

(2) To export American alligator specimens that are not from an approved program, complete Form 3-200-27 and submit it to the U.S. Management Authority.

(3) For information on issuance criteria for CITES documents, see § 23.36 for export permits and § 23.37 for re-export certificates.

(i) *Conditions for import, export, or re-export.* Upon import, export, or re-export, each crocodylian specimen must meet the applicable tagging requirements in paragraphs (d), (e), and (f) of this section.

§ 23.71 How can I trade internationally in sturgeon caviar?

(a) *U.S. and foreign general provisions.* For the purposes of this section, *sturgeon caviar* means the processed roe of any species of sturgeon, including paddlefish (Order Acipenseriformes). The import, export, or re-export of sturgeon caviar must meet the requirements of this section and the other requirements of this part (see subparts B and C for prohibitions and application procedures).

(b) *Labeling.* You may import, export, or re-export sturgeon caviar only if labels are affixed to containers prior to export or re-export in accordance with this paragraph.

(1) The following definitions apply to caviar labeling:

(i) *Non-reusable label* means any label or mark that cannot be removed without being damaged or transferred to another container.

(ii) *Primary container* means any container in direct contact with the caviar.

(iii) *Secondary container* means the receptacle into which primary containers are placed.

(iv) *Processing plant* means a facility in the country of origin responsible for the first packaging of caviar into a primary container.

(v) *Repackaging plant* means a facility responsible for receiving and repackaging caviar into new primary containers.

(vi) *Lot identification number* means a number that corresponds to information related to the caviar tracking system used by the processing plant or repackaging plant.

(2) The caviar-processing plant in the country of origin must affix a non-reusable label on the primary container that includes all of the following information:

(i) Standardized species code; for hybrids, the species code for the male is followed by the code for the female and the codes are separated by an “x” (codes are available on our website; see § 23.7).

(ii) Source code.

(iii) Two-letter ISO code of the country of origin.

(iv) Year of harvest.

(v) Processing plant code and lot identification number.

(3) If caviar is repackaged before export or re-export, the repackaging plant must affix a non-reusable label to the primary container that includes all of the following information:

(i) The standardized species code, source code, and two-letter ISO code of the country of origin.

(ii) Year of repackaging and the repackaging plant code, which incorporates the two-letter ISO code for the repackaging country if different from the country of origin.

(iii) Lot identification number or CITES document number.

(4) The exact quantity of caviar must be indicated on any secondary container along with a description of the contents in accordance with international customs regulations.

(c) *Documentation requirements.* Unless the sturgeon caviar qualifies as a personal or household effect under § 23.15, the CITES document or an annex attached to the document must contain all information that is given on the label. The exact quantity of each species of caviar must be indicated on the CITES document.

(d) *Export quotas.* Commercial shipments of sturgeon caviar from stocks shared between different countries may be imported only if all of the following conditions have been met:

(1) The relevant countries have established annual export quotas for the shared stocks that were derived from catch quotas agreed among the countries. The quotas are based on an appropriate regional conservation strategy and monitoring regime and are not

§ 23.72

50 CFR Ch. I (10–1–12 Edition)

detrimental to the survival of the species in the wild.

(2) The quotas have been communicated to the CITES Secretariat and the Secretariat has communicated the annual export quotas to CITES Parties.

(3) The caviar is exported during the quota year (March 1 – last day of February) in which it was harvested and processed.

(e) *Re-exports*. Any re-export of sturgeon caviar must occur within 18 months from the date of issuance of the original export permit.

(f) *Pre-Convention*. Sturgeon caviar may not be imported, exported, or re-exported under a pre-Convention certificate.

(g) *Mixed caviar*. Caviar and caviar products that consist of roe from more than one species may only be imported into or exported from the United States if the exact quantity of roe from each species is known and is indicated on the CITES document.

(h) *U.S. application forms*. Application forms can be obtained from our website or by contacting us (see §23.7). For CITES document requirements, see §23.36 for export permits and §23.37 for re-export certificates. For export, complete Form 3-200-76 and submit it to the U.S. Management Authority. For re-export, complete Form 3-200-73 and submit it to FWS Law Enforcement.

[72 FR 48448, Aug. 23, 2007, as amended at 73 FR 40986, July 17, 2008]

§ 23.72 How can I trade internationally in plants?

(a) *U.S. and foreign general provisions*: In addition to the requirements of this section, the import, export, or re-export of CITES plant specimens must meet the other requirements of this part (see subparts B and C for prohibitions and application procedures).

(b) *Seeds*. International shipments of seeds of any species listed in Appendix I, except for seeds of certain artificially propagated hybrids (see §23.92), or seeds of species listed in Appendix II or III with an annotation that includes seeds, must be accompanied by a valid CITES document. International shipments of CITES seeds that are artificially propagated also must be accompanied by a valid CITES document.

(c) *A plant propagated from exempt plant material*. A plant grown from exempt plant material is regulated by CITES.

(1) The proposed shipment of the specimen is treated as an export even if the exempt plant material from which it was derived was previously imported. The country of origin is the country in which the specimen ceased to qualify for the exemption.

(2) Plants grown from exempt plant material qualify as artificially propagated provided they are grown under controlled conditions.

(3) To export plants grown from exempt plant material under controlled conditions, complete Form 3-200-33 for a certificate for artificially propagated plants.

(d) *Salvaged plants*.

(1) For purposes of this section, *salvaged plant* means a plant taken from the wild as a result of some environmental modification in a country where a Party has done all of the following:

(i) Ensured that the environmental modification program does not threaten the survival of CITES plant species, and that protection of Appendix-I species *in situ* is considered a national and international obligation.

(ii) Established salvaged specimens in cultivation after concerted attempts have failed to ensure that the environmental modification program would not put at risk wild populations of CITES species.

(2) International trade in salvaged Appendix-I plants, and Appendix-II plants whose entry into trade might otherwise have been considered detrimental to the survival of the species in the wild, may be permitted only when all the following conditions are met:

(i) Such trade would clearly benefit the survival of the species in the wild or in cultivation.

(ii) Import is for the purposes of care and propagation.

(iii) Import is by a *bona fide* botanic garden or scientific institution.

(iv) Any salvaged Appendix-I plant will not be sold or used to establish a commercial operation for artificial propagation after import.
