Int'l. Fishing and Related Activities

§ 300.5

§ 300.5 Facilitation of enforcement.

(a) *Compliance.* The operator of, or any other person aboard, any fishing vessel subject to this part must immediately comply with instructions and signals issued by an authorized officer or CCAMLR inspector to stop the vessel, and with instructions to facilitate safe boarding and inspection of the vessel, its gear, equipment, fishing record (where applicable), and catch for purposes of enforcing this part.

(b) *Communications.* (1) Upon being approached by a USCG vessel or aircraft, or other vessel or aircraft with an authorized officer or CCAMLR inspector aboard, the operator of a fishing vessel must be alert for communications conveying enforcement instructions.

(2) VHF-FM radiotelephone is the preferred method of communicating between vessels. If the size of the vessel and the wind, sea, and visibility conditions allow, a loudhailer may be used instead of the radio. Hand signals, placards, high frequency radiotelephone, voice, flags, whistle or horn may be employed by an authorized officer or CCAMLR inspector, and message blocks may be dropped from an aircraft.

(3) If other communications are not practicable, visual signals may be transmitted by flashing light directed at the vessel signaled. USCG units will normally use the flashing light signal "L" which, in the International Code of Signals, means "you should stop your vessel instantly."

(4) Failure of a vessel's operator promptly to stop the vessel when directed to do so by an authorized officer or CCAMLR inspector, or by an enforcement vessel or aircraft, using loudhailer, radiotelephone, flashing light, flags, whistle, horn or other means constitutes prima facie evidence of the offense of refusal to allow an authorized officer or CCAMLR inspector to board.

(5) A person aboard a vessel who does not understand a signal from an enforcement unit and who is unable to obtain clarification by loudhailer or radiotelephone must consider the signal to be a command to stop the vessel immediately.

(c) *Boarding.* The operator of a vessel directed to stop must:

(1) Monitor Channel 16, VHF-FM, if so equipped.

(2) Stop immediately and lay to or, if appropriate and/or directed to do so by the authorized officer or CCAMLR inspector, maneuver in such a way as to allow the safe boarding of the vessel by the authorized officer or CCAMLR inspector and the boarding party.

(3) Except for those vessels with a freeboard of 4 ft (1.25 m) or less, provide a safe ladder, if needed, for the authorized officer or CCAMLR inspector and boarding party to come aboard.

(4) When necessary to facilitate the boarding or when requested by an authorized officer or CCAMLR inspector, provide a manrope or safety line, and illumination for the ladder.

(5) Take such other actions as necessary to facilitate boarding and to ensure the safety of the authorized officer or CCAMLR inspector and the boarding party.

(d) *Signals.* The following signals, extracted from the International Code of Signals, may be sent by flashing light by an enforcement unit when conditions do not allow communications by loudhailer or radiotelephone. Knowledge of these signals by vessel operators is not required. However, knowledge of these signals and appropriate action by a vessel operator may preclude the necessity of sending the signal "L" and the necessity for the vessel to stop instantly.

(1) "AA" repeated (-. -.) is the call to an unknown station. The operator of the signaled vessel should respond by identifying the vessel by radiotelephone or by illuminating the vessel's identification.

(2) "RY-CY" (-. -. -.- -.-) means "you should proceed at slow speed, a boat is coming to you." This signal is normally employed when conditions allow an enforcement boarding without the necessity of the vessel being boarded coming to a complete stop, or, in some cases, without retrieval of fishing gear that may be in the water.

(3) "SQ3" (... --.- ...-) means "you should stop or heave to; I am going to board you."

Subpart B—High Seas Fisheries

AUTHORITY: 16 U.S.C. 5501 *et seq.*

§ 300.10 Purpose.

This subpart implements the High Seas Fishing Compliance Act of 1995 (Act), which requires the Secretary to license U.S. vessels fishing on the high seas.

§ 300.11 Definitions.

In addition to the terms defined in section 300.2 and those in the Act and the Agreement to Promote Compliance with International Conservation and Management Measures by Fishing Vessels on the High Seas, adopted by the Conference of the Food and Agriculture Organization of the United Nations on November 24, 1993 (Agreement), the terms used in this subpart have the following meanings. If a term is defined differently in §300.2, the Act, or the Agreement, the definition in this section shall apply.

High seas means the waters beyond the territorial sea or exclusive economic zone (or the equivalent) of any Nation, to the extent that such territorial sea or exclusive economic zone (or the equivalent) is recognized by the United States.

High seas fishing vessel means any vessel of the United States used or intended for use on the high seas for the purpose of the commercial exploitation of living marine resources as a harvesting vessel, mothership, or any other support vessel directly engaged in a fishing operation.

International conservation and management measures means measures to conserve or manage one or more species of living marine resources that are adopted and applied in accordance with the relevant rules of international law, as reflected in the 1982 United Nations Convention on the Law of the Sea, and that are recognized by the United States.

Regional Administrator means any one of the Directors of the five NMFS regional offices, defined under §300.2, serving as the issuing office.

§ 300.12 Issuing offices.

Any Regional Administrator may issue permits required under this subpart. While applicants for permits may submit an application to any Regional Administrator, applicants are encouraged to submit their applications (with envelopes marked “Attn: HSFCA Permits”) to the Regional Administrator with whom they normally interact on fisheries matters.

§ 300.13 Vessel permits.

(a) *Eligibility.* (1) Any high seas fishing vessel of the United States is eligible to receive a permit under this subpart, unless the vessel was previously authorized to be used for fishing on the high seas by a foreign nation, and—

(i) The foreign nation suspended such authorization, because the vessel undermined the effectiveness of international conservation and management measures, and the suspension has not expired; or

(ii) The foreign nation, within the 3 years preceding application for a permit under this section, withdrew such authorization, because the vessel undermined the effectiveness of international conservation and management measures.

(2) The restrictions in paragraphs (a)(1) (i) and (ii) of this section do not apply if ownership of the vessel has changed since the vessel undermined the effectiveness of international conservation and management measures, and the new owner has provided sufficient evidence to the Regional Administrator demonstrating that the owner and operator at the time the vessel undermined the effectiveness of such measures has no further legal, beneficial, or financial interest in, or control of, the vessel.

(3) The restrictions in paragraphs (a)(1) (i) and (ii) of this section do not apply if it is determined by the Regional Administrator that issuing a permit would not subvert the purposes of the Agreement.

(b) *Application forms.* The owner or operator of a high seas fishing vessel may apply for a permit under this subpart by completing an application form. Applicants may obtain an application form from a Regional Administrator.

Int'l. Fishing and Related Activities

§ 300.14

(c) *Application information.* An applicant must submit a complete and accurate permit application, signed by the owner or operator, to the appropriate Regional Administrator.

(d) *Fees.* NMFS will charge a fee to recover the administrative expenses of permit issuance. The amount of the fee will be determined in accordance with the procedures of the NOAA Finance Handbook, available from a Regional Administrator, for determining administrative costs of each special product or service. The fee is specified with the application form. The appropriate fee must accompany each application. Failure to pay the fee will preclude issuance of the permit. Payment by a commercial instrument later determined to be insufficiently funded will invalidate any permit.

(e) *Issuance.* (1) Except as provided in subpart D of 15 CFR part 904, the Regional Administrator will issue a permit, which will include appropriate conditions or restrictions, within 30 days of receipt of a completed application and payment of the appropriate fee.

(2) The Regional Administrator will notify the applicant of any deficiency in the application.

(f) *Validity.* Permits issued under this subpart are valid for 5 years from the date of issuance. Renewal of a permit prior to its expiration is the responsibility of the permit holder. For a permit to remain valid to its expiration date, the vessel's USCG documentation or state registration must be kept current. A permit issued under this subpart is void when the name of the owner or vessel changes, or in the event the vessel is no longer eligible for U.S. documentation, such documentation is revoked or denied, or the vessel is removed from such documentation.

(g) *Change in application information.* Any changes in vessel documentation status or other permit application information must be reported to the Regional Administrator in writing within 15 days of such changes.

(h) *Transfer.* A permit issued under this subpart is not transferable or assignable to another vessel or owner; it is valid only for the vessel and owner to which it is issued.

(i) *Display.* A valid permit, or a copy thereof, issued under this subpart must be on board the vessel while operating on the high seas and available for inspection by an authorized officer. Faxed copies of permits are acceptable.

[61 FR 35550, July 5, 1996, as amended at 64 FR 15, Jan. 4, 1999]

§ 300.14 Vessel identification.

(a) *General.* A vessel permitted under this subpart must be marked for identification purposes in accordance with this section.

(b) *Marking.* Vessels must be marked either:

(1) In accordance with vessel identification requirements specified in Federal fishery regulations issued under the Magnuson-Stevens Act or under other Federal fishery management statutes; or

(2) In accordance with the following identification requirements:

(i) A vessel must be marked with its IRCS, or, if not assigned an IRCS, must be marked (in order of priority) with its Federal, state, or other documentation number appearing on its high seas fishing permit;

(ii) The markings must be displayed at all times on the vessel's side or superstructure, port and starboard, as well as on a deck;

(iii) The markings must be placed so that they do not extend below the waterline, are not obscured by fishing gear, whether stowed or in use, and are clear of flow from scuppers or overboard discharges that might damage or discolor the markings;

(iv) Block lettering and numbering must be used;

(v) The height of the letters and numbers must be in proportion to the size of the vessel as follows: for vessels 25 meters (m) and over in length, the height of letters and numbers must be no less than 1.0 m; for vessels 20 m but less than 25 m in length, the height of letters and numbers must be no less than 0.8 m; for vessels 15 m but less than 20 m in length, the height of letters and numbers must be no less than 0.6 m; for vessels 12 m but less than 15 m in length, the height of letters and numbers must be no less than 0.4 m; for vessels 5 m but less than 12 m in

§ 300.15

length, the height of letters and numbers must be no less than 0.3 m; and for vessels under 5 m in length, the height of letters and numbers must be no less than 0.1 m;

(vi) The height of the letters and numbers to be placed on decks must be no less than 0.3 m;

(vii) The length of the hyphen(s), if any, must be half the height (h) of the letters and numbers;

(viii) The width of the stroke for all letters, numbers, and hyphens must be h/6;

(ix) The space between letters and/or numbers must not exceed h/4 nor be less than h/6;

(x) The space between adjacent letters having sloping sides must not exceed h/8 nor be less than h/10;

(xi) The marks must be white on a black background, or black on a white background;

(xii) The background must extend to provide a border around the mark of no less than h/6; and

(xiii) The marks and the background must be maintained in good condition at all times.

AUTHORITY: 16 U.S.C. 951–961 *et seq.*

§ 300.20 Purpose and scope.

The regulations in this subpart are issued under the authority of the Tuna Conventions Act of 1950 (Act). The regulations implement recommendations of the Inter-American Tropical Tuna Commission (IATTC) for the conservation and management of highly migratory fish resources in the Eastern Tropical Pacific Ocean so far as they affect vessels and persons subject to the jurisdiction of the United States.

§ 300.21 Definitions.

In addition to the terms defined in § 300.2, in the Act, and in the Convention for the Establishment of an Inter-American Tropical Tuna Commission (Convention), the terms used in this subpart have the following meanings. If a term is defined differently in § 300.2, in the Act, or in the Convention, the definition in this section shall apply.

Bigeye tuna means the species *Thunnus obesus*.

Commission's Yellowfin Regulatory Area (CYRA) means the waters bounded by a line extending westward from the mainland of North America along the 40° N. latitude parallel, and connecting the following coordinates:

40° N. lat., 125° W. long.;

20° N. lat., 125° W. long.;

20° N. lat., 120° W. long.;

5° N. lat., 120° W. long.;

§ 300.22 Yellowfin tuna—record-keeping and written reports.

(a) The master or other person in charge of a fishing vessel, or a person authorized in writing to serve as the agent for either person, must keep an accurate log of all operations conducted from the fishing vessel, entering for each day the date, noon position (stated in latitude and longitude or in relation to known physical features), and the tonnage of fish on board, by species. The record and bridge log maintained at the request of the IATTC shall be sufficient to comply with this paragraph, provided the items of information specified are accurately entered in the log.

(b) *Vessel register*. Except as provided under paragraph (b)(1) of this section, vessels must be listed on the Vessel Register and categorized as active under paragraph (b)(4)(i) of this section in order to purse seine for tuna in the Convention Area.

(1) *Exceptions*. The following classes of vessels are exempted from being listed on the Vessel Register to purse seine for tuna in the Convention Area:

(i) Vessels licensed under the South Pacific Tuna Treaty that exercise an option to fish in the Convention Area for a single trip each year, provided that the total number of optional trips does not exceed 32 in a given calendar year. Each optional trip in the Convention Area may not exceed 90 days in duration.

(ii) Vessels of 400 st (362.8 mt) or less carrying capacity for which landings of tuna caught in the Convention Area

50 CFR Ch. III (10–1–05 Edition)

comprise 50 percent or less of the vessel's total landings, by weight, for a given calendar year.

(2) *Requirements for inclusion on the vessel register*. The Vessel Register shall include, consistent with resolutions of the IATTC, only vessels that fished in the Convention Area prior to the creation of the Vessel Register on June 28, 2002. New vessels may be added to the Vessel Register at any time to replace those previously removed by the Regional Administrator, provided that the total capacity of the replacement vessel or vessels does not exceed that of the vessel or vessels being replaced.

(3) *Vessel information*. The owner of any fishing vessel that uses purse seine, longline, drift gillnet, harpoon, or troll fishing gear to harvest tuna in the Convention Area for sale or a person authorized in writing to serve as agent for the owner must provide such information about the vessel and its characteristics as requested by the Regional Administrator, to conform to IATTC actions relative to the Vessel Register. This information initially includes, but is not limited to, vessel name and registration number; a photograph of the vessel with the registration number showing and legible; vessel length, beam and moulded depth; gross tonnage and hold capacity in cubic meters and tonnage; engine horsepower; date and place where built; and type of fishing method or methods used.

(4) *Vessel register status*. For a vessel to be categorized as either "active" or "inactive" on the Vessel Register in the following calendar year, the vessel owner or managing owner must submit to the Regional Administrator under §216.24(b) of this title, the observer placement fee, vessel permit application, and permit application processing fee for the vessel.

(i) *Active status*. As early as August 1 of each year, vessel owners or managing owners may submit to the Regional Administrator, a vessel permit application and payment of the permit application fee and observer placement fee for each vessel in excess of 400 st (362.8 mt) carrying capacity qualified to be listed on the Vessel Register under paragraph (b)(2) of this section to have a vessel categorized as active

Int'l. Fishing and Related Activities

§ 300.22

for the following calendar year. Vessel permit applications may not be submitted via regular mail; they must be faxed to (562) 980-4027. Owners or managing owners of vessels of 400 st (362.8 mt) carrying capacity or less must only submit payment of the observer placement fee associated with active status in order to request a small purse seine vessel be categorized as active for the following calendar year. The Regional Administrator must receive the faxed vessel permit application and payment of the observer placement fee and permit application processing fee no later than September 15 for vessels for which a DML was requested for the following year and no later than November 30 for vessels for which a DML was not requested for the following year. Submission of the vessel permit application and payment of the observer placement fee and permit application processing fee will be interpreted by the Regional Administrator as a request for a vessel to be categorized as active. The following restrictions apply to active status:

(A) The cumulative carrying capacity of all vessels categorized as active on the Vessel Register may not exceed 8,969 mt in a given year;

(B) A vessel may not be added to active status on the Vessel Register unless the captain of the vessel has obtained a valid operator permit under § 216.24(b)(2) of this title;

(C) For 2005 only, requests for vessels will be prioritized on a first-come, first-served basis according to the date and time the fax is received in the office of the Regional Administrator;

(D) Requests for active status for 2006 and subsequent years will be prioritized according to the following hierarchy:

(1) Requests received for vessels that were categorized as active in the previous year, beginning with the vessel's status in 2005, unless the request for active status was determined to be frivolous by the Regional Administrator under paragraph (b)(4)(ii) of this section;

(2) Requests received for vessels that were categorized as inactive under paragraph (b)(4)(iii) of this section in the previous year, beginning with the vessel's status in 2005;

(3) Requests for vessels not described in paragraphs (b)(4)(D)(I) or (2) of this section will be prioritized on a first-come, first-served basis according to the date and time stamp printed by the incoming fax machine upon receipt, provided that the associated observer placement fee is paid by the applicable deadline described in § 216.24(b)(6)(iii) of this title; and

(4) Requests received from owners or managing owners of vessels that were determined, by the Regional Administrator, to have made a frivolous request for active status under paragraph (b)(4)(ii) of this section.

(i) *Frivolous requests for active status.* Beginning with requests made for 2005, a request for active status under paragraph (b)(4)(i) of this section will be considered frivolous, unless as a result of force majeure or other extraordinary circumstances as determined by the Regional Administrator if, for a vessel categorized as active in a given calendar year, less than 20 percent of the vessel's total landings, by weight, in that same year is comprised of tuna harvested by purse seine in the Convention Area.

(iii) *Inactive status.* From August 1 through November 30 of each year, vessel owners or managing owners may request that vessels qualified to be listed on the Vessel Register under paragraph (b)(2) of this section be categorized as inactive for the following calendar year by submitting to the Regional Administrator payment of the associated observer placement fees. At any time during the year, a vessel owner or managing owner may request that a vessel qualified to be listed on the Vessel Register under paragraph (b)(2) of this section be categorized as inactive for the remainder of the calendar year by submitting to the Regional Administrator payment of the associated observer placement fee plus a 10 percent surcharge of the fee. Payment of the observer placement fee consistent with inactive status will be interpreted by the Regional Administrator as a request for the vessel to be categorized as inactive.

(5) *Removal from the vessel register.* A vessel may be removed from the Vessel Register by the Regional Administrator;

§ 300.23

50 CFR Ch. III (10–1–05 Edition)

- (i) If the vessel has sunk;
- (ii) Upon written request by the vessel's owner or managing owner;
- (iii) Following a final agency action on a permit sanction for a violation;
- (iv) For failure to pay a penalty or for default on a penalty payment agreement resulting from a final agency action for a violation; or
- (v) If the U.S. Maritime Administration or the U.S. Coast Guard notifies NMFS that:

(A) The owner has submitted an application for transfer of the vessel to foreign registry and flag; or

(B) The documentation for the vessel will be or has been deleted for any reason.

(6) *Process for Removal from the Vessel Register.* When a vessel is removed from the Vessel Register under paragraph (b)(5) of this section, the Regional Administrator shall promptly notify the vessel owner in writing of the removal and the reasons therefor. For a removal from the Vessel Register under §300.22(b)(5)(iii), the Regional Administrator will not accept a request to reinstate the vessel to the Vessel Register for the term of the permit sanction. For a removal from the Vessel Register under §300.22(b)(5)(iv), the Regional Administrator will not accept a request to reinstate the vessel to the Vessel Register until such time as payment is made on the penalty or penalty agreement, or such other duration as NOAA and the vessel owner may agree upon.

(7) *Procedures for replacing vessels removed from the Vessel Register.* (i) A vessel previously listed on the Vessel Register, but not included for a given year or years, may be added back to the Vessel Register and categorized as inactive at any time during the year, provided the owner of the vessel pays the observer placement fee associated with inactive status plus a 10 percent surcharge of the fee.

(ii) A vessel may be added to the Vessel Register and categorized as active in order to replace a vessel removed from active status under paragraph (b)(5) of this section, provided the total carrying capacity of active vessels does not exceed 8,969 mt and the owner submits a complete request under paragraph (b)(7)(iv) or (v) of this section.

(iii) After a vessel categorized as active is removed from the Vessel Register, the Regional Administrator will notify owners or managing owners of vessels categorized as inactive that replacement capacity is available on the active list of the Vessel Register. In the event that owners of inactive vessels do not request to replace a removed vessel, the Regional Administrator will notify owners of vessels eligible for, but not included on, the Vessel Register that replacement capacity is available on the active list of the Vessel Register.

(iv) The owner or managing owner of a purse seine vessel of 400 st (362.8 mt) carrying capacity or less may request a vessel be categorized as active to replace a vessel removed from the Vessel Register by submitting payment of the observer placement fee to the Regional Administrator.

(v) The owner or managing owner of a purse seine vessel in excess of 400 st (362.8 mt) carrying capacity may request a vessel be categorized as active to replace a vessel removed from the Vessel Register by submitting to the Regional Administrator under §216.24(b) of this title, the observer placement fee, vessel permit application, and permit application processing fee for the replacement vessel. The replacement vessel will be eligible to be categorized as active on the Vessel Register if it has a carrying capacity equal to or less than the vessel being replaced, and the captain of the replacement vessel possesses an operator permit under §216.24(b) of this title.

(vi) The Regional Administrator will forward requests to replace vessels removed from the Vessel Register within 15 days of receiving each request.

§ 300.25 Eastern Pacific fisheries management.

(a) *Notification of IATTC recommendations.* The Regional Administrator will directly notify owners or agents of U.S. tuna vessels of any fishery management recommendations made by the IATTC and approved by the Department of State that will affect fishing or other activities by U.S. parties with fishery interests in the Convention Area. As soon as practicable after such notification, the Regional Administrator will announce approved IATTC

(b) *Tuna quotas.* (1) Fishing seasons for all tuna species begin on January 1 and end either on December 31 or when NMFS closes the fishery for a specific species.

(2) The Regional Administrator may close the U.S. fishery for yellowfin, bigeye, or skipjack tuna or any other tuna species in the Convention Area or portion of the Convention Area when advised by the Director of Investigations of the IATTC that the associated quota has been or is projected to be reached. Any such closure may include:

(i) An allowance for an incidental catch that may be landed while fishing for other tuna species;

(ii) A prohibition on the further setting of specified gear types on floating objects by U.S. vessels in the Convention Area;

(4) As soon as practicable after being advised of the quota attainment or projection under paragraph (b)(2) of this section, the Regional Administrator will publish an announcement of the closure in the FEDERAL REGISTER.

(c) *Use of tender vessels.* No person subject to these regulations may use a tender vessel in the Convention Area.

(d) *Transshipments at sea.* No person subject to these regulations may transship purse seine-caught tuna from one vessel to another vessel at sea within the Convention Area.

§ 300.30

50 CFR Ch. III (10–1–05 Edition)

human consumption for other than reason of size. This requirement shall not apply to the last set of a trip if the available well capacity is insufficient to accommodate the entire fish catch brought on board.

(2) All purse seine vessels must release all sharks, billfishes, rays, mahimahi (*dorado*), and other non-tuna fish species, except those being retained for consumption aboard the vessel, as soon as practicable after being identified on board the vessel during the brailing operation.

(3) All purse seine vessels must apply special sea turtle handling and release procedures, as follows:

(i) Whenever a sea turtle is sighted in the net, a speedboat shall be stationed close to the point where the net is lifted out of the water to assist in release of the turtle;

(ii) If a turtle is entangled in the net, net roll shall stop as soon as the turtle comes out of the water and shall not resume until the turtle has been disentangled and released;

(iii) If, in spite of the measures taken under paragraphs (e)(3)(i) and (ii) of this section, a turtle is accidentally brought onboard the vessel alive and active, the vessel's engine shall be disengaged and the turtle shall be released as quickly as practicable;

(iv) If a turtle brought on board under paragraph (e)(3)(iii) of this section is alive but comatose or inactive, the resuscitation procedures described in § 223.206(d)(1)(i)(B) of this title shall be used before release of the turtle.

§ 300.62 Annual management measures.

Annual management measures may be added and modified through adoption by the Commission and publication in the FEDERAL REGISTER by the Assistant Administrator, with immediate regulatory effect. Such measures may include, *inter alia*, provisions governing: Licensing of vessels, inseason actions, regulatory areas, fishing periods, closed periods, closed areas, catch limits (quotas), fishing period limits, size limits, careful release of halibut, vessel clearances, logs, receipt and possession of halibut, fishing gear, retention of tagged halibut, supervision of unloading and weighing, and sport fishing for halibut. The Assistant Administrator will publish the Commission's regulations setting forth annual management measures in the FEDERAL REGISTER by March 15 each year. Annual management measures may be adjusted inseason by the Commission.

§ 300.63 Catch sharing plan and domestic management measures in Area 2A.

(a) A catch sharing plan (CSP) may be developed by the Pacific Fishery Management Council and approved by NMFS for portions of the fishery. Any approved CSP may be obtained from

Int'l. Fishing and Related Activities

§ 300.64

the Administrator, Northwest Region, NMFS.

(b)(1) Each year, before January 1, NMFS will publish a proposal to govern the recreational fishery under the CSP for the following year and will seek public comment. The comment period will extend until after the Commission's annual meeting, so the public will have the opportunity to consider the final area 2A total allowable catch (TAC) before submitting comments. After the Commission's annual meeting and review of public comments, NMFS will publish in the FEDERAL REGISTER the final rule governing sport fishing in area 2A. Annual management measures may be adjusted inseason by NMFS.

(2) A portion of the commercial TAC is allocated as incidental catch in the salmon troll fishery in Area 2A. Each year the landing restrictions necessary to keep the fishery within its allocation will be recommended by the Pacific Fishery Management Council at its spring meetings, and will be published in the FEDERAL REGISTER along with the annual salmon management measures.

(3) A portion of the Area 2A Washington recreational TAC is allocated as incidental catch in the primary directed longline sablefish fishery north of 46°53'18" N. lat. (Pt. Chehalis, WA), which is regulated under 50 CFR 660.323(a)(2). This fishing opportunity is only available in years in which the Area 2A TAC is greater than 900,000 lb (408.2 mt.) provided that a minimum of 10,000 lb (4.5 mt) is available above a Washington recreational TAC of 214,100 lb (97.1 mt). Each year that this harvest is available, the landing restrictions necessary to keep this fishery within its allocation will be recommended by the Pacific Fishery Management Council at its spring meetings, and will be published in the FEDERAL REGISTER. These restrictions will be designed to ensure the halibut harvest is incidental to the sablefish harvest and will be based on the amounts of halibut and sablefish available to this fishery, and other pertinent factors. The restrictions may include catch or landing ratios, landing limits, or other means to control the rate of halibut landings.

(i) In years when this incidental harvest of halibut in the directed sablefish fishery north of 46°53'18" N. lat. is allowed, it is allowed only for vessels using longline gear that are registered to groundfish limited entry permits with sablefish endorsements and that possess the appropriate incidental halibut harvest license issued by the Commission.

(ii) It is unlawful for any person to possess, land or purchase halibut south of 46°53'18" N. lat. that were taken and retained as incidental catch authorized by this section in the directed longline sablefish fishery.

(4) The commercial longline fishery in area 2A is governed by the annual management measures published pursuant to §§ 300.62 and 300.63.

(5) The treaty Indian fishery is governed by § 300.64 and tribal regulations. The annual quota for the fishery will be announced with the Commission regulations under § 300.62

[61 FR 35550, July 5, 1996, as amended at 63 FR 13009, Mar. 17, 1998; 63 FR 24752, May 5, 1998; 64 FR 52469, Sept. 29, 1999; 65 FR 67308, Nov. 9, 2000; 65 FR 8373, Jan. 31, 2001; 66 FR 36208, July 11, 2001; 66 FR 42156, Aug. 10, 2001; 68 FR 11003, Mar. 7, 2003; 68 FR 18156, Apr. 15, 2003; 69 FR 24532, May 4, 2004; 70 FR 16751, Apr. 1, 2005]

Specially Validated Dissostichus Catch Document (SVD CD) means a *Dissostichus* catch document that has been specially issued by a State to accompany seized or confiscated catch of *Dissostichus* spp. offered for sale or otherwise disposed of by the State.

Transship means the transfer of fish or fish products from one vessel to another.

Vessel Monitoring System (VMS) means a system that allows a Flag State, through the installation of satellite-tracking devices on board its fishing vessels to receive automatic transmission of certain information.

§ 300.102 Relationship to other treaties, conventions, laws, and regulations.

(a) Other conventions and treaties to which the United States is a party and other Federal statutes and implementing regulations may impose additional restrictions on the harvesting and importation into the United States of AMLRs.

(b) The ACA implements the Antarctic Treaty Agreed Measures for the Conservation of Antarctic Fauna and Flora (12 U.S.T. 794). The ACA and its implementing regulations (45 CFR part 670) apply to certain defined activities of U.S. citizens south of 60° S. lat.

(c) The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 *et seq.*), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Migratory Bird Treaty Act (16 U.S.C. 701 *et seq.*), and their implementing regulations also apply to the harvesting and importation of AMLRs.

§ 300.103 Procedure for according protection to CCAMLR Ecosystem Monitoring Program Sites.

(a) *General.* (1) Any person subject to the jurisdiction of the United States

must apply for and be granted an entry permit authorizing specific activities prior to entering a CCAMLR Ecosystem Monitoring Program (CEMP) Protected Site designated in accordance with the CCAMLR Conservation Measure describing the Procedures for According Protection for CEMP Sites.

(2) If a CEMP Protected Site is also a site specially protected under the Antarctic Treaty (or the Protocol on Environmental Protection to the Antarctic Treaty and its Annexes, when it enters into force), an applicant seeking to enter such a Protected Site must apply to the Director of the NSF for a permit under applicable provisions of the ACA or any superseding legislation. The permit granted by NSF shall constitute a joint CEMP/ACA Protected Site permit and any person holding such a permit must comply with the appropriate CEMP Protected Site Management Plan. In all other cases, an applicant seeking a permit to enter a CEMP Protected Site must apply to the Assistant Administrator for a CEMP permit in accordance with the provisions of this section.

(b) *Responsibility of CEMP permit holders and persons designated as agents under a CEMP permit.* (1) The CEMP permit holder and person designated as agents under a CEMP permit are jointly and severally responsible for compliance with the Act, this subpart, and any permit issued under this subpart.

(2) The CEMP permit holder and agents designated under a CEMP permit are responsible for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or forbidden by the CEMP permit holder or agents, and regardless of knowledge concerning their occurrence.

(c) *Prohibitions regarding the Antarctic Treaty System and other applicable treaties and statutes.* Holders of permits to enter CEMP Protected Sites are not permitted to undertake any activities within a CEMP Protected Site that are not in compliance with the provisions of:

(1) The Antarctic Treaty, including the Agreed Measures for the Conservation of Antarctic Fauna and Flora (including the Protocol on the Environmental Protection to the Antarctic

Treaty and its Annexes when it enters into force), as implemented under by the ACA and any superseding legislation. (Persons interested in conducting activities subject to the Antarctic Treaty or the Protocol should contact the Office of Polar Programs, NSF).

(2) The Convention for the Conservation of Antarctic Seals.

(3) The Convention and its Conservation Measures in force, implemented under the Act.

(d) *Prohibitions on takings.* Permits issued under this section do not authorize any takings as defined in the applicable statutes and implementing regulations governing the activities of persons in Antarctica.

(e) *Issuance criteria.* Permits designated in this section may be issued by the Assistant Administrator upon a determination that:

(1) The specific activities meet the requirements of the Act.

(2) There is sufficient reason, established in the permit application, that the scientific purpose for the intended entry cannot be served elsewhere.

(3) The actions permitted will not violate any provisions or prohibitions of the Protected Site's Management Plan submitted in compliance with the CCAMLR Conservation Measure describing the Procedures for According Protection to CEMP Sites.

(f) *Application process.* An applicant seeking a CEMP permit from the Assistant Administrator to enter a CEMP Protected Site shall include the following in the application.

(1) A detailed justification that the scientific objectives of the applicant cannot be accomplished elsewhere and a description of how said objectives will be accomplished within the terms of the Protected Site's Management Plan.

(2) A statement signed by the applicant that the applicant has read and fully understands the provisions and prohibitions of the Protected Site's Management Plan. Prospective applicants may obtain copies of the relevant Management Plans and the CCAMLR Conservation Measure describing the Procedures for According Protection to CEMP Sites by requesting them from the Assistant Administrator.

Int'l. Fishing and Related Activities

§ 300.103

(g) *Conditions.* CEMP permits issued under this section will contain special and general conditions including a condition that the permit holder shall submit a report describing the activities conducted under the permit within 30 days of the expiration of the CEMP permit.

(h) *Duration.* Permits issued under this section are valid for a period of up to five years. Applicants requesting a permit to reenter a Protected Site must include the most recent report required by the general condition in the previously issued CEMP permit describing the activities conducted under authority of that permit.

(i) *Transfer.* CEMP permits are not transferable or assignable. A CEMP permit is valid only for the person to whom it is issued.

(j) *Modification.* (1) CEMP permits can be modified by submitting a request to the Assistant Administrator. Such requests shall specify:

(i) The action proposed to be taken along with a summary of the reasons therefore.

(ii) The steps that the permit holder may take to demonstrate or achieve compliance with all lawful requirements.

(2) If a requested modification is not in compliance with the terms of the Protected Site's Management Plan, the Assistant Administrator will treat the requested modification as an application for a new CEMP permit and so notify the holder. Modifications will be acted upon within 30 days of receipt. The CEMP permit holder must report to the Assistant Administrator any change in previously submitted information within 10 days of the change.

(3) Additional conditions and restrictions. The Assistant Administrator may revise the CEMP permit effective upon notification of the permit holder, to impose additional conditions and restrictions as necessary to achieve the purposes of the Convention, the Act and the CEMP Management Plan. The CEMP permit holder must, as soon as possible, notify any and all agents operating under the permit of any and all revisions or modifications to the permit.

(k) *Revocation or suspension.* CEMP permits may be revoked or suspended

based upon information received by the Assistant Administrator and such revocation or suspension shall be effective upon notification to the permit holder.

(1) A CEMP permit may be revoked or suspended based on a violation of the permit, the Act, or this subpart.

(2) Failure to report a change in the information submitted in a CEMP permit application within 10 days of the change is a violation of this subpart and voids the application or permit, as applicable. Title 15 CFR part 904 governs permit sanctions under this subpart.

(1) *Exceptions.* Entry into a Protected Site described in this section is lawful if committed under emergency conditions to prevent the loss of human life, compromise human safety, prevent the loss of vessels or aircraft, or to prevent environmental damage.

(m) *Protected sites.* (1) Sites protected by the Antarctic Treaty and regulated under the ACA are listed at 45 CFR part 670 subparts G and H.

(2) The following sites have been identified as CEMP Protected Sites subject to the regulatory authority of the Act:

(i) *Seal Islands, South Shetland Islands*—The Seal Islands are composed of islands and skerries located approximately 7 km north of the northwest corner of Elephant Island, South Shetland Islands. The Seal Islands CEMP Protected Site includes the entire Seal Islands group, which is defined as Seal Island plus any land or rocks exposed at mean low tide within a distance of 5.5 km of the point of highest elevation on Seal Island. Seal Island is situated at 60°59'14" S. lat., 55°23'04" W. long.

(ii) *Cape Shirreff and the San Telmo Islands.* This designation takes effect on May 1, 1995. Cape Shirreff is a low, ice-free peninsula towards the western end of the north coast of Livingston Island, South Shetland Islands, situated at 62°29' S. lat., 60°47' W. long., between Barclay Bay and Hero Bay. San Telmo Island is the largest of a small group of ice-free rock islets, approximately 2 km west of Cape Shirreff. The boundaries of the Cape Shirreff CEMP Protected Site are identical to the boundaries of the Site of Special Scientific Interest No. 32, as specified by ATCM Recommendation XV-7. No manmade

§ 300.104

boundary markers indicate the limits of the SSSI or protected site. The boundaries are defined by natural features and include the entire area of the Cape Shirreff peninsula north of the glacier ice tongue margin, and most of the San Telmo Island group. For the purposes of the protected site, the entire area of Cape Shirreff and the San Telmo Island group is defined as any land or rocks exposed at mean low tide within the area delimited by the map of SSSI No. 32 and available from the Assistant Administrator.

(c) Each vessel participating in an exploratory fishery must carry a scientific observer.

(d) The operator of any vessel engaging in an exploratory fishery must submit, by the date specified in the operator's harvesting permit, catch, effort, and related biological, ecological, and environmental data as required by a data collection plan for the fishery formulated by the CCAMLR Scientific Committee.

(e) In addition to the requirements in § 300.112, any individual planning to enter an exploratory fishery must notify the Assistant Administrator no later than 4 months in advance of the annual meeting of CCAMLR. The Assistant Administrator will not issue a permit to enter an exploratory fishery until after the requirements of § 300.112 have been met and the meeting of

CCAMLR, which receives and considers the notice made to the Assistant Administrator, has been concluded.

§ 300.107 Reporting and recordkeeping requirements.

[65 FR 30016, May 10, 2000, as amended at 68 FR 23228, May 1, 2003]

§ 300.108 Vessel and gear identification.

(a) *Vessel identification.* (1) The operator of each harvesting vessel assigned an IRCS must display that call sign amidships on both the port and starboard sides of the deckhouse or hull, so that it is visible from an enforcement or inspection vessel, and on an appropriate weather deck so that it is visible from the air.

(2) The operator of each harvesting vessel not assigned an IRCS, such as a small trawler associated with a mothership or one of a pair of trawlers, must display the IRCS of the associated vessel, followed by a numerical suffix specific for the non-assigned vessel.

(3) The vessel identification must be in a color in contrast to the background and must be permanently affixed to the harvesting vessel in block roman alphabet letters and arabic numerals at least 1 m in height for harvesting vessels over 20 m in length, and at least 0.5 m in height for all other harvesting vessels.

(b) *Navigational lights and shapes.* Each harvesting vessel must display the lights and shapes prescribed by the International Regulations for Preventing Collisions at Sea, 1972 (TIAS 8587, and 1981 amendment TIAS 10672), for the activity in which the harvesting vessel is engaged (as described at 33 CFR part 81).

(c) *Gear identification.* (1) The operator of each harvesting vessel must ensure that all deployed fishing gear that is not physically and continuously at-

tached to a harvesting vessel is clearly marked at the surface with a buoy displaying the vessel identification of the harvesting vessel (see paragraph (a) of this section) to which the gear belongs, a light visible for 2 miles at night in good visibility, and a radio buoy. Trawl codends passed from one vessel to another are considered continuously attached gear and do not have to be marked.

(2) The operator of each harvesting vessel must ensure that deployed longlines, strings of traps or pots, and gillnets are marked at the surface at each terminal end with a buoy displaying the vessel identification of the harvesting vessel to which the gear belongs (see paragraph (a) of this section), a light visible for 2 miles at night in good visibility, and a radio buoy.

(3) Unmarked or incorrectly identified fishing gear may be considered abandoned and may be disposed of in accordance with applicable Federal regulations by any authorized officer or CCAMLR inspector.

(d) *Maintenance.* The operator of each harvesting vessel must:

(1) Keep the vessel and gear identification clearly legible and in good repair.

(2) Ensure that nothing on the harvesting vessel obstructs the view of the markings from an enforcement or inspection vessel or aircraft.

(3) Ensure that the proper navigational lights and shapes are displayed for the harvesting vessel's activity and are properly functioning.

§ 300.109 Gear disposal.

(a) The operator of a harvesting vessel may not dump overboard, jettison or otherwise discard any article or substance that may interfere with other fishing vessels or gear, or that may catch fish or cause damage to any marine resource, including marine mammals and birds, except in cases of emergency involving the safety of the ship or crew, or as specifically authorized by communication from the appropriate USCG commander or authorized officer. These articles and substances include, but are not limited to, fishing gear, net scraps, bale straps, plastic bags, oil drums, petroleum containers,

§ 300.110

50 CFR Ch. III (10–1–05 Edition)

oil, toxic chemicals or any manmade items retrieved in a harvesting vessel's gear.

(b) The operator of a harvesting vessel may not abandon fishing gear in Convention waters.

(c) The operator of a harvesting vessel must provide a copy of the CCAMLR information brochure "Marine Debris—A Potential Threat to Antarctic Marine Mammals" to each member of the crew of the harvesting vessel and must display copies of the CCAMLR placard "Avoidance of Incidental Mortality of Antarctic Marine Mammals" in the wheelhouse and crew quarters of the harvesting vessels. Copies of the brochure and placard will be provided to each holder of a harvesting permit by NMFS when issuing the permit.

§ 300.110 Mesh size.

(a) The use of pelagic and bottom trawls having the mesh size in any part of a trawl less than indicated is prohibited for any directed fishing for the following Antarctic finfishes:

(1) *Notothenia rossii* and *Dissostichus eleginoides*—120 mm.

(2) *Champscephalus gunnari*—90 mm.

(3) *Gobionotothen gibberifrons*, *Notothenia kempfi* and *Lepidorhirus squamifrons*—80 mm.

(b) Any means or device that would reduce the size or obstruct the opening of the meshes is prohibited.

(c) The following procedure will be used for determining compliance with mesh size requirements.

(1) *Description of gauges.* (i) Gauges for determining mesh sizes will be 2 mm thick, flat, of durable material and capable of retaining their shape. They may have either a series of parallel-edged sides connected by intermediate tapering edges with a taper of one to eight on each side, or only tapering edges with the taper defined above. They will have a hole at the narrowest extremity.

(ii) Each gauge will be inscribed on its face with the width in millimeters both on the parallel-sided section, if any, and on the tapering section. In the case of the latter, the width will be inscribed every 1 mm interval, but the indication of the width may appear at regular intervals other than 1 mm.

(2) *Use of the gauge.* (i) The net will be stretched in the direction of the long diagonal of the meshes.

(ii) A gauge as described in paragraph (c)(1) of this section will be inserted by its narrowest extremity into the mesh opening in a direction perpendicular to the plane of the net.

(iii) The gauge may be inserted into the mesh opening either with a manual force or using a weight or dynamometer, until it is stopped at the tapering edges by the resistance of the mesh.

(3) *Selection of meshes to be measured.*

(i) Meshes to be measured will form a series of 20 consecutive meshes chosen in the direction of the long axis of the net, except that the meshes to be measured need not be consecutive if the application of paragraph (c)(3)(ii) of this section prevents it.

(ii) Meshes less than 50 cm from lacings, ropes, or codline will not be measured. This distance will be measured perpendicular to the lacings, ropes or codline with the net stretched in the direction of that measurement. No mesh will be measured which has been mended or broken or has attachments to the net fixed at that mesh.

(iii) Nets will be measured only when wet and unfrozen.

(4) The measurement of each mesh will be the width of the gauge at the point where the gauge is stopped, when using this gauge in accordance with paragraph (c)(2) of this section.

(5) Determination of the mesh size of the net will be the arithmetical mean in millimeters of the measurements of the total number of meshes selected and measured as provided for in paragraphs (c) (3) and (4) of this section, the arithmetical mean being rounded up to the next millimeter.

(6) *Inspection procedure.* (i) One series of 20 meshes, selected in accordance with paragraph (c)(3) of this section, will be measured by inserting the gauge manually without using a weight or dynamometer. The mesh size of the net will then be determined in accordance with paragraph (c)(5) of this section. If the calculation of the mesh size shows that the mesh size does not appear to comply with the rules in force, then two additional series of 20 meshes selected in accordance with paragraph (c)(3) of this section will be measured.

Int'l. Fishing and Related Activities

§ 300.112

The mesh size will then be recalculated in accordance with paragraph (c)(5) of this section, taking into account the 60 meshes already measured; this recalculation will be the mesh size of the net.

(ii) If the captain of the vessel contests the mesh size determined in accordance with paragraph (c)(6)(i) of this section, such measurement will not be considered for the determination of the mesh size and the net will be remeasured.

(A) A weight or dynamometer attached to the gauge will be used for remeasurement. The choice of weight or dynamometer is at the discretion of the inspectors. The weight will be fixed to the hole in the narrowest extremity of the gauge using a hook. The dynamometer may either be fixed to the hole in the narrowest extremity of the gauge or be applied at the largest extremity of the gauge.

(B) The accuracy of the weight or dynamometer must be certified by the appropriate national authority.

(C) For nets of a mesh size of 35 mm or less as determined in accordance with paragraph (c)(6)(i) of this section, a force of 19.61 newtons (equivalent to a mass of 2 kg) will be applied, and for other nets, a force of 49.03 newtons (equivalent to a mass of 5 kg).

(D) For the purposes of determining the mesh size in accordance with paragraph (c)(5) of this section, when using a gauge or dynamometer, one series of 20 meshes only will be measured.

§ 300.111 Framework for annual management measures.

(a) *Introduction.* New management measures may be added and others modified through publication of a regulatory action in the FEDERAL REGISTER. The following framework process authorizes the implementation of measures that may affect the operation of the commercial or exploratory fisheries, gear, area restrictions, or changes in catch and/or effort.

(b) *Preliminary notice.* The Secretary of State shall publish preliminary notice in the FEDERAL REGISTER of the management measures adopted by the parties to the Convention.

(c) *Procedure.* At its annual meeting, usually in October or November, the

Commission may recommend new measures and that established measures be modified, removed, or re-instituted. After public notice of those recommendations by the Secretary of State and opportunity for public comment, and after considering the impact of instituting the measures and any public comment received by the Secretary of State, the Assistant Administrator may implement the management measures by notice in the FEDERAL REGISTER, with immediate force and effect. The notification in the FEDERAL REGISTER will summarize new management measures, and respond to any public comments received by the Secretary of State on the preliminary notice.

(d) *Types of management measures to be frameworked.* Management measures that may be implemented by regulatory notice rather than by codified regulation are those that generally will not remain in effect for more than 12 months and include catch restrictions, time and area closures, and gear restrictions.

(e) The fishing season for all Convention Area species is December 1 through November 30 of the following year, unless otherwise set in specific CCAMLR conservation measures.

[61 FR 35550, July 5, 1996, as amended at 68 FR 23228, May 1, 2003]

§ 300.112 Harvesting permits.

(a) *General.* (1) Every vessel subject to the jurisdiction of the United States that attempts to reduce or reduces any AMLR to possession must have a harvesting permit authorizing the attempt or reduction, unless the attempt or reduction occurs during recreational fishing or is covered by an individual permit. Boats launched from a vessel issued a harvesting permit do not require a separate permit, but are covered by the permit issued the launching vessel. Any enforcement action that results from the activities of a launched boat will be taken against the launching vessel.

(2) Permits issued under this section do not authorize vessels or persons subject to the jurisdiction of the United States to harass, capture, harm, kill, harvest, or import marine mammals. No marine mammals may be taken in

the course of commercial fishing operations unless the taking is allowed under the Marine Mammal Protection Act and/or the Endangered Species Act pursuant to an exemption or permit granted by the appropriate agency.

(b) *Responsibility of owners and operators.* (1) The owners and operators of each harvesting vessel are jointly and severally responsible for compliance with the Act, this subpart, and any permit issued under the Act and this subpart.

(2) The owners and operators of each such vessel are responsible for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or forbidden by the owners or operators, and regardless of knowledge concerning their occurrence.

(3) The owner of such vessel must report any sale, change in ownership, or other disposition of the vessel to the Assistant Administrator within 15 days of the occurrence.

(c) *Application.* Application forms for harvesting permits are available from the Assistant Administrator (Attn: CCAMLR permits). A separate fully completed and accurate application must be submitted for each vessel for which a harvesting permit is requested at least 90 days before the date anticipated for the beginning of harvesting.

(d) *Issuance.* The Assistant Administrator may issue a harvesting permit to a vessel if the Assistant Administrator determines that the harvesting described in the application will meet the requirements of the Act and will not:

(1) Decrease the size of any harvested population to levels below those that ensure its stable recruitment. For this purpose, the Convention recommends that its size not be allowed to fall below a level close to that which ensures the greatest net annual increment.

(2) Upset the ecological relationships between harvested, dependent, and related populations of AMLRs and the restoration of depleted populations to levels that will ensure stable recruitment.

(3) Cause changes or increase the risk of changes in the marine ecosystem that are not potentially reversible over

2 or 3 decades, taking into account the state of available knowledge of the direct and indirect impact of harvesting, the effect of the introduction of alien species, the effects of associated activities on the marine ecosystem and of the effects of environmental changes, with the aim of making possible the sustained conservation of AMLRs.

(4) Violate the management measures issued pursuant to §300.111 of this subpart.

(5) Violate any other conservation measures in force with respect to the United States under the Convention or the Act.

(e) *Duration.* A harvesting permit is valid from its date of issuance to its date of expiration unless it is revoked or suspended.

(f) *Transfer.* Permits are not transferable or assignable. A permit is valid only for the vessel to which it is issued.

(g) *Display.* Each harvesting vessel when engaged in harvesting must either have on board an up-to-date copy of its harvesting permit or a fully completed and up-to-date harvesting vessel certificate and the vessel operator must produce it for inspection upon the request of an authorized officer or CCAMLR inspector. In order for the certificate to be considered complete, the vessel owner or operator must enter on it the name and IRCS of the vessel issued the harvesting permit, the number of the harvesting permit and its date of issuance and expiration, the harvesting authorized by the permit, and all conditions and restrictions contained in the permit. Blank certificates are available from the Assistant Administrator.

(h) *Changes in information submitted by permit applicants or holders—(1) Changes in pending applications.* Applicants for a harvesting permit must report to the Assistant Administrator in writing any change in the information contained in the application. The processing period for the application will be extended as necessary to review the change.

(2) *Changes occurring after permit issuance—(1) Changes other than in the manner and amount of harvesting.* The owner or operator of a vessel that has been issued a harvesting permit must report to the Assistant Administrator

Int'l. Fishing and Related Activities

§ 300.113

in writing any change in previously submitted information other than a proposed change in the location, manner, or amount of harvesting within 15 days of the change. Based on such reported information, the Assistant Administrator may revise the permit effective upon notification to the permit holder. As soon as possible, the vessel owner or operator must revise any harvesting vessel certificate evidencing the permit, accordingly.

(ii) *Requested changes in the location, manner, or amount of harvesting.* Any changes in the manner or amount of harvesting must be proposed in writing to the Assistant Administrator and may not be undertaken unless authorized by the Assistant Administrator through a permit revision or issuance of a new permit. If a requested change in the location, manner, or amount of harvesting could significantly affect the status of any Antarctic marine living resource, the Assistant Administrator will treat the requested change as an application for a new permit and so notify the holder.

(i) *Additional conditions and restrictions.* The Assistant Administrator may revise the harvesting permit, effective upon notification to the permit holder, to impose additional conditions and restrictions on the harvesting vessel as necessary to achieve the purposes of the Convention or the Act. The permit holder must, as soon as possible, direct the vessel operator to revise the harvesting vessel certificate, if any, accordingly.

(j) *Revision, suspension, or revocation for violations.* A harvesting permit may be revised, suspended, or revoked if the harvesting vessel is involved in the commission of any violation of its permit, the Act, or this subpart. Failure to report a change in the information contained in an application within 15 days of the change is a violation of this subpart and voids the application or permit, as applicable. If a change in vessel ownership is not reported, the violation is chargeable to the previous owner. Title 15 CFR part 904 governs permit sanctions under this subpart.

(k) *Transshipment vessels.* Any U.S. flagged vessel that receives or attempts to receive *Dissostichus* species from a harvesting vessel at sea, regard-

less of whether such transshipment occurs in waters under the jurisdiction of CCAMLR, must obtain from NMFS a harvesting permit authorizing transshipment. Transshipment vessels must comply with the permitting provisions of this section with respect to harvesting vessels.

§ 300.113 Dealer permits and preapproval.

(a) *General.* (1) A dealer intending to import or re-export AMLR must obtain an AMLR dealer permit valid for one year. Preapproval from NMFS is required for each shipment of *Dissostichus* species. Only those specific activities stipulated by the permit are authorized for the permit holder.

(2) An AMLR may be imported into the United States if its harvest has been authorized by a U.S.-issued individual permit issued under § 300.112 (a)(1) or its importation has been authorized by a NMFS-issued dealer permit and preapproval issued under paragraph (a) of this section. AMLRs may not be released for entry into the United States unless accompanied by the harvesting permit or the individual permit and the DCD for that shipment which has been stamped by NMFS certifying that preapproval has been granted to allow import.

(3) In no event may a marine mammal be imported into the United States unless authorized and accompanied by an import permit issued under the Marine Mammal Protection Act and/or the Endangered Species Act.

(4) A dealer permit or preapproval issued under this section does not authorize the harvest or transshipment of any AMLR by or to a vessel of the United States.

(b) *Application.* Application forms for AMLR dealer permits and preapproval are available from NMFS. A complete and accurate application must be received by NMFS for each preapproval at least 15 working days before the anticipated date of the first receipt, importation, or re-export.

(c) *Fees.* A fee to recover the administrative expenses associated with processing preapproval applications will be charged. The amount of the fee will be

determined in accordance with procedures specified in the NOAA Finance Handbook for calculating administrative costs of special products and services. The fee is specified with the preapproval application form. The appropriate fee must accompany each application and be paid by check, draft, or money order.

(d) *Issuance.* NMFS may issue a dealer permit or preapproval if it determines that the activity proposed by the dealer meets the requirements of the Act and that the resources were not or will not be harvested in violation of any conservation measure in force with respect to the United States or in violation of any regulation in this subpart.

(e) *Duration.* A permit issued under this section is valid from its date of issuance to its date of expiration unless it is revoked or suspended. A preapproval is valid until the product is imported (and re-exported, if applicable).

(f) *Transfer.* A permit issued under this section is not transferable or assignable.

(g) *Changes in information*—(1) Pending applications. Applicants for permits and preapproval under this section must report in writing to NMFS any change in the information submitted in their permit and preapproval applications. The processing period for the application may be extended as necessary to review and consider the change.

(2) Issued permits and preapprovals. Any entity issued a permit or preapproval under this section must report in writing to NMFS any changes in previously submitted information. Any changes that would result in a change in the receipt or importation authorized by the preapproval, such as harvesting vessel or country of origin, type and quantity of the resource to be received or imported, and Convention statistical subarea from which the resource was harvested, must be proposed in writing to NMFS and may not be undertaken unless authorized by NMFS through issuance of a revised or new preapproval.

(h) *Revision, suspension, or revocation.* A permit or preapproval issued under this section may be revised, suspended,

or revoked, based upon a violation of the permit, the Act, or this subpart. Failure to report a change in the information contained in a permit or preapproval application voids the application, permit, or preapproval as applicable. Title 15 CFR part 904 governs permit sanctions under this subpart.

(i) *Exception.* For shipments of *Dissostichus* species which are fresh and less than 2,000 kilograms in quantity, the application for approval of catch documents of toothfish must be submitted to NMFS within 24 hours of import.

(j) *SVDCD.* Dealer permits will not be issued for *Dissostichus* spp. offered for sale or other disposition under a Specially Validated DCD.

(k) *Registered agent.* Foreign entities shall, as a condition of possessing a dealer permit, designate and maintain a registered agent within the United States that is authorized to accept service of process on behalf of that entity. Foreign based importers of record may identify to NMFS the registered agent identified for Customs Service purposes.

§ 300.114 Appointment of a designated representative.

(a) All holders of permits authorizing fishing in subarea 48.3 must appoint a designated representative in the United States.

(b) The designated representative will be notified of closures under § 300.111 and must transmit this information to the vessel on the grounds.

(c) The designated representative may receive catch reports from the vessel and transmit the reports to NMFS in writing.

§ 300.115 Prohibitions.

In addition to the prohibitions in § 300.4, it is unlawful for any person to:

(a) Reduce to possession or attempt to reduce to possession any AMLRs without a permit for such activity as required by § 300.112.

§300.116 Facilitation of enforcement and inspection.

In addition to the facilitation of enforcement provisions of §300.5, the following requirements apply to this subpart.

(a) *Access and records.* (1) The owners and operator of each harvesting vessel must provide authorized officers and CCAMLR inspectors access to all spaces where work is conducted or business papers and records are prepared or stored, including but not limited to personal quarters and areas within personal quarters. If inspection of a particular area would interfere with specific on-going scientific research, and if the operator of the harvesting vessel makes such assertion and produces an individual permit that covers that specific research, the authorized officer or CCAMLR inspector

§ 300.117

50 CFR Ch. III (10-1-05 Edition)

will not disturb the area, but will record the information pertaining to the denial of access.

(2) The owner and operator of each harvesting vessel must provide to authorized officers and CCAMLR inspectors all records and documents pertaining to the harvesting activities of the vessel, including but not limited to production records, fishing logs, navigation logs, transfer records, product receipts, cargo stowage plans or records, draft or displacement calculations, customs documents or records, and an accurate hold plan reflecting the current structure of the vessel's storage and factory spaces.

(3) Before leaving vessels that have been inspected, the CCAMLR inspector will give the master of the vessel a Certificate of Inspection and a written notification of any alleged violations of Commission measures in effect and will afford the master the opportunity to comment on it. The ship's master must sign the notification to acknowledge receipt and the opportunity to comment on it.

(b) *Reports by non-inspectors.* All scientists, fishermen, and other non-inspectors present in the Convention area and subject to the jurisdiction of the United States are encouraged to report any violation of Commission conservation and management measures observed in the Convention area to the Office of Ocean Affairs (CCAMLR Vio-

lations), Department of State, Room 5801, Washington, DC 20520.

(c) *Storage of AMLRs.* The operator of each harvesting vessel storing AMLRs in a storage space on board the vessel must ensure that non-resource items are neither stowed beneath nor covered by resource items, unless required to maintain the stability and safety of the vessel. Non-resource items include, but are not limited to, portable conveyors, exhaust fans, ladders, nets, fuel bladders, extra bin boards, or other moveable non-resource items. These non-resource items may be in a resource storage space when necessary for the safety of the vessel or crew or for the storage of the items. Lumber, bin boards, or other dunnage may be used for shoring or bracing of product to ensure the safety of crew and to prevent shifting of cargo within the space.

(d) *Disposition of resources denied entry.* [Reserved]

Subpart I—United States-Canada Fisheries Enforcement

AUTHORITY: 16 U.S.C. 1801 *et seq.*

§ 300.140 Purpose and scope.

This subpart implements the Agreement Between the Government of the United States of America and the Government of Canada on Fisheries Enforcement executed at Ottawa, Canada, on September 26, 1990 (Agreement), allowing each party to the Agreement to take appropriate measures, consistent with international law, to prevent its nationals, residents and vessels from violating those national fisheries laws and regulations of the other party. This subpart applies, except where otherwise specified in this subpart, to all persons and all places (on water and on land) subject to the jurisdiction of the

United States under the Magnuson Act. This includes, but is not limited to, activities of nationals, residents and vessels of the United States (including the owners and operators of such vessels) within waters subject to the fisheries jurisdiction of Canada as defined in this subpart, as well as on the high seas and in waters subject to the fisheries jurisdiction of the United States.

§ 300.141 Definitions.

In addition to the terms defined in § 300.2 and those in the Magnuson Act and the Agreement, the terms used in this subpart have the following meanings. If a term is defined differently in § 300.2, the Magnuson Act, or the Agreement, the definition in this section applies.

Applicable Canadian fisheries law means any Canadian law, regulation or similar provision relating in any manner to fishing by any fishing vessel other than a Canadian fishing vessel in waters subject to the fisheries jurisdiction of Canada, including, but not limited to, any provision relating to stowage of fishing gear by vessels passing through such waters, and to obstruction or interference with enforcement of any such law or regulation.

Authorized officer of Canada means any fishery officer, protection officer, officer of the Royal Canadian Mounted Police, or other employee authorized by the appropriate authority of any national or provincial agency of Canada to enforce any applicable Canadian fisheries law.

§ 300.160 Requirement for marking of containers or packages.

Except as otherwise provided in this subpart, all persons are prohibited from importing, exporting, or transporting in interstate commerce any container or package containing any fish or wildlife (including shellfish) unless each container or package is conspicuously marked on the outside with both the name and address of the shipper and consignee and an accurate list of its contents by species and number of each species.

§ 300.161 Alternatives and exceptions.

(a) The requirements of § 300.160 may be met by complying with one of the following alternatives to the marking requirement:

(1)(i) Conspicuously marking the outside of each container or package containing fish or wildlife with the word “fish” or “wildlife” as appropriate for its contents, or with the common name of its contents by species, and

(3) Fish or shellfish that are landed by, and offloaded from, a fishing vessel (whether or not the catch has been carried by the fishing vessel interstate), as long as the fish or shellfish remain at the place where first offloaded.

Subpart L—Pacific Albacore Tuna Fisheries

AUTHORITY: Sec. 401, Pub. L. 108-219, 118 Stat. 616 (16 U.S.C. 1821 note).

SOURCE: 69 FR 31535, June 4, 2004, unless otherwise noted.

50 CFR Ch. III (10-1-05 Edition)

§ 300.170 Purpose and scope.

The regulations in this subpart govern fishing by U.S. vessels in waters under the fisheries jurisdiction of Canada pursuant to the 1981 Treaty Between the Government of the United States of America and the Government of Canada on Pacific Coast Albacore Tuna Vessels and Port Privileges as amended in 2002. Regulations governing fishing by Canadian vessels in waters under the fisheries jurisdiction of the United States pursuant to this Treaty as amended in 2002 are found at §600.530 of chapter VI of this title.

§ 300.171 Definitions.

In addition to the definitions in the Magnuson-Stevens Fishery Conservation and Management Act and §600.10 of Chapter VI of this title, the terms used in this subpart have the following meanings:

Fishing under the Treaty as amended in 2002 means to engage in fishing for albacore tuna in waters under the fisheries jurisdiction of Canada seaward of 12 nautical miles from the baseline from which the territorial sea is measured.

Regional Administrator means the Regional Administrator, Southwest Region, NMFS, 501 W. Ocean Boulevard, Suite 4200, Long Beach, CA 90802-4213, or a designee.

Reporting Office means the office designated by the Regional Administrator to take hail-in and hail-out reports from U.S. and Canadian vessel operators.

Treaty means the 1981 Treaty Between the Government of the United States of America and the Government of Canada on Pacific Coast Albacore Tuna Vessels and Port Privileges as amended in 2002.

§ 300.172 Vessel list.

The “vessel list” is the list of U.S. vessels that are authorized to fish under the Treaty as amended in 2002. Only a vessel on the list for at least 7 days may engage in fishing in Canadian waters under the Treaty as amended in 2002. At least 7 (seven) days prior to the first day on which any fishing in Canadian waters may begin, the owner of any U.S. vessel that wishes to be eligible to fish for albacore tuna under the

Int'l. Fishing and Related Activities

§ 300.180

Treaty as amended in 2002 must provide the Regional Administrator or his designee with the vessel name, the owner's name and address, phone number where the owner can be reached, the U.S. Coast Guard documentation number (or state registration number if not documented), and vessel operator (if different from the owner) and his or her address and phone number. NMFS will then place the vessel on the vessel list.

§ 300.173 Vessel identification.

A U.S. vessel fishing under the Treaty as amended in 2002 must be marked with its name and vessel identification prominently displayed where they will be clearly visible both from the air and from a surface vessel. Vessel identification means the U.S. Coast Guard Documentation number (or if not documented, the state registration number) followed by the letter U in the same height and size as the numerals. Numerals and the letter U must meet the size requirements of § 660.704 of chapter VI of this title.

§ 300.174 Logbook reports.

The owner of any U.S. vessel that fishes for albacore tuna in Canadian waters under the Treaty as amended in 2002 must maintain and submit to the Regional Administrator a logbook of catch and effort of such fishing. The logbook form will be provided to the vessel owner as soon as practicable after the request to be placed on the list of vessels. The logbook must be submitted to the Regional Administrator within 15 days of the end of a trip, regardless of whether the trip ends by reentry to U.S. waters or entry to Canada's territorial sea, other Canadian waters in which fishing is not permitted, or a Canadian port. If the departure is due to exit to the high seas, the vessel operator must submit the logbook within 7 days of its next landing.

§ 300.175 Hail-in and hail-out reports.

Subpart M—International Trade Documentation and Tracking Programs for Highly Migratory Species

AUTHORITY: 16 U.S.C. 951–961 and 971 *et seq.*; 16 U.S.C. 1801 *et seq.*

SOURCE: 69 FR 67277, Nov. 17, 2004, unless otherwise noted.

§ 300.180 Purpose and scope.

The regulations in this subpart are issued under the authority of the Atlantic Tunas Convention Act of 1975 (ATCA), Tuna Conventions Act of 1950, and Magnuson-Stevens Act. The regulations implement the recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT) for the conservation and management of tuna and tuna-like species in the Atlantic Ocean and of the Inter-American Tropical Tuna Commission (IATTC) for the conservation and management of highly migratory fish resources in the Eastern Tropical Pacific Ocean, so far as they affect vessels and

persons subject to the jurisdiction of the United States.

§ 300.181 Definitions.

Atlantic bluefin tuna means the species *Thunnus thynnus* found in the Atlantic Ocean.

Bigeye tuna means the species *Thunnus obesus* found in any ocean area.

Bluefin tuna, for purposes of this subpart, means Atlantic and Pacific bluefin tuna, as defined in this section.

BSD tag means a numbered tag affixed to a bluefin tuna issued by any country in conjunction with a catch statistics information program and recorded on a bluefin tuna statistical document (BSD).

CBP means the U.S. Customs and Border Protection.

CCSBT means the Commission for the Conservation of Southern Bluefin Tuna established pursuant to the Convention for the Conservation of Southern Bluefin Tuna.

Customs territory of the United States has the same meaning as in 19 CFR 101.1 and includes only the States, the District of Columbia, and Puerto Rico.

Dealer tag means the numbered, flexible, self-locking ribbon issued by NMFS for the identification of Atlantic bluefin tuna sold to a dealer permitted under § 635.4 of this title as required under § 635.5(b) of this title.

Entered for consumption has the same meaning as in 19 CFR 141.0a(f) and generally refers to the filing of an entry summary for consumption with customs authorities, in proper form, with estimated duties attached.

Entry for consumption, for purposes of this subpart, has the same meaning as entry for consumption, withdrawal from warehouse for consumption, or entry for consumption of merchandise from a foreign trade zone, as provided under 19 CFR parts 101.1, 141, 144, and 146. For purposes of this subpart, “entry for consumption” generally means an import into the Customs territory of the United States or the separate customs territory of a U.S. insular possession, for domestic use, that is classified for customs purposes in the “consumption” category (entry type codes 00–08) or withdrawal from warehouse or foreign trade zone for con-

sumption category (entry type codes 30–34 and 38). For purposes of this subpart, HMS destined from one foreign country to another, which transits the Customs territory of the United States or the separate customs territory of a U.S. insular possession, and is not classified as an entry for consumption upon release from CBP or other customs custody, is not an entry for consumption under this definition.

Entry number, for purposes of this subpart, means the unique number/identifier assigned by customs authorities for each entry into a customs territory. For CBP, the entry number is assigned at the time of filing an entry summary (CBP Form 7501 or equivalent electronic filing) for entries into the Customs territory of the United States.

Export, for purposes of this subpart, means to effect exportation.

Exportation has the same general meaning as 19 CFR 101.1 and generally refers to a severance of goods from the mass of things belonging to one country with the intention of uniting them to the mass of things belonging to some foreign country. For purposes of this subpart, a shipment between the United States and its insular possessions is not an export.

Exporter, for purposes of this subpart, is the principal party in interest, meaning the party that receives the primary benefit, monetary or otherwise, of the export transaction. For exports from the United States, the exporter is the U.S. principal party in interest, as identified in Part 30 of title 15 of the CFR. An exporter is subject to the requirements of this subpart, even if exports are exempt from statistical reporting requirements under Part 30 of title 15 of the CFR.

Finlet means one of the small individual fins on a tuna located behind the second dorsal and anal fins and forward of the tail fin.

Fish or fish products regulated under this subpart means bluefin tuna, frozen bigeye tuna, southern bluefin tuna and swordfish and all such products of these species except parts other than meat (e.g., heads, eyes, roe, guts, and tails).

IATTC means the Inter-American Tropical Tuna Commission, established

Int'l. Fishing and Related Activities

§ 300.182

pursuant to the Convention for the Establishment of an Inter-American Tropical Tuna Commission.

ICCAT means the International Commission for the Conservation of Atlantic Tunas established pursuant to the International Convention for the Conservation of Atlantic Tunas.

Import, for purposes of this subpart, generally means the act of bringing or causing any goods to be brought into the customs territory of a country with the intent to unlade them. For purposes of this subpart, goods brought into the United States from a U.S. insular possession, or vice-versa, are not considered imports.

Importer, for purposes of this subpart, means the principal party responsible for the import of product into a country. For imports into the United States, and for purposes of this subpart, "importer" means the consignee as identified on entry documentation or any authorized, equivalent electronic medium required for release of shipments from the customs authority of the United States or the separate customs territory of a U.S. insular possession. If a consignee is not declared, then the importer of record is considered to be the consignee.

Insular possession of the United States or U.S. insular possession, for purposes of this subpart, means the Commonwealth of the Northern Mariana Islands, Guam, American Samoa, and other possessions listed under 19 CFR 7.2, that are outside the customs territory of the United States.

Intermediate country means a country that exports to another country HMS previously imported as an entry for consumption by that nation. A shipment of HMS through a country on a through bill of lading, or in another manner that does not enter the shipment into that country as an entry for consumption, does not make that country an intermediate country under this definition.

IOTC means the Indian Ocean Tuna Commission established pursuant to the Agreement for the Establishment of the Indian Ocean Tuna Commission approved by the Food and Agriculture Organization (FAO) Council of the United Nations.

Pacific bluefin tuna means the species *Thunnus orientalis* found in the Pacific Ocean.

Permit holder, for purposes of this subpart, means, unless otherwise specified, a person who obtains a trade permit under § 300.182.

Re-export, for purposes of this subpart, means the export of goods that were previously entered for consumption into the customs territory of a country.

RFMO, as defined under this subpart, means regional fishery management organization, including CCSBT, IATTC, ICCAT, or IOTC.

Separate customs territory of a U.S. insular possession means the customs territory of a U.S. insular possession when that possession's customs territory is not a part of the Customs territory of the United States.

Southern bluefin tuna means the species *Thunnus maccoyii* found in any ocean area.

Swordfish means the species *Xiphias gladius* that is found in any ocean area.

Tag means either a dealer tag or a BSD tag.

Trade permit means the HMS international trade permit under § 300.182.

§ 300.182 HMS international trade permit.

(a) *General*. A person entering for consumption, exporting, or re-exporting fish or fish products regulated under this subpart from any ocean area must possess a valid trade permit issued under this section. Importation of fish or fish products regulated under this subpart by nonresident corporations is restricted to those entities authorized under 19 CFR 141.18.

(b) *Application*. A person must apply for a permit in writing on an appropriate form obtained from NMFS. The application must be completed, signed by the applicant, and submitted with required supporting documents, at least 30 days before the date upon which the permit is made effective. Application forms and instructions for their completion are available from NMFS.

(c) *Issuance*. (1) Except as provided in subpart D of 15 CFR part 904, NMFS will issue a permit within 30 days of receipt of a completed application.

§ 300.183

50 CFR Ch. III (10–1–05 Edition)

(2) NMFS will notify the applicant of any deficiency in the application, including failure to provide information or reports required under this subpart. If the applicant fails to correct the deficiency within 30 days following the date of notification, the application will be considered abandoned.

(d) *Duration.* Any permit issued under this section is valid until December 31 of the year for which it is issued, unless suspended or revoked.

(e) *Alteration.* Any permit that is substantially altered, erased, or mutilated is invalid.

(f) *Replacement.* NMFS may issue replacement permits. An application for a replacement permit is not considered a new application. An appropriate fee, consistent with paragraph (j) of this section, may be charged for issuance of a replacement permit.

(g) *Transfer.* A permit issued under this section is not transferable or assignable; it is valid only for the permit holder to whom it is issued.

(h) *Inspection.* The permit holder must keep the permit issued under this section at his/her principal place of business. The permit must be displayed for inspection upon request of any authorized officer, or any employee of NMFS designated by NMFS for such purpose.

(i) *Sanctions.* The Assistant Administrator may suspend, revoke, modify, or deny a permit issued or sought under this section. Procedures governing permit sanctions and denials are found at subpart D of 15 CFR part 904.

(j) *Fees.* NMFS may charge a fee to recover the administrative expenses of permit issuance. The amount of the fee is calculated, at least annually, in accordance with the procedures of the NOAA Finance Handbook, available from NMFS, for determining administrative costs of each special product or service. The fee may not exceed such costs and is specified on each application form. The appropriate fee must accompany each application. Failure to pay the fee will preclude issuance of the permit. Payment by a commercial instrument later determined to be insufficiently funded shall invalidate any permit.

(k) *Change in application information.* Within 30 days after any change in the

information contained in an application submitted under this section, the permit holder must report the change to NMFS in writing. If a change in permit information is not reported within 30 days, the permit is void as of the 31st day after such change.

(1) *Renewal.* Persons must apply annually for a trade permit issued under this section. A renewal application must be submitted to NMFS, at an address designated by NMFS, at least 30 days before the permit expiration date to avoid a lapse of permitted status. NMFS will renew a permit provided that: the application for the requested permit is complete; all reports required under the Magnuson-Stevens Act, ATCA, and the Tuna Conventions Act of 1950 have been submitted, including those required under §§ 300.183, 300.185, 300.186, and 300.187 and § 635.5 of this title; and the applicant is not subject to a permit sanction or denial under paragraph (i) of this section.

§ 300.183 Permit holder reporting and recordkeeping requirements.

(a) *Biweekly reports.* Any person issued a trade permit under § 300.182 must submit to NMFS, on forms supplied by NMFS, a biweekly report of imports entered for consumption, exports, and re-exports of fish or fish products regulated under this subpart.

(1) The report required to be submitted under paragraph (a) of this section must be postmarked within 10 days after the end of each biweekly reporting period in which fish or fish products regulated under this subpart were entered for consumption, exported, or re-exported. The bi-weekly reporting periods are defined as the first day to the 15th day of each month and the 16th day to the last day of each month.

(2) Each report must specify accurately and completely the requested information for each shipment of fish or fish products regulated under this subpart that is entered for consumption, exported, or re-exported.

(b) *Recordkeeping.* Any person issued a trade permit under § 300.182 must retain at his/her principal place of business a copy of each biweekly report and supporting records for a period of 2

Int'l. Fishing and Related Activities

§ 300.184

years from the date on which each report was submitted to NMFS.

(c) *Other reporting and recordkeeping requirements.* Any person issued a trade permit is also subject to the reporting and recordkeeping requirements identified in § 300.185.

(d) *Inspection.* Any person authorized to carry out the enforcement activities under the regulations in this subpart has the authority, without warrant or other process, to inspect, at any reasonable time: fish or fish products regulated under this subpart, biweekly reports, statistical documents, re-export certificates, relevant sales receipts, import and export documentation, or other records and reports required by this subpart to be made, retained, or submitted. A permit holder must allow NMFS or an authorized person to inspect and copy, for any fish or fish products regulated under this subpart, any import and export documentation and any reports required under this subpart, and the records, in any form, on which the completed reports are based, wherever they exist. Any agent of a person issued a trade permit under this part, or anyone responsible for importing, exporting, storing, packing, or selling fish or fish products regulated under this subpart, shall be subject to the inspection provisions of this section.

(3) Bigeye tuna caught by purse seiners and pole and line (bait) vessels and destined for canneries within the United States, including all U.S. commonwealths, territories, and possessions, may be imported without the documentation required under this subpart.

(d) *Swordfish.* (1) Documentation is required for swordfish products including those identified by the following subheading numbers from the HTS:

§ 300.185

§ 300.185 Documentation, reporting and recordkeeping requirements for statistical documents and re-export certificates.

(a) *Imports*—(1) *Applicability of requirements.* The documentation requirements in paragraph (a)(2) of this section apply to all imports of fish or fish products regulated under this subpart into the Customs territory of the United States, except when entered as a product of an American fishery landed overseas (HTS heading 9815). For insular possessions with customs territories separate from the Customs territory of the United States, documentation requirements in paragraph (a)(2) of this section apply only to entries for consumption. The reporting requirements of paragraph (a)(3) of this section do not apply to fish products destined from one foreign country to another which transit the United States or a U.S. insular possession and are designated as an entry type other than entry for consumption as defined in § 300.181.

(2) *Documentation requirements.* (i) All fish or fish products regulated under this subpart, imported into the customs territory of the United States or entered for consumption into a separate customs territory of a U.S. insular possession, must, at the time of pre-

senting entry documentation for clearance by customs authorities (e.g., CBP Forms 7533 or 3461 or other documentation required by the port director) be accompanied by an original, completed, approved, validated, species-specific statistical document with the required information and exporter's certification completed as specified in § 300.186. Customs forms can be obtained by contacting the local CBP port office; contact information is available at *www.cbp.gov*. For a U.S. insular possession, contact the local customs office for any forms required for entry.

(ii) The statistical document must be validated as specified in § 300.187 by a responsible government official of the country whose flag vessel caught the fish (regardless of where the fish are first landed).

(iii) For fish products entered for consumption, the permit holder must provide on the original statistical document that accompanied the import shipment the correct information and importer's certification specified in § 300.186, and must note on the top of the statistical document the entry number assigned at the time of filing an entry summary (e.g., CBP Form 7501 or electronic equivalent) with customs authorities.

(iv) Bluefin tuna, imported into the Customs territory of the United States or entered for consumption into the separate customs territory of a U.S. insular possession, from a country requiring a BSD tag on all such bluefin tuna available for sale, must be accompanied by the appropriate BSD tag issued by that country, and said BSD tag must remain on any bluefin tuna until it reaches its final destination. If the final import destination is the United States, which includes U.S. insular possessions, the BSD tag must remain on the bluefin tuna until it is cut into portions. If the bluefin tuna portions are subsequently packaged for domestic commercial use or re-export, the BSD tag number and the issuing country must be written legibly and indelibly on the outside of the package.

(3) *Reporting requirements.* For fish or fish products regulated under this subpart that are entered for consumption and whose final destination is within

Int'l. Fishing and Related Activities

§ 300.185

the United States, which includes a U.S. insular possession, a permit holder must submit to NMFS the original statistical document that accompanied the fish product as completed under §300.186 and paragraph (a)(2) of this section. A copy of the original completed statistical document must be postmarked and mailed, or faxed, by said permit holder to NMFS at an address designated by NMFS within 24 hours of the time the fish product was entered for consumption into the Customs territory of the United States or the separate customs territory of a U.S. insular possession.

(b) *Exports*—(1) *Applicability of requirements.* The documentation and reporting requirements of this paragraph apply to exports of fish or fish products regulated under this subpart that were harvested by U.S. vessels and first landed in the United States, or harvested by vessels of a U.S. insular possession and first landed in that possession. This paragraph also applies to products of American fisheries landed overseas.

(2) *Documentation requirements.* A permit holder must complete an original, numbered, species-specific statistical document issued to that permit holder by NMFS for each export referenced under paragraph (b)(1) of this section. Such an individually numbered document is not transferable and may be used only once by the permit holder to which it was issued to report on a specific export shipment. A permit holder must provide on the statistical document the correct information and exporter certification specified in §300.186. The statistical document must be validated, as specified in §300.187, by NMFS, or another official authorized by NMFS. A list of such officials may be obtained by contacting NMFS. A permit holder requesting U.S. validation for exports should notify NMFS as soon as possible after arrival of the vessel to avoid delays in inspection and validation of the export shipment.

(3) *Reporting requirements.* A permit holder must ensure that the original statistical document as completed under paragraph (b)(2) of this section accompanies the export of such products to their export destination. A copy of the statistical document must

be postmarked and mailed by said permit holder to NMFS, at an address designated by NMFS, within 24 hours of the time the fish product was exported from the United States or a U.S. insular possession.

(c) *Re-exports*—(1) *Applicability of requirements.* The documentation and reporting requirements of this paragraph apply to exports of fish or fish products regulated under this subpart that were previously entered for consumption into the customs territory of the United States or the separate customs territory of a U.S. insular possession through filing the documentation specified in paragraph (a) of this section. The requirements of this paragraph do not apply to fish products destined from one foreign country to another which transit the United States or a U.S. insular possession and which are designated as an entry type other than entry for consumption as defined in §300.181.

(2) *Documentation requirements.* (i) If a permit holder subdivides or consolidates a shipment that was previously entered for consumption as described in paragraph (c)(1) of this section, the permit holder must complete an original, individually numbered, species-specific re-export certificate issued to that permit holder by NMFS for each such re-export shipment. Such an individually numbered document is not transferable and may be used only once by the permit holder to which it was issued to report on a specific re-export shipment. A permit holder must provide on the re-export certificate the correct information and re-exporter certification specified in §300.186. The permit holder must also attach the original statistical document that accompanied the import shipment or a copy, and provide the correct information and intermediate importer's certification specified in §300.186, and must note on the top of both the statistical documents and the re-export certificates the entry number assigned by customs authorities at the time of filing the entry summary.

(ii) If a shipment that was previously entered for consumption as described in paragraph (c)(1) of this section is not subdivided into sub-shipments or consolidated, for each re-export shipment,

a permit holder must complete the intermediate importer's certification on the original statistical document and note the entry number on the top of the statistical document. Such re-exports do not need a re-export certificate and the re-export does not require validation.

(iii) Re-export certificates must be validated, as specified in §300.187, by NMFS or another official authorized by NMFS. A list of such officials may be obtained by contacting NMFS. A permit holder requesting validation for re-exports should notify NMFS as soon as possible to avoid delays in inspection and validation of the re-export shipment.

(3) *Reporting requirements.* For each re-export, a permit holder must submit the original of the completed re-export certificate (when required) and the original or a copy of the original statistical document completed as specified under paragraph (c)(2) of this section, to accompany the shipment of such products to their re-export destination. A copy of the completed statistical document and re-export certificate (when required) must be post-marked and mailed by said permit holder to NMFS, at an address designated by NMFS, within 24 hours of the time the shipment was re-exported from the United States.

(d) *Recordkeeping.* A permit holder must retain at his or her principal place of business, a copy of each statistical document and re-export certificate required to be submitted to NMFS pursuant to this section, and supporting records for a period of 2 years from the date on which it was submitted to NMFS.

(e) *Inspection.* Any person responsible for importing, exporting, storing, packing, or selling fish or fish products regulated under this subpart, including permit holders, consignees, customs brokers, freight forwarders, and importers of record, shall be subject to the inspection provisions at §300.183(d).

§ 300.186 Contents of documentation.

(a) *Statistical documents.* To be deemed complete, all statistical documents must state:

(8) If applicable, the name(s) and address(es), including the name of the city and state or province of import, and the name(s) of the intermediate country(ies) or the name of the country of final destination, and license number(s) of, and be signed and dated in the importer's certification block by each intermediate and the final importer.

(g) *Bluefin tuna re-export certificates.* To be deemed complete, Bluefin tuna re-export certificates must, in addition to the elements in paragraph (f) of this section, also state:

(1) Whether the fish for re-export was farmed.

(2) The name and address of the farm from which the fish was taken.

(h) *Approved statistical documents and re-export certificates.* (1) An approved statistical document or re-export certificate may be obtained from NMFS to accompany exports of fish or fish products regulated under this subpart from the customs territory of the United States or the separate customs territory of a U.S. insular possession.

(2) A nationally approved form from another country may be used for exports to the United States if that document strictly conforms to the information requirements and format of the applicable RFMO documents. An approved statistical document or re-export certificate for use in countries without a nationally approved form may be obtained from the following websites, as appropriate: *www.iccat.org*, *www.iattc.org*, *www.ccsbt.org*, or *www.iotc.org* to accompany exports to the United States.

§ 300.187 Validation requirements.

(a) *Imports.* The approved statistical document accompanying any import of any fish or fish product regulated under this subpart must be validated by a government official from the issuing country, unless NMFS waives this requirement pursuant to an applicable RFMO recommendation. NMFS will furnish a list of countries for which government validation requirements are waived to the appropriate customs officials. Such list will indicate the circumstances of exemption for each issuing country and the non-government institutions, if any, accredited to validate statistical documents and re-export certificates for that country.

(b) *Exports.* The approved statistical document accompanying any export of fish or fish products regulated under this subpart must be validated, except pursuant to a waiver described in paragraph (d) of this section. Validation must be made by NMFS or another official authorized by NMFS.

(c) *Re-exports.* The approved re-export certificate accompanying any re-export of fish or fish products regulated under this subpart, as required under § 300.185(c), must be validated, except pursuant to a waiver described in paragraph (d) of this section. Validation must be made by NMFS or another official authorized by NMFS.

(d) *Validation waiver.* Any waiver of government validation will be consistent with applicable RFMO recommendations concerning validation of statistical documents and re-export certificates. If authorized, such waiver of government validation may include exemptions from government valida-

tion for Pacific bluefin tuna with individual BSD tags affixed pursuant to paragraph (f) of this section or for Atlantic bluefin tuna with tags affixed pursuant to § 635.5(b) of this title. Waivers will be specified on statistical documents and re-export certificates or accompanying instructions, or in a letter to permit holders from NMFS.

(e) *Authorization for non-NMFS validation.* An official from an organization or government agency seeking authorization to validate statistical documents or re-export certificates accompanying exports or re-exports from the United States, which includes U.S. commonwealths, territories, and possessions, must apply in writing, to NMFS, at an address designated by NMFS for such authorization. The application must indicate the procedures to be used for verification of information to be validated; list the names, addresses, and telephone/fax numbers of individuals to perform validation; procedures to be used to notify NMFS of validations; and an example of the stamp or seal to be applied to the statistical document or re-export certificate. NMFS, upon finding the applicant capable of verifying the information required on the statistical document or re-export certificate, will issue, within 30 days, a letter specifying the duration of effectiveness and conditions of authority to validate statistical documents or re-export certificates accompanying exports or re-exports from the United States. The effectiveness of such authorization will be delayed as necessary for NMFS to notify the appropriate RFMO of other officials authorized to validate statistical document or re-export certificates. Non-government organizations given authorization to validate statistical documents or re-export certificates must renew such authorization on a yearly basis.

(f) *BSD tags*—(1) *Issuance.* NMFS will issue numbered BSD tags for use on Pacific bluefin tuna upon request to each permit holder.

(2) *Transfer.* BSD tags issued under this section are not transferable and are usable only by the permit holder to whom they are issued.

(3) *Affixing BSD tags.* At the discretion of permit holders, a tag issued

§ 300.189

under this section may be affixed to each Pacific bluefin tuna purchased or received by the permit holder. If so tagged, the tag must be affixed to the tuna between the fifth dorsal finlet and the keel.

(4) *Removal of tags.* A tag, as defined in this subpart and affixed to any bluefin tuna, must remain on the tuna until it is cut into portions. If the bluefin tuna or bluefin tuna parts are subsequently packaged for transport for domestic commercial use or for export, the number of each dealer tag or BSD tag must be written legibly and indelibly on the outside of any package containing the bluefin tuna or bluefin tuna parts. Such tag number also must be recorded on any document accompanying the shipment of bluefin tuna or bluefin tuna parts for commercial use or export.

(5) *Labeling.* The tag number of a BSD tag affixed to each Pacific bluefin tuna under this section must be recorded on NMFS reports required by § 300.183, on any documents accompanying the shipment of Pacific bluefin tuna for domestic commercial use or export as indicated in §§ 300.185 and 300.186, and on any additional documents that accompany the shipment (e.g., bill of lading, customs manifest, etc.) of the tuna for commercial use or for export.

(6) *Reuse.* BSD tags issued under this section are separately numbered and may be used only once, one tail tag per Pacific bluefin tuna, to distinguish the purchase of one Pacific bluefin tuna. Once affixed to a tuna or recorded on any package, container or report, a BSD tag and associated number may not be reused.

§ 300.188 Ports of entry.

NMFS shall monitor the importation of fish or fish products regulated under this subpart into the United States. If NMFS determines that the diversity of handling practices at certain ports at which fish or fish products regulated under this subpart are being imported into the United States allows for circumvention of the statistical document requirement, NMFS may undertake a rulemaking to designate, after consultation with the CBP, those ports at which fish or fish products regulated under this subpart from any ocean area

may be imported into the United States.
