§§ 337.7-337.9

- (iii) Deposit placement network means a network in which an insured depository institution participates, together with other insured depository institutions, for the processing and receipt of reciprocal deposits.
- (iv) Network member bank means an insured depository institution that is a member of a deposit placement network
- (v) Reciprocal deposits means deposits received by an agent institution through a deposit placement network with the same maturity (if any) and in the same aggregate amount as covered deposits placed by the agent institution in other network member banks.
- (f) A market is any readily defined geographical area in which the rates offered by any one insured depository institution soliciting deposits in that area may affect the rates offered by other insured depository institutions operating in the same area. The effective yield on a deposit with an odd maturity shall be determined by interpolating between the yields offered by other insured depository institutions on deposits of the next longer and shorter maturities offered in the market. For purposes of this §337.6, a presumption shall exist that the prevailing rate or effective yield in the relevant market is the national rate as defined in paragraph (b)(2)(ii)(B) of this section unless the FDIC determines, in its sole discretion based on available evidence, that the effective yield in that market differs from the national rate. Evidence of the effective yield in a particular market may include (but is not limited to) the following:
- (1) Evidence as to the rates paid by other insured depository institutions in the same State, county or metropolitan statistical area (though the FDIC shall not be obligated to recognize each State, county or metropolitan statistical area as a separate market area);
- (2) Evidence as to the rates paid by credit unions in the same market area if the FDIC determines that the insured depository institution competes directly with these credit unions; and
- (3) Evidence as to the different rates paid on different deposit products in the same market area (though the FDIC shall not be obligated to recog-

nize all alleged distinctions among various deposit products). (Example: For a particular market, evidence exists that the rates on money market deposit accounts (MMDAs) differ from the rates on negotiable order of withdrawal (NOW) accounts. MMDAs are distinguishable from NOW accounts in that the two types of accounts are subject to different legal requirements. Under these circumstances, for this market, the FDIC could recognize that the prevailing rate on MMDAs is different than the prevailing rate on NOW accounts.)

§§ 337.7-337.9 [Reserved]

§ 337.10 Waiver.

An insured State nonmember bank has the right to petition the Board of Directors of the Corporation for a waiver of this part or any subpart thereof with respect to any particular transaction or series of similar transactions. A waiver may be granted at the discretion of the Board upon a showing of good cause. All such petitions should be filed with the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

[39 FR 29179, Aug. 14, 1974, as amended at 67 FR 71071, Nov. 29, 2002]

§ 337.11 Effect on other banking practices.

(a) Nothing in this part shall be construed as restricting in any manner the Corporation's authority to deal with any banking practice which is deemed to be unsafe or unsound or otherwise not in accordance with law, rule, or regulation; or which violates any condition imposed in writing by the Corporation in connection with the granting of any application or other request by an FDIC-Supervised institution, or any written agreement entered into by such institution with the Corporation. Compliance with the provisions of this
