Camp Ouachita, Ouachita NF, AR	1,000,000
Washtita Battlefield, OK	1,500,000
Backcountry Hut repairs, AK	500,000
Log Transfer Facilities, Tongass NF, AK	500,000
Forestry Science Bldg re- pairs, Princeton WV	315,000
Monongahela facilities im- provements, WV	1,340,000
Hardwood Technology Ctr., Purdue Univ., IN	3,100,000

Durability Test Facility, FPL, WI	500,000
Chugach NF, visitor cen- ter, AK	1,000,000
Lewis & Clark Ctr., MT	284,000
Total	168,652,000

The funds provided for construction of backcountry huts in Alaska shall be used to contract with the Alaska Mountain and Wilderness Huts Association at Snow River to perform the work.

The Committee has included bill language authorizing the Forest Service to transfer previously appropriated funds in addition to the \$3,100,000 provided for fiscal year 2003, to Purdue University for construction of the Hardwood Tree Improvement and Regeneration Center.

Within the funds provided for facilities capital improvement and maintenance, \$1,000,000 is for the Institute of Pacific Island Forestry, HI.

The Committee recommends that the agency continue to lease the administrative buildings in Newcastle, Wyoming until a permanent facility is established to provide

continued operations within the community of Newcastle.

The Committee has been informed that the Forest Service has utilized funds appropriated in fiscal year 2001 for the Seward multi-agency administrative facility for other purposes without seeking authority from the Committee. The Committee directs the Forest Service to replace the funds appropriated for the Seward facility by using funds from general administrative functions and to expedite this project. The Committee notes that the funds for the Chugach NF visitor center in Cordova shall be the final amount provided by the Forest Service. In addition, the agency shall be given a share of the space in this facility proportional to the agency's share of the construction cost.

Roads.—The Committee recommends \$235,566,000 for road maintenance and capital improvement, which is an increase of \$3,673,000 above the budget request, and \$5,900,000 above the enacted level. The funding allocations are set out below.

Road Maintenance/Capital Improvement	\$229,666,000
---	---------------

Highland Scenic Highway, Williams River Improvements, WV	1,300,000
Road Improvements, Tongass NF, AK	4,000,000
Avalanche Control, Chugach NF, AK	600,000
Total	236,566,000

The Committee has included \$4,000,000 for construction and reconstruction of roads on the Tongass National Forest. Within the funds provided, \$3,000,000 shall be allocated for retrofitting and road decommissioning in the Lake Tahoe Basin.

Trails.—The Committee recommends \$69,572,000 for trail maintenance and capital improvement, which is \$503,000 below the en-

acted level, and \$743,000 above the request. The funding allocations are set out below.	
Trail Maintenance/Improvement	\$68,712,000
San Sophia Station, CO	500,000
Pinhoti Trail, AL	360,000
Total	69,572,000

Infrastructure improvement.—The Committee recommends \$69,866,000 for infrastructure improvements which is \$19,000,000 above the request.

The Committee has not provided the \$10,000,000 for office collocations with the Bureau of Land Management as proposed in the budget request. Before providing these funds, the Committee believes a more prudent

course is for the Forest Service to analyze the number of sites where such collocations would be beneficial and provide the Committee with a report indicating the locations of these sites and the funds necessary to accomplish this objective.

LAND ACQUISITION

Appropriations, 2002	\$149,742,000
Budget estimate, 2003	130,510,000
Committee recommendation	148,263,000

The Committee recommends \$148,263,000 for land acquisition, \$17,753,000 above the budget request.

The Committee recommends the following distribution of funds:

Project	Forest	Committee recommendation
Arkansas Rivers and Streams (incl. Stumpy Point and Lake Winona)		
Big Sur Ecosystem	Ozark-St. Francis NF (AR)	\$3,000,000
Black Hills Critical Inholdings	Los Padres NF (CA)	3,000,000
Bonneville Shoreline Trail	Black Hills NF (SD)	3,700,000
Brider-Teton	Wasatch-Cache NF (UT)	2,265,000
Broad River Corridor	Brider-Teton NF (WY)	4,584,000
Chattanooga W&R/Chattooga River	Sumter NF (SC)	5,000,000
Clinch Ranch District and New Castle Ranger District	Chattahoochee NF/Nantahala NF (SC/GA/NC)	2,000,000
Columbia River Gorge NSA	Jefferson NF (VA)	2,600,000
Critically Sensitive Lands	CRONSA (OR/WA)	10,000,000
Daniel Boone Assorted Inholdings	Lake Tahoe Basin (CA/NV)	6,700,000
Florida National Scenic Trail	Daniel Boone NF (KY)	2,500,000
Francis Marion	Multiple (FL)	500,000
Gascon Point (Sawyer)	Francis Marion NF (SC)	4,000,000
Georgia Mountains	Santa Fe NF (NM)	5,500,000
Greater Yellowstone Area	Chattahoochee NF (GA)	3,200,000
Green Mountain Recreation & Water Enhancement	Multiple (MT)	9,300,000
High Uintas	Green Mountain NF (VT)	1,750,000
Hoosier Unique Areas	Wasatch-Cache NF (UT)	4,250,000
I-90 Corridor/Plum Creek & Cascade Conservation Partnership	Hoosier NF (IN)	2,500,000
La Madera	Mt. Baker-Snoqualmie NF (WA)	6,000,000
Lake Labish Restoration Project	Cibola NF (NM)	3,800,000
Minnesota Wilderness/Water/Wildlife	Willamette NF (OR)	500,000
Mount Sentinel	Chippewa NF/Superior NF (MN)	1,650,000
Northwest Wild & Scenic Rivers (incl. Illinois WSR and Skagit)	Lolo NF (MT)	800,000
Ozarks Mountain Streams and Rivers	Multiple (OR/WA)	2,500,000
Pacific Crest Trail	Mark Twain NF (MO)	2,000,000
Pacific Northwest Streams (incl. Salmon Streams of the Siuslaw and Arrowleaf)	Multiple (CA/OR/WA)	3,000,000
Red Mountain	Multiple (OR/WA)	4,000,000
Sedona/Red Rocks (incl. Thomas Point & Woo Ranch)	Uncompahgre NF/San Juan NF (CO)	5,000,000
Ottawa NF	Coconino NF (AZ)	2,500,000
SPI, North Fork American River	Ottawa NF (MI)	6,000,000
Swan Valley	Tahoe NF (CA)	2,000,000
Talladega	Flathead NF (MT)	8,000,000
Tennessee Mountains	Talladega NF (AL)	700,000
Thunder Mountain	Cherokee NF (TN)	4,400,000
Watershed, RY Timber	Payette NF (ID)	2,000,000
White Mountain	Beaverhead-Deerlodge NF (MT)	5,700,000
White Sulphur Springs/John Lee Hollow	White Mountain NF (NH)	500,000
Critical Inholdings/Wilderness Protection	Monongahela NF (WV)	4,100,000
Use of carryover/anticipated slippage	Multiple	3,000,000
Subtotal, Line Item Acquisitions		130,499,000
Acquisition Management (incl. Cash Equalization)		17,764,000
Total, FS Land Acquisition		148,263,000

Consistent with the budget request, the Committee has provided a substantial increase for acquisition management. The Committee expects that the additional amounts provided will be sufficient to execute the acquisition program in an efficient manner, and that the Forest Service will ensure that acquisition management funds are being spent appropriately and that project dollars are not being used for acquisition management or otherwise misallocated.

The Committee understands negotiations are ongoing between the Forest Service and outside parties to purchase Snow Country byways in the Ottawa NF. Should an agreement satisfactory to all parties be reached, the funds designated for the Ottawa NF in this report should be used for those lands.

ACQUISITION OF LANDS FOR NATIONAL FORESTS, SPECIAL ACTS

Appropriations, 2002	\$1,069,000
Budget estimate, 2003	1,069,000
Committee recommendation	1,069,000

The Committee recommends an appropriation of \$1,069,000 which is equal to the fiscal year 2002 enacted level. These funds are derived from receipts at certain forests.

ACQUISITION OF LANDS TO COMPLETE LAND EXCHANGES

Appropriations, 2002	\$234,000
Budget estimate, 2003	234,000
Committee recommendation	234,000

The Committee recommends an appropriation of \$234,000, which is equal to the fiscal year 2002 enacted level. This amount is derived from funds deposited by State, county, and municipal governments or public school authorities pursuant to the Act of December 4, 1967, as amended (16 U.S.C. 484a).

RANGE BETTERMENT FUND (Special Fund, Indefinite)

Appropriations, 2002	\$3,290,000
Budget estimate, 2003	3,402,000
Committee recommendation	3,402,000

The Committee recommends an appropriation of \$3,402,000, which is equal to the request. This amount is for range rehabilitation, protection, and improvement, and is derived from fees received for livestock grazing on National Forests pursuant to section 401(b)(1) of Public Law 94-579, as amended.

GIFTS, DONATIONS AND BEQUESTS FOR FOREST AND RANGELAND RESEARCH

Appropriations, 2002	\$92,000
Budget estimate, 2003	92,000
Committee recommendation	92,000

The Committee recommends an appropriation of \$92,000, the same as the budget estimate and the fiscal year 2002 enacted level. This amount is derived from the fund established under 16 U.S.C. 1643(b).

MANAGEMENT OF NATIONAL FOREST LANDS FOR SUBSISTENCE USES SUBSISTENCE MANAGEMENT, FOREST SERVICE

Appropriations, 2002	\$5,488,000
Budget estimate, 2003	5,542,000
Committee recommendation	5,542,000

The Committee recommends \$5,542,000 for subsistence management of forest lands in the State of Alaska, which is the same as the budget request.

ADMINISTRATIVE PROVISIONS, FOREST SERVICE

The Committee has continued many of the same administrative provisions as provided in prior years.

Language is included which authorizes the Forest Service to provide funds to the National Forest Foundation to match up to \$2,250,000 in private contributions on a 1-for-1 basis for projects on National Forest System lands or related to Forest Service programs. The Committee has authorized up to \$400,000 of Federal funds provided, may be used for administrative expenses of the Foundation.

Language is included which provides funds for the National Fish and Wildlife Foundation in the amount of \$2,650,000 on a 1-for-1 matching basis with private contributions for projects on or benefiting National Forest System lands.

Language is included which allows the Forest Service to transfer appropriated funds to the Bureau of Land Management from the National Forest System account for work related to the management of wild horses and burros. The amount of funds transferred with this authority should be displayed in subsequent budget justifications.

Language is included which permits the Secretary of Agriculture to sell excess buildings and other facilities on the Green Mountain National Forest and to retain the revenues for maintenance and rehabilitation activities on the forest.

Language is included allowing up to \$15,000,000 to be transferred to the Secretary of Commerce or the Secretary of the Interior for Endangered Species Act consultations.

The Committee notes the expected increases in indirect costs for the Forest Service despite the administration's emphasis on streamlining agency operations and reducing such costs. While the Committee is skeptical that such costs can be reduced by 50 percent, as proposed by the administration, it is imperative that substantial reductions occur in order to increase the availability of funds for on-the-ground work. Although the Committee has eliminated prescriptive bill language regarding management of indirect

costs, the Committee directs the Forest Service to continue to display agency indirect costs in future budget justifications, continue its use of standard definitions for such costs, and report to the Committee any changes in such definitions. Further, the Committee directs that indirect expenses charged to the Knutson-Vandenberg, Brush Disposal, Cooperative Work-Other, and Salvage Sale funds shall be limited to no more than 20 percent of total obligations.

DEPARTMENT OF ENERGY BUDGET DOCUMENTATION

The Committee continues to be deeply concerned with the quality and content of the Department's budget justification and related documents. The information presented to Congress—information on which it must base critical funding decisions—is often incomplete, frequently uninformative, and generally lacking in clarity and specificity. Proposed changes in activities from one fiscal year to another are regularly left unexplained. Indeed, the Department's budget documents are replete with examples where funding levels have been proposed for change, including the outright termination of ongoing activities, yet no justification or explanation is offered. Particularly troublesome are the proposed changes in statutory language which are presented to Congress without explanation.

Unfortunately, these concerns are not new, nor is this the first time the Committee has advised the Department of this ongoing problem. Consequently, the Committee directs the Department to evaluate its current budget formulation and request process, and, within 90 days of enactment of this Act, present the Committee with a plan for addressing this problem. At a minimum, the Committee expects future budget justifications to include a full explanation of any funding change of \$50,000 or more within a specific activity, and fiscal year crosswalks

detailling, at the activity level, any project initiations or terminations. In addition, the Department is directed to fully explain in future justifications proposed changes to statutory language, including a detailed description of the need for such changes and the history of any statutes and regulations affected. This directive was included on page 85 of Senate Report 106-312, but has been utterly ignored by the Department and the Office of Management and Budget despite the fact that such explanations are required by OMB itself.

CLEAN COAL TECHNOLOGY (DEFERRAL)

The Committee recommends a deferral of \$70,000,000 in previously appropriated funding for the Clean Coal Technology program. The Committee understands that the projects for which this funding will be used are progressing, but at a somewhat slower pace than originally anticipated.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

Appropriations, 2002	\$622,490,000
Budget estimate, 2003	529,305,000
Committee recommendation	625,665,000

The Committee recommends \$625,665,000 for fossil energy research and development, an increase of \$3,175,000 over the equivalent enacted level in fiscal year 2002. More than \$77,700,000 in programmatic increases above the budget request were necessitated by the Department's proposed early termination of valuable research projects, many of which, in the opinion of the Committee, are central to our Nation's energy security. In addition, the Committee has not agreed to the use of \$14,000,000 in previously appropriated funds. The amounts recommend by the Committee as compared to the budget estimate are shown below.

	Budget estimate	Committee recommendation	Change
Clean coal power initiative (new budget auth.) (By transfer)	\$110,000,000 40,000,000	\$150,000,000	+ \$40,000, - 40,000,000
Total	150,000,000	150,000,000
Coal and Power Systems:			
Central Systems	84,950,000	95,250,000	+ 10,300,000
Distributed Generation Systems—Fuel Cells	49,500,000	64,525,000	+ 15,025,000
Sequestration R&D	54,000,000	41,965,000	- 12,035,000
Fuels	5,000,000	27,300,000	+ 22,300,000
Advanced Research	31,650,000	34,150,000	+ 2,500,000
Subtotal, Coal and Power Systems	225,100,000	263,190,000	+ 38,090,000
Gas	22,590,000	46,320,000	+ 23,730,000
Petroleum—Oil Technology	35,400,000	44,300,000	+ 8,900,000
Cooperative R&D	6,000,000	8,340,000	+ 2,340,000
Fossil energy environmental restoration	9,715,000	9,715,000
Import/export authorization	2,500,000	3,000,000	+ 500,000
Headquarters program direction	15,820,000	18,900,000	+ 3,080,000
Energy technology Center program direction	54,880,000	69,900,000	+ 15,020,000
General plant projects	2,000,000	6,000,000	+ 4,000,000
Advanced Metallurgical Processes: Advanced metallurgical processes	5,300,000	6,000,000	+ 700,000
Total, Fossil Energy Research and Development	529,305,000	625,665,000	+ 82,360,000

Clean Coal Power Initiative.—The Committee recommends \$150,000,000 in new budget authority for the clean coal power initiative in keeping with the President's stated commitment to provide \$2,000,000,000 over 10 years for clean coal technologies. The Committee does not agree to the Department's proposal to use \$40,000,000 in previously appropriated clean coal funds.	
Coal and Power Systems:		
Central Systems	84,950,000	95,250,000
Distributed Generation Systems—Fuel Cells	49,500,000	64,525,000
Sequestration R&D	54,000,000	41,965,000
Fuels	5,000,000	27,300,000
Advanced Research	31,650,000	34,150,000
Subtotal, Coal and Power Systems	225,100,000	263,190,000
Gas	22,590,000	46,320,000
Petroleum—Oil Technology	35,400,000	44,300,000
Cooperative R&D	6,000,000	8,340,000
Fossil energy environmental restoration	9,715,000	9,715,000
Import/export authorization	2,500,000	3,000,000
Headquarters program direction	15,820,000	18,900,000
Energy technology Center program direction	54,880,000	69,900,000
General plant projects	2,000,000	6,000,000
Advanced Metallurgical Processes: Advanced metallurgical processes	5,300,000	6,000,000
Total, Fossil Energy Research and Development	529,305,000	625,665,000

Clean Coal Power Initiative.—The Committee recommends \$150,000,000 in new budget authority for the clean coal power initiative in keeping with the President's stated commitment to provide \$2,000,000,000 over 10 years for clean coal technologies. The Committee does not agree to the Department's proposal to use \$40,000,000 in previously appropriated clean coal funds.

The Committee is aware of promising results from a pilot test of electro-catalytic oxidation (ECO) multi-pollutant control technology for fossil fuel-fired power plants previously supported by Congress. The Department of Energy has supported mercury removal testing as part of this pilot and the Ohio Coal Development Office is supporting a 50 megawatt (MW) demonstration of this

technology. Full scale (several hundred MW) demonstration of this type of multi-pollutant technology would be an appropriate use of Clean Coal Technology funds.

Fuels and Power Systems.—The Committee recommends \$263,190,000 for fuels and power systems, an increase of \$16,689,000 over the fiscal year 2002 enacted level and \$38,090,000 over the budget request. In Central Systems, increases above the budget request total \$10,300,000, of which \$1,000,000 is to support an evaluation program of elemental mercury emissions reduction from North Dakota lignite-fired power plants, \$4,000,000 is for IGCC including continued support of the ion transport membrane (ITM) oxygen project, \$2,300,000 is for advanced combustion systems, and \$3,000,000 is for turbines. In Dis-

tributed Generation, increases above the request total \$15,025,000, of which \$1,000,000 is for advanced research (continuation of the electrochemical engineering program at MSU), \$2,000,000 is for Vision 21 hybrids, \$11,500,000 is for innovative systems concepts (for the SECA program), and \$525,000 is for novel generation (ramgen). Within the amount provided for Fuel Cell Systems, \$3,000,000 is to continue work on the Molten Carbonate Hybrid project started in fiscal year 2002. In Sequestration Research and Development, there is a decrease below the budget request of \$12,035,000. In Fuels, increases above the budget request total \$22,300,000, of which \$15,000,000 is for transportation fuels and chemicals (of which \$7,000,000 is for ultra clean fuels), \$4,000,000 is

for solid fuels and feedstocks (of which \$1,000,000 is for CPCPC and \$3,000,000 is for CAST), and \$3,300,000 is for advanced fuels research (of which \$2,000,000 is for the C-1 chemistry program and \$1,300,000 is for the carbon products program). And, in Advanced Research, increases above the budget request total \$2,500,000, of which \$1,000,000 is for coal utilization science (continuation of the Arctic Energy Office), \$1,000,000 is for materials, and \$2,000,000 is for technology crosscut (for continuation of the supercomputing program). Decreases below the budget request total \$1,500,000, of which \$1,000,000 is from University Coal Research and \$500,000 is from HBCU Research Activities.

The Committee is aware of the ongoing work between NETL, Western Kentucky University, and other institutions to initiate a Consortium to Study Coal Combustion. The Department is encouraged to use a portion of the \$2,300,000 increase in Advanced Combustion Systems to begin development of this Consortium.

Within the increase provided for Transportation Fuels and Chemicals, the Department should continue ongoing projects including the clean diesel fuels program in cooperation with the University of Alaska, small footprint plant conversion technology and the ITM syngas project.

Natural Gas Technologies.—The Committee recommends \$46,320,000 for natural gas technologies, an increase of \$1,120,000 over the fiscal year 2002 enacted level, and \$23,730,000 over the budget request. In Exploration and Production, increases above the budget request total \$7,000,000, of which \$3,000,000 is for the Deep Trek program, \$1,000,000 is for continuation of the lab/industry partnerships, and \$3,000,000 is for the Arctic Energy Office (of which \$2,000,000 is directed toward research on the Alaska gas pipeline). In Gas Hydrates, increases above the budget request total \$5,000,000. In Infrastructure, increases above the request total \$9,050,000, of which \$2,000,000 is for storage technology and \$7,000,000 is for infrastructure technology. In Emerging Processing Technology, increases above the budget total \$2,680,000 (for the

final phase of the coal mine methane demonstration program).

Oil Technologies.—The Committee recommends \$44,300,000 for oil technologies, a decrease of \$11,699,000 from the fiscal year 2002 enacted level and an increase of \$8,900,000 from the budget request. In Exploration and Production, increases above the budget request total \$9,000,000, of which \$500,000 is for advanced drilling, \$1,500,000 is for advanced diagnostics, \$2,000,000 is for the lab/industry partnerships, \$2,000,000 is for reservoir efficiency, \$1,500,000 is for PRIME, and \$1,500,000 is for the Arctic Energy Office of which \$500,000 is to continue oxygen transport ceramic membrane research. In Reservoir Life Extension, Reservoir Life Extension includes an overall reduction of \$500,000 from the budget request level, including a decrease of \$1,500,000 from Technology Transfer and an increase of \$1,000,000 for PUMP. And, in Effective Environmental Protection, increases above the budget request total \$400,000 for the risk assessment program split equally between the RBDMS Base Program and the coalbed methane interface for MT and Alaska.

Cooperative Research and Development.—The Committee recommends \$8,340,000 for cooperative research and development, an increase of \$100,000 over the fiscal year 2002 enacted level, and \$2,340,000 above the budget request.

Environmental Restoration.—The Committee recommends \$9,715,000 for environmental restoration, and increase of \$215,000 above the fiscal year 2002 enacted level and fully commensurate with the budget request.

Program Direction and Management Support.—The Committee recommends \$88,800,000 for program direction and management support, an increase of \$2,800,000 above the fiscal year 2002 enacted level, and \$18,100,000 above the budget request. The sizable increase above the budget request is attributable to the fact that the Committee has not followed the Department's practice of counting previously appropriated program direction funding. Of the funds provided, \$18,900,000 is for headquarters program direction and \$69,900,000 is for field program direction.

Plant and Capital Equipment.—The Committee recommends \$6,000,000 for plant and capital equipment, a decrease of \$7,450,000 from the fiscal year 2002 enacted level, and an increase of \$4,000,000 above the budget request. Of the funds made available, \$2,000,000 is for general plant projects (including the Albany Research Center) and \$4,000,000 is for the second installment of the infrastructure improvement program at the National Energy Technology Laboratory. The Committee is hopeful that the Department will heed its direction of last year and include the NETL funding as part of the base in future years.

Advanced Metallurgical Processes.—The Committee recommends \$6,000,000 for advanced metallurgical processes, an increase of \$800,000 from the fiscal year 2002 enacted level, and \$700,000 above the budget request.

NAVAL PETROLEUM AND OIL SHALE RESERVES Appropriations, 2002 \$17,371,000
Budget estimate, 2003 20,831,000
Committee recommendation 20,831,000

The Committee recommends \$20,831,000 for the Naval Petroleum and Oil Shale Reserves, the same as the budget request.

ELK HILLS SCHOOL LANDS FUND Appropriations, 2002 \$36,000,000
Budget estimate, 2003 36,000,000
Committee recommendation (advance appropriation) 36,000,000

The Committee recommends \$36,000,000 for the Elk Hills school lands fund, the same as the budget request and the fiscal year 2002 level. These funds will become available on October 1, 2003.

ENERGY CONSERVATION Appropriations, 2002 \$912,805,000
Budget estimate, 2003 901,651,000
Committee recommendation 884,293,000

The amounts recommended by the Committee compared with the budget estimates by activity are shown in the following table:

	Budget estimate	Committee recommendation	Change
Building Technology, State and Community Sector	\$408,791,000	\$366,993,000	-\$41,798,000
Federal Energy Management Program	27,880,000	26,880,000	-1,000,000
Industry Sector	138,359,000	140,859,000	+2,500,000
Power Technologies	63,904,000	65,154,000	+1,250,000
Transportation	222,664,000	244,354,000	+21,690,000
Policy and management	40,053,000	40,053,000
Total, Energy Conservation	901,651,000	884,293,000	-17,358,000

Building Technology, State and Community Sector

Federal Energy Management Program

Total, Energy Conservation

The detail table at the back of the report displays the distribution of funds among the activities in energy conservation. Changes to the budget request are detailed below.

Building, Technology, State and Community Sector.—In buildings, research, and standards, increases include \$5,000,000 in equipment, materials, and tools, of which \$4,000,000 is for the Next Generation of Lighting Initiative and \$1,000,000 is for window technologies, and \$1,000,000 for lighting and appliance standards. Decreases include \$700,000 for technical and program management support.

In building technology assistance, there is an increase of \$6,202,000 for the State energy program, a decrease of \$52,100,000 for weatherization assistance and a decrease of \$1,000,000 for Energy Star.

Federal Energy Management Program.—The Committee recommends a reduction of \$1,000,000 from the budget request for the Federal Energy Management Program.

Industry Sector.—For industry sector research, the Committee recommends a net increase of \$2,500,000 above the request for in-

dustries of the future (crosscutting). Within the increase above the request, \$1,000,000 is provided for industrial materials of the future, \$1,500,000 is provided for the inventions and innovations program, and \$2,000,000 is provided to fund a regional bio-based products consortia. The Committee encourages this organization to work toward becoming self-sustaining. In industries of the future (crosscutting), there are decreases of \$1,000,000 for industrial assessment centers and \$1,000,000 for technical and program management support. The Committee encourages the mining vision to emphasize research that reduces the cost of mineral production and to document best practices.

Power Technologies.—For power technologies, increases include \$1,000,000 for gas turbines and \$250,000 for fuel flexibility to be dedicated to oil heat research. Within available funds, the Department should consider funding for the National Accounts Energy Alliance.

Transportation Sector.—For transportation sector research, there is an increase of \$21,690,000. The Committee recommends a

\$8,000,000 net increase for vehicle technologies research and development, including \$2,000,000 for combustion and aftertreatment research and development, \$1,000,000 for light truck engines, \$5,000,000 for heavy truck engines, \$1,000,000 for gasoline boosting technology research, \$1,500,000 for off-highway engine research and development, including research on locomotive engines, agricultural, and other off-highway equipment, and \$1,000,000 for advanced battery development. The Committee recommends decreases of \$3,000,000 for fuel cell research and development (including \$1,400,000 for systems, \$1,000,000 for stack subsystems components, and \$600,000 for fuel processor storage), and \$500,000 for vehicle systems optimization. Within the funds provided, the Northwest Alliance for Transportation Technologies (NATT) should be expanded to support the continued development of essential power systems advanced emissions technologies for Light and Heavy Duty vehicles.

Other transportation program increases include an increase of \$4,690,000 for fuels utilization research and development. Within this increase, \$990,000 is for alternative fuels for automobiles and light trucks, \$1,000,000 is for medium trucks, and \$1,000,000 is for heavy trucks. Also within this increase is \$1,700,000 for fueling infrastructure. The Committee expects the Department to consider the natural gas CNG Cylinder Safety Inspection and Certification Training program within that increase.

The Committee recommends a \$8,000,000 increase for materials technologies, including \$2,000,000 for automotive propulsion materials, \$5,000,000 for automotive lightweight materials, and \$1,000,000 for heavy vehicle strength reduction materials to support continued funding of on-going research on Metal Matrix Composites.

In technology deployment, the Committee recommends a \$2,000,000 increase for the Clean Cities program and decreases of \$500,000 for testing and evaluation and \$500,000 for replacement fuels. The Committee is aware of work being done by the National Ethanol Vehicle Coalition to increase E-85 fueling capacity, and urges the Department to give careful consideration to proposals that may be submitted to further this goal.

General.—By means of this report, the Committee approves the reorganizational reprogramming submitted by the Office of Energy Efficiency and Renewable Energy. The Committee still questions certain aspects of this proposal, particularly the board of directors and it expects that its concerns will be addressed when the new organization is in place.

As is mentioned earlier in this report, the Committee directs the Office of Energy Efficiency and Renewable Energy to revise and restructure the budget justification document submitted to this subcommittee for fiscal year 2004. The fiscal year 2004 budget justification should include a detailed cross-walk table from the old budget structure and organization to the new budget structure and organization, as well as provide adequate explanations of programmatic changes. The Office should not use the current format that repeats the same program explanation each year. Instead, EERE should detail and justify any changes made to the enacted level.

ECONOMIC REGULATION

Appropriations, 2002	\$1,996,000
Budget estimate, 2003	1,487,000
Committee recommenda-	
tion	1,487,000

The Committee recommends \$1,487,000 for economic regulation, equal to the budget request.

STRATEGIC PETROLEUM RESERVE

Appropriations, 2002	\$179,009,000
Budget estimate, 2003	168,856,000
Committee recommenda-	
tion	172,856,000

The Committee recommends \$172,856,000 for the Strategic Petroleum Reserve, a decrease of \$6,153,000 from the fiscal year 2002 enacted level, and an increase of \$4,000,000 from the budget request. Of the amount provided, the Committee recommends \$158,856,000 for storage facilities development and operations, an increase of \$4,000,000 over the budget request. These funds are to be used for the electricity and operational requirements directly associated with injecting oil into the Reserve's caverns. The increase is offset by reducing the SPR Petroleum Account by a corresponding amount. This change will preserve consistency in accounting, and allow comparability of costs over time. The Committee's recommendation also includes \$14,000,000 for management. Finally, funding

for the Northeast Home Heating Oil Reserve has been retained in a separate account.

SPR PETROLEUM ACCOUNT

Appropriations, 2002	
Budget estimate, 2003	\$11,000,000
Committee recommenda-	
tion	7,000,000

The Committee recommends \$7,000,000 for the SPR Petroleum Account, a decrease of \$4,000,000 below the budget request. This decrease is fully explained in the recommendations for the Strategic Petroleum Reserve.

NORTHEAST HOME HEATING OIL RESERVE

Appropriations, 2002	\$8,000,000
Budget estimate, 2003	8,000,000
Committee recommenda-	
tion	6,000,000

The Committee recommends \$6,000,000 for the Northeast Home Heating Oil Reserve, a decrease of \$2,000,000 from the fiscal year 2002 enacted level and the budget request. The reduction is to be offset by the use of carry-over balances.

ENERGY INFORMATION ADMINISTRATION

Appropriations, 2002	\$78,499,000
Budget estimate, 2003	80,111,000
Committee recommenda-	
tion	80,111,000

The Committee recommends \$80,111,000 for the Energy Information Administration, which is the same as the budget estimate.

The Committee is concerned about the quality, consistency, and timeliness of the data published by EIA on coal production and consumption as well as the electric utility sector. EIA is directed to resolve and correct the problems surrounding this data.

The Committee is also aware that the EIA forecasts for nuclear energy in the "Annual Energy Outlook" have required significant revision over the past several years. EIA should review its nuclear energy models to assess whether the information presented is accurate, reliable, and based on sound economic assumptions.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

INDIAN HEALTH SERVICE

INDIAN HEALTH SERVICES

Appropriations, 2002	\$2,389,614,000
Budget estimate, 2003	2,452,997,000
Committee recommenda-	
tion	2,455,881,000

The Committee recommends an appropriation of \$2,455,881,000 for Health Services. This amount is \$66,267,000 above the current year enacted level and \$2,884,000 above the budget estimate. Increases above the budget estimate include: \$230,000 for the Ketchikan Native Corporation to correct a reconciliation error that would have resulted in an unintended decrease to the base funds available for the operation of a clinic in Ketchikan; and \$95,000 for the Recruitment and Retention of American Indians into Nursing (RAIN) program at the University of North Dakota. This national program has proven to be highly successful in recruiting and graduating American Indians with degrees in nursing. A decrease of \$500,000 has been taken from the proposed \$1,500,000 increase for the epidemiological centers. Within Indian health professions, the Committee has continued base funding of \$250,000 for the University of Montana and \$250,000 for the University of North Dakota to continue their InPsych programs, and \$750,000 for the University of North Dakota to continue its INMED program. Within urban health services, an amount of \$1,000,000 is retained in base funding for the dental program run by First Nations Community Health Sources in cooperation with the Southwest Indian Poly-

technic Institute. An amount of \$4,000,000 remains in the base for the Telehealth Initiative in Alaska. An amount of \$4,150,000 for additional recruitment efforts proposed in the budget estimate has not been included in the Committee's recommendations because it is unclear why many of the proposed activities could not be accomplished within existing funds.

The Committee has restored an amount of \$9,709,000 in proposed administrative reductions or transfers within the Services account. The Committee does not agree to the proposed reductions of \$4,435,000 from tribal operations and \$4,436,000 from direct operations for managerial reforms. The budget estimate indicates that these reductions are to be taken from administrative positions and costs associated with travel, training, copying, and similar activities. In the time period from 1993-2001, the FTE levels at IHS headquarters were reduced by 60 percent. Regional program staffing levels were reduced by 58 percent. Given these statistics, as well as the vast need for improved services, the Committee cannot support these proposals. Further, the Committee does not agree to the proposed transfer of \$838,000 for consolidation of the Legislative Affairs Office at IHS with that of the U.S. Department of Health and Human Services (DHHS). The complexity and variety of issues that surround the provision of health services to Native Americans and Alaska Natives demand an unusual degree of expertise and experience. It is the Committee's view that Native American health issues merit greater emphasis and attention than would be gained in a consolidation at the Department's headquarters level. As in past years, language has been included in the bill under Administrative Provisions requiring that any changes to the appropriation structure of the Indian Health Service be approved in advance by the House and Senate Appropriations Committees. This language would pertain to any consolidation plans the Department of Health and Human Services may wish to implement that would redirect funds appropriated to the IHS for specific functions.

The Committee does not agree to the budget proposal that would require the Indian Health Service to absorb \$11,899,000 in retirement annuity payments for Commissioned Corps Officers and, therefore, has included language in the bill continuing the current system of non-reimbursable contributions by the U.S. Department of Health and Human Services to the Retirement Pay and Medical Benefits for Commissioned Officers account. Given the enormous needs in every area of health services for Native Americans, the Committee cannot support a proposal that would use already insufficient program dollars to cover the unfunded increase.

Bill language has also been included regarding base funds of \$15,000,000 that are directed to the Alaska Federation of Natives for alcohol control, prevention, and treatment. The bill language would designate \$100,000 of the overall amount for an independent third party (1) to conduct an evaluation of the program, including each grantee and contractor, which will include by region the number of clients, including recidivism rates, and the impact on overall alcoholism and crime rates, and (2) to make recommendations for improvement, provided that no more than 5 percent may be used by any entity receiving funding for administrative overhead including indirect costs.

The Committee expects the Service to continue the diabetes prevention and research activities centered at the National Diabetes Prevention Center in Gallup, New Mexico, and jointly funded by the Centers for Disease Control.

Within 45 days of receiving a request to expand the contract health service area of the

Mississippi Band of Choctaw Indians to cover members in the western Tennessee counties of Lauderdale, Shelby and Tipton, the Director of the Indian Health Service shall rule on such request. If the request is not approved, the Director shall report to the Committee within 30 days of his ruling the specific reasons for the denial. Prior to accepting the request for expansion of the service area, the Service shall consult with the tribe regarding the documentation and information required by the Service in order to process the request.

INDIAN HEALTH FACILITIES

Appropriations, 2002	\$369,487,000
Budget estimate, 2003	362,571,000
Committee recommendation	365,390,000

The Committee has provided an appropriation of \$365,390,000 for Indian health facilities. This amount is \$4,097,000 below the enacted level and \$2,819,000 above the budget request. The detail table at the back of the report displays the proposed distribution of funds among the Service's facilities programs.

Within health care facilities construction, the Committee recommends the following distribution:

Health care facilities construction	Budget estimate	Committee recommendation
Hospitals:		
Fort Defiance, AZ	\$20,400,000	\$16,400,000
Winnebago, NE	8,241,000	8,241,000
Outpatient Facilities:		
Pinon, AZ	13,900,000	16,000,000
Red Mesa, AZ	7,653,000	7,653,000
Pawnee, OK	10,639,000	12,633,000
St. Paul, AK	11,167,000	5,584,000
Metlakatla, AK	308,000
Sisseton, SD	3,000,000
Staff quarters: Bethel	5,000,000

As indicated above, an amount of \$308,000 for the health clinic at Metlakatla, AK, is recommended by the Committee with the understanding that an additional \$5,000,000 will be dedicated to the construction project from available carryover funds.

The Committee has included bill language that would prohibit the use of Indian Health Service appropriated funds for sanitation facilities construction associated with new homes funded with grants by housing programs of the Department of Housing and Urban Development (DHUD). These DHUD housing grant programs for new homes are able to fund the sanitation facilities necessary for the homes.

The Committee strongly encourages the Indian Health Service, from its Sanitation Facilities Construction program, to continue to fund at the highest level possible within the current IHS priority list, construction of a new drinking water system for the Shoshone-Bannock Tribes of the Fort Hall Reservation in Idaho.

Last year, the Committee instructed the Indian Health Service to continue its review of the facilities priority system with the goal of better reflecting the full range of need for facilities in Indian country. Since that time, the Committee understands that a work group assembled by the facilities appropriations tribal advisory board has completed a draft report for the board's consideration. That report is available to the public through the Service's web site. Once the board has had the opportunity to consider the group's recommendations, a final report will be issued for consideration by the tribes and the Service. Upon issuance of the final report, the Committee expects that future budget requests will better reflect the range of needs identified by the report.

The Committee is concerned about reports that the small ambulatory grant program

lacks representation from tribes in the eastern region of the United States. While recognizing that this is a competitive program, the Committee encourages the Service to consider geographic distribution as one of the criteria for selection in applications that are otherwise similarly evaluated.

OTHER RELATED AGENCIES

OFFICE OF NAVAJO AND HOPI INDIAN RELOCATION

SALARIES AND EXPENSES

Appropriations, 2002	\$15,148,000
Budget estimate, 2003	14,491,000
Committee recommendation	14,491,000

The Committee recommends an appropriation of \$14,491,000 which is \$657,000 below the fiscal year 2002 level and is the same as the budget estimate.

INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT

PAYMENTS TO THE INSTITUTE

Appropriations, 2002	\$4,490,000
Budget estimate, 2003	5,130,000
Committee recommendation	5,130,000

The Committee recommends an appropriation of \$5,130,000, which is the same as the budget estimate.

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES
(INCLUDING RESCISSION)

Appropriations, 2002	\$420,960,000
Budget estimate, 2003	434,660,000
Committee recommendation	436,660,000

The Committee recommends an appropriation of \$436,660,000 for salaries and expenses of the Smithsonian Institution. This amount is \$2,000,000 above the budget estimate. The detail table at the back of the report displays the proposed allocation of funds among the Institution's programs. The increase to the budget estimate is provided to the National Museum of American History for its 9/11 initiative.

The Smithsonian's Inspector General found that for fiscal years 1998 through 2000, the Board of Regents approved \$699,000,000 in trust fund expenditures while the Institution spent \$1,070,000,000. This discrepancy was due to the lack of coherent and comprehensive budget proposals for the Institution's trust funded activities. The Committee is pleased that the Institution has developed a plan to address this issue, and urges its timely implementation. The Committee also urges the Institution to implement such interim measures as are necessary to mitigate the risks associated with incomplete trust budget proposals.

REPAIR, RESTORATION AND ALTERATION OF FACILITIES

Appropriations, 2002	\$67,900,000
Budget estimate, 2003	81,300,000
Committee recommendation	78,300,000

The Committee recommends an appropriation of \$78,300,000 for the repair and restoration of facilities. This amount is \$3,000,000 below the budget request and an increase of \$10,400,000 above the fiscal year 2002 enacted level. The Committee has included bill language proposed in the budget justification that would allow for funds from this appropriation to be used for salaries of personnel assigned to facilities projects. The bill also includes language providing for the issuance of a single procurement contract for the repair and renovation of the Patent Office Building. Within funds provided, the Smithsonian should address the need for a Mall entrance

to the National Museum of Natural History that meets the American with Disabilities Act regulations.

The Committee requested the National Academy of Public Administration to examine the needs for restoration and renovation of Smithsonian facilities, and a report was received by the Committee in July, 2001 which recommends \$1,500,000,000 in repairs and renovations to ensure the safety and security of the collections, facilities, employees and visitors at the Smithsonian's 400 buildings. The Committee is providing \$78,300,000 for the repair and restoration of facilities as a beginning to the \$1,500,000,000 that is needed over the next 10 years.

CONSTRUCTION

Appropriations, 2002	\$30,000,000
Budget estimate, 2003	12,000,000
Committee recommendation	16,000,000

The Committee recommends an appropriation of \$16,000,000 for construction of Smithsonian facilities. This amount exceeds the budget estimate by \$4,000,000 and is designated in full for ongoing construction of the National Museum of the American Indian. Based on the most recent information provided to the Committee, these additional funds are necessary to meet the Museum's remaining contractual obligations.

The Committee has included language proposed in the budget justification that would allow the use of construction funds for salaries of personnel required for construction projects.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

Appropriations, 2002	\$71,115,000
Budget estimate, 2003	78,219,000
Committee recommendation	77,219,000

The Committee recommends an appropriation of \$77,219,000 for salaries and expenses at the National Gallery of Art. This amount is \$6,104,000 above the enacted level and \$1,000,000 below the budget estimate. The Committee does not concur with the proposal to fund the special exhibitions program at \$807,000 and has provided an additional \$2,199,000 in order to maintain the current operating level of \$3,026,000. An increase of \$952,000 above the enacted level has been included for preventive maintenance and facilities repairs. Given the overall budget constraints faced by the Committee, as well as the priority placed on restoring special exhibitions funds, it was not possible to meet the budget estimate for those activities in full. The detail table at the back of the report displays the distribution of funds among and Gallery's activities and, with the exceptions noted above, is in agreement with the budget request.

REPAIR, RESTORATION, AND RENOVATION OF BUILDINGS

Appropriations, 2002	\$14,220,000
Budget estimate, 2003	16,230,000
Committee recommendation	16,230,000

The Committee recommends an appropriation of \$16,230,000 for the repair, restoration, and renovation of buildings. This amount meets the budget estimate, and provides funding to continue Master Facilities Plan projects, as well as ongoing renovation and repair work. The Committee expects that any proposal by the Gallery to apply these funds in a manner that is not readily apparent from the fiscal year 2003 budget presentation will be brought to the Committee's attention before action is taken.

JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

OPERATIONS AND MAINTENANCE

Appropriations, 2002	\$19,310,000
----------------------------	--------------

Budget estimate, 2003	16,310,000
Committee recommendation	16,310,000
The Committee recommends an appropriation of \$16,310,000 to meet the budget estimate for the operations and maintenance of the John F. Kennedy Center for the Performing Arts.	
CONSTRUCTION	
Appropriations, 2002	\$19,000,000
Budget estimate, 2003	17,600,000
Committee recommendation	17,600,000

The Committee recommends an appropriation of \$17,600,000 to meet the budget request for major construction and renovation projects of the Kennedy Center.

WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

SALARIES AND EXPENSES	
Appropriations, 2002	\$7,796,000
Budget estimate, 2003	8,488,000
Committee recommendation	8,488,000

The Committee recommends an appropriation of \$8,488,000 for the Woodrow Wilson International Center for Scholars, an amount that meets the budget request. The detail table at the back of the report displays the proposed distribution of funding for the center's activities in the coming fiscal year.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL ENDOWMENT FOR THE ARTS	
GRANTS AND ADMINISTRATION	
Appropriations, 2002	\$98,234,000
Budget estimate, 2003	99,489,000
Committee recommendation	¹ 116,489,000

¹Includes funds previously appropriated separately through the Challenge America fund account.

The Committee recommends an appropriation of \$116,489,000 for the National Endowment of the Arts. This total includes an amount of \$99,489,000 for grants and administration, and \$17,000,000 for the Challenge America Fund, which has been folded into the NEA account to more accurately reflect overall program levels. Both sums are in agreement with the budget estimate.

Language in title III of the bill retains provisions from prior years regarding priority for rural and underserved communities; priority for grants that encourage public knowledge, education, understanding, and appreciation of the arts; restrictions regarding individual grants, subgranting, and seasonal support; a 15-percent cap on the total amount of grant funds directed to any one State; designation of a category for grants of national significance; and authority to solicit and invest funds.

The detail table at the back of the report displays the proposed distribution among the endowment's activities.

NATIONAL ENDOWMENT FOR THE HUMANITIES

GRANTS AND ADMINISTRATION	
Appropriations, 2002	\$108,382,000
Budget estimate, 2003	109,632,000
Committee recommendation	109,632,000

The Committee recommends an appropriation of \$109,632,000 for grants and administration of the National Endowment for the Humanities, an amount that meets the budget estimate. The detail table at the back of the report displays the distribution of funds among the agency's various activities.

As in prior years, the Committee has included bill language providing the Endowment with the authority to solicit and invest funds.

MATCHING GRANTS	
Appropriations, 2002	\$16,122,000
Budget estimate, 2003	16,122,000
Committee recommendation	16,122,000

The Committee recommends an appropriation of \$16,122,000 for matching grants. This amount meets the budget request and provides \$10,436,000 for Challenge grants and \$5,686,000 is for Treasury funds.

COMMISSION OF FINE ARTS	
SALARIES AND EXPENSES	
Appropriations, 2002	\$1,224,000
Budget estimate, 2003	1,224,000
Committee recommendation	1,224,000

The Committee recommends an appropriation of \$1,224,000 for the Commission of Fine Arts, an amount that meets the fiscal year 2003 budget estimate. The Committee expects that the Commission of Fine Arts will continue to serve as the administering agency for the National Capital Arts and Cultural Affairs Program. It had been proposed in the budget estimate to transfer this program to the D.C. Commission on the Arts and Humanities.

NATIONAL CAPITAL ARTS AND CULTURAL AFFAIRS

Appropriations, 2002	\$7,000,000
Budget estimate, 2003	7,000,000
Committee recommendation	7,000,000

The Committee recommends an appropriation of \$7,000,000 for the National Capital Arts and Cultural Affairs Program. The Committee does not agree with the proposal to administer these funds through the D.C. Commission on the Arts and Humanities and, therefore, expects the Commission of Fine Arts to continue managing the program in the same manner as it has in the past.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Appropriations, 2002	\$3,400,000
Budget estimate, 2003	3,667,000
Committee recommendation	3,667,000

The Committee recommends \$3,667,000, the same as the budget request.

NATIONAL CAPITAL PLANNING COMMISSION

SALARIES AND EXPENSES	
Appropriations, 2002	\$8,011,000
Budget estimate, 2003	7,253,000
Committee recommendation	7,253,000

The Committee recommends an appropriation of \$7,253,000 for the National Capital Planning Commission, which meets the budget estimate.

UNITED STATES HOLOCAUST MEMORIAL MUSEUM

HOLOCAUST MEMORIAL MUSEUM	
Appropriations, 2002	\$36,028,000
Budget estimate, 2003	38,663,000
Committee recommendation	38,663,000

The Committee recommends an appropriation of \$38,663,000 for the Holocaust Memorial Museum. This amount meets the fiscal year 2003 budget estimate, which includes funds for fixed cost increases and additional maintenance needs.

PRESIDIO TRUST

PRESIDIO TRUST FUND	
Appropriations, 2002	\$23,125,000
Budget estimate, 2003	21,327,000
Committee recommendation	21,327,000

The Committee recommends \$21,327,000 for the Presidio Trust, a decrease of \$1,798,000

from the fiscal year 2002 enacted level and fully commensurate with the budget request.

TITLE III—GENERAL PROVISIONS

The Committee has recommended inclusion of several general provisions in the bill including the following:

SEC. 301. Provides that contracts which provide consulting services be a matter of public record and available for public review, except where otherwise provided by law.

SEC. 302. Provides that appropriations available in the bill shall not be used to produce literature or otherwise promote public support of a legislative proposal on which legislative action is not complete.

SEC. 303. Provides that appropriations made available in this bill will not remain available beyond the current fiscal year unless otherwise provided.

SEC. 304. Provides that appropriations made available in this bill cannot be used to provide a cook, chauffeur, or other personal servants.

SEC. 305. Provides for restrictions on departmental assessments unless approved by the Committees on Appropriations.

SEC. 306. Limits the actions of the Forest Service and the Bureau of Land Management with regard to the sale of giant sequoia trees to a manner consistent with such sales as were conducted in fiscal year 2000.

SEC. 307. Prohibits the National Park Service from implementing a concession contract which permits or requires the removal of the underground lunchroom at Carlsbad Caverns National Park.

SEC. 308. Retains mining patent moratorium carried in previous years.

SEC. 309. Provides that funds appropriated to the Bureau of Indian Affairs and the Indian Health Service for contract support costs for fiscal years 1994 through 2001 are the total amounts available except that, for the Bureau of Indian Affairs, tribes and tribal organizations may use their tribal priority allocations for unmet indirect costs of ongoing contracts, grants, self-governance compacts, or annual funding agreements.

SEC. 310. Includes language allowing competition for watershed restoration projects through the "Jobs in the Woods" component of the President's forest plan for the Pacific Northwest or for the "Jobs in the Woods" program for Alaska to be limited to individuals and entities in historically timber-dependent areas covered by the plan.

SEC. 311. Includes language defining the grantmaking capabilities and responsibilities of the National Endowment of the Arts. Grants to individuals may be made only for literature fellowships, national heritage fellowships, or American jazz masters fellowships. The Chairperson of the Endowment will establish procedures to ensure that grants made, except those to a State or local arts agency, will not be used to make a further grant to any other organization or individual to conduct activity independent of the direct grant recipient. Grants for seasonal support may not be awarded unless the application is specific to the contents of the season.

SEC. 312. Includes language allowing the National Endowment for the Arts and the National Endowment for the Humanities to raise funds and receive gifts, to deposit such in an interest-bearing account for the appropriate Endowment, and to use such to further the functions of the respective Endowments in accordance with the specified intent of the donors.

SEC. 313. Provides language for awarding financial assistance to underserved populations under the National Foundation on the Arts and the Humanities Act of 1965. With funds appropriated to carry out section 5 of the act, the chairman will establish a

category of national significance grants. With the exception of this grant category, the chairman will not make grants exceeding 15 percent, in the aggregate, of such funds to any single State.

SEC. 314. Prohibits the use of appropriations to fund any activities associated with the issuance of the 5-year program under the Forest and Rangeland Renewable Resources Planning Act. Strategic planning activities carried out for that act should now be completed as part of the agency's compliance with the Government Performance and Results Act, Public Law 103-62.

SEC. 315. Prohibits the use of funds to support Government-wide administrative functions unless they are justified in the budget process and approved by the House and Senate Appropriations Committees.

SEC. 316. Prohibits the use of funds for GSA telecommunication centers.

SEC. 317. Prohibits the use of funds to make improvements to Pennsylvania Avenue in front of the White House without Committee approval.

SEC. 318. Provides additional authority to use the roads and trails funds for priority forest health related management. The Committee recognizes that there is a serious backlog in important road, trail and bridge work throughout the national forest system just as there is a serious backlog in needed management related to forest health.

SEC. 319. Addresses timber sales involving Alaska western red cedar. This language slightly modifies a provision carried in the fiscal year 2002 bill, which deals with export of certain western red cedar timber from Alaska. Mills which process western red cedar in the Pacific Northwest have an insufficient supply of western red cedar, and the national forest in southeast Alaska sometimes has a surplus. This provision continues a program by which Alaska's surplus western red cedar is made available preferentially to U.S. domestic mills outside Alaska, prior to export abroad.

SEC. 320. Provides that the Forest Service may not inappropriately use the Recreation Fee Demonstration program to supplant existing recreation concessions on the national forests.

SEC. 321. Continues a provision providing that the Secretary of Agriculture shall not be considered in violation of certain provisions of the Forest and Rangeland Renewable Resources Planning Act solely because more than 15 years have passed without revision of a forest plan, provided that the Secretary is working in good faith to complete the plan revision within available funds.

SEC. 322. Prohibits oil, natural gas and mining related activities within current national monument boundaries.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 2002 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR FISCAL YEAR 2003

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION, AND RELATED AGENCIES APPROPRIATION BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. SPECTER, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for Departments of Labor, Health and Human Services, and Education and related agencies for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amount of budget authority

Total bill as reported to Senate	\$430,133,003,000
Amount of adjusted appropriations, 2002	412,247,133,000
Budget estimates, 2003	425,777,165,000
The bill as reported to the Senate:	
Over the adjusted appropriations for 2002	+17,885,870,000
Over the budget estimates for 2003	+4,355,838,000

SUMMARY OF BUDGET ESTIMATES AND COMMITTEE RECOMMENDATIONS

For fiscal year 2003, the Committee recommends total budget authority of \$430,133,003,000 for the Departments of Labor, Health and Human Services, and Education, and Related Agencies. Of this amount, \$131,399,000,000 is current year discretionary funding.

OVERVIEW AND BILL HIGHLIGHTS

The Labor, HHS, and Education and Related Agencies bill constitutes the largest of the non-defense Federal appropriations bills being considered by Congress this year. It is the product of extensive deliberations, driven by the realization that no task before Congress is more important than safeguarding and improving the health and well-being of all Americans. This bill is made up of over 300 programs, spanning three Federal Departments and numerous related agencies. But the bill is more than its component parts. Virtually every element of this bill reflects the traditional ideal of democracy: that every citizen deserves the right to a basic education and job skills training; protection from illness and want; and an equal opportunity to reach one's highest potential.

This bill at the same time provides a safety net of social protections for the needy while stimulating advances in human achievement and the life sciences. At its core, this bill embodies those defining principles by which any free society must be guided: compassion for the less fortunate; respect for family and loved ones; acceptance of personal responsibility for one's actions; character development; and the avoidance of destructive behavior.

HIGHLIGHTS OF THE BILL

Physical Activity and Nutrition.—The Committee recommendation includes a total of \$940,467,000 for programs to increase physical activity, improve nutrition, and reduce obesity and overweight.

Job Training.—The Committee recommendation includes \$5,120,084,000 for job training programs, an increase of \$144,321,000 over the budget request.

Worker protection.—The Committee bill includes \$1,239,500,000 to ensure the health and safety of workers, including \$462,314,000 for the Occupational Safety and Health Administration and \$271,841,000 for the Mine Safety and Health Administration. The recommendation is an increase of \$61,000,000 over the 2002 level.

Child Labor.—The Committee bill includes \$148,015,000 for activities designed to end abusive child labor. This is \$93,441,000 above the budget request.

Persons With Disabilities.—To promote independent living in home and community based settings, the Committee has included \$6,960,162,000 for services to persons with disabilities. This includes \$27,000,000 for programs authorized under the Assistive Technology Act. In addition, the recommendation includes \$47,015,000 for the Office of Disability Policy at the Department of Labor, and \$40,000,000 for Real Choice Systems Change Grants through the Center for Medicaid and Medicare Services.

National Institutes of Health.—A total of \$27,167,926,000 is recommended to fund biomedical research at the 27 Institutes and Centers that comprise the NIH. This represents an increase of \$3,712,083,000 over the fiscal year 2002 level and is the same as the budget request. This appropriation completes the historic 5-year effort to double the funding for the NIH.

Minority health, education and training initiative.—The Committee bill includes \$2,116,187,000, an increase of \$144,258,000 over the 2002 appropriation for an initiative to provide greater support for minority health, education and training programs.

AIDS.—The Committee bill includes \$5,677,026,000 for AIDS research, prevention, and services. This includes \$2,051,295,000 for Ryan White programs, an increase of \$140,570,000 over the fiscal year 2002 level, and \$860,293,000 for AIDS prevention programs at the Centers for Disease Control and Prevention.

Bioterrorism initiative.—The Committee bill includes \$3,741,080,000 to fund efforts to address bioterrorism threats.

Health Centers.—The recommendation includes \$1,533,570,000 for health centers, an increase of \$75,706,000 over the budget request and \$190,000,000 over the fiscal 2002 level.

Centers for Disease Control.—The Committee bill provides \$745,600,000 within the Centers for Disease Control and Prevention to combat chronic disease and promote health. The amount recommended is \$55,370,000 over the budget request.

Substance abuse.—The Committee bill provides \$2,278,379,000 for substance abuse prevention and treatment programs. This is an increase of \$63,985,000 over the 2002 enacted level. The recommendation restores proposed reductions to substance abuse prevention programs and supports an increase of \$60,000,000 for the substance abuse prevention and treatment block grant.

Head Start.—The Committee recommendation includes \$6,667,533,000 for the Head Start Program. This represents an increase of \$129,893,000 over the 2002 level and is the same as the request.

Low-income home energy assistance state grants.—The Committee recommends \$1,700,000,000 for heating and cooling assistance for low-income individuals and families, \$300,000,000 more than the request and the same as the 2002 level.

Education for the Disadvantaged.—The Committee has provided \$13,178,400,000 in grants to enhance educational opportunities for disadvantaged children. This includes an increase of \$1,000,000,000 over the fiscal year 2002 amount for grants to local education agencies, bringing the total to \$11,350,000,000.

Teacher Quality.—The Committee recommends \$2,850,000,000 for State grants to

improve teacher quality. This is the same as both the fiscal year 2002 appropriation and the budget request.

English Language Acquisition.—The Committee recommends \$690,000,000 for bilingual education, an increase of \$25,000,000 over the administration request and the fiscal year 2002 level.

Student financial aid.—The Committee recommends \$13,151,500,000 for student financial assistance, an increase of \$866,000,000 over last year and \$384,000,000 more than the President's budget. The amount provided for the Pell Grant Program will allow the maximum grant to be raised to \$4,100, an increase of \$100 over the 2002 amount and the budget request.

Higher education initiatives.—The Committee bill provides \$2,047,640,000 for initiatives to provide greater opportunities for higher education, including \$832,500,000 for Federal TRIO programs.

Education for individuals with disabilities.—The Committee bill provides \$9,691,424,000 to help ensure that all children have access to a free and appropriate education, and that all infants and toddlers with disabilities have access to early intervention services. This represents an increase of \$1,018,620,000 over the 2002 level. Included in this appropriation is an increase of \$1,000,000,000 over last year's level for grants to States.

Rehabilitation services.—The bill recommends \$2,959,838,000 for rehabilitation services, an increase of \$14,025,000 above the amount provided in 2002. These funds are essential for families with disabilities seeking employment. The Committee restored funding for several important programs proposed for elimination, such as Supported Employment State Grants, Projects with Industry, Recreational programs and programs for migrant and seasonal farmworkers.

Services for older Americans.—For programs serving older Americans, the Committee recommendation totals \$3,034,636,000, an increase of \$128,080,000 over the fiscal year 2002. This recommendation includes \$212,547,000 for senior volunteer programs, \$440,200,000 for community service employment for older Americans, \$359,000,000 for supportive services and centers, \$150,000,000 for family caregiver support programs and \$721,670,000 for senior nutrition programs. For the medical research activities of the National Institute on Aging, the Committee recommends \$1,000,099,000. The Committee recommendation includes \$12,500,000 for the Medicare insurance counseling program.

PHYSICAL ACTIVITY AND NUTRITION INITIATIVE

Obesity has become our Nation's fastest rising public health threat. All available data show that the number of Americans who are obese or overweight have reached epidemic proportions. An estimated 120 million people—61 percent of American adults—are either overweight or obese. This puts them at increased risk for chronic and life-threatening diseases such as heart disease, stroke, cancer and diabetes. Chronic diseases account for 7 out of every 10 U.S. deaths, and more than 60 percent of medical care expenditures.

Between 1980 and 1999 the number of obese American adults nearly doubled from approximately 15 percent to 27 percent. An estimated 300,000 premature deaths a year are associated with obesity and overweight, an amount second only to tobacco-related deaths. The total direct and indirect costs attributed to overweight and obesity amounted to \$117,000,000,000 in 2000. The problem is not limited to adults. Alarmingly, an increasing number of overweight youth in this country are at risk for chronic health problems or disabilities later in life. About 13 percent of children and 14 percent of adolescents are obese. The increase in obesity

and overweight among American youth over the past two decades has been dramatic, more than tripling in the past two decades. According to a recent study, hospital costs for diseases related to childhood obesity have increased threefold in the past 20 years. A recent study confirms that Americans are becoming obese at younger ages: approximately 27 percent of U.S. adults are obese by the time they reach their mid-30s, about twice the rate in the early 1960s.

This dramatic upsurge in obesity has been associated with a nationwide increase in diabetes. The prevalence of type 2 diabetes, the most common form of the disease, has tripled in the last 30 years. At least 80 percent of patients with type 2 diabetes are overweight or obese. Type 2 diabetes was commonly known in the past as "adult onset" diabetes. However, research is showing a dramatic escalation in the number of children diagnosed with type 2 diabetes. Whereas fewer than 4 percent of childhood diabetes cases in 1990 were type 2, that number has risen to approximately 20 percent.

Problems with obesity and diabetes also disproportionately affect minority communities. Thirty percent of African Americans are obese, compared to 21 percent of whites. Black women were nearly twice as likely as white women to be obese, and one quarter of Hispanic women are obese. According to the CDC, African American are considered to have the highest rates of both obesity and diabetes among all races and ethnic groups. Among all groups, however, Native Americans have some of the highest prevalence rates of overweight. Among the highest rates reported are for American Indians in Arizona at 80 percent for women and 67 percent for men.

The good news is that many of the chronic diseases linked to obesity are preventable. Recent studies provide strong evidence that prevention efforts focusing on diet, exercise and other lifestyle changes can result in substantially reduced risk among high-risk groups. Last August a major clinical trial reported that Americans at high risk for type 2 diabetes can dramatically reduce their risk of getting the disease with improvements to their diet and exercise. In addition, exercise and nutrition can have health benefits for individuals of all ages and at all levels of fitness.

The Committee strongly believes a commitment to improving physical activity and nutrition is imperative if we are to reduce chronic disease, premature deaths and related health care costs. For this reason, the Committee has included a total of \$940,467,000 for programs designed to increase physical activity, healthy lifestyles and nutrition. This is an increase of \$60,219,000 over last year's level.

Recognizing the myriad physical activity promotion programs being undertaken by different Federal agencies, the Committee urges agencies receiving funds for this purpose under this bill to take special measures to coordinate their activities. In particular, the CDC's Division of Nutrition and Physical Activity (DNPA) should develop mechanisms such as interagency committees to coordinate with the Department of Education in administering such as programs as the Carol M. White Physical Education for Progress in order to leverage resources at the local level. The Committee notes the recent establishment of a Memorandum of Understanding between the CDC, the Department of Interior and the Department of Agriculture in the area of promoting physical activity as a valuable model.

Nutrition and Physical Activity

The Committee commends the substantial efforts that CDC is directing to stem the obe-

sity epidemic across all life stages. CDC is coordinating national, State, and school-based programs to research and implement health promotion and public health education strategies and interventions to increase physical activity levels and good nutrition at all ages, to provide important health information, and to monitor health and healthy behaviors in the population. CDC currently funds 12 States to promote physical activity and good nutrition to prevent and control obesity. The Committee recommends \$40,000,000 for primary prevention activities related to Nutrition, Physical Activity, and Obesity at CDC, an increase of \$12,495,000 over fiscal year 2002.

The Committee recognizes the potential to respond to this national problem through broad, population-based primary prevention strategies. The Committee encourages CDC to build on the successful CDC Guide to Community Preventive Services and the Guidelines for Comprehensive Programs to Promote Healthy Eating and Physical Activity, and to collect and disseminate information, evaluations, and planning guides that document a range of specific State and local policy and environmental interventions that provide practical, replicable approaches to improving nutrition and physical activity. The Committee recognizes coordination at the local level is critical, especially among community health and school-based efforts to promote physical activity and nutrition. The Committee recommends that the CDC urge its grantees to establish a position of statewide physical activity coordinator to oversee a comprehensive physical activity and nutrition program, in order to ensure resources are utilized to their optimum potential and to avoid duplicative efforts. This position could be funded through DNPA grants or elsewhere and could be located in the State Health Department, Governor's Council on Physical Fitness and Sports, or in the State Education Department.

Healthy Communities

The Committee provides \$20,000,000 to HRSA for the Healthy Communities Innovation Initiative, a new pilot program designed to prevent three of the most rapidly increasing chronic conditions in this country: diabetes, asthma, and obesity. The Committee is pleased that the Secretary has championed this program, which will develop coalitions between private and public organizations working in the areas of prevention, medical, social, educational, business, religious, and civic services. This program will encourage the development of innovative efforts in five communities to enhance access to services, encourage positive behavioral changes, and improve community health. The Committee further encourages the Secretary to stress the importance of weight reduction as a tool in preventing heart disease.

School Health

Obesity rates were significantly reduced among girls in grades 6-8 who participated in a school-based intervention program. The Committee applauds CDC for establishing effective coordinated school health programs in 20 States and 2 local education agencies. The Committee urges CDC to expand its coordinated school health program. The Committee has provided \$58,235,000 for coordinated school health to address risk behaviors such as tobacco use, unhealthy diets, and physical inactivity at CDC. The Committee urges CDC and the Department of Education to coordinate activities relating to nutrition and physical activity which will help to reduce obesity and prevent heart disease.

Head Start

The Committee commends the Department for its focus on prevention as a key to im-

proving the overall health and well-being of our Nation. The Committee also recognizes the importance of good nutrition and physical activity among young children for developing a fertile atmosphere for cognitive development and school readiness. According to the Nutrition Cognition National Advisory Committee at Tufts University in Massachusetts, children without an adequate diet may have trouble concentrating in school, participating in play, bonding with peers, and performing at their potential. Therefore, the Committee urges the Head Start Bureau to review the scope of good nutrition and physical activities which are presently being undertaken in response to the Head Start Performance Standards, as well as the current knowledge base on good nutrition and physical activities for young children. Further, the Committee urges the Head Start Bureau to review the activities presently being undertaken by local programs to promote healthy bodies as a prerequisite for strong minds and to identify best practices currently employed by local programs. As a follow up, the Committee encourages the Head Start Bureau, in collaboration with the National Head Start Association, to devise a plan for implementing a locally-determined but coordinated effort to achieve the goals of a stronger, more vibrant and effective nutritional and physical activity component within Head Start programs. The Committee expects that the Head Start Bureau will enter into a cooperative agreement with the National Head Start Association to carry out these activities.

Physical Education

Despite the well-publicized benefits of exercise, more than 60 percent of American adults do not get enough physical activity to provide health benefits. This trend is not limited to adults: more than a third of young people in grades 9-12 do not regularly engage in physical activity. Nearly one-half of American youths aged 12-21 years are not vigorously active on a regular basis. Physical education (PE) classes are important for ensuring that young people have a minimal, regular amount of physical activity and for establishing physical activity patterns that may be carried into adulthood. Yet the Committee notes that daily enrollment in physical education classes dropped from 42 percent to 25 percent among high school students between 1991 and 1995. In order to help reverse this trend, the Committee recommendation includes \$70,000,000 for the Carol M. White Physical Education for Progress program. This is an increase of \$20,000,000 over the fiscal year 2002 level and \$70,000,000 over the request. This program provides grants to local educational agencies and community-based organization to initiate, expand and improve physical education program for students in kindergarten through 12th grade. The PEP program will help curb this Nation's increasing obesity problem, which will in turn reduce the risk of developing heart disease later in life.

National Youth Fitness Survey

The Committee believes a national instrument to assess fitness levels of young people is needed to plan, execute and evaluate a comprehensive effort to address obesity and overweight. CDC conducted the National Children and Youth Fitness Survey (NCYFS) twice during the mid-1980's, funded under Departmental authority, but this survey was discontinued. The Committee believes NCYFS should be re-established. The NCYFS should include the same measures of fitness used previously, in order to allow for comparisons with past data, and should incorporate new measures, in order to reflect new understandings of appropriate fitness assessment. In addition, in developing a new NC

fiscal years, consideration should be given to establishing measures relating the provision of physical activity programs (physical education, recess, and after-school) and academic performance. The Committee envisions NCYFS to be done on regular 5-year intervals in the future.

PREVENTING AND REVERSING HEART DISEASE INITIATIVE

Nearly 62 million Americans, young and old, live with the effects of cardiovascular disease. The Nation's number one killer, cardiovascular disease costs society an estimated \$330,000,000,000 annually in medical costs and lost productivity. Challenges to combating this disease include persistent geographic, racial, and ethnic disparities, the increased prevalence of sedentary lifestyles, obesity rates, and deficiencies in the use of proven and effective treatments for those already afflicted with cardiovascular disease.

On May 16, 2002, the Subcommittee on Labor, Health and Human Services and Education convened a hearing to more closely examine the factors contributing to cardiovascular disease, and to explore possible approaches to prevent, control, and reverse its effects. Testimony heard from a variety of top medical experts reflected a common theme: All agreed that stress management, in conjunction with diet modification, exercise, and pharmacological and/or surgical intervention, can significantly improve the quality of life for those confronted with cardiovascular disease. Witnesses confirmed that cardiovascular disease usually begins several years before symptoms appear. Due to the body's compensation mechanisms many individuals function normally for years in an asymptomatic state, unaware that the disease is taking hold. Once symptoms become apparent, a disproportionate amount of medical resources are devoted to dealing with those symptomatic events, rather than taking preventive measures at a much earlier stage. Integrating technology, behavioral and metabolic medicine, and lifestyle modifications at an early age would shift that focus from reactive medicine to preventive medicine. For example, relatively simple lifestyle modifications, including exercise, nutrition plans and learning a relaxation response to stress, such as yoga techniques, have led to successful outcomes for individuals who are otherwise at risk. Individuals who have adopted these changes have experienced positive results, including weight loss, lower blood pressure and cholesterol levels, improved clinical symptoms and reduction in psychological distress. For many years the National Heart, Lung and Blood Institute has supported a vigorous program of research on the behavioral and psychological impact of cardiovascular disease. Data obtained by NHLBI confirmed that mental stress could cause myocardial ischemia or reduced blood flow.

Current evidence suggests that all individuals at risk for cardiovascular disease can benefit from stress reduction, but that general health and well-being are greatly improved if the first steps are taken during childhood. Among children, in fact, stress management programs have been shown to improve self-esteem, grade-point average and work habits while reducing violent behavior. To that end, the educational system in this country should be encouraged to incorporate stress management programs into school curriculum.

To address the prevention and reversing heart disease initiative, the Committee has included \$419,300,000 in addition to the amounts provided as part of the physical activity and nutrition initiative.

Obesity and nutrition programs work hand in hand in preventing and reducing heart dis-

ease. The Committee encourages the Departments of Health and Human Services and Education to coordinate the above programs and activities to address both initiatives.

Fund for Innovative Education

As part of the preventing and reversing heart disease initiative, the Committee has included \$1,000,000 to design programs to teach school children and teachers coping skills to help ease both the short- and long-term effects of stress. The Committee directs the Department to implement this initiative as soon as possible. Programs such as these have been scientifically proven to improve students' self-esteem, self-efficacy, control, grade point average, work habits, memory and cooperation.

National Institute of Heart, Lung and Blood

The Committee encourages the NHLBI, in conjunction with Walter Reed Medical Center, to conduct a controlled, prospective, randomized trial to compare the outcomes of utilizing a demanding vegetarian diet versus a more liberal diet that would also utilize lipid-lowering drugs, as well as the impact of relaxation response-based stress management programs. Such a trial could take place over a long period of time to allow a long-term assessment of outcomes.

Centers for Medicare and Medicaid Service

The Committee commends the Centers for Medicare and Medicaid Service (CMS) for their work on a lifestyle modification study comparing the efficacy and costs of two cardiac approaches to reversing heart disease.

Centers for Disease Control

The Committee has provided \$10,000,000 to increase CDC's cardiovascular programs as part of the Committee's initiative to prevent and reverse heart disease. The Committee urges the CDC to initiate research to examine strategies to prevent and reverse heart disease, including mind/body approaches to stress management, yoga, diet modifications, and exercise programs.

Minorities continue to be underrepresented in the health professions. To address disparities in the health care workforce, as well as the shortages in underserved communities, the Committee has included \$305,564,000 for health professions programs, including \$125,330,000 for centers of excellence, health careers opportunity programs, faculty loan repayment and scholarships for disadvantaged students. Also included is \$25,051,000 for nursing workforce diversity.

To improve the health of racial and ethnic populations through the development of effective health policies and programs to eliminate disparities in health, the Committee has provided \$283,258,000 including \$186,929,000 for the National Center on Minority Health and Health Disparities and \$46,329,000 for minority health improvements. Also included, to address areas hardest hit by the HIV-AIDS epidemic, is \$50,000,000 specifically targeted for minority AIDS programs.

For Indian education programs to help increase student achievement through early childhood, preschool, elementary and secondary education and vocational programs, the Committee has included \$129,368,000. Programs for migrant and Native American education and training are funded at \$579,101,000.

To aid institutions with a significant percentage of financially needy students, the Committee has provided an increase of \$36,788,000 over the fiscal year 2002 appropriation for a total of \$475,413,000. Included in this amount is \$82,000,000 for strengthening institutions, \$93,000,000 for Hispanic-serving institutions, \$215,415,000 for historically black colleges and universities, \$53,764,000 for strengthening historically black graduate institutions, and Native Alaskan and Native

Hawaiian institutions are funded at \$8,234,000.

To assist States, colleges, middle and high schools serving high percentages of low income students and improve postsecondary education opportunities for low-income individuals and first-generation college students, the Committee has included \$1,127,500,000 for the GEAR UP and TRIO programs. To assist Howard University with academic programs and the administration of the University hospital, the Committee recommends \$239,474,000. And to provide minority and low-income college students with information, preparation and financial assistance needed to gain access to complete law school, \$5,000,000 has been provided for the Thurgood Marshall legal educational opportunity program.

The increases provided for the above mentioned programs, along with funding for the National Institutes of Health, the Centers for Disease Control and Prevention, and the No child Left Behind Act, will go a long way towards eliminating health and education disparities.

SAFE MOTHERHOOD INITIATIVE

Over the last decade, the Committee has expressed its strong support for closing the gap in research on diseases and conditions specific to women and of including women and minorities in clinical research where they had previously been ignored. The Committee recognizes that much progress has been made to improve research and the quality of care for women. Yet over the past year, the Committee has grown increasingly concerned about the lack of progress that has been made in reducing the rates of maternal mortality and morbidity in the United States. The Committee notes that there has been no decline in pregnancy-related deaths or morbidity in 20 years. Although the Department of Health and Human Services set goals to reduce pregnancy-related deaths and illness set forth in Healthy People 2000 and again in Healthy People 2010, it has failed to do so.

Today, the United States ranks 20th out of 49 developed countries in maternal mortality related deaths. About 1,000 women a year—two to three every day—die from pregnancy-related causes. African American women are four times more likely to die from pregnancy-related illness or conditions; and women over the age of 35 are two to three times more likely to experience a pregnancy-related death compared to women aged 20–25. The rate of pre-term labor and delivery remains virtually unchanged as well.

Pregnancy-related illness affect an even wider number of women: in the United States one out of three pregnant women experience a major medical complication at some point during their pregnancy. And women who are high-risk, who have a chronic condition face even more difficult pregnancies, deliveries, and risk to their long-term health.

Despite the need for accurate information on prescription drug use by pregnant women, only 1 percent of FDA approved drugs have been shown in controlled studies to show no risk to pregnant women and their babies. And 80 percent of FDA approved drugs lack adequate scientific evidence about use in pregnancy. That means that pregnant women are left with little or no knowledge about the safety of medications, prescribed or over-the-counter, and their impact on the fetus.

The Committee believes it is time to live up to the commitments articulated in Healthy People 2000 and 2010 to reduce maternal mortality and morbidity and ensure a safe and healthy pregnancy for all women. In fact, a recent National Summit on Safe

Motherhood held by the CDC, and cosponsored by a range of agencies and organizations, laid the cornerstones of a strategy to improve our Nation's commitments to healthy pregnancies, healthy mothers, and healthy infants. The Committee calls on the Secretary to put key elements of such a safe motherhood initiative in place and has developed this Safe Motherhood initiative to help achieve these goals, including:

Improving the Safety of Medications for Pregnant Women

The Committee is very concerned about the lack of scientific data and studies on the safety and dosing of drugs for women who are pregnant. While drug testing in women raises important ethical considerations, the Committee believes that the NIH and FDA can develop appropriate protocols and mechanisms to improve the quality of information available to women and their health care providers about the safety and proper dosing of drugs and biologics taken during pregnancy. The Committee urges NIH to work with the FDA to improve the quality of information on drugs and biological products for women who are pregnant and lactating through grants, contract or other appropriate mechanisms to aid in promptly completing studies to determine the safety and dosing for marketed drugs and biologics that were not approved or licensed based on studies in pregnant women. The Director shall be prepared to report to the Committee at its annual review before the Committee on the progress and activities.

Improving National Data and Information related to Maternal Morbidity and Mortality

The Committee provides the CDC \$5,000,000 to establish a demonstration program to improve data collection about pregnancy-related complications and maternal mortality. CDC shall award grants to at least four States for the development of surveillance systems that use standard definitions of maternal morbidity and mortality that have been developed by the CDC in collaboration with the grant recipients. The quality of data and information about maternal morbidity and mortality is poor and unreliable. States do not use standard definitions of maternal morbidity or mortality. When States do collect data, it is impossible to compare their data, know precisely what is happening within the State, or to identify emerging trends across States.

CDC Safe Motherhood Activities

The committee commends CDC for its groundbreaking National Summit of Safe Motherhood and commends the agency for its work on its Safe Motherhood Initiative. The Summit succeeded in expanding our understanding of Safe Motherhood as a critical woman's health issue and identified the troubling lack of research and data on pregnancy-related issues. The Committee has provided an increase of \$2,000,000 to CDC to further its work identified at the Summit and to continue to carry out their existing Safe Motherhood activities.

Research to Reduce Poor Pregnancy Outcomes—and Racial and Ethnic Disparities

The Committee provides CDC \$2,000,000 to provide individual grants to community-based organizations, public and private research institutions and universities to conduct prevention and health promotion research to focus specifically on improving maternal outcomes in maternal morbidity and mortality, eliminating racial disparities in maternal morbidity and mortality, such as developing better health care models, population-based studies, prevention strategies, culturally sensitive and appropriate health care practice models, improved outreach and efforts and funding for minority organiza-

tions to provide technical assistance and outreach in minority communities. The research should take into consideration the role of stress, violence, discrimination, nutrition, obesity, and access to quality health care and health literacy.

Substance abuse treatment

According to the National Institute of Drug Abuse, more than 5 percent of the 4,000,000 women who gave birth in the United States in 1992 used illegal drugs while pregnant, according to the first and only nationally representative survey of drug use among pregnant women. That is an estimated 221,000 women gave birth that year while using illicit drugs during their pregnancy. The Committee notes that when a pregnant woman abuses drugs or alcohol, both she and her unborn child may suffer harm. In addition, substance abuse often creates or is accompanied by an array of social problems for the abuser and those around her, including violence, child abuse and neglect, and family dysfunction. Therefore, the Committee has provided SAMHSA with \$3,000,000 for residential treatment programs for pregnant women which provide comprehensive treatment service strategies, including outreach, intake and assessment, provision of comprehensive services, and follow-up for women and their children in order to reduce the harm caused to mothers and their children.

EDUCATION INITIATIVE

The No Child Left Behind Act, approved overwhelmingly by Congress in December 2001 and signed into law in January 2002, mandates the Nation's most sweeping education reforms in decades. It signals a new relationship between the Federal Government and public schools, one that is based on high expectations for every student—and strict accountability for success or failure. More than ever before, Federal dollars will be tied to academic achievement; States, districts, and schools must improve student performance, or face the consequences.

Most importantly, the law presumes that all children—regardless of race, ethnicity, disability, or proficiency in English—can succeed academically. That is a powerful notion, and it holds great potential to raise student performance across the Nation.

But that potential may not be realized if these high expectations aren't backed up with enough resources to make them attainable. While States and local communities provide more than 90 percent of funding for elementary and secondary education and our education system primarily is a State and local responsibility, the Federal Government does have a supporting role. That's why this education funding bill makes targeted investments in programs that support State and local education reform efforts. Hiring qualified teachers takes more than lofty goals and good intentions; it also takes money. So does replacing old textbooks, buying computers, implementing successful curricula, and numerous other measures that are critical to creating an environment where children can learn. Educators and parents need to believe their schools have enough money to give them a fighting chance to meet the new mandates. Without that trust, public opinion will quickly turn against the No Child Left Behind Act's reforms, and the high expectations that are the cornerstone of the law will be relaxed or ignored. That would be a tragic result for the millions of today's students who are receiving an inadequate education. For those reasons, the Committee has responded by adding more than \$1,700,000,000 for education over last year's historic increase in Federal funding. Almost \$800,000,000 of that amount is designated for programs authorized by the No Child Left Behind Act.

Title I grants to LEAs

One of the Committee's top educational priorities was to increase funding for Title I Grants to LEAs. Schools receiving Title I aid are at the greatest risk of failing to meet the academic standards mandated in the new law; they're also the schools upon which the most accountability measures have been placed. Therefore, the Committee has provided for this account a record-high \$11,350,000,000, an increase of \$1,000,000,000 over last year. The Committee allocated all of this increase through the two funding formulas that are the most targeted to the poorest schools.

Teacher quality programs

Another priority for the Committee in addressing the mandates of the No Child Left Behind Act was to increase funding for teacher quality programs, which can be used for a variety of measures, including teacher recruitment and retention, professional development, the reform of teacher certification requirements, and class-size reduction. The No Child Left Behind Act mandates that all teachers must be "highly qualified" by the end of the 2005-06 school year; in the near term, all Title I teachers hired after September 2002 must also meet that definition. Therefore, the Committee has provided more than \$3,350,000,000 for programs where funds may be used for specific activities in support of teacher quality.

English language acquisition

The No Child Left Behind Act establishes several new accountability measures that specifically address limited-English-proficient (LEP) students. States will be required to set annual yearly progress goals for the achievement of all children as well as specific groups of children, including LEP students. In addition, each State will be required to develop annual measurable objectives for LEP students; these objectives must track student progress in learning English and district progress in making adequate yearly progress for LEP students. The Committee recognizes that LEP students will face many unique challenges in trying to meet these goals; therefore, it has provided \$690,000,000 for English language acquisition State grants. While the increase in the overall program is \$25,000,000, States will receive an increase of \$75,000,000 over last year because less money is needed to support categorical programs that were consolidated under the No Child Left Behind Act.

Other key education programs

The Committee also directed additional funding to several other programs that will help States, districts, and schools meet the new education mandates. Among them:

- The Committee has provided a \$100,000,000 increase, as requested by the administration, for the Reading First program, for a total of \$1,000,000,000. This program provides State grants to improve reading instruction in grades K-3.
- The Committee has provided \$175,000,000, an increase of \$12,500,000 over last year, for rural education programs.
- The Committee has provided \$13,000,000, an increase of \$3,000,000 over last year, for dropout prevention grants.
- The Committee has provided \$15,000,000, an increase of \$5,000,000, for school leadership programs to help districts recruit and train principals.
- The Committee has provided \$37,584,000, an increase of \$2,584,000 over last year, for voluntary public school choice programs; such programs help enable parents of students in failing public schools to send their children to better public schools.

REPROGRAMMING AND INITIATION OF NEW PROGRAMS

Reprogramming is the utilization of funds for purposes other than those contemplated at the time of appropriation enactment. Reprogramming actions do not represent requests for additional funds from the Congress, rather, the reapplication of resources already available.

The Committee has a particular interest in approving reprogrammings which, although they may not change either the total amount available in an account or any of the purposes for which the appropriation is legally available, represent a significant departure from budget plans presented to the Committee in an agency's budget justification.

Consequently, the Committee directs that the Departments and agencies funded through this bill make a written request to the chairman of the Committee prior to reprogramming of funds in excess of 10 percent, or \$500,000, whichever is less, between programs, activities, or elements unless an alternate amount for the agency in question is specified elsewhere in this report. The Committee desires to have the requests for reprogramming actions which involve less than the above-mentioned amounts if such actions would have the effect of changing an agency's funding requirements in future years, if programs or projects specifically cited in the Committee's reports are affected or if the action can be considered to be the initiation of a new program.

The Committee directs that it be notified regarding reorganization of offices, programs, or activities prior to the planned implementation of such reorganizations.

The Committee further directs that each agency under its jurisdiction submit to the Committee statements on the effect of this appropriation act within 60 days of final enactment of this Act.

TRANSFER AUTHORITY

The Committee has included bill language permitting transfers up to 1 percent between discretionary appropriations accounts, as long as no such appropriation is increased by more than 3 percent by such transfer; however, the Appropriations Committees of both Houses of Congress must be notified at least 15 days in advance of any transfer. Similar bill language was carried in last year's bill for all three Departments.

Prior Committee notification is also required for actions requiring the use of general transfer authority unless otherwise provided for in this Act. Such transfers specifically include taps, or other assessments made between agencies, or between offices within agencies. Funds have been appropriated for each office funded by this Committee; it is not the intention of this Committee to augment those funding levels through the use of special assessments. This directive does not apply to working capital funds or other fee-for-service activities.

ACCRUAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dol-

lar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

**TITLE I—DEPARTMENT OF LABOR
EMPLOYMENT AND TRAINING ADMINISTRATION**

TRAINING AND EMPLOYMENT SERVICES

Appropriations, 2002	\$5,484,834,000
Budget estimate, 2003	4,975,763,000
Committee recommendation	5,120,084,000

The Committee recommends \$5,120,084,000 for this account in 2003 which provides funding authorized primarily by the Workforce Investment Act [WIA]. This is \$364,750,000 less than the 2002 level, and \$144,321,000 above the administration request.

Training and employment services is comprised of programs designed to enhance the employment and earnings of economically disadvantaged and dislocated workers, operated through a decentralized system of skill training and related services. This appropriation is generally forward-funded on a July-to-June cycle. Funds provided for fiscal year 2003 will support the program from July 1, 2003 through June 30, 2004.

Beginning with the fiscal year 2000 appropriation, budget constraints required that a portion of this account's funding be advance appropriated, with obligations for a portion of Adult and Dislocated Worker Employment and Training Activities and Job Corps delayed until the following fiscal year. This practice will continue in this year's appropriation.

Fiscal year 2000 was the first full year of operations under the new Workforce Investment Act, beginning July 1, 2000 through June 30, 2001. The new legislation is significantly enhancing employment and training services, consolidating, coordinating, and improving programs utilizing a local level one-stop delivery system. In concurring with the President's budget request for the youth, adult, and dislocated worker block grants, the administration expects that current participant levels will be maintained, due to the reported availability of large amounts of unspent funds carried over from prior years. However, the committee is aware that there is controversy over the accuracy of financial reporting under the Workforce Investment Act, and notes that the General Accounting

Office has made several recommendations to the Labor Department for improvements. Therefore, the Committee intends to carefully monitor this situation, recognizing the vital role of the workforce system at a time of economic slowdown.

Adult employment and training activities.—For Adult Employment and Training Activities, the Committee recommends \$900,000,000. This is \$50,000,000 less than the 2002 comparable level and the same as the budget request. This program is authorized by the Workforce Investment Act and is formula-funded to States and further distributed to local workforce investment boards. Services for adults will be provided through the One-Stop system and most customers receiving training will use their individual training accounts to determine which programs and providers fit their needs. The Act authorizes core services, which will be available to all adults with no eligibility requirements, and intensive services, for unemployed individuals who are not able to find jobs through core services alone.

Dislocated worker employment and training activities.—For Dislocated Worker Employment and Training Activities, the Committee recommends \$1,383,040,000, the same as the budget request. This is an increase of \$11,540,000 over the 2002 comparable level. Of this amount, \$1,106,432,000 is designated for State formula grants. This program, authorized by WIA, is a State-operated effort which provides core services, intensive services, training, and supportive services to help permanently separated workers return to productive, unsubsidized employment. In addition, States use these funds for rapid response assistance to help workers affected by mass layoffs and plant closures. The recommendation includes \$276,608,000 available to the Secretary for activities specified in WIA, primarily to respond to mass layoffs, plant and/or military base closings, and natural disasters across the country, which cannot be otherwise anticipated, as well as technical assistance and training and demonstration projects.

The Committee bill continues language authorizing the use of funds under the dislocated workers program for projects that provide assistance to new entrants in the workforce and incumbent workers.

The Committee recommendation includes, as it has in past years, funding for dislocated worker projects aimed at assisting the long-term unemployed.

The Committee encourages efforts to make certain that dislocated workers in low pay, entry-level jobs can qualify for help under the Dislocated Worker Program and get a fair share of the funding.

The Committee is aware of the substantial worker dislocation brought on by the closure of sugarcane plantations and the rapidly increasing demand for food safety training at all levels of food production. To meet these needs, the Committee reiterates its recommendation in last year's report to provide on-farm and off-farm food safety training for dislocated sugarcane workers employed in the agricultural and food sector. Due to economic reasons and family dysfunction, elderly caregivers care for thousands of preschool Hawaiian and part-Hawaiian children with little or no preparation. The Committee urges the Department to expand funding to programs which work to train and assist these caregivers and the children they serve. The Committee was pleased to learn from the Secretary that the administration has established an interagency effort to address our Nation's nursing shortage. The shortage is especially critical in rural America and within various ethnic minority populations, such as native Hawaiians. The Department is accordingly strongly urged to work with

nursing programs serving such populations, and in particular, to ensure that summer employment opportunities exist for nursing students.

Youth activities.—For Youth Activities, the Committee recommends \$1,000,965,000, the same as the budget request. Youth Activities, authorized by WIA, consolidates the Summer Youth Employment and Training Program under JTPA Title IIB, and Youth Training Grants under JTPA Title IIC. In addition to consolidating programs, WIA also requires Youth Activities to be connected to the One-Stop system as one way to link youth to all available community resources. The purpose of Youth Activities is to provide eligible youth with assistance in achieving academic and employment success through improving educational and skill competencies and providing connections to employers. Other activities include providing mentoring opportunities, opportunities for training, supportive services, summer employment opportunities that are directly linked to academic and occupational learning, incentives for recognition and achievement, and activities related to leadership development, citizenship, and community service.

Youth opportunity grants.—For Youth Opportunity Grants, the Committee recommends \$44,500,000, the same as the budget request. Combined with funds from prior years, it is expected that this amount will be sufficient to continue funding the 36 existing Youth Opportunity Grants that meet performance goals. These grants are aimed at increasing the long-term employment of youth who live in empowerment zones, enterprise communities, and other high-poverty areas. Surveys conducted by the Department of Labor have found employment rates for out-of-school youth as low as 24 percent in selected high-poverty neighborhoods. Youth Opportunity Grants will attempt to dramatically increase these employment rates, and thus improve all aspects of life for persons living in these communities.

Job Corps.—For Job Corps, the Committee recommends \$1,518,550,000. This is \$13,610,000 less than the budget request, but \$59,798,000 more than the 2002 comparable level. The Committee applauds Job Corps for establishing partnerships with national employers, and encourages Job Corps to continue to work with both large employers and small businesses to ensure that student training meets current labor market needs. Job Corps should continue its efforts to upgrade its vocational offerings and curricula to reflect industry standards and skill shortages. Job Corps, authorized by WIA, is a nationwide network of residential facilities chartered by Federal law to provide a comprehensive and intensive array of training, job placement and support services to at-risk young adults. The mission of Job Corps is to attract eligible young adults, teach them the skills they need to become employable and independent, and place them in meaningful jobs or further education. Participation in the program is voluntary and is open to economically disadvantaged young people in the 16-24 age range who are unemployed and out of school. Most Job Corps students come from disruptive or debilitating environments, and it is important that they be relocated to residential facilities where they can benefit from the highly structured and carefully integrated services provided by the Job Corps program. A limited number of opportunities are also available for non-residential participation.

The Committee encourages Job Corps to strengthen working relationships with workforce development entities, including employers, that will enhance services to students and increase students' career opportu-

nities. The Department is encouraged to continue its efforts to meet industry standards in its occupational offerings through a multi-year process to review, upgrade, and modernize its vocational curricula, equipment, and programs in order to create career opportunities for students in appropriate growth industries. The Committee also continues to encourage the Department of Labor's Employment and Training Administration to encourage Job Corps centers to coordinate with community-based organizations, such as substance abuse treatment centers, in innovative ways.

The Committee supports the goal of the Workforce Investment Act of 1998 to integrate our Nation's many diverse job training programs, and its approach of retraining the national character of the Job Corps program within the new framework. The Committee encourages the Department to continue its work to develop national partnerships with major regional and national employers to increase employment opportunities for Job Corps graduates. The Department should also continue to establish connections between Job Corps and State workforce development programs, and between Job Corps and other national and community partners, to provide the most efficient, cost-effective services possible.

Responsible Reintegration for Young Offenders.—The Committee recommends \$55,000,000 for Responsible Reintegration for Young Offenders, the same as the fiscal year 2002 level, to address youth offender issues. This large scale WIA Pilot and Demonstration initiative will link offenders under age 35 with essential services that can help make the difference in their choices in the future, such as education, training, job placement, drug counseling, drug demand reduction activities, and mentoring, in order to reintegrate them into the mainstream economy. Through local competitive grants, this program would establish partnerships between the criminal justice system and local workforce investment systems, complementing a similar program in the Department of Justice (DOJ). To maximize the impact of these initiatives, the DOL and DOJ funds will be targeted to the same communities and populations. An estimated 10,400 youth will be served, and it is expected that 65 percent of program graduates will get jobs, re-enroll in high school, or be enrolled in post-secondary education or training.

Native Americans.—For Native Americans, the Committee recommends \$57,000,000. This is the same as the 2002 comparable level. This program, authorized by WIA, is designed to improve the economic well-being of Native Americans (Indians, Eskimos, Aleuts, and Native Hawaiians) through the provision of training, work experience, and other employment-related services and opportunities that are intended to aid the participants to secure permanent, unsubsidized jobs.

Migrant and seasonal farmworkers.—For Migrant and Seasonal Farmworkers, the Committee recommends \$80,770,000. This is the same as the 2002 comparable level. This program, authorized by WIA, is designed to serve members of economically disadvantaged families whose principal livelihood is derived from migratory and other forms of seasonal farmwork, or fishing, or logging activities. Enrollees and their families are provided with employment training and related services intended to prepare them for stable, year-round employment within and outside of the agriculture industry.

There are at least 3 million hard-working migrant and seasonal farmworkers in America whose annual incomes are below \$10,000. At a time when most State budgets are shrinking and many of the basic services provided by State and local governments are

being cut back, the Committee recognizes the importance of sustaining a national commitment, dating from 1964, to help alleviate the chronic seasonal unemployment and under-employment that traps many farm-worker families in a cycle of poverty across generations and that deprives many farm-worker children of educational opportunities and real prospects for better jobs at higher wages. The Committee also recognizes that many State and local government officials will be reluctant to fund this training and related assistance for this vulnerable portion of our Nation's workforce who migrate through many States every year, even though the work they perform is essential to the economic well-being of our Nation's farmers, growers, and small businesses.

The Committee recommendation of \$80,770,000 for activities authorized under Section 167 of the Workforce Investment Act is reflected in two separate line items on the table accompanying the Committee Report: "Migrant and Seasonal Farmworkers" and "National Activities/Other." Under the Migrant and Seasonal Farmworkers line item, the Committee recommends \$79,751,000. The Committee recommendation includes bill language directing that \$4,786,000 of this amount be used for migrant and seasonal farmworker housing grants. The recommendation also provides that the remaining amount be used for State service area grants, including funding grantees in those States impacted by formula reductions at no less than 85 percent of the comparable 1998 levels for such States. Within the National Activities/Other line item, the Committee recommendation includes \$1,019,000 to be used for Section 167 training, technical assistance and related activities, including funds for migrant rest center activities. The Committee urges the Department to continue valuable technical assistance services provided by the Association of Farmworker Opportunity Programs. Finally, the Committee wishes to again advise the Department regarding the requirements of the Workforce Investment Act in selecting an eligible entity to receive a State service area grant under Section 167. Such an entity must have already demonstrated a capacity to administer effectively a diversified program of workforce training and related assistance for eligible migrant and seasonal farmworkers.

The Committee believes that the Association of Farmworkers Opportunity Programs provide valuable technical assistance and training to grantees and has distinguished itself as a tremendous resource. Its Children in the Fields Campaign provides information, education, and technical assistance related to child labor in agriculture. The Association also provides other assistance related to employment and training (including pesticide and other worker safety training for children and adults). The Department is encouraged to continue the services that the Association provides these areas.

The Committee requests the Department undertake a study and submit a report to the Congress by July 1, 2003 with recommendations for eliminating the double standard embodied currently in the Fair Labor Standards Act (FLSA) and corresponding regulations whereby child farmworkers as young as 10 years of age can work in large-scale, corporate agriculture in the United States at younger ages, for longer hours, and under more hazardous conditions than minors age 16 and over working in non-agricultural jobs.

National programs.—This activity includes WIA-authorized programs in support of the workforce system including technical assistance and incentive grants, evaluations, pilots, demonstrations and research, and the Women in Apprenticeship Program.

Technical Assistance/Incentive Grants.—The Committee recommends \$15,000,000 for the

provision of technical assistance, staff development, and replication of programs of demonstrated effectiveness; as well as incentive grants to each State that exceeds State adjusted levels of performance for WIA State programs.

Pilots, Demonstrations, and Research.—The Committee recommends \$55,161,000, which is \$74,988,000 less than the fiscal year 2002 level, for grants or contracts to conduct research, pilots or demonstrations that improve techniques or demonstrate the effectiveness of programs. Within this amount, the Committee expects the Department of Labor to conduct a comprehensive study on the composition (including past and present numbers, as well as future projections) of the U.S. textile and apparel industry labor force, including the availability of training and textile-related engineering and manufacturing programs. The study should include a significant review of the impact of lay-offs on the industry, the workers, the local communities, and the States and regions involved. The Committee expects the Department of Labor to coordinate with the Department of Commerce in designing the preparation of this report. The Committee requests that the study be completed no later than September 1, 2003.

The Committee is deeply concerned about the ability of the 28 million Americans who are deaf or hard-of-hearing to be informed of critical news and information in the post-9/11/01 environment. The Committee is aware that court reporting schools may not be able to meet the “unfunded mandate” set by the Telecommunications Act of 1996 to provide closed captioning of 100 percent of broadcast programming by January 2006. These compelling concerns justify continued Federal support to those schools to increase their capacity to attract and train more real time writers and to work closely with the broadcasting industry to significantly increase the amount of programming that is closed captioned.

The Committee is concerned with the lack of information provided to the Committee regarding the performance and operation of the Workforce Investment Act (WIA). Further, the Committee is concerned that States and local workforce investment areas lack the technology to comply with the basic performance reporting and operational requirements of the WIA. This includes client case management, program performance and fiscal reporting and basic job match. The Committee recognizes that the private sector has developed and successfully implemented such technology on a limited basis on behalf of State and local workforce areas. However, the infrastructure cost restraints of the WIA have impeded widespread implementation. Therefore, the Committee recommends the Secretary provide States and local workforce investment areas funding to partner with the private sector to pilot such technology and determine its benefit to the WIA system.

Evaluation.—The Committee recommends \$9,098,000 to provide for the continuing evaluation of programs conducted under WIA, as well as of federally-funded employment-related activities under other provisions of law.

Women in Apprenticeship.—The Committee recommends \$1,000,000 to continue the current level of the Women in Apprenticeship and Nontraditional Occupations program. This activity provides technical assistance to employers and unions to assist them in training, placing, and retraining women in nontraditional jobs and occupations.

National Skills Standards Advisory Board.—The Committee concurs with the administration’s request not to provide additional funding for the Board, the authorization for

which has expired. Fiscal year 2002 funding for the Board was \$3,500,000, to remain available until expended.

The Committee acknowledges the ongoing dialogue between the National Skill Standards Board (NSSB) and the Department of Labor concerning the future mission funding, and governance of the NSSB. If a plan satisfactory to the Labor Department can be developed, the Committee would entertain a request to provide funds through reprogramming.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

Appropriations, 2002	\$445,100,000
Budget estimate, 2003	440,200,000
Committee recommendation	440,200,000

The Committee recommends \$440,200,000, the same as the budget request for community service employment for older Americans. This program, authorized by title V of the Older Americans Act, provides part-time employment in community service activities for unemployed, low-income persons aged 55 and over. It is forward-funded from July to June, and the 2003 appropriation will support the program from July 1, 2003, through June 30, 2004. The Committee believes that within the title V community service employment for older Americans, special attention should be paid to providing community service jobs for older Americans with poor employment prospects, including individuals with a long-term detachment from the labor force, older displaced homemakers, aged minorities, limited English-speaking persons, and legal immigrants.

The program provides a direct, efficient, and quick means to assist economically disadvantaged older workers because it has a proven effective network—currently operated jointly by 10 national sponsors and the States—in every State and in practically every county. Administrative costs for the program are low, and the vast majority of the money goes directly to low-income seniors as wages and fringe benefits.

The program provides a wide range of vital community services that would not otherwise be available, particularly in low-income areas and in minority neighborhoods. Senior enrollees provide necessary and valuable services at Head Start centers, schools, hospitals, libraries, elderly nutrition sites, senior center, and elsewhere in the community. These services would not be available without the program.

A large proportion of senior enrollees use their work experience and training to obtain employment in the private sector. This not only increases our Nation’s tax base, but it also enables more low-income seniors to participate in the program.

The Committee is aware that the administration portion of the cost per authorized position in the Title V program has not been adjusted since 1981. The Committee therefore directs the Department to conduct, in consultation with national and State Title V grantees, an analysis to determine the appropriate cost per authorized position and to report back its finding and recommendations no later than July 1, 2003.

Finally, the Committee reiterates the concern expressed in last year’s report regarding balancing the community service and employment and training goals of this important program. The Committee again expresses its concern that any significant increase in job placement goals must be accompanied by assurances from the Department to the Committee that sufficient skills training resources under the Workforce Investment Act will be available to national and State Title V grantees to help meet such increased placement goals. The Committee has not yet received such assurances.

The Committee is aware that, prior to enactment of the Workforce Investment Act (WIA), the Federal job-training program targeted funds specifically to older workers. Currently, WIA funds are not targeted for training older workers, at a time when the number of older workers is increasing significantly. To remain competitive in the labor market, older workers must acquire or update their job skills. While WIA is designed to meet the needs of all workers, the Committee is concerned that the One-Stop Career Centers, funded under WIA, may not be adequately meeting the training and education needs of older workers. The Committee therefore requests that the Department report within 180 days the measures it can undertake to ensure training and related services, appropriated under WIA, are available to older workers.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

Appropriations, 2002	\$415,650,000
Budget estimate, 2003	13,000,000
Committee recommendation	972,200,000

The Committee recommends \$972,200,000, an increase of \$556,550,000 over the fiscal year 2002 level. This is the amount estimated to pay for increased training and income support expenses under the expanded trade adjustment assistance program included in the Trade Act of 2002, enacted last August. These are entitlement funds. The Committee encourages the Labor Department to utilize the reprogramming process, if it is necessary to utilize discretionary funds for administrative or other expenses for newly authorized programs under the Trade Act that cannot be paid from this account.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

Appropriations, 2002	\$3,779,501,000
Budget estimate, 2003	3,686,543,000
Committee recommendation	3,618,903,000

The Committee recommends \$3,618,903,000 for this account. This is \$67,640,000 below the budget request and \$160,598,000 below the 2002 comparable level. Included in the total availability is \$3,475,451,000 authorized to be drawn from the “Employment Security Administration” account of the unemployment trust fund, and \$143,452,000 to be provided from the general fund of the Treasury.

The funds in this account are used to provide administrative grants and assistance to State agencies which administer Federal and State unemployment compensation laws and operate the public employment service.

For unemployment insurance (UI) services, the bill provides \$2,651,488,000. This includes \$2,641,488,000 for State Operations, which is \$76,200,000 less than the President’s request and \$136,498,000 less than the fiscal year 2002 level. The Committee has deleted the request for \$76,200,000 related to proposed legislation for temporary extended benefits, since this cost was previously enacted as part of Public Law 107-147. The Committee expects the Department to manage these resources to ensure equitable funding to States to handle total workload. The Committee recommendation includes \$10,000,000 for UI national activities, the same as the fiscal year 2002 level and the President’s request, which is directed to activities that benefit the State/Federal unemployment insurance program. The bill provides for a contingency reserve amount should the unemployment workload exceed an average weekly insured claims volume of 4,526,000. This contingency amount would fund the administrative costs of unemployment insurance workload over the level of 4,526,000 insured unemployed per week at a rate of \$28,600,000 per 100,000 insured unemployed, with a pro rata amount

granted for amounts of less than 100,000 insured unemployed.

For the Employment Service grants to States, the Committee recommends \$796,735,000 which includes \$23,452,000 in general funds together with an authorization to spend \$773,283,000 from the "Employment Security Administration" account of the unemployment trust fund. These funds are available for the program year of July 1, 2003, through June 30, 2004.

The recommendation includes \$50,680,000 for national activities, an increase of \$21,560,000 over the budget request. This recommendation restores the \$20,560,000 reduction proposed in direct funding of the foreign labor certification program, rejecting the proposal to finance a portion of this program by a direct transfer from H-1B fees. The recommendation also adds \$1,000,000 over the request to restore the proposed cut in the work opportunity tax credit program.

The recommendation also includes \$100,000,000 for One-Stop Career Centers, a reduction of \$13,000,000 below the request. This Committee recommendation includes funding for America's Labor Market Information System, including core employment statistics, universal access for customers, improving efficiency in labor market transactions, and measuring and displaying WIA performance information.

The recommendation includes \$20,000,000 for the Work Incentives Grants program, the same as last year's level and the President's request, to help persons with disabilities find and retain jobs through the One-Stop Career Center system mandated by the Workforce Investment Act. Funding will support systems building grants intended to ensure that One-Stop systems integrate and coordinate mainstream employment and training programs with essential employment-related services for persons with disabilities.

The Committee agrees that the work opportunity tax credit [WOTC], and the welfare-to-work tax credit provide important resources to create new jobs, particularly for those Americans who would otherwise be dependent on welfare. Therefore, the Committee recommendation includes \$21,000,000 for the administration of these initiatives, an increase of \$1,000,000 over the budget request, restoring the increased amount previously enacted.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

Appropriations, 2002	\$464,000,000
Budget estimate, 2003	463,000,000
Committee recommendation	463,000,000

The Committee recommends \$463,000,000, a decrease of \$1,000,000 below the 2002 comparable level, for this account. The appropriation is available to provide advances to several accounts for purposes authorized under various Federal and State unemployment compensation laws and the black lung disability trust fund, whenever balances in such accounts prove insufficient. The bill anticipates that fiscal year 2003 advances will be made to the black lung disability trust fund. The requested amount is required to provide for loan interest payments on Black Lung Trust Fund borrowed amounts.

The separate appropriations provided by the Committee for all other accounts eligible to borrow from this account in fiscal year 2003 are expected to be sufficient. Should the need arise, due to unanticipated changes in the economic situation, laws, or for other legitimate reasons, advances will be made to the needy accounts to the extent funds are available. Funds advanced to the black lung disability trust fund are now repayable with interest to the general fund of the Treasury.

PROGRAM ADMINISTRATION

Appropriations, 2002	\$161,276,000
----------------------------	---------------

	Budget estimate, 2003	172,061,000
Committee recommendation	177,642,000	

The Committee recommendation includes \$121,032,000 in general funds for this account, as well as authority to expend \$56,610,000 from the "Employment Security Administration" account of the unemployment trust fund, for a total of \$177,642,000. This is \$16,366,000 greater than the 2002 comparable level.

The Committee recommendation concurs with the \$5,500,000 requested increase to provide staff and contract resources for performance management and accountability functions. The recommendation restores proposed reductions in apprenticeship, Job Corps, and other youth services administrative activities. The recommendation also adds \$6,000,000 to restore funding which the budget had assumed would come from enactment of authorizing legislation redirection H-1B fees for Federal administration expenses.

General funds in this account provide the Federal staff to administer employment and training programs under the Workforce Investment Act, the Older Americans Act, the Trade Act of 1974, and the National Apprenticeship Act. Trust funds provide for the Federal administration of employment security functions under title III of the Social Security Act and the Immigration and Nationality Act, as amended. Federal staff costs related to the Wagner-Peyser Act in this account are split 97 percent to 3 percent between unemployment trust funds and general revenue, respectively.

PENSION AND WELFARE BENEFITS ADMINISTRATION SALARIES AND EXPENSES

Appropriations, 2002	\$110,932,000
Budget estimate, 2003	117,044,000
Committee recommendation	117,044,000

The Committee recommendation provides \$117,044,000 for this account, which is \$6,112,000 above the 2002 comparable level, and the same as the budget request. This includes program increases to enhance the Voluntary Fiduciary Compliance Program and the ERISA filing and acceptance system.

The Pension and Welfare Benefits Administration [PWBA] is responsible for the enforcement of title I of the Employee Retirement Income Security Act of 1974 [ERISA] in both civil and criminal areas. PWBA is also responsible for enforcement of sections 8477 and 8478 of the Federal Employees' Retirement Security Act of 1986 [FERSA]. PWBA provides funding for the enforcement and compliance; policy, regulation, and public services; and program oversight activities.

PENSION BENEFIT GUARANTY CORPORATION

The Corporation's estimate for fiscal year 2003 includes benefit payments of \$1,325,000,000, multiemployer financial assistance of \$10,000,000, administrative expenses limitation of \$13,050,000, and services related to terminations expenses of \$179,844,000.

The Pension Benefit Guaranty Corporation is a wholly owned Government corporation established by the Employee Retirement Income Security Act of 1974. The law places it within the Department of Labor and makes the Secretary of Labor the Chair of its Board of Directors. The Corporation receives its income primarily from insurance premiums collected from covered pension plans, collections of employer liabilities imposed by the act, and investment earnings. It is also authorized to borrow up to \$100,000,000 from the Treasury. The primary purpose of the Corporation is to guarantee the payment of pension plan benefits to participants if covered plans fail or go out of existence.

EMPLOYMENT STANDARDS ADMINISTRATION SALARIES AND EXPENSES

Appropriations, 2002	\$370,236,000
Budget estimate, 2003	294,315,000
Committee recommendation	385,457,000

The Committee recommendation includes \$385,457,000 for this account. This is \$15,221,000 above the 2002 comparable level and \$91,142,000 above the budget request. The bill contains authority to expend \$2,029,000 from the special fund established by the Longshore and Harbor Workers' Compensation Act; the remainder are general funds. In addition, an amount of \$31,987,000 is available by transfer from the black lung disability trust fund. This is the same as the request and \$610,000 above the 2002 comparable level.

This recommendation provides sufficient funding to offset the impact of inflation, preventing the reduction in full-time equivalent staffing assumed in the budget request. It rejects the administration's proposed legislation that would have established a surcharge on the amount billed to Federal agencies for workers' compensation benefits to finance Labor Department administrative expenses of \$86,442,000. It restores proposed program reductions, including the equal pay initiative and includes recommended program increases.

The President's budget included a legislative proposal under the jurisdiction of the Senate Committee on Health, Education, Labor, and Pensions to charge individual agencies, starting in fiscal year 2003, the administrative cost of the Federal Employees' Compensation Act (FECA) program. Currently Federal agencies are budgeted for and billed each year for monetary and medical benefits that have been paid to their employees under FECA, while the program's discretionary administrative costs are financed in the Department of Labor (DOL). The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee will continue to fund this administrative cost through this account.

The Employment Standards Administration is involved in the administration of numerous laws, including the Fair Labor Standards Act, the Immigration and Nationality Act, the Migrant and Seasonal Agricultural Workers' Protection Act, the Davis-Bacon Act, the Family and Medical Leave Act, the Federal Employees' Compensation Act [FECA], the Longshore and Harbor Workers' Compensation Act, and the Federal Mine Safety and Health Act (black lung).

The Committee supports expansion of the equal pay initiative, which helps business improve the way they pay their employees, and assists in education about the importance of equal pay.

SPECIAL BENEFITS

Appropriations, 2002	\$121,000,000
Budget estimate, 2003	163,000,000
Committee recommendation	163,000,000

The Committee recommends continuation of appropriation language to provide authority to require disclosure of Social Security account numbers by individuals filing claims under the Federal Employees' Compensation Act or the Longshore and Harbor Workers' Compensation Act and its extensions.

The recommendation includes \$163,000,000, the same as the budget request and an increase of \$42,000,000 above the 2002 comparable level. This appropriation primarily provides benefits under the Federal Employees' Compensation Act [FECA]. The payments are prescribed by law.

The total amount to be available in fiscal year 2003 is \$3,326,393,000, an increase of \$108,000,000 above the 2002 comparable level.

The Committee recommends continuation of appropriation language that provides authority to use the FECA fund to reimburse a new employer for a portion of the salary of a newly reemployed injured Federal worker. The FECA funds will be used to reimburse new employers during the first 3 years of employment not to exceed 75 percent of salary in the worker's first year, declining thereafter. Costs will be charged to the FECA fund.

The Committee again includes appropriation language that retains the drawdown date of August 15. The drawdown authority enables the agency to meet any immediate shortage of funds without requesting supplemental appropriations. The August 15 drawdown date allows maximum flexibility for continuation of benefit payments without interruption.

The Committee recommends continuation of appropriation language to provide authority to deposit into the special benefits account of the employees' compensation fund those funds that the Postal Service, the Tennessee Valley Authority, and other entities are required to pay to cover their fair share of the costs of administering the claims filed by their employees under FECA. The Committee concurs with requested bill language to allow use fair share collections to fund capital investment projects and specific initiatives to strengthen compensation fund control and oversight.

ENERGY EMPLOYEES OCCUPATIONAL ILLNESS COMPENSATION PROGRAM

Appropriations, 2002	\$135,665,000
Budget estimate, 2003	104,867,000
Committee recommendation	104,867,000

The Committee recommends \$104,867,000 for this account in 2003. This is the same as the President's request and \$30,798,000 below 2002.

The mission of the Energy Employees Occupational Illness Compensation Program is to deliver benefits to eligible employees and former employees of the Department of Energy, its contractors and subcontractors or to certain survivors of such individuals, as provided in the Energy Employees Occupational Illness Compensation Program Act. The mission also includes delivering benefits to certain beneficiaries of the Radiation Exposure Compensation Act. Benefit costs of \$758,000,000 are anticipated in fiscal year 2003.

The Energy Employees Occupational Illness Compensation Program provides benefits authorized by the Energy Employees Occupational Illness Compensation Program Act. The program went into effect on July 31, 2001. The Department of Labor's Office of Workers' Compensation Programs within the Employment Standards Administration is responsible for adjudicating and administering claims filed by employees or former employees (or their survivors) under the Act.

BLACK LUNG DISABILITY TRUST FUND

Appropriations, 2002 (Definite)	\$1,036,115,000
Budget estimate, 2003:	
(Definite)	55,629,000
(Indefinite)	979,371,000
Committee recommendation:	
(Definite)	55,629,000
(Indefinite)	979,371,000

The Committee recommends \$1,035,000,000 for this account in 2003, of which \$55,629,000 is definite budget authority and \$979,371,000 is indefinite budget authority. In total, this is a decrease of \$934,000 below the 2002 comparable level and the same as the administration request. This represents a change in the appropriation language beginning in fiscal year 2002 for the Black Lung Disability Trust Fund. This change will eliminate the

need for drawdowns from the subsequent year appropriation in order to meet current year compensation, interest, and other benefit payments. The appropriation language will continue to provide definite budget authority for the payment of administrative expenses for the operation and administration of the Trust Fund.

The total amount available for fiscal year 2003 will provide \$360,371,000 for benefit payments, and \$55,629,000 for administrative expenses for the Department of Labor. Also included is \$619,000,000 for interest payments on advances. In fiscal year 2002, comparable obligations for benefit payments are estimated to be \$388,283,000 while administrative expenses are \$54,651,000. In fiscal year 2002, the interest payments on advances is estimated to be \$593,000,000.

The trust fund pays all black lung compensation/medical and survivor benefit expenses when no responsible mine operator can be assigned liability for such benefits, or when coal mine employment ceased prior to 1970, as well as all administrative costs which are incurred in administering the benefits program and operating the trust fund.

It is estimated that 49,000 people will be receiving black lung benefits financed from the trust fund by the end of the fiscal year 2003. This compares with an estimated 53,250 receiving benefits in fiscal year 2002.

The basic financing for the trust fund comes from a coal excise tax for underground and surface-mined coal. Additional funds come from reimbursement payments from mine operators for benefit payments made by the trust fund before the mine operator is found liable, and advances. The advances to the fund assure availability of necessary funds when liabilities may exceed other income. The Omnibus Budget Reconciliation Act of 1987 continues the current tax structure until 2014.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

Appropriations, 2002	\$443,498,000
Budget estimate, 2003	437,019,000
Committee recommendation	462,314,000

The Committee recommendation includes \$462,314,000 for this account. This is an increase of \$25,295,000 over the budget request and an increase of \$18,816,000 above the 2002 comparable level. This agency is responsible for enforcing the Occupational Safety and Health Act of 1970 in the Nation's workplaces.

This recommendation provides sufficient funding to offset the impact of inflation, preventing the reduction in full-time equivalent staffing assumed in the budget request.

In addition, the Committee has included language to allow OSHA to retain up to \$750,000 per fiscal year of training institute course tuition fees to be utilized for occupational safety and health training and education grants in the private sector.

Within the amount for Safety and Health Standards, bill language specifies that \$2,000,000 of the increased funding is only available to provide for the reissuance of a rule relating to ergonomics. It is the Committee's expectation that these funds expedite activities leading to reissuance of such a rule within the timeframe and according to the parameters specified in S. 2184.

The Committee is concerned that OSHA has halted action on or delayed many important regulatory initiatives on major workplace hazards, including chemical safety regulations to prevent reactive chemical explosions which have killed 108 workers over the past two decades, the extension of confined space entry requirements to the construc-

tion industry where 87 workers were killed in confined space incidents during the 1990's, and regulations to limit exposure to cancer causing chemicals perchloroethylene, hexavalent chromium and metalworking fluids. At the same time, the administration has proposed to reduce funding for its standards activities. The Committee believes that the development and issuance of safety and health standards is one of the core responsibilities of OSHA, and has provided funding in the bill to maintain OSHA's current level of activity for safety and health standards, not including funds for the development of a new ergonomics standard.

The Committee retains language carried in last year's bill effectively exempting farms employing 10 or fewer people from the provisions of the act except those farms having a temporary labor camp. The Committee also retains language exempting small firms in industry classifications having a lost workday injury rate less than the national average from general schedule safety inspections. These provisions have been in the bill for many years.

The Committee believes that OSHA's worker safety and health training and education programs, including the grant program that supports such training, are a critical part of a comprehensive approach to worker protection. The Committee is concerned that OSHA cut funding to help establish ongoing worker safety and health training programs and has provided \$7,175,000 in additional funds to restore the Susan Harwood training grant program to \$11,175,000. Bill language specifies that no less than \$3,200,000 shall be used to maintain the existing institutional competency building training grants, provided that grantees demonstrate satisfactory performance.

The Committee has provided funding to maintain the State consultation grant program and expects that this program will continue to be targeted to provide compliance assistance to small businesses.

The Committee is very pleased with OSHA's efforts in placing high priority on the voluntary protection programs (VPP) and other voluntary cooperative programs. The agency's work in expanding participation in the programs, and promoting prompt review and processing of applications is particularly noteworthy. The Committee expects OSHA to continue to place high priority on the VPP. Cooperative voluntary programs, especially the VPP, are an important part of OSHA's ability to assure worker safety and health and should be administered in conjunction with an effective strong enforcement program.

The Committee also intends that the Office of Regulatory Analysis continue to be funded as close as possible to its present level.

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

Appropriations, 2002	\$253,932,000
Budget estimate, 2003	254,323,000
Committee recommendation	271,841,000

The Committee recommendation includes \$271,841,000 for this account. This is \$17,909,000 more than the 2002 comparable level, and \$17,518,000 more than the budget request.

This recommendation provides sufficient funding to offset the impact of inflation, preventing the reduction in full-time equivalent staffing assumed in the budget request. It further includes funding to continue the Miner's Choice X-ray Program.

The Committee recommendation includes \$10,000,000 for digitizing mine maps and to develop technologies to detect mine voids, in an effort to improve the ability of mining officials to verify the location of abandoned

mines. This recommendation is in response to initiatives for improving mine safety arising from a special hearing held October 21, 2002, in Johnstown, Pennsylvania, on the mine disaster at Quecreek. This initiative, to supplement State funding, is intended to make sure that all existing mine maps are available to the relevant agencies and the maps are centrally warehoused and digitized in order to ensure their preservation.

The Committee recommendation also increases the bill language amount for mine rescue and recovery activities from "up to \$1,000,000" to "up to \$2,000,000", while retaining the provision allowing the Secretary of Labor to use any funds available to the Department to provide for the costs of mine rescue and survival operations in the event of a major disaster.

This agency insures the safety and health of the Nation's miners by conducting inspections and special investigations of mine operations, promulgating mandatory safety and health standards, cooperating with the States in developing effective State programs, and improving training in conjunction with States and the mining industry.

In addition, bill language is included to allow the National Mine Health and Safety Academy to collect not to exceed \$750,000 for room, board, tuition, and the sale of training materials to be available for mine safety and health education and training activities. Bill language also allows MSHA to retain up to \$1,000,000 from fees collected for the approval and certification of equipment, materials, and explosives for use in mines, and may utilize such sums for such activities.

The Committee is aware that in October 2001 the National Academy of Sciences (NAS) released a report on recommendations to improve the safety of coal waste impoundments. The Committee notes that the NAS report includes recommendations on actions that could be taken, primarily by the Mine Safety and Health Administration (MSHA) and the Office of Surface Mining (OSM) to improve the design process for coal slurry impoundments; to improve mapping of mines and the characterization of sites of existing and future impoundments; to improve the assessment of mitigation of risks associated with impoundments; and to assess alternative options for these impoundments. In recognizing the public safety and environmental threats that these impoundment failures pose, the Committee directs MSHA and OSM to provide the Committee with a study, no later than March 15, 2003, on specific actions the respective agencies are taking to implement the recommendations contained in the October 2001 NAS report, and on specific actions taken to address failures and potential failures which have occurred since October 11, 2000.

BUREAU OF LABOR STATISTICS SALARIES AND EXPENSES

Appropriations, 2002	\$475,431,000
Budget estimate, 2003	498,164,000
Committee recommendation	490,454,000

The Committee includes \$494,454,000 for this account, \$7,710,000 less than the budget request and \$15,023,000 more than the 2002 comparable level. This includes \$72,029,000 from the "Employment Security Administration" account of the unemployment trust fund, and \$418,425,000 in Federal funds. This funding level will cover the agency's built-in increases.

The Bureau of Labor Statistics is the principal fact finding agency in the Federal Government in the broad field of labor economics.

In addition, the Committee has included bill language making \$2,570,000 of the BLS al-

lowance for Occupational Employment Statistics available for the period July 1, 2003 through September 30, 2003; this converts this activity to current year funding, at its annual level of \$10,280,000, instead of funding on a program year basis.

OFFICE OF DISABILITY POLICY

Appropriations, 2002	\$38,056,000
Budget estimate, 2003	47,015,000
Committee recommendation	47,015,000

The Committee recommends \$47,015,000 for this account in 2003. This is the same as the President's request and \$8,959,000 above 2002.

Congress created the Office of Disability Employment Policy (ODEP) in the Department of Labor's fiscal year 2001 appropriation. Programs and staff of the former President's Committee on Employment of People with Disabilities (PCEPD) have been integrated into this new office.

The ODEP mission, under the leadership of an Assistant Secretary, is to bring a heightened and permanent long-term focus to the goal of increasing employment of persons with disabilities. This will be achieved through policy analysis, technical assistance, and development of best practices, as well as outreach, education, constituent services, and promoting ODEP's mission among employers.

The increase includes: an expansion of One-Stop accessibility grants, to support the process of implementing the "ticket to work" through One-Stop Career Centers; expanding the provision of grants aimed at developing and implementing innovative programs for moving youth with disabilities from school to work; and funding an Olmstead grant program to assist persons with significant disabilities in making the transition from institutional settings to the community and employment.

The Committee urges the Department to establish a special, structured, fall and spring semester internship program to augment existing programs supporting undergraduate students with disabilities in their efforts to pursue careers in public service. The program would be carried out under a partnership between the Secretary, the Congress and the Judiciary, groups representing citizens with disabilities and colleges and universities that would provide opportunities for their students to participate in this innovative program for undergraduate students with disabilities.

DEPARTMENTAL MANAGEMENT SALARIES AND EXPENSES

Appropriations, 2002	\$385,601,000
Budget estimate, 2003	317,934,000
Committee recommendation	396,623,000

The Committee recommendation includes \$396,623,000 for this account, which is \$78,689,000 more than the budget request and \$11,022,000 more than the 2002 comparable level. In addition, an amount of \$22,952,000 is available by transfer from the black lung disability trust fund, which is the same as the budget request.

The primary goal of the Department of Labor is to protect and promote the interests of American workers. The departmental management appropriation finances staff responsible for formulating and overseeing the implementation of departmental policy and management activities in support of that goal. In addition, this appropriation includes a variety of operating programs and activities that are not involved in departmental management functions, but for which other salaries and expenses appropriations are not suitable.

The Committee recommendation reflects major Committee priorities, including inter-

national labor affairs, and pension participant advocacy.

The Committee recommendation includes \$26,468,000 for Executive Direction, the same as the budget request.

The Committee recommends \$10,973,000 for the Women's Bureau, an increase of \$2,604,000 over the budget request and \$808,000 above the fiscal year 2002 level. The Committee urges the Women's Bureau to provide increased support for effective programs such as "Women Work!", to provide technical assistance and training on programming for women in transition, as well as Pay Equity initiatives.

Bill language specifies that not less than \$3,000,000 is provided to establish an Office of Pension Participant Advocacy within the Office of the Secretary at the Department of Labor. The Committee believes that protecting and promoting the rights of workers in retirement plans is central to the mission of the Department of Labor. The Committee is concerned by the lack of protection for participants in private retirement plans that have been highlighted by recent financial failures. The Committee believes that it is necessary for there to be an office within the Federal Government to advise both Congress and the Administration on necessary changes in policies to correct problems that affect participants. In addition, there is a need to coordinate public and private efforts to assist participants and provide them with meaningful information. Although several Federal agencies have oversight of pension plans—the PBGC insures terminated defined benefit plans and the PWBA has traditionally focused on protecting the integrity of pension funds—none have traditionally sought to protect the retirement security interests of American workers. For this reason, the Committee has chosen to include funds for the express purpose of creating an office within this agency to identify needed changes in pension policies, and gaps in data on pension plans and their participants.

The Committee recommends \$148,015,000 for the Bureau of International Labor Affairs, the same level of funding as provided in fiscal year 2002.

Of this amount, the Committee's recommendation includes \$82,000,000 to sustain important U.S. commitments to restore hope and to improve the lives of more than 250 million defenseless child laborers at work in today's global economy. The United States was the third nation to ratify ILO Convention #182 for the Elimination of the Worst Forms of Child Labor, just months after its unprecedented unanimous adoption in 1999. Having done so, the Committee recognizes an on-going obligation to provide supplementary resources to assist developing countries especially to remove children from the worst forms of child labor. \$45,000,000 of that sub-total shall constitute the U.S. contribution to sustain and to extend to more countries in waiting the successful efforts of the ILO's International Program for the Elimination of Child Labor (IPEC). The remaining \$37,000,000 is for bilateral assistance to expand upon the program initiated by the Department in fiscal year 2001 to help ensure access to basic education for the growing number of children removed from the worst forms of child labor in impoverished nations where abusive and exploitative child labor is most acute; however, the Secretary may transfer \$14,000,000 of this sub-total to USAID's "Basic Education and Policy Support Initiative" for complementary projects. The Committee notes that the United States was a strong and active supporter of the Dakar Declaration of 2000, including the commitment therein to help achieve universal access to basic education for all of the world's children by 2015. Accordingly, the

Committee views this program to be a vital component for fulfilling this on-going commitment and firmly believes that affording access to basic education is also the single most effective means to curb the worst forms of child labor, wherever they exist. In programming these funds, the Committee directs the Department to consult with our country's labor attaches and labor reporting officers abroad, to coordinate and work more closely with USAID and IPEC officials, and to also make use of non-governmental organizations and trade unions, when appropriate, to promptly and economically steer these funds to where they benefit the most child laborers who are at the greatest risk.

The Committee recognizes that combating abusive child labor and promoting greater respect for other internationally-recognized worker rights and core labor standards are crucial to spreading the benefits of trade and investment more broadly within as well as among all trading nations. Accordingly, the Committee further recommends \$20,000,000 for multilateral technical assistance, and \$17,000,000 for bilateral assistance to enable developing countries in particular to strengthen governmental capacity to enforce national labor laws and protect internationally-recognized worker rights, to implement core labor standards, and to develop policies to assist workers who are adversely affected by shifts in trade and investment flows, structural adjustments, and macroeconomic changes within national economies and the global economy respectively.

The Committee also deems it very important that ILAB deepen and improve its permanent capacity to compile and report to the Congress annually on the extent to which each foreign country that has trade and investment agreements with the United States enforces internationally-recognized worker rights as required under multiple U.S. laws and promotes core labor standards as embodied in the ILO Declaration on Fundamental Principles and Rights at Work as adopted and reaffirmed in 1998. The Committee expects \$5,000,000 to be spent for this purpose. The Committee recognizes that it may be necessary to build ILAB capacity over a period of 2 years and, for the Department to tap private sector expertise from knowledgeable employer, trade union, and non-governmental organizations with their own presence or in-country partners on the ground in foreign countries.

Finally, the Committee requests that ILAB undertake and complete a study and report to the Congress by September 30, 2003 on government-wide implementation of Executive Order No. 13126 prohibiting the acquisition and procurement of any products mined, produced, or manufactured with any forced or indentured child labor and compliance with this order by all civilian and military agencies. In prior studies and reports to the Congress, the Department has identified and presented evidence of the use of forced or indentured child labor in the production of at least 45 products in at least 25 foreign countries and those findings have been further corroborated by the U.S. State Department in its annual human rights reports to the Congress. Nevertheless, the Department, in coordination with the General Services Administration, only included 11 products in two foreign countries when the final list of tainted products was published in the Federal Register for the first time on January 18, 2001. This study should explain in detail why so few products and countries have been included on the current list of procurement prohibitions, given that the Labor Department, State Department, and Customs Service within the Treasury Department have identified collectively a much larger list of goods produced in many more foreign coun-

tries they have reason to believe were mined, produced, or manufactured using forced or indentured child labor. It should also include recommendations to improve government-wide compliance with Executive Order No. 13126, to include services within its scope where there is reason to believe there is forced or indentured child labor involved, and to award Federal procurement preferences to reward companies and industries that do not do business with any foreign or domestic producers who use forced, indentured, or abusive child labor.

The Committee concurs with the request to provide \$10,000,000 for HIV/AIDS workplace education. The Committee expects the Department to work through the ILO to most effectively program the appropriated funds. The Committee previously directed that ILAB work through the ILO to effectively program funds provided in fiscal year 2002 to global workplace-based education and prevention programs. In fiscal year 2003, the Committee recommendation includes \$10,000,000 solely for the purpose of providing the ILO with assistance to conduct global workplace-based HIV-AIDS education and prevention programs. For other ILAB programs, including 125 FTE for Federal Administration, the Committee recommends \$14,282,000.

Acknowledging the need to upgrade the information technology capability in the Department of Labor, the Committee provides \$55,000,000 for the information technology fund, and \$5,884,000 for management cross cut activities. The total provided includes support for cross-cutting investments such as common office automation suite implementation, architecture requirements, and web services as well as human resource management.

The Committee retains bill language intended to ensure that decisions on appeals of Longshore and Harborworker Compensation Act claims are reached in a timely manner.

VETERANS EMPLOYMENT AND TRAINING

Appropriations, 2002	\$212,624,000
Budget estimate, 2003	210,337,000
Committee recommendation	218,087,000

The Committee recommendation includes \$218,087,000 for this account, including \$26,550,000 in general revenue funding and \$191,537,000 to be expended from the "Employment Security Administration" account of the unemployment trust fund. This is \$7,750,000 more than the budget request and \$5,463,000 above the 2002 comparable level.

For State grants the bill provides \$83,615,000 for the Disabled Veterans Outreach Program and \$79,253,000 for the Local Veterans Employment Representative Program. These amounts are each \$2,000,000 above the budget request and the fiscal year 2002 enacted level.

For Federal administration, the Committee recommends \$28,669,000, an increase of \$2,000,000 over the budget request and \$713,000 more than the fiscal year 2002 level. The Committee supports the concept of the Transition Assistance Program administered jointly with the Department of Defense which assists soon-to-be-discharged service members in transitioning into the civilian work force and includes funding to maintain an effective program. The Committee recommendation includes \$2,000,000, the same as the fiscal 2002 level, for the National Veterans Training Institute [NVTI]. This Institute provides training to the Federal and State staff involved in the direct delivery of employment and training related services to veterans.

The Committee recommendation includes \$19,000,000 for the Homeless Veterans Program, an increase of \$1,500,000 over the budg-

et request. Also included is \$7,550,000 for the Veterans Workforce Investment Program, an increase of \$250,000 above the budget request and the same as the fiscal year 2002 level.

The recommendation also authorizes the Department of Labor to permit the Veterans' Employment and Training Service [VETS] to also fund activities in support of the VETS' Federal Contractor Program [FTP] from funds currently made available to States for veterans' employment activities. It does not authorize transfer of any activities to the Department of Veterans Affairs, as proposed in the budget request.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$56,860,000
Budget estimate, 2003	62,256,000
Committee recommendation	62,256,000

The bill includes \$62,256,000 for this account, the same as the budget request and \$5,396,000 above the 2002 comparable level. This funding will cover the agency's built-in increases, as well as program increases. The bill includes \$56,659,000 in general funds and authority to transfer \$5,597,000 from the "Employment Security Administration" account of the unemployment trust fund. In addition, an amount of \$334,000 is available by transfer from the black lung disability trust fund.

The Office of the Inspector General [OIG] was created by law to protect the integrity of departmental programs as well as the welfare of beneficiaries served by those programs. Through a comprehensive program of audits, investigations, inspections, and program evaluations, the OIG attempts to reduce the incidence of fraud, waste, abuse, and mismanagement, and to promote economy, efficiency, and effectiveness.

GENERAL PROVISIONS

General provision bill language is included to:

Prohibit the use of Job Corps funding for compensation of an individual at a rate in excess of Executive Level II (sec. 101).

Permit transfers of up to 1 percent between appropriations (sec. 102).

Prohibit funding for the procurement of goods and services utilizing forced or indentured child labor in industries and host countries already identified by the Labor Department (sec. 103 in accordance with Executive Order 13126).

Authorize funds to be appropriated for job training for workers involved in construction projects funded through the Denali Commission (sec. 104).

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION	
HEALTH RESOURCES AND SERVICES	
Appropriations, 2002	\$6,080,551,000
Budget estimate, 2003	5,365,404,000
Committee recommendation	6,115,654,000

The Committee provides an appropriation of \$6,115,654,000 for health resources and services. This is \$750,250,000 more than the administration request and \$35,103,000 more than fiscal year 2002.

Health Resources and Services Administration [HRSA] activities support programs to provide health care services for mothers and infants; the underserved, elderly, homeless; migrant farm workers; and disadvantaged minorities. This appropriation supports cooperative programs in community health, AIDS care, health provider training, and health care delivery systems and facilities.

HEALTH CENTERS

The Committee provides \$1,533,570,000 for the health centers, which is \$190,000,000 more

than fiscal year 2002 level and \$75,706,000 above the administration request for this group of programs, which include community health centers, migrant health centers, health care for the homeless, and public housing health service grants.

In fiscal year 2003, community, migrant, public housing and homeless Health Centers will provide primary health care services to more than 12,000,000 people. Health Centers serve indigent urban and underserved rural clients, including many uninsured patients. From 1999 to 2001, the number of uninsured seeking care at Health Centers increased by 500,000 for a total of 4.2 million or about 40 percent of the patient population in 2001. In addition, millions of poor, minority, or isolated people, who have some health insurance coverage, continue to encounter serious difficulties in getting access to health care due to income or distance barriers. For many of these Americans, Health Centers are the only source of primary and preventive health care. Located in more than 3,500 rural and urban medically-underserved communities around the Nation, Health Centers have proven to be a cost-effective and efficient source of care for the underserved. By providing access to basic health services, Health Centers annually save the health care system billions of dollars in reduced use of costly emergency room, specialty, and hospital inpatient care.

The Committee does not set aside any additional appropriations for loan guarantee authority under Section 330(d) or Part A of Title XVI of the Public Health Service Act. The Committee intends that the \$14,000,000 of subsidy authority appropriated in fiscal year 1997 and fiscal year 1998, making \$160,000,000 available for loan guarantees, continue to be available for guarantees of both loan principal and interest in accordance with the original allocations.

The Committee limits the amount available for payment of claims under the Federal Tort Claims Act to \$50,000,000, which is \$25,000,000 more than the administration request and \$35,000,000 more than the amount provided for last year. The Committee recognizes the tremendous value of this program for health centers and as new health centers become covered, and past claims are settled, payments have risen accordingly.

Community health centers

Community health centers provide comprehensive, case-managed primary health care services to medically indigent and underserved populations in rural and urban areas. Of the clients served by community health centers, about 44 percent are children and 67 percent have incomes below the poverty line.

The Committee is pleased with the process HRSA has used to fund new start applications and also the expeditious manner in which the first round of funding was allocated. Adequate funding is provided to ensure that at least 30 new starts, 60 new sites, and 80 project expansions occur in 2003. However, the Committee expects HRSA to give priority to areas of the country that currently have few health centers and significant numbers of underserved populations not currently served by health centers, especially minority communities and rural and frontier areas.

Although the Committee continues to support the expansion of the health centers program to double the number of patients served, the Committee is concerned that current funding methodologies may not recognize the increased cost of providing services for current patients at existing health centers. The Committee expects HRSA to use a portion of the increased funding provided to increase support for existing health centers

based on performance-related criteria separate from the funding of new service site and service expansion applications.

The Committee is concerned that Federal community health center funds are often not available to small, remote communities in Alaska, Hawaii and other similar States because the population base is too small. Many of these communities have no health service providers and are forced to travel long distances by boat or plane even in emergency situations. The Committee is aware that efforts are now underway to double community health center funding to address the growing number of uninsured persons in this country, but, without new approaches to providing health services, many will not benefit from the proposed increases in funding. The Committee applauds the agency for its initiatives such as the "Alaska Frontier Health Plan," and encourages the agency to continue and expand its efforts with this program.

The Committee is concerned by the small percentage of Illinois' medically-underserved population that presently have access to community or migrant health center services. The Committee expects HRSA to take steps to address this services deficit in fiscal year 2003.

School-based health centers

This program provides grants for comprehensive primary and preventive health care services and health education to at-risk and medically underserved children and youth. Grants are awarded to public or private, nonprofit, community-based health care providers. Through agreements with a local school or school system, the health care entity provides the services in the school building or on school grounds.

Migrant health program

The program helps provide culturally sensitive comprehensive primary care services to migrant and seasonal farm workers and their families. Over 80 percent of the centers also receive funds from the community health centers program.

Health care for the homeless

The program provides project grants for the delivery of primary health care services, substance abuse services, and mental health services to homeless adults and children. About one-half of the projects are administered by community health centers. The other one-half are administered by nonprofit coalitions, inner-city hospitals, and local public health departments.

Public housing health service grants

The program awards grants to community-based organizations to provide case-managed ambulatory primary health and social services in clinics at or in proximity to public housing. More than 60 percent of the programs are operated by community health centers.

Native Hawaiian health care

The Committee again includes the legal citation in the bill for the Native Hawaiian Health Care Program. The Committee has included sufficient funding so that health care activities funded under the Native Hawaiian Health Care Program can be supported under the broader community health centers line. The Committee expects that not less than \$9,000,000 be provided for these activities in fiscal year 2003.

The purpose of this activity is to improve the health status of native Hawaiians by making primary care, health promotion, and disease prevention services available through the support of Native Hawaiian health systems. Services provided include health screening, nutrition programs, and contracting for basic primary care services.

This activity also supports a health professions scholarship program for native Hawaiians.

Other Native Hawaiian and Pacific Islander health issues

The Committee remains committed to the concept of a demonstration project for American Samoans in Hawaii at the Waimanalo Health Center that will integrate social services, include traditional health, prevention and disease management, and address the disparities in health status among native Hawaiians and other minority populations.

In addition, as emphasized last year, the Committee strongly supports the establishment of a Center of Excellence for Indigenous Health and Healing at the University of Hawaii and other schools that serve native peoples including American Indians, Alaska Natives and Pacific Islanders. The incorporation of traditional medicine and healing practices into the training of medical, nursing, social work, psychology, pharmacy and public health students will not only advance these disciplines but also enhance the health care services delivered to these populations.

The Committee believes that community health centers are a critical source of care for the underserved, particularly in remote rural areas in States such as Alaska and Hawaii. To facilitate the development of such centers in these and other States with low-income persons living in extremely remote areas, the Committee recommends that HRSA examine its regulations and applications procedures to ensure they are not unduly burdensome but are appropriately flexible to meet the needs of these communities. New health centers in remote communities are needed.

Again, the Committee observes that the State of Hawaii and Pacific Basin Region are experiencing an acute shortage of doctorally prepared pharmacists, and there is no school of pharmacy in the State. Unique to Hawaii is the fact that much of its population comes from the pacific basin region and use health interventions that are unique to that part of the world. Therefore, the Committee again urges HRSA to develop a pharmacy program at the University of Hawaii/Hilo that includes in its curriculum a strong clinical focus on pacific basin region culture and traditional interventions.

The Committee recognizes the important service done by the Molokai Health System on that remote island. This is an exemplary facility. Its environment provides opportunities to research outcomes of new interventions, evaluate culturally relevant health education, train providers on caring for ethnic populations and integrate non-Western health treatments. The leadership of Molokai has also encouraged the collaboration among diverse health professionals and the use of technological advances such as telehealth and telemedicine and video consultations. Given this history of success in meeting the needs of its unique community, the Committee strongly recommends that Molokai General Hospital be designated as a Center of Excellence on the provision of health care in rural areas.

National Health Service Corps: Field placements

The Committee provides \$46,498,000 for field placement activities, which is \$8,000 less than the fiscal year 2002 level and the same as the administration request. The funds provided for this program are used to support the activities of National Health Service Corps obligors and volunteers in the field, including travel and transportation costs of assignees, training and education, recruitment of volunteers, and retention activities. Salary costs of most new assignees are paid by the employing entity.

National Health Service Corps: Recruitment

The Committee provides \$142,918,000 for recruitment activities, which is \$43,929,000 more than the fiscal year 2002 level and the same as the administration request. This program provides major benefits to students (full-cost scholarships or sizable loan repayment) in exchange for an agreement to serve as a primary care provider in a high priority federally designated health professional shortage area. The Committee reiterates its intention that funds support multi-year, rather than single-year, commitments.

The Committee applauds the President for building on the Committee's Rural Health Initiative from the previous fiscal year by proposing a needed increase for this program. The Committee is again increasing funding for field placements and recruitment to address growing concerns about primary care provider shortages in rural and underserved areas. The Committee strongly supports these programs because of their success in recruiting, training, and retaining well-trained providers in these areas. The Committee is aware that providers who train in rural and underserved areas are more likely to elect to practice in those areas.

HEALTH PROFESSIONS

The Committee provides \$305,564,000 for health professions programs under Title VII of the Public Health Services Act, which is \$10,343,000 more than the fiscal year 2002 level and \$294,564,000 more than the administration request for these programs.

The Committee urges the administration to create a partnership between the HRSA and the Arthritis Foundation for the purpose of conducting a national study on the status of pediatric rheumatology in the United States. As provided in the Children's Health Act of 2000, this study will assess this crisis and identify strategies for addressing the significant shortage of pediatric services for children with arthritis. The Secretary shall report the findings of the study to the Committee no later than August 1, 2003.

The Committee remains concerned about the widening gap between the size of the Nation's aging baby boom population and the number of pulmonary/critical care physicians. Given the current funding trends for graduate medical education, we can expect a severe shortage of these specialists by 2007. The Committee therefore urges the Administrator to consult with the American College of Chest Physicians and the members of the Critical Care Workforce Partnership to develop a comprehensive action plan to address this pending crisis.

The following clusters and their associated programs are included in this consolidated account:

*A. Training for diversity**Centers of excellence*

This program was established to fund institutions that train a significant portion of the Nation's minority health professionals. Funds are used for the recruitment and retention of students, faculty training, and the development of plans to achieve institutional improvements. The institutions that are designated as centers of excellence are private institutions whose mission is to train disadvantaged minority students for service in underserved areas. Located in poor communities and usually with little State funding, they serve the health care needs of their patients often without remuneration. The Committee is pleased that the agency has refocused the minority centers of excellence program on providing support to historically minority health professions institutions.

The Committee is pleased that HRSA has re-focused the Minority Centers of Excel-

lence program on providing support to historically minority health professions institutions.

Health careers opportunity program

This program provides funds to medical and other health professions schools for recruitment of disadvantaged students and pre-professional school preparations. The Committee is pleased that HRSA has given priority consideration for grants to minority health professions institutions, and recommends that grant review committees have proportionate representation from these institutions.

The Committee is pleased that HRSA has given priority consideration for H-COP grants to minority health professions institutions, and recommends that grant review committees have proportionate representation from these institutions. The Committee continues to encourage the H-COP program to consider applications that are responsive to allied health professions which are experiencing shortages and high vacancy rates.

Faculty loan repayment

This program provides for the repayment of education loans for individuals from disadvantaged backgrounds who are health professions students or graduates, and who have agreed to serve for not less than 2 years as a faculty member of a health professions school.

Scholarships for disadvantaged students

This program provides grants to health professions schools for student scholarships to individuals who are from disadvantaged backgrounds and are enrolled as full-time students in such schools. The Committee continues to intend that all health professions disciplines made eligible by statute be able to participate in the scholarships program.

*B. Training in primary care medicine and dentistry**Family medicine training*

Family medicine activities support grants for graduate training in family medicine, grants for pre-doctoral training in family medicine, grants for faculty development in family medicine, and grants for the establishment of departments of family medicine. The Committee reiterates its support for this program and recognizes its importance in increasing the number of primary care physicians in underserved areas.

General internal medicine and pediatrics training

This program provides funds to public and private nonprofit hospitals and schools of medicine and osteopathic medicine to support residencies in internal medicine and pediatrics. Grants may also include support for faculty.

Physician assistants

This program supports planning, development, and operation of physician assistant training programs.

General dentistry and pediatric dental residencies

This program assists dental schools and postgraduate dental training institutions to meet the costs of planning, developing, and operating residency training and advanced education programs in general practice of dentistry and funds innovative models for postdoctoral general dentistry and pediatric dentistry.

The Committee recognizes the need to increase the number of dentists in rural and underserved areas, and particularly increase the number of pediatric dentists in those areas. Rural States are disproportionately underserved by pediatric dentists.

The Committee recognizes that these programs play a critical role in meeting the

oral health care needs of Americans; especially those who require specialized or complex care and represent vulnerable populations in underserved areas. Additionally, the Committee realizes that several States have fewer than 10 pediatric dentists. This clearly is not enough to address American children's needs.

*C. Interdisciplinary, community-based linkages**Area health education centers*

This program links university health science centers with community health service delivery systems to provide training sites for students, faculty, and practitioners. The program supports three types of projects: Core grants to plan and implement programs; special initiative funding for schools that have previously received Area Health Education Centers (AHEC) grants; and model programs to extend AHEC programs with 50 percent Federal funding.

Health education and training centers

These centers provide training to improve the supply, distribution, and quality of personnel providing health services in the State of Florida or along the border between the United States and Mexico and in other urban and rural areas with populations with serious unmet health care needs.

Allied health and other disciplines

These programs seek to improve access, diversity, and distribution of allied health practitioners to areas of need. The program improves access to comprehensive and culturally competent health care services for underserved populations.

The Committee recognizes the need to continue the Graduate Psychology Education Program within the Bureau of Health Professions. The Committee understands that this is the only federally funded psychology-training program, and for this reason, considers its continuation a high priority. The Committee urges the administration to establish of a graduate training program in Geropsychology (GTG) to train health service psychologists to work with older Americans, especially in rural communities and other underserved people.

The Committee continues to encourage HRSA to give priority consideration to those projects for schools training allied health professionals experiencing shortages, such as medical technologists and cytotechnologists.

Geriatric education centers and training

The Committee expects this program to continue to support grants to health professions schools to establish geriatric education centers and to support geriatric training projects. These centers and geriatric training programs play a vital role in enhancing the skill-base of health care professionals to care for our Nation's growing elderly population. The Committee is concerned about the shortage of trained geriatricians and urges the agency to give priority to building the work force necessary to care for the Nation's elderly.

Quentin N. Burdick program for rural health interdisciplinary training

This program addresses shortages of health professionals in rural areas through interdisciplinary training projects that prepare students from various disciplines to practice together, and offers clinical training experiences in rural health and mental health care settings to expose students to rural practice. The Committee continues to be concerned about the lack of providers in rural areas and expects funding to continue at least at the fiscal year 2003 level.

The Committee supports addressing the issue of how the delivery of chiropractic health care can be enhanced in rural areas, and how more women and minorities can be

recruited as chiropractic health care practitioners in rural areas. The Committee also expects the Bureau to expand its support for telecommunications and telehealth initiatives for providing distance education and training for nurses and allied health professionals serving rural areas.

Podiatric primary care training

This program provides grants to hospitals and schools of podiatric medicine for residency training in primary care. In addition to providing grants to hospitals and schools of podiatric medicine for residency training in primary care, the program also permits HRSA to study and explore ways to more effectively administer postdoctoral training in an ever changing health care environment.

Chiropractic demonstration grants

The program provides grants to colleges and universities of chiropractic to carry out demonstration projects in which chiropractors and physicians collaborate to identify and provide effective treatment of spinal and lower back conditions. The Committee continues to strongly support the chiropractic research and demonstration grant program, originally authorized under Section 782 of Public Law 102-408, and funded by the Committee in previous years. The Committee recommends that the chiropractic-medical school demonstration grant program be continued.

The Committee believes that demonstration projects that address treatment for spinal and lower-back conditions, as authorized under Section 755(b)(3) of Public Law 105-392, may include training initiatives as well as research collaborations between physicians, chiropractors and chiropractic colleges. Therefore, the Committee directs HRSA to provide funding for such training components of chiropractic demonstration grant proposals in fiscal year 2003 and beyond.

D. Workforce information and analysis

Health professions data and analysis

This program supports the collection and analysis of data on the labor supply in various health professions and on future work force configurations.

Research on certain health professions issues

This program supports research on the extent to which debt has a detrimental effect on students entering primary care specialties; the effects of federally funded education programs for minorities attending and completing health professions schools; and the effectiveness of State investigations in protecting the health of the public.

E. Public health workforce development

With the continued need for public health training throughout the country, the Committee believes these programs serve an important role in maintaining the country's public health infrastructure.

Public health, preventive medicine and dental public health programs

This program supports awards to schools of medicine, osteopathic medicine, public health, and dentistry for support of residency training programs in preventive medicine and dental public health; and for financial assistance to trainees enrolled in such programs.

Health administration programs

This program provides grants to public or nonprofit private educational entities, including schools of social work, but not schools of public health, to expand and improve graduate programs in health administration, hospital administration, and health policy analysis and planning; and assists educational institutions to prepare students for employment with public or nonprofit private agencies.

F. Children's hospital graduate medical education program

The Committee provides \$285,000,000 for the Children's Hospital Graduate Medical Education (GME) program. This is \$33,000 more than the fiscal year 2002 level and \$85,000,000 more than the administration request.

The program provides support for health professions training in children's teaching hospitals that have a separate Medicare provider number ("free-standing" children's hospitals). Children's hospitals are statutorily defined under Medicare as those whose inpatients are predominantly under the age of 18. The funds in this program are intended to make the level of Federal Graduate Medical Education support more consistent with other teaching hospitals, including children's hospitals, which share provider numbers with other teaching hospitals. Payments are determined by formula, based on a national per-resident amount. Payments support training of resident physicians as defined by Medicare in both ambulatory and inpatient settings.

The Committee believes Federal support for GME for children's hospitals is a sound investment in children's health. Congress has enacted expansions in children's health coverage and increased support for health programs devoted to children and biomedical research. Equitable funding for children's hospitals GME is needed to sustain the pediatric workforce, including an adequate supply of future pediatric researchers, and our pediatric research enterprise.

The Committee further recognizes that an inequity exists for GME funding for children's teaching hospitals because Medicare is the largest single payer of GME, and free-standing children's hospitals treat few Medicare patients. These funds provide essential, equitable support for the teaching contributions of these institutions.

G. Nursing education programs

The Committee provides \$83,502,000 for Nursing Education Programs under Title VIII of the Public Health Services Act which is \$1,000,000 more than the fiscal year 2002 level and the same as the administration request.

The Committee recognizes the current nursing shortage is creating a health care crisis in hospitals and skilled nursing facilities. The lack of young people in nursing has resulted in a steady and dramatic increase in the average age of U.S. nurses. Today, the average age of a working RN is 43 years old. According to recent surveys, one in five nurses plans to retire by 2006, exacerbating the shortage.

Another factor contributing to the nursing shortage is the availability of nursing faculty. They, like nurses in healthcare delivery, are aging. Thus, for some schools, even if they could recruit more students, they may not have faculty to teach them. The Committee believes that this is an area that requires critical attention.

One reason for this shortage is the inability of nursing schools to educate more nursing students, which is in turn largely the result of a lack of qualified nursing faculty. Since the average age of nurse educators today is 55, this shortage of educators will continue to accelerate. The Committee is further aware of the success of the Troops-to-Teachers program at the Departments of Defense and Education in placing qualified military veterans into teaching positions in America's public schools through an expedited certification process. The Committee therefore encourages HRSA to establish a pilot program similar to the Troops-to-Teachers program to encourage qualified, active duty military nurses to become nurse educators in certified nursing school pro-

grams. The program should include career and placement assistance, transitional stipends for those who commit to teach in nursing schools, and cooperation with nursing schools to expedite the transition from the military to civilian teaching.

Advanced education nursing

The Committee provides \$47,596,000 for Advanced Education Nursing programs, which is \$12,445,000 more than the fiscal year 2002 level and \$13,445,000 more than the administration request. This program funds nursing schools to prepare nurses at the master's degree or higher level for teaching, administration, or service in other professional nursing specialties.

Basic nurse education and practice

The Committee provides \$10,855,000 for Basic Nurse Education and Practice programs, which is \$5,434,000 less than the fiscal year 2002 level and the administration request. Authorized by Public Law 105-392, the goal of this program is to improve the quality of nursing practice. Activities under this program will initiate new projects that will change the educational mix of the basic nursing workforce and empower the workforce to meet the demands of the current health care system.

Nursing workforce diversity

The Committee provides \$25,051,000 for Nursing Workforce Diversity programs, which is \$18,879,000 more than the fiscal year 2002 level and the administration request. The goal of this program is to improve the diversity of the nursing workforce through increased educational opportunities for individuals from disadvantaged backgrounds. The Committee urges the Division of Nursing to develop and increase cultural competence in nursing and to increase the number of underrepresented racial and ethnic minorities in all areas of nursing education and practice to enhance nursing's ability to provide quality health care services to the increasingly diverse community it serves.

OTHER HRSA PROGRAMS

Hansen's disease services

The Committee has included \$18,142,000 for the Hansen's Disease Program which is \$303,000 more than fiscal year 2002 and the same as the administration request. This program offers Hansen's Disease treatment in Baton Rouge at the Center, at other contract supported locations in Baton Rouge, and in grant supported outpatient regional clinics. These programs provide treatment to about 3,000 of the 6,000 Hansen's disease sufferers in the United States.

With the exception of about 40 long-term residents who continue to reside at Carville, the program has completed the move to leased space in Baton Rouge. Other former long term residents have been offered and elected to receive a living allowance from the program and now live independently. The former Federal property at Carville has been transferred to the State of Louisiana.

Over the next few years a long term facility will be developed in the Baton Rouge area and offered to the current long term residents remaining at the Carville location as an alternative to remaining at the historic facility.

The program also conducts research focusing on the global elimination of Hansen's Disease in laboratory facilities at Louisiana State University in Baton Rouge. Research activities are directed toward the development of new anti-leprosy drugs and short-term more effective regimens; manufacture and distribution of lepromin skin tests reagents through the World Health Organization; identification of host resistant mechanisms for potential use in vaccines development; and application of state-of-the-art biotechnology to develop simple lab techniques

for case detection and diagnosis of pre-clinical disease.

The Committee was surprised to learn of the extent to which there has been an increase in the number of individuals afflicted with Hansen's Disease in Hawaii due to its geographical location and the influx of immigrants from the Pacific Basin region. Funds have been provided to assist the State in its screening efforts, which of necessity, must be targeted towards the unique immigration cultures.

Healthy communities innovation initiative

The Committee has included \$20,000,000 for the Healthy Communities Innovation Initiative. This new program is funded at the administration's request.

The Healthy Communities Innovation Initiative is a new interdisciplinary services demonstration program which will concentrate on the prevention of three of the most rapidly increasing diseases in the United States; diabetes, asthma, and obesity. The purpose of this initiative is to encourage the development of innovative efforts within 5 communities in defined geographical areas, to enhance access to services, and change health outcomes.

Maternal and child health block grant

The Committee provides \$741,531,000 for the maternal and child health [MCH] block grant. This is \$10,000,000 more than fiscal year 2002 and the administration request.

The Maternal and Child Health Block Grant program provides a flexible source of funding that allows States to target their most urgent maternal and child health needs through development of community-based networks of preventive and primary care that coordinate and integrate public and private sector resources and programs for pregnant women, mothers, infants, children, and adolescents. The program supports a broad range of activities including prenatal care, well child services and immunizations, reducing infant mortality, preventing injury and violence, expanding access to oral health care, addressing racial and ethnic disparities and providing comprehensive care for children, adolescents, and families through clinics, home visits and school-based health programs.

The MCH block grant funds are provided to States to support health care for mothers and children. According to statute, 12.75 percent of funds over \$600,000,000 are used for community-integrated service systems [CISS] programs. Of the remaining funds, 15 percent is used for special projects of regional or national significance [SPRANS] while 85 percent is distributed on the same percentage split as the basic block grant formula.

The Committee provides \$5,000,000 more for SPRANS activities than would otherwise be the case under the statutory formula for oral health demonstration programs and activities in the States. The Committee expects that the programs will include grants to reduce the incidence of early childhood caries and baby bottle tooth decay, community water fluoridation, school-linked dental sealant programs, and to implement State identified objectives for improving oral health.

The Committee is aware of the joint activities between CMS and HRSA to improve access to medical and dental care for mothers and children in underserved populations. CMS and the Maternal and Child Health program at HRSA have worked together to assist States to reduce barriers to care for Medicaid and SCHIP populations for maternal and child health care including oral health care. The Committee urges these agencies to continue their partnership and expand support for State oral health systems grants and innovative demonstration

projects for the prevention and early intervention of dental diseases in young children, State dental access summit meetings, and the National Maternal and Child Oral Health Resource Center. The Committee recognizes that such agency collaborations are instrumental for providing coordinated services that do not duplicate limited resources.

It is the Committee's understanding that MCH has committed to retaining SPRANS funding for three thalassemia centers that provide comprehensive services to patients and families through fiscal year 2003. The Committee believes that these are critical programs and commends MCH for its support for them. The Committee further urges MCH to work closely with these three centers and with the Cooley's Anemia Foundation to assure that these centers continue to have a stable source of support that will allow them to function at or above current levels of service.

The Committee commends HRSA's Maternal and Child Health Bureau for its support of the Sudden Infant Death Syndrome Program Support Center, and encourages the Bureau to continue its efforts in this important area of service. The Committee is pleased that the SIDS and Other Infant Death Support Center is collaborating with the NIH to address the disproportionately high incidence of SIDS among African Americans.

The Committee recognizes that numerous and challenging problems confront our adolescent populations and that every effort should be made to encourage initiatives that promote the health and well being of those who represent our future. In particular, we commend the Waimanalo Health Center in Hawaii and encourage all efforts to expand its programs for adolescents.

The Committee recognizes that every year over 4 million infants are born and screened to detect conditions that threaten their life and long-term health. Newborn screening is a public health activity used for early identification of infants affected by certain genetic, metabolic, hormonal, and/or functional conditions for which there may be an effective treatment or intervention. If left untreated, these disorders can cause death, disability, mental retardation, and other serious illnesses. Parents are often unaware that while nearly all babies born in the United States undergo newborn screening, the number and quality of these tests vary from State to State. The Committee supports efforts, including those authorized by the Children's Health Act of 2000, to eliminate the disparities that exist between the types of screening provided in the States. Ultimately, eliminating these disparities can be the difference between children suffering irreversible injury or death versus children receiving successful diagnosis and treatment.

Healthy start initiative

The Committee provides \$98,989,000 for the healthy start infant mortality initiative. This is the same as the fiscal year 2002 and the administration request.

The healthy start initiative was developed to respond to persistently high rates of infant mortality in this Nation. The initiative was expanded in fiscal year 1994 by a special projects program, which supported an additional seven urban and rural communities to implement infant mortality reduction strategies and interventions. The Children's Health Act of 2000 fully authorized this initiative as an independent program.

Universal newborn hearing screening and early intervention

The Committee provides \$10,000,000 for universal newborn hearing screening and early intervention activities, which is \$1,000 above

the fiscal year 2002 level and \$10,000,000 more than the administration request. The Committee rejects the administration proposal to consolidate this program into the Maternal and Child Health Block Grant program.

The Committee continues to strongly support the initiative it began 2 years ago to provide grants to States to establish universal newborn hearing screening and early intervention programs. This initiative has been quite successful and the response from States has been substantial. The Committee is aware that HRSA received many more high quality applications for this program than it was able to fund. Numerous studies have demonstrated that newborn hearing screening followed by early intervention services can greatly improve health and educational outcomes for children.

Currently, 44 States and 3 territories have received competitive grants for the purpose of implementing statewide early hearing detection intervention (EHDI) programs. Since these grants have only been operational for between 6 months to 2 years, the Committee believes that a dedicated source of funding is critical at this time to ensure that State EHDI programs become fully operational and that screening programs are properly linked with diagnosis, early intervention, and the child's routine medical care (medical home).

The Committee is concerned that only 67 percent of babies are now screened for hearing loss before 1 month of age. Of the babies screened, only 56 percent who needed diagnostic evaluations actually receive them by 3 months of age. Moreover, only 53 percent of those diagnosed with hearing loss are enrolled in early intervention programs by 6 months of age.

The Committee has provided an increase to expand funding to States, increase the availability of qualified pediatric audiologists, educate health care providers and families about the importance of and procedures for EHDI, continue and expand the National Technical Assistance System which works with States to develop their programs, evaluate the impact of statewide EHDI programs, increase the capacity of States to screen children for progressive and late-onset hearing losses, as well as chronic middle ear infections, and to link identified children with medical, audiological, otolaryngological and early intervention services. To minimize the loss to follow-up, the Committee urges HRSA to ensure that all infants identified through the screening process are linked to a medical home.

The Committee expects HRSA to coordinate projects funded with this appropriation with projects related to early hearing detection and intervention by the National Center on Birth Defects and Developmental Disabilities, the National Institute on Deafness and Other Communication Disorders, the National Institute on Disability and Rehabilitation Research, and the Office of Special Education and Rehabilitative Services.

Organ procurement and transplantation

The Committee provides \$24,990,000 for organ transplant activities. This is \$5,000,000 more than fiscal year 2002 and the same as the administration request.

These funds support a scientific registry of organ transplant recipients and the National Organ Procurement and Transplantation Network to match donors and potential recipients of organs. A portion of the appropriated funds may be used for education of the public and health professionals about organ donations and transplants, and to support agency staff providing clearinghouse and technical assistance functions. The Committee encourages the agency to establish linkages with State and Federal transportation officials to improve coordination of

donation following vehicular accidents, through the establishment of donor registries.

The Committee urges HRSA to implement policies to encourage the retrieval of pancreata so that additional transplants can be conducted.

The Committee considers increasing the supply of organs, available from voluntary donations to be a top public health priority and expects that funds be committed to those activities having the greatest demonstrable impact on donation rate.

National bone marrow donor program

The Committee provides \$22,034,000 for the national bone marrow donor program. This is \$37,000 more than fiscal year 2002 and the same as the administration request. The National Bone Marrow Donor Registry is a network, operated under contract, that helps patients suffering from leukemia or other blood diseases find matching volunteer unrelated bone marrow donors for transplants. The program also conducts research on the effectiveness of unrelated marrow transplants and related treatments.

Rural health outreach grants

The Committee provides \$51,472,000 for health outreach grants. This amount is \$645,000 less than the fiscal year 2002 level and \$13,620,000 more than the administration request. This program supports projects that demonstrate new and innovative models of outreach in rural areas such as integration and coordination of health services.

The Committee is aware that the population of the Mississippi Delta suffers from the worst health status in the United States. This predominately African-American population suffers from disproportionately high rates of heart disease, cancer, diabetes, sexually transmitted diseases, and other infectious and chronic diseases. The Committee recognizes the variety of factors including socioeconomic, heredity, educational and environmental conditions that result in this abnormally high incidence of disease and poor health status. As a result of this combination of factors, the Committee also understands the need for a sustained multi-faceted approach that includes research, education, and infrastructure, as well as surveillance, prevention and treatment strategies to combat this health crisis. Therefore, the Committee recommends the continued funding of these activities as already initiated and undertaken by the coordinated efforts of the Mississippi Delta Health Initiative. The Delta Health Initiative is a partnership between The University of Mississippi Medical Center, Delta State University, Mississippi Valley State University and the Mississippi Department of Health as well as Delta region health officials, agencies and providers.

The Committee is deeply concerned about the increased incidence of prescription drug abuse in pockets of the country, particularly rural and frontier communities. Using existing authority under the Public Health Act, HRSA is urged to establish a program to raise awareness and promote comprehensive, community-focused, research-based approaches to reversing this trend, principally among our youth. Education and awareness on this critical issue will hopefully reduce the incidence of non-medical use of prescribed drugs and allow those patients who truly need these medicines to continue to have access to them.

The Committee understands that many primary care clinics in isolated, remote locations are providing extended stay services and are not staffed or receiving appropriate compensation to provide this service. The Committee encourages the agency to undertake a demonstration project to evaluate the effectiveness of a new type of provider, the

"Extended Stay Primary Care Center," to provide expanded services in remote and isolated primary care clinics to meet the needs of seriously ill or injured patients who cannot be transferred quickly to acute care referral centers, and patients who require monitoring and observation for a limited time.

Rural health research

The Committee provides \$16,808,000 for the Rural Health Policy Development Program. This is \$2,000,000 more than the fiscal year 2002 level and \$10,808,000 more than the administration request. The funds provide support for the Office as the focal point for the Department's efforts to improve the delivery of health services to rural communities and populations. Funds are used for rural health research centers, the National Advisory Committee on Rural Health, and a reference and information service.

State offices of rural health

The Committee provides \$10,000,000 for the State Offices of Rural Health. This is \$2,001,000 above the fiscal year 2002 level and \$6,000,000 more than the administration request. The State Office of Rural Health program helps the States strengthen rural health care delivery systems. For the second consecutive year, Committee is significantly increasing funding for the offices of rural health to allow States to better coordinate care and improve support and outreach in rural areas. The Committee believes that increased funds for this purpose are critical to improving access and quality health care services throughout rural communities.

Telehealth

The Committee provides \$39,192,000 for telehealth activities. This is \$2,000,000 above the fiscal year 2002 level and \$33,583,000 more than the administration request.

The telehealth program promotes the use of technologies to improve access to health services and distance education for health professionals. The Committee recognizes the tremendous potential that telehealth has for improving the delivery of quality health care to rural underserved areas and for providing distance education to health care professionals. The Committee supports HRSA's numerous rural telehealth initiatives and encourages the agency to work in partnership with medical librarians and other health information specialists in the development and implementation of its telehealth projects.

Native and rural Alaskan health care

The Committee provides \$30,000,000 for the Denali Commission, which is \$10,000,000 more than the fiscal year 2002 level and \$30,000,000 more than the administration request. These funds support construction and renovation of health clinics, hospitals and social service facilities in rural Alaska as authorized by Public Law 106-113. Provision of this funding will help remote communities in Alaska develop critically needed health and social service infrastructure for which no other funding sources are available so that health and social services may be provided to Alaskans in remote rural communities as they are in other communities throughout the country.

The Committee expects the Denali Commission to allocate funds to a mix of rural hospital, clinic, long-term care and social service facilities, rather than focusing exclusively on clinic funding.

Critical care programs

The Committee has grouped the following ongoing and proposed activities: emergency medical services for children, the traumatic brain injury program, trauma care/emergency medical services, and poison control centers.

Emergency medical services for children

The Committee provides \$20,000,000 for emergency medical services for children.

This is \$1,009,000 more than the fiscal year 2002 level and \$1,007,000 more than the administration request. The program supports demonstration grants for the delivery of emergency medical services to acutely ill and seriously injured children.

The Committee urges HRSA to consider EMSC a high priority, and supports the efforts and purpose of the EMSC program to continue to work with States to improve the training and availability of emergency medical services personnel who effectively treat children. The Committee also urges the Department to focus on the development of prevention and treatment programs and education of emergency personnel in remote and rural areas throughout the country.

Poison control centers

The Committee provides \$24,000,000 for poison control center activities, which is \$2,792,000 more than fiscal year 2002. The funds provided support activities authorized in the Poison Control Center Enforcement and Enhancement Act as well as the development and assessment of uniform patient management guidelines.

Traumatic brain injury program

The Committee provides \$9,000,000 for the traumatic brain injury program, which is \$1,501,000 more than the fiscal year 2002 level and the administration request. The program supports implementation and planning grants to States for coordination and improvement of services to individuals and families with traumatic brain injuries as well as protection and advocacy. Such services can include: pre-hospital care, emergency department care, hospital care, rehabilitation, transitional services, education, employment, and long-term support. The Committee includes \$3,000,000 for protection and advocacy services, as authorized under section 1305 of Public Law 106-310.

Black lung clinics

The Committee provides \$6,000,000 for black lung clinics. This is the same level as the fiscal year 2002 level and the administration request. This program funds clinics which treat respiratory and pulmonary diseases of active and retired coal miners. These clinics reduce the incidence of high-cost inpatient treatment for these conditions.

Trauma care

The Committee provides \$5,000,000 for trauma/emergency medical services. This is \$1,500,000 more than the fiscal year 2002 level and \$5,000,000 more than the administration request. The Committee rejects the administration proposal to consolidate this program into the Maternal and Child Health Block Grant program. This program is intended to improve the Nation's overall emergency medical systems, which are constantly activated to respond to a wide range of natural and man-made disasters, such as: earthquakes; mass violence; riots; school shootings; motor vehicle crashes; and terrorist attacks.

Nurse loan repayment for shortage area service

The Committee provides \$15,000,000 for nurse loan payment for shortage area services. This is \$4,761,000 more than fiscal year 2002 and the same as the administration request.

This program offers student loan repayment to nurses in exchange for an agreement to serve not less than 2 years in an Indian health service health center, native Hawaiian health center, public hospital, community or migrant health center, or rural health clinic. The Committee commends the administration for supporting and building on the commitment made in the Rural Health Initiative last year for this critical

program. The Committee again intends that the majority of the increased funding be provided to increase the supply of qualified health care professionals in rural areas.

Payment to Hawaii, Hansen's disease treatment

The Committee provides \$2,045,000 for Hansen's disease services. This is the same as fiscal year 2002 and the administration request.

Within the amount provided for Hansen's disease services, the Committee urges funding for the fiscal year 2003 payment to the State of Hawaii for the medical care and treatment in its hospital and clinic facilities of persons with Hansen's disease at a per diem rate not greater than the comparable per diem operating cost per patient at Gillis W. Long National Hansen's Disease Center. This amount is the same as the administration request and the 2002 level.

ACQUIRED IMMUNE DEFICIENCY SYNDROME
Ryan White AIDS programs

The Committee provides \$2,051,295,000 for Ryan White AIDS programs. The recommendation includes \$25,000,000 in transfers available under section 241 of the Public Health Service Act. The recommendation is \$140,708,000 more than fiscal year 2002 and \$140,570,000 more than the administration request.

Recent advances in diagnosis, treatment, and medical management of HIV disease has resulted in dramatic improvements in individual health, lower death rates and transmission of HIV from mother to infant. The Committee recognizes, however, that not all HIV infected persons have benefited from these medical advances and expects that the Ryan White CARE Act programs provide social and other support services with the specific intent of obtaining and maintaining HIV-infected individuals in comprehensive clinical care.

The Department is encouraged to identify obstacles confronting people with HIV/AIDS in receiving medical care funded through the Ryan White programs and to develop strategies to address these problems in light of the changing medical needs of a patient population that is living longer with current therapies.

The Committee recognizes the recent advances in the treatment and medical care of persons with HIV disease and the need for early access to these interventions and services. Furthermore, the Committee understands that disparities exist in accessing and maintaining the benefits of these recent advances among communities highly impacted by HIV and AIDS.

Emergency assistance—title I

The Committee provides \$630,000,000 for emergency assistance grants to eligible metropolitan areas disproportionately affected by the HIV/AIDS epidemic. This amount is \$10,486,000 above the fiscal year 2002 and the administration request. These funds are provided to metropolitan areas meeting certain criteria. One-half of the funds are awarded by formula and one-half are awarded through supplemental competitive grants.

The Committee encourages the Secretary, when awarding supplemental title I funds, to give priority as appropriate to EMA's whose applications increase services to women, adolescents, and children with AIDS/HIV infection.

Comprehensive care programs—title II

The Committee provides \$1,095,000,000 for HIV health care and support services. This amount is \$117,627,000 above the fiscal year 2002 level and the administration request. These funds are awarded to States to support HIV service delivery consortia, the provision of home and community-based care services for individuals with HIV disease, continu-

ation of health insurance coverage for low-income persons with HIV disease and support for State AIDS drug assistance programs [ADAP].

The Committee continues to be encouraged by the progress of anti-retroviral therapy in reducing the mortality rates associated with HIV infection and in enhancing the quality of life of patients on medication. The Committee has approved bill language for \$739,000,000 for AIDS medications, which is \$100,000,000 more than the fiscal year 2002 level and the administration request.

The Committee further urges HRSA to encourage States to utilize Federal ADAP funding in the most cost-effective manner to maximize access to HIV drug therapies and to eliminate cost-shifting from Medicaid to the State ADAP programs. States with ADAP funding should be allowed the flexibility to purchase and maintain insurance policies for eligible clients including covering any costs associated with these policies, or continue to pay premiums on existing insurance policies that provide a full range of HIV treatments and access to comprehensive primary care services, as determined by a State. Funds should not be committed to purchase insurance deemed inadequate by a State in its provision of primary care or in its ability to secure adequate access to HIV treatments.

Early intervention program—title III-B

The Committee provides \$200,000,000 for early intervention grants. This is \$6,083,000 more than the fiscal year 2002 level and \$5,945,000 more than the administration request. These funds are awarded competitively to primary health care providers to enhance health care services available to people at risk of HIV and AIDS. Funds are used for comprehensive primary care, including counseling, testing, diagnostic, and therapeutic services.

The Committee encourages HRSA to fairly allocate the increase for title III-B between existing grantees and new providers. By providing additional funds to current grantees, the Committee intends to strengthen the HIV care infrastructure already established in title III-B clinics. The Committee also supports expansion of the number of communities receiving assistance from this title.

Priority should be placed on funding existing and new projects in rural, medically underserved areas, and secondary cities outside of major metropolitan areas in order to build clinical capacity for the delivery of HIV care among clinicians serving high-risk populations, minorities, and those who are unable to access clinical HIV care for economic reasons. In building capacity, the goal is to develop knowledgeable clinicians to improve access to quality HIV treatment based upon the evolving HIV treatment guidelines of DHHS.

Women, infants, children, and youth—title IV

The Committee provides \$75,000,000 for title IV pediatric AIDS, which is \$4,010,000 above the fiscal year 2002 level and the administration request. Funds are awarded to community health centers, family planning agencies, comprehensive hemophilia diagnostic and treatment centers, federally qualified health centers under section 1905(1)(2)(B) of the Social Security Act, county and municipal health departments and other nonprofit community-based programs that provide comprehensive primary health care services to populations with or at risk for HIV disease.

The Committee intends that at least 90 percent of total title IV funding be provided to grantees. With the exception of funds provided through the CBC/Minority HIV/AIDS initiative, the Committee expects the funding increase will be primarily used to sup-

port maintenance and expansion of existing care services, including the rising costs of providing comprehensive care and the implementation of quality management programs. The Committee intends that HRSA use a significant portion of the remaining funds to expand comprehensive services for youth. The Committee is pleased by current efforts to facilitate ongoing communication with and among grantees on the administration of the title IV program and expects the agency to expand these efforts. The Committee expects the agency to work with grantees to develop effective title IV-specific site visit methodologies.

Some 5 percent of the funds appropriated under this section may be used to provide peer-based technical assistance. Within this amount, sufficient funds are available to maintain and expand work being done to create a national consumer and provider education center on the use of various strategies and planning in the care of children, youth, women and families infected with or affected by HIV and AIDS.

AIDS dental services

The Committee provides \$16,000,000 for AIDS dental services, which is \$2,502,000 more than the fiscal year 2002 level and the administration request. This program provides grants to dental schools, dental hygiene schools, and postdoctoral dental education programs to assist with the cost of providing unreimbursed oral health care to patients with HIV disease.

The Committee recognizes the importance of oral health care providers in the diagnosis of HIV and in treating the painful and debilitating oral manifestations of this disease. The Committee supports this program as it improves access to oral health services for low-income and uninsured people living with HIV and AIDS by providing partial reimbursement to dental education institutions for delivering care. The Committee recognizes that these dental services are vital because they are often the only services available to AIDS patients since many State Medicaid programs do not cover adult dental services.

AIDS education and training centers

The Committee provides \$35,295,000 for the AIDS education and training centers [AETC's], which is the same as the fiscal year 2002 level and the administration request. AIDS education and training centers train health care practitioners, faculty, and students who care for AIDS patients outside of the traditional health professions education venues, and support curriculum development on diagnosis and treatment of HIV infection for health professions schools and training organizations. The targeted education efforts by AETC's are needed to ensure the cost-effective use of the significant expenditures in Ryan White programs and the AIDS drugs assistance program. The agency is urged to fully utilize the AETC's to ensure the quality of medical care and to ensure, as much as possible, that no individual with HIV receives suboptimal therapy due to the lack of health care provider information.

Family planning

The Committee provides \$285,000,000 for the title X family planning program. This is \$19,945,000 more than the fiscal year 2002 level and \$19,725,000 more than the administration request. Title X grants support primary health care services at more than 4,500 clinics nationwide. About 85 percent of family planning clients are women at or below 150 percent of poverty level. Title X of the Public Health Service Act, which established the family planning program, authorizes the provision of a broad range of acceptable and

effective family planning methods and preventive health services. This includes FDA-approved methods of contraception.

The Committee has increased funding for clinics receiving Title X funds to address increasing financial pressures in their effort to provide high-quality, subsidized family planning services and preventive health care to (4.4 million each year, many of whom are uninsured) low-income and uninsured women. These pressures include rising medical costs of newer and longer lasting contraceptive methods, pharmaceuticals, and screening and diagnostic technologies (as well as a rising uninsured population). The Committee recognizes that due to these financial pressures, it will be difficult for Title X clinics to serve the current number of patients without a significant funding increase. The Committee also recognizes that the increased availability of new contraceptive methods and screening technologies will improve women's health and result in a decrease in unintended pregnancies nationwide.

The Committee remains concerned that programs receiving Title X funds ought to have access to these resources as quickly as possible. The Committee, therefore, again instructs the Department to distribute to the regional offices all of the funds available for family planning services no later than 60 days following enactment of this bill.

The Committee intends that at least 90 percent of funds appropriated for Title X activities be for clinical services authorized under section 1001 of the Act. All such funds for section 1001 activities are to be provided to the regional offices to be awarded to grantees to provide family planning methods and services as specified by the Title X statute. The Committee further expects the Office of Family Planning to spend any remaining year-end funds in section 1001 activities.

Community Based Abstinence Education Program

The Committee provides \$40,000,000 for this program, which provides support for the development and implementation of abstinence education programs for adolescents, ages 12 through 18. This is the same as the fiscal year 2002 level and \$32,979,000 less than the President's request. These funds, together with the \$50,000,000 in mandatory funds provided through the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, will make \$90,000,000 available for abstinence education. These programs are unique in that their entire focus is to educate young people and create an environment within communities that support teen decisions to postpone sexual activity until marriage. The Committee intends that the Secretary fund grantees who are currently receiving section 510 funds, but whose project periods were scheduled to expire at the end of fiscal year 2002.

Health care facilities

The Committee has provided no funding for health care facilities, which is \$311,942,000 below the 2002 level and the same as the administration request. Funds are made available to public and private entities for construction and renovation of health care and other facilities. The reduction below last year's level is due to the funding of one-time projects.

Buildings and facilities

The Committee provides \$250,000 for buildings and facilities, which is the same as fiscal year 2002 level and the administration request.

Rural hospital flexibility grants

The Committee provides \$45,000,000 for rural hospital flexibility grants, which is

\$5,000,000 more than the fiscal year 2002 level and \$20,000,000 more than the administration request.

This program administers the Rural Health Flexibility Program previously administered by the Health Care Finance Administration. Under this program, eligible rural hospitals may convert themselves into limited service facilities termed Critical Care Hospitals. Such entities are then eligible to receive cost-based payments from Medicare. The grant component of the program assists States with the development and implementation of State rural health plans, conversion assistance, and associated activities.

Of the amount provided, the Committee includes \$20,000,000 to continue the Small Rural Hospital Improvement Grant Program, as authorized by Section 1820 (g)(3) of the Social Security Act and Public Law 107-116 and outlined in House Report 107-342.

Rural access to emergency devices

The Committee provides \$12,500,000 for rural access to emergency devices, which is the same as the fiscal year 2002 level and \$10,500,000 more than the administration request. This program, which is to be administered through the Rural Health Outreach Office, provides grants to expand placement of automatic external defibrillators (AEDs) in rural areas and to ensure that first responders and emergency medical personnel are appropriately trained.

Radiogenic diseases

The Committee provides \$2,000,000 for the Radiation Exposure Compensation Act, which is \$2,000,000 less than the fiscal year 2002 level and the administration request. This program provides grants for the education, prevention, and early detection of radiogenic cancers and diseases resulting from exposure to uranium during its mining and milling at nuclear test sites.

National practitioner data bank

The Committee provides \$19,500,000 for the national practitioner data bank, which is \$2,900,000 more than the fiscal year 2002 level and the same as the administration request. The Committee and the administration assume that full funding will be provided entirely through the collection of user fees and will cover the full cost of operating the data bank. Traditional bill language is included to ensure that user fees are collected to cover all costs of processing requests and providing such information to data bank users.

Health care integrity and protection data bank

The Committee provides \$5,600,000 for the health care integrity and protection data bank, which is \$500,000 more than the fiscal year 2002 level and the same as the administration request. The Committee and the administration assume that full funding will be provided entirely through the collection of user fees and will cover the full cost of operating the data bank. The data bank is intended to collect, maintain, and report on certain actions taken against health care providers, suppliers, and practitioners.

Healthcare access for the uninsured/Community access program

The Committee provides no funding for this activity. In fiscal year 2002, \$120,027,000 was provided. The administration requested no funds for this purpose. This program is designed to increase the capacity and effectiveness of community health care institutions and providers who serve patients, regardless of their ability to pay.

Program management

The Committee provides \$143,354,000 for program management activities for fiscal year 2003. This is \$5,783,000 less than the fis-

cal year 2002 level and \$348,000 less than the administration request.

MEDICAL FACILITIES GUARANTEE AND LOAN FUND

The Committee has not included funding for the Medical Facilities and Guarantee and Loan Fund. This fund was established in 1972 under the Medical Facilities Construction Program in order to make funds available for construction of medical facilities. The fund is established in the Treasury without fiscal year limitation to pay interest subsidies, make payments of principal and interest in the event of default on a guaranteed loan, and repurchase, if necessary loans sold and guaranteed. There are sufficient carryover funds from prior years' appropriations to pay defaults and interest subsidy payments; therefore, no appropriation is required to cover these payments.

HEALTH EDUCATION ASSISTANCE LOANS

The Committee provides no additional guarantee authority for new HEAL loans in fiscal year 2003, which is the same as the President's request.

The Committee provides \$7,000,000 to liquidate obligations from loans guaranteed before 1992, which is the same as the administration request and \$3,000,000 less than the 2002 appropriation.

For administration of the HEAL Program including the Office of Default Reduction, the Committee provides \$3,914,000, which is \$123,000 above the 2002 appropriation and the same as the administration request.

The HEAL Program insures loans to students in the health professions and helps to ensure graduate student access to health professions education, especially among minority, disadvantaged students, and those from behavioral and mental health fields. The Budget Enforcement Act of 1990, changed the accounting of the HEAL Program. One account is used to pay obligations arising from loans guaranteed prior to 1992. A second account was created to pay obligations and collect premiums on loans guaranteed in 1992 and after. Administration of the HEAL Program is separate from administration of other HRSA programs.

VACCINE INJURY COMPENSATION TRUST FUND

Appropriations, 2002	\$84,696,000
Budget estimate, 2003	88,909,000
Committee recommendation	88,909,000

The Committee provides that \$88,909,000 be released from the vaccine injury compensation trust fund in fiscal year 2003, of which \$2,991,000 is for administrative costs. The total amount is \$4,213,000 more than fiscal year 2002 and the same as the administration request.

The National Vaccine Injury Compensation Program provides compensation for individuals with vaccine-associated injuries or deaths. Funds are awarded to reimburse medical expenses, lost earnings, pain and suffering, legal expenses, and a death benefit. The vaccine injury compensation trust fund is funded by excise taxes on certain childhood vaccines.

CENTERS FOR DISEASE CONTROL AND PREVENTION

DISEASE CONTROL, RESEARCH, AND TRAINING

Appropriations, 2002	\$4,303,256,000
Budget estimate, 2003	3,874,444,000
Committee recommendation	4,387,249,000

The Committee provides \$4,387,249,000 for the Centers for Disease Control and Prevention (CDC), which is \$83,993,000 above the fiscal year 2002 level and \$512,805,000 above the budget request. The Committee recommendation includes \$84,500,000 in transfers

available under section 241 of the Public Health Service Act.

The activities of the CDC focus on several major priorities: provide core public health functions; respond to urgent health threats; monitor the Nation's health using sound scientific methods; build the Nation's health infrastructure to insure our national security against bioterrorist threats; promote women's health; and provide leadership in the implementation of nationwide prevention strategies to encourage responsible behavior and adoption of lifestyles that are conducive to good health.

The anthrax attacks of late last year set off an avalanche of false alarms that produced thousands of samples for testing. Each of these samples had to be handled as if contaminated with the deadly *Bacillus anthracis* bacterium. The Committee is aware of the sacrifices made to ensure the accurate processing and testing of thousands of samples for anthrax. The Committee commends the CDC, especially the National Center for Infectious Diseases, National Institute for Occupational Safety and Health, and National Center for Environmental Health, for their efforts during this time of uncertainty.

BIRTH DEFECTS, DEVELOPMENTAL DISABILITIES, DISABILITY AND HEALTH

The Committee recommends \$97,691,000 for birth defects, developmental disabilities, disability and health which is \$7,781,000 above the fiscal year 2002 level and \$8,368,000 above the administration request.

Birth defects are the leading cause of infant death in the United States. More than 150,000 infants are born with birth defects each year in the United States. The Child Health Act of 2000 created CDC's National Center on Birth Defects and Developmental Disabilities. The Committee recognizes CDC as the Nation's leader in assisting States in monitoring for birth defects and developmental disabilities and improving the health and wellness of people living with a disability. The birth defects and developmental disabilities monitoring programs collect, analyze, and make available data on the incidence and causes of birth defects and developmental disabilities.

Autism.—Within the total provided, \$1,368,000 above the budget request is to expand autism surveillance activities. The Committee is concerned about the lack of information available on the prevalence, cause or effective treatment of autism. Basic data collection and verification is integral to better understanding the incidence of autism, the factors that may be associated with a higher rate of incidence, and effective treatment.

Childhood birth defects and developmental disorders.—The Committee recognizes the importance of helping children suffering from birth defects and developmental disorders. These include cleft lip, cleft palate, missing limbs and other facial deformities from hemangiomas, hemifacial and microsomia to microtia, aural atresia, and craniosynostosis. The Committee, therefore, urges the National Center on Birth Defects and Developmental Disabilities to conduct research on the incidence of birth defects including abnormalities of structure, function, or body metabolism, the cost of appropriate medical treatment, availability of insurance coverage, and insurance coverage policies. The Committee urges the Center to work with the National Foundation for Facial Reconstruction and the American Society of Plastic Surgeons to develop an information clearinghouse for parents and physicians regarding appropriate medical treatment.

Disabilities Prevention Programs.—The Committee continues to strongly support the

CDC disabilities prevention program which provides support to States and academic centers to reduce the incidence and severity of disabilities, especially developmental and secondary disabilities. Individuals living with disabilities and their families need information on medical, physical, and emotional needs, and resources and support to reintegrate socially and economically into society. The Committee is pleased by the partnerships between the CDC and the disability-related information and support centers in the areas of limb loss, paralysis and AD/HD and has included sufficient funding to allow CDC to continue these successful programs and partnerships at, at least, their current funding levels and with existing partners.

In particular, the Committee commends CDC for its work with the Christopher Reeve Paralysis Foundation to establish an information and support center and to reduce secondary disabilities among people with paralysis.

The Committee encourages the continued support of activities aimed at improving knowledge about the usefulness and effectiveness of health promotion programs for persons with disabilities.

Duchenne muscular dystrophy.—The Committee has included \$4,000,000 to expand the epidemiological program in Duchenne and Becker muscular dystrophy. The Center is expected to gather and analyze extensive data on these diseases, including a comparison of treatment approaches.

Fetal Alcohol Syndrome.—Within the total provided, \$1,000,000 above the budget request is to expand activities related to Fetal Alcohol Syndrome (FAS).

The Committee supports CDC's efforts to reduce the rates of Fetal Alcohol Syndrome (FAS) through surveillance and prevention programs. FAS, the country's leading known cause of mental retardation and birth defects, devastates the lives of as many as 12,000 newborn children and their families each year, and is completely preventable. This increase will allow CDC to expand surveillance activities to document the magnitude of the problem and to develop and implement prevention strategies.

Folic acid education campaign to prevent birth defects.—Each year, an estimated 2,500 babies are born with neural tube defects (NTDs), birth defects of the brain and spinal cord, including anencephaly and spina bifida. CDC estimates that up to 70 percent of NTDs could be prevented if all women of childbearing age consume 400 micrograms of folic acid daily, beginning before pregnancy. The Committee commends CDC for its leadership in this area.

Newborn Screening.—Title XXVI of the Children's Health Act of 2000 provides that the Secretary shall award grants to improve or expand the ability of State and local public health agencies to provide screening to newborns and children having or at risk for heritable disorders. The Committee supports further research and demonstration projects for the translation of new scientific knowledge into applied public health screening programs. The Committee urges CDC to coordinate with HRSA in translating the results of these efforts, particularly in the areas of Fragile X Syndrome and Cystic Fibrosis, into guidance for public health programs, including State newborn screening programs.

The Committee commends CDC for its early hearing detection and intervention (EHDI) program for newborns, infants and young children with hearing loss. Thirty States have received cooperative agreement grants over the last 2 years (15 States in fiscal year 2000 and another 15 States in fiscal year 2001) to assist in developing strong sur-

veillance and tracking systems. These grants ensure that infants referred from newborn hearing screening programs receive appropriate and timely diagnostic and early intervention services. The Committee is concerned that of babies who were screened, only 56 percent who needed diagnostic evaluations actually received them by 3 months of age. Moreover, only 53 percent of those diagnosed with hearing loss were enrolled in early intervention programs by 6 months of age. The Committee believes that increased funding is required to ensure that States develop appropriate surveillance and tracking systems to provide timely and appropriate diagnostic and intervention services to infants and toddlers.

The Committee encourages the National Center on Birth Defects and Developmental Disabilities to provide clarification and guidance to States regarding how EHDI surveillance, tracking, and data management programs are affected by the Health Insurance Portability and Accountability Act and the Family Education Rights and Privacy Act.

To avoid duplication and interference, the Committee expects CDC to coordinate projects funded with this appropriation with EHDI projects conducted by the Health Resources Services Administration, the National Institute on Deafness and Other Communication Disorders, the National Institute on Disability and Rehabilitation Research, and the Office of Special Education and Rehabilitative Services.

Regional centers for birth defects research and prevention.—The Committee encourages CDC to increase support for research activities conducted by the eight regional Centers for Birth Defects Research and Prevention. These centers located in Arkansas, California, Georgia, Iowa, Massachusetts, New Jersey, New York, and Texas, conduct epidemiological research on the prevention of birth defects. For over 5 years, the Centers have identified cases and obtained data for inclusion in the National Birth Defect Prevention Study, the largest case-control study of birth defects ever conducted. Now, the centers can begin to use this data for studies that will lead to understanding the biological mechanisms of the nearly 80 percent of birth defects whose causes are unknown. An increase will allow these centers to expand and intensify the study of genetic and environmental causes of birth defects.

Special Olympics Healthy Athletes Initiative.—The Committee continues to be concerned about the unmet health needs among persons with mental retardation. In March of 2001, this Committee held a field hearing in Anchorage Alaska, during the World Winter Special Olympics Games. At that hearing, numerous witnesses, including persons with mental retardation, expressed their frustration in securing needed health services and the severe consequences of not being able to obtain such services in a timely and appropriate way. Persons with mental retardation have more health challenges and poorer access to health care than the rest of the population. As a result, their lives are unnecessarily shortened and the quality of their lives is severely compromised.

To address the unmet health needs among its athletes, Special Olympics created the Healthy Athletes Program, which provides Special Olympics athletes access to an array of health assessment, education, preventive health services and supplies, and referral for follow-up care where needed. These services are provided to athletes without cost in conjunction with competitions at local, State, national, and international levels. Last year, this Committee established a Special Olympics Healthy Athletes Initiative at CDC to support these efforts. Sufficient funds have been included this year to increase funding for that activity.

Spina Bifida.—The Committee recognizes that Spina Bifida is the leading permanently disabling birth defect in the United States. While Spina Bifida and related neural tube defects are highly preventable through proper nutrition, including appropriate folic acid consumption, and its secondary effects can be mitigated through appropriate and proactive medical care and management, such efforts have not been adequately supported or coordinated to result in significant reductions in these costly conditions. In an effort to improve the quality-of-life for individuals affected by Spina Bifida and reduce and prevent the occurrence of and suffering from this birth defect, the Committee has provided \$2,000,000 to support the establishment of a National Spina Bifida Program. This program should be established in coordination with a leading national voluntary health agency which exists to promote the prevention of spina bifida and to enhance the lives of all affected. Such a national program will lead the nation's efforts in addressing issues associated with this devastating birth defect.

State cooperative agreements for birth defects surveillance.—The Committee encourages CDC to increase support to States to develop, implement, and/or expand community-based birth defects tracking systems, programs to prevent birth defects, and activities to improve access to health services for children with birth defects. CDC is now assisting twenty-eight States with cooperative agreements.

Chronic Disease Prevention and Health Promotion

The Committee recommends \$745,600,000 for chronic disease prevention and health promotion, which is \$1,622,000 below the fiscal year 2002 level and \$55,370,000 above the administration's request.

The unprecedented commitment to biomedical research in recent years represents a critical investment in the future health of our nation. The Committee recognizes, however, that the benefits of basic research alone cannot be fully realized unless results of this important work are effectively translated into public health interventions to address costly and prevalent conditions such as chronic diseases.

Chronic diseases have had a profound human and economic toll on our nation. Nearly 125 million Americans today are living with some form of chronic condition, including cancer, cardiovascular disease, diabetes, arthritis and various neurological conditions such as epilepsy. These and other chronic diseases now account for nearly 70 percent of all health care costs, as well as 70 percent of all deaths annually. By the year 2020, the affected population is expected to reach 157 million Americans and represent \$1,000,000,000 in health care expenditures, equivalent to over 80 percent of all anticipated health care expenditures. Less than \$1.25 per person, however, is directed towards public health interventions focused on preventing the debilitating effects traditionally associated with chronic conditions. A few modifiable risk factors bring suffering and early death to millions of Americans. Three such factors—tobacco use, poor nutrition, and lack of physical activity are major contributors to our Nation's leading causes of death.

The Committee believes that the Federal investment in chronic disease prevention remains inadequate. Recognizing the need to establish chronic disease prevention as a national priority, the Committee therefore provides an increase of \$55,193,000 over fiscal year 2002 levels to begin to more appropriately address this national crisis.

Within the total provided, the following funding levels are for the specific program

activities: heart disease and stroke, \$47,218,000; cancer prevention and control, \$290,526,000; arthritis, \$14,803,000; health promotion, \$24,790,000; diabetes, \$64,500,000; tobacco, \$100,623,000; nutrition, physical activity and obesity, \$40,000,000; school health, \$58,235,000; safe motherhood, \$57,565,000; oral health, \$10,791,000; prevention centers, \$27,945,000; epilepsy, \$7,527,000; and iron overload, \$477,000.

Arthritis.—The Committee notes that Congress established the CDC arthritis program in 1999 following the development of the National Arthritis Action Plan (NAAP). The CDC activities form the backbone of a multi-pronged response to the Nation's leading cause of disability. Prior to this initiative, there was no coordinated public health strategy to prevent and appropriately treat the over 100 forms of this painful, debilitating disease. Grants to States are a core component of the CDC arthritis program. These partnerships promote the development of a State-based network of local activities to confront the burden of arthritis. This approach also encourages the formation of broadly-based coalitions with health care providers, community-based organizations, and other stakeholders to coordinate and leverage their resources. The Arthritis Foundation chapters across the country have led this external effort.

Behavioral Risk Factor Surveillance System.—The Committee has provided \$7,000,000 for the Behavioral Risk Factor Surveillance System (BRFSS). The Committee notes that gathering, analyzing, and distributing data on behavioral risk factors is key to addressing a host of health problems, especially chronic diseases. The BRFSS program collects behavior-related data so that scarce resources can be directed efficiently to address chronic diseases, such as heart disease, cancer, diabetes, obesity, and vascular diseases such as stroke. The Committee believes the increase in BRFSS funding should be used to increase infrastructure at the State and CDC levels; improve the rates of response of survey questions; increase the timeliness of data; improve CDC's web site to make data more accessible for analysis; and create State demonstration projects to examine and assess innovative methods in chronic disease health tracking.

Cancer Prevention and Control.—The previous 5 years have seen a major increase in the nation's investment in medical research at the NIH, resulting in significant breakthroughs for cancer and other serious diseases. Testimony at the Committee's cancer hearing, in June, repeatedly referred to the vital importance of prevention and public education programs and the need to translate the increased research funding into programs that reach people who are affected by cancer. Specifically, there was discussion of the need for increased application research funding in the nation's cancer program, primarily housed at the CDC. The need to reach the public, particularly medically underserved populations, with the message of prevention and early detection of cancer cannot be overstated. The seven CDC programs—Comprehensive Cancer Control Initiative; National Cancer Registries Program; Colorectal Cancer Screening, Education and Outreach; Prostate Cancer Awareness Campaign; National Breast and Cervical Cancer Early Detection Program; Ovarian Cancer Program; Skin Cancer Program—included in the CDC's cancer line item have proven to be highly effective, but are only a starting point if we are to reduce the mortality from cancer. The Committee is strongly supportive of the CDC cancer programs focused on awareness, education and early detection and has included a significant increase for

The significant growth of cancer prevention and control programs within State health agencies has resulted in the recognition that improved coordination of cancer control activities is essential to maximizing resources and achieving desired cancer prevention and control outcomes. The Committee commends CDC for its work with health agencies to enhance the number and quality of cancer-related programs that are available to the U.S. population and to develop an integrated and coordinated approach to reduce the cancer burden through prevention, early detection, treatment, and rehabilitation. In fiscal year 2002, CDC funded 19 States and one Indian Health Board to develop comprehensive cancer control programs which help build the foundation for a nationwide, comprehensive cancer control program. Comprehensive cancer programs integrate the full range of cancer prevention activities including research, evaluation, health education and communication, program development, public policy development, surveillance, and clinical services.

The Committee includes the President's request for increased funding for the Breast and Cervical Screening program. CDC's National Breast and Cervical Cancer Early Detection Program has provided more than 3 million potentially life-saving screening tests for women. Despite its success in screening these women, the program is still only able to screen 15-20 percent of the eligible population due to the difficulties in finding these hard to reach women. Therefore, the Committee recommends that 50 percent of funds be used for actual provision of screening and clinical services and the remaining 50 percent of funds be used by States for outreach, effective management, public and professional education, and quality assurance to ensure enhancement of infrastructure development activities that will provide screening and diagnostic services to eligible women. The Committee's recommendation will enable more women to receive these vital screening services.

Colorectal cancer is the third most commonly diagnosed cancer for both men and women in the United States, and the second leading cause of cancer related deaths. In 2001, approximately 148,000 new cases were diagnosed and 56,000 people died from the disease. When colorectal cancer is detected and treated early, survival is greatly enhanced. However, despite the availability of proven screening tests, only 37 percent of colorectal cancers are diagnosed while the disease is still in a localized stage.

The Committee is very pleased with the leadership of CDC's National Colorectal Cancer Roundtable in promoting the availability and advisability of screening to both health care providers and the general public. The Committee encourages CDC to continue to expand its partnerships with State health departments, professional and patient organizations, and private industry to combat this devastating disease.

As pancreatic cancer is the country's fifth leading cause of cancer death, and 99 percent of people diagnosed with pancreatic cancer die within 6 months, the Committee urges the CDC to convene a series of meetings of CDC and other agency officials, leading advocacy organizations who provide information and education, and other key stakeholders, to define the public health role of educating medical professionals and the public about the risk factors, symptoms, treatment options and palliative care methods related to pancreatic cancer. These findings should be presented in a report due to the Committee no later than 30 days prior to the fiscal year 2004 Appropriations hearings. The report should include a budget and time-frame for implementing the recommendations derived from these meetings.

The Committee applauds the partnership between CDC and the Lance Armstrong Foundation to address the needs of the over 9 million Americans living with, through and beyond cancer by expanding the Agency's State-based comprehensive cancer program to include issues of survivorship, including late term effects and quality of life.

Given the shortages and high vacancy rates of qualified health personnel who work in laboratories to prepare and analyze tissue and cell samples, the Committee urges CDC's Breast and Cervical Cancer Screening Program to develop a partnership with HRSA's Allied Health Special Projects Program to support programs at schools which contribute to solving the shortages.

Chronic Fatigue Syndrome (CFS).—The Committee is pleased that CDC has branched into new and important areas of CFS research and medical education in the first 3 years of the 4-year period in which \$12,900,000 is being restored to the CFS program at CDC. Since approximately half the funds remain, the Committee instructs CDC to extend the payback period by 1 year, through fiscal year 2004. The Committee further expects that CDC will provide sufficient funding, including funds allocated through the payback program, to accelerate its CFS research plan to identify the causes, risk factors, diagnostic markers, natural history and economic impact of CFS; to create a CFS patient registry; and to educate health care providers about the detection, diagnosis and management of CFS.

Cooley's Anemia and Thalassemia.—In fiscal year 2002, the Committee supplied funding for CDC to create a thalassemia-based blood safety and surveillance program, modeled after the universal data collection program used for hemophilia. It is the Committee's intention that this program be continued in fiscal year 2003. In addition, the Committee believes that the program will benefit from expanded interaction between CDC and the Cooley's Anemia Foundation, particularly with regard to educating patients, families, health providers and the public about blood safety.

Diabetes.—There is a diabetes epidemic in our nation. Today, approximately 16 million Americans have diabetes, including 5.9 million who do not know they have the disease. Diagnosed diabetes rose 49 percent nationally between 1990 and 2000. Type 2 diabetes, once considered an adult disease, is now found in children. Recently released results from the largest-ever clinical study on diabetes prevention confirmed that diabetes can be prevented in high-risk adults. The NIH-led and CDC-supported Diabetes Prevention Program (DPP) demonstrated that sustained lifestyle change, including modest weight loss and physical activity, resulted in prevention of diabetes in those diagnosed as "pre-diabetic". An additional 16 million Americans are "pre-diabetic". The Committee encourages CDC to work with State Diabetes Control Programs to establish pilot projects to test strategies that will become effective public health interventions to prevent or significantly delay the onset of diabetes in high-risk individuals and develop systems to identify and monitor the number of people who are at highest risk for developing diabetes.

The high incidence of diabetes among Native Hawaiian populations persists, and the Committee is pleased with CDC's efforts to target this population, in particular to assist the leadership of Native Hawaiian and Pacific Basin Islander communities. It is important to incorporate traditional healing concepts and to develop partnerships with community centers, and the Committee encourages CDC to build on its historical efforts in this regard. Diabetes is also one of

the most serious health challenges facing American Indians and Alaska Natives today. Some American Indian Tribes have the highest rates of diabetes in the world. Approximately half of American Indian adults have diabetes. On average, American Indians and Alaska Natives are 2.8 times as likely to have diagnosed diabetes as non-Hispanic whites of similar age.

Available data often underestimates the true prevalence of diabetes in American Indians. The Navajo Health and Nutrition Survey, published in 1997, showed that 22.9 percent of Navajo adults age 20 and older had diabetes. Fourteen percent had a history of diabetes, but another 7 percent were found to have undiagnosed diabetes during the survey.

In all 12 Indian Health Service Areas, diabetes is reported as one of the top ten major health problems. 15.1 percent of American Indians and Alaska Natives receiving care from IHS have diabetes. Until recently, type 2 diabetes was rarely diagnosed in children and adolescents. An alarming recent development is the occurrence of type 2 diabetes, once called "adult-onset" diabetes, with much greater frequency among children, especially minority children including Native American youth.

The Committee expects CDC to place continued priority on the prevention of diabetes among American Indians and Alaska Natives.

Epilepsy.—The Committee recognizes epilepsy, a chronic neurological condition, as a significant public health concern affecting over 2.3 million persons in the United States including 300,000 American seniors over the age of 65. For a long time epilepsy has been seen as a condition that affects young people, often starting in early childhood; sometimes lasting throughout life. The U.S. population is aging and stroke, cardiovascular disease, brain tumors and Alzheimer's disease are all causes of epilepsy in the elderly. Further, the Committee acknowledges that CDC has worked diligently over the last couple of years to promote better public education and treatment of people with epilepsy. Therefore, the Committee has provided increased funding for the CDC to enhance its epilepsy efforts in partnership with a national non-profit that works on behalf of children and adults affected by seizures through research, education, advocacy and service, and should include activities addressing the relationship between older adults and epilepsy; maximizing public and provider health education programs in the schools, the public sector and in States; and supporting prevention research on stigma and self-esteem.

Glaucoma and other Vision Disorders.—Age-related threats to sight, including age-related macular degeneration, glaucoma, cataracts and diabetes retinopathy are expected to nearly double by the year 2030 with the aging of the baby-boomer generation. Recognizing this emerging public health threat, the Committee is aware of the demonstrated success of vision screening programs in preventing blindness and vision impairments among many of the more than 30 million adults that suffer from eye-related disorders.

The Committee is encouraged by the CDC's exploration of strategies to implement a national initiative to combat the effects of eye-related disorders, especially glaucoma. The Committee has included funds for CDC to establish vision screening and education programs in partnership with national voluntary health agencies and for CDC to develop a national surveillance system to monitor trends over time and assess the economic costs of vision loss especially related to glaucoma. In addition, the Committee concurs with the President's request that

\$2,800,000 should be used to continue or expand a model project that is testing and evaluating the efficacy of glaucoma screening using mobile units.

Heart Disease and Stroke.—The Committee recommendation includes a \$10,000,000 increase for the CDC cardiovascular programs as part of the Committee's initiative to prevent and reverse heart disease. The Committee urges the CDC to initiate research to examine strategies to prevent and reverse heart disease, including mind/body approaches to stress management, yoga, diet modifications and exercise programs. The Committee is aware that many States still need a State-based cardiovascular disease prevention and control program, but in the past funding has not been made available. In fiscal year 2001, only 28 States received CDC funding to design and/or implement State-specific programs to prevent and control heart disease, stroke and other cardiovascular diseases even though cardiovascular diseases remain the No. 1 killer of men and women across all racial and ethnic groups in the United States. The Committee strongly believes that since cardiovascular diseases remain the No. 1 killer in every State, each State should receive funding for a Cardiovascular Health State Program and, therefore, has increased funding for the Cardiovascular Health State Program, allowing CDC to increase the number of States supported by this program and to initiate research to examine the causes of the regional disparity of cardiovascular diseases.

The Committee recommends an increase of \$1,000,000 to expand the WISEWOMAN program. WISEWOMAN provides additional preventive services to low-income uninsured women screened in CDC's National Breast and Cervical Cancer Early Detection Program. CDC uses this established system to screen women for other chronic disease risk factors, to respond to women with risk factors (e.g. high blood pressure, high cholesterol) by providing dietary and physical activity counseling and programs. Since WISEWOMAN's inception approximately 10,000 low-income and uninsured women have been screened for high blood pressure and cholesterol. In fiscal year 2002 CDC will fund 12 WISEWOMAN programs.

Stroke remains America's No. 3 killer, a major cause of permanent disability and a key contributor to late-life dementia. This year about 600,000 Americans will suffer a stroke and nearly 170,000 will die. The drug tPA is the only FDA-approved emergency treatment for clot-based stroke. Yet, less than 5 percent of those eligible for tPA receive it. Established by Congress during the fiscal year 2001 appropriations process, the Paul Coverdell National Acute Stroke Registry is designed to track and improve the delivery of care to patients with acute stroke. In fiscal year 2002, the CDC supported activities to develop and test prototypes for this registry in 8 sites. The Committee urges CDC to continue to work with the National Institute of Neurological Disorders and Stroke, and the National Heart, Lung, and Blood Institute at the National Institutes of Health, the Brain Attack Coalition, and other pertinent professional organizations, including hospitals, universities, State and local health departments, and other appropriate partners experienced in the treatment of stroke to further implement this registry.

Hemophilia.—The Committee expects CDC to continue working closely with the National Hemophilia Foundation in strengthening its disease management, prevention,

outreach, and blood safety surveillance programs to meet the needs of persons with hemophilia, other bleeding and clotting disorders, and, particularly, women with bleeding disorders. The Committee requests a report by March, 2003 on CDC's efforts to establish a genetic data bank for persons with hemophilia and the resources required and steps to be taken to expeditiously genotype the hemophilia community.

Juvenile Diabetes.—The Committee is aware that a surveillance system to track childhood diabetes has been initiated that is proving beneficial to research for the treatment and cure of the disease. The Committee encourages CDC to extend and expand the childhood diabetes surveillance system to track all American children suffering from the disease.

Kidney disease.—The Committee recognizes that kidney disease is the ninth leading cause of death in the United States, costing the Medicare program \$12,000,000,000 annually. Recent epidemiologic research indicates that more than 20 million Americans have signs of kidney disease and that an additional 20 million individuals in this country are at increased risk of kidney disease. Moreover, most of these individuals are unaware of this danger to their health. The Committee believes there is a need for public health programs to identify and educate those who are threatened by kidney disease and thereby reduce morbidity and improve outcomes. Therefore, the Committee encourages CDC to develop a national kidney disease action plan and a public health strategy to combat kidney disease in this country.

Micronutrients.—Deficiencies of micronutrients such as iron, iodine, and vitamin A, affect nearly one-third of the world's population, and result in reduced mental and physical development of children, poor pregnancy outcomes, diminished work capacity of adults, and increased morbidity and premature mortality among populations. Effective and inexpensive interventions such as dietary diversification, food fortification and supplementation have eliminated most micronutrient deficiencies in developed countries.

The Committee has provided sufficient funding for CDC to continue its efforts to eliminate micronutrient malnutrition. The focus of these efforts is to support a number of national and international efforts to assess micronutrient status of populations and to monitor and strengthen implementation of interventions as well as to assess the impact of the interventions over time. CDC has extensive expertise in epidemiology, monitoring and assessment, and laboratory science. These efforts reflect the unique contribution that CDC can make to eliminate micronutrient deficiencies.

Nutrition, Physical Activity and Obesity.—Obesity is epidemic in the United States. Between 1980 and 1994, the prevalence of obesity in the United States has increased by 100 percent in children and adolescents. More than 20 percent of the adult population is 30 pounds or more overweight and 10 to 15 percent of children and adolescents are overweight. The cost of diseases associated with obesity is almost \$100,000,000,000 per year. Risk factors associated with obesity—physical inactivity and unhealthy eating—account for at least 300,000 preventable deaths each year and increase the risk for many chronic diseases like diabetes, heart disease and cancer. The Committee is aware that the CDC's own statistics show that native Americans, including native Alaskans and native Hawaiians suffer higher rates of obesity than other Americans.

The Committee commends the substantial, comprehensive efforts that CDC is directing to stem the obesity epidemic across all life

stages. CDC is coordinating national, State and school-based programs to research and implement interventions to increase physical activity levels and good nutrition at all ages, to provide important health information, and to monitor health and healthy behaviors in the population. CDC currently funds 12 States to promote physical activity and good nutrition to prevent and control obesity. As part of its physical activity, nutrition and obesity prevention initiative, the Committee has included a significant increase for Nutrition, Physical Activity, and Obesity at CDC.

Oral Health.—The Committee recognizes that to effectively reduce disparities in oral disease will require improvements at the State and local levels. The Committee is pleased that almost half of the States applied for grant funding from the Division of Oral Health to target prevention programs and resources to those at greatest risk. The Committee expects the Division to advance efforts to reduce the disparities and health burden from oral cancers that are closely linked to chronic diseases like diabetes and heart disease.

Prevention Centers.—The prevention centers form a nationwide network of academic institutions that conduct applied research designed to develop and test innovative strategies for health promotion and disease prevention. The primary goals of the program are to identify risk factors, to identify barriers and facilitators to behavior change to demonstrate the effectiveness of prevention interventions, to increase collaboration among agencies and community partners, and to train public health professionals in creative ways for preventing chronic diseases and other health problems. The Committee has included sufficient funds to expand the number of prevention centers funded by CDC.

The Committee continues to support within the prevention center program a Tobacco Prevention Research Network to increase the knowledge base on the most effective strategies for preventing and reducing youth tobacco use, as well as on the social, physiological and cultural reasons for tobacco use among children.

The Committee encourages the continued support of center activities aimed at improving knowledge about the usefulness and effectiveness of health promotion programs for persons with disabilities.

The Committee recognizes the urgency to discover novel compounds to combat bio-engineered (weapons-grade) bioterrorist threats. Many of these threats require antibiotics and antiviral agents with activity against drug resistant strains of these bio-engineered bioterrorist weapons.

Primary Immunodeficiencies Diseases.—In fiscal year 2002, the Committee appropriated funding for a national physician education and public awareness program related to primary immunodeficiency diseases. It is the Committee's intent that this program be continued in fiscal year 2003 and that CDC continue to work closely with the Jeffrey Modell Foundation to implement and continue the Foundation's plan for public awareness and physician education. The Committee is also pleased that CDC has recognized that these diseases constitute a major public health issue and intends to pursue appropriate public health interventions to address it with other available resources.

Prostatitis.—Prostatitis affects 10 percent of the male population. It may be the trigger for both prostate enlargement and prostate cancer. Prostatitis may act as a reservoir for bacterial resistance and for the spread of chronic disease in women and men by various pathogens. The Committee encourages CDC to continue to investigate the etiology of prostatitis, begin disease surveillance, in-

crease public awareness, and determine treatment and prevention.

Safe Motherhood.—The Committee has increased funding for the Safe Motherhood program as part of its Safe Motherhood initiative. The purpose of this program is to improve the chances that a woman will have a safe and healthy pregnancy and delivery. Of the 4 million women who give birth in the United States each year, over one-third have a pregnancy-related complication before, during, or after delivery. These complications may cause long-term health problems or even death. Unfortunately, the causes and treatments of pregnancy-related complications are largely unknown and understudied. In fact, the United States ranks only 20th in maternal mortality rates out of 49 developed countries. Every day, two to three women die from pregnancy related complications. And despite the fact that maternal mortality was targeted in 1987 as part of Healthy People 2000, the maternal mortality rate in this country has not decreased in 20 years.

School Health.—The Committee notes that obesity rates were cut in half among girls in grades 6–8 who participated in a school-based intervention program. The Committee applauds CDC for establishing effective coordinated school health programs in 20 States and two local education agencies. As part of its physical activity, nutrition and obesity prevention initiative, the Committee has included sufficient funds for CDC to expand its coordinated school health program to address risk behaviors such as tobacco use, unhealthy diets, and physical inactivity.

The Committee further recognizes the effectiveness of school health programs as demonstrated by the significant reductions in sexual risk behaviors among the nation's high school students over the past decade. However, the Committee is concerned that CDC's funding for the school health HIV program has not increased in 10 years. To compensate, some of the additional funding provided over last year's level is directed to the school health HIV program and the Committee urges CDC to use the funds to expand its prevention efforts aimed at youth.

Sudden Infant Death Syndrome.—The Committee notes the work of CDC, the National Institute of Child Health and Human Development and HRSA in developing model guidelines for death scene protocol for Sudden Infant Death Syndrome. The Committee encourages CDC to implement projects to demonstrate the effectiveness of the death scene protocol in a variety of locales (urban, suburban, and rural) throughout the Nation. The Committee expects CDC to be prepared to report on progress on this initiative during the fiscal year 2004 budget hearings.

Tobacco Use.—Tobacco use is the single most preventable cause of death and disease in our society. It causes more than 400,000 deaths in the United States each year, and costs the nation \$50,000,000,000 in medical expenses alone. Children are especially hard hit by tobacco. Ninety percent of adult smokers begin their habit as children. These funds are intended to expand the capacity of all State and local health departments, education agencies, and national organizations to build comprehensive tobacco control programs and to develop and begin implementation of a national public education campaign to reduce access to and the appeal of tobacco products among young people.

Environmental Health

The Committee recommends \$189,489,000 for environmental health activities which is \$36,058,000 above the fiscal year 2002 level and \$37,334,000 above the administration request.

Within the total provided, the following funding levels are for specific funding activities: \$36,826,000 is for the environmental

health laboratory; \$71,002,000 is for environmental health activities; \$38,887,000 is for the asthma program; and \$42,774,000 is for the childhood lead poisoning program.

Many of the public health successes that were achieved in the 20th century can be traced to innovations in environmental health practices. However, emerging pathogens and environmental toxins continue to pose risks to our health and significant challenges to public health. The task of protecting people's health from hazards in their environment requires a broad set of tools. First among these tools are surveillance and data collection to determine which substances in the environment are getting into people and to what degree. It also must be determined whether or not these substances are harmful to humans, and at what level of exposure. Many scientists estimate that about two-thirds of all cancers result from environmental exposure, but much better data are needed to improve this estimate and determine which exposures cause cancer and other diseases.

The Committee is aware of concerns raised within and outside Alaska about the safety of Alaskan wild foods. The Committee encourages CDC to give careful consideration to a State of Alaska program to monitor the safety of Alaskan wild foods, including field studies of the effects of environmental chemical contaminants and naturally occurring metals in Alaskan wild foods, measurement of PCB levels in remote arctic communities, documentation of mercury levels in ancient humans, documentation of incidence of childhood asthma, and development of public health recommendations on Alaskan wild food consumption by subsistence users and others.

Asthma.—CDC's asthma activities focus on three areas: tracking the disease to improve the Nation's ability to determine asthma prevalence, severity, and management; assuring that interventions are based on science; and working to address this problem through partnerships including providing technical assistance to non-governmental organizations to carry out diverse community-based childhood asthma control programs.

The Committee is pleased with the work that the CDC has done to address the increasing prevalence of asthma. However, the increase in asthma among children remains alarming. The Committee urges CDC to expand its outreach aimed at increasing public awareness of asthma control and prevention strategies, particularly among at-risk populations in underserved communities. To further facilitate this effort, CDC is urged to partner with voluntary health organizations, such as the American Lung Association's Asthma Clinical Research Centers, to support program activity consistent with CDC's efforts to fund community-based interventions that apply effective approaches demonstrated in research projects within the scientific and public health community.

Childhood Lead Poisoning Prevention.—Since its inception in fiscal year 1990, the CDC program has expanded to approximately 40 project areas that encompass States, local areas, and numerous communities and screens an estimated 1.75 million children annually. The program has developed its first Geographic Information System (GIS) website using U.S. Census data on income, race, and old housing to help State and local health departments identify high-risk geographic areas. The availability of such information will result in more efficient, targeted screening.

The Committee is concerned the current approach to lead poisoning prevention cannot achieve the national goal of ending this disease by 2010. The Committee has provided an increase above the budget request to sup-

port more concerted, prevention-oriented strategies. The Committee encourages CDC to target its grants to communities at high risk, promote wide adoption of lead-safe work practices, emphasize correction of identified lead hazards, make clearance dust testing routine, and support community-based efforts to assess and address health hazards in high-risk housing.

Childhood Leukemia.—The Committee appreciates the CDC's continuing work on the cancer cluster investigation in Fallon, Nevada, and understands that preliminary results of that investigation are due within the next few months. The Committee strongly encourages the CDC to continue to devote resources to this investigation.

Environmental Health Laboratory.—The CDC environmental health laboratory performs assessments for State investigations of diseases (such as cancer and birth defects) and investigations of chemical exposures, such as dioxin, pesticides, mercury and cadmium. CDC is also working with States to improve public health laboratories that assess State level biomonitoring needs. CDC works closely with academic institutions, other Federal agencies, and other partners to measure human exposure to toxic substances and the adverse effects of that exposure.

The Committee recognizes CDC for its commendable work in analyzing toxic exposures throughout the United States. The Committee further recognizes that CDC's environmental laboratory is unprecedented in the world for measuring toxic exposures to humans and further commends CDC for publishing the National Report on Human Exposure to Environmental Chemicals, which provides information about the U.S. population's exposure to 27 toxic substances, including heavy metals and certain pesticides.

The Committee supports the CDC biomonitoring program and study of environmental toxins and their relationship to chronic diseases, such as asthma, many birth defects, and cancer to increase our understanding of the cause of many chronic diseases and conditions and to facilitate the development of effective prevention strategies.

Health Tracking Network.—The Committee has included \$32,000,000 for the Health Tracking Network. In fiscal year 2001, the Committee first requested that CDC develop a plan for a coordinated Nationwide Health Tracking Network. In fiscal year 2002, the Committee provided \$17,500,000 to develop pilot programs in States as a first step in the development of the Network. The fiscal year 2003 funds will enable CDC to establish tracking networks in up to 15 additional States and create a Center of Excellence in public health at an appropriate research university. The Committee strongly urges CDC to assure that as States develop these systems they build on existing efforts where appropriate, including terrorism preparedness and other ongoing State tracking and monitoring initiatives. The Committee urges that all of the relevant centers, institutes, and offices within the CDC be included in the development, testing, and implementation of this nationwide project.

The Committee further urges CDC to make every effort to support systems that are flexible in their data content, platform independent, and scalable to the entire Nation. The Committee understands that this is a long term project, and requests CDC to submit a vision statement for a Nationwide Health Tracking Network as well as a plan for achieving this vision.

Rural Health.—The Committee is greatly concerned about the health status of the residents of rural communities. The Committee commends CDC for its efforts last year to conduct an assessment of rural health problems. Sufficient funds have been provided to continue this important effort.

Epidemic Services and Response

The Committee recommends \$78,001,000 for epidemic services and response which is \$2,138,000 below the fiscal year 2002 level and the same as the administration's request.

CDC's epidemic services and response program provides resources and scientific expertise for operating and evaluating surveillance systems; developing and refining research methods and strategies to the benefit of public health practice; training public health professionals who are prepared to respond to public health emergencies, outbreaks and other assistance requests; and communicating with multi-faceted audiences accurate public health information and effective messages. The scientific basis of this program is applied epidemiology, in concert with other components of sound public health practice. Findings from these disciplines enable States, health organizations, foreign ministries of health, and others in the health field to make sound decisions and create effective policy. Information derived from epidemiologic data and scientific reasoning provide public health programs with an objective rationale to set priorities, apply interventions and policies, and evaluate public health programs. Within the epidemic services and response program, CDC carries out a variety of applied research and development activities. Areas of research include: social determinants of health; aberration detection; burden of disease; injury, and death; prevention effectiveness; and health care quality. The Committee recognizes that CDC maintains a keen appreciation for the fact that local outbreaks of illness can develop rapidly into epidemics, that previously unidentified health problems can appear at any time, that contaminated food or defective products may appear in the community without warning, and that the threat of bioterrorism is present in many areas of the world. When CDC participates in an investigation, all of the resources of the agency are at the disposal of the affected area, including its state-of-the-art laboratories.

Health Statistics

The Committee recommends \$125,899,000 which is \$780,000 below fiscal year 2002 and the same as the administration request.

CDC's statistics give us context and perspective on which we can base important public health decisions. By aggregating the experience of individuals, we gain a collective understanding of our health, our collective experience with the health care system, and our problems and public health challenges. NCHS data are used to create a basis for comparisons between population groups or geographic areas, as well as an understanding of how trends in health change and develop over time.

HIV, STD, and TB Prevention

The Committee recommends \$1,168,532,000 for HIV, STD, and TB Prevention, which is \$33,532,000 above the fiscal year 2002 level and \$33,532,000 above the administration request. Of the amount provided, \$860,293,000 is for HIV/AIDS programs, of which \$168,763,000 is for global HIV/AIDS programs; \$170,450,000 is for the STD program; and \$137,789,000 if for the Tuberculosis program.

Recognizing the intersection among these diseases, and the need for a focal point for leadership and accountability, CDC combines HIV, STD, and TB activities to provide leadership in preventing and controlling human immunodeficiency virus infection, other sexually transmitted diseases (STDs), and tuberculosis. CDC works in collaboration with partners at community, State, national, and international levels, applying well-integrated, multi-disciplinary programs of research, surveillance, technical assistance

and evaluation. These diseases are not vaccine preventable and must be controlled and prevented through identifying, diagnosing, and treating infected persons; through provision of confidential, culturally competent counseling to identify and reach those who have been exposed to infection and who may not know it; and through individual and population level health promotion to reduce high risk behaviors.

HIV/AIDS Prevention.—CDC's HIV/AIDS prevention programs are working in every State and territory to prevent new infections, link people who are already infected to medical care and translate scientific research findings into practical prevention programs available to every person at risk. CDC will continue to adapt these prevention programs to meet new and different needs.

According to the CDC, between 4 million and 5 million people in the United States are at continued behavioral risk for HIV infection. The Committee recognizes that this is a low estimate due to under-reporting by participants and the lack of inclusion of schools, prisons, and the military. Communities must be better equipped with local data to identify and direct resources to those most at risk. They must have an array of effective interventions available and the capacity to implement and evaluate them at the local level. They must also be able not only to address barriers and deter risky behavior but also to encourage health promotion behavior through a variety of individual and group interventions, community-level supports, and structural level changes. Because those at risk for or living with HIV infection are often also at risk for other health problems, HIV prevention must be integrated with other services such as STD and TB screening and treatment, reproductive health services, mental health services, and drug use prevention and treatment.

The Committee recognizes the role of State and local health departments in providing comprehensive HIV prevention programs targeted locally to address the prevention needs of individual communities and in conducting surveillance activities designed to monitor the course of the epidemic.

The Committee recognizes that CDC is currently developing a new program announcement to guide State and local HIV prevention efforts beginning in January 2004. The Committee encourages CDC to work with State and local health departments to streamline the application process and reduce the administrative burden on health departments.

HIV prevention community planning is an important component of the comprehensive HIV prevention programs administered by State and local health departments nationwide. With nearly 10 years of experience with community planning, the Committee urges the CDC to revise Federal guidance to be less prescriptive and to encourage greater flexibility for jurisdictions to implement models of community planning appropriate for their jurisdictions including multi-year planning and joint care and prevention planning.

Global HIV/AIDS.—CDC works with governments in 25 countries in Africa, Asia and Latin America and the Caribbean focusing on primary prevention of HIV/AIDS; care and treatment of tuberculosis and other opportunistic infections, palliative care and appropriate use of antiretroviral medications; and infrastructure and capacity development. The Committee recognizes that it is not feasible for CDC to establish programs in every country in need. The increase should support rapid response teams and regional programs to address the needs of countries that are not part of CDC's Global AIDS Program and to foster regional approaches to HIV/AIDS prevention, care and treatment.

The Committee commends CDC for recognizing the urgent public health need to develop new HIV prevention options by increasing the funds available for microbicide research and development. The Committee urges CDC to continue to expand funding and staff for microbicide research and development within funds provided for global AIDS. These funds could support clinical trials of microbicides as set forth in CDC's HIV Prevention Strategic Plan and its topical microbicide 5-year research agenda.

Sexually transmitted diseases.—CDC's strategy for STD prevention is to provide national and international leadership through research, surveillance, policy development, and assistance to States, territories and local health departments in the delivery of services to prevent and control the transmission of STDs and their complications. The Committee recognizes that this year, more than 15 million Americans will contract a STD. National surveillance of syphilis, chlamydia, and gonorrhea is supported, and sentinel surveillance strategies are being developed for new viral STDs, specifically, human papillomavirus. Prevention research is conducted to improve methods and delivery of prevention services and to develop and refine interventions.

The Committee has recommended increased funding for this program to address priorities of CDC's sexually transmitted disease program including infertility prevention and syphilis elimination. Funds would support expansion of chlamydia screening to reach more underserved women and enhanced rapid response and community partnerships to eliminate syphilis.

Tuberculosis (TB).—The Committee recommendation includes increased funding for CDC's Tuberculosis program to begin to implement the recommendations of the recent Institute of Medicine Report entitled, "Ending Neglect: The Elimination of Tuberculosis in the United States" which was a call to triple research funding for TB to prevent and control the disease; to advance efforts to maintain control of TB in the United States by identifying and curing active TB; to speed the decline of TB through target testing and treatment of latent infection; and to advance global research and control efforts. As the report recommends, CDC should partner with private foundations on research, including the development of vaccines, diagnostic tests, and new drugs and to test the applicability of new tools, to achieve the recommendations.

The Committee commends CDC for its continued efforts to control TB in the United States, as demonstrated by the 8 years of declining numbers of TB cases in this country. However, TB is the leading infectious disease killer in the world with more than 2 billion people—or one-third of the world's population—infected with Mycobacterium tuberculosis, the causative agent of TB. In the next two decades, there are predicted to be 249 million new active cases and 70 million resulting deaths from TB. Worldwide, TB is the leading killer of people who are HIV-infected, accounting for one-third of AIDS deaths. While rates of TB in the United States have been on a steady decline, this global crisis will continue to directly impact this country until global control efforts are more effective. Soon, more than half of all cases of TB in the United States will be among foreign-born individuals. The Committee urges CDC to consider working with the Immigration and Naturalization Service to develop novel TB screening strategies for individuals emigrating from high TB incidence countries.

Immunization

The Committee recommends \$652,895,000 for the program authorized under section 317 of

the Public Health Service Act which is \$25,294,000 above the fiscal year 2002 level and above the administration request. The Committee recommendation includes \$14,000,000 in transfers available under section 241 of the Public Health Service Act.

The Omnibus Reconciliation Act [OBRA] of 1993 established a new vaccine purchase and distribution system that provides, free of charge, all pediatric vaccines recommended for routine use by the Advisory Committee on Immunization Practices to all Medicaid-eligible children, uninsured children, underinsured, and native Americans through program-registered providers.

Despite great success in lowering disease levels and raising immunization coverage rates, much remains to be done to ensure the protection of children and adults worldwide. Approximately 1 million 2-year-old children in the United States have not received one or more of the more established, recommended vaccines. New vaccines, although greatly beneficial to public health, complicate an already complex immunization schedule and make it increasingly difficult to ensure complete immunization. One of our Nation's greatest challenges is extending our success in childhood immunization to the adult population. The burden due to the occurrence of vaccine-preventable diseases in adults in the United States is staggering. As many as 50,000 U.S. adults die of influenza, pneumococcal infections and hepatitis B. CDC is addressing these obstacles to the greatest extent possible and continues to provide leadership to reduce disability and death resulting from diseases that can be prevented through vaccination.

The Committee has increased funding for the Section 317 immunization program. It has been brought to the Committee's attention that costs of delivering vaccines to children in remote frontier areas are substantially higher than in other areas of the country because these communities are often only accessible via aircraft. The Committee encourages CDC to provide infrastructure support needed to deliver these vaccines at the community level, including development of a statewide immunization registry to ensure that all children in remote rural areas are immunized. The Committee notes that failure to immunize children in such areas results in deaths each year from exposure to open sewage lagoons and contaminated water.

Global Immunization Activities.—The Committee includes \$148,788,000 for global immunization activities which include \$106,400,000 for polio vaccine, surveillance, and program operations for the highly successful, yet unfinished polio eradication efforts; and \$42,388,000 for the purchase of measles vaccine for measles mortality reduction and regional measles elimination initiatives and to expand epidemiologic, laboratory, and programmatic/operational support to WHO and its member countries.

While the United States has greatly reduced its burden of vaccine preventable diseases through childhood immunization, its children remain at risk due to widespread occurrence of these diseases in other countries. CDC supports a broad range of programmatic and research efforts to reduce the global burden of these diseases. A record low of 480 polio cases occurred worldwide in 2001, a decrease of more than 99.8 percent since 1988 when the polio eradication initiative was launched. Endemic measles cases have been eliminated from all but two countries in the Americas; however, measles remains the largest single-cause of child vaccine preventable deaths globally, with approximately 800,000 measles-related deaths still occurring each year (450,000 in Africa). Each year, diseases that could be prevented with available

vaccines kill 3 million children worldwide. Vaccines that are now in late stages of development could prevent almost 2 million additional deaths. CDC Measles activities should build on global disease control and surveillance infrastructure developed for polio eradication.

Infectious Disease Control

The Committee recommends \$334,471,000 for infectious disease control, which is \$9,975,000 below the fiscal year 2002 level and the same as the administration request.

These activities focus on: national surveillance of infectious disease; applied research to develop new or improved diagnoses; prevention and control strategies; working with State and local departments and private health care providers to transfer application of infectious disease prevention technologies; and strengthening the capability to respond to outbreaks of new or reemerging disease.

Infectious diseases are a leading cause of death worldwide, accounting for one-quarter to one-third of the estimated 54 million deaths in 1998. Disease outbreaks endanger U.S. citizens at home and abroad, threaten U.S. Armed Forces overseas, and exacerbate social and political instability. Outbreaks can interfere with the global marketplace, affecting tourism, trade, and foreign investment. CDC's strategies to combat infectious diseases invest in and build upon both the public health system that was established over a century ago to increase the preparedness to address the emergence of dangerous new threats.

The Committee is aware that in 1995, in partnership with Federal, State, and local agencies, universities, private industry, foreign governments, the World Health Organization (WHO), and many non-governmental organizations, CDC launched the first phase of a nationwide program to revitalize national capacity to protect the public from infectious disease threats. The second phase of CDC's effort, "Preventing Emerging Infectious Diseases: A Strategy for the 21st Century", published in 1998, continues these partnerships to build domestic and global capacity for recognizing and responding to infectious diseases.

Anti-microbial resistance.—The Committee is concerned over the development of resistance in microbes to current antimicrobial therapies. Bacterial resistance to common antimicrobial agents has become one of the most serious emerging infectious disease threats facing communities and the health care system in the United States. Resistance to drug therapies leaves entire populations vulnerable to both simple infections and complex bioterrorism, as almost all microbes have become resistant to any commercially available product. To combat this national health threat, the Committee recognizes a need to discover and develop new pharmaceutical products to combat these drug resistant microbes. In recognition of the growing problem, the CDC's goal is to develop and evaluate new antimicrobial drugs. With the CDC's mission and expertise in world-wide surveillance, it is uniquely positioned to facilitate the global bio-prospecting and development of new pharmacologically active compounds in untapped ocean and land environments to combat the growing threat posed by drug resistant microbes.

Recognizing that a greater effort is needed to confront this problem, the Committee encourages CDC to provide sufficient funds to begin to address several critical areas. These include (1) development and evaluation of compounds with antimicrobial activity against multidrug resistant strains of *Staphylococcus aureus*, *enterococcus*, gram-negative hospital acquired pathogens, and

vancomycin-tolerant pneumococcus; (2) development of demonstration projects to combat antimicrobial resistance in the hospital and community, particularly in rural settings; (3) development of Centers of Excellence in Health Care Epidemiology, and (4) enhancement of capacity at the CDC to support these and other activities related to control of antimicrobial resistance.

Antimicrobial Resistance Epicenter Program.—The Committee applauds CDC on its support for the Prevention Epicenter Program and recommends that CDC significantly expand and enhance this program to address patient safety issues.

Food Safety.—CDC established PulseNet in 45 State health departments. PulseNet is a national network of public health laboratories that performs DNA "fingerprinting" on bacteria that may be foodborne. The PulseNet network has revolutionized foodborne disease surveillance by allowing near real-time comparison of these "fingerprint" patterns through an electronic database at CDC. Matching patterns can indicate possible nationwide outbreaks and provide an early warning for public health investigation and intervention. The Committee is pleased that CDC has developed and implemented a state-of-the-art diagnostic and communications system to improve parasitic disease diagnosis in the United States. This system, known as DPDx, uses Internet communication to rapidly exchange diagnostic images of parasites digitally captured from microscopic slides. Using DPDx, public health laboratories can obtain diagnostic assistance in real time, allowing for rapid identification of possible outbreaks.

Global Malaria Initiative.—The Committee continues to recognize the tremendous impact of malaria in the developing world, and notes malaria's increasing resistance to anti-malarial drugs designed to counter its pervasive effects. New drugs must be developed, and the Committee urges the CDC to continue its efforts to lead in new compound discovery.

Hepatitis C.—The Committee is pleased with the initial steps taken to implement the National Hepatitis C Prevention Strategy including the appointment of Hepatitis C coordinators in all 50 States plus the establishment of 15 large metropolitan area demonstrations. The Committee notes, however, based on the CDC report Implementation Plan for the National Hepatitis C Prevention Strategy that significant deficiencies exist in mounting a full national response to hepatitis C. The Committee recommends that CDC conduct a National Hepatitis Coordinators Conference to train coordinators to help States integrate hepatitis prevention in State public health programs. The Committee requests a report by June, 2003 which documents the treatment and pharmaceutical needs of individuals served by the large metropolitan demonstrations and the necessary funding mechanisms needed to meet these needs.

The Committee urges CDC to work with voluntary health organizations and professional societies to promote liver wellness and prevention of hepatitis. CDC is urged to review options for a National Hepatitis Roundtable, similar to CDC's Colorectal Cancer Roundtable.

Pandemic Influenza.—Pandemic influenza is a particularly virulent strain of influenza that arises spontaneously and periodically. Examples include the outbreak of Spanish flu in 1918, that killed 500,000 people, and outbreaks in 1957 (Asian flu) and 1968 (Hong Kong flu). The Committee has included funds for pandemic influenza activities. These funds will allow CDC to strengthen global and domestic surveillance capabilities in order to increase the likelihood of early de-

tection of an influenza pandemic and the effective tracking of its spread.

Patient Safety.—The Committee recommends increased funding for patient safety activities. The Committee urges CDC to expand the National Health Care Safety Network, a national electronic medical error/adverse events monitoring system. This system will encompass a representative sample of hospitals in the United States, managed care organizations, long-term care facilities, and other healthcare venues linked to health departments and CDC. The funds can also be used to enhance capacity for detection and response to medical errors and other adverse healthcare events at State and local levels through active monitoring, improved epidemiologic/root cause investigation, and on-site intervention to promote patient safety and improve patient outcomes.

West Nile virus.—The Committee is aware of CDC's effort to complete a national plan for West Nile virus response in the United States. That includes developing a computerized national surveillance system for West Nile virus and provides funds to 53 health departments to build national capacity to develop and implement effective surveillance, prevention, and control of West Nile virus in the United States.

Injury Prevention and Control

The Committee recommends \$149,385,000 for injury prevention and control, which is \$62,000 below the 2002 level and \$4,621,000 above the administration request.

CDC is the lead Federal agency for injury prevention and control. Programs are designed to prevent premature death and disability and reduce human suffering and medical costs caused by: fires and burns; poisoning; drowning; violence; lack of bicycle helmet use; lack of seatbelt and proper baby seat use; and other injuries. The national injury control program at CDC encompasses nonoccupational injury and applied research in acute care and rehabilitation of the injured. Funds are utilized for both intramural and extramural research as well as assisting State and local health agencies in implementing injury prevention programs. The Committee recognizes the vital role CDC serves as a focal point for all Federal injury control activities.

The Committee's recommended increase over the amount proposed in the President's Budget for Injury Prevention and Control which will enable CDC to continue the widespread adoption of programs, policies, and practices that are successful in reducing injuries and deaths, as well as minimizing the adverse outcomes from injury. These funds will allow current activities in fiscal year 2002 to continue, including programs to support trauma information and education, activities in childhood injury and violence prevention and research and State programs to prevent injury and violence.

In addition, sufficient funds have been included to continue support for all existing Injury Control Research Centers.

Traumatic Brain Injury.—The Committee has provided an increase in the TBI Prevention Program to enable the program to implement its new authorities enacted in 2000 regarding TBI surveillance and registry, establish a One-Call Information Center, and expand awareness programs with an emphasis on minority populations. This increase will assist in filling significant gaps in information available at State and Federal levels regarding the incidence and prevalence of TBI, the resources available to victims of TBI, and the nature of specific factors involving TBI in young children and in institutionalized individuals.

National Violent Death Reporting System.—In fiscal year 2002, Congress called on CDC to

begin implementation of a plan for a system for timely, complete, objective and accurate information about violent deaths and injuries to inform and evaluate policy and program efforts. The Committee is pleased with the progress and has included \$3,000,000 to extend implementation of this model plan for the establishment of a national violent death reporting system (NVDRS) from 20 to 22 States. NVDRS will enable States to understand more about the violence problem in their States. The Committee urges CDC to continue to work with private health and education agencies as well as State agencies in the development and implementation of an injury reporting system.

Occupational Safety and Health

The Committee recommends \$274,899,000 for occupational safety and health programs, which is \$1,181,000 below the fiscal year 2002 level and \$27,581,000 above the administration budget. The Committee recommendation includes \$41,900,000 in transfers available under section 241 of the Public Health Service Act.

The CDC's National Institute for Occupational Safety and Health (NIOSH), is the only Federal agency responsible for conducting research and making recommendations for the prevention of work-related illness and injury. The NIOSH mission spans the spectrum of activities necessary for the prevention of work-related illness, injury, disability, and death by gathering information, conducting scientific biomedical research (both applied and basic), and translating the knowledge gained into products and services that impact workers in settings from corporate offices to construction sites to coal mines.

The Committee recommends \$88,760,000 for CDC's National Occupational Research Agenda (NORA). This is the same funding level as fiscal year 2002 and restores the \$25,581,000 cut proposed by the Administration. NORA is a critical scientific research program that protects employees and employers from the high personal and financial costs of work site health and safety losses. Industries such as agriculture, construction, health care, and mining benefit from the scientific research supported by NORA. The program's research agenda focuses on prevention of disease and injury resulting from infectious diseases, cancer, asthma, hearing loss, musculoskeletal disorders, traumatic injuries, and allergic reactions, among others. In fiscal year 2002, NORA supported more than \$40,000,000 in extramural research conducted by universities and other research institutions. The Committee continues to strongly support NORA and encourages expansion of its research program to cover additional causes of work place health and safety problems.

Construction Safety and Health.—The Committee once again is very pleased with the progress that NIOSH has made in its program directed at occupational illnesses and injuries in the building and construction industry. According to the Bureau of Labor Statistics, the rate of serious illnesses and injuries in construction has dropped 32 percent from 1992 to 1997. The Committee is also pleased by NIOSH's new focus on active intervention to prevent occupational injury and illness in the construction industry, and the National Occupational Research Agenda (NORA) for establishing research priorities. However, the Committee is concerned with the continued high fatality rate in the industry, and has included funds to continue the program at no less than current levels.

Education and Research Centers.—The Committee commends the work of the 15 university-based Education and Research Centers (ERC's) and the smaller single discipline Training Project Grants (TPG's). These re-

gional centers are integral to the Nation's efforts to improve the health and safety of working men and women, and important to the future efforts of NIOSH to implement the National Occupational Research Agenda (NORA). Recognizing the important role Education ERCs play in preventive health research and the training of occupational safety and health professionals, and includes an increase of \$2,000,000 for ERCs.

Farm Health and Safety.—The Committee has included funding to continue the farm health and safety initiative. This important initiative, begun in fiscal year 1990, has a primary focus of reducing the incidence of fatal and nonfatal injuries and occupational diseases among the millions of agricultural workers and their families in the United States. The Committee is particularly pleased with the research being undertaken by the Agricultural Research Centers.

Preventive Health and Health Services Block Grant

The Committee recommends \$134,966,000 for the preventive health and health services block grant, which is \$1,000 below the 2002 level and the same as the administration's request.

The Preventive Health and Health Services Block Grant provides States with funds for services to reduce preventable morbidity and mortality to improve the quality of life. The Block Grant is the primary source of funding to States for health education and risk reduction activities; cholesterol, hypertension, and cancer screening; and programs to prevent sex offenses. The strategy of the Block Grant is to provide States with flexibility to tailor prevention and health promotion programs to their health priority needs. Block Grant funding enables States to provide money for developing new programs; fund essential services that would otherwise go unfunded; and address urgent, rapidly developing health hazards such as disease outbreaks or environmental disasters.

Public Health Improvement

The Committee recommends \$115,672,000 for public health improvement, which is \$32,528,000 below the fiscal year 2002 level and \$1,147,000 below the administration request. The Committee recommendation includes \$28,600,000 in transfers available under section 241 of the Public Health Service Act.

Our national public health system is the first line of defense against preventable disease, disability and bioterrorism. Virtually every health problem in our communities—*infectious disease outbreaks, chemical hazards, chronic diseases, and injuries*—is first recognized by local public health professionals, who must work in concert with State and national officials to control these threats, prevent spread, and save lives. Despite steady increases and shifts in the U.S. population there has been a decline in the number of public health workers per capita in the past decade. Schools of Public Health and Preventive Medicine report that the majority of graduates do not seek employment in public health agencies. Only an estimated 44 percent of the Nation's current 448,000 public health practitioners have had formal training in public health. One-half of all public health nurses—the largest profession in public health—lack a baccalaureate nursing degree. The majority of public and private laboratory scientists lack access to continuing education and training essential to using the cascade of new, high-technology laboratory tests accurately and safely.

Minority Health Disparities.—This program is intended to help racial and ethnic minority communities mobilize and organize their resources to support effective and sustainable programs that will contribute to the elimination of health disparities in the fol-

lowing six target health areas: infant mortality, breast and cervical cancer screening and management, cardiovascular disease, diabetes, HIV infection and AIDS, and child and adult immunizations. REACH 2010 is a two-phased, 5-year demonstration project. Phase I is a 12-month planning phase to support planning and development of demonstration programs. Phase II is a 4-year implementation and evaluation phase. The Committee is pleased with CDC's commitment to the REACH 2010 Program. The planning (Phase I) communities currently are establishing infrastructure to support community-level data collection, establishing collaborative partnerships, establishing linkages with other State and local agencies, and working with Federal agencies and other partners to identify promising prevention strategies that have the greatest potential for reducing the health disparities in the target populations.

National Electronic Disease Surveillance System.—Accurate, timely health information is a critical component of all effective prevention and control efforts. Yet, only 55 percent of local health departments have high-speed, continuous Internet access for finding the most recent health guidelines and recommendations. Only 56 percent can successfully receive broadcast health alerts. Only 50 percent have access to community health information critical for setting priorities, taking effective actions, and tracking improvements in health status. The Committee is pleased with CDC's work to integrate disease detection and monitoring to ensure rapid reporting and follow-up.

Prevention Research.—The Committee recommends \$17,021,000 for the extramural prevention research program. This reverses the virtual elimination of the program proposed in the President's request. The prevention research program translates biomedical research into practical public health actions by sponsoring peer-reviewed research conducted by academics who are linked with State and local health agencies to develop improved interventions. The anthrax attacks of last fall demonstrated dramatically the gaps in our Nation's knowledge of how best to address industrial exposure, risk factors, treatment, effective control measures, and environmental cleanup. These and many other urgent questions regarding infectious and chemical agents, mass trauma, and radiological exposures need to be answered through additional prevention research. The Committee supports this program strongly and encourages CDC to expand the program's research into additional areas of public health concern. There are many areas of research that can pay dividends in both improved health and reduced health care costs. The Committee expects some of these funds to be used to support research on ways to prevent disease and disability in rural areas and to better utilize nurses and allied health professionals in prevention and health promotion efforts.

As more and more Americans use alternative and complementary therapies to maintain and improve their health, there is a growing need for better consumer information about these therapies. The Committee expects CDC to expand their effort in this area. Practice-based assessments and the identification and study of promising and heavily used complementary and alternative therapies and practices should be undertaken and results published. The Committee expects CDC to collaborate with the National Center for Complementary and Alternative Medicine to assure that its efforts are coordinated with efforts by this Center.

The Committee is aware of research regarding saliva as a cost-effective, non-invasive diagnostic tool for early detection

of breast cancer and encourages CDC to consider a “Saliva as a Diagnostic Tool” research initiative.

Buildings and Facilities

The Committee recommendation includes \$270,000,000 for the planning, design, and construction of new facilities as well as the repair and renovation of existing CDC facilities. This is \$20,000,000 above the fiscal year 2002 level and \$270,000,000 above the administration request.

The Committee recommendation includes \$250,000,000 for continuation of CDC’s building program for its Atlanta facilities and \$20,000,000 to begin construction and purchase equipment for CDC’s infectious disease laboratory in Fort Collins, Colorado. The Committee has long supported the rapid implementation of CDC’s Buildings and Facilities Master Plan and is pleased with the progress made to date for the agency’s Atlanta, Georgia facilities. The Committee notes that continuing to implement the Master Plan as quickly as possible is essential for the public health security of our Nation, particularly after the World Trade Center and anthrax terrorist attacks of last year. Like some of its remaining Atlanta, Georgia facilities, CDC’s Fort Collins laboratory is antiquated, it poses a health and safety threat to employees, and it is inadequate for the job of responding to bioterrorist attacks and other public health threats. The facility suffers from severe overcrowding, significant infrastructure failings including fragile cooling, heating and air handling systems, lack of adequate fire alarms or intercom systems, lack of functional sprinkler systems, and a sinking foundation. The Committee urges replacement of the existing Fort Collins laboratory as quickly as possible, while others are in great need of complete renovation.

The Committee has provided bill language to allow CDC to enter into a single contract or related contracts for the full scope of development and construction of facilities and instructs CDC to utilize this authority when constructing the Fort Collins facility.

Office of the Director

The Committee recommends \$49,749,000 for the Office of the Director, which is \$1,671,000 below the fiscal year 2002 level and \$4,870,000 above the administration request.

The Office of the Director (OD) manages and directs programs of the CDC. OD provides leadership, advises on policy matters, and develops and evaluates progress of goals and objectives related to disease prevention and control. OD provides direction and coordination to the epidemiologic activities of CDC and coordinates CDC’s response to health emergencies. In addition, OD coordinates and manages programs on global health activities, minority health, and women’s health relating to disease prevention and control.

Communications.—The Committee was concerned during last year’s anthrax crisis that there was the perception that CDC was conveying incomplete messages, mixed messages, or no messages at all to the American people. Clear information is critical to public health and is central to the mission of the CDC. Within funds available, the Committee recommendation includes up to \$10,000,000 to analyze CDC’s communication mechanisms in an effort to guarantee a fast, accurate, and targeted flow of information not only during crisis but also in day-to-day operations. CDC should report to the Committee within 6 months of the enactment of this legislation as to the specific plan of action for this effort.

Energy Employees Occupational Illness Compensation Program.—The Committee commends CDC, and in particular, NIOSH for its efforts under the Energy Employees Occupa-

tional Illness Compensation Program Act (EEOICPA). The Committee is aware that the Department of Labor and NIOSH have already received a large number of cancer claims and expect more under this program. Most cancer claims will require dose reconstruction in order to determine probability of causation. The Committee is concerned that NIOSH may not have adequate staff to handle this workload and urges the Director of CDC to closely monitor the situation so that claims can be promptly evaluated.

The Committee expects CDC to report to the Committee prior to next year’s budget hearing on how it intends to address this backlog issue.

Field Staff.—The Committee has included bill language to exempt employees of the Centers for Disease Control and Prevention or the Public Health Service, detailed as field assignees for purposes related to homeland security, from full-time equivalent [FTE] employment limitations, administrative ceilings, or targets. The effect of the bill language is to furnish States, municipalities, and other organizations with a sufficient number of field assignees to implement important public health programs related to homeland security.

Inflammatory Bowel Disease.—It is estimated that up to 1 million people in the United States suffer from Crohn’s disease or ulcerative colitis, collectively known as inflammatory bowel disease (IBD). The Committee has encouraged the CDC to work in partnership with the IBD community to establish a national IBD epidemiology program to further our understanding of these diseases. The Committee understands that the CDC has recently entered into a partnership with Crohn’s and Colitis Foundation of America to initiate this important program. Now that this project has been established through an investment by the patient community, the Committee strongly encourages the CDC to provide significant funding for this program in fiscal year 2003. Moreover, the Committee requests that the Director of the CDC provide a report to the Committee no later than 6 months after the enactment of this legislation detailing the progress that has been made in advancing this initiative.

NATIONAL INSTITUTES OF HEALTH

With this year’s appropriation, the Committee marks a historic event: Funding for one of our great national treasures, the National Institutes of Health, has been doubled in just 5 years.

Through past investments in the NIH, countless lives have been saved; new vaccines, cures, diagnostics, and treatments have been developed; and a thriving biomedical research industry has been created. That extraordinary record of achievement inspired the Committee in 1998 to embark upon the ambitious goal of doubling the Nation’s investment in biomedical research.

This goal could not have been achieved without widespread support from scientists, who made a compelling case that the additional funds could be put to good use, and from the American people, millions of whom look to the NIH as their best hope for medical cures and treatments. They, more than anyone else, have reason to celebrate the completion of the doubling effort.

By steadfastly keeping NIH funding on track to achieve this goal, the Committee has enabled the NIH to support far more promising research than it was ever able to before, and to advance into new areas of science, even as the doubling project was underway. For example:

—The NIH now funds nearly 10,000 more research grants than it did before the doubling began. That’s 10,000 more ideas that could lead to vaccines, cures, and treat-

ments, as well as fundamental scientific breakthroughs that could open up new opportunities for improving human health;

—The NIH now funds 40 percent more research centers than it did in 1998. Such centers can provide the catalyst for researchers of many backgrounds—not just physicians, but mathematicians, computer scientists, physicists, social scientists, and chemists—to come together to solve fundamental science problems or develop novel cures. In the process, the doubling effort has helped change the way research is conducted.

—The NIH can now support the training of over 1,500 more scientists each year than it could in 1998. This investment will help ensure there are enough trained professionals ready to turn today’s research advances into tomorrow’s treatments, diagnostics, vaccines, and cures.

—NIH funding for clinical trials has doubled from \$1,400,000,000 in 1998 to \$2,800,000,000 today. This increase has enabled NIH-funded scientists to get basic research results into medical practice that much faster, and the Nation to benefit more quickly from its investments in biomedical research.

The Committee understands that the impact of the doubling effort will continue to be felt for many decades. But several advances during the past 5 years offer a sense of the benefits the Nation will reap in the future from today’s investments. They include: the mapping of the human genome, which is revolutionizing biology and opening up entire new fields of research; the FDA approval of Gleevec, the first drug that directly turns off the signal of a protein known to cause a cancer; and rapid advances in embryonic and adult stem cell biology, areas of discovery that could lead to revolutionary treatments and cures.

While the NIH continues to invest in basic research, it is also helping the Nation respond to new threats to the homeland—specifically, to the threat of bioterrorism. NIH-funded scientists helped analyze the genetic code of the anthrax strains used in last fall’s anthrax attacks, in an effort to catch the perpetrators, even as other NIH-supported researchers helped advance our knowledge about how to design new vaccines and cures for bioterrorist agents. The NIH is now initiating an important bioterrorism research initiative to develop countermeasures to neutralize bioterrorist threats from microorganisms such as smallpox, anthrax, tularemia, and plague.

As the Committee marks the conclusion of the doubling effort, it notes that the job of investing in biomedical research is far from over. Heart disease, drug abuse, mental disorders, cancer, diabetes, Parkinson’s, Alzheimer’s, and other debilitating diseases and conditions continue to affect millions of Americans on a daily basis. The Nation must sustain the momentum of these investments, so future generations can continue to benefit from the improvements in human health that flow from the NIH.

The Committee recommends \$27,167,926,000 for the NIH. This amount is \$3,742,183,000 above the fiscal year 2002 appropriation and the same as the budget request. For each Institute and Center below, figures for the fiscal year 2002 appropriation and the budget request have been adjusted to reflect transfers to the NIBIB.

NATIONAL CANCER INSTITUTE

Appropriations, 2002	\$4,128,351,000
Budget estimate, 2003	4,642,394,000
Committee recommendation	4,642,394,000

The Committee recommends an appropriation of \$4,642,394,000 for the National Cancer

Institute [NCI]. This is equal to the budget request and \$514,043,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NCI conducts and supports basic and applied cancer research in prevention, early detection, diagnosis, treatment, and rehabilitation. The Institute provides training support for research scientists, clinicians, and educators, and maintains a national network of cancer centers, clinical cooperative groups, community clinical oncology programs, cancer prevention and control initiatives, and outreach programs to rapidly translate basic research findings into clinical practice.

The Committee continues to regard scientific investigation into the cause, cure, prevention, and treatment of cancer as one of the Nation's top priorities. Research offers the only hope for putting a stop to a disease that wastes precious human resources and contributes to spiraling health care costs.

Anti-cancer drugs.—The Committee is aware that the NCI is collaborating on the development of synthetic small molecule drugs that target both novel and known targets in cell cycle regulation. The Committee understands that these compounds leave normal, non-cancer cells unharmed while inducing cell-suicide in cancer cells. The Committee encourages the NCI to continue to fund this unique research effort.

Behavioral research.—The NCI is encouraged to continue its recent emphasis on the interactions of genetic, environmental, and lifestyle factors that affect cancer risk and the prevention, detection, and treatment of cancer. The Committee is particularly supportive of work on risk determination and better communication of that risk to the public and public health infrastructures. The NCI is uniquely positioned to develop and expand large collaborative human population studies that can help build the science base. The NCI is also encouraged to expand research efforts to define the biological, behavioral, and social bases of tobacco use and addiction, and to refine treatment options for specific groups (e.g. pregnant women or young smokers).

Blood cancers.—The Committee urges the NCI to continue to implement the research priorities for leukemia, lymphoma, and multiple myeloma included in the May 2001 Progress Review Group Report.

Bone metastases.—The Committee understands that bone metastases are common in a number of human cancers and contribute heavily to morbidity, most prominently in prostate cancer, breast cancer and multiple myeloma. Recognizing this, the NCI is encouraged to promote research to understand the underpinnings of tumor metastasis to the bone. The Institute is also encouraged to focus on understanding the interaction between tumor cells and a multitude of cells in the bone microenvironment, as well as the role of extra cellular matrix and a multitude of growth factors, cytokines and other proteins on tumor survival and growth in the bone microenvironment.

Brain Tumor Progress Review Group.—The Committee is concerned that the NCI and NINDS have not proceeded with implementation of the Brain Tumor Progress Review Group's recommendations on advancing brain tumor research. The Committee strongly urges the NCI and NINDS to finalize their plan for implementing the recommendations and to provide additional funding for the NCI-NINDS Neuro-Oncology Program to ensure that the Federal research agency is a leader in brain tumor research. The two Institutes should also seek to expand their collaborative brain tumor re-

search ventures, including interactive meetings involving scientists of different disciplines and interdisciplinary grant applications in brain tumor biology and etiology. The Committee requests that the NCI and NINDS report on their collaborative brain tumor research initiatives by December 31, 2003.

Cancer and minorities.—The Committee remains concerned that cancer rates for Native Hawaiians and other Native American Pacific Islanders are disproportionately high. The Committee encourages the NCI to expand its research in this area.

Cancer screening technologies.—The Committee recognizes the importance of novel technologies such as plasma K-RAS DNA in the NCI's efforts to develop non-invasive cancer screening technologies for clinical use.

Cancer survivorship.—With the advances that have resulted from the ongoing commitment and investment in biomedical research, and the resultant advances in cancer treatment, cancer for many has become a chronic illness. Currently, there are over 9 million cancer survivors in the Nation, and this number is expected to grow dramatically. More must be done to improve the understanding of the growing cancer survivorship population, including determinations of physiological and psychological late effects, prevalence of secondary cancers, as well as further development of effective survivorship interventions. The Committee supports an aggressive expansion of the NCI Office of Cancer Survivorship activities, to include the convening of a consensus conference on cancer survivorship. The Committee requests the Director of NCI to submit a report, by April 1, 2003, outlining the activities the NCI is undertaking to enhance cancer survivorship research and to expand the Office on Cancer Survivorship.

Chronic lymphocytic leukemia.—The Committee strongly encourages the NCI to increase the level of research aimed at determining the underlying cause and optimum therapies for CLL, the most common form of adult leukemia in the United States. The Committee is encouraged by the NCI's willingness to consider a supplementary application for research funding for the CLL Research Consortium. The Committee further urges the NCI to expand funding for the Consortium to speed up the progress in finding significant scientific breakthroughs.

Chronic myeloproliferative disorders.—Polycythemia vera, idiopathic myelofibrosis and essential thrombocythemia are malignant diseases of the bone marrow that are underserved with respect to research funding, considering the number of people they strike. These disorders are chronic and can transform into acute leukemia. They offer great research promise with respect to insights into the behavior of blood cells, since the cells that they affect appear normal but behave abnormally. The major obstacle to research into the causes and the treatment of these disorders has been the lack of Federal funds designated for this purpose. The Committee strongly believes that the NCI should expand research into these disorders, and it expects the NCI to report to Congress by April 1, 2003, about existing efforts, as well as planned future efforts, to better understand these disorders.

Complementary and alternative cancer therapies.—The Committee expects the NCI to expand its work and its collaborative efforts with NCCAM to support research on promising complementary and alternative cancer therapies as well as on their integration with traditional therapies. Thousands of Americans are turning to these therapies, and consumers will benefit from a rigorous scientific review of them.

DES.—The Committee continues to strongly support increased efforts to study and educate the public and health professionals about the impact of exposure to the synthetic hormone diethylstilbestrol (DES). The Committee expects the NCI to continue its support of research in this area. In addition, the Committee urges the NCI to continue its agreement with the CDC to implement a national education program for consumers and health professionals. The Committee expects the NCI and these other agencies to continue to consult with organizations representing individuals impacted by DES as they carry out DES research and education efforts.

Gynecologic cancers.—The Committee is concerned about the patterns of care for gynecological cancers, and it urges the NCI to expand CanCORS to gynecologic cancers. While the Committee commends the NCI for funding four ovarian cancer SPOREs and the one gynecologic cancer SPORE, it believes research into other gynecologic cancers needs to be enhanced. The Committee urges the NCI to continue funding ovarian cancer SPOREs and to consider creating SPOREs specifically for cervical and endometrial cancers.

Imaging systems technologies.—The Committee is encouraged by progress made by the NCI following its August 1999 conference on biomedical imaging, and it urges the NCI to continue to take a leadership role with the Centers for Medicare and Medicaid Services (CMS) and the Food and Drug Administration to avoid duplicative reviews of new imaging technologies which may prevent their benefits from reaching patients on a timely basis. The Committee is aware of the great potential for improved patient care and disease management represented by molecular imaging technologies, especially positron emission tomography (PET) through its ability to image the biology of many kinds of cancer and other diseases. The Committee continues to support the NCI's increased emphasis on examining the molecular basis of disease through imaging technologies such as PET and MicroPET. The Committee continues to encourage the large-scale testing of women for breast cancer and of men for prostate cancer to demonstrate and quantify the increased diagnostic and staging capabilities of PET relative to conventional diagnostic and staging technologies including mammography.

Kidney and bladder cancers.—The Committee is concerned that funding for kidney and bladder cancer has not kept pace with that of other cancers. The Committee understands that the NCI has worked with the scientific community to develop an agenda for research into these cancers. The Committee encourages the NCI to implement this agenda for other urologic cancers in the coming fiscal year.

Liver cancer.—The Committee encourages the NCI to work closely with the NIDDK to investigate prevention, diagnosis and therapy for hepatocellular carcinoma and other cancers of the liver.

Neurofibromatosis (NF).—Neurofibromatosis research has significant potential for cancer patients since NF genes have been implicated in the signaling process that determines cell growth and cell differentiation. The Committee commends NCI for recognizing NF's connection to many of the most common forms of human cancers and commencing phase II clinical trials of NF1 patients with plexiform neurofibromas. The Committee encourages the NCI to strengthen its NF research portfolio in such areas as further development of animal models, natural history studies, therapeutic experimentation and clinical trials.

Pancreatic cancer.—The Committee is very concerned that funding increases for pancreatic cancer research have not risen at a

rate commensurate with the severity of this disease or the increases afforded the NCI for the past 5 years. Pancreatic cancer is the Nation's fifth-leading cause of cancer death, and 99 percent of people diagnosed with pancreatic cancer die within 6 months. Therefore, the Committee strongly urges the NCI to: (1) fully implement the recommendations outlined in the Progress Review Group on pancreatic cancer during fiscal year 2003; (2) consider funding five pancreatic cancer SPOREs by fiscal year 2004; and (3) develop a plan to create a critical mass of pancreatic cancer researchers and grants over the next 3 years. The Committee asks the NIH to address these recommendations in a report to Congress by March 30, 2003.

The Committee also urges the NCI to explore new methods for identifying genetic and environmental factors and gene-environment interactions that contribute to pancreatic cancer, and to develop and implement methods for rapid case ascertainment, which may include immediate electronic reporting from pathology, radiology, and laboratory departments.

The Committee further notes the promise of utilizing proteomic analysis of blood samples to diagnose pancreatic cancer at its earliest stages. Proteomic analysis, which involves the identification of specific protein patterns in blood or other specimens that match known malignant patterns, is quicker than identifying separate proteins and the genes that create the proteins. This analysis was recently employed for the detection of ovarian neoplasms and is presently under study for the early detection of invasive prostate cancer. The Committee encourages the NCI to rapidly identify predictive proteomic patterns relevant to pancreatic cancer.

Primary immunodeficiencies (PI).—Research has shown that patients suffering from primary immunodeficiencies have a 100–200 times greater risk of developing cancer than persons not suffering from PI. This has been a particular problem in minority communities, where PI is often underdiagnosed. The Committee urges the NCI to fund an aggressive research agenda that will target methods of identifying undiagnosed patients and appropriate treatments as a means of preventing cancer. In addition, the Committee continues to urge NCI to play a meaningful role in the national physician education and public awareness campaign of the Jeffrey Modell Foundation.

Prostate cancer.—Incidences of prostate cancer have been on the rise in recent decades. Evidence is growing that in addition to genetic disposition, numerous other factors—including lifestyle, nutritional imbalances, chronic infections, and hormonal, psychological and environmental components—play a role in the development of prostate cancer. The Committee strongly urges the NIH to renew its commitment to prostate cancer research, with a special emphasis on accelerating new avenues for basic research, drug development, and clinical research.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE
Appropriations, 2002 \$2,560,197,000
Budget estimate, 2003 2,776,411,000
Committee recommendation 2,820,011,000

The Committee recommendation includes \$2,820,011,000 for the National Heart, Lung, and Blood Institute [NHLBI]. This is \$43,600,000 more than the budget request and \$259,814,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The National Heart, Lung, and Blood Institute provides leadership for a national research program in diseases of the

heart, blood vessels, lungs and blood, in transfusion medicine, and in sleep disorders through support of innovative basic, clinical, population-based, and health education research.

Advanced imaging technology for heart disease and stroke.—The Committee is aware that heart perfusion PET scans using Rubidium-82 are considered the “gold standard” for determining the extent of muscle damage to the heart following a heart attack. The Committee encourages the NHLBI to expand its research efforts into the role of biological imaging and PET in delivering more accurate information to determine appropriate treatment for heart disease patients.

Behavioral research on positive health.—The Committee notes that the NHLBI has sponsored important research demonstrating the power of social connectedness to help speed recovery after heart attacks. The Committee is interested in research that helps reveal the pathways through which positive experiences and emotions may enhance health or protect against illness. The Committee encourages the NHLBI to continue its work in this area and to expand where possible any initiatives to increase basic behavioral research on the etiology of disease resistance. The Institute is also encouraged to examine initiatives that may be ready for field-testing in community populations.

Blood disorders.—The Committee commends the NHLBI for its actions to establish a Transfusion Medicine/Hemostasis Clinical Research Network and for the enhancements being made to the existing network of sickle cell centers.

Cardiovascular diseases.—The Committee continues to regard research into the causes, cure, prevention and treatment of heart attack, stroke and other cardiovascular diseases as one of the Nation's top priorities. Cardiovascular diseases remain the leading cause of death in the United States and a major cause of disability. The Committee is concerned that funding in constant dollars for NHLBI's Extramural Heart Program has not kept pace with increases for the NIH at a time when promising breakthroughs are on the horizon. The Committee continues to believe that an intensive research program on heart attack, stroke and other cardiovascular diseases should be a top priority of the NHLBI and of the NIH. The Committee urges the Institute to place the highest priority on cardiovascular research and has included sufficient funds to allow the Institute to support existing heart and stroke-related research and to invest in promising research initiatives in this area.

Cardiovascular diseases in women.—The Committee is aware that cardiovascular diseases remain a major cause of disability and the leading cause of death of American women. The clinical course of cardiovascular disease is different in men than in women, and current diagnostic capabilities are less accurate in women than in men. The Committee urges the NHLBI to expand cardiovascular disease research in women, including studies to develop safe, efficient and cost effective diagnostic approaches for women.

In addition, the Committee encourages the NHLBI to create more informational and educational programs for women patients and health care providers on heart disease and stroke risk factors, as authorized under Public Law 105-340, the Women's Health Research and Prevention Amendments of 1998.

Chronic obstructive pulmonary disease (COPD).—The Committee encourages the Institute to further research COPD and to expand research on the pediatric origins of COPD, the effects of environment on COPD, and the identification of biomarkers that might predict complications of COPD, including lung cancer.

Cooley's anemia.—The Committee remains strongly supportive of the Institute's creation of the Thalassemia Clinical Research Network, which is composed of North America's leading research entities on thalassemia, the medical term for Cooley's anemia.

Diamond-Blackfan Anemia.—The Committee is pleased that NHLBI has conducted a workshop to evaluate the current state of the science for the rare bone marrow deficiency disorder, Diamond Blackfan Anemia (DBA). The Committee understands that based on the findings of the workshop, NHLBI is developing a comprehensive research strategy to investigate its genetic predispositions to cancer, advanced treatment options, and gene therapy. NHLBI should submit a report to the Committee on the findings of the workshop and the subsequent research strategy. The Committee also urges NHLBI to consider ways to enhance the Diamond Blackfan Anemia National Registry so that it may better facilitate research in this field.

Disease networks.—The Committee is pleased with the NHLBI's efforts to create disease networks in the areas of asthma, sarcoidosis, and ARDS. The Committee encourages the NHLBI to expand disease networks and to expand the network concept to include the creation of tissue banks for acquisition and distribution of tissue for asthma, COPD, and interstitial lung disease.

Heart disease and kidney disease.—There is a well-established and significant link between heart disease, hypertension, and kidney disease. The Committee encourages the NHLBI to increase its collaboration with the NIDDK to develop cooperative research initiatives in this area, and it urges the NHLBI to consider sponsoring a workshop on hypertension as it relates to heart and kidney disease.

Hemophilia.—The Committee commends the NHLBI for its role in addressing hemophilia and for the Institute's strong support of hemophilia gene therapy research. The Committee notes the NHLBI program for women with bleeding disorders, and it encourages the NHLBI to convene a consensus conference to determine next steps for research. The Committee recognizes the Institute's efforts to address the shortage of trained hematologists through the establishment of a clinical research network, and it urges the NHLBI to expand support for strategies to ensure this critical issue is addressed.

Lung repair.—Respiratory failure is often a result of irreversible lung injury. This may occur acutely in conditions such as the acute respiratory distress syndrome (ARDS) or chronically with disorders such as COPD or pulmonary fibrosis. The Committee encourages the NHLBI to promote the use of stem cells in animal models to study lung repair and organogenesis as a novel method to reverse respiratory failure.

Marfan syndrome.—The Committee commends the NHLBI for its past and ongoing support of research on aortic aneurysms, which are pathologically related to Marfan syndrome. In particular, the Committee commends the Institute for providing funding support for the request for applications that was initiated by NIAMS for heritable disorders of connective tissue, which include Marfan syndrome. Marfan syndrome is a life-threatening genetic disorder that affects several organ systems and may result in rupture of the aorta without the proper intervention.

Minority cardiovascular health research.—The Committee remains concerned that cardiovascular diseases disproportionately affect minorities. For example, compared with whites, blacks have a 1.3 times greater rate of nonfatal stroke, a 1.8 times greater rate of fatal stroke, and a 1.5 times greater rate of heart disease death. The Committee encourages the NHLBI to support new partnerships

between research-intensive medical centers and health care systems that serve minority populations. Such partnerships would facilitate the study of complex biological, behavioral, and societal factors that contribute to health disparities in cardiovascular disease; promote research within the health care systems to improve minority health and reduce health disparities; and provide training of investigators to study cardiovascular diseases in minorities. An important aspect of the programs would be the development of community involvement in the research and outreach strategies for patient recruitment and retention and emphasis on prompt and effective communication of research findings to health care practitioners.

Minority health and lung disease.—The Committee is aware that lung diseases disproportionately affect many minority groups. The Committee encourages the NHLBI to work with other Institutes and Centers to develop an epidemiologic approach to determine the disproportionate impact of airway disease on minority populations.

Myeloproliferative disorders and myelodysplasia.—The Committee urges the NHLBI to work with the NCI to develop new research initiatives into the causes and targeted therapies of myeloproliferative disorders and myelodysplastic syndromes. These disorders are characterized by an overgrowth of often abnormal cells in the bone marrow which may lead to leukemia.

National Asthma Education and Prevention Program (NAEPP).—The Committee commends the NAEPP, which is administered by the NHLBI, for its leadership in helping to educate physicians, asthma patients, their families, and the general public regarding asthma and its management. The Committee encourages the NAEPP to enhance the role that its advisory committee plays in helping to coordinate asthma education throughout the United States. In addition, the Children's Health Act of 2000 legislation included provisions for the NAEPP to develop, in conjunction with other Federal agencies and voluntary and professional health organizations, a Federal plan to respond to asthma. This plan will include the roles and responsibilities of several Federal agencies in combatting asthma. The Committee encourages the NHLBI to move forward quickly on this effort.

Obesity-associated cardiovascular diseases.—Obesity is a major risk factor for heart disease, stroke, and other cardiovascular diseases. An estimated 61 percent of American adults are overweight or obese, and excessive weight in children and adolescents is of increasing concern. The Committee encourages the NHLBI to support basic and clinical studies to explain how excessive body weight contributes to the development of cardiovascular diseases such as hardening of the arteries, enlarged hearts, heart failure and irregular heart beats. Major areas needing further research and clarification include the role of fatty tissue in inflammation, the effects of obesity on the growth of the heart, blood vessel, respiratory, hormone and metabolic systems; and the complex interactions between being overweight and conditions such as chronic sleep loss, high blood pressure and diabetes.

Pediatric asthma.—The Committee recognizes that little is known about the optimal treatment for asthma in infants and young children. The Committee encourages NHLBI to use the research amassed through the Pediatric Asthma Clinical Research Network to provide clearer choices for childhood asthma therapy, to encourage the development and dissemination of new therapies, and to identify optimum asthma management strategies for children.

Pulmonary hypertension.—Pulmonary hypertension (PH) is a rare, progressive and

fatal disease that predominantly affects women. It causes deadly deterioration of the heart and lungs and is a secondary condition in many other serious disorders such as scleroderma and lupus. The Committee commends the NHLBI's efforts to promote PH-related research, and it encourages the Institute to increase funding for basic research, gene therapy, and clinical trials of promising pharmaceuticals.

Scleroderma.—The Committee encourages the NHLBI to undertake research initiatives on the cause of and treatment options for scleroderma, a chronic and progressive disease that predominantly strikes young women. Scleroderma can result in complications that include pulmonary fibrosis, pulmonary hypertension, myocardial fibrosis, cardiac arrhythmias, pericarditis, and Raynaud's phenomenon.

Sleep medicine.—The Committee commends the Institute and its National Center for Sleep Disorders Research for the progress being made to advance research into the relationship between obstructive sleep apnea and obesity, hypertension, cardiovascular diseases, and mortality. The Committee encourages the Institute to accelerate these efforts and to consider conducting multi-site clinical studies that will assess effective treatments for patients with sleep apnea and identify the functions of sleep for health, aging, and prevention of disease.

Temporomandibular joint disorders (TMJ).—The Committee applauds the NHLBI for taking the initiative to investigate research opportunities related to the cardiovascular and sleep-related consequences of temporomandibular disorders, and it encourages the Institute to act upon the recommendations that ensued from an NHLBI workshop related to these issues.

Tuberculosis and AIDS interaction.—The Committee supports the important research on the interaction of tuberculosis and AIDS conducted by the NHLBI AIDS research program, and it encourages NHLBI to strengthen its research in this important area.

Vascular disease and Alzheimer's.—There is a growing body of evidence that cerebrovascular disease may be a key mechanism in triggering the manifestation of Alzheimer's disease. Autopsy data reveal that individuals whose brains showed the plaques and tangles that are the hallmark of Alzheimer's disease were much more likely to develop dementia if they had also suffered a series of small strokes. Data from longitudinal studies also suggest that high cholesterol and hypertension may be significant risk factors in Alzheimer's disease. The implications of these discoveries are enormous, particularly for racial and ethnic groups that are disproportionately affected by vascular disease. Preliminary studies indicate that cholesterol-lowering drugs and anti-hypertensive medications may also protect against cognitive impairment and Alzheimer's disease. The Committee urges the NHLBI to pursue this line of research and to work collaboratively with the NIA.

NATIONAL INSTITUTE OF DENTAL AND CRANIOFACIAL RESEARCH

Appropriations, 2002	\$343,149,000
Budget estimate, 2003	372,167,000
Committee recommendation	374,067,000

The Committee recommendation includes \$374,067,000 for the National Institute of Dental and Craniofacial Research [NIDCR]. This is \$1,900,000 more than the budget request and \$30,918,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIDCR supports research and research training to improve the oral

health of the American people. The Institute emphasizes ways to prevent disease in high-risk groups, including the elderly, minority populations, and individuals with medical conditions and medications that compromise oral health. The research agenda includes studies of craniofacial genes and birth defects; bone and joint diseases; AIDS, other infections, and immunity; oral cancer; chronic pain; epidemiology; biomaterials; and diagnostic systems.

Dental complications of Paget's disease.—The Committee encourages NIDCR to support research on bone surrounding teeth, oral and dental complications of Paget's disease, new animal models of dentinogenesis imperfecta, orthodontic manipulation in people with osteogenesis imperfecta and biomarkers related to saliva. The Committee also encourages NIDCR to continue its research on fibrous dysplasia.

Temporomandibular joint disorders (TMJ).—The Committee is aware that the Institute intends to broaden its scientific base for TMJ research beyond studies on the psychological and behavioral factors in the etiology or chronicity of TMJ diseases and disorders that have long dominated the research portfolio. The Committee urges investment in studies of normal and abnormal structural and functional features of the joint and related structures, using the tools of cell and molecular biology as well as advanced imaging techniques. The Committee asks that the NIDCR and other Institutes follow up with research initiatives resulting from the spring 2002 TMJ Association's meeting on joint and muscle dysfunction of the TMJ.

NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND KIDNEY DISEASES

Appropriations, 2002	\$1,466,380,000
Budget estimate, 2003	1,604,647,000
Committee recommendation	1,637,347,000

The Committee recommends an appropriation of \$1,637,347,000 for the National Institute of Diabetes and Digestive and Kidney Diseases [NIDDK]. This is \$32,700,000 more than the administration's request and \$170,967,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIDDK provides leadership for a national program in three major disease categories: diabetes, endocrinology, and metabolic diseases; digestive diseases and nutrition; and kidney, urologic, and hematologic diseases. The NIDDK plans, conducts, fosters, and supports a coordinated program of fundamental and clinical research and demonstration projects relating to the causes, prevention, diagnosis, and treatment of diseases within these categories. The Institute also supports efforts to transfer the knowledge gained from its research program to health professionals, patients, and the general public.

Behavioral research.—The Committee encourages the NIDDK to continue a research emphasis on the links between depression and diabetes. Diabetics who have co-occurring depressive symptoms have less success managing their illnesses. Depression has been linked to poorer adherence to medical and behavioral regimens and lower rates of exercise. The Committee also notes that a recent NIDDK clinical trial on diabetes, the Diabetes Prevention Program, demonstrated that diet and exercise could be more successful than medication in preventing the development of diabetes in groups that faced a high risk of diabetes. The NIDDK is strongly encouraged to build on its investment in behavioral research, particularly in areas that would add to the science base on the maintenance of positive behavior change.

Bladder disease research.—Bladder diseases have a significant negative impact on the U.S. population. The Committee urges the Institute to increase funds for the urology program and other areas critical to bladder disease.

Children and adolescent urological diseases.—While research urologic diseases has led to advances in the care and management of some urologic diseases affecting adults, these diseases persist as a major cause of illness among the most vulnerable population, children and adolescents. The NIDDK should develop and implement an interagency plan for pediatric urologic disease research. The Committee requests the NIDDK to submit a status report prior to the fiscal year 2004 appropriations hearings that outlines the steps it is taking to address the specific research needs of children and adolescents suffering from urologic diseases and conditions.

Chronic prostatitis.—The Committee requests that the NIDDK increase funding for the Chronic Prostatitis Collaborative Research Network. The Institute is also encouraged to stimulate new and diverse research in chronic prostatitis by convening a scientific and clinical workshop to be held in fiscal year 2003 which will disseminate the findings of the CPCRN and develop a strategic research plan.

Cooley's anemia.—The Committee commends the outstanding work being done at the NIDDK on such issues as iron chelation, non-invasive iron measurement, fetal hemoglobin and other topics that are critical to the health and well-being of Cooley's anemia patients. The development of a less burdensome method of iron chelation, in particular, is a critical priority as these patients currently must infuse themselves with a drug pumped into their bodies up to 12 hours per night. Research directed at reducing this burden is urgently needed.

Diabetes in Native Hawaiians.—The Committee encourages the NIDDK to investigate the incidence of diabetes in Native American, Hawaiian, and Alaskan populations, as well as the Mississippi Band of the Choctaw Indians and the Eastern Band of the Cherokee Indians.

Digestive diseases.—Diseases of the digestive system, such as colorectal cancer, inflammatory bowel disease, irritable bowel syndrome, hemochromatosis, celiac disease, and hepatitis, affect more than one-half of all Americans at some time in their lives. The Committee commends the NIDDK on the success of its Digestive Disease Centers program in addressing a wide range of disorders that result in tremendous human suffering and economic cost. The Committee encourages the Institute to expand this program.

Gastroparesis.—Millions of Americans suffer from gastroparesis, a condition caused by the failure of the stomach to empty because of decreased motility. One of the most common complications of diabetes, gastroparesis also affects individuals with lupus, scleroderma, and is a complication in the treatment of Parkinson's and asthma. In up to 40 percent of cases, the cause of gastroparesis is unknown. While researchers are exploring methods to diagnose this disorder, effective treatments remain elusive. The Committee strongly encourages NIDDK to place special emphasis on developing and testing more effective, innovative diagnostic tests and novel treatments, and on training health care providers about this gastric neuromuscular disorder.

Glomerular injury research.—The Committee is pleased with the NIDDK's glomerular injury research initiatives, including a clinical trial for patients with focal segmental glomerulosclerosis. Further, the Committee continues to encourage the NIDDK to consider initiating a scientific conference on

glomerular injury research, and to explore support for gathering prevalence data on glomerular injury.

Hematology.—The Committee is aware of the high-quality hematology research in iron metabolism, gene regulation, and stem cell plasticity currently funded by the Institute, and it encourages the NIDDK to plan the next steps in setting priorities for future research in these and other areas that significantly impact a broad array of blood disorders.

Hepatitis C.—The Committee remains concerned about the disproportionate impact of hepatitis C among minorities. The Committee encourages the NIDDK to expand research on better treatment options for minorities, and to partner with the CDC and voluntary health organizations to facilitate a prevention and education campaign targeted at high-risk populations.

Inflammatory bowel disease.—The Committee has been encouraged in recent years by discoveries related to Crohn's disease and ulcerative colitis, collectively known as inflammatory bowel disease (IBD). These extremely complex disorders represent the major cause of morbidity from intestinal illness. The Committee commends NIDDK for its strong leadership in this area and encourages the Institute to expand research focused on: (1) the cellular, molecular and genetic structure of IBD, (2) identification of the genes that determine susceptibility or resistance to IBD in various patient subgroups, and (3) translation of basic research findings into patient clinical trials as outlined in the research agenda developed by the scientific community entitled, "Challenges in Inflammatory Bowel Disease." In addition, the Committee encourages NIDDK to continue to strengthen its partnership with the IBD community and expand its Digestive Disease Centers program. The Committee requests that the Institute provide a report on the progress made throughout the NIH in all of these areas by October 1, 2003.

Interstitial cystitis.—The Committee is very concerned by the direction of interstitial cystitis (IC) research at the NIDDK in the last two budget cycles. Despite strong congressional interest in expanding such research, the NIDDK did not invest in new IC-specific research grants during fiscal year 2002 and has thus far not committed to doing so in fiscal year 2003. The Committee urges the NIDDK to reverse this trend and aggressively support research that will enhance the basic science knowledge of IC through IC-specific research.

The Committee is pleased that NIDDK has pledged continued support and expansion of the IC Clinical Trials Group. The Committee is aware that the group is making good progress on the evaluation of BCG for the treatment of IC. Ancillary studies, including urinary marker studies, are being done concurrently, and will help provide an understanding of the differences between responders and non-responders. The Committee feels strongly that funding for ancillary studies should be included in the recompetition of the RFA for the ICCTG clinical centers. This will ensure peer review, and at the same time, avoid possible significant delays in funding of the ancillary studies should they be offered through a different mechanism.

The Committee is also pleased that the NIDDK completed a draft of the recommendations put forth by the Bladder Research Review Group and had planned to issue its final report in 2002. The Committee urges that the strategic plan's recommendations regarding IC be implemented and fully funded as soon as possible. The Committee requests a full update on this and all IC-related research activities as part of the NIDDK's written testimony for the fiscal year 2004 Senate appropriations hearing.

Irritable bowel syndrome.—The Committee remains concerned about the increasing frequency of irritable bowel syndrome (IBS), and it encourages NIDDK to partner with other Institutes and Centers to enhance research on this disorder, including studies on its prevalence.

Islet cell transplantation.—The Committee is pleased with NIH-supported research involving the transplantation of insulin-producing islet cells into individuals with juvenile diabetes. The Committee encourages the NIDDK to work closely with the NIAID on initiatives to create and maintain immune tolerance to transplanted islet cells. In addition, the Committee encourages the NIDDK to vigorously pursue all avenues of research that could lead to alternative supplies of insulin-producing cells, including stem cell technology.

Juvenile diabetes.—The Committee urges the NIDDK to continue development of a vaccine to prevent juvenile diabetes, and to collaborate with other Institutes on this project. In addition, the Committee commends the NIDDK for its efforts to determine the genetic origins of juvenile diabetes, including the development of a Type 1 Diabetes Genetics Consortium, which will collect and share valuable DNA information from juvenile diabetes patients from studies around the world. The Committee encourages the NIDDK to continue and expand this effort to determine the genetics of the complications of diabetes, such as retinopathy, kidney disease and neuropathy. The Committee also remains concerned about reports of a shortage of pediatric endocrinologists, and it urges the NIDDK to enhance efforts to address this serious problem.

Kidney disease and end-stage renal disease.—Diabetes is the leading cause of kidney failure and end-stage renal disease. The Committee urges the NIDDK to expand research into early prevention and therapeutic intervention of kidney disease to prevent end-stage renal failure. The Committee also encourages the NIDDK to consider launching a permanent kidney disease clinical research mechanism. Finally, the Institute is urged to address an anticipated workplace shortage in nephrology by launching new training initiatives and workshops to foster interest in the field.

Kidney disease clinical research.—The Committee previously noted the current inherent problems in conducting kidney disease research due to the lack of a permanent infrastructure, such as a clinical trials cooperative group. The Committee commends the NIDDK for its leadership in moving forward in this area, by holding an initial workshop to develop strategies that will strengthen kidney research and enhance researchers' abilities to translate research findings to the bedside, facilitate clinical trials, and recruit patients for studies. The Committee urges the NIDDK to continue with these efforts, and to make the necessary funds available in this fiscal year to launch a permanent kidney disease clinical research mechanism.

Live-donor liver transplants.—More than 1,300 people died over the past year because of the lack of a donor liver, and there were almost 18,750 individuals on the list waiting for liver transplants. In view of this continuing shortage of organ donors, the Committee is pleased that an award has been made for the establishment of six clinical centers and a data coordinating center to focus research on the need to improve the outcome of both donors and recipients involved in such transplants.

Mucopolysaccharidosis (MPS).—The Committee is pleased with the efforts made by the NIDDK to enhance research efforts in the area of MPS, both to achieve a greater understanding of these disorders and to pursue

the development of effective therapies. The Committee encourages the NIDDK to continue its strong investment in MPS-related research, including bone and joint involvement and pathophysiology of brain damage as they relate to MPS disorders. The NIDDK is further encouraged to build on collaborative efforts with the NINDS, NICHD and appropriate Institutes and Centers involved in this research.

Non-alcoholic Steatohepatitis.—The Committee is pleased that the Institute has provided funding for six clinical centers and one data coordinating center to focus additional research on non-alcoholic steatohepatitis (NASH), which is the second most common cause of liver disease after hepatitis C. In view of the fact that NASH is increasing rapidly in children, the Institute is encouraged to collaborate with the NICHD to expand this award to include a more significant focus on children.

Osteoporosis.—The Committee encourages the NIDDK to collaborate with the NIAMS to conduct large-scale trials to determine the most effective and least costly way to combine treatments for osteoporosis, both to prevent bone breakdown and build new bone. The Committee also urges the NIDDK to consider co-funding grants with NCCAM and the Office of Dietary Supplements regarding the nutritional and hormonal influences of calcium on bones, as well as the bioavailability of various calcium supplements.

Pediatric kidney disease.—Although significant strides have been made in understanding kidney disease in adults, much less is known about its complications in children, including obstacles to full growth potential and neurocognitive development. For this reason, the Committee is disappointed that children were not included in a prospective cohort study of chronic renal insufficiency, particularly in light of recent initiatives calling for greater participation of children in studies of this nature. Given the long-term implications when children reach adulthood, the Committee strongly urges the NIDDK to undertake research into the history and treatment of (1) cardiovascular problems in children suffering from chronic kidney disease, giving careful consideration to the role of hypertension, lipid abnormalities, obesity, cardiovascular calcification and cardiac arrhythmia, and (2) neurocognitive and developmental deficits including learning disabilities, with related issues of chronic neurological, intellectual and emotional impairment; poor linear growth; and abnormal bone formation.

Pediatric liver disease.—The Committee is pleased that the NIDDK has taken steps to increase research on biliary atresia, the most common cause of liver transplantation in children. The Committee notes that metabolic causes of liver disease and non-alcoholic steatohepatitis (NASH) are also significant causes of liver disease in children. Therefore, it urges additional research focused on these diseases and other forms of pediatric liver disease.

Polyzystic kidney disease (PKD).—The Committee is pleased that the NIDDK has implemented most of the PKD Strategic Plan as established in early fiscal year 1999, and that has sponsored another PKD Strategic Planning Meeting to chart the next 3- to 5-year course for this promising field of study. Likewise, the Committee is encouraged to know that the NIDDK will launch the PKD Interventional Trials Network this year and will partner with the private sector to increase the quality of this project. The Committee is pleased to note that both the ARPKD gene discovery (for infantile PKD) and the Intracellular Calcium Channel breakthrough for ADPKD in February 2002 were discovered by NIH-funded scientists.

The Committee strongly urges NIDDK to take advantage of this unprecedented PKD research momentum and accelerate its research efforts toward creating effective clinical interventions for the 600,000 Americans afflicted with PKD.

Training grants.—The Committee is very concerned that so few investigators have focused their careers on diseases of the pancreas and pancreatic cancer. The Committee urges the NIDDK to increase the number of training grants, fellowship and career development programs, and seed grants that are specifically aimed at increasing the number of researchers, including young investigators, to pancreatic diseases.

Urinary incontinence.—Urinary incontinence afflicts approximately 13 million adults in the United States, 85 percent of whom are women. The Committee urges the NIDDK to enhance its support of urinary incontinence research following the recommendations of the Bladder Research Progress Review Group. In addition, the Committee encourages the NIDDK to increase the number of clinical sites in the Urinary Incontinence Treatment Network Initiative.

Urological diseases.—Urological diseases have a significant impact on men, women and children in this country and represent a major public health issue that will increase as the population ages. The Committee has previously expressed its concern over the adequacy of the urology basic science research effort. The Committee therefore strongly encourages the NIDDK to make the investments in urology research needed to achieve significant improvement in the ability of physicians to diagnose and treat these diseases and to relieve the human suffering they cause.

Urologist shortage.—The Committee is aware of the shortage of urologists entering research careers. It encourages the NIDDK to initiate career development awards appropriate for urologists and other surgeons, taking into account the specific requirements for training and experience that urology residency and fellowship training programs must meet. The NIDDK should consider modifying the current research time requirements and develop alternative career pathways suitable for urologic fellowship training programs.

Urology Interagency Coordinating Committee.—Several Federal agencies, including the Department of Defense and the Veterans Administration, have a role in urology research. In order to strengthen trans-institutional research, the Committee encourages the NIDDK to provide funds to the Urology Interagency Coordinating Committee to foster such research.

Urology research centers.—The Committee is impressed with the results produced by the O'Brien urology research centers, which bring together a critical mass of scientists who focus on a particular aspect of urologic disease. The Committee urges the NIDDK to increase the number and funding of these centers and ensure that there is focus on pediatric urology; prostate growth and disease; female urology, including incontinence, infection, interstitial cystitis, and bladder function and development; and tissue engineering and genetics. These centers should also be able to develop exploratory projects and provide support for resident and fellow research opportunities.

Women's urological health.—The Committee is concerned with the lack of progress at NIDDK in developing a women's urological health initiative. The conference held 4 years ago identified important research issues and needs, but there has been little subsequent action. The Committee strongly urges the Institute to implement the con-

ference recommendations in the coming fiscal year and address the management problems that caused this delay in action.

NATIONAL INSTITUTE OF NEUROLOGICAL DISORDERS AND STROKE

Appropriations, 2002	\$1,312,780,000
Budget estimate, 2003	1,424,405,000
Committee recommendation	1,466,005,000

The Committee recommends an appropriation of \$1,466,005,000 for the National Institute of Neurological Disorders and Stroke [NINDS]. This is \$41,600,000 more than the budget request and \$153,225,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NINDS conducts and supports a broad range of research and research training on the normal function of the brain, spinal cord, and peripheral nerves, and on neurological and neuromuscular disorders. Neurological research includes epidemiology studies to identify risk factors for disease; laboratory studies to examine the structure and function of nerve cells; and brain imaging studies to understand how the brain is affected by disease and how it operates to carry out tasks such as learning and memory. New approaches for the diagnosis, treatment, and prevention of brain disorders are evaluated in studies with patients and those at risk for brain disorders.

Alzheimer's disease.—The NINDS continues to play an integral role in widening the scientific base of knowledge about Alzheimer's disease. For example, scientists have developed an antisense molecule that, when introduced intravenously, reversed learning and memory deficits in mice with an Alzheimer's-like disease. The Committee believes that the potential of antisense therapy for Alzheimer's and related disorders is promising. The Committee urges the NINDS to continue to assign a high priority to its Alzheimer's research portfolio. In addition, the Committee urges the NINDS, in collaboration with the NIA and NIMH, to expand its research into early diagnosis of Alzheimer's using PET imaging of the brain.

Ataxia telangiectasia (A-T).—A-T is a genetic disease that attacks in early childhood. It progressively affects coordination and severely compromises the immune system. Children with A-T are highly likely to develop cancer, and rarely live beyond their teens. The Committee encourages the NINDS to work with the NCI and other appropriate Institutes to support research aimed at understanding the underlying causes of A-T with the goal of translating this basic research into treatments for the disease.

Batten disease.—The Committee is disappointed with the pace of research regarding Batten disease. The Committee strongly urges the Institute to increase funding for such research by actively soliciting grant applications for Batten disease and taking aggressive steps to assure that a vigorous research program is established.

Brain tumors.—The Committee encourages the NINDS to continue working with the NCI to carry out the recommendations of the recently issued Report of the Brain Tumor Progress Review Group.

Duchenne muscular dystrophy.—The Committee commends NIH for initiating the muscular dystrophy cooperative research centers. These centers will support interdisciplinary teams of accomplished investigators undertaking basic and clinical research to improve treatment options for patients with Duchenne and Becker muscular dystrophy. The Committee expects NINDS to work cooperatively with NIAAMS and NICHD to expand the research undertaken by the centers program.

Dystonia.—The Committee continues to support the expansion of research and treatment developments regarding the neurological movement disorder dystonia, which is the third most common movement disorder after tremor and Parkinson's disease. The Committee encourages the NINDS to support additional research on both focal and generalized dystonia, and it commends the Institute for its study of the DYT1 gene and encourages expansion in this research area. Furthermore, the Institute is encouraged to support epidemiological studies on dystonia and to increase public and professional awareness of this disorder.

Epilepsy.—Epilepsy remains a major, unsolved public health problem affecting the lives of over 2.5 million Americans and their families. The Committee applauds the development of benchmarks for epilepsy research resulting from the "Curing Epilepsy: Focus on the Future" conference held in March 2000, and it encourages the NINDS to expand research into the prevention, treatment, and eventual cure of epilepsy. In addition, the Committee urges the NINDS to address critical research issues related to the impact of seizures on young children, women, the elderly and those with intractable or uncontrolled epilepsy. The Committee commends the Institute on the anti-epileptic drug development program that has led to the discovery of many important anti-epileptic medications, and it encourages the Institute to further develop this program with specific research plans and goals.

Fragile X.—Fragile X is a single-gene neurological disease resulting in mental disorders, cognitive impairment and seizures. The Committee urges the NINDS to enhance its research activities on Fragile X and to include Fragile X patients in its studies of related disorders. The Committee also urges the NINDS to coordinate these efforts with other Institutes working on related activities, including the NIMH and the NICHD.

Mucopolysaccharidosis (MPS).—The Committee commends the NINDS for sponsoring a scientific conference focusing on central nervous system issues and the barriers to and development of effective therapies for MPS disorders, and urges the NINDS to solicit investigator proposals resulting from the findings of the conference. The Committee also encourages the NINDS, in collaboration with the NIDDK and the NICHD, to support current MPS research and use all available mechanisms to further stimulate and enhance efforts to better understand and treat MPS disorders.

Neurofibromatosis.—Neurofibromatosis (NF) is a genetic disorder of the nervous system that causes tumors to grow along nerves anywhere on or in the body. The Committee is aware that recent advances in research have linked NF to cancer, brain tumors, learning disabilities and heart disease, and it urges the NINDS to expand its NF basic and clinical research portfolio.

Spinal muscular atrophy.—Spinal muscular atrophy (SMA) is the most common genetic killer of infants and the most prevalent genetic motor neuron disease. While there is currently no cure for the disease, the research outlook is promising. Researchers have already identified the genes involved in SMA as well as compounds that may lead to potential treatments. The Committee understands that the severity of the disease, its relatively high incidence, and the possibility of imminent treatments have led the NINDS to explore the idea of using SMA as a model for a new approach to funding translational research. The Committee strongly endorses that plan, and it urges the NINDS to devote sufficient resources to such an effort to maximize chances of success, and evaluate whether a similar approach would work for other diseases.

In addition, the Committee strongly urges the Institute to increase funding for SMA research by aggressively soliciting grant applications, and it encourages the Institute to consider establishing centers of excellence for basic and applied research in SMA. Lastly, the Institute is encouraged to support epidemiological studies on SMA and to increase public and professional awareness of the disease.

Stroke.—The Committee continues to regard research into the causes, cure, prevention, treatment and rehabilitation of stroke as one of the Nation's top priorities. The Committee commends the NINDS for convening a Stroke Progress Review Group, consisting of researchers, clinicians, pertinent organizations and advocacy groups. This Group crafted a report that will serve as a blueprint for a long-range strategic plan on stroke research.

The Committee is concerned that funding for stroke research over the years may not have kept pace with the scientific opportunities and the number of Americans afflicted with stroke. The Committee encourages the NINDS to dedicate more resources to stroke research and to expand its stroke education program. The Committee also encourages the NINDS to expand its research efforts into the utility of PET scans of the brains of stroke victims to determine whether brain tissue damage from stroke may be reversible.

Temporomandibular joint disorders (TMJ).—The Committee commends the Institute for its initiative in conducting a workshop on Neurobiology of Craniofacial/Deep Tissue Persistent Pain, designed to attract neuroscience investigators to explore these little-understood areas of acute and chronic pain. The Committee expects a report on initiatives and research growing out of the workshop and urges, in addition, that research be conducted in collaboration with the NHLBI and other pertinent institutes on other aspects of sensory-motor dysfunction associated with TMJ diseases and disorders, including autonomic nervous system involvement, dysphagia, alterations in proprioception, and a range of speech, breathing, and sleep problems.

Traumatic brain injury (TBI).—There are at least 1.5 million people who sustain a traumatic brain injury (TBI) annually, and at least 5.3 million people who live with a disability as a result of TBI. The Committee urges the NINDS to expand bench science research on the mechanisms of this disorder and to begin translational research into clinical settings.

Tuberous sclerosis.—Tuberous sclerosis complex (TSC) is a genetic disorder that attacks several different organ systems, causing tumor growth in the brain, heart, kidney, lungs and skin. TSC often manifests itself through seizures, chronic kidney disease, autism and sometimes mental retardation. The Committee looks forward to receiving the TSC research plan currently being developed by NINDS and private patient foundations, and encourages the Institute to enhance its research efforts in this field through all available mechanisms, including the development of a comprehensive patient registry, epidemiological studies and the development of animal models and cell lines. The Committee looks forward to receiving a progress report prior to the fiscal year 2004 hearings.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

Appropriations, 2002	\$2,534,539,000
Budget estimate, 2003	3,990,473,000
Committee recommendation	3,727,473,000

The Committee recommends an appropriation of \$3,727,473,000 for the National Insti-

tute of Allergy and Infectious Diseases [NIAID]. This is \$263,000,000 less than the budget request and \$1,192,934,000 more than the fiscal year 2002 appropriation. Included in these funds is \$100,000,000 to be transferred to the Global Fund to Fight HIV/AIDS, Malaria, and Tuberculosis. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

The Committee recommendation includes bill language that allows the NIAID to spend up to \$150,000,000 on extramural facilities construction.

Mission.—The NIAID is the lead NIH Institute charged with developing vaccines and supporting research on allergies, acquired immunodeficiency syndrome (AIDS), sexually transmitted diseases, tuberculosis, tropical diseases, and other infectious diseases—including those likely to be used as agents of bioterrorism. To accomplish this mission, the NIAID supports and conducts basic and clinical research and research training programs in infectious diseases, whether they are naturally occurring or the result of a bioterrorist attack, and in diseases caused by, or associated with, disorders of the immune system.

Advanced vaccine/device combination.—The Committee is aware of new vaccine/device delivery systems that could increase vaccine efficacy, use far less vaccine, and require fewer doses. The U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID) is currently conducting research and development on vaccine/device combinations to improve the performance of vaccines against weaponized organisms, including anthrax, plague, and staphylococcus enterotoxin B. The Committee encourages NIAID to work with USAMRIID on this effort.

Asthma, allergic diseases, and drug allergy.—The Committee encourages the NIAID to continue its efforts on asthma and expand its research into the area of drug allergy. Penicillin allergy alone causes 400 deaths each year in this country. The Committee encourages the NIAID, in collaboration with other Institutes as appropriate, to implement a program that will begin to address this need.

Asthma research and management.—The Committee is very pleased with the NIAID's leadership regarding asthma research and management. The Committee recognizes the role the Institute has played in the Inner City Asthma Study and the importance of this effort concerning morbidity and mortality among underserved populations, particularly children. The Committee encourages the NIAID to continue to improve its focus and effort on asthma management, especially as it relates to children. The Committee also encourages the NIAID to collaborate more aggressively with voluntary health organizations to support asthma prevention, treatment, and research activities. Additionally, recent studies suggest that a variety of viral and bacterial agents, including agents used for immunization, may play a role in the development of asthma. The Committee encourages the Institute to expand research into the role that infections and vaccines may play in the development of asthma.

Eye diseases.—The Committee encourages the Institute to collaborate with the NEI on research involving eye-related viruses and infectious diseases.

Food allergy.—An estimated 7 million individuals suffer from food allergies in the United States, with up to 6 percent of all children under the age of 3 experiencing these potentially life-threatening allergies. The Committee urges the NIAID to implement a program to stimulate more research in this area.

Hemophilia.—The Committee supports the NIAID's efforts to ensure access for persons with hemophilia to clinical trials for improving treatment of HIV and complications of hemophilia, including hepatitis C (HCV). The Committee, in particular, is encouraged by the NIAID's leadership in supporting research related to liver disease progression and response to HCV treatment among HIV/HCV co-infected persons with hemophilia, and it urges the Institute to continue its efforts in this area.

Hepatitis C.—The Committee encourages the NIAID to support the virology and immunology portions of the NIDDK's HALT-C clinical trial. The HALT-C trial is a multicenter, randomized, controlled study designed to determine if using interferon over several years will suppress the hepatitis C virus, prevent progression to cirrhosis, prevent liver cancer, and reduce the need for liver transplantation. In addition, the Committee understands that limited clinical trials in Europe have partially validated the premise that the most effective way to eliminate the hepatitis C virus is to initiate an aggressive treatment at the inception of the virus. The Institute is encouraged to collaborate with the NIDDK and the Centers for Disease Control and Prevention to establish and validate treatment guidelines for use with individuals with acute hepatitis C at its inception.

Inflammatory bowel disease.—The Committee continues to note with interest a scientific research agenda for Crohn's disease and ulcerative colitis (collectively known as inflammatory bowel disease) entitled "Challenges in Inflammatory Bowel Disease (IBD)." This report identifies strong linkages between the functions of the immune system and IBD. The Committee encourages the Institute to expand its research partnerships with the IBD community in fiscal year 2003 and expand research focused on (1) the immunology of IBD and (2) the interaction of genetics and environmental factors in the development of the disease.

Juvenile diabetes.—The Committee is aware that the Immune Tolerance Network is investigating methods to create and maintain tolerance to transplanted insulin-producing islet cells in recipients with juvenile diabetes. The Committee understands that the goal of this investigation is to eliminate the need for patients to undergo long-term immunosuppressive therapy after transplantation. The Committee encourages the NIAID to continue and expand this area of research, including developing additional protocols focused on islet cell transplantation into individuals with juvenile diabetes.

Primary immune deficiency diseases.—The Committee is concerned that the primary immune deficiency community would be at significant risk for contracting smallpox if the Nation were to initiate a large-scale smallpox vaccination campaign. Therefore, the Committee encourages the NIAID to give priority consideration under its accelerated bioterrorism research program to a study of the potential benefits of immune globulin intravenous (IGIV) in the fight against smallpox. The Committee also understands that the NIAID intends to establish a cooperative consortium of investigators to address clinical and pre-clinical research questions on PI, including the molecular and cellular characterization of patients with novel phenotypes, and the development of new models, novel diagnostics, and new treatment approaches, such as gene therapy. The Committee urges the NIAID to move ahead aggressively with this initiative. In addition, the Committee would like to see the NIAID's current research project that is testing a new screening method for underserved popu-

lations replicated in other urban centers. Finally, the Committee continues to support greater involvement by the NIAID in the Jeffrey Modell Foundation's national campaign for physician education and public awareness of these diseases.

Temporomandibular joint disorders (TMJ).—The Committee urges NIAID to incorporate the autoimmune and inflammatory processes involved in temporomandibular diseases and disorders into its research portfolio. The collection of tissue samples from TMJ patients and people without TMJ disease has been suggested as part of a patient registry, to determine whether inflammatory mediators, growth factors, cytokines and other cell and molecular factors affecting immunity may differ between people with and without TMJ disease.

Transplantation.—The Committee is aware of the wide gap between the supply of and demand for transplanted organs. The Institute is encouraged to expand research on organ transplantation, including the development of artificial organs, hepatocyte transplantation, xenotransplantation, live-donor liver transplantation, split liver transplantation, and other research focuses as appropriate.

Tuberculosis.—Tuberculosis continues to account for more deaths worldwide than any other infectious disease and for over a quarter of all preventable adult deaths. The Committee commends the NIAID for its aggressive program of tuberculosis research, and it encourages a greater emphasis on the development of a vaccine, as noted by the NIAID's "Blueprint for Tuberculosis Vaccine Development."

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

Appropriations, 2002	\$1,700,139,000
Budget estimate, 2003	1,854,984,000
Committee recommendation	1,853,584,000

The Committee recommendation includes \$1,853,584,000 for the National Institute of General Medical Sciences [NIGMS]. This is \$1,400,000 less than the budget request and \$153,445,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—NIGMS supports research and research training in the basic biomedical sciences. Institute grantees, working in such fields as cell biology, biophysics, genetics, developmental biology, pharmacology, physiology, biological chemistry, bioinformatics, and computational biology, study normal biological processes to better understand what goes wrong when disease occurs. In this way, NIGMS supplies the new knowledge, theories, and technologies that can then be applied to the disease-targeted studies supported by other NIH components. NIGMS-supported basic research advances also regularly find applications in the biotechnology and pharmaceutical industries. The Institute's training programs help provide the scientists needed by industry and academia to maintain United States leadership in biomedical science.

Behavioral science research and training.—As the NIH Institute most concerned with basic research, the NIGMS has provided leadership in basic research on physiological and biological structures and functions that may play roles in numerous health conditions. The Committee encourages the NIGMS to develop collaborations with other Institutes, such as the NCI and NIMH, and the Office of Behavioral and Social Sciences Research to fund basic research to integrate physiological knowledge of predisease pathways with behavioral studies.

Medical Scientist Training Program (MSTP).—The Committee understands that

translating the human genome into cures and therapies is the next great challenge for modern medicine. To meet that challenge, a new generation of scientists must be trained. The MSTP is a highly competitive program that trains physicians for careers in biomedical research by supporting them as they earn both M.D. and Ph.D. degrees. The Committee strongly urges the NIGMS to provide additional funds to increase the number of promising physicians it trains through this program.

Minority scientist training programs.—The Committee commends the NIGMS for its training programs that have a special focus on increasing the number of minority scientists, such as the Minority Access to Research Careers (MARC) and Minority Biomedical Research Support (MBRS) programs.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

Appropriations, 2002	\$1,113,087,000
Budget estimate, 2003	1,213,817,000
Committee recommendation	1,213,817,000

The Committee recommends an appropriation of \$1,213,817,000 for the National Institute of Child Health and Human Development [NICHD]. This is equal to the budget request and \$100,730,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NICHD is that component of the NIH which is responsible for conducting and supporting research on maternal and child health, the population sciences, and medical rehabilitation. Research encompassed by these areas targets infant mortality; genetic diseases, including birth defects; mental retardation; gynecological health and contraceptive development and evaluation; pediatric, maternal, and adolescent AIDS; developmental biology; vaccine development; demographic and behavioral research; and restoration or enhancement of function in individuals experiencing physical disability due to injury, disease, or birth defect.

Autism.—The Committee commends the NICHD for maintaining funding levels for the NIH centers of excellence in autism, and it urges the Institute to continue to do so. In addition, the Committee urges the NICHD to find ways to expand the pool of autism researchers.

Demographic research.—The Committee is pleased with the development of a long-range plan for demographic research supported by the NICHD, and the continued active collaboration with other Federal offices and agencies in carrying out its mission. Contributions of the NICHD program to increasing knowledge of fatherhood, marriage, immigration, and the implications of increasing racial and ethnic diversity are of high importance. The Committee encourages the NICHD to continue focusing attention on family and community factors in examining the health and development of poor children. The Committee further encourages the Institute to continue its attention to data and training needs for policy-relevant demographic research.

Duchenne muscular dystrophy.—The Committee commends NICHD's participation in the initiation of the muscular dystrophy cooperative research centers and expects NICHD to work cooperatively with NIAMS and NINDS to expand the research undertaken by the centers program.

Environmental effects on child health and development.—The Committee applauds the NICHD on its efforts to work collaboratively with the Environmental Protection Agency and the Centers for Disease Control and Prevention on developing the Longitudinal Cohort Study on Environmental Effects on

Child Health and Development, which is now called the National Children's Study. This study aims to quantify the effects of environmental exposures plus the biological and social factors on child health and development. The Committee is pleased that the NICHD is undertaking a strategic planning process that strongly emphasizes a collaborative process between the biomedical and behavioral sciences and reaffirms its commitment to this entire effort.

Fragile X.—Fragile X, the most common inherited cause of mental retardation, results from the failure of a single gene to produce a specific protein. Researchers at the NICHD have made great strides in understanding the mechanism by which this genetic defect causes mental retardation, seizures, aggressive outbursts and severe anxiety. Fragile X has the potential to be a powerful research model for other forms of X-linked mental retardation, as well as neuropsychiatric disorders, including autism, schizophrenia, mood disorders, and pervasive developmental disorder. The Committee is gratified that the NICHD has enhanced its research efforts on Fragile X internally, in cooperation with other Institutes, and by partnering with the FRAXA Research Foundation in the issuance and funding of a Request for Applications to research scientists. The Committee notes that the Children's Health Act of 2000 calls for the establishment of at least three Fragile X research centers. The Committee is pleased that the NICHD has issued a Request for Applications to implement this in fiscal year 2003. The Committee strongly urges the NICHD to allocate sufficient funds for expediting, expanding, and enhancing the work of these centers.

Infertility and contraceptive research.—The Committee continues to place a high priority on research to combat infertility and speed the development of improved contraceptives. The NICHD is urged to continue aggressive activities in this area, including individual research grants and those of the infertility and contraceptive research centers.

Juvenile diabetes.—The Committee encourages the NICHD to expand research using newborn screening tests, specifically to determine the causes of juvenile diabetes and to develop methods to prevent the disease. In addition, the Committee is aware of efforts to develop a vaccine to prevent juvenile diabetes and is encouraged by the early promise of this research. The Committee urges the NICHD to collaborate with the NIDDK in this important research initiative and with the CDC on the creation of a national surveillance system to track individuals with juvenile diabetes.

Maternal-fetal medicine.—The Committee is pleased with the progress of the Maternal-Fetal Medicine Units (MFMU) Network. The Committee urges the NICHD to continue and expand its support of the Network to enable researchers to continue to collect data and more efficiently study complicated pregnancies with a focus on pre-term birth and maternal complications. In addition, the Committee urges the NICHD to increase research in the area of pregnancy-related complications, with a special emphasis on issues related to minority health disparities.

Osteogenesis imperfecta.—The Committee encourages the Institute to increase its research on osteogenesis imperfecta, especially genetic therapies, animal models, drug treatment, and rehabilitation.

Pediatric kidney disease.—Kidney disease remains a persistent and little-understood problem among infants, children, and adolescents. The NICHD is strongly urged to undertake research to identify factors responsible for poor linear growth, abnormal bone formation and cognitive deficits in children; epidemiological studies designed to quantify

the magnitude of the problem and identify which kidney diseases present the highest risk; and initiatives aimed at maximizing the academic potential of children with kidney disease.

Pediatric liver disease.—The Committee urges the Institute to pursue opportunities to participate with the NIDDK and other Institutes on pediatric liver disease research, particularly in the areas of biliary atresia and non-alcoholic steatohepatitis.

Primary immunodeficiencies (PI).—The Committee continues to be impressed by the comprehensive commitment that the NICHD has shown in addressing PI, particularly with regard to the Institute's partnership with the Jeffrey Modell Foundation, the NCI, the NIAID, and the CDC on a national physician education and public awareness campaign. The Committee encourages the NICHD to continue and expand its involvement in this campaign.

Skeletal growth.—The committee encourages the NICHD to support research in abnormal and normal skeletal growth and development, including rickets and chronic under-nutrition, use of oral contraceptives and anabolic steroids, lactation, and pregnancy.

Specialized centers for research.—The Committee commends the NICHD for its innovative program of specialized centers for research in reproductive medicine at minority institutions.

Sudden Infant Death Syndrome.—The Committee is pleased with NICHD's continued efforts to extend the reach of its successful "Back to Sleep" campaign to underserved populations and daycare providers. The Committee also commends NICHD's attempts to further its progress in SIDS research by initiating a third SIDS 5-year research plan.

Traumatic brain injury (TBI).—The Committee commends the NICHD and the National Center for Medical Rehabilitation Research for their efforts in establishing a TBI clinical trials network to investigate the efficacy of rehabilitation services for TBI victims. The Committee supports further research by the Center to investigate methods of improving decision-making functions and related cognitive skills of TBI victims.

Urogynecology program.—The Committee is encouraged by the NICHD's accomplishments to date in establishing a research portfolio on pelvic floor disorders and urinary incontinence. The Committee encourages the Institute to fund grant applications for tissue structure, epidemiological studies, urinary incontinence, and clinical trials intervention programs. The Committee also encourages the NICHD to include the effects of pregnancy on a woman's chance for later urogynecologic problems in the future "National Children's Study."

Vulvodynia.—Research indicates that millions of American women suffer from vulvodynia, a painful and often debilitating disorder of the female reproductive system. Despite its prevalence, very little attention has been paid to the disorder by health professionals or researchers. Since fiscal year 1998, the Committee has called on the NICHD to support research on the prevalence, causes, and treatment of vulvodynia. While some initial steps have been taken, the Committee continues to be very concerned with the lack of research progress made in this important area and the lack of priority placed on it by the NICHD. The Committee expects the Institute to provide a significant increase in funding for research on vulvodynia.

NATIONAL EYE INSTITUTE

Appropriations, 2002	\$581,191,000
Budget estimate, 2003	629,990,000
Committee recommendation	634,290,000

The Committee recommends an appropriation of \$634,290,000 for the National Eye Institute [NEI]. This is \$4,300,000 more than the budget request and \$53,099,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NEI is the Nation's Federal resource for the conduct and support of laboratory and clinical research, research training, and other programs with respect to blinding eye diseases, visual disorders, mechanisms of visual function, preservation of sight, and the special health problems and needs of individuals who are visually impaired or blind. In addition, the NEI is responsible for the dissemination of information, specifically public and professional education programs aimed at the prevention of blindness.

The Committee is pleased that vision impairment is a priority area in the national Healthy People 2010 initiative. The Institute is urged to develop the data on the extent of the problem of eye disease, especially among the aging population, and the economic consequences of eye disease so progress in these areas can be measured.

Age-related macular degeneration.—Age-related macular degeneration (AMD) is the most common form of irreversible blindness for persons over the age of 65. More than 1.6 million Americans over age 50 suffer from AMD, and this number is expected to triple by the year 2020. NEI-supported research has demonstrated that early detection and treatment can slow the onset of this sight-threatening disease, thereby maintaining the independence and quality of life of the elderly. Therefore, the Committee encourages the NEI, through the National Eye Health Education Program (NEHEP), to launch an education and outreach program relating to AMD to increase public awareness about the need for early detection and diagnosis, recognition of symptoms, and treatments for the disease. The Committee likewise encourages the NEI to expand its intramural research efforts on this disease.

Bioengineering.—The Committee commends the NEI for its longstanding support for new technologies specifically aimed at improving the understanding of ocular and visual systems. The Committee encourages the NEI to continue its research in these critical areas and to expand its research in tissue bioengineering related to artificial corneas, adult stem cell research aimed at replacing or regenerating cornea tissue, and other applications of innovative technologies that will enhance or restore vision.

Diabetic eye diseases.—The Committee is pleased with the NEI's initiative to develop and evaluate more rapidly new treatments for macular edema through a new multi-center clinical trials network. The Committee is aware that diabetic retinopathy is the leading cause of new cases of blindness in this country. Diabetic macular edema, secondary to diabetic retinopathy, is a major cause of vision loss due to the leakage of fluids and other materials from damaged blood vessels. The Committee encourages the NEI to continue to implement the recommendations of the Diabetes Research Working Group related to diabetic eye disease.

Health disparities.—NEI-supported researchers have found that the prevalence of non-insulin-dependent diabetes mellitus (NIDDM) is two to three times higher in Hispanics than in non-Hispanic whites. The Committee is pleased with the NEI's progress in implementing its Spanish language education program "Ojo con su visión," and it encourages the NEI to continue its targeted health education activities and messages to increase

awareness of diabetes and its complications in the Hispanic population.

National Eye Health Education Program.—The National Eye Health Education Program (NEHEP) is coordinated by the NEI in partnership with over 60 national organizations that conduct eye health education programs. The Committee commends the NEI for its development of the Low Vision Education Program to increase awareness of low vision and its impact on the quality of life, particularly among African-American and Hispanic populations that are at increased risk of vision loss from sight-threatening diseases. The Committee is particularly pleased with “The Eye Site,” an award-winning traveling exhibit directed toward people with low vision, their families and friends, and health care and service professionals.

Neurodegenerative eye diseases.—The Committee is pleased to learn of the significant advances made in research on neurodegeneration across a range of eye diseases, including retinitis pigmentosa, ocular albinism, macular degeneration, and glaucoma. In light of these developments, the Committee urges the NEI to increase its support and conduct of research on these neurodegenerative eye diseases, including support for genomic and proteomic resources and for collaborative multidisciplinary research.

Sjögren's syndrome.—The Committee commends the NEI for supporting grants in dry eye and Sjögren's-related research and encourages continued investigation into improved therapeutics for dry eye. An important initial step in dry eye research and Sjögren's is obtaining epidemiology data, and the Committee encourages the NEI to pursue this research.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

Appropriations, 2002	\$566,118,000
Budget estimate, 2003	614,258,000
Committee recommendation	617,258,000

The Committee recommends an appropriation of \$617,258,000 for the National Institute of Environmental Health Sciences [NIEHS]. This is \$3,000,000 more than the budget request and \$51,140,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The mission of the NIEHS is to define how environmental exposures affect health; how individuals differ in their susceptibility to these effects; and how these susceptibilities change with time. This knowledge, coupled with prevention and communication programs, can lead to a reduction in environmentally associated diseases and dysfunctions.

Environmental Health Sciences Centers.—The Committee continues to strongly support the Environmental Health Sciences Centers program and believes that a fully funded centers program is critical to carrying out the expanding mission of the NIEHS. The Committee strongly urges the Institute to maintain the centers' current funding levels.

Hormone-disrupting chemicals.—The Committee encourages the NIEHS to enhance research on the health effects of exposure to hormone-disrupting chemicals. The committee also encourages the NIEHS to collaborate with the Centers for Disease Control and Prevention, the United States Geological Survey, the Environmental Protection Agency, and other appropriate agencies in this effort. This collaboration will contribute to a better understanding of how hormone-disrupting chemicals lead to the development of reproductive, nervous, and immune system disorders, and cancer, particularly as a consequence of pre-natal exposures.

Volcanic emissions.—The Committee continues to be concerned about the public health aspects of volcanic emissions in Hawaii. Such emissions present significant acute and long-term health problems, and the Committee urges the development of a multidisciplinary approach to this problem.

NATIONAL INSTITUTE ON AGING

Appropriations, 2002	\$893,130,000
Budget estimate, 2003	968,699,000
Committee recommendation	1,000,099,000

The Committee recommendation includes \$1,000,099,000 for the National Institute on Aging [NIA]. This is \$31,400,000 more than the budget request and \$106,969,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIA conducts biomedical, behavioral, and social research related to the aging process to prevent disease and other problems of the aged, and to maintain the health and independence of older Americans. Research in aging over the last two decades demonstrates that aging should not be equated with inevitable decline and disease.

Age-related bone diseases.—The committee encourages the NIA to coordinate research with NIAMS into age-related changes in bone and the skeleton, including osteoporosis, osteogenesis imperfecta, and Paget's disease.

Alzheimer's disease.—An estimated 4 million Americans now suffer from Alzheimer's disease, a degenerative brain disorder that robs its victims of the ability to care for themselves; places enormous physical, emotional and financial burdens on family caregivers; and each year drains \$100,000,000,000 from our economy. Left unchecked, an estimated 14 million individuals will be stricken over the next few decades, while the annual cost of caring for Alzheimer's victims will soar to \$375,000,000,000. The Committee 3 years ago challenged the NIH and the scientific community to launch a full-scale assault on Alzheimer's disease that focuses on preventing or delaying its onset. The NIA responded by embarking on a multi-Institute prevention initiative that encompassed basic, epidemiological, behavioral and clinical research. As a result of these efforts, science is now at the point where effective treatment and prevention of the disabling effects of Alzheimer's are within reach. In light of the dramatic strides that have already been made in understanding Alzheimer's disease, scientists believe that an investment of \$1,000,000,000 as soon as possible will produce the answers necessary to conquer Alzheimer's. The Committee urges the NIA to expand its investment in Alzheimer's disease research, focusing especially on its pathology, the identification of risk factors, more effective treatments, and large-scale clinical trials. In addition, advances in genetics and imaging now make it possible to study Alzheimer's in ways that were never before possible. The Committee encourages the NIA to apply this new knowledge to ongoing longitudinal studies.

The Committee also urges the NIA to focus on early detection of Alzheimer's disease so that clinical interventions to slow or stop the progression of the disease may be undertaken. The Committee notes that positron emission tomography (PET) may identify Alzheimer's disease at an early stage and encourages the NIA, in collaboration with the NINDS and the NIMH, to expand its research efforts into early diagnosis of Alzheimer's using PET and other brain imaging methods.

Behavioral research.—The Committee recognizes the NIA's efforts to spur research on aging and cognitive function, and it urges

the Institute to focus on the many difficult questions involved in long-term maintenance of positive behavior change. The Committee applauds efforts in the Behavioral and Social Research branch to encourage multidisciplinary and interdisciplinary behavioral economics research that may address questions of savings and resource allocation in the pre- and post-retirement populations.

Cardiovascular aging research.—Cardiovascular diseases remain America's leading causes of death of older men and women and a significant cause of disability. The Committee urges the NIA to make cardiovascular research a priority.

Claude D. Pepper Older American Independence Centers.—The Committee continues to strongly support these successful centers, which focus on developing innovative and cost effective ways to enhance the independence of older Americans. The centers also play the critical role of developing top level experts in geriatrics. The Committee strongly urges the NIA to make all possible efforts to expand these centers to include a school of nursing.

Demographic and economic research.—The Committee commends the NIA for its demography and economic research. It is impressed by the importance of the findings from the Health and Retirement Study and the National Long Term Care Survey regarding the continuing decline in physical and cognitive disability. The Committee urges the NIA to expand funding for these studies and to explore the economic and social impact of the decline for families and society. The Committee also encourages the NIA to assess the role of health as a factor in premature retirement.

Older Americans with mental illness.—The Committee is concerned about the growing population of older Americans who suffer from mental illness. This is often an underserved population, particularly in rural areas. The Committee encourages the NIA to target funds to study and identify vulnerable older adults who are at risk for such mental illnesses as depression, anxiety, and psychoses. Because advanced practice psychiatric nurses work in a variety of settings, the Committee believes they may be in a unique position to be a critical component of research related to the assessment and treatment of older adults with these disorders.

NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL AND SKIN DISEASES

Appropriations, 2002	\$448,699,000
Budget estimate, 2003	486,624,000
Committee recommendation	489,324,000

The Committee recommends an appropriation of \$489,324,000 for the National Institute of Arthritis and Musculoskeletal and Skin Diseases [NIAMS]. This is \$2,700,000 more than the budget request and \$40,625,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—NIAMS conducts and supports basic and clinical research and research training, and the dissemination of health information on the more than 100 forms of arthritis; osteoporosis and other bone diseases; muscle biology and muscle diseases; orthopedic disorders, such as back pain and sports injuries; and numerous skin diseases. The research agenda of NIAMS addresses many devastating and debilitating diseases that afflict millions of Americans. These diseases of the joints, muscles, bones, connective tissues, and skin, in the aggregate, will affect nearly every American at some point in their lives, causing tremendous human suffering and costing the Nation billions of dollars in both health care and lost productivity. The research activities of this Institute serve the concerns of many different

special populations, including women, minorities, children, and the elderly.

Duchenne muscular dystrophy.—The Committee commends NIH for initiating the muscular dystrophy cooperative research centers. These centers will support interdisciplinary teams of accomplished investigators undertaking basic and clinical research to improve treatment options for patients with Duchenne and Becker muscular dystrophy. The Committee expects NIAMS to work cooperatively with NINDS and NICHD to expand the research undertaken by the centers program.

Gender differences in musculoskeletal biology.—Recent scientific advances have begun to make it possible to understand underlying gender-dependent differences that contribute to differences in disease incidence and severity between males and females. Osteoarthritis, rheumatoid arthritis, and osteoporosis are expressed to a greater extent in females. The Committee encourages NIAMS to work to identify the extent of these gender differences in musculoskeletal disorders and develop a plan for addressing the questions that require further research.

Marfan syndrome.—Marfan syndrome is a life-threatening genetic disorder affecting several organ systems including musculoskeletal, cardiovascular and ophthalmologic systems. To further boost research in this area, the Committee encourages NIAMS to consider all available mechanisms of funding for research on Marfan syndrome. The Committee commends NIAMS for taking the lead role in the vital support of research on heritable disorders of connective tissue, which include Marfan syndrome. The Committee is pleased to note that NIAMS has issued a Request for Applications for heritable disorders of connective tissue.

Metabolic bone diseases.—The Committee urges NIAMS to enhance its research into all metabolic bone diseases, to support research that applies new developments in genomics and proteomics to osteoporosis and related bone diseases, and to conduct large-scale clinical trials to determine whether agents that prevent bone loss reduce fracture risk in women with low bone mass.

Osteogenesis imperfecta.—The Committee encourages the Institute to pursue new osteogenesis imperfecta (OI) research opportunities arising out of the 2002 scientific workshop on OI, including life-threatening respiratory and cardiovascular problems related to osteogenesis imperfecta.

Scleroderma.—The Committee is encouraged by the NIAMS's growing interest in scleroderma, a chronic and progressive disease that predominantly strikes young women. More research is critically needed to identify the genetic risk factors for scleroderma and to develop safe and effective treatments. The Committee encourages the NIAMS to collaborate with other Institutes, including the NHLBI, NIDDK, and NIDCR, to generate more comprehensive research opportunities for scleroderma.

Skeletal repair.—The Committee encourages NIAMS to explore the stimulation of skeletal repair by biophysical agents including mechanical strain, ultrasound, and electrical energy. This research would be valuable to interdisciplinary interests including trauma, aging, rehabilitation and exercise physiology, and tissue engineering.

Temporomandibular joint disorders (TMJ).—The Institute is urged to initiate research on the unique features of the temporomandibular joint as well as explore to what extent temporomandibular diseases and disorders share common pathogenic mechanisms with osteoarthritis in other joints and musculoskeletal pain. The recommendations from the recent TMJ Association meeting on joint and muscle dysfunc-

tion of the TMJ, which NIAMS co-sponsored, can serve as guidance for the NIAMS TMJ research agenda.

Tissue reengineering.—There is growing interest in the possibility that tissue engineering will provide a biological solution to the critical clinical need for organs and tissues. The Committee encourages NIAMS to consider holding a workshop to help educate clinicians, who can apply the advances to patients, about this new field.

NATIONAL INSTITUTE ON DEAFNESS AND OTHER COMMUNICATION DISORDERS

Appropriations, 2002	\$341,965,000
Budget estimate, 2003	370,805,000
Committee recommendation	372,805,000

The Committee recommends an appropriation of \$372,805,000 for the National Institute on Deafness and Other Communication Disorders [NIDCD]. This is \$2,000,000 more than the budget request and \$30,840,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIDCD funds and conducts research and research training in the normal and disordered processes of human communication, specifically in the areas of hearing, balance, smell, taste, voice, speech, and language. The Institute addresses the special biomedical and behavioral problems of people who have communication impairments or disorders; contributes to health promotion and disease prevention; and supports efforts to create devices that substitute for lost and impaired sensory and communication functions.

Dysphonia.—The Committee continues to be pleased with the NIDCD's expanding intramural research program with respect to dysphonia. The Committee encourages the NIDCD to explore possibilities for a more active extramural research effort on dysphonia, and collaboration with other NIH Institutes on this important disorder.

Early detection and intervention.—The Committee supports expanded research on the early detection, diagnosis, and intervention of infants with deafness and other communication disorders, as well as on new intervention strategies to prevent otitis media and other childhood causes of hearing loss.

Genetic deafness.—The Committee encourages the NIDCD to conduct research into the genetic basis for normal and disordered communication, especially auditory system proteomics, and into interventions that prevent or treat genetic deafness.

Hair cell regeneration.—The Committee urges NIDCD to give a high priority to new and important directions for inner ear hair cell regeneration.

Hearing devices.—The Committee encourages the NIDCD to expand research that would improve the benefits of cochlear prostheses and improve remediation of less-than-profound hearing loss through hearing aids and/or new prostheses and drug-delivery systems.

Language acquisition.—The Committee encourages the NIDCD to explore the biological bases and genetics of language, as well as infant speech perception and language acquisition. It also encourages the Institute to develop clinical applications such as genetic screening for all communication disorders.

Noise-induced hearing loss.—The Committee continues to be concerned by the number of Americans who suffer from noise-induced hearing loss. The NIDCD's Wise Ears! campaign has the potential to make significant inroads towards educating Americans of all ages, and the Committee strongly supports its expansion.

Presbycusis.—Presbycusis, the gradual loss of hearing from aging, will become more

common as the Nation's population grows older. The Committee encourages research on the central and peripheral mechanisms leading to presbycusis hearing loss and on strategies that would prevent hearing loss in our senior population.

Preventing hearing loss.—The Committee supports expanded research on prosthetic and pharmacological therapies for hearing loss from noise stress, ototoxic drugs and other traumas.

Tinnitus.—The Committee encourages the Institute to expand its research into mechanisms underlying peripheral and central tinnitus.

NATIONAL INSTITUTE OF NURSING RESEARCH

Appropriations, 2002	\$120,428,000
Budget estimate, 2003	130,438,000
Committee recommendation	131,438,000

The Committee recommends an appropriation of \$131,438,000 for the National Institute of Nursing Research [NINR]. This is \$1,000,000 more than the budget request and \$11,010,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The National Institute of Nursing Research [NINR] supports clinical and basic research on biological and behavioral aspects of critical national health problems. The Institute's programs have established a scientific basis for research that seeks to reduce the burden of acute and chronic illness and disability for individuals of all ages; improve the quality of life by preventing and delaying the onset of disease or slowing its progression; and establishing better approaches to promoting health and preventing disease. The NINR supports programs essential to improving clinical environments by testing interventions which influence patient health outcomes and reduce costs and demands for care.

Adolescent research intervention.—Adolescents are prone to risky behaviors that endanger their present and future health, such as smoking, eating unhealthy foods, excessive drinking of alcohol, and physical inactivity. The Committee supports the NINR's research interventions that address multiple risks across adolescent populations and settings, such as school, work, and the community, to reduce youthful risk-taking and its consequences.

Alzheimer's disease.—The Committee is pleased that the NINR plans to expand research on long-term care recipients' health care needs and interventions. Working in collaboration with the NIA and other Institutes, the NINR is playing a critical role in improving care for individuals with Alzheimer's disease through research aimed at maintaining functional mobility and preventing complications from co-occurring illnesses, excess disability, and premature decline.

Collaboration with NIMH.—The Committee acknowledges the long-term mentorship program established by NINR in collaboration with the National Institute of Mental Health to prepare mental health nurses with the skill sets required for competitive research proposals to the NIH. The Committee recommends continued collaboration with NIMH to generate initiatives.

Health disparities.—The Committee commends the NINR for its active role in research to abolish health disparities and urges continued emphasis, particularly in light of findings that the health care of minorities, even those who are insured, is lower in quality. The NINR's efforts to build community partnerships for research on key health issues that are identified by the minority community members themselves are an important step in the right direction.

Family caregivers.—The Committee commends the NINR for its research to assist the Nation's estimated 24 million to 27 million family caregivers, who provide an average of 18 hours of unpaid care a week to their ill relatives. The Committee is encouraged by findings showing that nursing interventions can improve caregiver skill levels, morale, and quality of life, and it supports enhanced research in this area. The Committee is also pleased that the NINR is expanding caregiver research directed at professional caregivers who serve those residing in nursing homes and in assisted living facilities.

Juvenile diabetes.—The Committee is aware of reports of adolescents with juvenile diabetes engaging in behavior that will accelerate damaging complications, such as neglecting to take insulin for purposes of weight loss. The Committee encourages the NINR to increase its attention to adolescents with juvenile diabetes, specifically regarding consequences of the disease's psychological impact. In addition, the Committee is aware of the important role that Ph.D. nurses play in research to find cures for diseases such as juvenile diabetes. The Committee encourages the Institute to expand measures to increase the numbers of Ph.D. nurses.

Nursing shortage.—The Committee is very concerned about the shortage of nurses. The NINR's efforts to build nursing research capacity are essential to ensure a sufficient supply of well-prepared investigators to address the health needs of tomorrow. The Committee encourages the NINR to implement programs that bring students into the research stream at a younger age and to diversify research and training opportunities in reaching out to minorities.

Palliative care.—The Committee commends the NINR for its efforts to advance the science of end-of-life/palliative care, and it encourages continued emphasis and expansion.

NATIONAL INSTITUTE ON ALCOHOL ABUSE AND ALCOHOLISM	
Appropriations, 2002	\$384,071,000
Budget estimate, 2003	416,773,000
Committee recommendation	418,773,000

The Committee recommends an appropriation of \$418,773,000 for the National Institute on Alcohol Abuse and Alcoholism [NIAAA]. This is \$2,000,000 more than the budget request and \$34,702,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIAAA conducts biomedical and behavioral research for improving prevention and treatment and reducing or eliminating the associated health, economic, and social consequences of alcohol abuse and alcoholism. NIAAA provides leadership in the country's effort to combat these problems by developing new knowledge that will decrease the incidence and prevalence of alcohol abuse and alcoholism and associated morbidity and mortality. NIAAA addresses these questions through an integrated program of biomedical, behavioral, and epidemiologic research on alcoholism, alcohol abuse, and related problems. This broad-based program includes various areas of special emphasis such as medications development, fetal alcohol syndrome, genetics, neuroscience and moderate drinking.

Alcohol treatment services.—Given the rapid growth of managed behavioral health care, the Committee is concerned that more needs to be known about how alcohol treatment services are delivered under managed care arrangements and the specific characteristics of behavioral health components of the health insurance plans and managed care or-

ganizations. The Committee continues its support of the NIAAA Advisory Council's comprehensive plan for health services, particularly its recommendation to prioritize research to understand the effects of managed care on treatment services. The Committee acknowledges the NIAAA's progress in implementing this recommendation, and it encourages the Institute to consider supporting additional research in this area.

Alcoholic liver disease.—Alcoholic liver disease remains a major cause of morbidity and mortality in the United States. The Committee notes that recent research suggests that free radicals are a principal vehicle through which alcohol damages the liver, and that antioxidants look increasingly promising as a potential treatment. The Committee encourages the Institute to expand its research on alcoholic liver disease, particularly regarding the interaction between hepatitis C and alcohol in liver disease.

Brain mapping and organ imaging in alcoholism.—The Committee notes the rapid progress made through advanced imaging technology in mapping the brain pathways that are involved in alcohol addiction and alcohol-related brain damage. The Committee urges the Institute to expand research on brain mapping in alcoholics. Where possible, the Institute should collaborate with the NIBIB and other NIH Institutes and agencies on the development of advanced instrumentation to further the understanding of alcohol dependence and alcohol-related medical disorders.

College drinking.—The Committee applauds the NIAAA Task Force Report on College Drinking—"A Call To Action: Changing the Culture of Drinking at U.S. Colleges"—especially its goal of providing university and college presidents, policymakers, and researchers with information and recommendations on the effectiveness of current interventions and encouraging them to embrace rigorous research-based solutions. The Committee is pleased that the NIAAA website Collegedrinkingprevention.gov has over 2 million hits and has received over 15 awards since it appeared in April, reflecting the concern and interest in this national public health problem. The Committee believes the Task Force's proposed research-based recommendations should be implemented in as many colleges and universities as soon as possible.

Health disparities.—Evidence suggests that alcohol affects genders and subpopulations differently, and that some groups suffer more adverse effects than others. The Committee encourages the Institute to work collaboratively with the NCMHD to study the role of gender, ethnicity, socioeconomic status, and other variables in determining the effects of alcohol use and abuse.

Identification of molecular targets of alcohol in the brain.—The Committee notes the success of NIAAA-funded investigators in identifying molecular targets of alcohol in the brain. The characterization of these targets may lead to the discovery of compounds that block specific effects of alcohol. The Committee is pleased to learn that this strategy has led to the prevention of alcohol-related birth defects in mice, and it encourages the Institute to stimulate additional research on the molecular basis for the actions of alcohol.

Longitudinal studies.—The Committee encourages the Institute to undertake longitudinal studies that recruit subjects in early adolescence to examine gene-environment interactions impacting alcohol abuse and alcoholism during the course of an individual's life. The Institute is encouraged to partner with other institutes, agencies and organizations deemed appropriate, including the NICHD and SAMHSA.

Medications development for alcoholism treatment.—The Committee is aware of advances in the understanding of how genetics and environment influence the response to alcohol. The Committee urges the Institute to encourage studies on the influence of psychological and social factors on the success of treatment, and develop new medications for the treatment of alcoholism and alcohol-related disorders.

Multidisciplinary research on fetal alcohol syndrome.—The Committee recognizes that fetal alcohol syndrome is among the most common preventable cause of mental impairment. The Committee supports the Institute's efforts to understand the biological mechanisms through which alcohol causes damage to the developing fetus. The Committee also urges the Institute to aggressively pursue research that will lead to effective strategies for the prevention and treatment of fetal alcohol syndrome.

Native Alaskans.—The Committee is aware of serious problems with alcohol and substance abuse among Native Alaskans and of the need for translating research into clinical applications for this population. The Committee urges the NIAAA to sponsor a Research to Practice Forum to focus on bridging the gap between researchers and practitioners and translating scientific research into clinical applications, and to support the implementation of any recommendations developed at the forum.

Prevention of alcohol abuse in adolescents.—The Committee is very concerned about the increasing number of alcohol-related deaths on college campuses and increasing alcohol use among elementary and secondary school-aged children. The Committee urges the Institute to pursue collaborations with other Institutes, such as the NICHD and NIMH, to study the causes of alcohol abuse among this age group and to devise strategies for effective prevention and intervention.

NATIONAL INSTITUTE ON DRUG ABUSE	
Appropriations, 2002	\$887,733,000
Budget estimate, 2003	964,613,000
Committee recommendation	968,013,000

The Committee recommends an appropriation of \$968,013,000 for the National Institute on Drug Abuse [NIDA]. This is \$3,400,000 more than the budget request and \$80,280,000 more than the fiscal year 2002 appropriation. The comparable numbers for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—Created in 1974, NIDA supports about 85 percent of the world's biomedical research in the area of drug abuse and addiction. The Committee commends NIDA for demonstrating through research that drug use is a preventable behavior and that addiction is a treatable disease. NIDA's basic research plays a fundamental role in furthering knowledge about the ways in which drugs act on the brain to produce dependence, and contributes to understanding how the brain works. In addition, NIDA research identifies the most effective pharmaceutical and behavioral drug abuse treatments. NIDA conducts research on the nature and extent of drug abuse in the United States and monitors drug abuse trends nationwide to provide information for planning both prevention and treatment services. An important component of NIDA's mission is also to study the outcomes, effectiveness, and cost benefits of drug abuse services delivered in a variety of settings and to assure dissemination of information with respect to prevention of drug abuse and treatment of drug abusers.

Collaboration with SAMHSA and other agencies.—The Committee encourages NIDA to continue to collaborate with SAMHSA and

other agencies to bridge the existing gap between research and practice. The Committee is pleased that NIDA plans to support CSAT's Addiction Technology Transfer Centers. The Committee believes that this collaborative effort will have a significant impact on how communities receive and develop the skills, systems, and necessary support to implement new research findings.

Community-friendly behavioral therapies.—Research-based behavioral treatments are often criticized as too lengthy, costly, complex, or difficult for treatment providers to integrate with more traditional methods of care. The Committee applauds NIDA's efforts to remedy this situation by developing and bringing behavioral therapies to community treatment centers. NIDA is urged to encourage researchers to make behavioral treatments more "community friendly," while still maintaining their effectiveness. The Committee is pleased that NIDA has expanded the scope of its research beyond testing new treatments to include studies on financing and organizational adaptation and change. The Committee encourages NIDA to continue testing new treatments in clinical trials and supporting research on how to move effective treatments into health care systems.

Hepatitis C treatment.—The Committee notes the high incidence of hepatitis C among the U.S. population that uses drugs. Research into the efficacy of treating such individuals for hepatitis C concurrently with drug dependency protocols such as methadone is highly recommended.

Information dissemination.—The Committee urges NIDA to use both the existing National Drug Abuse Treatment Clinical Trials Network infrastructure and the new prevention infrastructures that are currently being established as part of NIDA's new Prevention Research Initiative to ensure that findings are put into practice in communities across the country.

Methamphetamine.—The Committee continues to be concerned about methamphetamine abuse across the Nation, especially in the Midwest. The Committee again urges NIDA to expand its research on improved methods of prevention and treatment of methamphetamine abuse.

Nicotine.—The Committee applauds NIDA's efforts to support a comprehensive research portfolio that has indisputably demonstrated the addictive nature of nicotine. The Committee encourages NIDA to work independently and, where possible, collaborate with other Institutes and organizations to identify and develop targets for new treatments. The Committee recognizes that treating addiction to nicotine remains among the most cost-effective approaches to reducing cancer risk.

Prevention research.—The Committee is pleased that NIDA has launched a multi-component National Prevention Research Initiative that will involve partners at the State and local levels. The Committee urges NIDA to expand this initiative to test the effectiveness of new and existing science-based prevention approaches in different communities, while also studying how best to adapt the programs for local needs.

Stress and substance abuse.—Stress plays a major role in the initiation and continuation of drug use, and in relapse to addiction. The Committee encourages the NIDA to increase its research portfolio on this topic as well as on post-traumatic stress disorder and substance abuse.

Translating basic research.—NIDA's strong basic research foundation has provided great insight into the addiction process and has helped identify molecular targets for the development of medications as well as new behavioral treatment strategies as well. The

Committee urges NIDA to use translational research to continue to rapidly bring knowledge from the lab into clinical practice.

NATIONAL INSTITUTE OF MENTAL HEALTH

Appropriations, 2002	\$1,238,093,000
Budget estimate, 2003	1,343,088,000
Committee recommendation	1,350,788,000

The Committee recommends an appropriation of \$1,350,788,000 for the National Institute of Mental Health [NIMH]. This is \$7,700,000 more than the budget request and \$112,695,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The research programs of the Institute lead the Federal effort to identify the causes of—and the most effective treatments for—mental illnesses, which, according to a report recently issued by the Surgeon General of the United States, afflict more than one in five American adults. One result of the Federal research investment has been a growing awareness that undiagnosed and untreated mental illness, in all its forms and with all of its consequences, is as damaging as physical illness to the Nation's well-being.

Alzheimer's disease.—The NIMH continues to play an important part in efforts to develop effective treatment strategies for Alzheimer's disease. Already underway is a large-scale, multi-site study to identify the best medication treatment strategies for the behavioral problems that co-occur in Alzheimer's. In addition, the NIMH's newly formed Aging Workgroup has undertaken an exhaustive review of its current aging-related research portfolio, with a view toward enhancing coordination and collaboration with other NIH institutes. The Committee is pleased with the steps the NIMH has already taken, and it encourages the Institute to continue its efforts to reduce the psychiatric burden of Alzheimer's disease, including research into the relationship between Alzheimer's and depression.

Autism.—The Committee notes that, under the leadership of the NIMH, the NIH has quickly carried out the provisions of the Children's Health Act with respect to establishing autism centers of excellence and the Interagency Autism Coordinating Committee. The Committee is also encouraged by grants from the NIMH to investigate treatment options, including pharmaceutical research targeting the unique needs of the autism community in both children and adults. The Committee urges the NIMH to continue to fund behavioral and clinical research as well as other promising areas of research related to autism spectrum disorders.

Borderline personality disorder (BPD).—The Committee understands that failure to recognize and adequately treat BPD can have devastating consequences such as substance abuse, domestic violence, and even suicide. The Committee urges the NIMH to expand its research on this disease.

Elderly mental health.—The Committee is concerned that despite substantial funding increases for the NIMH in recent years, the Institute's sponsorship of extramural research on the mental health of the elderly has not kept pace with its funding of research for other populations. Therefore, the Committee urges the NIMH to expand research in this area through all available mechanisms.

Fragile X.—Fragile X causes cognitive impairment, mental disorders such as obsessive-compulsive disorder, and extreme anxiety. The Committee urges the NIMH to conduct research on the neurobiological basis of Fragile X, characterize the mental health symptoms of Fragile X, and investigate effective treatments and promising new

psychopharmacologic interventions that target those symptoms. The Committee also urges the NIMH to include Fragile X in its studies of related neuropsychiatric disorders and to work with other Institutes such as the NICHD and the NINDS to develop cooperative research support mechanisms in this area.

Frontier mental health needs.—The Committee commends the NIMH on its outreach efforts to determine the differences in mental health needs which may exist in remote frontier communities. The Committee encourages the NIMH to expand its research efforts into these communities, which are often ignored in research projects but which continue to suffer from high incidences of mental health problems.

Health disparities.—The Committee is encouraged by the NIMH's efforts to determine the causes for the disproportionate impact of mental disorders on racial and ethnic minority groups and to investigate methods of addressing and alleviating health disparities based on race and ethnicity. The Committee urges the NIMH to act on its strategic goals to achieve a more ethnic and racially diverse pool of mental health investigators through minority-focused training and career development mechanisms; to ensure inclusion of minority groups in clinical trials funded by the NIMH; to obtain an accurate measurement of the extent of mental health disparities across communities of color; and to use basic behavioral science to determine cultural differences in stress, coping and resilience.

Major Depression and Bipolar Disorder.—More than 20 million children and adults in the Nation are affected by major depression or bipolar disorder, and depression has been shown to be a leading cause of disability worldwide. Depression and bipolar disorders are also prominently associated with suicide. The Committee is aware that the NIMH has developed "Breaking Ground, Breaking Through: The Strategic Plan for Mood Disorders Research" in consultation with nationally recognized scientific experts, members of the National Advisory Mental Health Council, and representatives of consumer groups. This plan summarizes the current state of the science on major depression and bipolar disorder across the life span, provides a vision of achievable scientific goals, and recommends research priorities. It also addresses the causes, diagnosis, and improvement of interventions at the level of individual patients and service systems, as well as prevention. The Committee encourages the NIMH to continue its efforts to understand, treat, and prevent these illnesses.

Native Hawaiians.—The Committee remains concerned that Native Hawaiians and other Native American Pacific Islanders continue to suffer disproportionately from mental health problems. The NIMH is encouraged to continue its efforts to address this area.

Portfolio balance.—The Committee commends the NIMH for a balanced approach to research that includes basic neuroscience, behavioral science, health services research and clinical research. The Committee applauds, for example, the NIMH's leadership in working quickly to address urgent public health problems. NIMH research has shown that, for some individuals, exposure to violent or traumatic events can result in very significant mental health repercussions. Recent school violence and the events of September 11, 2001, have proven that this information is crucial and directly applicable. The Committee supports the NIMH's determination to speed the translation of research results into practical societal benefits, including improved mental health services for those who need them.

Translating behavioral and social sciences research.—The Committee supports

translational research in the behavioral and social sciences to address how basic behavioral processes inform the diagnosis, treatment, and delivery of services for patients, particularly for young people, with mental disorders. To further the translation of research knowledge into practice, the Committee encourages ongoing collaboration between the NIMH and the Substance Abuse and Mental Health Services Administration to reduce the current lag time between the discovery of an effective treatment or intervention and its availability at the community level. The Committee also promotes the establishment of translational behavioral research as a priority funding area for the NIMH.

NATIONAL HUMAN GENOME RESEARCH INSTITUTE
Appropriations, 2002 \$429,312,000
Budget estimate, 2003 463,137,000
Committee recommendation 468,037,000

The Committee recommendation includes \$468,037,000 for the National Human Genome Research Institute [NHGRI]. This is \$2,900,000 more than the budget request and \$38,725,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NHGRI coordinates extramural and intramural research as well as research training for the NIH component of the Human Genome Project, an effort to determine the location and sequence of the estimated 30,000 to 40,000 genes which constitute the human genome. The Division of Extramural Research supports research on genetic sequences of both human and non-human genomes, DNA sequencing technology development, database management and analysis, and studies of the ethical, legal, and social implications of human genome research. The Division of Intramural Research focuses on applying the tools and technologies of the Human Genome Project to understanding the genetic basis of disease and developing DNA-based diagnostics and gene-based therapies. Since its establishment, the intramural program has developed a strong research program in collaboration with several other NIH Institutes to study and better understand rare and complex genetic diseases such as diabetes, heart disease, breast cancer, colon cancer, and melanoma.

The Committee notes that during fiscal year 2003, the field of genetics will observe a major anniversary, and the National Human Genome Research Institute (NHGRI) will reach an unprecedented accomplishment. Fifty years ago, in April of 1953, Drs. James D. Watson and Francis Crick reported the discovery of the double helix structure of DNA, a landmark achievement in the annals of scientific research. In 2003 the Human Genome Project expects to complete the final DNA sequence of the human genome, in time for the 50th anniversary of the Watson-Crick paper. The Committee commends the NHGRI for completing the Human Genome Project both years ahead of schedule and under budget. While we have now entered the era in which science begins to unravel the great mystery of the human genome in order to understand the function of each of our genes, completely understanding that mystery will clearly take many more years of discovery.

The Committee is pleased that even as it completes the sequence of the human genome, the NHGRI is planning for the future of genomic science and of the institute. The Committee encourages consultation with outside experts in such fields as genetics, genomics, medicine, biotechnology, the law, social policy and ethics as a way to prepare for the future. The development of a specific and bold new research plan for the NHGRI

will certainly ensure continued scientific advances and greatly assist the Congress as it sets funding priorities in the coming years.

Behavioral research.—Recent research has revealed that different genes can be turned on or turned off at different points in a person's life. Understanding what events or behaviors influence gene expression is an important frontier of scientific knowledge. The Committee encourages the NHGRI to develop collaborations with other Institutes and the Office of Behavioral and Social Sciences Research to support integrative research aimed at understanding the role of environmentally induced gene expression in the course of disease and in the promotion of health.

Epilepsy.—The Committee encourages the Institute to continue to intensify its efforts to identify epilepsy genes for the more than 40 different types of epilepsy, and to assist the NINDS in the search for a genetic fingerprint diagnostic test aimed at improving drug therapy for epilepsy. The Committee further encourages the Institute to coordinate efforts with the NINDS to create a national consortium to identify new epilepsy susceptibility genes through a large-scale genotype: phenotype screen. The Committee urges the Institute to continue to make epilepsy research a priority and to coordinate research efforts with other Institutes through the Interagency Epilepsy Coordinating Committee.

Haplotype map.—The Committee supports the development of a “haplotype map” of the human genome, if possible through a public-private partnership. This comprehensive resource for human biomedical research will capture the complete catalogue of the common genome ancestral segments (“haplotype blocks”) observed in human populations. This map will provide a new tool for scientists to scan the entire genome and identify more rapidly and effectively those genetic variations associated with disease risk and drug response in the human population. That, in turn, will help researchers develop an understanding of the complex biological processes that give rise to disease and assist scientists in discovering preventive measures, treatments and cures for these illnesses. The haplotype map and similar tools will help genomic science bridge the gap from basic science to applications for human health.

Non-human genomes.—The Committee endorses the rigorous scientific process that the NHGRI has developed for selection of non-human genomes to sequence using NHGRI-supported sequencing capacity. This peer review process, whereby investigator- or community-initiated proposals are submitted for consideration by the NHGRI, ensures that organisms for genomic sequencing will be selected on the basis of specific, well-defined scientific goals, taking advantage of the rigor, robustness and fairness provided by scientific discussion and peer evaluation.

The Committee is pleased that the NHGRI has indicated its interest in sequencing the cow and chicken genomes. The Committee encourages the Institute's efforts to expand genome sequencing to other mammalian and avian genomes, and to ensure that sequence information of these species is made publicly available to all without restriction.

Privacy.—The Committee remains concerned about the proper use of genetic information and encourages the NHGRI's ongoing efforts, though its ELSI program, to examine the privacy and fair use of genetic information. Other important issues related to human genetics research and its consequences should also be studied, including: the appropriate use of genetic tests; the protection of human subjects who participate in genetic research; the development of policies to guide research into genetic variation; and

complex social issues, such as how genetics informs concepts of race and ethnicity.

Type 1 Diabetes Genetics Consortium.—The Committee is aware of the development of a Type 1 Diabetes Genetics Consortium, which will collect and share valuable DNA information from juvenile diabetes patients from studies around the world. The Committee encourages the NHGRI to collaborate with the NIDDK in efforts to determine the genetic origins of juvenile diabetes by directing resources towards this important initiative.

NATIONAL INSTITUTE OF BIOMEDICAL IMAGING AND BIOENGINEERING

Appropriations, 2002	\$261,951,000
Budget estimate, 2003	271,200,000
Committee recommendation	283,100,000

The Committee recommends an appropriation of \$283,100,000 for the National Institute of Biomedical Imaging and Bioengineering [NIBIB]. This is \$11,900,000 more than the budget request and \$21,149,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NIBIB improves health by promoting fundamental discoveries, design and development, and translation and assessment of technological capabilities in biomedical imaging and bioengineering, enabled by relevant areas of information science, physics, chemistry, mathematics, materials science, and computer sciences. The Institute plans, conducts, fosters, and supports an integrated and coordinated program of research and research training that can be applied to a broad spectrum of biological processes, disorders and diseases and across organ systems. The Institute coordinates with the biomedical imaging and bioengineering programs of other agencies and NIH Institutes to support imaging and engineering research with potential medical applications and facilitates the transfer of such technologies to medical applications.

The Committee recognizes the contribution bioengineering brings to medicine. Bioengineering improves the quality of life through its contribution to advances in science and technology related to health. The Committee understands that this newly created Institute must have adequate resources to begin its important task of supporting high-quality research.

Juvenile diabetes.—The Committee is aware that imaging and bioengineering technologies could have widespread applications for the treatment and prevention of diseases and conditions such as juvenile diabetes. The Committee encourages the NIBIB to collaborate with the NIDDK on the development and application of imaging technologies to evaluate and track the progress of biologic events non-invasively, specifically the investigation and monitoring of beta cell destruction during the onset of juvenile diabetes and indications of graft rejection following the transplantation of whole organs, tissue, or cells. The Committee also encourages the Institute to collaborate with the NIDDK to develop non-invasive metabolic sensor technologies for the monitoring of glucose and metabolism in individuals with juvenile diabetes.

Molecular imaging technologies.—The Committee encourages the Institute to provide increased funding for molecular imaging technologies such as positron emission tomography (PET) and microPET to take advantage of the capacities of molecular imaging to detect disease process at the molecular level and to monitor the effectiveness of targeted gene therapies now under development. The Committee also encourages the Institute to develop its research agenda in

close collaboration with other, disease-specific Institutes at NIH, so that new imaging technologies are closely tied to the research projects being supported by the NIH.

Temporomandibular joint disorders (TMJ).—The Committee is mindful of the dismal history of failures in the case of plastic and other materials used in implants to replace parts of the temporomandibular joint. The Committee urges the Institute to make studies of the TM joint and related structures a high priority.

NATIONAL CENTER FOR RESEARCH RESOURCES

Appropriations, 2002	\$986,505,000
Budget estimate, 2003	1,065,272,000
Committee recommendation	1,161,272,000

The Committee recommends an appropriation of \$1,161,272,000 for the National Center for Research Resources [NCRR]. This is \$96,000,000 more than the budget request and \$174,767,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NCRR develops and supports critical research technologies and shared resources that underpin research to maintain and improve the health of our Nation. The NCRR programs develop a variety of research resources; provide biomaterial and resources for complex biotechnologies, clinical research, and specialized primate research; develop research capacity in minority institutions; and enhance the science education of pre-college students and the general public.

Extramural construction.—The Committee has included bill language identifying \$125,000,000 for extramural biomedical facility renovation and construction. This is an increase of \$15,000,000 over the fiscal year 2002 appropriation and \$48,000,000 over the budget request. These funds are to be awarded competitively, consistent with the requirements of section 481A of the Public Health Service Act, which allocates 25 percent of the total funding to institutions of emerging excellence.

Federal loan guarantee program.—The Committee understands that the Administration has been considering a program that would guarantee loans for construction of research facilities at institutions conducting NIH-supported biomedical research. The Committee is very interested in a Federal loan guarantee program, which has the potential to address the huge requirement for new and upgraded research facilities that has been generated by the doubling of the NIH budget. The Committee requests a report, to be submitted by June 1, 2003, describing how such a program would work, the potential benefits and costs both to the Federal Government and to the institution, and how a loan guarantee program would be integrated with the current grant program.

General Clinical Research Centers.—In fiscal year 2002, the NCRR supported more than 80 General Clinical Research Centers (GCRCs) to provide people across the country with local access to clinical research programs focused on a wide range of diseases and disorders. GCRCs are also directly involved in translating basic science discoveries to improvements in patient care. For fiscal year 2003, the Committee has provided \$312,000,000, an increase of \$40,000,000 over the fiscal year 2002 level, for the GCRC program as authorized by Section 481C of the Public Health Service Act. The Committee intends that this increase should be used to provide the resources necessary to upgrade GCRC facilities with the sophisticated technologies needed to apply the mapping of the human genome to the study of human disease and respond to the threat of bioterrorism; expand

clinical research training efforts, including the recently announced Mentored Clinical Research Scholar Program Award; expand staffing as recently mandated by NCRR to assure patient safety and maximum compliance with new regulatory requirements; and support local GCRC pilot projects as approved by the NCRR Advisory Council.

Health disparities research.—The Committee commends the NCRR for its proposal to establish comprehensive centers for health disparities research and looks forward to learning more about this important new initiative.

IDeA grants.—The Committee has provided \$220,000,000 for the Institutional Development Award (IDeA) Program authorized by section 402(g) of the Public Health Service Act. This is a \$60,000,000 increase over fiscal year 2002. Within the total provided, \$90,000,000 is for the Biomedical Research Infrastructure Network (BRIN) initiative and \$130,000,000 is for the Centers of Biomedical Research Excellence (COBRE) initiative.

The Committee strongly supports the IDeA program, and urges the NCRR to further expand these initiatives. The Committee understands that the NCRR intends to review and evaluate the BRIN mechanism this year, and awaits the results of this critical evaluation. The focus of IDeA should continue to be improving the necessary infrastructure at research institutions within the IDeA States, so that they may develop a critical mass of competitive biomedical researchers that will enhance our nation's overall biological research capacity.

Institutional animal resources.—The Committee commends the NCRR for its support of recent efforts to upgrade animal research facilities at minority health professions schools including the recent competitive supplement to Research Centers in Minority Institutions (RCMI) for developing and improving institutional animal resources. The Committee encourages the NCRR to continue to work in partnership with the National Center on Minority Health and Health Disparities to support this initiative.

Islet cell research.—The Committee encourages NCRR to facilitate islet cell research by creating additional sites, isolating insulin-producing cells for both distribution to researchers as well as for transplantation, and improving methods to store and transport insulin-producing cells.

National Primate Research Centers.—The Committee values the critical role played by the eight National Primate Research Centers (NPRCs). These centers conduct specialized basic and applied biomedical research and offer essential and valuable services to other researchers across the United States. The Committee urges the NCRR to engage with the NPRCs in an assessment process to identify NPRC and NPRC-user needs, and to provide the Committee with a summary of the findings.

Plant-based medicinal products.—The Committee remains interested in efforts to develop plant-based medicinal products, and it encourages the NCRR to collaborate with plant scientists, particularly in rural America, in developing novel useful products.

Positron emission tomography.—The Committee continues to urge the NCRR to support research resource centers for the development and refinement of positron emission tomography (PET) as a unique imaging technology to diagnose and stage diseases of the brain, including Alzheimer's disease.

Research Centers in Minority Institutions.—The Committee continues to recognize the critical role played by minority institutions at both the graduate and undergraduate level in addressing the health research and training needs of minority populations. These programs help facilitate the prepara-

tion of a new generation of scientists at these institutions. The Committee urges the NCRR to constitute to support the Research Centers in Minority Institutions program.

NATIONAL CENTER FOR COMPLEMENTARY AND ALTERNATIVE MEDICINE [NCCAM]

Appropriations, 2002	\$104,592,000
Budget estimate, 2003	113,249,000
Committee recommendation	114,149,000

The Committee has included \$114,149,000 for the National Center for Complementary and Alternative Medicine, an increase of \$900,000 above the budget request and \$9,557,000 over the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

The Committee strongly supports the work of the National Center for Complementary and Alternative Medicine. The Center is charged with ensuring that complementary and alternative therapies be rigorously reviewed to provide consumers with reliable information.

The Committee expects that funding for existing and new Centers supported by NCCAM will be maintained and directs the Center to undertake field investigations and a program for the collection and evaluation of outcome data on promising alternative therapies. The Committee expects NCCAM to expand its support of CDC's field investigations program and of AHRQ literature reviews and data-analysis efforts. The Committee also expects the Center to allocate sufficient funds to develop and disseminate a comprehensive set of fact sheets on CAM therapies to inform the public and health professionals of the state of scientific knowledge about these therapies.

The Committee has included sufficient funds for NCCAM to increase support for the chiropractic research center.

NATIONAL CENTER ON MINORITY HEALTH AND HEALTH DISPARITIES

Appropriations, 2002	\$157,742,000
Budget estimate, 2003	186,929,000
Committee recommendation	186,929,000

The Committee has included \$186,929,000 for the National Center on Minority Health and Health Disparities, the same as the budget request and \$29,187,000 over the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The NCMHD advises the NIH Director and Institute and Center (IC) directors on the development of NIH-wide policy issues related to minority health disparities research, research on other health disparities, and related research training. Among other activities, the NCMHD develops, in consultation with the NIH Director, IC directors, and the advisory council, a comprehensive strategic plan that identifies and establishes objectives, priorities, budgets, and policy statements governing the conduct and support of all NIH minority health disparities research, research on other health disparities, and related research training activities. It also administers funds for the support of minority health disparities research and other health disparities research, by awarding grants and leveraging the programs of the ICs.

The Committee is encouraged by the opportunities that exist for the NCMHD to help further advances in improving the health of minorities and eliminating health disparities through the expanded conduct and support of research, research training, community outreach, and accelerated dissemination of research findings in cancer, heart disease,

asthma, stroke, sickle cell disease, obesity, diabetes, substance abuse, mental health, infant mortality, HIV/AIDS, and chronic pulmonary diseases. Considerable opportunities are at hand for improving clinical outcomes in the short- and long-term. The NCMHD is encouraged to capitalize on opportunities provided by recent advances in biomedical, clinical and behavioral research by strengthening its focus on efforts to unravel the genomic analysis of diseases that disproportionately affect minorities including the ethical, legal and social implications of this research; applying advanced knowledge from prevention, behavioral, translational, clinical and basic research to developing and implementing effective innovative approaches that address obesity and diabetes across communities of color; ensuring the integration of advances in health care, practice, and self-management in clinicians' guides and health care delivery; applying knowledge that has been learned with respect to stress and diet response mechanisms, and environmental risk factors for cancer, heart disease, asthma and stroke; applying advances stemming from unraveling the physiology and genetics of diabetes; furthering implementation of recommendations stemming from the various IOM studies on improving minority health; developing innovative strategies for improving the health status and health outcomes of minority adolescents, young adults and elderly; furthering the understanding of the dietary link in arthritic diseases; strengthening and expanding the involvement and participation of minority organizations including minority community-based organizations in research, outreach, awareness and prevention activities.

Glomerular injury.—The Committee understands that glomerular injury, a group of diseases which effect the filtering mechanisms of the kidney, are more prevalent among African Americans than the general population. The Committee urges the NCMHD to explore collaboration with the NIDDK to conduct and support research activities related to glomerular injury.

Lung diseases.—The Committee is concerned with the disproportionate impact of lung diseases affecting minorities. The Committee encourages the Center to partner with other agencies to develop an epidemiologic approach to determine the disproportionate impact of airway disease on minority populations.

Strategic plan.—The Committee commends the NCMHD for its leadership in addressing the longstanding problem of health status disparities in minority populations. The Committee looks forward to reviewing the strategic plan for health disparities research currently being developed by the NCMHD. The Committee continues to encourage the NCMHD to implement its successful research endowment program as an ongoing initiative, and to establish the centers of excellence program. Finally, the Committee encourages the Director of the NCMHD to coordinate with the NIH Director and the NCRR in support of extramural facility construction and the development of other research infrastructure at minority health professions schools.

JOHN E. FOGARTY INTERNATIONAL CENTER FOR ADVANCED STUDY IN THE HEALTH SCIENCES

Appropriations, 2002	\$56,918,000
Budget estimate, 2003	63,380,000
Committee recommendation	60,880,000

The Committee recommends an appropriation of \$60,880,000 for the Fogarty International Center [FIC]. This is \$2,500,000 less than the budget request and \$3,962,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate

include funds to be transferred from the Office of AIDS Research.

Mission.—Adapting research advances in biomedicine to populations at home and abroad requires a continuing commitment to basic science as well as rigorous clinical and applied (epidemiological) studies. Examples are vaccines, anti-infective agents, drugs, and more efficient diagnostic tools, combinations of interventions, and health policies to reduce the risk of disease and its associated human, social, and economic consequences. These challenges will benefit from a more coordinated and multi-disciplinary approach to global health needs. It is the mission of the FIC to address these challenges by forging collaborations with a range of domestic and global partners in international research and training to pursue three core objectives: first, to accelerate the pace of discovery and its application by special projects enabling scientists worldwide to share conceptual insights, analytic methods, data sets, patient cohorts, or special environments; second, to engage and assist young as well as more established U.S. investigators to address scientific challenges related to global health; and third, to help develop a cadre of highly capable young foreign investigators positioned to cooperate with U.S. scientists in areas of the world that, due to geography, genetics, or disease burdens, provide unique opportunities to understand disease pathogenesis, anticipate disease trends, or develop interventions of relevance and priority for both the United States and the collaborating country.

Chronic obstructive pulmonary disease.—The Committee notes that chronic obstructive pulmonary disease (COPD) is the fourth-leading cause of death worldwide, and it encourages the FIC to expand its COPD research and training activities.

Tuberculosis.—The Committee recognizes the growing value of international research and surveillance programs with respect to infectious diseases such as tuberculosis (TB). The Committee is pleased by the Center's research collaboration with international organizations and governments on multi-drug-resistant TB, and it encourages the Center to continue these important studies. The Committee is aware that the FIC offers TB supplemental training grants to recipients of AIDS International Training and Research Program (AITRP) or International Training and Research Program in Emerging Infectious Diseases (ERID) grants. The Committee encourages the FIC to develop a specific, freestanding TB training program.

NATIONAL LIBRARY OF MEDICINE

Appropriations, 2002	\$277,273,000
Budget estimate, 2003	310,299,000
Committee recommendation	310,299,000

The Committee recommends an appropriation of \$310,299,000 for the National Library of Medicine [NLM]. This is equal to the budget request and \$33,026,000 more than the fiscal year 2002 appropriation. Included is \$4,000,000 for improvement of information systems. The recommendation includes \$8,200,000 in transfers available under section 241 of the Public Health Service Act. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The National Library of Medicine is the Federal institution that for more than 150 years has collected, organized, preserved, and disseminated the world's output of biomedical literature in all forms. As a result of this activity NLM is the world's largest library of the health sciences, its holdings numbering more than 5 million items. The NLM has pioneered innovative methods to disseminate bibliographic information. Basic

to the mission of the NLM is a wide-ranging research program to improve how medical information is communicated. This responsibility is aided by a grants program and by specialized services in toxicology, environmental health, and biotechnology.

Home medical consultations.—The Committee continues to support demonstration projects to test the use of state-of-the-art telemedicine technology for home medical consultations. This innovative approach holds great promise for improving the care and lowering health care costs for homebound individuals who require frequent monitoring.

Internet connection grant program.—The Committee continues to be concerned about limitations on access to health information in rural and other medically underserved areas. It supports the NLM's efforts to address this issue through the Library's Internet Connection Grant program, which partners with regional libraries to provide hardware, set-up, training and access to the Internet at locations in medically underserved areas.

Minority health professions.—The Committee encourages the NLM to strengthen information technology infrastructure at minority health professions schools that focus their research activities on health disparities and the education of health professionals who serve in medically underserved communities.

New facility.—Many of the most serious diseases have a molecular basis. The NLM's National Center for Biotechnology Information is an integral player in this research process, for it organizes and analyzes the vast volume of genomic information uncovered in the last decade. The Congress believes that if this Center is to make its maximum contribution to our fight against disease, it must very soon have expanded facilities to meet the growing demands being placed on it. The Committee provided funds necessary for the design of such facilities, and it desires that such design, when completed, be rapidly moved into the construction phase. The Committee, therefore, requests a report from the NIH by April 1, 2003, that delineates the features of this new facility, its size and its expected cost, based upon a fast-track schedule.

Outreach.—The Committee continues to note the success of the NLM's MEDLINE and MEDLINEplus databases. The Committee encourages NLM to continue its outreach activities aimed at educating health care professionals and the general public about the Library's products and services, in coordination with medical librarians and other health information specialists.

Public mandate.—The NLM has legislatively mandated outreach activities to publicize its information services to health professionals and the public. Because the Library has developed an extensive set of authoritative and easily accessible (electronic and print) health information services for the public, the Committee encourages the NLM to continue these efforts and also to target specifically certain underserved parts of the U.S. population, particularly ethnic minorities, the elderly, non-English-speaking individuals, and Americans living in rural areas.

PubMed Central.—The Committee commends the NLM for its continued management and development of PubMed Central, an electronic online repository for life science articles.

Senior citizen outreach.—The Committee continues to support the NLM's efforts to provide senior citizens with expanded access to NLM's databases, through such means as including Internet access at senior centers and congregate meal sites.

OFFICE OF THE DIRECTOR

Appropriations, 2002	\$235,400,000
Budget estimate, 2003	255,074,000
Committee recommendation	257,974,000

The Committee recommends an appropriation of \$257,974,000 for the Office of the Director [OD]. This is \$2,900,000 more than the budget request and \$22,574,000 more than the fiscal year 2002 appropriation. The comparable amounts for the budget estimate include funds to be transferred from the Office of AIDS Research.

Mission.—The Office of the Director provides leadership and direction to the NIH research community, and coordinates and directs initiatives which crosscut the NIH. The Office of the Director is responsible for the development and management of intramural and extramural research and research training policy, the review of program quality and effectiveness, the coordination of selected NIH-wide program activities, and the administration of centralized support activities essential to operation of the NIH.

The Committee directs the Director of NIH to make a written request to the chairman of the Committee prior to any reprogramming of \$1,000,000 or more, between programs, projects, activities, institutes, divisions and centers. The Committee desires to have the requests for reprogramming actions which involve less than the above-mentioned amounts if such actions would have the effect of changing funding requirements in future years, if programs or projects specifically cited in the Committee's reports are affected, or if the action can be considered to be the initiation of a new program.

Alpha-1 antitrypsin deficiency.—Alpha-1 antitrypsin deficiency, a genetic disorder often misdiagnosed as asthma or chronic obstructive pulmonary disease (COPD), is a major cause of lung transplants in adults and liver transplants in children. The Committee encourages the NIH to enhance its clinical research portfolio for alpha-1 and to consider conducting a state-of-the-science conference on the disorder. The NIH is also encouraged to raise public awareness about alpha-1 and provide appropriate information to health professionals.

Autoimmune diseases.—The Committee awaits the imminent release of the NIH's Autoimmune Diseases Research Plan, which was requested in the Children's Health Act of 2000. More than 80 autoimmune diseases affect up to 22 million Americans, mostly women. The Committee believes that the planned research has the potential to generate improved prevention measures, diagnostic tools, and treatment regimens, resulting in reduced treatment costs and a significant alleviation of human suffering.

Chronic fatigue syndrome.—The Committee is pleased that the NIH released its long-awaited CFS program announcement in December 2001, and it hopes that this initiative will reverse 7 years of declining CFS funding at NIH. To foster response to this program announcement, the Committee urges the NIH to put a priority on efforts to understand the cause and progression of CFS, identify diagnostic markers, and better understand pediatric CFS.

Clinical research.—Research supported by the National Institutes of Health has produced a wealth of knowledge about the fundamentals of human health and disease. But the accumulation of fundamental knowledge for its own sake is of little value unless it finds its way into hospitals and physicians, where it can be put to use in promoting good health or diagnosing, preventing and treating disease. Whether the dividends from basic research are fully realized will depend on the extent to which the clinical research

enterprise is encouraged and nurtured, including health services and epidemiological studies. To that end, the Committee encourages the NIH Director to re-institute the advisory panel on clinical research and to consider creating an office of clinical research to oversee and coordinate activities across the NIH. In addition, the Committee strongly urges the NIH to accelerate its ongoing clinical research training program. The Committee requests a report by April 1, 2003, outlining the status of clinical research activities currently underway as well as plans for the future.

Clinical research loan repayment.—In 2000, the Congress authorized a loan repayment program for clinical researchers as part of the Clinical Research Enhancement Act. The Committee is pleased that the NIH initiated the program last year, but was concerned that NIH established an initial policy that excluded clinical investigators who did not have NIH funding. The Committee understands that NIH plans to change this policy in the second year of the program, and it urges the NIH to include as eligible applicants students and trainees enrolled in peer-reviewed clinical research training programs supported by the NIH or private sources. The Committee requests data on the number of applications submitted as well as the number and size of awards made as of April 1, 2003. The Committee also requests demographic information on the applicants and recipients of the awards, including the status of their career development.

Deafness research.—The Committee encourages the NIH to fund multi-institute projects to expand basic research regarding the causes of deafness.

Department of Defense transfers.—The Committee has not approved the transfer of \$49,000,000 requested in the budget to fund Department of Defense medical free electronic laser research, HIV clinical trial research and radiation exposure research. The Committee recommends that funding for defense-related science and technology initiatives should be handled by the Defense Department.

Distribution of resources.—Following the Institute of Medicine (IOM) study of the organization of the NIH, the Committee encourages NIH to contract with IOM to study the distribution of research resources across the agency's Institutes and Centers. An objective analysis may help inform the committee on the wisest distribution of new funds as they become available.

Down syndrome.—Down syndrome is the most common genetic cause of mental retardation in humans. About 1 in 800 babies born live in the United States has Down syndrome. People with Down syndrome also have an increased risk of developing Alzheimer's disease, autism, and many neurological and psychiatric disorders. Recent research holds the promise that future clinical interventions could substantially improve cognition, language ability, and behavior for persons with Down syndrome. In addition, research into the connection between Down syndrome and Alzheimer's disease may lead to a better understanding as to the causes of Alzheimer's disease. The Director is urged to coordinate with NICHHD, NIA, NINDS and NIMH, to place a high priority on researching the causes and treatment of Down syndrome and to allocate sufficient funds for expanding Down syndrome research into enhancing cognitive development and developing methods to ameliorate early cognitive decline and the onset of Alzheimer's disease.

Epilepsy.—The Committee recognizes that while the NINDS is the primary Institute for addressing epilepsy, several other Institutes are also involved in related research. As 75 percent of epilepsy cases begin in childhood,

the NICHHD has an important role to play in studying this disease. So, too, does the NHGRI, which is urged to assist the NINDS in the search for a genetic fingerprint diagnostic test aimed at improving drug therapy for epilepsy. The NIMH is encouraged to explore a potential link between epilepsy and mood disorders, both of which are often treated with anti-convulsant medications. Finally, the NIA is encouraged to examine epilepsy in patients over age 65. The Committee urges the Director to continue an Interagency Epilepsy Coordinating Committee that includes agency scientists and industry and patient representatives. It requests the Director to provide a report to Congress by April 1, 2003, on the progress made in the coordination of research efforts in epilepsy among these Institutes, and on the progress made to implement the NINDS research benchmarks resulting from the March 2000 conference "Curing Epilepsy: Focus on the Future."

Fibromyalgia.—Fibromyalgia is a chronic disorder characterized by widespread musculoskeletal pain, fatigue, multiple tender points, and other debilitating symptoms. Because the symptoms manifest themselves most notably in the muscles, NIH research in fibromyalgia has been concentrated in the NIAMS. While the Committee commends the NIAMS for its interest in this condition, research increasingly indicates that fibromyalgia is not primarily a disease of the muscles, but rather a condition caused by malfunctions in the brain and central nervous system. Therefore, the Committee strongly urges the NIAMS and the NINDS to work together in addressing the challenge of fibromyalgia, and to expand their research into this disorder. In addition, the Committee notes that there are no FDA-approved drugs for fibromyalgia. While the NIAMS Strategic Plan for 2000–2004 specifically cites the need for NIAMS-supported investigators to test the efficacy of new drugs and biologicals for arthritis and related diseases, the Institute has announced no plans to include fibromyalgia in that effort. The Committee urges the NIAMS to do so.

Graduate Training in Clinical Investigation Awards.—The Committee understands that the translation of basic research to general medical practice is slowed by a shortage of well-trained clinical investigators. The Committee is concerned that the NIH has not moved forward with implementation of the Graduate Training in Clinical Investigation Awards authorized by the Clinical Research Enhancement Act, which was intended to address this shortage. While the Committee is pleased that the NIH has initiated the Clinical Research Curriculum Awards to improve the quality of training in clinical research, a shortcoming of this program is the absence of support for tuition and stipends for the individual students. The Committee believes that the Graduate Training in Clinical Investigation Awards may be necessary to replenish the supply of well-trained clinical investigators.

Human tissue supply.—The Committee continues to be interested in matching the increased needs of researchers who rely upon human tissues and organs to study human diseases and to search for cures. The Committee is aware that one of the leaders in this competitive field, the National Disease Research Interchange [NDRI], is uniquely positioned to serve NIH grantees, as well as the intramural and university-based researchers who are finding it increasingly difficult to obtain this valuable and effective alternative research resource. More than 500 peer-reviewed research advances made by NDRI-dependent researchers have been published during the past 4 years contributing to the research community's fund of knowledge. The Committee is encouraged by

NDRI's role in these research advances and applauds the Director's expanded support for NDRI by bringing NEI, NIDDK, NIAID, NIAMS, and the Office of Rare Diseases into the multi-institute initiative. While this is promising, more needs to be done to match the demand for the use of human tissue in research. The Committee, therefore, expects the Director to advise the Director of NCRR to consider substantially increasing its core support for NDRI, and to continue to encourage the Institute Directors to identify and implement program-specific initiatives that might utilize the NDRI. The NIH should submit a written progress report to the Committee no later than April 1, 2003 outlining its plan and action steps to accomplish these goals in fiscal year 2003.

Laboratory Animals.—The Committee is concerned about allegations that several institutions receiving NIH funding may not be in full compliance with the Public Health Service policy on humane Care and Use of Laboratory Animals. The Committee encourages NIH to determine the extent and scope of any such allegations and notify the Committee of its findings.

Lymphatic diseases and lymphedema.—The Committee commends the NIH for co-sponsoring The Lymphatic Continuum conference in May 2002 and for establishing a trans-NIH coordinating committee to focus on the lymphatic system, with particular emphasis on lymphedema and related lymphatic disorders. Since basic and translational research for lymphatic research and diseases of the lymphatic system crosses most Institutes and Centers, broad committee representation is strongly encouraged. Research and medical care for lymphatic diseases has long been neglected; therefore, the Committee strongly urges the NIH to stimulate and support intramural and extramural programs for basic and translational research relating to lymphatic diseases, including but not limited to: insufficiency of lymphatic circulatory function (to include all forms of lymphedema, both primary and secondary); lymphatic vascular valvular insufficiencies; complex congenital vascular proliferative diseases of the lymphatic vasculature, including but not limited to, so-called lymphangioma, cystic hygroma, lymphangiosarcoma, lymphangioleiomyomatosis; and developmental disorders of the lymphatic system, including but not limited to lymphangiectasia, chylous reflux and complex vascular malformations, such as Klippel-Trenauny Syndrome.

The Committee requests the Director to provide a report by April 1, 2003, outlining both short- and long-term plans to stimulate and support basic and translational research for lymphatic diseases. Furthermore, the Committee urges the NIH to examine whether experts on lymphatic research are adequately represented on CSR peer review panels and relevant Institute study sections.

Microbicides.—There is an urgent need to expand the range of preventive interventions for HIV transmission. Microbicides, which are antimicrobial products that can be applied topically for the prevention of sexually transmitted diseases, may offer one of the most promising approaches to preventing HIV. The Committee commends the NIH for increasing the funds available for microbicide research and development, and it supports additional increases in funding for this area through OAR, NIAID, NICHD, NIMH, NIDA, and ORWH. The Committee remains concerned, however, that microbicide research at the NIH is currently conducted with no single line of administrative accountability or specific funding coordination. The Committee also notes that the Centers for Disease Control and the U.S. Agency for International Development have

recently expanded their microbicide portfolios, which means that without overall Federal coordination, costly inefficiencies may result. Therefore, the Committee urges the NIH both to continue implementation of its strategic plan for microbicide research and development, and to accelerate and strengthen efforts to coordinate research among Institutes and with other Federal agencies. The Committee requests a report by March 31, 2003, on the status of its microbicide program, including research efforts, funding, and implementation of the strategic plan.

Minority health professions infrastructure.—The Committee continues to be pleased with the NIH Director's implementation of various programs focused on developing research infrastructure at minority health professions institutions, including Research Centers at Minority Institutions, Extramural Biomedical Research Facilities, and the National Center for Minority Health and Health Disparities. Because there are a number of new competitive mechanisms for the NIH to work with these research institutions, the Committee recommends that the NIH Director work closely with the Director of the National Center on Minority Health and Health Disparities to coordinate these various mechanisms.

National Institutes of Health/Department of Energy Medical Technology Partnership.—The Committee expects the NIH to continue to collaborate with the Department of Energy (DOE) to evaluate the technologies developed within the nuclear weapons program and other DOE programs in terms of their potential to enhance health sciences, with the goal of achieving clinical applications and improved national health care.

Neurofibromatosis (NF).—The Committee has included specific report language on NF under the NCI and NINDS, but it recognizes that NF research involves many other Institutes and Centers as well, including the NHLBI, NEI, NIDCD, NICHD, and NIAMS. The Committee urges the Director to identify new research opportunities regarding NF that cuts across all these Institutes and Centers.

Office of Behavioral and Social Sciences Research.—The Committee encourages the OBSSR to foster the NIH's behavioral research portfolio by planning and sponsoring interdisciplinary initiatives that further the public health missions of multiple Institutes and Centers. In particular, the OBSSR's efforts to encourage research on new methodologies in the behavioral and social sciences are appreciated. The Office is urged to follow up on its conferences on sociocultural research and health disparities by developing initiatives with the National Center for Minority Health and Health Disparities and the NIH Institutes and Centers. The Committee encourages the OBSSR to push forward on planned initiatives to increase scientific understanding of the elements of education and the workplace that most affect health, and to follow up on its successful program of grants on behavior change by focusing on the challenge of maintaining behavior change.

Office of Dietary Supplements.—The use of dietary supplements has increased significantly among Americans who want to improve their health and prevent disease, and there is a great need for additional research to better inform consumers of the benefits of these supplements. The Committee expects the ODS to allocate sufficient funds to continue an initiative—begun at the Committee's urging in last year's bill—to speed up ongoing collaborative efforts to develop, validate, and disseminate analytical methods and reference materials for the most commonly used botanicals and other dietary supplements.

The Committee is pleased that the ODS has followed through on its recommendation to begin a major research initiative on the safety and efficacy of products containing ephedra, and it urges the Office to assure that the work is reviewed in an unbiased manner before it is finalized. The results of this research should be evaluated by the FDA to assure that any regulatory action taken on products containing ephedrine alkaloids is based on sound science.

The Committee is also pleased that the ODS has begun an evidence-based review of the research concerning the health benefits of omega-3 fatty acids. Given the significant human and financial costs associated with heart disease, the Committee expects the Office to provide sufficient funds to promptly complete this initial review and provide recommendations for further major clinical trials.

Office of Research on Women's Health.—The Office of Research on Women's Health (ORWH) works in collaboration with the Institutes and Centers (ICs) of the NIH to promote and foster efforts to address gaps in knowledge related to women's health through the enhancement and expansion of funded research and the initiation of new investigative studies. The ORWH is responsible for ensuring the inclusion of women in clinical research funded by the NIH, including the development and implementation of a computerized tracking system and the implementation of guidelines on such inclusion. The Office is also involved in promoting programs to increase the number of women in biomedical science careers, and in developing women's health and sex and gender factors in biology as a focus of medical/scientific research.

The Committee recognizes the critical role played by the specialized centers of research on sex and gender factors affecting women's health, and it encourages the Office to continue programmatic initiatives to further this work. The Committee also continues to support the Building Interdisciplinary Research Careers in Women's Health programs.

Parkinson's disease.—The Committee is aware that the Parkinson's Disease Research Agenda developed by the NIH in 2000 included professional judgment funding projections that totaled an additional \$1,000,000,000 over 5 years. It is the clear intent of the Committee that the NIH, which has received substantial funding increases in recent years, come as close as possible to fulfilling that Agenda while maintaining the standards of peer review.

The Committee was extremely disappointed, therefore, to learn that during fiscal years 2001 and 2002—the first 2 years of the Parkinson's Disease Research Agenda—NIH funding increases for Parkinson's failed to keep pace with funding increases for NIH overall. In addition, the NIH's projected Parkinson's budget for fiscal year 2003 falls \$138,200,000 short of the \$353,300,000 professional judgment budget estimate cited by the Agenda for that year. As a consequence, the NIH would fall even further behind on implementing the Agenda, and this highly promising field of research would not move ahead as speedily as the Congress intended.

The Committee strongly urges the NIH to devote additional resources to Parkinson's research using all available mechanisms, including RFAs and further support of NIEHS initiatives.

The Committee expects the NIH to report to Congress by April 1, 2003, on the steps it is taking to fulfill the Parkinson's Disease Research Agenda.

Pediatric drug studies.—The Committee is aware that many generic drugs have not been studied for use in pediatric patients. Therefore, the Committee encourages the

NIH to take actions necessary to fully implement the new section 409I of the Public Health Service Act to study the safety and efficacy of off-patent/off-exclusivity drugs in pediatric patients. The Committee requests a report by February 1, 2004, which includes information on the number of pediatric drug studies supported; the estimated cost of each study undertaken; the nature and type of studies undertaken; the number of label changes that occurred due to the studies completed; the patent status of the drugs studied; and the number of drugs remaining on the priority list established through section 409I of the Best Pharmaceuticals for Children Act.

Pediatric research initiative.—The Committee is pleased that the Office of the Director is implementing its Pediatric Research Initiative, as authorized by the Child Health Act of 2000. The Committee strongly supports the intent of the initiative, to provide additional funds to encourage the growth of support for pediatric research across Institutes and to stimulate new and promising areas of pediatric research.

Pediatric research loan repayment.—The Children's Health Act of 2000 established the Pediatric Research Loan Repayment Program to ensure the future supply of researchers dedicated to the care and research needs of children. The Committee is pleased with the expeditious initial implementation of this program, and it urges the NIH to expand it, particularly in the areas of Duchenne muscular dystrophy and Fragile X. The Committee requests that the Director prepare a report by April 1, 2003, detailing the progress of this program.

Physical inactivity.—Physical inactivity, as a contributing factor to disease, represents the third leading cause of death in the United States and is a major contributor to obesity, the second leading cause of death. The Committee encourages the NIH to conduct public outreach efforts with the goal of encouraging researchers to bring their research expertise and skills to bear on this field.

Postpartum depression.—Each year, over 400,000 women suffer from postpartum mood changes, with "baby blues" afflicting up to 80 percent of new mothers; postpartum mood and anxiety disorders impairing around 10–20 percent of new mothers; and postpartum psychosis striking 1 in 1,000 new mothers. However, little systematic research has been done to uncover the underlying causes and to develop effective treatments. Therefore, the Committee encourages the Institutes to expand, intensify and coordinate research on postpartum depression and psychosis. In addition, the Committee encourages the NIH to convene a national research conference to develop a national research plan for postpartum depression and psychosis.

Racial and ethnic disparities.—The Committee was disturbed by the conclusions of the Institute of Medicine's March 2002 report titled "Unequal Treatment: Confronting Racial and Ethnic Disparities in Health Care." The Committee strongly urges the NIH to take all steps necessary to reduce and eventually eliminate racial and ethnic health disparities. On a related matter, the Committee is pleased with the leadership that NIH has shown, through its Projecto Ciencia initiative, to provide state-of-the-art health material to Hispanic consumers and information to Hispanic health professionals on NIH research opportunities. The NIH is encouraged to increase funding for this initiative with expanded emphasis on outreach to Hispanic consumers, Hispanic participation in clinical trials, and NIH training and research opportunities, especially as principal investigators.

Scleroderma.—The Committee has included specific report language on scleroderma

under NIAMS and the NHLBI, but it recognizes that scleroderma research involves many other Institutes and Centers as well. The NIDDK is encouraged to support such research because of scleroderma's links to gastrointestinal involvement and renal crisis; the NIDCR, because scleroderma may be associated with a number of potential dental and craniofacial complications; and the Office of Research on Women's Health, because scleroderma mainly strikes young women.

Sjögren's syndrome.—Sjögren's syndrome is one of the most prevalent autoimmune diseases, yet little is known about the cause or effective treatments. The Committee is pleased by the research that the NIDCR has conducted on Sjögren's, but recognizes that because this disease may affect all organs, it falls within the mission of many Institutes. For this reason, the Committee urges the NIH Autoimmune Diseases Coordinating Committee, as it implements the NIH Autoimmune Diseases Research Plan, to emphasize increased research on Sjögren's syndrome across the Institutes. In particular, the Committee encourages the NIAMS and NIAID to expand their research on musculoskeletal and immunological manifestations of the disease. The Committee also notes that Sjögren's syndrome is an excellent model for lymphoproliferation and transformation to malignancies; therefore, the NCI is encouraged to explore the increased progression in Sjögren's from a benign autoimmune process to malignancy.

Social work research.—The Committee commends the NIMH, NIDA, NCI, and the Office of Behavioral and Social Science Research for their recognition of social work research's important contribution to our Nation's health. The Committee urges the NIH to develop a social work research plan that outlines research priorities, as well as a research agenda, across NIH Institutes and Centers to be reported to the Committee by April 1, 2003.

Stem cell research.—The Committee is encouraged by the promise of both adult and embryonic stem cell research to improve the lives of individuals suffering from devastating diseases and conditions. However, the Committee also recognizes that basic stem cell research must be accomplished before therapies can be produced. In last year's report, the Committee encouraged NIH to move forward expeditiously to implement the President's policy concerning support of scientifically meritorious stem cell research. The Committee also commended NIH for moving quickly to negotiate material transfer agreements with holders of existing embryonic cell lines. However, since then, the Committee has learned that very few stem cell lines are being shared with researchers. The Committee is also concerned that few grant applications have been funded in this area. The Committee requests that the Department of Health and Human Services send the subcommittee a report explaining how it plans to encourage more grant applications and what specific steps it plans to take to make more stem cell lines available.

The Committee also commends NIH for the development of the online human embryonic stem cell registry and encourages NIH to expand the registry to make it more useful to researchers by providing additional documentation regarding the stem cell lines, such as conditions of derivation, characteristics of the cell lines (i.e. cell-surface markers present or absent, growth conditions, and requirements for maintenance in long-term culture), and publications that reference the cell lines. Furthermore, the Committee encourages NIH to seriously consider developing a stem cell repository.

In addition, the Committee is aware of the exciting new developments in the field of

umbilical cord stem cells. But more research needs to be undertaken to explore these issues, including the possible use of these cells to treat cancers, genetic diseases, muscular dystrophy, neurological disorders, and diabetes. The Committee urges the NCI, NHLBI, NIAMS, NIDDK, and the NINDS to actively pursue research in these areas in a manner consistent with the NIH tradition of strong peer-reviewed science.

Stroke in women.—As the second-leading cause of death among women worldwide, stroke in women is a major health problem. The Committee believes that special attention should be focused on better understanding the gender differences in stroke and cerebrovascular disease, as well as in the medical care of stroke patients. Some aspects of the disease unique to women include strokes related to pregnancy and the use of oral contraceptives; stroke in younger women therefore should not be underestimated. Stroke is additionally a leading cause of serious disability among women and may contribute to late-life cognitive decline. The Committee supports the funding of new and continuing NIH studies that investigate the impact of postmenopausal hormone replacement therapy on stroke risk. The Committee urges the NIH to increase research in stroke among women of all ages, with a focus on stroke prevention, acute stroke management, post-stroke recovery, long-term outcomes, and quality of life.

In addition, the Committee supports the NIH's initiatives toward advancing the organization of stroke care and the identification of stroke treatment and research centers that would provide rapid, early, continuous 24-hour treatment to stroke victims, including the use of the clot-buster t-PA when appropriate. The Committee believes that designated areas in medical facilities equipped with the resources and personnel for treating stroke would also promote the early evaluation of innovative stroke treatments.

Temporomandibular joint disorders (TMJ).—The Committee recognizes that the problems associated with temporomandibular diseases and disorders involve many Institutes and Centers, including the NIDCR, NIAMS, NIAID, and NIBIB. The Committee calls on the Office of the Director to coordinate cross-cutting research by the various Institutes and Centers and provide a report directly to the Committee by April 1, 2003, on TMJ initiatives begun in fiscal year 2002 or scheduled to begin in fiscal year 2003. The Committee commends the Office of Research on Women's Health for its consistent support of workshops and other activities to further TMJ research, in recognition that women in the child-bearing years appear to be more susceptible than men to TMJ problems. The Office is urged to continue its support of TMJ initiatives.

Training award stipends.—The Committee concurs with the policy adopted by the NIH in March 2001 which provides for 10 percent increases in research training award stipends until appropriate stipend levels are achieved. The Committee strongly encourages the NIH to apply this policy to the fiscal year 2003 appropriation, just as it did with the training stipends funded by the fiscal year 2002 appropriation.

BUILDINGS AND FACILITIES

Appropriations, 2002	\$296,000,000
Budget estimate, 2003	632,800,000
Committee recommendation	607,800,000

The Committee recommends an appropriation of \$607,800,000 for buildings and facilities [B&F]. The amount recommended is \$25,000,000 below the budget request and \$311,800,000 more than the fiscal year 2002 appropriation.

Mission.—The buildings and facilities appropriation provides for the NIH construction programs including design, construction, and repair and improvement of the clinical and laboratory buildings and supporting facilities necessary to the mission of the NIH. This program maintains physical plants at Bethesda, Poolesville, Baltimore, and Frederick, MD; Research Triangle Park, NC; Hamilton, MT; Perrine, FL; New Iberia, LA; and Sabana Seca, PR.

Neuroscience Research Center and Clinical Research Center.—The Committee recommendation provides sufficient amounts for the NIH to continue support for high-priority construction projects previously approved and endorsed by the Congress. The Congress provided full-scope contract authority in the fiscal year 2002 appropriation for both phases of the John Edward Porter Neuroscience Research Center; that authority is continued for fiscal year 2003. The Committee expects the NIH to keep to the original schedule for completing this project. However, the Committee is extremely concerned about the cost of completing the Mark O. Hatfield Clinical Research Center. The Committee understands that small cost overruns are expected in most large construction projects. However, in this situation, \$144,500,000 in unanticipated costs is totally unacceptable. Therefore, the Committee directs the NIH, prior to requesting any further construction dollars, to do a thorough investigation of why the cost overrun occurred, and what steps the NIH intends to take to ensure that future projects are better managed.

The Committee has included full-scope bill language within this appropriation to give flexibility to the NIH to address the cost overrun situation. The Committee has taken this action to ensure that the new clinical center will be completed as soon as possible because of the critical role the center will play in the advancement of medical science. The Committee directs the NIH to report within 30 days of the enactment of this bill on how it will use the full-scope authority to maintain progress on these two projects. This report should also identify how other projects, if any, have been affected to maintain this progress.

OFFICE OF AIDS RESEARCH

Appropriations, 2002	\$3,137,690,000
Budget estimate, 2003	3,193,086,000
Committee recommenda-	
tion	3,203,917,000

The Committee recommendation does not include a direct appropriation for the Office of AIDS Research [OAR]. Instead, funding for AIDS research is included within the appropriation for each Institute, Center, and Division of the NIH. The recommendation also includes a general provision which directs that the funding for AIDS research, as determined by the Director of the National Institutes of Health and the OAR, be allocated directly to the OAR for distribution to the Institutes consistent with the AIDS research plan. The recommendation also includes a general provision permitting the Director of the NIH and the OAR to shift up to 3 percent of AIDS research funding among Institutes and Centers throughout the year if needs change or unanticipated opportunities arise. These modifications to the budget recommendation are consistent with the manner in which funding for AIDS research was provided in fiscal year 2001. The Committee requests that the Director report on the fiscal year 2001 allocation plans for AIDS research within 60 days of enactment and provide notification to the Committee in the event the Directors exercise the 3 percent transfer authority.

The NIH Office of AIDS Research [OAR] coordinates the scientific, budgetary, legisla-

tive, and policy elements of the NIH AIDS research program. Congress provided new authorities to the OAR to fulfill these responsibilities in the NIH Revitalization Act Amendments of 1993. The law mandates the OAR to develop an annual comprehensive plan and budget for all NIH AIDS research and to prepare a Presidential bypass budget.

SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION

Appropriations, 2002	\$3,137,690,000
Budget estimate, 2003	3,193,086,000
Committee recommenda-	
tion	3,203,917,000

The Committee recommends \$3,203,917,000 for the Substance Abuse and Mental Health Services Administration [SAMHSA] for fiscal year 2003, an increase of \$66,227,000 more than the comparable fiscal year 2002 level and \$10,831,000 more than the administration request. The recommendation includes \$74,200,000 in transfers available under section 241 of the Public Health Service Act. SAMHSA is responsible for supporting mental health programs and alcohol and other drug abuse prevention and treatment services throughout the country, primarily through categorical grants and block grants to States.

The Committee has provided funding for programs of regional and national significance under each of the three SAMHSA centers: mental health services, substance abuse treatment and substance abuse prevention. Separate funding is available for the children's mental health services program, projects for assistance in transition from homelessness, the protection and advocacy program, data collection activities undertaken by the Office of Applied Studies and the two block grant programs: the community mental health services block grant and the substance abuse prevention and treatment block grant.

The Committee commends SAMHSA for proposing additional funding to address the treatment gap, but is concerned that these resources are based on reductions in substance abuse prevention activities as well as best practice programs authorized under CMHS, CSAP and CSAT. The Committee notes that the Public Health Service Act authorizes SAMHSA to: "conduct programs, and assure the coordination of such programs with activities of the National Institutes of Health and the Agency for Healthcare Research and Quality, as appropriate, to evaluate the process, outcomes and community impact of treatment and prevention services and systems of care in order to identify the manner in which such services can most effectively be provided." The Committee believes that it is important for SAMHSA to continue to have sufficient resources to fund best practices service research activities that support the development of the most effective prevention and treatment programs to address substance abuse and mental health issues.

The Committee strongly supports SAMHSA's Federal leadership role to improve the quality and availability of empirically based prevention and treatment services in the areas of mental health and substance abuse. To further the translation of research knowledge into practice, the Committee encourages ongoing collaboration between SAMHSA and the National Institutes of Health (specifically with the National Institute of Mental Health, the National Institute of Drug Abuse, and the National Institute on Alcohol Abuse and Alcoholism.) The Committee believes concerted efforts should be undertaken to reduce the current 15- to 20-year lag between the discovery of an effective treatment or intervention and its availability at the community level.

The Committee remains concerned by the disproportionate presence of substance abuse in rural and native communities, particularly for American Indian, Alaska Native and Native Hawaiian communities. The Committee reiterates its belief that funds for prevention and treatment programs should be targeted to those persons and communities most in need of service. Therefore, the Committee has provided sufficient funds within CSAP and CSAT to continue supporting projects that increase knowledge about effective ways to deliver services to rural and native communities. The Committee believes that Community Health Centers should be utilized in this effort.

CENTER FOR MENTAL HEALTH SERVICES

Appropriations, 2002	\$831,904,000
Budget estimate, 2003	822,116,000
Committee recommenda-	
tion	838,116,000

The Committee recommends \$838,116,000 for mental health services, \$6,212,000 more than last year's level and \$16,000,000 more than the budget request. Included in this amount is funding for programs of regional and national significance, the mental health performance partnership block grant to the States, children's mental health services, projects for assistance in transition from homelessness, and protection and advocacy services for individuals with mental illnesses.

The Committee believes that CMHS should promote the model of permanent supportive housing for people who have been homeless for long periods of time. The Committee directs CMHS to work with providers and States to collect information on the amount of block grant funding being used by States for treatment in permanent supportive housing for people who have been homeless for long periods of time. This information should be included in future budget submissions beginning with fiscal year 2005. The Committee also encourages CMHS to monitor the extent to which homeless people assisted with PATH funds enter permanent housing. The Committee intends that funding for PATH help meet the goal of ending chronic homelessness.

Programs of regional and national significance

The Committee recommends \$226,067,000 for programs of regional and national significance, \$3,851,000 less than the fiscal year 2002 amount and \$13,000,000 more than the administration's request. Programs of regional and national significance address priority mental health needs through developing and applying best practices, offering training and technical assistance, providing targeted capacity expansion grants, and changing the delivery system through family, client-oriented and consumer-run activities.

The Committee continues to support funding for mental health counselors for school-age children, as part of an effort to reduce the incidence of youth violence. The Committee intends that \$95,000,000 be used for counseling services for school-age youth. Among other things, the Committee believes that mental health counseling for troubled youth can help prevent violent acts, and therefore is providing continued funding to help schools in that effort. It is again expected that SAMHSA will collaborate with the Departments of Education and Justice to continue a coordinated approach.

The Committee notes that suicide continues to claim almost 30,000 lives each year, making it one of the top 15 causes of death in the United States. For 15- to 24-year-olds and children ages 10-14, suicide is the third leading cause of death. The Committee continues to support State and local efforts to reduce the occurrence of this premature and

unfortunate loss of life. The Committee has included \$3,000,000 to continue supporting the National Suicide Prevention Resource Center. This important initiative supports technical assistance in developing, implementing and evaluating effective suicide prevention programs. The Resource Center serves as a training and field support and acts as a clearinghouse for all pertinent best practices information regarding suicide prevention, and it promotes evaluation of suicide prevention programs to ensure that effective techniques, strategies, and recommended best practices are made available to users. The Committee also continues support for the Suicide Prevention Hotline program.

The Committee appreciates CMHS's commitment to improving the quality, effectiveness and availability of therapeutic services delivered to traumatized children and adolescents; furthering the understanding of the individual, familial, and community impact of child and adolescent traumatic stress and the methods used to prevent its consequences; and reducing the frequency and consequences of traumatic events on children and adolescents. The Committee recommendation includes \$30,000,000 to continue and build on the National Child Traumatic Stress Initiative. Of the amount provided, \$10,000,000 is available in the Public Health and Social Services Emergency Fund.

The Committee remains concerned about the ongoing problems of post-traumatic stress disorder present in the refugee immigrant population in Hawaii. Because these immigrants represent diverse cultures and often have limited mastery of English, the Committee urges vigorous attention to the mental health problems of these future citizens.

The Committee recommendation includes funding for the Safe Schools/Healthy Students Program, which supports the Departments of Health and Human Services, Justice, and Education, working together to develop empirically supported programs to prevent youth violence and to intervene with families, schools, and communities where violence has already occurred. The Committee urges the use of community health centers as part of this effort. The Committee is disappointed by the lack of comprehensive evaluation information from wave one grantees under the Safe Schools/Healthy Students Program. The Committee urges CMHS to accelerate their national evaluation of this important program.

The Surgeon General's report, "Mental Health: Culture, Race, Ethnicity," clearly identifies the existence of racial and ethnic disparities in the mental health system. A major recommendation in the Surgeon General's earlier report "Report on Mental Health" is to increase funding for training minority mental health professionals. Although minorities currently represent 30 percent of our Nation's population and are projected to account for 40 percent in 2025, only 7.2 percent of doctorates awarded in psychology since 1978 have been to people of color. The Committee recognizes the urgency of training additional minority mental health professionals, to include Native Hawaiians, and encourages SAMHSA to provide additional resources to the Minority Fellowship Program.

The Committee continues to recognize the importance of consumer/peer-run programs that help people with mental illnesses live successfully in the community. These low-cost services have an impressive record of assisting people with mental disorders to decrease their dependence on expensive social services and avoid psychiatric hospitalization. Having proved effective, they have been replicated in numerous communities with State and local funding. The Center for Men-

tal Health Services has funded five consumer and consumer-supporter national technical assistance centers that provide training and information to help these groups grow. The Committee has included \$2,000,000 above the budget request to continue the current level of funding for the consumer and consumer-supporter national technical assistance centers. The Committee directs CMHS to support grants to fund five such national technical assistance centers for a period of no less than 5 years.

The Committee is concerned about the prevalence of pregnancy related mental health conditions suffered by women today. The Committee is concerned specifically about the high prevalence of postpartum depression and psychosis suffered by pregnant women today in the United States. Each year, over 400,000 women suffer from postpartum mood changes, with "baby blues" afflicting up to 80 percent of new mothers; postpartum mood and anxiety disorders impairing around 10–20 percent of new mothers; and postpartum psychosis striking 1 in 1,000 new mothers. Therefore, the Committee recommends that resources be expended for the treatment of women and their families suffering from such pregnancy-related mental health conditions.

The Committee recommendation includes \$5,000,000 to continue the elderly treatment and outreach program. Demographic projections show that by the year 2010, there will be approximately 40 million Americans over the age of 65. The Committee notes that more than one in five will experience mental disorders. This grant program will help local communities establish the infrastructure necessary to better serve the mental health needs of older adults.

The Committee supports \$5,000,000 for the jail diversion grant program, an increase of \$1,000,000 over last year. The Committee recognizes that up to 1 million individuals with mental illnesses will either spend time in jail or prison during the current year. This is a most unfortunate statistic, when individuals could be more appropriately treated in a community health setting. Therefore, the Committee urges SAMHSA to work with the Department of Justice, the law enforcement community, the court system and other appropriate agencies and associations to ensure that funding is utilized to divert inappropriate incarcerations and link individuals with mental illnesses with the support they need to avoid future contact with the criminal justice system.

The Committee recommendation includes \$1,000,000 to continue support for new awards under the community action grant program. This program helps communities implement evidence-based exemplary practices that serve adults with serious mental illness and children and adolescents with serious emotional disorders. The Committee notes that this program has met or exceeded performance measures in fiscal year 2000 and fiscal year 2001.

Mental health performance partnership block grant

The Committee recommends \$433,000,000 for the mental health performance partnership block grant, the same amount as the fiscal year 2002 appropriation and the budget request. States use these funds to support the development and implementation of innovative community-based services and maintain continuity of community programs. Funds are allocated to States and territories by formula.

The Children's Health Act of 2000 made several changes to the authority for the mental health block grant, including the development of a performance partnership framework in which States are granted pro-

gram flexibility for achieving a common set of performance measures. The Committee expects SAMHSA to provide detailed information in its fiscal year 2004 congressional justification about the transition to the performance partnership grant framework and funding requested to support this transition.

The Committee recognizes the vital importance of services supported by mental health block grant funds. From fiscal year 1999 to 2002, the Committee has increased the appropriation by 50 percent to help move care for adults with serious mental illness and children with serious emotional disturbance from inpatient care settings to treatment and supports available in the community. Unfortunately, due to tight budget constraints this year, the Committee must concur with the President's budget request for the mental health block grant.

Children's mental health services

The Committee recommends \$96,694,000 for the children's mental health services program, an increase of \$63,000 more than the comparable fiscal year 2002 level and the same as the administration's request. This program provides grants and technical assistance to support community-based services for children and adolescents with serious emotional, behavioral or mental disorders. Grantees must provide matching funds, and services must involve the educational, juvenile justice, and health systems.

The Committee notes the positive findings that program evaluations have generated to date. For example, cross-agency treatment planning has increased from 40 percent in 1997 to more than 62 percent in 2001, which illustrates the extent to which this program helps local program providers—from education and juvenile justice to child welfare—collaborate to support access to quality mental health treatment and services. Further, GPRA outcome measures indicate that targets were exceeded or met for sustained improvements in clinical outcomes, stability of living arrangements and decreases in contacts with law enforcement. The Committee expects that SAMHSA will disseminate widely information about the ways in which local communities can develop comprehensive systems of care that meet the needs of children with serious emotional disorders and their families, as well as support technical assistance for grantees to continue to improve local collaboration.

Projects for assistance in transition from homelessness [PATH]

The Committee recommends \$46,855,000 for the PATH Program, an increase of \$7,000,000 more than the fiscal year 2002 amount and the same amount as the administration's request.

PATH is a critical program which provides outreach, mental health, and case management services and other community support services to individuals with serious mental illness who are homeless or at risk of becoming homeless. The PATH Program makes a significant difference in the lives of homeless persons with mental illnesses. PATH services eliminate the revolving door of episodic inpatient and outpatient hospital care. Multi-disciplinary teams address client needs within a continuum of services, providing needed stabilization so that mental illnesses and co-occurring substance abuse and medical issues can be addressed. Assistance is provided to enhance access to housing, rehabilitation and training, and other needed supports, assisting homeless people in returning to secure and stable lives.

The Committee is aware that approximately 600,000 Americans are homeless on any given night. Of that number, an estimated one-third have serious mental illnesses, and more than one-half also have an

alcohol and/or drug problem. A recent evaluation of the PATH program found that increasing outreach activities was an effective means of linking homeless persons to the services they need, which helps to stabilize their living situations and secure the additional support they need to live a healthy and self-sufficient life. Therefore, the Committee intends to continue supporting this important and effective program.

Protection and advocacy

The Committee recommends \$35,500,000 for the protection and advocacy program, an increase of \$3,000,000 over the fiscal year 2002 amount and the administration's request. This program helps ensure that the rights of mentally ill individuals are protected while they are patients in treatment facilities, or while they are living in the community, including their own homes. Funds are allocated to States according to a formula based on population and relative per capita income.

The Committee has provided additional resources to support the efforts of the protection and advocacy system. Additional funding has enabled State P&A programs to increase the number of clients served, the amount of public awareness and education conducted and the number of training activities delivered. The Committee notes that the P&A programs have exceeded their GPRA performance targets in all of these areas. The Committee recognizes that additional investments are needed to support State P&A programs as they seek to meet their growing responsibilities. State P&A programs continue to support the needs of individuals with mental illness through advocacy and investigation related to incidents involving restraints and seclusion in care or treatment facilities and employment, housing and other supports provided in the community.

CENTER FOR SUBSTANCE ABUSE TREATMENT
Appropriations, 2002 \$2,016,383,000
Budget estimate, 2003 2,142,994,000
Committee recommendation 2,095,000,000

The Committee recommends \$2,095,000,000 for substance abuse treatment programs, an increase of \$78,617,000 over last year's funding and \$47,994,000 less than the budget request. The recommendation includes \$62,200,000 in transfers available under section 241 of the Public Health Service Act. This amount funds substance abuse treatment programs of regional and national significance and the substance abuse prevention and treatment block grant to the States.

The Committee remains concerned about the treatment gap that continues to exist for those Americans in need of substance abuse treatment services. The Committee commends SAMHSA for proposing additional funding to address the treatment gap, but is concerned that these new resources are the result of reductions in substance abuse prevention activities as well as best practice programs authorized under CMHS, CSAP and CSAT. The latest estimates indicate that millions of Americans with serious substance abuse treatment go untreated each year, adding billions in monetary costs to our society and immeasurable emotional pain and suffering for millions of families. Studies have shown that substance abuse treatment is effective at reducing primary drug use by nearly 50 percent, criminal activity by 80 percent and alcohol- and drug-related medical visits by 50 percent while increasing individual financial self-sufficiency. Further, the Committee is aware that research has shown that addiction treatment is as effective as the treatment for other chronic medical conditions. The Committee commends

CSAT for initiating its National Treatment Plan Initiative (NTP), and believes that additional resources need to be devoted to the NTP and to reducing, and eventually eliminating, the treatment gap.

The Committee believes that CSAT should promote permanent supportive housing as a highly effective model for ending chronic homelessness. The Committee directs CSAT to collect information about the amount of block grant funds devoted to treatment for people who have been homeless for long periods of time and have moved into permanent supportive housing. This information should be included in future budget submissions beginning with fiscal year 2005.

The Committee requests that CSAT provide it with a report of fiscal year 2003 funding available for treatment services for Native Americans.

Programs of regional and national significance

The Committee recommends \$310,000,000 for programs of regional and national significance [PRNS]. This amount is \$18,617,000 above the fiscal year 2002 amount and \$47,994,000 less than the budget request.

Programs of regional and national significance include three primary activities: best practice programs are used to develop more information on how best to serve those most in need; training and technical assistance supports dissemination of information through knowledge development; and targeted capacity expansion programs enable the agency to respond to service needs in local communities.

The Committee supports CSAT's proposed expansion of clinically based treatment and related services for adult, juvenile and family drug courts and individuals returning from the community who are on probation, parole, or unsupervised release. The Committee is aware of the rapid increases in the use of drug courts throughout the country as an alternative to the traditional court system. These courts make substance abuse treatment available, when appropriate, as an alternative to incarceration, and are considered a cost-effective approach to helping drug users regain control of their lives.

The Committee continues its strong support of the grants for homeless individuals program, a collaboration between CSAT and CMHS addressing the substance abuse and mental health treatment needs of homeless individuals. The Committee notes that as many as half of homeless adults have histories of alcohol abuse or dependence, one-third have histories of drug abuse and one-quarter have lifetime histories of serious mental illness. The Committee encourages these Centers to devote as much additional funding as possible for new awards.

Programs of regional and national significance include critical support for substance abuse treatment services for the Nation's homeless population. The homeless have unique needs and life circumstances that have received inadequate attention in terms of substance abuse treatment. Therefore, the Committee continues to advocate coordinated and seamless service delivery for the homeless that includes mental health, primary care, and other social services that will support positive treatment outcomes. The Committee recommendation includes additional resources to continue to make progress in this area.

The Committee understands that methamphetamine abuse continues to be a major problem in many areas of the country, in particular the South and the Midwest. The State of Iowa is experiencing a particularly high incidence of methamphetamine abuse, as well as other emerging drug issues. The Committee recommendation includes sufficient funding to support prevention and

treatment demonstration projects in Iowa and other parts of the Midwest and South. School-based prevention demonstration projects would teach the dangers of methamphetamine abuse and addiction as well as other emerging drug issues, using methods that are effective and evidence-based and include initiatives that give students the responsibility to create their own anti-drug abuse education programs for their schools. Treatment demonstrations would carry out planning, establishing, or administering evidence-based treatment programs that are designed to assist individuals to quit their use of methamphetamine or other emerging drugs and remain drug-free.

The Committee encourages CSAT to continue to focus new resources on targeting specific treatment approaches for adolescents. The Committee is aware of the lack of available treatment programs specifically designed to address the needs of adolescents. The Committee believes that adolescents would respond more favorably to treatment services offered in such a manner.

The Committee remains concerned about the incidence of drug addiction among pregnant women and has provided funding within the Committee recommendation for the Residential Treatment Program for Pregnant and Postpartum Women (PPW), authorized under section 508 of the Public Health Service Act. Within the funds appropriated for CSAT, \$3,000,000 shall be used for the PPW program. The Committee is particularly concerned about the increased incidence of methamphetamine use and urges the Secretary to fund a certain number of PPW programs in areas of high methamphetamine use.

Substance abuse prevention and treatment block grant

The Committee recommends \$1,785,000,000 for the substance abuse prevention and treatment block grant, \$60,000,000 more than the fiscal year 2002 level and the same amount as the administration's request. The recommendation includes \$62,200,000 in transfers available under section 241 of the Public Health Service Act.

The block grant provides funds to States to support alcohol and drug abuse prevention, treatment, and rehabilitation services. Funds are allocated to the States according to formula. State plans must be submitted and approved annually.

The Committee recommendation includes an additional \$60,000,000 for the block grant to reduce the treatment gap.

The Children's Health Act of 2000 made several changes to the authority for the substance abuse prevention and treatment block grant, including the development of a performance partnership framework in which States are granted program flexibility for achieving a common set of performance measures. The Committee expects SAMHSA to provide detailed information in its fiscal year 2004 congressional justification about the transition to the performance partnership grant framework and proposed funding that will support this transition.

CENTER FOR SUBSTANCE ABUSE PREVENTION
Appropriations, 2002 \$198,011,000
Budget estimate, 2003 152,815,000
Committee recommendation 183,379,000

The Committee recommends \$183,379,000 for programs to prevent substance abuse, a decrease of \$14,632,000 less than last year's level and \$30,564,000 more than the budget request. This amount funds substance abuse prevention programs of regional and national significance.

The Committee is very concerned about the administration's request to significantly

reduce funding for prevention activities. The Committee notes that prevention is a key partner in the effort to reduce the treatment gap. The Committee is aware that the National Drug Control Strategy has established 2-year goals of reducing current use by 10 percent for 12- to 17-year-olds and individuals 18 years and older. States and communities will be challenged to develop the capacity to deliver effective substance abuse prevention programs without additional resources, especially given the demographic surge in youth aged 15-20 expected during the current decade. The Committee recognizes that this cohort exhibits the highest rates of substance abuse initiation. If current rates hold steady during the current decade, this cohort of individuals would cause a significant increase in the treatment gap.

The Committee is aware that CSAP's science-based model programs show that prevention investments have the potential to reduce substance abuse rates by 25 percent. Further, delaying the age of first use can slow the progression of abuse, dependency and the need for treatment. The Committee also notes that prevention programs reduce the risk factors that are associated with later use and increase the protective factors that help individuals avoid use, thus producing a downward pressure on the treatment gap over the long term.

The Committee also recognizes that prevention programs are cost-effective. The Office of National Drug Control Policy has shown a direct correlation between increases in drug prevention investments and decreases in the prevalence of drug use. Prevention programs show cost-benefit ratios in the range of 8:1 to 15:1 for reduced costs in crime, school and work absenteeism, as well as reduced need for and costs of substance abuse treatment. Therefore, the Committee has provided \$30,564,000 over the budget request to continue investments in the Nation's substance use prevention infrastructure including the following programs: Starting Early, Starting Smart, Community-Initiated Prevention Intervention, FAS/FAE, Ecstasy and National Clearinghouse for Alcohol and Drug Information.

Programs of regional and national significance

The Committee has provided \$183,379,000 for programs of regional and national significance [PRNS], \$14,632,000 less than the fiscal year 2002 amount and \$30,564,000 more than the administration's request. The Center for Substance Abuse Prevention is the sole Federal organization with responsibility for improving accessibility and quality of substance abuse prevention services. Through the programs of regional and national significance activity, CSAP supports: development of new practice knowledge on substance abuse prevention; identification of proven effective models; dissemination of science-based intervention information; State and community capacity-building for implementation of proven effective substance abuse prevention programs; and programs addressing new needs in the prevention system.

The Committee notes the alarming increase in use and availability of ecstasy and other club drugs among our Nation's youth. For 2 consecutive years, ecstasy use reported by 10th and 12th grade students has increased. According to SAMHSA's Drug Abuse Warning Network, ecstasy-related emergency room admissions in the United States increased significantly from 253 in 1994 to 4,511 in 2000. The Committee urges SAMHSA to pay close attention to this and other emerging drug use issues and has included \$5,000,000 to continue and expand on the program funded last year.

The Committee is aware of the need to strengthen fetal alcohol syndrome (FAS)

prevention efforts and improve service delivery by ensuring that professionals in key fields are knowledgeable about FAS and related birth defects, particularly in high-prevalence regions. The Committee has therefore included sufficient funding to support training on FAS and related birth defects for professionals and students in health care, education, social work, foster care, criminal justice, and other relevant fields.

The Committee notes the insufficient number of effective fetal alcohol syndrome and fetal alcohol effects (FAS/FAE) programs in communities affected by this problem. The Committee has provided sufficient funding to expand efforts to identify, disseminate and implement effective FAS/FAE prevention and treatment programs.

The Committee is troubled by the recent findings of the NIAAA Task Force on College Drinking. The study reveals that drinking by college students age 18-24 contributes to an estimated 1,400 student deaths, 500,000 injuries, and 70,000 cases of sexual assault or date rape each year. It also estimates that more than one-fourth of college students that age have driven in the past year while under the influence of alcohol. The Committee commends CSAP for funding programs designed to prevent alcohol problems among college students. The Committee encourages CSAP to continue to enhance its work in this area and to disseminate information about scientifically based prevention programs that can be utilized in appropriate settings. The Committee notes that two related programs were added this year to the National Registry of Effective Prevention Programs.

The Committee is aware that alcohol abuse, though common on many campuses, does not run rampant among all college and university students, and also notes that one of the challenges to reducing alcohol abuse among this population is the perceived norm that everyone is doing it. Previous studies have shown that most students drink moderately or abstain. The Committee recognizes that the proportion of nondrinkers on college campuses increased from 15 to 19 percent between 1993 and 1999.

The Committee strongly supports the information dissemination activities of the National Clearinghouse for Alcohol and Drug Information (NCADI). Last year, the NCADI website received more than 86 million hits; its radio messages reached almost 52 million listeners; and it provided critical support to individuals in the prevention and treatment field. The Committee understands that NCADI exceeded its GPRA performance targets for both the number of information requests received, as well as the level of customer satisfaction achieved. Therefore, the Committee continues to support NCADI at no less than last year's level of funding, so it can continue to serve as a one-stop source for comprehensive, customer-oriented information regarding substance use prevention, intervention and treatment.

PROGRAM MANAGEMENT

The Committee recommends \$86,467,000 for program management activities of the agency, \$4,925,000 less than the fiscal year 2002 level and \$11,306,000 more than the President's request. The recommendation includes \$12,000,000 in transfers available under section 241 of the Public Health Service Act.

The program management activity includes resources for coordinating, directing, and managing the agency's programs. Program management funds support salaries, benefits, space, supplies, equipment, travel, and departmental overhead required to plan, supervise, and administer SAMHSA's programs.

Last year, the Committee provided \$9,000,000 requested in the SAMHSA budget

for data collection initiatives. These additional resources were requested and provided to make much-needed improvements in the Drug Abuse Warning Network (DAWN) and the Drug and Alcohol Services Information System (DASIS.) The Committee notes that the DAWN captures information from hospital emergency departments as a means of tracking current trends in illicit and licit drug abuse. The DASIS is the only source of national data on services available for substance abuse treatment and the characteristics of individuals admitted for treatment. The Committee is disappointed that funds required to sustain these improvements were eliminated from the SAMHSA budget.

The Committee notes that only 36 percent of targets for fiscal year 2001 had reported data upon release of the Final Fiscal Year 2003 GPRA Annual Performance Plan and fiscal year 2001 Annual Performance Report. The Committee expects that SAMHSA will continue to improve the quality and timeliness of data required for compliance with GPRA.

The Committee has recommended additional resources for the program management account above the budget request, to continue support for critical investments in data collection activities, to support technical assistance to States as the block grants are transitioned to performance partnerships and to restore excessive reductions proposed in staff and associated expenses.

The Committee also recommends \$955,000 for Federally owned facilities at St. Elizabeths Hospital. The budget request did not include funds for this purpose. The funds will pay for day-to-day protection and maintenance, environmental remediation, historic and archaeological studies, and cemetery clock tower maintenance. These activities are necessary to prepare the facilities for transfer to the General Services Administration as excess property.

AGENCY FOR HEALTHCARE RESEARCH AND QUALITY

Appropriations, 2002	\$298,745,000
Budget estimate, 2003	250,000,000
Committee recommendation	308,645,000

The Committee recommends \$308,645,000 for the Agency for Healthcare Research and Quality [AHRQ]. This is \$58,645,000 more than the administration request and \$9,900,000 more than the fiscal year 2002 level. The administration proposed to fund AHRQ through transfers available under section 241 of the Public Health Service Act. The Committee did not approve this request.

The Agency for Healthcare Research and Quality was established in 1990 to promote improvements in clinical practice and patient outcomes, promote improvements in the financing, organization, and delivery of health care services, and increase access to quality care. AHRQ is the Federal agency charged to produce and disseminate scientific and policy-relevant information about the cost, quality, access, and medical effectiveness of health care. AHRQ provides policymakers, health care professionals, and the public with the information necessary to improve cost effectiveness and appropriateness of health care and to reduce the costs of health care.

HEALTH COSTS, QUALITY, AND OUTCOMES

The Committee provides \$252,645,000 for research on health costs, quality and outcomes [HCQO], which is \$58,645,000 more than the administration request and \$5,000,000 above the fiscal year 2002 level. HCQO research activity is focused upon improving clinical practice, improving the health care system's capacity to deliver quality care, and tracking progress toward health goals through monitoring and evaluation.

The Committee is disappointed that the administration's request for AHRQ reflected a cut of 16 percent, or almost \$49,000,000. This proposed cut would prevent the agency from issuing any new grants or contracts, and would require current, non-patient safety grants to be cut in half. AHRQ's research provides crucial information to policymakers regarding key health issues, such as how to improve the quality of care, reduce costs, eliminate health disparities, and translate the medical discoveries made at the National Institutes of Health into improved health care services for all Americans. Examples of research supported by the Agency include studies showing that patients who take beta blockers prior to bypass surgery have improved survival rates, that newer antidepressants are equally as effective as older medication in the treatment of depression, and that African-American Medicare beneficiaries are far less likely than white beneficiaries to receive flu shots. The Committee believes that the health systems research sponsored by AHRQ is an important complement to the biomedical research performed at NIH, and is committed to ensuring that sufficient funding exists for this type of research.

The Committee is also concerned that the administration has proposed transferring \$10,000,000 from AHRQ to the Department of Commerce for the Current Population Survey. While the Committee supports improvements to the CPS, it is displeased that the administration has chosen to fund this activity from an agency with such a small budget. The Committee does not approve the administration's proposal to shift funds to the Department of Commerce, and directs that none of AHRQ's funds be used or transferred for this purpose.

The Committee notes that, as a result of funds it provided 3 years ago, the Agency has funded valuable research relating to bioterrorism. The Committee is aware that AHRQ has sponsored a web site to help primary care physicians learn how to diagnose and treat bioterrorist agents such as smallpox and anthrax. AHRQ also funded a "real time" early warning system for infectious disease outbreaks developed at Carnegie Mellon University, which was highlighted by President Bush in February. The Committee believes that this research is an integral part of efforts to ensure that our health care system is prepared for a bioterrorism attack. For this reason the Committee has provided AHRQ with an additional \$5,000,000 for bioterrorism research within the Public Health and Social Services Emergency Fund.

The Committee continues to be very concerned about the enormous personal and economic cost of medical errors. More people die annually from medical errors than from automobile accidents, breast cancer, or AIDS. During the past 2 years the Committee has provided funding for initiating research into the causes of medical errors in the hope of dramatically improving the safety of health care services in this country. For fiscal year 2003, the Committee directs AHRQ to devote \$60,000,000 of the total amount provided for HCQO to determining ways to reduce medical errors. This represents an increase of \$5,000,000 over the amount provided last year. The Committee understands that these funds will be used to provide challenge grants to health facilities to implement local safety interventions, and to develop a program to train patient safety experts.

Childhood birth defects and developmental disorders.—The Committee recognizes the importance of helping children suffering from birth defects and developmental disorders. These include cleft lip, cleft palate, missing limbs and other facial deformities from

hemangiomas, hemifacial and microsomia to microtia, aural atresia, and craniosynostosis. The Committee, therefore, urges the Agency to identify surgical procedures and treatment protocols for congenital deformities that would clearly differentiate reconstructive surgery from cosmetic surgery. Also, the Committee urges the Agency to commission one of its Centers for Evidence-based Practice to conduct research for the development of standards for the treatment of congenital deformities.

Health disparities.—The Committee encourages the Agency to carefully evaluate the analysis, findings, and recommendations of the March 2002 Institute of Medicine report regarding the disparities of medical care delivery to minorities. In particular, the Agency should pursue creative ways to address this serious finding and improve health care delivery for African-Americans, those of Hispanic and Asian origin, Native-Americans, Alaskans and Hawaiians.

Mental Illness and Older Americans.—The Committee is seriously concerned about the prevalence of undiagnosed and untreated mental illness among older Americans. Affective disorders, including depression, anxiety, dementia, and substance abuse and dependence, are often misdiagnosed or not recognized by primary and specialty care physicians in their elderly patients. While effective treatments for these conditions are available, there is an urgent need to translate advancements from biomedical and behavioral research to clinical practice. The Committee urges AHRQ to support evidence-based research projects focused on the diagnosis and treatment of mental illnesses in the geriatric population, and to disseminate evidence-based reports to physicians and other health care professionals.

MEDICAL EXPENDITURES PANEL SURVEYS

The Committee provides \$53,300,000 for health insurance and medical expenditures panel surveys [MEPS], which is the same as the administration request and \$4,800,000 above the fiscal year 2002 level. MEPS is intended to obtain timely national estimates of health care use and expenditures, private and public health insurance coverage, and the availability, costs and scope of private health insurance benefits. It also develops cost and savings estimates of proposed changes in policy and identifies impact of policy changes on payers, providers, and patients.

Program support

The Committee recommends \$2,700,000 for program support. This amount is the same as the administration request and is \$100,000 more than the fiscal year 2002 level. This activity supports the overall management of the Agency.

CENTERS FOR MEDICARE AND MEDICAID SERVICES

GRANTS TO STATES FOR MEDICAID

Appropriations, 2002	\$107,119,398,000
Budget estimate, 2003	112,090,218,000
Committee recommendation	112,090,218,000

The Committee recommends \$112,090,218,000 for Grants to States for Medicaid. This amount is \$4,970,820,000 more than the fiscal year 2002 appropriation and the same as the administration's request. This amount excludes \$46,601,937,000 in fiscal year 2002 advance appropriations for fiscal year 2003. In addition, \$51,861,386,000 is provided for the first quarter of fiscal year 2004, as requested by the administration.

The Medicaid program provides medical care for eligible low-income individuals and families. It is administered by each of the 50 States, the District of Columbia, Puerto

Rico, and the territories. Federal funds for medical assistance are made available to the States according to a formula, which determines the appropriate Federal matching rate for State program costs. This matching rate is based upon the State's average per capita income relative to the national average, and shall be no less than 50 percent and no more than 83 percent.

PAYMENTS TO HEALTH CARE TRUST FUNDS

Appropriations, 2002	\$81,979,200,000
Budget estimate, 2003	81,462,700,000
Committee recommendation	81,462,700,000

The Committee recommends \$81,462,700,000 for Federal payments to health care trust funds. This amount is the same as the administration's request and is a decrease of \$516,500,000 from the fiscal year 2002 appropriation.

This entitlement account includes the general fund subsidy to the Supplementary Medical Insurance Trust Fund (Medicare Part B), plus other reimbursements to the Hospital Insurance Trust Fund (Medicare Part A), for benefits and related administrative costs that have not been financed by payroll taxes or premium contributions.

The Committee has provided \$80,905,000 for the Federal payment to the Supplementary Medical Insurance Trust Fund. This payment provides matching funds for premiums paid by Medicare Part B enrollees. This amount is the same as the administration's request and \$427,000,000 less than the fiscal year 2002 amount.

The recommendation also includes \$225,000,000 for hospital insurance for the uninsured. This amount is the same as the administration's request and is \$67,000,000 less than the 2002 amount.

The Committee also recommends \$168,000,000 for Federal uninsured benefit payment. This payment reimburses the Hospital Insurance Trust Fund for the cost of benefits provided to Federal annuitants who are eligible for Medicare. This amount is the same as the administration's request and is \$18,000,000 more than the fiscal year 2002 appropriation.

The Committee recommendation includes \$164,700,000 to be transferred to the Hospital Insurance Trust Fund as the general fund share of CMS's program management administrative expenses.

PROGRAM MANAGEMENT

Appropriations, 2002	\$2,437,083,000
Budget estimate, 2003	2,507,914,000
Committee recommendation	2,559,664,000

The Committee recommends \$2,559,664,000 for CMS program management. This is \$51,750,000 more than the administration's request and \$122,581,000 more than the fiscal year 2002 enacted level.

Research, demonstrations, and evaluations

The Committee recommends \$68,400,000 for research, demonstration, and evaluation activities. This amount is \$48,801,000 less than the amount provided in fiscal year 2002 and \$40,000,000 more than the administration request.

CMS research and demonstration activities facilitate informed, rational Medicare and Medicaid policy choices and decision making. These studies and evaluations include projects to measure the impact of Medicare and Medicaid policy analysis and decision making, to measure the impact of Medicare and Medicaid on health care costs, to measure patient outcomes in a variety of treatment settings, and to develop alternative strategies for reimbursement, coverage, and program management.

The Committee has included \$40,000,000 for Real Choice Systems Change Grants to

States to fund initiatives that establish specific actions steps and timetables to achieve enduring system improvements and to provide long term services and supports, including community-based attendant care, to eligible individuals in the most integrated setting appropriate. Grant applications should be developed jointly by the State and Consumer Task Force. The Task Force should be composed of individuals with disabilities, consumers of long-term care services and supports, and those who advocate on behalf of such individuals. Grant funded activities should focus on the following areas of need as determined by the States and the Task Force: community-integrated personal assistance services, building quality infrastructures for community-based long term care systems, enabling integrated long term support services to follow the individual across settings in a manner that permits as much participant direction as possible, developing innovative methods to address direct service worker shortages such as affordable health coverage and providing respite for caregivers of adults or children. These Real Choice Systems Change grants funds shall remain available until expended. To assure the sufficient time to promote enduring systems change, grantees will be allowed to utilize the funds over a 3-year period.

The recommended funding level for the research and demonstration program will provide for continuation of current activities. Priority areas for CMS research include access to high-quality health care, health service delivery systems, and provider payment systems. The Committee encourages CMS to consider a demonstration project to extend and expand islet cell transplantation clinical trials.

Medicare operations

The Committee recommends \$1,680,084,000 for Medicare operations (formerly known as Medicare contractors), which is \$5,000,000 more than the budget request and \$146,084,000 more than the fiscal year 2002 appropriation. In addition, \$720,000,000 is available for the Medicare Integrity Program within the mandatory budget as part of the health insurance reform legislation.

The Medicare operations line item covers a broad range of activities including claims processing and program safeguard activities performed by Medicare contractors. These contractors also provide information, guidance, and technical support to both providers and beneficiaries. In addition, this line item includes a variety of projects that extend beyond the traditional fee-for-service arena.

The Committee recommends no less than \$12,500,000 to support grants for State Health Insurance Counseling and Assistance programs (SHIPs). SHIPS provide information, counseling and decision support to people with Medicare.

Medicare contractors partner with the Federal Government to administer the Medicare fee-for-service program. Contractors pay claims, provide beneficiary and provider customer service and education, and combat Medicare waste, fraud and abuse. The Committee believes that it is critical for Medicare contractors to be adequately funded. It is for this reason that the Committee has continued to increase Medicare contractor funding over the years. However, the Committee is concerned that the funding appropriated for Medicare contractor activities is not being appropriately distributed by CMS to its Medicare contractors. The Committee expects CMS to manage these resources so that Medicare contractors have the funding needed to handle total workloads, which are steadily increasing. The Committee also expects funding to be provided to Medicare contractors in a timely manner. Further, the

Committee strongly recommends CMS eliminate the 5 percent cap on transferring funds among functions so that contractors have greater flexibility to manage their resources in a manner that best matches programmatic needs. The Committee expects CMS to include, within its fiscal year 2004 congressional justification, a report on how fiscal year 2003 resources were allocated to Medicare contractors.

State survey and certification

Survey and certification activities ensure that institutions and agencies providing care to Medicare and Medicaid beneficiaries meet Federal health, safety, and program standards. On-site surveys are conducted by State survey agencies, with a pool of Federal surveyors performing random monitoring surveys.

The Committee recommends \$254,397,000 for Medicare State survey and certification activities, an increase of \$6,750,000 over the budget request and the same as the fiscal year 2002 level. The Committee understands that this level of effort will be supplemented by support contracts funded by the Quality Improvement Organization (formerly the Peer Review Organization) activity; this will bring the program level for survey and certification activities to \$271,297,000 for fiscal year 2003, a real increase of \$16,900,000 over the fiscal year 2002 level.

Federal administration

The Committee recommends \$556,783,000 for Federal administration costs, the same as the administration's request. The Committee recommendation is \$25,298,000 more than the fiscal year 2002 level.

This funding level will support 4,476 full-time equivalent positions, a decrease of 93 from the fiscal year 2002 adjusted level. Most of the increase is for fixed expenses of personnel compensation and benefits.

The Committee has been very pleased with the efforts of CMS under its demonstration authority to address the extraordinary adverse health status of Native Hawaiians in Waimanalo, Hawaii. The Committee urges an additional focus upon American Samoa residents in that geographical area utilizing the expertise of the Waimanalo Health Center and its Mauli Ola program.

The Committee continues to support and invest in the enhanced quality of care for seniors. The Committee strongly urges the Secretary of Health and Human Services to implement the MedPAC's recommendation to assess contemporary models for pharmacists' services to ensure that seniors have access to this important patient care. The Committee urges the Secretary to consult with various national organizations representing pharmacists and pharmacies and to report back to Congress within this fiscal year.

The Committee remains extremely concerned over CMS' continuing failure to articulate clear guidelines and to set expeditious timetables for consideration of new technologies, procedures and products for Medicare coverage. A particularly troubling example is CMS' lengthy delays and failure to articulate clear standards regarding Medicare coverage of positron emission tomography (PET). The effect of these delays in instituting Medicare coverage is to continue to deny the benefits to these technologies and procedures to Medicare patients. The Committee also remains concerned that CMS appears to be requiring some new technologies to repeat clinical trials and testing that have already gained FDA approval. The Committee is also concerned that CMS appears to be requiring substantially different levels of evidence to approve various new products for Medicare coverage. For example, very little documentation is required for approval of

magnetic resonance angiography (MRA), while voluminous amounts of data are required to make a coverage decision on PET. The Committee remains concerned that the 120-person Medicare Coverage Advisory Committee may be further delaying coverage decisions and creating unnecessary costs for the Medicare program. These include the commissioning of studies that are not based on sound, established scientific principles. Because of the possible duplication of efforts among HHS agencies and related unnecessary costs to the Medicare program and the Department, the Committee again asks that the Secretary take a leadership role in resolving this matter expeditiously.

The Committee is aware of the joint activities of CMS and HRSA to improve access to medical and dental care for mothers and children in underserved populations. CMS and the Maternal and Child Health program at HRSA, have worked together to assist States to reduce barriers to care for Medicaid and SCHIP populations for maternal and child health care including oral health care. The Committee urges these agencies to continue their partnership and expand support for State oral health systems grants and innovative demonstration projects for the prevention and early intervention of dental diseases in young children, State dental access summit meetings, and the National Maternal and Child Oral Health Resource Center. The Committee recognizes that such agency collaborations are instrumental for providing coordinated services that do not duplicate limited resources.

The Committee is concerned that CMS has not updated its state guidance document on dental care for Medicaid-eligible children in over 20 years. The Committee is aware that CMS has commissioned and received an update of The Early and Periodic Screening, Diagnostic and Treatment (EPSDT) guide from the American Academy of Pediatric Dentistry. This document is vital to ensuring that the states correctly implement EPSDT dental requirements and provide full coverage for all eligible children. Furthermore, the guidance will help states improve access to dental care by providing a better understanding of the dental workforce and financing system. The Committee strongly urges CMS to release a revised state guidance manual on dental care under the Medicaid/EPSDT program before February 28, 2003.

The Committee expects the Secretary to issue "L" Codes based on fair and reasonable reimbursement levels to cover Total Body Orthotic Management for Non-Ambulatory severely disabled nursing home residents. Such treatment will be a medically prescribed device consisting of custom fitted individual braces with adjustable joints designed to improve function, retard progression of musculoskeletal deformity, or to restrict, eliminate or assist in the functioning of lower and upper extremities, pelvic, spinal, and cervical regions of the body. Such device will consist of individually adjustable braces that are attached to a frame which is an integral component of the device, and for which the individual braces cannot function or be used apart from the frame. This responds to a long-standing Committee concern about an unintended consequence of HCFA Ruling 96-1. While designed to crack down on fraud and abuse in the DME market on Part B Medicare reimbursement, this ruling also denied a highly specialized whole body orthotic treatment that dramatically improves the medical condition and quality of life for some severely disabled Medicare beneficiaries under full time care in nursing facilities. The Committee notes the May 2002, congressionally authorized GAO report entitled "Orthotics Ruling Has Implications

for Beneficiary Access and Federal and State Costs" that identifies a substantial nursing home population that has been denied this care as a result of 96-1, but recommends that a restoration of such care be accompanied by appropriate controls, consistent with those established for existing "L" codes, that protect the integrity of the Medicare Program. The committee recognizes the need for these controls, but at the same time notes that beneficiaries have been without this treatment for over 5 years and urges CMS to expeditiously re-establish reimbursement measures for these services.

The Committee directs the Secretary of Health and Human Services to review the Medicare Geographic Classification Review Board's criteria for reclassification determinations with respect to making payments to hospitals. The Committee requests the review to include a detailed analysis of disparities among hospital's reimbursement rates for hospitals in metropolitan statistical areas that border on areas that have a higher wage indices; the difficulty hospitals face in losing skilled medical personnel to neighboring areas with urban classifications and higher wage and salary structures; geographic and environmental impediments to traditional community routes; the base costs on which the wage index is applied; and the affect lower wage indices have on the quality of care. The Committee directs the Secretary to report to the Committee no later than February 28, 2003.

The Committee requests that the Secretary conduct a comprehensive study of current literature and best practices to determine the cost-effectiveness and impact on medical outcomes of behavioral-based weight loss services in conjunction with the nutritional therapy benefit. The Committee directs the study to include assessment of group-based weight loss management services and the proper qualifications of individuals to conduct such programs, including those trained to provide such programs that have completed clinical trials and have demonstrated their efficacy through publications in peer-reviewed scientific journals, to produce and maintain weight loss.

The Committee understands that concerns have been raised about Medicare reimbursement rules for certain anemia drugs under the Outpatient Prospective Payment program. The Committee therefore directs the Administrator of the Centers for Medicare and Medicaid Services to conduct a study examining claims data from hospitals and physicians to determine comparable dosage of biologicals used for the treatment of anemia in cancer patients. This study shall be completed and submitted to the Secretary of the Department of Health and Human Services and the Committee on Appropriations no later than April 1, 2003.

ADMINISTRATION FOR CHILDREN AND FAMILIES

PAYMENTS TO STATES FOR CHILD SUPPORT ENFORCEMENT AND FAMILY SUPPORT PROGRAMS

Appropriations, 2002	\$2,536,313,000
Budget estimate, 2003	2,416,800,000
Committee recommendation	2,475,800,000

The Committee recommends that \$2,475,800,000 be made available in fiscal year 2003 for payments to States for child support enforcement and family support programs. The Committee recommendation provides the full amount requested under current law. The budget request includes savings of \$59,000,000 based on proposed legislation.

These payments support the States' efforts to promote the self-sufficiency and economic security of low-income families. These funds also support efforts to locate noncustodial parents, determine paternity when nec-

essary, and establish and enforce orders of support. The appropriation, when combined with the \$1,100,000,000 in advance funding provided in last year's bill and an estimated \$461,000,000 from offsetting collections, supports a program level of \$4,036,800,000.

The Committee also has provided \$1,100,000,000 in advance funding for the first quarter of fiscal year 2004 for the child support enforcement program, the same as the budget request.

LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM

Appropriations, 2002	\$2,000,000,000
Budget estimate, 2003	1,700,000,000
Committee recommendation	1,700,000,000

The Committee recommendation for LIHEAP is \$1,700,000,000. LIHEAP is made up of two components: the State grant program and the contingency fund. The recommended amount for the State grant program is \$300,000,000 more than the administration request and the same amount as last year. However, due to tight budget constraints and the current availability of \$300,000,000 in the contingency fund, the Committee does not recommend any additional funds for this purpose. The administration requested \$300,000,000.

LIHEAP grants are awarded to States, territories, Indian tribes and tribal organizations to assist low-income households in meeting the costs of home energy. States receive great flexibility in how they provide assistance, including direct payments to individuals and vendors and direct provision of fuel.

The Committee recommendation includes \$1,700,000,000 for the State grant program, the same amount as last year's funding level and \$300,000,000 more than the amount requested by the administration. These resources are distributed by formula to States, territories, Indian tribes and tribal organizations defined by statute, based in part on each State's share of home energy expenditures by low-income households nationwide.

The Committee recommendation does not include \$300,000,000 in additional resources for the contingency fund as requested by the administration. The contingency fund may be used to provide assistance to one or more States adversely affected by extreme heat or cold, significant price increases or other causes of energy-related emergencies. The Committee notes that \$300,000,000 in no-year funding is available currently in the contingency fund. The Committee is committed to ensuring that sufficient resources are available in the fund, to provide additional assistance to households with energy burdens not met by the regular program and meet the objectives of the authorizing statute. The Committee intends to monitor the availability of resources in the contingency fund and will consider future action, as needed, in subsequent appropriations bills.

The Committee is disappointed by the unwillingness of the administration to release any or all of the \$300,000,000 in contingency funding currently available. The Committee notes that in the Statement of the Managers accompanying the Supplemental Appropriations Act, 2001 (Public Law 107-20) the conferees encouraged the administration to release contingency funds provided by this Act due to the pressing additional energy assistance needs of millions of eligible families. The Committee again notes that the authorizing statute states that the contingency fund was authorized to meet the additional home energy assistance needs of one or more States arising from a natural disaster or other emergency, as defined in section 2603(1)(A-G), which includes six other factors not related to weather or natural disasters.

The Committee is aware of data that has been reported over the past 4 months that show the definition of emergency has been met in many States. The Committee directs the Department to provide a report within 60 days after the enactment of this bill identifying the sources of data used for considering release of contingency funds for each of the parts of the emergency definition.

The Committee encourages the Department to work with appropriate agencies and associations to make sure data is available to administer this program, and in particular, make decisions about release of contingency funding.

The Committee intends that up to \$27,500,000 of the amount recommended for LIHEAP for fiscal year 2003 be used for the leveraging incentive fund. The fund will provide a percentage match to States for private or non-Federal public resources allocated to low-income home energy benefits.

REFUGEE AND ENTRANT ASSISTANCE

Appropriations, 2002	\$460,195,000
Budget estimate, 2003	452,724,000
Committee recommendation	442,724,000

The Committee recommends \$442,724,000 for refugee and entrant assistance, \$17,471,000 less than the fiscal year 2002 level and \$10,000,000 less than the budget request.

Based on an estimated refugee admission ceiling of 75,000, this appropriation, together with prior-year funds available for fiscal year 2003 expenses, will enable States to continue to provide at least 8 months of cash and medical assistance to eligible refugees and entrants, a variety of social and educational services, as well as foster care for refugee and entrant unaccompanied minors.

The Committee is committed to ensuring that the American public is safe and not exposed to potential security risks. However, the Committee also is concerned about the additional hardships imposed on individuals fleeing their homes from civil strife, persecution, and torture as they await additional security procedures in potentially dangerous temporary locations and refugee camps. As a result of these delays, almost 40,000 refugees under the admissions ceiling for fiscal year 2002 were not allowed to resettle in the United States. These unused slots resulted in fewer transitional, medical and support services provided than estimated under the fiscal year 2002 appropriation, so some savings exist in these programs. Given the tremendous budgetary pressure on the Committee this year, the Committee recommends a small reduction of \$10,000,000 in these programs for fiscal year 2003. The Committee recommendation will not affect the ability of programs to meet fully the demand for services under the fiscal year 2003 admissions ceiling, as sufficient carryover funds are available to offset the proposed reduction. The Committee intends to closely monitor the situation to ensure that sufficient funding is available to meet the critical needs of individuals fleeing persecution throughout the world.

The Refugee and Entrant Assistance Program is designed to assist States in their efforts to assimilate refugees, asylees, Cuban and Haitian entrants, and adults and minors who are trafficking victims, into American society as quickly and effectively as possible. The program funds State-administered transitional and medical assistance, the voluntary agency matching grant program, programs for victims of trafficking and torture, employment and social services, targeted assistance, and preventive health.

In order to carry out the refugee and entrant assistance program, the Committee recommends \$221,291,000 for transitional and medical assistance, including State administration and the voluntary agency program;

\$10,000,000 for victims of trafficking; \$147,121,000 for social services; \$4,835,000 for preventive health; and \$49,477,000 for targeted assistance.

Section 412(a)(7) of title IV of the Immigration and Nationality Act authorizes the use of funds appropriated under this account to be used to carry out monitoring, evaluation, and data collection activities to determine the effectiveness of funded programs and to monitor the performance of States and other grantees.

The Committee recommends \$10,000,000 to treat and assist victims of torture. These funds may also be used to provide training to healthcare providers to enable them to treat the physical and psychological effects of torture. The Committee acknowledges that well-established treatment centers, such as the Center for Victims of Torture, have developed the knowledge base that has fostered growth of treatment facilities around the country and strengthened treatment services generally. This positive trend may continue if leading centers are able to expand their staffs to create more trainers and improve evaluation and research needed to guide and develop new programs.

CHILD CARE AND DEVELOPMENT BLOCK GRANT

Appropriations, 2002	\$2,099,976,000
Budget estimate, 2003	2,099,994,000
Committee recommendation	2,099,994,000

The Committee recommendation provides \$2,099,994,000 for the child care and development block grant, \$18,000 more than last year and the same as the budget request.

The child care and development block grant supports grants to States to provide low-income families with financial assistance for child care; for improving the quality and availability of child care; and for establishing or expanding child development programs. The funds are used to both expand the services provided to individuals who need child care in order to work or attend job training or education and allow States to continue funding the activities previously provided under the consolidated programs.

The Committee is aware that the authorization for the child care and development block grant program expired on September 30, 2002. The block grant was last reauthorized in 1996 as part of the Personal Responsibility and Work Opportunity Reconciliation Act. The Act established the child care and development fund, which consists of mandatory funding provided under the Social Security Act and discretionary funding supported by annual appropriations under the child care and development block grant program.

The Committee believes that significant increases in mandatory funding for child care should be supported by the reauthorization of the Welfare Reform law to pay for additional work requirements and to respond to the needs of low income, working poor families. The Welfare Reform law established policies that have resulted in a significant increase in the working Americans. Work requirements have decreased the welfare casesload by 1.8 million families from 1996–1999, many of whom are not earning a living wage and are in need of assistance. The share of families working or participating in work-related activities while receiving TANF also grew significantly; by fiscal year 1999, nearly 900,000 TANF parents were employed or engaged in work activities. Also, there has been a large increase in labor force participation by low income single parents, which includes many families not previously connected to the labor force; between 1996 and 1999, the number of employed single mothers grew from 1.8 million to 2.7 million.

The Committee recommendation continues specific earmarks in appropriations lan-

guage, also included in the budget request, that provide targeted resources to specific policy priorities including \$19,120,000 for the purposes of supporting resource and referral programs and before and afterschool services. This represents the Federal commitment to the activities previously funded under the dependent care block grant. The Committee expects that these funds will not supplant current funding dedicated to resource and referral and school age activities provided by the child care and development block grant. The Committee strongly encourages States to address the matters of before and afterschool care and the establishment of resource and referral programs with the funds provided in this program.

The Committee recommendation includes an additional \$272,672,000 for child care quality activities, and sets aside \$100,000,000 specifically for an infant care quality initiative. These funds are recommended in addition to the 4 percent quality earmark established in the authorizing legislation. The Committee has provided these additional quality funds because of the considerable research that demonstrates the importance of serving children in high quality child care settings which include nurturing providers who are educated in child development and adequately compensated. While considerable progress has been made, the Committee believes States should continue to invest in education and training linked to compensation of the child care workforce in order to improve the overall quality of child care.

The Committee recommendation also provides \$10,000,000 for child care research, demonstration and evaluation activities.

The Committee recommendation for resource and referral activities also includes \$1,000,000 to continue support for the National Association of Child Care Resource and Referral Agencies' information service, Child Care Aware, the national toll-free information hotline which links families to local child care services and programs. Funds also were requested in the budget request for this purpose.

SOCIAL SERVICES BLOCK GRANT

Appropriations, 2002	\$1,700,000,000
Budget estimate, 2003	1,700,000,000
Committee recommendation	1,700,000,000

The Committee recommends an appropriation of \$1,700,000,000 for the social services block grant. The recommendation is the same amount as the budget request and 2002 enacted level.

The Committee has included bill language that allows States to transfer up to 10 percent of their annual allocations under the Temporary Assistance for Needy Families to the Social Services Block Grant program. Under the budget request, States would be limited to transfers of up to 4.25 percent for fiscal year 2003. The Committee recognizes that the block grant is a vital source of support for many vulnerable children and families, the elderly and single adults and continues to support this important State flexibility.

CHILDREN AND FAMILIES SERVICES PROGRAMS

Appropriations, 2002	\$8,428,574,000
Budget estimate, 2003	8,593,364,000
Committee recommendation	8,654,884,000

The Committee recommends a funding level of \$8,654,884,000 for children and families services programs. The recommendation includes \$6,000,000 in transfers available under section 241 of the Public Health Service Act. The recommendation is \$226,310,000 more than the comparable fiscal year 2002 funding level and \$61,520,000 more than the budget request.

This appropriation provides funding for programs for children, youth, and families, the developmentally disabled, and Native Americans, as well as Federal administrative costs.

Head Start

Head Start provides comprehensive development services for low-income children and families, emphasizing cognitive and language development, socioemotional development, physical and mental health, and parent involvement to enable each child to develop and function at his or her highest potential. At least 10 percent of enrollment opportunities in each State are made available to children with disabilities.

The Committee recommends \$6,667,533,000 for the Head Start Program, an increase of \$129,893,000 more than the comparable fiscal year 2002 level and the same as the budget request. The Committee recommendations includes \$1,400,000,000 in advance funding that will become available on October 1, 2003.

The Committee is aware that the Department's recently-released 7-year national evaluation of the Federal Early Head Start program found that 3-year-old children completing the program performed better in cognitive and language development than children not participating in the program. Further, the study found that children completing Early Head Start achieved gains on standardized tests of cognitive and language development, may need fewer special learning interventions later on, and performed better on critical social-emotional tasks, such as relating to their parents, paying attention and behaving appropriately. The study also found that Early Head Start parents were more likely to read to their children, be emotionally supportive, help with language development and show positive parenting behavior. Early Head Start parents also participated more in education and employment-related activities. These findings justify the Committee's efforts to increase funding for the Early Head Start program, to ensure that more eligible children participate in this important and effective program.

The Committee is impressed by the most recent Family and Child Experience Survey (FACES) data released last month. The Committee notes that the findings reveal that as they had in 1997–1998, Head Start children showed significant gains in vocabulary skills in 2000–2001 against national norms; Head Start children showed modestly larger gains in letter recognition skills in 2000–2001 than they had in 1997–1998; Head Start graduates showed gains in social skills, including improvements in interaction and complex play and Head Start classroom quality remained in the "Good" range in the Early Childhood Education Rating Scale and Assessment Profiles in 2000, as they were in 1997. These findings support the significant investments that the Committee has supported for the Head Start program.

However, the Committee is concerned that the congressionally-mandated National Impact Study of Head Start has not been completed and encourages the ACF to move forward and complete this important study. The National Impact Study was mandated by Congress to be completed by 2003.

The Committee understands the serious need for additional and expanded Head Start facilities among native American populations and in rural areas. The Committee believes that the Department could help serve these needy communities by providing minor construction funding, as authorized, in remote native American communities.

The Committee is aware of the unique circumstances rural areas face in designing Early Head Start programs to meet the

needs of families. Rural areas experience higher costs per child, either due to the higher cost of transporting infants and children to Early Head Start Centers, or because of higher rents due to the lack of adequate and licensable facilities in rural areas. In selecting new grantees under this program, the Committee believes the Department should give consideration to applicants serving rural areas that meet or exceed all performance criteria even though they may propose a higher cost per child due to these factors.

The Committee is aware that, in fiscal year 2002, approximately \$40,000,000 in quality improvement Head Start funding was available to improve staff salaries and support professional development. This commitment of funding has helped increase both teacher compensation and retention rates among Head Start staff. The Committee expects the Department to continue to focus quality improvement efforts on improving Head Start teacher compensation such that teacher salaries more equitably reflect educational level and experience.

The Committee strongly supports the effort to strengthen the qualifications of Head Start teachers. At least 50 percent of teachers in center-based Head Start programs must have an associate, baccalaureate, or advanced degree in early childhood education or a degree in a related field, with experience in teaching preschool children, by September 30, 2003. The Committee expects the Department to focus staff development efforts on increasing the educational level of Head Start teachers in order to meet this goal.

The Head Start Act contemplates services to low-income children and their families. The law does not, however, prescribe age requirements for Head Start participation, short of limiting enrollment to children "who have not yet reached the age of compulsory school attendance." Despite this fact, Head Start has traditionally served children in their years immediately prior to their entering into kindergarten. With States and localities increasing their investments in preschool services, local Head Start programs have been presented with not only an opportunity, but a need to serve infants and toddlers in their years proven to be the most formative in recently publicized brain research developmental studies.

Accordingly, the Committee encourages the Department of Health and Human Services to support efforts by local Head Start programs to use grant funds to deliver quality services to the infant and toddler population where a community assessment evidences a need for such services and the local program has the capacity to meet that need. The Committee supports this expansion in response to changing local community needs, separate and apart from the new grant process under the Early Head Start program created as part of the 1994 Head Start reauthorization. When combined with the new grant authority for Early Head Start which flows from increased appropriations annually, expansion of existing preschool programs to serve infants and toddlers is particularly responsive to research emphasizing the developmental needs of our youngest children—needs which can be ably addressed through the Head Start model of comprehensive services.

The Committee commends the Department for its focus on prevention as a key to improving the overall health and well-being of our Nation. The Committee also recognizes the importance of good nutrition and physical activity among young children for developing a fertile atmosphere for cognitive development and school readiness. According to the Nutrition Cognition National Advisory Committee at Tufts University in Mass-

sachusetts, children without an adequate diet may have trouble concentrating in school, participating in play, bonding with peers, and performing at their potential.

Therefore, the Committee urges the Head Start Bureau to review the scope of good nutrition and physical activities which are presently being undertaken in response to the Head Start Performance Standards, as well as the current knowledge base on good nutrition and physical activities for young children. Further, the Committee urges the Head Start Bureau to review the activities presently being undertaken by local programs to promote healthy bodies as a prerequisite for strong minds and to identify best practices currently employed by local programs. As a follow up, the Committee encourages the Head Start Bureau, in collaboration with the National Head Start Association, to devise a plan for implementing a locally-determined but coordinated effort to achieve the goals of a stronger, more vibrant and effective nutritional and physical activity component within Head Start programs. The Committee expects that the Head Start Bureau will enter into a cooperative agreement with the National Head Start Association to carry out these activities.

The Senate is currently considering the reauthorization of the Personal Responsibility and Work Opportunities Act, in order to assist individuals to secure gainful employment and help families to gain self-sufficiency in the new economy. As a result of the 1996 enactment of welfare reform, families previously eligible for Head Start services based on their low-income status have found themselves marginally exceeding those income limitations and, therefore, losing access to Head Start services for their children. The Committee recognizes that Head Start does not serve all income-eligible children and their families in the country. Nonetheless, while eligibility for other programs is sensitive to regional disparities in income, Head Start eligibility is not. It is clear that an inner-city family's expenses with respect to food, housing and medical needs are different from those of a rural family, while a rural family's transportation needs, for one, may well outpace similar needs for their urban neighbors. Eligibility requirements should reflect this difference. Current law gives the Secretary of Health and Human Services authority to permit the enrollment of a "reasonable number" of over-income families in Head Start. In a welfare-reformed era, families may find their income marginally exceeding national poverty guidelines, while their need for quality early childhood programming is even more pronounced. The Committee encourages the Secretary to permit local programs to best address local community needs in these changing times, but encourages flexibility which does not deny services to the neediest of the needy. The Committee encourages the Secretary to exercise his authority, as appropriate, to permit the enrollment of over-income children and their families in up to 25 percent of program placements, so long as services are not denied to income-eligible children and families as a result of this flexibility.

The Committee is aware that the Department's "Descriptive Study of Seasonal Farmworker Families" published in September 2001 revealed that just 19 percent of eligible children of migrant and seasonal farmworkers are served by Migrant Head Start programs. The study also concluded "that Migrant Head Start agencies greatly improve the lives of migrant and seasonal farmworker families, and in doing so, help to strengthen local agricultural economies." The Committee urges the Head Start Bureau to provide an increase in funding for Migrant

Head Start programs proportionate to the overall increase in the Head Start appropriation.

The Committee is aware of efforts currently being undertaken to improve pre-literacy skills in Head Start children and lauds the administration for its commitment to this effort. However, the Committee cautions against anything that would detract from the comprehensive nature of the program in delivering early childhood development and family services. While school readiness is front and center in the goals of Head Start, the elements necessary to achieve that readiness range from adequate nutrition and health screening to social and emotional development and family building as well as the cognitive growth of young children.

The Committee encourages the Department to ensure that in securing pre-literacy training and technical assistance for Head Start grantees, every reasonable effort is made to use competitive procedures in securing private sector service providers to assist in completing the Head Start mission.

The Committee is aware that the goal of the Head Start program is to ensure the social competence and school readiness of children upon completion of the program. The Committee expects the Department to continue to promote learning and brain development to accelerate and improve the cognitive development of Head Start children. The Committee expects the Department to monitor Head Start programs to ensure that a majority of children participating in Head Start programs meet the minimum educational performance measures and standards upon completion of the program as outlined in the Head Start Act, as amended in 1998.

The TCU/Head Start partnership has made a lasting investment in our Indian communities by creating associate degree programs in Early Childhood Development and related fields. New graduates of these programs can help meet the Congressional mandate that 50 percent of all program teachers earn an Associate Degree in Early Childhood Development or a related discipline by 2003. One clear impediment to the on-going success of this partnership program is the decrease in discretionary funding being targeted for the TCU/Head Start partnership. The Committee urges the Head Start Bureau to direct sufficient funding to allow current grantees to extend their programs for two additional years and to ensure that this vital program can continue and be expanded to serve all tribal college communities.

Consolidated runaway and homeless youth program

The Committee recommends \$93,000,000 for this program, an increase of \$4,898,000 more than the fiscal year 2002 level and \$4,867,000 more than the administration request. The Committee recommends \$41,800,000 for transitional living programs and \$51,200,000 for basic centers.

This program addresses the crisis needs of runaway and homeless youth and their families through support to local and State governments and private agencies. Basic centers and transitional living programs help address the needs of some of the estimated 300,000 homeless youth, many of whom are running away from unsafe or unhealthy living environments. These programs have been proven effective at supporting positive youth development, securing stable and safe living arrangements and providing the skills required to engage in positive relationships with caring adults and contribute to society. The Committee looks forward to the release of performance outcome data available through the new management information system.

The Runaway and Homeless Youth Act requires that not less than 90 percent of the funds be allocated to States for the purpose of establishing and operating community-based runaway and homeless youth centers, as authorized under Parts A and B of the Act. Funds are distributed on the basis of the State youth population under 18 years of age in proportion to the national total. The remaining 10 percent funds networking and research and demonstration activities including the National Toll-Free Communications Center.

Grants are used to develop or strengthen community-based programs which assist homeless youth in making a smooth transition to productive adulthood and social self-sufficiency; and to provide technical assistance to transitional living programs for the acquisition and maintenance of resources and services.

The basic centers program, authorized under Part A of the Act, supports grants to community-based public and private agencies for the provision of outreach, crisis intervention, temporary shelter, counseling, family unification and aftercare services to runaway and homeless youth and their families.

The transitional grant program (TLP) provides grants to local public and private organizations to address shelter and service needs of homeless youth, ages 16-21. The program's goals are to have youth safe at home or in appropriate alternative settings and to help them develop into independent, contributing members of society.

A homeless youth accepted into the program is eligible to receive shelter and services continuously for up to 540 days. The services include counseling; life skills training, such as money management and housekeeping; interpersonal skill building, such as decision-making and priority setting; educational advancement; job preparation attainment; and mental and physical health care.

The administration has proposed \$10,000,000 for a separate maternity group home program. The Committee is aware of the need for and shares the administration's interest in funding residential services for young mothers and their children who are unable to live with their own families because of abuse, neglect, or other circumstances. The Committee notes that pregnant and parenting youth are currently eligible for and served through the TLP. The Committee commends the administration for placing special emphasis on pregnant and parenting youth in its fiscal year 2002 runaway and homeless youth program announcement. The Committee also compliments the administration for its special efforts to make the maternity group home community aware of the fiscal year 2002 program announcement.

The Committee also recognizes the need for and value of expanding transitional living opportunities for all homeless youth. Therefore, the Committee seeks to preserve the flexibility afforded in current law to respond to the needs of the young people who are most at-risk and in greatest need of transitional living opportunities in their communities by providing additional resources to the existing portfolio of consolidated runaway and homeless youth act programs.

It is the Committee's expectation that current and future TLP grantees will continue to provide transitional living opportunities and supports to pregnant and parenting homeless youth, as is their current practice. To further ensure that pregnant and parenting homeless youth are able to access transitional living opportunities and supports in their communities, the Committee encourages the Secretary, acting through the network of Federally-funded runaway

and homeless youth training and technical assistance providers, to offer guidance to grantees and others on the programmatic modifications required to address the unique needs of pregnant and parenting youth and on the various sources of funding available for residential services to this population.

Maternity group homes

The Committee recommendation does not include \$10,000,000 requested in the budget for the maternity group homes program. The Committee has deferred action on this program pending the enactment of authorizing language. Under this proposed program, the ACF would provide targeted funding for community-based, adult-supervised group homes for young mothers and their children. These homes would provide safe, stable, nurturing environments for mothers who cannot live safely with their own families and assist them in moving forward with their lives by providing support so they can finish school, acquire job skills, and learn to be good parents.

The Committee provided a \$19,000,000 increase in funding last year under the transitional living program to strengthen our Nation's support system for all youth in need of stable, safe living accommodations and services. The Committee expects the Family and Youth Services Bureau to continue to provide the technical assistance needed to enable TLP grantees and their community partners to address the unique needs of young mothers and their children, as well as helping interested entities in identifying sources of funding currently available to provide residential services to this population.

Child abuse prevention programs

The Committee recommends \$48,364,000 for child abuse and neglect prevention and treatment activities. The recommendation includes \$22,013,000 for State grants, the same as last year and the budget request. The recommendation also includes \$26,351,000 for discretionary activities, an increase of \$201,000 more than last year and the same as the budget request. These programs seek to improve and increase activities at all levels of government which identify, prevent, and treat child abuse and neglect through State grants, technical assistance, research, demonstration, and service improvement.

Abandoned infants assistance

The Committee recommendation includes \$12,205,000 for abandoned infants assistance, an increase of \$3,000 more than 2002 level and the same amount as the budget request. This program provides financial support to public and private entities to develop, implement, and operate demonstration projects that will prevent the abandonment of infants and young children. Grants provide additional services such as identifying and addressing the needs of abandoned infants, especially those who are drug exposed or HIV positive; providing respite care for families and care givers; and assisting abandoned infants and children to reside with their natural families or in foster care.

Child welfare services

The Committee recommends an appropriation of \$291,986,000 for child welfare services, the same as the fiscal year 2002 level and the administration request. This program helps State public welfare agencies improve their child welfare services with the goal of keeping families together. State services include: preventive intervention, so that, if possible, children will not have to be removed from their homes; reunification so that children can return home and development of alternative placements like foster care or adoption if children cannot remain at home. These services are provided without regard to income.

Child welfare training

The Committee recommends \$7,498,000, an increase of \$3,000 over the comparable fiscal year 2002 level and the same amount as the administration request. Under section 426, title IV-B of the Social Security Act, discretionary grants are awarded to public and private nonprofit institutions of higher learning to develop and improve education/training programs and resources for child welfare service providers. These grants upgrade the skills and qualifications of child welfare workers.

Adoption opportunities

The Committee recommends \$27,405,000 for adoption opportunities, an increase of \$20,000 more than the fiscal year 2002 level and the same amount as the administration request. This program eliminates barriers to adoption and helps find permanent homes for children who would benefit by adoption, particularly children with special needs. The Committee notes the progress that has been made in increasing adoptions of children within 2 years of their placement in the public foster care system, as well as the increase in family reunification within 1 year of placement.

Adoption incentives

The Committee recommends \$43,000,000 for adoption incentives, the same amount as the comparable fiscal year 2002 appropriation and the budget request. The purpose of this program is to provide incentive funds to States to encourage an increase in the number of adoptions of children from the public foster care system. These funds are used to pay States bonuses for increasing their number of adoptions. The appropriation allows incentive payments to be made for adoptions completed in fiscal years 2001 and 2002.

Adoption awareness

The Committee recommendation includes \$12,906,000 for the adoption awareness program, the same amount as the fiscal year 2002 level and the administration request. This program was authorized in the Children's Health Act of 2000. The program consists of two activities: the Infant Adoption Awareness Training Program and the Special Needs Awareness Campaign. The Infant Adoption Awareness Training Program provides grants to support adoption organizations in the training of designated health staff in eligible health centers that provide health services to pregnant women to inform them about adoption and make referrals on request on an equal basis with all other course of action. Within the Committee recommendation, \$9,906,000 is available for this purpose.

The Special Needs Adoption Campaign supports grants to carry out a national campaign to inform the public about the adoption of children with special needs. The Committee recommendation includes \$3,000,000 to continue this important activity.

Compassion capital fund

The Committee recommendation includes \$45,000,000 for the compassion capital fund, \$15,000,000 more than last year and \$55,000,000 less than the budget request. Funds available will support grants to charitable organizations to emulate model social service programs and to encourage research on the best practices of social service organizations.

The Committee expects funds made available through this program to supplement and not supplant private resources and encourages the Secretary to require private resources to match grant funding provided to public/private partnerships.

Social services research

The Committee recommends \$6,000,000 for social services and income maintenance research, the same amount the administration

request for discretionary funding. The Committee has funded the discretionary portion of this program through transfers available under section 241 of the Public Health Service Act. Mandatory funding also is available for this purpose in the Welfare Reform legislation and the administration budget request assures \$25,158,000 is available from this source. Last year, \$31,158,000 was available for this program. These funds support cutting-edge research and evaluation projects in areas of critical national interest. Research includes determining services that are more cost-effective and alternative ways to increase the economic independence of American families.

The Committee 4 years ago encouraged ACF to work with the State information technology consortium in an effort to help States with the difficult task of streamlining service delivery, while also meeting TANF record-keeping and reporting requirements. The Committee is pleased to learn that this effort is progressing and that States and ACF are now able to share systems information on TANF, child support enforcement, child welfare and child care activities. The Committee understands that plans are now underway to put in place web-based technology that permits communications and interface within States, across State borders, and between ACF and States. Accordingly, the Committee urges ACF to expand its efforts with the State information technology consortium in fiscal year 2003. Similarly, The Committee is pleased to note that child support collections on behalf of families continue to grow. When combined with other income, child support collections passed through to TANF families can provide the boost needed to help a family attain self-sufficiency. To aid in this objective, the Committee urges CSE to implement the next phase of an effort launched last year in conjunction with the State information technology consortium. The Committee remains convinced that States are in a position to best determine how to remove current barriers to child support collections and to improve the flow of information between agencies and the court system.

Community-based resource centers

The Committee recommends \$33,417,000 for community-based resource centers, an increase of \$1,000 more than the fiscal year 2002 level and the same amount as the administration request. These resources support two purposes: assisting each State in developing, operating, expanding and enhancing a network of community-based, prevention-focused, family resource and support programs and supporting activities that foster an understanding, appreciation, and knowledge of diverse populations in order to be effective in preventing and treating child abuse and neglect.

Developmental disabilities programs

The Committee recommends \$147,434,000 for developmental disabilities programs, an increase of \$6,914,000 more than the comparable fiscal year 2002 amount and \$6,900,000 more than the budget request. The Administration on Developmental Disabilities supports community-based delivery of services which promote the rights of persons of all ages with developmental disabilities. Developmental disability is defined as severe, chronic disability attributed to mental or physical impairments manifested before age 22, which causes substantial limitations in major life activities.

State councils

For State councils, the Committee recommends \$72,200,000. The State Councils on Developmental Disabilities program assists each State in promoting the development of

a comprehensive, statewide, consumer and family-centered system which provides a coordinated array of culturally-competent services, and other assistance for individuals with developmental disabilities. State councils undertake a range of activities including demonstration of new approaches, program and policy analysis, interagency collaboration and coordination, outreach and training.

Protection and advocacy grants

For protection and advocacy grants, the Committee recommends \$37,000,000. This formula grant program provides funds to States to establish protection and advocacy systems to protect the legal and human rights of persons with developmental disabilities who are receiving treatment, services, or rehabilitation within the State.

Projects of national significance

The Committee recommends \$12,734,000 for projects of national significance to assist persons with developmental disabilities. This program funds grants and contracts providing nationwide impact by developing new technologies and applying and demonstrating innovative methods to support the independence, productivity, and integration into the community of persons with developmental disabilities.

The Committee recognizes the potential benefits that assistive technology can have for individuals with developmental disabilities.

Within the Committee recommendation, \$4,000,000 is available to expand activities of the Family Support Program. The increase over the budget request for programs of national significance has been provided for this purpose.

University-affiliated programs

For university-affiliated programs, the Committee recommends \$25,500,000. This program provides operational and administrative support for a national network of university-affiliated programs and satellite centers. Grants are made annually to university-affiliated programs and satellite centers for interdisciplinary training, exemplary services, technical assistance, and information dissemination activities.

Native American programs

The Committee recommends \$45,912,000 for Native American programs, the same amount as the 2002 level and \$716,000 more than the budget request. The Administration for Native Americans [ANA] assists Indian tribes and native American organizations in planning and implementing long-term strategies for social and economic development through the funding of direct grants for individual projects, training and technical assistance, and research and demonstration programs.

The Committee continues its significant interest in the revitalization of native languages through education. The Committee encourages ANA to allocate additional resources to support the Native American Languages program and urges the ANA to make schools a part of this effort, consistent with the policy expressed in the Native American Languages Act.

Community services

The Committee recommends an appropriation of \$740,477,000 for the community services programs. This is \$1,692,000 more than the fiscal year 2002 level and \$100,152,000 higher than the administration request.

Within the funds provided, the Committee recommends \$649,987,000 for the community services block grant [CSBG]. These funds are used to make formula grants to States and Indian tribes to provide a wide range of services and activities to alleviate causes of pov-

erty in communities and to assist low-income individuals in becoming self-sufficient.

The Committee rejects the administration's recommendation to cut the Community Services Block Grant funding. Although a restrictive Committee allocation prevented CSBG funding from being substantially increased this year, the Committee continues to recognize the importance of CSBG and the Community Action Agencies it funds in helping meet the extraordinary challenges facing low-income communities.

The Nation's Community Action Agency network relies on CSBG funding to help initiate and administer programs designed to alleviate poverty. The universal characteristic of these CSBG-funded programs is that they provide people with the resources and the tools to become self-sufficient. The Committee understands that the Department of Health and Human Services, and its Office of Community Services in particular, could better use this network in developing future policy initiatives. The Committee notes that in a number of States, including Iowa and Pennsylvania, CAA-initiated family development and self-sufficiency programs are an integral component of welfare reform efforts. The administration is encouraged to look for further nationwide linkages between those individuals seeking to leave the welfare system and become self-sufficient and the many family development and self-sufficiency strategies operated by Community Action Agencies.

In addition, the Committee believes that the Office of Community Services should be more aggressive in ensuring proper oversight of some State CSBG State expenditure of CSBG allocations that are intended to fund local eligible activities. The Committee expects the Office of Community Services to better evaluate and enforce each State's expenditure of CSBG funds. The Committee is also concerned that some State audits of the previous years' expenditures of CSBG funds are not adequately reviewed and acted upon.

The Committee expects the Office of Community Services to release funding to the States in the most timely manner. The Committee also expects the States to make funds available promptly. The Committee is aware that the Office of Community Services and some States have been extraordinarily delinquent in providing funds to local eligible entities.

In addition, the Committee again expects the Office of Community Services to inform the State CSBG grantees of any policy changes affecting carryover CSBG funds within a reasonable time after the beginning of the Federal fiscal year.

Several discretionary programs are funded from this account. Funding for these programs is recommended at the following levels for fiscal year 2003: community economic development, \$33,000,000; individual development accounts, \$24,990,000; rural community facilities, \$7,500,000; national youth sports, \$17,000,000; and community food and nutrition, \$8,000,000.

Community economic development grants are made to private, nonprofit community development corporations, which in turn provide technical and financial assistance to business and economic development projects that target job and business opportunities for low income citizens. The Committee has included bill language clarifying that Federal funds made available through this program may be used for financing for construction and rehabilitation and loans or investments in private business enterprises owned by Community Development Corporations. Of the total provided, the Committee has included \$5,500,000 for the Job Creation Demonstration authorized under the Family Support Act to target community development

activities to create jobs for people on public assistance. As in the past, the Committee expects that a priority for grants under this program go to experienced community development corporations.

The Committee continues to support the Job Creation Demonstration program, authorized by the Family Support Act. This demonstration program provides grants on a competitive basis to non-profit organizations to create new employment and business opportunities for TANF recipients and other low income individuals. Funding also supports technical and financial assistance for private employers that will result in the creation of full-time permanent jobs for eligible individuals. The Committee recognizes that continued funding of the Job Creation Demonstration program would provide opportunities for more low-income individuals.

Most of the drinking water and waste water systems in the country that are not in compliance with Federal standards are in communities of 3,000 or fewer. Rural Community Assistance Programs [RCAPs] use funds available from the Rural Community Facilities Program to assist a number of communities in gaining access to adequate community facilities, gaining financing for new or improved water and waste water systems and in complying with Federal standards.

The Committee has included bill language allocating funding to the Office of Community Services for Rural Community Facilities Technical Assistance as authorized under section 680(3)(B) of the Community Services Block Grant Act. In providing this funding, the Committee directs that it be used solely for the purpose of improving water and waste water facilities in poor, rural communities. As in the past these funds should be allocated to regional, rural community assistance programs.

The Committee is concerned that many small and very small community water and wastewater treatment systems might be most vulnerable to terrorist attack, yet least prepared to deal with the issue. The Committee urges OCS to support a RCAP Small Community Infrastructure Safety and Security Training and Technical Assistance project, which will provide State, regional and national infrastructure safety and security training workshops and on-site technical assistance targeted to small and very small community water and wastewater treatment systems. The goal of the project is to improve the capacity of small systems to better prepare for emergencies, develop emergency preparedness training manuals for small water systems, identify appropriate technologies to secure such systems, and provide technical assistance to small communities struggling to deal with these issues.

Family violence prevention and services

The Committee recommends \$149,000,000 for family violence prevention and services programs, an increase of \$7,385,000 over the fiscal year 2002 appropriation and the budget request.

For the runaway youth prevention program, the Committee recommends \$16,000,000, which is \$1,001,000 more than the fiscal year 2002 appropriation and the administration request. This is a discretionary grant program open to private nonprofit agencies for the provision of services to runaway, homeless, and street youth. Funds may be used for street-based outreach and education, including treatment, counseling, provision of information, and referrals for these youths, many of whom have been subjected to or are at risk of being subjected to sexual abuse. The goal of this program is to help young people leave the streets.

For the national domestic violence hotline, the Committee recommends \$3,000,000,

which is \$843,000 more than the fiscal year 2002 comparable level and the administration request. This is a cooperative agreement which funds the operation of a national, toll-free, 24-hours-a-day telephone hotline to provide information and assistance to victims of domestic violence. The Committee has recommended additional funding for the hotline because of the 19 percent growth in call volume that occurred last year and the associated increased in the caller abandonment rate of the hotline. The Committee is aware that employees of the parent agency even voluntarily reduced their pay to stay within budget constraints, rather than reduce hotline staff and service to those in need.

The Committee recommends \$130,000,000 for the grants for battered women's shelters program, \$5,541,000 above the fiscal year 2002 program level and the administration request. This is a formula grant program to support community-based projects which operate shelters and provide related assistance for victims of domestic violence and their dependents. Emphasis is given to projects which provide counseling, advocacy, and self-help services to victims and their children.

Early learning opportunities program

The Committee recommendation includes \$38,000,000 for the early learning opportunities program, an increase of \$13,003,000 more than the comparable fiscal year 2002 funding level. The administration proposed eliminating this program. This program supports grants to local community councils comprised of representatives from agencies involved in early learning programs, parent organizations and key community leaders. Funds are used to increase the capacity of local organizations to facilitate development of cognitive skills, language comprehension and learning readiness; enhance childhood literacy; improve the quality of early learning programs through professional development and training; and remove barriers to early learning programs.

Faith-based center

The Committee recommendation includes \$1,500,000 to continue staff support for the operation of the Department's Center for Faith-Based and Community Initiatives, the same as the fiscal year 2002 level and the budget request.

Promotion of responsible fatherhood and healthy marriage

The Committee recommendation does not include \$20,000,000 included in the budget request for a new program designed to promote responsible fatherhood and responsible marriage. Legislation has not been enacted that would create this new program. The purpose of this proposed program was to spur State and community level approaches to assist fathers to be more actively and productively involved in the lives of their children.

Mentoring children of prisoners

The Committee recommendation includes \$12,500,000 for this new program. The administration requested \$25,000,000. The mentoring children of prisoners program was authorized last year under section 439 of the Social Security Act. The purpose of this program is to help children while their parents are imprisoned, which includes activities that keep children connected to a parent in prison in order to increase the chances that the family will come together successfully when the parent is released. As a group, children of prisoners are less likely than their peers to succeed in school and more likely to engage in delinquent behavior.

Independent Living Training Vouchers

The Committee recommendation includes \$60,000,000 for the new independent living

program, the same as the budget request. These funds will support vouchers of up to \$5,000 for college tuition or vocational training for individuals who age out of the foster care system, so they can be better prepared to live independently and contribute productively to society. Studies have shown that 25,000 youth leave foster care each year at age 18 and just 50 percent will have graduated high school, 52 percent will be unemployed and 25 percent will be homeless for one or more nights.

Program administration

The Committee recommends \$171,747,000 for program administration, \$45,000 less than the comparable fiscal year 2002 level and \$1,000,000 above the administration request.

The Committee urges ACF to continue to make progress in improving its Annual Performance Plan and Annual Performance Report. The Committee notes that many programs proposed for funding do not have solid data for baselines or performance outcome measures. This lack of objective data makes more difficult the Committee's decisions regarding the allocation of limited resources. The Committee believes that the agency should work with program grantees and relevant associations to identify the most objective ways in which to evaluate the effectiveness of ACF programs and establish a timeline for producing meaningful data by which programs can be assessed.

The Committee continues its interest in the Department's Child and Family Services reviews. These reviews are an effective method for monitoring the progress States are making in assuring the safety, health and permanency for children in child welfare and foster care as required in the Adoption and Safe Families Act. The Committee encourages the Department to make available sufficient resources to ensure full implementation of the new collaborative monitoring system. The Committee understands that the remaining States will be reviewed during fiscal year 2003. The Committee requests that ACF prepare a report on compliance and other implementation issues identified during these reviews and provide it to the Committee not later than 90 days after the last review.

In establishing its Technical Assistance Centers for Children and Families initiative, the Committee urges the Administration to give consideration to establishing a Pacific Basin focus given the unique needs, geographical isolation, cultural complexities, and Federal responsibilities for the residents of that region.

PROMOTING SAFE AND STABLE FAMILIES

Appropriations, 2002	\$375,000,000
Budget estimate, 2003	505,000,000
Committee recommendation	505,000,000

The Committee recommends \$505,000,000 for fiscal year 2003, an increase of \$130,000,000 more than the fiscal year 2002 amount and the same as the budget request. Funding available provides grants to States in support of: (1) family preservation services; (2) time-limited family reunification services (3) community-based family support services and (4) adoption promotion and support services. The Committee notes that most of the Federal funding related to child welfare is provided for the removal and placement of children outside of their own homes. Funds available through the Promoting Safe and Stable Families program are focused on supporting those activities that can prevent family crises from emerging that might require the temporary or permanent removal of a child from his or her own home.

The Promoting Safe and Stable Families program is comprised of \$305,000,000 in

capped entitlement funds authorized by the Social Security Act and \$200,000,000 in discretionary appropriations.

PAYMENTS TO STATES FOR FOSTER CARE AND ADOPTION ASSISTANCE

Appropriations, 2002	\$4,885,600,000
Budget estimate, 2003	4,855,000,000
Committee recommendation	4,855,000,000

The Committee recommends \$4,855,000,000 for this account, which is \$30,600,000 less than the 2002 comparable level and the same as the budget request. In addition, the Committee recommendation concurs with the administration's request of \$1,745,600,000 for an advance appropriation for the first quarter of fiscal year 2004. The Committee also has included bill language, proposed in the budget, that will improve program operations and the flow of funds to States. The Foster Care Program provides Federal reimbursement to States for: maintenance payments to families and institutions caring for eligible foster children, matched at the Federal medical assistance percentage [FMAP] rate for each State; and administration and training costs to pay for the efficient administration of the Foster Care Program, and for training of foster care workers and parents.

The Adoption Assistance Program provides funds to States for maintenance costs and the nonrecurring costs of adoption for children with special needs. The goal of this program is to facilitate the placement of hard-to-place children in permanent adoptive homes, and thus prevent long, inappropriate stays in foster care. As in the Foster Care Program, State administrative and training costs are reimbursed under this program.

The Independent Living Program provides services to foster children under 18 and foster youth ages 18–21 to help them make the transition to independent living by engaging in a variety of services including educational assistance, life skills training, health services and room and board. States are awarded grants from the annual appropriation proportionate to their share of the number of children in foster care, subject to a matching requirement.

ADMINISTRATION ON AGING

Appropriations, 2002	\$1,349,447,000
Budget estimate, 2003	1,341,344,000
Committee recommendation	1,369,290,000

The Committee recommends an appropriation of \$1,369,290,000 for aging programs, \$19,843,000 more than the fiscal year 2002 comparable funding level and \$27,946,000 more than the budget request.

Supportive services and senior centers

The Committee recommends an appropriation of \$359,000,000 for supportive services and senior centers, \$2,006,000 more than the comparable fiscal year 2002 level and \$2,000,000 more than the administration request. This State formula grant program funds a wide range of social services for the elderly, including multipurpose senior centers, adult day care and ombudsman activities. State agencies on aging award funds to designated area agencies on aging who in turn make awards to local services providers. All individuals age 60 and over are eligible for services, although, by law, priority is given to serving those who are in the greatest economic and social need, with particular attention to low-income minority older individuals and those residing in rural areas. Under the basic law, States have the option to transfer up to 30 percent of funds appropriated between the senior centers program and the nutrition programs, which allows the State to determine where the resources are most needed.

Preventive health services

The Committee recommends \$22,562,000 for preventive health services, an increase of \$1,439,000 more than the comparable fiscal year 2002 amount and \$1,000,000 more than the budget request. Funds appropriated for this activity are part of the comprehensive and coordinated service systems targeted to those elderly most in need. Preventive health services include nutritional counseling and education, exercise programs, health screening and assessments, and prevention of depression.

Within the appropriation for this program, the Committee recommends that \$6,000,000 be provided to expand medication management, screening and education activities to prevent incorrect medication and adverse drug reactions among the elderly. These activities will help older adults learn more about managing medications safely and help reduce unnecessary hospitalizations and illnesses. The Committee notes that individuals aged 65 years and older take the greatest number and quantity of medications, which increases the health risks associated with adverse drug interactions and misuse. Studies have found that up to 28 percent of hospitalizations of older people are due to noncompliance with drug therapy and adverse events. These additional funds will help reduce the incidence of adverse effects of drug interaction and misuse.

Protection of vulnerable older Americans

The Committee recommends \$19,681,000 for grants to States for protection of vulnerable older Americans. Within the Committee recommendation, \$14,449,000 is for the ombudsman services program and \$5,232,000 is for the prevention of elder abuse program. The amount recommended for the ombudsman services program is \$2,000,000 more than the fiscal year 2002 level and the administration request. The amount recommended for the elder abuse prevention program is the same as the fiscal year 2002 level and budget request. Both programs provide formula grants to States to prevent the abuse, neglect, and exploitation of older individuals. The ombudsman program focuses on the needs of residents of nursing homes and board and care facilities, while elder abuse prevention targets its message to the elderly community at large.

The Committee recognizes the importance of the Long-Term Care Ombudsman Program in assisting residents of nursing homes and board and care facilities resolve abuse and neglect complaints. The Committee is aware of the Institute of Medicine's 1995 study which recommended a ratio of 1 ombudsman for every 2,000 nursing home beds to meet the needs of long-term care residents, as well as the DHHS Office of Inspector General's 1999 report recommending additional funding for the program. Therefore, the Committee has provided an increase of \$2,000,000 for the Long-Term Ombudsman Program, which will allow the program to hire additional ombudsman staff, expand public information and education campaigns, and upgrade technology.

The Committee supports continued and additional funding for the long-term care ombudsman resource center and its training and clearinghouse functions, which provide information, technical assistance, programmatic, and other support for State and regional long-term care ombudsmen.

National family caregiver support program

The Committee recommends \$150,000,000 for the national family caregiver support program, an increase of \$14,000,000 more than the comparable fiscal year 2002 level and the budget request. Funds appropriated for this activity established a multifaceted support

system in each State for family caregivers. All States are expected to implement the following five components into their program: individualized referral information services; assistance to caregivers in locating services from a variety of private and voluntary agencies; caregiver counseling, training and peer support; respite care provided in the home, an adult day care center or other residential setting located in an assisted living facility; and limited supplemental services that fill remaining service gaps.

The Committee continues to make investment in our Nation's family caregiver support system, in recognition of the critical role and essential care that millions of informal and family caregivers provide. Research has shown that half of all caregivers of older persons are 65 years of age or older, many of whom are themselves in fair to poor health. Further, one-third of caregivers are employed full-time and have to take unpaid leave or rearrange their work schedules to care for a loved one. The family caregiver support program provides respite care, caregiving training and counseling and other support services that support the efforts of the caregiver.

Native American Caregiver Support Program

The Committee recommendation includes \$6,500,000 to carry out the Native American Caregiver Support Program, an increase of \$1,000,000 more than last year and the budget request. The program will assist Tribes in providing multifaceted systems of support services for family caregivers and for grandparents or older individuals who are relative caregivers. In fiscal year 2002, funds were used to provide both discretionary and formula grants to support the goals of this program.

Congregate and home-delivered nutrition services

For congregate nutrition services, the Committee recommends an appropriation of \$390,000,000, the same amount as the comparable fiscal year 2002 level and the budget request. For home-delivered meals, the Committee recommends \$182,000,000, an increase of \$5,500,000 more than the comparable fiscal year 2002 funding level and \$3,500,000 more than the administration request. These programs address the nutritional need of older individuals. Projects funded must make home-delivered and congregate meals available at least once a day, 5 days a week, and each meal must meet one-third of the minimum daily dietary requirements. While States receive separate allotments of funds for congregate and home-delivered nutrition services and support services, they are permitted to transfer up to 40 percent of funds between these programs.

The Committee celebrates the 30th anniversary of the Older Americans Act Nutrition Program. Over the past 30 years, the program has supported almost 6 billion meals for older Americans. A national evaluation of the nutrition program found that it successfully reaches older individuals who are older, poorer, more likely to live in rural areas, more functionally impaired and at higher nutritional risk than the population generally. Individuals who were served realized higher nutrient intake, decreased food insecurity, increased social interaction and an improved quality of life. The Committee also recognizes the significant role that the program plays beyond the provision of meals. Nutrition screening, education and counseling services are critical to maintaining good health and independence for older adults.

Nutrition Services Incentives Program

The Committee recommendation includes \$149,670,000 for the nutrition services incentives program, the same as the comparable

fiscal year 2002 funding level and the budget request.

The Committee agrees with the administration's request to shift funding for the Nutrition Services Incentive Program (NSIP) from the Food and Nutrition Service within USDA to the Administration on Aging within the Department of Health and Human Services (DHHS). It is the Committee's belief, however, that it is critically important for several aspects of NSIP to remain intact, as the program is shifted into DHHS. This includes the allocation of NSIP funds on the basis of the number of meals served in a State in the previous year, as opposed to the number of seniors that reside in that State. Further, NSIP funds are not currently, and should not become, subject to transfer, expenditure for administrative costs, or match requirements, and States should continue to have the option of receiving benefits in the form of cash or commodities. The Committee directs the Under Secretary of the Food and Nutrition Service to work with the Assistant Secretary for Aging within DHHS to ensure this transfer of funding and responsibilities is carried out in a manner that in no way disrupts the delivery of services provided by NSIP. The Committee has maintained access to commodities within USDA because the agency has both the infrastructure and the expertise to conduct this activity that is not available in AoA and HHS.

Aging grants to Indian tribes and native Hawaiian organizations

The Committee recommends \$27,675,000 for grants to native Americans, \$1,946,000 more than the comparable fiscal year 2002 amount and the administration request. Under this program awards are made to tribal and Alaskan Native organizations and to public or nonprofit private organizations serving native Hawaiians which represent at least 50 percent Indians or Alaskan Natives 60 years of age or older to provide a broad range of supportive services and assure that nutrition services and information and assistance are available.

Training, research and discretionary projects

The Committee recommends \$27,837,000 for training, research, and discretionary projects, \$10,436,000 less than the fiscal year 2002 comparable level and the same as the budget request. These funds support activities designed to expand public understanding of aging and the aging process, apply social research and analysis to improve access to and delivery of services for older individuals, test innovative ideas and programs to serve older individuals, and provide technical assistance to agencies that administer the Older Americans Act.

The Committee has provided support at last year's level to continue the pilot project to test the best ways of using the skills of retired nurses, doctors, accountants and other professionals to train other seniors and to serve as expert resources to detect and stop Medicare fraud, waste and abuse. The Committee expects that these funds will be used to make grants and that administrative costs will be minimized. In addition, the Committee expects that an improved system will be developed and implemented in coordination with CMS and the OIG to track cases referred by this initiative.

The Committee is aware that the Centers for Disease Control and Prevention (CDC) reported that more than 10,000 seniors died in 1999 from fall-related injuries. CDC estimates that the direct costs to Medicare and Medicaid for falls-related care will exceed \$32,000,000,000 in 2020. Given the unnecessary and premature loss of life and public expense associated with elder falls, the Committee encourages the Administration on Aging to oversee and support a national education

campaign to reduce the risk of elder falls and prevent repeat falls. The campaign should be directed to elders, their families, and health care providers.

The Committee continues to support funding at no less than last year's level for national programs scheduled to be refunded in fiscal year 2003 that address a variety of issues, including elder abuse, native American issues and legal services.

Aging network support activities

The Committee recommends \$2,379,000 for aging network support activities, the same as the comparable fiscal year 2002 amount and the budget request. The Committee recommendation includes \$1,199,000 for Eldercare Locator. The Committee recommendation provides \$1,180,000 for the pension information and counseling projects, the same as the comparable fiscal year 2002 level.

The Eldercare Locator, a toll-free, nationwide directory assistance service for older Americans and their caregivers, is operated by the National Association of Area Agencies on Aging. Since 1991, the service has linked more than 700,000 callers to an extensive network of resources for aging Americans and their caregivers. The Committee provided an increase of almost \$340,000 to support expansion to the Internet of this information and referral service.

Pension counseling projects provide information, advice, and assistance to workers and retirees about pension plans, benefits, and how to pursue claims when pension problems arise. The information dissemination and outreach activities of the pension counseling projects have reached nearly 50,000 individuals. In addition, individualized counseling to more than 7,000 individuals has helped recoup more than \$30,000,000 on behalf of older individuals.

Alzheimer's Disease Demonstration Grants to States

As a result of the aging of the baby boom generation, the number of individuals affected by Alzheimer's disease will double in the next 20 years. The Committee recommends a funding level of \$14,000,000, an increase of \$2,504,000 more than the comparable fiscal year 2002 level and \$2,500,000 more than the administration's request, for Alzheimer's disease demonstration grants to States.

Currently, an estimated 70 percent of individuals with Alzheimer's disease live at home, where families provide the preponderance of care. For these families, caregiving comes at enormous physical, emotional and financial sacrifice. The Alzheimer's disease demonstration grant program currently provides matching grants to 32 States to stimulate and better coordinate services for families coping with Alzheimer's. With a relatively small amount of Federal support to provide the stimulus, States have found innovative ways to adapt existing health, long-term care, and community services to reach previously underserved populations, particularly minorities and those living in rural communities. Given the program's proven record of success, the Committee recommends an increase of \$1,504,000 more than the comparable 2002 appropriation to expand the program to additional States. Given the enormous demands on Alzheimer's family caregivers, the Committee has included \$1,000,000 to support an Alzheimer's family contact center for round-the-clock help to Alzheimer's families in crisis.

Program administration

The Committee recommends \$17,986,000 to support Federal staff that administer the programs in the Administration on Aging, \$116,000 less than the comparable 2002 level and the same amount as the budget request.

These funds provide administrative and management support for programs administered by the agency.

OFFICE OF THE SECRETARY

GENERAL DEPARTMENTAL MANAGEMENT

Appropriations, 2002	\$347,052,000
Budget estimate, 2003	384,395,000
Committee recommendation	374,386,000

The Committee recommends \$374,386,000 for general departmental management [GDM]. This is \$10,009,000 below the administration request and \$27,334,000 above the fiscal year 2002 level. The Committee does not agree to the proposed consolidation of Public Affairs and Legislative Affairs functions in the Office of the Secretary. For this reason the Committee's recommendation does not include the \$27,793,000 requested to transfer staff from the operating divisions to the Office of the Secretary. In addition, the Committee has denied the fiscal year 2003 bill language request, proposed in the budget, to transfer funds from accounts of the National Institutes of Health and the Agency for Healthcare Research and Quality within the Department for the purpose of consolidating all of HHS legislative and public affairs activities within the Office of the Secretary. The Committee has taken this action because of the concern that information necessary to make timely decisions by the Congress and requests for information by the public may be delayed by this consolidation.

The Committee recommendation includes \$21,552,000 in appropriated funds which in previous years were provided through program evaluation funds. On a comparable basis, the Committee's recommendation reflects a decrease of \$3,768,000 below the administration request. The Committee recommendation includes the transfer of \$5,851,000 from Medicare trust funds, which is the same as the administration request and the fiscal year 2002 level.

The Committee directs that specific information requests from the chairman and ranking member of the Subcommittee on Labor, Health and Human Services, and Education, and Related Agencies, on scientific research or any other matter, shall be transmitted to the Committee on Appropriations in a prompt professional manner and within the time frame specified in the request. The Committee further directs that scientific information requested by the Committees on Appropriations and prepared by Government researchers and scientists be transmitted to the Committee on Appropriations, uncensored and without delay.

This appropriation supports those activities that are associated with the Secretary's role as policy officer and general manager of the Department. It supports certain health activities performed by the Office of Public Health and Science, including the Office of the Surgeon General. GDM funds also support the Department's centralized services carried out by several Office of the Secretary staff divisions, including personnel management, administrative and management services, information resources management, intergovernmental relations, legal services, planning and evaluation, finance and accounting, and external affairs.

The Office of the Surgeon General, in addition to its other responsibilities, provides leadership and management oversight for the PHS Commissioned Corps, including the involvement of the Corps in departmental emergency preparedness and response activities.

The Committee has provided \$4,000,000 to support the activities of the United States-

Mexico Border Health Commission as authorized by Public Law 103-400. The Commission is authorized to assess and resolve current and potential health problems that affect the general population of the United States-Mexico border area.

Chronic Fatigue.—The Committee is disappointed that the establishment of the Department's Chronic Fatigue Syndrome advisory committee, announced in January 2001, has been delayed and that the advisory committee's predecessor, the Chronic Fatigue Syndrome Coordinating Committee has not met since January 2001. These delays have jeopardized momentum and important partnerships between the member agencies and the CFS community. It is this Committee's expectation that the new advisory committee will not diminish the full partnership of involved agencies or the collaborative relationships among Federal agencies, scientists, and CFS advocates that have developed over recent years through the CFS Coordinating Committee. The Committee anticipates that the new advisory committee will further advance the efforts of the Department and the public health service agencies to address the scientific questions about CFS and the social service needs of persons with CFS.

Complementary and Alternative Medicine Policy.—The Committee is pleased with the strong work and final report of the White House Commission on Complementary and Alternative Medicine Policy. The Committee expects the Secretary to provide sufficient funds to establish an interagency coordinating unit to assist with the implementation of the Commission's recommendations and expects to receive a briefing on the Department's progress in this area by March 30, 2003.

Data Collection.—The Committee urges the Secretary to strengthen the Department's collection and reporting of data on health care enrollment, access and utilization by patients' race, ethnicity, primary language and socioeconomic status by all agencies engaged in, or receiving Federal funds for health-related activities. It is expected that all Federal, State, and other entities receiving Federal funds shall collect and report disaggregated data; that racial and ethnic data shall be reported by federally-defined categories, and by subpopulation groups. Measures of racial and ethnic disparities should be used in performance measurement and in monitoring the progress of federally-funded activities for the elimination of health disparities. As the Nation's leading health enterprise, the Department is expected to play a leadership role in assuring the collection and reporting of racial, ethnic and primary health-related data through written policy and sustained action and resources. The Secretary is urged to designate a central authority within the Department to oversee its policies in this area, as well as dissemination, implementation and compliance activities.

The Secretary must ensure that Federal datasets meet at least the minimum standards set by the Office of Management and Budget in 1997 and subsequent standards for maintaining, collecting, and presenting Federal data on race and ethnicity. Also, the Committee reminds the Secretary of OMB's requirement that the standards be adopted as soon as possible, but not later than January 1, 2003, for use in household surveys, administrative forms and records, and other data collections purposes.

Homelessness.—The Committee supports the administration's goal of ending chronic homelessness. The Committee encourages the various agencies within the Department to re-examine their program delivery mechanisms to ensure that resources, both tar-

geted and mainstream, are reaching people who have been homeless for long periods of time.

The Committee also supports efforts to address chronic homelessness more effectively through better coordination of housing and support services at both the national policy and local service delivery levels. The Committee encourages the Department to seek opportunities to partner with the Department of Housing and Urban Development in providing service enriched supportive housing. The development of permanent supportive housing, that is, housing coupled with mental health, substance abuse and primary care supportive services, has been shown to be a highly effective model for addressing the needs of the chronically homeless. The Committee encourages Departmental program offices, including the Community Health Centers Program in HRSA, and the Centers for Mental Health Services, Substance Abuse Treatment, and Substance Abuse Prevention in SAMHSA to work with their grantees to identify opportunities for collaborating with local housing providers to develop permanent supportive housing.

The Committee urges the Department to study whether additional policies and protocols may be needed to ensure that persons being discharged from systems of care including mental health and substance abuse treatment programs and foster care have housing options to prevent such discharge from immediately resulting in homelessness.

Racial and Ethnic Disparities.—The Committee is deeply concerned about the results of a study released in March 2002 from the Institute of Medicine: *Unequal Treatment: Confronting Racial and Ethnic Disparities in Health Care*. The Committee is committed to ensuring the overall improved health of the American people, and strongly urges the Secretary to take the steps necessary to implement the study's recommendations, which offer significant guidelines and opportunities for eliminating health disparities and improving health. Specifically, all institutes and agencies are strongly encouraged to increase the representation of racial and ethnic minorities among health professionals, advance equity of care through the use of evidence-based guidelines, and promote the concept of multi-disciplinary treatment teams and community health workers who can help patients navigate through the health care system. The Committee expects the Secretary to report on the progress of this action during next year's appropriations hearings, and to include a progress update in the Department's Budget Justification.

Tick-Borne Disease.—The Committee urges the Secretary to consult with the biomedical community, community-based clinicians, voluntary organizations, patients and appropriate governmental agency officials to ensure coordination and communication regarding tick-borne diseases. These consultations may provide knowledge and support to the Secretary on matters of program oversight, performance, and priority setting for agencies that impact tick borne diseases.

Adolescent family life

The Committee has provided \$31,124,000 for the Adolescent Family Life Program [AFL]. This is \$2,198,000 more than the fiscal year 2002 appropriation and same as the administration request.

AFL is the only Federal program focused directly on the issue of adolescent sexuality, pregnancy, and parenting. Through demonstration grants and contracts, AFL focuses on a comprehensive range of health, educational, and social services needed to improve the health of adolescents, including the complex issues of early adolescent sexuality, pregnancy, and parenting.

Within the total provided, the Committee continues the prevention projects begun in fiscal year 1998, as well as new prevention projects. The Committee again expects the Department to fund new prevention projects which enable smaller communities to begin the organization and implementation of coalitions to implement abstinence-based education programs. The Committee again expects the Department, when announcing grant competitions, to provide a reasonable length of time for applicants to complete application packages, provide extensive technical assistance to applicants, with special assistance given to new applicants, and revise the terminology and instructions in grant applications to assure that the information being requested is as clear as possible.

Physical fitness and sports

The Committee recommends \$1,223,000 for the Federal staff which supports the President's Council on Physical Fitness and Sports. This is the same as the budget request and \$86,000 more than the fiscal year 2002 appropriation.

The President's Council on Physical Fitness and Sports serves as a catalyst for promoting increased physical activity/fitness and sports participation for Americans of all ages and abilities, in accordance with Executive Order 13265, as amended. The programs sponsored by PCPFS are supported largely through private sector partnerships.

The Committee has provided additional resources in this bill for a physical activity and nutrition initiative. The President's Council is urged to take a look at the Committee's recommendations and offer suggestions regarding how to coordinate between programs receiving funds for this purpose and how to build upon this initiative next year.

Minority health

The Committee recommends \$46,329,000 for the Office of Minority Health. This is the same as the budget request and \$3,228,000 less than the fiscal year 2002 appropriation.

The Office of Minority Health [OMH] focuses on strategies designed to decrease the disparities and to improve the health status of racial and ethnic minority populations in the United States. OMH establishes goals, and coordinates all departmental activity related to improving health outcomes for disadvantaged and minority individuals. OMH supports several demonstration projects, including the Minority Community Health Coalition, the Bilingual/Bicultural Service, the Center for Linguistic and Cultural Competency in Health Care, and the Family and Community Violence Prevention Program.

The Committee continues to recognize the need to recruit and train more minorities in the health professions. The Committee encourages the Office of Minority Health to support established programs that have a proven record of increasing the number of under-represented minorities entering the health professions.

Health Disparities.—The Committee commends the Secretary for designating the elimination of health disparities as a major priority for the Department, and is encouraged that the agencies within the Department are moving forward in this area as they develop, implement, and evaluate strategic plans for eliminating health disparities. The Committee expects the Office of Minority Health, along with the National Center for Minority Health and Health Disparities at the National Institutes of Health, to coordinate and monitor the implementation of the Department's elimination of health disparities strategic plans. The Committee expects the Secretary to report to Congress on the progress and implementation of the strategic

plans during next year's appropriations hearings, and to include a progress update in the Department's Budget Justification.

National Minority Male Health Project.—The Committee continues to support this effort and urges the Office of Minority Health to fund a consortium of historically black colleges and universities (HBCUS) to plan for the implementation of this project. The Committee understands that Bowie State University, Lincoln University, Morehouse College, Morgan State University, and Wilberforce will all be part of the initial group of demonstration institutions. The Committee urges that OMH dedicate adequate funds to expand this effort to include at least five additional HBCUS as demonstration institutions.

Provider education.—The Committee encourages the Secretary to provide funding for HIPAA provider education geared specifically to home care and hospice providers. These funds should be used to assist providers in complying with HIPAA privacy and administrative simplification requirements.

Office on Women's Health

The Committee recommends \$28,795,000 for the Office on Women's Health. This is the same as the administration request and \$2,034,000 more than the fiscal year 2002 appropriation.

The PHS Office on Women's Health [OWH] develops, stimulates, and coordinates women's health research, health care services, and public and health professional education and training across HHS agencies. It advances important crosscutting initiatives and develops public-private partnerships, providing leadership and policy direction, and initiating and synthesizing program activities to redress the disparities in women's health.

The Committee remains strongly supportive of the work done by the Office on Women's Health in the Office of the Secretary. In addition to its own work advancing women's health, it provides critical coordinating services with offices located in NIH, CDC, HRSA, FDA, SAMHSA, AHRQ, and CMS. In totality, these offices assure that issues related to research, treatment, services, training, and education efforts by HHS reflect the distinct needs of women. The Secretary should notify the Committee in advance of any changes planned for the status, location, or reporting structure of this office or any of the offices enumerated above.

Office of Emergency Preparedness

The Committee has provided \$15,247,000, which is the same as the budget request and \$1,076,000 more than last year, for activities to counter the adverse health and medical consequences from major terrorist events. Within this amount, sufficient funds are provided for the Office of Emergency Preparedness to staff and administer this program, as well as the other OEP activities specified in the administration's request.

The Department has lead responsibility for health, medical, and health-related support under the Federal response plan to catastrophic disasters. On behalf of the Department, the Office of Emergency Preparedness assesses the potential health and medical consequences of a terrorist incident and to formulate necessary responses. The funds provided would support activities to build local, State, and Federal capacity to respond to terrorist acts with public health implications. Such activities would include assisting local emergency managers through the MMST system to build an enhanced capability to detect and identify biologic and chemical agents.

HIV/AIDS in minority communities

To address high-priority HIV prevention and treatment needs of minority commu-

nities heavily impacted by HIV/AIDS, the Committee recommends \$50,000,000. These funds are available to key operating divisions of the Department with capability and expertise in HIV/AIDS services to assist minority communities with education, community linkages, and technical assistance.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$35,727,000
Budget estimate, 2003	39,747,000
Committee recommendation	39,747,000

The Committee recommends an appropriation of \$39,747,000 for the Office of Inspector General. This is the same as the administration request and \$4,020,000 higher than the fiscal year 2002 level. In addition to discretionary funds, the Health Insurance Portability and Accountability Act of 1996 provides \$160,000,000 in mandatory funds for the Office of the Inspector General in fiscal year 2003; the total funds provided to the Office by this bill and the authorizing bill would be \$199,747,000 in fiscal year 2003.

The Office of Inspector General conducts audits, investigations, inspections, and evaluations of the operating divisions within the Department of Health and Human Services. The OIG functions with the goal of reducing the incidence of waste, abuse, and fraud. It also pursues examples of mismanagement toward the goal of promoting economy and efficiency throughout the Department.

The Committee commends the Office of Inspector General for their continued good work to reduce waste, fraud and abuse in Department programs. The Committee expects efforts to reduce Medicare mispayments will be continued and expanded. The Committee also wants to assure that seniors calling into the toll-free telephone line to report Medicare mispayments get a prompt and complete response.

OFFICE FOR CIVIL RIGHTS

Appropriations, 2002	\$31,955,000
Budget estimate, 2003	33,642,000
Committee recommendation	33,642,000

The Committee recommends \$33,642,000 for the Office for Civil Rights. This is the same as the administration request and \$1,687,000 more than the fiscal year 2002 level.

This recommendation includes the transfer of \$3,314,000 from the Medicare trust funds, which is the same as the administration request and the fiscal year 2002 level.

The Office for Civil Rights is responsible for enforcing civil rights-related statutes in health care and human services programs. To enforce these statutes, OCR investigates complaints of discrimination, conducts program reviews to correct discriminatory practices, and implements programs to generate voluntary compliance among providers and constituency groups of health and human services.

POLICY RESEARCH

Appropriations, 2002	\$2,500,000
Budget estimate, 2003	2,499,000
Committee recommendation	2,499,000

The Committee recommends \$2,499,000 for policy research, which is the same as the administration request and \$1,000 less than the fiscal year 2002 amount. The Committee also provides \$18,000,000 in program evaluation funds, which will yield a program level of \$20,499,000 in fiscal year 2003.

Funds appropriated under this title provide resources for research programs that examine broad issues which cut across agency and subject lines, as well as new policy approaches outside the context of existing programs. This research can be categorized into three major areas: health policy, human

services policy, and disability, aging and long-term care policy.

RETIREMENT PAY AND MEDICAL BENEFITS FOR COMMISSIONED OFFICERS

Appropriations, 2002	\$262,075,000
Budget estimate, 2003	251,039,000
Committee recommendation	251,039,000

The Committee provides an estimated \$251,039,000 for retirement pay and medical benefits for commissioned officers of the U.S. Public Health Service. This is the same as the administration request and is \$11,036,000 below the estimated payments for fiscal year 2002.

This account provides for: retirement payments to U.S. Public Health Service officers who are retired for age, disability, or length of service; payments to survivors of deceased officers; medical care to active duty and retired members and dependents and beneficiaries; and for payments to the Social Security Administration for military service credits.

The Committee notes that, according to the budget request, the various agencies and operating divisions across the Department are expected to absorb \$27,702,000 in retirement medical cost payments for Commissioned Corps Officers. Medical cost payments have traditionally been funded by this account. While the Committee understands that the transfer of responsibility is mandated in the Department of Defense Reauthorization Act of fiscal year 2002, the Committee is disturbed that the corresponding funds were not transferred to the operating divisions to cover these costs. Therefore, the Committee has included bill language mandating that the Retirement Pay and Medical Benefits for Commissioned Officers account continue to cover these costs in fiscal year 2003 as it has done in the past. The Committee expects that any future proposals by the administration for the operating divisions to pay these costs will include the funding required to do so.

HEALTH FACILITIES CONSTRUCTION AND MANAGEMENT FUND

Appropriations, 2002	
Budget estimate, 2003	\$184,000,000
Committee recommendation	

The Committee recommendation does not include funding for this account. The administration proposed consolidating into this account the management of buildings and construction across the Department. Instead the Committee has included \$270,000,000 for buildings and facilities in the CDC appropriation and \$20,000,000 for CDC security in the PHSSEF appropriation.

PUBLIC HEALTH AND SOCIAL SERVICES EMERGENCY FUND

Appropriations, 2002	\$2,707,263,000
Budget estimate, 2003	2,295,184,000
Committee recommendation	2,255,980,000

The Committee recommends \$2,255,980,000 for the Public Health and Social Services Emergency Fund. This is \$39,204,000 below the administration request and \$451,283,000 below the fiscal year 2002 level. The Committee has provided funding for Poison Control and Emergency Medical Services for Children in HRSA instead of in this account as proposed by the administration. The Committee has fully funded the administration request when these amounts are included.

The Committee provides \$940,000,000 to CDC for upgrading State and local capacity. This amount maintains funding at the level provided last year. The Committee has included \$40,000,000 for the Health Alert Network. The Health Alert Network was established to provide ongoing communications,

technology, information systems support and education and training to local public health agencies. The Committee recognizes the important role that HAN played during and after the events of September 11. The Committee is also aware that the broad public health infrastructure required is the same for bioterrorism preparedness as for other public health threats. The Committee also recognizes that ongoing support for communications, technology and information systems is necessary to ensure that broad-based public health capacity is improved and maintained. Given the investment made in the development of HAN, the Committee expects that CDC will move forward with the next logical phase of the network, which is to provide workforce training and education, support for organizational capacity building in local public health agencies and the creation of knowledge management systems required by public health practitioners.

The Committee directs CDC and the Department to assure that State HAN grantees spend no less than 85 percent of these funds at the local level for local public health improvement. Further, CDC and the Department are directed to ensure that any funds provided for training, communications and technology for bioterrorism be coordinated and used in collaboration with HAN where appropriate.

Of the total amount, the Committee recommends \$158,700,000 for upgrading CDC capacity, which is an increase of \$21,995,000 over the fiscal year 2002 level. The Committee recommends an additional \$5,000,000 to CDC for public health preparedness centers in order to provide public health preparedness training to contiguous States. The Committee has also provided the following amounts for CDC: \$300,000,000 for the National Pharmaceutical Stockpile, \$100,000,000 for the smallpox vaccine, \$18,040,000 for evaluation and research of the anthrax vaccine, and \$20,000,000 for security at CDC's facilities in Atlanta, including information technology security.

The Committee notes that these funds provided to CDC can be used to give assistance to States who want to use technology which allows for more rapid administration of vaccines on a massive scale in case of bioterrorism attack.

The Committee's recommendation includes \$152,240,000 for the Office of the Secretary, an increase of \$35,396,000 over fiscal year 2002. The Committee has provided \$2,000,000 within this amount to the Office of Public Health and Science for activities related to the transformation and modernization of the Public Health Service (PHS) Commissioned Corps. Such a transformation will entail the following: (1) establishment of an integrated command and control structure, to provide the Secretary with the capacity to field proportional responses to emergencies while simultaneously strengthening the nation's public health infrastructure; and (2) modernization of the Corps to ensure that it is rapidly deployable and adaptable, capable of responding effectively to emergencies of varying intensities, able to integrate resources from various partner agencies into a unified response system, and directed via an integrated management and administration structure in the Department. These funds will allow an increase in recruitment for Corps health professionals, expand and enhance the Commissioned Corps Readiness Force, provide medical readiness education and training to Corps personnel, and establish a PHS Auxiliary system to provide locally-grouped professionals who can be deployed along with Corps teams.

The Committee also provides \$547,000,000 to HRSA for bioterrorism activities. Of this amount, \$492,000,000 is for hospital prepared-

ness and infrastructure improvements related to bioterrorism. This is an increase of \$357,000,000 over last year's level. The Committee provides \$55,000,000 for curriculum development and training on the detection and treatment of diseases caused by bioterrorism. The Committee recommendation also includes \$10,000,000 for SAMHSA and \$5,000,000 for bioterrorism research at AHRQ.

The Committee directs the Secretary to use the \$10,000,000 for SAMHSA to supplement the \$20,000,000 available for the National Child Traumatic Stress Initiative within Programs of Regional and National Significance under the Center for Mental Health Services. With a total program level of \$30,000,000 (\$10,000,000 more than last year, excluding \$10,000,000 in grants supported by Public Law 107-38), the Committee expects that SAMHSA will be able to increase the number of children and families served through the direct services provided by this program. In addition, the additional funding will promote improvements in treatment, training opportunities and public information efforts.

In addition to the funds provided in the PHSSEF, the Committee has provided \$1,485,100,000 to NIH for bioterrorism-related activities. The aggregate amount provided in this bill for bioterrorism is \$3,741,080,000.

The Committee notes that a bioterrorism event will occur at the local level and will require local capacity, preparedness and initial response. For this reason it was the intent of Congress that a significant amount of the funding provided in the Emergency Supplemental Act of 2002 (Public Law 107-117) be used to improve local public health capacity and meet the needs determined by local public health agencies. The Committee believes it is essential that local public health agencies are full partners in developing State plans and that a significant level of funding be made available to build local capacity and meet the needs as determined by local public health officials.

Therefore, the Committee directs the Department to report on steps it is taking to ensure that: (1) substantial funding reaches local public health agencies, and such funds are used to build local public health capacity in ways with which local public health officials concur; and (2) local public health agencies are fully participating partners in developing State preparedness plans. The Department is directed to report to the Committee on the amounts of fiscal year 2002 funding that each State has spent or plans to spend to directly benefit or improve local public health capacity, and the amount each State has directly granted to local public health agencies. The Committee expects this report to be submitted 90 days after the enactment of this bill.

GENERAL PROVISIONS, DEPARTMENT OF HEALTH AND HUMAN SERVICES

The Committee recommendation includes language placing a \$50,000 ceiling on official representation expenses, which is \$13,000 more than existing law (sec. 201).

The Committee recommendation includes language carried in fiscal year 2002 which limits the assignment of certain public health personnel (sec. 202).

The Committee recommendation retains language regarding set-asides in the authorizing statute of the National Institutes of Health (sec. 203).

The Committee recommendation retains a provision carried in fiscal year 2002 to limit the use of grant funds to pay individuals no more than an annual rate of Executive Level I (sec. 204).

The Committee recommendation retains language carried in fiscal year 2002 restricting the Secretary's use of taps for program

evaluation activities unless he submits a report to the Appropriations Committees on the proposed use of funds (sec. 205).

The Committee recommendation includes language authorizing the transfer of up to 1.25 percent of Public Health Service funds for evaluation activities (sec. 206).

The Committee recommendation retains language restricting transfers of appropriated funds among accounts and requiring 15 day notification to both the House and Senate Appropriations Committees (sec. 207).

The Committee recommendation retains language carried in fiscal year 2002 permitting the transfer of up to 3 percent of AIDS funds among Institutes and Centers by the Director of NIH and the Director of the Office of AIDS Research at NIH (sec. 208).

The Committee recommendation retains language which requires that the use of AIDS research funds be determined jointly by the Director of the National Institutes of Health and the Director of the Office of AIDS Research and that those funds be allocated directly to the Office of AIDS Research for distribution to the Institutes and Centers consistent with the AIDS research plan (sec. 209).

The Committee recommendation retains language carried in fiscal year 2002 regarding requirements for family planning applicants (sec. 210).

The Committee recommendation retains language which restricts the use of funds to carry out the Medicare+Choice Program if the Secretary denies participation to an otherwise eligible entity (sec. 211).

The Committee recommendation retains language which States that no provider services under Title X of the PHS Act may be exempt from State laws regarding child abuse (sec. 212).

The Committee recommendation retains language carried in fiscal year 2002 extending the refugee status of persecuted religious groups (sec. 213).

The Committee recommendation retains language which prohibits the Secretary from withholding substance abuse treatment funds (sec. 214).

The Committee recommendation retains language carried in fiscal year 2002 which facilitates the expenditure of funds for international AIDS activities (sec. 215).

The Committee recommendation includes a new provision allowing the Division of Federal Occupational Health to use personal services contracting to employ professional, administrative, and occupational health professionals (sec. 216).

The Committee recommendation includes bill language which permits transfer of the Nutrition Services Incentives Program from USDA to AOA (sec. 217).

The Committee recommendation includes bill language that allows the NIH to expand the number of Morris K. Udall Parkinson's Disease Centers (sec. 218).

TITLE III—DEPARTMENT OF EDUCATION EDUCATION FOR THE DISADVANTAGED

Appropriations, 2002	\$12,346,900,000
Budget estimate, 2003	13,385,400,000
Committee recommendation	13,178,400,000

The Committee recommends an appropriation of \$13,178,400,000 for education for the disadvantaged. This amount is \$831,500,000 more than the fiscal year 2002 appropriation and \$207,000,000 below the budget request.

The programs in the Education for the Disadvantaged account help ensure that poor and low-achieving children are not left behind in the Nation's effort to raise the academic performance of all children and youth. That goal is more pressing than ever since the passage of the No Child Left Behind Act,

which incorporates numerous accountability measures into Title I programs, especially part A grants to local educational agencies—the largest Federal elementary and secondary education program.

In particular, the new law strengthens Title I accountability by requiring States to implement statewide accountability systems covering all public schools and students. These systems must be based on challenging State standards in reading and mathematics, annual statewide progress objectives ensuring that all groups of students reach proficiency in reading and math within 12 years, and annual testing for all students in grades 3–8. State progress objectives and assessment results must be broken out by poverty, race and ethnicity, disability, and limited English proficiency. States, school districts, and schools must report annually on their progress toward statewide proficiency goals. Districts and schools that fail to make adequate yearly progress (AYP) toward these goals will, over time, be subject to increasingly rigorous improvement, corrective action, and restructuring measures aimed at getting them back on course to meet State standards. Students attending schools that fail to meet annual State AYP objectives for 2 consecutive years will be permitted to transfer to a better public school or, if the school continues to fail to meet AYP for 3 years or more, to use Title I funds to obtain educational services from a public- or private-sector provider selected by their parents.

Grants to local educational agencies

Title I Grants to Local Educational Agencies (LEAs) provide supplemental education funding, especially in high-poverty areas, for local programs that provide extra academic support to help raise the achievement of eligible students or, in the case of schoolwide programs, help all students in high-poverty schools to meet challenging State academic standards. The program serves more than 15 million students in nearly all school districts and more than half of all public schools—including two-thirds of the Nation's elementary schools.

Title I schools help students reach challenging State standards through one of two models: “targeted assistance” that supplements the regular education program of individual children deemed most in need of special assistance, or a “schoolwide” approach that allows schools to use Title I funds—in combination with other Federal, State, and local funds—to improve the overall instructional program for all children in a school.

More than any other Federal program, Title I grants to LEAs are critical to the success of the No Child Left Behind Act. The Committee recommends \$11,350,000,000 for this program, an increase of \$1,000,000,000 over the 2002 appropriation and the same as the budget request.

The grants are distributed through four formulas: basic, concentration, targeted, and education finance incentive grant (EFIG).

For Title I basic grants, including the amount transferred to the Census Bureau for poverty updates, the Committee recommends an appropriation of \$7,172,971,000, the same as the fiscal year 2002 appropriation and the budget request. Basic grants are awarded to school districts with at least 10 poor children who make up more than 2 percent of enrollment.

For concentration grants, the Committee recommends an appropriation of \$1,365,031,000, the same as the fiscal year 2002 appropriation and the budget request. Funds under this program are distributed according to the basic grants formula, except that they go only to LEAs where the number of poor children exceeds 6,500 or 15 percent of the total school-aged population.

Last year, for the first time, Congress appropriated Title I funds through the EFIG and targeted formulas. This year, the Committee recommends allocating all of the increase through those two formulas.

The EFIG formula delivers a larger share of Title I funds to high-poverty school districts—those with child poverty rates in excess of 30 percent—than any other Title I formula, followed closely by the targeted grants formula. In addition, the EFIG formula uses State-level “equity” and “effort” factors to make allocations to States that are intended to encourage States to spend more on education and to improve the equity of State funding systems. Once State allocations are determined, suballocations to the LEA level are based on a modified version of the targeted grants formula, described below.

The Committee recommends an appropriation of \$1,405,999,000 for education finance incentive grants. This amount is \$612,500,000 more than the fiscal year 2002 appropriation and the budget request.

The targeted grants formula weights child counts to make higher payments to school districts with high numbers or percentages of poor students. For these grants, the Committee recommends an appropriation of \$1,405,999,000, which is \$387,500,000 more than the fiscal year 2002 appropriation and \$612,500,000 below the budget request.

William F. Goodling Even Start Family Literacy Program

For the Even Start program, the Committee recommends \$200,000,000, which is \$50,000,000 below the fiscal year 2002 appropriation and the same as the budget request.

The Even Start program provides grants for family literacy programs that serve disadvantaged families with children under 8 years of age and adults eligible for services under the Adult Education and Family Literacy Act. Programs combine early childhood education, adult literacy, and parenting education.

States receive funds on the basis of their proportion of Title I LEA grant allocations and make competitive 4-year grants to partnerships of local educational agencies and community-based organizations. Grant funds must be equitably distributed among urban and rural areas. The local share of program costs must increase from 10 percent in the first year to 40 percent in the 4th year, 50 percent in years 5 through 8, and 65 percent after 8 years.

Reading First State Grants

The Committee recommends \$1,000,000,000, the same as the budget request and \$100,000,000 more than the fiscal year 2002 appropriation, for the Reading First State Grants program.

Reading First is a comprehensive effort to provide States and LEAs with funds to implement comprehensive reading instruction for children in grades K–3. The purpose of the program is to help ensure that every child can read by third grade. LEAs and schools that receive funds under this program should use the money to provide professional development in reading instruction for teachers and administrators, adopt and use reading diagnostics for students in grades K–3 to determine where they need help, implement reading curricula that are based on scientific research, and provide reading interventions for children who are not reading at grade level.

Early Reading First

The Committee recommends \$75,000,000, the same as the budget request and the fiscal year 2002 appropriation, for Early Reading First. Early Reading First complements Reading First State Grants by providing competitive grants to school districts and

nonprofit groups to support activities in existing preschool programs that are designed to enhance the verbal skills, phonological awareness, letter knowledge, pre-reading skills, and early language development of children ages 3 through 5. Funds are targeted to communities with high numbers of low-income families.

Improving Literacy Through School Libraries

The Committee recommends \$15,000,000 for the Improving Literacy Through School Libraries program. This amount is \$2,500,000 more than the budget request and the fiscal year 2002 appropriation.

This program provides funds for urgently needed, up-to-date school library books and training for school library media specialists in order to support the scientifically based reading programs authorized by the Reading First initiative. LEAs with a child-poverty rate of at least 20 percent are eligible for the competitive awards. Funds may be used to acquire school library media resources, including books and advanced technology; facilitate resource-sharing networks among schools and school libraries; provide professional development for school library media specialists; and provide students with access to school libraries during non-school hours.

Migrant

For the State agency migrant program, the Committee recommends \$400,000,000, which is \$4,000,000 more than the budget request and the fiscal year 2002 appropriation.

The Title I migrant program authorizes grants to State educational agencies for programs to meet the special educational needs of the children of migrant agricultural workers and fishermen. Funds are allocated to the States through a statutory formula based on each State's average per-pupil expenditure for education and counts of migratory children ages 3 through 21 residing within the States. Only migratory children who have moved within the last 3 years are generally eligible to be counted and served by the program.

This appropriation also supports activities to improve interstate and intrastate coordination of migrant education programs.

Neglected and delinquent

The Committee recommends \$50,000,000 for the Title I neglected and delinquent program. This amount is \$2,000,000 more than the budget request and the fiscal year 2002 appropriation.

This program provides financial assistance to State educational agencies for education services to neglected and delinquent children and youth in State-run institutions and for juveniles in adult correctional institutions.

Funds are allocated to individual States through a formula based on the number of children in State-operated institutions and per-pupil education expenditures for the State.

States are authorized to set aside up to 10 percent of their neglected and delinquent funds to help students in State-operated institutions make the transition into locally operated programs. Transition activities are designed to address the high failure and dropout rate of institutionalized students and may include alternative classes, counseling and supervisory services, or educational activities in State-supported group homes.

Evaluation

The Committee bill includes \$8,900,000, the same as the budget request and the fiscal year 2002 appropriation, for Title I evaluation activities. Evaluation funds are used to support large-scale national surveys that examine how the Title I program is contributing to student performance.

Comprehensive school reform

The Committee recommends no funds for this program. The budget included

\$235,000,000 for this program, the same amount provided in fiscal year 2002.

This program provides schools with funding to develop or adopt, and implement, comprehensive school reforms that will enable children in participating schools to meet State standards. The Department allocates funds to States based on their relative shares of the previous year's Title I basic grants funds.

Dropout prevention

The Committee recommends \$13,000,000 to help schools implement effective school dropout prevention and re-entry programs. This amount is \$3,000,000 more than the fiscal year 2002 appropriation. The administration requested no funds for this purpose.

Close Up Fellowships

For Close Up Fellowships, formerly called Ellender Fellowships, the Committee bill includes \$1,500,000, the same as the fiscal year 2002 appropriation. The administration proposed eliminating this program, which is administered by the Close Up Foundation of Washington, D.C. The program provides fellowships to students from low-income families and their teachers to enable them to attend 1 week in Washington attending seminars and meeting with representatives of the three branches of the Federal Government.

Advanced Placement

The Committee recommends \$25,000,000 for Advanced Placement. This amount is \$3,000,000 more than the budget request and the fiscal year 2002 appropriation. The first priority of the program is to subsidize test fees for low-income students who are enrolled in an Advanced Placement class and plan to take an Advanced Placement test. The balance of the funds are allocated for Advanced Placement Incentive Program grants, which are used to expand access for low-income individuals to Advanced Placement programs. Eligible activities include teacher training and participation in online Advanced Placement courses, among other related purposes.

High school equivalency program

The Committee bill includes \$24,000,000 for the high school equivalency program (HEP). This amount is \$1,000,000 more than the budget request and the fiscal year 2002 appropriation.

This program provides 5-year grants to institutions of higher education and other non-profit organizations to recruit migrant students ages 16 and over and provide the academic and support services needed to help them obtain a high school equivalency certificate and subsequently gain employment, win admission to a postsecondary institution or a job-training program, or join the military. Projects provide counseling, health services, stipends, and placement assistance. HEP serves about 8,000 migrants.

College Assistance Migrant Program

For the College Assistance Migrant Program (CAMP), the Committee recommends \$16,000,000, which is \$1,000,000 more than the budget request and the fiscal year 2002 appropriation.

Funds provide 5-year grants to institutions of higher education and nonprofit organizations for projects that provide tutoring, counseling, and financial assistance to migrant students during their first year of postsecondary education. Projects also may use up to 10 percent of their grants for follow-up services after students have completed their first year of college, including assistance in obtaining student financial aid.

IMPACT AID

Appropriations, 2002	\$1,143,500,000
Budget estimate, 2003	1,140,500,000
Committee recommendation	1,176,500,000

The Committee recommends an appropriation of \$1,176,500,000 for impact aid for the Department of Education. This amount is \$36,000,000 more than the budget request and \$33,000,000 more than the fiscal year 2002 appropriation.

Impact aid provides financial assistance to school districts for the costs of educating children when enrollments and the availability of revenues from local sources have been adversely affected by the presence of Federal activities. Children who reside on Federal or Indian lands generally constitute a financial burden on local school systems because these lands do not generate property taxes—a major revenue source for elementary and secondary education in most communities. In addition, realignments of U.S. military forces at bases across the country often lead to influxes of children into school districts without producing the new revenues required to maintain an appropriate level of education.

Basic support payments.—The Committee recommends \$1,012,500,000 for basic support payments. This amount is \$30,000,000 more than the budget request and the fiscal year 2002 appropriation. Under statutory formula, payments are made on behalf of all categories of federally connected children.

Payments for children with disabilities.—Under this program, additional payments are made for certain federally connected children eligible for services under the Individuals with Disabilities Education Act. The Committee bill includes \$52,000,000 for this purpose. This amount is \$2,000,000 more than the fiscal year 2002 level and the budget request.

Facilities maintenance.—This activity provides funding for maintaining certain school facilities owned by the Department of Education. The Committee recommends \$8,000,000, the same as the budget request and the fiscal year 2002 level, for this purpose.

Construction.—Payments are made to eligible LEAs to be used for construction and renovation of school facilities, or for debt service related to the construction of school facilities. The Committee recommends \$47,000,000 for this program. This amount is \$2,000,000 more than the budget request and \$1,000,000 below the fiscal year 2002 appropriation.

Payments for Federal property.—These payments compensate local educational agencies in part for revenue lost due to the removal of Federal property from local tax rolls. Payments are made to LEAs that have a loss of tax base of at least 10 percent of assessed value due to the acquisition since 1938 of real property by the U.S. Government. The Committee recommends \$57,000,000 for this activity. This amount is \$2,000,000 more than the budget request and the fiscal year 2002 appropriation.

SCHOOL IMPROVEMENT PROGRAMS

Appropriations, 2002	\$7,837,473,000
Budget estimate, 2003	6,784,484,000
Committee recommendation	7,788,329,000

The Committee recommends an appropriation of \$7,788,329,000 for school improvement programs. This is \$1,003,845,000 more than the budget request and \$49,144,000 less than the fiscal year 2002 appropriation.

State grants for improving teacher quality

The No Child Left Behind Act requires States to ensure that all teachers teaching in core academic subjects are "highly qualified" by the end of the 2005–2006 school year. The Committee recommends \$2,850,000,000, the same as the budget request and the fiscal year 2002 appropriation.

States and LEAs may use the funds for a range of activities related to the certifi-

cation, recruitment, professional development and support of teachers. Activities may include reforming teacher certification and licensure requirements, addressing alternative routes to State certification of teachers, recruiting teachers and principals, and implementing teacher mentoring systems, teacher testing, merit pay and merit-based performance systems.

These funds may also be used by districts to hire teachers to reduce class sizes. The Committee recognizes that smaller classes, particularly in the early grades, can have a positive impact on students by improving classroom discipline, providing students with more individualized attention, and allowing parents and teachers to work more closely together. Funds within the teacher quality State grants program may be used to continue this commitment to our Nation's students, parents and teachers, without taking away from other efforts to invest in professional development.

Improving teacher quality: National activities

The Committee recommends \$40,000,000 for professional development national activities. This amount is \$5,000,000 more than the fiscal year 2002 appropriation and \$25,000,000 more than the budget request. Within those funds, \$15,000,000 is included for professional development activities for early childhood educators and caregivers in high-poverty communities. This amount is the same as the fiscal year 2002 appropriation and the budget request. In addition, \$10,000,000, the same as the fiscal year 2002 appropriation, is included for the National Board for Professional Teaching Standards. The administration requested no funds for this purpose.

Finally, the Committee recognizes the critical role that principals play in creating an environment that fosters good teaching and high academic achievement. Therefore, the Committee recommends \$15,000,000 for the school leadership program, which provides competitive grants to assist high-need LEAs to recruit and train principals and assistant principals through activities such as professional development and training programs. This amount is \$5,000,000 more than the fiscal year 2002 appropriation; the administration requested no funds for this purpose.

Mathematics and science partnerships

For mathematics and science partnerships, the Committee recommends \$25,000,000, which is \$12,500,000 more than the fiscal year 2002 appropriation and the budget request. These funds will be used to improve the performance of students in the areas of math and science by bringing math and science teachers in elementary and secondary schools together with scientists, mathematicians, and engineers to increase the teachers' subject-matter knowledge and improve their teaching skills. The Secretary is authorized to award grants, on a competitive basis, to eligible partnerships to enable the entities to pay the Federal share of the costs of developing or redesigning more rigorous mathematics and science curricula that are aligned with State and local standards; creating opportunities for enhanced professional development that improves the subject-matter knowledge of math and science teachers; recruiting math and science majors; and improving and expanding training of math and science teachers, including the effective integration of technology into curricula and instruction.

Troops-to-Teachers

This program supports the Defense Department's Troops to Teachers program, which helps prepare retiring military personnel to teach in high-poverty school districts. The Secretary of Education transfers program funds to the Department of Defense for the

Defense Activity for Non-Traditional Education Support to provide assistance, including stipends of up to \$5,000, to eligible members of the armed forces so that they can obtain teacher certification or licensing. In addition, the program helps these individuals find employment in a school. The Committee recommends \$20,000,000, the same as the budget request, for this program. This amount is \$2,000,000 more than the fiscal year 2002 appropriation.

Transition to teaching

This program provides grants to help support efforts to recruit, train, and place non-traditional teaching candidates into teaching positions and to support them during their first years in the classroom. In particular, this program is intended to attract mid-career professionals and recent college graduates. Program participants are placed in high-need schools in high-need LEAs. The Committee recommends \$35,000,000, a decrease of \$4,400,000 below the budget request and the same as the fiscal year 2002 appropriation.

Innovative education program strategies State grants

The Committee recommends \$385,000,000 for innovative education program strategies State grants. This amount is the same as the fiscal year 2002 appropriation and the budget request.

The innovative education program provides support to States and LEAs in developing education reform initiatives that will improve the performance of students, schools and teachers.

Educational technology state grants

The Committee recommends \$700,500,000 for educational technology State grants. This amount is the same as the budget request and the fiscal year 2002 appropriation.

This program supports efforts to integrate technology into curricula to improve student learning. Funds flow by formula to States and may be used for the purchase of hardware and software, teacher training on integrating technology into the curriculum, and efforts to use technology to use technology to improve communication with parents, among other related purposes. An LEA must use at least 25 percent of its formula allocation for professional development in the integration of technology into the curricula unless it can demonstrate that it already provides such professional development.

Ready to Learn Television

The Committee recommends an appropriation of \$24,000,000 for the Ready to Learn Television program. This amount is \$2,000,000 more than the budget request and the fiscal year 2002 appropriation.

Ready to Learn Television supports the development and distribution of educational television programming designed to improve the readiness of preschool children to enter kindergarten and elementary school. The program also supports the development, production, and dissemination of educational materials designed to help parents, children, and caregivers obtain the maximum advantage from educational programming.

Preparing Tomorrow's Teachers to Use Technology

The Committee recommends \$62,500,000, which is the same as the fiscal year 2002 appropriation, for the Preparing Tomorrow's Teachers to Use Technology (PT3) program. The administration requested no funds for this purpose.

The Committee strongly believes that this program should be preserved. Teacher preparation is critical to ensuring that the Nation's substantial investment in education technology is used effectively. Too often,

however, it is mistakenly assumed that just because prospective teachers may know how to use technology in their daily lives, they automatically understand how to integrate it into curricula. Without a program designated specifically to promote high-quality teacher preparation in technology, the Committee fears that States are unlikely to devote adequate funds for this purpose from larger block programs that they rely on to address a myriad of other pressing needs, from recruiting teachers and reducing class sizes to buying new hardware and upgrading distance learning capabilities.

Funds are used to assist consortia of private and public entities to prepare prospective teachers to use technology effectively in the classroom. Consortia consist of at least one institution of higher education, one State or local educational agency, and one other entity. Of the amount appropriated, the Committee urges the Department to allocate all funds that are not used for continuation costs for the purpose of issuing a new, multi-year grant competition.

21st Century Community Learning Centers

The Committee recommends an appropriation of \$1,000,000,000 for the 21st Century Community Learning Centers program. This amount is the same as the budget request and the fiscal year 2002 appropriation.

This program enables communities to establish or expand community learning centers that provide activities offering significant extended learning opportunities, such as before-and after-school programs, for students and related services to their families. Centers must target their services on students who attend schools that are eligible to operate a schoolwide program under Title I of the Elementary and Secondary Education Act or serve high percentages of students from low-income families.

Safe and drug-free schools and communities

The Committee recommends a total of \$644,250,000 for activities to promote safe and drug-free schools and communities. This amount is \$10,000,000 less than the fiscal year 2002 appropriation and the same as the budget request.

State grant program.—The Committee bill provides \$482,017,000 for the safe and drug-free schools and communities State grant program. This amount is \$10,000,000 more than the fiscal year 2002 appropriation and the budget request.

National programs.—The Committee has included \$162,233,000 for the national programs portion of the safe and drug-free schools program. This amount is \$20,000,000 less than the fiscal year 2002 appropriation and \$10,000,000 less than the budget request. The Committee intends that \$5,000,000 shall be used for Project SERV (School Emergency Response to Violence), which provides education-related services to LEAs in which the learning environment has been disrupted due to a violent or traumatic crisis. The budget request included \$10,000,000 for Project SERV. However, the Committee will monitor the availability of funding and consider action in subsequent appropriations bills. The funds provided for Project SERV are available until expended.

The Committee is aware of the increasing problem of alcohol and drug abuse on college campuses. Therefore, it has included \$850,000 to continue the National Recognition Awards program under the same guidelines outlined by Section 120(f) of Public Law 105-244. This program identifies and provides models of alcohol and drug abuse prevention and education programs in higher education. The Committee is disappointed that the Department did not fund this program last year, as requested in Senate report language. The Committee strongly urges the Department to resume funding in fiscal year 2003.

Modifications made to the Safe and Drug Free Schools Program in Section 4114(a)(1) of the No Child Left Behind Act may have created dramatic changes in funding for some LEAs. The Committee understands that no data have been compiled to show the nationwide breakdown of these funding changes at the LEA level. Therefore, the Committee requests that the Department gather this information and report back to Congress no later than May 1, 2004, with its findings.

Magnet schools assistance

For the magnet schools assistance program, the Committee bill provides \$110,000,000, the same as the budget request and the fiscal year 2002 appropriation.

This program supports grants to local educational agencies to establish and operate magnet schools that are part of a court-ordered or federally approved voluntary desegregation plan. Magnet schools are designed to attract substantial numbers of students from different social, economic, ethnic, and racial backgrounds. Grantees may use funds for teacher salaries, purchase of computers, and other educational materials and equipment.

Charter schools

The Committee recommends \$200,000,000 for the support of charter schools. This amount is the same as the budget request and the fiscal year 2002 appropriation.

This program supports the planning, development, and initial implementation of charter schools, which are public schools that receive exemption from many statutory and regulatory requirements in exchange for promising to meet agreed-upon accountability measures. State educational agencies that have the authority under State law to approve charter schools are eligible to compete for grants. If an eligible SEA does not participate, charter schools from the State may apply directly to the Secretary.

Credit enhancement for charter school facilities

The Committee recommends no funding for this new program. The budget request included \$100,000,000 for this purpose.

Voluntary public school choice

The Committee recommends \$27,584,000, which is \$2,584,000 above the budget request and the fiscal year 2002 appropriation, for efforts to establish or expand State- or district-wide public school choice programs, especially for parents whose children attend low-performing public schools.

Choice demonstration fund

The Committee recommends no funding for this new program. The budget request included \$50,000,000 for this purpose.

State assessments and enhanced assessment instruments

A key accountability measure in the No Child Left Behind Act requires annual State assessments in reading and mathematics for all students in grades 3-8 beginning in the 2005-2006 school year. The new assessments will be used to determine whether States, LEAs, and schools are making adequate yearly progress toward the goal of helping all students attain proficiency within 12 years of the 2001-2002 school year.

This program has two components. The first provides formula grants to States to pay the cost of developing standards and assessments required by the new law. The statute includes funding "trigger amounts" for fiscal years 2002-2007; States may defer the new assessments if the appropriation falls below the trigger level. The trigger was \$370,000,000 for fiscal year 2002 and rises to \$380,000,000 in fiscal year 2003. Under the second component, appropriations in excess of the trigger level are used for the Grants for Enhanced Assessment Instruments program.

This competitive grant program supports efforts by States to improve the quality and fairness of their assessment systems.

Congress appropriated a total of \$387,000,000 for the two programs in fiscal year 2002—\$370,000,000 for State assessments and \$17,000,000 for enhanced assessment instruments. The administration has requested the same total for fiscal year 2003, with \$380,000,000 dedicated to State assessments and \$7,000,000 to enhanced assessment instruments. The Committee recommends an appropriation of \$387,000,000, same as the budget request and the fiscal year 2002 appropriation.

Education for homeless children and youth

For carrying out education activities authorized by Title VII, subtitle B of the Stewart B. McKinney Homeless Assistance Act, the Committee recommends \$54,000,000, which is \$4,000,000 more than the budget request and the fiscal year 2002 appropriation.

This program provides assistance to each State to support an office of the coordinator of education for homeless children and youth, to develop and implement State plans for educating homeless children, and to make subgrants to LEAs to support the education of those children. Grants are made to States based on the total that each State receives in Title I grants to LEAs.

Training and advisory services

For training and advisory services authorized by Title IV of the Civil Rights Act, the Committee recommends \$7,334,000, the same as the budget request and the fiscal year 2002 appropriation.

The funds provided will continue operation of the 10 regional equity assistance centers (EACs). Each EAC provides services to school districts upon request. Activities include disseminating information on successful practices and legal requirements related to non-discrimination on the basis of race, color, sex, or national origin in education programs.

Education for Native Hawaiians

For programs for the education of Native Hawaiians, the Committee bill includes \$32,500,000, which is \$14,200,000 more than the budget request and \$2,000,000 more than the fiscal year 2002 appropriation. The Committee urges the Department to continue its eight programmatic funding level allocations of last year and, further, to provide \$2,000,000 for early childhood education. The Committee remains supportive of the funding for construction/co-location activities within those public schools heavily impacted by a high proportion of Native Hawaiian students.

The Committee includes bill language making a minor change in the Native Hawaiian section of the No Child Left Behind Act to reflect a provision included by the Senate in its version of the legislation.

Prisoner education.—Native Hawaiians continue to represent a major, if not the largest, ethnic group in the State's prison system. The Committee recognizes the importance of reintegrating Native Hawaiian youth into school settings or onto a career path and job placement through comprehensive, culturally sensitive individual and family counseling; educational skills training; and employment training/job placement. Over the past several years, efforts in this area have shown significant progress. Efforts should target Native Hawaiian youth in districts with high percentages of school dropouts and youth offenders.

Alaska Native educational equity

The Committee recommends \$32,500,000 for the Alaska Native educational equity assistance program. This amount is \$18,300,000 more than the budget request and \$8,500,000 more than the fiscal year 2002 appropriation.

These funds address the severe educational handicaps of Alaska Native schoolchildren. Funds are used for the development of supplemental educational programs to benefit Alaska Natives.

The Committee has included bill language making minor corrections in the Alaska Native section of Public Law 107-110.

Rural education

The Committee recommends \$175,000,000, an increase of \$12,500,000 over the fiscal year 2002 appropriation, for rural education programs. The administration requested no funds for this purpose.

The Committee strongly supports the continued use of Federal funding specifically for rural education. Rural schools face difficult challenges in meeting the mandates in the No Child Left Behind Act, particularly in the areas of attracting highly qualified teachers and adapting to new assessment requirements and reporting expectations. The rural education programs that were funded for the first time last year are intended to help level the playing field for small and high-poverty rural school systems that typically receive less Federal formula funding than their urban and suburban counterparts, and are frequently unable to compete for competitive grants. In addition to providing more total funding for such districts, the program also allows the districts to combine funds from four categorical programs and use the money to address their highest priorities, such as recruiting teachers, purchasing technology, or upgrading curricula.

Rural education funding should be equally divided between the Small, Rural Schools Achievement Program, which provides funds to LEAs that serve a small number of students, and the Low-Income and Rural Schools Program, which provides funds to LEAs that serve concentrations of poor students, regardless of the number of students served.

Mentoring

The Committee recommends \$17,500,000 to support mentoring programs and activities for children who are at risk of failing academically, dropping out of school, or getting involved in criminal or delinquent activities, or who lack strong positive role models. This amount is the same as the fiscal year 2002 appropriation; the administration requested no funds for this program.

Fund for the Improvement of Education

The Committee recommends an appropriation of \$735,661,000 for the Fund for the Improvement of Education (FIE). This amount is \$97,228,000 below the fiscal year 2002 appropriation and \$651,661,000 more than the budget request.

Programs of national significance. Within the amount recommended, the Committee includes \$380,416,000 for programs of national significance. This amount is \$3,539,000 below the fiscal year 2002 appropriation and \$345,416,000 more than the budget request. The recommendation includes no funds for comprehensive school reform demonstrations. The administration requested no funds for this purpose.

Also within programs of national significance, the Committee has included \$1,000,000—as part of its preventing and reversing heart disease initiative—for programs to teach school children and teachers coping skills to help ease the short- and long-term effects of stress. Programs such as these have been scientifically proven to improve students' self-esteem, self-efficacy, control, grade point average, work habits, memory and cooperation.

Character education. The Committee recommends \$25,000,000 to provide support for the design and implementation of character

education programs. This amount is the same as the budget request and the fiscal year 2002 appropriation.

Reading Is Fundamental/Inexpensive book distribution. The Committee recommends \$27,000,000 to award a contract to Reading Is Fundamental, Inc. (RIF) to provide reading-motivation activities. This amount is \$3,000,000 more than the budget request and the fiscal year 2002 appropriation. RIF, a private nonprofit organization, encourages reading both inside and outside school by allowing youngsters to select books to keep at home. Federal funds provide up to 75 percent of the costs of books.

Smaller learning communities. The Committee recommends no funding for this purpose, as did the administration. In fiscal year 2002 \$142,189,000 was provided for this activity.

The administration recommended eliminating the 11 programs below. The Committee has rejected that recommendation.

Elementary school counseling. The Committee includes \$32,500,000 to establish or expand counseling programs in elementary schools. This amount is the same as the fiscal year 2002 appropriation.

Javits gifted and talented education. The Committee has included \$11,250,000 for the Javits Gifted and Talented Students Education Program. This amount is the same as the fiscal year 2002 appropriation. This program authorizes awards to State and local education agencies, institutions of higher education, and other public and private agencies for research, demonstration, and training activities designed to enhance the capability of elementary and secondary schools to meet the special educational needs of gifted and talented students.

Star Schools. The Committee recommends \$27,520,000 for the Star Schools program. This amount is the same as the fiscal year 2002 appropriation. The Star Schools program is designed to improve instruction in math, science, foreign languages, and other subjects such as vocational education, to underserved populations by means of telecommunications technologies.

Ready to Teach. The Committee recommends \$17,000,000 for two Ready to Teach programs. This amount is \$5,000,000 more than the fiscal year 2002 appropriation. The Committee includes \$12,000,000 for Teacherline and one or more other nonprofit entities, for the purpose of developing national telecommunications-based programs to improve teaching in core curricular areas, and \$5,000,000 for digital educational programming grants, which allow local public television stations, in partnership with State and local educational agencies, institutions of higher education, nonprofit groups, and businesses to develop digital instructional materials for classroom use.

Foreign language assistance. The Committee recommends \$18,500,000, which is \$4,500,000 more than the fiscal year 2002 appropriation, for competitive grants to increase the quality and quantity of foreign language instruction. The Committee intends that none of the Foreign Language Assistance program funds should be used for the Foreign Language Incentive program.

Carol M. White Physical Education for Progress. The Committee recommends \$70,000,000 to help LEAs and community-based organizations initiate, expand and improve physical education programs for students in grades K-12. This amount is \$20,000,000 more than the fiscal year 2002 appropriation.

Community technology centers. The Committee recommends \$32,475,000, the same amount as the fiscal year 2002 appropriation, for community technology centers. Community technology centers provide disadvantaged residents of economically distressed

urban and rural communities with access to information technology and related training. They can provide, among other things, preschool and after-school programs, adult education and literacy, and workforce development and training.

Exchanges with historic whaling and trading partners: The Committee recommends \$10,000,000 to provide educational, cultural, apprenticeship, and exchange programs for Alaska Natives, Native Hawaiians and their historical whaling and trading partners in Massachusetts. This amount is \$5,000,000 more than the fiscal year 2002 appropriation.

Arts in education: The Committee has included \$36,000,000 for arts in education. This amount is \$6,000,000 more than the fiscal year 2002 appropriation. Within the total, \$6,000,000 is for the John F. Kennedy Center for the Performing Arts; \$7,000,000 is for VSA arts; \$10,000,000 is for the competitive art education model grant program for the development and model projects that effectively strengthen and integrate the arts and cultural partnerships into the core curriculum; \$7,000,000 is for grants for professional development for music, dance, drama and visual arts educators to be administered by the U.S. Department of Education; \$2,000,000 is for national evaluation and dissemination of information regarding funded model programs and professional development projects; \$1,000,000 is for media literacy projects focused on violence prevention; and \$3,000,000 is for cultural partnerships for at-risk youth. When awarding grants for professional development of music educators, the Department is urged to put a priority on preparing and retaining teachers in underserved rural and urban areas, including music teachers who enter the profession through alternative certification.

Parental assistance: The Committee recommends \$45,000,000 for Parental Information and Resource Centers, which provide training, information, and support to parents, State and local education agencies, and other organizations that carry out parent education and family involvement programs. This amount is \$5,000,000 above the fiscal year 2002 appropriation.

Women's educational equity: The Committee includes \$3,000,000, the same as the fiscal year 2002 appropriation, for the women's educational equity program. This program supports projects that assist in the local implementation of gender equity policies and practices.

Community service for expelled or suspended students

The Committee recommends \$50,000,000, the same as the fiscal year 2002 appropriation, for formula grants to States to carry out programs under which students who are expelled or suspended from school are required to perform community service. The administration requested no funds for this purpose.

Alcohol abuse reduction

The Committee recommends \$25,000,000, the same as the fiscal year 2002 appropriation, for grants to LEAs to develop and implement programs to reduce underage drinking in secondary schools. The administration requested no funds for this purpose. The Committee directs the Department and the Substance Abuse and Mental Health Services Administration (SAMHSA) in the Department of Health and Human Services to work together on this effort.

Teaching of traditional American history

The Committee recommends \$100,000,000, the same as the fiscal year 2002 appropriation, for the instruction of American history in elementary and secondary education. This amount is \$50,000,000 more than the budget

request. Grants are limited to activities that are related to American history, and cannot be used for social studies coursework. Grant awards are designed to augment the quality of American history instruction and to provide professional development activities and teacher education in the area of American history. The Committee directs the Department to continue its current policy of awarding 3-year grants.

Civic education

The Committee recommends \$30,000,000, which is \$3,000,000 more than the fiscal year 2002 appropriation, for grants to improve the quality of civics and government education, to foster civic competence and responsibility, and to improve the quality of civic and economic education through exchange programs with emerging democracies. The administration requested no funds for this purpose.

Program funds support the Cooperative Education Exchange and We the People programs. The Committee recommends \$12,000,000, which is \$1,200,000 more than the fiscal year 2002 appropriation, for the Cooperative Education Exchange program, formerly called the International Education Exchange program.

Of these funds, the Committee has included \$4,500,000 for the Center for Civic Education and \$4,500,000 for the National Council on Economic Education. The remaining \$3,000,000 should be used for a competitive grant program for civics and government education, and for economic education.

The Committee recommends \$18,000,000, which is \$1,800,000 more than the fiscal year 2002 appropriation, for the nonprofit Center for Civic Education to support the We the People program. We the People has two components: the Citizen and the Constitution, which provides teacher training and curriculum materials for upper elementary, middle, and high school students; and Project Citizen, a program for middle school that focuses on the role of State and local governments in the American Federal system. Within the amount recommended for the We the People program, the Committee intends that \$3,000,000 be used to continue the comprehensive program to improve public knowledge, understanding, and support of American democratic institutions. The Committee also intends that \$1,500,000 be used to continue the school violence prevention demonstration program.

National Writing Project

The Committee recommends \$18,000,000, which is \$4,000,000 more than the fiscal year 2002 appropriation, for the National Writing Project. The administration recommended eliminating this program.

These funds are awarded to the National Writing Project, a nonprofit organization that supports and promotes K-16 teacher training programs in the effective teaching of writing.

INDIAN EDUCATION

Appropriations, 2002	\$120,368,000
Budget estimate, 2003	122,368,000
Committee recommendation	122,368,000

The Committee recommends \$122,368,000, the same as the budget request, for Indian education programs. This amount is \$2,000,000 more than the fiscal year 2002 appropriation.

Grants to local education agencies

For grants to local education agencies, the Committee recommends \$97,133,000, the same as the budget request and the fiscal year 2002 appropriation. These funds provide financial support to reform elementary and secondary school programs that serve Indian students,

including preschool children. Funds are awarded on a formula basis to local educational agencies and schools supported and operated by the Bureau of Indian Affairs.

Special programs for Indian children

The Committee recommends \$20,000,000 for special programs for Indian children. This amount is the same as the budget request and the fiscal year 2002 appropriation. Funds are used for demonstration grants to improve Indian student achievement through early childhood and preschool education programs, and for professional development grants for training Indians who are preparing to begin careers in teaching and school administration.

National activities

The Committee recommends \$5,235,000, the same as the budget request, for national activities. This amount is \$2,000,000 more than the fiscal year 2002 appropriation. The increased funds will be used to expand efforts to improve research, evaluation, and data collection on the status and effectiveness of Indian education programs.

ENGLISH LANGUAGE ACQUISITION

Appropriations, 2002	\$665,000,000
Budget estimate, 2003	665,000,000
Committee recommendation	690,000,000

The Committee recommends an appropriation of \$690,000,000 for English language acquisition, an increase of \$25,000,000 more than the budget request and the fiscal year 2002 appropriation. The Department makes formula grants to States based on each State's share of the Nation's limited-English-proficient and recent immigrant student population. The program is designed to increase the capacity of States and school districts to address the needs of these students.

SPECIAL EDUCATION

Appropriations, 2002	\$8,672,804,000
Budget estimate, 2003	9,687,804,000
Committee recommendation	9,691,424,000

The Committee strongly supports legislative measures that would fulfill the Federal Government's responsibility for paying its share of special education costs, as described in the Individuals with Disabilities Education Act (IDEA). The Committee notes that the Senate Budget Committee included in its budget resolution a measure to pay for increases in special education grants to States using mandatory funding, rather than discretionary funding.

In the meantime, the Committee recommends \$9,691,424,000 for special education programs authorized by the IDEA. This amount is \$1,018,620,000 more than the fiscal year 2002 appropriation and \$3,620,000 more than the budget request.

Grants to states

The Committee recommends \$8,528,533,000 for special education grants to States, as authorized under part B of the IDEA. The amount recommended is \$1,000,000,000 more than the fiscal year 2002 appropriation and the same as the budget request. This program provides formula grants to assist States in meeting the costs of providing special education and related services for children with disabilities.

The Committee's recommended funding level represents approximately 18 percent of the average per-pupil expenditure, compared with 17 percent under the fiscal year 2002 appropriation.

Preschool grants

The Committee recommends \$390,000,000 for preschool grants. This amount is the same as the fiscal year 2002 appropriation and the

budget request. The preschool grants program provides formula grants to States to make available special education and related services for children with disabilities aged 3 through 5.

Grants for infants and families

The Committee bill provides \$437,000,000, the same as the budget request, for grants for the infants and families program under part C of the IDEA. This amount is \$20,000,000 more than the fiscal year 2002 appropriation. This program provides formula grants to States to implement statewide systems of coordinated, comprehensive, multidisciplinary interagency programs to make available early intervention services to all children with disabilities, ages 2 and under, and their families.

State improvement

For State improvement grants, the bill provides \$51,700,000, the same as the fiscal year 2002 appropriation and the budget request. This program provides competitive grants to State educational agencies to assist them, in partnership with parents, teachers, institutions of higher education, interest groups, and others, to improve results for children with disabilities by reforming and improving their educational systems.

Research and innovation

The Committee has included \$70,000,000, which is \$8,380,000 below the budget request and the fiscal year 2002 appropriation, for research and innovation. This program supports competitive awards to produce and advance the use of knowledge to improve services and results for children with disabilities.

The Committee's recommendation does not include any funding for the research agenda of the President's Commission on Excellence in Special Education. The Committee believes that funding for that purpose should be considered following the IDEA reauthorization, along with measures to fully fund the part B State grants program.

Technical assistance and dissemination

The Committee recommends \$53,481,000, the same as the fiscal year 2002 level and the budget request, for technical assistance and dissemination. Awards support institutes, regional resource centers, clearinghouses, and other efforts to build State and local capacity to make systemic changes and improve results for children with disabilities.

Personnel preparation

The Committee recommends \$95,000,000 for the personnel preparation program. This amount is \$5,000,000 more than the fiscal year 2002 appropriation and the budget request. Funds support competitive awards to help address State-identified needs for qualified personnel to work with children with disabilities, and to ensure that these personnel have the skills and knowledge they need to serve these children.

The Committee is particularly concerned about the shortage of qualified special education teachers and higher education faculty. Therefore, it has provided sufficient resources in this account to ensure an increase in funding for leadership personnel over the fiscal year 2002 level. The Committee also urges the Department to use a portion of the increased appropriation for the preparation of personnel who serve children with low-incidence disabilities, particularly those with sensory disabilities such as low vision, blindness, and deafness.

Parent information centers

The Committee bill provides \$28,000,000 for parent information centers. This amount is \$2,000,000 more than the fiscal year 2002 appropriation and the budget request. This program makes awards to parent organizations

to support parent training and information centers, including community parent resource centers. These centers provide training and information to meet the needs of parents of children with disabilities living in the areas served by the centers, particularly underserved parents, and parents of children who may be inappropriately identified.

Technology and media services

The Committee recommends \$37,710,000 for technology and media services. This amount is \$5,000,000 more than the budget request and the same as the fiscal year 2002 appropriation. This program makes competitive awards to support the development, demonstration, and use of technology, and educational media activities of value to children with disabilities.

The Committee recommendation includes \$9,500,000 for Recording for the Blind and Dyslexic, Inc. This is the same amount as the fiscal year 2002 level and \$3,500,000 more than the budget request. These funds support the continued production and circulation of recorded textbooks, increased outreach activities to print-disabled students and their teachers, and accelerated use of digital technology.

The Committee also recommends \$1,500,000 for the Readline Program. The amount recommended is the same as the fiscal year 2002 appropriation for this activity. The administration proposed eliminating this program.

This activity is authorized by section 687(b)(2)(G) of the Individuals with Disabilities Education Act, as amended. The Committee recognizes the progress of the Readline Program, which is developing a wide range of media resources to disseminate research conducted by the National Institutes of Health, as well as other research concerning effective teaching strategies, early diagnosis of, and intervention for, young children with reading disabilities. These resources include an extensive Web site, videos, and programming for television and radio broadcast. The Committee includes funding for the continued development and distribution of media resources to reach the parents and teachers of children with reading disabilities.

REHABILITATION SERVICES AND DISABILITY RESEARCH

Appropriations, 2002	\$2,945,813,000
Budget estimate, 2003	3,001,840,000
Committee recommendation	2,959,838,000

The Committee recommends \$2,959,838,000 for rehabilitation services and disability research, \$14,025,000 more than the comparable fiscal year 2002 funding level and \$42,002,000 less than the administration request.

Vocational rehabilitation State grants

The Committee provides \$2,533,492,000 for vocational rehabilitation grants to States, which is \$52,109,000 more than the comparable fiscal year 2002 funding level. The Committee recommendation provides the full amount authorized by the authorizing statute. The budget request proposed to eliminate several categorical programs, redirected \$62,573,000 in funding to the State grant program and provided an additional increase of \$20,260,000. The Committee rejected this approach and believes changes of this nature should be considered during reauthorization.

Basic State grant funds assist States in providing a range of services to help persons with physical and mental disabilities prepare for and engage in meaningful employment. Authorizing legislation requires States to give priority to persons with significant disabilities. Funds are allotted to States based on a formula that takes into account population and per capita income. States must

provide a 21.3 percent match of Federal funds, except the State's share is 50 percent for the cost of construction of a facility for community rehabilitation program purposes.

The Rehabilitation Act requires that no less than 1 percent and not more than 1.5 percent of the appropriation in fiscal year 2003 for vocational rehabilitation State grants be set aside for grants for Indians. Service grants are awarded to Indian tribes on a competitive basis to help tribes develop the capacity to provide vocational rehabilitation services to American Indians with disabilities living on or near reservations.

Vocational Rehabilitation Incentive Grants

The Committee recommendation does not include \$30,000,000 proposed in the budget request for the new Vocational Rehabilitation Incentive Grants program. This proposed program is not authorized. Under this new program, grants would be awarded to State VR agencies based on their performance in helping individuals with disabilities obtain competitive jobs.

Client assistance

The Committee bill recommends \$12,397,000 for the client assistance program, an increase of \$500,000 more than the fiscal year 2002 appropriation and the administration request.

The client assistance program funds State formula grants to assist vocational rehabilitation clients or client applicants in understanding the benefits available to them and in their relationships with service providers. Funds are distributed to States according to a population-based formula, except that increases in minimum grants are guaranteed to each of the 50 States, the District of Columbia, and Puerto Rico, and guaranteed to each of the outlying areas, by a percentage not to exceed the percentage increase in the appropriation. States must operate client assistance programs in order to receive vocational rehabilitation State grant funds.

Training

The Committee provides \$42,629,000 for training rehabilitation personnel, an increase of \$3,000,000 more than the fiscal year 2002 appropriation and same as the administration request.

The purpose of this program is to ensure that skilled personnel are available to serve the rehabilitation needs of individuals with disabilities. It supports training, traineeships, and related activities designed to increase the numbers of qualified personnel providing rehabilitation services. The program awards grants and contracts to States and public or nonprofit agencies and organizations, including institutions of higher education, to pay all or part of the cost of conducting training programs. Long-term, in-service, short-term, experimental and innovative, and continuing education programs are funded, as well as special training programs and programs to train interpreters for persons who are deaf, hard of hearing and deaf-blind.

The Committee is concerned over the reduction in funding for rehabilitation long-term training programs, and in particular those that require orthotic and prosthetic care, and urges RSA to fund no fewer than four university O+P programs at \$250,000 each.

Demonstration and training programs

The Committee bill includes \$21,238,000 for demonstration and training programs for persons with disabilities, the same amount as the comparable fiscal year 2002 appropriation and \$3,746,000 more than the administration request. This program awards grants to States and nonprofit agencies and organizations to develop innovative methods and comprehensive services to help individuals

with disabilities achieve satisfactory vocational outcomes. Demonstration programs support projects for individuals with a wide array of disabilities. Within the Committee recommendation, \$1,000,000 is for activities designed to establish an applied research agenda, improve the quality of applied orthotic and prosthetic research and help meet the increasing demand for provider services. The Committee expects the Department to award these funds through a grant competition.

Migrant and seasonal farmworkers

The Committee recommends \$2,350,000 for migrant and seasonal farmworkers, the same as the fiscal year 2002 appropriation. The Department proposed eliminating funding for this program.

This program provide grants limited to 90 percent of the costs of the projects providing comprehensive rehabilitation services to migrant and seasonal farm workers with disabilities and their families. Projects also develop innovative methods for reaching and serving this population. The program emphasizes outreach, specialized bilingual rehabilitation counseling, and coordination of vocational rehabilitation services with services from other sources.

Recreational programs

The Committee provides \$2,596,000 for recreational programs, the same amount as the fiscal year 2002 appropriation. The budget request did not include funding for this program.

Recreational programs help finance activities such as sports, music, dancing, handicrafts, and art to aid in the employment, mobility, and socialization of individuals with disabilities. Grants are awarded to States, public agencies, and nonprofit private organizations, including institutions of higher education. Grants are awarded for a 3-year period with the Federal share at 100 percent for the first year, 75 percent for the second year, and 50 percent for the third year. Programs must maintain the same level of services over the 3-year period.

The Committee notes that the primary purpose of this program is to initiate recreational and related activities for individuals with disabilities. These programs are designed to aid individuals with disabilities in employment, mobility, independence and community integration. The Committee notes that almost three out of four programs whose last year of Federal funding ended in fiscal years 1998 through 2000 are still in operation and continue to meet the recreational needs of individuals with disabilities. These results show that this limited investment is having a national impact, as each new grant supports seed money for recreational programs throughout the United States.

Protection and advocacy of individual rights

The Committee recommends \$17,500,000 for protection and advocacy of individual rights, an increase of \$2,300,000 more than the fiscal year 2002 appropriation and the budget request.

This program provides grants to agencies to protect and advocate for the legal and human rights of persons with disabilities who are not eligible for protection and advocacy services available through the Developmental Disabilities Assistance and Bill of Rights Act or the Protection and Advocacy for Individuals with Mental Illness Act.

The Committee notes that a recent evaluation of the PAIR program found that more than 98 percent of cases closed by a sample of PAIR programs were resolved through counseling, negotiation/mediation and supervised referrals. The evaluation also found that many of the programs had considerable dif-

ficulties attempting to serve the significant number of persons eligible for the program. Therefore, the Committee has recommended additional resources to continue to expand the availability of PAIR services to eligible individuals.

Projects with industry

The Committee bill includes \$22,071,000 for projects with industry, the same as the 2002 appropriation. The administration proposed eliminating funding for this program.

The projects with industry [PWI] program promotes greater participation of business and industry in the rehabilitation process. PWI provides training and experience in realistic work settings to prepare individuals with disabilities for employment in the competitive job market. Postemployment support services are also provided. The program makes grants to a variety of agencies and organizations, including corporations, community rehabilitation programs, labor and trade associations, and foundations.

The Committee notes that according to the Department's 2001 Annual Performance Report, the Projects with Industry program has exceeded performance measures in all three areas by which the program is measured. More than 3 out of 5 PWI clients were placed in competitive employment in 2001; Projects With Industry projects will report that participants placed in competitive employment increase earnings by an average of at least \$236 per week; and 67.2 percent of previously unemployed persons were placed in competitive employment. These significant achievements warrant continued funding, especially in light of the new Ticket to Work program and the role that PWI projects can play in assisting Social Security disability beneficiaries and SSI recipients in securing employment and exiting the disability roles.

Supported employment State grants

The Committee's bill includes \$38,152,000 for the supported employment State grant program, the same as the 2002 appropriation. The administration proposed eliminating funding for this program.

This program assists persons who may have been considered too severely disabled to benefit from vocational rehabilitation services by providing the ongoing support needed to obtain competitive employment. Short-term vocational rehabilitation services are augmented with extended services provided by State and local organizations. Federal funds are distributed on the basis of population.

Independent living State grants

The Committee recommends \$22,296,000 for independent living State grants, which is the same as the amount appropriated in 2002 and the budget request.

The independent living State formula grants program provides funding to improve independent living services, support the operation of centers for independent living, conduct studies and analysis, and provide training and outreach.

Independent living centers

For independent living centers, the Committee recommends \$69,500,000, an increase of \$7,000,000 over the 2002 appropriation and the same amount as the budget request.

These funds support consumer-controlled, cross-disability, nonresidential, community-based centers that are designed and operated within local communities by individuals with disabilities. These centers provide an array of independent living services.

Independent living services for older blind individuals

The Committee provides \$28,000,000 for independent living services to older blind individuals, an increase of \$3,000,000 more than

the 2002 appropriation and the administration request.

States participating in the program must match every \$9 of Federal funds with not less than \$1 in non-Federal resources. Assistance is provided to persons aged 55 or older to adjust to their blindness, continue living independently and avoid societal costs associated with dependent care. Services may include the provision of eyeglasses and other visual aids, mobility training, braille instruction and other communication services, community integration, and information and referral. These services help older individuals age with dignity, continue to live independently and avoid significant societal costs associated with dependent care. The services most commonly provided by this program are daily living skills training, counseling, the provision of low-vision devices community integration, information and referral, communication devices, and low-vision screening.

The Committee notes that there are 5,000,000 Americans in this country age 55 and older who are experiencing vision loss and that the number of Americans in this category is expected to double in the next 30 years. The Committee recognizes the very important and cost-effective work carried out through this program. By allowing older individuals to remain in their homes and communities, substantial savings are achieved. The Committee is informed that the yearly savings to society for just 10 percent of the clients now receiving independent living services is \$56,000,000.

Program improvement activities

For program improvement activities, the Committee provides \$900,000, the same amount as the 2002 appropriation and the budget request. In fiscal year 2003, funds for these activities will continue to support technical assistance efforts to improve the efficiency and effectiveness of the vocational rehabilitation program and improve accountability efforts. The funds provided are sufficient to support ongoing program improvement activities and to support ongoing dissemination and performance measurement activities.

Evaluation

The Committee recommends \$1,000,000 for evaluation activities, the same as the 2002 appropriation and the administration request.

These funds support evaluations of the impact and effectiveness of programs authorized by the Rehabilitation Act. The Department awards competitive contracts for studies to be conducted by persons not directly involved with the administration of Rehabilitation Act programs.

Helen Keller National Center

The Committee bill includes \$8,717,000 for the Helen Keller National Center for Deaf-Blind Youth and Adults, the same as the 2002 appropriation and the budget request.

The Helen Keller National Center consists of a national headquarters in Sands Point, NY, with a residential training and rehabilitation facility where deaf-blind persons receive intensive specialized services; a network of 10 regional field offices which provide referral and counseling assistance to deaf-blind persons; and an affiliate network of 48 agencies. At the recommended level, the center would serve approximately 102 persons with deaf-blindness at its headquarters facility and provide field services to approximately 1,850 individuals and families.

National Institute on Disability and Rehabilitation Research

The Committee recommends \$110,000,000 for the National Institute on Disability and Rehabilitation Research [NIDRR], the same as

the amount appropriated in fiscal year 2002 and the budget request.

NIDRR develops and implements a comprehensive and coordinated approach to the conduct of research, demonstration projects, and related activities that enable persons with disabilities to better function at work and in the community, including the training of persons who provide rehabilitation services or who conduct rehabilitation research. The Institute awards competitive grants to support research in Federally designated priority areas, including rehabilitation research and training centers, rehabilitation engineering research centers, research and demonstration projects, and dissemination and utilization projects. NIDRR also supports field-initiated research projects, research training, and fellowships.

The Committee urges the NIDRR to focus on activities to enhance access to assistive technology for people with disabilities, including technology-based activities, such as technology transfer.

The Committee strongly encourages NIDRR to give priority in awarding grants to establish new rehabilitation and research engineering centers which will aid in the implementation of the Executive Order related to the Supreme Court Decision in *L.C. v. Olmstead*.

The Committee encourages NIDRR to provide increased funding for the Interagency Committee on Disability Research (ICDR) and notes that the primary purpose of the ICDR is to promote cooperation across various government agencies in the development and execution of disability and rehabilitation and research activities. The Committee strongly encourages the ICDR to enter into cooperative agreements with other ICDR members to identify Federally funded technological and scientific research that could be applied to promote the independence of people with disabilities and the elderly. The same Federal agencies shall work in partnership with the private sector to develop a plan to bring the applied technologies to the private marketplace. The Committee commends ICDR for expansion of its website/database for the coordination of research by various agencies.

The Committee strongly urges NIDRR to use resources appropriated for the Assistive Technology Development Fund to develop new assistive technology, bring technology that has already been developed to market and expand the availability of existing assistive technology to people with disabilities. The Committee believes that priority for grants should be given to the development of technology that has a limited number of users, or orphan technology. In addition, a portion of these funds should be used to further the development of assistive technology for children and students and reach the goals of projects that were previously funded through the small business innovation research activity of OSER's technology and media services program.

Assistive technology

The Committee bill provides \$27,000,000 for assistive technology, a reduction of \$33,884,000 from the fiscal year 2002 appropriation and \$3,884,000 less than the budget request.

The Assistive Technology Program is designed to improve occupational and educational opportunities and the quality of life for people of all ages with disabilities through increased access to assistive technology services and devices. It provides grants to States to develop comprehensive, consumer-responsive statewide programs that increase access to, and the availability of, assistive technology devices and services. The National Institute on Disability and Re-

habilitation Research administers the program.

The Committee recommendation includes \$27,000,000 for activities authorized under title I of the Assistive Technology Act (AT Act). The Committee has included bill language which allows all State projects funded currently under title I of the AT Act to receive not less than the amount they received in fiscal year 2002. The bill language also provides minimum grants of \$100,000 for State protection and advocacy systems, \$30,000 for systems in the outlying areas. In fiscal year 2003, the AT Act would require 23 States to lose Federal financial support provided by title I, at a time when States are operating in a new policy landscape that includes the Olmstead decision, final section 508 standards and the Ticket to Work and Work Incentives Improvement Act.

The Committee recommendation does not include additional resources for title III programs, due to tight budget constraints and \$36,552,000 in funding available currently for title III programs. In fiscal year 2000, the Committee provided \$4,028,000 in first year funding. Last year, the Committee provided \$36,552,000, and allowed these funds to be available for 2 years. These funds have yet to be expended. The Committee will review the program funding level in the fiscal year 2004 budget and ensure that sufficient resources are available to continue this important program. Loan programs offer individuals with disabilities attractive options that significantly enhance their ability to purchase assistive technology devices and services.

Access to telework fund

As requested by the administration, the Committee does not recommend additional resources for the access to telework fund. The Committee provided \$20,000,000 for this new program last year, and notes that the grant competition has not been announced as of yet. Funding provided last year is available to the Department for 2 years. The Committee will review the funding needed in fiscal year 2004 to maintain and expand this program.

The access to telework fund is designed to increase employment opportunities for individuals with disabilities by providing greater access to computers and other equipment individuals need if they decide to work from home. The fund would provide matching funds to States to enable them to provide loans for individuals with disabilities to purchase computers and other equipment so that they can telework from home.

The Committee encourages the Department of Education to design the access to telework loan program in a manner which creates the maximum incentives for people with disabilities to participate. The Committee recognizes that the decision to attempt to work involves a high level of risk for a person with a disability, including the potential loss of health care coverage and income subsidies, and that the design of the program should take this fact into account (including the possibility of loan forgiveness should the person's attempt to work fail). Finally, the Committee encourages the Department to allow States flexibility in implementation of the program to encourage participation, including the use of any non-Federal resources to meet the match requirement.

SPECIAL INSTITUTIONS FOR PERSONS WITH DISABILITIES

AMERICAN PRINTING HOUSE FOR THE BLIND

Appropriations, 2002	\$14,000,000
Budget estimate, 2003	14,000,000
Committee recommendation	15,500,000

The Committee recommends \$15,500,000 for the American Printing House for the Blind

[APH], \$1,500,000 more than the 2002 appropriation and the budget request.

This appropriation helps support the American Printing House for the Blind, which provides educational materials to students who are legally blind and enrolled in programs below the college level. The Federal subsidy provides almost 51 percent of APH's total sales income. Materials are distributed free of charge to schools and States through per capita allotments based on the total number of students who are blind. Materials provided include textbooks and other educational aids in braille, large type, and recorded form and microcomputer applications.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF	
Appropriations, 2002	\$55,376,000
Budget estimate, 2003	52,014,000
Committee recommendation	54,600,000

The Committee recommends an appropriation of \$54,600,000 for the National Technical Institute for the Deaf [NTID], a decrease of \$776,000 from the fiscal year 2002 appropriation and \$2,586,000 above the budget request.

The Institute, located on the campus of the Rochester Institute of Technology, was created by Congress in 1965 to provide a residential facility for postsecondary technical training and education for persons who are deaf. NTID also provides support services for students who are deaf, trains professionals in the field of deafness, and conducts applied research. Within the amount provided, \$1,600,000 is for construction. At the discretion of the Institute, funds may be used for the Endowment Grant program.

GALLAUDET UNIVERSITY	
Appropriations, 2002	\$96,938,000
Budget estimate, 2003	94,446,000
Committee recommendation	98,438,000

The Committee recommends \$98,438,000 for Gallaudet University, an increase of \$1,500,000 above the amount appropriated in 2002 and \$3,992,000 more than the budget request.

Gallaudet University is a private, non-profit institution offering undergraduate, and continuing education programs for students who are deaf, as well as graduate programs in fields related to deafness for students who are hearing-impaired and who are deaf. The university conducts basic and applied research related to hearing impairments and provides public service programs for the deaf community.

The Model Secondary School for the Deaf serves as a laboratory for educational experimentation and development, disseminates models of instruction for students who are deaf, and prepares adolescents who are deaf for postsecondary academic or vocational education. The Kendall Demonstration Elementary School develops and provides instruction for children from infancy through age 15.

The Committee recommendation includes funding to enable Gallaudet University to maintain and enhance its technological base, continue investments in faculty and staff, continue to enhance developmental and honors programs and support improvements in physical facilities, including campus security. Funds also are available, at the discretion of the University, for the Endowment Grant program.

VOCATIONAL AND ADULT EDUCATION	
Appropriations, 2002	\$1,934,060,000
Budget estimate, 2003	1,897,560,000
Committee recommendation	1,938,060,000

The Committee recommendation includes a total of \$1,938,060,000 for vocational and

adult education, consisting of \$1,322,000,000 for vocational education and \$591,060,000 for adult education, and \$25,000,000 for State grants for incarcerated youth offenders.

VOCATIONAL EDUCATION

The Committee recommendation of \$1,322,000,000 for vocational education is \$1,000,000 more than the fiscal year 2002 amount and \$15,500,000 more than the administration's request.

Basic grants.—The Committee has included \$1,180,000,000 for basic grants, the same as the fiscal year 2002 appropriation and the administration request.

Funds provided under the State grant program assist States, localities, and outlying areas to expand and improve their programs of vocational education and provide equal access to vocational education for populations with special needs. Persons assisted range from secondary students in prevocational courses through adults who need retraining to adapt to changing technological and labor market conditions. Funds are distributed according to a formula based on State population and State per capita income.

Under the Indian and Hawaiian natives programs, competitive grants are awarded to federally recognized Indian tribes or tribal organizations and to organizations primarily serving and representing Hawaiian natives for services that are in addition to services such groups are eligible to receive under other provisions of the Perkins Act.

Tech-prep education.—The Committee recommends \$108,000,000 for tech-prep programs. This is the same as the 2002 appropriation and the administration request. This program is designed to link academic and vocational learning and to provide a structured link between secondary schools and postsecondary education institutions. Funds are distributed to the States through the same formula as the basic State grant program. States then make planning and demonstration grants to consortia of local educational agencies and postsecondary institutions to develop and operate model 4-year programs that begin in high school and provide students with the mathematical, science, communication, and technological skills needed to earn a 2-year associate degree or 2-year certificate in a given occupational field.

Tribally controlled postsecondary vocational institutions.—The Committee has provided \$7,000,000 on a current-funded basis for tribally controlled postsecondary vocational institutions, an increase of \$500,000 over the fiscal year 2002 level and the budget request. This program provides grants for the operation and improvement of two tribally controlled postsecondary vocational institutions to ensure continued and expanding opportunities for Indian students: United Tribes Technical College in Bismarck, North Dakota, and Crownpoint Institute of Technology in Crownpoint, New Mexico.

National programs, research.—The Committee recommends \$12,000,000 for national research programs and other national activities, the same amount as the 2002 appropriation and the administration request. The National Research Center for Career and Technical Education and the National Dissemination Center for Career and Technical Education are the only federally funded centers charged with the responsibility to conduct research and provide technical assistance to vocational educators. The results of the applied research done by these Centers inform technical assistance to reform and improve vocational education instruction in schools and colleges. Resources made available through this program also are used to support a variety of activities to identify and promote effective research-based programs and practice in vocational education.

Vocational training tied to real economic opportunities and rooted in endangered traditional crafts is a significant need in rural Hawaiian and part-Hawaiian communities. The Committee urges the Department to fund programs that support the development of mentoring programs pairing secondary students with individuals who have succeeded in commercially developing traditional Hawaiian arts and crafts. These mentoring programs can provide young Hawaiian and Part-Hawaiian students with training in important crafts while also teaching them how to successfully turn these skills into economic gain.

Tech-prep education demonstration program.—The Committee recommendation includes \$5,000,000 for this program, the same amount as provided in fiscal year 2002. The administration did not request funding for this program. Under this demonstration authority, the Secretary awards grants competitively to consortia that involve a business as a member, locate a secondary school on the site of a community college, and seek voluntary participation of secondary school students enrolled such a high school. The purpose of the demonstration program is to support development of the "middle college" model of high school, which promotes higher student achievement and postsecondary enrollment. Funds may be used for curriculum, professional development, equipment, and other start-up and operational costs.

Occupational and employment information program.—The amount of \$10,000,000 has been provided to continue activities authorized by section 118 of the Carl Perkins Act, \$500,000 more than last year. The administration proposed the elimination of this program. The Act requires that at least 85 percent of the amount be provided directly to State entities to develop and deliver occupational and career information to students, job seekers, employers, education, employment and training programs.

ADULT EDUCATION

The Committee has included \$591,060,000 for adult education, the same amount as the 2002 appropriation and the administration request.

Adult education State programs.—For adult education State programs, the Committee recommends \$575,000,000, the same amount as the fiscal year 2002 appropriation and the administration request. These funds are used by States for programs to enable economically disadvantaged adults to acquire basic literacy skills, to enable those who so desire to complete a secondary education, and to make available to adults the means to become more employable, productive, and responsible citizens.

The Committee recommendation continues the English literacy and civics education State grants set aside within the Adult Education State grant appropriation. Within the total, \$70,000,000 is available to help States or localities affected significantly by immigration and large limited-English populations to implement programs that help immigrants acquire English literacy skills, gain knowledge about the rights and responsibilities of citizenship and develop skills that will enable them to navigate key institutions of American life. The amount recommended is the same as the fiscal year 2002 level and the budget request.

National activities.—The Committee has included \$9,500,000, the same as the 2002 appropriation and the administration request. The Department supports applied research, development, dissemination, evaluation and program improvement activities to assist States in their efforts to improve the quality of adult education programs.

National Institute for Literacy.—The Committee recommends \$6,560,000 for the Na-

tional Institute for Literacy, authorized under section 242 of the Adult Education and Family Literacy Act, the same amount as available currently and the budget request. The Institute provides leadership and coordination for national literacy efforts by conducting research and demonstrations on literacy, providing technical assistance through a State capacity building grant program, establishing and maintaining a national center for adult literacy and learning disabilities, and awarding fellowships to outstanding individuals in the field to conduct research activities under the auspices of the Institute.

The Committee recognizes and supports the unique mandate of the National Institute for Literacy to serve as a national resource for adult education and literacy programs. The Committee is aware that the President has nominated 10 new advisory board members to oversee the work of the Institute. The Committee urges this new advisory board to assist the Institute in maintaining its unique focus on adult literacy through its programs, such as the Bridges to Practice initiative that informs and trains adult educators on proper assessments and interventions for low literate adults who have learning disabilities, and the Equipped for the Future initiative that works to improve the quality and results of adult learning programs by focusing instruction and assessment on the skills and knowledge adults need to accomplish their goals as citizens, parents, and workers.

STATE GRANTS FOR INCARCERATED YOUTH OFFENDERS

The Committee has included \$25,000,000 for a program authorized by part D of title VIII of the Higher Education Act, an increase of \$3,000,000 more than the amount appropriated in fiscal year 2002. The Department proposed eliminating this program. This program provides grants to State correctional education agencies to assist and encourage incarcerated youth to acquire functional literacy, life and job skills, through the pursuit of a postsecondary education certificate or an associate of arts or bachelor's degree. Grants also assist correction agencies in providing employment counseling and other related services that start during incarceration and continue through prerelease and while on parole. Each student is eligible for a grant of not more than \$1,500 annually for tuition, books, and essential materials, and not more than \$300 annually for related services such as career development, substance abuse counseling, parenting skills training, and health education. In order to participate in a program, a student must be no more than 25 years of age and be eligible to be released from prison within 5 years. Youth offender grants are for a period not to exceed 5 years, 1 year of which may be devoted to study in remedial or graduate education.

The Committee notes the positive findings from a recent evaluation of programs funded in three States. The Three State Recidivism Study found that re-arrest, reconviction, and re-incarceration rates were significantly lower for the prison population who had participated in correctional education than for non-participants. The study found the re-arrest rate of correctional education participants was 48 percent, compared to 57 percent for the non-participants; re-conviction rate was 27 percent for correctional educational participants, compared to 35 percent for non-participants; and re-incarceration rate was 21 percent, compared to 31 percent for non-participants. This important program not only helps make the Nation's streets safer for all Americans, but it saves public money as fewer contacts are made with the more expensive criminal justice system and former

prisoners become employed, contributing members of society.

Within the appropriation for State grants for incarcerated youth offenders, the Committee includes \$5,000,000 to continue the prisoner literacy initiative. The Committee notes that the extremely high rates of illiteracy or marginal reading skills among inmates is a national problem and therefore encourages the development of a uniform model to evaluate literacy programs across the country.

STUDENT FINANCIAL ASSISTANCE

Appropriations, 2002	\$12,285,500,000
Budget estimate, 2003	12,767,500,000
Committee recommendation	13,151,500,000

The Committee recommends an appropriation of \$13,151,500,000 for student financial assistance, an increase of \$866,000,000 more than the comparable fiscal year 2002 appropriation and \$384,000,000 more than the administration request. This comparison excludes \$1,000,000,000 made available by Public Law 107-206 to address a shortfall in the Pell grant program.

Federal Pell Grant Program

For Pell grant awards in the 2003-2004 academic year, the Committee recommends \$11,180,000,000. The Committee recommendation is \$317,000,000 more than requested by the administration.

Pell grants provide need-based financial assistance that helps low-and middle-income undergraduate students and their families pay the costs of postsecondary education and vocational training. Awards are determined according to a statutory need analysis formula that takes into account a student's family income and assets, household size, and the number of family members, excluding parents, attending postsecondary institutions. Pell grants are considered the foundation of Federal postsecondary student aid.

The amount recommended is sufficient to raise the maximum Pell grant to \$4,100, the highest level in the program's history and an increase of \$100 over the maximum grant for the 2002-2003 academic year. The Pell grant maximum award supported by the Committee recommendation is at least \$100 more than that requested by the administration.

The Committee has made significant gains in supporting increases in funding for the Pell Grant Program. Since fiscal year 2000, the maximum Pell grant has been increased from \$3,300 to the current recommendation of \$4,100, an increase of almost 25 percent in 3 years. With the Committee recommendation for this year, program funding will have increased by 50 percent over this period. Also, the number of students receiving Pell grant awards will have increased by more than 500,000 over the past 3 years. While the Committee would have liked to increase the maximum grant by a larger amount, budget constraints would not accommodate investments greater than the Committee recommendation.

The Committee has not included bill language requested by the administration that would allow the Secretary to establish the Pell grant maximum award after enactment of the appropriations bill.

Federal supplemental educational opportunity grants

The Committee recommends \$725,000,000 for Federal supplemental educational opportunity grants [SEOG], the same amount as the 2002 appropriation level and the budget request.

This program provides funds to postsecondary institutions for need-based grants to undergraduate students. Institutions must contribute 25 percent of SEOG awards, which are subject to a maximum grant level of

\$4,000. School financial aid officers have flexibility to determine student awards, though they must give priority to Pell grant recipients.

Federal work-study programs

The Committee bill provides \$1,011,000,000 for the Federal Work-Study Program, the same as the 2002 level and the administration request. This program provides grants to more than 3,300 institutions to help an estimated 1 million undergraduate, graduate, and professional students meet the costs of postsecondary education through part-time employment. Work-study jobs must pay at least the Federal minimum wage and institutions must provide at least 25 percent of student earnings. Institutions also must use at least 7 percent of their grants for community-service jobs.

The Committee strongly supports continued funding for the work colleges program authorized in section 448 of the Higher Education Act of 1965. These funds help support comprehensive work-service learning programs at seven work colleges, and cooperative efforts among the work colleges to expose other institutions of higher education to the work college concept. Of the amount recommended by the Committee, \$4,000,000 is available for this program.

Federal Perkins loans

The Committee bill includes \$100,000,000 for Federal Perkins loans capital contributions, which is the same as the 2002 appropriation and the budget request. The amount recommended, when combined with institutional revolving funds, would maintain the 2003 loan volume at the current estimated level of \$1,200,000,000. At this funding level more than 700,000 loans would be made.

The Federal Perkins Loan Program supports student loan revolving funds built up with capital contributions to about 2,000 participating institutions. Institutions use these revolving funds, which also include Federal capital contributions (FCC), institutional contributions equal to one-third of the FCC, and student repayments, to provide low-interest (5 percent) loans that help financially needy students pay the costs of postsecondary education. The Committee has included the amount necessary to maintain the current loan volume level.

The Committee bill also includes \$67,500,000 for loan cancellations, the same amount as the 2002 level and amount requested by the administration. These funds reimburse institutional revolving funds on behalf of borrowers whose loans are cancelled in exchange for statutorily specified types of public or military service, such as teaching in a qualified low-income school, working in a Head Start Program, serving in the Peace Corps or VISTA, or nurses and medical technicians providing health care services.

Leveraging educational assistance partnership program

For the leveraging educational assistance partnership [LEAP] program, the Committee includes \$67,000,000, the same amount as the 2002 appropriation. The administration proposed eliminating this program.

The leveraging educational assistance partnership program provides a Federal match to States as an incentive for providing need-based grant and work-study assistance to eligible postsecondary students. When the appropriation exceeds \$30,000,000, amounts above this threshold must be matched by States on a 2:1 basis. Federally supported grants and job earnings are limited to \$5,000 per award year for full-time students.

The Committee recognizes the important role that the LEAP program plays in maintaining a Federal-State partnership for en-

suring that postsecondary education is available to all academically-qualified Americans. The Committee notes that a recent Advisory Committee on Student Financial Aid report recommended that Federal policy should encourage a far more substantial State and institutional commitment to need-based grant aid. The Committee notes that this important program leverages almost \$1,000,000,000 in State spending for need-based student grant programs. Therefore, it is the Committee's intent to continue this important program.

Loan forgiveness for child care providers

The Committee recommends \$1,000,000 for this demonstration program, the same as the fiscal year 2002 appropriation and the budget request. Under this demonstration program, Stafford and Unsubsidized Stafford Loan borrowers under the Federal Family Education Loan Program and the William D. Ford Direct Loan program who have earned a degree in early childhood education and work for 2 full years as a child care provider in a low-income community may have a portion of their loan obligation forgiven.

The Committee encourages the Department to prepare the required final evaluation report of this important program as soon as possible. The Committee looks forward to receiving this report, so further actions and investments can be made that support improvements in the education level and compensation of the early childcare profession.

HIGHER EDUCATION

Appropriations, 2002	\$2,031,048,000
Budget estimate, 2003	1,883,053,000
Committee recommendation	2,047,640,000

The Committee recommends an appropriation of \$2,047,640,000 for higher education programs, \$16,592,000 more than the fiscal year 2002 amount and \$164,587,000 more than the budget request.

Aid for institutional development

The Committee recommends \$475,413,000 for aid for institutional development authorized by titles III and V of the Higher Education Act, \$36,788,000 above the 2002 appropriation and \$20,999,000 more than the budget request.

The Committee encourages the Department to provide technical assistance and conduct research on issues germane to predominately and Historically Black Colleges and Universities (HBCUs) and other institutions of higher education that have large minority student populations, including disseminating best practices information on the most efficient and cost-effective uses of title III funding, reducing student loan default rates, increasing graduation rates, and grant writing training.

Strengthening institutions.—The Committee bill includes \$82,000,000 for the part A strengthening institutions program, an increase of \$8,375,000 over the fiscal year 2002 level and \$5,725,000 more than the budget request. The part A program supports competitive, 1-year planning and 5-year development grants for institutions with a significant percentage of financially needy students and low educational and general expenditures per student in comparison with similar institutions. Applicants may use part A funds to develop faculty, strengthen academic programs, improve institutional management, and expand student services. Institutions awarded funding under this program are not eligible to receive grants under other sections of part A or part B.

Hispanic-serving institutions [HSI].—The Committee recommends \$93,000,000 for institutions at which Hispanic students make up at least 25 percent of enrollment, \$7,000,000 more than the fiscal year 2002 level and

\$3,904,000 more than the administration request. Institutions applying for title V funds must meet the regular part A requirements and show that at least one-half of their Hispanic students are low-income college students. Funds may be used for acquisition, rental or lease of scientific or laboratory equipment, renovation of instructional facilities, development of faculty, support for academic programs, institutional management, and purchase of educational materials. Title V recipients are not eligible for other awards provided under title III, parts A and B.

Strengthening historically black colleges and universities.—The Committee provides \$215,415,000 for part B grants, \$9,415,000 more than the fiscal year 2002 level and \$2,000,000 more than the administration request. The part B strengthening historically black colleges and universities [HBCU] program makes formula grants to HBCUs that may be used to purchase equipment, construct and renovate facilities, develop faculty, support academic programs, strengthen institutional management, enhance fundraising activities, provide tutoring and counseling services to students, and conduct outreach to elementary and secondary school students. The minimum allotment is \$500,000 for each eligible institution. Part B recipients are not eligible for awards under part A.

Strengthening historically black graduate institutions.—The Committee bill includes \$53,764,000 for the part B, section 326 program, \$4,764,000 more than the fiscal year 2002 level and \$3,000,000 more than the administration request. The section 326 program provides 5-year grants to strengthen historically black graduate institutions [HBGIs]. The Higher Education Amendments of 1998 increased the number of recipients to 18 named institutions, but reserved the first \$26,600,000 appropriated each year to the 16 institutions included in the previous authorization. Grants may be used for any part B purpose and to establish an endowment.

Strengthening Alaska Native and Native Hawaiian-serving institutions

The Committee recommends \$8,234,000 for this program, an increase of \$1,734,000 over the fiscal year 2002 appropriation and \$1,500,000 more than budget request. The purpose of this program is to improve and expand the capacity of institutions serving Alaska Native and Native Hawaiian students. Funds may be used to plan, develop, and implement activities that encourage: faculty and curriculum development, better fund and administrative management, renovation and improvement of instructional facilities, student services, and the purchase of library books and other educational materials.

Strengthening tribally controlled colleges and universities

The Committee recommends \$23,000,000 for strengthening tribal colleges and universities (TCUs), an increase of \$5,500,000 over the fiscal year 2002 level and \$4,870,000 more than the budget request. Still in their early stages, TCUs rely on a portion of these funds to address developmental needs, including faculty development, curriculum and student services. In addition, the Committee in fiscal year 2001 helped launch a competitive grant program to assist institutions in addressing long overdue and high-priority infrastructure and facilities requirements. The funds provided shall be used to support continuation of existing basic grants and new planning or implementation grant awards. The remaining funds shall be available for grants for renovation and construction of facilities to help address urgently needed facilities repair and expansion.

International education and foreign language studies

The bill includes a total of \$101,500,000 for international education programs, an increase of \$3,000,000 over the fiscal year 2002 level and \$1,000,000 less than the budget request.

Domestic programs.—The Committee recommends \$87,000,000 for domestic program activities related to international education and foreign language studies, including international business education, under title VI of the HEA, an increase of \$1,800,000 above the fiscal year 2002 appropriation and \$1,000,000 less than the administration request. Domestic programs include national resource centers, undergraduate international studies and foreign language programs, international research and studies projects, international business education projects and centers, American overseas research centers, language resource centers, foreign language and area studies fellowships, and technological innovation and cooperation for foreign information access.

Overseas programs.—The bill includes \$13,000,000 for overseas programs authorized under the Mutual Educational and Cultural Exchange Act of 1961, popularly known as the Fulbright-Hays Act. The recommendation is an increase of \$1,200,000 more than the fiscal year 2002 level and the same as the budget request. Under these overseas programs, grants are provided for group and faculty research projects abroad, doctoral dissertation research abroad, and special bilateral projects. Unlike other programs authorized by the Fulbright-Hays Act and administered by the Department of State, these Department of Education programs focus on training American instructors and students in order to improve foreign language and area studies education in the United States.

Institute for International Public Policy.—The Committee bill recommends \$1,500,000 for the Institute for International Public Policy. This is the same amount as the fiscal year 2002 level and the budget request. This program is designed to increase the number of minority individuals in foreign service and related careers by providing a grant to a consortium of institutions for undergraduate and graduate level foreign language and international studies. An institutional match of 50 percent is required.

Fund for the improvement of postsecondary education

The Committee recommends \$126,926,000 for the Fund for the Improvement of Postsecondary Education [FIPSE], which is \$53,996,000 less than the 2002 appropriation and \$87,788,000 more than the administration request. FIPSE stimulates improvements in education beyond high school by supporting exemplary, locally developed projects that have potential for addressing problems and recommending improvements in postsecondary education. The fund is administered by an independent board that provides small, competitive grants and contracts to a variety of postsecondary institutions and agencies, including 2- and 4-year colleges and universities, State education agencies, community-based organizations, and other non-profit institutions and organizations concerned with education beyond high school.

The Committee recommendation includes \$25,810,000, the full amount requested for the comprehensive program. The Committee rejects the budget request to consolidate the Demonstration Projects to Ensure Quality Higher Education for Students with Disabilities program within the FIPSE program.

Minority science and engineering improvement

The Committee recommends \$9,500,000 for the Minority Science and Engineering Im-

provement program [MSEIP], \$1,000,000 more than the fiscal year 2002 level and the administration request. This program provides discretionary grants to institutions with minority enrollments greater than 50 percent to purchase equipment, develop curricula, and support advanced faculty training. Grants are intended to improve science and engineering education programs and increase the number of minority students in the fields of science, mathematics, and engineering.

Interest subsidy grants

The Committee recommends \$3,000,000 for interest subsidy grants, \$2,000,000 less than the fiscal year 2002 level and the same as the administration request. This appropriation is required to meet the Federal commitment to pay interest subsidies on 73 loans made in past years for constructing, renovating, and equipping postsecondary academic facilities. No new interest subsidy commitments have been entered into since 1973 but subsidy payments on existing loans are expected to continue until the year 2013.

Federal TRIO programs

The Committee bill includes \$832,500,000 for Federal TRIO programs, an increase of \$30,000,000 above the fiscal year 2002 appropriation and the administration request.

TRIO programs provide a variety of services to improve postsecondary education opportunities for low-income individuals and first-generation college students: Upward Bound offers disadvantaged high school students academic services to develop the skills and motivation needed to continue their education; Student Support Services provides remedial instruction, counseling, summer programs and grant aid to disadvantaged college students to help them complete their postsecondary education; Talent Search identifies and counsels individuals between ages 11 and 27 regarding opportunities for completing high school and enrolling in postsecondary education; Educational Opportunity Centers provide information and counseling on available financial and academic assistance to low-income adults who are first-generation college students; and the Ronald E. McNair Postbaccalaureate Achievement Program supports research internships, seminars, tutoring, and other activities to encourage disadvantaged college students to enroll in graduate programs.

The Committee urges the Department to use a funding allocation strategy in making awards under TRIO that balances the need to fund a larger number of grantees with the need for projects to improve the quality of student services and expand to serve all eligible students. The Committee notes that, at the budget request level, \$5,365,000 has not been allocated to any particular TRIO program.

Gaining early awareness and readiness for undergraduate programs [GEAR UP]

The Committee recommends \$295,000,000, an increase of \$10,000,000 over the amount provided in fiscal year 2002 and the budget request. Under this program funds are used by States and partnerships of colleges, middle and high schools, and community organizations to assist middle and high schools serving a high percentage of low-income students. Services provided help students prepare for and pursue a postsecondary education.

Byrd honors scholarships

The Committee recommends \$41,001,000 for the Byrd honors scholarship program, the same amount as the fiscal year 2002 appropriation and the budget request.

The Byrd honors scholarship program is designed to promote student excellence and achievement and to recognize exceptionally able students who show promise of continued

excellence. Funds are allocated to State education agencies based on each State's school-aged population. The State education agencies select the recipients of the scholarships in consultation with school administrators, teachers, counselors, and parents. The funds provided will support a new cohort of first-year students in 2003, and continue support for the 2000, 2001, and 2002 cohorts of students in their fourth, third and second years of study, respectively. The amount recommended will provide scholarships of \$1,500 to 27,334 students.

Javits fellowships

The Committee recommends \$10,000,000 for the Javits Fellowships program, the same as the fiscal year 2002 amount and the budget request.

The Javits Fellowships program provides fellowships of up to 4 years to students of superior ability who are pursuing doctoral degrees in the arts, humanities, and social sciences at any institution of their choice. Each fellowship consists of a student stipend to cover living costs, and an institutional payment to cover each fellow's tuition and other expenses. Funds provided in the fiscal year 2003 appropriation support fellowships for the 2004–2005 academic year.

Graduate assistance in areas of national need [GAANN]

The Committee recommends \$31,000,000 for graduate assistance in areas of national need, the same as the fiscal year 2002 level and the budget request. This program awards competitive grants to graduate academic departments and programs for fellowship support in areas of national need as determined by the Secretary. In fiscal year 2001, the Secretary designated the following areas of national need: biology, chemistry, computer and information sciences, engineering, geological and related sciences, mathematics and physics. Recipients must demonstrate financial need and academic excellence, and seek the highest degree in their fields.

Teacher quality enhancement grants

The Committee recommends \$90,000,000 for the teacher quality enhancement grants program, the same amount as the fiscal year 2002 level and the budget request. The program was established to support statewide initiatives that best meet their specific teacher preparation and recruitment needs. Further, the Act provides and designates funding for the program in three focus areas: 45 percent of resources support a State grant program, 45 percent of funds are used for a partnership program, and 10 percent are designated for a recruitment grant program.

Under the State grant program, funds may be used for a variety of State-level reforms, including more rigorous teacher certification and licensure requirements; provision of high-quality alternative routes to certification; development of systems to reward high-performing teachers and principals; and development of efforts to reduce the shortage of qualified teachers in high-poverty areas.

Teacher training partnership grants, which are awarded to local partnerships comprised of at least one school of arts and science, one school or program of education, a local education agency, and a K-12 school, may be used for a variety of activities designed to improve teacher preparation and performance, including efforts to provide increased academic study in a proposed teaching specialty area; to prepare teachers to use technology effectively in the classroom; to provide preservice clinical experiences; and to integrate reliable research-based teaching methods into the curriculum. Partnerships may work with other entities, with those involving businesses receiving priority consid-

eration. Partnerships are eligible to receive a one-time-only grant to encourage reform and improvement at the local level.

The recruitment grant program supports efforts to reduce shortages of qualified teachers in high-need school districts as well as provide assistance for high-quality teacher preparation and induction programs to meet the specific educational needs of the local area.

Child care access means parents in schools

The Committee recommends an appropriation of \$16,300,000 for the Child Care Access Means Parents in School (CAMPUS) program, \$8,700,000 less than the 2002 appropriation and \$1,300,000 more than the budget request. The Committee takes this action because of the \$8,700,000 lapsed in fiscal year 2001 and the additional funds that lapsed in fiscal year 2002. This program was established in the Higher Education Amendments of 1998 to support the efforts of a growing number of non-traditional students who are struggling to complete their college degrees at the same time that they take care of their children. Discretionary grants of up to 4 years are made to institutions of higher education to support or establish a campus-based childcare program primarily serving the needs of low-income students enrolled at the institution.

The Committee expects the Department to continue to publicize the availability of these funds, provide appropriate technical assistance and offer pre-application workshops to ensure that eligible entities are able to access funding made available through this program.

Demonstration projects to ensure quality higher education for students with disabilities

The Committee recommends \$7,000,000 for this program, the same amount appropriated in fiscal year 2002. The Department proposed eliminating funding for this program. This program's purpose is to ensure that students with disabilities receive a high-quality postsecondary education. Grants are made to support model demonstration projects that provide technical assistance and professional development activities for faculty and administrators in institutions of higher education.

Underground railroad program

The Committee recommendation includes \$2,500,000 for the Underground Railroad program, an increase of \$500,000 over the fiscal year 2002 amount. The administration did not request any resources for this program. The program was newly authorized by the Higher Education Amendments of 1998 and was funded for the first time in fiscal year 1999. Grants are provided to research, display, interpret, and collect artifacts relating to the history of the underground railroad. Educational organizations receiving funds must demonstrate substantial private support through a public-private partnership, create an endowment fund that provides for ongoing operation of the facility, and establish a network of satellite centers throughout the United States to share information and teach people about the significance of the underground railroad in American history.

GPRA/Higher Education Act Program Evaluation

The Committee recommends \$1,000,000 for the Government Performance and Results Act data collection and for the Higher Education Act Program Evaluation program, the same amount as the fiscal year 2002 appropriation and the budget request. The administration requested these funds to comply with the Government Performance and Results Act, which requires the collection of data and evaluation of Higher Education pro-

grams and the performance of recipients of Higher Education funds.

Thurgood Marshall legal educational opportunity program

The Committee recommends \$5,000,000 for this program, \$1,000,000 more than the fiscal year 2002 appropriation. The Department did not request funding for this program. Resources will be used to provide minority, low-income or disadvantaged college students with the information, preparation, and financial assistance needed to gain access to and complete law school study.

B.J. Stupak Olympic scholarships

The Committee recommendation does not include funding for this program, the same as the budget request. The \$1,000,000 appropriated for fiscal year 2002 will be used to provide financial assistance to athletes who are training at the United States Olympic Education Center or one of the United States Olympic Training Centers and who are pursuing a postsecondary education at an institution of higher education.

HOWARD UNIVERSITY

Appropriations, 2002	\$237,474,000
Budget estimate, 2003	237,474,000
Committee recommendation	239,974,000

The Committee recommends an appropriation of \$239,974,000 for Howard University, which is \$2,500,000 more than the fiscal year 2002 appropriation and the budget request. Howard University is located in the District of Columbia and offers undergraduate, graduate, and professional degrees through 12 schools and colleges. The university also administers the Howard University Hospital, which provides both inpatient and outpatient care, as well as training in the health professions. Federal funds from this account support about 53 percent of the university's projected educational and general expenditures, excluding the hospital. The Committee agrees with the administration and recommends, within the funds provided, \$3,600,000 for the endowment program.

Howard University Hospital.—Within the funds provided, the Committee recommends \$30,374,000 for the Howard University Hospital, the same as the fiscal year 2002 level and the budget request. The hospital serves as a major acute and ambulatory care center for the District of Columbia and functions as a major teaching facility attached to the university. The Federal appropriation provides partial funding for the hospital's operations.

COLLEGE HOUSING AND ACADEMIC FACILITIES LOANS

Appropriations, 2002	\$762,000
Budget estimate, 2003	762,000
Committee recommendation	762,000

Federal administration.—The Committee bill includes \$762,000 for Federal administration of the CHAFL program, the same as the 2002 level and the administration request.

These funds will be used to reimburse the Department for expenses incurred in managing the existing CHAFL loan portfolio during fiscal year 2003. These expenses include salaries and benefits, travel, printing, contracts (including contracted loan servicing activities), and other expenses directly related to the administration of the CHAFL Program.

HISTORICALLY BLACK COLLEGE AND UNIVERSITY CAPITAL FINANCING PROGRAM

Appropriations, 2002	\$208,000
Budget estimate, 2003	208,000
Committee recommendation	208,000

Federal administration.—The Committee recommends \$208,000 for Federal administration of the Historically Black College and

University [HBCU] Capital Financing Program, the same as the fiscal year 2002 level and the administration request.

The HBCU Capital Financing Program makes capital available to HBCUs for construction, renovation, and repair of academic facilities by providing a Federal guarantee for private sector construction bonds. Construction loans will be made from the proceeds of the sale of the bonds.

INSTITUTE OF EDUCATION SCIENCE

Appropriations, 2002	\$443,870,000
Budget estimate, 2003	432,887,000
Committee recommendation	397,387,000

The bill includes \$397,387,000 for educational research, statistics, and assessment programs. This amount is \$46,483,000 below the fiscal year 2002 appropriation and \$35,500,000 less than the budget request. This account supports education research, data collection and analysis activities, and the assessment of student progress.

Research, development and dissemination

The Committee recommends \$89,500,000 for educational research, development and national dissemination activities. This amount is \$32,317,000 below the fiscal year 2002 appropriation and \$85,500,000 less than the budget request. Funds are available for obligation for 2 fiscal years. These funds support research, development, and dissemination activities that are aimed at expanding fundamental knowledge of education and promoting the use of research and development findings in the design of efforts to improve education.

Regional educational laboratories

The Committee recommends \$67,500,000, the same amount as the budget request and the fiscal 2002 appropriation, for regional educational laboratories. Funding supports a network of 10 laboratories that are responsible for promoting the use of broad-based systemic strategies to improve student achievement.

Statistics

The Committee recommends \$87,000,000 for data-gathering and statistical-analysis activities of the National Center for Education Statistics (NCES). This amount is \$2,000,000 more than the fiscal year 2002 appropriation and \$8,000,000 less than the budget request.

The NCES collects, analyzes, and reports statistics on education in the United States. Activities are carried out directly and through grants and contracts. The Center collects data on educational institutions at all levels, longitudinal data on student progress, and data relevant to public policy. The NCES also provides technical assistance to State and local education agencies and postsecondary institutions.

Assessment

The Committee recommends \$95,387,000, the same as the budget request, for assessment. This amount is \$16,166,000 less than the fiscal year 2002 appropriation.

These funds provide support for the National Assessment of Educational Progress (NAEP), a congressionally mandated assessment created to measure the educational achievement of American students. The primary goal of NAEP is to determine and report the status and trends over time in educational achievement, subject by subject. Beginning in 2002, the Department will pay for State participation in biennial reading and mathematics assessments in grades 4 and 8.

Within the funds appropriated, the Committee recommends \$4,562,000 for the National Assessment Governing Board (NAGB), which is responsible for formulating policy for NAEP. The amount is the same as the

budget request and \$509,000 more than the fiscal year 2002 appropriation.

Multi-year grants and contracts

The Committee recommends \$58,000,000 to continue multi-year grants and contracts to comprehensive regional assistance centers, Eisenhower regional mathematics and science consortia, and regional technology in education consortia (R*TECs). This amount is the same as the fiscal year 2002 appropriation. The administration requested no funds for this purpose.

Within the funds appropriated, the Committee recommends: \$28,000,000 for the comprehensive regional assistance centers program, which funds 15 university-based or nonprofit centers that offer technical assistance to States, school districts, and schools on a variety of topics; \$15,000,000 for Eisenhower regional mathematics and science consortia, which disseminate exemplary mathematics and science education instruction materials and provide technical assistance for the implementation of teaching methods and assessment tools; \$5,000,000 for the Eisenhower Math and Science Clearinghouse; and \$10,000,000 for R*TECs, which are regional centers that help States, local educational agencies, teachers, school library and media personnel, administrators, and other education entities successfully integrate technologies into K-12 classrooms, library media centers, and other educational settings, including adult literacy centers.

DEPARTMENTAL MANAGEMENT PROGRAM ADMINISTRATION

Appropriations, 2002	\$364,761,000
Budget estimate, 2003	411,795,000
Committee recommendation	412,093,000

The Committee recommends \$412,093,000 for program administration, \$47,332,000 more than the comparable fiscal year 2002 funding level and \$298,000 more than the budget request.

Funds support personnel compensation and benefits, travel, rent, communications, utilities, printing, equipment and supplies, automated data processing, and other services required to award, administer, and monitor approximately 170 Federal education programs. Support for program evaluation and studies and advisory councils is also provided under this activity.

The Committee is concerned about the delay applicants are experiencing in receiving awards under grant programs. The Committee is aware of grant competitions that have taken more than 1 year from the announcement of the competition to the official notification of awards. The Committee understands that the events of September 11th and late enactment of the bill caused some delay in the process. However, it is the Committee's strong belief that every action should be taken to reduce the time it takes for applicants to learn whether their program has been renewed or whether they have been funded for the first time, while still maintaining a strong peer and grant review framework. The Committee requests that the Department provide a report within 60 days of enactment of this bill on the steps that it can take to reduce the delay in administering grant competitions.

The Committee has included \$750,000 to provide to all Title IV institutions, that are eligible for funding under the higher education, a handbook providing detailed instructions on compliance with section 485(f) of the Higher Education Act of 1965. The Committee expects that these handbooks will be distributed no later than August 1, 2003.

The Committee has provided the authority for the Department to lease from non-Fed-

eral sources one additional passenger motor vehicle as requested in the budget.

The Committee has included \$12,795,000, requested by the administration, to support costs associated with the renovation and modernization of the Mary E. Switzer building. These funds are available until expended. The Committee expects the Department to include a detailed explanation and justification of the funding required to complete this project in its fiscal year 2004 budget justification.

OFFICE FOR CIVIL RIGHTS

Appropriations, 2002	\$79,934,000
Budget estimate, 2003	86,276,000
Committee recommendation	86,276,000

The Committee bill includes \$86,276,000 for the Office for Civil Rights [OCR], \$6,342,000 more than the comparable fiscal year 2002 appropriation and the same as the budget request.

The Office for Civil Rights is responsible for the enforcement of laws that prohibit discrimination on the basis of race, color, national origin, sex, disability, and age in all programs and institutions funded by the Department of Education. To carry out this responsibility, OCR investigates and resolves discrimination complaints, monitors desegregation and equal educational opportunity plans, reviews possible discriminatory practices by recipients of Federal education funds, and provides technical assistance to recipients of funds to help them meet civil rights requirements.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$38,720,000
Budget estimate, 2003	41,000,000
Committee recommendation	41,000,000

The Committee recommends \$41,000,000 for the Office of the Inspector General, \$2,280,000 more than the fiscal year 2002 appropriation and the same as the budget request.

The Office of the Inspector General has the authority to investigate all departmental programs and administrative activities, including those under contract or grant, to prevent and detect fraud and abuse, and to ensure the quality and integrity of those programs. The Office investigates alleged misuse of Federal funds, and conducts audits to determine compliance with laws and regulations, efficiency of operations, and effectiveness in achieving program goals.

STUDENT AID ADMINISTRATION

Appropriations, 2002	\$107,484,000
Budget estimate, 2003	105,388,000
Committee recommendation	105,388,000

The Committee recommends \$105,388,000 in discretionary resources for the new Student Aid Administration account. The Committee recommendation is \$2,096,000 less than the comparable fiscal year 2002 funding level and the same as the request.

Fiscal year 2002 funding for activities funded in this new account was provided by the FFEL Federal Administration account and program administration account.

Funds appropriated for the Student Aid Administration account, in addition to mandatory funding available through Section 458 of the Higher Education Act, will support the Department's student aid management expenses. The Office of Student Financial Assistance and Office of Postsecondary Education have primary responsibility for administering Federal student financial assistance programs.

The Committee rejects the Administration's legislative proposal to fund this new account solely through annual appropriations.

GENERAL PROVISIONS

The Committee bill contains language which has been included in the bill since 1974, prohibiting the use of funds for the transportation of students or teachers in order to overcome racial imbalance (sec. 301).

The Committee bill contains language included in the bill since 1977, prohibiting the transportation of students other than to the school nearest to the student's home (sec. 302).

The Committee bill contains language which has been included in the bill since 1980, prohibiting the use of funds to prevent the implementation of programs of voluntary prayer and meditation in public schools (sec. 303).

The Committee bill includes a provision giving the Secretary of Education authority to transfer up to 1 percent of any discretionary funds between appropriations (sec. 304).

The Committee bill includes a provision mandating the certain funds for reading activities not be used to supplant non-Federal funds (sec. 305).

The Committee bill includes a provision regarding allocation of Title I funds in New York City (sec. 306).

The Committee bill includes language making minor corrections in the Alaska native section of Public Law 107-110 (sec. 307).

The Committee includes language making a minor correction in the Native Hawaiian section of Public Law 107-110 (sec. 308).

TITLE IV—RELATED AGENCIES

ARMED FORCES RETIREMENT HOME BOARD

Appropriations, 2002	\$71,440,000
Budget estimate, 2003	67,340,000
Committee recommendation	67,340,000

The Committee recommends authority to expend \$67,340,000 from the Armed Forces Home Trust Fund to operate and maintain the Armed Forces Retirement Home—Washington and the Armed Forces Retirement Home—Gulfport. This amount is equal to the budget request.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

DOMESTIC VOLUNTEER SERVICE PROGRAMS	
Appropriations, 2002	\$328,895,000
Budget estimate, 2003	396,063,000
Committee recommendation	351,063,000

The Committee recommends an appropriation of \$351,063,000 for the domestic volunteer service programs of the Corporation for National and Community Service. The Committee recommendation is \$22,168,000 above the fiscal year 2002 comparable level, and \$45,000,000 less than the budget request.

VISTA

The Committee bill provides \$94,287,000 for the Volunteers in Service to America (VISTA) Program, \$9,000,000 above the fiscal year 2002 level and equal to the budget request.

VISTA is a 36-year-old program which provides capacity building for small community-based organizations. VISTA volunteers raise resources for local projects, recruit and organize volunteers, and establish and expand local community-based programs in housing, employment, health, and economic development activities.

Special Volunteer Programs

The Committee recommends \$10,000,000 for the Special Volunteer Programs, double the fiscal year 2002 level and \$45,000,000 below the budget request.

These funds will be used to carry out Part C of Title I of the Domestic Volunteer Serv-

ice Act of 1973, which authorizes grants to volunteer organizations to encourage and enable persons from all age groups to perform volunteer service in agencies, institutions and situations of need. Grants are awarded to organizations that strengthen and support volunteer efforts, with a particular emphasis on anti-poverty efforts.

The Committee commends the CNS for its stated goal of recruiting new Senior Corps volunteers and strongly supports this effort. The Committee is aware that one of the most important factors in the decision to continue volunteering is the quality of the first volunteer experience and the ongoing presence of the volunteer organization. For this reason, the Committee urges the Corporation to coordinate this newly funded program with the Senior Corps direct service programs. No funds have been included for the proposed Parent Drug Corps.

National Senior Volunteer Corps

The Committee bill provides \$212,547,000 for the National Senior Volunteer Corps programs, equal to the fiscal year 2002 level and the budget request.

The Committee recognizes the valuable contributions of seniors participating in the Foster Grandparent (FGP), Retired and Senior Volunteer (RSVP) and Senior Companion Programs (SCP). In accordance with the Domestic Volunteer Service Act (DVSA), the Committee intends that at least one-third of each program's increase over the fiscal year 2001 level shall be used to fund Program of National Significance (PNS) expansion grants to allow existing FGP, RSVP and SCP programs to expand the number of volunteers serving in areas of critical need as identified by Congress in the DVSA. Within the appropriation, sufficient funding has been included to provide adequate resources for administrative cost increases realized by all current grantees in each DVSA program. Remaining funds should be used to begin new FGP, RSVP and SCP programs in geographic areas currently underserved. The Committee expects these projects to be awarded via a nationwide competition among potential community-based sponsors.

The Committee is concerned that 1,474 service years under the Senior Corps programs went unfilled in fiscal year 2001. These unfilled slots resulted in over \$5,000,000 of unexpended funds. Since the early 1990's, the Corporation has maintained a 15 percent allowance for health care costs above the income guidelines. Over the same period of time, health care costs have risen exponentially. Data from the Centers for Medicare and Medicaid Services (CMS) indicates that seniors under 125 percent of poverty (those eligible for Senior Corps) spend an average of 35 percent of their out-of-pocket income on prescription drugs alone—more than twice the Corporations' allowance for all healthcare costs. In addition, seniors just above the Senior Corps eligibility, between 135 percent and 150 percent of poverty, spend an average of 30 percent of their income on prescription drugs. The Committee urges the Corporation to examine the potential for a more appropriate health care allowance that would allow the Senior Corps to tap into these potential volunteers and engage more of the President's projected new volunteers into sustained volunteer opportunities.

The Committee has included \$400,000 for senior demonstration programs, equal to the fiscal year 2002 appropriation and the budget request.

Foster Grandparent Program

The Committee recommends \$106,700,000 for the Foster Grandparent Program, equal to the fiscal year 2002 appropriations level and the budget request.

This program provides volunteer opportunities to seniors age 60 and over who serve

at-risk youth. This program involves seniors in their communities and provides a host of services to children.

Senior Companion Program

For the Senior Companion Program, the Committee bill includes \$46,563,000, an increase of \$2,168,000 over the fiscal year 2002 appropriations level and equal to the budget request.

This program enables senior citizens to provide personal assistance and companionship to adults with physical, mental, or emotional difficulties. Senior companions provide vital in-home services to elderly Americans who would otherwise have to enter nursing homes. The volunteers also provide respite care to relieve care givers.

Retired and Senior Volunteer Program

The Committee bill provides \$58,884,000 for the Retired and Senior Volunteer Program (RSVP), \$4,000,000 above the fiscal year 2002 level and equal to the budget request.

This program involves persons age 55 and over in volunteer opportunities in their communities.

Program support

The Committee bill includes \$34,229,000 for program support, \$2,000,000 above the fiscal year 2002 appropriation and equal to the budget request.

CORPORATION FOR PUBLIC BROADCASTING

Appropriations, 2003	\$365,000,000
Appropriations, 2004	380,000,000
Budget estimate, 2005	395,000,000
Committee recommendation	395,000,000

The Committee recommends an appropriation of \$395,000,000 for the Corporation for Public Broadcasting (CPB), an advance appropriation for fiscal year 2005. This amount is \$15,000,000 more than the fiscal year 2004 appropriation and equal to the budget request.

In addition, the Committee recommends \$48,744,000 for the conversion to digital broadcasting. The recommendation is \$23,744,000 above last year's appropriation and the administration request.

The Committee notes that since the passage of the 1996 Telecommunications Act, only 87 of the Nation's 356 public television stations have converted to digital. The remaining 269 stations are facing a May 2003 deadline by which to complete conversion or risk losing their licenses. To date, Federal funding for this conversion totals \$158,000,000 out of the total estimated cost of \$1,700,000,000. Stations have raised over \$750,000,000 from State and private sources and are generally expected to cover more than half of the costs of conversion. The Committee is concerned that the Administration's request is not sufficient to meet the Federal mandate and to cover the Federal share of conversion.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Appropriations, 2002	\$39,982,000
Budget estimate, 2003	40,718,000
Committee recommendation	40,718,000

The Committee recommends an appropriation of \$40,718,000 for the Federal Mediation and Conciliation Service (FMCS), \$736,000 above the fiscal year 2002 appropriation and equal to the budget request.

The FMCS was established by Congress in 1947 to provide mediation, conciliation, and arbitration services to labor and management. FMCS is authorized to provide dispute resolution consultation and training to all Federal agencies.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Appropriations, 2002	\$6,939,000
----------------------------	-------------

Budget estimate, 2003	7,127,000
Committee recommendation	7,127,000

The Committee recommends an appropriation of \$7,127,000 for the Federal Mine Safety and Health Review Commission, an increase of \$188,000 over the fiscal year 2002 appropriation and the same as the budget request.

The Federal Mine Safety and Health Review Commission provides administrative trial and appellate review of legal disputes under the Federal Mine Safety and Health Act of 1977. The five-member Commission provides administrative appellate review of the Commission's administrative law judge decisions.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

INSTITUTE OF MUSEUM AND LIBRARY SERVICE	
Appropriations, 2002	\$224,501,000
Budget estimate, 2003	210,000,000
Committee recommendation	203,000,000

The Committee recommends an appropriation of \$203,000,000 for the Institute of Museum and Library Services. This is \$21,501,000 less than the 2002 level and \$7,000,000 less than the administration request.

Office of Museum Services Operations Grants

The Committee recommends \$15,932,000 for operations grants. These funds support grants to museums for building increased public access, expanding educational services, reaching families and children, and using technology more effectively in support of these goals. In addition, non-competitive grants are awarded for technical assistance in four types of assessments: Institutional, Collections Management, Public Dimension, and governance.

Museum Conservation Programs

The Committee recommends \$3,630,000 for Conservation programs. These funds support grants to allow museums to survey collections, perform training, research, treatment and environmental improvements. In addition, grantees may receive additional funds to develop an education component that relates to their conservation project. In addition, non-competitive grants are awarded for technical assistance in conservation efforts.

Museum National Leadership Projects

The Committee recommends \$5,700,000 for National Leadership projects. The National Leadership Grants encourage innovation in meeting community needs, widespread and creative use of new technologies, greater public access to museum collections, and an extended impact of Federal dollars through collaborative projects.

Office of Museum Services Administration

The Committee recommends \$3,463,000 for program administration, the same as the budget request. Funds support personnel compensation and benefits, travel, rent, communications, utilities, printing, equipment and supplies, automated data processing, and other services.

Office of Library Services State Grants

The Committee recommends \$154,494,000 for State grants. Funds are provided to States by formula to carry out 5-year State plans. These plans must set goals and priorities for the State consistent with the purpose of the act, describe activities to meet the goals and priorities and describe the methods by which progress toward the goals and priorities and the success of activities will be evaluated. States may apportion their funds between two activities, technology and targeted services. For technology, States may use funds for electronic linkages among libraries, linkages to educational, social and information

services, accessing information through electronic networks, or link different types of libraries or share resources among libraries. For targeted services, States may direct library and information services to persons having difficulty using a library, underserved urban and rural communities, and children from low income families. Within the total recommended, \$3,075,000 has been provided for library services to Native Americans and Native Hawaiians.

Library National leadership projects

The Committee recommends \$14,081,000 for national leadership projects. These funds support activities of national significance to enhance the quality of library services nationwide and to provide coordination between libraries and museums. Activities are carried out through grants and contracts awarded on a competitive basis to libraries, agencies, institutions of higher education and museums. Priority is given to projects that focus on education and training of library personnel, research and development for the improvement of libraries, preservation, digitization of library materials, partnerships between libraries and museums and other activities that enhance the quality of library services nationwide.

The Committee commends the administration for proposing an Initiative to Recruit and Educate Librarians and has included \$3,000,000 for this purpose. The nation is facing an impending retirement wave of librarians. The Bureau of Labor Statistics reports that 57 percent of current librarians are 45 and older and 50 percent of librarians are expected to leave the profession in the next 10 years. In addition, current librarians are being asked to take on expanded duties as information technology advances and our society experiences an ever-increasing need for the dissemination of public safety and public health data.

Office of Library Services Administration

The Committee recommends \$5,700,000 for program administration, the same as the budget request. Funds support personnel compensation and benefits, travel, rent, communications, utilities, printing, equipment and supplies, automated data processing, and other services.

MEDICARE PAYMENT ADVISORY COMMISSION

Appropriations, 2002	\$8,250,000
Budget estimate, 2003	8,250,000
Committee recommendation	8,250,000

The Committee recommends an appropriation of \$8,250,000 for the Medicare Payment Advisory Commission, equal to the fiscal year 2002 appropriation and the budget request.

The Medicare Payment Advisory Commission (MedPAC) was established by Congress as part of the Balanced Budget Act of 1997 (Public Law 105-33). Congress merged the Physician Payment Review Commission with the Prospective Payment Assessment Commission to create MedPAC.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

Appropriations, 2002	\$1,000,000
Budget estimate, 2003
Committee recommendation	1,000,000

The Committee recommends an appropriation of \$1,000,000 for the National Commission on Libraries and Information Science, the same as the fiscal year 2002 appropriation and \$1,000,000 more than the budget request.

The Commission determines the need for, and makes recommendations on, library and information services, and advises the President and Congress on the development and

implementation of national policy in library and information sciences.

NATIONAL COUNCIL ON DISABILITY

Appropriations, 2002	\$2,830,000
Budget estimate, 2003	2,830,000
Committee recommendation	2,830,000

The Committee recommends an appropriation of \$2,830,000 for the National Council on Disability, equal to the fiscal year 2002 appropriation and the budget request.

The Council is mandated to make recommendations to the President, the Congress, the Rehabilitation Services Administration, and the National Institute on Disability and Rehabilitation Research, on the public issues of concern to individuals with disabilities. The Council gathers information on the implementation, effectiveness, and impact of the Americans With Disabilities Act and looks at emerging policy issues as they affect persons with disabilities and their ability to enter or reenter the Nation's work force and to live independently.

NATIONAL LABOR RELATIONS BOARD

Appropriations, 2002	\$226,618,000
Budget estimate, 2003	233,223,000
Committee recommendation	238,223,000

The Committee recommends an appropriation of \$238,223,000 for the National Labor Relations Board (NLRB), \$11,605,000 more than the fiscal year 2002 comparable level and \$5,000,000 more than the budget request.

The NLRB is a law enforcement agency which adjudicates disputes under the National Labor Relations Act.

The Committee is disappointed to note that the progress made by the NLRB reducing the backlog of unfair labor practice cases has been stymied by an increase in case intakes. The backlog at the end of fiscal year 2001 was approximately 970 cases and grew to 2,010 cases by the end of fiscal year 2002. The Committee is concerned about the impact this backlog has on workplace conditions. To that end, the Committee has included additional funds to continue the effort to reduce backlogged cases.

NATIONAL MEDIATION BOARD

Appropriations, 2002	\$10,635,000
Budget estimate, 2003	11,203,000
Committee recommendation	11,203,000

The Committee recommends an appropriation of \$11,203,000 for the National Mediation Board, \$568,000 more than the fiscal year 2002 appropriation and the same as the budget request.

The National Mediation Board protects interstate commerce as it mediates labor-management relations in the railroad and airline industries under the Railway Labor Act. The Board mediates collective bargaining disputes, determines the choice of employee bargaining representatives through elections, and administers arbitration of employee grievances.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Appropriations, 2002	\$8,964,000
Budget estimate, 2003	9,577,000
Committee recommendation	9,577,000

The Committee recommends an appropriation of \$9,577,000 for the Occupational Safety and Health Review Commission, \$613,000 above the fiscal year 2002 appropriation and the same as the budget request.

The Commission serves as a court to justly and expeditiously resolve disputes between the Occupational Safety and Health Administration (OSHA) and employers charged with violations of health and safety standards enforced by OSHA.

RAILROAD RETIREMENT BOARD

DUAL BENEFITS PAYMENTS ACCOUNT

Appropriations, 2002	\$137,000,000
Budget estimate, 2003	124,000,000
Committee recommendation	124,000,000

The Committee has provided a total of \$124,000,000 for dual benefits, including \$8,000,000 in income tax receipts on dual benefits as authorized by law. The Committee recommendation is \$13,000,000 less than the fiscal year 2002 level and the same as the budget request.

This appropriation provides for vested dual benefit payments authorized by the Railroad Retirement Act of 1974, as amended by the Omnibus Reconciliation Act of 1981. This separate account, established for the payment of dual benefits, is funded by general fund appropriations and income tax receipts of vested dual benefits.

FEDERAL PAYMENTS TO THE RAILROAD RETIREMENT ACCOUNT

Appropriations, 2002	\$150,000
Budget estimate, 2003	150,000
Committee recommendation	150,000

The Committee recommends \$150,000 for interest earned on unnegotiated checks. This is the same as the fiscal year 2002 appropriation and budget request.

LIMITATION ON ADMINISTRATION

Appropriations, 2002	\$97,700,000
Budget estimate, 2003	97,720,000
Committee recommendation	97,720,000

The Committee recommends an appropriation of \$97,720,000 for the administration of railroad retirement/survivor benefit programs. This amount is \$20,000 more than the fiscal year 2002 comparable level, and the same as the budget request.

The Board administers comprehensive retirement-survivor and unemployment-sickness insurance benefit programs for the Nation's railroad workers and their families. This account limits the amount of funds in the railroad retirement and railroad unemployment insurance trust funds which may be used by the Board for administrative expenses.

The Committee is concerned by the administration's lack of a consistent policy on the payment of commercial rent by trust fund agencies. The Committee requests that the Office of Management and Budget clarify its policy in the fiscal year 2004 budget. In the meantime, the Committee has included language to prohibit funds from the railroad retirement trust fund from being spent on any charges over and above the actual cost of administering the trust fund, including commercial rental rates.

LIMITATION ON THE OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$6,261,000
Budget estimate, 2003	6,300,000
Committee recommendation	6,300,000

The Committee recommends \$6,300,000 for the Office of the Inspector General, \$39,000 above the 2002 appropriation and the same as the budget request.

The Committee has included bill language to allow the Office of the Inspector General to use funds to conduct audits, investigations, and reviews of the Medicare program. The Committee finds that as long as the RRB has the authority to negotiate and administer the separate Medicare contract, the RRB Inspector General should not be prohibited from using funds to review, audit, or investigate the RRB's separate Medicare contract.

SOCIAL SECURITY ADMINISTRATION

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

Appropriations, 2002	\$434,400,000
Budget estimate, 2003	20,400,000
Committee recommendation	20,400,000

The Committee recommends an appropriation of \$20,400,000 for payments to Social Security trust funds, the same as the administration request. This amount reimburses the old age and survivors and disability insurance trust funds for special payments to certain uninsured persons, costs incurred administering pension reform activities, and the value of the interest for benefit checks issued but not negotiated. This appropriation restores the trust funds to the same financial position they would have been in had they not borne these costs, properly charged to the general funds.

The decrease in appropriation is a result of the inclusion of \$414,000,000 in last year's appropriation for the quinquennial adjustment to reimburse the OASI trust funds for the costs of granting noncontributory wage credits for military service.

SPECIAL BENEFITS FOR DISABLED COAL MINERS

Appropriations, 2002	\$332,840,000
Budget estimate, 2003	300,177,000
Committee recommendation	300,177,000

The Committee recommends an appropriation of \$300,177,000 for special benefits for disabled coal miners. This is in addition to the \$108,000,000 appropriated last year as an advance for the first quarter of fiscal year 2003. The recommendation is the same as the administration request. These funds are used to provide monthly benefits to coal miners disabled by black lung disease and to their widows and certain other dependents, as well as to pay related administrative costs.

The Social Security Administration holds primary responsibility for claims filed before July 1973, with the Department of Labor responsible for claims filed after that. By law, increases in black lung benefit payments are tied directly to Federal pay increases. The year-to-year decrease in this account reflects a declining beneficiary population.

The Committee recommends an advance appropriation of \$97,000,000 for the first quarter of fiscal year 2004, the same as the administration request. These funds will ensure uninterrupted benefit payments to coal miners, their widows, and dependents.

SUPPLEMENTAL SECURITY INCOME

Appropriations, 2002	\$21,577,412,000
Budget estimate, 2003	24,017,392,000
Committee recommendation	24,025,392,000

The Committee recommends an appropriation of \$24,025,392,000 for supplemental security income. This is in addition to the \$10,790,000,000 appropriated last year as an advance for the first quarter of fiscal year 2003 and includes funds for continuing disability reviews. The recommendation is \$2,447,980,000 more than the fiscal year 2002 level and \$8,000,000 more than the administration's request. The Committee also recommends an advance appropriation of \$11,080,000,000 for the first quarter of fiscal year 2004 to ensure uninterrupted benefits payments.

These funds are used to pay benefits under the SSI Program, which was established to ensure a Federal minimum monthly benefit for aged, blind, and disabled individuals, enabling them to meet basic needs. It is estimated that approximately 6.5 million persons will receive SSI benefits each month during fiscal year 2003. In many cases, SSI benefits supplement income from other sources, including Social Security benefits.

The funds are also used to reimburse the Social Security trust funds for the administrative costs for the program with a final settlement by the end of the subsequent fiscal year as required by law, to reimburse vocational rehabilitation agencies for costs incurred in successfully rehabilitating SSI recipients and for research and demonstration projects.

The Committee is concerned about backlogs in the amount of time that many applicants for Social Security disability benefits must wait before they finally receive disability benefits to which they are entitled. In fiscal year 2002, the Committee provided funding to reduce this backlog, as well as the funding to address a special caseload of beneficiaries who have received Supplemental Security Income disability benefits, but are entitled to Social Security disability benefits as well. In May 2002, the Social Security Administration discovered that this special caseload was more extensive than originally believed, potentially including more than 500,000 individuals. The Committee understands that the Commissioner is in the process of undertaking a thorough review of this issue to determine the number of affected individuals and the cost of processing this caseload. These complex cases must be re-examined by specially trained SSA staff so that these SSI beneficiaries can receive Social Security disability benefits to which they are entitled, some from as far back as the 1970's. The Committee is also concerned that re-examining these cases and calculating past due benefits will lengthen the already-unacceptable waiting periods facing disabled Americans. The Committee directs the SSA Commissioner to submit a report to the Committee within 30 days of the enactment of this bill detailing the amount of funds necessary to complete the training of staff and processing of this special caseload, as well as a plan for eliminating the backlog of disability applications and appeals and the amount of funding necessary to execute that plan.

Beneficiary services

The Committee recommendation includes \$45,728,000 for beneficiary services, which is the same as the administration request and \$8,316,000 more than the fiscal year 2002 level. This appropriation added to an estimated \$39,300,000 in carryover funding will bring the fiscal year 2003 program funding level to approximately \$85,000,000. This amount is available for payments to Employment Networks for successful outcomes or milestone payments under the Ticket to Work program and for reimbursement of State vocational rehabilitation agencies and alternate public or private providers.

Research and demonstration projects

The Committee recommendation includes \$38,000,000 for research and demonstration projects conducted under sections 1110 and 1115 of the Social Security Act. This is \$1,000,000 more than the fiscal year 2002 level and \$8,000,000 more than the administration request.

This amount will support SSA's efforts to strengthen its policy evaluation capability and focus on research of: program issues, the impact of demographic changes on future workloads and effective return-to-work strategies for disabled beneficiaries.

The Committee commends the Administration on their stated goal of preventing and ending homelessness for people with disabilities, within 10 years. The Committee believes that increasing the Social Security Administration's outreach and application assistance to homeless people as well as others who are economically disadvantaged is an important part of this effort. The Committee is aware that SSA operated an effective outreach program in the early 1990's,

where grants were awarded to local non-profits to provide SSI outreach and application assistance. In light of the ongoing need for SSI outreach and application assistance, the Committee has included an additional \$8,000,000 to provide and to administer a competitive demonstration grants demonstration program, targeted toward providing outreach and application assistance to homeless persons and other underserved populations.

Administration

The Committee recommendation includes \$2,824,000,000 for payment to the Social Security trust funds for the SSI Program's share of SSA's base administrative expenses. This is \$197,000,000 above the fiscal year 2002 level and equal to the administration request.

LIMITATION ON ADMINISTRATIVE EXPENSES	
Appropriations, 2002	\$7,575,500,000
Budget estimate, 2003	7,936,000,000
Committee recommendation	7,936,000,000

The Committee recommends a program funding level of \$7,936,000,000 for the limitation on administrative expenses, which is equal to the administration request and \$360,500,000 higher than the fiscal year 2002 level.

This account provides resources from the Social Security trust funds to administer the Social Security retirement and survivors and disability insurance programs, and certain Social Security health insurance functions. As authorized by law, it also provides resources from the trust funds for certain nontrust fund administrative costs, which are reimbursed from the general funds. These include administration of the supplemental security income program for the aged, blind and disabled; work associated with the Pension Reform Act of 1984; and the portion of the annual wage reporting work done by the Social Security Administration for the benefit of the Internal Revenue Service. The dollars provided also support automated data processing activities and fund the State disability determination services which make initial and continuing disability determinations on behalf of the Social Security Administration. Additionally, the limitation provides funding for computer support, and other administrative costs.

The limitation includes \$7,825,000,000 for routine operating expenses of the agency, which is equal to the amount requested by the President and \$782,500,000 over the 2002 comparable amount. These funds, as well as those derived from an increase in the user fees which are discussed below, cover the mandatory costs of maintaining equipment and facilities, as well as staffing.

The Committee commends SSA for monitoring and assessing the impact of Social Security Ruling (SSR) 99-2p regarding Chronic Fatigue Syndrome. The Committee is pleased that SSA officials have continued to educate adjudicators at all levels of the SSA process about the April 1999 Chronic Fatigue Syndrome ruling (99-2p). The Committee encourages SSA to continue these educational efforts, as many SSA employees remain unfamiliar with or misinformed about CFS and the functional limitations it imposes. Finally, the Committee encourages SSA to continue examining obstacles to benefits for persons with CFS. The Committee also encourages SSA to examine the impact of the ruling on CFS patients' access to benefits, and to keep medical information updated throughout all levels of the application and review process.

Social Security Advisory Board

The Committee has included \$1,800,000 within the limitation on administrative expenses account for the Social Security Advisory Board for fiscal year 2003, the same level as the administration request and the same as the fiscal year 2002 level.

User fees

In addition to other amounts provided, the Committee recommends \$111,000,000 for administrative activities funded from user fees that were authorized in fiscal year 1998. This is equal to the administration's request and an increase of \$11,000,000 over the fiscal year 2002 level.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$75,000,000
Budget estimate, 2003	83,000,000
Committee recommendation	83,000,000

The Committee recommends \$83,000,000 for activities for the Office of the Inspector General, \$8,000,000 more than fiscal year 2002 and equal to the administration request. This includes a general fund appropriation of \$21,000,000 together with an obligation limitation of \$62,000,000 from the Federal old-age and survivors insurance trust fund and the Federal disability insurance trust fund.

U.S. INSTITUTE OF PEACE

Appropriations, 2002	\$15,104,000
Budget estimate, 2003	16,200,000
Committee recommendation	16,200,000

The Committee recommends an appropriation of \$16,200,000 for the U.S. Institute of Peace, \$1,096,000 more than the fiscal year 2002 appropriation and equal to the budget request.

The Institute was established by the U.S. Institute of Peace Act (Public Law 98-525) in 1984. The Institute is an independent, non-profit, national organization whose primary mission is to promote, through scholarship and education, international peace, and the resolution of conflicts without recourse to violence.

TITLE V—GENERAL PROVISIONS

The Committee recommendation retains provisions which: authorize transfers of unexpended balances (sec. 501); limit funding to 1 year availability unless otherwise specified (sec. 502); limit lobbying and related activities (sec. 503); limit official representation expenses (amended) (sec. 504); prohibit funding of any program to carry out distribution of sterile needles for the hypodermic injection of any illegal drug unless the Secretary of HHS determines such programs are effective in preventing the spread of HIV and do not encourage the use of illegal drugs (sec. 505); state the sense of Congress about purchase of American-made equipment and products (sec. 506); clarify Federal funding as a component of State and local grant funds (sec. 507); limit use of funds for abortion (sec. 508 and sec. 509); restrict human embryo research (sec. 510); limit the use of funds for promotion of legalization of controlled substances included last year (sec. 511); limits use of funds to enter into or review contracts with entities subject to the requirement in section 4212(d) of title 38, United States Code, if the report required by that section has not been submitted (sec. 512); and prohibits the use of funds to promulgate regulations regarding the individual health identifier (sec. 513).

The Committee recommendation includes a new provision regarding the Institute of Peace (sec. 514).

The Committee recommendation includes an across-the-board administrative cost reduction (sec. 515).

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee report on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

The following items are identified pursuant to this requirement:

Nursing Loan Repayment, \$_____; Title VII of the Public Health Services Act, \$305,564,000; Title VIII of the Public Health Services Act, \$88,002,000; Universal Newborn Hearing Screening, \$10,000,000; Trauma Care, \$5,000,000; Abstinence Education, \$40,000,000; Organ Transplantation, \$24,990,000; Rural Hospital Flex Grants, \$45,000,000; Denali Commission, \$30,000,000; Family Planning, \$285,000,000; State Offices of Rural Health, \$10,000,000; Health statistics, \$125,899,000; Birth defects and developmental disabilities, \$97,691,000; Adolescent Family Life, \$31,124,000; Office of Minority Health, \$46,329,000; Office of Disease Prevention and Health Promotion, \$7,589,000; Child Care and Development Block Grant, \$2,099,994,000; Child Abuse Prevention and Treatment Act, \$109,186,000; Abandoned Infants Assistance Act, \$12,205,000; Native American Programs, \$45,912,000; Refugee and Entrant Assistance Programs, \$432,724,000; Alzheimer's Disease Demonstration Grants to States, \$14,000,000; Volunteers in Service to America, \$94,287,000; Special Volunteer Programs, \$10,000,000; National Senior Volunteer Corps, \$212,547,000; Institute of Museum and Library Services, \$203,000,000; United States Institute of Peace, \$16,200,000;

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or a joint resolution repealing or amending any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

[NOTICE: This is a draft for use of the Committee and its staff only, in preparation for markup.]

LEGISLATIVE BRANCH
APPROPRIATIONS, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. BENNETT, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the legislative branch for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amount of new budget (obligational) authority¹

Amount of bill as reported to Senate	\$2,342,634,000
Amount of 2003 budget estimate	2,408,616,000
Legislative branch appropriations, 2002	2,276,910,000
Amount of bill below budget estimate, 2003	-65,982,000
Amount of bill above legislative branch appropriations, 2002	+65,724,000

¹Excludes House items.

GENERAL STATEMENT AND SUMMARY

The Committee recommends new budget (obligational authority) of \$2,342,634,000 for the legislative branch, for fiscal year 2003. This total is \$65,982,000 below the budget request and \$65,724,000 above the fiscal year 2002 level. The bill excludes House items pursuant to the normal protocol.

Highlights of the bill include \$203,775,000 for the U.S. Capitol Police, an increase of \$30,485,000 over the fiscal year 2002 level, to enhance the security of the U.S. Capitol complex; \$335,185,000 for the Architect of the Capitol to maintain, improve, and construct buildings and facilities of the Congress; and \$499,253,000 for the Library of Congress. Increases over the fiscal year 2002 level are aimed principally at security upgrades.

The Committee expects all agencies to notify the Committee of any significant departures from budget plans presented to the Committee in any agency's budget justifications. In particular, agencies funded through this bill are required to notify the Committee prior to each reprogramming of funds in excess of the lesser of 10 percent or \$500,000 between programs, projects or activities, or in excess of \$500,000 between object classifications (except for shifts within the pay categories, object class 11, 12, and 13 or as further specified in each agency's respective section). This includes cumulative reprogrammings that together total at least \$500,000 from or to a particular program, activity, or object classification. The Committee desires to be notified of reprogramming actions which involve less than the above-mentioned amounts if such actions would have the effect of changing an agency's funding requirements in future years or if programs or projects specifically cited in the Committee's reports are affected.

The Committee also expects all agencies to submit operating plans for the Committee's approval within 30 days of the bill's enactment.

LEGISLATIVE BRANCH AGENCIES' BUDGET AND FINANCIAL INFORMATION

The Committee's review of the legislative branch agencies' budget submissions, including the presentation of Full Time Equivalent

(FTE) estimates; operating plans; and related materials identified a number of differences in the approaches and methodologies used by each agency. The Committee believes that there should be greater consistency and transparency in the assumptions, techniques, and methods used by legislative branch agencies in preparing and presenting their budget, financial reports and other FTE and financial management information for the Committee. Also, the presentation of budget estimates broken out by Title I and Title II will no longer be necessary in the fiscal year 2004 budget submission. Therefore, the Committee directs the Legislative Branch Financial Managers Council (LBFMC) in consultation with financial management officials in the legislative branch agencies, to propose guidelines on the form and content for preparing agency budget, FTE, and financial information in a more consistent, transparent, and useful manner. The proposed guidelines should be based on prevailing best practices and should better integrate budget formulation and execution, financial reporting, and performance management information. At a minimum, the LBFMC should develop and recommend guidelines on the form and content for the (1) annual budget submission without distinction by Title, (2) consistent presentation of FTE estimates, (3) budget markup material, and (4) annual operating plan. The Committee directs the agencies to focus greater attention, management, and review to the allocation, costing, and monitoring of onboard positions in order to better utilize FTE ceilings. The Committee expect to see improvements in the execution of FTE ceilings during fiscal year 2003, and better formulation of payroll cost in fiscal year 2004 budget requests.

TITLE I—LEGISLATIVE BRANCH APPROPRIATIONS SENATE

PAYMENT TO WIDOWS AND HEIRS OF DECEASED MEMBERS OF CONGRESS

The Committee has included \$150,000 for a payment to the heirs of the late Senator Paul David Wellstone.

EXPENSE ALLOWANCES

Appropriations, 2002	\$62,000
Budget estimate, 2003	62,000
Committee recommendation	120,000

The Committee recommends an appropriation of \$120,000 for the expense allowances of the Vice President, the President pro tempore of the Senate, the majority and minority leaders, the majority and minority whips, the chairmen of the majority and minority conference committees, and the chairmen of the majority and minority policy committees. The expense allowances have not been increased in some time. In most cases, the proposed increase is substantially less than the increase in the cost of living since the establishment of the allowance. The recommended allowances are as follows:

For the expense allowance of the Vice President, the Committee recommends an amount of \$20,000. An allowance of \$10,000 was first provided by Public Law 81-71, effective January 20, 1949.

For the expense allowance of the President pro tempore, the Committee recommends an amount of \$20,000. An allowance of \$10,000 was first provided by the Second Supplemental Appropriations Act, 1978 (Public Law 95-355), effective October 1, 1977.

For the expense allowance of the majority and minority leaders, the Committee recommends \$20,000 for each leader, for a total of \$40,000. An allowance of \$10,000 was first provided by Public Law 84-242, effective July 1, 1955.

For the expense allowance of the majority and minority whips, the Committee recommends \$10,000 for each whip, for a total of \$20,000. An allowance of \$10,000 was first provided by the Supplemental Appropriations Act, 1977, Public Law 95-26, effective April 1, 1977.

For the expense allowance for the chairmen of the majority and minority conference committees, the Committee recommends \$5,000 for each chairman, for a total of \$10,000. An allowance was first provided in the Supplemental Appropriations Act for Fiscal Year 1985, Public Law 99-88, effective August 15, 1985.

For the expense allowance for the chairmen of the majority and minority policy committees, the Committee recommends \$5,000 for each chairman, for a total of \$10,000.

Expenditures from all the foregoing allowances are made upon certification from the individuals for whom the allowances are authorized, and are reported semiannually in the report of the Secretary of the Senate.

REPRESENTATION ALLOWANCES FOR THE MAJORITY AND MINORITY LEADERS

Appropriations, 2002	\$30,000
Budget estimate, 2003	30,000
Committee recommendation	30,000

The Committee recommends an appropriation of \$30,000 for representation allowances for the majority and minority leaders.

This allowance was established in the Supplemental Appropriations Act for fiscal year 1985 (Public Law 99-88). The funds were authorized to be used by the majority and minority leaders solely for the discharge of their appropriate responsibilities in connection with official visits to the United States by members of foreign legislative bodies and representatives of foreign governments and intergovernmental agencies. The recommended amount is to be divided equally between the two leaders.

Expenditures from this allowance are made upon certification of the leaders and are reported in the semiannual report of the Secretary of the Senate.

SALARIES, OFFICERS AND EMPLOYEES

Appropriations, 2002	\$104,039,000
Budget estimate, 2003	119,671,000
Committee recommendation	116,891,000

The Committee recommends an appropriation of \$116,891,000 for the subaccounts funded under the overall account for the salaries of officers and employees of the Senate.

It should be noted that except for a handful of positions in the Offices of the Secretary and the Sergeant at Arms that are required by statute, specific staffing levels are not stipulated either by the budget request or by the Committee's recommendation. Rather, lump-sum allowances are provided to fund staffing levels each office finds necessary and appropriate for the performance of its duties. Estimated staffing levels for offices funded under this appropriation for fiscal year 2003 are 1,339 positions.

SALARIES, OFFICERS AND EMPLOYEES

[Estimated staffing levels—fiscal years 2002 and 2003]

	2003 request	2002
Office of the Vice President	45	45
Office of the President pro tempore	11	11
Office of the majority and minority leaders	47	47
Offices of the majority and minority whips	16	16
Conference committees	48	48
Offices of the secretaries of the conference of the majority and the conference of the minority	12	12
Policy committees	57	55
Office of the Chaplain	4	4
Office of the Secretary	252	252
Office of the Sergeant at Arms and Doorkeeper	829	779

SALARIES, OFFICERS AND EMPLOYEES—Continued

(Estimated staffing levels—fiscal years 2002 and 2003)

	2003 request	2002
Offices of the secretaries for the majority and minority	18	18
Totals	1,339	1,287

Any change from the allocation of funds in the subaccounts within this appropriation is subject to the approval of the Committee.

The total amount appropriated is allocated to the various offices of the Senate as displayed under the headings for the offices that follow.

OFFICE OF THE VICE PRESIDENT

Appropriations, 2002	\$1,867,000
Budget estimate, 2003	1,949,000
Committee recommendation	1,949,000

The Committee recommends an appropriation of \$1,949,000 to fund the salaries of the administrative and clerical staff of the Office of the Vice President in connection with his duties as the President of the Senate.

OFFICE OF THE PRESIDENT PRO TEMPORE

Appropriations, 2002	\$473,000
Budget estimate, 2003	518,000
Committee recommendation	518,000

The Committee recommends an appropriation of \$518,000 for the Office of the President pro tempore.

OFFICES OF THE MAJORITY AND MINORITY LEADERS

Appropriations, 2002	\$2,868,000
Budget estimate, 2003	3,094,000
Committee recommendation	3,094,000

The Committee recommends an appropriation of \$3,094,000 for the offices of the majority and minority leaders.

The administrative and clerical staffs funded by this appropriation were authorized under the provisions of Public Law 91-145, effective November 1, 1969. The amount recommended is to be equally divided, providing \$1,547,000 for each office.

OFFICES OF THE MAJORITY AND MINORITY WHIPS

Appropriations, 2002	\$1,912,000
Budget estimate, 2003	2,042,000
Committee recommendation	2,042,000

The Committee recommends an appropriation of \$2,042,000 for the offices of the majority and minority whips. It is to be equally divided, providing \$1,021,000 for each office.

The authority for the administrative and clerical staff funded by this appropriation was created by Public Law 84-242, effective July 1, 1955.

COMMITTEE ON APPROPRIATIONS

Appropriations, 2002	\$10,825,000
Budget estimate, 2003	11,266,000
Committee recommendation	11,266,000

For the salaries of the Committee on Appropriations, the Committee recommends an appropriation of \$11,266,000, an increase of \$441,000 over the enacted level.

CONFERENCE COMMITTEES

Appropriations, 2002	\$2,500,000
Budget estimate, 2003	2,610,000
Committee recommendation	2,610,000

For the administrative and clerical staffs of the majority and minority conference committees, the Committee recommends an appropriation of \$2,610,000. The appropriation provides \$1,305,000 in salaries for the staff of each conference committee.

The chairman of each conference committee may transfer to or from amounts provided for salaries of each conference to the account for conference committee expenses within the "Miscellaneous items" appropriation.

OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

Appropriations, 2002	\$618,000
Budget estimate, 2003	648,000
Committee recommendation	648,000

The Committee recommends an appropriation of \$648,000 for the majority and minority conference secretaries.

These offices were created by section 6 of Senate Resolution 17, agreed to January 10, 1977, and two positions in each office were first funded in the Supplemental Appropriations Act, 1977 (Public Law 95-26).

Section 102 of the Supplemental Appropriations Act, 1979 (Public Law 96-38), abolished the specific positions and established a lump-sum allowance for the employment of staff, effective October 1, 1979. The amount recommended is to be divided equally between the majority secretary and the minority secretary.

POLICY COMMITTEES

Appropriations, 2002	\$2,550,000
Budget estimate, 2003	2,724,000
Committee recommendation	2,724,000

For the salaries of the administrative and clerical staffs of the majority and minority policy committees, the Committee recommends an appropriation of \$2,724,000, or \$1,362,000 for each committee.

The chairman of each policy Committee may transfer to or from amounts provided for salaries of each policy Committee to the account for policy Committee expenses within the "Miscellaneous items" appropriation.

OFFICE OF THE CHAPLAIN

Appropriations, 2002	\$301,000
Budget estimate, 2003	315,000
Committee recommendation	315,000

For the Office of the Chaplain, the Committee recommends an appropriation of \$315,000. The amount recommended would provide the salaries for the Chaplain of the Senate and support staff to assist the Chaplain with his pastoral duties. The Fiscal Year 1988 Legislative Branch Appropriations Act, Public Law 100-202, established the rate of pay for the Chaplain at Executive Level IV, currently \$130,000.

OFFICE OF THE SECRETARY

Appropriations, 2002	\$15,424,000
Budget estimate, 2003	17,079,000
Committee recommendation	17,079,000

The Committee recommends \$17,079,000 for salaries of the Office of the Secretary. Fiscal year 2003 staffing levels are estimated at 252 positions.

This appropriation provides funds for four statutory positions (Secretary of the Senate, Assistant Secretary of the Senate, Financial Clerk of the Senate, and Parliamentarian of the Senate) and lump-sum allowances for the employment and adjustment of salaries of personnel in the Office of the Secretary of the Senate, as authorized by Public Law 97-51, effective October 1, 1981 (2 U.S.C. 61a-11). The following departmental guidelines for fiscal year 2003 have been submitted by the Secretary to the Committee. The departmental budgets grouped in the apportionment schedule under executive offices include: the Executive Office of the Secretary of the Senate, Page school, Senate Security

and Information Systems. The departmental budgets grouped in the apportionment schedule under administrative services include: captioning services, conservation and preservation, curator, disbursing office, gift shop, historical office, human resources, interparliamentary services, library, printing and document services, public records, and the stationery room. The departmental budgets grouped in the apportionment schedule under legislative and legal services include: the bill clerk, chief counsel for employment, daily digest, enrolling clerk, journal clerk, legislative clerk, Official Reporters of Debate, and Parliamentarian.

The Committee is aware that the Secretary of the Senate intends to implement a pilot program within available funds, to install real time closed captioning of Senate Committee hearings for deaf and hard of hearing individuals. The current lack of these services inhibits the opportunity for all Senate staff and constituents to participate fully in Committee proceedings. The Committee supports these efforts and encourages implementation of this pilot program as soon as possible.

OFFICE OF THE SECRETARY OF THE SENATE

(Estimated staffing levels—fiscal years 2002 and 2003)

	2003 request	2002	Dif- ference
Executive offices	40	40
Administrative services	157	167	-10
Legislative and legal services	55	45	+10
Totals	252	252

OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

Appropriations, 2002	\$39,082,000
Budget estimate, 2003	45,941,000
Committee recommendation	43,161,000

This appropriation provides funds for the salaries of three statutory positions (Sergeant at Arms and Doorkeeper, Deputy Sergeant at Arms and Doorkeeper, and Administrative Assistant to the Sergeant at Arms and Doorkeeper) and lump-sum allowances for employment and adjustments of salaries of personnel in the Office of the Sergeant at Arms and Doorkeeper of the Senate, as authorized by Public Law 97-51, effective October 1, 1981 (2 U.S.C. 61f-7).

The Committee recommends a total of \$43,161,000 for fiscal year 2003. This is an increase of \$4,079,000 over the fiscal year 2002 level. The amount recommended reflects the increased costs of the equipment, services, and support required to ensure the security of the physical, information, and communication assets of the U.S. Senate. Specifically, the increase over the enacted level is attributable to funding a cost-of-living adjustment, merit funding, and additional positions, most of which are directed at enhancing security for the Senate community. The reduction from the original budget request reflects the Sergeant at Arms' efforts to develop a more cost-efficient method of processing mail and packages and deferred hiring of new staff.

The offices and personnel covered by this appropriation are shown in the following table.

STAFFING—OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

	2002 level	2003 Committee recommendation
Operations division:		
Capitol Division	\$11,719,000	\$13,123,000
Positions	284	306
Central operations	\$7,855,000	\$8,146,000
Positions	181	183
Technology Development Services	\$7,599,000	\$9,031,000

STAFFING—OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE—Continued

	2002 level	2003 Committee recommendation
Positions	108	128
IT Support Services	\$4,987,000	\$5,506,000
Positions	93	98
Office Support Division	\$1,693,000	\$1,871,000
Positions	28	28
Staff Offices Division	\$4,819,000	\$5,036,000
Positions	80	81
SMA Project	\$410,000	\$448,000
Positions	5	5
Total	\$39,082,000	\$43,161,000
Positions	779	829

The Committee has no objection to the Sergeant at Arms moving staff positions between divisions without a formal reprogramming request but expects to be notified of such changes.

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

Appropriations, 2002	\$1,350,000
Budget estimate, 2003	1,410,000
Committee recommendation	1,410,000

The Committee recommends an appropriation of \$1,410,000 for the offices of the secretaries for the majority and minority. The appropriation is to be equally divided, providing \$705,000 for each office.

AGENCY CONTRIBUTIONS

Appropriations, 2002	\$25,219,000
Budget estimate, 2003	30,075,000
Committee recommendation	30,075,000

The Committee recommends an appropriation of \$30,075,000 for agency contributions for employees paid under the appropriation, "Salaries, officers and employees," and employees paid under the appropriation "Expenses of the United States Senate Caucus on International Narcotics Control" and employees paid under the appropriation "Joint Economic Committee."

Agency contributions include the Senate's contributions as an employer to the civil service retirement system, the Federal Employees' Retirement System, the thrift savings plan, Federal employee group life insurance, Federal employee health insurance programs, and FICA. The Senate is required by law to make these payments, and the total required is dependent upon the number of Senate employees, their compensation levels, the benefit programs in which they are enrolled, and the extent of the benefits elected.

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

Appropriations, 2002	\$4,306,000
Budget estimate, 2003	4,581,000
Committee recommendation	4,581,000

For the Office of the Legislative Counsel of the Senate, the Committee recommends an appropriation of \$4,581,000. The fiscal year 2003 staffing level is estimated to be 35 positions. The amount provided pays for the salaries, expenses, and agency contributions of the office.

OFFICE OF SENATE LEGAL COUNSEL

Appropriations, 2002	\$1,109,000
Budget estimate, 2003	1,176,000
Committee recommendation	1,176,000

The Office of Senate Legal Counsel was established pursuant to section 701 of Public Law 95-521. The Committee recommends an appropriation of \$1,176,000 for the Office. The amount provided pays for the salaries, expenses, and agency contributions of the Office.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

Appropriations, 2002	\$12,000
Budget estimate, 2003	12,000
Committee recommendation	12,000

Section 119 of Public Law 97-51 authorized an expense allowance for the Secretary of the Senate, the Sergeant at Arms and Doorkeeper of the Senate, the Secretary for the Majority, and the Secretary for the Minority. Since fiscal year 1983, the amount has been provided through a direct appropriation. The Committee recommends an appropriation of \$12,000, providing an allowance of \$3,000 for each office.

CONTINGENT EXPENSES OF THE SENATE

INQUIRIES AND INVESTIGATIONS

Appropriations, 2002	\$107,264,000
Budget estimate, 2003	109,450,000

Committee recommendation	109,450,000
--------------------------------	-------------

¹Reflects budget amendment \$2,067,000.

The Committee recommends an appropriation of \$109,450,000 for inquiries and investigations by all Senate standing, special, and select committees, consistent with S. Res. 54, authorizing expenditures by the Committees of the Senate for fiscal year 2003.

This appropriation funds the liquidation of obligations incurred by committees under the authorization provided in Committee funding resolutions.

U.S. SENATE CAUCUS ON INTERNATIONAL NARCOTICS CONTROL

Appropriations, 2002	\$520,000
Budget estimate, 2003	520,000
Committee recommendation	520,000

The Committee recommends \$520,000 for the expenses of the U.S. Senate Caucus on International Narcotics Control. Established in 1985 by "The Foreign Relations Authorization Act", the Caucus was created to monitor and promote international compliance with narcotics control treaties and monitor and encourage U.S. Government and private programs seeking to expand international cooperation against drug abuse. The Caucus is composed of seven Senators and five members from the public sector with a chairman from the majority party and a co-chairman from the minority party. It was the intent of the original conferees that the caucus operate in the manner of the Helsinki Commission.

SECRETARY OF THE SENATE

Appropriations, 2002	¹ \$8,821,000
Budget estimate, 2003	7,077,000
Committee recommendation	7,077,000

¹Includes \$250,000 in fiscal year 2002 supplemental appropriations.

The Committee recommends an appropriation of \$7,077,000 for expenses of the Office of the Secretary. The Committee has included \$5,000,000 for a multi-year program to upgrade and expand the Financial Management Information System. These funds are made available until September 30, 2007.

The table printed below sets forth the apportionment of funds under this appropriation, followed by a brief description of the line items. Any deviation of more than 10 percent cumulatively from the stated levels for each item will require the customary prior approval of the Committee.

EXPENSES—OFFICE OF THE SECRETARY

Item	Amount available fiscal year 2002, Public Law 107-68	Budget estimate fiscal year 2003	Difference
Executive office	\$452,700	\$397,800	-\$54,900
Administrative services	849,185	1,422,900	+573,715
Legislative and legal services	269,115	256,300	-12,815
Special projects	7,000,000	5,000,000	-2,000,000
Emergency Response Fund	250,000	-250,000
Totals	8,821,000	7,077,000	-1,744,000

Typical expenditures of the Secretary of the Senate include:

Consultants.—Funding is provided for not to exceed two individual consultants as authorized by section 110 of Public Law 95-94, August 5, 1977, which amends section 101 of Public Law 95-26, May 4, 1977. Consultants employed under this authority shall not be paid in excess of the per diem equivalent of the highest gross rate of annual compensation which may be paid to employees of a standing committee of the Senate.

Legal reference volumes and dictionaries.—Funding is provided to furnish U.S. Senators with volumes of the U.S. Code Annotated or U.S. Code service, pocket parts and supplements, as authorized by Public Law 92-51, July 9, 1971.

The Disbursing Office is responsible for providing the U.S. Code Annotated or the U.S. Code Service to Senators when they assume office and upon receipt of a written request of a Senator. In addition, dictionary and dictionary stands are also furnished to Senators from funds provided for in this account.

Contractual legal and administrative services and miscellaneous expenses.—Funding is provided for various contractual, administrative, and miscellaneous expenses incurred by the Office of the Secretary. The Office of the Secretary has contractual authority under Public Law 92-342, for the Federal Election Campaign Act and has utilized this authority to employ professional legal services in the past. In addition, the Office of the Secretary has incurred various types of legal and other expenses which have been authorized by the Senate. Administrative services and miscellaneous expenses are housekeeping expenses of the Office of the Secretary.

Travel and registration fees.—Funding is provided for travel expenses and registration fees incurred by the Secretary of the Senate and the employees of the Office of the Secretary. This line item excludes funding for travel expenses for the Federal Election Campaign Act under the Office of Public Records, which is provided separately under the authority of Public Law 93-342.

The authority for the travel portion of this account was provided for by section 101 of Public Law 94-59, July 25, 1975. The current limitation for travel expenses was increased to \$10,000 (Section 102 of Public Law 97-12, June 5, 1981). Section 1 of Public Law 98-367, July 17, 1984, removed the not-to-exceed limitation on travel expenses for the Secretary of the Senate, during any fiscal year.

Orientation and training.—Funding is provided for expenses incurred by the Secretary of the Senate to conduct orientation seminars or similar meetings for Senators, Senate officials, or members of staffs of Senators or Senate officials, not to exceed \$10,000 each fiscal year, under the authority of 2 U.S.C. 69a.

The Office of the Sergeant at Arms and Doorkeeper of the Senate is also authorized under these provisions to conduct seminars or similar meetings in the same manner and to the same extent as the Office of the Secretary of the Senate.

Newspapers.—Funding is provided to furnish newspapers and magazines for official purposes to the Marble Room, leadership offices, Republican and Democratic Cloakrooms, Senate officers, and certain other offices.

Senate service awards.—Funding is provided for the issuance of service pins or emblems as authorized by Senate Resolution 21, September 10, 1965. Senate Resolution 21 authorizes the Secretary of the Senate, under the direction of the Committee on Rules and Administration and in accordance with regulation promulgated by the Committee, to procure such pins or emblems and award them to Members, officers, and employees of the Senate who are entitled.

Postage.—This account also provides funding for postage for the Office of the Secretary of the Senate for special delivery, registered mail, and additional postage not covered under the frank.

Education of Senate pages.—Funding is provided for the education of Senate pages. Senate Resolution 184, July 29, 1983, authorized the Secretary of the Senate to enter into a contract, agreement, or other arrangement with the board of education of the District of Columbia, or to provide such educational services and items in such other manner as he may deem appropriate. Public Law 98-125, October 13, 1983, amended Public Law 98-51, July 14, 1983, striking out the heading and paragraph “Education of Pages” under the heading “Joint Items”, and redesignated the funds provided in Public Law 98-51 for the education of pages between the House of Representatives and the Senate. Each House is to provide for the education of its own pages.

Stationery.—Funding is provided for stationery supplies for the Office of the Secretary of the Senate. The funds provided have been allocated to the various departments of the Office of the Secretary.

Senate Commission on Art.—Funding is provided for the Senate Commission on Art, authorized by Public Law 100-696, November 18, 1988, to acquire any work of art, historical object, documents or material relating to historical matters, or exhibits for placement or exhibition within the Senate wing of the Capitol, any Senate office building, or in rooms, spaces, or corridors thereof, and to publish a Senate historical objects inventory and calendar of exhibits on display within the Senate wing of the Capitol and Senate office buildings.

The Senate Commission on Art was formerly the Commission on Arts and Antiquities, which was authorized by Senate Resolution 382, October 1, 1968, as amended by Senate Resolution 95, April 1, 1977, and Senate Resolution 400, March 23, 1988.

Representation expenses.—Funding is provided (not to exceed \$50,000) to the Secretary of the Senate to coordinate and carry out responsibilities in connection with foreign parliamentary groups or other foreign officials visiting the United States. Authorized by section 2 of Public Law 101-163, November 21, 1989.

Office of Conservation and Preservation.—Funding is provided for the Office of Conservation and Preservation to develop and coordinate programs directly related to the conservation and protection of Senate

records and materials for which the Secretary of the Senate has statutory authority.

Book preservation.—Funding is provided for the Office of Conservation and Preservation to use outside sources for the preservation and protection of the Senate book collection, including historically valuable documents under the care of the Secretary of the Senate.

Office of Public Records.—Funding is provided for expenses of the Office of Public Records. This office has evolved through various pieces of legislation and various responsibilities authorized by the Federal Election Campaign Act, as amended, the Ethics in Government Act, as amended, and the Lobbying Disclosure Act, as amended. Public Law 92-342, July 10, 1972, authorized the Secretary of the Senate to procure technical support services, consultants, use of detailed employees and travel expenses in carrying out his duties under the Federal Election Campaign Act of 1971. The Office of Public Records is mentioned for the first time in Public Law 93-145, November 1, 1973, which authorizes the Secretary of the Senate to appoint and fix the compensation of a superintendent and other position for the Office of Public Records. In addition, under the authority of Public Law 95-521, October 26, 1978 (Ethics in Government Act) reports filed under section 101 shall be available for public inspection and a copy of the report shall be provided to any person upon request. Any person requesting a copy of a report may be required to pay a reasonable fee to cover the cost of reproduction. Any moneys received by the Secretary shall be deposited into the Office of Public Records Revolving Fund under the authority of Public Law 101-163, November 21, 1989. The office also performs functions under the Senate Select Committee on Ethics, such as registration of mass mailings; and under the Lobbying Disclosure Act.

Disbursing Office.—Funding is provided for expenses incurred in the operation of the disbursing office. Typical expenses for this office include online access charges for Department of Treasury systems, notary bonds, seals and supplies, necessary supplies in conjunction with the various machinery maintained in the office, which are not available in the stationery room, and necessary insurance policies required for the protection of the disbursing officer of the Senate for monies assigned to his accountability.

Office of Captioning Services.—Funding is provided for the closed captioning of the televised Senate floor proceedings for the hearing impaired. Closed captioning was first authorized under the authority of Public Law 101-163, November 21, 1989.

Senate Chief Counsel for Employment.—Funding is provided for the Office of the Senate Chief Counsel for Employment. This office is a nonpartisan office formed in May 1993 at the direction of the joint leadership and is charged with providing legal advice and representation of Senate offices in all areas of employment law.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

Appropriations, 2002	\$95,904,000
Budget estimate, 2003	117,133,000
Committee recommendation	114,423,000

The Committee recommends the appropriation of \$114,423,000 for expenses of the Sergeant at Arms. The increase of \$18,519,000 over the enacted level is attributable in large part to security-related needs such as new mail and package handling costs and the new Office of Security and Emergency Preparedness.

The Sergeant at Arms budget structure reflects six major divisions: Capitol Division, Central Operations Division, Technology Development Services Division, IT Support Services Division, Office Support Division, and the Staff Offices Division. The Capitol Division centralizes all functions related to the maintenance and administration of the Senate wing of the U.S. Capitol Building, and provides mailing, photographic studio, and recording studio services. The Central Operations Division provides printing, mailing and parking services to the Senate. The Technology Development Services Division supports enterprise information technology systems, applications development, Internet/Intranet services, information security, and network engineering. The IT Support Services Division provides desktop computer support, mail system acquisition, maintenance and support, telecommunications, and Web and technology assessment support. The Office Support Division includes desktop computer acquisition and customer support. The Staff Offices Division includes Financial Management, Human Resources, and the Joint Office of Education and Training.

The following table compares the component categories within this account for fiscal years 2002 and 2003.

EXPENSES—OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

[In thousands of dollars]

	2002 level	2003 Committee recommendation
Capitol Division	13,455	10,410
Central Operations Division	2,443	3,965
Technology Development Services Division	17,565	22,330
IT Support Services Division	34,754	42,701
Office Support Division	24,688	28,686
Staff Offices Division	1,222	1,589
SMI Project	1,777	4,742
Total	95,904	114,423

The Committee requests that the Sergeant at Arms provide to the Committee a spending plan prior to the beginning of fiscal year 2003. Any deviation of more than 10 percent cumulatively from the level for each item in the spending plan will require the customary approval of the Committee.

MISCELLANEOUS ITEMS

Appropriations, 2002	\$14,274,000
Budget estimate, 2003	119,409,000
Committee recommendation	18,513,000

¹ Reflects pending budget estimate of \$1,000,000.

The Committee recommends an appropriation of \$18,513,000 for miscellaneous items.

Any deviation of more than 10 percent cumulatively from the stated levels for each item will require the customary prior approval of the Committee.

The following table sets forth the apportionment of funds under this appropriation:

FISCAL YEAR 2003 BUDGET—MISCELLANEOUS ITEMS APPORTIONMENT SCHEDULE

ITEM	AMOUNT AUTHORIZED FISCAL YEAR 2002 PUBLIC LAW 107-68	COMMITTEE RECOMMENDATION FISCAL YEAR 2003	DIFFERENCE
Resolution and reorganization reserve	\$2,450,000	\$2,500,000	+\$50,000
Unallocated	1,000,000	7,000,500	+6,000,500
Reserve for contingencies (miscellaneous items)	600,000	600,000	
Employees' compensation fund reimbursement (worker's compensation)	715,000	744,000	+29,000

FISCAL YEAR 2003 BUDGET—MISCELLANEOUS ITEMS APPORTIONMENT SCHEDULE—Continued

ITEM	AMOUNT AUTHORIZED FISCAL YEAR 2002 PUBLIC LAW 107-68	COMMITTEE RECOMMENDATION FISCAL YEAR 2003	DIFFERENCE
Mailing of Town Meeting Notices (Public Law 107-68, dated Nov. 12, 2001)	3,000,000	500,000	-2,500,000
Jacob K. Javits Fellowship Program (S. Res. 193, dated Sept. 30, 1999, as amended) (expires Sept. 30, 2004)	250,000	350,000	+100,000
John Heinz Fellowship Program (S. Res. 356, dated Oct. 7, 1992, S. Res. 238, dated July 1, 1994, and S. Res. 180 dated Sept. 30, 1999 (expires Sept. 30, 2004))	71,000	71,000
Reception of foreign dignitaries (S. Res. 247, dated Feb. 7, 1962, as amended by S. Res. 370, dated Oct. 10, 2000)	30,000	30,000
Foreign travel—Members and employees (S. Res. 179, dated May 25, 1977)	125,000	125,000
Federal employees compensation account (Public Law 96-499, dated Dec. 5, 1980 (Unemployment Compensation))	1,750,000	1,750,000
Conferences for the Majority and Minority (Public Laws 97-51, dated Jan. 3, 1983, 101-250, dated Nov. 5, 1990, and 107-68, dated Nov. 12, 2001)	200,000	200,000
Policy Committees for the Majority and Minority (Public Law 104-53, dated Nov. 19, 1995)	144,000	150,000	+6,000
Postage	6,000	16,000
Stationery	13,000	216,500	+3,500
Consultants—including agency contributions (2 USC 61h-6 as amended)	2,000,000	2,500,000	+500,000
National Security Working Group (S. Res. 75, March 25, 1999 (expires Dec. 31, 2002))	700,000	700,000
Committee on Appropriations (Public Law 105-275, dated Oct. 21, 1998)	950,000	950,000
Senate Child Care Center:			
Agency Contribution costs authorized by Public Laws 102-90, dated Aug. 14, 1991 and 103-50, dated July 2, 1993	250,000	300,000	+50,000
Training classes, conferences, and travel expenses as authorized by Public Law 104-197, dated Sept. 16, 1996	20,000	20,000
Total	14,274,000	18,513,000	+4,239,000
¹ Postage apportionment (fiscal year 2003):			
President of the Senate			\$2,700
Secretary for the Majority			1,100
Secretary for the Minority			1,100
Chaplain			1,100
Total			6,000
² Stationery apportionment (fiscal year 2003):			
President of the Senate			\$8,000
Conference of the Majority			300
Conference of the Minority			300
Chaplain			700
Senate Chamber			7,200
Total			16,500

Resolution and reorganization reserve.—This line item is used to cover the costs of Senate resolutions and public laws that authorize expenditures from the contingent fund of the Senate that do not have specific appropriations for such purpose.

Reserve for contingencies.—This is a Committee on Rules and Administration line item which includes payment for gratuities for family members of deceased Senate employees; damage to automobiles in the Senate parking lots; contractual, legal, and administrative services; and miscellaneous expenses.

Employees' compensation fund reimbursements (worker's compensation).—Reimbursements made to the U.S. Department of Labor for total benefits and other payments made on behalf of Senate employees from the employees' compensation fund.

Reception of foreign dignitaries.—The Committee on Foreign Relations is authorized to expend not to exceed \$30,000 each fiscal year to receive foreign dignitaries under the authority of Senate Resolution 247, agreed to February 7, 1962, as amended.

Jacob K. Javits Fellowship Program.—This fellowship program was first authorized by S. Res. 425, agreed to June 23, 1988, for a 5-year period ending June 22, 1993, and reauthorized by S. Res. 193 through September 30, 2004. The authorized funding level of \$350,000 each fiscal year provides for up to 10 fellows each fiscal year. The appointing authority is the Secretary of the Senate.

John Heinz Fellowship Program.—This fellowship program was first authorized by S. Res. 356 and extended by S. Res. 238, and S. Res. 180. It is authorized through September 30, 2004 and provides for up to 2 fellows each calendar year. The appointing authority is the Secretary of the Senate.

Foreign travel—Members and employees.—Senate Resolution 179, agreed to May 25, 1977, authorized payment from the contingent fund of the Senate, of the domestic portion of transportation costs and travel expenses incurred by Members and employees of the Senate when engaged in authorized foreign travel.

Federal employees' compensation account (unemployment compensation).—This line item provides for expenses incurred for the Senate to reimburse the Federal employees' com-

pensation account, pursuant to Public Law 96-499, approved December 5, 1980, for unemployment compensation payments made to Senate employees.

Conferences for the majority and minority.—The amount recommended provides for the expenses of the majority and minority conference committees.

Policy committees for the majority and minority.—The amount recommended provides for the expenses of the majority and minority policy committees.

Postage.—Provides for postage allowances for the President of the Senate, Secretary of the Majority, Secretary of the Minority, and Senate Chaplain.

Stationery.—Provides funds for stationery and office supplies for the President of the Senate, conference committees of the Senate, Office of the Chaplain, and the Senate Chamber.

Consultants—including agency contributions.—Provides authority for the appointment and payment of consultants to the majority and minority leaders, president pro tempore, president pro tempore emeritus, and the legislative counsel. The following summarizes the current authority and limitations:

Majority leader: Eight consultants at not to exceed the daily rate for maximum standing committee rate. All of the consultants may be appointed at an annual rate of compensation not to exceed the maximum annual rate for a standing committee.

Minority leader: Eight consultants at not to exceed the daily rate for maximum standing committee rate. All of the consultants may be appointed at an annual rate of compensation not to exceed the maximum annual rate for a standing committee.

Legislative counsel (subject to President Pro Tempore approval): Two consultants at not to exceed the daily rate for maximum standing committee rate. All of the consultants may be appointed at an annual rate of compensation not to exceed the maximum annual rate for a standing committee.

President Pro Tempore: Two consultants at not to exceed the daily rate for maximum standing committee rate. The consultants may be appointed at an annual rate of compensation not to exceed the maximum annual rate for a standing committee.

President Pro Tempore Emeritus: One consultant at not to exceed the daily rate for maximum standing committee rate. The consultants may be appointed at an annual rate of compensation not to exceed the maximum annual rate for a standing committee.

Senate National Security Working Group.—Provides funding for the Senate National Security Working Group, under the authority of Senate Resolution 75, agreed to March 25, 1999. The Senate National Security Working Group was formerly the Senate Arms Control Observer Group.

Committee on Appropriations.—Pursuant to Public Law 105-275 provides funding for administrative expenses for the Committee on Appropriations.

Senate Employees' Child Care Center—agency contributions.—Provides for the payment of agency contribution costs as authorized by Public Law 102-90, approved August 14, 1991, and Public Law 103-50, approved July 2, 1993, for employees of the Senate Employees Child Care Center.

Senate Employees' Child Care Center—training classes and conference costs.—Provides for the reimbursement of any individual employed by the Senate Employees' Child Care Center for the cost of training classes and conferences in connection with the provision of child care services and for travel, transportation, and subsistence expenses incurred in connection with the training classes and conferences, as authorized by Public Law 104-197, approved September 16, 1996.

Student Loan Repayment Program.—The Committee notes that in fiscal year 2003 the Senate will be entering the second year of a pilot of the student loan repayment program and will evaluate its future as part of the fiscal year 2004 budget cycle.

SENATORS' OFFICIAL PERSONNEL AND OFFICE EXPENSE ACCOUNT

Appropriations, 2002	\$270,494,000
Budget estimate, 2003	303,879,000
Committee recommendation	294,545,000

The Committee recommends an appropriation for fiscal year 2003 of \$294,545,000 for the Senators' Official Personnel and Office Expense Account.

This account funds salaries and benefits of Senators' staffs as well as the office expense

allowance for Senators' offices. These funds were formerly carried under several accounts including: "Administrative, clerical and legislative assistance to Senators;" "Agency contributions," under the heading "Salaries, officers and employees;" and "Official office expense allowances." Those separate appropriations were merged into this single account in Public Law 100-137.

The Senators' official personnel and office expense allowance [SOPOEA] is comprised of three components. Two of these are for salaries of personnel in Senators' offices. The allowance for administrative and clerical assistance is based on the population of States, beginning with States with a population of fewer than 5 million people to States with a population of 28 million or more. The table illustrates the allowances per population

category and the States which fall into those categories.

The second component of the salaries allowance is for legislative assistance to Senators, as authorized by Public Law 95-94. This allowance provides funding for three positions in each Senator's office at an annual rate of \$145,459 for a total of \$436,377 per office, or \$43,637,700 for all 100 Senators.

The third component of the SOPOEA is for office expenses. Each Senator's office is allocated an amount for office expenses, as displayed in the following table, including the Committee on Rules and Administration's reallocations of the official mail. In addition, an amount of \$200,000 is provided to cover additional expenses that may be incurred in the event of the death or resignation of a Senator, and to provide for transi-

tional expenses during election years subject to regulations set by the Committee on Rules and Administration with respect to official mail.

It should be noted that the amounts provided for the various components of the SOPOEA are entirely fungible. Amounts provided for salaries may be used for expenses, and vice versa, subject to regulations set by the Committee on Rules and Administration with respect to official mail. It should also be noted that the figures in the following table are preliminary, and that official notification of member budgets is issued by the Financial Clerk of the Senate after final passage of this bill.

The following table illustrates the several components of the SOPOEA.

SENATOR'S OFFICIAL PERSONNEL AND OFFICE EXPENSE ALLOWANCE—FISCAL YEAR 2003

State	Admin. & cler. assist. allowance 10/1/2002	Legislative assist. allowance 10/1/2002	O.O.E.A. allowance 10/1/2002	Total allowance 10/1/2002
Alabama	\$1,568,333	\$436,377	\$184,725	\$2,189,435
Alaska	1,568,333	436,377	253,398	2,258,108
Arizona	1,623,297	436,377	202,086	2,261,760
Arkansas	1,568,333	436,377	169,662	2,174,372
California	2,669,720	436,377	468,377	3,574,474
Colorado	1,568,333	436,377	190,990	2,195,700
Connecticut	1,568,333	436,377	161,586	2,166,296
Delaware	1,568,333	436,377	128,525	2,133,235
Florida	2,227,928	436,377	309,366	2,973,671
Georgia	1,788,197	436,377	217,935	2,442,509
Hawaii	1,568,333	436,377	280,511	2,285,221
Idaho	1,568,333	436,377	165,280	2,169,990
Illinois	2,008,061	436,377	267,158	2,711,596
Indiana	1,678,265	436,377	196,938	2,311,580
Iowa	1,568,333	436,377	172,052	2,176,762
Kansas	1,568,333	436,377	169,620	2,174,330
Kentucky	1,568,333	436,377	178,678	2,183,588
Louisiana	1,568,333	436,377	187,300	2,192,010
Maine	1,568,333	436,377	148,923	2,153,633
Maryland	1,623,297	436,377	172,709	2,232,383
Massachusetts	1,678,265	436,377	196,800	2,311,442
Michigan	1,843,161	436,377	237,130	2,516,668
Minnesota	1,568,333	436,377	189,323	2,194,033
Mississippi	1,568,333	436,377	170,417	2,175,127
Missouri	1,623,297	436,377	199,235	2,258,927
Montana	1,568,333	436,377	162,918	2,167,628
Nebraska	1,568,333	436,377	161,413	2,166,123
Nevada	1,568,333	436,377	174,344	2,179,054
New Hampshire	1,788,197	436,377	143,596	2,148,306
New Jersey	1,568,333	436,377	207,679	2,432,253
New Mexico	1,568,333	436,377	167,556	2,172,266
New York	2,353,224	436,377	323,996	3,113,597
North Carolina	1,788,197	436,377	217,694	2,442,268
North Dakota	1,568,333	436,377	150,614	2,155,324
Ohio	1,953,096	436,377	258,199	2,647,672
Oklahoma	1,568,333	436,377	181,862	2,186,572
Oregon	1,568,333	436,377	190,883	2,195,593
Pennsylvania	2,008,061	436,377	265,654	2,710,092
Rhode Island	1,568,333	436,377	139,314	2,144,024
South Carolina	1,568,333	436,377	174,653	2,179,363
South Dakota	1,568,333	436,377	152,480	2,157,190
Tennessee	1,623,297	436,377	195,614	2,255,288
Texas	2,423,558	436,377	361,087	3,221,022
Utah	1,568,333	436,377	170,610	2,175,320
Vermont	1,568,333	436,377	137,310	2,142,020
Virginia	1,733,230	436,377	196,082	2,365,689
Washington	1,623,297	436,377	215,816	2,275,490
West Virginia	1,568,333	436,377	149,269	2,153,979
Wisconsin	1,623,297	436,377	193,061	2,252,735
Wyoming	1,568,333	436,377	153,825	2,158,535
Total	84,730,932 × 2	21,818,850 × 2	10,064,471 × 2	116,614,253 × 2
Grand Total	169,461,864	43,637,700	20,128,942	233,228,506

According to the most recent employment data compiled by the Secretary of the Senate, as of April 30, 2002, there were 4,121 individuals employed in Senators' offices throughout the United States and covered by this appropriation.

U.S. Senators' staff as of September 30, 1993–2001 and April 30, 2002

Year	Number of Staff
1993	4,262
1994	4,142
1995	4,112
1996	3,959
1997	4,044
1998	4,022
1999	4,039
2000	4,072
2001	3,964
2002	4,121

In addition to providing funds for compensation of employees within Senators' offices, this appropriation also provides for agency contributions for those employees; that is, the Senate's share, as an employer, of the various employee benefit programs for which Senate employees are eligible. These payments are mandatory, and fluctuate according to the programs in which employees are enrolled, the level of compensation, and the degree of participation. Budget requests for this account prepared by the Financial Clerk must be based on both experience and evaluation of trends. The fiscal year 2003 request for this account anticipates \$68,739,000 in agency contribution costs.

The amount recommended by the Committee for the SOPOEA is less than would be required to cover all obligations that could

be incurred under the authorized allowances for all Senators. The Committee is able to recommend an appropriation of a lesser amount than potentially necessary because Senators typically do not obligate funds up to the absolute ceiling of their respective allowances. In fact, a number of offices spend less than their total allowances. Evidence of this can be found in the semiannual report of the Secretary of the Senate. At the direction of this Committee in the Fiscal Year 1996 Legislative Branch Appropriations Act, the Secretary's report now includes summary information on each Senator's authorized allowance, expenditures made, and the balance, if any.

In the alternative, the Committee could recommend an appropriation to fund fully

the sum total of all the authorized allowances. For fiscal year 2003, that would mean an appropriation of \$303,879,000, \$9,334,000 more than that recommended.

The Committee expects that all offices are complying with long-standing rules regarding the Senate employees transit subsidy.

SENATE OFFICIAL MAIL COSTS

Appropriations, 2002	\$300,000
Budget estimate, 2003	300,000
Committee recommendation	300,000

For the official mail costs of the Senate, the Committee recommends an appropriation of \$300,000, which is the same as the budget request.

ADMINISTRATIVE PROVISIONS

SEC. 1. This provision amends the authorization for expense allowances for leadership offices.

SEC. 2. This provision amends the authorization for the stationery allowance for the office of the president of the Senate.

SEC. 3. This provision increases by \$50,000 the allowance for administrative and clerical assistance.

SEC. 4. This provision authorizes the Majority Policy Committee, Minority Policy Committee, Conference of the Majority, and Conference of the Minority to use the services of personnel of government departments or agencies, with the prior approval of such department or agency and the Committee on Rules and Administration.

SEC. 5. This provision authorizes a public safety exception to the Government inscriptions requirement on mobile Senate offices.

SEC. 6. This provision authorizes multi-year contracting authority for the Secretary of the Senate and Sergeant at Arms, subject to the approval of the Rules Committee.

SEC. 7. This provision relates to consultant positions for leadership offices.

JOINT ITEMS

JOINT ECONOMIC COMMITTEE

Appropriations, 2002	\$3,424,000
Budget estimate, 2003	3,658,000
Committee recommendation	3,658,000

The Committee recommends an appropriation of \$3,658,000 for the Joint Economic Committee. This is an increase of \$234,000 over the enacted level needed for cost-of-living increases and one additional position.

JOINT COMMITTEE ON TAXATION

Appropriations, 2002	\$6,733,000
Budget estimate, 2003	7,323,000
Committee recommendation	7,323,000

The Committee recommends an appropriation of \$7,323,000 for salaries and expenses of the Joint Committee on Taxation. This is an increase of \$590,000 over the enacted level primarily to accommodate cost-of-living increases.

OFFICE OF THE ATTENDING PHYSICIAN

Appropriations, 2002	\$1,865,000
Budget estimate, 2003	1,947,000
Committee recommendation	3,000,000

The Committee recommends an appropriation of \$3,000,000 for the Office of the Attending Physician. The Office was first established by House Resolution 253, adopted December 5, 1928. The increase of \$1,053,000 over the request level will provide for an additional medical officer/physician, and will accommodate higher equipment costs. It will also provide for an increase in the allowances for the attending physician and medical officers, the first adjustment in the allowances since 1988. The bill provides authority of \$300,000 to remain available until expended.

CAPITOL GUIDE AND SPECIAL SERVICES OFFICE

Appropriations, 2002	¹ \$2,862,000
Budget estimate, 2003	3,035,000
Committee recommendation	3,035,000

¹Includes \$350,000 in emergency response funds (Public Law 107-117).

The Committee recommends an appropriation of \$3,035,000 for the Capitol Guide and Special Services Office. This provides for 70 FTEs, as currently authorized.

STATEMENTS OF APPROPRIATIONS

Appropriations, 2002	\$30,000
Budget estimate, 2003	30,000
Committee recommendation	30,000

The Committee recommends \$30,000 for the preparation of detailed statements of appropriations as required by law. This account is used as payment for the preparation of the volumes, "Statements on Appropriations," for the second session of the 107th Congress. These volumes show annual appropriations made, indefinite appropriations, and contracts authorized, along with a chronological history of regular appropriations bills. The volumes are compiled jointly by the Senate and House Committees on Appropriations pursuant to a directive in the Legislative Appropriations Act of June 7, 1924.

CAPITOL POLICE

	Recommended
Salaries	\$175,675,000
Expenses	28,100,000
Total, Capitol Police	203,775,000

The Committee recommends \$203,775,000, an increase of \$30,485,000 above the enacted level, for the U.S. Capitol Police. Significant increases are provided to increase the size of the force, increase pay, improve training, and fund new programs aimed at recruitment and retention.

GAO reporting requirement.—The Fiscal Year 2001 Legislative Branch Appropriations Act required GAO to participate in the selection of a Chief Administrative Officer (CAO) for the USCP and monitor the implementation of management improvements in budgeting, financial management, information technology, and human resources. The law required GAO to provide quarterly reports to the Chief of the Capitol Police, Capitol Police Board, and congressional appropriations and oversight committees having jurisdiction over the Capitol Police, through September 30, 2002 on USCP's implementation efforts. Much progress has been made by the CAO to improve overall administrative operations of the Capitol Police. However, there are still some significant deficiencies, including the need for the USCP to update its strategic plan to reflect post-September 11, 2001 changes, and implement an effective administrative management strategy in the agency, particularly with respect to its human resources. Therefore, the Committee direct GAO to continue monitoring the human resource management function of the Capitol Police and provide semi-annual reports to the Capitol Police entities and Committees on Appropriations on progress being made by the USCP toward developing and implementing an effective human resource management strategy. These reports should continue through fiscal year 2004.

Review of salary, benefits, and working conditions.—The Committee urge the Capitol Police Board to conduct a review of Capitol Police salary, benefits, and working conditions and recommend any modifications which the board considers likely to improve the ability of the U.S. Capitol Police to recruit and retain officers. The review should incorporate an examination of retirement benefits of

federalized members of the Capitol Police force, including a comparison to the Sky Marshals from the Transportation Security Agency, Federal Bureau of Investigation agents, the National Park Police officers, members of the uniformed division of the Secret service, and other Federal law enforcement officers. The Committee has been informed that the various Federal law enforcement agencies all receive comparable retirement benefits. It is the intent of this Committee that the Capitol Police should continue to receive retirement benefits on terms at least as generous as those of other Federal law enforcement agencies.

SALARIES

Appropriations, 2002	\$113,044,000
Budget estimate, 2003	184,526,000
Committee recommendation	175,675,000

The Committee recommends an appropriation of \$175,675,000 for the salaries of the U.S. Capitol Police (USCP). The increase of \$62,631,000 is needed primarily to increase staffing by 269 FTEs over the fiscal year 2002 approved level, for a total of 1,839 FTEs. Funding is included for cost of living pay increases, comparability pay increases to enhance competitiveness with other law enforcement agencies, and recruitment and retention incentives including the student loan repayment program. The pay raise is expected to total 9.1 percent. The reduction below the request reflects revised projections of pay costs associated with extraordinarily high attrition in fiscal year 2002.

The amount provided covers salaries, benefits, and overtime costs. Capitol Police personnel are also eligible for hazardous duty pay and comparability pay similar to locality pay adjustments granted other Federal law enforcement personnel in the Washington, DC, area.

The Committee has added new authority for the USCP to police the Botanic Garden, with an estimated staffing requirement of 29 FTE. The priority for postings remains coverage of 2 officers per door.

GENERAL EXPENSES

Appropriations, 2002	¹ \$44,146,000
Budget estimate, 2003	28,100,000
Committee recommendation	28,100,000

¹Includes \$31,000,000 in emergency response fund transfer (Public Law 107-38).

The Committee recommends the budget request of \$28,100,000 for general expenses of the Capitol Police. The amount recommended is needed primarily to support the significant increase in staffing as well as an increase in training. The difference from the request reflects re-estimates of cost projections and emerging needs. Expenses include office supplies and equipment, laundry and dry-cleaning, communications, motor vehicles, uniforms and equipment, investigations, training, and miscellaneous items.

ADMINISTRATIVE PROVISIONS

SEC. 1001. The Committee has included a routine provision which allows for funds to be transferred between the "Salaries" and "General expenses" accounts.

SEC. 1002. This provision authorizes the USCP to procure severable services in 1 fiscal year that carry into the next year. Executive Branch agencies received this authority under the Federal Acquisition Streamlining Act.

SEC. 1003. This provision authorizes the disposition of surplus or obsolete property of the Capitol Police.

SEC. 1004. This provision makes technical corrections to current law regarding USCP recruitment and relocation bonuses.

SEC. 1005. This provision authorizes USCP to recruit individuals without regard to age.

SEC. 1006. This provision makes technical corrections to Public Law 107-117 relative to retention allowances.

SEC. 1007. This provision relates to education assistance for employees of the Capitol Police.

SEC. 1008. In order to enhance recruitment efforts of the Capitol Police, the Committee has included a provision that allows the Capitol Police to appoint employees at a rate of pay at or above step one of the pay grade in which the employee is appointed.

SEC. 1009. This provision authorizes overtime compensation for officers and members at the rank of lieutenant or higher.

SEC. 1010. This provision authorizes training programs for employees of the Capitol Police.

SEC. 1011. This provision authorizes the Chief of the Capitol Police to provide, under certain circumstances, additional compensation for employees with specialty assignments and proficiencies.

SEC. 1012. The Committee has included a provision, effective as of September 11, 2001, that establishes the limits on premium pay on an annual rather than pay period basis during emergency periods.

SEC. 1013. *Merger of Capitol Police with Library of Congress Police.* Over a period of many years, three Legislative Branch police forces evolved on Capitol Hill: the U.S. Capitol Police, Library of Congress, and Government Printing Office. In fiscal year 2001, the Committee directed the General Accounting Office to undertake a review to determine the desirability and feasibility of consolidating these police forces into a single force under the control of the U.S. Capitol Police. After reviewing and fully considering the results of GAO's thorough analysis, the Committee has determined that there are significant benefits to be realized by combining the Library of Congress police force with the U.S. Capitol Police. A merger of this nature under a single, unified chain of command would enhance the overall security of Capitol Hill by facilitating better communication and coordination of police activities; providing centralized intelligence gathering, dissemination, and threat assessments; developing consistent responses to emergency situations or threats; allowing for flexibility in staffing officers; and providing additional training and equipment for all officers.

Given these benefits and the need for increased security on Capitol Hill following the September 11th and anthrax incidents of last year, the Committee is proposing legislation that would make effective a merger of the Library of Congress police force into the U.S. Capitol Police within 3 years. Many issues will need to be considered and addressed, such as benefits, pay, retirement, qualification requirements, security systems, and training, to effect this merger. The Committee believes that the Chief of Police will need a period of up to 3 years to develop and implement a plan to address these and other issues to merge the two police forces.

The Committee encourages USCP to plan to establish a separate Library Division of the USCP to address the specific security needs of the Library.

SEC. 1014. The Committee has included an administrative provision clarifying the authority of the USCP to police the Botanic Garden.

SEC. 1015. In the event of an emergency as determined by the Capitol Police Board or a concurrent resolution of Congress, authority is provided to the Chief of Police to appoint, as special officers, other Governmental law enforcement and, where appropriate, military personnel.

SEC. 1016. This section provides necessary authorities for the Chief of the Capitol Police to be the disbursing officer for the Capitol Police.

SEC. 1017. Requires promulgation of certain regulations within 60 days after enactment of this Act.

OFFICE OF COMPLIANCE SALARIES AND EXPENSES

Appropriations, 2002	\$2,059,000
Budget estimate, 2003	2,224,000
Committee recommendation	2,059,000

The Committee recommends an appropriation of \$2,059,000 for the salaries and expenses of the Office of Compliance, as authorized by section 305 of Public Law 104-1, the Congressional Accountability Act of 1996.

CONGRESSIONAL BUDGET OFFICE

SALARIES AND EXPENSES

Appropriations, 2002	\$30,780,000
----------------------------	--------------

Budget estimate, 2003	32,390,000
Committee recommendation	32,094,000

The Committee recommends an appropriation of \$32,094,000 for the Congressional Budget Office. The amount recommended represents an increase of \$1,321,000 over the enacted level to cover all mandatory and price level increases.

ADMINISTRATIVE PROVISIONS

SEC. 1101. This provision provides CBO authority that executive branch agencies have to establish an educational program to enhance the abilities and effectiveness of CBO employees through study or work experiences.

SEC. 1102. This provision reinstates an exemption from an obsolete procurement statute which effectively prohibits modern acquisition methods.

ARCHITECT OF THE CAPITOL

The Committee has recommended a funding level of \$334,474,000 and an FTE level of 1,466 for all activities of the Architect of the Capitol. Excluded are House items which are traditionally left for consideration by that body.

The requested authorized level of full-time equivalent positions of 1,477 has been reduced to 1,466, including 29 new FTEs. The annualization of the new positions in the fiscal year 2004 base will bring the total FTE authorization to 1,475. It is also noted that the FTE authorized level included under each appropriation accommodates temporary staff hired by the Construction Management Division for project related work.

The Architect of the Capitol is directed to observe closely limitations on full-time equivalent (FTE) positions. It is noted, however, that funding was provided for various projects with no commensurate increase in the FTE ceiling. Accordingly, the Committee provides relief from the FTE ceilings for delivery of those projects under the condition that the Committees on Appropriations are notified prior to the increase in the FTE ceiling.

The following table shows the request and the Committee recommendation:

Appropriation	Fiscal year		
	2002 appropriation	2003 request ¹	2003 recommendation
General administration	\$51,371,000	\$63,951,000	\$59,343,000
Capitol building	15,194,000	46,789,000	32,094,000
Capitol Grounds	6,009,000	7,711,000	8,356,000
Senate office buildings	42,126,000	55,103,000	64,871,000
Capitol Power Plant	52,583,000	143,603,000	102,286,000
Library buildings and grounds, structural and mechanical care	21,753,000	40,284,000	37,521,000
Capitol Police buildings and grounds			23,900,000
Emergency response funds (Public Law 107-38)	106,304,000		
Botanic Garden	5,646,000	5,661,000	6,103,000
Capitol visitor center	70,000,000		
Congressional Cemetery	1,250,000		
Total	372,236,000	363,102,000	334,474,000

¹ Reflects pending budget amendments totaling \$13,704,000.

FTEAC.—The Committee is pleased with the establishment of the Full-Time Equivalent Advisory Committee (FTEAC) in the Architect's office. The FTEAC is intended to provide a forum for the prioritization and alignment of positions within each appropriation and across the agency. The Architect is requested to keep the Committee advised on the progress of the FTEAC.

Working Reserves.—The Committee encourages the Architect to make better use of available working reserves. Therefore, the Architect is directed to establish accounts within each no-year and each multi-year appropriation under the Architect of the Capitol for the purpose of receipt of reallo-

gments of unobligated funds from completed projects. The funds will be used for contingency purposes as deemed necessary by the Architect with the approvals of the Committees on Appropriations of the House of Representatives and the Senate. Completion of each project should be certified by the project manager before transferring funds into the contingency account.

Window Replacement.—The Committee recommends an incremental approach for the window replacement project for blast and bullet resistance for which the Architect of the Capitol proposed \$11,400,000 in design dollars across four appropriations. The Committee recommends an amount of \$1,200,000

to develop prototypes before proceeding with this very costly project. In view of heightened security concerns and the need to maintain the Capitol's historical appearance, if approved this project will address security requirements and incorporate historical aesthetics.

Condition Assessments/Master Plan.—The Committee has provided an amount of \$500,000 in the Capitol buildings appropriation and an amount of \$1,100,000 in the Senate office buildings appropriation for condition assessments of the Capitol complex. The assessment will be conducted in tandem with the development of a master plan for the

Capitol complex, and will include the collection of relevant information regarding buildings, inspection and equipment testing of properties and assets, analysis and identification of deficiencies, identification of solutions and costs, a forecast of future renewal requirements, and the development of long-range comprehensive financial plans.

The Committee has established a new funding line, “Study, Design, and Condition Assessment,” within several appropriations to improve response time and flexibility in conducting studies, surveys, assessments, and designs. The Architect of the Capitol is to notify the Committees on Appropriations 21 days prior to moving forward with these projects.

GENERAL ADMINISTRATION		
Appropriations, 2002	\$51,371,000	
Budget estimate, 2003	63,951,000	
Committee recommendation	59,343,000	

The Committee recommends an appropriation of \$59,343,000 for general administration. The amount provided includes \$55,275,000 for the operating budget and \$4,068,000 for the capital budget, and will accommodate an FTE level of approximately 362 with additional positions targeted to project management and facilities support. Annualization of the additional FTEs in fiscal year 2004 will increase the FTE level to 367. A total of \$6,450,000 is made available until September 30, 2007. The Committee has deleted the travel limitations, but directs the Architect to

submit a semi-annual report on travel to the Committees.

The General Administration appropriation was established in fiscal year 2002 for the purpose of consolidating into a single appropriation the funding for salaries and related benefits of the Architect, officers, administrative and support staff, including engineering and architecture employees. Previously, the funding for these items was included in several jurisdictional appropriations under the Architect. This account also provides for administrative items such as agency-wide contractual services; surveys and studies; information technology; and electronics and safety engineering operations.

The following table displays the budget detail.

Item	Amount requested	Committee recommendation
FISCAL YEAR 2003 OPERATING BUDGET		
Personal Services	\$36,898,000	\$35,615,000
Rent, Communications, Utilities & Travel	3,599,000	1,279,000
Other Services	16,782,000	17,977,000
Supplies	254,000	254,000
Equipment	150,000	150,000
Subtotal, Operating Budget	57,683,000	55,275,000
FISCAL YEAR 2003 CAPITAL BUDGET		
Implementation of Safety Programs	450,000	450,000
Security Project Support for AOC	125,000	125,000
Financial Management System (FMS)	1,627,000	1,627,000
Implementation of AOCNET	500,000	500,000
Computer-Aided Facility Management (CAFM)	1,366,000	1,366,000
Study, Master Schematic Plan for Fort Meade	200,000
Study, Conduct Energy Survey of Capitol Complex	2,000,000
Subtotal, Capital Budget	6,268,000	4,068,000
Total, General Administration	63,951,000	59,343,000

Personnel Support System.—The Committee supports and has provided an amount of \$1,041,000 for a new personnel system within the total increase of \$2,781,000 for information resources. This funding is intended for the Architect to automate its processes and procedures related to recruitment, position classification, and workforce management. However, based on problems encountered by the Library of Congress in implementing a similar system, the Committee recommends the Architect closely monitor the implementation to ensure problems and delays are minimized, and keep the Committee apprised of its progress.

Financial Management.—The Committee notes the significant accomplishments made by the Architect in the successful implementation of its new financial management system. The AOC financial management organization warrants confidence towards continued progress and the preparation of auditable financial statements at the end of fiscal year 2003. Funding in the amount of \$350,000 is being provided to build the policies and procedures to ensure the internal control mechanisms are in place to support this effort as well as improved budget documentation.

Worker Safety.—The Committee continues to place a high priority on improving worker safety within the Architect of the Capitol operations. While significant improvements have been made in the last year to reduce the worker injury rate, there is more to be done. The Committee expects AOC to be developing and integrating a management

process, the benefit of which is that safety becomes an integral operating discipline and overall workplace safety injuries are reduced. The Architect is directed to continue its efforts using outside expertise where necessary to provide management assistance, training, audits, and assistance in safety program implementation. The AOC will keep the Committee informed of the progress of this program.

Recycling.—The Committee is encouraged by progress in the AOC’s recycling program. The Committee directs the Architect to implement and expand the recommendations of the best practices review and develop a pilot project to address electronic equipment waste recycling (not to exceed \$500,000). The Committee expects the Architect to provide quarterly reports on the recycling program, including the pilot electronic waste initiative.

Golden Dollar “Sacagawea Coin”.—The Committee supports the circulation of the Golden Dollar (Sacagawea) coin. However, the Committee notes with disappointment that several gift shops and restaurant facilities in the U.S. Capitol still do not distribute the coin nearly 2 years after its introduction. The Committee urges the Architect of the Capitol and the Secretary of the Senate to require the use of the coin in the cash drawers of restaurant facilities and gift shops in the U.S. Capitol complex.

CAPITOL BUILDING

Appropriations, 2002	¹ \$15,194,000
Budget estimate, 2003	46,789,000

Committee recommendation

32,094,000

¹ Does not reflect \$106,304,000 by transfer in emergency response funds (Public Law 107-38).

The Committee recommends an appropriation of \$32,094,000 for necessary expenses for the maintenance, care and operation of the Capitol. Of this, \$19,065,000 is available until September 30, 2007. The amount provided includes \$10,886,000 for the operating budget and \$21,208,000 for the capital budget. The recommendation is \$14,695,000 below the request owing to the deletion of Capitol Police items from this account and the creation of a new account for USCP items. The FTE authorized level is 171, including any temporary construction staff assigned to Capitol projects. The ceiling includes 4 new full-time equivalent positions that will be annualized to 5 in the fiscal year 2004 base to increase the authorized level to 172 FTEs.

The Committee’s recommendation includes \$12,000,000 for the upgrade of the air conditioning system for the East Front of the Capitol, which was completed approximately 40 years ago. The amount provided is \$2,400,000 more than the original request owing to a revised estimate based on 100 percent design of the project. The recommendation includes \$2,000,000 for replacing the high voltage switch gear and cables that accelerates out-year plans in order to link this effort to construction contracts with the Capitol Visitor Center.

The following table displays the budget detail.

Item	Amount requested	Committee recommendation
FISCAL YEAR 2003 OPERATING BUDGET		
Personal Services	\$7,796,000	\$8,021,000
Other Services	2,216,000	2,216,000
Supplies	483,000	483,000
Equipment	166,000	166,000

Item	Amount re- quested	Committee rec- ommendation
Subtotal, Operating Budget	10,661,000	10,886,000
FISCAL YEAR 2003 CAPITAL BUDGET		
ADA Requirements	75,000	75,000
Replacement of Minton Tile	385,000	200,000
Roofing Repair, Around House & Senate Chambers	160,000	160,000
Elevator/Escalator Modernization Program, CB	500,000	500,000
Door Refinishing/Restoration	289,000	289,000
Chandelier Restoration and Crystal/Globe Replacement	319,000	319,000
Conservation of Wall Paintings	300,000	300,000
Design, Provide Emergency Electrical Service, CB	125,000
Off-Site Delivery/Screening Center, USCP	22,000,000
Design, Replace Windows, Capitol	600,000
Design, Renovate Outside Air Intake Tunnels	400,000
Replace High Voltage SWGR & Cables, Capitol	1,000,000	2,000,000
Upgrade Air Conditioning—East Front, Capitol	9,600,000	12,000,000
Study, Historic Structure Report	75,000
Study, Design and Condition Assessment	5,065,000
Computer, Telecom, & Electrical Support	300,000	300,000
Subtotal, Capital Budget	36,128,000	21,208,000
Total, Capitol Buildings	46,789,000	32,094,000

CAPITOL GROUNDS

Appropriations, 2002	\$6,009,000
Budget estimate, 2003	7,711,000
Committee recommendation	8,356,000

The Committee recommends an appropriation of \$8,356,000 for Capitol Grounds for the care and improvements of the grounds surrounding the Capitol, the Senate and House office buildings, and the Capitol Power Plant. The recommendation includes

\$6,041,000 in operating funds and \$2,315,000 for the capital budget, of which \$1,780,000 is to remain available until September 30, 2007.

The amount recommended is \$2,347,000 above the fiscal year 2002 enacted level and \$645,000 above the budget request. The FTE authorized level will remain at 69, including any temporary construction staff assigned to projects.

The recommendation adjusts the operating budget to reflect past obligation trends and grounds requirements which resulted in re-

ductions to exterior pointing and caulking, miscellaneous improvements, and performances on the Capitol grounds, while providing additional funds for general annual repairs, training, and bulk waste disposal. The Committee is not recommending the requested amount of \$60,000 for sidewalk replacement given the ongoing construction across the Capitol complex.

The following table displays the budget detail.

Item	Amount re- quested	Committee rec- ommendation
FISCAL YEAR 2003 OPERATING BUDGET		
Personal Services	\$4,260,000	\$4,253,000
Other Services	1,218,000	1,200,000
Supplies	528,000	528,000
Equipment	60,000	60,000
Subtotal, Operating Budget	6,066,000	6,041,000
FISCAL YEAR 2003 CAPITAL BUDGET		
Replace Truck	80,000	80,000
Wayfinding and ADA-Compliant Signage, CG	425,000	430,000
Sidewalk Replacement	60,000
Maintenance of Outdoor Sculpture: Garfield and Peace	20,000	25,000
Design, Replace, Automate and Expand Irrigation System	80,000
Design, Street and Sidewalk Infrastructure Improvements	250,000
Study, Design and Condition Assessment	580,000
Power Requirements	730,000	1,200,000
Subtotal, Capital Budget	1,645,000	2,315,000
Total, Capitol Grounds	7,711,000	8,356,000

SENATE OFFICE BUILDINGS

Appropriations, 2002	\$42,126,000
Budget estimate, 2003	55,103,000
Committee recommendation	64,871,000

The Committee recommends an appropriation of \$64,871,000 for maintenance of the Senate office buildings. The appropriation includes \$43,163,000 for the operating budget and \$21,708,000 for the capital budget, of

which \$21,600,000 shall remain available until September 30, 2007.

The recommendation is \$22,745,000 above the enacted level for fiscal year 2002 and \$9,768,000 above the budget request, primarily due to the replenishment of fiscal year 2002 reprogrammed funds for higher priority and immediate requirements. The FTE authorized level is 555 FTEs, including any temporary construction staff assigned to Senate projects. The recommendation includes 4 new full-time equivalent positions that will

be annualized to 5 in the fiscal year 2004 base to increase the ceiling to 556 FTEs.

The Committee, after reviewing the financial statements of the Senate restaurants, recommends a funding level of \$1,095,000 which is above the requested amount to meet financial obligations. Additionally, the Committee has added \$30,000 to support the combined waste recycling program.

The following table displays the budget detail.

Item	Amount re- quested	Committee rec- ommendation
FISCAL YEAR 2003 OPERATING BUDGET

CAPITOL POWER PLANT

Appropriations, 2002	\$52,583,000
Budget estimate, 2003	143,603,000
Committee recommenda- tion	102,286,000

The Committee recommends an appropriation of \$102,286,000 for the operations of the Capitol Power Plant. This is supplemented by \$4,400,000 in reimbursements. Of the amount provided, \$61,739,000 shall remain available until September 30, 2007. The recommendation includes \$39,967,000 for the operating budget and \$62,319,000 for the capital budget.

The FTE authorized level will remain at 94, including any temporary construction staff assigned to projects.

The Power Plant provides heat, light, power, and air-conditioning for the Capitol, Senate and House office buildings, and the Library of Congress buildings; heat, light, and power for the Botanic Garden and the Senate and House Garages; light for the Capitol Grounds' street, park, and floodlighting system; steam heat for the Government Printing Office and Washington City Post Office, also known as Postal Square; and steam heat and air-conditioning for the Union Station complex, Folger Shakespeare Library, the Thurgood Marshall Federal Judiciary

Building, and the U.S. Supreme Court Building on a reimbursable basis.

The recommended budget would increase by \$49,703,000 over the enacted level primarily owing to three major capital projects. The amount recommended includes \$41,000,000 for the expansion of the west refrigeration plant which is critically needed due to the aging equipment in the east refrigeration plant which will be de-commisioned when the west refrigeration plant is expanded, and the need for additional capacity. Without this project, the Capitol complex would be facing a critical shortfall in chilled water capacity and the plant would not have the ability to serve the campus with reliable chilled water. Also, the east refrigeration plant uses R-12 refrigerant, an ozone depleting substance which will be banned from use in the near future. The recommended funding is for the construction of the extension and installation of three chillers with supporting auxiliaries. These funds are made available until September 30, 2007.

In addition, the capital budget includes \$10,289,000 for the repair of the South Capitol Street steam line which has deteriorated and must be rebuilt to provide a safe, reliable tunnel for steam; and \$8,500,000 for the repair of the Constitution Avenue tunnel in order

to correct life safety deficiencies. These funds are also made available until September 30, 2007.

Within the operating budget, approximately 90 percent of the recommended amount is for the purchase of electricity from the local private utility, payment to the government of the District of Columbia for the provision of water and sewer services, and the procurement of boiler fuel, as displayed in the following table.

Fiscal year 2003 estimated utility costs

Purchase of electrical en- ergy	\$23,350,000
Purchase of natural gas	4,500,000
Purchase of steam	434,000
Purchase of chilled water ..	380,000
Purchase of coal	2,550,000
Purchase of oil	1,707,000
Water and sewer payments	3,200,000

Total 36,121,000

The balance of this appropriation supports a work force to operate and maintain the Power Plant.

The following table displays the budget detail.

	Item	Amount re- quested	Committee rec- ommendation
FISCAL YEAR 2003 OPERATING BUDGET			
Personal Services		\$6,076,000	\$6,057,000

LIBRARY BUILDINGS AND GROUNDS

Appropriations, 2002	\$21,753,000
Budget estimate, 2003	40,284,000
Committee recommenda- tion	37,521,000

The Committee recommends an appropriation of \$37,521,000 for the care and maintenance of the Library buildings and grounds by the Architect of the Capitol, of which \$5,500,000 shall remain available until expended and \$18,614,000 shall remain available until September 30, 2007. The recommenda-

tion includes \$11,754,000 for the operating budget and \$25,767,000 for the capital budget, including \$5,500,000 for the Audio-Visual Conservation Center, the final installation of funding for this project.

The following table displays the budget detail.

Subtotal, Capital Budget	¹ 28,567,000	25,767,000
Total, Library Buildings and Grounds	40,284,000	37,521,000

¹ Includes pending Budget Amendment totaling \$13,404,000.

The recommendation is \$15,768,000 above the enacted amount for fiscal year 2002 and \$2,763,000 below the budget request, including the pending budget amendment. The FTE ceiling is 153, including any temporary construction staff assigned to projects. The ceiling includes 3 new full-time equivalent positions that will be annualized to 4 in the fiscal year 2004 base and will increase the ceiling to 154 FTEs.

The Committee's recommendation provides significant increases in the funding for capital projects at the Library of Congress to include additional sprinklers for the Madison Building, roof repairs for the east parking lot, Jefferson Building elevator modernization, air conditioning for the NW curtain, a study and design for a copyright deposit facility, and the design of book storage modules #3 and #4 at Fort Meade. The amount provided also includes \$9,566,000 for the design and construction of book storage Module #2 at Fort Meade. The Committee expects this high-priority project will be completed as expeditiously as possible. Given the significant increase, the Architect needs to continue to expand on services that can be provided by other Government agencies.

CAPITOL POLICE BUILDINGS AND GROUNDS

Appropriations, 2002	\$5,646,000
Budget estimate, 2003	5,661,000
Committee recommenda- tion	\$23,900,000

The Committee has created a new appropriation account for Capitol Police Buildings and Grounds. The amount recommended,

\$23,900,000, includes \$22,000,000 for an off-site delivery facility for the USCP; \$1,500,000 in design funding for a tactical training facility; and \$400,000 for lease of a vehicle maintenance facility.

The Committee considers a new off-site delivery facility to be a high priority need, and the Committee fully expects the study to be completed in early fiscal year 2003.

USCP master plan.—The Committee is disappointed about the slow progress of the AOC and USCP in developing a comprehensive master plan for the Capitol Police. The Committee recognizes that the Capitol Police have additional space requirements owing to significant deficiencies in existing space, new training requirements, a growing force, and an enhanced security posture. While requirements and an operational scenario have been identified, the AOC and USCP have failed to provide a comprehensive plan to address these needs. The Committee directs AOC and USCP to provide the comprehensive plan including identification of specific properties which will best meet the needs within 15 days of enactment of this Act. The plan should also include a delineation of priorities, cost estimates, and a full explanation of the recommendations.

BOTANIC GARDEN

Appropriations, 2002	\$5,646,000
Budget estimate, 2003	5,661,000
Committee recommenda- tion	6,103,000

The Committee recommends \$6,103,000 for salaries and expenses of the Botanic Garden.

This includes \$4,646,000 in the operating budget and \$1,457,000 in the capital budget, of which \$120,000 is to remain available until September 30, 2007.

The recommendation is \$457,000 above the fiscal year 2002 enacted level and \$442,000 above the budget request, including the pending budget amendment. The FTE authorized level is 55, including any temporary construction staff assigned to projects. The recommendation includes 4 new full-time equivalent positions that will be annualized to 5 in the fiscal year 2004 base to increase the ceiling to 56 FTEs.

The Committee is pleased with the enthusiastic response by the public to the Botanic Garden and the newly established outreach program. The Committee is providing \$300,000 as requested in a pending budget amendment to expand partnership and educational opportunities such as with the Missouri Botanical Garden.

The Committee recognizes that the garden is in the early stages of the new operation and further resources are required. In this respect the recommendation provides additional funds for general annual repairs including improved locks, shade curtain repair, and vestibule modifications; as well as increased custodial and mowing services. The Committee's recommendation supports the capital improvements for interpretive illustrations in the conservatory garden court, and exhibits, banners and audio tours for the west gallery of the Conservatory.

Item	Amount re- quested	Committee rec- ommendation
FISCAL YEAR 2003 OPERATING BUDGET

ADMINISTRATIVE PROVISIONS

SEC. 1201. This provision was carried last year and permanently increases the limitation on small purchases and contracts under simplified acquisition procedures.

SEC. 1202. *Streamlined Acquisitioning.* This section provides authority to the Architect of the Capitol to enter into multiyear contracts to the same extent as executive agencies.

SEC. 1203–1206. *AOC Restructuring.* The Architect of the Capitol (AOC) faces many complex challenges that have been exacerbated by the events of September 11, 2001 and the

Anthrax incidents on Capitol Hill. The Committee commends the Architect and the dedicated employees of the AOC for their tireless, professional services during these times of crisis. The Architect and his employees responded to the fullest in meeting the uncertainties and challenges facing Capitol Hill and deserve the recognition, gratitude, and commendation of the Congress, staff and the many American citizens they serve. In this context and growing out of the many challenges currently facing the AOC, the Committee has noted a need to strengthen AOC's management capabilities to address effectively its principal focus areas, including improving the agency's strategic direction and business programs, processes, and systems; attracting, developing, and retaining a diverse and capable workforce; improving overall facilities management of the national treasures under its jurisdiction; and improving project management capabilities to address an ever growing number of critical capital projects.

To this end, the Committee has included language which establishes a Deputy Architect position, who would also act as the Chief Operating Officer and would be responsible for long-term strategic planning as well as developing annual performance plans covering each of the general goals and objectives in the strategic plan. This individual should have skills in strategic planning, performance management, strategic human capital management, worker safety, customer satisfaction, and service quality. This individual would also be responsible for proposing organizational changes (including new positions) needed to carry out the Office of the Architect of the Capitol's mission and strategic and annual performance goals.

The AOC is directed to consult with and seek advice from the Comptroller General or his designee in the selection of the Deputy Architect. The Deputy Architect is directed to seek consultation and advice from the Comptroller General in performing the responsibilities under this section.

The bill also requires the Architect and Deputy Architect to enter into an annual performance agreement that sets forth measurable individual goals linked to the organizational goals in the AOC's annual performance plan for the Deputy Architect in key operational areas. The agreement shall be subject to review and renegotiation on an annual basis and a copy of the agreement shall be provided to the relevant Committees of the House and Senate. In addition, the Deputy Architect is to submit to the Architect and the relevant Committees in the House and Senate an annual performance report. This report shall contain an evaluation of the extent to which the AOC met the goals and objectives identified in the annual performance plan for the preceding year and an explanation of the results achieved during the preceding year relative to the established goals. This report shall also include the evaluation rating of the performance of the Deputy Architect including the amounts of bonus compensation awarded to the Deputy.

SEC. 1207. This section clarifies a provision carried in section 4 of the Legislative Branch Appropriations Act of 2001.

SEC. 1208. The bill includes a provision that updates the 1922 description of the division of labor between the Architect of the Capitol and the Librarian of Congress with respect to Library buildings and grounds, and, to provide flexibility in accomplishing necessary work, authorizes the agencies to re-allocate facilities projects between themselves and to transfer project funding (appropriations, gift and/or trust funds). The Committee directs the Architect and the Librarian to enter into a memorandum of understanding that sets forth their mutual understanding of the scope of work that may be transferred between them, the conditions under which work and funds will be transferred, and the process for managing such projects. The memorandum shall be established by March 31, 2003, and shall include a process for expediting relocation of floor-to-ceiling partitions in Library buildings and related painting and electrical work.

standing that sets forth their mutual understanding of the scope of work that may be transferred between them, the conditions under which work and funds will be transferred, and the process for managing such projects. The memorandum shall be established by March 31, 2003, and shall include a process for expediting relocation of floor-to-ceiling partitions in Library buildings and related painting and electrical work.

LIBRARY OF CONGRESS

SALARIES AND EXPENSES

Appropriations, 2002: ¹	
Salaries and expenses	\$336,307,000
Authority to spend receipts	- 6,850,000
Net, salaries and expenses	329,457,000

Budget estimate, 2003:	
Salaries and expenses	357,121,000
Authority to spend receipts	- 6,850,000
Net, salaries and expenses	350,271,000

Committee recommendation:	
Salaries and expenses	358,474,000
Authority to spend receipts	- 6,850,000
Net, salaries and expenses	351,624,000

¹Includes \$29,615,000 by transfer from emergency response fund (Public Law 107-38).

The Committee recommends an appropriation of \$358,474,000 for salaries and expenses of the Library of Congress and approves authority to spend receipts of \$6,850,000 in fiscal year 2003. This is \$1,353,000 above the request and \$22,167,000 above the enacted level.

The Committee recommends:

- an additional \$4,000,000 for the last year of the Joining Hands Across America program;
- the transfer of \$6,836,000 for furniture and furnishings, owing to the discontinuation of that account so there may be a more accurate accounting of program costs;
- a reduction of \$3,918,000 from personnel costs, reflecting a more accurate projection of the cost of new positions;
- a reduction of \$1,174,000 to reflect revised CSRS contribution cost projections;
- an additional \$882,000 for the Integrated Library System project;
- an additional \$1,000,000 for the central financial management system;
- \$500,000 for activities related to the Louisiana Purchase Bicentennial celebration;
- an additional \$200,000 for the Lewis and Clark Bicentennial exhibition. These funds will go to Southern Illinois University to develop a permanent commemoration of the Lewis and Clark expedition and its time in Illinois, including an exhibit to be located in Cairo, Illinois and digitization of documents and records relating to the expedition. Funds will be transferred upon Library of Congress approval of a project description submitted by the University;
- an additional \$527,000 for police pay raises; and
- \$2,500,000 for new shelving at the Culpeper storage facility.

The Committee has not included \$5,000,000 for the purchase of library materials.

The Committee fully supports the Veterans History project (\$476,000) and has included funding for outreach with the States. The bill includes language providing \$989,000

to support the Lewis and Clark Bicentennial exhibition.

Mail costs.—The Committee is concerned with the cost of new mail and package handling protocols which have resulted from the bioterrorism events last fall. While the Committee fully supports all means necessary to ensure the safety of mail and packages, the Committee directs the Library to continue to seek the most cost-effective means of doing so.

Retail operations.—The Committee continues to be interested in the concept of generating revenue for certain needs of the Library through retail ventures. According to the General Accounting Office, the Library needs to develop fundamental policies, procedures and plans for developing its retail operations. The Committee directs the Library to develop a plan to achieve its goal of generating profits from its retail activities, including a determination of the range of products that potentially could be sold, whether such retail activities would sell products at no profit or even at a loss for purposes of promoting certain Library events or activities, and if greater emphasis should be placed on the most profitable products or expanding product lines and markets. The Library, as part of this effort, needs to prepare basic business plans for its current and future retail operations, develop accounting procedures to collect and analyze cost and profitability information for the retail activities, and conduct marketing studies to identify markets and products to help achieve its retail goals. The Committee expects to receive a report on these activities prior to hearings on the fiscal year 2004 budget request.

COPYRIGHT OFFICE

SALARIES AND EXPENSES

Appropriations, 2002:	
Salaries and expenses	\$40,896,000
Authority to spend receipts	- 27,864,000
Net, salaries and expenses	13,032,000

Budget estimate, 2003:	
Salaries and expenses	44,321,000
Authority to spend receipts	- 29,527,000
Net, salaries and expenses	14,794,000

Committee recommendation:	
Salaries and expenses	39,226,000
Authority to spend receipts	29,512,000
Net, salaries and expenses	9,714,000

The Committee recommends the direct appropriation of \$9,714,000 for the Copyright Office and approves authority to spend receipts of \$29,512,000 in fiscal year 2003, for a total of \$39,226,000. The Committee's recommendation reflects the transfer of \$742,000 from the furniture and furnishings account, which has been discontinued, and a reduction of \$187,000 to reflect the CSRS agency rate reduction.

The Copyright Office received an additional \$7,500,000 from the Fiscal Year 2002 Supplemental (Public Law 107-206) to offset the loss of copyright registration receipts during fiscal year 2002. The fiscal year 2003 recommendation reflects a reduction in net appropriations of \$5,650,000 because the full funding was not required.

CONGRESSIONAL RESEARCH SERVICE
SALARIES AND EXPENSES
Appropriations, 2002

\$81,454,000

Budget estimate, 2003	87,646,000
Committee recommendation	86,952,000

The Committee recommends an appropriation of \$86,952,000 for the Congressional Research Service. The amount recommended is an increase of \$5,498,000 over the fiscal year 2002 level. Approximately \$4,362,000 of this increase is needed for mandatory cost-of-living and other pay and inflation-related increases. An additional \$711,000 is for new personnel in the areas of terrorism and homeland security, and aging issues. A total of \$425,000 is associated with the transfer from the furniture and furnishings account, which has been discontinued in an effort to better account for program costs throughout the Library. The decrease of \$694,000 below the request reflects a more accurate projection of salary costs associated with new personnel.

BOOKS FOR THE BLIND AND PHYSICALLY HANDICAPPED

SALARIES AND EXPENSES	
Appropriations, 2002	\$49,788,000
Budget estimate, 2003	51,020,000
Committee recommendation	50,963,000

The Committee recommends an appropriation of \$50,963,000 for salaries and expenses for Books for the Blind and Physically Handicapped. This is an increase of \$1,175,000 over the fiscal year 2002 level needed to accommodate mandatory pay and price level increases. The change from the budget request reflects the amended CSRS agency contribution.

This appropriation supports a National Reading Program for blind and physically handicapped citizens. Books and magazines in braille and various recorded formats are produced by the National Library Services for the Blind and Physically Handicapped for distribution through a network of State and locally supported libraries. At present, 57 regional libraries in 49 States, the District of Columbia, the Virgin Islands, Puerto Rico, and Guam house and circulate books and magazines to eligible readers. Seventy-nine subregional libraries in 17 States assist at the local public library level; 53 libraries and 4 cooperating agencies distribute sound reproducers. Two multistate centers, under contract to the National Library Service, store and distribute books and other materials in their geographical regions. The Librarian has estimated a readership of 750,000 individuals in fiscal year 2002.

The Committee has included bill language making available \$1,000,000 for the National Federation of the Blind NEWSLINE service to help defray the telecommunications costs associated with the dissemination of audio information (including newspapers) to eligible individuals when such information is distributed from a multi-state center with centralized reader registration and serving a minimum of 20 States. This is a one-time appropriation for this item.

ADMINISTRATIVE PROVISIONS

SECS. 1301–1302. The Committee has included two routine administrative provisions carried in prior years.

SEC. 1303. The Committee has included an administrative provision extending by 2 years the time by which funds must be matched by outside sources for the National Digital Information Infrastructure and Preservation Program.

SEC. 1304. This provision makes technical corrections to Public Law 106–173 regarding the Abraham Lincoln Bicentennial Commission.

GOVERNMENT PRINTING OFFICE

CONGRESSIONAL PRINTING AND BINDING	
Appropriations, 2002	\$81,000,000

Budget estimate, 2003	90,143,000
Committee recommendation	90,143,000

The Committee recommends an appropriation of \$90,143,000. The increase of \$9,143,000 over the enacted level is attributable to covering the fiscal year 2001 shortfall in this account (\$5,875,000) as well as mandatory pay and price level increases.

The following table compares the component categories within this account for fiscal year 2002. The Committee has not recommended separate amounts for each activity in order to give the GPO the flexibility to meet changing requirements.

CONGRESSIONAL PRINTING AND BINDING

	Appropriations 2002	Requested 2003	Recommended 2003
Congressional Record Program	\$20,147,000	\$20,373,000	
Miscellaneous publications	4,340,000	4,515,000	
Miscellaneous printing and binding	16,388,000	16,760,000	
Details to Congress	2,193,000	2,295,000	
Document envelopes and document franks	1,240,000	1,040,000	
Business and committee calendars	2,697,000	2,275,000	
Bills, resolutions, and amendments	8,800,000	7,387,000	
Committee reports	3,362,000	3,440,000	
Documents	2,394,000	2,520,000	
Hearings	17,871,000	21,266,000	
Committee prints	1,568,000	2,397,000	
Funding for 2001 orders		5,875,000	
Total	81,000,000	90,143,000	\$90,143,000

GAO Review.—The Committee recognizes GPO is entering a new era and is at the forefront of needing to confront several major challenges. The longstanding structure of centralized printing and dissemination within the Federal Government is facing several challenges. The administration and executive branch departments and agencies recently have challenged the basic statutory premise of GPO doing all printing for the Federal Government. In addition, technology advances during the past decade have significantly changed the state of printing and information dissemination—changes that need to be considered as the future of printing and publishing within the Federal Government is contemplated. Decisions about these and other issues over the next few years will have a significant effect on the costs of printing and public access to Federal Government publications, which is a basic right of every American citizen which must be maintained.

The Committee believes that a comprehensive and critical assessment of printing, publishing, copying, and disseminating information within the Federal Government is needed. Such an assessment would provide the Congress and new Public Printer with useful information that will be needed to formulate a long-term strategic plan for the GPO and to develop effective, efficient, and economical means for printing and disseminating Federal Government information.

Therefore, the Committee directs the General Accounting Office (GAO) to conduct a comprehensive review and assessment of the Government Printing Office. GAO shall report its findings and recommendations no later than December 1, 2003, so that the Committee may consider GAO's findings and recommendations in deliberating the fiscal year 2005 appropriations for the legislative branch.

OFFICE OF SUPERINTENDENT OF DOCUMENTS

SALARIES AND EXPENSES

Appropriations, 2002 ¹	\$33,639,000
Budget estimate, 2003	32,302,000

Committee recommendation	29,661,000
--------------------------------	------------

¹ Includes \$4,000,000 by transfer from emergency response fund (Public Law 107–38).

The Committee recommends an appropriation of \$29,661,000, a decrease of \$2,641,000 below the request level. This provides for mandatory pay and price level increases.

This appropriation provides for salaries and expenses associated with the distribution of Government documents to depository and international exchange libraries, the cataloging and indexing of Government publications, and the distribution of publications authorized by law at the request of Members of Congress and other Government agencies.

REVOLVING FUND

The Committee bill continues the limitations on reception and representation expenses and costs of attendance at meetings. Funds for replacement of the air-conditioning system and lighting improvements were included in the pending fiscal year 2001 supplemental.

GENERAL ACCOUNTING OFFICE

SALARIES AND EXPENSES

Appropriations, 2002	¹ \$429,444,000
Budget estimate, 2003	454,802,000
Committee recommendation	451,134,000

¹ Reflects \$7,600,000 by transfer from emergency response fund (Public Law 107–117).

The Committee recommends funding of \$451,134,000 for salaries and expenses of the General Accounting Office. Additionally, \$3,000,000 is authorized in offsetting collections derived from rent receipts and reimbursements for conducting financial audits of Government corporations, for a total of \$454,134,000, which will support an FTE level of 3,269 FTEs. The amount recommended, together with collections will cover mandatory pay and price level increases, and reflects the revised CSRS contribution cost projections.

Technology Assessment.—In fiscal year 2002, the Congress authorized the General Accounting Office (GAO) to conduct a pilot technology assessment program and to report on the results of the pilot program and the desirability of maintaining a technology assessment capability in the legislative branch. An independent evaluation of the pilot program found that the pilot program has provided some useful information for the Congress on a high-priority technology-related concern. In order to maintain this technology assessment capability within the legislative branch the Committee recommends \$1,000,000 to permit GAO to conduct a minimum of three additional studies in fiscal year 2003.

PAYMENT TO THE FOREIGN LEADERSHIP DEVELOPMENT CENTER TRUST FUND

Appropriations, 2002	\$8,000,000
Budget estimate, 2003	10,000,000
Committee recommendation	13,000,000

The Committee recommends \$13,000,000 as a payment to the Foreign Leadership Development Center Trust Fund for the Center for Foreign Leadership Development. The Center for Russian Leadership Development was established on December 21, 2000 (Public Law 106–554) as a legislative branch entity. This bill includes legislation (section 1401) changing the name and expanding the mission of the Russian Leadership Program to include Newly Independent States of the former Soviet Union including the Baltic States. The mission of the Center is to enable emerging political leaders of Russia and Newly Independent States at all levels of government to

gain significant, first-hand exposure to the American free market economic system and the operation of American democratic institutions through visits to comparable governments and communities in the United States. Up to 70 percent of the appropriation may be available for the Russian component of the program.

TITLE II—GENERAL PROVISIONS

Included are several routine general provisions carried annually in the bill (secs. 301–309), as follows:

Section 201 bans the use of appropriated funds for service and maintenance of private vehicles, except under such regulations as may be promulgated by the House Administration Committee and the Senate Rules and Administration Committee, respectively.

Section 202 limits the availability for obligation of appropriation to the fiscal year for which it is expressly provided in the bill accompanying this report.

Section 203 provides that any pay rate and title designation for a staff position created in this Act, and not specifically established by the Legislative Pay Act of 1929, is to be made permanent law by this Act. Further, any pay rate and title change for a position provided for in the 1929 Act is to be made permanent law by this act and any changes in the official expenses of Members, officers, and committees, and in the clerk hire of the House and Senate are to be made permanent law by this Act.

Section 204 bans the use of funds for contracts unless such contracts are matters of public record and are available for public inspection.

Section 205 appropriates such sums as may be necessary for the payment of settlements and awards pursuant to Public Law 104-1.

Section 206 authorizes legislative branch entities participating in the Legislative Branch Financial Managers Council [LBFMC] to finance the costs of the LBFMC.

Section 207 extends for 1 year the availability of funds for the Senate art collection.

Section 208 authorizes the Architect of the Capitol to maintain the landscape features in an area not otherwise under its jurisdiction.

SEC. 209. U.S.-China Economic and Security Review Commission. A general provision has been included providing \$1,800,000 for this commission.

The U.S.-China Commission was authorized by Public Law 106-398 and established in October in 2000 to monitor, investigate and report to Congress on the national security implications of the bilateral economic relationship with the Peoples Republic of China.

SEC. 210. A general provision has been included providing \$300,000 for the John C. Stennis Center for Public Service Development. The Committee continues to support the excellent work done by the Stennis Center in the promotion of public service, and through programs that promote an understanding of the Federal Government. Since its establishment by Congress in 1988, the Stennis Center has attracted young people in careers in public service, provided training for leaders in or likely to be in public service, and offered development opportunities for senior Congressional staff. Due to a recent ruling by the Department of Treasury, the fund established for the Center's operation must now be invested in securities that provide a lower rate of return. Because of this action, the Center's operating budget will be substantially reduced. To help in this funding transition and to maintain current programs, the Committee has provided \$300,000 to assist the Center in addressing this unanticipated budget shortfall.

SEC. 211. This provision allows funding of \$250,000 for title II of the Congressional Award Act.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify, with particularity, each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

The Committee has recommended no such funding.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI, OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

[COMMITTEE PRINT]

[NOTICE: This is a draft for use of the Committee and its staff only, in preparation for markup.]

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. SHELBY, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the Department of Transportation and re-

lated agencies for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amounts of new budget (obligational) authority for fiscal year 2003

Amount of bill as reported to Senate

\$22,202,638,000

Amount of budget estimates, 2003

20,799,680,000

Fiscal year 2002 enacted

18,900,670,000

TOTAL OBLIGATIONAL AUTHORITY PROVIDED—GENERAL FUNDS AND TRUST FUNDS

In addition to the appropriation of \$22,202,638,000 in new budget authority for fiscal year 2003, large amounts of contract authority are provided by law, the obligation limits for which are contained in the annual

appropriations bill. The principal items in this category are the trust funded programs for Federal-aid highways, for mass transit, and for airport development grants. For fiscal year 2003, estimated obligation limitations and exempt obligations total \$42,478,231,000.

PROGRAM, PROJECT, AND ACTIVITY

During fiscal year 2003, for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177), as amended, with respect to appropriations contained in the accompanying bill, the terms "program, project, and activity" shall mean any item for which a dollar amount is contained in appropriations acts (including joint resolutions providing continuing appropriations) or accompanying reports of the House and Senate Committees on Appropriations,

or accompanying conference reports and joint explanatory statements of the committee of conference. This definition shall apply to all programs for which new budget (obligational) authority is provided, as well as to discretionary grants and discretionary grant allocations made through either bill or report language. In addition, the percentage reductions made pursuant to a sequestration order to funds appropriated for facilities and equipment, Federal Aviation Administration, and for acquisition, construction, and improvements, Coast Guard, shall be applied equally to each budget item that is listed under said accounts in the budget justifications submitted to the House and Senate Committees on Appropriations as modified by subsequent appropriations acts and accompanying committee reports, conference reports, or joint explanatory statements of the committee of conference.

ACCRUAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New

Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

TITLE I—DEPARTMENT OF TRANSPORTATION OFFICE OF THE SECRETARY SALARIES AND EXPENSES

Appropriations, 2002¹ \$67,778,000

(In thousands of dollars)

Budget estimate, 2003 ²	92,460,000
Committee recommendation	83,069,000
¹ Does not reflect reduction of \$488,000 pursuant to section 349 of Public Law 107-87 or reduction of \$162,000 pursuant to section 1106 of Public Law 107-117.	
² Excludes \$3,640,000 for CSRS/FEHB accruals, of which \$149,000 is OST share of TASC accruals.	

Section 3 of the Department of Transportation Act of October 15, 1966 (Public Law 89-670) provides for establishment of the Office of the Secretary of Transportation [OST]. The Office of the Secretary is composed of the Secretary and the Deputy Secretary immediate offices, the Office of the General Counsel, and five assistant secretarial offices for transportation policy, aviation and international affairs, budget and programs, governmental affairs, and administration. These secretarial offices have policy development and central supervisory and coordinating functions related to the overall planning and direction of the Department of Transportation, including staff assistance and general management supervision of the counterpart offices in the operating administrations of the Department.

The Committee recommends a total of \$83,069,000 for the Office of the Secretary of Transportation including \$60,000 for reception and representation expenses.

The following table summarizes the Committee's recommendation in comparison to the budget estimate:

	Fiscal year—		
	2002 enacted ¹	2003 esti- mate ²	Committee recommendation
Immediate Office of the Secretary and Deputy Secretary		4,411	
Immediate Office of the Secretary	1,929	2,201
Immediate Office of the Deputy Secretary	619	79

¹ Reflects reduction of \$650,000 pursuant to section 349 of Public Law 107-87 and section 1106 of Public Law 107-117..

² Excludes \$3,640,000 for CSRS/FEHB accruals.

IMMEDIATE OFFICE OF THE SECRETARY

The Committee recommends \$2,201,000 for fiscal year 2003 for the Immediate Office of the Secretary. The Immediate Office of the Secretary has the primary responsibility to provide overall planning, direction, and control of the Department.

IMMEDIATE OFFICE OF THE DEPUTY SECRETARY

The Committee has recommended a total of \$799,000 for the Immediate Office of the Deputy Secretary which has the primary responsibility of assisting the Secretary in the overall planning and direction of the Department. The amount provided is \$180,000 more than the comparable fiscal year 2002 appropriated level.

OFFICE OF THE GENERAL COUNSEL

The Committee recommends \$15,507,000 for fiscal year 2003 for the Office of the General Counsel. The Office of the General Counsel provides legal services to the Office of the Secretary including the conduct of aviation regulatory proceedings and aviation con-

sumer activities and coordinates and reviews the legal work in the chief counsels' offices of the operating administrations. The General Counsel is the chief legal officer of the Department of Transportation and the final authority within the Department on all legal questions. The Committee approves the agency's request for an increase of \$553,000 to be used for the Department's "Accessibility for All America" initiative. These resources will assist the Department in carrying out the requirements in the Air Carrier Access Act of 1986 (ACA) and Section 707 of the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR-21).

OFFICE OF THE UNDER SECRETARY FOR POLICY

The position of the Under Secretary of Transportation for Policy in the Department was established by section 215 of the Maritime Transportation Security Act of 2002 and consolidated the Offices of Policy, Aviation and International Affairs, and Intermodalism. The Under Secretary for Policy is the chief policy officer of the Department and is

responsible to the Secretary for the analysis, development, and review of policies and plans for domestic and international transportation. The Office administers the economic regulatory functions regarding the airline industry and is responsible for international aviation programs, the essential air service program, airline fitness licensing, acquisitions, international route awards, computerized reservation systems, and special investigations such as airline delays.

For fiscal year 2003, the Committee recommendation includes \$11,123,000 for the Office of the Under Secretary for Policy, but does not concur with the request to fund the Office of Intermodalism in the Office of the Secretary accounts. As in past years, the Committee recommends funding for that office to be provided within the Federal Highway Administration's limitation on administrative expenses. Within the funds provided for the Under Secretary for Policy, the Committee provides the following allocation:

Aviation and International

Affairs	\$7,923,000
Transportation Policy	3,200,000
Intermodalism	(1,261,000)

Tier Matching Based on Fiscal Capability.—At present, Federal grant programs administered by the Federal Highway Administration, Federal Aviation Administration, and Federal Transit Administration require an identical match of all communities without regard to their financial circumstances. Some have asserted that this policy places a disproportionate burden on lower-income jurisdictions and prevents these jurisdictions from fully participating in the very programs necessary to improve conditions. The Committee takes no position on this assertion. However, for the purpose of information gathering, the Committee separately requests the FHWA, FAA, and FTA to each provide reports, covering the programs within each administration, to the Committee by March 15, 2003 which address this contention. Should the agencies believe that contention has merit, they may as part of these reports, propose a tiered matching system for non-Federal contributions based upon the fiscal capability of the grantee and which does not increase, over the existing grant programs, each program's cumulative financial burden on each administration.

OFFICE OF THE ASSISTANT SECRETARY FOR BUDGET AND PROGRAMS

The Committee recommends a total of \$8,375,000 for the Office of the Assistant Secretary for Budget and Programs. The amount provided is the same as the budget request and is \$647,000 more than the comparable fiscal year 2002 appropriated level. The Assistant Secretary for Budget and Programs is the principal staff advisor to the Secretary on the development, review, presentation, and execution of the Department's budget resource requirements, and on the evaluation and oversight of the Department's programs. The primary responsibilities of this office are to ensure the effective preparation and presentation of sound and adequate budget estimates for the Department, to ensure the consistency of the Department's budget execution with the action and advice of the Congress and the Office of Management and Budget, to evaluate the program proposals for consistency with the Secretary's stated objectives, and to advise the Secretary of program and legislative changes necessary to improve program effectiveness.

The Committee directs the Office of the Secretary to report monthly on the status of all outstanding reports and reporting requirements, including how delinquent congressionally mandated or requested reports are and an estimated date for delivery. The Committee expects that the Department will constitute this responsibility in the Office of the Assistant Secretary for Budget and Programs.

OFFICE OF THE ASSISTANT SECRETARY FOR GOVERNMENTAL AFFAIRS

The Committee recommends \$2,282,000 for the Office of the Assistant Secretary for Governmental Affairs which advises the Secretary on all congressional and intergovernmental activities and on all departmental legislative initiatives and other relationships with Members of Congress. The amount provided is the same as the comparable fiscal year 2002 appropriated level. The Assistant Secretary promotes effective communication with other Federal agencies and regional Department officials, and with State and local governments and national organizations for development of departmental programs; and ensures that consumer preferences, awareness, and needs are brought into the decision-making process.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

The Committee recommends \$26,070,000 for the Office of the Assistant Secretary for Administration which includes the Office of the Secretary portion of rent. The Assistant Secretary for Administration is responsible for establishing policies and procedures, setting guidelines, working with the Operating Administrations to improve the effectiveness and efficiency of the Department in human resource management, security and administrative management, real and personal property management, and acquisition and grants management. The amount provided above the comparable fiscal year 2002 appropriated level is intended to compensate for some or all of the following requested adjustments:

Increased security investigations	+\$40,000
Protection services for the Secretary	+150,000
HQ building security barriers	+300,000

The Committee has deferred consideration of the requests for secure video conferencing equipment until the issues surrounding the transition of certain DOT agencies to the new Department of Homeland Security are resolved. The Committee has not provided funding for a security survey for the new headquarters building since funding is not provided for the new headquarters building.

OFFICE OF PUBLIC AFFAIRS

The Committee recommends \$1,920,000 for the Office of Public Affairs which is the principal advisor to the Secretary and other senior departmental officials and news media on public affairs questions. The Office issues news releases, articles, fact sheets, briefing materials, publications, and audiovisual materials. It also provides information to the Secretary on opinions and reactions of the public and news media on transportation programs and issues. The amount provided is \$197,000 more than the comparable fiscal year 2002 appropriated level.

EXECUTIVE SECRETARIAT

The Committee recommends an appropriation of \$1,390,000 for the expenses of the Executive Secretariat. The Executive Secretariat assists the Secretary and Deputy Secretary in carrying out their management functions and responsibilities by controlling and coordinating internal and external written materials. The amount provided is a 15 percent increase above the comparable fiscal year 2002 appropriated level.

BOARD OF CONTRACT APPEALS

The primary responsibility of the Board of Contract Appeals is to provide an independent forum for the trial and adjudication of all claims by, or against, a contractor relating to a contract of any element of the Department, as mandated by the Contract Disputes Act of 1978, 41 U.S.C. 601. The Committee has provided \$611,000 for the Board of Contract Appeals Board. The amount provided is the same as the amount requested.

OFFICE OF SMALL AND DISADVANTAGED BUSINESS UTILIZATION

The Office of Small and Disadvantaged Business Utilization has primary responsibility for providing policy direction for small and disadvantaged business participation in the Department's procurement and grant programs, and effective execution of the functions and duties under sections 8 and 15 of the Small Business Act, as amended. The Committee recommends \$1,304,000, the full amount requested.

OFFICE OF THE CHIEF INFORMATION OFFICER

The Committee recommends \$11,487,000 for the Office of the Chief Information Officer

which serves as the principal adviser to the Secretary on matters involving information resources and information systems management. The amount provided is \$5,346,000 more than the comparable fiscal year 2002 appropriated level. The Committee believes that the additional funds are sufficient to address the Department's most critical information technology security initiatives.

OFFICE OF CIVIL RIGHTS

Appropriations, 2002 ¹	\$8,500,000
Budget estimate, 2003 ²	8,700,000
Committee recommendation	8,700,000

¹ Does not reflect reduction of \$60,000 pursuant to section 349 of Public Law 107-87 or reduction of \$70,000 pursuant to section 1106 of Public Law 107-117.

² Excludes \$470,000 for CSRS/FEHB accruals.

The Office of Civil Rights is responsible for advising the Secretary on civil rights and equal employment opportunity matters, formulating civil rights policies and procedures for the operating administrations, investigating claims that small businesses were denied certification or improperly certified as disadvantaged business enterprises, and overseeing the Department's conduct of its civil rights responsibilities and making final determinations on civil rights complaints. In addition, the Civil Rights Office is responsible for enforcing laws and regulations which prohibit discrimination in federally operated and federally assisted transportation programs. The Committee has provided a funding level of \$8,700,000 for the Office of Civil Rights, the full amount requested.

NEW HEADQUARTERS BUILDING

Appropriations, 2002	\$25,000,000
Budget estimate, 2003	
Committee recommendation	

The administration requested \$25,000,000 for the new Department of Transportation headquarters project to consolidate all of the department's headquarters operating administration functions (except FAA and the United States Coast Guard), from various locations into a state-of-the-art efficient leased buildings within the central employment area of the District of Columbia.

The Committee believes that providing funding for this building is premature at this time, given the uncertainty surrounding the transition of certain DOT functions to the newly established Department of Homeland Security and the extraordinary investments that the Transportation Security Administration has already made in the existing DOT building.

TRANSPORTATION PLANNING, RESEARCH, AND DEVELOPMENT

Appropriations, 2002 ¹	\$11,993,000
Budget estimate, 2003 ²	10,700,000
Committee recommendation	21,000,000

¹ Does not reflect reduction of \$87,000 pursuant to section 349 of Public Law 107-87 or reduction of \$313,000 pursuant to section 1106 of Public Law 107-117.

² Excludes \$135,000 for CSRS/FEHB accruals.

The Office of the Secretary performs those research activities and studies which can more effectively or appropriately be conducted at the departmental level. This research effort supports the planning, research and development activities needed to assist the Secretary in the formulation of national transportation policies. The program is carried out primarily through contracts with other Federal agencies, educational institutions, nonprofit research organizations, and private firms. The Committee recommends \$21,000,000 for transportation planning, research, and development, \$9,007,000 more

than the fiscal year 2002 enacted level and \$10,300,000 more than the President's budget request.

Project Name	Amount
Bypass Mail System Computer Software & Hardware Upgrades, AK	\$500,000

Limitation, 2002 ¹	\$125,323,000
Budget estimate, 2003 ²	131,779,000
Committee recommendation	131,779,000

¹ Does not reflect reduction of \$5,000,000 pursuant to section 349 of Public Law 107-87 or reduction of \$4,300,000 pursuant to section 1106 of Public Law 107-117.

² Does not reflect \$12,100,000 additional obligation limitation pursuant to H.R. 4775.

³ Proposed without limitations. Includes DOT only.

The Transportation Administrative Service Center [TASC] provides a business operation fund for DOT to provide a wide range of administrative services to the Department and other customers. Services are financed through customer reimbursements. During the budget formulation phase TASC provides customers with estimates based on historical usage, adjusted for new or changed requirements. TASC is also responsive to newly emerging customer requirements that may be identified as the program is executed. Customer estimates are updated mid-year during the execution phase to provide customers with more current information. TASC services are delivered to customers through an organizational structure of individual business practices providing related services or products. This arrangement allows TASC to achieve economies of scale, resulting in savings for TASC customers. TASC customers also benefit from expertise developed in service areas that are used in the Federal sector, such as transit benefit distribution and technology acquisition. TASC operates under a full cost recovery concept, which incorporates distribution of overhead and indirect cost. TASC services include:

- Functions formerly in DOT's working capital fund [WCF];
- Office of the Secretary [OST] personnel, procurement and information technology support operations;
- Systems development staff;
- Operations of the consolidated departmental dockets facilities; and
- Certain departmental services and administrative operations, such as human resources management programs, transit fare subsidy payments, and employee

wellness including substance awareness and testing.

SMALL COMMUNITY AIR SERVICE DEVELOPMENT PILOT PROGRAM

Appropriations, 2002	\$20,000,000
Budget estimate, 2003	
Committee recommendation	20,000,000

The Committee bill includes \$20,000,000, within funds provided for FAA's airport improvement program, for the Small Community Air Service Development Pilot Program authorized by section 203 of the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century. The program is designed to improve air service to underutilized airports in small and rural communities. The total number of communities or groups of communities that can participate in the program is limited to no more than 4 from any one State and no more than 40 overall. The program gives priority to communities that have high air fares, will contribute a local share of the cost, will establish a public-private partnership to facilitate airline service, and where assistance will provide benefits to a broad segment of the traveling public.

ESSENTIAL AIR SERVICE AND RURAL AIRPORT IMPROVEMENT FUND

	Appropriations	Mandatory ³	AIP transfer	Total
Appropriations, 2002 ¹	\$13,000,000	\$50,000,000	\$63,000,000
Budget estimate, 2003	30,000,000	\$43,000,000	113,000,000
Committee recommendation	65,000,000	50,000,000	115,000,000

¹ Does not include \$50,000,000 from payments to Air Carriers (A&ATF) provided in the Emergency Supplemental Act, 2002, Public Law 107-117.

² Payments to Air Carriers (Airport and Airway Trust Fund).

³ From overnight fees.

The Essential Air Service [EAS] and Rural Airport Improvement Program provides funds directly to commuter/regional airlines to provide air service to small communities that otherwise would not receive air service and for rural airport improvement as provided by the 1996 Federal Aviation Reauthorization Act.

The Federal Aviation Reauthorization Act of 1996 authorizes user fees for flights that fly over, but do not land in, the United States. The first \$50,000,000 of each year's fees were to go directly to carry out the Essential Air Service Program and, to the extent not used for essential air service, to improve rural airport safety. If \$50,000,000 in fees is not available, than the funds must be

made available from appropriations otherwise made available to the FAA Administrator.

For fiscal year 2003, the Administration has proposed to transfer \$83,000,000 from the grants-in-aid for airports program (AIP) for the costs of the EAS program. The Committee has rejected this request as it would strip almost the entire amount of increased funds available in fiscal year 2003 for investments in airport capacity and safety and security projects. The Administration is also proposing bill language to allow the Secretary to take whatever actions are necessary to keep the 2003 program within the proposed \$113,000,000. The budget also proposed capping the per passenger subsidy at

\$275 for points greater than 210 miles, with the exception of service to communities in Alaska. The Committee does not concur with either proposal and has instead provided adequate sums to provide service to all current and likely eligible points. The Committee notes that there is anticipated to be an estimated \$13,000,000 in carryover funds brought forward from fiscal year 2002 to fiscal year 2003. Together with these resources, program funding under the Committee recommendation should equal \$128,000,000 in fiscal year 2003.

The following table reflects the points currently receiving service and the annual rates as of February 1, 2002 in the continental United States and Hawaii.

EAS SUBSIDY RATES AS OF FEBRUARY 1, 2002

States/communities	Average daily enplanements at EAS point (year ending September 30, 2001)	Annual subsidy rates (February 1, 2002)	Subsidy per passenger	Total passengers (year ending September 30, 2001)

MINORITY BUSINESS RESOURCE CENTER PROGRAM

Appropriations, 2002	\$900,000
Budget estimate, 2003	900,000
Committee recommendation	900,000

Office of Small and Disadvantaged Business Utilization [OSDBU]/Minority Business Resource Center [MBRC].—The OSDBU/MBRC provides assistance in obtaining short-term working capital and bonding for disadvantaged, minority, and women-owned businesses [DBE/MBE/WBE's]. In fiscal year 2001, the short-term lending program was con-

verted from a direct loan program to a guaranteed loan program. In fiscal year 2003, the program will continue to focus on providing working capital to DBE/MBE/WBE's for transportation-related projects in order to strengthen their competitive and productive capabilities.

Since fiscal year 1993, the short-term lending program has been a separate line item appropriation, which segregated such activities in response to changes made by the Federal Credit Reform Act of 1990. The limitation on guaranteed loans under the Minority Business Resource Center is at the administration's requested level of \$18,367,000.

Of the funds appropriated, \$500,000 covers the subsidy costs; and, \$400,000 is for administrative expenses to carry out the Guaranteed Loan Program.

MINORITY BUSINESS OUTREACH

Appropriations, 2002	\$3,000,000
Budget estimate, 2003	3,000,000
Committee recommendation	3,000,000

This appropriation provides contractual support to assist small, women-owned, Native American, and other disadvantaged business firms in securing contracts and sub-contracts arising out of projects that involve

Federal spending. It also provides support to historically black and Hispanic colleges. Separate funding is requested by the administration since this program provides grants and contract assistance that serves DOT-wide goals and not just OST purposes.

GENERAL PROVISIONS

Rebates, refunds, and incentive payments.— The Department receives funds from various

Government programs at different time intervals (that is, weekly, monthly, quarterly). For example, under the General Services Administration's Travel Management Center [TMC] Program, rebate checks received from the travel contractor are distributed monthly to each element of the Department in proportion to net domestic airline sales arranged by the contractor. Past expenditures have to be analyzed to determine the proper

sources to refund which can be a time-consuming process. The staff time and cost associated with the precise accounting for each such refund is prohibitive. To alleviate the need to specifically identify the source for each repayment the Committee has included language (sec. 326), as requested, that allows a fair and sensible allocation of the rebates and miscellaneous other funds.

CHANGES IN FISCAL YEAR 2002 DEPARTMENT OF TRANSPORTATION APPROPRIATIONS

(In thousands of dollars)

¹ Does not include reallocation of Public Law 107-38 funds of \$760 million from FEMA to TSA.

² Net of transfer of RABA to FMCSA.

³ Reflects \$50 million BA transfer from formula grants to capital discretionary.

⁴ BTS funding included within Federal-aid highways.

⁵ Does not include \$5.5 million reimbursable from FHWA and FTA.

TRANSPORTATION SECURITY ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

	Appropriation	Offsetting Collections
Appropriations, 2002 ^{1,2}	\$1,250,000,000	\$1,250,000,000
Budget estimate, 2003	5,346,000,000	2,347,000,000
Committee recommendation	5,346,000,000	2,347,000,000

¹ Does not include: (1) an additional \$780,000,000 in supplemental funding provided to FAA for, among other things, security within the aircraft, explosives detection systems, and designated pilot and demonstration projects; (2) \$298,000,000 in appropriated funding provided to FAA for functions now performed by TSA, including the transfer of the Civil Aviation Security organization, research and development, and explosives detection systems; and, (3) \$93,000,000 provided for port security grants.

² Does not include \$2,85,000,000,000 in fiscal year 2002 to support TSA operations.

The Transportation Security Administration (TSA) was established on November 19, 2001, with the enactment of the Aviation and Transportation Security Act (Act) into law. The Act created TSA within the Department of Transportation and identified a series of objectives and authorities under which TSA would improve security across all modes of transportation for the American public. As called for in the Act, TSA is charged with ensuring security across the U.S. transportation system. TSA's mission is to protect the Nation's transportation systems by safeguarding the freedom of movement of people and commerce. TSA will be responsible for providing security to the Nation's transportation systems including aviation, railways, highways, pipelines, and waterways. The Act for the first time made overall aviation security a direct Federal responsibility.

The Committee recommends \$5,346,000,000 for the activities of the Transportation Security Administration for fiscal year 2003. The amount provided is the same as the budget request.

Challenges for the Transportation Security Administration (TSA).—The deadlines imposed by the Aviation and Transportation Security Act posed an extraordinarily challenge for any Federal agency to meet, even one that has been up and running for several decades. That said, the Committee has not been satisfied with the agency's performance to date, especially in the manner in which the agency has communicated with the Committee and the general public. Budget materials provided by the agency to the Committee have been substantially revised several times and have lacked the level of specificity and clarity that is necessary for the Committee to conduct proper oversight and allocate taxpayer funds. Even more importantly, the

agency's posture with its public stakeholders has been characterized by arrogance and disregard of the public's views. This is particularly troubling given the fact that the agency's core mission is to reassure the public as to the safety of the Nation's transportation system. The Committee hopes and expects that the recent change in leadership at the agency will signal a new day in the way the agency interacts with the Committee and the general public.

Programs, Projects and Activities (PPAs).—As discussed above, the Committee has struggled to ascertain the TSA's spending plans based on the budget documentation submitted by the agency. The statement of managers accompanying the Supplemental Appropriations Act for Fiscal Year 2002 noted that, at present, there are no clearly defined Programs, Projects, and Activities (PPA's) established for the TSA's budget. The Committee anxiously awaits the TSA's submission of proposed PPA's so that the Committee can better understand and review the agency's spending priorities. Until the agency and the Committee agree on defined PPA's for the TSA budget, the Committee cannot articulate its funding recommendation in the context of adjustments to the President's Budget. As such, the following table displays the minimum amounts provided by the Committee for the following activities.

Modification of Airports to Install Checked Baggage Explosive Detection Systems Including Trace Detection Systems	\$250,000,000
Procurement of Explosive Detection Systems and Trace Detection Systems	¹ 124,000,000
Intercity Bus Security Initiative	15,000,000
Operation Safe Commerce	30,000,000
Security Research	25,000,000
Grants to Port Authorities for Security Enhancements	100,000,000

¹ Includes transfer of \$55,000,000 from FAA facilities and equipment.

Modification of Airports to Install EDS and ETD Systems.—In reviewing the TSA's belated budget justification, the Committee was dismayed to learn that no additional funds have been budgeted for fiscal year 2003 for airport modifications necessary to install Explosive Detection Systems (EDS) and Ex-

plosive Trace Detection (ETD) systems. To comply with the ATSA December 31st deadline, the TSA has installed massive amounts of explosive detection equipment in the Nation's airports to screen all checked baggage for explosives. By the agency's own admission, however, many of the measures that were necessary to install and operate this equipment on such a short timeline presents a considerable inconvenience to airline passengers, air carriers, airport managers and airport-based vendors. In many instances, for the lack of time and money to install explosive detection systems as part of the airport's central baggage processing system, explosive detection equipment was installed in terminal space currently used by airline passengers. In other instances, the TSA has adopted the use of canine teams, bag match, and other detection methods on a temporary basis until certified explosive detection machines can be installed and manned.

The Committee is not prepared to allow this less-than-satisfactory situation to persist for a number of years while the agency pursues the development of next-generation explosive detection technologies. As such the Committee has provided \$250,000,000 for fiscal year 2003 for the purpose of improving upon the interim deployment plans that were necessary to comply with the December 31 deadline. The Committee expects these funds to be used to retrofit those airports that will face the greatest difficulty in minimizing the inconvenience of air passengers in complying with the December 31 deadline.

Credentialing and screening of aviation workers.—The statement of managers accompanying the second Supplemental Appropriations Act for fiscal year 2002 expressed a number of concerns regarding TSA's planned deployment of its transportation worker identity card (TWIC) initiative. The Committee of Conference to that bill went on to prohibit the TSA from obligating any funds for this initiative until the agency reports to the House and Senate Committees on Appropriations on the concerns cited in the statement of managers and the agency receives written reprogramming approval from both Committees. In developing his reprogramming request, the Committee expects the Under Secretary to be particularly attentive to the immediate need for improved credentialing to allow for the expeditious and seamless movement of airline and airport employees. The fact that airline and airport workers have already undergone

background investigations should facilitate this effort. The Committee expects the Under Secretary to promptly develop a credentialing system that is accepted throughout the airport network and is supported by a centralized database so that access limitations can be communicated promptly throughout the system. With regard to security screening, it is imperative that TSA develop a new screening process for airline and airport employees. This process should be conducted at separate portals from the screening of passengers and should be tailored to the minimal security risk posed by aviation employees. The TSA's current screening methods for aviation employees diverts limited security resources away from the real risks to the air transportation system and needlessly creates delays for workers providing time-critical aviation services on behalf of the traveling public. The Committee believes that TSA would benefit from the appointment of a taskforce to assist in the development of this new credentialing and screening system. Such a taskforce should include representatives from airlines, airports, and aviation labor. The Committee will carefully review the Under Secretary's reprogramming requests to determine the extent of his responsiveness to the Committee's stated concerns and directives in this area.

Intercity Bus Security.—The Committee has provided an additional \$15,000,000 for the TSA's continued efforts in the area of improving security in the intercity bus industry. These funds will better insure the security of millions of passengers that use the nation's intercity bus network.

Motor Carrier Security Program.—The Committee recommendation includes \$20,000,000 for grants for an industry-wide trucking security program. The level of funding is consistent with the request that was included in the President's fiscal year 2003 budget amendments.

Operation Safe Commerce.—The Committee has provided \$30,000,000 for the continued deployment of Operation Safe Commerce. These funds shall be subject to the same terms and conditions as articulated in the Committee report accompanying the fiscal year 2002 Supplemental Appropriations Bill. The amount provided is \$2,000,000 more than the amount provided for fiscal year 2002.

Security Research.—TSA will conduct research and development activities in an effort to improve current security technology. This research will be targeted toward methodologies of detecting potential chemical, biological or similar threats and devices that could be released on an aircraft or within an airport.

Pilot projects.—The Committee has provided funding in previous appropriations acts for the TSA to conduct pilot projects to demonstrate and evaluate promising security

technologies and concepts. Pilot projects provide useful data and practical experience regarding the effect of innovative approaches and technology in improving aviation security. As the newest large hub airport, Denver International Airport (DIA) is well-suited as a location for testing new security systems, and the Committee encourages the Under Secretary to consider DIA as a candidate for conducting pilot projects, including tests of new explosive detection equipment.

Security Research Centers.—The FAA has established strong collaborative research efforts with universities and private industry, and this beneficial arrangement has helped advanced a variety of aviation interests. The Committee believes that the Under Secretary could achieve similar benefits in the area of transportation security by establishing similar alliances. Therefore, the Committee encourages the Under Secretary, as the TSA continues to refine its research and development program, to utilize expertise at the following institutions: Center for Industrial Competitiveness at the University of Massachusetts-Lowell; National Institute for Advanced Transportation Technology at the University of Idaho; State University System of Florida's Consortium for Intermodal Transportation Safety and Security; Aviation Institute at the University of Nebraska at Omaha; and, the Center of Excellence for Aviation Security.

Automated Surveillance System.—The Committee encourages the Under Secretary to develop airport checkpoint security and process management initiative at the Wichita Mid-Continent Airport that links video technology with advanced software for real-time identification of security risks and can alert appropriate security personnel.

Remote baggage screening.—The Committee encourages the Under Secretary to develop a pilot project at Anchorage International Airport that will evaluate the potential of a rapid baggage movement system to screen checked luggage for explosives at an off-site facility.

Grants to Port Authorities for Security Enhancements.—The Committee has provided \$100,000,000 for port security grants in fiscal year 2003. These grants will be competitively awarded by the Under Secretary for the purpose of assessing and improving security at the Nation's seaports. While a total of \$218,000,000 was made available for this activity between the first and second Supplemental Appropriations Acts for 2002, the Department of Transportation's solicitation for applications demonstrated an initial demand for these grants of almost \$700,000,000. Funds provided in fiscal year 2003 will help meet this demand.

Integrated Port Security Pilot Projects.—The Committee is supportive of a series of integrated port security pilot projects that involve information sharing between the busi-

est container and cruise ship ports in the southeastern United States. In distributing funds under the port security grant program for fiscal year 2002 and fiscal year 2003, the Committee encourages the Under Secretary to positively consider applications for such an integrated set of pilot projects. Elements of these pilot projects might include the improvement of surveillance systems, the use of smart cards and biometric technology, vehicular traffic control, cargo inspection, improved communications infrastructure and information systems infrastructure, as well as passenger and baggage screening for cruise ship passengers.

Fitness for Duty Requirements.—The Committee is concerned that the Under Secretary has not as yet implemented the new requirement imposed by the Aviation and Transportation Security Act that airport security screeners demonstrate daily their fitness-for-duty without impairment due to fatigue, medications, drug use or alcohol. The Committee strongly recommends that the Under Secretary make expedited use of currently available fitness-for-duty technology to assess daily the alertness of airport security and provides \$250,000 specifically to implement a 1-year pilot project at the Seattle-Tacoma International Airport.

Air Marshall air-ground communications.—Funding was provided in fiscal year 2002 for procurement of air-ground communications systems for Federal air marshals. The Committee expects the Under Secretary to proceed expeditiously with this procurement and begin installation of such systems on major commercial passenger aircraft as soon as possible.

U.S. COAST GUARD

SUMMARY OF FISCAL YEAR 2002 PROGRAM

The U.S. Coast Guard, as it is known today, was established on January 28, 1915, through the merger of the Revenue Cutter Service and the Lifesaving Service. In 1939, the U.S. Lighthouse Service was transferred to the Coast Guard, followed by the Bureau of Marine Inspection and Navigation in 1942. The Coast Guard has as its primary responsibilities the enforcement of all applicable Federal laws on the high seas and waters subject to the jurisdiction of the United States; promotion of safety of life and property at sea; assistance to navigation; protection of the marine environment; and maintenance of a state of readiness to function as a specialized service in the Navy in time of war (14 U.S.C. 1, 2).

The Committee recommends a total program level of \$6,118,978,000 for the activities of the Coast Guard in fiscal year 2003. This represents an increase of \$1,088,469,000 above the fiscal year 2002 enacted level. The following table summarizes the Committee's recommendations:

[In thousands of dollars]

Program	Fiscal year—		
	2002 enacted ^{1,3}	2003 estimate ⁵	Committee recommendation
Operating expenses ²	\$3,780,150	\$4,153,456	\$4,318,456
Acquisition, construction, and improvements ⁴	702,354	725,000	752,000
Environmental compliance and restoration	16,927	17,000	17,000
Alteration of bridges	15,466	14,000
Retired pay	876,346	889,000	889,000
Reserve training	83,194	86,522	86,522
Research, development, test, and evaluation	20,222	22,000	22,000
Total	5,494,659	5,892,978	6,118,978

¹ Excludes reduction of \$1,471,000 pursuant to Public Law 107-87 and 107-117.

² Includes funding for national security activities of the Coast Guard scored against budget function 050 (defense discretionary) as follows: fiscal year 2002 enacted amount includes \$440,000,000 in defense discretionary funding; fiscal year 2003 estimate includes \$340,000,000 and fiscal year 2003 Committee recommendation includes \$340,000,000.

³ Excludes \$209,150,000 in Emergency Supplemental Appropriations pursuant to Public Law 107-117.

⁴ Excludes \$66,000,000 in supplemental appropriations pursuant to Public Law 107-206.

⁵ Excludes \$22,284,000 in civilian and \$293,858,000 in military accruals. Excludes \$165,000,000 in new user fee revenue.

	General	Trust	New user fee revenue	Total
Appropriations, 2002 ^{1,2,5}	\$3,357,055,000	\$24,945,000	\$3,382,000,000
Budget estimate, 2003 ³	4,129,126,000	25,000,000	\$165,000,000	4,318,456,000
Committee recommendation ⁴	4,293,456,000	25,000,000	4,318,456,000

¹ Includes \$440,000,000 for national security activities scored against budget function 050 (defense).

² Excludes reduction of \$1,471,000 rescission pursuant to Public Laws 107-87 and 107-117.

³ Includes \$340,000,000 for national security activities scored against budget function 050 (defense).

⁴ Includes \$340,000,000 for national security activities including drug interdiction scored against budget function 050 (defense).

⁵ Excludes \$209,150,000 in Emergency Supplemental Appropriations pursuant to Public Law 107-117.

The “Operating expenses” appropriation provides funds for the operation and maintenance of multipurpose vessels, aircraft, and shore units strategically located along the coasts and inland waterways of the United States and in selected areas overseas.

The program activities of this appropriation fall into the following categories:

Search and rescue.—One of its earliest and most traditional missions, the Coast Guard maintains a nationwide system of boats, aircraft, cutters, and rescue coordination centers on 24-hour alert.

Aids to navigation.—To help mariners determine their location and avoid accidents, the Coast Guard maintains a network of manned and unmanned aids to navigation along our coasts and on our inland waterways, and operates radio stations in the United States and abroad to serve the needs of the armed services and marine and air commerce.

Marine safety.—The Coast Guard insures compliance with Federal statutes and regulations designed to improve safety in the merchant marine industry and operates a recreational boating safety program.

Marine environmental protection.—The primary objectives of this program are to minimize the dangers of marine pollution and to assure the safety of U.S. ports and waterways.

Enforcement of laws and treaties.—The Coast Guard is the principal maritime enforcement agency with regard to Federal laws on the navigable waters of the United States and the high seas, including fisheries, drug smuggling, illegal immigration, and hijacking of vessels.

Ice operations.—In the Arctic and Antarctic, Coast Guard icebreakers escort supply ships, support research activities and Department of Defense operations, survey uncharted waters, and collect scientific data.

The Coast Guard also assists commercial vessels through ice-covered waters.

Defense readiness.—During peacetime the Coast Guard maintains an effective state of military preparedness to operate as a service in the Navy in time of war or national emergency at the direction of the President. As such the Coast Guard has primary responsibility for the security of ports, waterways, and navigable waters up to 200 miles offshore.

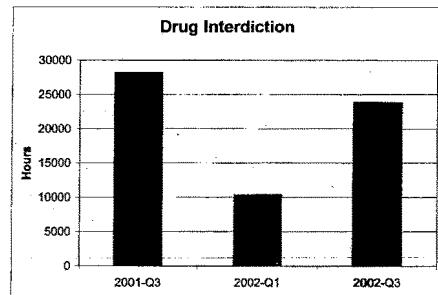

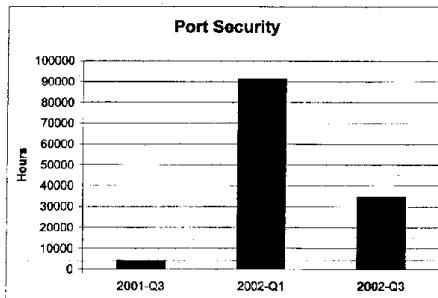

COMMITTEE RECOMMENDATION

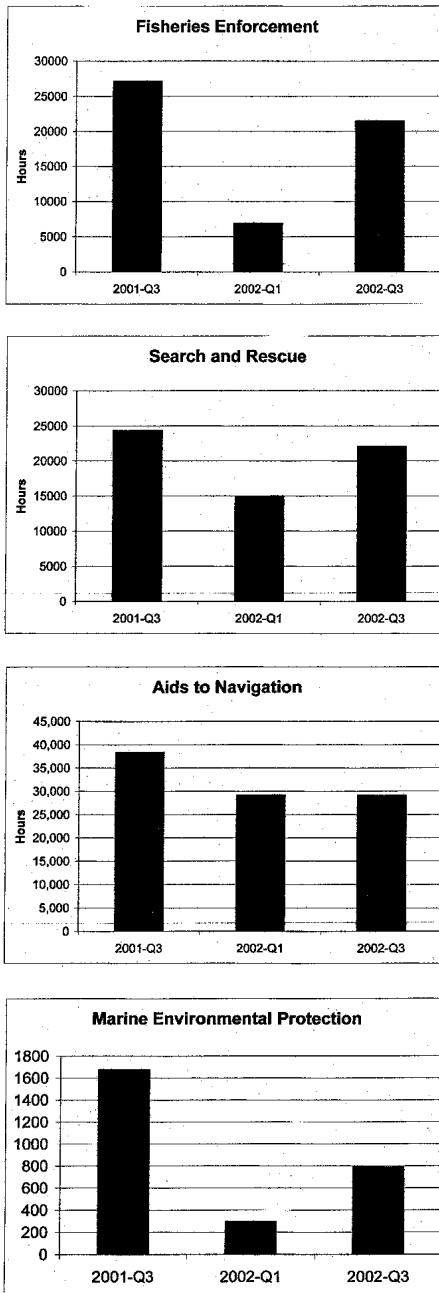

The Committee recommendation for Coast Guard operating expenses is \$4,318,456,000, including \$25,000,000 from the oil spill liability trust fund and \$340,000,000 from function 050 for the Coast Guard’s defense-related activities including drug interdiction.

Mission Emphasis.—The Coast Guard responded to the terrorist attacks of last September in an unprecedented and dramatic manner. In doing so, they refocused nearly all of their personnel and redirected most of their cutters, boats and aircraft on domestic maritime security. While the Coast Guard has on a number of occasions been required to rapidly shift its mission emphasis, the extent of the shift to domestic security that followed the events of September 11th was certainly unprecedented in the history of the Coast Guard. The Committee believes that the Coast Guard acted with extraordinary professionalism and heroism during this period of rapid transformation. At the same time, the Committee has concerns regarding the Coast Guard’s ability to once again achieve mission balance and adequately address its other critical missions—missions including Search and Rescue, Drug and Migrant Interdiction, the maintenance of Aids to Navigation and ensuring the safety and integrity of our domestic fishing grounds.

As part of the Committee’s annual hearing regarding the Coast Guard’s budget request, the DOT Inspector General reported that the service deployed 59 percent of its resources on port safety and security missions immediately following September 11th. Those resources included the Coast Guard’s core Search and Rescue vessels, some of which were repositioned far away from their optimal location for conducting their Search and Rescue mission. Indeed, the IG noted that the Coast Guard’s small boat stations experienced a 50 percent increase in operating hours as they sought to perform all of their new port security responsibilities at the same time they were seeking to maintain an effective Search and Rescue program.

The information provided below illustrates exactly how the Coast Guard directed its mission emphasis over the last year. It depicts an overall increase in operating hours in the first quarter of fiscal year 2002 reflecting the rapid response to the terrorist attacks. That surge began to level off in the third quarter of fiscal year 2002 as the Coast Guard sought to return to a more balanced level of effort across its missions. A review of the data for the third quarter of fiscal year 2002—the most recent quarter for which data is available—reveals that many of the missions that suffered the greatest diminution of effort following September 11th have not yet returned to their baseline level. Indeed, the Committee is greatly concerned that the agencies new emphasis on security, as articulated in its fiscal year 2003 budget request, means that the Coast Guard has no intention of restoring missions like drug interdiction and fisheries enforcement to their pre-September 11th levels.

The Committee does not question the need for a more robust homeland security focus on the part of the Coast Guard. Even so, the Committee is disappointed that, at a time when the Administration is requesting an historic and well deserved funding increase for the Coast Guard, almost the entire increase is devoted to expanded homeland defense efforts. Indeed, the documentation accompanying this budget request confirms the agency's intention to continue to de-emphasize its non-homeland defense missions while its budget grows. The Committee does not agree that, at a time when the Coast Guard's operating budget is growing by double-digit percentages, the taxpayer should be content with a diminished effort in the areas of marine safety, marine environmental protection, drug interdiction and fisheries enforcement.

In order to address this concern, the Committee is granting the Commandant the flexibility to redress this imbalance. The Committee fully funds the \$21,724,000 sought

for Maritime Search and Rescue improvements—budget category IV F—and disallows funding for budget category IV G since this item is not consistent with the Coast Guard's Ports and Waterways Safety Systems (PAWSS) strategy. With the more than \$450,000,000 in additional funding provided in this appropriation to operate new facilities and commence or enhance new initiatives, the Committee expects the Commandant to launch his highest priority initiatives for homeland defense while leaving himself sufficient resources to return his non-homeland security missions to their pre-September 11th levels.

The Committee directs the Commandant to submit a detailed report as to how he will achieve this objective as part of his budget submission for fiscal year 2004. This report should include a detailed revised distribution of fiscal year 2003 resources in comparison to the line items initially requested in the fiscal year 2003 budget request. In order to monitor the Commandant's progress toward

this goal, the Committee directs the Commandant to submit quarterly reports to the Committee detailing the resource hours achieved by mission. This report should also include district-by-district data for aircraft, cutter, and boat hours by mission area. The report should also compare this data to the comparable data for the eight quarters that preceded September 11, 2001. These reports will be submitted using the same deadlines and restrictions pertaining to the agency's Quarterly Acquisition Reports.

The Committee recognizes that the integrity of the Coast Guard's mission hour data has been compromised in the past due to inconsistencies in unit's reporting practices in the field. The Committee commends the Commandant's efforts to date to improve the accuracy of this data and requests that the DOT Inspector General periodically monitor the reporting of this data as well as the accuracy of the quarterly mission hour reports to be submitted to the Committee.

Flag Officer Billets.—The Committee has provided sufficient funds for the retention of 37 flag billets in fiscal year 2003, which is 3 more than the number requested in the Coast Guard's budget request and which reflects the actual number of flag officers.. The Committee notes that the number of flag officer billets has grown steadily in the last few years even though the Coast Guard has consistently had the lowest ratio of officers to flag officers and enlisted personnel to flag officers of any of the military services. The Committee recognizes that an even higher level of flag officer billets may be authorized. However, the Committee is concerned that the budget justifications submitted to the Committee have not accurately reflected the number of flag officers requested for the budget year. Specifically, the budget justification for fiscal year 2000 identified an expectation for one additional flag billet in the budget year. With the arrival of the 2001 budget request, the Committee discovered that the service added two additional flag billets in fiscal year 2000. Similarly, the 2002 budget request did not identify any growth in the number of flag officers for that year. With the arrival of the budget request for 2003, the Committee discovered that the service had indeed added another flag officer in 2002. The Committee expects the Coast Guard to address the imbalance inherent to the flag officer-to-billet ratio and to ensure that the budget justification for fiscal year 2004 reflects an accurate, appropriate, and sustainable level.

Navigational Assistance Services Fees.—For the second consecutive year, the Administration had proposed the initiation of new Navigational Assistance Service fees. The effect of this proposal is to lower the actual appropriation requirement for Coast Guard operating expenses in fiscal year 2003 by \$165,000,000 by requiring the users of Coast Guard services to cover those costs. The Committee has, again, rejected this approach and provided sufficient appropriations to cover all of the Coast Guard's needs.

Marine Fire and Safety Association.—The Committee remains supportive of efforts by the Marine Fire and Safety Association (MFSA) to provide specialized firefighting training and maintain an oil spill response contingency plan for the Columbia River. The Committee encourages the Secretary to provide funding for MFSA consistent with the authorization and directs the Secretary to provide \$312,000 to continue efforts by the nonprofit organization comprised of numerous fire departments on both sides of the Columbia River. The funding will be utilized to provide specialized communications, firefighting training and equipment, and to implement the oil spill response contingency plan for the Columbia River.

Great Lakes Pilotage.—The Committee is informed that the Great Lakes ports collectively petitioned the Coast Guard in July 2001 to publish for public comment a proposed plan to streamline and modernize the pilotage system on the Great Lakes. The Committee is concerned that the Coast Guard has not acted on this petition. The Committee urges the Coast Guard to seek public comment on this issue.

AMSEA.—The Committee recommends \$350,000 to be available only to continue this marine safety training program that trains fishermen and children in cold water safety techniques.

Oil spill prevention, 13th District.—Within the amount provided, the Committee has provided \$1,600,000 for enhanced oil spill prevention activities in the waters of Washington State. These additional funds shall be under the sole control of the Captain of the Port-Puget Sound and will be in addition to any and all funds that would normally be allocated for marine environmental protection activities to that unit under the President's budget request. The Captain of the Port-Puget Sound is the Federal official solely responsible for preventing the accidental release of oil from tankers entering the Straits of Juan de Fuca and Puget Sound. As such, the Committee expects the Captain of the Port to use his professional judgment in allocating these funds to measures that he believes will best protect these waters. Such measures could include a cost sharing arrangement with the State of Washington for the hiring of a rescue tug at Neah Bay. However, these funds could be allocated to alternative measures if, in the view of the Captain of the Port, such alternative measures will provide a superior level of protection. The Committee expects the Commandant to forward to the Committee a spend plan for these funds once the Captain of the Port has decided on the appropriate approach to enhancing environmental protection in his area of operation.

Station Indian River Inlet Staffing.—The Committee is aware that a staffing shortage may exist at Coast Guard Station Indian River Inlet following the addition of new security requirements. The station, which is currently staffed by nine personnel, acts as the gateway to the ports of Wilmington, Delaware and Philadelphia, Pennsylvania. The men and women at this station maintain a safe and secure waterway for vessels traveling to these ports. They also provide waterside security for the Salem Nuclear Power Plant, bridges over navigational waters, oil refineries and tourist attractions along the Delaware River, Delaware Bay and Delaware's Atlantic Coast. As such, the Commandant is directed to evaluate the staffing levels at this station to determine if additional staffing is necessary.

Coastwise Endorsements.—More than 5 years after Congress enacted section 113(d) of the Coast Guard Authorization Act of 1996 (now codified at 46 U.S.C. 12106(e)), the Agency has yet to promulgate regulations implementing the provision. The Committee is concerned that the resulting lack of Federal direction could allow control over U.S. coastwise vessels by foreign companies who may use tax and other advantages to compete unfairly with U.S. companies in domestic commerce. The Congressional intent in 1996, which has not changed in enacting section 113(d), was to provide U.S.-based coastwise vessel operators with broadened sources of investment capital. At no time did Congress intend that section 113(d) be interpreted as a means of undermining the integrity of the Jones Act and related Maritime Cabotage laws. Until

the rule implementing subsection 12106(e) is published in final form, the Committee expects the Coast Guard to ensure that any application approved under this provision is fully consistent with the intent of Congress as stated in the 1996 Conference Report.

Datum marker buoys (DMBs).—The Committee allowance includes not less than \$1,000,000 for the continued procurement of Datum Marker Buoys.

Maritime Electro-Optical Infrared (EO/IR) Handheld and Fixed Sensors.—Within the funds provided, the Committee provides \$5,000,000 for Maritime Electro-Optical Sensors. Of this amount, \$3,000,000 shall be derived from budget category IV G and \$2,000,000 from the additional funds provided. These sensors are on cutters, patrol boats, as well as for Marine Safety Offices and Marine Safety and Security Teams. They will assist in both the maritime safety and security mission goals by enabling Coast Guard personnel to conduct maritime operations safely and effectively at night and in adverse weather conditions.

Coast Guard Yard.—The Committee recognizes the Coast Guard Yard at Curtis Bay, Maryland is a critical component of the Coast Guard's core logistics capability that directly supports fleet readiness. The Committee further recognizes that the yard has been a vital part of the Coast Guard's readiness infrastructure for more than 100 years and believes that sufficient industrial work should be assigned to the Yard on a competitive basis to maintain this capability.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

	General	Trust	Total
Appropriations, 2002 ¹	\$616,354,000	\$20,000,000	\$636,354,000
Budget estimate, 2003 ²	705,000,000	20,000,000	725,000,000
Committee recommendation	732,000,000	20,000,000	752,000,000

¹ Excludes reduction of \$294,000 pursuant to Public Law 107-87 and 108-117.

² Excludes \$1,266,000 in civilian and \$9,580,000 in military accruals.

This appropriation provides for the major acquisition, construction, and improvement of vessels, aircraft, shore units, and aids to navigation operated and maintained by the Coast Guard. Currently, the Coast Guard has in operation approximately 250 cutters, ranging in size from 65-foot tugs to a 420-foot polar icebreakers, more than 2,000 boats, and an inventory of more than 200 helicopters and fixed-wing aircraft. The Coast Guard also operates approximately 600 stations, support and supply centers, communications facilities, and other shore units. The Coast Guard maintains over 48,000 navigational aids—buoys, fixed aids, lighthouses, and radio navigational stations.

COMMITTEE RECOMMENDATION

The recommended bill provides \$752,000,000 for acquisition, construction, and improvements, including \$20,000,000 from the oil spill liability trust fund. This represents an increase of \$115,646,000 (18 percent) above last year's enacted level and is the same as the budget request.

The following table summarizes the Committee's programmatic recommendations:

	Fiscal year 2002 enacted ¹²	Fiscal year 2003 estimate	Committee recommendation
Vessels	\$89,640,000	\$13,600,000	\$25,600,000
Integrated Deepwater Systems Program	320,190,000	500,000,000	480,000,000
Aircraft	9,500,000
Other equipment	79,293,000	117,700,000	132,700,000
Shore facilities and aids to navigation	73,100,000	28,700,000	48,700,000
Personnel and related support	64,631,000	65,000,000	65,000,000
Total	636,354,000	725,000,000	752,000,000

¹ Excludes reduction of \$294,000 rescission pursuant to Public Laws 107-87 and 108-117.

² Excludes \$328,000,000 in supplemental emergency appropriations.

The following table compares the fiscal year 2002 enacted level, the fiscal year 2003 estimate, and the recommended level by program, project, and activity.

Program name	Fiscal year		Committee recommendation
	2002 enacted	2003 estimate	
Vessels:			
Survey and design—cutters and boats	\$500,000	\$400,000	\$400,000
Seagoing buoytenders (WLB) replacement	68,000,000	4,000,000	4,000,000
Polar class reliability improvement (RIP)	4,490,000	2,200,000	2,200,000
41 foot utility boat replacement	12,000,000	4,000,000	4,000,000
85 foot fast patrol craft	4,650,000
87 foot coastal patrol boats	12,000,000
Alex Haley conversion	3,000,000	3,000,000
Subtotal vessels	89,640,000	13,600,000	25,600,000
Integrated Deepwater Systems program (IDS):			
Aircraft	35,700,000	138,200,000	135,200,000
Surface ships	36,700,000	215,700,000	212,700,000
C4ISR	106,500,000
Logistics	71,200,000	71,600,000	66,600,000
Other contracts	39,800,000	43,500,000	36,500,000
Government Program Management	30,300,000	31,000,000	29,000,000
Subtotal IDS	320,200,000	500,000,000	480,000,000
Aircraft:			
Aviation parts and support	9,000,000
C130J system provisioning and training analyses	500,000
Subtotal aircraft	9,500,000
Other Equipment:			
Ports and Waterways Safety Systems (PAWSS)	6,000,000	5,000,000	5,000,000
Marine information for safety & law enforcement	7,450,000
National distress system modernization	42,000,000	90,000,000	90,000,000
Defense message system implementation	1,500,000	2,100,000	2,100,000
Commercial satellite communication	1,500,000
Global maritime distress and safety system	2,200,000	2,200,000	2,200,000
Search and rescue capabilities	1,320,000
Thirteenth district microwave modernization	800,000	3,000,000	3,000,000
Hawaii Rainbow communications system	3,100,000	3,000,000	3,000,000
High frequency recapitalization & modernization	2,000,000	2,000,000	2,000,000
Prince William Sound Microwave wide-area	1,000,000	1,000,000	1,000,000
Security surveillance and protection	15,000,000
Command center readiness/infrastructure	727,000
P-250 pump replacement	2,046,000
Configuration management—phase II	3,000,000
Self-contained breathing apparatus	1,000,000
Maritime electro-optical sensors	4,000,000
Ice detecting radar—Cordova, AK	650,000
Maritime domain awareness information	9,400,000	9,400,000
Subtotal other equipment	79,293,000	117,700,000	132,700,000
Shore Facilities & aids to navigation:			
Survey and design—shore projects	4,000,000	2,500,000	2,500,000
Minor AC&I shore construction projects	4,000,000	4,900,000	4,900,000
Housing	13,500,000	7,000,000	7,000,000
Waterways ATON projects	5,500,000	4,900,000	4,900,000
Rebuild Station Port Huron, MI	3,100,000
Consolidate warehouse—CG Yard, MD	12,600,000
Construct new station—Brunswick, GA	3,600,000
Replace utilities, ISC building Number 8—Boston, MA	1,600,000
Construct engineering bldg, ISC Honolulu, HI	7,200,000
Consolidate Kodiak aviation support—Kodiak, AK	5,700,000	4,000,000	4,000,000
Reconstruct north wall, Escanaba Municipal dock	300,000
Rebuild ISC Seattle Pier 36—Phase I	10,000,000	16,000,000
CG Marine safety & rescue station, Chicago, IL	2,000,000	4,000,000
Vessel pier facility, Cordova, AK	5,400,000	5,400,000
Station Manistee, MI construction	73,100,000	28,700,000
Subtotal shore facilities	73,100,000	28,700,000	48,700,000
Personnel and Related Support:			
Direct personnel costs	63,931,000	64,500,000	64,500,000
Core acquisition costs	700,000	500,000	500,000
Subtotal personnel and related support	64,631,000	65,000,000	65,000,000
Total appropriation	636,354,000	725,000,000	752,000,000

VESSELS

Response Boat Small.—The Committee notes that the Coast Guard is procuring a new standard small boat to provide the lower range capability of its shore-based response system. These Response Boats will be procured under an indefinite delivery, indefinite quantity (IDIQ) contract for a period of seven years, with an initial purchase quantity of 100 boats and a maximum quantity of 700. The Committee notes with concern, however, that the Coast Guard in the FRP has specified a specific design technology for the outboard motors that will power the Response Boat Small fleet.

It has been reported to the Committee that the decision on the specified engine technology may have been based on an out-of-date survey. The Committee, however, is more concerned that a Coast Guard FRP would still limit competition by mandating a specific engine technology rather than use

a performance-based specification to maximize competition while ensuring all basic requirements are met this far into the era of procurement reform.

Accordingly, prior to exercising any options beyond the purchase of the first 100 boats, the Coast Guard may modify the contract to be either a pure performance-based specification or to specifically allow both direct injection and four-stroke engines to be considered by boat manufacturers as long as they meet the requisite performance and environmental criteria and such a change is merited based on the results of the most recent internal Coast Guard study.

Coastal Patrol Boats.—The Committee believes that Coastal Patrol Boats are an essential part of the Coast Guard's homeland defense in our ports, waterways, and territorial waters. The Committee is aware that the Coast Guard has identified the need for additional Coastal Patrol Boats. In order to address one of the Coast Guard's most press-

ing capital needs and to prevent a fiscal year 2003 production line gap, the Committee has provided \$12,000,000 for on-going procurement efforts.

INTEGRATED DEEPWATER SYSTEMS PROGRAM

The Committee has provided \$480,000,000 for the Integrated Deepwater Systems (IDS) program, which is \$159,800,000 or 50 percent more than the fiscal year 2002 enacted level and \$20,000,000 less the budget request.

NATIONAL DISTRESS AND RESPONSE SYSTEM MODERNIZATION PROGRAM

The Committee recommends \$90,000,000 requested for the modernization of the National Distress and Response System (NDRS), which is effectively the maritime 911 system for mariners in distress.

OTHER EQUIPMENT

The Committee provided \$132,700,000 for Other Equipment which is the same as the budget request.

Improved security surveillance and protection.—The Committee recommends \$15,000,000 only for the Coast Guard to develop and acquire equipment that will improve security surveillance and perimeter protection capabilities in the Nation's ports, waterways, and coastal zones. The Committee believes that this program has the promise not only of improving the Coast Guard's ability to respond to terrorist threats but also of minimizing the possibility that Coast Guard assets and personnel will be diverted from traditional missions to homeland security missions. The Committee further directs that these funds shall be executed as an integral component of its modernization effort to meet emerging maritime threats.

SHORE FACILITIES AND AIDS TO NAVIGATION

Minor AC&I Shore Construction Projects.—The Committee recommends \$4,900,000 for Minor AC&I shore construction projects, which is the same as the budget request. Within the funds provided, \$400,000 is provided for construction of engineering building at U.S. Coast Guard Station Portsmouth Harbor in New Castle, New Hampshire.

Rebuild ISC Seattle Pier 36—Phase I.—The Committee recommendation includes an additional \$16,000,000 for costs associated with repairing and rebuilding the Coast Guard's Integrated Support Center at Pier 36 in Seattle. Now that a decision has been made not to move the Integrated Support Center to an alternative site, the Committee believes it is time to move out rapidly to replace the aging infrastructure at pier 36 and give the Coast Guard personnel that work there a safe and appropriate working environment. The Committee directs the Commandant to submit an anticipated spend plan and construction schedule for this initiative prior to conference committee action on this bill.

BILL LANGUAGE

Capital investment plan.—The bill maintains the requirement for the Coast Guard to submit a 5-year capital investment plan with initial submission of the President's budget request. This requirement was first established in fiscal year 2001.

Disposal of real property.—The bill maintains the provision enacted in fiscal year 2001 crediting to this appropriation proceeds from the sale or lease of the Coast Guard's surplus real property and providing that such receipts are available for obligation only for the national distress and response system modernization program.

ENVIRONMENTAL COMPLIANCE AND RESTORATION

Appropriations, 2002 ¹	\$16,927,000
Budget estimate, 2003 ²	17,000,000
Committee recommendation	17,000,000

¹ Excludes reduction of \$9,000 pursuant to Public Laws 107-87 and 107-117.

² Excludes \$218,000 in civilian and \$68,000 in military accruals.

The Environmental Compliance and Restoration account provides funds to address environmental problems at former and current Coast Guard units as required by applicable Federal, State, and local environmental laws and regulations. Planned expenditures for these funds include major upgrades to petroleum and regulated-substance storage tanks, restoration of contaminated ground water and soils, remediation efforts at hazardous substance disposal sites, and initial site surveys and actions necessary to bring Coast Guard shore facilities and vessels into compliance with environmental laws and regulations.

The recommended bill provides \$17,000,000 for environmental compliance and restoration. The recommendation is the same as the budget request.

ALTERATION OF BRIDGES (HIGHWAY TRUST FUND)	
Appropriations, 2002	\$15,466,000
Budget estimate, 2003	
Committee recommendation	14,000,000

The "Alteration of bridges" appropriation provides funds for the Coast Guard's share of the cost of altering or removing bridges obstructive to navigation. Under the provisions of the Truman-Hobbs Act of June 21, 1940, as amended (33 U.S.C. 511 et seq.), the Coast Guard, as the Federal Government's agent, is required to share with owners the cost of altering railroad and publicly owned highway bridges which obstruct the free movement of navigation on navigable waters of the United States in accordance with the formula established in 33 U.S.C. 516. Alteration of obstructive highway bridges is eligible for funding from the Federal-Aid Highways program.

The Committee has provided an appropriation from the highway trust fund of \$14,000,000 for the alteration of bridges, which is the same as the budget request.

The Committee recommendation is to be distributed as follows:

Bridge and Location	Committee recommendation
Chelsea Street Bridge Project, Boston, MA	\$2,000,000.00
EJ&E Railroad Bridge, Morris, IL	1,000,000.00
Fourteen Mile CSX Railroad Bridge, Mobile, AL	5,000,000.00
John F. Limehouse Bridge, Charleston, SC	1,500,000.00
Florida Avenue Bridge, New Orleans, LA	4,500,000.00
Total	14,000,000.00

EJ&E Bridge.—The Committee is concerned about the alteration of the EJ&E railroad bridge near Morris, Illinois. To date, the Committee has provided more than \$6,500,000 for this important bridge project in fiscal years 2000, 2001, and 2002. It is the Committee's understanding that design and engineering work has been completed. The Committee provides \$1,000,000 for this bridge project and directs the Coast Guard to initiate construction on this project.

RETIRED PAY

Appropriations, 2002 (mandatory)	\$876,346,000
Budget estimate, 2003 (mandatory)	
Committee recommendation (mandatory)	889,000,000

The "Retired pay" appropriation provides for retired pay of military personnel of the Coast Guard and Coast Guard Reserve, members of the former Lighthouse Service, and for annuities payable to beneficiaries of retired military personnel under the retired serviceman's family protection plan (10 U.S.C. 1431-1446) and survivor benefit plan (10 U.S.C. 1447-1455), payments for career status bonuses under the National Defense Authorization Act for Fiscal Year 2000, and for payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act.

COAST GUARD MILITARY RETIREMENT FUND

Appropriations, 2002 (mandatory)	
Budget estimate, 2003 (mandatory)	\$889,000,000
Committee recommendation (mandatory)	

The Administration proposed legislation in October 2001, to accrue fully the retirement costs of Coast Guard military personnel (as well as the Public Health Service and Na-

tional Oceanic and Atmospheric administration Commissioned Corps). The account will make payments to current retirees, receive the accrual payments from Coast Guard accounts for current active duty members, and receive a payment for unfunded liabilities of Coast Guard personnel.

The program also provides for retired pay of military personnel of the Coast Guard Reserve, members of the former Lighthouse Service, and for annuities payable to the beneficiaries of retired military personnel under the retired serviceman's family protection plan (10 U.S.C. 1431-1446) and the survivor benefit plans (10 U.S.C. 1447-1455); payments for career status bonuses under the National Defense Authorization Act; and payments for medical care of retired personnel and their dependents under the Dependents Medical Care Act (10 U.S.C., ch. 55).

As discussed earlier in this report, the Committee has not appropriated funds based on the administration's proposed legislation as no action has been taken to enact this proposal by the Committee of jurisdiction.

RESERVE TRAINING

Appropriations, 2002 ¹	\$83,194,000
Budget estimate, 2003 ²	86,522,000
Committee recommendation	86,522,000

¹ Excludes reduction of \$41,000 pursuant to Public Laws 107-87 and 107-117.

² Excludes \$303,000 civilian and \$26,000,000 military accruals.

Under the provisions of 14 U.S.C. 145, the Secretary of Transportation is required to adequately support the development and training of a Reserve force to ensure that the Coast Guard will be sufficiently organized, manned, and equipped to fully perform its wartime missions. The purpose of the Reserve training program is to provide trained units and qualified persons for active duty in the Coast Guard in time of war or national emergency, or at such other times as the national security requires. Coast Guard reservists must also train for mobilization assignments that are unique to the Coast Guard in times of war, such as port security operations associated with the Coast Guard's Maritime Defense Zone [MDZ] mission, and deployable port security units associated with the international Defense Operations mission.

The recommended bill includes \$86,522,000 for reserve training, which is the budget request.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

	General	Trust	Total
Appropriations, 2002 ¹	\$16,730,000	\$3,492,000	\$20,222,000
Budget estimate, 2003 ²	18,500,000	3,500,000	22,000,000
Committee recommendation	18,500,000	3,500,000	22,000,000

¹ Excludes reduction of \$6,000 pursuant to Public Laws 107-87 and 107-117.

² Excludes \$328,000 and \$778,000 military accruals.

The Coast Guard's Research and Development Program seeks to improve the tools and techniques with which Coast Guard carries out its varied operational missions and to increase the knowledge base upon which it depends to fulfill its regulatory responsibilities.

The recommended bill provides a funding level of \$22,000,000 for research and development projects, which is with the budget request. Of this amount \$3,500,000 is to be derived from the oil spill liability trust fund. This recommendation is consistent with the budget request.

Engineered Wood Composites Technology.—The Committee is aware of engineered wood composites technology developed by the University of Maine. Engineered Wood Composites are designed to reduce maintenance cost

and extend the useful life of waterfront structures. A total of \$3,000,000 is provided within the funds made available to support the continued development, demonstration and evaluation of engineered wood composites at Coast Guard facilities including the U.S. Coast Guard Stations in Jonesport and Southwest Harbor ME.

Spectral Imaging Technology.—Within the funds provided, \$2,500,000 is included for a pilot project to test automatic Search and Rescue Spectral Imaging technology for Coast Guard C-130 at Kalaeloa, Hawaii.

Shipboard Fire Safety.—Within the funds provided, the Committee recommendation includes \$250,000 to accelerate research related to the life safety hazards inherent in high-density vessel occupancy at the U.S. Coast Guard Fire Safety and Test Detachment in Mobile, AL in coordination with the University of South Alabama.

Maritime Domain Awareness Information.—The Committee is aware of the need to improve maritime domain awareness and encourages the Coast Guard to investigate designing and installing a Maritime Domain Awareness Surveillance System demonstration project in an effort to improve port security.

Meteorological and Marine Observation Systems.—Within the funds provided, \$250,000 is included for a prototype observation system in the Lower Chesapeake Bay. The Committee believes that such a system will improve short-and long-term predictions of phenomenon facilitating safe and efficient maritime operations.

BOAT SAFETY

(AQUATIC RESOURCES TRUST FUND)

Appropriations, 2002 (mandatory)	\$64,000,000
--	--------------

Budget estimate, 2003 (mandatory)	64,000,000
Committee recommenda- tion (mandatory)	64,000,000

This account provides financial assistance for a coordinated National Recreational Boating Safety Program for the several States. Title 46, United States Code, section 13106, establishes a “Boat safety” account from which the Secretary may allocate and distribute matching funds to assist in the development, administration, and financing of qualifying State programs. The “Boat safety” account consists of amounts transferred from the highway trust fund which are derived from the motorboat fuel tax (18.4 cents per gallon).

The Transportation Efficiency Act for the 21st Century provides \$64,000,000 of mandatory funding from the “Aquatic Resources Trust fund” annually for this program. Of this amount, \$59,000,000 is provided for grants to States and \$5,000,000 for Coast Guard administration. The President’s budget requests no discretionary appropriations for fiscal year 2003.

GENERAL PROVISIONS

Vessel traffic safety fairway, Santa Barbara/San Francisco.—The bill retains a general provision (sec. 312) that would prohibit funds to plan, finalize, or implement regulations that would establish a vessel traffic safety fairway less than 5 miles wide between the Santa Barbara traffic separation scheme and the San Francisco traffic separation scheme. On April 27, 1989, the Department published a notice of proposed rulemaking that would narrow the originally proposed 5-mile-wide fairway to two 1-mile-wide fairways separated by a 2-mile-wide area where off-shore

[In thousands of dollars]

oil rigs could be built if Lease Sale 119 goes forward. Under this revised proposal, vessels would be routed in close proximity to oil rigs because the 2-mile-wide non-fairway corridor could contain drilling rigs at the edge of the fairways. The Committee is concerned that this rule, if implemented, could increase the threat of offshore oil accidents off the California coast. Accordingly, the bill continues the language prohibiting the implementation of this regulation.

Quarterly acquisition reports.—The bill retains a general provision (sec. 341) requiring that the Coast Guard submit a quarterly report regarding the status of major acquisition programs.

FEDERAL AVIATION ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

The Federal Aviation Administration traces its origins to the Air Commerce Act of 1926, but more recently to the Federal Aviation Act of 1958 which established the independent Federal Aviation Agency from functions which had resided in the Airways Modernization Board, the Civil Aeronautics Administration, and parts of the Civil Aeronautics Board. FAA became an administration of the Department of Transportation on April 1, 1967, pursuant to the Department of Transportation Act (October 15, 1966).

The total recommended program level for the FAA for fiscal year 2003 amounts to \$13,552,225,000, which is \$219,658,000 more than the fiscal year 2002 enacted level. The following table summarizes the Committee’s recommendations:

Program	Fiscal year—		
	2002 en- acted ¹	2003 budget estimate	Committee recommendation
Operations	6,893,567	7,077,203	7,047,203
General fund appropriation	1,112,481	3,277,925	3,247,925
Trust fund appropriation	5,773,519	3,799,278	3,799,278
Aviation user fees	7,567		
Facilities and equipment	2,914,000	2,981,022	2,981,022
Research, engineering, and development	195,000	124,000	124,000
Grants-in-Aid for Airports	3,300,000	3,400,000	3,400,000
Total available budget resources	13,302,567	13,582,225	13,552,225

¹ Does not reflect rescissions and reductions pursuant to Public Law 107-87 and 107-117, nor supplemental appropriations pursuant to Public Law 107-117.

² Excludes CSRS/FEHB accruals.

OPERATIONS

Appropriations, 2002 ¹	\$6,886,000,000
Budget estimate, 2003	7,077,203,000
Committee recommenda- tion	7,047,203,000

¹ Does not reflect TASC reductions of \$2,820,000 pursuant to Public Law 107-87 and Public Law 107-117, nor supplemental appropriations of \$200,000,000 pursuant to Public Law 107-117 or \$7,567,000 in aviation user fees.

² Excludes CSRS/FEHB accruals.

FAA’s “Operations” appropriation provides funds for the operation, maintenance, communications, and logistic support of the air traffic control and navigation systems and activities. It also covers the administration and management of the regulatory, commercial space, medical, engineering, and development programs.

The bill includes \$3,799,278,000 for the operations activities of the Federal Aviation Administration from the airport and airway

[In thousands of dollars]

trust fund. The balance of the operations appropriation will come from the general fund.

As in past years, FAA is directed to report immediately to the Committees on Appropriations in the event resources are insufficient to operate a safe and effective air traffic control system.

The following table summarizes the Committee’s recommendation in comparison to the budget estimate:

	2002 program level ¹	2003 budget es- timate ²	Committee rec- ommendations
Air traffic services	5,446,872	5,697,537	5,662,037
Aviation regulation and certification	767,649	833,967	839,467
Civil aviation security	149,605		
Research and acquisitions	195,559	207,600	207,600
Commercial space transportation	12,416	12,325	12,325
Regional coordination	85,735	82,192	82,192
Human resources	69,282	80,260	80,260
Financial services	50,178	48,782	48,782
Staff offices	108,704	84,890	84,890
Information Services		29,650	29,650
Total	6,886,000	7,077,203	7,047,203

¹ Does not reflect TASC reductions of \$2,820,000 pursuant to Public Law 107-87 and Public Law 107-117, nor supplemental appropriations of \$200,000,000 pursuant to Public Law 107-117.

² Excludes CSRS/FEHB accruals.

Contract tower program.—The Committee continues to support the contract tower program and the cost-sharing program as a cost-

effective way to enhance air traffic safety at smaller airports. The Committee’s recommendation includes \$78,000,000 to fund the

existing contract tower program, the remaining eligible non-Federal towers not currently operated by the FAA, and other non-

towered airports eligible for the program. In addition to these resources, the Committee has provided \$6,000,000 for the contract tower cost-sharing program.

Medallion Program.—The Committee recommendation includes \$1,500,000 to continue support for this Government and industry cooperative program to improve rural air safety in Alaska. The Medallion program has been overwhelmed with applications, and this funding will allow an expansion of the program beyond its original operating plan.

Alien Species Action Plan (ASAP).—The Committee provides \$3,000,000 out of available funds to continue the implementation of the Alien Species Action Plan which was adopted by the FAA as part of its August 26, 1998 Record of Decision approving certain improvements at Kahului Airport on the Island of Maui. These funds will be used to complete capital projects that were started in fiscal year 2002 and continue the operational requirements imposed by the ASAP.

National airspace redesign.—Of the funds provided for the activity, \$8,500,000 shall be for the NY/NJ Airspace Redesign effort and shall not be reprogrammed by the FAA for other activities, including airspace redesign activities outside the NY/NJ metro area. As the FAA moves forward with its redesign program in the New York/New Jersey and Philadelphia area, the Committee encourages the FAA, where appropriate, to consider air noise impacts as part of the redesign effort.

Spaceport licensing procedures.—The Committee is aware that the State of Oklahoma has a variety of locations that are ideal for orbital launches due to low population density and existing infrastructure. As such, the

State of Oklahoma has been working to develop a spaceport. The Committee strongly encourages the FAA Administrator to provide the necessary technical assistance and financial resources to assist with the licensing procedures for this potential spaceport.

Non-precision GPS approaches.—The Committee recommendation includes \$5,000,000 to continue with the work associated with increasing the number of non-precision GPS instrument approaches developed and published for airports that are not Part 139 certificated. Of these funds, \$1,500,000 is only for the Office of Regulation and Certification (AVR) to develop advisory materials and policy guidelines for the general aviation community.

Inspector technical training.—In March, 2002, the FAA released the results of a study which evaluated the commercial airplane certification process. One of the major findings of the study is that the FAA, airlines and aircraft manufacturers have not adequately communicated important safety information within and among their organizations. The study also concluded that proper training and adequate hands-on experience are essential to ensure that safety inspectors identify potential safety hazards. The Committee has provided \$4,000,000 more than the President's request to provide additional technical training for FAA's aviation safety inspectors as the agency moves forward with the implementation of its Operational Evolution Plan (OEP). Specifically, the additional funding will provide necessary training for inspectors in order to properly certify pilots and aircraft in the Reduced Vertical Separation Minimums. The Committee also encourages the FAA to develop a plan to im-

prove the coordination and communication process between the FAA's flight standards and aircraft certification offices.

FACILITIES AND EQUIPMENT

(AIRPORT AND AIRWAY TRUST FUND)

Appropriations, 2002 ¹	\$2,914,000,000
Budget estimate, 2003	2,981,022,000
Committee recommendation	2,981,022,000

¹ Does not reflect \$108,500,000 of supplemental appropriations pursuant to Public Law 107-117 or rescission of \$15,000,000 of unobligated balances pursuant to Public Law 107-87.

² Excludes CSRS/FEHB accruals.

Under the "Facilities and equipment" appropriation, safety, capacity and efficiency of the Federal airway system are improved by the procurement and installation of new equipment and the construction and modernization of facilities to keep pace with aeronautical activity and in accordance with the Federal Aviation Administration's comprehensive capital investment plan [CIP], formerly called the national airspace system [NAS] plan.

The Federal Aviation Administration's most recent estimate is that it will spend approximately \$41,901,000,000 on the Air Traffic Control Modernization effort from 1981 through 2004.

The bill includes an appropriation of \$2,981,022,000 for the facilities and equipment of the Federal Aviation Administration. The Committee's recommended distributions of the funds for each of the major accounts are as follows:

FACILITIES AND EQUIPMENT

Program name	Fiscal year 2002 enacted	Fiscal year 2003 estimate	Committee rec- ommendation
Activity 1, Improve Aviation Safety:			
Reduce Commercial Aviation Fatalities:			
Terminal Business Unit	\$160,355,000	\$141,000,000	\$161,300,000
Aviation Weather Services Improvements	22,520,000	23,440,000	23,440,000
Low Level Windshear Alert System (LLWAS)—Upgrade	1,533,000	1,600,000	1,600,000
Aviation Safety Analysis System (ASAS)	22,100,000	21,700,000	21,700,000
Integrated Flight Quality Assurance	2,000,000	500,000	500,000
Safety Performance Analysis System (SPAS)	2,100,000	2,100,000	2,100,000
Performance Enhancement Systems (PENS)	2,500,000	2,600,000	2,600,000
Aviation Weather Services Improvements (CWIS)	5,000,000
Total, Activity 1	39,300,000	29,800,000	32,800,000
Reduce General Aviation Fatalities: Safe Flight 21			
Other Aviation Safety Programs:			
Advanced Technology Development and Prototyping	55,991,000	41,100,000	41,600,000
Aircraft Related Equipment Program	7,500,000	16,000,000	16,000,000
National Aviation Safety Data Analysis Center (NASDAC)	1,800,000	2,000,000	2,000,000
Explosive Detection Technology	97,500,000	121,500,000	55,000,000
Aircraft Fleet Modernization	1,500,000
Volcano Monitoring	2,000,000	3,000,000
Total, Activity 1	423,699,000	403,340,000	363,640,000
Activity 2, Improve the Efficiency of the Air Traffic Control System:			
Increase the Number of Flights Handled by Airports:			
Terminal Business Unit	490,518,059	551,035,496	534,601,496
Aeronautical Data Link (ADL) Applications	38,113,200	33,200,000	29,700,000
Free Flight Phase 2	69,900,000	106,200,000	96,200,000
Air Traffic Management (ATM)	49,300,000	13,000,000	13,000,000
Free Flight Phase 1	122,570,000	39,900,000	39,900,000
Automated Surface Observing System (ASOS)	13,280,000	12,100,000	12,100,000
Improve Routing Efficiency for Flights En Route:			
Next Generation VHF Air/Ground Communications System (NEXCOM)	34,950,000	71,100,000	71,100,000
En Route Automation Program	46,200,000	71,050,000	75,250,000
Weather and Radar Processor (WARP)	24,171,000	13,600,000	13,600,000
Long Range Radar Sustainment	7,500,000
Improve Overall NAS Efficiency:			
Air Traffic Operations Management System (ATOMS)	1,000,000	1,100,000	1,100,000
NAS Management Automation Program (NASMAP)	1,100,000	1,900,000	1,900,000
Total, Activity 2	891,102,259	914,185,496	895,951,496
Activity 3, Increase Capacity of the NAS:			
Increase Capability of En Route Systems to Handle Flights:			
Navigation and Landing Aids	272,589,200	249,800,000	295,735,000
Oceanic Automation System	88,100,000	87,400,000	76,349,000
Gulf of Mexico Offshore Program	6,900,000	2,300,000	2,300,000
Voice Switching and Control System (VSYS)	16,000,000	14,000,000	14,000,000
Transponder Landing System	6,000,000	12,000,000
Total, Activity 3	389,589,200	353,500,000	400,384,000
Activity 4, Improve Reliability of the NAS:			
Replace Terminal Equipment to Prevent Decreased Performance:			
Guam CERAP—Relocate	6,400,000	5,000,000	5,000,000
Terminal Voice Switch Replacement (TVSR)/Enhanced Terminal Voice Switch	20,000,000	6,200,000	17,200,000
Airport Cable Loop Systems—Sustained Support	4,000,000	4,000,000	5,500,000
Replace En Route Equipment to Prevent Decreased Performance:			
En Route Automation Program	155,863,000	142,800,000	147,500,000

FACILITIES AND EQUIPMENT—Continued

Program name	Fiscal year 2002 enacted	Fiscal year 2003 estimate	Committee rec- ommendation
ARTCC Building Improvements/Plant Improvements	44,000,000	40,200,000	40,200,000
Air Traffic Management (ATM)	24,500,000	24,500,000	24,500,000
Replace Supporting Systems that Impact Overall NAS Performance:			
Critical Telecommunications Support	1,900,000	1,000,000	1,000,000
FAA Telecommunications Infrastructure (FTI)	39,900,000	46,600,000	46,600,000
Air/Ground Communications Infrastructure	30,700,000	22,800,000	22,800,000
Voice Recorder Replacement Program (VRRP)	6,000,000	3,300,000	3,300,000
NAS Infrastructure Management System (NIMS)	16,000,000	29,100,000	29,100,000
Flight Service Station (FSS) Modernization	4,700,000	5,700,000	5,700,000
FSAS Operational and Supportability Implementation System (OASIS)	33,943,000	19,710,000	19,710,000
Weather Message Switching Center Replacement (WMSCR)	2,500,000	2,000,000	2,000,000

Total, All Activities	2,914,000,000	2,981,022,000	2,981,022,000

IMPROVE AVIATION SAFETY

Safety and Security Activities.—The Committee recommends \$6,000,000 for additional aviation safety and security activities within FAA's terminal business unit in activity one. Within the funds provided, the Committee provides \$500,000 for specialized training to fight and prevent aircraft fires at the Rocky Mountain Emergency Services Training Center; \$500,000 for aviation security systems upgrades at Daniel Webster College; and, \$5,000,000 to an aviation security and science center at Embry-Riddle Aeronautical University.

Advanced Technology Development and Prototyping.—The Committee provides \$41,600,000 for the advanced development and prototyping program which is \$500,000 more than the President's budget request. The Committee is aware of a potentially cost effective technology called the Runway Obstruction Warning System (ROWS). The Committee has included \$500,000 to further test and develop this technology at the Gulfport-Biloxi Airport. Also included within the funds provided is \$2,000,000 for the airfield improvement program authorized under section 905 of Public Law 106-181. The recommended funding level includes \$5,500,000 to continue the wind profiling and weather research activities at Juneau, Alaska.

Explosives Detection Technology.—The administration's budget for FAA "Facilities

and Equipment" includes \$124,000,000 for Explosives Detection Technology of which \$2,500,000 is for personnel and support costs. Funds for Explosive Detection Technology were provided in fiscal year 2002 under both the Department of Transportation and Department of Defense Appropriations bills. Requested funds for fiscal year 2003 will be used for the deployment of FAA certified Explosive Detection Systems as well as Threat Image Projection Systems, Explosive Trace Detection Devices and Computer-Based Training Platforms. Though this funding has been requested within the FAA budget, the administration's budget request assumes that these funds will be transferred to the Transportation Security Administration. The Committee has fully funded the request for explosive detection technology by providing \$55,000,000 under "Facilities and Equipment" to transfer to the Transportation Security Administration (TSA) and providing the balance of \$69,000,000 directly to TSA. The Committee anticipates future requests for explosive detection technology and believes that management of this acquisition program and future funding requests should be transferred to the TSA which assumed responsibility for providing, installing, and operating bomb screening devices at the nation's airports under the Aviation and Transportation Security Act.

Safe Flight 21.—The Committee recommends \$32,800,000 for Safe Flight 21, which is \$3,000,000 more than the budget request. The Committee is encouraged by the success of the Capstone initiative and has provided additional funding to accelerate deployment of the Capstone infrastructure in Southeastern Alaska. The Committee continues to believe that Safe Flight 21 technologies show promise of reducing runway incursions. As the program proceeds, attention should be given to how this program could promote safer ground traffic at airports and how ADS-B and other technologies could be used to address the runway incursion problem.

Volcano Monitor.—The Committee recommendation provides \$3,000,000 to extend the aviation safety benefits of the seismic monitoring network to remote areas.

Airport Surface Detection Equipment (ASDE-X).—The Committee provides \$104,600,000 for the Airport Surface Detection Equipment (ASDE-X) program. The amount provided is \$14,300,000 more than the administration's request. The ASDE-X program will improve runway safety and prevent runway incursion accidents by improving airport controller situational awareness. This is achieved by providing visual representation of the traffic situation on the airport surface to the controller in the form of aircraft position information, flight call signs, and by alerting controllers through aural and visual alarms

that a potential accident may occur. The amount provided above the administration's request will fund the development of new multi-lateration capability for deployment at the following high volume ASDE-3 sites: Memphis, Tennessee; Louisville, Kentucky; St. Louis, Missouri; Dallas, Texas; Chicago, Illinois; Los Angeles, California; and Atlanta, Georgia.

IMPROVE THE EFFICIENCY OF THE AIR TRAFFIC CONTROL SYSTEM

New York Integrated Control Complex.—The Committee recommendation includes \$5,000,000 to plan and develop a facility needed to integrate the New York Air Traffic Control Center and TRACON, which are currently located 20 miles apart in outdated facilities. This integration is critical because the New York-New Jersey airspace, the most congested in the United States, is currently inefficiently managed due to the fact that controllers in separate locations must communicate by telephone under extremely trying circumstances. As a result, the controllers must be extremely cautious when moving planes in and out of the airspace. The result is often costly and exorbitant delays, which in turn generate potential safety vulnerabilities.

Aeronautical Information and Flight Planning Enhancements (AIFPE).—Within the En Route Automation Program, the Committee has provided an additional \$4,200,000 for Aeronautical Information and Flight Planning Enhancements. This additional funding will provide for new development of hand-off capability between Canada, the United States and Mexico. At present, this procedure is currently done manually. The Committee believes that automating this process will enhance both the safety and efficiency of controlled aircraft within North America.

Automated surface observing system.—The Committee's recommendation includes \$12,100,000 for the automated surface observing system program as requested in the President's budget. Within the funds provided, the Committee includes \$500,000 to implement an automated weather sensor system at the Driggs-Reed Memorial Airport in Idaho Falls, ID.

Long Range Radar Sustainment (LRRS).—The Committee has provided \$7,500,000 for Long Range Radar Sustainment. The amount provided is the same as that provided in the recently enacted Supplemental Appropriations bill of fiscal year 2002. Together these funds will provide for a \$15,000,000 sustainment program for the ARSR-4 radar systems located on the perimeter of the United States. While these radars were scheduled to be decommissioned prior to the events of September 11th, it is now apparent both to the FAA and Department of Defense that these aging radars must remain in operation.

Free flight phase two.—The Committee recommendation includes \$96,200,000 for Free Flight Phase II activities. The recommendation is \$26,300,000 more than the fiscal year 2002 enacted level and \$10,000,000 less than the budget estimate. Within the available funds, the Committee has provided full funding for the User Request Evaluation Tool (URET).

Aeronautical Data Link (ADL) Applications.—The Committee has reduced the budget request for Aeronautical Data Link Applications to \$29,700,000 which is \$3,500,000 lower than the budget request. The Aeronautical Data Link program is designed to provide data link applications between ground and airborne automation systems. This program is designed to reduce voice congestion as well as grant pilots direct access to weather and air traffic control information while reducing voice communication errors. Re-

cently FAA officials have encountered technical software development challenges in certifying the en route controller/pilot data link (CPDLC) system. As such, the FAA has postponed the deployment of the CPDLC system by roughly 2 years. The funds reduced from the budget request include \$2,000,000 from the CPDLC Build II project; \$500,000 from the Flight Information Service Data Link program; and, \$1,000,000 from the CPDLC Decision Support System Services.

Airport surveillance radar (ASR-11).—The Committee has provided \$90,000,000 for the Airport Surveillance Radar (ASR-11) program. The amount provided is \$33,400,000 less than the budget request. The new ASR-11 radar is expected to provide digital radar data necessary to interface with new automation systems, such as the Standard Terminal Automation Replacement System (STARS). The FAA expects to procure this radar as part of a larger contract vehicle managed by the United States Air Force. Due to concerns over delivery delays and the performance of this radar, the FAA ordered that the ASR-11 vendor provide its final system for the development, test, and evaluation phase at the end of calendar year 2001. That date was then slipped until March of 2002. The FAA and the Air Force have been conducting such testing individually. It appears that certain problems with the radar's performance may persist, including the appearance of false targets on the radar screen in numbers that exceed the agency's specification. The FAA, like the Air Force, is now bringing the radar into operational testing to determine whether these and other problems can be resolved in the operational environment. The Committee will monitor the progress of this program carefully. Given the testing delays already encountered and the uncertainty that surrounds the next round of testing, the Committee has reduced funding for the program below the requested level.

Radar at Gallatin Airport.—The Committee is concerned about potential safety risks associated with the lack of radar coverage at Gallatin Airport, Montana, an airport whose enplanements and operations are growing. The Committee directs the administrator to conduct a site survey for the installation of the appropriate radar at the airport.

Precision runway monitor (PRM).—The Committee has provided a total of \$18,000,000 for the procurement of three precision runway monitors (PRMs). This rapid update special purpose radar system enables aircraft to approach the airport in dual arrival streams with shorter separation distances and in deteriorating weather conditions. The vendor of this technology has offered to extend the existing price of PRM units, making it possible for the FAA to achieve substantial savings for the taxpayer through a three-unit purchase. The Committee expects the FAA to initiate a procurement of three systems, with the expectation that systems will be installed at Hartsfield International Airport, Detroit Metropolitan-Wayne County Airport, and one other site to be determined. Within the amount provided, sufficient funds are made available for the installation of a PRM already under contract at Cleveland Hopkins International Airport. The Committee believes that this installation will better ensure that the full capacity benefits of new runway 6L/24R will be realized.

Terminal Air Traffic Control Facilities—Replace.—The Committee recommendation provides \$103,566,000 for this program. The recommendation provides funding for the following projects:

Fiscal Year 2003 Terminal Air Traffic

Pago Pago, American Samoa	\$175,000
Baltimore, MD	2,088,581

Chantilly, VA	600,000
Deer Valley, AZ	803,196
Memphis, TN	1,147,000
Portland, OR (TRACON)	5,500,000
Dallas, TX (Addison)	5,700,000
Reno, NV	8,349,000
Fort Wayne, IN	3,539,000
Newport News, VA	6,400,000
La Guardia, NY	9,460,000
St. Louis, MO (TRACON)	1,500,000
Corpus Christi, TX	700,000
Beaumont, TX	1,000,000
Seattle, WA (ATCT)	550,000
Salina, KS	500,000
Newark, NJ	3,000,000
Pt. Columbus, OH	2,100,000
Grand Canyon, AZ	255,898
Savannah, GA	919,190
Newburgh, NY	2,065,000
Richmond, VA	550,000
Vero Beach, FL	878,775
Everett, WA	925,000
Roanoke, VA	550,000
Merrimack, NH (BCT)	4,700,000
Seattle, WA (TRACON)	4,782,701
Phoenix, AZ	14,107,919
Manchester, NH	943,609
Wilkes Barre, PA	2,000,000
Topeka, KS	1,690,131
Billings, MT	2,120,000
Missoula, MT	2,000,000
Provo, UT	666,000
Albuquerque, NM	1,800,000
Columbus, MS	1,500,000
Las Vegas, NV	3,000,000
Columbia, SC	1,000,000
Reno, NV (TRACON)	4,000,000

Total 103,566,000

Oakland Tower Replacement.—The Committee has reduced the request for Terminal Air Traffic Control Facilities Replacement by \$19,000,000. This reduction is attributable to the deletion of funding for the replacement of the air traffic control tower at Oakland, California. Based on the FAA's newly updated contracting schedule, the agency will not be able to contract for this tower within fiscal year 2003.

Static Transfer Switches.—The Committee commends the FAA for procuring and installing static transfer switches at en route facilities. The switches enable air traffic control centers to switch to back-up power systems quickly in order to prevent computers from "crashing." The Committee encourages the FAA to proceed expeditiously with this effort.

Notams Graphics.—The Committee directs the FAA to expand the use of graphics to not only flight service stations but also to provide pilots with advisory graphics of information contained in the NOTAMs including temporary flight restrictions. It is important that graphics on Special Use Airspace also be made available, and the Committee believes that advisory graphics can be conveyed through the Direct User Access Terminal System and other sources, including the internet.

INCREASE CAPACITY OF THE NAS

Navigation and landing aids.—The Committee provides a total of \$307,735,000 to modernize the FAA's navigation and landing aids systems which is \$57,935,000 more than the President's budget request. Within the funds provided, the Committee includes \$1,500,000 for navigation aids and equipment at the Nikolski Airport; \$4,000,000 for navigation and landing improvements at the Cincinnati Northern Kentucky International Airport; \$4,000,000 for navigation and landing improvements for Lambert-St. Louis International Airport; and, \$800,000 for remote transmitter receivers at Las Vegas-McCarran International Airport.

Wide Area Augmentation System (WAAS).—The Committee continues to be concerned

about the diminishing return on investment expected from the deployment of the Wide Area Augmentation System as well as the accuracy of the FAA's budget for this program during consideration of the fiscal year 2002 Appropriations bill. The administrator submitted a special request for funding to obtain a third geo-stationary satellite to support the WAAS signal. The Committee funded this special request but the FAA has now informed the Committee that the initiative, as so many others within the WAAS program, will be delayed. The FAA has now decided to execute a competitive contract for this satellite communications service. This has resulted in a diminished requirement for funds in fiscal year 2003. As a result, the Committee has lowered funding for the WAAS program to \$98,900,000, a reduction of \$11,600,000 from the budget request.

Loran-C Upgrade/Modernization.—Within the funds provided for navigation and landing aids, the Committee includes \$21,000,000 for Loran-C upgrades and modernizations.

Instrument Landing System (ILS)—Establish upgrade.—The Committee recommendation provides \$36,180,000 and directs the increase above the budget request to be distributed as follows:

Mesa Intermountain Mu-	
nicipal Airport, AR	\$580,000.00
Winder-Barrow Airport,	
GA	4,000,000.00
Olive Branch Airport, MS ..	600,000.00
Reno/Tahoe International	
Airport, NV	1,500,000.00
Pangborn Memorial Air-	
port, WA	1,500,000.00
Wasilla Airport, AK	1,000,000.00
Stuttgart Municipal Air-	
port, AR	2,000,000.00
Talladega Municipal Air-	
port, AL	1,500,000.00

Transponder Landing System (TLS).—The Committee recommendation provides \$12,000,000 an increase of \$6,000,000 over the fiscal year 2002 appropriated level to acquire and site TLS units. The Committee directs the FAA to conduct surveys and cost benefit analysis for TLS deployments with the appropriated funding at the following locations:

Driggs-Reed Memorial and	
Sandpoint, ID	\$4,000,000
William H. Morse Airport,	
Bennington VT	2,000,000
Elko and Minden-Tahoe	
Airports, NV	4,000,000
La Grand/Union County	
Airport, OR	2,000,000

In addition, the Committee recognizes that most of these sites are repeated from previous legislation and directs the FAA to use previous appropriations expeditiously to install these and previously named sites. The Committee further expects the FAA to expeditiously install and commission all previously named sites that are found to be suitable for installation once type acceptance has been reinstated.

Approach Lighting System Improvement (ALSIP).—The Committee recommendation provides \$29,755,000 for the procurement and deployment of runway lighting system to facilitate improved and precision landing capabilities at various airports. The Committee directs funding to be allocated to the airports listed below as follows:

Auburn-Opelika R.G. Pitts	
Airport, AL (MALSR)	\$1,500,000
Reno-Stead Airport, NV	
(MALSR)	2,400,000
Baton Rouge Municipal	
Airport, LA (MALSR)	750,000
Cleveland Hopkins Int'l,	
Runway 24L (MALSR)	400,000

Alaska statewide rural air-	
port lighting	11,000,000
North Little Rock Municip-	
al, AR (MALSR)	450,000

In addition, the Committee provides \$6,000,000 to reduce the backlog of MALSR systems that are awaiting installation and \$4,000,000 to procure additional systems. The Committee recommends that the FAA continue to procure the latest equipment that has been approved for use in the National Aerospace System (NAS).

Advanced technology and oceanic procedures.—The Committee has been supportive of the need to improve the capability of air traffic services over the Atlantic and Pacific Oceans and has been concerned about delays and difficulties the FAA has experienced in the past with the Advanced Technologies and Oceanic Procedures (ATOP) procurement. Although considered a non-developmental acquisition, it was determined after the contract was awarded in June, 2001, that the amount of essential software to be developed and tested was severely underestimated. Due to the additional complexity, delays in software development continue to plague the procurement, and the factory-level acceptance testing which was scheduled to be completed in September, 2002, has yet to begin. The Committee urges the FAA to aggressively manage this procurement and deletes \$11,051,000 in anticipation of the cascading effect software development problems will have on the delivery of the first system.

IMPROVE RELIABILITY OF THE NAS

Airport cable loop systems.—The Committee recommendation provides \$5,500,000 to continue FAA's efforts to upgrade and replace deteriorated cable of the surveillance and landing communications systems within the National Airspace System. Within the request provided is \$1,500,000 for a fiber optic loop around Las Vegas-McCarran International Airport.

Flight service station switch modernization.—The Committee has included \$13,200,000 for the flight service station switch modernization program as requested in the budget request. This modernization program will replace 65 voice switching systems at Automated Flight Service Stations and provide eight small tower voice switches for the non-automated Flight Service Stations in the Alaskan region. The Committee believes it would be prudent for the FAA to deploy the switches consistent with its OASIS implementation plan. At the same time, the Committee cautions FAA not to use this direction as a reason to delay the implementation of the OASIS system.

Terminal Voice Switch Replacement (TVSR)/Enhanced Terminal Voice Switch (ETVS).—The Committee provides \$17,200,000 for the Terminal Voice Switch Replacement (TVSR) program. This modernization program is designed to replace 421 electro-mechanical and non-supportable electronic voice pitching systems. The amount provided over the budget request will be used for the following activities: \$3,000,000 will be used for additional conferencing capability to improve inter-agency coordination during periods of security vulnerabilities which was identified by the FAA after the events of September 11th, 2001; and, \$8,000,000 will be used to increase substantially the number of ETVS/RDV5 units procured in 2003.

Alaska NAS Interfacility Comm System (ANICS).—The Committee recommendation includes \$4,000,000. This is \$1,100,000 more than the requested level of funding and is the same level appropriated in fiscal year 2002. With this amount, sufficient funding has been provided to begin installation at a second Phase II site this year.

Initial Academy Training System (IANTS).—Within the En Route Automation Program,

the Committee has provided \$16,900,000 over and above the budget request for the Initial Academy Training System program (IATS). These additional funds will provide a standardized Display System Replacement (DSR) training platform at the FAA Academy located in Oklahoma City, OK. At present, newly hired air traffic controllers train at the academy on outdated M-1 consoles and do not receive any training on the standardized Display System Replacement platform until they arrive at an Air Route Traffic Control Center (ARTCC). These additional funds will be critical to the training of what is expected to be an increased number of new recruits to replace controllers entering retirement.

En Route Automation Program.—The Committee has reduced the funding requested for the En Route Automation Program by \$12,200,000. This reduction is attributable to a level of unobligated balances that continue to mount in the En Route Communications Gateway program. Over a 3 year period between fiscal year 2000 and 2002, the Committee has appropriated \$104,700,000 for the Eunomia/ECG Program. The FAA has rescored this program, which is designed to replace the Peripheral Adapter Module Replacement Item (PAMRI) equipment, to meet other critical needs as determined by the FAA's Air Traffic Services office. Due to the delays associated with the rescored of the ECG program, it is anticipated that the program will have an unobligated balance of \$12,200,000 entering fiscal year 2003. The Committee has adjusted the fiscal year 2003 budget request to account for this unobligated balance.

FAA Telecommunications Infrastructure (FTI).—The Committee has provided \$46,600,000 for FAA's Telecommunications Infrastructure (FTI). The amount provided is the same as the budget request. The FTI Program is intended to improve telecommunications services within the FAA's NAS and non-NAS infrastructures. The current incumbent provider of these services is WorldCom. Given the recent financial troubles besetting this company, the Committee is concerned with the company's ability to continue to provide critical telecommunications services for the nation's air traffic control infrastructure. While the FAA has now awarded the new FTI contract to another vendor, WorldCom recently signed a 5-year bridge contract to provide for a transition period between WorldCom and the new provider. The Committee is concerned about WorldCom's ability to perform all elements of the 5-year bridge contract. As such, the Committee directs that the administrator develop a contingency plan for the continuation of telecommunications services in the event that WorldCom is incapable of fulfilling its contract obligations. The Committee expects the administrator to coordinate with the Office of the Inspector General in the development of this contingency plan.

Air/Ground Communications Infrastructure.—Within the funds provided for air/ground communications infrastructure, the Committee has included \$3,000,000 to develop and test a prototype capability to transmit critical flight data from aircraft to ground station using currently installed data management and communications equipment.

IMPROVE THE EFFICIENCY OF MISSION SUPPORT

DOD/FAA facilities transfer.—The Committee recommends \$3,200,000, including \$2,000,000 for the Lawton/Fort Sill Regional Airport ARAC (Airport Radar Approach Control).

En route communications and control facilities improvements.—The Committee provides \$1,307,953 for en route communications and control facilities improvements, which is

\$250,000 more than the President's budget. Within the amount provided, the Committee includes \$250,000 for a remote communications outlet at Keokuk, IA Airport.

Asset Support Chain Management (ASCM).—The Committee has provided \$5,000,000 for the Logistics Support Systems and Facilities activity. This program will provide a single integrated planning, inventory, and asset management solution to improve the FAA's performance, financial, and logistics information systems. The amount provided is \$4,300,000 less than the budget request. This reduction is attributable to the slippage in a number of programmed elements.

Transition Engineering Support.—The Committee has provided \$37,000,000 for Transition Engineering Support. This program supports the NAS Implementation Support Contract (NISC). The amount provided is \$2,000,000 less than the budget request and the Committee believes that this slight reduction can be easily accommodated without any significant impact on the agency's overall NAS modernization effort.

Technical Services Support Contract (TSSC).—The Committee has provided

\$44,700,000 for the Technical Services Support Contract. The amount provided is \$2,000,000 less than the level in the budget request. This adjustment is attributable to savings adjusted by the FAA resulting from the transition from a new TSSC contract the reduction is expected to have no impact on system performance.

Resource Tracking Program (RTP).—The Committee has provided a total of \$2,500,000 for the Resource Tracking Program. This amount is \$1,200,000 less than the budget request. This reduction will result in the deferral of software maintenance upgrades. However, this deferral should in no way undermine the FAA's ability to improve the integrity of its internal budgeting processes.

RESEARCH, ENGINEERING, AND DEVELOPMENT (AIRPORT AND AIRWAY TRUST FUND)

Appropriations, 2002 ¹	\$195,000,000
Budget estimate, 2003 ²	124,000,000
Committee recommendation	124,000,000

¹ Does not reflect \$50,000,000 of supplemental appropriations pursuant to Public Law 107-117.
² Excludes CSRS/FEHB accruals.

This appropriation finances research, engineering, and development programs to improve the national air traffic control system by increasing its safety, security, productivity, and capacity. The programs are designed to meet the expected air traffic demands of the future and to promote flight safety. The major objectives are to keep the current system operating safely and efficiently; to protect the environment; and to modernize the system through improvements in facilities, equipment, techniques, and procedures in order to insure that the system will safely and efficiently handle the volume of aircraft traffic expected to materialize in the future.

COMMITTEE RECOMMENDATION

The Committee recommendation includes \$124,000,000, for the FAA's research, engineering, and development activities.

A table showing the fiscal year 2002 enacted level, the fiscal year 2003 budget estimate, and the Committee recommendation follows:

RESEARCH, ENGINEERING AND DEVELOPMENT

Program Name	Fiscal year 2002 enacted	Fiscal year 2003 estimate	Committee recommendation
Improve Aviation Safety:			
Reduce Commercial Aviation Fatalities:			
Fire Research and Safety	\$5,242,000	\$6,429,000	\$6,429,000
Propulsion and Fuel Systems	5,998,000	3,998,000	4,998,000
Advanced Materials/Structural Safety	1,338,000	1,374,000	1,374,000
Flight Safety/Atmospheric Hazards Research	4,494,000	3,101,000	4,101,000
Aging Aircraft	25,600,000	20,974,000	20,974,000
Aircraft Catastrophic Failure Prevention Research	2,794,000	1,920,000	1,920,000
Flightdeck/Maint/Sysy Integration Human Factors	8,003,000	8,411,000	8,411,000
Reduce General Aviation Fatalities:			
Propulsion and Fuel Systems	2,570,000	1,713,000	1,713,000
Advanced Materials/Structural Safety	1,636,000	1,679,000	1,679,000
Flight Safety/Atmospheric Hazards Research	1,926,000	1,329,000	1,329,000
Aging Aircraft	6,400,000	5,243,000	5,243,000
Flightdeck/Maint/Sysy Integration Human Factors	1,903,000	2,000,000	2,000,000
Aviation System Safety:			
Aviation Safety Risk Analysis	5,784,000	6,926,000	6,926,000
ATC/AF Human Factors	8,500,000	10,317,000	10,317,000
Aeromedical Research	6,121,000	6,603,000	6,603,000
Weather Research	13,877,000	19,406,000	19,406,000
Improve Efficiency of Air Traffic Control System: Weather Research Efficiency	9,791,000	9,099,000	12,099,000
Reduce Environmental Impacts of Aviation: Environment and Energy	22,081,000	7,698,000	2,698,000
Improve Efficiency of Mission:			
System Planning and Resource Management	1,200,000	1,459,000	1,459,000
Technical Laboratory Facilities	12,250,000	6,455,000	6,455,000
Strategic Partnership	400,000	610,000	610,000
System Security Technology:			
Explosives and Weapons Detection	32,624,000
Airport Security Technology Integration	2,084,000
Aviation Security Human Factors	5,163,000
Aircraft Hardening	4,640,000
Information System Security	2,581,000
Accountwide adjustment: CSRS/FEHB accruals	−2,744,000	−2,744,000
Total Appropriation	195,000,000	124,000,000	124,000,000

IMPROVE AVIATION SAFETY

Propulsion and fuel systems.—The Committee recommendation provides a total of \$6,711,000 for propulsion and fuel systems research to reduce commercial and general aviation fatalities. Within the funds provided, the Committee includes \$1,000,000 to continue the activities of the specialty metals processing consortium and \$1,000,000 for additional research into the performance and combustion characteristics of aviation grade ethanol fuels.

Flight safety/atmospheric hazards research.—The Committee recommendation includes a total of \$5,430,000, including \$3,000,000 for flight safety/atmospheric hazards research to continue the development of in-flight simulator training for civilian and commercial pilots at the Roswell Industrial Center.

Aging aircraft.—The Committee recommendation includes a total of \$26,217,000 for the aging aircraft program to reduce commercial and general aviation fatalities. The Committee has provided resources to continue the collaborative efforts between the FAA and several public and private organizations including the Center for Aviation

Systems Reliability (CASR), the Airworthiness Assurance Center of Excellence (AACE) and the Engine Titanium Consortium (ETC). Within the appropriation, the recommendation includes \$3,500,000 for the Center for Aviation Systems Reliability (CASR); \$4,000,000 for the Airworthiness Assurance Center of Excellence (AACE); \$3,000,000 for the Engine Titanium Consortium (ETC); \$3,000,000 for the Aging Aircraft Non-destructive Inspection Validation Center (AANC); and, \$2,500,000 for the Center for Aviation Research and Aerospace Technology (CARAT).

Anomalous flight monitor.—Within the funds provided, the Committee includes \$3,000,000 to develop a pilot project at Seattle-Tacoma International Airport to create a system that integrates and leverages the capabilities of mobile software objects to monitor and understand current air traffic operations and to sense the "state" of an aircraft for anomalous flight conditions.

Weather research safety.—The Committee recommendation provides \$19,406,000 to continue the FAA's weather research program that is focused on system safety. Within the

funds provided for weather research, the Committee recommendation includes \$5,000,000 to continue research to identify wake turbulence by utilizing pulsed laser Doppler radar technology.

IMPROVE THE EFFICIENCY OF AIR TRAFFIC CONTROL SYSTEM

Weather research efficiency.—The Committee includes \$12,099,000 for weather research to improve the efficiency of the air traffic control system. Within the funds provided, the Committee includes \$5,000,000 for wake turbulence research to expedite the development of new standards and procedures.

REDUCE ENVIRONMENTAL IMPACT OF AVIATION

Environment and energy research.—The Committee provides \$2,698,000 for environment and energy research, a reduction of \$5,000,000 due to budget constraints.

GRANTS-IN-AID FOR AIRPORTS

(LIQUIDATION OF CONTRACT AUTHORIZATION)

(AIRPORT AND AIRWAY TRUST FUND)

Appropriations, 2002 ¹	\$1,800,000,000
Budget estimate, 2003	3,100,000,000

Committee recommendation

3,100,000,000

¹ Does not reflect \$175,000,000 of direct supplemental appropriations pursuant to Public Law 107-117.

Chapter 471 of title 49, U.S.C. authorizes a program of grants to fund airport planning and development and noise compatibility planning and projects for public use airports in all States and territories.

The Committee recommends \$3,100,000,000 in liquidating cash for grants-in-aid for airports. This is consistent with the Committee's obligation limitation on airport programs for fiscal year 2002 and for the payment of previous years' obligations.

COMMITTEE RECOMMENDATION

Obligation limitation, 2002	\$3,300,000,000
Budget estimate, 2003	3,400,000,000
Committee recommendation	3,400,000,000

The total program level recommended for fiscal year 2003 for grants-in-aid to airports is \$3,400,000,000 and is intended to be sufficient to continue the important tasks of enhancing airport and airway safety, ensuring that airport standards can be met, maintaining existing airport capacity, and developing additional capacity. The amount provided includes \$81,049,000 for administration and airport technology research. Also, the Administration proposes that the grants-in-aid funds be used to make up for shortfalls in overflight fee collections to fund the essential air service program.

The Committee notes that a sizable alternative source of funding is available to airports in the form of passenger facility charges [PFC's]. The first PFC charge began for airlines tickets issued on June 1, 1992. DOT data shows that as of May 1, 2002, 330 airports have been approved for collection of PFC's in the amount of \$34,000,000,000. During calendar year 2001 airports collected \$1,590,000,000 in PFC charges, and \$1,940,000,000 is estimated to be collected in calendar year 2002. Of the airports collecting PFC's, approximately one-fifth collected about 90 percent of the total, and all of these are either large or medium hub airports. Prior to the authorized increase in PFC charges, the DOT estimated that these airports will collect more than \$1,610,000,000 in

calendar year 2001, depending on the number of applications received and approved and assuming current statutory authority. The first collections at the new \$4.50 PFC level began on April 1, 2001 at 31 airports. Eventually, the funding to airports from the 50 percent nominal increase in authorized passenger facility charges will result in dramatically increased resources for airport improvements, expansions, and enhancements.

LIMITATION ON OBLIGATIONS

The bill includes a limitation on obligations of \$3,400,000,000 for fiscal year 2003. This is the same as the President's budget request and \$100,000,000 over the fiscal year 2002 enacted level.

A table showing the distribution of these funds compared to the fiscal year 2002 levels and the President's budget request follows:

	<i>Fiscal year 2003 (Est.)</i>
AIR-21 Appropriations	
Limitation	\$3,400,000,000
Airports Operations	-64,620,000
Research & Development	-16,429,000
Small Community Program	-20,000,000
Available for AIP Grants	3,298,951,000
Primary Airports	1,028,358,014
Cargo (3.0 percent)	98,968,530
Alaska Supplemental	21,345,114
States (20.0 percent):	
Non-Primary Entitlement	341,887,082
State Apportionment by Formula	317,903,118
Subtotal	659,790,200
Carryover Entitlement	300,000,000
Subtotal Entitlements	2,108,461,858

Small Airport Fund:

Non Hub Airports	183,303,989
Non Commercial Service	91,651,994

	<i>Fiscal year 2003 (Est.)</i>
Small Hub	45,825,997
Subtotal Small Airport Fund	320,781,980
Subtotal Non Discretionary	2,429,243,838
Noise (34 percent of Disc)	295,700,436

Remaining Discretionary	133,369,593

Subtotal Other Discretionary	533,478,373
Subtotal Discretionary	\$869,707,162
GRAND TOTAL	3,298,951,000

AIRPORT DISCRETIONARY GRANTS

Within the overall obligation limitation in this bill, over \$869,000,000 is available for discretionary grants to airports. The Committee has carefully considered a broad array of discretionary grant requests that can be expected in fiscal year 2003. Specifically, the Committee expects the FAA to give priority consideration to applications for the projects listed below in the categories of the AIP for which they are eligible. If funds in the remaining discretionary category are used for any projects in fiscal year 2003 that are not listed below, the Committee expects that they will be for projects for which FAA has issued letters of intent (including letters of intent the Committee recommends below that the FAA subsequently issues), or for projects that will produce significant aviation safety improvements or significant improvements in systemwide capacity or otherwise have a very high benefit/cost ratio.

Within the program levels recommended, the Committee directs that priority be given to applications involving the further development of the following airports:

Subaccount	Project Name
Abilene Airport, TX	Various Improvements
Akutan Airport, AK	Various Improvements
Allen Army Airbase, AK	Various Improvements & Maintenance
Anchorage Int'l Airport, AK	Various Improvements
Andalusia Opp., AL	Runway/Taxway Overlay
Andrews-Murphy Airport, NC	Various Improvements
Ankeny Regional Airport, IA	Hanger, Taxway, Apron
Artesia Municipal Airport, NM	Various Improvements
Atka Airport, AK	Various Improvements
Atmore Municipal Airport, AL	Improvements in Safety Zones
Austin Straubel Field, WI	Various Improvements
Autauga County Airport, AL	Overlay, Widen Existing Runway
Baltimore-Washington Int'l Airport, MD	Various Improvements
Barbour County Regional, WV	Various Improvements
Barker Regional Airport, KY	Runway Extension, Various Improvements
Barter Island Dew Airport (Kaktovik), AK	Various Improvements
Bartlesville Municipal Airport, OK	Runway, Safety Area
Batesville Regional Airport, AR	Various Improvements
Baxter County Regional Airport, AR	Runway
Benedum Airport, WV	Various Improvements
Bert Mooney Airport, MT	Various Improvements
Billings Airport, MT	Terminal & Security
Birmingham International Airport, AL	Various Improvements
Bismarck Municipal Airport, ND	Terminal Replacement
Blackwell Field Airport, AL	Land Acquisition for Runway Extension
Bob Wiley Field Airport, SD	Various Improvements
Bowling Green/Warren Regional, KY	Facility
Bowman Field Airport, KY	Various Improvements
Braxton County Airport, WV	Various Improvements
Bremerton Airport, WA	Various Improvements
Bruce Campbell Field Airport, MS	Land Acq., Taxway
Buffalo Int'l Airport, NY	Runway, Taxiway Ext./Rehab.
Burlington-Alamance Airport, NC	Various Improvements
Bush Field Airport, GA	New Terminal, Access & Parking
Carl P. Savage Airport, GA	Runway Extension & Widening
Cartersville/Bartow Airport, GA	Various Improvements
Central Illinois Regional Bloomington-Normal, IL	Airport Improvement Projects
Central Nebraska Regional Airport, NE	Taxway & Runway
Central Wisconsin Airport, WI	Runway, Taxiway
Centre Municipal Airport, AL	Land Acquisition & Runway Ext.
Chan Gurney Airport, SD	Runway Lighting System
Charlottesville-Albermarle Airport, VA	Various Improvements

Subaccount	Project Name
Cherokee County Airport, GA	Runway Ext., Taxiway & Hangar
Cherry Capital Airport, MI	Terminal Construction
Cheyenne Airport, WY	Runway Safety Area & Taxiway
Cheyenne Airport, CO	Runway Safety & Taxiway
Cheyenne Eagle Butte, SD	Reservation Hangar
Chippewa County Int'l Airport, MI	Passenger Terminal
Cincinnati Northern Kentucky Regional, KY	Feasibility Study
Clarion County Airport, PA	Runway Expansion
Clark County Airport, IN	Lengthen Runway
Cleveland-Hopkins Int'l Airport, OH	Noise Mitigation
Clinton Airport, IA	Runway, Taxiway Paving
Concord Regional Airport, NC	Runway Ext., Land Acquisition
Connellsburg Airport, PA	Runway Extension
Council Bluffs Airport, IA	Land Acquisition, Runway
Craig Field Airport, AL	Runway Improvements
Cumberland Regional Airport, MD	Various Improvements
Dane County Regional Airport, WI	Runway Construction
Davenport Municipal Airport, IA	New Terminal Building
Davis City Airport, WV	Various Improvements
Denton Municipal Airport, TX	Improvements
Denver International Airport, CO	Runway
Detroit Metro Wayne County Airport, MI	Terminal, Runway Rehabilitation
Dona Ana County Airport, NM	Runway and Taxiway
Drake Field, AR	Various Improvements
Eagle County Airport, CO	Radar Improvements
Eastern Iowa Regional Airport, IA	Taxiway, Aprons
Eastern West Virginia, WV	Various Improvements
Easterwood Airport, TX	Various Improvements
Elkins-Randolph Field, WV	Various Improvements
Emmet County Regional Airport, MI	Passenger Terminal
Erie International, PA	Runway Extension
Fairfield County Airport, SC	Runway Extension
Fairfield Municipal Airport, IA	Runway & Taxiway
Fairhope Municipal Airport, AL	New Runway
Fairmont Municipal Airport, WV	Various Improvements
False Pass Airport, AK	Various Improvements
Fayette Airport, WV	Various Improvements
Ford Airport, MI	Runway Reconstruction
Freeport Albertus Airport, IL	Airport Improvement Projects

Wilmington International, NC	Various Improvements
Winfield City Airport, WV	Various Improvements
Winona-Montgomery County Airport, MS	Various Improvements
Wood City/Gill Robb Wilson Field, WV	Various Improvements
Yeager Airport, WV	Various Improvements

LETTERS OF INTENT

Congress authorized FAA to use letters of intent [LOI's] to fund multiyear airport improvement projects that will significantly enhance systemwide airport capacity. FAA is also to consider a project's benefits and costs in determining whether to approve it for AIP funding. FAA adopted a policy of committing to LOI's no more than about 50 percent of forecasted discretionary funds allocated for capacity, safety, security, and noise projects. The Committee viewed this policy as reasonable because it gave FAA the flexibility to fund other worthy projects that do not fall under a LOI. Both FAA and airport authorities have found letters of intent helpful in planning and funding airport development.

ADMINISTRATION

The bill provides that, within the overall obligation limitation, \$81,049,000 is available for administration of the airports program by the FAA and airport technology research.

The Committee recommendation includes \$16,429,000 for Airport Technology Research. The program is included in AIP for fiscal year 2003 as the research directly supports improvements in airport safety, capacity,

and efficiency. The research is directed at mitigation of wildlife strike hazards to aircraft, improvement of airport rescue and firefighting, improvement of airport lighting and marking, reduction in runway incursions, and improvement in airport pavement and design. It also includes funding for the 18 FTE in the Airport Technology Branch at the William J. Hughes Technical Center and continued operation of the pavement test facility at the Technical Center.

GENERAL PROVISIONS

Second career training program.—The Committee has included bill language which was included in the President's budget request which prohibits the use of appropriated funds for the second career training program. This prohibition has been carried in annual appropriations acts for many years.

Sunday premium pay.—The bill retains a provision, first included in the fiscal year 1995 appropriations bill, which prohibits FAA from paying Sunday premium pay, except in those cases where the individual actually worked on a Sunday. This provision is identical to that which was in effect for fiscal years 1995–2002. It was requested by the administration for fiscal year 2003.

Manned auxiliary flight service stations.—The Committee has retained bill language which was requested by the administration to prohibit the use of funds for operating a manned auxiliary flight service station in the contiguous United States. There is no funding provided in the "Operations" account for such stations in fiscal year 2003.

Facilitating Environmental Reviews to Increase Airport Capacity.—The bill authorizes the Federal Aviation Administration (sec. 338) to use funds from airport sponsors, including the airport's "Grants-in-Aid for Airports" entitlement funds, for the hiring of additional staff or for obtaining services of consultants for the purpose of facilitating environmental activities related to airport projects that add critical airport capacity to the national air transportation system.

FAA and TSA Facilities on Airport Property.—The bill includes a provision (sec. 335) that prohibits funds in this Act to be used to adopt guidelines or regulations requiring airport sponsors to provide the Federal Aviation Administration or the Transportation Security Administration "without cost" buildings, maintenance, or space for FAA services. The prohibition does not apply to

negotiations between FAA and airport sponsors concerning “below market” rates for such services or to grant assurances that require airport sponsors to provide land without cost to the FAA for air traffic control facilities. The prohibition also does not apply to the TSA’s use of space for security checkpoints.

FEDERAL HIGHWAY ADMINISTRATION SUMMARY OF FISCAL YEAR 2003 PROGRAM

The principal mission of the Federal Highway Administration is to, in partnership with State and local governments, foster the development of a safe, efficient, and effective highway and intermodal system nationwide including access to and within National Forests, National Parks, Indian Lands and other public lands.

Under the Committee recommendations, a total program level of \$32,892,767,000 would be provided for the activities of the Federal Highway Administration in fiscal year 2003. The following table summarizes the fiscal year 2002 program levels, the fiscal year 2003 program request and the Committee’s recommendations:

[In thousands of dollars]

Program	Fiscal year—		Committee recommendation
	2002 program level	2003 budget estimate	
Federal-aid highways limitation ¹	31,799,104	23,204,787	31,800,000
Limitation on administrative expenses ¹	(311,000)	(317,732)	(317,732)
Exempt Federal-aid obligations	965,308	892,767	892,767
Appalachian Development Highway System	200,000	200,000
Total	32,964,412	24,097,554	32,892,767

¹ Does not reflect TASC reduction of \$841,000 in section 349 of Public Law 107-87 as amended by sec. 1106, Public Law 107-117.

LIMITATION ON ADMINISTRATIVE EXPENSES

Appropriations, 2002 ¹	\$31,000,000
Budget estimate, 2003 ²	317,732,000
Committee recommendation ²	317,732,000

¹ Does not reflect TASC reduction of \$841,000 in section 349 of Public Law 107-87 as amended by sec. 1106, Public Law 107-117.

² Funding for motor carrier administration expenses is included as a separate limitation in the Federal Motor Carrier Safety Administration.

The limitation on administrative expenses controls spending for virtually all the salaries and expenses of the Federal Highway Administration. The Transportation Equity Act for the 21st Century changed the funding source for the highway research accounts from the administrative takedown of the Federal-Aid Highway Program to individual contract authority provisions. The Committee recommends a limitation of

\$317,732,000. Within the funds provided, the Committee includes \$1,261,000 for the Office of Intermodalism.

The following table reflects the fiscal year 2002 level, the 2003 level requested by the administration, and the Committee’s recommendation:

[In thousands of dollars]

Program	Fiscal year—		Committee recommendation
	2002 level	2003 budget estimate	
Administrative expenses:			
Salaries and benefits	222,936	231,857	231,857
Travel	9,473	9,473	9,473
Transportation	465	465	465
GSA rent	20,621	24,646	24,646
Communications, rent, and utilities	9,607	9,607	9,607
Printing	1,412	1,412	1,412
TASC	7,025	6,184	6,184
Supplies	2,000	2,000	2,000
Equipment	4,536	4,536	4,536
Other (including Office of Intermodalism)	32,925	27,552	27,552
Total	311,000	317,732	317,732

¹ Does not reflect TASC reduction of \$841,000 in section 349 of Public Law 107-87 as amended by section 1106, Public Law 107-117.

The Committee recommends the following items be funded under section 104(a)(1)(A): \$106,967,000 for the border enforcement program within the Federal Motor Carrier Safety Administration. Within that amount, \$47,000,000 shall be available for the construction of border inspection facilities along the U.S./Mexico border. The administration’s budget proposed that this \$47,000,000 expenditure be funded as a statutory earmark within the National Corridor Planning and Development Program.

Child passenger protection education grants.—The Committee recommendation includes \$7,500,000 to continue providing

grants, as authorized under section 2003(b) of TEA21, that train safety professionals on all aspects of proper child restraint use and educate the public on the installation, selection, and placement of child safety seats.

FEDERAL-AID HIGHWAYS

(LIMITATION ON OBLIGATIONS)

(HIGHWAY TRUST FUND)

Limitation, 2002 ¹	\$31,799,104,000
Budget estimate, 2003	23,204,787,000
Committee recommendation	31,800,000,000

¹ Does not reflect 0.22 percent reduction in section 1403 of Public Law 106-554.

The accompanying bill includes language limiting fiscal year 2003 Federal-aid highways obligations to \$31,800,000,000 an increase of \$896,000 over the fiscal year 2002 enacted level and \$8,595,213,000 over the budget request.

The following table shows the distribution of highway funds apportioned to the States under four scenarios: the fiscal year 2002 enacted level, the President’s budget, the level authorized in TEA21 without any negative adjustment associated with the Revenue Aligned Budget Authority Program, and the Committee recommendation.

FEDERAL HIGHWAY ADMINISTRATION ESTIMATED FISCAL YEAR 2003 DISTRIBUTION OF OBLIGATION LIMITATION

States	Actual fiscal year 2002 distribution ¹	Fiscal year 2003 estimate (includes negative RABA) ¹	Fiscal year 2003 TEA21 (No RABA) ¹	Fiscal year 2003 Committee recommendation ¹

¹ Includes Special Limitation for Minimum Guarantee, Appalachia and High Priority Projects and excludes Exempt Minimum Guarantee and Emergency Relief.² Includes territories.

FEDERAL-AID HIGHWAYS PROGRAMS

The roads and bridges that make up our nation's highway infrastructure are built, operated, and maintained through the joint efforts of Federal, State, and local governments. States have much flexibility to use Federal-aid highway funds to best meet their individual needs and priorities, with FHWA's assistance and oversight.

The Transportation Equity Act for the 21st Century (TEA21), the highway, highway safety, and transit authorization through fiscal year 2003 makes funds available in the following major categories:

National highway system.—The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 authorized the National Highway System (NHS), which was subsequently established as a 163,000-mile road system by the National Highway System Designation Act of 1995. This system serves major population centers, intermodal transportation facilities, international border crossings, and major destinations. It is comprised of all interstate routes, selected urban and principal rural arterials, defense highways, and major highway connectors carrying up to 76 percent of commercial truck traffic and 44 percent of all vehicle traffic. A State may transfer up to half of its NHS funds to the Surface Transportation program (STP) and all NHS funds with the concurrence of the Secretary of Transportation. The Federal share of the NHS is an 80 percent match and funds remain available for 4 fiscal years.

Interstate maintenance.—The 46,567-mile Dwight D. Eisenhower National System of Interstate and Defense Highways retains a separate identity within the NHS. This program finances projects to rehabilitate, restore, resurface and reconstruct the Interstate system. Reconstruction of bridges, interchanges, and over-crossings along existing Interstate routes is also an eligible activity if it does not add capacity other than high occupancy vehicle (HOV) and auxiliary lanes.

All remaining Federal funding to complete the initial construction of the Interstate system has been provided through previous

highway legislation. The TEA21 provides flexibility to States in fully utilizing remaining unobligated balances of prior Interstate Construction authorizations. States with no remaining work to complete the Interstate System may transfer any surplus Interstate Construction funds to their Interstate Maintenance program. States with remaining completion work on Interstate gaps or open-to-traffic segments may relinquish Interstate Construction fund eligibility for the work and transfer the Federal share of the cost to their Interstate Maintenance program.

Funds provided for the Interstate maintenance discretionary program in fiscal year 2003 shall be available for the following activities in the corresponding amounts:

Project	Amount
I-15 Reconstruction, 10800 South to 600 North, UT	\$6,000,000
I-182/SR-240 Interchange Reconstruction, WA	3,000,000
I-195 Relocation Project, RI	3,000,000
I-25 Broadway & Alameda Interchange Rebuilding, CO	5,000,000
I-29 Madison Street Interchange, Sioux Falls, SD	4,000,000
I-295 Via Duct to I-76, NJ	2,000,000
I-30/I-35 Dallas, Construction of Bridges for Trinity River, TX	6,000,000
I-90, Exit 32 Interchange at Sturgis, SD	4,000,000
I-35/Turkey Creek, Reconstruction Project, KS	3,000,000
I-40 Crosstown Realignment, OK	6,000,000
I-40 Paseo del Volcan Interchange, Albuquerque, NM	2,000,000
I-44 & US 65 Interchange, MO	2,000,000
I-55 Church Rd. to TN State Line, DeSoto County, MS	10,000,000
I-55/US-49 Flyover Near Jackson, MS	6,000,000
I-65/70 Market Square Redesign/Replace ramp, IN	5,000,000
I-75 Improvements South West Florida, FL	2,000,000

I-90 Joint Port of Entry Project, WY	2,500,000

Project	Amount
Marquette Interchange Reconstruction, WI	8,000,000
Port of Garfield Road & Bridge Road, WA	500,000
Route 80 Paterson Interchange, NJ	400,000
Sunnyside, South First St. Reconstruction, WA	1,500,000
SW First-NW Lake Road Project, WA	3,000,000
Union Gap, Valley Mall Blvd., WA	1,500,000
US-12, Burbank to Walla Walla, WA	2,500,000
US-63/I-70 Interchange Improvements, MO	10,000,000

Surface transportation program.—The surface transportation program (STP) is a very flexible program that may be used by the states and localities for any roads (including NHS) that are not functionally classified as local or rural minor collectors. These roads are collectively referred to as Federal-aid highways. Bridge projects paid with STP funds are not restricted to Federal-aid highways but may be on any public road. Transit capital projects are also eligible under this program. The total funding for the STP may be augmented by the transfer of funds from other programs and by minimum guarantee funds under TEA21 which may be used as if they were STP funds. Once distributed to the states, STP funds must be used according to the following percentages: 10 percent for safety construction; 10 percent for transportation enhancement; 50 percent divided among areas of over 200,000 population and remaining areas of the State; and, 30 percent for any area of the state. Areas of 5,000 population or less are guaranteed an amount based on previous funding, and 15 percent of the amounts reserved for these areas may be spent on rural minor collectors. The Federal share for the STP program is 80 percent with a 4-year availability period.

Bridge replacement and rehabilitation program.—This program is continued by the TEA21 to provide assistance for bridges on public roads, including a discretionary set-aside for high cost bridges and for the seismic retrofit of bridges. Fifty percent of a

state's bridge funds may be transferred to the NHS or the STP, but the amount of any such transfer is deducted from the national bridge needs used in the program's apportionment formula for the following year.

At least 15 percent, but not more than 35 percent, of a State's apportioned bridge funds must be spent on bridges not on the Federal-aid system.

Funds provided for the bridge discretionary program in fiscal year 2003 shall be available for the following activities in the corresponding amounts:

Project	Amount
Bull Slough Bridge Repair, AL	\$1,000,000
Canvas Bridge, Nicholas County, WV	6,000,000
Covered Bridges, including \$2,000,000 for Vermont	8,000,000
Depot Street Bridge restoration, Beacon Falls, CT	1,000,000
Historic Woodrow Wilson Bridge, Flowood, MS	1,000,000
Hot Metal Bridge, PA	500,000
Hwy-19 Bridge Replacement, Hermann, MO	5,000,000
I-195 Washington Bridge Replacement, RI	7,000,000
Indian River Inlet Bridge Repairs in Sussex, DE	5,000,000
Lexington Bridge, Cowlitz-Wahkiakum WA	7,500,000
Market Street Bridge Replacement, Lycoming County, PA	3,500,000
Missouri River Two State Bridge Project, NE	2,000,000
Monroe St. Bridge Rehabilitation, Spokane, WA	2,500,000
Pearl Harbor Memorial Bridge Reconstruction, New Haven, CT	6,000,000
Pomeroy-Mason Bridge, Mason County, WV	6,000,000
Red Cliff Arch Bridge Restoration/US24, CO	4,000,000
Waldo-Hancock Bridge Rehabilitation, ME	5,000,000
Russell St. Viaduct Replacement (MD295), Baltimore, MD	6,000,000
Sauvie Island Bridge, Replacement Project, OR	6,000,000
Tate's Bluff, Arkansas Replacement Bridge, AR	3,000,000
Two Medicine River Bridge, MT	1,500,000
US231 Southbound Tennessee River Bridge Replacement, AL	8,000,000
Wacker Drive Reconstruction, Chicago, IL	4,500,000

National Historic Covered Bridge Preservation Program.—The Committee recommendation provides \$8,000,000 for the covered bridge program within the funds made available for the discretionary bridge program. Within this amount, \$2,000,000 shall be made available for covered bridges in the State of Vermont.

Congestion mitigation and air quality improvement program.—This program provides funds to States to improve air quality in non-attainment and maintenance areas. A wide range of transportation activities are eligible, as long as DOT, after consultation with EPA, determines they are likely to help meet national ambient air quality standards. TEA21 provides greater flexibility to engage public-private partnerships, and expands and clarifies eligibilities to include programs to reduce extreme cold starts, maintenance areas, and particulate matter (PM-10) non-attainment and maintenance areas. If a State has no non-attainment or maintenance areas, the funds may be used as if they were STP funds.

On-road and off-road demonstration projects may be appropriate candidates for funding under the CMAQ program. Both sectors are critical for satisfying the purposes of the CMAQ program, including regional

emissions and verifying new mobile source control techniques.

Federal lands highways.—This program provides authorizations through three major categories—Indian reservation roads, parkways and park roads, and public lands highways (which incorporates the previous forest highways category)—as well as a new category for Federally-owned public roads providing access to or within the National Wildlife Refuge System. TEA21 also establishes a new program for improving deficient bridges on Indian reservation roads.

The Committee directs that the funds allocated for this program in this bill and in permanent law are to be derived from the FHWA's public lands discretionary program, and not from funds allocated to the National Park Service's regions. Funds provided for the Federal lands program in fiscal year 2003 shall be available for the following activities:

Project	Amount
Arches National Park Main Entrance Relocation, UT	\$1,250,000
BIA Route 13/Route 1 Project, Makah, WA	5,400,000
Blackstone River Valley Bikeway, RI	2,000,000
Cattle Point Road, San Juan County, WA	350,000
Chilatchee Creek Park Access Road Improvements, AL	475,000
Colonial Historic Park—Jamestown 400th Anniversary Transportation Improvements, VA	2,170,000
Council Grove Lake Embankment Roadway, KS	1,500,000
Downeast Heritage Center, Parking & Access, ME	200,000
Fort Drum Road Improvements, NY	770,000
Freemont County Project, WY	1,100,000
Frog Level Road, Neshoba County, MS	1,000,000
Gateway Trail, Grand Canyon National Park, AZ	1,380,000
Glacier National Park, Going-to-the-Sun Road, MT	5,000,000
Hawaii Statewide Improvements Highway 93 Expansion Project, MT	5,000,000
Homochitto National Forest Access Rd, Lincoln, MS	1,400,000
Hoonah Road (FM), AK	2,000,000
Hoover Dam Bypass New Bridge downstream of Dam, NV	1,400,000
Hoover Dam Bridge Bypass, AZ	6,750,000
Hwy 2 Highline EIS Project, MT	7,000,000
I-215 Widening, NV	1,000,000
Iditarod Historic National Trail Project, AK	3,500,000
Kenai River Trail, AK	500,000
KS-115 and KS-911 Interchange, KY	500,000
Lewis and Clark, Gates of the Mountains Road Project, MT	1,000,000
Marsh-Billings-Rockefeller Park Pedestrian Walkway, VT	600,000
Metlakatla/Walden Point Road, AK	380,000
Naknek Lake Camp Road, AK	2,000,000
Rocks-Back Country Byway, Stage 2, ID	3,400,000
Shotgun Cove Road, AK	2,000,000
Southeast Alaska Seatrails, AK	750,000
Spirit Lake Tribe Shared Use Path, Fort Totten, ND	520,000
SR-149 Resurfacing, Rio Grande National Forest, CO	2,000,000
SR-164 Muckleshoots, WA	420,000
US 95 Widening Laughlin Cut-off to Railroad Pass, NV	10,000,000
USMC Heritage Center Access, VA	2,000,000
Yakama Signal Peak Road, WA	4,150,000

Broughton Bridge improvements.—A total of \$1,850,000 was provided to make improve-

ments to Broughton Bridge, Kansas in Public Laws 106-346 and 107-87. The balance shall be available to make improvements to the access road to the bridge, including pavement overlay and related shoulder work.

Minimum guarantee.—Under TEA21, after the computation of funds for major Federal-aid programs, additional funds are distributed to ensure that each State receives an additional amount based on equity considerations. This minimum guarantee provision ensures that each State will have a return of 9.5 percent on its share of contributions to the highway account of the Highway Trust Fund. To achieve the minimum guarantee each fiscal year, \$2,800,000,000 nationally is available to the States as though they are STP funds (except that requirements related to set-asides for transportation enhancements, safety, and sub-State allocations do not apply), and any remaining amounts are distributed among core highway programs.

Value pricing program.—As the fiscal year 2003 applications for the value pricing program are being reviewed, the Committee encourages FHWA to support the data collection phase of the pay-as-you-drive variable pricing research program in Atlanta, GA.

Emergency relief.—This program provides for the repair and reconstruction of Federal-aid highways and Federally-owned roads which have suffered serious damage as the result of natural disasters or catastrophic failures. TEA21 restates the program eligibility specifying that emergency relief (ER) funds can be used only for emergency repairs to restore essential highway traffic, to minimize the extent of damage resulting from a natural disaster or catastrophic failure, or to protect the remaining facility and make permanent repairs. If ER funds are exhausted, the Secretary of Transportation may borrow funds from other highway programs.

High priority projects.—TEA21 includes 1,850 high priority projects specified by the Congress. Funding for these projects totals \$9,359,850,000 over the 6 year period with a specified percentage of the project funds made available each year. Unlike demonstration projects in the past, the funds for TEA21 high priority projects are subject to the Federal-aid obligation limitation, but the obligation limitation associated with the projects does not expire.

Transportation Infrastructure Finance and Innovation Act (TIFIA).—Programs authorized under the Transportation Infrastructure Finance and Innovation Act (TIFIA) provide credit assistance on flexible terms directly to public-private sponsors of major surface transportation projects to assist them in gaining access to the capital markets. The Committee believes that TIFIA is an important part of the Federal Government's overall infrastructure investment effort—one that is likely to grow in importance and size in the future. Unfortunately, demand for resources under the program has not kept pace with the contract authority available under TEA21. As such, the program is expected to carry an unspent balance of over \$100,000,000 into fiscal year 2003. The Committee believes that the carryover balances will adequately cover the likely demand for projects in 2003. As such, the Committee has used the program's contract authority to augment funding for the Transportation and Community and System Preservation Pilot Program (TCSP), the National Corridor Planning and Development Program, and the Coordinated Border Infrastructure and Safety Program. Demand for resources under these programs will far outstrip current authorizations in 2003.

National corridor planning and border infrastructure programs.—TEA21 created a national corridor planning and development program that identifies funds for planning,

design, and construction of highway corridors of national significance, economic growth, and international or interregional trade. Allocations may be made to corridors identified in section 1105(c) of ISTEA and to other corridors using considerations outlined in legislation. The coordinated border infrastructure program is established to improve the safe movement of people and goods at or across the U.S./Mexico and U.S./Canada borders.

Funds provided for the National Corridor and Border Infrastructure Program shall be available for the following activities:

<i>Project</i>	<i>Amount</i>
Appalachian North-South Corridor Planning Study, MD	\$1,000,000
Billings Bypass Development, MT	4,000,000
Charlotte/Mecklenburg County N/S Transitway, Inc.	2,000,000

APPALACHIAN DEVELOPMENT HIGHWAY SYSTEM	
Appropriations, 2002	\$200,000,000
Budget estimate, 2003 ¹	
Committee recommendation	200,000,000

¹The budget estimate requests funding under the Federal-Aid Highway obligation limitation.

<i>Amount</i>	The Committee recommendation includes \$200,000,000 for the Appalachian Development Highway System (ADHS). The amount provided is the same as the fiscal year 2002 comparable level. Funding for this initiative is authorized under section 1069(y) of Public Law 102-240—the Intermodal Surface Transportation Efficiency Act. The ADHS program provides funds for the construction of the Appalachian corridor highways in the 13 States that comprise the Appalachian region. These highways, in many instances, are intended to replace some of the most deficient and dangerous segments of rural roadway in America.
1,000,000	LIMITATION ON TRANSPORTATION RESEARCH
Limitation, 2002 ¹	\$447,500,000
500,000	Budget estimate, 2003 ¹
500,000	Committee recommendation
775,000	
1,000,000	¹ Resources available in fiscal year 2002 and requested in fiscal year 2003 are assumed within the Federal aid highway obligation limitation in the budget request for fiscal year 2003.
350,000	The limitation controls spending for the transportation research and technology programs of the FHWA. This limitation includes the intelligent transportation systems, surface transportation research, technology deployment, training and education, and university transportation research. The Committee recommendation provides an obligation limitation for transportation research of \$462,500,000.
500,000	Surface transportation research
750,000	Technology deployment program
400,000	Training and education
500,000	Bureau of Transportation Statistics
400,000	ITS standards, research, operational tests, and development
500,000	ITS deployment
400,000	University transportation research
500,000	Subtotal
1,500,000	<i>Highway research and development.</i> —The Committee appreciates the improvement in the justification accompanying the budget request and notes the presentation of the surface research estimate separate from the presentation of the technology deployment funding estimate.
750,000	
500,000	
1,250,000	Environment, planning, and real estate
1,000,000	Research and technology program support
1,000,000	International research
250,000	Structures
400,000	Safety
250,000	Highway operations
400,000	Asset management
250,000	Pavements research
100,000	Policy research
1,000,000	Long Term Pavement Project (LTPP)
750,000	Advanced Research
1,000,000	R&T strategic planning/ performance measures
750,000	
1,500,000	<i>Environment, planning, and real estate.</i> —The Committee recommendation includes \$16,774,000 for environment, planning, and real estate research, which is \$4,221,000 more than the budget estimate. Within the funds provided for this research activity, the Committee has provided \$800,000 to continue dust and persistent particulate abatement research in Kotzebue, Alaska.
100,000	

Research and technology program support.—The Committee recommends \$8,545,000, an increase of \$1,462,000 from the budget request and \$410,000 more than the fiscal year 2002 enacted level. Within the funds available for research and technology, the Committee has provided \$750,000 for the Center on Coastal Transportation Research at the University of South Alabama.

International research.—The Committee recommendation includes \$500,000 for international research. This is the same amount provided in fiscal year 2002 and is consistent with the amount authorized under TEA21.

Structures.—The Committee has provided \$13,085,000 for structures research, an increase of \$4,067,000 from the budget request. This research effort allows FHWA to reduce deficiencies on National Highway System bridges and should facilitate continued progress on high performance materials and engineering applications to design, repair, retrofit, inspect, and rehabilitate bridges. The Committee directs the FHWA to continue its collaborative research effort with West Virginia University's Construct Facilities Center regarding research into composite structure and related engineering research. Within the funds for this research activity, the Committee has provided \$500,000 for a demonstration project to evaluate the use of battery-powered cathodic protection to extend the life of concrete bridges that are located in extreme cold weather conditions. The Committee recommendation also includes \$500,000 to support non-destructive structural evaluation technology at the New Mexico State University's Bridge Research Center.

Safety.—The Committee recommendation provides \$12,490,000 for safety research, an increase of \$2,973,000 above the budget estimate. These funds will allow FHWA to continue to accelerate the substantial progress being made on technologies or strategies to reduce run-off-road crashes, improve nighttime driving, reduce the frequency of crashes at intersections, improve pedestrian safety, and develop, test, and refine the Interactive Highway Safety Design Model. Within the funds provided, the Committee included \$1,500,000 to conduct research into heavy vehicle safety, and vulnerability assessments regarding security and safety in all modes of transportation at a not-for-profit, technology-oriented entity in the Pacific Northwest with demonstrated research capabilities to address issues of braking, vehicle electrification and human factors.

Highway operations.—The Committee recommendation provides \$13,101,000 for research activities regarding highway operations, which is \$3,309,000 more than the budget request. Within these funds, the Committee has included \$1,200,000 to analyze existing conditions and make recommendations that will enhance the freight mobility transportation system in Washington State.

Asset management.—The Committee recommends \$3,290,000 for asset management research activities, an increase of \$631,000 from the budget estimate.

Policy.—The Committee recommendation includes \$8,510,000, an increase of \$180,000 from the fiscal year 2002 enacted level and an increase of \$1,263,000 above the budget estimate.

Pavements research.—The Committee recommends \$15,200,000 for highway pavement research, including work on asphalt, Portland cement pavement research, polymer additives, and recycled materials. This is \$4,799,000 more than the budget estimate and \$1,447,000 more than the fiscal year 2002 enacted level. Within the funds provided, the Committee has included \$1,000,000 to the Center for Portland Cement Concrete Pavement Technology at Iowa State University; \$1,000,000 to continue evaluation of GSB-88 emulsified binder treatment application; \$1,250,000 for the National Center for Asphalt Technology (NCAT) and \$1,000,000 to continue research related to silica fume high performance concrete.

Advanced research.—The Committee recommendation deletes \$203,000 from the budget request and provides \$750,000. The Committee notes the many of the proposed areas of research and technology investigation duplicate efforts in other research activities and in the ITS research program.

R&T strategic planning and performance measures.—The Committee has provided \$755,000 for research and technology strategic planning and performance measures, an increase of \$27,000 from the budget request. The Committee anticipates that this level of funding will be sufficient to support planned strategic planning activities, research outreach, and development and refinement of performance measures, as required by the Government Performance and Results Act (GPARA).

Other.—The Committee supports the FHWA effort with AASHTO, TRB, among others in advancing a national R&T agenda in the areas of safety, infrastructure renewal, operations and mobility, planning and environment, and policy analysis and systems monitoring. The Committee recognizes the benefits of improved communication and coordination between key partners and stakeholders, and awaits completion of the synthesis report on the partnership initiative.

ITS Standards, Research, Operational Tests, Development, and Deployment.—The Committee recommends that the \$232,000,000 authorized in TEA21 for ITS research and associated activities in fiscal year 2002 be allocated in the following manner:

	Amount
Research and Development	\$50,701,000
Operational Tests	10,782,000
Evaluation/Program Policy Assessment	6,739,000
Architecture and Standards	18,868,000
Program Support	11,455,000
Integration	11,455,000
ITS Deployment Incentive Program	122,000,000

Specified ITS deployment projects.—It is the intent of the Committee that the following projects contribute to the integration and interoperability for intelligent transportation systems in metropolitan and rural areas as provided under section 5208 of TEA21 and promote deployment of the commercial vehicle intelligent transportation system infrastructure as provided under section 5209 of TEA21. Funding for deployment activities are to be available as follows:

	Project	Amount
Advance Traveler Info. System & Smart Card System, OH		\$2,500,000
Alaska Statewide: Smart Emergency Medical Access System ..		3,000,000
Boston Traffic Monitoring & Security System, MA		2,000,000
Bozeman Pass Wildlife Channelization Study, MT		500,000
Cargo Mate Logistics and Intermodal Management System, NY		2,000,000
Cary, Computerized Traffic Signal System, NC		1,000,000
CCTA Burlington Multimodal Transit Center, VT		1,000,000
Center for Injury Sciences at UAB, Crash Notification, AL		2,000,000
Central Florida Regional Transportation Authority, Orange/Seminole ITS, FL		2,000,000
Chattanooga (CARTA) ITS, TN ...		1,500,000
Sierra Madre Intermodal Transportation Center, Los Angeles, CA		2,500,000
CVISN, NM		1,125,000
Flint Mass Transportation Authority ITS program, MI		1,000,000
Intelligent Transportation Center, Atlanta, GA		500,000

Project	Amount
GMU, ITS Research, VA	2,000,000
Great Lakes ITS program, MI	3,000,000
Harrison County Sheriff's Department, ITS, MS	1,000,000
Hoosier SAFE-T, IN	2,000,000
Huntsville, AL	2,000,000
I-80 Dynamic Message Signs, Southern WY	4,000,000
Idaho Statewide CVISN	2,250,000
Illinois Statewide	4,500,000
Iowa Statewide ITS	1,400,000
Kansas City Scout, Advanced Traffic Management System, KS	1,500,000
Kansas City SmartPort	1,000,000
Kent, Intracity Transit Project, WA	1,500,000
Lynnwood ITS, WA	2,000,000
Maine Statewide, Rural Advanced Traveler Info. System, ME	2,000,000
Maryland Statewide ITS	2,000,000
Missouri Statewide Rural ITS, MO	2,000,000
NDSU Advanced Traffic Analysis Center, ND	1,000,000
Nebraska statewide ITS	5,000,000
New Bedford ITS Port Information Center, MA	1,000,000
Oklahoma Statewide ITS	7,000,000
Pennsylvania Turnpike Commission, PA	5,000,000
Program of Projects, WA	5,500,000
Providence Transportation Information Center, ITS, RI	2,000,000
Sacramento Area Council of Governments, ITS, CA	1,000,000
Shreveport ITS Project, LA	1,000,000
SCDOT Statewide ITS	5,000,000
SR-68/Riverside Dr. ITS, Espanola, NM	475,000
Surface Transportation Institute, Univ. of North Dakota, ND	1,500,000
T-REX Southeast Corridor Multi-Modal Project, CO	9,000,000
Tucson ER-LINK ITS project, AZ	1,250,000
Univ. of Nebraska Lincoln, SMART Transportation, NE	2,000,000
University of Kentucky Transportation Center, KY	2,000,000
Utah Commuter Link, Davis and Utah Counties, UT	1,000,000
Vermont Statewide Rural Advanced Traveler System, VT	1,500,000
Vermont Variable Message Signs, VT	1,000,000
Washington, DC Metro ITS	4,000,000
Northern Virginia ITS, VA	4,000,000
Wisconsin State Patrol Mobile Data Communications Network	2,000,000

Illinois ITS.—The Committee provides \$4,500,000 to the Illinois Department of Transportation (IDOT) for Intelligent Transportation Systems grants. The Committee expects IDOT to fund the following projects: \$750,000 to Lake County for traffic corridor communications systems; \$450,000 to DuPage County for traffic signal coordination; \$850,000 for an I-55/Lake Springfield Fixed Anti-Icing System; \$800,000 to the Village of Bourbonnais for congestion relief projects; and \$150,000 for the city of Marion's traffic control project. The Committee further provides \$1,500,000 to the city of Chicago for Intelligent Transportation Systems grants, including the Cicero Avenue Traveler Information project and the Traffic Management Center.

NATIONWIDE DIFFERENTIAL GLOBAL POSITIONING SYSTEM		
Appropriations, 2002 ¹	\$6,000,000	\$110,000,000
Budget estimate, 2003 ²	6,000,000	117,464,000
Committee recommendation ²	(6,000,000)	117,464,000
Funding derived from limitation on administrative expenses.		
Funding for NDGPS provided within FAA "facilities and equipment" account.		

NDGPS.—The Committee recommendation includes \$6,000,000 for continued investment in the Nationwide NPGPS Network. The funding is provided within the FAA's facilities and equipment account.

BUREAU OF TRANSPORTATION STATISTICS (LIMITATION ON OBLIGATION)

Appropriations, 2002	\$31,000,000
Budget estimate, 2003 ¹	31,000,000
Committee recommendation	31,000,000

¹ Excludes \$675,000 for CSRS/FEHP accruals.

The Bureau of Transportation Statistics (BTS) was established in section 6006 of the Intermodal Surface Transportation Efficiency Act [ISTEA], to compile, analyze, and make accessible information on the Nation's transportation systems, collect information on intermodal transportation, and enhance the quality and effectiveness of the statistical programs of the Department of Transportation.

FEDERAL-AID HIGHWAYS

(LIQUIDATION OF CONTRACT AUTHORIZATION) (HIGHWAY TRUST FUND)

Appropriations, 2002	\$30,000,000,000
Budget estimate, 2003	29,000,000,000
Committee recommendation	32,000,000,000

The Committee recommends a liquidating cash appropriation of \$32,000,000,000.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

In December 1999, the Congress passed the Motor Carrier Safety Improvement Act (Public Law 106-159), which established the Federal Motor Carrier Safety Administration (FMCSA) within the Department of Transportation. Prior to this legislation, motor carrier safety responsibilities were housed within the Federal Highway Administration.

The preeminent mission of the FMCSA is to improve the safety of commercial vehicle operations on the nation's highways. A primary goal of the agency is to reduce the number of accidents and fatalities due to truck accidents. FMCSA resources and activities contribute to safety in commercial vehicle operations through enforcement, safety regulation, technological innovation, improvements in information systems, training, and improvements to commercial driver's license testing, record keeping, and sanctions. To achieve these goals, the FMCSA works with Federal, State, and local enforcement agencies, the motor carrier industry, and highway safety organizations.

MOTOR CARRIER SAFETY (HIGHWAY TRUST FUND)

The Motor Carrier Safety program provides for the salaries, operating expenses, research funding for the FMCSA. The Motor Carrier Safety Improvement Act of 1999 (MCSIA) amended Section 104(a)(1) of title 23 to provide one-third of 1 percent of the administrative takedown to be made available to administer motor carrier safety programs and motor carrier research. The administration's budget requests a takedown of 45/100 of 1 percent for these purposes.

LIMITATION ON ADMINISTRATIVE EXPENSE

Appropriations, 2002 ¹	\$110,000,000
Budget estimate, 2003 (limitation)	117,464,000
Committee recommendation	117,464,000

¹ Does not reflect reduction of \$158,000 pursuant to Public Law 107-87, as amended by Public Law 107-117.

The Committee recommendation provides a total of \$117,464,000 for operating expenses

and research funding for the FMCSA consistent with the budget request. Of the funds provided, \$110,464,000 is for operating expenses and \$7,000,000 is for research and technology initiatives. The recommendation provides the following adjustments to the budget request:

Share the Road Safely	-\$100,000
Safety is Good Business Program	-250,000
R&T Information Dissemination	-150,000
Hazardous Materials Safety and Security	+500,000

Domestic motor carrier safety.—While FMCSA has moved expeditiously to implement the United States-Mexico cross-border trucking safety provisions, the Committee remains concerned about the lack of progress that has been made in commercial motor vehicle safety in recent years. Despite the fact that there has been a nearly 50 percent increase in funding for motor carrier safety activities since the FMCSA was created in 1999, there has been only a 3.5 percent decrease in the number of fatalities involving large truck crashes. In fact, more than one out of ten people killed in motor vehicle incidents are involved in a crash with a large truck even though large trucks represent a very small percentage of total registered vehicles. Given this record, it calls into question whether the FMCSA will achieve its 1999 goal of reducing truck deaths and injuries by 50 percent by 2009.

The Committee reminds FMCSA that the agency's safety oversight efforts for domestic truck traffic should be equal to, if not greater than, those for cross-border traffic. The fact that it takes FMCSA an average of 4 years to complete a rulemaking and that many rules have not been published by their statutory deadlines is evidence that the agency has a long way to go in pursuing its safety mission. Furthermore, in the aftermath of the events of September 11th, the Committee urges FMCSA to be particularly attentive to the security risks associated with the commercial driver's license program and the transportation of hazardous materials as discussed in greater detail in this report.

Commercial drivers license oversight.—Federal regulations require individuals to carry a commercial driver's license (CDL) when operating a commercial motor vehicle weighing in excess of 26,001 pounds, when hauling hazardous materials or when transporting at least 16 passengers. Over the last decade, the number of CDL holders has doubled to over 10.5 million today and it is estimated that nearly 470,000 new CDLs are issued each year. Since truck travel volume is expected to increase roughly 20 percent over the next decade, it is critically important that FMCSA put adequate safety measures in place to effectively monitor the commercial motor vehicle industry and commercial motor vehicle drivers. The fiscal year 2002 Supplemental Appropriations bill included \$17,300,000 for FMCSA to boost CDL fraud detection and prevention efforts as well as to conduct background check reviews of CDL drivers who hold or seek hazardous materials endorsements. These additional funds will assist FMCSA in its efforts to address the deficiencies in the CDL licensing and testing program that were outlined in the Inspector General's May, 2002 report. The Committee notes that the FMCSA concurred with nearly all of the IG's recommendations. Given the expected growth in the number of CDL holders, it is essential that FMCSA conduct timely compliance reviews of State CDL programs. The Committee believes it is essential that State and third party CDL examiners be monitored regularly to ensure that any deficiencies in the program can be eliminated. As such the Committee encourages

FMCSA to adopt a standard that includes such monitoring activities as may be necessary to comport with the IG's recommendation.

Hazardous materials transportation.—Every day in the United States, there are over 800,000 shipments of hazardous materials ranging from flammable materials and explosives to poisons and corrosives. The Committee commends FMCSA for completing over 38,000 security sensitivity visits of hazardous materials transportation and other at-risk providers earlier this year. These visits have served to increase the level of awareness of hazardous materials carriers to terrorist threats and to identify potential security vulnerabilities for corrective or law enforcement action. However, the Committee firmly believes that FMCSA must continue to aggressively monitor the safety and security vulnerabilities in the transportation of hazardous materials since 90 percent of hazardous material shipments occur by truck. The Committee urges FMCSA to vigorously enforce compliance with Federal hazardous materials regulations and to encourage States to appropriately utilize the motor carrier safety assistance program for hazardous materials training and enforcement. With regard to hazardous materials safety and security research, the Committee provides \$758,000 which is \$500,000 more than the budget request. The additional funds above the budget request shall be used to expand and expedite the completion of FMCSA's hazardous materials security risk assessments.

"Safety is Good Business" Program.—The Committee has deleted the funding for this initiative in the motor carrier research program. The Committee believes that the "Safety is Good Business" program should be funded out of FMCSA's high priority initiatives program within the motor carrier safety assistance program.

Crash causation study.—The Committee recommends \$5,000,000 for the continuation of FMCSA's comprehensive crash causation study. The Committee appreciates the complexity of this study which now involves over 100 Federal, state and contractor support personnel. Over 450 crashes have been investigated, but many of these have not been completely coded. The Committee understands that the FMCSA sought out a Transportation Research Board committee to review the first set of large truck crash causation cases and to make recommendations on what coding changes may be necessary. The Committee reiterates its message from last year that it is imperative that the results of this study should be made available as soon as possible. The study's results will assist FMCSA in setting safety priorities as well as serve as useful tool for Congressional oversight and legislative activities. The Committee directs FMCSA and NHTSA to submit a letter report to the House and Senate Committees on Appropriations by March 15, 2003 indicating the study's progress; the Department's response to and status of TRB's recommendations; and, a time schedule for the release of its initial results.

Share the road safely.—The Committee provides a total of \$600,000 for the "Share the Road Safely" program which is designed to educate the motoring public on how to share the road safely with large trucks and buses. As required by the Transportation Equity Act for the 21st Century, \$500,000 of the funds provided for this program are transferred from NHTSA's highway safety program account. While this program is administered by the FMCSA, the Committee believes that NHTSA should have input into the program's development since NHTSA is the agency with primary responsibility for the behavioral programs geared toward passenger car

drivers. The Committee urges FMCSA to coordinate the agency's "share the road" efforts with NHTSA.

Young driver pilot program.—In February, 2001, the FMCSA requested comments on a proposal that the agency had received to initiate a pilot program which would waive Federal regulations to allow individuals between the ages of 18 and 21 to work in truck driver jobs in interstate commerce. Current Federal safety regulations require that commercial motor vehicle drivers be at least 21 years of age. The Committee is aware that FMCSA has received comments from state transportation officials and private citizens opposing this proposal due to safety concerns. Given the fact that young drivers are overrepresented in motor vehicle crashes, the Committee is not convinced of the merits of this proposal. Prior to the approval of such a pilot program, the Committee directs the FMCSA Administrator to conduct a thorough analysis of the safety ramifications and whether there's a genuine shortage of truck drivers to warrant such a waiver of the Federal safety regulations.

Driver record improvements.—Section 204 of the Motor Carrier Safety Improvement Act of 1999 (MCSIA) requires States to query the National Driver Register (NDR) and the Commercial Driver's License Information System prior to issuing or renewing a motor vehicle operator's license. The Committee notes that the rule implementing this provision has yet to be promulgated and would remind FMCSA and NHTSA that each agency shares an equal responsibility for fulfilling the MCSIA requirement. However, progress on this rule has been stalled because each agency believes that the other has the lead on the rule's development. The Committee directs the Secretary to assign either FMCSA or NHTSA as the lead agency in the rule's development and urges both agencies to move forward expeditiously on this rule as other driver record improvements, such as the one-driver, one-record pointer system, are further developed. In that regard, the Committee directs NHTSA and FMCSA to conduct an analysis of the costs associated with the development of a one-driver, one-record pointer system and the strategic steps necessary for its implementation and submit that analysis to the House and Senate Committees on Appropriations by June 1, 2003.

Driver research.—Within the funds provided for FMCSA's research and technology program, the Committee provides \$700,000 for the Transportation Research Institute at the George Washington University VA Campus for advanced research on driver error related to fatigue, inattentiveness and sleep deprivation through the use of sophisticated in-vehicle monitoring and assistance systems related to vehicle performance. In addition, the Committee has included \$250,000 to initiate a separate multidisciplinary driver research program that evaluates cognitive sensory, environmental, mechanical, and large-scale epidemiologic aspects of driver behavior in order to identify measures that show promise of improving safety and reduce the likelihood of serious injury.

**NATIONAL MOTOR CARRIER SAFETY PROGRAM
(LIQUIDATION OF CONTRACT AUTHORIZATION)
(HIGHWAY TRUST FUND)**

	(Liquidation of contract authorization)	(Limitation on obligations)
Appropriations, 2002	\$205,896,000	\$205,896,000
Budget estimate, 2003	190,000,000	190,000,000
Committee recommendation	190,000,000	190,000,000

The FMCSA's National Motor Carrier Safety Program (NMCSP) was authorized by TEA21 and amended by the Motor Carrier Safety Improvement Act of 1999. This program consists of two major areas: the motor

carrier safety assistance program (MCSAP) and the information systems and strategic safety initiatives (ISSSI). MCSAP provides grants and project funding to States to develop and implement national programs for the uniform enforcement of Federal and State rules and regulations concerning motor safety. The major objective of this program is to reduce the number and severity of accidents involving commercial motor vehicles. Grants are made to qualified States for the development of programs to enforce the Federal motor carrier safety and hazardous materials regulations and the Commercial Motor Vehicle Safety Act of 1986. The basic program is targeted at roadside vehicle safety inspections of both interstate and intrastate commercial motor vehicle traffic. ISSSI provides funds to develop and enhance data-related motor carrier programs.

The Committee recommends \$190,000,000 in liquidating cash for this program consistent with the authorized contract activity level.

LIMITATION ON OBLIGATIONS

The Committee recommends a \$190,000,000 limitation on obligations for motor carrier safety grants. This is the level authorized under the Motor Carrier Safety Improvement Act of 1999, which amended TEA21.

Truck driver training program.—Within the funds provided for FMCSA's high priority initiative program, the Committee provides \$700,000 for the development of a concrete skid pad at Lewis-Clark State College North Lewiston Training Facility. The project would enable the creation of controlled "adverse" weather situations, including ice and rain, as well as faulty braking systems, tire blow-outs, and anti-skid equipment failure, as part of the Commercial Drivers License Training program, which provides safety training for bus and commercial motor vehicle drivers.

Highway watch program.—Within the funds provided for FMCSA's high priority initiative program, the Committee provides \$1,000,000 for the continuation of the Highway Watch program. The Highway Watch program trains professional truck drivers to recognize and report a variety of incidents on the Nation's highways. As the program is expanded to reach an increasing number of truck drivers, the Committee urges that a security component be included in the training to help truck drivers better identify potential security threats.

Operation respond.—Within the funds provided for FMCSA's high priority initiatives, the Committee includes \$1,000,000 to design, build, and demonstrate the benefits of a seamless hazardous materials incident detection, management, and response system, including the expansion of the Operation Respond network of emergency responders and by linking this network with tracking and automatic crash notification technologies. The Committee urges that, working with the private sector, these funds be used to establish a national first responder emergency services network and to accelerate deployment of Operation Respond software.

BORDER ENFORCEMENT PROGRAM

(HIGHWAY TRUST FUND)

Appropriations, 2002	\$25,866,000
Budget estimate, 2003	59,967,000
Committee recommendation	159,967,000

¹Funded under FHWA administrative takedown.

The North American Free Trade Agreement (NAFTA), enacted in 1993, anticipated the initiation of cross-border trucking shipments between the United States and Mexico by December, 1995. The previous Administration made a specific decision not to allow

Mexico-domiciled motor carriers to transport cross-border shipments beyond a limited commercial zone into the United States due to concerns over the safety of the Mexican trucking fleet. In February, 2001, an Arbitral Panel issued a finding that the United States was out of compliance with NAFTA and could not bar all Mexican applicants from entering the United States. However, the Panel clearly stipulated that NAFTA did not restrict the ability of the United States to implement measures to ensure Mexican trucking companies and Mexican truck drivers meet U.S. safety standards.

Last year, the Committee dedicated a significant amount of time and effort to the safety concerns associated with the initiation of cross-border trucking shipments between the United States and Mexico when the Administration announced its intention to open the border by January, 2002. The fiscal year 2002 Transportation Appropriations Act included a general provision which required a number of actions by the Secretary of Transportation, the Federal Motor Carrier Safety Administration (FMCSA) and the Inspector General (IG) prior to the opening of the United States-Mexico border to commercial vehicle traffic beyond the commercial zone. A key provision was the requirement that the Inspector General conduct a comprehensive review of border operations to verify whether safety requirements are in place. The Inspector General's report of June 25, 2002 states that the FMCSA has made measured progress toward meeting the Act's requirements to hire and train inspectors; establish inspection facilities; and develop safety processes and procedures for Mexican long-haul carriers.

However, the IG's report indicates that there are remaining issues of concern. Two areas that need additional attention are law enforcement authority's access to databases and the ability of States to prosecute Mexican trucks operating in violation of U.S. law. Specifically, the IG's report states that Mexico's commercial driver's license (CDL) and vehicle registration databases are sufficiently accurate and integrated into databases. However, 6 of the 25 United States-Mexico border crossings do not have adequate access to these databases to verify licenses, registration, operating authority or insurance. Additionally, the Transportation Act required the IG to verify that measures are in place to enable U.S. law enforcement authorities to ensure the effective enforcement and monitoring of Mexican motor carriers according to U.S. law. The IG's report points out only two States—Arizona and California—have enacted legislation authorizing their enforcement personnel to take action when they encounter a vehicle operating without authority. This means that 48 States lack any law to put out-of-service or penalize large trucks that are caught operating without Federal operating authority. The Committee commends the Agency for promulgating a rule that includes operating authority violations among the safety criteria for placing vehicles out of service until States enact their own statutes.

Finally, Section 350 of the fiscal year 2002 Transportation Appropriations Act requires that, prior to the opening of the United States-Mexico border to commercial vehicle traffic, the Secretary of Transportation must certify in writing in a manner addressing the IG's findings and verify that opening the border does not pose an unacceptable safety risk to the American public. The Committee intends to continue to closely monitor the implementation of the United States-Mexico cross-border trucking provisions to ensure that safety is not compromised. The Committee has included a general provision continuing the cross-bor-

der safety provisions included in the 2002 Transportation Appropriations Act.

The Committee recommends \$41,967,000 for Federal border enforcement staffing and operations and \$18,000,000 for State operations grants to the southern border States.

Additional border enforcement funding is provided in this bill including \$8,250,000 for State operations grants under the National Motor Carrier Safety Program, and \$47,000,000 for inspection station construction under the Federal Highway Administrator's administrative takedown.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

The National Highway Traffic Safety Administration (NHTSA) was established as a separate organizational entity in the Department of Transportation in March 1970. It succeeded the National Highway Safety Bureau, which previously had administered traffic and highway safety functions as an organizational unit of the Federal Highway Administration.

The agency's current programs are authorized in four major laws: (1) the National Traffic and Motor Vehicle Safety Act, (chapter 301 of title 49, U.S.C.); (2) the Highway Safety Act, (chapter 4 of title 23, U.S.C.); (3) the Motor Vehicle Information and Cost Savings (MVICS) Act, (Part C of subtitle VI of title 49, U.S.C.), and (4) the Transportation Equity Act for the 21st Century (TEA21).

The first law provides for the establishment and enforcement of safety standards for vehicles and associated equipment and the conduct of supporting research, including the acquisition of required testing facilities and the operation of the national driver register (NDR). Discrete authorizations were subsequently established for the NDR under the National Driver Register Act of 1982.

The second law provides for coordinated national highway safety programs (section 402) to be carried out by the States and for highway safety research, development, and demonstration programs (section 403). The Anti-Drug Abuse Act of 1988 (Public Law 100-690) authorized a new drunk driving prevention program (section 410) to make grants to States to implement and enforce drunk driving prevention programs.

The third law (MVICS) provides for the establishment of low-speed collision bumper standards, consumer information activities, diagnostic inspection demonstration projects, automobile content labeling, and odometer regulations. An amendment to this law established the Secretary's responsibility, which was delegated to NHTSA, for the administration of mandatory automotive fuel economy standards. A 1992 amendment to the MVICS established automobile content labeling requirements.

The fourth law (TEA21) reauthorizes the full range of NHTSA programs and enacts a number of new initiatives. These include: safety incentives to prevent operation of motor vehicles by intoxicated persons (section 163 of title 23 U.S.C.); seat belt incentive grants (section 157 of title 23 U.S.C.); occupant protection incentive grants (section 405); and highway safety data improvement incentive grant program (section 411). TEA21 also reauthorized highway safety research, development and demonstration programs (section 403) to include research measures that may deter drugged driving, educate the motoring public on how to share the road safely with commercial motor vehicles, and provide vehicle pursuit training for police. Finally, TEA21 adopts a number of new motor vehicle safety and information provisions, including rulemaking directions for improving air bag crash protection systems, lobbying restrictions, exemptions from the

odometer requirements for classes or categories of vehicles the Secretary deems appropriate, and adjustments to the automobile domestic content labeling requirements.

In 2000, the Transportation Recall Enhancement, Accountability, and Documentation (TREAD) Act amended the National Traffic and Motor Vehicle Safety Act in numerous respects and enacted many new ini-

tatives. These consist of a number of new motor vehicle safety and information provisions, including a requirement that manufacturers give NHTSA notice of safety recalls or safety campaigns in foreign countries involving motor vehicles or items of motor vehicle equipment that are identical or substantially similar to vehicles or equipment in the United States; higher civil penalties for violations of the law; a criminal penalty for vi-

lations of the law's reporting requirements; and a number of rulemaking directions that include developing a dynamic rollover test for light duty vehicles, updating tire safety and labeling standards, improving the safety of child restraints, and establishing a child restraint safety rating consumer information program.

The following table summarizes the Committee recommendations:

Program	Fiscal year 2002 enacted	Fiscal year 2003 estimate	Committee rec- ommendation
Operations and research	\$200,264,000	\$200,444,508	\$215,000,000
National driver register (HTF)	(2,000,000)	(2,000,000)	(2,000,000)
Highway traffic safety grants (firewall)	223,000,000	225,000,000	225,000,000
Total	423,264,000	425,444,508	440,000,000

OPERATIONS AND RESEARCH (INCLUDING HIGHWAY TRUST FUND)

	General Fund	Trust Fund	Total
Appropriations, 2002	\$126,264,000	\$74,000,000	\$200,264,000
Budget estimate, 2003 ¹	126,444,508	74,000,000	200,444,508
Committee recom- mendation	141,000,000	74,000,000	215,000,000

¹ Excludes 4,437,000 for CSRS/FEHB accruals.

For fiscal year 2003, the Transportation Equity Act for the 21st Century (TEA21), as amended, authorizes \$72,000,000 of contract authority from the highway trust fund to finance operations and research activities eligible under title 23 U.S.C. 403. This funding is included within the firewall guarantee for highway spending. The act also includes an authorization, subject to appropriations, from the highway trust fund of \$2,000,000 to maintain the National Driver Register. In addition, the administration is requesting \$130,881,000 for activities related to sections 30104 and 32102 of title 49. This funding is derived from the general fund and is subject to appropriations.

The accompanying bill provides appropriations totaling \$215,000,000 to be distributed as follows:

Program	Committee recommendation
Salaries and benefits	\$63,328,000
Travel	1,324,000
Operating expenses	22,834,000
Contract Programs:	
Safety performance	10,393,000
Safety assurance	15,760,000
Highway safety	52,458,000
Research and analysis	59,396,000
General administration ..	657,000
Grant administration re- imbursement	-11,150,000
Total	215,000,000

OPERATING EXPENSES

Workforce planning and development.—NHTSA established this program in fiscal year 2001 in an effort to encourage college students to enter into the fields of engineering, research, science and technology, vehicle safety and injury. The Committee recognizes the agency's desire to build a base of employees for future employment but would note that the challenges of attrition in the transportation workforce are not unique to NHTSA. The Committee believes that this type of workforce planning should be done throughout the entire Department of Transportation through the coordination of the office of the Assistant Secretary for Administration. The Committee includes \$300,000 within the NHTSA budget for a more measured initiative in this area.

Contract execution delays.—The Committee is aware that there continue to be excessive delays in the timely execution of NHTSA contracts. All too frequently, contract re-

cipients have had to wait for several months before Federal funds are granted. The Committee expects greater attention to this area and insists that once a contract has been awarded that it should be executed in a timely fashion. The Committee directs the NHTSA Administrator to conduct a thorough review of the agency's contracting procedures and to take appropriate steps to eliminate any unnecessary delays.

SAFETY PERFORMANCE STANDARDS

Passenger vehicle tire traction.—The Transportation Recall Enhancement, Accountability, and Documentation Act of 2000 (TREAD) mandated the Secretary to strengthen the Federal standards governing tire safety performance. NHTSA issued a proposed rulemaking on March 5, 2002, to revise and update its tire safety standards. The proposed rule addresses tire safety from the vantage point of reducing the chances of tire failure principally by increasing tire resistance to heat and high speed operation. Although NHTSA has a consumer information program, the Uniform Tire Quality Grading System, which assigns traction ratings to tires marketed in the United States, there is no Federal standard requiring acceptable levels of tire adhesion or traction, especially for passenger vehicles operating on wet road surfaces. As NHTSA prepares its final rule on tire safety performance, the Committee encourages NHTSA to consider including standards for tire performance on wet road surfaces. Absent such inclusion, the Committee directs NHTSA to send a letter to the House and Senate Committees on Appropriations explaining why wet road tire performance standards were not included.

SAFETY ASSURANCE

Defect information system.—NHTSA's Office of Defect Investigation is in the process of replacing its current defect database with a new information system. When fully operational, this new system, which is being developed by the Volpe National Transportation Systems Center, will store consumer complaints as well as the early warning data as required by the TREAD Act. The Inspector General issued a report earlier this year which raised concerns about whether this new information system can be successfully implemented on-time and within the estimated \$5,000,000 budget. The Committee believes that NHTSA should be attentive to the concerns raised by the IG and directs NHTSA to provide a letter to the House and Senate Committees on Appropriations which details the current schedule and cost estimates for this system.

Early Warning Reporting System.—The Committee directs the Administrator to submit a report to the House and Senate Committees on Appropriations detailing the methods the Agency will adopt to ensure that all tires imported and sold in the United States comply with the Early Warning Reporting System as outlined in NHTSA's final regulations.

HIGHWAY SAFETY PROGRAMS

The Committee recommends the following adjustments to the budget request:

Occupant protection: Out- reach initiatives to in- crease belt use	+\$3,500,000
Emergency medical serv- ices	+1,000,000
Impaired driving:	
Judicial/prosecutorial initiative	+1,500,000
Repeat offender tracking model	+3,000,000
Target population out- reach	+1,500,000
Motorcycle safety	+300,000
Drugs, driving and youth ..	+295,000
Highway safety research ...	+200,000

National occupant protection program.—The stated objectives of NHTSA's occupant protection program are to increase seat belt use and decrease the number of child occupant fatalities. Over the last several years, NHTSA has set aggressive goals for achieving seat belt use across the nation since each percentage point increase in seat belt use saves approximately 226 lives and prevents over 3,700 injuries each year. NHTSA's seat belt goal in 2001 was 86 percent and while seat belt use reached an all-time high of 73 percent, the agency still fell far short of its national goal. The Committee is disappointed that NHTSA's seat belt goal dropped from 87 percent in 2002 to 78 percent in 2003 and that the agency's fiscal year 2003 budget cut its core safety program dedicated to national occupant protection by 14 percent. The Committee strongly believes that NHTSA must continue to be vigilant and creative in its efforts to increase national seat belt use particularly for those targeted groups that are high-risk and often difficult to reach. The Committee recommends \$14,683,000 for NHTSA's occupant protection efforts which is \$3,500,000 more than the President's budget request. The Committee directs that these additional funds be used to continue the outreach activities toward minority populations, teens and rural populations. To further supplement NHTSA's overall seat belt efforts, the Committee has included bill language to continue the public service message program that was started in fiscal year 2002. A more detailed discussion of this program is included in the NHTSA bill language section of this report.

Impaired driving.—The Committee is very concerned about the lack of progress that is being made to reduce the number of alcohol-related motor vehicle fatalities. In 2000, there were 16,653 alcohol-related fatalities which was 5.4 percent more than 1999 and represented the largest percentage increase on record. These alcohol-related crashes also cause an estimated 300,000 injuries and cost society over \$45,000,000,000 every year. Unfortunately, the preliminary estimates for 2001 indicate there was virtually no reduction in

the number of alcohol-related fatalities. At the Committee's hearing on highway safety on February 27, 2002, witnesses testified that the progress in meeting national goals to reduce alcohol-impaired driving has stalled in recent years. Again, as in the case of NHTSA's occupant protection program, the fiscal year 2003 budget reduced NHTSA's impaired driving core program by 22 percent at a time when alcohol-related fatalities are increasing. The Committee recommends \$15,576,000 for NHTSA's impaired driving program which is \$6,000,000 more than the President's budget request.

Judicial and prosecutorial awareness.—Within the funds provided for NHTSA's impaired driving program, the Committee provides \$1,500,000 to improve prosecutorial and judicial actions to combat alcohol-impaired driving. A review of past NHTSA expenditures to combat impaired driving revealed that the agency has dedicated only a small portion of Section 403 funds to support the role of prosecutors and judges in dealing with impaired drivers. The Committee directs the Secretary of Transportation, in cooperation with the Attorney General, to conduct a detailed analysis designed to strengthen Federal policies and laws intended to combat alcohol-impaired driving and document the results and recommendations. This report should identify best strategies for reducing obstacles to obtaining convictions of alcohol-impaired driving and strategies to help prosecutors and judges apply sanctions in a consistent manner. The report should also emphasize strategies to reduce plea bargaining, diversion or deferral programs, and other means used by offenders to avoid any permanent record of an alcohol-related offense. In particular, the analysis should provide guidance for improving judicial and prosecutorial training, outreach, and adherence to state standards of conduct. The Committee directs NHTSA to submit this report to the Senate and House Committees on Appropriations by October 1, 2003.

Tracking repeat offenders.—The Committee includes \$3,000,000 within NHTSA's impaired driving program to expedite the development and expand the testing of the model "Driver History Information Records System for Impaired Driving." This tracking system is designed to assist States and local communities exchange timely information about prior impaired driving offenses and to transmit conviction and license suspension notices among law enforcement officials, the courts and driver licensing agencies.

Impaired driving and targeted populations.—The Committee is concerned that there continues to be certain segments of the population that are over represented in alcohol-related motor vehicle crashes. For example, male drivers between the ages of 21 and 34 represent the highest percentage of alcohol-related fatalities. The Committee strongly believes that NHTSA must continue to vigorously pursue strategies to reduce impaired driving among the age groups and ethnic populations that represent the highest risk. Within the funds provided for NHTSA's impaired driving program, the Committee includes \$1,500,000 to increase the outreach efforts with these targeted populations.

Highway safety research.—The Committee includes \$7,298,000 for NHTSA's highway safety research program, an increase of \$200,000 above the President's budget request. Within the funds provided, the Committee includes \$200,000 to initiate research on advanced alcohol ignition interlock systems. A key component of this research is the development of advanced technologies for use in the steering wheel that could detect blood alcohol levels.

Drugs, driving and youth.—The Committee recommendation includes \$1,437,000 for NHTSA's drugs, driving and youth program

efforts, an increase of \$295,000 over the President's budget. The Committee is concerned about the data which indicates that alcohol and drug use is increasing among teenagers. Since this youth population is expected to increase nearly 5 percent by the year 2005, the Committee believes it is particularly important for NHTSA to boost its impaired driving youth prevention and education activities. The Committee is aware of programs such as the "Protecting You, Protecting Me" curriculum which is designed to educate children in grades 1 through 5 about the dangers of riding in a car with an impaired driver and underage alcohol consumption. The Committee directs NHTSA to utilize these additional funds to develop a similar type of program directed toward teenager drivers.

Emergency medical services.—The Committee recommends \$3,189,000 for emergency medical services, which is \$1,000,000 more than the President's budget request. Within the funds provided, the Committee includes \$1,000,000 to continue training EMS personnel in delivering pre-hospital care to patients with traumatic brain injuries. Since this program's inception in 1998, it is estimated that nearly 31 states will have received the training and educational material and over 1,600 in-state instructors will have received training. The Committee urges NHTSA to continue this national rollout with the Brain Trauma Foundation and its Centers of Excellence. Just as it is important for EMS personnel to receive proper training to care for the critically injured, it is equally important that first responders have the tools necessary to locate the injured as quickly as possible. There have been a number of highly publicized cases of crash victims who were stranded for extended periods of time because their vehicles were not easily located. Advanced location technology associated with wireless E 9-1-1 can assist law enforcement and EMS personnel in reaching victims quickly. The Committee notes that NHTSA's fiscal year 2003 budget includes plans to develop a national clearinghouse and best practices document for State implementation of wireless E 9-1-1. As these implementation tools are developed, the Committee encourages NHTSA to consult with a broad range of EMS providers, law enforcement officials, wireless technology providers and the appropriate Federal and State agencies.

Motorcycle safety.—The Committee provides \$945,000 for NHTSA's motorcycle safety efforts which represents a \$300,000 increase over the President's budget. The Committee is concerned about the upward trend in the number of motorcycle fatalities. From 1999 to 2000, motorcycle fatalities rose by 15 percent and the preliminary estimates for 2001 indicate that fatalities rose by another 7.2 percent over 2000. Since new unit sales of on-highway motorcycles have increased in recent years, rider training programs have not been able to keep pace. In December 2000, NHTSA assembled a technical working group comprised of law enforcement, health care, insurance and motorcycle organizations to assist in the development of the National Agenda for Motorcycle Safety. The Committee has provided increased funding to further assist in the implementation of the Agenda's urgent and essential recommendations. In particular, the Committee urges NHTSA to coordinate with the motorcycle community to focus these additional resources toward strategies which will enhance rider crash avoidance skills and improve motorcycle conspicuity.

RESEARCH AND ANALYSIS

National Automotive Sampling System.—The Committee provides \$11,570,000 for the Na-

tional Automotive Sampling System (NASS), an increase of \$1,000,000 over the President's budget request. The NASS General Estimates System data assists in assessing the trend and magnitude of the crash situation in this country, and the NASS Crash-worthiness Data System provides more in-depth and descriptive data which allows NHTSA to quantify the relationships between the occupants and vehicles in the real-world crash environment. The Committee directs NHTSA to utilize the additional funds to expand the NASS database with a particular focus on child safety seat and tire-related data.

Biomechanical research.—The Committee provides a total of \$14,954,000 for biomechanics research which is \$1,000,000 more than the President's budget request. The Committee's recommendation includes necessary resources for the continued research of the Crash Injury Research and Engineering Network program. In addition, within the funds provided, the Committee includes \$2,000,000 to continue research related to traumatic brain and spinal cord injuries caused by motor vehicle, motorcycle, and bicycle accidents at the Southern Consortium for Injury Biomechanics.

Tire safety research.—The Committee recommendation includes \$375,000 in NHTSA's pneumatic tire research program for the Mercer Engineering Research Center to initiate research on the relationships between tire age, condition driven, load and pressure and the effects on tire safety.

Built-in child restraints.—Section 13(h) of the TREAD Act required NHTSA to conduct a study on the use and effectiveness of automobile booster seats for children. To date, NHTSA has yet to release this study which had a statutory deadline of November 1st, 2001. The pending study is expected to compare the safety benefits of existing booster systems to the safety provided to children who are using lap and shoulder belts alone. The Committee urges NHTSA to issue the results of the booster seat study without delay, however, the Committee believes that a review of integrated or built-in child restraints is also warranted. The Committee provides \$1,000,000 within NHTSA's safety systems research program to conduct an evaluation of integrated or built-in child safety systems. The evaluation should include the safety and correctness of fit for the child; the availability of testing data on the system and vehicle in which it will be used; compatibility with different makes and models; cost-effectiveness in mass production for consumers; ease of use and relative availability to children riding in motor vehicles; and benefits of built-in seats to increasing compliance with State child occupant restraint laws. The Committee directs NHTSA to submit the results of this supplementary study to the House and Senate Committees on Appropriations by October 1, 2003.

Heavy vehicle research.—Within the funds provided for heavy vehicle research, the Committee includes \$1,000,000 for the National Transportation Research Center in Tennessee to continue to conduct broad-based laboratory-to-roadside research into heavy vehicle safety issues.

NATIONAL DRIVER REGISTER (HIGHWAY TRUST FUND)

The National Driver Register (NDR) is a central repository of information on individuals whose licenses to operate a motor vehicle have been revoked, suspended, canceled, or denied. The NDR also contains information on persons who have been convicted of serious traffic-related violations such as driving while impaired by alcohol or other drugs. State driver licensing officials query the NDR when individuals apply for a license, for the purpose of determining whether driving privileges have been withdrawn by

other States. Other organizations such as the Federal Aviation Administration and the Federal Railroad Administration also use NDR license data in hiring and certification decisions in overall U.S. transportation operations.

The bill includes \$2,000,000 for the NDR from the highway trust fund.

In addition, the Committee reminds NHTSA that the direction given to the Federal Motor Carrier Safety Administration regarding the implementation of Section 204 of the Motor Carrier Safety Improvement Act and the development of a one-driver, one-record pointer system is equally applicable to NHTSA. The Committee expects both agencies to work together on these initiatives without further delay.

HIGHWAY TRAFFIC SAFETY GRANTS

(LIQUIDATION OF CONTRACT AUTHORIZATION) (HIGHWAY TRUST FUND)

Appropriations, 2002	\$223,000,000
Budget estimate, 2003	225,000,000

Committee recommendation	225,000,000
--------------------------------	-------------

For fiscal year 2003 the Transportation Equity Act for the 21st Century authorized the following State grant programs: Highway Safety Program, the Alcohol-Impaired Driving Countermeasures Incentive Grant Program and the Occupant Protection Incentive Grant Program. Under the Highway Safety Program, grant allocations are determined on the basis of a statutory formula established under 20 U.S.C. 402. Individual States use this funding in national priority areas established by Congress which have the greatest potential for achieving safety improvements and reducing traffic crashes, fatalities, and injuries. Also, the national occupant protection survey shall be funded from within this amount. The Alcohol-Impaired Driving Countermeasures Incentive Grant Program encourages States to enact stiffer laws and implement stronger programs to detect and remove impaired drivers from the roads. The occupant protection pro-

gram encourages States to promote and strengthen occupant protection initiatives. The State Highway Safety Data Grants Program encourages States to improve their collection and dissemination of important highway safety data.

The Committee recommends an appropriation for liquidation of contract authorization of \$225,000,000 for the payment of obligations incurred in carrying out provisions of these grant programs.

The Committee has included a provision prohibiting the use of section 402 funds for construction, rehabilitation or remodeling costs, or for office furnishings and fixtures for State, local, or private buildings or structures.

LIMITATION ON OBLIGATIONS

The bill includes language limiting the obligations to be incurred under the various highway traffic safety grants programs. Separate obligation limitations are included in the bill with the following funding allocations:

	Fiscal year 2002 enacted	Fiscal year 2003 estimate	Committee recommendation
Highway safety programs	\$160,000,000	\$165,000,000	\$165,000,000
Alcohol-impaired driving countermeasures grants	38,000,000	40,000,000	40,000,000
Occupant protection incentive grants	15,000,000	20,000,000	20,000,000
State highway safety data grants	10,000,000
Total	223,000,000	225,000,000	225,000,000

BILL LANGUAGE

Public safety messages.—The bill contains a provision (sec. 340) extending the authority for States to use traffic safety grant funds under Section 402 to produce and place highway safety public service messages in television, radio, cinema, print media and on the Internet. This year, the Committee continues a provision that was included in the fiscal year 2002 bill which designated safety belt use innovative grant funds to be used for public safety messages and evaluation to support the Operation ABC (America Buckles up Children) Mobilizations that are conducted each year in May and November. Most of these funds were used to support State high-visibility “Click It or Ticket” enforcement programs in May, 2002. The preliminary results from the May 2002 initiative show continued success in achieving measurable increases in seat belt use. The average percentage increase in seat belt use for those States utilizing paid advertising in the May mobilization initiative was 7.6 percent.

The Committee believes that this program must be continued and expanded in order to achieve its full potential in saving lives and reducing injuries. Just as high visibility enforcement programs have proven to be effective in increasing seat belt use, research has also concluded that sobriety checkpoints are highly effective in reducing alcohol-related traffic fatalities and injuries. NHTSA's own survey has indicated that 4 out of 5 Americans support increased enforcement and tougher laws to protect themselves and their families from impaired drivers. The Committee has included bill language providing \$20,000,000 from seat belt and impaired driving grant programs to be used as directed by the NHTSA Administrator for broadcast advertising to support national law enforcement mobilizations aimed at increasing seat belt use and controlling impaired driving. It is the Committee's intent that these funds support at least two national mobilizations during the year, and that NHTSA work on these initiatives with the States and non-profit safety organizations that have been active in conducting recent mobilizations. Further, the Committee expects NHTSA to work with the States to ensure that they have adequate resources for impaired driving enforcement activities as part of the mobilizations.

force programs have proven to be effective in increasing seat belt use, research has also concluded that sobriety checkpoints are highly effective in reducing alcohol-related traffic fatalities and injuries. NHTSA's own survey has indicated that 4 out of 5 Americans support increased enforcement and tougher laws to protect themselves and their families from impaired drivers. The Committee has included bill language providing \$20,000,000 from seat belt and impaired driving grant programs to be used as directed by the NHTSA Administrator for broadcast advertising to support national law enforcement mobilizations aimed at increasing seat belt use and controlling impaired driving. It is the Committee's intent that these funds support at least two national mobilizations during the year, and that NHTSA work on these initiatives with the States and non-profit safety organizations that have been active in conducting recent mobilizations. Further, the Committee expects NHTSA to work with the States to ensure that they have adequate resources for impaired driving enforcement activities as part of the mobilizations.

FEDERAL RAILROAD ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

The Federal Railroad Administration (FRA) became an operating administration within the Department of Transportation on April 1, 1967. It incorporated the Bureau of Railroad Safety from the Interstate Commerce Commission, the Office of High Speed Ground Transportation from the Department of Commerce, and the Alaska Railroad from the Department of the Interior. The Federal Railroad Administration is responsible for planning, developing, and administering programs to achieve safe operating and mechanical practices in the railroad industry. Grants to the National Railroad Passenger Corporation (Amtrak) and other financial assistance programs to rehabilitate and improve the railroad industry's physical infrastructure are also administered by the Federal Railroad Administration.

The Committee recommends \$1,049,065,000 for the activities of the Federal Railroad Administration for fiscal year 2003. This is \$337,800,000 more than the budget request.

The following table summarizes the Committee recommendations:

Program	Fiscal year—		
	2002 enacted	2003 budget estimate	Committee recommendation
Safety and operations ^{1 2 3}	\$110,857,000	\$73,264,000	\$118,264,000
New user fee revenue for safety and operations	45,000,000
Railroad research and development	29,000,000	14,325,000	29,325,000
New user fee revenue for railroad research and development	14,000,000
Next generation high-speed rail	32,300,000	23,200,000	30,000,000
Alaska railroad rehabilitation ⁴	20,000,000	25,000,000
Grants to National Railroad Passenger Corporation ⁵	521,476,000	521,476,000	826,476,000
Pennsylvania Station Redevelopment Project	20,000,000	20,000,000	20,000,000
Amtrak Reform Council	(225,000)
Total budgetary resources	733,633,000	711,265,000	1,049,065,000

¹ Does not include reductions of \$175,000 pursuant to section 349 of Public Law 107-87 and \$150,000 pursuant to section 1106 of Public Law 107-117 for fiscal year 2002.

² Does not include supplemental funding of \$6,000,000 pursuant to Public Law 107-117 for emergency expenses to respond to the September 11, 2001, terrorist attacks on the United States.

³ Fiscal year 2003 budget estimate excludes \$4,625,000 in CSRS retirement and FEHB accruals.

⁴ Fiscal year 2002 excludes \$10,200,000 transferred from USAF.

⁵ Excludes \$100,000,000 from Public Law 107-117 and \$205,000,000 from the 2002 Supplemental Appropriations Act for further recovery from and response to terrorist Attacks on the United States.

SAFETY AND OPERATIONS

Appropriations, 2002 ¹	\$110,857,000
Budget estimate, 2003	73,264,000
Committee recommendation	118,264,000

¹ Does not reflect reduction of \$175,000 pursuant to section 349 of Public Law 107-87 and \$150,000 pursuant to section 1106 of Public Law 107-117.

² Does not include supplemental funding of \$6,000,000 pursuant to Public Law 107-117 for emergency expenses to respond to the September 11, 2001, terrorist attack on the U.S.

The Safety and Operations account provides support for FRA rail safety activities and all other administrative and operating activities related to staff and programs.

Inspector workforce.—The Committee has approved the President's request for 10 additional full time equivalent (FTE) staff years and 20 additional positions which will bring FRA's inspector workforce to a total of 444 FTEs. The Committee includes \$1,393,000 to fund 6 additional track inspector FTEs and 4 additional operating practice inspector FTEs. Given the recent increases in track-caused accidents and derailments as well as human-factor caused accidents, the Committee urges FRA to move rapidly to fill these positions.

Highway-railroad grade crossing safety.—The Committee notes that the Department has either completed or made substantial progress on most of the actions specified in its strategic action plan to improve safety at highway-railroad grade crossings. In view of the need to continue progress in this area, the Committee directs the Secretary of Transportation to submit with the fiscal year 2004 budget request a new action plan outlining specific efforts to be pursued by FRA, FHWA, FMCSA, NHTSA and the ITS Joint Program Office to improve safety at both public and private crossings.

Positive train control.—The Committee agrees with the National Transportation Safety Board that the current pace of development and implementation of collision avoidance technologies is inadequate. No plan for industry-wide integration has been developed. Progress has been particularly slow along rail lines that primarily serve freight carriers, and even those lines with significant passenger traffic remain largely unprotected today—some 12 years after positive train control was first placed on the Safety Board's "Most Wanted" list. The Committee directs FRA to submit an updated economic analysis of the costs and benefits of PTC and related systems that takes into account advances in technology, and systems savings to carriers and shippers as well as other cost savings that might be realized by prioritized deployment of these systems, especially along lines that might mix freight and passenger trains. That analysis should be submitted as a letter report to both the House and Senate Committees on Appropriations by October 1, 2003.

Safety assurance and compliance program (SACP).—In 1997, FRA began the implementation of the Safety Assurance and Compliance Program (SACP) which is a systems-based approach to safety inspection and is designed to help maximize FRA's safety inspection efforts. With over 220,000 miles of railroad operated by the nation's Class I, regional and local freight railroads, the Committee believes it is imperative that FRA continue to utilize SACP as well as traditional methods of inspection. The Committee directs FRA to provide a status report by April 1, 2003 to the House and Senate Committees on Appropriations which summarizes FRA's SACP activities in fiscal year 2002 along with the agency's safety audit plans for fiscal year 2003.

SAFETY AND OPERATIONS USER FEES

Appropriations, 2002	
----------------------------	--

Budget estimate, 2003	(\$45,000,000)
Committee recommendation	

User fees.—The Committee denies the Administration's legislative proposal to impose safety user fees on FRA safety and operations services.

RAILROAD RESEARCH AND DEVELOPMENT

Appropriations, 2002	\$29,000,000
Budget estimate, 2003	14,325,000
Committee recommendation	29,325,000

The Federal Railroad Administration's Railroad Research and Development Program provides for research in the development of safety and performance standards for high-speed rail and the evaluation of their role in the Nation's transportation infrastructure. The Committee recommends an appropriation of \$29,325,000 for railroad research and development, \$15,000,000 more than the administration's requested level.

COMMITTEE RECOMMENDATION

The Committee recommends the following funding levels for the Railroad research and development programs:

Railroad System Issues	\$3,225,000
Human Factors	3,478,000
Rolling Stock and Components	2,487,000
Track and Structures	5,225,000
Track and Train Interaction	3,350,000
Train Control	1,250,000
Grade Crossings	1,435,000
Hazardous Materials Transportation	1,000,000
Train Occupant Protection	6,450,000
R&D Facilities and Test Equipment	1,425,000

Track and Structures.—The Committee provides \$5,225,000 for FRA's track and structures research efforts. Within the funds provided, the Committee includes \$1,000,000 to continue the development of the Integrated Railway Remote Information Service (InteRRIS) which is public-private demonstration program which utilizes defect detectors across North America. InteRRIS is an internet-based system designed to aggregate, interrogate and store data from these field-deployed detector systems. These additional funds will provide enhancements to FRA's National Rail Corridor Car Performance Database to make it web accessible and generate new queries to support any analysis of the data for improving safety and predictive maintenance. The Committee also includes \$2,000,000 for Marshall University and the University of Nebraska for safety research programs in rail equipment, human factors, track, and rail safety related issues.

Freight congestion study.—The Committee is aware of continued railroad-freight congestion issues in the Chicago, Illinois region. It can take 2 days or more to move freight through the region, often times at train speeds averaging between 6.8 and 12 m.p.h. Blocked crossings also contribute to this congestion. More than 37,500 rail freight cars move through the region daily across nearly 2,000 at-grade railroad crossings and to 26 intermodal yards. The Committee directs the Federal Railroad Administrator to work with the Chicago Transportation Coordination Office and communities in the Chicago region, including the city of Chicago, to compile and publish a periodic measure of the impact of rail operations in the area. This shall also include the status of improvement projects undertaken by the railroads to relieve congestion. This information should translate operational reports to reflect community impacts of blocked crossings and idling locomotives/trains. These reports

shall be submitted on a quarterly basis. The administrator should also expand the number of monitored crossings in the Chicago region to measure the full extent of block railroad crossings, including using event recorders and/or remote monitors to collect data indicating the exact times grade crossing gates are closed and the length of time they remain closed. The administrator should report to the House and Senate Committees on Appropriations the status of these efforts no later than 120 days after enactment.

RAILROAD RESEARCH AND DEVELOPMENT USER FEES

Appropriations, 2002	
Budget estimate, 2003	(\$14,000,000)
Committee recommendation	

User fees.—The Committee denies the Administration's legislative proposal to impose user fees on FRA's railroad research and development activities.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING PROGRAM

Section 502 of Public Law 94-210, as amended authorizes obligation guarantees for meeting the long-term capital needs of private railroads. Railroads utilize this funding mechanism to finance major new facilities and rehabilitation or consolidation of current facilities. No appropriations or new loan guarantee commitments are proposed in fiscal year 2003.

The Rail Rehabilitation and Improvement Financing Program, as established in section 7203 of the Transportation Equity Act for the 21st Century [TEA21], will enable the Secretary of Transportation to provide loans and loan guarantees to State and local governments, Government-sponsored authorities and corporations, railroads and joint ventures to acquire, improve, or rehabilitate intermodal or rail equipment or facilities, including track, bridges, yards, and shops.

NEXT GENERATION HIGH-SPEED RAIL

Appropriations, 2002	\$32,200,000
Budget estimate, 2003	23,200,000
Committee recommendation	30,000,000

The Committee has provided \$30,000,000 in general fund appropriations for the High-Speed Ground Transportation [HSGT] Program, \$6,800,000 more than the President's budget request.

The Committee first provided funding for the Next Generation High-Speed Rail [NGHSR] Program in fiscal year 1995. The program funds high-speed rail research, development, and technology demonstration programs to foster high-speed passenger service on rail corridors throughout the country.

The Committee recommends the following funding levels for the Next Generation High-Speed Rail Programs:

High-speed train control systems	\$5,000,000
High-speed non-electric locomotives	5,300,000
Grade crossing hazard mitigation/Low-cost innovative technologies ..	3,900,000
Track and structures technology	1,200,000
Corridor planning	9,100,000
Magnetic levitation	5,500,000

High-speed train control systems.—The Committee has provided a total of \$5,000,000 for the North American Joint PTC project.

Grade crossing hazard mitigation/low-cost innovative technologies.—The Committee recommends \$3,900,000 for grade crossing hazard mitigation and low-cost innovative technology initiatives.

Within the funds provided, the Committee includes the following allocations:

North Carolina Sealed Corridor Initiative	\$700,000
Illinois Rail-Grade crossing safety program	800,000
State of Vermont hazard elimination	500,000

Corridor planning.—The Committee includes \$9,100,000 for passenger rail corridor planning. Within the funds provided, the Committee includes the following allocations:

Southeast High Speed Rail Corridor, NC	\$1,000,000
California high-speed rail ..	2,000,000
Florida high-speed rail ..	3,850,000
Gulf Coast high-speed rail corridor	800,000
Seattle-Everett corridor study	750,000
Las Vegas-Los Angeles high-speed study	200,000
Northern New England corridor, VT	500,000

Seattle-Everett, Washington Rail Corridor Study.—The Committee provides \$750,000 to conduct a corridor planning study of track capacity and utilization by freight, commuter and intercity rail services in the Seattle-Everett portion of the Pacific Northwest High Speed Rail Corridor and the environmental challenges that would accompany expansion of that track capacity.

Las Vegas-Los Angeles study.—The Committee provides \$200,000 to conduct a rail capacity and ridership analysis for high-speed rail service between Las Vegas and Los Angeles. The study will assess existing capacity along the route; identify potential improvements to increase capacity and reduce trip times; conduct preliminary engineering and assess station requirements.

Magnetic levitation transportation.—A total of \$5,500,000 has been provided for magnetic levitation activities to be distributed as follows:

Washington-Baltimore, MD: Environmental studies	\$500,000
Nevada-California: Environmental impact studies, design and engineering	2,000,000
Greensburg-Pittsburgh, PA: Planning, engineering and design	2,000,000
Southern California Maglev environmental study and planning	1,000,000

Rail-highway crossing hazard eliminations.—Section 1103 of the Transportation Equity Act for the 21st Century (TEA21) provides \$5,250,000 for the elimination of rail-highway crossing hazards. Of these set-aside funds, the following allocations are made:

Gulf Coast high-speed rail corridor	\$2,000,000
Chicago Hub high-speed rail corridor between Milwaukee and LaCrosse, WI	500,000
Pacific Northwest high-speed rail corridor	1,500,000
ALASKA RAILROAD REHABILITATION	
Appropriations, 2002 ¹	\$20,000,000
Budget estimate, 2003	20,000,000
Committee recommendation	25,000,000

¹ Excludes \$10,200,000 transferred from USAF pursuant to section 8062 of Public Law 107-117.

The Committee has included a total of \$25,000,000 for rail safety and infrastructure improvements benefiting passenger operations of the Alaska railroad. This railroad extends 498 miles from Seward through Anchorage, the largest city in Alaska, to the city of Fairbanks, and east to the town of North Pole and Eielson Air Force Base. It carries both passengers and freight, and provides a critical transportation link for passengers and cargo traveling through difficult terrain and harsh climatic conditions.

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION (AMTRAK)

Appropriations, 2002 ¹	\$521,476,000
Budget estimate, 2003	521,476,000
Committee recommendation	826,476,000

¹ Excludes supplemental funding of \$100,000,000 pursuant to Public Law 107-117 and \$205,000,000 pursuant to the Supplemental Appropriations Act for Fiscal Year 2002.

COMMITTEE RECOMMENDATION

For fiscal year 2003, the administration has requested an appropriation of \$521,476,000. Separately, Amtrak's Board of Directors has submitted a budget request for \$1,200,000,000 for fiscal year 2003, an increase of \$305,000,000 or 58 percent more than the fiscal year 2003 budget request.

Transparency in Amtrak's Budget Process.—The Secretary and other members of the administration have stated repeatedly that greater transparency is needed in Amtrak's budgeting process. The Committee wholeheartedly agrees and commends the Secretary for his successful efforts in requiring Amtrak to provide all relevant participants in the debate with accurate and timely financial documentation. Similarly, the Committee commends Amtrak's new leadership for its willingness to provide such transparency in the development of the railroad's spending plans.

AMTRAK REFORM COUNCIL

Appropriations, 2002 ¹	\$225,000
Budget estimate, 2003
Committee recommendation

¹ The Council is an independent entity. Its funding is presented within the FRA for display purposes only.

[In thousands of dollars]

The Committee has not provided funding for the Amtrak Reform Council as the Council has now issued its final report and completed its work.

PENNSYLVANIA STATION REDEVELOPMENT PROJECT

Appropriations, 2002	\$20,000,000
Budget estimate, 2003	20,000,000
Committee recommendation	20,000,000

In 2000, an advance appropriation of \$20,000,000 was provided for each fiscal year 2001, 2002, and 2003. These funds support the redevelopment of the Pennsylvania Station in New York City, including the renovation of the James A. Farley Post Office building as a train station and commercial center, and basic upgrades to Pennsylvania Station.

FEDERAL TRANSIT ADMINISTRATION

SUMMARY OF FISCAL YEAR 2003 PROGRAM

The Federal Transit Administration was established as a component of the Department of Transportation by Reorganization Plan No. 2 of 1968, effective July 1, 1968, which transferred most of the functions and programs under the Federal Transit Act of 1964, as amended (78 Stat. 302; 49 U.S.C. 1601 et seq.), from the Department of Housing and Urban Development. The missions of the Federal Transit Administration are: to assist in the development of improved mass transportation facilities, equipment, techniques, and methods; to encourage the planning and establishment of urban and rural transportation services needed for economical and desirable development; to provide mobility for transit dependents in both metropolitan and rural areas; to maximize productivity of transportation systems; and to provide assistance to State and local governments and their instrumentalities in financing such services and systems.

The current authorization for the programs funded by the Federal Transit Administration is contained in the Transportation Equity Act for the 21st Century.

Under the Committee recommendation, a total program level of \$7,226,000,000 would be provided for the programs of the Federal Transit Administration for fiscal year 2003, which is the obligation limitation authorized under the mass transit category in TEA21. This funding is comprised of \$1,445,000,000 in direct appropriations of general funds and \$5,781,000,000 in limitations on contract authority.

The following table summarizes the Committee's recommendations compared to fiscal year 2002 and the administration's request:

Program	2002 enacted	2003 estimate ¹	Committee recommendation
Administrative expenses	67,000	73,000	73,000
Formula grants ^{2,3}	3,542,000	3,839,000	3,839,000
University transportation research	6,000	6,000	6,000
Transit planning and research	116,000	122,000	122,000
Capital investment grants ^{3,4}	2,891,000	3,036,000	3,036,000
Job access and reverse commute grants	125,000	150,000	150,000
Total	6,747,000	7,226,000	7,226,000

¹ Excludes \$3,586,000 in CSRS/FEHB accruals.

² Excludes \$23,500,000 in Emergency supplemental funding provided pursuant to Public Law 107-117.

³ Fiscal year 2002 reflects transfer of \$50,000,000 from Formula grants to Capital investment grants.

⁴ Excludes \$100,000,000 in Emergency supplemental funding provided pursuant to Public Law 107-117.

ADMINISTRATIVE EXPENSES

	General fund	Trust fund	Total
Appropriations, 2002	\$13,400,000	\$53,600,000	\$67,000,000
Budget estimate, 2003 ¹	14,600,000	58,400,000	73,000,000
Committee recommendation	14,600,000	58,400,000	73,000,000

¹ Excludes \$3,586,000 in CSRS/FEHB accruals.

The Committee recommends a total of \$73,000,000 in budget resources funds for administrative expenses.

FORMULA GRANTS

	General fund	Trust fund	Total
Appropriations, 2002 ²	\$668,400,000	\$2,873,600,000	\$3,542,000,000
Budget estimate, 2003	767,800,000	3,071,200,000	3,839,000,000
Committee recommendation	767,800,000	3,071,200,000	3,839,000,000

¹ Reflects \$50,000,000 transferred to capital investment grants pursuant to Public Law 107-87 and excludes \$23,500,000 in Emergency Supplemental funding provided pursuant to Public Law 107-117.

² Fiscal year 2002 does not reflect FHWA flex funding transferred to FTA.

Formula grants to States and local agencies funded under this heading fall into four categories: urbanized area formula grants (U.S.C. sec. 5307); clean fuels formula grants (U.S.C. sec. 5308); formula grants and loans for special needs of elderly individuals and

individuals with disabilities (U.S.C. sec. 5310); and formula grants for non-urbanized areas (U.S.C. sec. 5311). In addition, set-asides of formula funds are directed to: a grant program for intercity bus operators to finance Americans with Disabilities Act [ADA] accessibility costs; and the Alaska Railroad for improvements to its passenger operations.

Within the total funding level of \$3,839,000,000 for fiscal year 2003, the statutory distribution of these formula grants is allocated among these categories as follows:

Urbanized areas (sec. 5307)	\$3,445,939,606
Clean fuels (sec. 5308)	50,000,000
Elderly and disabled (sec. 5310)	90,652,801
Nonurbanized areas (sec. 5311)	240,607,643
Over-the-Road Bus Program	6,950,000
Alaska railroad	4,849,950

Section 3007 of TEA21 amends U.S.C. 5307, urbanized formula grants, by striking the authorization to utilize these funds for operating costs, but includes a specific provision allowing the Secretary to make operating grants to urbanized areas with a population of less than 200,000. Generally, urbanized formula grants may be used to fund capital projects, and to finance planning and im-

provement costs of equipment, facilities, and associated capital maintenance used in mass transportation. All urbanized areas greater than 200,000 in population are statutorily required to use 1 percent of their annual formula grants on enhancements, which include landscaping, public art, bicycle storage, and connections to parks.

Clean fuels program.—The Transportation Equity Act for the 21st Century requires that \$50,000,000 be set-aside from funds made available under the formula grants program to fund the clean fuels program. The clean fuels program is supplemented by an additional set-aside from the major capital investment's bus program and provides grants for the purchase or lease of clean fuel buses for eligible recipients in areas that are not in compliance with air quality attainment standards. The Committee has included bill language transferring the clean fuel formula set-aside funds to the capital investment grants account. The Committee has identified designated recipients of these funds within the projects listed under the bus program of the capital investment grants account.

The following table displays the State-by-State distribution of the formula program funds within each of the program categories:

FEDERAL TRANSIT ADMINISTRATION, FISCAL YEAR 2003 GUARANTEED LEVEL APPORTIONMENT FOR FORMULA PROGRAMS (BY STATE)

State	Section 5307 urbanized area	Section 5311 nonurbanized area	Section 5310 elderly and persons with disabilities	Total formula programs
Alabama	\$14,927,927	\$6,693,617	\$1,582,925	\$23,204,469
Alaska	1,8,546,214	932,932	240,303	9,719,449
American Samoa		153,033	60,088	213,121

Wisconsin	41,295,126	6,734,456	1,574,405	49,603,987
Wyoming	1,381,764	982,612	256,054	2,620,430
Subtotal	3,433,535,608	239,404,605	90,652,801	3,763,593,014
Oversight	17,253,948	1,203,038		18,456,986
Total			90,652,801	3,782,050,000
Clean Fuels				50,000,000
Over-the-Road Bus Accessibility				6,950,000
Grand Total				3,839,000,000

¹ Includes \$4,849,950 for the Alaska Railroad improvements to passenger operations.

Over-the-road buses.—The Committee has included \$6,950,000 in fiscal year 2003 for the over-the-road accessibility program. These funds are intended to assist over-the-road bus operators in complying with the Americans with Disabilities Act accessibility requirements.

UNIVERSITY TRANSPORTATION RESEARCH

	General fund	Trust fund	Total
Appropriations, 2002	\$1,200,000	\$4,800,000	\$6,000,000
Budget estimate, 2003	1,200,000	4,800,000	6,000,000
Committee recommendation	1,200,000	4,800,000	6,000,000

Section 5505 of TEA21 provides authorization for the university transportation research program. The purpose of the university transportation research program is to become a national resource and focal point for the support and conduct of research and training concerning the transportation of passengers and property. Funds provided under the FTA university transportation research program are transferred to and managed by the Research and Special Programs Administration (RSPA), combined with a transfer from the Federal Highway Administration of \$26,500,000. The transit university transportation research program funds are statutorily available only to the following universities: University of Minnesota and Northwestern University. Funding is also statutorily available for awards based on competitive applications of approved universities.

The Committee action provides \$6,000,000 for the university transportation research program, the same level as provided in fiscal year 2002.

TRANSIT PLANNING AND RESEARCH

	General fund	Trust fund	Total
Appropriations, 2002 ¹	\$23,000,000	\$93,000,000	\$116,000,000
Budget estimate, 2003	24,200,000	97,800,000	122,000,000
Committee recommendation	24,200,000	97,800,000	122,000,000

¹ Does not reflect FHWA flex funding transferred to FTA.

The Committee action provides \$122,000,000 for transit planning and research. The bill contains language specifying that \$60,385,600 shall be available for the metropolitan planning program; \$5,250,000 for the rural transit assistance program; \$31,500,000 for the national planning and research program; \$12,614,400 for the State planning and research program; \$8,250,000 for transit cooperative research; and \$4,000,000 for the National Transit Institute at Rutgers University.

The following table summarizes the Committee recommendation:

	Fiscal year—		Committee recommendation
	2002 program level ¹	2003 budget estimate	
Metropolitan planning	\$55,422,400	\$60,385,600	\$60,385,600
Rural transit assistance program	5,250,000	5,250,000	5,250,000
State planning and research program	11,577,600	12,614,400	12,614,400
Transit cooperative research program	8,250,000	8,250,000	8,250,000
National Transit Institute	4,000,000	4,000,000	4,000,000
National planning and research program	31,500,000	31,500,000	31,500,000
Total	116,000,000	122,000,000	122,000,000

¹ Fiscal year 2002 does not reflect FHWA flex funding transferred to FTA.

NATIONAL PLANNING AND RESEARCH PROGRAM

The Committee recommendation includes transit planning and research grants from the national program for:

Project	Amount
Auburn University Compus Transit System, AL	\$375,000
Center for Composites Manufacturing, AL	1,000,000
Detroit Airport Rail Project, MI	200,000

Project	Amount	Committee recommendation		
		2002 program level	Fiscal year 2003 budget estimate	Committee recommendation
Detroit Area Regional Transportation Authority Studies, MI	750,000			
Electric Transit Vehicle Institute, TN	500,000			
I-93 Corridor Transit Investment Study, NH	1,000,000			
National Bio-terrorism Civilian Medical Response Center, PA	1,000,000			
National Deployment of the ITN America, ME	500,000

Zinc-air Zero emmissions bus, NV	1,500,000			
Project ACTION	3,000,000			

TRUST FUND SHARE OF EXPENSES (LIQUIDATION OF CONTRACT AUTHORIZATION)

(HIGHWAY TRUST FUND)

Appropriations, 2002	(\$5,398,000,000)
Budget estimate, 2003	(5,781,000,000)
Committee recommendation	5,781,000,000

For fiscal year 2003, the Committee has provided \$5,781,000,000 in liquidating cash for the trust fund share of transit expenses associated with the following programs: administrative expenses, formula grants, university transportation research, transit planning and research, job access and reverse commute grants, and capital investment grants. This level of funds is equal to the total budget authority from the highway trust fund inside the transit firewall as outlined in the transportation discretionary spending guarantee subtitle of the Transportation Equity Act for the 21st Century.

CAPITAL INVESTMENT GRANTS

	General funds	Trust funds	Total
Appropriations, 2002 ¹	\$618,200,000	\$2,272,800,000	\$2,891,000,000
Budget estimate, 2003	607,200,000	2,428,800,000	3,036,000,000
Committee recommendation	607,200,000	2,428,800,000	3,036,000,000

¹ Includes \$50,000,000 transferred from formula grants pursuant to Public Law 107-87 and excludes \$100,000,000 in Emergency supplemental funding provided pursuant to Public Law 107-117.

Section 5309 of 49 U.S.C. authorizes discretionary grants or loans to States and local public bodies and agencies thereof to be used in financing mass transportation investments. Investments may include construction of new fixed guideway systems and extensions to existing guideway systems; major bus fleet expansions and bus facility construction; and fixed guideway expenditures for existing systems.

The Committee action provides a level of \$3,036,000,000. Within this total, \$2,428,800,000 is from the "Mass transit" account of the highway trust fund, and no more than \$607,200,000 shall be appropriated from general funds. The following table summarizes the Committee recommendations:

Project	Amount	2002 program level	Fiscal year 2003 budget estimate	Committee recommendation
AC Transit Buses and Bus Facilities, CA	\$607,200,000	\$607,200,000	\$607,200,000	\$607,200,000
Adams Transit Authority Buses and Bus Facilities, PA	1,214,400,000	1,214,400,000	1,214,400,000	1,214,400,000
Total	1,821,600,000	3,036,000,000	3,036,000,000	3,036,000,000

Limited extensions of discretionary funds.—There have been occasions when the Committee has extended the availability of capital investment funds. These extensions are granted on a case by case basis and, in nearly all instances, are due to circumstances that were unforeseen by the project's sponsor. The availability of these particular funds are intended for one additional year, absent further congressional direction. The Committee directs the FTA not to reallocate funds provided in fiscal year 1999 and fiscal year 2000 for the following projects:

- Santa Fe/El Dorado, New Mexico rail link project
- Albuquerque, New Mexico light rail project
- Tuscaloosa, Alabama intermodal center
- Kenosha-Racine-Milwaukee, Wisconsin rail extension project
- Northern New Mexico park and ride facilities and State of New Mexico, Buses and Bus-Related Facilities
- Birmingham, Alabama transit corridor project
- Harrisburg, Pennsylvania-Capital Area Transit/Corridor One commuter rail project
- Charleston, South Carolina monorail corridor project
- King County, Washington park and ride expansion
- Sequim, Washington—Clallam Transit multimodal center
- Birmingham-Jefferson County, Alabama buses
- Port MacKenzie/Upper Cook Inlet Intermodal Facility
- Roaring Fork Transportation Authority, CO
- Dothan Wiregrass, Alabama vehicles and transit facility
- Jefferson/Montevallo, Alabama pedestrian walkway
- Montgomery, Alabama Union Station intermodal center
- Pritchard, Alabama bus transfer center
- West Virginia statewide intermodal facility and buses.

Bill language.—The bill contains a general provision (sec. 322) reprogramming funds provided in previous fiscal years for the following project:

- Wilmington, Delaware downtown transit connector (fiscal year 2000 and fiscal year 2001)—to be made available for Wilmington, Delaware commuter rail improvements.
- Missoula Ravalli Transportation Management Administration buses (fiscal year 2001)—to be made available for Missoula Ravalli Transportation Management Administration buses and bus facilities.

BUS AND BUS FACILITIES

The Committee recommendation for bus and bus facilities funding is \$657,200,000. These funds may be used to replace, rehabilitate, and purchase buses and related equipment and to construct bus-related facilities. Funds for bus and bus facilities shall be distributed as follows:

Project	Amount
AC Transit Buses and Bus Facilities, CA	\$1,000,000
Adams Transit Authority Buses and Bus Facilities, PA	400,000

Project

Ajo to Phoenix Bus Service, AZ

Alabama A&M University bus & bus facilities, AL

Alabama State Docks Intermodal Facility, AL

Alabama Statewide Bus Facilities and Ancillary Equipment, AL

Alabama Statewide Replacement of Senior Center Vans, AL

Albuquerque, NM bus and bus facilities

Allegheny Port Authority Buses, PA

Allentown Intermodal Transportation Center, PA

Altoona Metro Transit buses, PA

Anchorage Int'l Airport Intermodal Facility, AK

Anchorage Transfer Facility, AK

Ann Arbor Transportation Authority Bus & Bus Facilities, MI

Area Transportation Authority Buses, North Central PA

Area VII Agency on Aging Bus and Bus Facility, MT

Arkansas Statewide, AR

Attleboro Intermodal Facility, MA

Aurora Avenue Bus Rapid Transit, WA

Austin Bus Projects, TX

Bay Area Transportation Authority Buses, Traverse City, MI

Beaumont buses, TX

Beaver County Transit Authority, Buses, PA

Bergen County Intermodal Park-n-Ride & Facilities, NJ

Berks Area Reading Transportation Buses and Bus Facilities, PA

Bi-State Development Agency Bus Replacement, MO

Blue Water Area Transit bus facility, Port Huron MI

Bridgeport High Speed Ferry Terminal Project, CT

Brockton Intermodal Transportation Center, MA

Brookhaven Multi-Modal Transportation Center, MS

Broward County Buses and Bus Facility, FL

Brownsville buses, TX

BRT Systems, Appurtenances & Facilities, HI

Buffalo Auditorium Intermodal Center, NY

Burien transit center, transit oriented development, WA

Bus Rapid Transit Project, Las Vegas Blvd., NV

Capital Area Transist buses, PA

Capital Area Transportation Authority (CATA), Lansing, MI

Cedar Falls, Multimodal Facility, IA

Cherry Street Multimodal Facility, IN

investment studies, preliminary engineering, right-of-way acquisition, project management, oversight, and construction for new systems and extensions. Under section 3009(g) of TEA21, there is an 8-percent statutory cap on the amount made available for activities other than final design and construction—that is, alternatives analysis, environmental impact statements, preliminary engineering, major investment studies, and other predesign and preconstruction activities.

COMMITTEE RECOMMENDATION

The bill allocates the funds provided for New Starts as follows:

Project	Amount
Alaska-Hawaii Setaside	\$10,296,000
Allegheny Port Authority, Stage II Light Rail Transit, PA	26,250,000
Altamont Commuter Express San Jose to Stockton, CA	1,000,000
Anderson County, South Carolina Transit System, SC	5,000,000
Baltimore Central Light Rail Double Track Project, MD	24,250,000
BART, SFO Extension, CA	100,000,000
Birmingham Transit Corridor Study/PE, AL	3,000,000
Boston, North Shore Corridor Project, MA	500,000
Boston, MA, South Boston Piers Transitway	681,000
Bridgeport Intermodal Corridor Project, CT	5,000,000
Burlington-Middlebury Commuter Rail, VT	2,000,000
Canal Streetcar, New Orleans, LA	30,000,000
Charlotte South Corridor Light Rail Project, NC ...	8,000,000
Chicago, Douglas Blue Line Project, IL	55,000,000
Chicago, METRA, Expansion Project, IL	52,000,000
Chicago, Ravenswood Brown Line Expansion Project, IL	2,000,000
DART, Suburban Areas Extension, Dallas, TX	60,000,000
Dulles Link Project, VA	18,000,000
East Side Access Project, NY	12,000,000
Euclid Corridor Transportation Project, Cleveland, OH	6,000,000
Houston Advanced Metro Transit Plan	20,000,000
Hudson-Bergen, Hoboken to Tonnelle Ave., NJ (MOS2)	50,000,000
Hudson-Bergen, Jersey City, Bayonne & Hoboken, NJ (MOS1)	19,200,000
Interstate MAX Light Rail Transit Extension Project, Portland, OR	70,000,000
Johnson County Commuter Rail, KS	400,000
Little Rock River Rail, AR	2,000,000
Los Angeles, North Hollywood Extension, CA	40,490,000
Lowell, MA to Nashua, NH Commuter Rail Ext. Project, NH	500,000
MARC Expansion Project, MD	12,000,000
MARTA North Line Extension Project Completion, GA	16,110,000
MATA Medical Rail Extension, Memphis, TN	15,610,000
Medical Center Light Rail Extension, UT	10,000,000

Project	Amount
Metro Link Commuter Rail, St. Clair Extension Project, IL	3,370,000
Metro North Rolling Stock, CT	6,000,000
Nashville Light Rail, TN ...	3,500,000
Newark-Elizabeth Rail Link, 15 Station Light Rail Line, NJ	60,000,000
North Shore Connector Project, Pittsburgh, PA	7,025,000
North/South TRAX Light Rail Transit Line, UT	720,000
Oceanside-Escondido Light Rail Project, CA	12,200,000
Ogden to Provo Commuter Rail Corridor, UT	6,000,000

Anderson County, South Carolina Transit System.—The Anderson County trolley system would prove an integral part of the commuter population in Anderson County. It would move people, many of which are low income, from their homes to jobs by using the rail system. This would create a more efficient and environmentally conscious answer to the overburdened system currently in place. The project is currently in alternatives analysis. The Committee has recommended \$5,000,000 in New Starts funding for this project in fiscal year 2003.

Atlanta, Georgia, north line extension project.—The Metropolitan Atlanta Rapid Transit Authority (MARTA) has completed construction of a 2.3-mile, 2-station extension of the North Line from the Dunwoody station to North Springs. This extension initiated Revenue Operations on December 16, 2001. This extension serves the rapidly-growing area north of Atlanta, which includes Perimeter Center and north Fulton County, and connects this area with the rest of the region by providing better transit service for both commuters and inner-city residents

traveling to expanding job opportunities. On December 20, 1994, FTA issued an FFGA committing a total of \$305,010,000 in New Starts funding to this project. In the Conference Report to the fiscal year 2000 appropriations act, FTA was instructed to amend the FFGA for this project to incorporate a change in scope as authorized under section 3030(d)(2) of TEA21. Accordingly, on March 2, 2000, FTA amended the FFGA to include 28 additional railcars, a multilevel parking facility in lieu of a surface parking lot, and enhancements to customer security and amenity measures at the Sandy Springs and North Springs stations. The total cost of the amended project is \$463,180,000, with \$370,540,000 from the section 5309 New Starts program. Of the \$65,530,000 increase in Federal funding, \$10,670,000 was applied from unexpended prior-year funds identified from cost savings on the Dunwoody section of the North Line extension. Including these prior-year funds, a total of \$354,500,000 has been appropriated for this project through fiscal year 2002. This leaves \$16,100,000 remaining in the amended FFGA for this project. The Committee has recommended \$16,100,000 in New Starts funding for this project in fiscal year 2003.

Baltimore/Central LRT Double-Tracking.—The Maryland Mass Transit Administration is constructing 9.4-miles of track to upgrade designated areas of the Baltimore Central Corridor Light Rail Line that are currently single track. The Central Corridor is 29-miles long and operates between Hunt Valley in the north to Cromwell/Glen Burnie in the south, serving Baltimore City and Baltimore and Anne Arundel Counties, with extensions providing direct service to the Amtrak Penn Station and the Baltimore-Washington International Airport. This project double-tracks eight sections of the Central Corridor between Timonium and Cromwell Station/Glen Burnie, for a total of 9.4-miles. Although no new stations are required, the addition of a second track will require construction of second station platforms at four stations. Other elements included in the project are bridge and crossing improvements, a bi-directional signal system with traffic signal preemption on Howard Street, and catenary and other equipment and systems. The double tracking will be constructed almost entirely in existing right-of-way. In July 2001, FTA and MTA entered into a FFGA in the amount of \$120,000,000 in 5309 New Starts funds. The total estimated cost of the project is \$153,700,000 (escalated dollars). A total of \$21,490,000 has been appropriated through fiscal year 2002. The Committee has recommended \$24,250,000 in New Starts funding for this project in fiscal year 2003.

Birmingham, Alabama, transit corridor project.—The Birmingham Metropolitan Planning Organization (MPO) completed a Regional Transit Feasibility Analysis as part of the Strategic Regional Multi-modal Mobility Plan (Plan) in November 1999. The overall Plan includes a congestion management system element and a feasibility determination for regional transportation and transit improvements for the Birmingham Metropolitan Planning Area of Jefferson and Shelby Counties. In the Phase I regional transportation and investment planning process, the transportation alternatives that were identified included highway improvements, high-occupancy vehicle (HOV) lanes, improved fixed-route transit service, circulator and feeder bus service, express bus service operating from park-and-ride lots on HOV lanes and light rail transit. The conclusions from the Phase I effort included, among other findings, the need to address long-term dedicated public transit funding and land development policies. The Birmingham MPO, representing local municipal

and county governments, in cooperation with the Birmingham-Jefferson County Transit Authority, is conducting Phase II. Phase II will identify the locally preferred alternative in each corridor in accordance with FTA's regulations for Major Capital Investment Projects. Phase II is scheduled for completion in fiscal year 2002. Through fiscal year 2002, Congress has appropriated \$10,860,000 in section 5309 New Starts funds for this effort and it has been authorized in TEA21. The Committee has recommended \$3,000,000 in New Starts funding for this project in fiscal year 2003.

Burlington, Vermont, Burlington to Middlebury rail line project.—The Vermont Agency of Transportation and Vermont Rail Division are working to slowly rehabilitate the rail system along the western side of the State to provide faster and more efficient service to a greater amount of people in Vermont. Given the overwhelming success of the Champlain Flyer commuter rail line from Burlington to Charlotte, Vermont. This new rail line would extend service to Middlebury as well as add more daily travelers on the rail system. The Committee has recommended \$2,000,000 in New Starts funding for this project in fiscal year 2003.

Central Link Light Rail, Puget Sound, Washington.—The Committee strongly supports a comprehensive transit solution for the Puget Sound, Washington corridor. It is currently the second most congested area in the Nation. FTA entered into a \$500,000,000 Full Funding Grant Agreement (FFGA) with Sound Transit in January 2001 for the former MOS-1. Since that time, the project has faced increased scrutiny and oversight by Congress and the Department of Transportation Inspector General related to concerns about cost increases and schedule delays. This thorough examination of the project is justified.

The Committee has been encouraged by progress made in recent months. The agency has new leadership and a new management team. New management has executed an agency-wide re-organization and instituted rigorous new budget and project controls. Based on a re-examination of the entire project, the Sound Transit Board identified a 13.9-mile, 11-station initial segment in September 2001. In November 2001, the Board formally adopted the initial segment as the new minimum operable segment. The Initial Segment, runs between the north end of the Downtown Seattle transit Tunnel south to the intersection of South 154th Street and State Route 518.

The Committee understands that Sound Transit will request a FFGA for the same \$500,000,000 granted in 2001, but will seek to apply it to the revised alignment. Through fiscal year 2003, Congress has appropriated \$90,970,000 for the project.

Charlotte, North Carolina, south corridor light rail transit project.—The Charlotte Area Transit System (CATS), in cooperation with the City of Charlotte, is proposing to design and construct an 11.2-mile light rail transit line extending from Uptown Charlotte to the Town on Pineville, North Carolina, near the South Carolina border. The proposed project is currently planned to operate within portions of existing Norfolk-Southern (NS) railroad rights-of-way (ROW), including sharing ROW with the city's existing downtown trolley system. The south corridor is an area generally paralleling I-77 along NS railroad ROW in the City of Charlotte and Mecklenburg County. A 3.7-mile portion of the proposed system—between Uptown and Scaleybark Road—would operate on abandoned NS ROW owned by the City of Charlotte. The remainder of the planned system (7.3 miles) would operate on separate tracks generally paralleling NS ROW. The proposed

project also includes construction of 16 stations, purchase of up to 15 light rail vehicles and the construction of a light rail vehicle maintenance and storage facility. Seven proposed stations from I-485 north to Scaleybark Road will include park-and-ride lots and serve as transfer points for local and express bus service. Total capital costs for the south corridor project are estimated at \$348,200,000. The Federal share is estimated to be \$174,000,100. Through fiscal year 2002, Congress has appropriated \$19,780,000 in section 5309 New Starts funds for this effort. It has also been authorized under TEA21. The Committee has recommended \$8,000,000 in New Starts funding for this project in fiscal year 2003.

Chicago, Illinois, Douglas Branch reconstruction project.—The Chicago Transit Authority (CTA) has implemented a complete reconstruction of the approximately 6.6-mile length of the existing Douglas Branch heavy rail line. The line extends from just west of downtown Chicago to its terminus at Cermak Avenue. The Douglas Branch was built in the late 19th and early 20th centuries. Due to its age, the line has become seriously deteriorated resulting in high maintenance and operating costs and declining service. The Douglas Branch currently carries approximately 27,000 average weekday boardings utilizing 11 stations. In the year 2020, CTA expects that the project would serve 6,000 daily new riders. It serves one of the most economically distressed areas in Chicago; low income households make up 30 percent of the total number of households within walking distance of the stations. The line has been in operation for over 100 years, and serves neighborhoods that originally developed along the system. The corridor contains an estimated 54,000 jobs and 115,000 residents within one-half mile of the stations, and serves the University of Illinois at Chicago (25,000 students) and a large, dense central business district with an estimated 339,000 jobs. Population and employment densities are high, averaging 9,100 jobs and nearly 20,000 people per square mile. After "looping" through the central business district, the Blue Line also extends to O'Hare International Airport and the Medical Center Complex. The total capital cost of the Douglas Branch reconstruction project is estimated at \$482,500,000. The Douglas Branch is authorized for final design and construction by section 3030(a)(106) of TEA21. FTA and CTA entered into an FFGA in January 2001 committing \$320,100,000 in Section 5309 New Starts funds to this project. A total of \$52,200,000 has been appropriated through fiscal year 2002. This leaves \$267,900,000 needed to fulfill the FFGA. The Committee has recommended \$55,000,000 in New Starts funding for this project in fiscal year 2003.

Chicago, Illinois, Metra North Central, Southwest Corridor Commuter Rails, and Union Pacific West line extension project.—Metra, the commuter rail division of the Regional Transportation Authority (RTA) of northeastern Illinois, will construct 16.3 miles of a second mainline track, including a 2.3-mile stretch of third track, along the existing 55-mile North Central Service (NCS) commuter rail line to accommodate increased service and operating speeds. The project also includes the construction of five new stations, parking facilities and the purchase of two diesel locomotives. The North Central Corridor extends from downtown Chicago to Antioch on the Illinois-Wisconsin border, traversing suburban Cook and Lake counties. Metra estimates that 8,400 average weekday boardings will occur on the NCS line in the year 2020. The total capital cost of the North Central project is estimated at \$225,520,000, of which Metra is expected to seek

\$135,320,000 in section 5309 New Starts funding. The North Central Corridor extends from downtown Chicago to Antioch on the Illinois-Wisconsin border, and traverses suburban Lake County. It includes the two most significant hubs of employment in the six-county northeastern Illinois region, the Chicago CBD and the area surrounding O'Hare International Airport. Metra estimates that this project will serve an average of 8,400 average weekday boardings by 2020, with 8,000 daily new riders. This project has been rated "medium" for both project justification and finance, earning an overall rating of "recommended." FTA approved entry into the final design stage of development in October 2000. Section 3030(a)(10) of TEA21 authorizes the North Central project for final design and construction. The North Central Full Funding Grant Agreement was signed on November 5, 2001. Through fiscal year 2002, a total of \$51,260,000 was provided for the Metra North Central project. Metra, the commuter rail division of the RTA of Northeast Illinois (NE IL), will construct an additional 12 miles of trackage within an existing 33-mile corridor connecting Union Station in downtown Chicago to 179th Street in Orland Park, Illinois. The Southwest Corridor (SWC) commuter rail project would extend commuter rail service from Orland Park southwest to Manhattan, Illinois. The project also includes the construction of 3.3 miles of a second mainline, three additional stations, parking facilities and multiple improvements to tracks, signals, stations, and other facilities. Section 3030(a)(12) of TEA21 authorized the "Southwest extension". The total cost of the Southwest Corridor commuter rail project is estimated at \$198,176,649. Through fiscal year 2002, \$38,500,000 was provided for the Southwest Corridor project. Metra and FTA entered into a FFGA in November 2001 committing \$103,020,000 in section 5309 New Starts funds to the project. Metra, the commuter rail division of the RTA of NE IL, is implementing an 8.5-mile extension to the existing 35-mile Union Pacific West Line (UPW). The project would extend the line approximately 8.5 miles west from Geneva to Elburn, Illinois. The project also includes multiple improvements to track and signals, construction of two new stations, parking facilities, the purchase of two diesel locomotives and the construction of a new overnight train storage yard. Section 3030(a)(13) of TEA21 authorizes this project as the Chicago "west line extension". The total capital costs of the Union Pacific West Line Extension is estimated at \$134,603,334 (escalated dollars) in Federal New Starts funding. Through fiscal year 2002, a total of \$34,840,000 has been appropriated for the UPW project. The Committee has recommended a combined amount of \$52,000,000 in New Starts funding for these three projects in fiscal year 2003.

Chicago, Illinois, Ravenswood reconstruction project.—The Chicago Transit Authority is proposing to reconstruct existing platforms and expand stations along the Ravenswood (Brown) Line to accommodate eight-car trains, increasing the overall capacity of the line. The Ravenswood Line extends 9.3 miles from the north side of Chicago to the "Loop elevated" in downtown Chicago and includes 19 stations. The majority of the Brown line is operated on an elevated structure except one portion near the north end of the line, which operates at grade. The Brown line was built between 1900 and 1907. CTA anticipates approximately 68,000 average weekday boardings, including 12,300 daily new riders, in the year 2020 on the Ravenswood Line. The proposed project would expand stations and platforms and straighten curves to allow CTA to operate longer trains, which would increase the capacity of the line. Section

3030(a)(11) of TEA21 authorized the project. In November 1997, CTA included the Ravenswood line expansion project in the region's financially constrained long-range transportation plan. The environmental review process for the Ravenswood Line Expansion Project was completed in July 2002. A Finding of No Significant Impact was determined. An evaluation is now being done to determine whether the project is eligible to enter into Final Design. Total capital costs are currently estimated at \$476,000,000 (escalated dollars), including a requested \$245,500,000 in section 5309 New Starts funds. Through fiscal year 2002, Congress has appropriated \$7,890,000 in section 5309 New Starts funds to the project. The Committee has recommended \$2,000,000 in New Starts funding for this project in fiscal year 2003.

Cleveland, Ohio, Euclid Corridor Transportation Project (ECTP).—The Greater Cleveland Regional Transit Authority (GCRTA) is proposing to implement a 9.8-mile transit corridor incorporating exclusive bus rapid transit lanes and related capital improvements on Euclid Avenue from Public Square in downtown Cleveland east to University Circle. The proposed project is known as the Euclid Corridor Transportation Project (ECTP). The ECTP incorporates a series of transit improvements including an exclusive center median busway along Euclid Avenue from Public Square to University Circle area into the city of East Cleveland, terminating at the Stokes/Windermere rapid transit station. GCRTA proposes to operate 60-foot articulated electric trolley buses (ETB) with both left and right-hand side doors for access and egress of patrons on the corridor. The ETBs will have access to the entire length of the proposed corridor. However, conventional buses will not be able to access Euclid Avenue in the central business district. GCRTA estimates that 29,500 average weekday boardings, including 2,400 daily new riders, will use the ECTP in the year 2025. Section 3035 of ISTEA authorized FTA to enter into a multiyear grant agreement for development of the Dual Hub Corridor. In November 1995, the GCRTA Board of Trustees selected the ECTP as the locally preferred alternative (LPA), which included a busway and the rehabilitation and relocation of several existing rapid rail stations. In December 1995, the Northeast Ohio areawide coordinating agency (local metropolitan planning organization) adopted a resolution supporting the ECTP. In mid-1999, GCRTA reconfigured the scope of the ECTP to incorporate only the construction of a busway along Euclid Avenue. The rapid rail elements have been eliminated from the ECTP proposal for section 5309 New Starts funding. The environmental review process was completed in September 2001. A Finding of No Significant Impact was determined. FTA approved the ECTP into final design. Total capital costs for the ECTP are estimated at \$228,600,000 (escalated dollars), of which Cleveland is expected to seek \$135,000,000 in section 5309 New Starts funding for the project. Through fiscal year 2002, Congress has appropriated \$19,390,000 in section 5309 New Starts funds for the Euclid corridor transportation project. Of this amount, Congress reprogrammed \$4,720,000 to other projects. The Committee has recommended \$6,000,000 in New Starts funding for this project in fiscal year 2003.

Dallas, Texas, North Central LRT extension project.—Dallas Area Rapid Transit (DART) is constructing a 12.5-mile, 9-station extension of its light rail system from the Park Lane Station north to the City of Plano. DART estimates that approximately 17,000 riders will use this extension by 2020, of which 6,800 will be new riders. The total cost of this project is estimated at \$517,200,000.

DART began contracting for construction and purchasing vehicles and necessary right-of-way in May 1998, and expects to open the North Central extension for revenue service in December 2003. The North Central extension is authorized for final design and construction under section 3030(a)(20) of TEA21. FTA issued an FFGA for this project on October 6, 1999, which will provide a total of \$333,000,000 in section 5309 New Starts funding. Through fiscal year 2002, a total of \$230,910,000 has been provided to this project. The Committee has recommended \$60,000,000 in New Starts funding for this project in fiscal year 2003.

Ft. Lauderdale, Florida, Tri-Rail Commuter Rail Upgrade.—The Tri-County Commuter Rail Authority (Tri-Rail) is proposing a number of system improvements to the 71.7-mile regional transportation system it operates between Palm Beach, Broward and Dade Counties in South Florida. This area has a population of over 4 million, nearly one-third of the total population of Florida. The planned improvements include construction of a second mainline track, rehabilitation of the signal system, station and parking improvements, acquisition of new rolling stock, improvements to the Hialeah Maintenance Yard facility, and construction of a new, northern layover facility. The proposed double-tracking will improve service by a factor of three, permitting 20-minute intervals between trains during peak commuter hours instead of the current 1-hour headways. Tri-Rail estimates that these improvements will serve 42,100 average daily boardings by 2015, including 10,200 daily new riders. On May 16, 2000, FTA issued an FFGA for Segment 5 of the Double Track Corridor Improvement Program, which includes construction of 44.3 miles of the second mainline track and upgrades to the existing grade crossing system along the entire 71.7-mile South Florida Rail Corridor. It is expected to open for revenue service on March 21, 2005. The first four segments, upgrading the Hialeah Maintenance Yard and replacing the New River Bridge, while part of the overall Double Track Corridor Improvement Program, are not included in the scope of this project. Total capital costs for the Segment 5 project are estimated at \$327,000,000. The FFGA for the Double Track Corridor Improvement Program Segment 5 Project will provide a total of \$110,500,000 in section 5309 New Starts funding. Through fiscal year 2002, Congress has appropriated \$52,400,000 for this project. This project has been authorized in TEA21. The Committee has recommended \$18,500,000 in New Starts funding for this project in fiscal year 2003.

Houston, Texas, Metro advanced transit plan project.—The Advanced Transit Program (ATP) is Houston METRO's plan for advanced high capacity transit in its 1,285 square mile service area. The first component to begin operation will be the locally funded 7.5-mile METRO Rail light rail project from downtown to Reliant Park. The next projects will flow from ongoing implementation of the METRO Mobility 2025. Adopted by the Board of Directors in May 2001, this is METRO's long-range transit plan for the region. The next steps in the ATP will be studies in the corridors designated for consideration of advanced high capacity transit. The four highest priority corridors will be subject to detailed alternatives analysis studies, defining mode and general alignment of the proposed advanced high capacity transit improvements. As a result of those studies, preferred alternatives for each corridor will be adopted and moved forward to implementation. By 2025, the ATP will have introduced advanced high capacity into many of the region's major travel corridors. The specific mode will be tailored to meet

individual corridor travel needs while maintaining system connectivity. This project has been authorized in TEA21. The Committee has recommended \$20,000,000 in New Starts funding for this project in fiscal year 2003.

Johnson County, Kansas, commuter rail project engineering and design.—Johnson County, Kansas is proposing to implement a 5 station, 23-mile Commuter Rail line extending from downtown Kansas City, Missouri, southwest to Olathe, Kansas, in Johnson County. The proposed commuter rail project would parallel Interstate 35, the major highway connecting Kansas City with Olathe, and would share existing Burlington Northern and Santa Fe (BNSF) railroad track (except for the line's northern-most mile segment, which would require either new track or existing Kansas City Terminal Railway trackage). Park and ride facilities are being planned for each proposed station. The commuter rail line will terminate in Kansas City at its historic Union Station. Ridership estimates for the I-35 commuter rail project range from 1,400 to 3,800 trips per day. These estimates will be refined during subsequent phases of project development. TEA21 section 5309(e)(8)(A) applies to this project. Through fiscal year 2002, Congress has appropriated \$4,450,000 for this project. The Committee has recommended \$400,000 in New Starts funding for this project in fiscal year 2003.

Largo, Maryland, Metrorail extension project.—The Washington Metropolitan Area Transit Authority (WMATA) is constructing a 3.1-mile heavy rail extension of the Metrorail blue line. The Largo Metrorail Extension will be from the existing Addison Road Station to Largo town center, located just beyond the Capital beltway in Prince George's County, Maryland. The project follows an alignment that has been preserved as a rail transit corridor in the Prince George's County master plan. The 3.1-mile alignment will contain at-, above-, and below-grade segments. Two new stations will be provided at Summerfield and at the Largo town center station. The stations will provide 500 and 2,200 park-and-ride spaces and 11 bus bays each. A number of local bus routes will connect to the two new stations; shuttle bus service is proposed between both stations and the FedEx Field, a major sports complex with entertainment and retail uses. Maryland Transit Administration (MTA) will manage the project through preliminary engineering, with WMATA undertaking final design and construction. The project is anticipated to open for service by December 2004, with a total capital cost estimated at \$433,900,000. In December 2000, FTA entered into an FFGA with WMATA that commits a total of \$260,300,000 in section 5309 New Starts funds to this project. Through fiscal year 2002, Congress has appropriated \$67,530,000 to this project. This project has been authorized in TEA21. The Committee has recommended \$60,000,000 in New Starts funding for this project in fiscal year 2003.

Las Vegas/Resort Corridor.—The Las Vegas Regional Transportation Commission (RTC) is in the process of conducting preliminary engineering on the proposed 3.1-mile Resort Corridor Automated Guideway Transit (elevated monorail) project. The monorail will serve the Las Vegas central business district and the northern part of the resort corridor along the Las Vegas "strip" from Fremont Avenue to Sahara Avenue. The Resort Corridor represents the region's largest primary employment center, as about 50 percent of the regional jobs (206,000) are located in this corridor. There are an estimated 69,300 jobs and 21,800 residents within a one-half mile from the proposed monorail boarding points. The RTC estimates the proposed system will

carry approximately 58,500 weekday boardings, including 19,880 daily new riders in 2020. Based in the 1990 census data, there are an estimated 1,690 low-income households within a one-half mile radius of the proposed six stations. Revenue operations are scheduled to begin in January 2004. This project represents an extension to a 4-mile fully automated monorail that is currently under construction by the Las Vegas Monorail Company (LVMC). The estimated capital cost for the 3.1-mile Resort Corridor monorail project is estimated to be \$440,000,000, of which the RTC is seeking \$130,000,000, or 30 percent, in New Starts funding. Through fiscal year 2002, Congress has appropriated \$13,880,000 for this project. The Committee is recommending \$9,000,000 in New Starts funding for this project in fiscal year 2003.

Little Rock, Arkansas, river rail project.—The Central Arkansas Transit Authority (CATA) is planning the implementation of a vintage streetcar circulator system on existing right-of-way connecting the Alltel Arena, the River Market, and the Convention Center in downtown Little Rock to the communities of North Little Rock and Pulaski County. CATA proposes that service be provided by seven replica streetcars operating on a single track powered by overhead catenary. The proposed system includes a 2.1-mile alignment, purchase of vehicles, and construction of a maintenance facility. Ridership projections estimate 1,000 to 1,200 average weekday boardings with an additional 1,000 to 1,800 riders on special event days. A future 0.4-mile extension to the William Jefferson Clinton Presidential Library site has been proposed. Revenue service is planned to begin in December 2002. This project is addressed in the TEA21 section 5309(e)(8)(A). The Committee has appropriated \$7,930,000 in New Starts funding for this project through fiscal year 2002 and has recommended \$2,000,000 in New Starts funding for this project in fiscal year 2003.

Long Island Rail Road, New York, East Side access project.—The New York Metropolitan Transit Authority (MTA) is currently in final design on a proposed direct access for Long Island Rail Road (LIRR) passengers to a new passenger concourse in Grand Central Terminal (GCT) in east Midtown Manhattan. The proposed 4-mile, 2 station, commuter rail extension under the East River, using an existing rail tunnel, is anticipated to alleviate LIRR tunnel capacity constraints and enable the overall growth of the Nation's largest commuter rail system. The project would provide access to the eastern part of midtown Manhattan for users of the LIRR who now must get to east midtown by subway or walking from Penn Station. By allowing some LIRR passengers to use GCT, the project would also free up capacity at Penn Station for New Jersey Transit and Amtrak trains. The LIRR ESA project would serve one of the strongest transit markets in the country. By the year 2020, MTA/LIRR projects that the LIRR ESA project will serve approximately 167,000 average weekday boardings including 15,400 daily new riders. Based on 1990 census data, MTA/LIRR estimates that there are approximately 4,443 low-income households within a one-half mile radius of proposed station areas. MTA/LIRR estimates that the LIRR ESA project would yield 7.4 million hours of travel-time savings. MTA estimates that the LIRR ESA would serve approximately 698,200 jobs that are located within a one-half mile radius of the proposed station areas. The project is scheduled for completion by December 2012 at a projected cost of \$4,350,000,000. MTA is proposing a request for \$2,170,000,000 in New Starts funding. In fiscal year 2002, Congress appropriated \$14,600,000 in section 5309 New Starts funds for the continued development

of the LIRR ESA project. The Committee has recommended \$12,000,000 in New Starts funding for this project in fiscal year 2003.

Los Angeles, California, North Hollywood extension project.—The Los Angeles Metro Rail Red Line rapid-rail system is being planned, programmed and constructed in phases, through a series of "Minimum Operable Segments" (MOSs). The first of these segments (MOS 1), a 4.4-mile, 5-station segment, opened for revenue service in January 1993. A 2.1-mile, 3-station segment of MOS 2 opened along Wilshire Boulevard in July 1996; an additional 4.6-mile, 5-station segment of MOS 2 opened in June 1999, and the Federal funding commitment has been fulfilled. On May 14, 1993, an FFGA was issued to the Los Angeles County Metropolitan Transportation Authority (LACMTA) for the third construction phase, MOS 3. MOS 3 was defined under ISTEA (section 3034) to include three segments: the North Hollywood segment, a 6.3-mile, 3-station subway extension of the Hollywood branch of MOS 2 to North Hollywood through the Santa Monica mountains; the Mid-City segment, a 2.3-mile, 2-station western extension of the Wilshire Boulevard branch; and an undefined segment of the Eastside project, to the east from the existing Red Line terminus at Union Station. LACMTA later defined this eastern segment as a 3.7-mile, 4-station extension under the Los Angeles River to First and Leona in East Los Angeles. On December 28, 1994, the FFGA for MOS 3 was amended to include this definition of the eastern segment, bringing the total commitment of Federal New Starts funds for MOS 3 to \$1,416,490,000. In January 1997, FTA requested that LACMTA submit a recovery plan to demonstrate its ability to complete MOS 2 and MOS 3, while maintaining and operating the existing bus system. On January 14, 1998, the LACMTA Board of Directors voted to suspend and demobilize construction on all rail projects other than MOS 2 and the MOS 3 North Hollywood Extension. The MTA submitted a recovery plan to FTA on May 15, 1998, which was approved by FTA on July 2, 1998. In 1998, LACMTA undertook a Regional Transportation Alternatives Analysis (RTAA) to analyze and evaluate feasible alternatives for the Eastside and Mid-City corridors. The RTAA addressed system investment priorities, allocation of resources to operate existing transit services at a reliable standard, assessment and management of financial risk, countywide bus service expansion, and a process for finalizing corridor investments. On November 9, 1998, the LACMTA Board reviewed the RTAA and directed staff to reprogram resources previously allocated to the Eastside and Mid-City Extensions to the implementation of RTAA recommendations, including the LACMTA Accelerated Bus Procurement Plan. LACMTA continued to study transit investment options for the Eastside and Mid-City corridors. In October 2000, FTA approved entry into preliminary engineering for a 5.9-mile, 8-station light rail line in the Eastside Corridor between downtown Los Angeles and East Los Angeles. The Mid-City corridor is still undergoing alternatives analysis. FTA will consider the prior Federal commitment under the MOS 3 FFGA as an "other factor" for rating and evaluation purposes for these projects, as long as the identified projects otherwise meet the requirements of the New Starts program. On June 9, 1997, FTA and LACMTA negotiated a revised FFGA covering the North Hollywood segment (Phase 1-A) of MOS 3, which opened in June 2000. The total capital cost of the North Hollywood project is estimated at \$1,310,820,000 of which the revised FFGA commits \$681,040,000 in section 5309 New Starts funds. Through fiscal year 2002, a total of \$640,550,000 has been appropriated for the

North Hollywood segment of MOS 3. This project has been authorized in TEA21. The Committee has recommended \$40,490,000 in New Starts funding for this project in fiscal year 2003.

Maryland, MARC commuter rail improvement projects.—The Maryland Mass Transit Administration is proposing three projects for the Maryland Commuter Rail (MARC) system serving the Baltimore, MD and Washington, DC metropolitan areas. These projects are (1) Mid-Day Storage Facility, (2) Penn-Camden Connection, and (3) Silver Spring Intermodal Transit Center. The proposed Mid-Day Storage Facility would be used for daytime equipment layover, minor repair, daily servicing and inspections of commuter rail train sets within the Amtrak Yard at Washington, DC's Union Station. Platforms that are currently used to store these trains at Union Station will no longer be available following the introduction of high-speed Amtrak service, and the new facility will avoid the operating cost of sending trains back to Baltimore for mid-day storage. MTA will lease the 5-acre site owned by Amtrak. Estimated capital costs for the Mid-Day Storage Facility project totals \$26,600,000. The Penn-Camden Connection is a 6-mile connection between the MARC Camden Line and MARC Penn Line/Amtrak Northeast Corridor in southwest Baltimore. The connection of these two commuter rail lines is designed to achieve many benefits: the opportunity to remove trains from the congested Camden line for reverse peak movements; access to the planned MARC Maintenance Facility to be located along the connection; and, increased operating flexibility on both commuter rail lines, allowing redirection of MARC service during periods of CSX freight operations. Estimated capital costs for the Penn-Camden Connection project totals \$33,300,000. The proposed Silver Spring Intermodal Transit Center, located in suburban Washington, DC, will construct an intermodal transit facility that relocates the Silver Spring MARC Station to the Silver Spring Metrorail station. The transit center would allow convenient passenger transfers between several modes of travel, including commuter rail, heavy rail, commuter and local bus service, taxi, bicycle, auto, and walking. The center will also accommodate the proposed Georgetown Branch Trolley to operate between Silver Spring and Bethesda. Located in the Silver Spring, MD central business district, a major transit hub for lower Montgomery County, the intermodal transit center will more efficiently meet existing and future transit needs of this area. Estimated capital costs for the Silver Spring Intermodal Transit Center project totals \$33,300,000. Section 3030(g)(2) of TEA21 authorizes these projects as part of the Frederick extension, and will permit service improvements necessary to take full advantage of that extension. The proposed share of Federal funding from the section 5309 New Starts program is less than \$25,000,000 for each of the individual improvements, which renders them exempt from evaluation. The Committee has recommended \$12,000,000 in New Starts funding for this project in fiscal year 2003.

Memphis, Tennessee Medical Center Extension project.—The Memphis Area Transit Authority (MATA), in cooperation with the City of Memphis, is proposing to build a 2-mile light rail extension to the Main Street Trolley/Riverfront Loop village rail system. The extension would expand service from the central business district (CBD) east to the Medical Center area. The line would operate on city streets in mixed traffic and would

connect with the Main Street Trolley, sharing a lane with automobile traffic on Madison Avenue between Main Street and Cleveland Street. Six new stations would be located along the route. The line will be designed to accommodate light rail vehicles, but vintage rail cars would be used until a proposed regional LRT line is implemented and a fleet of modern LRT vehicles is acquired. The total capital cost of this project is estimated at \$74,580,000. This project would be the last segment of the downtown rail circulation system as well as the first segment of a regional light rail line. This project is included in the City of Memphis' Capital Improvement Program, the Memphis MPO Transportation Improvement Program, and the State Transportation Improvement Program. A Major Investment Study/Environmental Assessment was completed in May 1997, fulfilling the statutory requirement for an alternatives analysis. FTA approved this project for entry into final design in May 2000. The Memphis Corridor was authorized for final design and construction by section 3030(a)(43) of TEA21. On December 12, 2000 FTA issued an FFGA committing a total of \$59,670,000 in section 5309 new start funds to the Medical Center Extension. A total of \$35,310,000 has been appropriated for this project through fiscal year 2002. The Committee has recommended \$15,610,000 in New Starts funding for this project in fiscal year 2003.

Twin Cities/Hiawatha Corridor LRT and Northstar Corridor Projects.—Metro Transit and the Metropolitan Council of Minneapolis (the local metropolitan planning organization), in cooperation with the Minnesota Department of Transportation (MnDOT), Hennepin County, and the Metropolitan Airports Commission (MAC), are constructing an 11.6-mile, 17-station light rail line linking downtown Minneapolis, the Minneapolis-St. Paul International Airport, and the Mall of America in Bloomington. The line would operate along the corridor following Hiawatha Avenue and Trunk Highway 55. The line begins in the central business district and travels south on the existing transit mall along 5th Street, follows the former Soo Line Railroad from the Metrodome to Franklin Avenue, and then runs parallel with Hiawatha Avenue towards the airport. The line will tunnel under the runways and taxiways for 1.8 miles, with 1 station, emerge on the west side of the airport, and continue south to the vicinity of the Mall of America in Bloomington. The project is expected to serve 24,800 average weekday boardings by the year 2020; 19,300 average weekday boardings are projected in the opening year. Revenue service is scheduled to commence in December 2004. The total capital cost of the Hiawatha Corridor LRT is estimated at \$675,400,000. Section 3030(a)(91) of TEA21 authorizes the "Twin Cities—Transitway Corridors" for final design and construction. In January 2001, FTA issued an FFGA that commits a total of \$334,300,000 in section 5309 New Starts funds to the Hiawatha Corridor LRT. Of this amount, \$168,350,000 has been provided through fiscal year 2002. The Minnesota Department of Transportation (MnDOT) is currently undertaking preliminary engineering on a proposal to design and construct an 82-mile commuter rail line within the Northstar Corridor that extends from downtown Minneapolis northwest to Rice, Minnesota. The Northstar Corridor project also includes the construction of a 1,750-foot light rail transit extension of the Hiawatha Corridor LRT project currently under construction. The proposed commuter rail project would serve one of the fast growing regions of the State. Ridership on the proposed commuter rail line is expected to be 10,800 average weekday boardings, including 5,400 daily

new riders. Based on 1990 census data, the MnDOT estimates that there are approximately 1,100 low-income households within a one-half mile radius of the proposed 11 stations. In the forecast year 2020, MnDOT estimates that the proposed commuter rail would yield approximately 0.4 million hours of travel-time savings. In addition, the proposed project would serve approximately 35,700 jobs located within a one-half mile radius of the proposed station areas, encompassing the Minneapolis, St. Cloud and Rice central business districts. During the Spring 2002 legislative session, the Minnesota State legislature was not able to reach a consensus on the provision of the State's share of the project's total estimated capital cost. The State was to provide approximately \$120,000,000. Total capital costs for this project are estimated to be \$294,000,000 including \$147,000,000 in requested section 5309 New Starts funding. Congress provided \$9,900,000 to this project in fiscal year 2002. This project has been authorized in TEA21. The Committee has recommended \$48,000,000 in New Starts funding for the Hiawatha Corridor LRT and the Northstar Corridor Projects in fiscal year 2003.

Nashua, New Hampshire-Lowell, Massachusetts, commuter rail project.—The New Hampshire Department of Transportation is planning on constructing an 11-mile commuter rail extension project. The rail line would connect Lowell, Massachusetts and Nashua, New Hampshire. The project includes the rehabilitation of track and appurtenances, construction of new track where necessary, as well as construction of a park-and-ride lot with a boarding platform. The new service extension will provide an alternative to a highly congested highway corridor. This project received funding through the TEA21 authorization as well as through other appropriations. Through fiscal year 2002, the Committee has appropriated \$5,930,000 in section 5309 New Starts funding. The Committee has recommended \$500,000 in New Starts funding for this project in fiscal year 2003.

Nashville, Tennessee, regional commuter rail project.—Nashville's Regional Transportation Authority, the Metropolitan Planning Organization, and the Metropolitan Transit Authority have completed the preliminary engineering and environmental studies. The project is currently in final design. This project has been authorized in TEA21. Through fiscal year 2002, \$11,870,000 has been appropriated for this project. The Committee has recommended \$3,500,000 in New Starts funding for this project in fiscal year 2003.

New Jersey/Hudson-Bergen light rail transit project (MOS-1).—The New Jersey Transit Corporation (NJ Transit) is constructing a 9.6-mile, Minimum Operable Segment (MOS) of an eventual 20.1-mile at-grade Hudson-Bergen Light Rail Transit System (HBLRTS) that will extend from the Vince Lombardi park-and-ride lot in Bergen County to West Fifth Street in Bayonne in Hudson County, New Jersey. HBLRTS MOS-1 will connect the Hoboken Terminal to 34th Street in Bayonne and West Side Avenue in Jersey City. The core of the completed system will serve the high-density commercial centers in Jersey City and Hoboken, and provide connections with NJ Transit commuter rail service, PATH trains to Newark and Manhattan, and the Port Imperial ferry from Weehawken to Manhattan. This minimum operable segment (MOS) is being constructed under a turnkey contract to design, build, operate, and maintain the system, which was awarded in October 1996. Total costs are expected to be \$992,140,000 for MOS-1; construction began in December 1996. In August 1996, FTA and NJ TRANSIT executed a FFGA, committing \$604,090,000 in section 5309 New Starts funding for HBLRTS MOS-1. NJ TRANSIT is cur-

rently providing initial revenue service on HBLRTS MOS-1 from Pavonia-Newport to West Side Avenue and East 34th Street. Construction on HBLRTS MOS-1 is approximately 85 percent complete. Full revenue service is scheduled to commence in September 2002. Through fiscal year 2002, a total of \$584,890,000 has been appropriated for this project. This project has been authorized in TEA21. The Committee has recommended \$19,200,000 in New Starts funding for this project in fiscal year 2003.

New Jersey/Hudson-Bergen light rail transit project (MOS-2).—The second Minimum Operable Segment (MOS-2) of the NJ Transit Hudson-Bergen LRT system is a 5.1-mile, 7-station segment running north from Hoboken Terminal to the Tonnelle Avenue park-and-ride lot in North Bergen, and south to 22nd Street in Bayonne. The Hudson-Bergen MOS-2 line will serve an area with one of the highest residential densities in the region, and the downtown Jersey City area contains the largest concentration of office development in Hudson County. By providing connections to ferry and commuter rail service, the line will also serve the Manhattan central business district. MOS-2 is scheduled for completion in 2005 and is anticipated to carry 34,900 average weekday boardings in 2010. Total costs for MOS-2 are estimated at \$1,215,400,000. FTA issued an FFGA for this project on October 31, 2000, committing a total of \$500,000,000 in section 5309 New Starts funds. The MOS-2 project does not require funding from the section 5309 New Starts program until fiscal year 2003; the issuance of the FFGA at this point provided NJ Transit with the authority to borrow funds to begin construction while the MOS-1 is being completed, under the same turnkey contract. This permits the entire Hudson-Bergen project to be constructed at a lower cost by avoiding the significant costs associated with stopping and then restarting a major construction project. No prior year funding has been appropriated for MOS-2 from the section 5309 New Starts program. This project has been authorized in TEA21. The Committee has recommended \$50,000,000 in New Starts funding for this project in fiscal year 2003.

Newark, New Jersey—Newark Rail Link (MOS-1) Project.—The New Jersey Transit Corporation (NJ Transit) is constructing a 1-mile, 5-station initial Minimum Operable Segment (MOS-1) of a proposed 8.8-mile, 16-station light rail transit (LRT) system between Newark and downtown Elizabeth, New Jersey. MOS-1 will function as an extension of the existing 4.3-mile Newark City Subway light rail line, running from Board Street in Newark to Newark's Penn Station. In August 2000, FTA and NJ TRANSIT executed a FFGA committing \$141,950,000 in section 5309 New Starts funds. NJ transit is preparing a Supplemental Draft Environmental Impact Statement (SDEIS) to analyze the effects of an alignment modification on the segment contained within the City of Elizabeth (NERL MOS-3) to support extensive commercial and retail development that has been initiated since the completion of the original 1997 DEIS for the full 8.8-mile NERL project. The total cost of the MOS-1 segment is estimated at \$207,700,000 (escalated dollars). Section 3030(a)(57) of TEA21 authorized the New Jersey Urban Core Project, which consists of eight separate elements including the Newark-Elizabeth Rail Link, for final design and construction. On August 2, 2000 FTA issued an FFGA committing a total of \$141,950,000 in section 5309 New Starts funds to the Newark Rail Link MOS-1 project. Congress has appropriated a total of \$59,390,000 for this project. The Committee has recommended \$60,000,000 in New Starts funding for this project in fiscal year 2003.

New Orleans, Louisiana, Canal Streetcar project.—The New Orleans Regional Transit Authority (RTA) is developing a 5.5-mile streetcar project in the downtown area, along the median of Canal Street. The Canal Streetcar spine will extend from the Canal Ferry at the Mississippi River in the central business district, through the Mid-City neighborhood to Carrollton Avenue, where one branch will continue on Canal Street to the Cemeteries and another will follow Carrollton Avenue to City Park/Beauregard Circle. The corridor is located in an existing, built-up area that was originally developed in the streetcar era. Much of the corridor lies within the central business district and historic areas. The central business district includes a high-density mix of office, retail, hotels and leisure attractions. The total capital cost of this project is estimated at \$161,300,000, of which RTA is seeking \$129,050,000 (80 percent) in section 5309 New Starts funding as recommended by FTA. Final design is essentially complete, contracts for vehicle assembly have been awarded, and construction contracts are pending award. FTA awaits completion of the congressional review of the proposed FFGA. Section 3030(a)(51) of TEA21 authorizes the New Orleans Canal Streetcar Project for final design and construction. Through fiscal year 2002, Congress has appropriated a total of \$70,030,000 for this project. The Committee has recommended \$30,000,000 in New Starts funding for this project in fiscal year 2003.

Pawtucket, Rhode Island, commuter rail and maintenance facility project.—The existing Massachusetts Bay Transit Authority lay-over/storage yard at East Junction, located in the heavily residential area in Attleboro, needs to be relocated to a 9-acre parcel located in the northwest quadrant of Interstate 95 and Smithfield Avenue in Pawtucket. A six-track yard with light servicing capabilities will be constructed initially. The yard will be designed to accommodate eight tracks and an electrified maintenance facility in the future. The Federal share of the project is \$14,700,000 (50 percent), consisting of \$10,000,000 in section 5309 New Starts funding and \$4,700,000 in Fixed Guideway Modernization funding, the rest of the project is being funded through the Rhode Island Department of Transportation (RIDOT) and the Massachusetts Bay Transit Authority. Through fiscal year 2002, Congress has appropriated \$5,450,000 in section 5309 in the FTA New Start funds. The Committee has recommended \$4,500,000 in New Starts funding for this project in fiscal year 2003.

Philadelphia, Pennsylvania, Schuylkill Valley Metro Project.—The Southeastern Pennsylvania Transportation Authority (SEPTA) and the Berks Area Reading Transportation Authority (BARTA) propose to develop the Schuylkill Valley Metro Rail project. The proposed project extends approximately 74 miles from Philadelphia to Reading and parallels the following major congested roadways: Schuylkill Expressway (Interstate 76), US 422 Expressway and US Route 202. The corridor includes the smaller cities of Norristown, Pottstown and Phoenixville. The corridor also includes suburban centers of King of Prussia and Great Valley, as well as regional activity centers and attractions including Center City Philadelphia, Art Museum, Philadelphia Zoo, King of Prussia Malls, Valley Forge National Park and Reading outlets. The corridor encompasses three transit authorities: SEPTA, BARTA and Pottstown Urban Transit (PUT) and two metropolitan planning regions: Delaware Valley and Berks County. Commuter rail service currently operates in the eastern portion of the corridor with rail freight service operations in the western portion of the corridor. SEPTA and BARTA have selected a lo-

cally preferred alternative (LPA) that would employ rail vehicles suitable for operation on mixed-use (passenger or freight) track, capable of one-man operation and with 15 and 30-minute headways in the peak and off peak, respectively. Total capital cost for the project is estimated at \$1,831,700,000. The DEIS was published in December 2001. FTA approved entry into preliminary engineering in January 2002. Through fiscal year 2002, Congress has provided \$25,720,000 in section 5309 New Starts funds for the proposed project. The Committee has recommended \$15,000,000 in New Starts funding for this project in fiscal year 2003.

Pittsburgh, Pennsylvania, North Shore Connector light rail transit project.—The Port Authority of Allegheny County (PAAC) proposes to construct a 1.6-mile light rail transit system extension connecting the Golden Triangle and the North Shore wholly within downtown Pittsburgh. The project would extend the existing LRT service from the Gateway center LRT station and the Convention Center. The North Shore Connector LRT project involves the construction of four new stations and modifications of the Gateway Center and Steel Plaza stations, and the acquisition of 10 new light rail vehicles. FTA approval to initiate preliminary engineering was granted in January 2001. Project capital costs are estimated at \$389,900,000 (escalated); revenue service start-up is planned in 2006. Through fiscal year 2002, Congress has appropriated \$23,670,000 in section 5309 New Starts funds for this effort. The Committee has recommended \$7,025,000 in New Starts funding for this project in fiscal year 2003.

Pittsburgh, Pennsylvania Stage II LRT Reconstruction project.—The Port Authority of Allegheny County (“Port Authority”) is reconstructing Pittsburgh’s old 25-mile trolley lines to modern light rail standards. The reconstruction is taking place in two stages. The Stage I Light Rail Transit (LRT) project, undertaken in the 1980s, included reconstruction of the first segment and construction of Pittsburgh’s first subway. Ground was broken on the Stage I LRT project in December 1980, and the reconstruction of this segment was completed in 1987. The Stage II LRT project includes reconstruction of the remaining 12 miles of the system, which consists of the Overbrook, Library and Drake trolley lines, to modern LRT standards. Single-track segments will be double-tracked; the Overbrook and Drake lines (which are currently closed) will be reopened, and 28 new light rail vehicles are being purchased. In order to prioritize program needs against financing requirements, Port Authority reconfigured its rail improvement program in 1999. As a result, the Stage II LRT project will itself be undertaken in segments. The revised Stage II LRT Priority Program includes reconstruction of 10.7 miles on both the Overbrook Line and a portion of the Library Line, construction of 2,400 park-and-ride spaces, and the purchase of 28 light rail vehicles. The total capital cost of the Stage II Priority Program is estimated at \$386,460,000. The remaining portions of the original Stage II LRT project will be undertaken as local funding becomes available. Section 3030(a)(98) authorizes the “Pittsburgh—Stage II Light Rail” project for final design and construction. In January 2001, FTA issued an FFGA for this project that would commit a total of \$100,200,000 in section 5309 New Starts funding. Through fiscal year 2002, a total of \$41,530,000 has been appropriated in New Starts funds for this project, and an additional \$96,500,000 has been appropriated in section 5309 Fixed Guideway Modernization funds. The Committee has recommended \$26,250,000 in New Starts funding for this project in fiscal year 2003.

Raleigh, North Carolina, triangle transit project.—The Phase I Regional Rail project is the first proposed segment of a three-phased regional transit plan for linking the three counties—Wake, Durham, and Orange—in the Triangle Region of North Carolina. In Phase I, the Triangle Transit Authority (TTA) intends to initiate regional rail service from Durham to downtown Raleigh and from downtown Raleigh to North Raleigh. TTA proposes to use Diesel Multiple Unit (DMU) rail vehicles to serve the 16 stations proposed for the Phase I of the project. TTA has proposed that the Phase I Regional Rail Project will use the existing North Carolina Railroad and CSX rail corridors to connect Duke University, downtown Durham, Research Triangle Park, RDU Airport, Morrisville, Cary, North Carolina State University, downtown Raleigh, and North Raleigh. The proposed project is estimated to serve 31,700 average weekday boardings by the year 2025. The most recent capital cost estimate for Phase I is \$754,700,000 (escalated dollars). The cost estimate includes final design, acquisition of right-of-way (ROW) and rail vehicles,

Portland, Oregon Interstate MAX LRT Extension project.—The Tri-County Metropolitan Transit District of Oregon (Tri-Met) is constructing a 5.8-mile, 10-station extension of the Metropolitan Area Express (“MAX”) light rail system, which will connect Portland’s central business district with the regional Exposition Center in north Portland. Riders will be able to transfer between the Interstate MAX extension and the existing 33-mile East/West MAX line at the Rose Quarter station. This line will complement regional land use plans by connecting established residential, commercial, entertainment and other major activity centers, and will provide a key transportation link in the region’s welfare-to-work programs. The total cost of the Interstate MAX project is estimated at \$350,000,000. Tri-Met estimates that the Interstate MAX extension will serve 18,100 average weekday boardings and 8,400 daily new riders by 2020. On September 20, 2000, FTA and Tri-Met entered into an FFGA that commits a total of \$257,500,000 in section 5309 New Starts funds to the Interstate MAX project. This does not include funding appropriated in prior years that were allocated to Portland Metro for the 12-mile South-North light rail line originally proposed for this corridor. Through fiscal year 2002, the Committee appropriated \$76,750,000 in section 5309 New Starts funds for the Interstate MAX light rail extension. This figure includes \$70,000,000 in prior years’ section 5309 New Starts funds that are not included in the FFGA commitment. The Committee has recommended \$70,000,000 in New Starts funding for this project in fiscal year 2003.

Puget Sound, Washington, Sounder Commuter Rail project.—Sound Transit, the Central Puget Sound Regional Transit Authority, is implementing commuter rail service along the 82-mile existing rail corridor between Lakewood and Everett, Washington. When the Sound Move enabling legislation is fully implemented, Sounder will serve 13 stations along the corridor, connecting commuters with local and regional bus service, the Washington State ferry system, Amtrak, the Central Link light rail system, and Tacoma Link. Currently, Sounder commuter rail is providing weekday service during peak hours at seven stations between downtown Tacoma and Seattle. Once in full operation, 18 trains will serve the Lakewood-Tacoma-Seattle Sounder segment, and 12 trains will serve the Everett-Seattle segment. By 2020, Sounder is estimated to carry 18,800 daily riders. To date, \$79,320,000 has been appropriated for the 82-mile corridor. The Committee has recommended \$30,000,000 in New Starts funding for this project in fiscal year 2003.

Raleigh, North Carolina, triangle transit project.—The Phase I Regional Rail project is the first proposed segment of a three-phased regional transit plan for linking the three counties—Wake, Durham, and Orange—in the Triangle Region of North Carolina. In Phase I, the Triangle Transit Authority (TTA) intends to initiate regional rail service from Durham to downtown Raleigh and from downtown Raleigh to North Raleigh. TTA proposes to use Diesel Multiple Unit (DMU) rail vehicles to serve the 16 stations proposed for the Phase I of the project. TTA has proposed that the Phase I Regional Rail Project will use the existing North Carolina Railroad and CSX rail corridors to connect Duke University, downtown Durham, Research Triangle Park, RDU Airport, Morrisville, Cary, North Carolina State University, downtown Raleigh, and North Raleigh. The proposed project is estimated to serve 31,700 average weekday boardings by the year 2025. The most recent capital cost estimate for Phase I is \$754,700,000 (escalated dollars). The cost estimate includes final design, acquisition of right-of-way (ROW) and rail vehicles,

station construction, park and ride lots, and construction of storage and maintenance facilities. The corridor proposed to be used by TTA for the project is shared among a number of railroads; thus, TTA is considering a number of track realignments to accommodate proposed inter-city and high-speed rail improvements. This project has been authorized in TEA21. Through fiscal year 2002, \$50,550,000 has been appropriated for this project. The Committee has recommended \$11,000,000 in New Starts funding for this project in fiscal year 2003.

St. Louis, Missouri, Metrolink St. Clair Extension project.—The Bi-State Development Agency (Bi-State) is developing a 26-mile extension of the Metrolink light rail line from downtown East St. Louis, Illinois to the Mid-America Airport in St. Clair County. A 17.4-mile Minimum Operable Segment (MOS), extending from the current Metrolink terminal in downtown East St. Louis to Belleville Area College (now known as Southwest Illinois College), began revenue service in May 2001. This segment consists of 8 stations, 7 park-and-ride lots, 20 new light rail vehicles, and a new maintenance facility in East St. Louis. The route makes extensive use of abandoned railroad rights-of-way. Right-of-way and real estate acquisition is proceeding as scheduled, and revenue service is scheduled to begin in 2001. The total capital cost of the St. Clair MOS is estimated at \$339,200,000. On October 17, 1996, FTA and Bi-State entered into an FFGA that commits a total of \$243,930,000 in section 5309 New Starts funding to complete the 17.4-mile MOS to Southwest Illinois College, and provides for extending the system to Mid-America Airport should funding become available at a later date. The funding committed to the MOS does not include \$8,490,000 in Federal New Starts funding provided prior to fiscal year 1996, which brings total Federal funding for this project to \$252,410,000 under the New Starts program. Through fiscal year 2002, a total of \$240,560,000 has been appropriated for this project. The Committee has recommended \$3,370,000 in New Starts funding for this project in fiscal year 2003.

Salt Lake City, Utah, CBD to University LRT project.—The Utah Transit Authority (UTA) is implementing a 2.5-mile, 4-station light rail line in eastern Salt Lake City, from the downtown area to Rice-Eccles Stadium on the University of Utah campus. The line would connect with the existing North/South line at Main Street and travel east along 400 South and 500 South to the stadium. Light rail vehicles would operate on city streets and property owned by Salt Lake City, the Utah Department of Transportation, and the University. The line is intended to significantly improve access to jobs, educational opportunities, health care, and housing throughout the 400 South corridor. The CBD to University line is scaled back from the originally proposed 10.9-mile West/East line from the airport to the university. Total capital costs are estimated at \$118,500,000. FTA issued an FFGA for the CBD to University LRT project on August 17, 2000, committing a total of \$84,600,000 in section 5309 New Starts funds. This does not include \$4,960,000 appropriated for the project in prior years, but not included in the FFGA scope. Through fiscal year 2002, \$20,800,000 in section 5309 New Starts funds has been appropriated for this project. The Committee has recommended \$68,760,000 in New Starts funding for this project in fiscal year 2003.

Salt Lake City, Utah, North-South LRT.—The Utah Transit Authority (UTA) has completed construction of a 15-mile light rail transit (LRT) line from downtown Salt Lake City to the southern suburbs. The line opened for regular weekday service on December 6, 1999. The system operates on city

streets downtown for 2 miles and then follows a lightly-used railroad alignment owned by UTA to the suburban community of Sandy for 13 miles. This project is one component of the Interstate 15 corridor improvement initiative, which includes reconstruction of a parallel segment of Interstate 15. Though original ridership projections for the South LRT system estimated daily ridership at 14,000 daily passengers in 2000 and 23,000 passengers by 2010, current ridership averages 19,000 weekday passengers. Total capital costs for this project were \$312,490,000. For the 2002 Winter Olympic and Paralympic Games, this project connected major hotels and local residential areas with the Olympic venues for figure skating, medal rounds for ice hockey, and the International Broadcast Center, and connects with bus service to venues for speed skating, curling, and the Nordic alpine events. On August 2, 1995, FTA issued an FFGA for this project that committed a total of \$237,390,000 in Federal New Starts funding. This does not include \$6,600,000 in prior year funds that were provided before the FFGA was issued, which brings the total amount of section 5309 New Starts funding to \$243,990,000. A total of \$236,678,000 has been appropriated through fiscal year 2002. The Committee has recommended \$720,000 in New Starts funding for this project in fiscal year 2003.

Salt Lake City, Utah, University Medical Center LRT extension project.—The Utah Transit Authority (UTA) provides light rail service on two lines: the has completed construction of a 1.5-mile North-South light rail transit (LRT) line from Sandy City to downtown Salt Lake City to the southern suburbs. The line opened for regular weekday service on December 6, 1999. The system operates on city streets downtown (2 miles) and then follows a lightly used railroad alignment owned by UTA to the suburban community of Sandy (13 miles). The University light rail line operates on a 2.5-mile alignment from downtown Salt Lake City to Rice-Eccles stadium located at the western edge of the University of Utah campus. The University Medical Center and associated facilities constitute one of Utah's largest traffic generation points. Significant ridership will be served by this project, which will add 3 stations and 1.5 miles of track to the existing UTA LRT system, extending from Rice-Eccles stadium to the University Medical Center. Revenue operation date is projected for December 2004. FTA and UTA signed an FFGA in May 2002 for \$53,600,000 in section 5309 New Starts funds. The Committee has recommended \$10,000,000 in New Starts funding for this project in fiscal year 2003.

Salt Lake City, Utah, Salt Lake City-Ogden-Provo Commuter Rail project.—The Wasatch Front Regional Council (WFRC) and the Mountainlands Association of Governments (MAG) the two metropolitan planning organizations that oversee transportation planning for more than 85 percent of the State of Utah's population, along with the Utah Transit Authority and the Utah Department of Transportation, have completed an Inter-Regional Corridor Alternatives Analysis study to evaluate transportation improvements in a 120-mile corridor from Brigham City to Payson. The corridor encompasses the Ogden, Salt Lake City and Provo/Orem urbanized areas. The study evaluates highway and transit alternatives in the corridor. WFRC and MAG completed a Long-Range Transit Analysis in 1998, identifying commuter rail as an effective means of serving the transportation demands in the corridor between Brigham City and Payson. A commuter rail line, with 12 stations, has been identified and evaluated and subsequently included in the region's Long Range Transportation Plan. Discussions are underway

with the Union-Pacific Railroad concerning the acquisition of railroad right-of-way to implement commuter rail, light rail or other transportation improvements. Total capital costs are estimated at \$587,000,000, with \$272,000,000 for Ogden to Salt Lake City and \$315,000,000 for Salt Lake City to Provo. Through fiscal year 2002, Congress has appropriated \$3,900,000 in section 5309 New Starts funds for this effort. The Committee has recommended \$6,000,000 in New Starts funding for this project in fiscal year 2003.

San Diego, California, Oceanside-Escondido Rail Corridor project.—The North County Transit District (NCTD) in northern San Diego County, California is planning to convert an existing 22-mile freight railroad corridor between Oceanside and Escondido into a rail transit line. The line would run east from the City of Oceanside through the cities of Vista and San Marcos and unincorporated portions of San Diego County, to the City of Escondido, using diesel multiple unit (DMU) rail vehicles. The alignment also includes 1.7 miles of new right-of-way to serve the campus of California State University San Marcos (CSUSM). The line is located along the State Route 78 corridor, the principal east-west corridor in the county. The complete 23.7-mile system will serve 15 stations, 4 of which would be located at existing transit centers. Passenger rail service would have exclusive use of the rail line during pre-defined hours of operation. An Environmental Impact Report (EIR) for the Oceanside-Escondido project was certified in 1990, and a separate EIR for the CSUSM alignment was certified in 1991. A major investment study was not required under the procedures in effect at the time, based on concurrence from FTA, FHWA, the San Diego Association of Governments, Caltrans, the City of San Marcos, and NCTD. Advance planning was completed in December 1995, and the Environmental Assessment/Supplemental Environmental Impact Report was completed in early 1997. FTA approved NCTD's request to enter final design in February 2000. The total capital cost for this project is estimated at \$332,300,000, of which NCTD is seeking \$152,100,000 in section 5309 New Starts funds. Ridership is estimated at 15,100 average weekday boardings in 2015, of which 8,600 would be daily new riders. Revenue operations are scheduled to begin in January 2004. This project will help to alleviate the heavy congestion of northern San Diego County along the Route 78 corridor. The project will serve large intermodal transit centers in both Oceanside and Escondido, and the corridor between contains a dispersed mix of commercial, industrial, and single-and multiple-family residential developments. This project is rated "medium-high" for both finance and justification, earning an overall rating of "highly recommended." Section 3030(a)(77) of TEA21 authorized this project for final design and construction. Through fiscal year 2002, Congress has appropriated \$24,280,000 in section 5309 New Starts funds for this project. FTA anticipates that NCTD will be ready for an FFGA for this project by fall fiscal year 2003. The Committee has recommended \$12,200,000 in New Starts funding for this project in fiscal year 2003.

San Diego, California, Mission Valley East LRT Extension project.—The Metropolitan Transit Development Board (MTDB) is constructing a 5.9-mile, 4-station light rail extension of its existing Blue Line, from east of Interstate 15 to the City of La Mesa, where it will connect to the existing Orange Line near Baltimore Drive. The Mission Valley East line will serve four new and two existing stations, and would include elevated, at-grade, and tunnel portions. The project includes two park and ride lots and a new access road between Waring Road and the

Grantville Station. The corridor runs parallel to Interstate 8 in eastern San Diego and La Mesa, and is characterized by a mix of low- to moderate-density industrial, residential, and commercial uses as well as by several major activity centers such as San Diego State University, the Grossmont regional shopping center, Kaiser Hospital, the Alvarado Medical Center, and the Grantville employment area. Over 24,000 jobs and nearly 10,000 residences are located within walking distance of the proposed stations, and existing zoning is generally supportive of transit. Total capital costs are estimated at \$431,000,000. On June 22, 2000, FTA issued an FFGA committing a total of \$329,960,000 in section 5309 New Starts funding to this project. Through fiscal year 2002, Congress has appropriated \$112,720,000 for this project. The Committee has recommended \$65,000,000 in New Starts funding for this project in fiscal year 2003.

San Francisco, California, BART Extension to SFO Airport project.—Bay Area Rapid Transit (BART) in San Francisco and the San Mateo County Transit District (SamTrans) are constructing an 8.7-mile, 4-station extension of the BART rapid transit system to serve San Francisco International Airport (SFO). The project consists of a 7.5-mile mainline extension from the existing BART station at Colma, through Colma, south San Francisco, and San Bruno, terminating at the Millbrae Avenue BART/CalTrain Station. An additional 1.2-mile spur from the main line north of Millbrae will take BART trains directly into the airport, to a station adjoining the new International Terminal. The San Francisco International Airport is a major partner in this project. All structures and facilities to be constructed on airport property and installation of related equipment are being funded, designed and constructed for BART by the airport. This project is also part of the FTA Turnkey Demonstration Program to determine if the design/build approach will reduce implementation time and cost. On July 24, 1997, the first contract was awarded for site preparation and utility relocation associated with this project. Bids for the main contract for construction of the line, trackwork and related systems were opened on November 25, 1997. On June 30, 1997, FTA entered into an FFGA for the BART SFO extension, committing a total of \$750,000,000 in Federal New Starts funds to the project; total capital costs at that time were estimated at \$1,054,000,000. The total cost has since increased to an estimated \$1,510,200,000; a surge in local construction activity has resulted in higher than estimated costs for construction of this project. Per the terms of the FFGA, any cost increases are the responsibility of the local project sponsors. Thus, the original Federal commitment is unchanged at \$750,000,000. Through fiscal year 2002, a total of \$317,370,000 has been appropriated for this project. This project has been authorized in TEA21. The Committee has recommended \$100,000,000 in New Starts funding for this project in fiscal year 2003.

San Juan/Tren Urbano.—The Puerto Rico Department of Transportation and Public Works (DTPW) is constructing a 10.7-mile, 16-station rapid rail line between Bayamon Centro and the Sagrado Corazon area of Santurce in the San Juan metropolitan area. The system consists of a double-track line operating over at-grade and elevated rights-of-way with a short below-grade segment, and a maintenance facility. When complete, this system is expected to carry 113,300 riders per day by 2010. This project has been selected as one of FTA's turnkey demonstration projects, which incorporates contracts to design, build, operate, and maintain the system. During 1996 and 1997, seven contracts

were awarded under the turnkey procurement. The total capital cost of this project is now estimated at \$1,653,600,000. On March 13, 1996, FTA entered into an FFGA committing \$307,410,000 in section 5309 New Starts funds to this project, out of a total project cost of \$1,250,000,000. This did not include \$4,960,000 in Federal New Starts funding provided prior to fiscal year 1996, which brings total Federal New Starts funding for this project to \$312,370,000. This FFGA was amended in July 1999 to include 2 additional stations and 10 additional railcars. This amendment included \$141,000,000 in section 5307 funds and \$259,900,000 in flexible funding; no additional section 5309 New Starts funds were committed. A total of \$193,560,000 in section 5309 funds has been allocated to the Tren Urbano project through fiscal year 2002. The Committee has recommended \$30,038,000 in New Starts funding for this project in fiscal year 2003.

Scranton, Pennsylvania, rail service to New York City.—Morris, Sussex, and Warren Counties, all located in New Jersey, in cooperation with the New Jersey TRANSIT Corporation (NJ TRANSIT) conducted a Major Investment Study/Environmental Assessment (MIS/EA) to examine the feasibility of re-instituting rail service on the Lackawanna Cut-off Corridor between Scranton, Pennsylvania and Hoboken, New Jersey. In addition, in 1998, a planning study was undertaken by Lackawanna County, Pennsylvania to preliminarily define the State's portion of the project. Commuter rail was selected as the locally preferred alternative. The potential rail service would connect to the NJ TRANSIT Boonton Line at Port Morris in Roxbury, New Jersey. Trains would operate to Hoboken and connect to Midtown Direct trains traveling to New York's Penn Station. The proposed project would include track and signal improvements, new stations, parking facilities, train storage yard, and rail equipment acquisition. Information on mobility improvements, environmental benefits, cost effectiveness, operating efficiencies, transit-supportive land use and other factors are being developed. Through fiscal year 2002, Congress has appropriated \$990,000 in section 5309 New Starts funds for this effort. These funds will be used for conceptual design and completion of the EA. The Committee has recommended \$3,000,000 in New Starts funding for this project in fiscal year 2003.

Seattle, Sound Transit Central Link Light Rail.—The Committee takes note of the significant progress made by the Federal Transit Administration and Sound Transit in addressing the concerns about light rail developments in the Puget Sound region raised by the Department of Transportation Inspector General's Interim Report of April, 2001. Since that time, the FTA and regional leaders have worked to make necessary improvements in the project plans and in oversight of the project. Sound Transit's Board of Directors in November, 2001 adopted a new initial segment for Central Link light rail. This 14-mile line will run south from downtown Seattle to just north of Sea-Tac Airport. Sound Transit has implemented management improvements which have improved its cost estimation and financial management capabilities. The FTA has stepped-up its oversight of the project as well. The Committee encourages the ongoing efforts of Sound Transit and the FTA and looks forward to continuing to work with the FTA and Sound Transit in addressing the Puget Sound region's significant transit needs.

Stamford, Connecticut, urban transitway project.—The City of Stamford, in coordination with the Connecticut Department of Transportation (ConnDOT), and the Southwestern Regional Planning Agency, is pro-

posing to design and construct a 1-mile Urban Transitway. This will consist of a bus lane, shared with high occupancy vehicles, that will provide a direct link from Interstate 95 to the Stamford Intermodal Transportation Center (SITC). The Urban Transitway project will include changes to the bus routes serving the SITC, improved pedestrian access, and the implementation of intelligent transportation systems (ITS). The SITC serves as a major transfer point for local bus and employer shuttle service and provides access to existing Amtrak and Metro-North rail service in the Northeast corridor. Currently, Metro-North operates 190 daily trains that stop at the SITC and approximately 2,500 riders use the service in the peak hours to commute from Stamford to New York City, while 1,500 riders travel inbound to employment opportunities in Stamford. To accommodate additional commuter capacity at the SITC, the City is expanding rail platform capacity and constructing a 1,200-space parking facility. This project has been authorized in TEA21 under section 5309(e)(8)(A). Through fiscal year 2002, Congress has appropriated \$14,850,000 for this project. The Committee has recommended \$12,000,000 in New Starts funding for this project in fiscal year 2003.

Stockton, California, Altamont Commuter Rail project.—The San Joaquin Regional Rail Commission (SJRRC), the Alameda Congestion Management Agency, and the Santa Clara Valley Transportation Authority have implemented a commuter rail system along an existing Union-Pacific Railroad right-of-way between the three counties. A Joint Powers Board comprised of members from each of the three agencies was also created to operate the proposed Altamont Commuter Express. The SJRRC would be the managing agency for the initial 36-month term of an agreement executed between the three agencies. In addition to identifying potential sources for capital and operating funds, the member agencies will define the methods for allocating future costs and the shares of future capital improvement contributions from the member agencies. Through fiscal year 2002, Congress has appropriated \$6,910,000 in section 5309 New Starts funds for this effort. The Committee has recommended \$1,000,000 in New Starts funding for this project in fiscal year 2003.

Wilmington, Delaware, Wilmington Train Station.—The Delaware Department of Transportation is proposing several improvements to the Wilmington train station which serves approximately 5,000 passengers daily in the Nation's busiest rail corridor. The proposed improvements would allow convenient passenger transfers between several modes of travel, including commuter rail passenger rail, commuter and local bus service, taxi, bicycle, auto and pedestrian. The planned improvements include platform modernization, concourse improvements, construction of a station entrance and platform ramp, and rehabilitation to elevators, escalators and restrooms. Through fiscal year 2002 a total of \$3,470,000 has been provided to this project. The Committee has recommended \$3,000,000 in New Starts funding for this project in fiscal year 2003.

JOB ACCESS AND REVERSE COMMUTE GRANTS

	General fund	Trust fund	Total
Appropriations, 2002	\$25,000,000	\$100,000,000	\$125,000,000
Budget estimate, 2003	30,000,000	120,000,000	150,000,000
Committee recommendation	30,000,000	120,000,000	150,000,000

The Committee recommends \$150,000,000 for the Job Access and Reverse Commute Grants program, the level guaranteed under the TEA21 transit category firewall. The Committee has included bill language transferring \$25,000,000 to the "Capital investment

grants" account. This level of funding is the same as the fiscal year 2002 appropriated level. This program is meant to help welfare reform efforts succeed by providing enhanced transportation services for low-income individuals, including former welfare recipients, traveling to jobs or training centers.

The program makes competitive grants to qualifying metropolitan planning organizations, local governmental authorities, agencies, and nonprofit organizations. Grants may not be used for planning or coordination activities.

The Committee recommends the following allocations of job access and reverse commute grant program funds in fiscal year 2003:

<i>Project</i>	<i>Amount</i>	
AC Transit—CalWORKS Recipient Job Center, CA	\$750,000	
Alabama Jefferson County JARC, AL	4,000,000	
Alaska Mobility Coalition, AK	500,000	
Allegheny Port Authority JARC, PA	3,000,000	
Austin Capital Metros Access to JARC, TX	3,000,000	
Brockton Area Transit Authority, MA	225,000	
Capital District Transportation Authority, Albany, NY	550,000	
Central Ohio, Mobility Management, COTA, OH	600,000	
Chatham JARC Program, GA	550,000	
Chautauqua Area Rural Transportation System, NY	100,000	
Chemung County Transit, NY	150,000	
Columbia, Expanded Service to Rural Welfare Recipients, NY	3,000,000	
Connecticut, JARC, CT	100,000	
Corpus Christi JARC Program, TX	750,000	
Delaware Welfare to Work Initiative	500,000	
El Paso, JARC Program, TX	750,000	
Flint Job Access Program, MI	750,000	
Fort Wayne's Hanna Creighton Transit Center, IN	1,500,000	
Franklin County Expansion of Hour Service, NY	150,000	
Grand Rapids Reverse Commute Program, MI	2,000,000	
Greater Cleveland Regional Transit Authority JARC, OH	325,000	
Hornell, Trans. Alternatives for Special Needs, NY	750,000	
Illinois, Ways To Work	500,000	
IndyGo Multi-use Downtown Transit Center, IN	1,000,000	
Iowa Statewide JARC	1,000,000	
Jackson-Josephine County JARC Project, OR	60,000	
Jacksonville Trans. Authority, Choice Ride Program, FL	1,000,000	
Kenai Peninsula, Transit Planning, AK	60,000	
KW, Paratransit Vehicle Replacement, KS	1,000,000	
LA County, UTRANS, CA	200,000	
Lafayette Ways to Work Program, LA	100,000	
Lancaster-Littleton Transit Project, NH	2,000,000	
Low-Income LIFT Program, SF MTC, CA	400,000	
LYNX, Central Florida Regional Transportation Authority, FL		
		Project
Macon-Bibb County Reverse Commute Program, GA	550,000	Appropriations from the Harbor Maintenance Trust Fund and revenues from non-federal sources finances the operation and maintenance of the Seaway for which the corporation is responsible.
Maricopa County Worklinks Project, AZ	500,000	
Maryland Statewide JARC, (Montgomery County—\$600,000)	4,000,000	COMMITTEE RECOMMENDATION
MASCOT Matanuska-Susitna Valley, AK	200,000	The Committee recommendation includes \$13,345,000 to fund the operations and maintenance of the Corporation. The Committee recommendation provides sufficient funding for the Corporation's highest capital priorities and the projects recommended by the U.S. Army Corps of Engineers after its survey and evaluation of the Corporation's lock and maintenance practices. Based on independent security assessments, the Corporation plans to implement additional security measures for the Saint Lawrence Seaway in 2003. The Corporation anticipates \$820,000 in new and revised security measures.
Metrolink Corridor Access to Jobs, MO	3,000,000	
Missouri Statewide JARC Grants, MO	2,800,000	
New Jersey JARC Program	4,000,000	
Northwest Ohio Commuter LINK, Toledo, OH	250,000	
Oklahoma Statewide Access to Jobs Program	4,000,000	
Oregon Ways to Work Loan Program	500,000	
Portland Metropolitan Region JARC Program, OR	1,500,000	
Rhode Island Deployment of Flexible Services	1,500,000	
Rhode Island Statewide JARC	2,000,000	
Ride Share Program—MTA, CA	750,000	
Rochester-Genesee Regional Transportation Authority, NY	400,000	
SACOG, Sacramento Region JARC Projects, CA	1,500,000	
San Antonio, Access to Jobs Program, TX	925,000	
Santa Clara Valley, Guaranteed Ride Home Program, CA	350,000	
SEPTA JARC, PA	3,500,000	
Service for Ithaca, NY	150,000	
Southern California Regional Rail Authority Metrolink Double Tracking Project	2,000,000	
Anchorage People Mover, AK	550,000	
STEP-UP Job Access Project, Dayton, OH	200,000	
Valley Metro/RPTA Job Access Program, AZ	250,000

		SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION
		The Saint Lawrence Seaway Development Corporation (the Corporation) is a wholly owned Government corporation established by the Saint Lawrence Seaway Act of May 13, 1954. The Corporation is responsible for the operation, maintenance, and development of the United States portion of the Saint Lawrence Seaway between Montreal and Lake Erie. The Corporation's major priorities include: safety, reliability, trade development, and management accountability.
		OPERATIONS AND MAINTENANCE
		(HARBOR MAINTENANCE TRUST FUND)
Appropriations, 2002 ¹	\$13,345,000	
Budget estimate, 2003 ²	14,086,000	
Committee recommendation	13,345,000	
		¹ Does not reflect reduction of \$11,000 pursuant to section 349 of Public Law 107-87 or reduction of \$10,000 pursuant to section 1106 of Public Law 107-117.
		² Does not reflect emergency supplemental funding of \$2,500,000 pursuant to Public Law 107-117.
		³ Does not include \$5,987,000 in proposed new user fees.
		⁴ Excludes CSRS/FEHB accruals of \$1,316,000.

The Committee has provided a total of \$43,725,000 for the "Research and special programs" account, which is the same as the budget request.

The following table summarizes the Committee recommendations:

	Fiscal year 2002 enacted ¹	Fiscal year 2003 estimate	Committee rec- ommendation
Hazardous materials safety	\$21,217,000	\$23,079,000	\$23,079,000
New hazardous materials user fees	(132)	\$5,987,000	(136)
(FTE)		(136)	(136)
Emergency transportation	\$1,897,000	\$2,058,000	\$2,058,000
(FTE)	(9)	(10)	(10)
Research and technology	\$2,784,000	\$2,854,000	\$2,854,000
(FTE)	(9)	(9)	(9)
Program and administrative support	\$11,381,000	\$16,387,000	\$15,734,000
(FTE)	(50)	(60)	(59)
Total, research and special programs		\$37,279,000	\$38,391,000
			\$43,725,000

¹ Does not reflect rescissions of \$113,000 pursuant to Public Law 107-87 and \$97,000 pursuant to Public Law 107-117.

² Does not reflect emergency supplemental funding of \$2,500,000 pursuant to Public Law 107-117.

HAZARDOUS MATERIALS SAFETY

The Office of Hazardous Materials Safety [OHMS] administers a nationwide program of safety regulations to fulfill the Secretary's duty to protect the Nation from the risks to life, health, and property that are inherent in the transportation of hazardous materials by water, air, highway, and railroad. OHMS plans, implements, and manages the hazardous materials transportation program consisting of information systems, research and analysis, inspection and enforcement, rulemaking support, training and information dissemination, and emergency procedures.

The Committee recommends \$23,079,000 for hazardous materials safety, which is the same as the budget request.

Hazardous Materials Registration Fee Increase.—The Committee does not support the requested bill language to increase the Hazardous Materials Registration Fee that would result in an estimated additional collection of \$6,000,000 in fiscal year 2003. The intended purpose of this increase is to finance part of the Hazardous Materials Safety Program. The Committee has denied the use of industry assessed fees to fund the Hazardous Materials Safety Program in the past and again denies this request.

EMERGENCY TRANSPORTATION

Emergency transportation (ET) programs provide support to the Secretary of Transportation for his statutory and administrative responsibilities in the area of transportation civil emergency preparedness and response. This program develops and coordinates the Department's policies, plans, and programs, in headquarters and the field to provide for emergency preparedness.

ET is responsible for implementing the Transportation Department's National Security Program initiatives, including an assessment of the transportation implications of the changing global threat. The Office also coordinates civil emergency preparedness and response for transportation services during national and regional emergencies, across the entire continuum of crises, including natural catastrophes such as earthquakes, hurricanes and tornados, and international and domestic terrorism. The Office of Emergency Transportation develops crisis management plans to mitigate disasters and implements these plans nationally and regionally in an emergency.

The Committee recommends \$2,058,000 for emergency transportation, which is the same as the budget request.

RESEARCH AND TECHNOLOGY

The Committee recommends \$2,854,000 for the Office of Research and Technology, which is the same as the budget request. The funds provided will help the Department coordinate and strengthen its responsibilities under TEA21, and will help support the R&T organizational excellence strategy specified in the Department's strategic plan, allow RSPA to support the intergovernmental

transportation research coordination responsibilities of the National Science and Technology Council, and support a limited intermodal research program.

The Committee supports the request for R&D planning. These funds are used to conduct a diversity of activities of fundamental importance to the Department and to help coordinate transportation-related research throughout the Government. For example, these funds are used to support technology transfer and in particular to ensure that R&T advances made in the international arena are made available to various modes within the Department. In addition, these funds are used to support research and education planning that applies to all of the modes. Most importantly, one of the key purposes of these funds is to eliminate any duplication of research within the DOT.

PROGRAM AND ADMINISTRATIVE SUPPORT

The program support function provides legal, financial, management, and administrative support to the operating offices within RSPA. These support activities include executive direction (Office of the Administrator), program and policy support, civil rights and special programs, legal services and support, and management and administration.

The Committee has provided \$15,734,000 for program and administrative support, which is consistent with the budget request.

RESEARCH AND SPECIAL PROGRAMS

Business Modernization.—Public Law 107-87 directed RSPA to develop an Information Technology Strategic Plan outlining improvements in information technology and business modernization. In advance of this plan, the administration requested \$3,616,000 for IT infrastructure improvements and identified RSPA's need to remedy its weak IT infrastructure as its number one priority for fiscal year 2003. The Committee supports the need to overhaul RSPA's Information Management Program but remains exceedingly concerned by RSPA's inability to develop a true Information Technology Strategic Plan that identifies what RSPA's information needs are, identifies who needs access to the information, and identifies the resulting system infrastructure requirements.

The Strategic Plan, dated February 1, 2002, does none of these things. It does, however, call for an additional \$3,500,000 dollars for further IT consulting expenses. The plan also identifies \$9,100,000 that will be necessary for software development and hardware acquisition. The Committee disagrees that this level of funding is necessary for either the consulting costs or the IT infrastructure development. As such, the Committee directs that no additional funds shall be expended for consulting costs for this initiative and directs RSPA to proceed with the hiring of their IT personnel. The Committee approves the request for 10 positions and 7 FTEs for information technology support. It is essential that RSPA hire the appropriate technical expertise to allow them to develop a

true Strategic Information Technology Plan in house. The Committee approves the request for \$3,600,000 but directs RSPA to provide a Strategic Information Technology Plan, of no more than 15 pages, to both the House and Senate Committees on Appropriations by August 15, 2003. The Strategic Plan shall be submitted prior to any IT expenditure beyond the hiring of Information Technology Specialists. Within this Strategic Plan RSPA should identify their infrastructure spending plan and address information security.

New Full Time Equivalent Positions Request.—Within the Administration's Personnel Compensation and Benefits request, 17 positions and 12 FTE's are requested. Of those personnel requested, one position and one FTE is for an emergency transportation military liaison position. This position is currently filled with a military fellow provided by the Department of Defense. While the Committee believes that a military liaison is beneficial to the Office of Emergency Transportation, funding should continue to be provided by the Department of Defense.

Pipeline Safety

(PIPELINE SAFETY FUND)

(OILSPILL LIABILITY TRUST FUND)

	Pipeline safety fund	Trust fund	Total
Appropriations, 2002 ¹	\$50,386,000	\$7,864,000	\$58,250,000
Budget estimate, 2003 ²	56,385,000	7,472,000	63,857,000
Committee rec- ommendation	56,385,000	7,472,000	63,857,000

¹ Does not reflect rescissions of \$74,000 pursuant to Public Law 107-87 and \$64,000 pursuant to Public Law 107-117.

² Excludes CSRS/FEHB accruals of \$653,000.

The Research and Special Programs Administration is responsible for the Department's Pipeline Safety Program. Funding for the Office of Pipeline Safety is made available from two primary sources: the pipeline safety fund, comprised of user fees assessed on interstate pipeline operators; and the oil spill liability trust fund, a revolving fund comprised of an environmental tax on petroleum and oil spill damage recovery payments. The Pipeline Safety Program promotes the safe, reliable, and environmentally sound transportation of natural gas and hazardous liquids by pipeline. This national program regulates the design, construction, operation, maintenance, and emergency response procedures pertaining to gas and hazardous liquids pipeline systems and liquefied natural gas facilities. Also included is research and development to support the Pipeline Safety Program and grants-in-aid to State agencies that conduct a qualified pipeline safety program and to others who operate one-call programs.

The Committee's recommendation for the Federal pipeline safety program generally supports, and is consistent with, the key provisions of the Senate-passed version of the pipeline safety reauthorization bill. The Committee recommends \$63,857,000 for the

Department's Pipeline Safety Program, which is consistent with the budget estimate. The bill specifies that, of the total appropriation, \$56,385,000 shall be from the pipeline safety fund and \$7,472,000 shall be from the oil spill liability trust fund.

Enforcement of Consensus Guidelines.—The Office of Pipeline Safety, the pipeline industry and various Federal agencies are working to finalize consensus guidelines and regulatory standards on the different security measures that should be taken by critical pipeline facilities. The Committee maintains that it is essential that OPS has sufficient legal authorities to ensure compliance with either these guidelines or standards. To that end, the Department's General Counsel shall submit a report to the House and Senate Committees on Appropriations before August 15, 2003, specifying the legal authorities that OPS will use to bring either enforcement actions or issue facility orders against any operator of a critical pipeline facility that fails to comply with the OPS-endorsed guidelines or consensus standards relevant to pipeline security at different threat levels. The Counsel will also assess the need for regulatory action in this area.

National Pipeline Safety and Operations Research Consortium.—Within the funds provided for research and development, the Committee encourages the administrator to support the creation of a National Pipeline Safety and Operations Research Consortium to increase the operational efficiency and system safety of pipeline transportation for both liquid and gas commodities. The Center will apply emerging technologies to the pipeline industry to benefit both carriers and pipeline customers to increase the physical safety and integrity and productivity of the nation's pipeline network.

Research and development.—The Committee recommends \$3,970,000 for pipeline safety research, which is consistent with the amount requested. Within the funds provided, \$600,000 shall be used for airborne environmental laser mapping technology research and engineering to support improved leak detection, analysis, and response by Federal, State, and industry pipeline safety officials.

**EMERGENCY PREPAREDNESS GRANTS
(EMERGENCY PREPAREDNESS FUND)**

Appropriations, 2002	\$200,000
Budget estimate, 2003	200,000
Committee recommendation	200,000

The hazardous materials transportation law (title 49 U.S.C. 5101 et seq.) requires RSPA to: (1) develop and implement a reimbursable emergency preparedness grants program; (2) monitor public sector emergency response training and planning and provide technical assistance to States, territories, and Indian tribes; and (3) develop and update periodically a national training curriculum for emergency responders. These activities are financed by receipts received from the hazardous materials shipper and carrier registration fees, which are placed in the emergency preparedness fund. The hazardous materials transportation law provides permanent authorization for the emergency preparedness fund for planning and training grants, monitoring and technical assistance, and for administrative expenses. An appropriation of \$200,000 also from the emergency preparedness fund, provides for the training curriculum for emergency responders.

LIMITATION ON OBLIGATIONS

Bill language is included that limits the obligation of emergency preparedness training grants to \$14,300,000 in fiscal year 2003.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

Appropriations, 2002 ^{1,2}	\$50,614,000
---	--------------

Budget estimate, 2003 ^{2,3}	57,421,000
Committee recommendation	57,421,000

¹ Does not reflect reductions of \$108,000 pursuant to section 349 of Public Law 107-87 and \$93,000 pursuant to section 1106 of Public Law 107-117. Does not reflect emergency supplemental funding of \$1,300,000 pursuant to Public Law 107-117.

² Does not include reimbursements of \$3,524,000 from FHWA, \$2,000,000 from FTA, \$2,000,000 from FAA, and \$100,000 from NTSB.

³ Excludes CSRS/FEHB accruals of \$2,532,000.

The Inspector General Act of 1978 established the Office of Inspector General [OIG] as an independent and objective organization, with a mission to: (1) conduct and supervise audits and investigations relating to the programs and operations of the Department; (2) provide leadership and recommend policies designed to promote economy, efficiency, and effectiveness in the administration of programs and operations; (3) prevent and detect fraud, waste, and abuse; and (4) keep the Secretary and Congress currently informed regarding problems and deficiencies.

OIG is divided into two major functional units: the Office of Assistant Inspector General for Auditing and the Office of Assistant Inspector General for Investigations. The assistant inspectors general for auditing and investigations are supported by headquarters and regional staff.

The Committee recommends \$57,421,000.

SURFACE TRANSPORTATION BOARD

SALARIES AND EXPENSES

	Appropriation	Crediting offsetting collections
Appropriations, 2002 ¹	\$18,457,000	\$950,000
Budget estimate, 2003 ²	19,459,000	1,000,000
Committee recommendation	19,459,000	1,000,000

¹ Does not reflect reductions of \$5,000 pursuant to section 349 of Public Law 107-87 and \$4,000 pursuant to section 1106 of Public Law 107-117.

² Excludes \$1,192,300 in CSRS retirement and FEHB accruals.

The Surface Transportation Board was created on January 1, 1996, by Public Law 104-88, the Interstate Commerce Commission Termination Act of 1995 (ICCTA). Consistent with the continued trend toward less regulation of the surface transportation industry, the ICCTA abolished the ICC, eliminated certain functions that had previously been implemented by the ICC, transferred core rail and certain other functions to the Board, and transferred motor licensing and certain other motor functions to DOT and are now being administered by FMCSA. The Board is specifically responsible for the regulation of the rail and pipeline industries and certain nonlicensing regulation of motor carriers and water carriers. Moreover, the Board, through its exemption authority, is able to promote deregulation administratively on a case-by-case basis. Rail reforms made by the Staggers Rail Act of 1980 also have been continued.

The Committee has provided \$19,459,000 for activities of the Board. Included in the recommended amount is an estimated \$1,000,000 in fees to be collected, which will offset the appropriated funding. The Board is authorized to credit the fees collected to the appropriated amount as offsetting collections reducing the general funds appropriation on a dollar-for-dollar basis as the fees are received and collected.

The Committee's recommendation will fund a total of 145 full-time staff equivalent (FTE) positions, if the Board collects the full \$1,000,000 in user fees. Between now and September 30, 2003, 46 percent of the Board's employees will be eligible for voluntary retirement. The Committee encourages the Board to move expeditiously in filling vacancies as retirements occur in order to ensure that the oversight functions of the Board are not compromised.

TITLE II—RELATED AGENCIES

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

SALARIES AND EXPENSES

Appropriations, 2002 ¹	\$5,015,000
Budget estimate, 2003	5,194,000
Committee recommendation	5,194,000

¹ Does not include reduction of \$146,000 pursuant to section 301 of Public Law 106-113.

The Committee recommends \$5,194,000 for the operations of the Architectural and Transportation Barriers Compliance Board, the funding level requested by the administration.

The Architectural and Transportation Barriers Compliance Board (the Access Board) is the lead Federal Agency promoting accessibility for all handicapped persons. The Access Board was reauthorized in the Rehabilitation Act Amendments of 1992, Public Law 102-569. Under this authorization, the Access Board's functions are to ensure compliance with the Architectural Barriers Act of 1968, and to develop guidelines for and technical assistance to individuals and entities with rights or duties under titles II and III of the Americans with Disabilities Act. The Access Board establishes minimum accessibility guidelines and requirements for public accommodations and commercial facilities, transit facilities and vehicles, State and local government facilities, children's environments, and recreational facilities. The Access Board also provides technical assistance to Government agencies, public and private organizations, individuals, and businesses on the removal of accessibility barriers.

The Committee's recommendation provides adequate funding to support 32.8 FTE, 2 FTE more than the fiscal year 2000 staffing level, consistent with the Board's budget request.

NATIONAL TRANSPORTATION SAFETY BOARD

SALARIES AND EXPENSES

Appropriations, 2002	\$68,650,000
Budget estimate, 2003	70,480,000
Committee recommendation	72,500,000

The Independent Safety Board Act of 1974 established the National Transportation Safety Board [NTSB] as an independent Federal agency to promote transportation safety by conducting independent accident investigations. In addition, the act authorizes the Board to make safety recommendations, conduct safety studies, and oversee safety activities of other Government agencies involved in transportation. The Board also reviews appeals of adverse actions by the Department of Transportation with respect to airmen and seamen certificates and licenses.

The Board has no regulatory authority over the transportation industry. Thus, its effectiveness depends on its reputation for impartial and accurate accident reports, realistic and feasible safety recommendations, and on public confidence in its commitment to improving transportation safety.

COMMITTEE RECOMMENDATION

The bill includes \$72,500,000 for the National Transportation Safety Board. The Committee recommendation is \$3,850,000 above the amount provided in fiscal year 2002 and \$2,020,000 more than the budget request. The Committee notes that the National Transportation Safety Board Amendments Act of 2000 (Public Law 106-424) requires the Board, among other things, to provide the payment of true overtime for investigators and to implement the financial management

control initiatives that were recommended by a private sector audit firm last year. The Committee's recommendation includes additional funding to annualize 25 new positions; provide true overtime payment costs; to provide 24 additional FTE's; and, to implement financial management programs. This is 13 more FTE's than requested by the administration for the enhancement of investigative staff.

TITLE III—GENERAL PROVISIONS

The Committee concurs with the general provisions that apply to the Department of Transportation and related agencies as proposed in the budget, with some changes, deletions, and additions. These are noted below:

SEC. 304. Modifies a requested provision to prohibit the use of funds for the salaries and expenses to no more than 100 political and presidential appointees to the Department of Transportation.

SEC. 316. Modifies a provision regarding the funding of administrative expenses for the Federal Motor Carrier Safety Administration and the Federal Highway Administration.

SEC. 318. Modifies a provision regarding funds made available to Alaska or Hawaii for ferry boats, ferry terminals and ferry passenger service.

SEC. 320. Includes a provision exempting a general aviation airport with more than 300,000 annual operations from having to accept scheduled passenger service provided that airport meets specific conditions.

SEC. 322. Includes a provision permitting funds from Public Law 106-69 and Public Law 106-346 for the Wilmington, Delaware downtown corridor project to be available for the Wilmington, Delaware commuter rail improvements.

SEC. 324. Includes a provision transferring the operation and maintenance of the localizer instrument landing system at the Walnut Ridge Regional Airport, Arkansas to the Federal Aviation Administration.

SEC. 325. Includes a provision transferring the operation and maintenance of the air traffic control tower at Williams Gateway Airport, Arizona to the Federal Aviation Administration.

SEC. 327. Includes a provision regarding a highway in Alaska.

SEC. 329. Includes a provision which modifies section 1211(i) of Public Law 105-178 to define the Alameda Corridor East and Southwest Passage, California high priority corridor.

SEC. 330. Provides \$169,600,000, including funds provided elsewhere in the bill, to the Secretary of Transportation to make grants for surface transportation projects. The Committee's recommendation represents a \$21,600,000 increase over the amount that was appropriated in fiscal year 2002. Funds provided for this program for fiscal year 2003 shall be available for the following activities:

Project	Amount
Aberdeen, SD to Geneseo, ND Rail Repair Project ..	\$650,000
Adrian's Landing Urban Development Roadway Realignment Project, Hartford, CT	5,000,000
Arkwright Connector, Spartanburg SC	1,200,000
Aroostook County North-South Highways, ME	5,000,000
Baseline Road, Isabella, Nottawa, Deerfield, Union, MI	1,000,000

St. Louis Major Arterial Road Improvement/Renovation, MO	1,000,000		
Tucson Railroad Grade Crossing Project, AZ	1,500,000		
Tuscaloosa Downtown Revitalization Project	5,000,000		

SEC. 331. Includes a provision directing the Secretary of Transportation to approve the use of national highway system and surface transportation funds for construction of noise barriers in Georgia.

SEC. 332. Modifies a provision from the fiscal year 2000 appropriations act which prohibits the use of funds in this Act unless the Secretary of Transportation notifies the House and Senate Committees on Appropriations not less than 3 full business days before any discretionary grant award is made under section 1221 of Public Law 107-178 as amended, and before any award totaling \$500,000 or more is announced by the Department or its modal administrations. The administration proposed deleting this provision.

SEC. 333. Includes a provision rescinding \$77,100,000 of funds provided in section 101(a)(2) of Public Law 107-42.

SEC. 334. Includes a provision requiring a National Academy of Sciences study regarding the shipment of spent nuclear fuel from research nuclear reactors.

SEC. 336. Includes a provision which would reimburse the city of Escanaba, Michigan for the costs incurred for repairing a municipal dock that is utilized by the United States Coast Guard.

SEC. 337. Includes a provision to consider the city of Norman, Oklahoma to be part of the Oklahoma City Transportation Management Area for fiscal year 2003.

SEC. 339. Includes a provision allowing grants for the construction of an air traffic control tower at Double Eagle II Airport, New Mexico.

SEC. 340. Modifies a provision from a previous appropriations act permitting Section 402 funds to be used to produce and place highway safety messages on paid media outlets and designating certain Section 157 and Section 410 funds for paid media to support national law enforcement mobilizations on seat belt use and impaired driving.

SEC. 341. Modifies a provision from the fiscal year 2002 appropriations act regarding Coast Guard Yard in Curtis Bay, Maryland and other Coast Guard specialized facilities. The administration proposed deleting this provision.

SEC. 342. Retains a provision prohibiting funds for the Office of the Secretary of Transportation to be reprogrammed without Congressional notification. The administration proposed deleting this provision.

SEC. 343. Includes a provision regarding Federal share for certain highway funds.

SEC. 344. Includes a provision regarding the Hoover Dam Bypass Bridge.

SEC. 346. Retains a provision allowing discretionary bridge funding to be used for historic covered bridges. The administration proposed deleting this provision.

SEC. 347. Modifies a provision requiring quarterly reports on major Coast Guard acquisition and mission hour emphasis. The administration proposed deleting this provision.

SEC. 348. Includes a provision amending Section 1503 and Section 1101(a)(9) of Public Law 105-178.

SEC. 349. Includes a provision which the administration had requested be deleted that reduces the funds provided for the Transportation Administrative Service Center.

SEC. 350. Extends a provision from the fiscal year 2002 appropriations act regarding the safety of cross-border trucking between the United States and Mexico. The administration proposed deleting this provision.

SEC. 351. Includes a provision granting discretionary authority to the Secretary of Transportation to waive certain requirements included in a conveyance for an airport.

SEC. 352. Includes a provision which expands the exemption from Federal axle weight restrictions presently applicable only to public transit buses to all over-the-road buses.

SEC. 353. Includes a provision regarding funds for the construction of roads and bridges in Lake Charles, Louisiana.

SEC. 354. Includes a provision modifying Section 342 of the Department of Transportation and Related Agencies Appropriations Act, 2002.

SEC. 355. Includes a provision modifying Section 343 of the Department of Transportation and Related Agencies Appropriations Act, 2002.

SEC. 356. Includes a provision providing \$3,500,000 to enable the Secretary to maintain operations of the Midway Island airfield.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports accompanying general appropriations bills identify each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

Federal Aviation Administration
Office of Commercial Space Transportation
Research, Engineering, and Development

Federal Highway Administration
Child Passenger Protection Education
Grants

Federal Railroad Administration
Safety and Operations

National Railroad Passenger Corporation
(AMTRAK)

National Transportation Safety Board

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

TREASURY AND GENERAL GOVERNMENT APPROPRIATION BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. CAMPBELL, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amount of bill as reported to the Senate	\$34,533,464,000
Amount of estimate	34,276,277,000
The bill as reported to the Senate:	
Above the appropriations provided in 2002	716,352,000
Above the estimates for 2003	257,187,000

GENERAL STATEMENT AND SUMMARY OF THE BILL

The accompanying bill contains recommendations for new budget (obligational) authority for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 2003.

The Committee considered budget estimates for fiscal year 2003 in the aggregate amount of \$34,276,277,000. Compared to that amount, the accompanying bill recommends new budget authority totaling \$34,533,464,000.

REPROGRAMMING REQUIREMENTS

The Committee is concerned about the number of reprogramming requests submitted by agencies for congressional review. Agencies are again reminded that only those requests which meet the reprogramming criteria listed below will be considered, that reprogramming should be reserved for critical circumstances, and that reprogramming proposals will not be considered, except in extraordinary circumstances, if received 45 or fewer days prior to the end of the fiscal year.

The reprogramming guidelines to be used to determine whether or not a reprogramming shall be submitted to the Committee for prior approval are as follows:

1. Except under extraordinary and emergency situations, the Committees on Appropriations will not consider requests for a reprogramming or a transfer of funds, or use of

unobligated balances, which are submitted after the close of the third quarter of the fiscal year, June 30;

2. Clearly stated and detailed documentation presenting justification for the reprogramming, transfer, or use of unobligated balances shall accompany each request;

3. For agencies, departments, or offices receiving appropriations in excess of \$20,000,000, a reprogramming shall be submitted if the amount to be shifted to or from any object class, budget activity, program line item, or program activity involved is in excess of \$500,000 or 10 percent, whichever is greater, of the object class, budget activity, program line item, or program activity;

4. For agencies, departments, or offices receiving appropriations less than \$20,000,000, a reprogramming shall be submitted if the amount to be shifted to or from any object class, budget activity, program line item, or program activity involved is in excess of \$50,000, or 10 percent, whichever is greater, of the object class, budget activity, program line item, or program activity;

5. For any action where the cumulative effect of below threshold reprogramming actions, or past reprogramming and/or transfer actions added to the request, would exceed the dollar threshold mentioned above, a reprogramming shall be submitted;

6. For any action which would result in a major change to the program or item which is different than that presented to and approved by either of the Committees, or the Congress, a reprogramming shall be submitted;

7. For any action where funds earmarked by either of the Committees for a specific activity are proposed to be used for a different activity, a reprogramming shall be submitted; and,

8. For any action where funds earmarked by either of the Committees for a specific activity are in excess of the project or activity requirement, and are proposed to be used for a different activity, a reprogramming shall be submitted.

Additionally, each request shall include a declaration that, as of the date of the request, none of the funds included in the request have been obligated, and none will be obligated, until the Committees on Appropriations have approved the request.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

AGENCY FEES FOR FECA ADMINISTRATION

The President's budget included a legislative proposal under the jurisdiction of the Senate Committee on Health, Education, Labor, and Pensions to charge individual agencies, starting in fiscal year 2003, the administrative cost of the Federal Employees' Compensation Act (FECA) program. Currently Federal agencies are budgeted for and billed each year for monetary and medical benefits that have been paid to their employees under FECA, while the program's discretionary administrative costs are financed in the Department of Labor (DOL).

The authorizing committee has not acted on this legislation; therefore, the Senate Appropriations Committee will continue to fund this administrative cost through the Department of Labor, Employment Standards Administration Salaries and Expenses Account.

TITLE I—DEPARTMENT OF THE TREASURY

DEPARTMENTAL OFFICES SALARIES AND EXPENSES

Appropriations, 2002	\$177,142,000
Budget estimate, 2003	191,914,000

Committee recommendation 191,887,000

The Committee recommends an appropriation of \$191,887,000 for salaries and expenses for departmental offices of the Department of the Treasury.

The Departmental Offices function in the Department of the Treasury is to provide basic support to the Secretary of the Treasury, who is the chief operating executive of the Department. The Secretary of the Treasury maintains the primary role in formulating and managing the domestic and international tax and financial policies of the Federal Government. The Secretary's responsibilities funded by the Salaries and Expenses appropriation include: recommending and implementing United States domestic and international economic and tax policy; fiscal policy; governing the fiscal operations of the Government; maintaining foreign assets control; managing the public debt; overseeing major law enforcement functions carried out by the Department of the Treasury; managing development financial policy; representing the United States on international monetary, trade and investment issues; overseeing Department of the Treasury's overseas operations; and directing the administrative operations of the Department of the Treasury.

In support of the Secretary, the Salaries and Expenses appropriation provides resources for policy formulation and implementation in the areas of domestic and international financial, investment, tax, economic, trade and financial operations and general fiscal policy. This appropriation also provides resources for administrative support to the Secretary and policy components, and coordination of Departmental administrative policies in financial and personnel management, procurement operations, and automated information systems and telecommunications.

Economic Policies and Programs.—The function of the Economic Policies and Programs Activity is to advise the Secretary and Deputy Secretary in economic areas such as: (1) monitors macro-and micro-economic developments and assists in determining appropriate economic policies; collects and analyzes data pertaining to international portfolio investment and foreign exchange positions; develops an overall appraisal of the current state of, and outlook for the economy; provides written and oral briefing materials for the Secretary, other officials, and outsiders; participates in interagency groups working on economic matters to develop and maintain a coordinated and consistent government-wide economic program; and (2) the formulation and execution of U.S. international economic and financial policies regarding a wide range of international development and analysis functions involving: trade and investment, energy policy, monetary affairs, development financing, and general economic research into international financial issues. The Office of International Affairs works closely with other Federal agencies and international financial institutions, and coordinates international financial and macro-economic policy with the National Economic Council (Annual Economic Summit), the National Security Council, the Council of Economic Advisors, the Office of Management and Budget (foreign country risk review), the United States Trade Representative (financial services, investment, etc.), and all components of the Executive Office of the President. Under Presidential Executive Order, the Office of International Affairs participates with the Department of State in the collection and analysis of economic information on foreign countries. In the areas of international monetary and for-

eign exchange policy, the Office of International Affairs shares responsibility with the Federal Reserve (principally, the Board of Governors, but also the Federal Reserve Bank of New York) in working closely with the International Monetary Fund. In the area of international development, the Office of International Affairs formulates resource needs, notably U.S. contributions, policies and programs for various Multilateral Development Banks. With the Export-Import Bank, the Office of International Affairs has responsibility for export credit finance. This activity includes the Office of the Assistant Secretary (Economic Policy), the immediate offices of the Under Secretary (International Affairs), the Assistant Secretary (International Affairs) and the Office of International Affairs.

Financial Policies and Programs.—The function of the Financial Policies and Programs Activity is to advise the Secretary and Deputy Secretary in areas of domestic finance, banking, fiscal policy and operations, and other related financial matters, including development of policies and guidance in the areas of financial institutions, Federal debt finance, financial regulation, and capital markets. Specifically, this activity ensures that the management of the Federal Government's cash minimizes risk and strikes a balance between cash needs and short-term investments. This activity provides decision makers and stakeholders with: (1) timely, concise and thorough policies, guidance and analysis in the areas of: financial institutions, financial regulation, the equitable and efficient delivery of financial services, the availability of credit, financial crimes, Federal debt finance, capital markets, the privatization of government assets, and any other issues related to domestic finance and financial services; and (2) recommendations regarding the development and implementation of tax policies and programs; official estimates of all Government receipts for the President's Budget, fiscal policy decisions, and cash management decisions; policy criteria reflected in regulations and rulings to implement the Internal Revenue Code; negotiation of tax treaties for the United States; and provides economic and legal policy analysis for domestic and international tax policy decisions. This activity includes the immediate office of the Under Secretary (Domestic Finance), the Assistant Secretary (Financial Institutions), the Assistant Secretary (Financial Markets), the Fiscal Assistant Secretary, and the Deputy Assistant Secretary for Community Development Policy and the Assistant Secretary (Tax Policy).

Enforcement Policies and Programs.—The function of the Enforcement Policies and Programs activity is to provide policy development, guidance and coordination to Treasury's law enforcement entities to combat money laundering and other financial crime, interdict illegal drugs, reduce violent crime, protect our nation's leaders, and provide quality training for enforcement personnel. Responsibilities include: (1) providing Departmental oversight and supervision of U.S. Customs Service, U.S. Secret Service, Federal Law Enforcement Training Center, Financial Crimes Enforcement Network, Bureau of Alcohol, Tobacco, and Firearms, and Executive Office of Asset Forfeiture; and (2) negotiating international agreements on behalf of the Secretary to engage in joint law enforcement operations for the exchange of financial information and records. The Office of Enforcement administers economic sanctions against selective foreign countries, international narcotics traffickers and international terrorists in furtherance of U.S. foreign policy and national security goals. This activity includes the immediate offices of the Under Secretary for Enforcement and

the Assistant Secretary (Enforcement), including the Office of Foreign Assets Control.

Treasury-wide Management Policies and Programs.—The Treasury-wide Management Policies and Programs Activity provides policy advice on matters involving the internal management of the Department and its bureaus; coinage and currency production and security; the sale and retention of savings bonds; financial management, information systems, security, property management, human resources, procurement and contracting, strategic planning; and customer service. This activity is responsible for implementing the functions of the Chief Financial Officer (CFO), the Government Performance Results Act (GPRRA), and the Information Technology Management Reform Act which includes efficient and effective use of the Treasury's resources. This activity includes the Office of the Assistant Secretary (Management) and Chief Financial Officer and the Treasurer of the United States.

Treasury-wide Financial Statement Audit.—This activity has responsibility for contracting and funding all financial statement audit work that will be done by the Office of the Inspector General (OIG). The OIG would streamline the process, provide costs savings and accountability for getting these audits done, and ensure timeliness and consistency of financial statement audits in the Department. The audits would include those of the Customs Service, the Financial Management Service, the Bureau of Public Debt, the Federal Financing Board, the Bureau of Alcohol, Tobacco, and Firearms, the Community Development Financial Institutions, and the Departmental Offices.

TREASURY FRANCHISE FUND

The Committee recognizes the success of Treasury's efforts to improve the quality and lower the cost of financial and administrative services. Accordingly, the need to have continuity in service delivery to current customers and to continuously improve operations and achieve further efficiencies in administrative support functions requires a permanent footing. Therefore, the Committee has included a new provision to permanently extend the Treasury Franchise Fund.

COUNTERFEIT CURRENCY TECHNOLOGY

The Committee notes that the war on terrorism and the war on drugs have demonstrated the importance of tracking the flows of currency. The Department of the Treasury has several offices that track, target, and block the financial transactions and assets of terrorists, narcotics traffickers, foreign countries, and others that pose a threat to our national security and economy, as well as offices that work with domestic and foreign financial markets. The Department of the Treasury, working in conjunction with the Department of State, the Department of Justice, and other agencies has been able to identify terrorist groups that may be funding possible actions against the United States at home and abroad.

The Committee understands that funds have been authorized to investigate the use of new technologies to detect and track counterfeit currency which might be used against U.S. interests at home and abroad. The Committee is aware of various technologies under development which could aid in this investigative effort. In order to best serve these critical missions, the Committee directs the Department of the Treasury to test the utility of using new technologies to help identify the size of the universe of counterfeit currency and better understand the circulation patterns of currency and report back to the Committee within 120 days of enactment of this Act on the results of its investigation of these technologies and recommendations regarding their potential use

in the war on terrorism and drugs. Should the results of these tests indicate that there are benefits to the Government from these technologies, the Committee would consider a reprogramming request which might be submitted by the Department.

CHICAGO POLICE DEPARTMENT CLEAR PROGRAM

The Committee is aware of an innovative program, created by the Chicago Police Department, designed to partner with the Department of the Treasury to implement improved information sharing between criminal justice agencies at the local, state, and Federal level—Citizen/Law Enforcement Analysis and Reporting (CLEAR). In addition to violent crimes, the CLEAR program will address financial and drug crimes, as well as other law enforcement functions under the jurisdiction of the Department and its related agencies. The Committee directs the Department to work with the Chicago Police Department to further develop and implement this important program and has included \$150,000, from within existing funds, for this project.

OFFICE OF FOREIGN ASSETS CONTROL

The Committee provides that the Office of Foreign Assets Control (OFAC) be funded at no less than \$21,206,000. The Committee is encouraged by the level of funding detail offered by Treasury in its budget justifications for its Enforcement programs, and regards this as an assurance that OFAC's direct costs will be properly covered as shown, and that administrative overhead resources are fairly allocated. The Committee requests that similar explanatory tables be provided in future justifications.

The Committee understands that license applications submitted to agencies at other departments, such as the Department of Commerce, are resolved in a reasonable period of time. The Committee believes that all license applications pertaining to travel-related transactions submitted to OFAC should be resolved expeditiously, but in no case no later than 90 calendar days after receipt of the completed license application.

The Committee has included a new general provision directing OFAC, whenever it decides to deny a license application pertaining to travel-related transactions, to notify the applicant of the denial in writing. The notification shall include:

- (1) The statutory and regulatory basis for the denial;
- (2) To the extent consistent with the national security of the United States, the specific considerations that led to the decision to deny the license application;
- (3) The name, phone number and e-mail address of the OFAC representative in a position to discuss the issues with the applicant.

DISCRIMINATORY BEER TAX

In June of 2002, the Government of Puerto Rico enacted huge increases in the excise tax on beer but exempted one local beer producer. Those increases make the tax on beer imported onto the Island from the mainland or abroad one of the highest alcohol excise taxes in the world. This excise tax has placed undue and unfair burdens on the Island's consumers and on U.S. beer producers. It is costing jobs on the mainland in factories and in supplier industries, including U.S. agriculture.

In order to remove this unfair barrier to trade and encourage a more equitable tax structure in Puerto Rico, the Committee has included a new Treasury general provision, Section 128, to freeze the return to Puerto Rico of the entire \$300,000,000 rum rebate under section 7652 of the Internal Revenue Code of 1986. Once the Secretary of the Treasury determines that the discriminatory

tax system has been abolished, the rum rebate will be retroactively reinstated.

DEPARTMENT-WIDE SYSTEMS AND CAPITAL INVESTMENTS PROGRAM

Appropriations, 2002	\$68,828,000
Budget estimate, 2003	68,828,000
Committee recommendation	68,828,000

The Committee has provided a total of \$68,828,000. The 1997 Treasury and General Government Appropriations Act established this account which is authorized to be used by or on behalf of Treasury bureaus, at the Secretary's discretion, to modernize business processes and increase efficiency through technology investments, as well as other activities that involve more than one Treasury bureau or Treasury's interface with other governmental agencies.

The Committee has been made aware of the inadequate funding requested by the Department of the Treasury for the projects under this program for the past couple of years. The Committee is also aware of the importance of the timelines for completion of these projects. The Committee urges the Department to provide the necessary funding in fiscal year 2004 to avoid delays and potential cost overruns for these projects.

OFFICE OF THE INSPECTOR GENERAL SALARIES AND EXPENSES

Appropriations, 2002	\$35,424,000
Budget estimate, 2003	35,428,000
Committee recommendation	35,424,000

The Committee recommends an appropriation of \$35,424,000 for salaries and expenses of the Office of the Inspector General (OIG). The Committee supports the creation of an official representative account and provides \$2,500 out of existing funds for that purpose.

The OIG conducts and supervises audits, evaluations, and investigations designed to: (1) promote economy, efficiency, and effectiveness and prevent fraud, waste and abuse in Departmental programs and operations; and (2) keep the Secretary and the Congress fully and currently informed of problems and deficiencies in the administration of Departmental programs and operations. The audit function provides program audit, contract audit and financial statement audit services. Contract audits provide professional advice to agency contracting officials on accounting and financial matters relative to negotiation, award, administration, repricing, and settlement of contracts. Program audits review and audit all facets of agency operations. Financial statement audits assess whether financial statements fairly present the agency's financial condition and results of operations, the adequacy of accounting controls, and compliance with laws and regulations. These audits contribute significantly to improved financial management by helping Treasury managers identify improvements needed in their accounting and internal control systems. The evaluations function reviews program performance and issues critical to the mission of the Department, including assessing the Department's implementation of the Government Performance and Results Act (GPRA). The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations. This appropriation also provides for the oversight of internal investigations made by the Office of Internal Affairs and Inspection in the Bureau of Alcohol, Tobacco and Firearms, the Customs Service, and the Secret Service.

The Inspectors General Auditor Training Institute provides the necessary facilities,

equipment, and support services for conducting auditor training for the Federal Government Inspector General community. The Office of the Inspector General is the parent organization for this entity, although program and financing data is reported under the Treasury Franchise fund (effective in 1999).

TREASURY INSPECTOR GENERAL FOR TAX ADMINISTRATION

Appropriations, 2002	\$125,778,000
Budget estimate, 2003	123,962,000
Committee recommendation	123,962,000

The Committee recommends an appropriation of \$123,962,000.

The Treasury Inspector General for Tax Administration (TIGTA) conducts audits, investigations, and evaluations to assess the operations and programs of the Internal Revenue Service (IRS) and Related Entities, the IRS Oversight Board and the Office of Chief Counsel to (1) promote the economic, efficient and effective administration of the nation's tax laws and to detect and deter fraud and abuse in IRS programs and operations; and (2) recommend actions to resolve fraud and other serious problems, abuses, and deficiencies in these programs and operations, and keep the Secretary and the Congress fully and currently informed of these issues and the progress made in resolving them. TIGTA reviews existing and proposed legislation and regulations relating to the programs and operations of the IRS and Related Entities and makes recommendations concerning the impact of such legislation and regulations on the economy and efficiency in the administration of programs and operations of the IRS and Related Entities. The audit function provides program audit, contract audit and financial statement audit services. Program audits review and audit all facets of IRS and Related Entities. Contract audits provide professional advice to IRS contracting officials on accounting and financial matters relative to negotiation, award, administration, repricing, and settlement of contracts. The evaluations function reviews program performance and issues critical to the mission of the IRS. The investigative function provides for the detection and investigation of improper and illegal activities involving IRS programs and operations and protects the IRS and Related Entities against external attempts to corrupt or threaten their employees.

The Treasury Inspector General for Tax Administration was established by the IRS Restructuring and Reform Act of 1998 (Public Law 105-206). Funding was first appropriated for this account in the fiscal year 2000 Treasury and General Government Appropriations Act (Public Law 106-58).

AIR TRANSPORTATION STABILIZATION PROGRAM

Appropriations, 2002	
Budget estimate, 2003	\$6,041,000
Committee recommendation	6,041,000

The Air Transportation Stabilization Board was authorized in the Air Transportation Safety and Stabilization Act to issue \$10 billion of Federal Credit instruments to air carriers. The purpose is "to compensate air carriers for losses incurred by the air carriers as a result of the terrorist attacks on the United States that occurred on September 11, 2001," providing among other criteria, that "such agreement is a necessary part of maintaining a safe, efficient, and viable commercial aviation system in the United States."

TREASURY BUILDING AND ANNEX REPAIR AND RESTORATION

Appropriations, 2002	\$28,932,000
----------------------------	--------------

Budget estimate, 2003	32,932,000
Committee recommendation	30,932,000

The Committee recommends an appropriation of \$30,932,000 for the repair and restoration of the Treasury Building and Annex. This appropriation funds repairs and selected improvements to maintain the Main Treasury and Annex buildings. This recommendation is \$2,000,000 above the fiscal year 2002 level.

EXPANDED ACCESS TO FINANCIAL SERVICES

Appropriations, 2002	\$2,000,000
Budget estimate, 2003	2,000,000
Committee recommendation	2,000,000

The Committee has provided \$2,000,000 for Expanded Access to Financial Services. The account continues funding to develop and implement a program to expand access to financial services to low-and moderate-income individuals who do not currently utilize bank accounts or other financial service opportunities. The Department of Treasury will develop and assist in funding private sector provision of low-cost electronic accounts and access to ATMs as a way of encouraging greater efficiency and access to the financial service system; conduct research on the financial services needs of low-and moderate-income persons; and assist in funding financial education for low- and moderate-income individuals.

The Committee recommends that funds be obligated to continue the two projects initiated in fiscal year 2001. The Committee also urges the Department to work with, and consider an application for a project under this account from, the Passaic County (New Jersey) Legal Aid Society.

COUNTERTERRORISM FUND

Appropriations, 2002	\$40,000,000
Budget estimate, 2003	40,000,000
Committee recommendation	20,000,000

The Committee has provided \$20,000,000 for the Counterterrorism Fund. These funds are provided for responding to unforeseen emergencies not budgeted for in the regular process. These funds are to be made available upon the advance approval of the Committees on Appropriations.

The Counterterrorism Fund is designed to cover unanticipated costs associated with: (1) providing support to counter, investigate, or prosecute domestic or international terrorism, including payment of rewards in connection with these activities; and (2) re-establishing the operational capability of an office, facility or other property damaged or destroyed as a result of any domestic or international terrorist incident. Treasury bureaus have important counterterrorism responsibilities including: protecting the President; designing and implementing security at National Special Security Events; investigating arson, explosives and firearms incidents; conducting financial investigations relating to terrorism; preventing weapons of mass destruction from entering our country; and implementing sanctions against terrorist organizations. Funds would be reimbursed to Treasury bureaus of departmental offices to compensate for costs incurred in areas such as travel, transportation, rentals and communications, print and graphics, other services, supplies, equipment, and unvouchered funds.

FINANCIAL CRIMES ENFORCEMENT NETWORK

Appropriations, 2002	\$47,537,000
Budget estimate, 2003	50,517,000
Committee recommendation	50,517,000

The Committee recommends an appropriation of \$50,517,000 for the Financial Crimes Enforcement Network (FinCEN).

FinCEN, created in 1990 and elevated to bureau status in 2001, supports law enforcement investigations to prevent and detect money laundering and other financial crimes. FinCEN's network links law enforcement, financial, and regulatory communities into a single information-sharing network. Using Bank Secrecy Act (BSA) information reported by banks and other financial institutions, FinCEN serves as the nation's central clearinghouse for broad-based financial intelligence and information sharing on money laundering. This information helps illuminate the financial trail for investigators to follow as they track criminals and their assets.

Investigative Analysis, Regulatory, and International Activities.—Through investigative analysis efforts, FinCEN provides support for the investigation and prosecution of law enforcement cases at the Federal, State, local and international levels, using financial data collected under the BSA, as well as other commercial and law enforcement information. FinCEN serves as a catalyst for research, analysis, and dissemination of information on money laundering methods and trends through joint case analysis with law enforcement, integration of all source information and the application of state-of-the-art data processing techniques. In the regulatory area, FinCEN establishes policies to administer the BSA effectively while balancing the associated burden imposed on the regulated financial institutions. Internationally, FinCEN maintains in-depth, country-specific expertise concerning money laundering and other financial crimes around the world to assist decision makers in developing and promoting U.S. government anti-money laundering policies. FinCEN also uses this expertise to promote the development of Financial Intelligence Units (FIUs) in other countries, and to facilitate investigative exchanges with them.

Money Services Business (MSB) Regulatory Program.—This program supports new requirements to strengthen anti-money laundering controls within the money services business industry. The term 'MSB' is used to define over 200,000 entities that act as money transmitters, issuers, redeemers and sellers of money orders and travelers checks, check cashers and currency exchanges. This largely unregulated industry is required to register with the Department of the Treasury by June 30, 2002. The Department of the Treasury has also issued a final regulation that, for the first time, extends suspicious activity reporting requirements to money transmitter, travelers check, and money order segments of the industry in 2002. In order to properly implement these regulations, FinCEN has undertaken a major public outreach project that is designed to identify and educate members of the money service business industry concerning the requirements of these new regulations.

USA Patriot Act.—FinCEN is responsible for implementing 23 of the 44 provisions contained in Title III of the USA Patriot Act, which provides new authorities and opportunities to support law enforcement investigative efforts and foster interagency cooperation against domestic and international financial crime. FinCEN also has a key role in many of the working groups established by the Department of the Treasury to address the other provisions. These responsibilities include developing regulatory programs to meet many of the provisions, establishing a highly secure network for electronic filing of Bank Secrecy Act reports, strengthening cooperation between financial institutions and the law enforcement communities, and enhancing strategic analysis in areas such as alternate remittances systems.

TREASURY FORFEITURE FUND

The Treasury forfeiture fund was established on October 1, 1993, in Public Law 102-393. It is available to pay or reimburse certain costs and expenses related to seizures and forfeitures that occur pursuant to the Treasury Department's law enforcement activities. It has two accounts, one which is funded through permanent indefinite authority and the other which is funded through a direct annual appropriation. The direct appropriation represents the annual congressional limitation on the use of the proceeds from seized and forfeited assets. Forfeited cash and the proceeds of forfeited monetary instruments are deposited into the fund. Proceeds from the sale of other seized and forfeited assets are also deposited into the fund.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

SALARIES AND EXPENSES

Appropriations, 2002	\$128,680,000
Budget estimate, 2003	122,393,000
Committee recommendation	126,660,000

The Committee recommends an appropriation of \$126,660,000 for salaries and expenses of the Federal Law Enforcement Training Center (FLETC).

FLETC provides the necessary facilities, equipment, and support services for conducting recruit, advanced, specialized, and refresher training for Federal law enforcement personnel. FLETC personnel conduct the instructional programs for the basic recruit and some of the advanced training. This appropriation is for operating expenses of FLETC, for research in law enforcement training methods, and curriculum content. In addition, FLETC has a reimbursable program to accommodate the training requirements of various Federal agencies. As funds are available, law enforcement training is provided to certain State, local, and foreign law enforcement personnel on a space-available basis.

The Committee has included funding to ensure that FLETC can meet the demands of agencies for training their personnel as they continue to hire additional personnel.

The Committee has again included a general provision (section 615) to permit FLETC to acquire the temporary use of additional training facilities without seeking the advance approval otherwise required by that section.

OFF-CAMPUS TRAINING

The Committee continues to support the FLETC mission to provide basic technical assistance to State and local law enforcement agencies. Therefore, the Committee provides funding for the travel expenses of non-Federal personnel to attend course development meetings and training. In addition, the Committee continues to authorize FLETC to obtain temporary use of additional facilities by lease, contract, or other agreement for training which cannot be accommodated in existing Center facilities. In making these decisions, the Committee believes every consideration should be given to providing training in the most cost effective manner.

RURAL LAW ENFORCEMENT EDUCATION

The Committee recognizes the successful collaboration between the National Center for State and Local Training at FLETC and the Minot State University (MSU) Rural Crime and Justice Center to expand the Small Town and Rural Law Enforcement training series in the Northern Plains States and for related rural law enforcement research. The validated success of this collaboration at a regional level leads the Committee to conclude that the project should be

expanded and conducted on a nationwide basis. Empirical research findings from the Northern Plains project have indicated that evaluation of rural law enforcement training results in higher quality and more relevant training practices, significantly changing how rural law enforcement officers perform their official duties. The Committee recognizes that it is not unusual to have only one law enforcement officer in a rural area, which underscores the significance of the training and evaluation, and the need to expand the program nationwide. In addition to funding included in the base, the Committee has provided \$1,500,000 to the national center and \$1,500,000 for MSU to expand on the current program and conduct the research and evaluative component of this national initiative.

LAWF ENFORCEMENT VEHICLE PURSUIT TRAINING

The Committee recognizes the importance of evaluating the effectiveness of the vehicle pursuit training program that FLETC has conducted nationwide with law enforcement executives. To conduct this assessment, the Committee has included an additional \$500,000 to FLETC for the Minot State University Rural Crime and Justice Center to provide a comprehensive evaluation/assessment of the effectiveness of the training and to provide recommendations for curriculum revision, training delivery methods, and program policy modifications.

FEDERAL AIR MARSHAL TRAINING

The Committee commends the men and women of the Federal Law Enforcement Training Center for their outstanding service to the nation, the law enforcement community and the traveling public. Immediately following the tragic terrorist attacks of September 11, 2001, FLETC and the Federal Aviation Administration (FAA) collaborated to meet the challenge of training large numbers of Federal Air Marshals to protect the United States aviation industry on an expedited basis.

Only weeks after the attacks, FLETC in Artesia, New Mexico, and Glynco, Georgia, began training large numbers of newly hired law enforcement officers for deployment as air marshals. FLETC augmented its excellent facilities in Artesia for this new training, which included operational commercial aircraft fuselages to provide realistic training environments. Through FLETC, the United States rapidly marshaled critical resources from across government to meet the urgent need for airline security. The Committee applauds this exceptional effort by FLETC and the Federal Air Marshals.

ALERRT

The Committee recognizes the successful work done by the Advanced Law Enforcement Rapid Response Training Center (ALERRT) at Southwest Texas State University to expand small town and rural law enforcement training in the Southern Plains States and for related rural law enforcement research. The validated success of the collaboration with local agencies for law enforcement training has provided results in higher quality and more relevant training practices, significantly changing how rural law enforcement officers perform their official duties. The Committee recognizes that it is not unusual to have only one law enforcement officer in a rural area, which underscores the significance of the training and evaluation. The Committee encourages the Federal Law Enforcement Training Center to work with Southwest Texas State University (SWT) and provides \$750,000 for this relationship to be developed and to expand the SWT ALERRT program.

TARLETON STATE UNIVERSITY

The Committee recognizes the successful work done by Tarleton State University for

Small Town and Rural Law Enforcement training in the Southern Plains. The validated success of this program's collaboration with local agencies for law enforcement training have provided results in higher quality and more relevant training practices, significantly changing how rural law enforcement officers perform their official duties. The Committee provides \$100,000 for FLETC to work with Tarleton State University to continue to expand and develop these initiatives.

ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

Appropriations, 2002	\$41,934,000
Budget estimate, 2003	23,329,000
Committee recommendation	32,029,000

The Committee recommends an appropriation of \$32,029,000 for acquisition, construction, improvements, equipment, furnishings and related costs for expansion and maintenance of facilities of the Federal Law Enforcement Training Center (FLETC).

The Committee was disappointed that the fiscal year 2003 budget request did not include additional funding for needed construction at the FLETC facilities in Glynco, Georgia and Artesia, New Mexico. While the Committee understands that the Master Plan is undergoing review, Federal law enforcement training needs have significantly increased since September 11, 2001. With new requirements placed upon FLETC to train Federal air marshals and additional law enforcement personnel necessary for homeland security, the budget falls well short of meeting immediate needs to support these efforts. The Committee therefore believes that it is incumbent upon the Department of the Treasury and the Federal Law Enforcement Training Center to move expeditiously to determine the long-range needs of both campus locations and to take all necessary steps to find the funding to begin addressing these needs. To that end, the Committee has provided \$4,200,000 for a new classroom and \$4,500,000 for an indoor firearms training range at the Artesia, New Mexico campus.

INTERAGENCY LAW ENFORCEMENT

Appropriations, 2002	\$107,576,000
Budget estimate, 2003	107,576,000
Committee recommendation	107,576,000

The Committee recommends an appropriation of \$107,576,000 for interagency law enforcement.

In a 1982 counterdrug effort, the Department of Justice (DOJ) developed the Interagency Crime and Drug Enforcement Task Force (ICDE) program to bring together and integrate the efforts of all levels of law enforcement in the fight against drugs. The ICDE program designated nine domestic regions that deploy the investigative expertise from 10 Federal agencies, and State and local law enforcement agencies to dismantle and disrupt major drug trafficking and money laundering organizations and place offenders in jail. Treasury agencies provide specific value-added investigative expertise to these major cases. The U.S. Customs Service provides specific expertise in international smuggling and interdiction; the Bureau of Alcohol, Tobacco and Firearms (ATF) provides expertise on firearms and explosives violence; and the Internal Revenue Service (Criminal Investigative Division) provides expertise on money laundering and tax evasion. Since 1998, the Treasury portion of the ICDE program has been administered by Treasury's Departmental Offices. Treasury's participating bureaus, ATF, Customs, and IRS, are reimbursed from this appropriation.

Treasury has assigned two special agents to oversee ICDE policy and budget for the three

Treasury bureaus. Funding for Treasury components is primarily utilized for full-time equivalent employees; however, a portion of funding is used for operating expenses incurred during the investigative phase of the case.

FINANCIAL MANAGEMENT SERVICE SALARIES AND EXPENSES

Appropriations, 2002	\$212,850,000
Budget estimate, 2003	220,712,000
Committee recommendation	220,664,000

The Committee recommends an appropriation of \$220,664,000 for salaries and expenses for the Financial Management Service (FMS) in fiscal year 2003.

Payments.—FMS implements payment policy and procedures for the Federal Government, issues and distributes payments, promotes the use of electronics in the payment process, and assists agencies in converting payments from paper checks to electronic funds transfer (EFT). The control and financial integrity of the Federal payments and collections process includes reconciliation, accounting, and claims activities. The claims activity settles claims against the United States resulting from Government checks which have been forged, lost, stolen, or destroyed, and collects monies from those parties liable for fraudulent or otherwise improper negotiation of Government checks.

Collections.—FMS implements collections policy, regulations, standards, and procedures for the Federal Government, facilitates collections, promotes the use of electronics in the collections process, and assists agencies in converting collections from paper to electronic media.

Debt Collection.—FMS provides debt collection operational services to client agencies which includes collection of delinquent accounts, offset of Federal payments against debts owed the Government, post-judgment enforcement, consolidation of information reported to credit bureaus, reporting for discharged debts or vendor payments, and disposition of foreclosed property.

Government-wide Accounting and Reporting.—FMS also provides financial accounting, reporting, and financing services to the Federal Government and the Government's agents who participate in the payments and collections process by generating a series of daily, monthly, quarterly and annual Government-wide reports. FMS also works directly with agencies to help reconcile reporting differences.

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS SALARIES AND EXPENSES

Appropriations, 2002	\$854,747,000
Budget estimate, 2003	883,775,000
Committee recommendation	888,430,000

The Committee recommends an appropriation of \$888,430,000 for salaries and expenses of the Bureau of Alcohol, Tobacco and Firearms (ATF), an increase of \$4,655,000 above the President's request, which includes \$5,000,000 for an explosives enforcement initiative.

The ATF has three major strategic goals: (1) effectively contribute to a safer America by reducing the future number and cost of violent crimes; (2) maintain a sound revenue management and regulatory system that continues reducing payer burden, improving service, collecting revenue due, and preventing illegal diversion; and (3) protect the public and prevent consumer deception in ATF's regulated commodities. To achieve these goals, ATF enforces the Federal laws and regulations relating to alcohol, tobacco, firearms, explosives, and arson by working directly and in cooperation with others.

FEDERAL ALCOHOL ADMINISTRATION ACT

The Committee recognizes alcoholic beverages as among the most socially sensitive commodities marketed in the United States. In this connection, marketing, labeling, and advertising of alcoholic beverages must be accomplished in an environment which fosters fair and healthy competition while protecting the interests of the American consumer. The Committee expects that there be no diminution of regulatory and oversight functions in fiscal year 2003.

ARMED CAREER CRIMINAL APPREHENSION PROGRAM

The Armed Career Criminal Act, signed into law in 1984 and expanded by the Anti-Drug Abuse Act of 1986, provides mandatory sentences for certain violent repeat offenders who carry firearms. The Bureau, given its jurisdiction over firearms laws, has a unique opportunity to effect the apprehension of violent offenders. The success to date of the Bureau's Repeat Offender Program has surpassed initial expectations regarding apprehension, prosecution, and conviction of career criminals. The Committee notes that 74 percent of the defendants apprehended under this program have had direct involvement in illegal narcotics trafficking.

STAFFING LEVELS IN SMALLER STATES AND RURAL STATES

Over the past several years the number of ATF agents in the smaller States and rural areas have steadily declined, in favor of placing agent resources in larger States with large metropolitan centers. These staffing trends have not always reflected the needs of these areas. The Committee credits the Department for recognizing the need for placing special agents in under-represented rural areas and small and medium-sized States. The Committee urges that ATF follow through on pledges to maintain and increase staffing in under-represented rural, small, and medium-sized States.

GREAT PROGRAM

The Committee provides \$13,000,000 for grants to local law enforcement organizations for the Gang Resistance Education and Training (GREAT) Program. The GREAT program continues to be enthusiastically endorsed by communities in Colorado, North Dakota, and Alaska. The Committee directs ATF to consider providing GREAT funding to the qualified law enforcement and prevention organizations in these areas.

SAFETY AND SECURITY STANDARDS

The Committee is concerned about the apparent lack of safety and security standards for federally licensed firearms dealers. Guns stolen from licensed gun dealers pose an increasingly significant public safety threat. It is clear that the industry and ATF need to work together to address these problems. Therefore, the Committee directs ATF to make identifying and addressing security recommendations for Federal firearms licensees a priority at the next firearms industry discussion group that convenes.

ACTIVITY ON INDIAN RESERVATIONS

The Committee appreciates ATF's efforts to address the growing problem of gang-related activities on and near Indian reservations. In conjunction with programs and activities provided by the Boys and Girls Clubs of America, ATF has made inroads in Native communities to reduce gang-related activities by training, seminars, and after-school activities aimed at reducing the number of Native children that are likely participants in gang behavior. The Committee recommends that ATF continue to coordinate the efforts of the Bureau of Indian Affairs (BIA), the Boys and Girls Clubs of America, and private organizations such as the Na-

tional Native American Law Enforcement Association to expand these activities and develop an inter-agency and inter-disciplinary approach to gang-related activities.

YOUTH CRIME GUN INTERDICTION INITIATIVE

The Committee commends ATF's efforts to reduce firearms violence by investigating illegal trafficking to the youth of this country. The Youth Crime Gun Interdiction Initiative (YCGII) began as a pilot program in 17 cities in 1996 and is currently operating in 50 sites.

The partnership between ATF and local law enforcement agencies in these communities is invaluable to the mutual effort to reduce gun-related crime. The tracing information provided by ATF not only allows local jurisdictions to target scarce resources to investigations likely to achieve results but also gives ATF the raw data to be able to investigate and prosecute the illegal source of these crime guns. The Committee continues to believe that there are significant disruptions in these illegal firearms markets directly due to investigative leads arising from this regional initiative.

EXPLOSIVES ENFORCEMENT GROUPS

The Committee is concerned about the illegal use of explosives and its relation to our homeland security. The Committee is dedicated to protecting and supporting our first responders, the American public, and American institutions from the threat of terrorist violence and the illegal and criminal use of explosives. There are approximately 6 billion pounds of explosives produced in the United States every year. Because of the extremely high and unacceptable risk to public safety from criminal or terrorist theft and misuse of these explosives, the Committee believes that more comprehensive enforcement and regulatory efforts are essential to public safety. Therefore, the Committee has included an additional \$5,000,000 for an explosives enforcement initiative. This funding shall be used to increase the number of agents and inspectors dedicated to enforcing existing Federal explosives laws and regulations.

The additional personnel would comprise explosives groups to be located strategically nationwide. These groups shall conduct undercover and surveillance operations into the misuse and trafficking in explosive materials; investigating all bombings of Federal interest throughout the United States; and thoroughly investigating all explosives-related thefts and losses. The Committee directs ATF to provide a detailed spending plan to the Committee on Appropriations prior to the obligation of any funds. The Committee encourages ATF to work with industry in developing this initiative.

EXPLOSIVE DETECTION TRAINING

The Committee appreciates efforts by ATF to make explosive detection training available on request to school districts nationwide. The Committee understands that ATF, in conjunction with the U.S. Department of Education, is developing a CD-ROM training program which will provide a standardized bomb threat management and response template for use by school administrators to develop a customized response program for individual schools. The Committee is pleased by this expanded assistance and encourages continued assistance to schools by ATF field office personnel as they establish and implement these necessary management and response plans.

MANAGEMENT AND TECHNOLOGICAL ENHANCEMENTS

The Committee expects that \$2,500,000 will be used to continue management and technological enhancement at the AFT National Licensing Center, the Imports Branch, and the National Firearms Act Branch (NFA).

The Committee notes that ATF has taken some major steps in the right direction:

- substantial progress on information management improvements for data retrieval and reporting for customers of the Firearms, Explosives and Arson Services (FEA) Division;
- increased meeting and other outreach efforts with industry to coordinate policy and operational concerns;
- a firearms importers conference and seminar to be held in the summer of 2002; and
- additional contract assistance retained and directed at FEA's service improvement efforts.

However, the Committee believes that there are critical areas of the plan which have not yet demonstrated improvement over the last 2 years.

The lack of well trained personnel still continues at certain branches. Some additional assistance is particularly needed with regard to specialized staff at the Division level to troubleshoot problems, and manage these significant improvement efforts. Operations personnel cannot be expected to perform these roles and still achieve service improvements, particularly where the operations workload has increased significantly in the last fiscal year due to the processing of import applications for nonimmigrant aliens (NIA).

Performance standards and critical elements for services positions to meet enhanced service goals in the FEA Division have not been finalized, but are still under review. The Committee has received no information that the Division as a whole has established milestones for service improvements, such as specific targets for reductions in current the processing times. The Committee notes that such milestones will have to take into account the addition of the NIA applicant workload.

Communications improvements must continue to be emphasized. In recent years, and more dramatically since new homeland security programs have been initiated, importers and NFA registrants often face inconsistent and confusing policy, law, and technical guidance that frequently changes regarding the importation of firearms, parts, and ammunition. Developments in these areas must be communicated clearly, consistently, and often to the importing and NFA communities. The Committee believes that in addition to use of the FFL newsletters and the ATF web site, a comprehensive and frequently updated guidance handbook designed for both the importing and NFA communities should be published and distributed to these communities as the Committee has recommended for the last 2 years.

ATF efforts cannot be fully achieved without serious coordination efforts, both in technology and policy, with the import and export processes at the Department of State and the U.S. Customs Service. The Committee recommends that ATF seek a working group with these agencies to consult with importers and others on solutions that will enhance the fairness and efficiency of administering or enforcing firearms-related laws by these agencies.

U.S. CUSTOMS SERVICE

SALARIES AND EXPENSES

Appropriations, 2002	\$2,471,960,000
Budget estimate, 2003	2,391,952,000
Committee recommendation	2,501,488,000

The Committee recommends an appropriation of \$2,501,488,000 for salaries and expenses of the U.S. Customs Service.

The Committee has included an additional \$4,000,000 for forced child labor, an additional \$4,000,000 for expanded intellectual property

rights initiatives, \$500,000 for the Vermont World Trade Center, \$2,300,000 for canine curriculum on chemical and biological threats, \$4,000,000 for port technology research and development, \$10,000,000 for the Container Security Initiative, \$2,000,000 for a bulk currency initiative, and \$750,000 for the Center for Agricultural Policy and Trade Studies.

The United States Customs Service, in partnership with other Federal agencies, is one of the Nation's primary means of border enforcement. Its mission is to ensure that all goods and persons entering and exiting the United States do so in compliance with all United States laws and regulations.

Commercial.—Commercial activities are all process/business area activities (Trade Compliance, Outbound, and Passenger Processing) which occur prior to a violation being confirmed or acceptance of a referral for investigation. This includes intelligence gathering, targeting, analysis, and examination activities.

Drug and Other Enforcement.—Drug and Other Enforcement activities are process activities which occur after confirmation of a violation or acceptance of a referral for investigation. Also included are enforcement strategies to address enforcement issues which impact more than one process, intelligence activities and investigations of drug and money laundering violations, intelligence activities and investigations related to alleged/suspected violations which are independent of process activities, the air and marine interdiction programs, and radio communications management.

NORTHERN BORDER

The Committee commends the actions of the United States Customs Service insofar as the Customs Service has worked to strengthen America's border with Canada. The Committee also recognizes that the process of strengthening the Northern Border is not complete and that further adjustments in personnel assignments and resource allocations will be necessary. Customs stands at the front line in securing "the longest open border in the world" from potential acts of terrorism and other illegal activity. The Committee is also aware of the vital role Customs performs in supporting America's strong trade relationship with Canada, facilitating over \$350,000,000,000 in trade annually.

The Committee supports full implementation of the 30-point "Smart Border Accord," signed by the United States and Canada in December 2001. The Committee urges Customs to fully implement ongoing initiatives in furtherance of securing the flow of people and goods, hardening our infrastructure, and in sharing mutual enforcement objectives with Canada. Implementation of programs such as pre-clearance of U.S.-bound traffic, "reverse inspections," hardening of remote ports, and expanded information sharing promises increased security and important trade benefits on the Northern Border.

The Committee commends Customs for stationing U.S. Customs officers in Canadian ports to work side by side with Canadian counterparts to target high-risk containers bound for the United States. Additionally, the Committee encourages Customs to expand use of "smart" processing and inspection technologies such as the NEXUS program. This joint United States-Canadian pilot is a dedicated commuter lane system which allows Customs and the Immigration and Naturalization Service to rapidly identify and clear pre-registered frequent travelers. The Committee urges Customs to implement an expansion of the program expeditiously as an integral part of a layered security framework which both secures our mutual border and facilitates this unique trade relationship.

SOUTHWEST BORDER SECURITY

The Committee commends the actions of the United States Customs Service in its efforts to combat threats entering America. The Committee also recognizes that the process of strengthening the Southwest Border is crucial to America's safety and that further adjustments in personnel assignments and resource allocations will be necessary. Customs stands at the front line in securing the United States-Mexican border from potential acts of terrorism and other illegal activity. The Committee is also aware of the vital role Customs performs in supporting America's strong trade relationship with Mexico, facilitating over \$232,000,000,000 in trade annually.

The Committee urges Customs to fully implement the United States-Mexico Border Partnership, which is a 22-point program with greater cooperation and technological enhancements at the border. Implementation of programs such as pre-clearance of U.S.-bound traffic, "reverse inspections," hardening of remote ports, and expanded information sharing promises increased security and important trade benefits to both the United States and Mexico.

The Committee commends Customs for its efforts to prescreen in-bound trade traffic through early cargo manifests but is concerned that more inspectors, check points, and the use of sophisticated technologies are needed to lower the risk of potential terrorism. Additionally, the Committee encourages Customs to expand use of "smart" processing and authorization and access technologies such as smart cards, currently used in the Department of Defense and the Department of the Treasury. Smart cards are identification cards embedded with a computer chip containing biometric data used to rapidly identify and clear preregistered and frequent travelers. The Committee urges Customs to expeditiously implement an expansion of a Southwest Border-wide security program as an integral part of a layered security framework which both secures our mutual border and facilitates this unique trade relationship with Mexico.

CONTAINER SECURITY INITIATIVE

The Customs Service announced the creation of the Container Security Initiative (CSI) on January 17, 2002. The CSI is a critical effort to address the need to protect U.S. seaports. This initiative would allow the targeting and screening of potentially dangerous cargo prior to its arrival at U.S. ports. The Committee notes that three major Canadian ports as well as the ports of Rotterdam, Singapore, Antwerp, and Le Havre have all become participants in this initiative. The Committee provides \$10,000,000 to continue this effort. The Committee also urges the Customs Service to continue to evaluate best practices when investigating options for container security as stated in Senate Report 107-156.

REMOTE ADMINISTRATION TECHNOLOGY

The Committee supports ongoing efforts to enhance services at low-volume ports of entry through the use of remote administration technology. The Committee believes the additional security presence and the after-hours travel capabilities will benefit those who live near the affected border crossings. However, to ensure that commercial traffic through these ports is not negatively affected, these enhancements must not result in loss of personnel or reduction of staffed hours at these ports.

STAFFING AND SERVICE LEVELS AT CUSTOMS PORTS OF ENTRY

The Committee continues to believe that the services provided through the Charleston, WV, Customs office are very important

to the State of West Virginia and the Nation as a whole. For this reason, the Committee expects the Service to maintain the level of services provided in fiscal year 1996 through fiscal year 2003 at this office.

The Committee continues to believe that the policy of providing part-time and temporary inspectors at the Honolulu International Airport is an effective way to handle the large and increasing volume of passengers arriving and departing this very busy airport in Hawaii. The Committee has again included \$750,000 for part-time and temporary positions in the Honolulu Customs District. This action is intended to enhance and not supplant current staffing levels. Amounts included in this account are sufficient to maintain staffing levels at this airport through fiscal year 2003 at the fiscal year 1997 level.

The Charleston, South Carolina Port (Port) is the fourth largest cargo port in the United States, and the second largest on the East Coast. However, the Port continues to be severely understaffed by Customs and lacks the necessary resources to address the volume of cargo entering the Port yearly. As the volume of cargo traffic at the Port continues to increase, Customs resources and staffing at the Port have fallen behind. The Committee is aware that Customs dedicated to the Port, on a temporary basis, an additional canine team which resulted in commensurate increases in seizures of contraband. This is concrete evidence that increased staffing at the Port will enhance the mission of the Customs Service at this location, supporting enforcement as well as facilitating the entry of legitimate trade. The Committee recommends that Customs make every effort to provide additional staffing and equipment for use at the Port. The Committee directs that in no case shall the level of Special Agents, Inspectors, Canine Enforcement Officers or other support personnel fall below the 1999 staffing levels at the Port.

The Committee is aware that the Immigration and Naturalization Service has assigned badly needed personnel to New Mexico's major ports of entry at Santa Teresa and Columbus. Similar increases in Customs Service personnel are needed, especially in Santa Teresa which lacks the staff to operate two processing booths throughout the day. The Committee therefore strongly urges the Customs Service to review the staffing situation in Santa Teresa and to approve the addition of four Customs Service personnel to that location. Further, the Committee expects to be kept informed on the status of this review.

Legitimate, as well as illicit, trade and traffic continue to grow in the State of Florida. Customs should give a high priority to funding sufficient inspection personnel at ports of entry in Florida for fiscal year 2003.

Over the years Customs personnel in smaller States as well as rural areas have declined considerably. Problems facing these areas have not necessarily declined, and the Committee urges Customs to continually review its staffing requirements and to consider the allocation to smaller States and rural areas.

The Committee recognizes the importance of full-time staffing at the Pittsburg, New Hampshire port of entry for New Hampshire and the entire New England region. As the only port of entry in New Hampshire, the Committee directs Customs to give a high priority to funding sufficient staffing at the Pittsburg station for fiscal year 2003.

The Committee appreciates the work of the Customs Service to address issues related to the national and economic security of our Nation. As such, the Committee recognizes the significant role that the Customs Service plays in providing essential inspection services to major airports such as Louisville, Kentucky, a major shipment hub

which faces acute economic pressure due to tremendous growth year after year. The Committee directs the Customs Service to identify and request resources necessary to address staffing shortfalls at the Louisville Airport, and to work closely with the Regional Airport Authority and the many businesses that rely on this location as a channel for national and international trade.

The U.S. Customs Service is the first line of homeland defense for cargo and ships that enter the Port of Virginia, which consists of the Norfolk International Terminals, the Portsmouth Marine Terminal, and the Newport News Marine Terminal. The Port of Virginia handled 1.3 million 20-foot containers and 1.6 million vessels in 2001. Located near the port are the Norfolk Naval Base, the Norfolk Naval Air Station, the Oceana Naval Air Station, Langley Air Force Base, the U.S. Army Transportation Center at Fort Eustis and Fort Story, and several other critical Department of Defense facilities. Because of the unique combination of defense facilities and large volume of international trade, the Port of Virginia is a likely target for terrorism. The Committee directs the Customs Service to conduct an in-depth review of the homeland security needs of the Port of Virginia, and report back within 60 days after the date of enactment on the resources necessary and steps they are taking to address those needs.

The Committee recognizes the importance of full-time staffing for the Providence, Rhode Island port of entry. While the volume of cargo entering Rhode Island has increased annually, staffing at the Office of Field Operations in Rhode Island has been operating below full strength. The Committee directs the Customs Service to give high priority to funding sufficient staffing in Rhode Island for fiscal year 2003.

The Committee also recognizes the increased demand for criminal investigative work by the Customs Service in Rhode Island, particularly in the areas of drug smuggling and money laundering investigations. The Committee directs the Customs Service to explore the feasibility of establishing an Office of Investigations in Providence, Rhode Island, including an adequate number of special agents and support staff.

PEACE BRIDGE JOINT BORDER FACILITY

The Committee directs the Commissioner of the U.S. Customs Service, in consultation with the Commissioner of the Immigration and Naturalization Service and the Office of Homeland Security, to submit to the Committee on Appropriations a report, within 180 days of enactment, that details how a joint United States/Canadian border inspection facility could be established on the Canadian side of the Peace Bridge in Fort Erie, Ontario. In formulating this report, the Commission shall consult with the Canadian Government, the Buffalo and Fort Erie Public Bridge Authority, and the City of Buffalo, New York. The report shall consider how such a joint facility could maximize the security and efficiency of the Peace Bridge Expansion project, which is currently being developed by the Buffalo and Fort Erie Public Bridge Authority. The report shall also include preliminary recommendations for such a joint or shared United States/Canadian facility and identify any United States or Canadian statutes or regulations that would need to be altered in order to establish such a facility.

TECHNOLOGY RESEARCH AND DEVELOPMENT

The Committee has provided \$4,000,000 to the U.S. Customs Service for the establishment of a pilot program to evaluate and prototype next-generation technology to screen and detect contraband, explosives, chemical and biological weapons, and radioactive ma-

terials at the Nation's larger ports including, but not limited to, the Port of Charleston, South Carolina. The Committee is aware of proven technology and security standards currently being employed by the Department of Defense Total Asset Visibility Network and encourages Customs to evaluate such best practices when investigating options for this project. In particular, Customs shall: (a) evaluate screening technology including, but not limited to, machinery that does not require human evaluation and analysis; and (b) work with agencies like the Departments of Energy and Defense to evaluate technology to facilitate the placement of radiation detection to maximize the ability to effectively detect Nuclear, Biological, and Chemical (NBC) threats. Customs shall report to the Committee on Appropriations no later than 120 days after the enactment of this legislation on its progress in implementing this program.

VEHICLE AND CARGO INSPECTION SYSTEM

The Committee has been responsive to the needs of the Customs Service for new technology and equipment to improve the inspection of traffic across both the Northern and Southwest Borders. One example is the use of the Vehicle and Cargo Inspection System (VACIS) technology which is a non-intrusive inspection technology used to scan vehicles, primarily trucks, and cargo containers. A new VACIS system has been developed to scan rail cars and has been installed along the Southwest Border for deployment.

An additional technology of interest to law enforcement agencies is the Weigh-In-Motion or WIM system, which can weigh commercial traffic as it passes through ports of entry. New Mexico State University's Physical Science Lab has WIM under development and has established the Santa Teresa Border Technology Deployment Center to test such technologies. The Committee strongly believes that the Customs Service should work jointly with the New Mexico State University Physical Science Lab to test the effectiveness of this technology at an operating port of entry.

VERMONT WORLD TRADE OFFICE

Vermont continues to develop a large market in international trade. Forty percent of Vermont companies, which employ approximately 70,000 individuals, are engaged in exports. In 1995, the State of Vermont created the Vermont World Trade Office to provide technical assistance to businesses and information on foreign trade opportunities. The Office has received overwhelming numbers of requests from companies interested in exploring international trade opportunities. To meet this demand, the Vermont World Trade Office hopes to open satellite offices and expand service for its clients. The Committee includes \$500,000 to continue the partnership with the Vermont World Trade Office in furtherance of promoting foreign trade.

CUSTOMS INTEGRITY AWARENESS PROGRAM (CIAP)

The Committee continues its strong support for the Customs integrity awareness program. This program, begun in fiscal year 2000, is to improve hiring methodologies to ensure that applicants are of the highest quality and integrity, and to improve the recruitment process. The funding provided allows Customs to conduct polygraph examinations for candidates applying for positions which are most susceptible to corruption. The Committee encourages the Commissioner to continue efforts to improve the integrity measures of the Customs Service.

CHILD PORNOGRAPHY

The Committee directs the Customs Service to continue providing \$100,000 of available funds to promote public awareness for the

child pornography pipeline, including ongoing efforts to make children aware of the pipeline, in fiscal year 2003. The Committee recommends that the Customs Service continue to coordinate this promotional effort with the National Center for Missing and Exploited Children and the U.S. Postal Service to ensure that the publicity is diversified and effective. The Committee fully supports Customs' work in battling child pornography and is impressed with the successes Customs has had given the limited resources.

FORCED AND INDENTURED CHILD LABOR

The Committee is pleased with the continued work of Customs regarding enforcement of section 307 of the Tariff Act of 1930 as it relates to forced and indentured child labor. The Committee believes that continued focus on enforcement of the ban on importation of goods made by forced child labor is critical, and that Customs needs to continue this effort through aggressive investigation and enforcement of the applicable laws. The Committee has provided an additional \$4,000,000 and expects to receive an expenditure plan prior to the obligation of funds.

INTELLECTUAL PROPERTY RIGHTS INITIATIVE

The Committee commands Customs for continuing to focus on Intellectual Property Rights violations even while it serves as America's frontline and performs critical homeland security duties. Intellectual Property Rights violation cost American businesses millions in lost revenue annually. Since its establishment in early calendar year 2002, the National Intellectual Property Rights Coordination Center, led by Customs in collaboration with the Federal Bureau of Investigation, has provided critical leadership for both domestic and international efforts. Through outreach, training, symposia, and aggressive investigations, the Center is protecting citizens from economic and other adverse impacts of counterfeit merchandise. The Committee directs Customs to aggressively continue these efforts and provides an additional \$4,000,000 for domestic and international programs, staffing, as well as continued operation of the Coordination Center.

CENTER FOR AGRICULTURAL POLICY AND TRADE STUDIES

The volume of trade along the Northern border has increased dramatically in the last decade as a result of a number of free trade agreements. Implementation of World Trade Organization (WTO) policies will also have a significant impact on the Northern Border, particularly in the Northern Plains region. The Committee recognized the importance of this growth in trade and provided funds in fiscal years 2000, 2001, and 2002 to conduct research on the bilateral trade of agricultural commodities and products under the Canada-United States Trade Agreement. This research is being conducted at the Center for Agricultural Policy and Trade Studies located at North Dakota State University.

The primary purpose of this research program is to analyze a wide range of agricultural and trade policy issues for agricultural products, agribusiness firms, and the rural economies in the Northern Plains States. Specific objectives for this research are (1) to evaluate the potential impacts of multilateral and regional free trade agreements (e.g. the WTO and Free Trade Area of the Americas negotiations) on Northern Plains agricultural competitiveness in global markets, (2) to analyze net farm income and agricultural policies for the Northern Plains region, (3) to evaluate the impacts of macro policy variables, such as exchange rates and the new farm bill, on agricultural exports, (4) to develop strategies to improve export opportunities for agricultural goods from this region, and (5) to analyze the impacts of the

North American Free Trade Agreement on trilateral flows of agricultural goods and net farm income in the region. The Committee has included \$750,000 to continue this project.

PROJECT ALERT

The Committee instructs the Customs Service to provide no less than \$200,000 to the National Center for Missing and Exploited Children for the training of retired law enforcement officers to assist in the investigation of unsolved missing children cases nationwide. The Committee anticipates that these funds will be in addition to other funds available to the Center for these purposes.

INTERDICTION OPERATIONS

Through the years, Customs has had to react to constantly changing drug smuggling methods. Consequently, interdiction methods have been adapted to challenge the nature of the ever-changing threat. This effort has proven effective, with record narcotics seizures posted annually. After the terrorist attacks of September 11, 2001, the concept of applying the lessons learned in air and marine narcotics enforcement to the precepts of counterterrorism have become particularly critical. This is especially true given the published vulnerabilities of our sovereign coastal waters, seaports, and airspace. The Committee notes that a reactive posture, oftentimes successful in counter drug activities, becomes an unacceptably passive alternative to combating the specter of terrorism proactively. The Committee believes that the threat of terrorism and the fluid patterns of drug smuggling demand forward thinking vigilance by Customs. The Committee notes that the consequences for failure in the fight against terrorism are unacceptable. The Committee therefore strongly urges Customs to apply the lessons learned from enhanced air and marine enforcement efforts in countering fluid smuggling efforts to the battle against terrorism by ensuring sufficient resources are dedicated to the interdiction mission.

CANINE DETECTION TRAINING CURRICULUM DEVELOPMENT

The Committee is encouraged with the initiatives demonstrated by the Customs Service as regards development and utilization of canine detection to combat and respond to possible future terrorist activities involving hazardous materials. The Committee is pleased that the Customs Service has continually recognized the unique and special abilities that the appropriately trained canine and handler immediately offer in this regard. The Committee has provided \$2,300,000 for further canine training activities and curriculum development to enhance canine detection technology for the detection of additional chemical and biological agents. In order to comply with this section, the Committee directs the Customs Service to contract with an appropriate entity, like Auburn University, and to provide any and all technical and physical support necessary to enhance canine detection technology and operational resources for protecting the Nation against terrorism.

ADVANCED PASSENGER INFORMATION SYSTEM

The Committee commends the U.S. Customs Service for the creation and expansion of the Advanced Passenger Information System. The Committee strongly believes that the information supplied through this program will be critical in our homeland security efforts. The Committee recommends that the Customs Service recognize the unique aspects of Part 135 on-demand air taxi operators as they apply manifest requirements according to Public Law 107-71, the Aviation Transportation Security Act of 2001. Customs is encouraged to consider all transmission options for any operators or locations that do not have internet access.

CHARACTERIZATION AND RECOGNITION OF DOMESTIC AND INTERNATIONAL BULK CURRENCY

Both United States and international bulk currency are used to finance trafficking of illicit substances and in supporting terrorist activities. Funding in the amount of \$2,000,000 is provided to the Customs Service for a contract with the Idaho National Engineering and Environmental Laboratory to expand the lab's support to the Department of the Treasury and the Customs Service program to characterize domestic currency and build a detector to identify illicit movement of bulk currency. The program will expand the existing effort into the characterization and recognition of international currency.

STRENGTHENED ENFORCEMENT OF U.S. TRADE LAWS PERTAINING TO STEEL

The Committee supports Customs in its enforcement of U.S. trade laws, including the Presidents' steel 201 proclamation of March 5, 2002, and all antidumping and countervailing duty orders related to steel. The Committee also understands that Customs is responsible for enforcing and monitoring imports of wire rods and certain line pipe products that were previously covered by a 201 remedy decision. The Committee is aware that Customs personnel assigned to enforce antidumping and countervailing duty orders, including import specialists, inspectors, and agents, have been increasingly burdened and many have been reassigned to meet homeland security priorities. The steel industry states that Customs would have to dedicate as many as 30 additional positions to fully enforce this set of trade laws, and the Committee understands that there are serious deficiencies in the level of training and specialized knowledge of Customs inspectors and import specialists who deal with steel tariff matters. The Committee supports assisting Customs officials, working with the steel manufacturing and trading community, to identify and apply the resources and training required to carry out these responsibilities. Such efforts may include utilizing steel industry experts through a series of national trading seminars, which could be made available to members of the trade and brokerage community who play a key role in classifying imported goods for Customs processing. Other efforts could involve assigning more import specialists, inspectors, or agents to steel trade enforcement. The Committee recommends that new steel import specialists be assigned to ports with the greatest volume of steel imports. In addition, the Committee directs Customs to report not later than 60 days after the date of enactment describing the steps it has taken to improve overall training for steel tariff implementation, enforcement efforts and manpower, including data on the types and value of illegal imports seized and the penalties awarded.

TEXTILE TRANSSHIPMENT ENFORCEMENT

Public Law 107-210 authorizes additional appropriations for textile transshipment enforcement operations by the United States Customs Service. In addition, the General Accounting Office was directed to audit efforts by the Customs Service to monitor transshipment efforts.

The Committee notes that textile transshipment enforcement is essential to help the textile industry in this country become more competitive in the international marketplace. The additional positions authorized by Public Law 107-210 would drastically increase the number of Customs import specialists, inspectors, and investigators which would help crack down on illegal transshipments into the United States. The provisions would also increase the number of

auditors and attorneys to help pursue suspected illegal importers as well as emphasize agent training.

The Committee looks forward to reviewing the GAO audit, which is expected in May 2003. The Committee also expects that the administration's fiscal year 2004 budget request will include necessary funding to help ensure that the textile trade laws are strictly enforced.

DRAWBACK OFFICES

The Committee is concerned about the decision to close the Boston drawback office, even though some reports indicate that that particular office has a 3-year backlog of drawback claims. The Committee feels that closing this office without providing a clear and workable alternative for exporters who rely on the Boston drawback office may have significant adverse effects on the ability of many U.S. companies to engage in international trade. Accordingly, the Committee requests that Customs forgo any closure of the Boston drawback office in this fiscal year. Further, the Committee directs Customs to provide, within 15 days after enactment of this Act, a detailed proposal as to how to handle both the Boston drawback office backlog and future claims in a more efficient and timely manner.

TRADE STUDIES

The volume of trade along the Southern Border has increased dramatically in the last decade as a result of a number of free trade agreements, most specifically the North American Free Trade Agreement. The Committee recognizes the importance of this growth in trade and provides \$550,000 to work with the Center for North American Studies to continue research on a wide range of agricultural and trade policy issues for agricultural products, agribusiness firms, and the rural economies in the Southern Plains States. The most specific objective for this research is to analyze the impacts of the North American Free Trade Agreement on trilateral flows of agricultural goods and net farm income in the region. Of the funds provided for this project, \$300,000 to work with the University of Texas Magic Program to continue to produce satellite imaging crucial to analyzing the effects of the North American Free Trade Agreement.

BORDERLAND SECURITY

The University of Texas El Paso proposes to design and implement, in coordination with other government elements, a crisis management program for dealing with regional security issues and terrorist attacks along the Southern Border. The Committee recognizes that El Paso is uniquely situated to address this problem due to its position along the United States-Mexico border, its status as an economic crossroads, and that El Paso, along with Ciudad Juarez, comprises the largest international metroplex in the world. Also, nearby are two strategic targets: White Sands Missile Range and Ft. Bliss. The Committee provides \$300,000 for Customs to work with the University of Texas to develop a crisis management program to protect the United States-Mexico Border.

AGRICULTURAL BIOTERRORISM

The Committee recognizes the work of the Institute for Countermeasures against Agricultural Bioterrorism (ICAB) at Texas A&M University to develop methods for rapid detection and diagnosis of bio-agents as well as prevention and mitigation of bioterrorist attacks. The Secretary of Treasury, as well as the Secretary of the new Department of Homeland Security once the Customs Service is transferred, are encouraged by the Committee to work closely with the Institute to help develop and implement new

technologies to protect our borders from bio-terrorism.

EL PASO RAIL YARD

The Committee is concerned about continued acts of violence against Customs, Immigration, FBI, and other Federal law enforcement personnel at the downtown El Paso, Texas rail yard and Customs inspection facility. The Committee also notes the heightened susceptibility of rail cars carrying hazardous materials to possible terrorist or other attack at the present downtown rail yard. Customs is strongly urged to continue to work closely with the City of El Paso and other relevant Federal, State, and local stakeholders to develop a plan to establish new freight rail yard and inspection facilities away from the downtown area.

DRUG DETECTION

The Committee is impressed with the U.S. Customs Service on the Southwest Border as shown by the 76 percent increase of seized cocaine due to the use of canine drug detection and advanced training. The Committee encourages Customs to expand this effort and report back both its successes and failures with this effort in 2004.

SMART BORDERS

The Texas Transportation Institute (TTI) is a leader in dealing with transportation issues across the nations and the Committee is impressed with TTI's research on security risks at border stations. TTI's Smart Border's initiative adapts and develops emerging technologies and practices to enhance the ability of inspection agents to facilitate the flow of traffic across the United States borders. The Committee provides \$125,000 for Customs to work with TTI in applying this research to its current practices.

TAMU INTERNATIONAL

Texas A&M International is in an exceptional position to assist customs in protecting our Nations. With the numerous agencies that deal with border affairs and the newly established Department of Homeland Security communication is essential to protecting America from Terrorism. The Committee provides \$100,000 for Customs to work with Texas A&M International University and other Federal Agencies to create a demonstration project in Laredo, Texas focusing on enhancing collaborative efforts on the border through training, research and education.

PROGRESSO BRIDGE

The Committee is concerned about the extraneous lines at the Progresso Bridge in Progresso, Texas for pedestrians crossing the U.S.—Mexico border. Customs and INS are urged to work together to find an equitable solution to expedite this on-foot traffic. The Committee provides \$75,000 for equipment-related costs to assist in this situation.

DAIRY PROTEIN BLENDS

The Committee is very concerned with the impact of imported milk protein concentrates on domestic milk use, resulting in historically low milk prices paid to dairy producers. The U.S. Customs Service of the Department of the Treasury is encouraged to expeditiously make their final decision on the reclassification of dairy protein blends within 60 days of the enactment of this Act and to report the results to the Committee.

HARBOR MAINTENANCE FEE COLLECTION

Appropriations, 2002	\$3,000,000
Budget estimate, 2003	3,000,000
Committee recommendation	3,000,000

The Committee provides \$3,000,000 to be transferred from the harbor maintenance trust fund to the Customs Service "salaries and expenses" appropriation.

The harbor maintenance fee was established to provide resources to the Army Corps of Engineers for the improvement of American channels and harbors. The fee is assessed on the value of commercial imports and exports delivered to and from certain specified ports. The fee is collected by the Customs Service. The transferred funds will offset the costs incurred by Customs in collecting these fees.

OPERATION, MAINTENANCE AND PROCUREMENT, AIR AND MARINE INTERDICTION PROGRAMS

Appropriations, 2002	\$184,560,000
Budget estimate, 2003	170,829,000
Committee recommendation	177,829,000

The Committee recommends an appropriation of \$177,829,000 for operation and maintenance activities of the Customs air and marine interdiction programs. This amount is \$6,731,000 below fiscal year 2002 levels and \$7,000,000 above the President's request. This includes an additional \$7,000,000 for the Customs National Aviation Center.

The Customs Air and Marine Interdiction Program combats the illegal entry of narcotics and other goods into the United States. This appropriation provides capital procurement and total operations and maintenance for the Customs air and marine program. This program also provides support for the interdiction of narcotics by other Federal, State and local agencies.

The Customs Service will continue implementation of the Western Hemisphere Drug Elimination Act (WHDEA). At the Administration's request \$35,764,000 in new funding is included to intensify WHDEA activities, including the purchase of new equipment as well as other enhancements, to improve interdiction efforts against drug operations in the source and transit zones.

CUSTOMS COUNTERDRUG RESOURCES

The Committee, supportive of the use of technology and assets as a means to enhance the Customs mission, necessarily places the priority on meeting these annualized costs over the acquisition of additional assets and the concomitant support personnel and maintenance costs. The Committee remains concerned about the Customs Service failure to consider the full budgetary impact and secure funding for items and personnel funded in addition to their congressional budget submission. The Committee encourages Customs to continue to evaluate, consider and acquire such assets in an effort to maximize its personnel and resources. However, the Committee expects that the Customs Service will responsibly address and meet all out-year costs for any new acquisitions and personnel without sacrificing existing programs in the process.

CUSTOMS NATIONAL AVIATION CENTER

The Committee has provided \$7,000,000 to continue a Customs Service program to facilitate uniformity in aviation training. This standardization program will be headquartered on site at the Customs National Aviation Center (CNAC) at Oklahoma City, Oklahoma. CNAC will also be the home station for such assets as are required to implement this program, including facilities necessary for further standardization of operational training activities of the Customs Service's Air and Marine Interdiction Division.

TOTAL SYSTEMS SUPPORT

The Committee has supported and continues to support the Customs air and marine interdiction programs, and is concerned about the aging fleet of P-3 aircraft. While it would be preferable to replace these aging aircraft with new models, the Committee is mindful of funding constraints. The Com-

mittee believes that the Customs Service should take all necessary steps to protect the investment in these aircraft, while considering aircrew safety. In this regard, the Committee is aware of an unsolicited proposal to work with Customs to study the feasibility of utilizing private sector expertise to manage a wide range of engineering and maintenance requirements. The Committee urges Customs to carefully review this proposal, and provide a report within 60 days after the date of enactment to the Committee on their plans with regard to a total systems support concept.

AUTOMATION MODERNIZATION

Appropriations, 2002	\$427,832,000
Budget estimate, 2003	435,332,000
Committee recommendation	435,332,000

The Committee has provided \$122,432,000 for the Automated Commercial Systems (ACS), and \$312,900,000 to continue work on the Automated Commercial Environment (ACE).

The Customs Service continues to modernize its trade data processing system. The current system, ACS, will be replaced with the new ACE. ACE will provide an upgrade to the system which will enable Customs to meet the demands of an increasing volume of trade and convert to a paperless process and an account-based system. These funds will support the ACS legacy system while the conversion to ACE is underway.

AUTOMATED COMMERCIAL ENVIRONMENT

Automation modernization of the aging Customs commercial systems and processes is critical to the Nation's commerce. In light of the events of September 11, 2001, it is even more imperative that all trade entering this country be as accurately tracked as possible. The Committee continues to be encouraged by the efforts and progress made by the Customs Service in its modernization effort. The Committee believes that Customs appears to be on the right track in establishing a well-considered framework necessary to proceed with the initial ACE development.

The Committee directs Customs, in concert with General Accounting Office (GAO) and the Department of the Treasury, to report periodically on the status of the project pertaining to the need for technology insertion, to include the reasons, whether through technological advancement or delay in project completion.

The Committee strongly believes that continued oversight of the program by GAO and Treasury is critical to successful adherence to the ACE expenditure plan. Periodic review of investment increments allows for oversight of the capital planning and architecture development and is consistent with best practices. The Committee directs that regular quarterly reports continue to be provided until ACE becomes functional. Additionally, the Committee directs Customs to submit requests for release of funds, including a cost-benefit analysis, in a timely manner, but in no case less than 30 days from the anticipated need for the funds.

U.S. MINT

The U.S. Mint manufactures coins, sells numismatic and investment products, and provides for security and asset protection. Public Law 104-52 established the U.S. Mint Public Enterprise Fund (the Fund). The Fund encompasses the previous Salaries and Expenses, Coinage Profit Fund, Coinage Metal Fund, and the Numismatic Public Enterprise Fund. The Mint submits annual audited business-type financial statements to the Secretary of the Treasury and to Congress in support of the operations of the revolving fund.

The operations of the Mint are divided into three major activities: Circulating Coinage;

Numismatic and Investment Products; and Protection. The Mint is credited with receipts from its circulating coinage operations, equal to the full cost of producing and distributing coins that are put into circulation, including depreciation of the Mint's plant and equipment on the basis of current replacement value. From those receipts, the Mint pays its cost of operations, which includes the costs of production and distribution. The difference between the face value of the coins and these costs are profit, which is deposited as seigniorage to the general fund. In 2001, the Mint transferred \$1,383,000,000 to the General Fund. Any seigniorage used to finance the Mint's capital acquisitions is recorded as budget authority in the year that funds are obligated for this purpose, and as receipts over the life of the asset.

GOLDEN DOLLAR COIN

The Committee strongly supported the creation and circulation of the Golden Dollar (Sacagawea) coin. However, the Committee notes with disappointment that nearly 2 years has passed since the coin's introduction with an exuberant marketing campaign, and the coin has yet to enter into regular circulation in all areas. The Committee is pleased with the U.S. Mint's action plan for additional research on the future of the Golden Dollar Coin, in accordance with the findings of the recent General Accounting Office (GAO) report, "New Dollar Coin Marketing Campaign Raised Public Awareness but Not Widespread Use" (GAO-02-896). The Committee hopes that the results of the research received in December 2002 will provide the necessary direction for the U.S. Mint and the Federal Reserve to improve the circulation of the Golden Dollar Coin. The Committee directs the U.S. Mint, in consultation with the Federal Reserve and the GAO, to submit a new marketing plan to the Committee on Appropriations no later than 15 days after the enactment of this appropriations Act.

BUREAU OF ENGRAVING AND PRINTING

The Bureau of Engraving and Printing (BEP) designs, manufactures, and supplies Federal Reserve notes, various public debt instruments, as well as most evidences of a financial character issued by the United States, such as postage and internal revenue stamps. The Bureau executes certain printings for various territories administered by the United States, particularly postage and revenue stamps.

The anticipated work volume is based on estimates of requirements submitted by agencies served. The program comprises the following activities:

Currency.—Total deliveries of currency for 2002 and 2003 are estimated to be 7 billion notes each year. During 2001, the Bureau delivered 7 billion Federal Reserve notes.

Stamps.—This category of work is comprised of postal and internal revenue stamps. The projected requirements for 2002 and 2003 are estimated to be 12 billion and 9 billion stamps, respectively. In 2001, the Bureau delivered 15.9 billion stamps.

Securities.—This program encompasses the production of a wide variety of bonds, notes, and debentures for the Bureau of Public Debt and certain other agencies of the Government.

Commissions, certificates, etc.—This program is comprised primarily of Presidential and Department of Defense commissions and certificates, White House invitations, and identification cards for various Government agencies. It represents a small portion of the Bureau's total workload.

Space utilized by other agencies.—Other agencies are charged for services provided in the space occupied in the Bureau's buildings.

Other miscellaneous services.—A wide variety of miscellaneous services are performed by Bureau personnel for other agencies, which are charged on an actual cost basis.

Purchase of operating equipment.—This category consists of new purchases and replacement of printing equipment and other related printing items.

Plant alterations and experimental equipment.—This category encompasses alterations made on the Bureau's buildings and purchases of experimental equipment. The operations of the Bureau are currently financed by means of a revolving fund established in accordance with the provisions of Public Law 656, August 4, 1950 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products and services performed. The Bureau is also authorized to assess amounts to acquire capital equipment and provide for working capital needs. Bureau operations during 2001 resulted in an increase to retained earnings of \$45,000,000.

The Committee is concerned about the links between terrorism and counterfeiting. The Committee is also aware that a substantial degree of counterfeiting of U.S. currency takes place overseas. The Committee encourages the Department of the Treasury to consider for future currency designs, the best available, most cost effective anti-counterfeiting technology and security devices for U.S. currency, including but not limited to alternative substrates; distinctive fibers; optically variable devices; high-technology inks; and, security measures produced by modern offset printing techniques.

No direct appropriation is required to cover the activities of the Bureau.

BUREAU OF THE PUBLIC DEBT

ADMINISTERING THE PUBLIC DEBT

Appropriations, 2002	\$186,953,000
Budget estimate, 2003	191,119,000
Committee recommendation	191,073,000

The Committee recommends an appropriation of \$191,073,000 for the Bureau of the Public Debt in fiscal year 2003. This amount includes \$2,500 within existing funds for official reception and representation expenses.

This appropriation provides funds for the conduct of all public debt operations and the promotion of the sale of U.S. savings-type securities.

Savings securities.—This activity involves the issuance, servicing, and retirement of savings bonds and notes and retirement-type securities, including: (1) the maintenance and servicing of individual accounts of owners of series H and HH bonds and the authorization of interest payments; and (2) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost. These functions are performed directly by the Bureau of the Public Debt, by the Federal Reserve Banks as fiscal agents of the United States, and by the qualified agents which issue and redeem savings bonds and notes. This activity also consists of sales promotion efforts, using press, radio, other advertising media, and organized groups, augmented by concentrated sales campaign emphasizing payroll savings plans.

Marketable and special securities.—This activity involves all securities of the United States, other than savings and retirement securities, including securities of Government corporations for which the Bureau of the Public Debt provides services. Functions performed relate to the issuance, servicing, and retirement of these securities, both directly by the Bureau and through the Federal Reserve Banks, as fiscal agents, including: (1) the maintenance and servicing of in-

dividual accounts of owners of registered securities and book-entry Treasury bills; (2) the authorization of interest and principal payments; and (3) the maintenance of accounting control over financial transactions, securities transactions and accountability, and interest cost.

INTERNAL REVENUE SERVICE

SUMMARY

The Committee has recommended a total of \$9,899,293,000 for the Internal Revenue Service (IRS) in fiscal year 2003. This amount is \$424,689,000 above the fiscal year 2002 enacted level and a decrease of \$16,560,000 from the President's request.

PROCESSING, ASSISTANCE, AND MANAGEMENT

Appropriations, 2002	\$3,810,880,000
Budget estimate, 2003	3,958,337,000
Committee recommendation	3,955,777,000

The Committee recommends an appropriation of \$3,955,777,000 for processing, taxpayer assistance, and management.

This appropriation provides for: processing tax returns and related documents; assisting taxpayers in the filing of their returns, paying taxes that are due, and complying with tax laws; issuing technical rulings; revenue accounting, conducting background investigations; managing financial resources, rent and utilities.

Pre-Filing Taxpayer Assistance and Education.—This activity includes resources to support services provided before a return is filed to assist the taxpayer in filing a tax return correctly. Included in this activity are staffing, training and direct support for (1) pre-filing services operational management; (2) tax law interpretation and published guidance; (3) taxpayer communication and education to research customer needs, prepare tax forms and publications, develop and manage education programs, establish partnerships with stakeholder groups, and disseminate tax information to taxpayers and the general public; (4) rulings and agreements to apply the tax law to specific taxpayers in the form of pre-filing agreements, determination letters, advance pricing agreements and other pre-filing determinations and advice; (5) marketing of electronic tax administration products and services; and (6) ensuring that taxpayers have an advocate to prevent future problems by identifying the underlying causes of taxpayers' problems and to participate in the development of systemic and/or procedural remedies.

Filing and Account Services.—This activity provides resources to support services provided to a taxpayer in the process of filing returns and paying taxes in addition to issuance of refunds and maintenance of taxpayers accounts. Included in this activity are staffing, training and direct support for (1) filing and account services operational management; (2) submission processing of paper and electronically submitted tax returns and supplemental documents which account for tax revenues, and issue refunds and tax notices; (3) electronic/correspondence assistance to taxpayers to resolve account and notice inquiries, either electronically or by telephone; (4) face-to-face assistance to taxpayers, including return preparation, answering tax questions, resolving account and notice inquiries, and supplying forms and publications to taxpayers; and (5) processing of information documents which enables the Service to match this information with that provided by taxpayers on their returns.

Shared Services Support.—This activity provides staffing, training and direct support for (1) services and supplies to manage IRS facilities; (2) human resources programs including recruitment, labor and employee relations, workforce planning and evaluation,

performance management, employee benefits, personnel security and transactional processing; (3) procurement; (4) the Servicewide EEO and Diversity program; (5) the Servicewide Career Management and Learning Center; (6) financial services including relocation, travel, imprest fund, purchase cards, corporate express and employee clearance; and (7) Treasury complaint centers. This activity also provides resources for (1) building rent; (2) IRS building services, maintenance space alterations, guard services, custodial overtime, utility services, and non-information technology equipment; (3) shared support such as copiers, postage meters, shredders, courier services, P.O. boxes, etc.; and (4) cleaning, maintenance, utilities, security and repair costs of delegated buildings.

General Management and Administration.—This activity provides staffing, training and direct support for (1) business unit headquarters management activities of strategic planning, communications and liaison, finance, human resources, EEO and diversity, and business systems planning; (2) national headquarters management and administration of policy making and goal setting, leadership and direction for the IRS, building partner relationships with key stakeholders (e.g., Congress, OMB, etc.); (3) strategic direction Servicewide for communications, Government liaison and disclosure, legislative affairs and public liaison; (4) general legal advice to the IRS on non-tax legal issues including procurement, personnel, labor relations, equal employment opportunity, fiscal law, tort claims and damages, ethics, and conflict of interest; and (5) payments for workmen's compensation benefits and unemployment compensation payments.

IRS STAFFING PLANS

The Committee continues to support adequate staffing levels for effective tax administration and supports the staffing plans for the Internal Revenue Service facilities in the communities of Martinsburg and Beckley, WV. Therefore, the Committee urges the IRS, within the constraints of the fiscal year 2003 funding levels, to make no staffing reductions at the Martinsburg National Computing Center and the programmed level at the Administrative Services Center in Beckley, WV.

TAXPAYER SERVICES

The Committee is pleased that the IRS is providing more service and assistance to taxpayers, especially in rural and less populated areas. The Committee notes the benefits provided by, and increased usage of, mobile tax preparation services in North Dakota. The Committee commends the IRS for providing this mobile taxpayer service and urges the IRS to use existing resources to expand this mobile service to New Mexico, with a special emphasis on providing these services to Native American reservations and pueblos. To increase use of these mobile services, the Committee urges the IRS to make a greater effort to provide early notice to local media of the dates and times the mobile services will be in specific locations.

The Committee also directs the IRS to provide a report to the Committee at the conclusion of the filing season on its efforts to publicize the availability of these mobile taxpayer services as well as the number of taxpayers served and the types of assistance provided.

TAX COUNSELING FOR THE ELDERLY

The Committee once again believes that the Tax Counseling Program for the Elderly has proven to be most successful. To meet the goals of this program, \$3,950,000 is included within the aggregate amount recommended by the Committee for processing

tax returns and assistance in fiscal year 2003. To ensure that the full effect of the program is accomplished, the IRS is directed to cover administrative expenses within existing funds.

TAXPAYER SERVICES IN ALASKA AND HAWAII

Given the remote distance of Alaska and Hawaii from the U.S. mainland and the difficulty experienced by Alaska and Hawaii taxpayers in receiving needed tax assistance by the national toll-free line, it is imperative that the Taxpayer Advocate Service office in each of these States is fully staffed and capable of resolving taxpayer problems of the most complex nature. The Committee directs the Internal Revenue Service to staff each Taxpayer Advocate Service office in each of these States with a Collection Technical Advisor and an Examination Technical Advisor in addition to the current complement of office staff. Staffing shall be increased if, as the result of the IRS Restructuring and Reform Act of 1998, subsequent legislation, or other factors, the number of cases or their complexity increases.

LOW-INCOME TAXPAYER CLINIC

The Committee once again commends the IRS for the Low-Income Taxpayer Clinic (LITC) program. With the growing complexity of tax laws, this program has provided invaluable help for taxpayers who are seeking to resolve disputes with the IRS. To ensure that the goals of the LITC program are maintained, the Committee has provided a total of \$7,000,000 to assist low-income taxpayer clinics across the Nation.

The Committee is concerned about recent proposed Treasury regulations that state that the Treasury Department and the Internal Revenue Service do not believe that qualified LITC's are authorized to provide tax preparation services unless it is in conjunction with a controversy or with an English as a Second Language program. Need-based tax preparation assistance through LITC and other programs such as VITA is imperative for many of our Nation's taxpayers who cannot afford commercial preparers. Without this assistance, many individuals may either not file a return or will make errors and prepare their returns improperly, ultimately leading to a controversy with the IRS. Helping taxpayers with problems with the IRS begins with the preparation and filing of the return. Without this assistance, the limited resources available to the LITC program will be insufficient to meet the demand of taxpayers with controversies with the IRS.

RHODE ISLAND LOW INCOME TAXPAYER CLINIC

The Committee acknowledges the valuable work and service to the community that the Rhode Island Low Income Taxpayer Clinic (RILITC) has provided over the past 4 years of its existence. The Committee therefore encourages the Internal Revenue Service to fund the RILITC's grant request for 2003, so that it may continue to operate and deliver its unique services to the citizens of the City of Providence.

VOLUNTEER INCOME TAX ASSISTANCE

The Committee notes that the existing Volunteer Income Tax Assistance (VITA) program provides an invaluable service by helping low income taxpayers prepare and file their Federal income tax returns. It is the Committee's understanding that IRS used Congress' fiscal year 2002 appropriation of an additional \$1,000,000 for the VITA program to provide VITA sites with additional computers and computer modules to assist taxpayers to file electronically. The Committee, therefore, urges the IRS to provide such additional sums as may become available to the VITA program outside of its in-kind contribution program. These additional

funds are intended to assist the IRS in expanding the VITA program to hard to serve areas, such as Indian Reservations. Additionally, these funds are intended to increase the capacity of VITA sites to file returns electronically and to cover some operational expenses. The Committee expects that IRS will continue its current level of in-kind contributions to VITA programs and directs the IRS to report to the Committee within 90 days of enactment of this Act on the steps it has taken in this regard.

PROVIDENCE, RHODE ISLAND TAXPAYER ASSISTANCE OFFICE

The Committee notes and commends the work that is being done at the Providence Field Office of the IRS to establish a Taxpayer Assistance Office, as well as to redesign the space used by the Taxpayer Advocate's Office. The Committee urges the IRS to ensure that these projects remain a priority and that funding for them remains intact.

WAGE AND INVESTMENT DIVISION

The Committee recognizes that there are ebbs and flows in employment at the Internal Revenue Service's field offices around the country, particularly in correlation to the tax filing season. However, the Committee is concerned that some of these departures may have unintended consequences, especially by stretching available resources to satisfy the needs of a particular community. Therefore, the Committee requests that the IRS report to the Committee, within 60 days after the date of enactment, with an analysis of staffing plans at IRS field offices and the impact of such plans on the communities they serve. The report also should include an analysis of staffing plans at the Providence, Rhode Island field office.

OFFICE OF APPEALS

The Committee recognizes the importance of the work provided by the IRS Office of Appeals, and strongly urges the IRS to consider establishing an Office of Appeals within the current IRS Field Office in Providence, Rhode Island.

IRS CONSORTIUM FOR LEARNING AND WORKFORCE DEVELOPMENT

The Committee is aware of the IRS Consortium for Learning and Workforce Development that incorporates technology such as e-learning to deliver training in a more cost-effective manner. The Committee is concerned that the delays in awarding the course conversion task order may jeopardize the Consortium initiative and directs the IRS to complete its negotiations expeditiously. Further, the Committee requests that the IRS provide quarterly briefings to the Committee on the work of the Consortium.

NO-COST EZ TAX FILING

The Committee understands that the IRS does not intend to enter into the tax preparation software business with respect to no- or low-cost digital filing of tax returns over the Internet. The Committee recognizes that the IRS intends to work in partnership with industry to expand the electronic filing of tax returns. The necessity of a partnership was emphasized in a statement released by the Department of the Treasury on January 30, 2002. The IRS has echoed this commitment to work with industry and notes that IRS plans do not include tax preparation services. The Committee notes that the IRS budget request sought no resources for this purpose. The Committee strongly believes in the industry-IRS partnership concept and urges the IRS to continue strengthening its ties with the private sector and computer software industry as it moves forward in this endeavor.

TAX LAW ENFORCEMENT

Appropriations, 2002	\$3,542,891,000
Budget estimate, 2003	3,729,072,000
Committee recommendation	3,729,072,000

The Committee recommends an appropriation of \$3,729,072,000 for tax law enforcement activities in fiscal year 2003.

This appropriation funds IRS's ability to provide equitable application and enforcement of the tax laws, identify possible non-filers for investigations, investigate violations of criminal statutes, and supports the Statistics of Income program.

Compliance Services.—This activity funds services to taxpayers after a return is filed, identifying and attempting to correct possible errors or underpayment. It provides for the examination of tax returns, both domestic and international, and the administration and judicial settlement of taxpayer appeals of examination findings. It also provides for monitoring employee pension plans, determining qualifications of organizations seeking exempt status, examining the tax returns of exempt organizations, enforcing statutes relating to detection and investigation of criminal violations of the internal revenue laws and other financial crimes, collecting unpaid accounts, securing unfiled tax returns and payments, analyzing and determining the reasons for delinquent accounts, preventing accounts from becoming delinquent, and preventing nonfiling. This activity also provides for legal counsel regarding legal interpretation of the law and representation in litigation.

Research and Statistics of Income.—This activity funds research and statistical analysis support for the Service. It provides annual income, financial, and tax data from tax returns filed by individuals, corporations, and tax-exempt organizations. Likewise it provides resources for market-based research to identify compliance issues, for conducting tests of treatments to address non-compliance, and for the implementation of successful treatments of taxpayer non-compliant behavior.

ABUSIVE TAX SHELTERS

The Committee has become extremely concerned about the growth of abusive tax shelters and their impact on investor confidence as well as on the national economy. For instance, during Committee hearings this spring with the Internal Revenue Service the Committee explored with the Commissioner examples of these corporations, such as the Enron Corporation which apparently ran nearly 600 subsidiaries out of single post office box in the Cayman Islands. The Committee strongly believes that these abuses are out of control and that the IRS must do more to target these abuses.

To ensure that the IRS more effectively and aggressively investigates and combats abusive tax shelters, the Committee directs the IRS to designate no less than \$60,000,000 of the "Tax Law Enforcement" account for the purpose of targeting these abusive schemes, abusive scheme promoters, and offshore schemes. The Committee further directs the IRS to report back to the Committee within 120 days after enactment of this Act on the resources that have been directed to assist in this effort.

EARNED INCOME TAX CREDIT

Appropriations, 2002	\$146,000,000
Budget estimate, 2003	146,000,000
Committee recommendation	146,000,000

The Committee recommends an appropriation of \$146,000,000.

The "Earned income tax credit" (EITC) appropriation provides for expanded customer

service and public outreach programs, strengthened enforcement activities, and enhanced research efforts to reduce overclaims and erroneous filing associated with the earned income tax credit.

Expanded customer service includes dedicated, toll-free telephone assistance, increased community-based tax preparation sites, and a coordinated marketing and educational effort (including paid advertising and direct mailings) to assist low-income taxpayers in determining their eligibility for EITC. Improved compliance includes increased staff and systemic improvements in submissions processing, examination, and criminal investigation programs. In returns processing, new procedures include expanded use of math error authority and the identification of EITC-based refund claims involving invalid or duplicate primary, secondary, and dependent tax identification numbers (TTIN's). Increased examination coverage, prior to issuance of refunds, reduces overpayment and encourages compliance in subsequent filing periods. In addition, post-refund correspondence audits by service center staff aids in the recovery of erroneous refunds. Criminal investigation activities target individuals and practitioners involved in fraudulent refund schemes and generate referrals of suspicious returns for followup examination. Examination staff, assigned to district offices, audit return preparers and may apply penalties for noncompliance with due diligence requirements.

Enhanced research activities and projects focus on EITC claimant characteristics and patterns of noncompliance and are designed to improve education and outreach products, strengthen IRS abuse detection capabilities, and measure the effects of Servicewide programs on compliance levels for the EITC-eligible taxpayer population. This appropriation also funds the development of specialized research data bases and masterfile updates, reimbursement to the Social Security Administration (SSA) for enhancements to the SSA numbering systems, and cooperative efforts with State vital statistics offices.

INFORMATION SYSTEMS

Appropriations, 2002	\$1,579,240,000
Budget estimate, 2003	1,632,444,000
Committee recommendation	1,632,444,000

The Committee recommends an appropriation of \$1,632,444,000 for information systems activities in fiscal year 2003.

This appropriation provides for Servicewide information systems operations and maintenance, and investments to enhance or develop business applications for the IRS Business Units. The appropriation includes staffing, telecommunications, hardware and software (including commercial-off-the-shelf), and contractual services.

Information services.—This activity provides the salaries, benefits, and related costs to manage, maintain, and operate the information systems that support tax administration.

The Service's business activities rely on these information systems to process tax and information returns, account for tax revenues collected, send bills for taxes owed, issue refunds, assist in the selection of tax returns for audit, and provide telecommunications services for all business activities including the public's toll free access to tax information. These systems are located in a variety of sites including the Martinsburg, West Virginia, Memphis, Tennessee, and Detroit, Michigan Computing Centers; Service Centers; and in other field office operations. Staffing in this activity develops and maintains the millions of lines of programming code supporting all aspects of tax processing; as well as operating and administering the Service's hardware infrastructure of

mainframes, minicomputers, personal computers, networks, and a variety of management information systems.

Information systems improvement programs.—This activity funds improvements or enhancements to business applications that support requirements unique to one of the new IRS Business Units. These projects meet the following criteria: each project is small or medium in size and can be fully developed and implemented in 1 to 2 years; it supports specialized functions of a single Business Unit; and it conforms to the modernized IRS architecture. These projects differ in scope from those funded by the Business Systems Modernization Program, which addresses major common tax administration systems that cross Business Unit lines.

The Committee believes that funds provided under the Information Systems account, particularly for development related activities, should be managed with the same diligence and financial controls as those activities funded through the Business Systems Modernization account. In addition, the Committee expects that as the Business Systems Modernization moves an increasing number of major projects into deployment, the Service will realign development activities funded under the Information Systems account so that they are managed and integrated formally into Business Systems Modernization activity. For this reason, the Committee directs the Commissioner to submit, concurrent with the fiscal year 2004 budget submission, a detailed budget justification for funds provided in the Information Systems account that outlines the specific use of all monies allocated in this appropriation, apportioning responsibility between operations and development functions, and specifying how program governance for these funds will meet the appropriate and rigorous requirements set for comparable activities in Business Systems Modernization.

BUSINESS SYSTEMS MODERNIZATION

Appropriations, 2002	\$391,593,000
Budget estimate, 2003	450,000,000
Committee recommendation	436,000,000

The Committee recommends an appropriation of \$436,000,000. This amount, in addition to \$14,000,000 provided in the fiscal year 2002 Supplemental, is equal to the President's fiscal year 2003 budget request. This account provides for revamping business practices and acquiring new technology. The agency is using a formal methodology to prioritize, approve, fund, and evaluate its portfolio of business systems modernization investments. This methodology enforces a documented, repeatable, and measurable process for managing investments throughout their life cycle. Investment decisions are approved by the IRS Core Business System Executive Steering Committee, chaired by the Commissioner.

BUSINESS SYSTEMS MODERNIZATION EFFORT

The Committee is pleased with the program's progress to date. In order to ensure more timely release of funds appropriated under this account in fiscal year 2003, the Committee directs the Internal Revenue Service (IRS), in consultation with the Department of the Treasury and the Office of Management and Budget, to submit a single business systems modernization spending plan to the Committee on Appropriations for the full use of this appropriation 15 days after the enactment of this appropriations Act. In addition, the IRS should articulate in its fiscal years 2003 and 2004 expenditure plans and the fiscal year 2004 budget submission how IRS intends to guarantee that products and projects delivered under the business systems modernization program are

fully integrated into the new business units. As in previous years, the Committee fully expects that the IRS will continue to brief and provide documents and all pertinent information to the General Accounting Office in a timely manner for review of the expenditure plan.

IRS—ADMINISTRATIVE PROVISIONS

The Committee has recommended approval of the following administrative provisions for the Internal Revenue Service:

Section 101 continues a provision which authorizes the IRS to transfer up to 5 percent of any appropriation made available to the agency in fiscal year 2003, to any other IRS account. The IRS is directed to follow the Committee's reprogramming procedures outlined earlier in this report.

Section 102 continues a provision which maintains a training program in taxpayer's rights and cross-cultural relations.

Section 103 continues a provision which requires the IRS to institute and enforce policies and procedures which will safeguard the confidentiality of taxpayer information.

Section 104 continues a provision which directs that funds shall be available for improved facilities and increased manpower to provide sufficient and effective 1-800 telephone assistance and that the Commissioner shall continue to make this a priority.

U.S. SECRET SERVICE

SALARIES AND EXPENSES

Appropriations, 2002	\$1,025,384,000
Budget estimate, 2003	1,010,435,000
Committee recommendation	1,010,817,000

The Committee recommends an appropriation of \$1,010,817,000 for the U.S. Secret Service in fiscal year 2003. The increase above the President's request reflects an additional \$740,000 for the National Center for Missing and Exploited Children.

The Secret Service is responsible for the security of the President, the Vice President and other dignitaries and designated individuals; for enforcement of laws relating to obligations and securities of the United States and financial crimes such as financial institution fraud and other fraud; and for protection of the White House and other buildings within Washington, D.C.

Investigations, protection, and uniformed activities.—The Service must provide for the protection of the President of the United States, members of his immediate family, the President-elect, the Vice President, or other officer next in the order of succession to the Office of the President, and the Vice President-elect, and the members of their immediate families unless the members decline such protection; protection of the person of a visiting head and accompanying spouse of a foreign state or foreign government and, at the direction of the President, other distinguished foreign visitors to the United States and official representatives of the United States performing special missions abroad; the protection of the person of former Presidents, their spouses and minor children unless such protection is declined. The Service is also responsible for the detection and arrest of persons engaged in counterfeiting, forging, or altering of any of the obligations or other securities of the United States and foreign governments; the investigation of thefts and frauds relating to Treasury electronic fund transfers; fraudulent use of debit and credit cards; fraud and related activity in connection with Government identification documents; computer fraud; food coupon fraud; and the investigation of personnel, tort claims, and other criminal and noncriminal cases.

The Secret Service Uniformed Division protects the Executive Residence and

grounds in the District of Columbia; any building in which White House offices are located; the President and members of his immediate family; the official residence and grounds of the Vice President in the District of Columbia; the Vice President and members of his immediate family; foreign diplomatic missions located in the Washington metropolitan area; and the Treasury Building, its annex and grounds, and such other areas as the President may direct on a case-by-case basis.

Presidential candidate protective activities.—The Secret Service is authorized to protect major Presidential and Vice Presidential candidates, as determined by the Secretary of the Treasury after consultation with an advisory committee. In addition, the Service is authorized to protect the spouses of major Presidential and Vice Presidential candidates; however, such protection may not commence more than 120 days prior to the general Presidential election.

MISSING AND EXPLOITED CHILDREN

The Committee has included \$1,633,000 for the Service's operation costs of the exploited child unit, associated with its continued efforts with the National Center for Missing and Exploited Children. The Committee has also included \$3,749,000 as a grant for investigations of exploited children.

STAFFING IN RHODE ISLAND

The Committee is concerned about the declining number of Secret Service special agents in Rhode Island, particularly in light of the increased demand for criminal investigative work in the areas of identity theft, bank fraud and counterfeit currency investigations. The Committee understands that the number of special agents, excluding the supervisor, has declined from seven in fiscal year 1998 to three in fiscal year 2002. The Committee urges the Secret Service to give the highest priority to funding additional staffing in Rhode Island for fiscal year 2003.

ACQUISITION, CONSTRUCTION, IMPROVEMENT AND RELATED EXPENSES

Appropriations, 2002	\$3,457,000
Budget estimate, 2003	3,519,000
Committee recommendation	3,519,000

The Committee recommends an appropriation of \$3,519,000 for the "Acquisition, construction, improvement and related expenses" account in fiscal year 2003, which is equal to the budget estimate.

This appropriation provides funding for security upgrades of existing facilities and the James J. Rowley Training Center to continue development of the current Master Plan and to maintain and renovate existing facilities to ensure efficient and full utilization of the Center.

DEPARTMENT OF THE TREASURY GENERAL PROVISIONS

The Committee recommends that certain general provisions be included in the Senate bill. The provisions do the following:

Section 110 continues a provision which pertains to reprogramming instructions for unobligated funds.

Section 111 continues a provision which authorizes certain basic services within the Treasury Department in fiscal year 2003, including purchase of uniforms; maintenance, repairs, and cleaning; purchase of insurance for official motor vehicles operated in foreign countries; and contracts with the Department of State for health and medical services to employees and their dependents serving in foreign countries.

Section 112 continues a provision which requires that funds provided to ATF for fiscal year 2003 will be expended in such a manner so as not to diminish enforcement efforts

with respect to section 105 of the Federal Alcohol Administration Act.

Section 113 continues a provision which authorizes transfers, up to 2 percent, between law enforcement appropriations under certain circumstances.

Section 114 continues a provision which authorizes transfers, up to 2 percent, between Departmental Offices, Office of Inspector General, Treasury Inspector General for Tax Administration, Financial Management Service, and the Bureau of the Public Debt appropriations under certain circumstances.

Section 115 continues a provision which authorizes transfer, up to 2 percent, between the Internal Revenue Service and the Treasury Inspector General for Tax Administration under certain circumstances.

Section 116 continues a provision to require that the purchase of law enforcement vehicles is consistent with Departmental vehicle management principles.

Section 117 continues a provision that prohibits the Department of the Treasury and the Bureau of Engraving and Printing from redesigning the \$1 Federal Reserve Note.

Section 118 continues a provision that authorizes the Secretary of the Treasury to transfer funds from Salaries and Expenses, Financial Management Service, to the Debt Services Account as necessary to cover the costs of debt collection. Such amounts shall be reimbursed to the Salaries and Expenses account from debt collections received in the Debt Services Account.

Section 119 continues a provision that extends the pilot project for designated critical occupations for 1 additional year.

Section 120 modifies and continues a provision that requires prior notification for the construction and operation of a museum by the United States Mint.

Section 121 continues a provision limiting the use of funds for the production of Customs declarations that do not inquire whether the passenger had been in the proximity of livestock.

Section 122 is a new provision directing the Federal Law Enforcement Training Center to establish an accrediting body to set standards for measuring and assessing the quality and effectiveness of Federal law enforcement training.

Section 123 is a new provision providing for a permanent extension of the Treasury Franchise Fund.

Section 124 is a new provision providing for licensing procedures for the Office of Foreign Assets Control.

Section 125 is a new provision authorizing a pilot project concerning reverse inspections for the Customs Service.

Section 126 is a new provision to allow the John C. Stennis Center for Public Service Development Trust Fund to invest in par value special securities issued by the Department of the Treasury.

Section 127 is a new provision to allow the James Madison Memorial Fellowship Trust Fund to invest in par value special securities issued by the Department of the Treasury.

Section 128 is a new provision regarding the rum rebate to Puerto Rico.

TITLE II—U.S. POSTAL SERVICE

PAYMENT TO THE POSTAL SERVICE FUND

Appropriations, 2002	\$596,093,000
Budget estimate, 2003	76,619,000
Committee recommendation	76,619,000

The Committee recommends an appropriation of \$76,619,000 in fiscal year 2003 for payments to the Postal Service Fund. This includes \$47,619,000 in advance appropriations made available on October 1, 2003, and \$29,000,000 as partial reimbursement for losses incurred in previous years for reduced-

rate mail, as required by the Revenue Forgone Act of 1993. The Committee also recommends an advance appropriation of \$31,014,000 for fiscal year 2004 as requested by the President. This amount consists of \$48,999,000 for providing free mail to the blind and overseas voters from which \$17,985,000 has been deducted to reconcile previous fiscal year estimated mail volume with actual volume.

Revenue forgone on free and reduced-rate mail enables postage rates to be set at levels below the unsubsidized rates for certain categories of mail as authorized by subsections (c) and (d) of section 2401 of title 39, United States Code. Free mail for the blind and overseas voters will continue to be provided at the funding level recommended by the Committee.

The Committee includes provisions in the bill that would assure that mail for overseas voting and mail for the blind shall continue to be free; that 6-day delivery and rural delivery of mail shall continue at the 1983 level; and that none of the funds provided be used to consolidate or close small rural and other small post offices in fiscal year 2003. These are services that must be maintained in fiscal year 2003 and beyond.

The Committee believes that 6-day mail delivery is one of the most important services provided by the Federal Government to its citizens. Especially in rural and small town America, this critical postal service is the linchpin that serves to bind the Nation together. The Committee recognizes that the Postal Service faces fiscal woes, but it believes that there are other means available to resolve this problem than reducing mail delivery to Americans.

RESPONSE TO THE ANTHRAX THREAT TO THE MAIL

The Committee was extremely concerned about the safety and security of postal employees and the American people as well as the mail as a result of last year's anthrax attacks. Following the attacks, the Committee held a hearing in November 2001 to learn more about how to protect the Nation's mail system from biohazards. Also in November 2001, the President provided \$175,000,000 in funds under his control from the funds provided by Congress in response to the September 11, 2001 terrorist attacks. In December 2001, this Committee took the lead in appropriating an additional \$500,000,000 to the Postal Service to further assist its response for additional funds to protect the mail. The President requested and received an additional \$87,000,000 in supplemental fiscal year 2002 funding to continue its efforts to improve mail safety and security.

The Committee understands that the Postal Service formally requested of the administration an additional \$799,800,000 for fiscal year 2003. The Committee understands the threat to mail safety continues. However, the Office of Management and Budget has yet to transmit a request for these funds to the Congress and the Committee's allocation is not sufficient to meet this additional requirement.

PEST INTRODUCTIONS

The Committee is concerned that recent introductions of plant and animal pests and diseases into Hawaii may have occurred through the U.S. postal system. Such introductions have severe consequences for U.S. agriculture, biodiversity, and public health and safety. The U.S. Postal Service is directed to work with the U.S. Department of Agriculture and the Hawaii Department of Agriculture to devise and implement a program to combat pest introductions.

ELY, NEVADA POST OFFICE

The Committee requests the United States Postal Service to conduct an analysis of the

recent decision to close the contract Post Office located in downtown Ely, Nevada. Within 90 days of the enactment of this Act, the Postal Service shall submit to the Committee a report on why the Ely Post Office was closed and what effect it believes the closure will have on Ely.

TITLE III—EXECUTIVE OFFICE OF THE PRESIDENT AND FUNDS APPROPRIATED TO THE PRESIDENT

EXECUTIVE OFFICE OF THE PRESIDENT CONSOLIDATION

For the second year in a row, the administration has proposed a consolidation of the various accounts which comprise the Executive Office of the President. Last year, the Committee gave this request considerable deliberation and concluded that the existing structure well served the Committee's and the public's need for sunshine in the funding and operation of these important functions. The existing structure also provides the executive branch with the flexibility it needs to reprogram funds within accounts to address unforeseen budget needs upon the notification and approval of the Committee. As noted in discussions with administration officials last year, as well as in hearings before this Committee this year, at no time has this Committee rejected an administration's request to reprogram existing funds within accounts in this Title.

COMPENSATION OF THE PRESIDENT AND THE WHITE HOUSE OFFICE

COMPENSATION OF THE PRESIDENT

Appropriations, 2002	\$450,000
Budget estimate, 2003	450,000
Committee recommendation	450,000

The fiscal year 2003 budget request for compensation of the President is \$450,000. This amount includes \$400,000 for the direct salary of the President as authorized by 3 U.S.C. 102, and a \$50,000 expense account for official expenses, with any unused portions reverting to the Treasury. This expense account is not considered as taxable to the President.

The Committee recommends the full budget request of \$450,000 for compensation of the President.

SALARIES AND EXPENSES

Appropriations, 2002	\$54,651,000
Budget estimate, 2003	84,595,000
Committee recommendation	59,735,000

The Committee recommends an appropriation of \$59,735,000 for the White House Office. This is a decrease of \$24,860,000 below the budget estimate because a portion of the funds requested for this account are provided in a new "Office of Homeland Security" account.

These funds provide the President with staff assistance and provide administrative services for the direct support of the President. Public Law 95-570 authorizes appropriations for the White House Office and codifies the activities of the White House Office.

OFFICE OF HOMELAND SECURITY

Appropriations, 2002	\$27,000,000
Budget estimate, 2003	24,844,000
Committee recommendation	24,844,000

The Office of Homeland Security was created by Executive Order 13288 which was signed by the President on October 8, 2001. The purpose of the Office, as stated in the Executive Order, is "to develop and coordinate the implementation of a comprehensive national strategy to secure the United States terrorist threats or attacks."

EXECUTIVE RESIDENCE AT THE WHITE HOUSE

OPERATING EXPENSES

Appropriations, 2002	\$11,695,000
----------------------------	--------------

Budget estimate, 2003	12,228,000
Committee recommendation	12,228,000

The Committee recommends an appropriation of \$12,228,000 for the Executive Residence at the White House.

These funds provide for the care, maintenance, refurbishing, improvement, heating, and lighting, including electrical power and fixtures, of the Executive Residence.

The Executive Residence staff provides for the operation of the Executive Residence. A staff of 40 domestic employees accomplish general housekeeping, prepare and serve meals, greet visitors, and provide services as required in support of official and ceremonial functions. A staff of 33 tradespersons, including plumbers, carpenters, painters, on a single shift; electricians on a double shift; and operating engineers on a 24-hour basis, maintains and makes repairs, minor modifications, and improvements to the 132 rooms and the mechanical systems, and provides support for official and ceremonial functions.

A staff of 12 specialized employees provide services necessary to the operation of the White House and official and ceremonial functions. This staff includes four florists, four curators, and four calligraphers.

An administrative staff consists of the chief usher, four assistant ushers, one executive grounds superintendent, one operating accountant, one accounting technician, one computer network engineer, and one administrative officer. This staff is charged with management and administrative functions of the Executive Residence. This requires coordination with the Executive Office of the President, the National Park Service, the military, the U.S. Secret Service, the General Services Administration, and other agencies.

During larger events, the Executive Residence staff is assisted by contract personnel under personal services contract agreements (services by agreement) to provide additional help as required for official and ceremonial functions.

WHITE HOUSE REPAIR AND RESTORATION

Appropriations, 2002	\$8,625,000
Budget estimate, 2003	1,200,000
Committee recommendation	1,200,000

The Committee recommends an appropriation of \$1,200,000 for White House Repair and Restoration. The Committee recommendation is equal to the budget estimate.

To provide for the repair, alteration, and improvement of the Executive Residence at the White House, a separate account was established in fiscal year 1996 to program and track expenditures for the capital improvement projects at the Executive Residence at the White House.

SPECIAL ASSISTANCE TO THE PRESIDENT

SALARIES AND EXPENSES

Appropriations, 2002	\$3,925,000
Budget estimate, 2003	4,066,000
Committee recommendation	4,066,000

The Committee recommends an appropriation of \$4,066,000 for special assistance to the President.

The "Special assistance to the President" account was established on September 26, 1970, to enable the Vice President to provide assistance to the President. This assistance takes the form of directed and special presidentially assigned functions.

The objective of the Office of the Vice President is to efficiently and effectively advise, assist, and support the President in the areas of domestic policy, national security affairs, counsel, administration, press, scheduling, advance, special projects, and assignments. Assistance is also provided for the wife of the Vice President.

The Vice President also has a staff funded by the Senate to assist him in the performance of his duties in the legislative branch.

The level of funding recommended by the Committee will allow for 24 full-time permanent positions in fiscal year 2003.

OFFICIAL RESIDENCE OF THE VICE PRESIDENT

OPERATING EXPENSES

Appropriations, 2002	\$318,000
Budget estimate, 2003	324,000
Committee recommendation	324,000

The Committee recommends an appropriation of \$324,000 for the official residence of the Vice President.

The “Official Residence of the Vice President (residence)” account was established by Public Law 93-346 on July 12, 1974. The residence is located on the grounds of the Naval Observatory in the District of Columbia and serves as a facility for official and ceremonial functions and as a home for the Vice President and his family.

The objective of the “Residence” account is to provide for the care of, operation, maintenance, refurnishing, improvement, and heating and lighting of the residence and to provide such appropriate equipment, furnishings, dining facilities, services, and provisions as may be required to enable the Vice President to perform and discharge the duties, functions, and obligations associated with his high office.

Funds to renovate the residence are provided to the residence through the Department of the Navy budget. The Committee has had a longstanding interest in the condition of the residence and expects to be kept fully apprised by the Vice President’s office of any and all renovations and alterations made to the residence by the Navy.

COUNCIL OF ECONOMIC ADVISERS

SALARIES AND EXPENSES

Appropriations, 2002	\$4,211,000
Budget estimate, 2003	4,405,000
Committee recommendation	4,405,000

The Committee recommends an appropriation of \$4,405,000 for salaries and expenses of the Council of Economic Advisers.

The Council of Economic Advisors analyzes the national economy and its various segments, advises the President on economic developments, recommends policies for economic growth and stability, appraises economic programs and policies of the Federal government, and assists in the preparation of the annual Economic Report of the President to Congress.

OFFICE OF POLICY DEVELOPMENT

SALARIES AND EXPENSES

Appropriations, 2002	\$4,142,000
Budget estimate, 2003	4,221,000
Committee recommendation	4,221,000

The Committee recommends \$4,221,000 for the Office of Policy Development.

The Office of Policy Development supports the National Economic Council and the Domestic Policy Council, in carrying out their responsibilities to advise and assist the President in the formulation, coordination, and implementation of economic and domestic policy. The Office of Policy Development also provides support for other domestic policy development and implementation activities as directed by the President.

NATIONAL SECURITY COUNCIL

SALARIES AND EXPENSES

Appropriations, 2002	\$7,494,000
Budget estimate, 2003	9,525,000
Committee recommendation	9,525,000

The Committee recommends an appropriation of \$9,525,000 for the salaries and expenses of the National Security Council (NSC).

The primary purpose of the Council is to advise the President with respect to the integration of domestic, foreign, and military policies relating to the national security.

The funding level provided by the Committee will support 60 full-time equivalent positions, or the same since the fiscal year 1996 level for the normal activities of the NSC.

OFFICE OF ADMINISTRATION

SALARIES AND EXPENSES

Appropriations, 2002	\$96,995,000
Budget estimate, 2003	70,128,000
Committee recommendation	70,128,000

The Committee has provided \$70,128,000 to the Office of Administration for fiscal year 2003.

The Office of Administration’s mission is to provide high-quality, cost-effective administrative services to the Executive Office of the President. These services, defined by Executive Order 12028 of 1977, include financial, personnel, library and records services, information management systems support, and general office services.

The Office of Administration receives reimbursements for information management support and general office services.

OFFICE OF MANAGEMENT AND BUDGET

SALARIES AND EXPENSES

Appropriations, 2002	\$70,752,000
Budget estimate, 2003	70,752,000
Committee recommendation	70,752,000

The Committee recommends an appropriation of \$70,752,000.

The Office of Management and Budget (OMB) assists the President in the discharge of his budgetary, management, and other executive responsibilities.

OMB-wide offices.—Executive direction and coordination for all Office of Management and Budget activities is provided. This includes the Director’s immediate office as well as staff support in the areas of budget review, administration, public affairs, office of communications, legislative reference, legislative affairs, economic policy, and general counsel. Budget instructions and procedures are developed, review of agency estimates is coordinated, budget data systems are maintained, agency financial management plans are reviewed, the budget document is prepared, and scorekeeping is accomplished.

National security and international affairs; general government and finance; natural resources, energy, and science; education, income maintenance, and labor; and health/personnel.—Agency programs, budget requests, and management activities are examined, appropriations are apportioned, proposed changes in agency functions are studied, and special studies aimed at establishing goals and objectives that would result in long- and short-range improvements in the agencies’ financial, administrative, and operational management are conducted.

Financial management.—In conjunction with the Chief Financial Officers Council, prepares the Government-wide financial management status report and 5-year plan, monitors execution of the plan; provides policy guidance on preparation and audit of financial statements, financial systems requirements, management controls, and cost accounting and audit requirements for the non-Federal grantee community.

Information and regulatory affairs.—Agency proposals to implement or revise Federal regulations and information collection re-

quirements are reviewed and coordinated. Information resources management and statistical policies and practices are analyzed and developed.

Procurement policy.—The Office of Federal Procurement Policy is responsible for promoting economy, efficiency, and effectiveness in the procurement of property and services by and for the executive branch.

HARRY S TRUMAN MEMORIAL SCHOLARSHIPS

The Committee strongly supports the Truman Scholarship program and its original intentions. The Committee is concerned, however, that the regulations regarding awarding a scholarship to at least one qualified applicant from each State has been violated numerous times in recent years. The Committee directs the Board of the Truman Scholarship program to strictly adhere to its statutory mandate to “assure that at least one Truman scholar shall be selected each year from each State in which there is at least one resident applicant who meets the minimum criteria established by the Foundation.”

OFFICE OF NATIONAL DRUG CONTROL POLICY

SALARIES AND EXPENSES

Appropriations, 2002	\$25,263,000
Budget estimate, 2003	25,458,000
Committee recommendation	26,456,000

The Committee recommends an appropriation of \$26,456,000. The Committee provides \$1,000,000 for the National Alliance for Model State Drug Laws but does not recommend an increase to the official reception and representation fund.

The Office of National Drug Control Policy (ONDCP), established by the Anti-Drug Abuse Act of 1988, and reauthorized by Public Law 105-277, is charged with developing policies, objectives and priorities for the National Drug Control Program. In addition, ONDCP administers the Counterdrug Technology Assessment Center (CTAC), the High Intensity Drug Trafficking Areas (HIDTA) program and the Special Forfeiture Fund. The account provides funding for personnel compensation, travel, and other basic operations of the Office, and for general policy research to support the formulation of the National Drug Control Strategy. Funds are also provided for the National Alliance for Model State Drug Laws, which encourages States to adopt and implement laws, policies, and regulations to reduce drug trafficking, drug use, and their related consequences.

COUNTERDRUG TECHNOLOGY ASSESSMENT CENTER

Appropriations, 2002	\$42,300,000
Budget estimate, 2003	40,000,000
Committee recommendation	40,000,000

The Committee recommends an appropriation of \$40,000,000 for the Counterdrug Technology Assessment Center (CTAC). This funding includes \$22,000,000 for the continuation of the technology transfer program by CTAC to State and local law enforcement in their efforts to combat drugs. Pursuant to the Office of National Drug Control Policy Reauthorization Act of 1998 (Title VII of Division C of Public Law 105-277), CTAC serves as the central counterdrug research and development organization for the U.S. Government.

The Committee expects multiagency research and development programs to be coordinated by CTAC in order to prevent duplication of effort and to assure that whenever possible, those efforts provide capabilities that transcend the need of any single Federal agency. Prior to the obligation of these funds, the Committee expects to be notified

by the chief scientist on how these funds will be spent; it also expects to receive periodic reports from the chief scientist on the priority counterdrug enforcement research and development requirements identified by the Center and on the status of projects funded by CTAC.

The Committee continues to believe CTAC should work closely and cooperatively with the individual law enforcement agencies in the definition of a national research and development program which addresses agency requirements with respect to timeliness, operational utility, and consistency with agency budget plans.

Last year the Committee provided additional funds for CTAC to focus on conducting substance abuse research and training Native American physicians in the field of substance abuse research. The Committee requests that the chief scientist provide periodic updates on this process.

COUNTERDRUG TECHNOLOGY TRANSFER PROGRAM

The Committee fully supports the continuation of this program and, therefore, has provided \$22,000,000 for its operation in fiscal year 2003. The Committee believes that this program demonstrates the best that the Federal Government has to offer to State and local law enforcement in their efforts to combat drug related crimes. The Committee is encouraged by the positive reception this program has received by State and local law enforcement agencies as current requests for technology continue to outpace resources by over four to one. The Committee expects that CTAC will conduct further outreach to State and local agencies to educate them about the program. Finally, the Committee would encourage CTAC to work with private industry to make their developed technology available to State and local law enforcement through this program. The Committee requests that ONDCP report within 60 days after the date of enactment of the fiscal year 2003 appropriations bill on the number of requests received, promotion efforts to State and local law enforcement, and the effectiveness and interest in this program by these law enforcement communities.

FUNDS APPROPRIATED TO THE PRESIDENT

FEDERAL DRUG CONTROL PROGRAMS

HIGH-INTENSITY DRUG TRAFFICKING AREAS (INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$226,350,000
Budget estimate, 2003	206,350,000
Committee recommendation	226,350,000

The Committee recommends an appropriation of \$226,350,000, which is \$20,000,000 above the budget request. The Committee directs that funding shall be provided for the existing High Intensity Drug Trafficking Areas (HIDTA) at no less than the fiscal year 2003 budget request level.

The Committee has included a new provision to prohibit the use of funds to consolidate management of the California, Arizona, New Mexico, and Texas partnerships in the El Paso office. Such a centralization of the Southwest Border HIDTA could undermine operational flexibility and law-enforcement support for the HIDTA program, ultimately degrading its effectiveness.

The Committee is deeply disturbed over ONDCP actions and communications with the Committee concerning the HIDTA program over the past year. The Committee provided additional funds in fiscal year 2002 for the HIDTA program to increase funding for or expand existing HIDTAs, or to fund newly designated HIDTAs. The Committee was not consulted when ONDCP decided how to obligate these funds, in some cases for different

purposes. In addition, the Committee is concerned that those decisions were not completely thought out, and that necessary programmatic personnel were not consulted.

The Committee is aware of the continued interest in the creation of new, and expansion of existing, HIDTAs. The Committee is also profoundly aware of proposals submitted to ONDCP for the additional \$20,000,000 provided by the Congress in fiscal year 2002 that went unfunded in ONDCP's spending plan. Prior to any notification or any obligation of funds, the Committee directs ONDCP to submit for approval to the Committee on Appropriations a spending plan for the additional \$20,000,000 for fiscal year 2003. The Committee directs ONDCP to review the Senate report for suggestions on how to allocate portions of the additional funds and requires ONDCP to provide a detailed explanation to the Committee on Appropriations on the reasons why any of the Senate recommendations receive an amount lower than that requested. The Committee also directs ONDCP to provide a detailed timeline and explanation to the Committee 30 days after the date of enactment on how the additional \$20,000,000 provided in fiscal year 2002 was obligated.

The HIDTA program was established by the Anti-Drug Abuse Act of 1988, as amended, and the Office of National Drug Control Policy's reauthorization, Public Law 105-277, to provide assistance to Federal, State and local law enforcement entities operating in those areas most adversely affected by drug trafficking. In allocating the HIDTA funds, the Committee expects the Director of ONDCP to ensure that the activities receiving these limited additional resources are used strictly for implementing the strategy for each HIDTA, taking into consideration local conditions and resource requirements. These funds should not be used to supplant existing support for ongoing Federal, State, or local drug control operations normally funded out of the operating budgets of each agency. The remaining funds may be transferred to Federal agencies and departments to support Federal antidrug activities.

The Committee believes that the Director should take steps to ensure that the HIDTA funds are transferred to the appropriate drug control agencies expeditiously. To ensure that the funding allocations meet the priorities outlined in the strategies, the Committee instructs the Director to submit the strategies, along with the identification of how the funds will be spent, to the Committee for approval prior to the obligation of the funds. The Committee also expects to be notified if any changes are made in the spending plans presented to it during the course of the fiscal year. The Committee further instructs the Director to submit the updated 2003 strategies for each of the HIDTA's to the Committee for review and to obligate the HIDTA funds within 120 days of enactment of this Act. This provision may be waived if a request is made to the Committee and has been approved in advance according to the normal reprogramming procedures.

The Committee expects the Director to take actions necessary to ensure that all HIDTA funds are being used to support only those activities which are directly linked to the individual HIDTA strategies recommended by the HIDTA coordinators and which support the goals and objectives outlined in each of these strategies.

ROCKY MOUNTAIN HIDTA

The Committee understands that the Office of National Drug Control Policy is reviewing a proposal from the Rocky Mountain High Intensity Drug Trafficking Area to expand its operation into five counties in Montana. The Committee encourages ONDCP to

closely and expeditiously review the merit of this request. However, the Committee directs that any expansion of the Rocky Mountain HIDTA be accomplished in such a way so as not to diminish the funding currently available to the existing HIDTA entities.

ECSTASY REDUCTION INITIATIVE

The Committee is extremely concerned about the use of Ecstasy among teenagers and young adults. The use of this dangerous drug has reached alarming proportions among junior high and high school students, and the numerous fatalities associated with Ecstasy do not appear to have had any impact on the drug's popularity. The Committee encourages the Rocky Mountain HIDTA to continue the Ecstasy reduction initiative to help deal with this steadily increasing problem, with emphasis on designated counties in Colorado.

COMMUNITY INVOLVEMENT IN HIDTAS

The Committee recognizes the positive impact and successes of the cooperative law enforcement arrangements of the HIDTA. As HIDTAs have matured, they have demonstrated an ability to address their HIDTA-specific problems with unique and effective solutions. Many HIDTAs have begun to reach outside of the law enforcement community to other organizations which affect the effort to combat drugs in our communities. The Committee has seen success in the HIDTAs as they begin to incorporate the important work of those in the community itself, such as in the areas of treatment and counseling. The Committee is encouraged by this rounding out of the HIDTAs' efforts and encourages the HIDTAs to continue to further develop these relationships.

MIDWEST HIDTA

The Committee is concerned about the growing production, trafficking, and use of methamphetamine throughout the Midwest HIDTA. The Committee is distressed that ONDCP did not provide more funds out of the additional \$20,000,000 fiscal year 2002 to address this situation.

The Committee notes that the State of Missouri, which is part of the Midwest HIDTA, had the highest number of methamphetamine lab seizures in the country. The fight against methamphetamine places a tremendous burden on State and local law enforcement. Additional funding would allow Missouri to continue to target methamphetamine labs, and would enable ONDCP to designate additional counties, including counties in the Southern District of Illinois, as part of the Midwest HIDTA where appropriate. The Committee directs ONDCP to work with the affected counties to determine whether they meet the statutory criteria required for designation as a HIDTA.

BALANCED FOCUS BETWEEN URBAN AND RURAL AREAS

The Committee is also concerned about the direction ONDCP seems to be taking the HIDTA program with the new National Priority Targeting Project. According to ONDCP, this Project will enhance existing HIDTA-affiliated law enforcement efforts to curtail the availability of illegal drugs through the disruption and dismantlement of specific major drug trafficking organizations that coincide with Department of Justice National Priority Targets ("NPTs"). The Committee is concerned that this "King-pin" strategy could significantly impact the level of support provided to cases that have been regional impact targets in the past.

GULF COAST HIDTA

The Committee recognizes that the Gulf Coast HIDTA covers the full spectrum of drug trafficking and abuse, trafficking modalities and types of criminal organizations.

In its continued effort to combat these threats, the Gulf Coast HIDTA is seeking to expand into new areas of Louisiana, Mississippi, and Alabama. ONDCP is encouraged to work with Louisiana and other interested States to further their initiatives.

NEW ENGLAND HIDTA

The Committee recognizes that the growing availability and abuse of inexpensive, high-purity heroin has had a harmful impact on the New England region, resulting in an increase in the number of drug-related arrests, overdose deaths and injuries, and individuals seeking treatment for addiction. The Committee is also aware of the extraordinary challenges posed by increasing drug importation into the region across the northern U.S. border and via marine transportation. Therefore, the Committee directs ONDCP to focus additional resources on these emerging drug threats and to work with the New England HIDTA to address unmet needs in the areas of task force expansion, training, intelligence, space and equipment, with a particular focus on Rhode Island.

SOUTHWEST INDIANA

The Committee is aware of a proposal to create a HIDTA in Southwest Indiana to combat the drastic increase in the production, use and distribution of methamphetamine. The Indiana State Police, in conjunction with local and Federal officials, would target the following counties in Southwest Indiana: Benton, Clay, Crawford, Daviess, Dubois, Fountain, Gibson, Greene, Jackson, Jasper, Knox, Lawrence, Martin, Monroe, Morgan, Montgomery, Newton, Orange, Owen, Parke, Perry, Pike, Posey, Putnam, Spencer, Sullivan, Vanderburgh, Vigo and Warrick. The State of Indiana has experienced an exponential increase in the number of methamphetamine labs that have been seized—43 in 1998, 129 in 1999, 314 in 2000, and 546 in 2001. State Police estimate that they will seize over 800 labs in 2002. ONDCP is encouraged to work with the Indiana State Police to develop and implement this innovative approach to combating the spread and distribution of methamphetamine. Recognizing current resource limitations, the Committee has provided additional discretionary funding and directs ONDCP to work with the affected counties to determine whether they meet the statutory criteria required for designation as a HIDTA.

MILWAUKEE HIDTA

The Committee understands that the ONDCP is reviewing a proposal to expand the Milwaukee HIDTA to the metropolitan areas surrounding Milwaukee along the I-94 corridor connecting Milwaukee to Chicago. This extension of the program to Racine, Kenosha and Waukesha counties would assist Milwaukee's efforts and attack the scourge of drugs in the surrounding communities. The Committee has provided additional discretionary funding and encourages ONDCP to work with these States and communities to determine whether they meet the statutory criteria required for designation as a HIDTA and direct the necessary resources towards this proposal.

SOUTHWEST BORDER HIDTA

The Committee recognizes the strides that have been made by the New Mexico partnership of the Southwest Border HIDTA in disrupting heroin trafficking in New Mexico. Despite these gains, however, the availability of heroin continues to be prevalent in Rio Arriba County and other counties in New Mexico. The Committee directs the Director of ONDCP to evaluate the situation and work with State and local law enforcement to provide adequate resources to target this continuing threat.

PHILADELPHIA/CAMDEN HIDTA

The Committee is aware of the current coordination of the State of Delaware with the Philadelphia/Camden HIDTA. As a result of this strong relationship, the Committee directs the Director of ONDCP to evaluate the current situation to determine whether or not Delaware meets the statutory requirements to qualify for inclusion into the Philadelphia/Camden HIDTA.

APPALACHIA HIDTA

The Committee is concerned that the three Appalachia HIDTA States, West Virginia, Kentucky, and Tennessee, along with California and Hawaii, account for over 77 percent of the domestic production of marijuana. The three Appalachia HIDTA States are also producing some of the most potent marijuana available. For fiscal year 2000, the West Virginia National Guard, which has mounted a vigorous counterdrug program in cooperation with the Appalachia HIDTA, estimates that the eradicated marijuana crop in West Virginia yielded plants valued at \$57,000,000. Therefore, the Committee directs ONDCP to work with State and local law enforcement officials to provide additional resources to combat this threat.

SOUTH CAROLINA HIDTA

The Committee is aware of a proposal to create a HIDTA in Charleston County, South Carolina. Charleston, South Carolina is the fourth largest port in the United States, with 177,000 containers annually entering the United States. The Committee understands the proposal would target, disrupt, and dismantle narcotics smuggling operations at the Ports of Charleston, Georgetown, and Port Royal, South Carolina. The Committee directs ONDCP to work with the Federal, State, and local law enforcement agencies in South Carolina to determine whether these areas meet the statutory criteria required for designation as a HIDTA.

NORTHWEST HIDTA

The Committee recognizes that Washington State has recently experienced tremendous growth in the production and use of methamphetamine. In fact, Washington is now second in the country in methamphetamine production, after California. Combating methamphetamine and other illegal drugs takes a multi-faceted approach, including the use of narcotics canines and support from various Federal agencies. Washington State has recently lost a number of critical drug detecting canines. Therefore, the Committee directs ONDCP to focus additional resources on these emerging drug threats, and in particular funding for additional narcotic canines to work with the Northwest HIDTA to address unmet needs in detection and enforcement.

HIDTA EFFORTS TO COMBAT METHAMPHETAMINE IN RURAL AREAS

The Committee is concerned about the increasing threat posed by methamphetamine production, trafficking, and use, especially in rural, underpopulated areas. Recognizing that the Director of ONDCP designated the Midwest HIDTA in 1996 to specifically address this threat, the Committee encourages ONDCP to continue to focus available resources on combating this emerging drug threat not only in the Midwest HIDTA, but in all HIDTAs operating in traditionally underserved areas.

WEB SERVICES TECHNOLOGY AND NETWORKING

The Committee provides \$1,150,000 to the Rocky Mountain HIDTA for a demonstration project in Colorado that uses web-based technology to securely integrate disparate data bases in real time for the purpose of enhancing the ability of law enforcement agencies to share and exchange information within

and between agencies in order to improve public safety.

SPECIAL FORFEITURE FUND

Appropriations, 2002	\$239,400,000
Budget estimate, 2003	251,300,000
Committee recommendation	172,700,000

The Committee recommends an appropriation of \$172,700,000. The Committee provides \$100,000,000 for the continuation of the National Youth Anti-Drug Media Campaign. The Committee included a total of \$5,900,000 for the United States Anti-Doping Agency.

The Anti-Drug Abuse Act of 1988, as amended, and the Office of National Drug Control Policy's reauthorization, Public Law 105-277, established the Special Forfeiture Fund to be administered by the Director of ONDCP. The monies deposited in the Fund support high-priority drug control programs and may be transferred to drug control agencies or may be directly obligated by the Director of ONDCP.

NATIONAL MEDIA CAMPAIGN

The Committee has been supportive of the national media campaign and has provided consistent funding for this program. When this program was initially funded by the Congress in fiscal year 1998, it was with the understanding that within 3 years there would be demonstrable behavior changes in America's youth with relation to drug use. To date, the Congress has provided over \$928,872,000 for this program and has done so at the expense of many other important law enforcement needs. The Committee is concerned that drug use is clearly increasing in spite of the national media campaign, leading some observers to conclude it has not had a noticeable impact on drug use among America's youth.

The May and November 2002 evaluations by Westat and the Annenberg School for Communication of the University of Pennsylvania confirmed numerous concerns over the effectiveness of the media campaign. It concluded that while there appears to be a favorable effect on parents, youth—the target audience for the program—do not seem to obtain similar benefits. It was the intent of both the authorizers and the appropriators to affect the behavior of drug use among youth over the course of a 5-year program. Unfortunately, we find ourselves back at square one after spending close to \$1,000,000,000 of taxpayer money.

The Committee held a hearing on this subject on June 19, 2002, shortly after the release of the Westat evaluation. The issues raised during the hearing highlighted the numerous controversies associated with the campaign and speculation regarding the cause. ONDCP is staking the future of the media campaign on an advertising effort it developed outside the parameters and participants specified in the authorization. ONDCP also stated that to move forward with the campaign, additional testing needed to be performed prior to any airing of advertising. The Committee agrees with the Director on fully testing the advertising.

The Committee has cautioned ONDCP for a number of years about the growing number of controversies and maintaining the true essence of the program as authorized by Congress. Recent events have resulted in a loss of the Committee's confidence in the management of the campaign, and the reason the Committee has decreased the allocation for the campaign.

DRUG-FREE COMMUNITIES ACT

The accelerating rate of drug use by young Americans is a major concern that must be addressed. The Committee, therefore, provides \$60,000,000 in support of the Drug-Free Communities Act. These funds will be used

to support the establishment of local counterdrug efforts that are characterized by strong conditions for local initiatives, support, and accountability. In addition, the requirement for participating communities to match funding will help ensure the degree of commitment necessary to succeed.

The Drug Free Communities Support Program Reauthorization (Public Law 107-82) authorized ONDCP to make a grant to establish a National Community Anti-Drug Coalition Institute. ONDCP instead solicited applications for a cooperative agreement. The sponsors of the provision did not intend for the National Community Anti-Drug Coalition Institute to be hampered by layers of bureaucracy which duplicate current efforts.

Congress created an advisory commission to oversee and guide the program when it authorized the Drug Free Communities Support Program in 1997. Creating a second advisory committee to oversee the National Community Anti-Drug Coalition Institute is a needless duplication and expense. In addition, avoiding programmatic duplications of effort should be the responsibility of ONDCP, and should not be shifted to the grant recipient.

The requirements for a grant recipient were clearly written in the authorizing legislation, and the sponsors of the reauthorization legislation are unaware of any organization besides the Community Anti-Drug Coalitions of America who meet these qualifications. As a result, the Committee has included language directing ONDCP to provide a \$2,000,000 grant directly to the Community Anti-Drug Coalitions of America to establish and maintain the National Community Anti-Drug Coalition Institute.

NATIONAL DRUG-FREE WORKPLACE

The Committee recognizes the work of the National Drug-Free Workplace Alliance to promote and assist the establishment of drug-free workplace programs and provide comprehensive drug-free workplace services to businesses. In addition, the Committee understands that the Alliance provides technical assistance and up-to-date workplace substance abuse information to communities, drug-free workplace organizations, and other similar groups through a national network of experts and professionals with drug-free workplace interests. The Committee urges ONDCP to work with the National Drug-Free Workplace Alliance as it coincides with ONDCP's mission and encourages cooperative efforts relating to the National Clearinghouse.

UNITED STATES ANTI-DOPING AGENCY

The Committee provides \$5,900,000 for efforts of the United States Anti-Doping Agency (USADA) under the Special Forfeiture Fund. The Committee directs ONDCP to provide the entire amount directly to USADA within 30 days after enactment.

USADA was created to oversee testing, education, research, and adjudication on behalf of America's athletes participating in the Olympic, Pan American, and Paralympic Games. The Committee has provided additional funds to increase the number of "No-Advanced-Notice" tests, to increase research funding at university and research laboratories, and to expand their efforts to educate the youth of America on health issues and the ethics of competing fairly in sport. The Committee continues to be impressed with the operations of this new agency and wishes to congratulate them on the international recognition of their efforts.

DRUG COURT INSTITUTE

The Committee provides \$1,000,000 for the National Drug Court Institute. The Committee is aware of the extraordinary growth in drug courts across the country and the

important training of new drug courts that the Institute provides. Drug courts provide an effective means to fight drug-related crime through the cooperative efforts of State and local law enforcement, the judicial system, and the public health treatment network.

TITLE IV—INDEPENDENT AGENCIES

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

SALARIES AND EXPENSES

Appropriations, 2002	\$4,629,000
Budget estimate, 2003	4,629,000
Committee recommendation	4,629,000

The Committee recommends \$4,629,000 for the Committee for Purchase From People Who Are Blind or Severely Disabled (CPPBSD).

The CPPBSD administers the Javits-Wagner-O'Day Act (JWOD) of 1971, as amended. Its primary objective is to use the purchasing power of the Federal Government to provide people who are blind or have other severe disabilities with employment and training that will develop and improve job skills as well as prepare them for employment options outside the JWOD program. In fiscal year 2003, the Committee's goal is to employ approximately 50,000 people who are blind or have other severe disabilities in 650 producing nonprofit agencies. The Committee's duties include promoting the program; determining which products and services are suitable for Government procurement from qualified nonprofit agencies serving people who are blind or have other severe disabilities; maintaining a procurement list of such products and services; determining the fair market price for products and services on the procurement list; and making rules and regulations necessary to carry out the purposes of the Act. In fiscal year 2003, the Committee's goal is to have sales of \$1.6 billion.

The Committee staff's responsibilities include promoting and assessing the overall program; supervising the selection and assignment of new products and services; assisting in establishing prices; reviewing and adjusting these prices; verifying the qualifications of nonprofit agencies; and monitoring their performance.

FEDERAL ELECTION COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$43,689,000
Budget estimate, 2003	45,244,000
Committee recommendation	45,244,000

The Committee recommends an appropriation of \$45,244,000 for the Federal Election Commission.

The Federal Election Commission administers the disclosure of campaign finance information, enforces limitations on contributions and expenditures, supervises the public funding of Presidential elections, and performs other tasks related to Federal elections.

FEDERAL LABOR RELATIONS AUTHORITY

SALARIES AND EXPENSES

Appropriations, 2002	\$26,524,000
Budget estimate, 2003	28,684,000
Committee recommendation	28,677,000

The Committee recommends an appropriation of \$28,677,000 for the Federal Labor Relations Authority.

The Federal Labor Relations Authority (FLRA) serves as a neutral party in the settlement of disputes that arise between unions, employees, and agencies on matters outlined in the Federal Service Labor Management Relations statute, decides major policy issues, prescribes regulations, and dis-

semimates information appropriate to the needs of agencies, labor organizations, and the public. Establishment of the FLRA gives full recognition to the role of the Federal Government as an employer.

In addition, the FLRA is engaged in case-related interventions and training and facilitation of labor-management partnerships and in resolving disputes. FLRA promotes labor-management cooperation by providing training and assistance to labor organizations and agencies on resolving disputes, facilitates the creation of partnerships, and trains the parties on rights and responsibilities under the Federal Relations Labor Relations Management statute.

GENERAL SERVICES ADMINISTRATION

FEDERAL BUILDINGS FUND—LIMITATIONS ON AVAILABILITY OF REVENUE (INCLUDING TRANSFER OF FUNDS)

The Federal Buildings Fund program consists of the following activities financed from rent charges:

Construction and acquisition of facilities.—Space is acquired through the construction or purchase of facilities and prospectus-level extensions to existing buildings. All costs directly attributable to site acquisition, construction, and the full range of design and construction services, and management and inspection of construction projects are funded under this activity.

Repairs and alterations.—Repairs and alterations of public buildings as well as associated design and construction services are funded under this activity. Protection of the Government's investment, health and safety of building occupants, transfer of agencies from leased space, and cost effectiveness are the principal criteria used in establishing priorities. Primary consideration is given to repairs to prevent deterioration and damage to buildings, their support systems, and operating equipment. This activity also provides for conversion of existing facilities and non-prospectus extensions.

Installment acquisition payments.—Payments are made for liabilities incurred under purchase contract authority and lease purchase arrangements. The periodic payments cover principal, interest, and other requirements.

Rental of space.—Space is acquired through the leasing of buildings including space occupied by Federal agencies in U.S. Postal Service facilities, 153 million rentable square feet in fiscal year 2002, and 157 million rentable square feet in fiscal year 2003.

Building operations.—Services are provided for Government-owned and leased facilities, including cleaning, utilities and fuel, protection, maintenance, miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision), and general management and administration of all real property related programs including salaries and benefits paid from the Federal Buildings Fund.

Other programs.—When requested by Federal agencies, the Public Buildings Service provides building services such as tenant alterations, cleaning and other operations, and protection services which are in excess of those services provided under the commercial rental charge. For presentation purposes, the balances of the Unconditional Gifts of Real, Personal, or Other Property trust fund have been combined with the Federal Buildings Fund.

CONSTRUCTION AND ACQUISITION

Limitation on availability, 2002	\$662,680,000
Limitation on availability, 2003	556,574,000
Committee recommendation	631,663,000

The Committee recommends \$631,663,000 for the construction and acquisition account. The Committee recommendation is \$75,089,000 above the President's request.

COURTHOUSE CONSTRUCTION

The Committee encourages the General Services Administration (GSA), the administration, and the judiciary to continue to work cooperatively to develop a single comprehensive plan upon which courthouse construction will be based. The Committee continues to believe that a model should incorporate utilization rates, courtroom sharing, and safety considerations. The use of cost savings measures and careful planning will result in a program that can be consistently supported. The Committee notes, however, that it has been extremely supportive of addressing the courthouse construction backlog. The Committee would remind the Administrative Office of the U.S. Courts (AOC) and other organizations that the Committee has adhered to the jointly agreed to priority list and that the Congress is constrained by overall budget resolutions and spending caps from accommodating every request.

COURTROOM SHARING

The Committee is aware of conflicting information regarding the issue of courtroom sharing. The Committee is concerned that in spite of the strict budgetary pressures facing the Federal Government, AOC fails to pursue a policy of fiscal restraint and approaches the Congress for increases in courthouse construction funding above the Administration's request. The Congress and the Administration have worked diligently to reign in court construction costs and the Committee will continue to pursue all avenues with respect to cost containment with or without the support of the Courts.

The Committee notes that the General Accounting Office (GAO), in a December 2000 report to the Congress on this issue, analyzed the data used in a courtroom sharing study commissioned by the Courts. That study criticized a 1997 GAO report on the same issue. GAO noted that the Courts did not agree with its recommendations, yet also commented that the AOC "did not provide any data, analysis, or rationale that would give us [GAO] an adequate basis for changing or dropping" the recommendations. The Committee concurs with GAO's concerns and urges the AOC to provide the Committee with persuasive courtroom use data and analysis, along with its views, to justify the number of courtrooms being requested in future courtroom construction requests.

PORT OF ENTRY INFRASTRUCTURE

The Committee notes that it has been over 2 years since the Port of Entry Infrastructure Assessment Study was delivered to the Congress. That study was required as part of the fiscal year 2000 Treasury and General Government Appropriations Act and included detailed input from the U.S. Customs Service, the Immigration and Naturalization Service, and GSA. The study identified an enormous backlog of 822 individual infrastructure requirements at our Nation's border crossings at an estimated gross cost of \$784,000,000.

The events of September 11, 2001 refocused the Nation's attention on the need to reinforce our borders. While this Committee has fully funded the administration's past requests for border facility construction and repair, those projects merely scratch the surface of what is required to robustly address the infrastructure backlog. The creation of a new Department of Homeland Security, which combines the various existing border agencies, offers the opportunity to address this facilities backlog in a cohesive manner.

The Committee therefore directs GSA, in consultation with the Office of Management

and Budget, the U.S. Customs Service, the Immigration and Naturalization Service, and Directorate of Border and Transportation Security within the Department of Homeland Security, to update the study and submit it to the Congress no later than 90 days after enactment of this Act.

The Committee also directs that the study identify port of entry infrastructure and technology improvements which enhance border security and facilitate the flow of legitimate commerce. The Committee urges that the study, to the greatest extent possible, prioritize projects based on the ability of the project to fulfill immediate security requirements and facilitate trade across the borders. The Committee recommends that the annual courthouse construction projects prioritization list submitted by the Administrative Office of the U.S. Courts be used as a model for this effort.

CHAMPLAIN PORT OF ENTRY

The Committee acknowledges the untenable conditions at the Champlain, New York port of entry and is aware that the General Services Administration is currently designing a new border facility to improve the safety and efficiency of this critical United States and Canada trade corridor. The Committee urges the Administration to make the completion of the Champlain port of entry a high priority and to include construction funding for the facility in the fiscal year 2004 budget request.

BURLINGTON, VT COURTHOUSE

The Committee is pleased that Burlington, VT is included in the list of recommended future construction projects provided by the Administrative Office of the U.S. Courts. The Committee expects GSA to move forward with this project in an expeditious manner and give priority to central business districts when selecting a location for the new building.

ROSENN FEDERAL COURTHOUSE

The Committee is aware of the shortage of parking in and around the Rosenn Federal Courthouse in Wilkes-Barre, Pennsylvania, which has caused a number of inconveniences for both employees and visitors to the facility. The Committee encourages GSA to work with the community to address this parking issue, utilizing up to \$1,000,000 from funds provided for the construction non-prospectus account.

REPAIRS AND ALTERATIONS

Limitation on availability,	
2002	\$869,376,000
Limitation on availability,	
2003	986,029,000

Committee recommendation

997,839,000

The Committee recommends new obligational authority of \$997,839,000 for repairs and alterations in fiscal year 2003.

Under this activity, the General Services Administration (GSA) executes its responsibility for repairs and alterations (R&A) of both Government-owned and leased facilities under the control of GSA. The major goal of this activity is to provide commercially equivalent space to tenant agencies. Safety, quality, and operating efficiency of facilities are given primary consideration in carrying out this responsibility. A major portion of the fiscal year 2003 program is devoted to nondiscretionary work necessary to meet this goal and keep the buildings in an occupiable condition.

R&A workload requirements originate with scheduled onsite inspections of buildings by qualified regional engineers and building managers. The work identified through these inspections is programmed in order of priority into the repairs and alter-

ations construction automated tracking system (RACATS) and incorporated into a 5-year plan for accomplishment, based upon funding availability, urgency, and the volume of R&A work that GSA has the capability to execute annually. Beginning in fiscal year 1995, design and construction services activities associated with the repair and alteration projects are funded in this account.

The R&A program, for purposes of funds control, is divided into two types of projects—line item and nonline item. The following is a definition of each category of projects:

Line item projects.—Line item projects are those larger projects for which a prospectus is required under the provisions of the Public Buildings Act of 1959. Generally, line item projects are similar to construction projects in the scope of work involved and the multiyear timeframe for project completion. Line item projects are listed individually in GSA's appropriations acts and the obligational authority for each project is limited to the amount shown therein.

Nonline item projects.—Projects included in this category are generally short term in nature and funds can normally be obligated within a 1-year period. This category also includes projects which are recurring in nature, such as cyclic painting and the minor repair of defective building systems; for example, mechanical, plumbing, electrical, fire safety, and elevator system components.

ROGERS COURTHOUSE RENOVATION PROJECT

The Committee provided funding for the design of the Rogers Courthouse renovation project in Denver, Colorado, in fiscal year 2002 with the expectation that the construction funding, estimated to be \$40,000,000, would be requested in fiscal year 2003. However, due to funding constraints, that level of funding is not available within the Federal Buildings Fund. The timing of the project had been planned to coordinate with the completion of the new Denver courthouse in late 2002 which will house the judicial offices currently occupying the Rogers Courthouse while renovations are underway. Therefore, in an effort to keep this project moving forward, the Committee has included an additional \$9,000,000 for demolition and asbestos removal. The Committee fully expects that the remaining construction funds will be requested as part of the fiscal year 2004 budget submission.

PITTSBURGH U.S. POST OFFICE AND COURTHOUSE

The Pittsburgh U.S. Post Office and Courthouse was completed in 1934 and must be expanded to accommodate the U.S. Courts. Needed alterations include an upgrade of the building's exterior, plaza and parking ramp improvements, installation of a fire safety system, and expansion of the severely undersized main lobby. The Committee provided much needed funding for this project in fiscal year 2002. However, in order to complete the project, the Committee has provided an additional \$2,810,000 in fiscal year 2003 for facade and window repairs, sprinkler system testing drains, millwork repairs, refurbishment of the lobbying revolving doors, sanitary/storm pipe repairs, corridor restoration, and replacement of basement garage doors.

INSTALLMENT ACQUISITION PAYMENTS

Limitation on availability,	
2002	\$186,427,000
Limitation on availability,	
2003	178,960,000

Committee recommendation

178,960,000

The Committee recommends a limitation of \$178,960,000 for installment acquisition payments. The Committee recommendation equals the budget estimate.

The Public Buildings Amendments of 1972 enables GSA to enter into contractual arrangements for the construction of a backlog of approved but unfunded projects. The purchase contracts require the Government to make periodic payments on these facilities over varying periods until title is transferred to the Government. This activity provides for the payment of principal, interest, taxes, and other required obligations related to facilities acquired pursuant to the Public Buildings Amendments of 1972 (40 U.S.C. 602a).

RENTAL OF SPACE

	Budget estimate, 2003	\$65,995,000
Committee recommendation	65,995,000	
Limitation on availability, 2002	\$2,952,050,000	
Limitation on availability, 2003	3,153,211,000	
Committee recommendation	3,153,211,000	

The Committee recommends a limitation of \$3,153,211,000 for rental of space. The Committee recommendation is equal to the budget estimate.

GSA is responsible for leasing general purpose space and land incident thereto for Federal agencies, except cases where GSA has delegated its leasing authority (for example, the Department of Veterans Affairs, as well as the Departments of Agriculture, Commerce, and Defense). GSA's policy is to lease privately owned buildings and land only when: (1) Federal space needs cannot be otherwise accommodated satisfactorily in existing Government-owned or leased space; (2) leasing proves to be more efficient than the construction or alteration of a Federal building; (3) construction or alteration is not warranted because requirements in the community are insufficient or are indefinite in scope or duration; or (4) completion of a new Federal building within a reasonable time cannot be assured.

BUILDING OPERATIONS

	Budget estimate, 2003	\$1,748,949,000
Committee recommendation	1,965,160,000	
Limitation on availability, 2002	\$1,965,160,000	
Limitation on availability, 2003	1,965,160,000	

The Committee recommends a limitation of \$1,965,160,000 for building operations.

This activity provides for the operation of all Government-owned facilities under the jurisdiction of GSA and building services in GSA-leased space where the terms of the lease do not require the lessor to furnish such services. Services included in building operations are cleaning, protection, maintenance, payments for utilities and fuel, grounds maintenance, and elevator operations. Other related supporting services include various real property management and staff support activities such as space acquisition and assignment; the moving of Federal agencies as a result of space alterations in order to provide better space utilization in existing buildings; onsite inspection of building services and operations accomplished by private contractors; and various highly specialized contract administration support functions.

The space, operations, and services referred to above are furnished by GSA to its tenant agencies in return for payment of rent. Due to considerations unique to their operation, GSA also provides varying levels of above-standard services in agency head-quarter facilities, including those occupied by the Executive Office of the President, such as the east and west wings of the White House.

POLICY AND CITIZEN SERVICES

SALARIES AND EXPENSES

Appropriations, 2002	
----------------------------	--

Budget estimate, 2003	\$65,995,000
Committee recommendation	65,995,000

The Committee recommends an appropriation of \$65,995,000 for salaries and expenses for the policy and operations of the General Services Administration.

Office of Governmentwide Policy provides for Government-wide policy development, support, and evaluation functions associated with real and personal property, supplies, vehicles, aircraft, information technology, acquisition, transportation and travel management. This office also provides for the Federal Procurement Data Center, Workplace Initiatives, Regulatory Information Service Center, the Catalog of Federal Domestic Assistance, and the Committee Management Secretariat. The *Office of Government-wide Policy*, working cooperatively with other agencies, provides the leadership needed to develop and evaluate the implementation of policies designed to achieve the most cost-effective solutions for the delivery of administrative services and sound workplace practices, while reducing regulations and empowering employees.

Office of Citizen Services provides leadership and support for electronic government initiatives and operates the official Federal portal through which citizens may access Federal information services electronically. The Federal Consumer Information Center is part of this office, though funded under a separate appropriation.

CHILD CARE CENTERS

The Committee recommends that funds provided to the *Office of Policy and Operations* continue to be used to issue and enforce regulations requiring any entity operating a child care center in a facility owned or leased by an executive agency to (1) comply with applicable State and local licensing requirements related to the provision of child care and (2) comply with center-based accreditation standards specified by the Administrator, if such a regulatory program is authorized.

COMPUTERS TO SCHOOLS PROGRAM

The Committee is aware that Indian tribal colleges and Alaska Native and Native Hawaiian serving institutions are being asked to undertake an increasing number of activities in Native communities related to education, employment and other training as part of the ongoing "welfare to work" transition mandated by the 1996 welfare reform law. To complement recent private sector donations of computers and related equipment to Indian tribes and Alaska Native and Native Hawaiian serving institutions, as part of its existing "Computers to Schools" program, the General Services Administration (GSA) is encouraged to work with the 31 Indian tribal colleges and Alaska Native and Native Hawaiian serving institutions to provide assistance to them in developing and upgrading the colleges' electronic capabilities. As part of this effort, GSA should utilize the 31 tribal colleges and Alaska Native and Native Hawaiian serving institutions as a discrete evaluation point as it works to meet these equipment needs. GSA's technical assistance will further enable the tribal colleges and Alaska Native and Native Hawaiian serving institutions to provide a higher quality of education to their students.

TELECOMMUTING CENTERS

The Committee encourages GSA to continue to promote telecommuting centers within the Federal Government in the Washington DC metro area as an effective means to provide an alternative workplace.

FEDERAL OFFICE BUILDING IN COLORADO SPRINGS

The Federal building located at 1520 Willamette Avenue in Colorado Springs, Colorado, is owned by GSA and is currently leased to the U.S. Air Force Space Command. It is the Committee's understanding that Space Command is moving ahead with options to vacate the facility. In the event that Space Command does not renew its lease and the facility becomes vacant and is deemed surplus, the Committee urges GSA to strongly consider the U.S. Olympic Committee's (USOC) need for additional space and to give priority to the USOC's request to gain title or acquire the property.

GSA FLEET VEHICLE STUDY

The Committee is aware of commercially-available technologies for standard vehicles that significantly improve fuel efficiencies and reduce harmful emissions through fuel treatments and catalysts. The Committee directs GSA to explore the use of these technologies and, if determined to be appropriate and economically feasible, incorporate them into GSA Fleet vehicles. The Committee directs GSA to report its findings to the Committee within 1 year.

FEDERAL BUILDING ACCESS

The Committee has learned that not all Federal identification is acceptable for immediate access to all Federal facilities. Rather, the tenants of some Federal Buildings have decided that only identification for staff who actually work in the building would allow immediate access and all other Federal visitors must wait in line to sign in before being allowed to enter. While the Committee understands the necessity for strict security, this inconsistency has created problems in some areas. Therefore, the Committee requests that GSA review this situation and report back 30 days after the date of enactment on their recommendations for a resolution to this problem.

ANGEL ISLAND IMMIGRATION STATION

The Committee directs the GSA to submit a report to the Committee within 30 days after the date of enactment on the status of the Angel Island Immigration Station which outlines the role of the GSA, the National Archives, the National Park Service, and any other relevant Federal agency in the effort to properly maintain, preserve and restore the Station as a national landmark.

CRAWFORD STREET FEDERAL BUILDING

The Committee is pleased by the progress that GSA has been making on the transfer of the Crawford Street Federal Building parking lot to the City of Portsmouth, Virginia, but is concerned that the negotiations have been ongoing for nearly a year without any real results. The Committee strongly encourages GSA to work with city officials to effectuate the property transfer.

OPERATING EXPENSES

SALARIES AND EXPENSES

Appropriations, 2002	
Budget estimate, 2003	\$88,263,000
Committee recommendation	94,640,000

The Committee recommends \$94,640,000 for this account.

Provides for the personal property utilization and donation activities of the Federal Supply Service and for the real property utilization and disposal activities of the Public Buildings Service, as well as agency-wide management and administration. These programs include utilization of real and personal property by Federal agencies and the transfer among agencies of excess real and personal property; disposal of surplus real property by sale, exchange, lease, permit, assignment, or transfer, as well as the protection and maintenance of excess and surplus

real property pending its disposition; appraisal of excess and surplus property, necessary environmental and cultural analyses, reuse planning, and real property utilization surveys; Indian Trust Accounting, administrative support of Congressional Districts and Senate State offices, and Critical Infrastructure Protection initiatives in the Federal Technology Service including the Federal Computer Incident Response Capability, the focal point for detecting and responding to attacks on Federal civilian computer systems, and responsibilities for the Federal Public Key Infrastructure Steering Committee and its activities.

VIRTUAL ARCHIVE STORAGE TERMINAL

The Committee recognizes that in the interest of national security, it is imperative to enhance and expand the capability to capture and archive electronic data on a government-wide scale. As such, the Committee provided funds in fiscal year 2002 to continue development of data mining tools to instantly extract and match data from multiple sources to resolve the critical security issues of today's environment. The Committee recognizes the important advancements of the Virtual Archive Storage Terminal (VAST) and the importance of adding the high performance computing capability of this data mining system and has included \$2,500,000 to continue this research effort.

DIGITAL LEARNING TECHNOLOGIES

The Committee has provided an additional \$500,000 to continue the development, demonstration, and research of the digital medical education project in connection with the Upper Great Plains Native American Tele-health Program.

The Committee has also provided \$500,000 for The University of Colorado Health Sciences Center's Digital TeleHealth Project. This project will employ digital medical education technology to promote the health and well-being of citizens in the eight-state Rocky Mountain region as well as American Indians and Alaska Natives nationwide.

GOVERNMENT RURAL OUTREACH INITIATIVE

The Committee is pleased with the work performed thus far on this rural areas outreach initiative. The Committee notes that the funds provided in fiscal year 2002 enabled the launching of the initiative to make electronic government services accessible to rural residents and to study and develop the technologies needed to ensure secure transactions of private information. The Committee has provided an additional \$1,750,000 to continue this initiative.

UNITED STATES CONSENSUS COUNCIL

The Committee is aware of a bipartisan effort to create a United States Consensus

Council. The response by national leaders to the attacks of September 11, 2001 has demonstrated the benefits of working together across party and political lines to address the Nation's most urgent priorities. The Council would provide ongoing support to Congress by bringing conflicting stakeholders to the table to resolve a wide range of difficult national policy issues. The Committee has provided \$1,000,000, within existing resources and subject to enactment of the authorizing legislation, to initiate this effort.

VETERANS' ORAL HISTORY

The Committee strongly supports efforts of various organizations to make oral history recordings of the veterans of the Nation's foreign wars. The Committee has provided \$250,000 for a grant to the North Dakota State Historical Society for costs associated with this effort in the State.

FINANCIAL TRANSACTION SOFTWARE

The Committee acknowledges the growing homeland security requirement to provide enhanced security for financial transactions. The Committee is aware of the efforts of organizations, such as the New York Institute for Advanced Studies in Software and Information Technology, to research and develop software focused on securing these transactions and has included \$1,500,000 to assist in this effort.

JOHN ADAMS COLLECTION

The Committee is aware of the interest of the Boston Public Library in preserving and making accessible to scholars, researchers, and the general public its holdings of the John Adams collection. The Committee has provided an additional \$500,000 to this account to assist in this effort.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$36,346,000
Budget estimate, 2003	37,617,000
Committee recommendation	37,617,000

The Committee recommends an appropriation of \$37,617,000 for the Office of Inspector General.

This appropriation provides agency-wide audit and investigative functions to identify and correct management and administrative deficiencies within the General Services Administration (GSA), which create conditions for existing or potential instances of fraud, waste and mismanagement. This audit function provides internal audit and contract audit services. Contract audits provide professional advice to GSA contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of

GSA operations and programs, test internal control systems, and develop information to improve operating efficiencies and enhance customer services. The investigation provides for the detection and investigation of improper and illegal activities involving GSA programs, personnel, and operations.

ELECTRONIC GOVERNMENT (E-GOV) FUND

Appropriations, 2002	\$5,000,000
Budget estimate, 2003	45,000,000
Committee recommendation	5,000,000

The Committee has agreed with the administration's request to create a new account to support interagency electronic government or "e-gov" initiatives, and has recommended an appropriation of \$5,000,000, to remain available through fiscal year 2004. This will allow the administration to begin this effort to develop and implement innovative uses of the Internet and other electronic media to provide individuals, businesses, and other Government agencies with simpler and more timely access to Federal information, benefits, services, and business opportunities. It is hoped that the resulting initiative will allow agencies to provide the public with optional use and acceptance of electronic information, services, and signatures by October 2003 as required under the Government Paperwork Elimination Act.

Proposals for funding must meet capital planning guidelines and include adequate documentation to demonstrate a sound business case, attention to security and privacy, and a way to measure performance against planned results. The Office of Management and Budget would control the allocation of the fund and direct its use for information systems projects and affect multiple agencies and offer the greatest improvements in access and service.

ALLOWANCES AND OFFICE STAFF FOR FORMER PRESIDENTS

Appropriations, 2002	\$3,196,000
Budget estimate, 2003	3,339,000
Committee recommendation	3,339,000

The Committee recommends \$3,339,000 for allowances and office staff for former Presidents.

This appropriation provides support consisting of pensions, office staffs, and related expenses for former Presidents Gerald R. Ford, Jimmy Carter, Ronald Reagan, George Bush, and William Jefferson Clinton, and for pension and postal franking privileges for the widow of former President Lyndon B. Johnson.

Below is listed a detailed breakdown of the fiscal year 2003 funding:

GENERAL SERVICES ADMINISTRATION—ALLOWANCES AND OFFICE STAFF FOR FORMER PRESIDENTS

[In thousands of dollars]

	Fiscal year 2003 request—former Presidents					Widows	Total
	Ford	Carter	Reagan	Bush	Clinton		
Personnel Compensation	96	96	96	96	150	534
Personnel Benefits	24	6	24	35	56	145
Benefits for Former Presidents	170	170	170	170	175	20	875
Travel	50	2	16	58	58	184
Rental Payments to GSA	112	102	140	174	436	964
Communications, Utilities and Miscellaneous charges:							
Telephone	25	25	17	14	29	110
Postage	9	20	10	14	22	2	77
Printing	6	5	13	12	15	51
Other Services	14	67	20	26	82	209
Supplies & Materials	11	6	21	11	25	74
Equipment	4	9	3	64	36	116
Total Obligations	521	508	530	674	1,084	22	3,339

GSA GENERAL PROVISIONS

The Committee has recommended the inclusion of the following general provisions:

Section 401 continues a provision which authorizes GSA to credit accounts with certain

funds received from Government corporations.

Section 402 continues a provision which authorizes GSA to use funds for the hire of passenger motor vehicles.

Section 403 continues a provision which authorizes GSA to transfer funds within the Federal buildings fund for meeting program requirements.

Section 404 continues a provision which limits funding for courthouse construction which does not meet certain standards of a capital improvement plan.

Section 405 continues a provision which provides that no funds may be used to increase the amount of occupiable square feet, provide cleaning services, security enhancements, or any other service usually provided, to any agency which does not pay the requested rate.

Section 406 continues a provision which allows pilot information technology projects to be repaid from the information technology fund.

Section 407 continues a provision which authorizes GSA to pay claims up to \$2,000,000 from construction projects and acquisition of buildings.

Section 408 is a new provision to name the Judge Dan M. Russell, Jr. Federal Building and United States Courthouse in Gulfport, Mississippi.

Section 409 is a new provision to name the Alfonse M. D'Amato United States Courthouse in Central Islip, New York.

Section 410 is a new provision to name the Cesar E. Chavez Memorial Building in Denver, Colorado.

Section 411 is a new provision to permit GSA to sell a parcel of land on an installment payment basis over a 5-year period.

Section 412 is a new provision to name the Richard Sheppard Arnold United States Courthouse in Little Rock, Arkansas.

Section 413 is a new provision to permit GSA to acquire additional parcels of land in Salt Lake City, Utah, in order to relocate an historical building.

MERIT SYSTEMS PROTECTION BOARD

SALARIES AND EXPENSES

Appropriations, 2002	\$30,555,000
Budget estimate, 2003	31,790,000
Committee recommendation	31,788,000

The Committee recommends an appropriation of \$31,788,000 for the Merit Systems Protection Board (MSPB).

MSPB assists Federal agencies in running a merit-based civil service system. This is accomplished on a case-by-case basis through hearing and deciding employee appeals, and on a systemic basis by reviewing significant actions and regulations of the Office of Personnel Management (OPM) and conducting studies of the civil service and other merit systems. These actions are designed to assure that personnel actions taken against employees are processed within the law, and that actions taken by OPM and other agencies support and enhance Federal merit principles.

LIMITATION

(TRANSFER OF TRUST FUNDS)

Appropriations, 2002	\$2,520,000
Budget estimate, 2003	2,594,000
Committee recommendation	2,594,000

The Committee has recommended a limitation of \$2,594,000 on the amount to be transferred from the civil service retirement and disability fund to the Board to cover administrative expenses to adjudicate retirement appeals cases.

MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY FOUNDATION

FEDERAL PAYMENT TO MORRIS K. UDALL SCHOLARSHIP AND EXCELLENCE IN NATIONAL ENVIRONMENTAL POLICY FOUNDATION

Appropriations, 2002	\$1,996,000
----------------------------	-------------

Budget estimate, 2003	1,996,000
Committee recommendation	1,996,000

The Committee recommends an appropriation of \$1,996,000 for these activities of the Morris K. Udall Foundation. The Committee includes language to allow up to 60 percent of the appropriation to be used for the expenses of the Native Nations Institute. The Committee also includes language requiring the Foundation to report to the Committee on the amount of funding, if any, transferred from the Trust Fund for the Native Nations Institute, and directs that this report include an itemization of planned Native Nations Institute expenditures for fiscal year 2003. The Committee further directs the Foundation to describe as part of the report its justification for such a transfer. Future budget justifications submitted to Congress regarding this effort are to contain detailed information on the actual expenditures of past years as well as detailed information on planned expenditures for the current and budget years.

The General Fund payment to the Morris K. Udall Fund is invested in Treasury securities with maturities suitable to the needs of the Fund. Interest earnings from the investments are used to carry out the activities of the Morris K. Udall Foundation. The Foundation awards scholarships, fellowships and grants, and funds activities of the Udall Center.

Public Law 106-568 authorized the Morris K. Udall Foundation to establish training programs for professionals in health care policy and public policy, such as the Native Nations Institute (NNI). NNI, based at the University of Arizona, will provide Native Americans with leadership and management training and analyze policies relevant to tribes.

MORRIS K. UDALL ENVIRONMENTAL DISPUTE RESOLUTION FUND

Appropriations, 2002	\$1,309,000
Budget estimate, 2003	1,309,000
Committee recommendation	1,309,000

The U.S. Institute for Environmental Conflict Resolution is a Federal program established by Public Law 105-156 to assist parties in resolving environmental, natural resource, and public lands conflicts. The Institute is part of the Morris K. Udall Foundation, and serves as an impartial, non-partisan institution providing professional expertise, services, and resources to all parties involved in such disputes. The Institute helps parties determine whether collaborative problem solving is appropriate for specific environmental conflicts, how and when to bring all the parties to the table, and whether a third-party facilitator or mediator might be helpful in assisting the parties in their efforts to each consensus or to resolve the conflict. In addition, the Institute maintains a roster of qualified facilitators and mediators with substantial experience in environmental conflict resolution, and can help parties in selecting an appropriate neutral.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

OPERATING EXPENSES

Appropriations, 2002	\$245,847,000
Budget estimate, 2003	256,731,000
Committee recommendation	249,731,000

The Committee recommends an appropriation of \$249,731,000 for Operating Expenses of the National Archives and Records Administration (NARA). The Committee has not included funding for Homeland Security records activities because the funds cannot be obligated during fiscal year 2003.

NARA provides for basic operations dealing with management of the Government's archives and records, operation of Presidential Libraries, and for the review for declassification of classified security information.

Records services.—This activity provides for selecting, preserving, describing, and making available to the general public, scholars, and Federal agencies the permanently valuable historical records of the Federal Government; the historical materials and Presidential records in Presidential Libraries; for preparing related publications and exhibit programs; and for conducting the appraisal of all Federal records.

Through the records declassification program, historically valuable information in the records of the Federal Government and in donated historical materials are made available to the public by declassifying as much information as possible without endangering the national security.

This activity also provides oversight for the information security program established by Executive Order 12958 as amended by Executive Order 13142 and reports annually to the President on the status of that program. It is also responsible for policy oversight for the National Industrial Security Program established under Executive Order 12829.

NARA, in research and development collaboration with national and international partners, is building an Electronic Records Archives (ERA) that will ensure the preservation of, and access to, Government electronic records. The pace of technological progress makes formats in which the records are stored obsolete within a few years, threatening to make them inaccessible even if they are preserved intact. ERA will preserve electronic records, regardless of the original format, retain them indefinitely, and enable requesters to access them on computer systems now and in the future.

Archives related services.—This activity provides for the publication of the Federal Register, the Code of Federal Regulations, the U.S. Statutes-at-Large, and Presidential documents, and for a program to improve the quality of regulations and the public's access to them. It also includes the administration and reference services portion for the National Historical Publications and Records Commission. This Commission makes grants nationwide to preserve and publish records that document American history.

Archives II Facility.—Provides for construction and related services of the new archival facility which was opened to the public in 1993. Costs of construction are financed by \$302 million of federally guaranteed debt issued in 1989. Since 1994 and continuing in 2003, the Archives seeks appropriations for the annual payments for interest and redemption of debt to be made under the contract for construction and related services.

Homeland security information sharing.—Provides for training personnel at the State and local level in the proper use and handling of classified and sensitive but unclassified homeland security information. Funding will also be used to facilitate security clearances for appropriate individuals at the State and local level, and to ensure that Federal agencies have the necessary classification authority for homeland security information.

VETERAN'S RECORDS PROCESSING

The Committee is pleased to note the exceptional progress being made by the National Military Personnel Records Center, St. Louis, MO in responding to requests for military service records. The Center is ahead of the goals presented to the Committee at the beginning of the year with over 33 percent of requests being fully answered within

10 days and almost half of all requests being filled within 15 days of receipt. The Committee applauds the work of the staff of the Center and requests a report update with the submission of next year's budget.

ARCHIVES FACILITIES REPAIRS AND RESTORATION

Appropriations, 2002	\$40,143,000
Budget estimate, 2003	10,458,000
Committee recommendation	14,208,000

The Committee recommends an appropriation of \$14,208,000. The Committee has included \$3,750,000 to acquire land in Anchorage, Alaska to build a new regional archives and records facility. The funds will be used to reimburse the General Service Administration for land acquisition services and for the purchase of approximately 10 acres of land.

This account provides for the repair, alteration, and improvement of Archives facilities and Presidential Libraries nationwide, and provides adequate storage for holdings. It will better enable the National Archives to maintain its facilities in proper condition for public visitors, researchers, and employees in NARA facilities, and also maintain the structural integrity of the buildings. These funds will determine appropriate options for preserving and providing access to 20th century military service records. These funds will allow NARA to complete preliminary design studies and analysis, including workflow and cost estimates, for housing and access options for these massive and valuable records. Technology and facility approaches will be examined.

NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

GRANTS PROGRAM

Appropriations, 2002	\$6,436,000
Budget estimate, 2003	5,000,000
Committee recommendation	7,000,000

The Committee recommends an appropriation of \$7,000,000. This amount is \$2,000,000 above the budget request.

The National Historical Publications and Records Commission (NHPRC) provides grants nationwide to preserve and publish records that document American history. Administered within the National Archives, which preserves Federal records, NHPRC helps State, local, and private institutions preserve non-Federal records, helps publish the papers of major figures in American history, and helps archivists and records managers improve their techniques, training, and ability to serve a range of information users.

Records Center Revolving Fund.—The NARA Records Center Revolving Fund provides low cost services, on a standard price basis, to Federal agency customers for quality storage and accession, reference, refile, and disposal services for records stored in service centers.

National Archives Gift Fund.—The National Archives Trust Fund Board may solicit and accept gifts or bequests of money, securities, or other personal property, for the benefit of or in connection with the national archival and records activities administered by the National Archives and Records Administration (44 U.S.C. 2305).

In accordance with 44 U.S.C. 2112, the Bush Presidential Library received a \$4 million endowment from the Bush Library Foundation. The money was deposited in the gift fund and invested in accordance with established National Archives Trust and Gift Fund procedures. Income earned on the investment will be used to offset a portion of the Library's operation and maintenance costs.

National Archives Trust Fund.—The Archivist of the United States furnishes, for a fee, copies of unrestricted records in the custody of the National Archives (44 U.S.C. 2116). Proceeds from the sale of copies of microfilm publications, reproductions, special works, and other publications, as well as admission fees to Presidential Library museum rooms, are deposited in this fund (44 U.S.C. 2112, 2307).

STATEHOOD INITIATIVE

Communities in Hawaii and Alaska are preparing to celebrate the 50th anniversary of Alaska and Hawaii Statehood. The Committee provides \$500,000, to be split evenly between the University of Hawaii and the University of Alaska, to catalog the historic records and artifacts relating to Statehood, and to improve the exhibit presentation in preparation for the Statehood celebrations.

OFFICE OF GOVERNMENT ETHICS

SALARIES AND EXPENSES

Appropriations, 2002	\$10,117,000
Budget estimate, 2003	10,488,000
Committee recommendation	10,486,000

The Committee recommends an appropriation of \$10,486,000 for salaries and expenses of the Office of Government Ethics (OGE) in fiscal year 2003.

OGE is charged by law to provide overall direction of Executive Branch policies designed to prevent conflicts of interest and insure high ethical standards. OGE carries out these responsibilities by developing rules and regulations pertaining to conflicts of interest, post employment restrictions, standards of conduct, and public and confidential financial disclosure in the Executive Branch; by monitoring compliance with the public and confidential disclosure requirements of the Ethics Reform Act of 1978 and the Ethics Reform Act of 1989 to determine possible violations of applicable laws or regulations and recommending appropriate corrective action; by consulting with and assisting various officials in evaluating the effectiveness of applicable laws and the resolution of individual problems; and by preparing formal advisory opinions, informal letter opinions, policy memoranda, and Federal Register entries on how to interpret and comply with the requirements on conflicts of interest, post employment, standards of conduct, and financial disclosure.

OFFICE OF PERSONNEL MANAGEMENT

SALARIES AND EXPENSES

Appropriations, 2002	\$99,636,000
Budget estimate, 2003	128,804,000
Committee recommendation	128,736,000

The Committee recommends an appropriation of \$128,736,000 for the salaries and expenses of the Office of Personnel Management (OPM).

OPM is responsible for personnel management functions which include the following activities:

Merit systems oversight and effectiveness.—Includes evaluating human resources management in Federal agencies through various methods including on-site reviews and special studies; administering classification appeals, Fair Labor Standards Act, and Inter-governmental Personnel programs to ensure that agencies adhere to the statutory requirements; helping agencies develop merit-based human resources management accountability; assessing the effectiveness of Government-wide human resources management policies and programs, and serving as a clearinghouse for best practices; testing and evaluating innovative human resources management practices and systems, including demonstration projects; providing readily

accessible statistics on the Federal workforce; and administering parts of the Voting Rights Act of 1965.

Employment service.—Provides leadership and manages the merit-based employment system for the Federal Government. In partnership with agencies, the Service provides a high-quality, diverse workforce through a mix of policy direction, technical assistance, and reimbursable services. These operations are carried out through a network of Service Centers throughout the country.

Retirement and Insurance.—This activity encompasses administration of earned employee benefits for Federal employees, retired Federal employees, and their families. These programs include the Civil Service Retirement System, the Federal Employees' Retirement System, the Federal Employees Group Life Insurance Program, and the Federal Employees Health Benefits Programs. In addition, this activity includes OPM's efforts to stay abreast of, and respond to, developments in non-Federal fringe benefits practices.

Workforce compensation and performance.—This activity includes developing and implementing pay and leave administration policy and evaluating the effectiveness of alternative compensation systems; developing classification policies and systems, and designing flexible alternatives to current systems; and developing Government-wide policy concerning employee performance management.

Investigations.—Focuses on assuring applicant and appointee fitness and suitability, and oversight of the investigative contract company.

Workforce relations.—This activity includes developing and administering policies, regulations and guidelines on employee relations, including adverse and performance-based actions and violence in the workplace; facilitating and supporting Federal work and family programs; providing leadership and policy guidance in support of agency human resources development programs and training technology initiatives; and providing guidance and assistance to Federal agencies in labor-management relations and partnerships.

Executive resources.—Provides Government-wide program leadership, policy direction, and technical assistance on all aspects of the Senior Executive Service personnel system and comparable executive systems.

Executive and other services.—Includes executive direction, policy development, legal advise and representation, public affairs, legislative activities, financial management, and the operating expenses of the President's Commission on White House Fellows.

Reimbursable programs.—OPM performs reimbursable work at the request of other agencies. OPM also provides administrative, information resources management, and executive service to other OPM accounts on a reimbursable basis.

VOTING RIGHTS ACT

The Committee continues to include a provision requested by the administration to allow Federal employees acting as Voting Rights Act observers to receive per diem at their permanent duty station. This provision makes it feasible for these observers to work in local areas and allow the Government to discontinue the practice of recruiting observers from distant locations and assuming the per diem, as well as travel costs.

CHILD CARE ASSISTANCE

The Committee remains concerned that child care expenses are often the second or third largest monthly expense Federal employees face. Additionally, many lower paid Federal workers are unable to afford quality

child care. As private industry has increasingly used subsidized child care for its employees as an effective productivity enhancement, retention and recruiting tool, the Committee believes the Federal Government must continue its commitment to do the same.

The Committee is concerned about the limited number of infant spots in Federal child care facilities and the resulting impact on working parents. Therefore, the Committee directs the Office of Personnel Management, working in consultation with the General Services Administration, to assess the past, current, and future needs of child care centers, including both infant and non-infant needs, in the Federal Government and provide a report to the Committee within 90 days after enactment of this Act on a plan to address these needs and the resources required to do so. The Committee expects OPM to coordinate with all Federal agencies in this effort.

BARNSTABLE COUNTY, MASSACHUSETTS

The Committee understands that on October 1, 2002, the Federal Salary Council recommended that Barnstable County be included as part of the Boston-Worcester-Lawrence, MA-NH-ME-RI-CT Locality Pay Area (LPA). The Committee directs OPM to provide a report detailing its intention with regard to implementing this recommendation within 45 days after enactment of this Act. Additionally, the Committee directs OPM to consider the Connecticut River Valley for inclusion into the Hartford Locality Pay Area, because of the difficulties some Federal agencies have documented in retaining and attracting Federal employees in the Connecticut River Valley.

LIMITATION

(TRANSFER OF TRUST FUNDS)

Limitation, 2002	\$115,928,000
Budget estimate, 2003	120,791,000
Committee recommendation	120,791,000

The Committee recommends a limitation of \$120,791,000.

These funds will be transferred from the appropriate trust funds of the Office of Personnel Management to cover administrative expenses for the retirement and insurance programs.

RETIREMENT SYSTEMS MODERNIZATION

Over the past several years, the Federal Government has expended hundreds of millions of dollars on automation hardware and software without significant planning and architectural design. The General Accounting Office (GAO) has documented problems with design and systems procurement on countless occasions. The Committee is supportive of providing the technology necessary to modernize the Federal employee retirement system technology, but is concerned given past history with other Federal agencies. In fiscal year 2002, the Committee recommended that OPM reach out to GAO for guidance and support on this initiative and encouraged the establishment of a relationship for the duration of this project. The Committee is disappointed that OPM did not act upon that suggestion. Therefore, the Committee directs OPM to conduct quarterly meetings with GAO and inform the Committee on the progress of this IT modernization project.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

Appropriations, 2002	\$1,498,000
Budget estimate, 2003	1,498,000
Committee recommendation	1,498,000

The Committee recommends an appropriation of \$1,498,000 for salaries and expenses of

the Office of Inspector General in fiscal year 2003.

The Office of Inspector General is charged with establishing policies for conducting and coordinating efforts which promote economy, efficiency, and integrity in the Office of Personnel Management's activities which prevent and detect fraud, waste, and mismanagement in the agency's programs. Contract audits provide professional advice to agency contracting officials on accounting and financial matters regarding the negotiation, award, administration, repricing, and settlement of contracts. Internal agency audits review and evaluate all facets of agency operations, including financial statements. Evaluation and inspection services provide detailed technical evaluations of agency operations. Insurance audits review the operations of health and life insurance carriers, health care providers, and insurance subscribers. The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations. Administrative sanctions bar from participation in the health insurance program those health care providers whose conduct may pose a threat to the financial integrity of the program itself or to the well-being of insurance program enrollees.

(LIMITATION ON TRANSFER FROM TRUST FUNDS)

Limitation, 2002	\$10,016,000
Budget estimate, 2003	10,766,000
Committee recommendation	10,766,000

The Committee recommends a limitation on transfers from the trust funds in support of the Office of Inspector General activities totaling \$10,766,000 for fiscal year 2003.

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEES HEALTH BENEFITS

Appropriations, 2002	\$6,129,000,000
Budget estimate, 2003	6,853,000,000
Committee recommendation	6,853,000,000

The Committee recommends an appropriation of \$6,853,000,000 for Government payments for annuitants, employees health benefits. The Committee recommendation equals the budget estimate.

This appropriation covers the Government's share of the cost of health insurance for annuitants covered by the Federal Employees Health Benefits Program and the Retired Federal Employees Health Benefits Act of 1960, as well as administrative expenses incurred by OPM for these programs.

GOVERNMENT PAYMENT FOR ANNUITANTS, EMPLOYEE LIFE INSURANCE

Appropriations, 2002	\$34,000,000
Budget estimate, 2003	34,000,000
Committee recommendation	34,000,000

The Committee recommends an appropriation of \$34,000,000 for the Government payment for annuitants, employee life insurance. This amount equals the budget request.

Public Law 96-427, the Federal Employees' Group Life Insurance Act of 1980 requires that all employees under the age of 65 who separate from the Federal Government for purposes of retirement on or after January 1, 1990, continue to make contributions toward their basic life insurance coverage after retirement until they reach the age of 65. These retirees will contribute two-thirds of the cost of the basic life insurance premium, identical to the amount contributed by active Federal employees for basic life insurance coverage. As with the active Federal employees, the Government is required to contribute one-third of the cost of the premium for basic coverage. OPM, acting as the

payroll office on behalf of Federal retirees, has requested, and the Committee has provided, the funding necessary to make the required Government contribution associated with annuitants' postretirement life insurance coverage.

PAYMENT TO CIVIL SERVICE RETIREMENT AND DISABILITY FUND

Appropriations, 2002	\$9,229,000,000
Budget estimate, 2003	9,410,000,000
Committee recommendation	9,410,000,000

The Committee recommends an appropriation of \$9,410,000,000 for payment to the civil service retirement and disability fund. The Committee recommendation equals the budget estimate.

The civil service retirement and disability fund was established in 1920 to administer the financing and payment of annuities to retired Federal employees and their survivors. The fund covers the operation of the Civil Service Retirement System and the Federal Employees' Retirement System.

This appropriation provides for the Government's share of retirement costs, transfers of interest on the unfunded liability and annuity disbursements attributable to military service, and survivor annuities to eligible former spouses of some annuitants who did not elect survivor coverage.

OFFICE OF SPECIAL COUNSEL

SALARIES AND EXPENSES

Appropriations, 2002	\$11,891,000
Budget estimate, 2003	12,434,000
Committee recommendation	12,434,000

The Committee recommends an appropriation of \$12,434,000 for the Office of Special Counsel (OSC).

OSC investigates Federal employee allegations of prohibited personnel practices and, when appropriate, prosecutes cases before the Merit Systems Protection Board and enforces the Hatch Act. OSC also provides a channel for whistleblowing by Federal employees, and may transmit whistleblowing allegations to the agency head concerned and require an agency investigation and a report to Congress and the President when appropriate.

U.S. TAX COURT

SALARIES AND EXPENSES

Appropriations, 2002	\$37,305,000
Budget estimate, 2003	37,305,000
Committee recommendation	37,305,000

The Committee recommends an appropriation of \$37,305,000 for the U.S. Tax Court.

The U.S. Tax Court is an independent judicial body in the legislative branch under article I of the Constitution of the United States. The court is composed of a chief judge and 18 judges. Decisions by the court are reviewable by the U.S. Courts of Appeals and, if certiorari is granted, by the Supreme Court.

In their judicial duties the judges are assisted by senior judges, who participate in the adjudication of regular cases, and by special trial judges, who hear small tax cases and certain regular cases assigned to them by the chief judge.

The court conducts trial sessions throughout the United States, including Hawaii and Alaska. The matters over which the Court has jurisdiction are set forth in various sections of title 26 of the United States Code.

Tax Court Independent Counsel Fund.—This fund is established pursuant to 26 U.S.C. 7475. The fund is used by the Tax Court to employ independent counsel to pursue disciplinary matters involving practitioners admitted to practice before the Court.

Tax Court Judges Survivors Annuity Fund.—This fund established pursuant to 26 U.S.C. 7448, is used to pay survivorship benefits to eligible surviving spouses and dependent children of deceased judges of the U.S. Tax Court. Participating judges pay 3.5 percent of their salaries or retired pay into the fund to cover creditable service for which payment is required. Additional funds, as are needed, are provided through the annual appropriation to the U.S. Tax Court.

WHITE HOUSE COMMISSION ON THE NATIONAL MOMENT OF REMEMBRANCE

Appropriations, 2002	\$500,000
Budget estimate, 2003	250,000
Committee recommendation	250,000

The Committee recommends an appropriation of \$250,000 for the White House Commission on the National Moment of Remembrance. This is the same as the President's request. The Commission was established and authorized by Public Law 106-579. The Commission will also accept gifts and generate product royalty revenue in order to revitalize the national understanding and commemoration of Memorial Day. The Defense Emergency Response Fund included \$500,000 for the Commission in fiscal year 2002.

STATEMENT CONCERNING GENERAL PROVISIONS

Traditionally, the Treasury and General Government appropriation bill has included general provisions which govern both the activities of the agencies covered by the bill, and, in some cases, activities of agencies, programs, and general government activities that are not covered by the bill. Those general provisions that are Governmentwide in scope are contained in title VI of this bill.

The bill contains a number of general provisions that have been carried in this bill for years and which are routine in nature and scope. General provisions in the bill are explained under this section of the report. Those general provisions that deal with a single agency only are shown immediately following that particular agency's or department's appropriation accounts in the bill. Those general provisions that address activities or directives affecting all of the agencies covered in this bill are contained in title V of the bill.

TITLE V—GENERAL PROVISIONS

THIS ACT

Section 501 continues a provision which limits the use of appropriated funds to the current fiscal year.

Section 502 continues a provision regarding consultant services.

Section 503 continues a provision which prohibits the use of funds to engage in activities which would prohibit in the enforcement of section 307 of the 1930 Tariff Act.

Section 504 continues the provision concerning the employment rights of Federal employees who return to their civilian jobs after assignment with the Armed Forces.

Section 505 continues a provision which requires compliance with the Buy American Act.

Section 506 continues a provision which states the sense of Congress regarding notice and purchase of American-made products.

Section 507 continues a provision which prohibits an individual from eligibility for Government contracts if a court determines that individual has intentionally fraudulently affixed a "Made in America" label to any product non-American made.

Section 508 continues a provision which provides up to 50 percent of unobligated balances may remain available for authorized purposes in compliance with reprogramming guidelines.

Section 509 continues a provision which prohibits the Executive Office of the President from using appropriated funds to request FBI background investigation reports.

Section 510 continues a provision that cost accounting standards under the Federal Procurement Policy Act shall not apply to the Federal Employees Health Benefits program.

Section 511 continues a provision permitting OPM to utilize certain funds to resolve litigation and implement settlement agreements regarding the non-foreign area cost-of-living allowance program.

Section 512 continues a provision prohibiting the use of funds to any person or entity convicted of violating the Buy American Act.

Section 513 is a new provision concerning procurement of goods made with forced or indentured child labor.

Section 514 is a new provision increasing the size of the endowment for future Presidential libraries.

TITLE VI—GENERAL PROVISIONS, DEPARTMENTS, AGENCIES, AND CORPORATIONS

The Committee has recommended the inclusion of the following general provisions:

Section 601 continues a provision authorizing agencies to pay travel costs of the families of Federal employees on foreign duty to return to the United States in the event of death or a life threatening illness of an employee.

Section 602 continues a provision requiring agencies to administer a policy designed to ensure that all of its workplaces are free from the illegal use of controlled substances.

Section 603 continues a provision regarding price limitations on vehicles to be purchased by the Federal Government.

Section 604 continues a provision allowing funds made available to agencies for travel to also be used for quarters allowances and cost-of-living allowances.

Section 605 continues a provision prohibiting the Government, with certain specified exceptions, from employing non-U.S. citizens whose posts of duty would be in the continental United States.

Section 606 continues a provision ensuring that agencies will have authority to pay the General Services Administration bills for space renovation and other services.

Section 607 continues a provision allowing agencies to finance the costs of recycling and waste prevention programs with proceeds from the sale of materials recovered through such programs.

Section 608 continues a provision providing that funds may be used to pay rent and other service costs in the District of Columbia.

Section 609 continues a provision prohibiting the use of appropriated funds to pay the salary of any nominee after the Senate voted not to approve the nomination.

Section 610 continues a provision precluding interagency financing of groups absent prior statutory approval.

Section 611 continues a provision authorizing the Postal Service to employ guards.

Section 612 continues a provision prohibiting the use of appropriated funds for enforcing regulations disapproved in accordance with the applicable law of the United States.

Section 613 continues a provision limiting the pay increases of certain prevailing rate employees.

Section 614 continues a provision limiting the amount that can be used for redecoration of offices under certain circumstances.

Section 615 continues provision prohibiting the expenditure of appropriated funds for the acquisition of additional law enforcement training facilities without the advance approval of the Committees on Appropriations

and allowing the Federal Law Enforcement Training Center to obtain temporary use of additional facilities for training which cannot be accommodated in existing Center facilities.

Section 616 continues a provision permitting interagency funding of national security and emergency preparedness telecommunications initiatives, which benefit multiple Federal departments, agencies, and entities.

Section 617 continues a provision requiring agencies to certify that a schedule C appointment was not created solely or primarily to detail the employee to the White House.

Section 618 continues a provision requiring agencies to administer a policy designed to ensure that all of its workplaces are free from discrimination and sexual harassment.

Section 619 continues a provision which prohibits the U.S. Customs Service from allowing the importation of products produced by forced or indentured child labor.

Section 620 continues a provision which prohibits the use of funds to prevent Federal employees from communicating with Congress or to take disciplinary or personnel actions against employees for such communication.

Section 621 continues a provision which prohibits training not directly related to the performance of official duties.

Section 622 continues a provision prohibiting the expenditure of funds for the implementation of agreements in certain nondisclosure policies unless certain provisions are included in the policies.

Section 623 continues a provision which prohibits use of appropriated funds for publicity or propaganda designed to support or defeat legislation pending before Congress.

Section 624 continues a provision which prohibits use of appropriated funds by an agency to provide Federal employees home address to labor organizations.

Section 625 continues a provision which prohibits the use of appropriated funds to provide nonpublic information such as mailing or telephone lists to any person or organization outside of the Government.

Section 626 continues a provision which prohibits the use of appropriated funds for publicity or propaganda purposes within the United States not authorized by Congress.

Section 627 continues a provision directing agencies employees to use official time in an honest effort to perform official duties.

Section 628 continues a provision authorizing the use of current fiscal year funds to finance an appropriate share of the Joint Financial Management Improvement Program.

Section 629 modifies and continues a provision authorizing agencies to transfer funds to or reimburse the Policy and Operations account of GSA to finance an appropriate share of the Joint Financial Management Improvement Program.

Section 630 continues a provision authorizing breastfeeding at any location in a Federal building or on Federal property.

Section 631 continues a provision which permits interagency funding of the National Science and Technology Council.

Section 632 continues a provision requiring identification of the Federal agencies providing Federal funds and the amount provided for all proposals, solicitations, grant applications, forms, notifications, press releases, or other publications related to the distribution of funding to a State.

Section 633 modifies and continues a provision which extends the authorization for franchise fund pilots for 1 year.

Section 634 continues a provision prohibiting the use of funds to monitor personal information relating to the use of Federal internet sites; the conferees apply this provision government-wide.

Section 635 continues a provision regarding contraceptive coverage under the Federal Employees Health Benefits Plan.

Section 636 continues a provision which clarifies that the United States Anti-Doping Agency is the official anti-doping agency for Olympic, Pan American, and Paralympic sport in the United States.

Section 637 is a new provision regarding Federal employee pay adjustments.

Section 638 continues a provision directing departments and agencies to comply with the Rural Development Act of 1972.

Section 639 is a new provision extending the expiration date of certain government information security requirements.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

The Committee recommends the following appropriations which lack authorization:

Department of the Treasury:

Departmental Offices:
Salaries and expenses, \$191,887,000
Department-wide Systems and Capital Investments Program, \$68,828,000
Air Transportation Stabilization Program, \$6,041,000
Treasury Building and annex, repair and restoration, \$30,932,000
Financial Crimes Enforcement Network, salaries and expenses, \$50,517,000
Federal Law Enforcement Training Center:

Salaries and expenses, \$126,660,000
Acquisition, construction, improvements, and related expenses, \$32,029,000

Financial Management Service, salaries and expenses, \$220,664,000

Bureau of Alcohol, Tobacco and Firearms:

Salaries and expenses, \$888,430,000
U.S. Customs Service:

Salaries and expenses, \$2,501,488,000
Operation and maintenance, air and marine interdiction programs, \$177,829,000

Automation modernization, \$435,332,000
Internal Revenue Service:

Processing, assistance, and management, \$3,955,770,000
Tax law enforcement, \$3,729,072,000

Earned Income Tax Credit, \$146,000,000
Information systems, \$1,632,444,000

Executive Office of the President:
The White House Office, salaries and expenses, \$59,735,000

Office of Homeland Security, \$24,844,000
Executive Residence at the White House, operating expenses, \$12,228,000

Special Assistance to the President, salaries and expenses, \$4,066,000
Council of Economic Advisers, salaries and expenses, \$4,405,000

National Security Council, salaries and expenses, \$9,525,000
Office of Administration, salaries and expenses, \$70,128,000

Office of Management and Budget, salaries and expenses, \$70,752,000
Office of National Drug Control Policy, salaries and expenses, \$26,456,000

U.S. Tax Court, salaries and expenses, \$37,305,000

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

DEPARTMENTS OF VETERANS AFFAIRS AND HOUSING AND URBAN DEVELOPMENT, AND INDEPENDENT AGENCIES APPROPRIATIONS BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. BOND, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the Departments of Veterans Affairs and Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amount of new budget (obligational) authority

Amount of bill as reported to Senate	\$121,925,545,000
Amount of appropriations, 2002	123,820,208,000
Amount of budget estimates, 2003	124,979,700,000
Under estimates for 2003	3,054,155,000
Above appropriations for 2002	1,894,663,000

INTRODUCTION

The Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies appropriations bill for fiscal year 2003 provides a total of \$121,925,545,000 in budget authority, including approximately \$31,576,338,000 in mandatory spending. The Committee did its best to meet all important priorities within the bill, with the highest priority given to veterans programs and section 8 contract renewals. Other priorities included maintaining environmental programs at or above current year levels, ensuring needed funds for our Nation's space and scientific research programs, and providing critical funding for emergency management and disaster relief including initial spending for new Homeland Security priorities.

As recommended by the Committee, this bill attempts to provide a fair and balanced approach to the many competing programs and activities under the VA-HUD subcommittee's jurisdiction.

The Committee recommendation provides \$26,460,257,000 in discretionary funding for the Department of Veterans Affairs, an increase of \$2,489,625,000 above the fiscal year 2002 enacted level and \$1,101,698,000 above the budget request. The Committee has made veterans programs the highest priority in the bill. Increases in VA programs above the

budget request are recommended for medical care and medical research.

For the Department of Housing and Urban Development, the Committee recommendation totals \$31,149,157,000, a decrease of \$1,044,038,000 below the fiscal year 2002 enacted level and \$199,934,000 below the budget request. The Committee has provided significant funding for all HUD programs while also providing the needed funding for all expiring section 8 contracts. The Committee believes a balanced approach to the funding of housing programs is key to meeting the housing needs of low-income families.

For the Environmental Protection Agency, the Committee recommendation totals \$8,205,436,000, an increase of \$126,623,000 above the fiscal year 2002 enacted level and an increase of \$584,923,000 above the budget request.

The Committee recommendation includes \$3,203,117,000 for the Federal Emergency Management Agency, including \$842,843,000 for disaster relief.

The Committee recommendation for the National Aeronautics and Space Administration totals \$15,125,500,000, an increase of \$223,800,000 above the fiscal year 2002 level.

For the National Science Foundation, the Committee recommendation totals \$5,268,980,000, an increase of \$460,440,000 above the fiscal year 2002 enacted level. The Committee views NSF as a key investment in the future and this funding is intended to reaffirm the strong and longstanding leadership of this Committee in support of scientific research and education.

REPROGRAMMING AND INITIATION OF NEW PROGRAMS

The Committee continues to have a particular interest in being informed of reprogrammings which, although they may not change either the total amount available in an account or any of the purposes for which the appropriation is legally available, represent a significant departure from budget plans presented to the Committee in an agency's budget justifications.

Consequently, the Committee directs the Departments of Veterans Affairs and Housing and Urban Development, and the agencies funded through this bill, to notify the chairman of the Committee prior to each reprogramming of funds in excess of \$250,000 between programs, activities, or elements unless an alternate amount for the agency or department in question is specified elsewhere in this report. The Committee desires to be notified of reprogramming actions which involve less than the above-mentioned amounts if such actions would have the effect of changing an agency's funding requirements in future years or if programs or projects specifically cited in the Committee's reports are affected. Finally, the Committee wishes to be consulted regarding reorganizations of offices, programs, and activities prior to the planned implementation of such reorganizations.

The Committee also expects the Departments of Veterans Affairs and Housing and

Urban Development, as well as the Corporation for National and Community Service, the Environmental Protection Agency, the Federal Emergency Management Agency, the National Aeronautics and Space Administration, the National Science Foundation, the Corporation for National and Community Service, and the Consumer Product Safety Commission, to submit operating plans, signed by the respective secretary, administrator, chief executive officer, or agency head, for the Committee's approval within 30 days of the bill's enactment. Other agencies within the bill should continue to submit operating plans consistent with prior year policy.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

TITLE I—DEPARTMENT OF VETERANS AFFAIRS	
Appropriations, 2002	¹ \$52,786,164,000
Budget estimate, 2003	54,612,197,000
Committee recommendation	58,040,545,000

¹Reflects the latest funding levels for Compensation and Pension in the mid-session review in 2002 and 2003.

GENERAL DESCRIPTION

The Veterans Administration was established as an independent agency by Executive Order 5398 of July 21, 1930, in accordance with the Act of July 3, 1930 (46 Stat. 1016). This act authorized the President to consolidate and coordinate Federal agencies especially created for or concerned with the administration of laws providing benefits to veterans, including the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers. On March 15, 1989, VA was elevated to Cabinet-level status as the Department of Veterans Affairs.

The VA's mission is to serve America's veterans and their families as their principal advocate in ensuring that they receive the care, support, and recognition they have earned in service to the Nation. The VA's operating units include the Veterans Health Administration, Veterans Benefits Administration, National Cemetery Administration, and staff offices.

The Veterans Health Administration develops, maintains, and operates a national health care delivery system for eligible veterans; carries out a program of education and training of health care personnel; carries out a program of medical research and development; and furnishes health services to members of the Armed Forces during periods of war or national emergency. A system of 172 medical centers, 864 outpatient clinics, 137 nursing homes, and 43 domiciliaries is maintained to meet the VA's medical mission.

The Veterans Benefits Administration provides an integrated program of nonmedical veteran benefits. This Administration administers a broad range of benefits to veterans and other eligible beneficiaries through 58 regional offices and the records processing center in St. Louis, MO. The benefits provided include: compensation for service-connected disabilities; pensions for wartime, needy, and totally disabled veterans; vocational rehabilitation assistance; educational and training assistance; home buying assistance; estate protection services for veterans under legal disability; information and assistance through personalized contacts; and six life insurance programs.

The National Cemetery Administration provides for the interment of the remains of eligible deceased servicepersons and discharged veterans in any national cemetery with available grave space; permanently maintains these graves; marks graves of eligible persons in national and private cemeteries; and administers the grant program for aid to States in establishing, expanding, or improving State veterans' cemeteries. The National Cemetery Administration includes 154 cemeterial installations and activities.

Other VA offices, including the general counsel, inspector general, Boards of Contract Appeals and Veterans Appeals, and the general administration, support the Secretary, Deputy Secretary, Under Secretary for Health, Under Secretary for Benefits, and the Under Secretary for Memorial Affairs.

COMMITTEE RECOMMENDATION

The Committee recommends \$58,040,545,000 for the Department of Veterans Affairs, including \$31,580,338,000 in mandatory spending

and \$26,460,207,000 in discretionary spending. The amount provided for discretionary activities represents an increase of \$1,102,170,000 above the budget request and \$2,489,625,000 above the fiscal year 2002 enacted level.

The Committee once again has made VA its top priority in the fiscal year 2003 VA-HUD bill. Specifically, the Committee is committed to ensuring that veterans have access to the quality medical care and services they deserve, in a timely manner.

The Committee is deeply concerned about overwhelming evidence that the VA medical system is failing its core constituency—service-connected, lower income, and special needs veterans. The Committee has learned of numerous anecdotal examples where VA's core constituency does not have access to timely, quality medical care because the networks that serve them are operating with long waiting lists. According to VA's recent estimate, there are over 310,000 veterans on waiting lists for medical care. In many instances, the wait for a doctor's appointment is over 6 months, and VA projects the waiting list will grow even more significantly if current guidelines and expectations do not change.

The Committee believes that the VA is "a victim of its own success" due to its generous healthcare benefits and vastly improved quality healthcare access. Over the last decade, VA has opened over 850 new outpatient clinics around the Nation that have attracted overwhelming numbers of users to the system. This, coupled with a generous pharmacy benefit and expanded eligibility criteria enacted in 1996, has resulted in a rapidly growing VA patient population. Most notably, since 1996, VA has seen a 500 percent increase in Priority 7 veterans—veterans who are not service-connected disabled and whose income is currently greater than \$24,000 per year.

Prior to 1996 eligibility reform, only veterans who were service-connected disabled or lower income were eligible for VA medical care. Eligibility reform opened the doors to all veterans—based on available resources and space—with the Secretary of Veterans Affairs expected to make an enrollment decision at the beginning of each year. Veterans were categorized into seven priority groups, with Priority 1–6 veterans being those with service-connected conditions or lower incomes. Priority 7 veterans were to be enrolled in the system on a space available basis. Receipts from first and third party payers, co-pays, and insurance, were to offset the cost of the services for Priority 7 veterans.

Of course, 1996 eligibility reform was predicated on the enactment of Medicare Subvention, whereby the VA would be reimbursed by Medicare for treating Medicare-eligible veterans. This part of the plan, however, has not come to fruition. Additionally, the lack of a national prescription drug benefit, and the failure of many privately managed care health systems, has made the VA's generous prescription benefit even more attractive. At the same time, VA has had a poor record of collecting what it is owed by private insurance companies. In short, Priority 7 veterans came to the system, but the expected funding sources from collections and Medicare did not. These events have pushed the VA healthcare system into crisis.

It is important to note that funding appropriated for VA medical care, which is allocated through the Veterans Equitable Resource Allocation (VERA) formula, only accounts for Priority 1–6 veterans. Priority 7 veterans are not included in the VERA formula. Yet in many areas of the Nation today, high priority service-connected disabled veterans are waiting in line for a doc-

tor's appointment behind Priority 7 veterans. The Committee believes this is evidence that the system is failing its core constituency. The Committee believes it has a responsibility—an obligation—to protect the most vulnerable veterans.

The Administration's fiscal year 2003 budget proposed a new \$1,500 annual medical care deductible for Priority 7 veterans. VA estimated that this proposal would have saved over \$1,145,543,000 through reduced demand on the system. The Committee is concerned that this proposal would leave many veterans, especially those who do not have private health insurance, without access to affordable medical care. The Committee has, therefore, rejected this proposal.

The Committee understands that VA simply cannot sustain the timely, quality medical care services that are expected, while attempting to meet this increased demand. While the Committee has provided significant increased resources over the past several years, it recognizes that funding alone will not ensure that VA's core constituency—service-connected, lower-income, and special needs veterans—do not fall through the system's cracks.

To that end, the Committee has provided an additional \$1,145,543,000 in fiscal year 2003 for VA medical care above the Administration's request. The Committee has also given the Secretary discretionary authority to establish a priority for treatment of veterans. If the Secretary takes action, VA can align its resources to meet its original mission of serving its core constituency. Finally, the Committee has extend VA's authority to collect prescription drug co-payments. Without this authority, VA projects to lose some \$600,000,000 in medical care resources. Further, VA projects that the loss of these valuable resources would result in the loss of care for 110,000 veterans in 2003.

The Committee notes that the Secretary currently has the authority to suspend enrollment or take other actions, such as creating an open enrollment season, in order to better manage demand on the system within available resources. The Committee further encourages the Secretary to explore other options such as creating a tiered pharmacy co-payment structure, increasing the income thresholds, and allowing current users of the VA system to fill their privately-written prescriptions through the VA.

The Committee expects that its recommendation of significantly increased medical care funding and broad administrative discretion will give the Secretary the necessary tools to address the VA's current healthcare crisis while maintaining its vital mission of providing timely, quality medical care to service-connected disabled, lower income, and special needs veterans.

VETERANS BENEFITS ADMINISTRATION

COMPENSATION AND PENSIONS

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	¹ \$26,044,288,000
Budget estimate, 2003	26,524,300,000
Committee recommendation	28,949,000,000

¹Reflects mid-session review funding levels.

PROGRAM DESCRIPTION

Compensation is payable to living veterans who have suffered impairment of earning power from service-connected disabilities. The amount of compensation is based upon the impact of disabilities on earning capacity. Death compensation or dependency and indemnity compensation is payable to the surviving spouses and dependents of veterans whose deaths occur while on active duty or result from service-connected disabilities. A clothing allowance may also be provided for service-connected veterans who use a prosthetic or orthopedic device.

Pensions are an income security benefit payable to needy wartime veterans who are precluded from gainful employment due to non-service-connected disabilities which render them permanently and totally disabled. Under the Omnibus Budget Reconciliation Act of 1990, veterans 65 years of age or older are no longer considered permanently and totally disabled by law and are thus subject to a medical evaluation. Death pensions are payable to needy surviving spouses and

children of deceased wartime veterans. The rate payable for both disability and death pensions is determined on the basis of the annual income of the veteran or his survivors.

This account also funds burial benefits and miscellaneous assistance.

COMMITTEE RECOMMENDATION

The Committee recommends \$28,949,000,000 for compensation and pensions. This is an in-

crease of \$2,904,712,000 above the fiscal year 2002 enacted level and \$2,424,700,000 above the budget request because it takes into account OMB's mid-session review. This amount includes the cost of living adjustment for fiscal year 2003.

The estimated caseload and cost by program follows:

COMPENSATION AND PENSIONS

	2002 ¹	2003	Difference
Caseload:			
Compensation:			
Veterans	2,356,600	2,433,216	+ 76,616

Unobligated balance and transfers	- 133,543,000	- 838,000	+ 132,705,000
Total appropriation	26,044,288,000	28,949,000,000	+ 2,904,712,000

¹ Does not include pending supplemental of \$1,100,000 (H.R. 4775).

The appropriation includes \$17,138,000 in payments to the "General operating expenses" and "Medical care" accounts for expenses related to implementing provisions of the Omnibus Budget Reconciliation Act of 1990, the Veterans' Benefits Act of 1992, the Veterans' Benefits Improvements Act of 1994, and the Veterans' Benefits Improvements Act of 1996. The amount also includes funds for a projected fiscal year 2003 cost-of-living increase of 1.8 percent for pension recipients.

READJUSTMENT BENEFITS

Appropriations, 2002	\$2,135,000,000
Budget estimate, 2003	2,264,808,000
Committee recommendation	2,264,808,000

PROGRAM DESCRIPTION

The readjustment benefits appropriation finances the education and training of veterans and servicepersons whose initial entry on active duty took place on or after July 1, 1985. These benefits are included in the All-Volunteer Force Educational Assistance Program (Montgomery GI bill) authorized under 38 U.S.C. 30. Eligibility to receive this assistance began in 1987. Basic benefits are funded through appropriations made to the readjustment benefits appropriation and transfers from the Department of Defense. Supplemental benefits are also provided to certain veterans and this funding is available from transfers from the Department of Defense. This account also finances vocational rehabilitation, specially adapted housing grants,

automobile grants with the associated approved adaptive equipment for certain disabled veterans, and finances educational assistance allowances for eligible dependents of those veterans who died from service-connected causes or have a total permanent service-connected disability as well as dependents of servicepersons who were captured or missing in action.

COMMITTEE RECOMMENDATION

The Committee recommends the budget estimate of \$2,264,808,000 for readjustment benefits. The amount recommended is an increase of \$129,808,000 above the fiscal year 2002 enacted level.

The estimated caseload and cost for this account follows:

READJUSTMENT BENEFITS

	2002	2003	Difference
Number of trainees:			
Education and training: dependents	49,949	51,746	+ 1,797
All-Volunteer Force educational assistance:

READJUSTMENT BENEFITS—Continued

		2002	2003	Difference
Total appropriation		2,135,000,000	2,264,808,000	+ 129,808,000

¹ Includes offsetting collections.

VETERANS INSURANCE AND INDEMNITIES	
Appropriations, 2002	\$26,200,000
Budget estimate, 2003	27,530,000
Committee recommendation	27,530,000

PROGRAM DESCRIPTION

The veterans insurance and indemnities appropriation is made up of the former appropriations for military and naval insurance, applicable to World War I veterans; National Service Life Insurance, applicable to certain World War II veterans; Servicemen's indemnities, applicable to Korean conflict veterans; and veterans mortgage life insurance to individuals who have received a grant for specially adapted housing.

COMMITTEE RECOMMENDATION

The Committee recommends the budget estimate of \$27,530,000 for veterans insurance and indemnities. This is an increase of \$1,330,000 above the fiscal year 2002 enacted level. The Department estimates there will be 4,203,880 policies in force in fiscal year 2003 with a value of \$599,263,090,000.

VETERANS HOUSING BENEFIT PROGRAM FUND PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

	Program account	Administrative expenses
Appropriations, 2002	\$203,278,000	\$164,497,000
Budget estimate, 2003	437,522,000	168,207,000
Committee recommendation	437,522,000	168,207,000

PROGRAM DESCRIPTION

This appropriation provides for all costs, with the exception of the Native American Veteran Housing Loan Program, of VA's direct and guaranteed loans, as well as the administrative expenses to carry out these programs, which may be transferred to and merged with the general operating expenses appropriation.

VA loan guaranties are made to service members, veterans, reservists and unmarried surviving spouses for the purchase of homes, condominiums, manufactured homes and for refinancing loans. VA guarantees part of the total loan, permitting the purchaser to obtain a mortgage with a competitive interest rate, even without a downpayment if the lender agrees. VA requires that a downpayment be made for a manufactured home. With a VA guaranty, the lender is protected against loss up to the amount of the guaranty if the borrower fails to repay the loan.

COMMITTEE RECOMMENDATION

The Committee recommends such sums as may be necessary for funding subsidy payments, estimated to total \$437,522,000, and \$168,207,000 for administrative expenses. The administrative expenses may be transferred to the "General operating expenses" account. Bill language limits gross obligations for direct loans for specially adapted housing to \$300,000.

EDUCATION LOAN FUND PROGRAM ACCOUNT
(INCLUDING TRANSFER OF FUNDS)

	Program account	Administrative expenses
Appropriations, 2002	\$1,000	\$64,000
Budget estimate, 2003	1,000	70,000
Committee recommendation	1,000	70,000

PROGRAM DESCRIPTION

This appropriation covers the cost of direct loans for eligible dependents and, in addition,

it includes administrative expenses necessary to carry out the direct loan program. The administrative funds may be transferred to and merged with the appropriation for the general operating expenses to cover the common overhead expenses.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,000 for funding subsidy program costs and \$70,000 for administrative expenses. The administrative expenses may be transferred to and merged with the "General operating expenses" account. Bill language is included limiting program direct loans to \$3,400.

VOCATIONAL REHABILITATION LOANS PROGRAM

ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

	Program account	Administrative expenses
Appropriations, 2002	\$72,000	\$274,000
Budget estimate, 2003	55,000	289,000
Committee recommendation	55,000	289,000

PROGRAM DESCRIPTION

This appropriation covers the funding subsidy cost of direct loans for vocational rehabilitation of eligible veterans and, in addition, it includes administrative expenses necessary to carry out the direct loan program. Loans of up to \$896 (based on indexed chapter 31 subsistence allowance rate) are available to service-connected disabled veterans enrolled in vocational rehabilitation programs as provided under 38 U.S.C. chapter 31 when the veteran is temporarily in need of additional assistance. Repayment is made in 10 monthly installments, without interest, through deductions from future payments of compensation, pension, subsistence allowance, educational assistance allowance, or retirement pay.

COMMITTEE RECOMMENDATION

The Committee recommends the requested \$55,000 for program costs and \$289,000 for administrative expenses for the Vocational Rehabilitation Loans Program account. The administrative expenses may be transferred to and merged with the "General operating expenses" account. Bill language is included limiting program direct loans to \$3,626,000. It is estimated that VA will make 5,300 loans in fiscal year 2003, with an average amount of \$684.

NATIVE AMERICAN VETERAN HOUSING LOAN PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

	Administrative expenses
Appropriations, 2002	\$544,000
Budget estimate, 2003	558,000
Committee recommendation	558,000

PROGRAM DESCRIPTION

This program will test the feasibility of enabling VA to make direct home loans to native American veterans who live on U.S. trust lands. It is a pilot program that began in 1993 and expires on December 31, 2005. Subsidy amounts necessary to support this program were appropriated in fiscal year 1993.

COMMITTEE RECOMMENDATION

The Committee recommends the budget estimate of \$558,000 for administrative expenses associated with this program in fiscal year 2003. These funds may be transferred to the "General operating expenses" account.

GUARANTEED TRANSITIONAL HOUSING LOANS FOR HOMELESS VETERANS PROGRAM ACCOUNT
(INCLUDING TRANSFER OF FUNDS)
PROGRAM DESCRIPTION

This program was established by Public Law 105-368, the Veterans Programs Enhancement Act of 1998. The program is a pilot project designed to expand the supply of transitional housing for homeless veterans and to guarantee up to 15 loans with a maximum aggregate value of \$100,000,000. Not more than five loans may be guaranteed in the first 3 years of the program. The project must enforce sobriety standards and provide a wide range of supportive services such as counseling for substance abuse and job readiness skills. Residents will be required to pay a reasonable fee.

COMMITTEE RECOMMENDATION

All funds authorized for this program have been appropriated. Therefore, additional appropriations are not required. Administrative expenses of the program, estimated at \$750,000 for fiscal year 2003, will be borne by the "Medical care" and "General operating expenses" appropriations.

VETERANS HEALTH ADMINISTRATION

MEDICAL CARE

Appropriations, 2002	\$21,331,164,000
Budget estimate, 2003	22,743,761,000
Committee recommendation	23,889,304,000

¹ Does not include pending supplemental of \$417,000,000 (H.R. 4775) and transfers.

PROGRAM DESCRIPTION

The Department of Veterans Affairs [VA] operates the largest Federal medical care delivery system in the country, with 172 medical centers, 43 domiciliaries, 137 nursing homes, and 864 outpatient clinics which includes independent, satellite, community-based, and rural outreach clinics.

This appropriation provides for medical care and treatment of eligible beneficiaries in VA hospitals, nursing homes, domiciliaries, and outpatient clinic facilities; contract hospitals; State home facilities on a grant basis; contract community nursing homes; and through the hometown outpatient program, on a fee basis. Hospital and outpatient care also are provided for certain dependents and survivors of veterans under the Civilian Health and Medical Program of the VA [CHAMPVA]. The medical care appropriation also provides for training of medical residents and interns and other professional paramedical and administrative personnel in health science fields to support the Department's and the Nation's health manpower demands.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$23,889,304,000 for VA medical care, an increase of \$2,558,140,000 over the fiscal year 2002 enacted level and \$1,145,543,000 above the budget request. In addition, VA has authority to retain co-payments and third-party collections, estimated to total \$1,448,874,000 in fiscal year 2003. Therefore, the Committee's recommendation represents total resources for medical care of \$25,338,178,000.

Access to Care.—The Committee is deeply concerned that in some areas of the country, veterans are denied timely access to care because of long waiting lists for appointments for new patients, and directs VA to report by March 3, 2003, on plans to reduce the

waitings lists, including a plan for ensuring that veterans who are on waiting lists can continue to have access to pharmaceuticals while they are waiting for their appointments.

Alaska has the highest percentage of veterans in the Nation, and among Alaskans, Alaskan Natives have an extraordinary high rate of service. However, veterans' services are often spotty or non-existent in most Alaskan Native villages. The Committee urges the Department to provide support to the Alaska Native Veterans Association to provide services to veterans living in Eskimo and Indian villages and communities.

The Committee commends the Department for opening the community-based outpatient clinic on the Kenai Peninsula, Alaska. The demand for services at the clinic, however, has been so high that many veterans often wait months to receive an appointment for routine care. The Committee urges the Department to address the resource needs of the Kenai clinic to ensure that it can meet the needs of the veterans it serves.

The Committee understands that the VA has held preliminary discussions with interested parties in Northeastern Minnesota to assess the need for a community based outpatient clinic in the Fosston/Bemidji area. The Committee strongly urges the VA to expedite this assessment, and to report to the Committee by March 3, 2003, on the feasibility of opening a clinic in the region.

The Committee urges the Department to continue its support for the Brother Francis Shelter, which provides critical services to homeless veterans in Anchorage, Alaska.

The Committee is very concerned by the results of the Inspector General's audit of the Lexington, Kentucky Research Program and the lack of properly accounting for physician's time split between research and patient care. With significant waiting lists existing and access performance standards not being met, research physicians must be meeting their full commitment to patient care. The Committee expects the Secretary to provide strong oversight in this area and to take steps system-wide, to ensure care for veterans is given the highest priority.

VERA.—The Committee continues to support the core principles underlying the Veterans Equitable Resource Allocation (VERA) system—that VA health care funds should be allocated fairly according to the number of veterans having the highest priority for health care, and aligning resources according to best practices in health care. At the same time, the Committee is supportive of ongoing studies to recommend ways to increase the level of efficiency and fairness for distributing medical care resources. However, the Committee recognizes that recent studies have indicated that modifications to the VERA formula could better account for infrastructure costs and actual patient care costs. The Committee directs the VA to complete the presently planned work as scheduled, and to continue the study in the coming year, updating the results with the most recent data and utilizing the models developed. The Committee further directs the VA to provide interim reports to the Committee in February and June 2003, and a final study with all findings by the end of fiscal year 2003. The final study should include any recommendations to better account for infrastructure costs and actual patient care costs, as well as ways to increase the level of efficiency and fairness for distributing medical care resources.

Finally, the Committee continues to believe that when any Veterans Integrated Service Network (VISN) experiences an operating shortfall that would threaten its ability to serve eligible veterans, and VHA has determined that the VISN has implemented

all appropriate economies and efficiencies, VHA should consider providing supplemental allocations to that VISN. To that end, the Committee urges VA to ensure that it reserves sufficient funds to meet the operating need of those VISNs that may require supplemental funding during the year.

Prevention of Amputations, Care, and Treatment.—The Committee is aware of studies that have found that collagen based therapies can reduce the need for amputations by increasing wound heal rates, and directs VA to provide a report by April 3, 2003, on the VA's experience in this matter as well as the VA's future plans to utilize collagen based therapies.

Physician Assistant Advisor.—The Veterans Benefits and Health Care Improvement Act of 2000 (Public Law 106-419) directed the VHA to create a Physician Assistant (PA) Advisor position to the Office of the Under Secretary for Health. The Committee commends VA for filling this position and strongly encourages the VHA to ensure that the PA Advisor position is a full-time position, located in the VA central office or in a VA field medical center that is in close proximity to Washington, DC, and provided sufficient funding to support the administrative and travel requirements associated with the position. The Committee directs VA to report by March 3, 2003, as to the progress made on this matter.

Psychology Post-Doctoral Training Program.—The Committee continues to support the VHA's efforts to strengthen the Psychology Post-Doctoral Training Program. The Committee awaits the progress report due early this year that will include the number of training slots for psychologists and their location.

Long Distance Learning Program for Nursing.—The Committee supports the joint VA/DOD Distance Learning Program, and recommend that the VA continue the distance learning project designed to transition clinical nurse specialists into roles as adult nurse practitioners.

Joslin Vision Network (JVN).—The Committee supports the current level of support to expand the JVN to additional pilot sites in fiscal year 2003. This program benefits diabetic patients by offering improved quality of care through increased access to the highest quality medical expertise and education, and the Committee encourages the VA to initiate new pilot sites to advance the JVN technology toward off-the-shelf deployment.

Homelessness.—The Committee commends the Department's efforts to improve coordination of its homeless programs with other Federal departments and agencies. The Committee is especially pleased with the Department's participation in the Interagency Council on the Homeless. The Committee strongly urges the Department to continue participating in the Council and develop coordinated strategies with other agencies to prevent and end homelessness among veterans.

Clarksburg/Ruby Memorial demonstration.—The Committee supports continuation at current levels of the Clarksburg VAMC/Ruby Memorial hospital demonstration project.

Rural Veterans Health Care Initiative.—The Committee supports continuation at the current level of the Rural Veterans Health Care Initiative at White River Junction, VT VAMC.

Harry S. Truman VAMC.—The Committee strongly urges VA to support development of a new micro-imaging center for the Harry S. Truman VAMC in Columbia, Missouri by providing funds for a micro-MRI, a micro-SPET, and a micro-PET. These research systems will be for imaging experimental mouse or small rat models. These new instruments will assist cancer research specialists in expanding and enhancing their study and

treatment of this deadly disease. These additions fill the critical remaining gap in a nationally prominent and unique program in the development of cancer therapeutics and imaging.

Fort Howard VAMC.—The Committee supports the creation of a continuum of care community for veterans at the Fort Howard VAMC in Maryland, and directs the VA to report by October 30, 2002, on the status of these efforts. The report should include specific timelines and milestones for the future.

Lakeside VAMC.—The Committee is aware of efforts in the City of Chicago, Illinois to impose possible zoning limitations on property occupied by the VA's Lakeside medical facility. The Committee strongly believes the VA must receive fair market value for the property in order to ensure that the best interests of veterans and the Federal Government are met. VA intends to transfer the Lakeside property to a successor user under an enhanced lease use agreement. However, recent efforts in the City would diminish the value of the Lakeside property, resulting in reduced proceeds for medical services needed for local area veterans. The Committee objects to these efforts and supports the VA's efforts to place the needs of veterans as their highest priority. The Committee fully supports the Department's plans to lease the property as described in their CARES plan and will explore all necessary means to prevent any effort to hurt local veterans. The Committee cautions outside interested parties that the lease of VA property in VISN 12 will be conducted in accordance with the previously announced CARES process. Accordingly, the Committee directs the VA to enter only into an enhanced lease agreement where the VA receives full value for the use of the facility, consistent with its current CARES plan. Before the VA proceeds with any lease, the Committee directs the Department to provide a professional, independent appraisal of the Lakeside property.

Ranch Hand Project.—The Committee supports the Ranch Hand project studying the impact of Agent Orange on Alaskan Native veterans and urges the Department to provide the funding necessary to complete this important project.

Minnesota Veterans Home.—The Committee is aware that the Minnesota Veterans Home has designed a comprehensive dementia care program. The Committee supports these efforts, and urges VA to provide support for this initiative.

Preventative Medicine.—The Committee is concerned that the Department's focus on acute care has overshadowed the need to include preventative medicine in its strategic healthcare delivery portfolio. To that end, the Committee urges the VA to develop strong collaborative efforts with academic public health institutions.

Complementary and Alternative Medicine.—The Committee directs the VA to review the recent final report of the White House Commission on Complementary and Alternative Medicine Policy, and to report by June 27, 2003, on the status of the VA's implementation of the report's recommendations to VA.

The Committee has included bill language delaying the availability until August 1, 2003, of \$500,000,000 in the equipment, lands, and structures object classifications.

The Committee has included bill language to make available through September 30, 2003, up to \$900,000,000 of the medical care appropriation. This provides flexibility to the Department as it continues to implement significant program changes.

MEDICAL CARE COLLECTIONS FUND

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$1,031,000,000
Budget estimate, 2003	21,448,874,000

Committee recommendation 2,144,874,000

¹ Includes \$805,000,000 in MCCF and \$226,000,000 in HSIF funds proposed to be transferred to the MCCF.

² As estimated in the budget request.

PROGRAM DESCRIPTION

The Balanced Budget Act of 1997 (Public Law 105-33) established the Department of Veterans Affairs Medical Care Collections Fund (MCCF). The Department deposits co-payments and third party insurance payments into this fund.

COMMITTEE RECOMMENDATION

The budget request assumes that VA will collect \$1,448,874,000 in co-payments, third party collections, and enhanced use lease proceeds. These funds will be transferred to the Medical Care account to provide direct healthcare services to our Nation's veterans. The Committee has included bill language extending VA's authority to collect co-payments for pharmaceuticals. The Committee has also included bill language making an accounting change to VA's collections account structure. The Committee's recommended change will result in all VA collections being deposited into the Medical Care Collections Fund, to be transferred to the Medical Care account in order to provide direct healthcare services to our Nation's veterans. Currently, VA has two separate collections accounts. The Committee's recommendation would place all of VA's collections into the Medical Care Collections Fund, and will result in better oversight to ensure that all co-payments, third party collections, and enhanced use lease proceeds are applied toward direct healthcare services for our Nation's veterans.

MEDICAL AND PROSTHETIC RESEARCH

Appropriations, 2002	\$371,000,000
Budget estimate, 2003	394,373,000
Committee recommendation	400,000,000

PROGRAM DESCRIPTION

The "Medical and prosthetic research" account provides funds for medical, rehabilitative, and health services research. Medical research supports basic and clinical studies that advance knowledge leading to improvements in the prevention, diagnosis, and treatment of diseases and disabilities. Rehabilitation research focuses on rehabilitation engineering problems in the fields of prosthetics, orthotics, adaptive equipment for vehicles, sensory aids and related areas. Health services research focuses on improving the effectiveness and economy of delivery of health services.

COMMITTEE RECOMMENDATION

The Committee recommends \$400,000,000 for medical and prosthetic research, an increase of \$5,627,000 above the budget request and \$29,000,000 above the fiscal year 2002 enacted level. The Committee remains highly supportive of this program, and recognizes its importance both in improving health care services to veterans and recruiting and retaining high-quality medical professionals in the Veterans Health Administration.

Neurofibromatosis.—Research has documented the link between neurofibromatosis (NF) and cancer, brain tumors, and heart disease. In view of this link, which suggests that research on NF stands to benefit a vast segment of the veteran population, the Committee encourages the VA to increase its NF research portfolio, in addition to continuing to collaborate with other Federal agencies, such as the Department of Defense, in joint initiatives.

Nursing Research Program.—The Committee supports the Nursing Research Program to enable nurses to conduct research that focuses on the specific health care needs of

aging veterans, and urges the program's continuation.

MEDICAL ADMINISTRATION AND MISCELLANEOUS OPERATING EXPENSES

Appropriations, 2002	\$66,731,000
Budget estimate, 2003	69,716,000
Committee recommendation	69,716,000

PROGRAM DESCRIPTION

This appropriation provides funds for central office executive direction (Under Secretary for Health and staff), administration and supervision of all VA medical and construction programs, including development and implementation of policies, plans, and program objectives.

COMMITTEE RECOMMENDATION

The Committee recommends \$69,716,000 for medical administration and miscellaneous operating expenses, an increase of \$2,985,000 above the fiscal year 2002 enacted level and the same as the budget request.

In 2000, VA established a reimbursement process between VHA, NCA, and VBA for project technical and consulting services to be provided by the Facilities Management Service Delivery Office. The estimated level of reimbursement to the Medical Administration and Miscellaneous Operating Expenses account in fiscal year 2003 for facilities management support is \$7,155,000.

DEPARTMENTAL ADMINISTRATION

GENERAL OPERATING EXPENSES

Appropriations, 2002	\$1,195,728,000
Budget estimate, 2003	1,256,418,000
Committee recommendation	1,256,418,000

PROGRAM DESCRIPTION

This appropriation provides for the administration of nonmedical veterans benefits through the Veterans Benefits Administration [VBA], the executive direction of the Department, several top level supporting offices, of the Board of Contract Appeals, and the Board of Veterans' Appeals.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,256,418,000 for general operating expenses, an increase of \$60,690,000 above the fiscal year 2002 enacted level. The amount provided includes \$992,000,000 for the Veterans Benefits Administration and \$264,418,000 for general administration. In addition to this appropriation, resources are made available for general operating expenses through reimbursements totaling \$423,239,000 for fiscal year 2003, with total estimated obligations of approximately \$1,679,657,000.

The Committee recommends making available \$65,800,000 of the GOE appropriation for 2 years, a travel limitation of \$17,082,000, and the current level of \$25,000 for official reception and representation expenses.

Veterans' Employment and Training Programs.—The Committee has not recommended the Administration's proposal to transfer these programs from the Department of Labor to the VA. The Committee expects that these programs will continue through the Department of Labor's Employment and Training Service, and will consider future proposals of this nature subject to the Committee's receiving more specific justifications on how such proposals will improve employment and training services for veterans.

Management Issues.—The Committee is concerned that there continues to be unclear lines of accountability within the Veterans Benefits Administration, leading to diminished enforcement of quality standards and program policies, and reduced efficiency and timeliness in claims processing. The Committee directs VA to report by May 30, 2003,

on efforts to address these management issues.

VA Healthcare Information Security.—The Committee is pleased with the VA's efforts to modernize its cyber security infrastructure to ensure that sensitive VA records, and those of the VHA patient population are protected from cyber attack, and urges the VA to accomplish this high priority objective as quickly as possible. To that end, the Committee supports continuation at current levels of planning and development efforts related to the recent establishment of the Cyber Security Joint Program Office located at the Martinsburg, WV VAMC.

NATIONAL CEMETERY ADMINISTRATION

Appropriations, 2002	\$121,169,000
Budget estimate, 2003	133,149,000
Committee recommendation	133,149,000

PROGRAM DESCRIPTION

The National Cemetery Administration was established in accordance with the National Cemeteries Act of 1973. It has a four-fold mission: to provide for the interment in any national cemetery the remains of eligible deceased servicepersons and discharged veterans, together with their spouses and certain dependents, and permanently to maintain their graves; to mark graves of eligible persons in national and private cemeteries; to administer the grant program for aid to States in establishing, expanding, or improving State veterans' cemeteries; and to administer the Presidential Memorial Certificate Program.

There are a total of 154 cemeterial installations in 39 States, the District of Columbia, and Puerto Rico. The Committee's recommendation for the National Cemetery Administration provides funds for all of these cemeterial installations.

COMMITTEE RECOMMENDATION

The Committee recommends \$133,149,000 for the National Cemetery Administration. This is an increase of \$11,980,000 over the fiscal year 2002 enacted level and the same as the budget request.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$52,308,000
Budget estimate, 2003	55,000,000
Committee recommendation	55,000,000

PROGRAM DESCRIPTION

The Office of Inspector General was established by the Inspector General Act of 1978 and is responsible for the audit and investigation and inspections of all Department of Veterans Affairs programs and operations.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$55,000,000 for the inspector general. This is an increase of \$2,692,000 above the fiscal year 2002 enacted level.

CONSTRUCTION, MAJOR PROJECTS

Appropriations, 2002	\$183,180,000
Budget estimate, 2003	193,740,000
Committee recommendation	144,790,000

PROGRAM DESCRIPTION

The construction, major projects appropriation provides for constructing, altering, extending, and improving any of the facilities under the jurisdiction or for the use of VA, including planning, architectural and engineering services, Capital Asset Realignment Enhanced Services (CARES) activities, assessment, and site acquisition where the estimated cost of a project is \$4,000,000 or more.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$144,790,000 for construction, major

projects, \$38,390,000 below the fiscal year 2002 enacted level and \$48,950,000 below the budget request.

The following table compares the Committee recommendation with the budget request.

CONSTRUCTION, MAJOR PROJECTS

[In thousands of dollars]

Location and description	Available through 2002	2003 request	Committee recommendation
Veterans Health Administration (VHA):			
Palo Alto (Palo Alto Division), CA, Seismic Corrections, Building 2	14,013	14,013	14,013
Palo Alto (Palo Alto Division), CA, Seismic Corrections, Building 4 (Research)	21,750	0	0

Subtotal, Other line-items	500	500	500
Total construction, major projects	16,000	16,000	16,000
1 Land acquisition funds (\$15,000,000) in 2001 and design funds (\$2,000,000) in 2002 were provided for a new cemetery in Southern Florida. Eighteen million dollars was provided in 2002 for land acquisition in Pittsburgh, Detroit, and Sacramento areas.			
2 National Cemetery Administration major project requests do not include the purchase of pre-placed crypts, which are funded by the Compensation and Pensions appropriation.			

¹ Land acquisition funds (\$15,000,000) in 2001 and design funds (\$2,000,000) in 2002 were provided for a new cemetery in Southern Florida. Eighteen million dollars was provided in 2002 for land acquisition in Pittsburgh, Detroit, and Sacramento areas.

² National Cemetery Administration major project requests do not include the purchase of pre-placed crypts, which are funded by the Compensation and Pensions appropriation.

The Committee recommends the requested amounts for 2 seismic correction projects in California, but directs that the VA proceed with these projects only upon confirmation that they are found to be consistent with the strategic plan which emerges from the CARES process in VISNs 21 and 22. Due to budgetary constraints, the Committee is funding the Administration's two highest priorities under this account.

The Committee also recommends the requested amounts for development of both the Pittsburgh, Pennsylvania, and the Miami, Florida National Cemeteries, and improvements at the Willamette, Oregon National Cemetery, and design funding for new cemeteries in Detroit, Michigan, and Sacramento, California.

CARES.—The Committee remains strongly committed to the Capital Asset Realignment for Enhanced Services (CARES) initiative to ensure the VA healthcare system can meet the needs of veterans today and in the future. The Committee commends the Department for implementing the first phase of CARES in VISN 12 and supports the Department's recently announced plan to complete CARES for the rest of the VA health care system within 2 years. To that end, the Committee recognizes that VA may have additional resource needs to support CARES studies across the Nation, and directs VA to keep the Committee apprised of any additional needs to ensure that the process can move forward as scheduled.

In support of the new CARES plan, the Committee has provided a total of \$40,000,000—\$5,000,000 in major construction and \$35,000,000 in minor construction—for CARES activities, including advance planning, design development, construction documents, and construction for major capital initiatives stemming from the CARES recommendations.

The Committee directs VA to propose, not later than February 15, 2002, a framework for prioritization of the capital improvement projects that will be identified as priorities as a result of the CARES studies. This proposal should include any necessary modifica-

tions to the VA capital investment and appropriations processes for major and minor construction funding.

The Committee also directs the VA to submit, not later than May 15, 2003, a 5-year strategic plan that describes the implementation of CARES, criteria used for priority-setting of projects, estimated funding costs per VISN by year, and estimated savings to be reinvested back into each VISN by year. The Committee directs that this plan be inclusive of all VA infrastructure needs—major, minor, research-related, safety, seismic, and other—so that ultimately, VA will produce one master list of all priority infrastructure projects. The Committee believes this is imperative to be able to plan for the future resource needs of VA and to eliminate confusion between and among VA's current differing and conflicting priority setting mechanisms.

Finally, the Committee directs that any major construction projects included in future budget submissions meet the following five basic criteria: (1) the project is CARES approved; (2) the project is included in the Department's 5-year strategic plan; (3) the project is a top priority for the VISN in which it is located; (4) the project is at least 30 percent design complete; and (5) the project is authorized.

Beckley, WV nursing home care unit.—The Committee urges the VA to include sufficient funding in the 2004 budget request for a new nursing home care unit at the Beckley, WV VAMC, upon confirmation that the project is consistent with the strategic plan which emerges from the VISN 6 CARES process.

CONSTRUCTION, MINOR PROJECTS

Appropriations, 2002	\$210,900,000
Budget estimate, 2003	210,700,000
Committee recommendation	210,700,000

PROGRAM DESCRIPTION

The construction, minor projects appropriation provides for constructing, altering, extending, and improving any of the facilities under the jurisdiction or for the use of

VA, including planning, CARES activities, assessment of needs, architectural and engineering services, and site acquisition, where the estimated cost of a project is less than \$4,000,000. Public Law 106-117, the Veterans Millennium Health Care and Benefits Act of 1999, gave VA the authority to make capital contributions from minor construction in enhanced-use leases.

COMMITTEE RECOMMENDATION

The Committee recommends \$210,700,000 for minor construction, the same as the budget request and \$200,000 below the fiscal year 2002 enacted level. The Committee is aware of the authorizing committees' current efforts to raise the limitation on minor construction projects. The Committee understands that the current limitation has not been raised for several years despite the inflationary cost of construction, and supports the authorizers' efforts to address this matter.

St. Louis Parking.—The Committee is aware that the Department is examining the use of enhanced-use leasing at the John Cochran Division of the VA Medical Center in St. Louis, Missouri as a means to address a severe parking deficiency and safety problem at the Medical Center. The Department is encouraged to address this problem consistent with the CARES protocols.

PARKING REVOLVING FUND

Appropriations, 2002	\$4,000,000
Budget estimate, 2003
Committee recommendation

PROGRAM DESCRIPTION

The revolving fund provides funds for the construction, alteration, and acquisition (by purchase or lease) of parking garages at VA medical facilities authorized by 38 U.S.C. 8109.

The Secretary is required under certain circumstances to establish and collect fees for the use of such garages and parking facilities. Receipts from the parking fees are to be deposited in the revolving fund and would be used to fund future parking garage initiatives.

COMMITTEE RECOMMENDATION

No new budget authority is requested for the parking revolving fund in fiscal year 2003. Leases will be funded from parking fees collected.

GRANTS FOR CONSTRUCTION OF STATE EXTENDED CARE FACILITIES

Appropriations, 2002	\$100,000,000
Budget estimate, 2003	100,000,000
Committee recommendation	100,000,000

PROGRAM DESCRIPTION

This account is used to provide grants to assist States in acquiring or constructing State home facilities for furnishing domiciliary or nursing home care to veterans, and to expand, remodel or alter existing buildings for furnishing domiciliary, nursing home, or hospital care to veterans in State homes. The grant may not exceed 65 percent of the total cost of the project, and grants to any one State may not exceed one-third of the amount appropriated in any fiscal year. Public Law 102-585 granted permanent authority for this program and Public Law 106-117 provided greater specificity in directing VA to prescribe regulations for the number of beds for which grant assistance may be furnished.

COMMITTEE RECOMMENDATION

The Committee recommends \$100,000,000 for grants for the construction of State extended care facilities, equal to the fiscal year 2002 enacted level and the budget request. This program cost-effectively meets long-term health care needs of veterans.

GRANTS FOR THE CONSTRUCTION OF STATE VETERANS' CEMETERIES

Appropriations, 2002	\$25,000,000
Budget estimate, 2003	32,000,000
Committee recommendation	32,000,000

PROGRAM DESCRIPTION

Public Law 105-368, amended title 38 U.S.C. 2408, which established authority to provide aid to States for establishment, expansion, and improvement of State veterans' cemeteries which are operated and permanently maintained by the States. This amendment increased the maximum Federal Share from 50 percent to 100 percent in order to fund construction costs and the initial equipment expenses when the cemetery is established. The States remain responsible for providing the land and for paying all costs related to the operation and maintenance of the State cemeteries, including the costs for subsequent equipment purchases.

COMMITTEE RECOMMENDATION

The Committee recommends \$32,000,000 for grants for construction of State veterans' cemeteries in fiscal year 2003, \$7,000,000 above the fiscal year 2002 enacted level and the same as the budget request.

ADMINISTRATIVE PROVISIONS

The Committee has included 10 administrative provisions (Sections 101-110) carried in earlier bills. Among these are:

Section 107 enables VA to use surplus earnings from the national service life insurance, U.S. Government life insurance, and veterans special life insurance programs to administer these programs. This provision was included for the first time in fiscal year 1996 appropriations legislation. The Department estimates that \$38,110,000 will be reimbursed to the "General operating expenses" account as a result of this provision.

Section 108 extends the VA's Franchise Fund pilot program.

Section 109 enables the VA to reimburse accounts from enhanced use lease proceeds.

Section 110 allows for fiscal year 2003 only, the reimbursement of the Office of Resolu-

tion Management (ORM) and the Office of Employment Discrimination Complaint Adjudication (OEDCA) for services provided, from funds in any appropriation for salaries and other administrative expenses.

Section 111 is a new administrative provision that: (1) reauthorizes VA's authority to collect co-payments for prescription drugs; and (2) makes an accounting change to combine the Health Services Improvement Fund (HSIF) and the Medical Care Collections Fund (MCCF), as described earlier in this report.

TITLE II—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Appropriations, 2002	\$32,148,695,000
Budget estimate, 2003	31,348,851,000
Committee recommendation	31,149,157,000

GENERAL DESCRIPTION

The Department of Housing and Urban Development [HUD] was established by the Housing and Urban Development Act (Public Law 89-174), effective November 9, 1965. This Department is the principal Federal agency responsible for programs concerned with the Nation's housing needs, fair housing opportunities, and improving and developing the Nation's communities.

In carrying out the mission of serving the needs and interests of the Nation's communities and of the people who live and work in them, HUD administers mortgage and loan insurance programs that help families become homeowners and facilitate the construction of rental housing; rental and homeownership subsidy programs for low-income families who otherwise could not afford decent housing; programs to combat discrimination in housing and affirmatively further fair housing opportunity; programs aimed at ensuring an adequate supply of mortgage credit; and programs that aid neighborhood rehabilitation, community development, and the preservation of our urban centers from blight and decay.

HUD administers programs to protect the homebuyer in the marketplace and fosters programs and research that stimulate and guide the housing industry to provide not only housing, but better communities and living environments.

COMMITTEE RECOMMENDATION

The Committee recommends for fiscal year 2003 an appropriation of \$31,149,157,000 for the Department of Housing and Urban Development. This is \$1,044,038,000 below the fiscal year 2002 enacted level and \$199,934,000 below the budget request.

HOUSING CERTIFICATE FUND
(INCLUDING RECESSSION AND TRANSFERS OF FUNDS)

Appropriations, 2002	¹ \$15,641,000,000
Budget estimate, 2003	217,527,000,000
Committee recommendation	16,928,697,000

¹Includes an advance appropriation of \$4,200,000,000 for fiscal year 2002.

²Includes an advance appropriation of \$4,200,000,000 for fiscal year 2003.

PROGRAM DESCRIPTION

This account provides funding for the section 8 programs, including vouchers, certificates, and project-based assistance. Section 8 assistance is the principal appropriation for Federal housing assistance, with over 3 million families assisted under section 8. Under these programs, eligible low-income families pay 30 percent of their adjusted income for rent, and the Federal Government is responsible for the remainder of the rent, up to the fair market rent or some other payment standard.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$16,928,697,000, including the necessary

funds to renew all expiring section 8 contracts. These funds also cover the costs of enhanced vouchers for families that choose to continue to live in multifamily housing in which a mortgage is refinanced and the housing was previously eligible for the Preservation Program, as well as in certain circumstances where owners of assisted multifamily housing opt out of the section 8 program. Consistent with the budget request, this account includes an advance appropriation of \$4,200,000,000 for the remaining costs of contracts renewed in calendar year 2003 for the months requiring section 8 assistance during fiscal year 2004.

Other activities eligible for funding under this account include: the conversion of section 23 projects to assistance under section 8; the relocation and replacement of demolished or disposed properties; the family unification program; and the relocation of witnesses in connection with efforts to fight crime in public and assisted housing pursuant to a law enforcement or prosecution agency.

The Committee did not include the administration's request for an additional 34,000 new vouchers because of ongoing concerns over the effectiveness of tenant-based vouchers in providing decent, safe, and affordable housing to low-income people. The Committee is deeply concerned that the tenant-based voucher program offers a false promise of rental choice that recipients cannot realize. In many instances, voucher holders have limited choices, and end up concentrated in the same low-income neighborhoods. This result is antithetical to the goals of the program, which include resident choice, mixed-income housing, and decent living conditions. The Committee urges HUD to make voucher reform a priority for the Department. The Committee strongly supports providing vouchers to people with disabilities, and has made it a priority in this Act. The Committee has included language to prioritize the reallocation of unused vouchers to people with disabilities. New language is also included to ensure that vouchers that were originally funded for use by people with disabilities remain for use by that population. Past practice by HUD and PHAs has resulted in disability vouchers being converted into non-designated vouchers. The Committee expects that these provisions will result in the same—if not greater—number of vouchers serving people with disabilities, despite the absence of a specific appropriation for disability vouchers. The Committee has also included a requirement for a HUD report on the effectiveness of vouchers for people with disabilities.

As part of a voucher reform effort, the Senate endorses a funding model developed by the House Committee on Appropriations which is designed to ensure that only the funds actually needed for vouchers in use will be made available. This model is designed to avoid the appropriation of budget authority in excess of the amount actually required while continuing the longstanding commitment to renew all currently authorized vouchers. While the Committee wishes to ensure that there are sufficient funds available to support all of the currently authorized vouchers that public housing agencies are able to use, the Committee wishes to avoid the recapture and rescission of large amounts of unused Section 8 funds in future years.

The Committee also notes that it is disappointed that HUD has made so little progress in reforming the section 8 program, both in terms of poor utilization rates and by requesting funds well in excess of program needs.

To make the section 8 program more effective, the Committee directs HUD to renew

annual contributions contracts with public housing agencies for the full number of vouchers reserved to date for each agency that expire during the period covered by this appropriations act. HUD is authorized, however, to contract with each public housing agency for the amount of funds needed to support the number of vouchers that the agency is expected to use in the 12-month period covered by the contract, even if this amount is less than the full amount of funds the public housing agency otherwise would receive under the current renewal formula established by 24 C.F.R. 982.102. In making this determination, HUD is directed to not arbitrarily determine the amount of funds an agency will receive based on the average number of vouchers the agency used during its previous fiscal year, but must make a reasonable determination of the number of vouchers likely to be used in the subsequent 12 months based on current utilization and recent and planned changes in the agency's administrative policies and practices that affect its voucher utilization rate. HUD is directed to collect timely information by the end of each fiscal year that identifies the number of assisted units that are occupied and the cost of these units to HUD for each program under this account. This information is to be provided to the House and Senate Committees on Appropriations before the end of each fiscal year. This information also should be updated regularly and available to these committees by demand. The Committee does not intend to override agreements that HUD has entered into with public housing agencies participating in the Moving to Work Demonstration concerning the renewal of contracts for voucher funds, nor does the Committee intend to reduce the number of vouchers reserved for an agency as part of the settlement of litigation.

In light of the inherent impossibility of calculating exactly how many vouchers can be used and how much they will cost in fiscal year 2003, to ensure that sufficient budget authority is provided for all authorized vouchers that can be used, the Committee bill contains language establishing a central fund that has both a finite appropriation and also includes a "current, indefinite" appropriation. This authority is limited to the renewal of voucher contracts under this year's bill. As to the renewal of vouchers, this authority may not exceed the funding necessary for the 2,077,336 authorized vouchers for which contracts are expiring or terminating. If a public housing agency is able to lease more vouchers than agreed upon in the annual contract, HUD may fund up to the number of vouchers reserved to date for the agency with either appropriations set aside for renewal of voucher contracts, or appropriations from the central fund. HUD shall not require agencies to use their program reserves for this purpose.

Before requesting additional funds from the Treasury under the "current, indefinite" appropriation language, HUD must use available recaptured Section 8 funds (both project-based and tenant-based funds) that are not needed to meet the rescission amount contained in the bill. The "current indefinite" authority may not exceed the amount of funds needed to meet costs associated with fiscal year 2003 for renewal and incremental vouchers, and may not be used for any obligations in fiscal year 2004. In addition, the Committee directs HUD to refrain from taking steps during fiscal year 2003 that would substantially increase average per voucher costs and to notify the appropriations subcommittees before revising the regulatory criteria that apply to the determination of Fair Market Rents or exception payment standards. HUD should not, however, delay in developing more accurate methods

for determining the likely average cost of vouchers in the renewal funding period.

The Committee directs HUD to continue current policies on the establishment, use and replenishment of program reserves for each public housing agency, in order to meet increases in current per voucher costs in excess of the costs assumed in calculating renewal funding. The Committee notes that HUD has an obligation to provide public housing agencies with access to up to an additional 30 days of funding, beyond the regular 30-day reserve, if necessary to serve the authorized number of families. HUD may use appropriations from the central fund to replenish reserves if prior years' appropriations are not available for this purpose.

While some agencies have used all or nearly all of their vouchers and voucher budget authority, and others have improved their performance to reach this target, some have chronically failed to utilize more than 10 percent of vouchers and related budget authority. In 2000, HUD began the process to reallocate unused vouchers from such agencies. Agencies that were warned in 2001 that they would lose vouchers if they did not bring their utilization rate up to 95 percent or higher within approximately 16 months and that failed to meet this target should have had their contracts with HUD reduced. Due to administrative error, HUD has not followed through on its initial warnings except for welfare-to-work vouchers. The Committee directs HUD to move expeditiously to implement fully the voucher reallocation policy, and permits HUD to use appropriations in the central fund for this purpose. Except for vouchers needed to meet urgent housing needs in federally-declared disaster areas, HUD should award contracts for these reallocated vouchers to the agencies most in need and able to make best use of them. If possible, reallocated vouchers should be made available to an agency in the state that can serve eligible families on the waiting list of the agency losing the funding. HUD should be able to make the awards of reallocated vouchers promptly, as interested agencies were given a deadline of August 2002 to apply for the initial round of such vouchers that were not reserved for the welfare-to-work program. To improve the reallocation process in fiscal year 2004 and thereafter, the Committee has included statutory language that would govern this process.

To help ensure that progress continues to be made to improve voucher utilization, HUD shall submit to the appropriations and authorizing committees within 4 months after enactment of this Act, a plan on the steps it intends to take to ensure that vouchers allocated to underperforming agencies are used, including, but not limited to, steps that would require changes in authorizing language or increased appropriations (or more flexibility in use of existing appropriations). The Committee recommends that continuing improvement in voucher utilization be included in the President's Management Agenda.

The Committee also notes that it is disappointed that HUD has made so little progress in reforming the section 8 program, both in terms of poor utilization rates and by requesting funds well in excess of program needs.

The Committee also directs HUD to identify in its fiscal year 2004 budget justification the renewal costs associated with each project-based section 8 program, such as the section 8 moderate rehabilitation program and the section 515 program.

The Committee urges the administration to use all available tools at its disposal to preserve existing project-based section 8 units. By one estimate, over 675,000 contracts on project-based section 8 units are due to

expire by 2005. The Committee is very concerned about the loss of these units, given the shortage in the supply of affordable housing, and in light of this Committee's substantial investment in those units. With an initial report due by April 15, 2003, the Department is directed to submit quarterly reports to this Committee on the number of units and properties where owners have elected to opt out of a section 8 contract, or to prepay the HUD mortgage. The report should also detail the repair needs for apartments covered by expiring section 8 contracts, and actions taken by the Department to preserve and/or improve the units.

PUBLIC HOUSING CAPITAL FUND (INCLUDING TRANSFER OF FUNDS)	
Appropriations, 2002	\$2,843,400,000
Budget estimate, 2003	2,425,900,000
Committee recommendation	2,683,400,000

PROGRAM DESCRIPTION

This account provides funding for modernization and capital needs of public housing authorities (except Indian housing authorities), including management improvements, resident relocation and homeownership activities.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$2,683,400,000 for the public housing capital fund, \$257,500,000 more than the budget request and \$160,000,000 below the fiscal year 2002 enacted level. The Committee has rejected the reduction proposed by the administration in light of the approximate \$20,000,000,000 in public housing capital needs.

Of the amount made available under this section, up to \$55,000,000 is for supportive services for residents of public housing, and up to \$15,000,000 is for the Neighborhood Networks Initiative in public housing. Funds for the Neighborhood Networks Initiative are provided to establish and operate computer centers in and around public housing. The Committee provides these funds so that residents of public housing can have access to the technology skills that are increasingly important in the 21st century workplace. The Committee is concerned that HUD does not have a comprehensive plan to address the digital divide, despite the Committee's urging last year to develop such a plan.

HUD is prohibited from using any funds under this account as an emergency reserve under section 9(k) of the United States Housing Act of 1937, but is provided up to \$75,000,000 for emergency capital needs.

The Committee does not accept the administration's legislative proposal to finance privately the capital needs of public housing with section 8 funds. The Committee is concerned that the proposal could result in a loss of public housing units, and would not benefit public housing units with the greatest capital needs. The Committee agrees, however, that Public Housing Authorities should have the tools they need to finance improvements to public housing units. New authority is needed so that public housing authorities can use funds they receive to address critical, deferred maintenance needs. The Committee includes an administrative provision to allow public housing authorities the flexibility to use public housing funds to leverage private capital to rehabilitate distressed units and develop public housing units in mixed-income housing developments.

PUBLIC HOUSING OPERATING FUND

Appropriations, 2002	\$3,494,868,000
Budget estimate, 2003	3,530,000,000
Committee recommendation	3,530,000,000

PROGRAM DESCRIPTION

This account provides funding for the payment of operating subsidies to some 3,050 public housing authorities (except Indian housing authorities) with a total of over 1.2 million units under management in order to augment rent payments by residents in order to provide sufficient revenues to meet reasonable operating costs.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$3,530,000,000 for the public housing operating fund, an increase of \$35,132,000 over the fiscal year 2002 level and the same as the budget request. HUD is prohibited from using any funds under this account as an emergency reserve under section 9(k) of the United States Housing Act of 1937.

The Committee directs HUD to use up to \$250,000,000 to meet the operating expenses of those public housing agencies (PHAs) that received a shortfall in their operating assistance in the fourth quarter of fiscal year 2002. These funds are included for only those PHAs in fiscal year 2002 that received less than the amount of operating assistance expected. Apparently, HUD has engaged in a practice over the last 10 years of paying for prior year operating costs with current year appropriations. This practice has occurred using substantial funds without the apparent knowledge or approval of either Congress or OMB. It also is inconsistent with the intent of Congress and appropriations practice. While HUD has taken steps to address these problems in the Public Housing program, the Committee remains concerned about the impact of this misuse of funds on the operations of PHAs. The Committee also directs HUD to report to the House and Senate Committees on Appropriations by April 15, 2003 on actions taken to address this practice, including all sanctions for poor performance and negligence. The Committee also directs HUD fully to fund the operating assistance needs of PHAs in fiscal year 2003 solely with fiscal year 2003 funds.

REVITALIZATION OF SEVERELY DISTRESSED PUBLIC HOUSING [HOPE VI]

Appropriations, 2002	\$573,735,000
Budget estimate, 2003	574,000,000
Committee recommendation	574,000,000

PROGRAM DESCRIPTION

The "Revitalization of severely distressed public housing" account makes awards to public housing authorities on a competitive basis to demolish obsolete or failed developments or to revitalize, where appropriate, sites upon which these developments exist. This is a focused effort to eliminate public housing which was, in many cases, poorly located, ill-designed, and not well constructed. Such unsuitable housing has been very expensive to operate, and difficult to manage effectively due to multiple deficiencies.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$574,000,000 for the "HOPE VI" account, the same as the budget request and the same as the fiscal year 2002 enacted level. The Committee urges the Department to continue funding innovative projects that work both as public and mixed-income housing as well as building blocks to revitalizing neighborhoods.

Of the amount provided under this account, \$5,000,000 is for a Neighborhood Networks Initiative in HOPE VI developments. These are additional funds for the development and operation of computer centers, and are not intended to supplant grants for computer centers that are made to PHAs in the normal HOPE VI process.

The Committee has included bill language to sunset the HOPE VI program on Sep-

tember 30, 2004. This is an important program that has revitalized many distressed communities and funding is expected to be included in the fiscal year 2004 budget. The Committee has concerns over the future and mandate of the HOPE VI program. Since the inception of the HOPE VI program, HUD has approved the demolition of approximately 140,000 units. The Committee directs the Department to submit a report by June 15, 2003, on the number and location of severely distressed public housing units that are in need of substantial revitalization or demolition. Further, the Committee urges the Department to use the lessons learned since the inception of the HOPE VI program to inform its reauthorization proposal. Successful HOPE VI developments have spurred the revitalization of low-income neighborhoods and provided new opportunities to residents of public housing. The Committee urges the Department to submit legislation that would codify those practices used by PHAs that have successfully implemented the HOPE VI program. The Committee stresses the importance of a meaningful reauthorization process, and urges the Department to work with the appropriate authorizing committees to make HOPE VI a viable program for future years.

NATIVE AMERICAN HOUSING BLOCK GRANT

(INCLUDING TRANSFERS OF FUNDS)

Appropriations, 2002	\$648,570,000
Budget estimate, 2003	646,594,000
Committee recommendation	648,570,000

PROGRAM DESCRIPTION

This account funds the native American housing block grants program, as authorized under title I of the Native American Housing Assistance and Self-Determination Act of 1996 (NAHASDA). This program provides an allocation of funds on a formula basis to Indian tribes and their tribally designated housing entities to help them address the housing needs within their communities. Under this block grant, Indian tribes will use performance measures and benchmarks that are consistent with the national goals of the program, but can base these measures on the needs and priorities established in their own Indian housing plan.

COMMITTEE RECOMMENDATION

The Committee recommends \$648,570,000 for the native American housing block grant, of which \$5,987,000 is set aside for a credit subsidy for the section 601 Loan Guarantee Program. The Committee recommendation is \$1,976,000 more than the budget request and the same as the fiscal year 2002 enacted level.

The Committee believes that training and technical assistance in support of NAHASDA should be shared, with \$2,200,000 to be administered by the National American Indian Housing Council (NAIHC) and \$5,000,000 by HUD in support of the inspection of Indian housing units, contract expertise, training and technical assistance in the training, oversight, and management of Indian housing and tenant-based assistance.

The Committee notes that there is not a requirement that qualified Indian and Alaska Native owned construction companies be given priority consideration in construction of Indian housing. In many Indian and Native communities, the unemployment rate exceeds 80 percent, and housing contracts would provide much needed employment and training opportunities for Native Americans living on reservations and in Alaska Native villages. The Committee directs the agency and its grantees to give priority consideration to qualified Native owned firms in the design and construction of Indian housing.

INDIAN HOUSING LOAN GUARANTEE FUND

PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)	
Appropriations, 2002	\$5,987,000
Budget estimate, 2003	5,000,000
Committee recommendation	5,000,000

PROGRAM DESCRIPTION

This program provides access to private financing for Indian families, Indian tribes and their tribally designated housing entities who otherwise could not acquire housing financing because of the unique status of Indian trust land. As required by the Federal Credit Reform Act of 1990, this account includes the subsidy costs associated with the loan guarantees authorized under this program.

COMMITTEE RECOMMENDATION

The Committee recommends \$5,000,000 in program subsidies to support a loan guarantee level of \$197,243,000. This is \$987,000 less than the fiscal year 2002 enacted level and the same as the budget request.

NATIVE HAWAIIAN HOUSING LOAN GUARANTEE FUND

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$1,000,000
Budget estimate, 2003	1,000,000
Committee recommendation	1,000,000

PROGRAM DESCRIPTION

This program provides access to private financing for Native Hawaiians who otherwise could not acquire housing financing because of the unique status of the Hawaiian Home Lands as trust land. As required by the Federal Credit Reform Act of 1990, this account includes the subsidy costs associated with the loan guarantees authorized under this program.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$1,000,000 in program subsidies to support a loan guarantee level of \$39,712,000. This is the same as the fiscal year 2002 enacted level and the same as the budget request.

COMMUNITY PLANNING AND DEVELOPMENT
HOUSING OPPORTUNITIES FOR PERSONS WITH AIDS [HOPWA]

Appropriations, 2002	\$277,432,000
Budget estimate, 2003	292,000,000
Committee recommendation	292,000,000

PROGRAM DESCRIPTION

The Housing Opportunities for Persons with AIDS [HOPWA] Program is designed to provide States and localities with resources and incentives to devise long-term comprehensive strategies for meeting the housing needs of persons living with HIV/AIDS and their families.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$292,000,000 for this program, \$14,568,000 above the fiscal year 2002 enacted level and the same as the budget request.

The Committee requires HUD to allocate these funds in a manner that preserves existing HOPWA programs to the extent those programs are determined to be meeting the needs of persons with AIDS.

OFFICE OF RURAL HOUSING AND ECONOMIC DEVELOPMENT

Appropriations, 2002	\$25,000,000
Budget estimate, 2003
Committee recommendation	25,000,000

PROGRAM DESCRIPTION

The Office of Rural Housing and Economic Development was established to ensure that the Department has a comprehensive approach to rural housing and rural economic

development issues. The account includes funding for technical assistance and capacity building in rural, underserved areas, and grants for Indian tribes, State housing finance agencies, State economic development agencies, rural nonprofits and rural community development corporations to pursue strategies designed to meet rural housing and economic development needs.

COMMITTEE RECOMMENDATION

The Committee recommends \$25,000,000 for the Office of Rural Housing and Economic Development for fiscal year 2003 to support housing and economic development in rural communities as defined by USDA and HUD. This funding level is the same as the fiscal year 2002 level and \$25,000,000 above the budget request.

The Committee does not accept the administration's recommendation to eliminate funding for this program. The Committee believes that the Office of Rural Housing and Economic Development plays an important role in HUD's community development activities. Twenty-five percent of nonmetropolitan homes are renter-occupied, and the high cost of housing burdens those in rural areas, as it does in urban communities. Furthermore, the Committee notes that the programs of the Office of Rural Housing and Economic Development are sufficiently different from the housing programs administered by the Department of Agriculture to warrant separate appropriations.

HUD is directed to administer this program according to existing regulatory requirements. It is expected that any changes to the program shall be made subject to notice and comment rulemaking.

EMPOWERMENT ZONES/ENTERPRISE COMMUNITIES

Appropriations, 2002	\$45,000,000
Budget estimate, 2003	
Committee recommendation	30,000,000

PROGRAM DESCRIPTION

The Empowerment Zones/Enterprise Communities (EZ/EC) program was authorized under the Omnibus Budget Reconciliation Act of 1993. The Taxpayer Relief Act of 1997 later authorized two additional Round I urban EZs and 15 Round II urban EZs. This interagency initiative is designed to create self-sustaining, long-term development in distressed urban and rural areas throughout the Nation. The program utilizes a combination of Federal tax incentives and flexible grant funds to reinvigorate communities that have been in decline for decades.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$30,000,000 for this program, \$15,000,000 less than the fiscal year 2002 enacted level and \$30,000,000 more than the budget request. These funds will be distributed to the 15 communities that received a second round EZ designation. The Committee remains concerned that the previous Administration acknowledged that this program was intended to be funded as a mandatory program and not as an obligation of this bill. The Committee expects the Senate Finance Committee to fund this program as mandatory. Moreover, the Committee remains concerned over accountability in this program and notes that the HUD Inspector General has been critical about how communities have implemented this program and used EZ funds.

COMMUNITY DEVELOPMENT FUND (INCLUDING TRANSFERS OF FUNDS)

Appropriations, 2002	¹ \$5,000,000,000
Budget estimate, 2003	4,732,500,000
Committee recommendation	5,050,000,000

¹ Does not include a \$2,000,000,000 appropriation made in the 2002 emergency supplemental bill.

PROGRAM DESCRIPTION

Under title I of the Housing and Community Development Act of 1974, as amended, the Department is authorized to award block grants to units of general local government and States for the funding of local community development programs. A wide range of physical, economic, and social development activities are eligible with spending priorities determined at the local level, but the law enumerates general objectives which the block grants are designed to fulfill, including adequate housing, a suitable living environment, and expanded economic opportunities, principally for persons of low and moderate income. Grant recipients are required to use at least 70 percent of their block grant funds for activities that benefit low- and moderate-income persons.

Funds are distributed to eligible recipients for community development purposes utilizing the higher of two objective formulas, one of which gives somewhat greater weight to the age of housing stock. Seventy percent of appropriated funds are distributed to entitlement communities and 30 percent are distributed to nonentitlement communities after deducting designated amounts for special purpose grants and Indian tribes.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$5,000,000,000 for the Community Development Block Grant [CDBG] program in fiscal year 2003. This is an increase of \$267,500,000 above the budget request for fiscal year 2003 and the same as the fiscal year 2002 enacted level.

The Committee has included \$4,580,200,000 for community development block grants (CDBG). The Committee does not include funding for the Administration's Colonias Gateway Initiative. The Committee encourages the Department to seek an authorization of the legislation required for this proposal and to perform a thorough review of the CDBG formula before proposing adjustments.

Set-asides under this account include \$72,500,000 for native Americans; \$3,300,000 for the Housing Assistance Council; \$2,600,000 for the National American Indian Housing Council; \$35,500,000 for the National Community Development Initiative; and \$45,500,000 for section 107 grants, including \$4,000,000 to support Alaska Native-Serving Institutions and Native Hawaiian-Serving Institutions; \$3,000,000 for competitive grants awarded to Tribal Colleges and Universities to build, expand, renovate, and equip their facilities; \$3,000,000 for community development work study; \$11,000,000 for historically black colleges and universities, of which up to \$2,000,000 is for technical assistance, \$7,000,000 for insular areas; and \$7,500,000 for Hispanic-serving institutions. The Committee includes \$10,000,000 for assistance authorized under the Hawaiian Homelands Homeownership Act of 2000 under section 107. The Administration proposed to fund this program in a separate account.

In addition, this legislation includes a set-aside of \$130,500,000 for the Economic Development Initiative (EDI) to finance efforts that promote economic and social revitalization.

At a minimum, the Secretary is directed to fund the following grants as part of the economic development initiative (the bill includes language that reduces these grants by ten percent):

\$1,000,000 for Arkansas State University at Mountain Home to develop community outreach programs;

\$1,000,000 for Clark County, Nevada for the construction of a community center;

\$900,000 for the City of Riverton, Utah for reconstruction of a Historic City Civic Center;

\$1,000,000 for the RMC Aviation Training Center in Billings, Montana;

\$500,000 for TechRanch in Bozeman, Montana;

\$200,000 for the Bozeman Rail Depot remediation project;

\$200,000 for Baltimore Clayworks in Baltimore, Maryland to expand the facility;

\$200,000 for the Audubon Center in Sandstone, Minnesota for the capital construction project;

\$500,000 for Boysville of Michigan in Detroit for the Samaritan Outreach Center;

\$500,000 for the Detroit Housing Group Inc., for the Alter Kercheval Housing Project;

\$400,000 for the Asian Pacific Community Center in St. Paul, Minnesota to create an urban village;

\$250,000 for the Friends of Youth in Redmond, Washington for the Griffin Home renovation;

\$250,000 for Horizons, Inc. in Sunnyside, Washington for technology training centers;

\$400,000 for Audubon Nebraska for the Spring Creek Prairie Education Center;

\$800,000 for Topeka, Kansas for redevelopment activities in Topeka, Kansas;

\$800,000 for the Schenectady Municipal Housing Authority, New York for community development and revitalization;

\$750,000 for the City of Daytona Beach, Florida for boardwalk area revitalization;

\$600,000 for the City of Baltimore, Maryland for the Main Street Initiative;

\$750,000 for the County of Hawaii for the construction of an emergency homeless shelter in Kailua-Kona;

\$750,000 for the City of Cincinnati, Ohio for the development of the Ohio River Trail;

\$750,000 for the city of Milwaukee, Wisconsin for the Menomonee River Valley Development project;

\$700,000 for the Pojoaque Pueblo of New Mexico to complete the Poeh Cultural Center and Museum;

\$700,000 for Franklin County MetroParks, Franklin County, Ohio for the purchase of land in the Darby Creek Watershed;

\$700,000 for the City of Charleston, South Carolina for pre- and post homeownership classes;

\$1,000,000 for the City of Columbia, South Carolina for the redevelopment of the Drew Park Wellness Center;

\$1,000,000 for El Paso, Texas for the renovation of the El Paso Plaza Theatre;

\$600,000 for the City of Madera, California for a community cultural and youth center;

\$1,300,000 for Sevier County, Utah for development of a Multi-Events Center;

\$1,000,000 for Anchorage, Alaska for an expansion of the Anchorage Museum;

\$600,000 for Marguerite's Place, Nashua, New Hampshire to provide transitional housing for women who are victims of domestic abuse and their children;

\$600,000 for the New Jersey Community Development Corporation for the Transportation Opportunity Center;

\$600,000 for the City of Portland, Oregon for a central city streetcar extension;

\$200,000 for Biddeford, Maine for theater restoration;

\$200,000 for the Mississippi Tribe of Choctaw for the development of a Choctaw Veterans Memorial;

\$500,000 for the Mobile Historic Development Commission in Mobile, Alabama for a Neighborhood Initiative Program;

\$500,000 for the Mananuska-Susitna Borough for an agricultural processing facility in Wasilla, Alaska;

\$500,000 for Ketchikan, Alaska for the Tongass Coast Aquarium in Ketchikan, Alaska;

\$500,000 for the Southside Community Center in Fairbanks, Alaska for an addition;

\$500,000 for the World War II Lend Lease Museum in Anchorage, Alaska;

\$500,000 for the Arkansas YMCAs for program development;

\$500,000 for the Wilmington Housing Authority, Delaware for redevelopment of blighted land;

\$500,000 for Spellman College in Atlanta, Georgia for renovations of Packard Hall;

\$500,000 for the Dekalb County Community Center, Georgia for the construction of a community center;

\$500,000 for the County of Kauai, Hawaii for the West Kauai High Tech Training Facility;

\$1,000,000 for the City of Rugby, North Dakota to complete information technology and energy projects;

COMMUNITY DEVELOPMENT LOAN GUARANTEES

PROGRAM ACCOUNT

(INCLUDING TRANSFER OF FUNDS)

	Limitation on guarantee loans	Program costs
Appropriations, 2002	\$608,696,000	\$15,000,000
Budget estimate, 2003	275,000,000	6,325,000
Committee recommendation	608,696,000	15,000,000

PROGRAM DESCRIPTION

Section 108 of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to issue Federal loan guarantees of private market loans used by entitlement and non-entitlement communities to cover the costs of acquiring real property, rehabilitation of publicly-owned real property, housing rehabilitation, and other economic development activities.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$15,000,000 for program costs associ-

ated with the section 108 loan guarantee program. This amount is the same as the fiscal year 2002 enacted level and \$7,715,000 more than the budget request. Of the funds provided, \$14,000,000 is for credit subsidy costs to guarantee \$608,696,000 in section 108 loan commitments in fiscal year 2003, and \$1,000,000 is for administrative expenses to be transferred to the salaries and expenses account.

BROWNFIELDS REDEVELOPMENT

Appropriations, 2002	\$25,000,000
Budget estimate, 2003	25,000,000
Committee recommenda- tion	25,000,000

PROGRAM DESCRIPTION

Section 108(q) of the Housing and Community Development Act of 1974, as amended, authorizes the Brownfields Redevelopment program. This program provides competitive economic development grants in conjunction with section 108 loan guarantees for qualified brownfields projects. Grants are made in accordance with Section 108(q) selection criteria. The program supports the cleanup and economic redevelopment of contaminated sites.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$25,000,000 for this program. This amount is the same as the fiscal year 2002 enacted level and the budget request. In order to allow greater flexibility, Brownfields funds are no longer required to be tied to section 108 development funding.

HOME INVESTMENT PARTNERSHIPS PROGRAM

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$1,846,040,000
Budget estimate, 2003	2,084,100,000
Committee recommenda- tion	1,950,000,000

PROGRAM DESCRIPTION

Title II of the National Affordable Housing Act, as amended, authorizes the HOME Investment Partnerships Program. This program provides assistance to States and units of local government for the purpose of expanding the supply and affordability of housing to low- and very low-income people. Eligible activities include tenant-based rental assistance, acquisition, and rehabilitation of affordable rental and ownership housing and, also, construction of housing. To participate in the HOME program, State and local governments must develop a comprehensive housing affordability strategy. There is a 25-percent matching requirement for participating jurisdictions which can be reduced or eliminated if they are experiencing fiscal distress.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$1,950,000,000 for the HOME Investment Partnerships Program. This amount is \$103,960,000 more than the fiscal year 2002 enacted level and \$134,100,000 less than the budget request.

The Committee did not include any funds for the Administration's proposed American Dream Downpayment Fund. The Committee supports expanding homeownership opportunities, but remains concerned that this program lacks authorization and may constrain the ability of local communities to determine how best to use HOME funds. The Committee supports any efforts the Department may undertake to educate communities on how to use HOME funds to expand homeownership, and encourages the Department to use its technical assistance funds towards this end. The Committee also reminds HUD that technical assistance funds available under this heading should be used to provide both Community Housing Development Or-

ganization (CHDO) and HOME technical assistance.

Of the amount provided for the HOME program, \$40,000,000 is for housing counseling assistance. The Committee does not fund housing assistance counseling in a new account, as proposed by the administration. Funding for housing counseling assistance has been doubled from the fiscal year 2002 enacted level. The Committee views homeownership counseling, including pre- and post-purchase counseling, as an essential part of successful homeownership. The Committee expects that this program will remain available to those participating in all of HUD's homeownership programs. The Committee urges HUD to utilize this program as a means of educating homebuyers on the dangers of predatory lending, in addition to the administration's stated purpose of expanding homeownership opportunities.

HOMELESS ASSISTANCE GRANTS

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$1,122,525,000
Budget estimate, 2003	1,129,500,000
Committee recommenda- tion	1,215,025,000

PROGRAM DESCRIPTION

The "Homeless Assistance Grants Program" account funds the emergency shelter grants program, the supportive housing program, the section 8 moderate rehabilitation single-room occupancy program, and the shelter plus care program.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,215,025,000 for homeless assistance grants. The amount recommended is \$92,500,000 more than the fiscal year 2002 appropriated level and \$85,525,000 more than the budget request. Of the amount provided, \$193,000,000 is to fund Shelter Plus Care renewals on an annual basis and \$17,600,000 is for technical assistance and management information system.

The Committee also has provided funds for the Interagency Council on the Homeless through a new account established under title III of this bill.

The Committee continues to believe that HUD and local providers need to increase, over time, the supply of permanent supportive housing for chronically homeless, chronically ill people until the need is met at an estimated 150,000 units. Accordingly, the Committee again includes a requirement that a minimum of 30 percent of the funds appropriated under this account be allocated to permanent housing. To this end, the Committee urges the Department to use its technical assistance funds to increase the capacity of homeless assistance providers to finance, develop, and operate permanent supportive housing.

The Committee is concerned that the Department is not taking the proper steps to ensure that Shelter Plus Care units are targeted to chronically homeless individuals. The Committee recognizes that the goal of creating 150,000 units of permanent supportive housing will not succeed in ending chronic homelessness if the Shelter Plus Care units are not properly targeted. The Committee directs the Department to report to the Committee by June 15, 2003 on how it is ensuring that Shelter Plus Care grants are made to providers serving chronically disabled, chronically homeless people.

The Committee remains supportive of the Department's ongoing work on data collection and analysis within the homeless programs. HUD should continue its collaborative efforts with local jurisdictions to collect an array of data on homelessness in order to analyze patterns of use of assistance, including how people enter and exit the homeless assistance system, and to assess

the effectiveness of the homeless assistance system. The Committee directs HUD to take the lead in working with communities toward this end, and to analyze jurisdictional data within 1 year. The Committee directs HUD to report on the progress of this data collection and analysis effort by no later than May 12, 2003.

The Committee remains concerned about the out-year costs of renewing permanent housing programs. Therefore, the Committee directs the Department to include 5-year projections, on an annual basis, for the cost of renewing the permanent housing component of the Supportive Housing Program and Shelter Plus Care grants in its fiscal year 2004 budget justifications. This legislation includes a new provision requiring HUD to include individual line requests for all housing assistance renewal requirements, including the amounts needed for expiring Supportive Housing Program and Shelter Plus Care grants.

The Committee is aware that HUD did not fund, all or part, of the State of Iowa Continuum of Care application for fiscal year 2002 because a number of pages were not present in the application as reviewed. While there are differences of opinion regarding the responsibility for the missing pages, this result would seem to be a case of form over substance with HUD apparently rejecting the application over the missing pages. Nevertheless, the Committee understands that the failure to fund the application will result in a large number of homeless individuals, including over 300 children, losing housing and supportive services without which their health and perhaps lives will be at risk. The Committee, therefore, directs HUD to quickly review the full application and make an award under the same process that was applied to other homeless grant requests with available Continuum of Care funds.

EMERGENCY FOOD AND SHELTER PROGRAM

Appropriations, 2002	
Budget estimate, 2003	\$153,000,000
Committee recommendation	

PROGRAM DESCRIPTION

The Emergency Food and Shelter Program originated as a one-time emergency appropriation to combat the effects of high unemployment in the emergency jobs bill (Public Law 98-8) which was enacted in March 1983. It was authorized under title III of the Stewart B. McKinney Homeless Assistance Act of 1987, Public Law 100-177.

The program has been funded by the Federal Emergency Management Agency (FEMA) and administered by a national board and the majority of the funding has been spent for providing temporary food and shelter for the homeless. Participating organizations are restricted by legislation from spending more than 3.5 percent of the funding received for administrative costs.

COMMITTEE RECOMMENDATION

The Committee does not include the Administration's proposal to transfer the Emergency Food and Shelter Program from FEMA to HUD. The Emergency Food and

SHELTER Program is successfully administered at FEMA, and the Committee does not concur that there is a compelling reason to disrupt the program by transferring it. The Committee has provided funding for this program within FEMA.

HOUSING PROGRAMS

HOUSING FOR SPECIAL POPULATIONS (INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$1,024,151,000
Budget estimate, 2003	1,024,151,000
Committee recommendation	1,033,801,000

PROGRAM DESCRIPTION

This account consolidates the housing for the elderly under section 202 and housing for the disabled under section 811. Under these programs, the Department provides capital grants to eligible entities for the acquisition, rehabilitation, or construction of housing. Up to 25 percent of the funding provided for housing for the disabled may be made available for tenant-based assistance under section 8.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$1,033,801,000 for development of additional new subsidized housing. Included in this recommendation is \$783,286,000 for capital advances for housing for the elderly (section 202 housing) and \$250,515,000 for capital advances for housing for the disabled (section 811 housing). This is \$9,650,000 more than the budget request for fiscal year 2002. This represents an increase of \$9,650,000 for section 202 above fiscal year 2002 level, including recaptures, and an increase of \$9,650,000 for section 811 over the fiscal year 2002 level. Up to 25 percent of the funding allocated for housing for the disabled can be used to fund tenant-based rental assistance for the disabled.

The section 202 funds include up to \$50,000,000 for the conversion of section 202 housing to assisted living facilities, and up to \$53,000,000 for service coordinators. HUD is directed to report by June 15, 2003 to the House and Senate Committees on Appropriations on the status of the conversion program, including what steps are being taken to ensure funds are being utilized.

The Committee is concerned about the growing costs of renewal contracts within the elderly and disabled housing programs. This legislation includes a new provision requiring HUD to include individual line requests for all housing assistance renewal requirements, including the amounts needed for expiring elderly and disabled housing contracts.

FLEXIBLE SUBSIDY FUND

(TRANSFER OF FUNDS)

PROGRAM DESCRIPTION

The Housing and Urban Development Act of 1968 authorized HUD to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects are deposited. Subject to approval in appropriations acts, the Secretary is authorized under the

Housing and Community Development Amendment of 1978 to transfer excess rent collections received after 1978 to the Troubled Projects Operating Subsidy program, renamed the Flexible Subsidy Fund.

COMMITTEE RECOMMENDATION

The Committee recommends that the account continue to serve as a repository of excess rental charges appropriated from the Rental Housing Assistance Fund. Although these resources will not be used for new reservations, they will continue to offset Flexible Subsidy outlays and other discretionary expenditures.

RENTAL HOUSING ASSISTANCE

PROGRAM DESCRIPTION

The section 236 Rental Housing Assistance Program is authorized by the Housing and Urban Development Act of 1968, as amended. The section 236 program subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants. Title V of the 1998 Appropriations Act established a program of rehabilitation grants for owners of eligible projects.

COMMITTEE RECOMMENDATION

The Committee has included a provision that directs HUD to make \$100,000,000 from contract authority in excess of required payments for fiscal year 2003 available for the capital costs of rehabilitation for projects eligible under section 236(s) of the National Housing Act. The Committee believes that these funds should be dedicated to the rehabilitation of HUD assisted housing, including housing for elderly and disabled people.

MANUFACTURED HOUSING FEES TRUST FUND

Appropriations, 2002	\$13,566,000
Budget request, 2002	13,000,000
Committee recommendation	13,000,000

PROGRAM DESCRIPTION

The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Manufactured Housing Improvement Act of 2000, authorizes the Secretary to establish Federal manufactured home construction and safety standards for the construction, design, and performance of manufactured homes. All manufactured homes are required to meet the Federal standards, and fees are charged to producers to cover the costs of administering the Act.

COMMITTEE RECOMMENDATION

The Committee recommends \$13,000,000 to support the manufactured housing standards programs to be derived from fees collected and deposited in the Manufactured Housing Fees Trust Fund account. The amount recommended is the same as the budget request and \$556,000 less than the fiscal year 2002 enacted level.

FEDERAL HOUSING ADMINISTRATION

MUTUAL MORTGAGE INSURANCE PROGRAM ACCOUNT (INCLUDING TRANSFERS OF FUNDS)

	Limitation on direct loans	Limitation on guaranteed loans	Administrative expenses
Appropriations, 2002	\$250,000,000	\$160,000,000,000	\$336,700,000
Budget estimate, 2003	50,000,000	160,000,000,000	347,829,000
Committee recommendation	250,000,000	160,000,000,000	347,829,000

GENERAL AND SPECIAL RISK PROGRAM ACCOUNT (INCLUDING TRANSFERS OF FUNDS)

	Limitation on direct loans	Limitation on guaranteed loans	Administrative expenses	Program costs
Appropriations, 2002	\$50,000,000	\$21,000,000,000	\$216,100,000	\$15,000,000
Budget estimate, 2003	50,000,000	21,000,000,000	223,716,400	15,000,000
Committee recommendation	50,000,000	21,000,000,000	223,716,400	15,000,000

PROGRAM DESCRIPTION

The Federal Housing Administration [FHA] fund covers the mortgage and loan insurance activity of about 40 HUD mortgage/loan insurance programs which are grouped into the mutual mortgage insurance [MMI] fund, cooperative management housing insurance [CMHI] fund, general insurance fund [GI] fund, and the special risk insurance [SRI] fund. For presentation and accounting control purposes, these are divided into two sets of accounts based on shared characteristics. The unsubsidized insurance programs of the mutual mortgage insurance fund and the cooperative management housing insurance fund constitute one set; and the general risk insurance and special risk insurance funds, which are partially composed of subsidized programs, make up the other.

The amounts for administrative expenses are to be transferred from appropriations made in the FHA program accounts to the HUD “Salaries and expenses” accounts. Additionally, funds are also appropriated for administrative contract expenses for FHA activities.

COMMITTEE RECOMMENDATION

The Committee has included the following amounts for the “Mutual Mortgage Insurance Program” account: a limitation on guaranteed loans of \$160,000,000,000, a limitation on direct loans of \$250,000,000, and an appropriation of \$347,829,000 for administrative expenses. For the GI/SRI account, the Committee recommends \$21,000,000,000 as a limitation on guaranteed loans, a limitation on direct loans of \$50,000,000, and \$223,716,400 for administrative expenses. The administrative expenses appropriation will be transferred and merged with the sums in the Department’s “Salaries and expenses” account and the “Office of the Inspector General” account.

In addition, the Committee directs HUD to continue direct loan programs in 2003 for multifamily bridge loans and single family purchase money mortgages to finance the sale of certain properties owned by the Department. Temporary financing shall be provided for the acquisition and rehabilitation of multifamily projects by purchasers who have obtained commitments for permanent financing from another lender. Purchase money mortgages will enable governmental and nonprofit intermediaries to acquire properties for resale to owner-occupants in areas undergoing revitalization.

The Committee included the “Credit Watch Act of 2001” in the fiscal year 2002 enacted bill in order to ensure that HUD could maintain its Federal Housing Administration (FHA) lender oversight program. The Committee notes that FHA continues to be a significant engine of homeownership for low income, minority, and first time homebuyers. However, in some cases and in certain neighborhoods, FHA has been misused to underwrite bad loans that lead to defaults and foreclosed homes, contributing to neighborhood decline and destabilization. Defaulted FHA properties sit vacant for 242 days, on average, before they are sold. Because the FHA does not then rehabilitate these properties, they cause blight in neighborhoods. Faulty appraisals have contributed significantly to this problem. The Committee notes that HUD cancelled its appraisal oversight program and has yet to implement its proposed alternative, which is based on the Credit Watch model.

Credit Watch is an excellent tool for uncovering unscrupulous or careless lenders

after they have originated bad loans. By eliminating fraudulent or unqualified lenders, the Committee and the Department hope to reduce the number of foreclosed properties in the future. However, the Committee notes that the Credit Watch model is only effective after problem loans default.

The Committee directs the Department to report to the appropriate Congressional Committees on further actions that can be taken to protect homebuyers and communities in census tracts that experience high rates of FHA defaults and foreclosures. Specifically, the Committee directs the Department to consider making FHA lenders responsible for the appraisals on loans in these census tracts. The Department should also consider: requiring first time homebuyers to receive counseling prior to the closing of an FHA loan; requiring home inspections on FHA-insured homes bought by first time homebuyers; and, requiring the use of specially certified FHA appraisers for the purchase of homes. In considering these and other possible options, the Committee urges the Department to avoid proposals that create additional burdens for the FHA program or FHA homebuyers as a whole.

Finally, the Committee has heard from numerous parties in areas affected by large numbers of FHA foreclosures and property flipping that certain investors are repeatedly involved in buying FHA foreclosed properties, making superficial repairs, and then reselling, or flipping them quickly at inflated prices. In some instances the unscrupulous investor that caused a borrower to default is then allowed to purchase the same property, post-foreclosure. The Committee asks the Department to explore strategies to identify investors who are involved in such schemes and prevent their purchasing FHA properties.

While the Committee recognizes that the Department continues to help ameliorate the problems created by FHA property flipping, the Department must become more aggressive in adopting the kind of preventive measures discussed here. The Department is directed to submit a report that responds directly to the issues raised by the Committee by February 25, 2003.

The Committee is concerned about the effect that the accelerated claims disposition demonstration will have in low-income, distressed communities. The Department has been unable to demonstrate how this program—in which HUD bundles delinquent loans and partners with a private bank to mitigate, or foreclose on, delinquent loans—could benefit very low-income communities, especially those where predatory lending has disproportionately occurred. The Committee is concerned that, in those communities, foreclosures will occur more frequently than they do under the current system, contributing to the deterioration of those communities. The Committee directs HUD to implement a system by which revitalization areas can be exempted from the accelerated claims disposition process should they choose to be.

The Committee remains concerned that HUD has failed to calculate adequately the amount of credit subsidy necessary to support its multifamily mortgage insurance programs. The Committee expects HUD to institute a computer program that accurately identifies the risk of default and financial risk to the insurance fund, including the ability to mark to market each day. The Committee further directs HUD to issue any premium changes through notice and comment rule making, as required by law.

The Committee further directs the Department to submit a report by February 15, 2003 that details all steps that HUD has taken to get into compliance with section 1303 of Public Law 107-206. The report should document any concerns raised by cities and non-profits over program guidelines and what the Department is doing to address those concerns. The report should also include the Department's plans for the future of the ACA program, and what steps it is taking to implement the program in communities hardest hit by FHA foreclosures.

The Committee also requests an audit by the HUD Inspector General of the Department's compliance with section 1303 of Public Law 107-203. That provision required the Secretary to enter into ACA contracts by September 15, 2003.

GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

GUARANTEES OF MORTGAGE-BACKED SECURITIES
LOAN GUARANTEE PROGRAM ACCOUNT
(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002:

Limitation on guaranteed loans	\$200,000,000,000
Administrative expenses	9,383,000

Budget estimate, 2003:

Limitation on guaranteed loans	200,000,000,000
Administrative expenses	10,343,000

Committee recommendation:

Limitation on guaranteed loans	200,000,000,000
Administrative expenses	10,343,000

PROGRAM DESCRIPTION

The Government National Mortgage Association [GNMA], through the mortgage-backed securities program, guarantees privately issued securities backed by pools of mortgages. GNMA is a wholly owned corporate instrumentality of the United States within the Department. Its powers are prescribed generally by title III of the National Housing Act, as amended. GNMA is authorized by section 306(g) of the act to guarantee the timely payment of principal and interest on securities that are based on and backed by a trust, or pool, composed of mortgages that are guaranteed and insured by the Federal Housing Administration, the Farmers Home Administration, or the Department of Veterans Affairs. GNMA's guarantee of mortgage-backed securities is backed by the full faith and credit of the United States.

In accord with the Omnibus Budget Reconciliation Act of 1990 [OBRA] requirements for direct and guaranteed loan programs, the administration is requesting \$10,343,000 for administrative expenses in the mortgage-backed securities program. Amounts to fund this direct appropriation to the “MBS program” account are to be derived from offsetting receipts transferred from the “Mortgage-backed securities financing” account to a Treasury receipt account.

COMMITTEE RECOMMENDATION

The Committee recommends a limitation on new commitments of mortgage-backed securities of \$200,000,000,000. This amount is the same level as proposed by the budget request. The Committee also has included \$10,343,000 for administrative expenses, the

same as the budget request and an increase of \$960,000 above the fiscal year 2002 enacted level.

POLICY DEVELOPMENT AND RESEARCH

RESEARCH AND TECHNOLOGY

Appropriations, 2002	\$50,250,000
Budget estimate, 2003	47,000,000
Committee recommendation	47,000,000

PROGRAM DESCRIPTION

Title V of the Housing and Urban Development Act of 1970, as amended, directs the Secretary of the Department of Housing and Urban Development to undertake programs of research, evaluation, and reports relating to the Department's mission and programs. These functions are carried out internally and through grants and contracts with industry, nonprofit research organizations, educational institutions, and through agreements with State and local governments and other Federal agencies. The research programs seek ways to improve the efficiency, effectiveness, and equity of HUD programs and to identify methods to achieve cost reductions. Additionally, this appropriation is used to support HUD evaluation and monitoring activities and to conduct housing surveys.

COMMITTEE RECOMMENDATION

The Committee recommends \$47,000,000 for research and technology activities in fiscal year 2003. This amount is \$3,250,000 below the fiscal year 2002 enacted level and the same as the budget request. Of this funding, \$8,750,000 is for the Partnership for Advancing Technologies in Housing (PATH) program. The Committee expects the PATH program to continue its cold climate housing research with the Cold Climate Housing Research Center in Fairbanks, Alaska. In addition, because in the past HUD has used this office's broad authority to administer new and unauthorized programs, this office is denied demonstration authority except where approval is provided by Congress in response to a re-programming request.

FAIR HOUSING AND EQUAL OPPORTUNITY

FAIR HOUSING ACTIVITIES

Appropriations, 2002	\$45,899,000
Budget estimate, 2003	45,899,000
Committee recommendation	45,899,000

PROGRAM DESCRIPTION

The fair housing activities appropriation includes funding for both the Fair Housing Assistance Program [FHAP] and the Fair Housing Initiatives Program [FHIP].

The Fair Housing Assistance Program helps State and local agencies to implement title VIII of the Civil Rights Act of 1968, as amended, which prohibits discrimination in the sale, rental, and financing of housing and in the provision of brokerage services. The major objective of the program is to assure prompt and effective processing of title VIII complaints with appropriate remedies for complaints by State and local fair housing agencies.

The Fair Housing Initiatives Program is authorized by section 561 of the Housing and Community Development Act of 1987, as amended, and by section 905 of the Housing and Community Development Act of 1992. This initiative is designed to alleviate housing discrimination by increasing support to public and private organizations for the purpose of eliminating or preventing discrimination in housing, and to enhance fair housing opportunities.

COMMITTEE RECOMMENDATION

The Committee recommendation provides \$45,899,000, of which \$25,649,000 is for the fair housing assistance program [FHAP] and no more than \$20,250,000 is for the fair housing initiatives program [FHIP].

The Committee emphasizes that State and local agencies under FHAP should have the primary responsibility for identifying and addressing discrimination in the sale, rental, and financing of housing and in the provision of brokerage services. It is critical that consistent fair housing policies be identified and implemented to insure continuity and fairness, and that States and localities continue to increase their understanding, expertise, and implementation of the law.

OFFICE OF LEAD HAZARD CONTROL

LEAD HAZARD REDUCTION

Appropriations, 2002	\$109,758,000
Budget estimate, 2003	126,000,000
Committee recommendation	201,000,000

PROGRAM DESCRIPTION

Title X of the Housing and Community Development Act of 1992 established the Residential Lead-Based Paint Hazard Reduction Act under which HUD is authorized to make grants to States, localities and native American tribes to conduct lead-based paint hazard reduction and abatement activities in private low-income housing. This has become a significant health hazard, especially for children. According to the Centers for Disease Control and Prevention [CDC], some 890,000 children have elevated blood levels, down from 1.7 million in the late 1980s. Despite this improvement, lead poisoning remains a serious childhood environmental condition, with some 4.4 percent of all children aged 1 to 5 years having elevated blood lead levels. This percentage is much higher for low-income children living in older housing.

COMMITTEE RECOMMENDATION

The Committee recommends \$201,000,000 for lead-based paint hazard reduction and abatement activities for fiscal year 2003. This amount is \$75,000,000 more than the budget request and \$91,242,000 more than the fiscal year 2002 enacted level. Of this amount, HUD may use up to \$10,000,000 for the Healthy Homes Initiative under which HUD conducts a number of activities designed to identify and address housing-related illnesses. The Committee supports the research being conducted by the National Foundation for Environmental Education on black mold, and encourages the Department to use funds pro-

vided for the Healthy Homes Initiative to fund this type of research.

The Committee recommends \$75,000,000 to establish a new lead hazard reduction demonstration program focused on major urban areas where children are disproportionately at risk for lead poisoning. For more than a dozen years, the Committee has taken an active interest in ending the highest public health threat to children under the age of 6 in the United States—lead poisoning from lead-based paint. Through a combination of initiatives, the Committee's efforts have resulted in dramatic reductions to lead hazards in low-income public housing.

Unfortunately, the progress has not been as great in privately-owned housing, particularly in unsubsidized low-income units. For that reason, approximately 1 million children under the age of 6 in the United States suffer from lead poisoning. While lead poisoning crosses all socioeconomic, geographic, and racial boundaries, the burden of this disease falls disproportionately on low-income and minority families. In the United States, children from poor families are eight times more likely to be poisoned than those from higher income families.

The urban lead hazard reduction program is designed to target funding to major urban areas where the lead hazard risk for low-income children under the age of 6 is greatest. Qualified applicants are the 25 major urban areas identified by the Secretary as having: (1) the highest number of pre-1940 units of rental housing; (2) significant deterioration of paint and; (3) a disproportionately high number of documented cases of lead-poisoned children. At least 80 percent of funds must be used for abatement and interim control of lead-based paint hazards. Further, the program targets abatement to units that serve low-income families. In order to ensure that occupants of all units in multi-family housing developments are adequately protected by lead hazard reduction activities, grantees are permitted to treat all residential units in structures with 5 or more units, a majority of which are occupied by low-income families, as though they were occupied entirely by low-income people. As a condition of assistance, each major urban area shall submit a detailed plan for use of funds that demonstrates sufficient capacity acceptable to the Secretary of Housing and Urban Development. The plans should identify units with the most significant risk, and should include strategies to reduce the risk of lead hazards and to mobilize public and private resources.

Nothing in this language is intended to mitigate the responsibility of housing owners to address the existence of lead-based paint hazards in a timely and expeditious manner.

The Committee has made this program subject to authorization by the proper committees.

MANAGEMENT AND ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

[In thousands of dollars]

	Appropriation	FHA funds by transfer	GNMA funds by transfer	CGDB funds by transfer	Title VI transfer	Indian housing	Native Hawaiian loan guarantee fund	Total
Appropriations, 2002	556,067	530,457	9,383	1,000	150	200	35	1,097,292

Committee recommendation	510,299	548,202	10,343	1,000	150	200	35	1,070,229

PROGRAM DESCRIPTION

The "Salaries and expenses" account finances all salaries and related expenses asso-

ciated with administering the programs of the Department of Housing and Urban Devel-

opment. These include the following activities:

Housing and mortgage credit programs.—This activity includes staff salaries and related expenses associated with administering housing programs, the implementation of consumer protection activities in the areas of interstate land sales, mobile home construction and safety, and real estate settlement procedures.

Community planning and development programs.—Funds in this activity are for staff salaries and expenses necessary to administer community planning and development programs.

Equal opportunity and research programs.—This activity includes salaries and related expenses associated with implementing equal opportunity programs in housing and employment as required by law and Executive orders and the administration of research programs and demonstrations.

Departmental management, legal, and audit services.—This activity includes a variety of general functions required for the Department's overall administration and manage-

ment. These include the Office of the Secretary, Office of General Counsel, Office of Chief Financial Officer, as well as administrative support in such areas as accounting, personnel management, contracting and procurement, and office services.

Field direction and administration.—This activity includes salaries and expenses for the regional administrators, area office managers, and their staff who are responsible for the direction, supervision, and performance of the Department's field offices, as well as administrative support in areas such as accounting, personnel management, contracting and procurement, and office services.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$1,070,229,000 for salaries and expenses. This amount is \$27,063,000 less than the fiscal year 2002 enacted level and the same as the budget request. The appropriation includes the requested amount of

\$548,202,000 transferred from various funds from the Federal Housing Administration, \$10,343,000 transferred from the Government National Mortgage Association, \$1,000,000 from the community development block grant funds, \$150,000 from title VI, \$200,000 from the Native American Housing Block Grant, and \$35,000 from the Native Hawaiian Housing Program.

In addition, the Department is prohibited from employing more than 77 schedule C and 20 noncareer senior executive service employees. The Committee understands that the Department is staffed largely by personnel who are close to retirement and at the top of the civil service pay schedule. The Committee encourages HUD to implement hiring practices that result in the hiring of young professionals who can gain experience and advancement.

OFFICE OF INSPECTOR GENERAL (INCLUDING TRANSFER OF FUNDS)

	Appropriation	FHA funds by transfer	Drug elimination grants transfer	Total
Appropriations, 2002	\$66,555,000	\$22,343,000	\$5,000	\$93,898,000
Budget estimate, 2003	74,341,000	23,343,000	97,684,000
Committee recommendation	74,341,000	23,343,000	97,684,000

PROGRAM DESCRIPTION

This appropriation will finance all salaries and related expenses associated with the operation of the Office of the Inspector General [OIG].

COMMITTEE RECOMMENDATIONS

The Committee recommends a funding level of \$97,684,000 for the Office of Inspector General (OIG). This amount is \$3,786,000 above the fiscal year 2002 enacted level and the same as the budget request. This funding level includes \$23,343,000 by transfer from various FHA funds. The Committee commends OIG for its commitment and its efforts in reducing waste, fraud and abuse in HUD programs. The Committee directs that of the funds provided, \$10,000,000 is to be targeted to anti-predatory lending and anti-flipping activities.

The Committee directs OIG to assess the compensation levels of employees in the Office of Federal Housing Enterprise Oversight (OFHEO) to determine whether salaries are comparable to those of the employees of other Federal financial regulators. The Committee also directs OIG to review the appropriateness of travel expenditures at OFHEO over the last 4 years.

WORKING CAPITAL FUND

Appropriations, 2002	\$276,737,000
Budget estimate, 2003	
Committee recommendation	276,737,000

PROGRAM DESCRIPTION

The working capital fund, authorized by the Department of Housing and Urban Development Act of 1965, finances information technology and office automation initiatives on a centralized basis.

COMMITTEE RECOMMENDATION

The Committee recommends \$276,737,000 for the working capital fund for fiscal year 2003. In 2001 and 2002 the fund was financed from fees charged for services performed. Fees will continue for services to develop and modify systems where the benefit is limited to a specific program.

CONSOLIDATED FEE FUND

(RESCISSON)

Appropriations, 2002	-\$6,700,000
Budget estimate, 2003	-8,000,000
Committee recommendation	-8,000,000

PROGRAM DESCRIPTION

Section 7(j) of the Department of Housing and Urban Development Act establishes fees and charges from selected programs which are deposited in a fund to offset the costs of audits, inspections, and other related expenses that may be incurred by the Department in monitoring these programs. These fees were misclassified for many years as deposit funds, and are now re-classified as on-budget Federal funds.

COMMITTEE RECOMMENDATION

The Committee recommends a rescission of all unobligated balances from the fee fund, as requested by the Administration.

OFFICE OF FEDERAL HOUSING ENTERPRISE OVERSIGHT

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$27,000,000
Budget estimate, 2003	30,000,000
Committee recommendation	30,000,000

PROGRAM DESCRIPTION

This appropriation funds the Office of Federal Housing Enterprise Oversight [OFHEO], which was established in 1992 to regulate the financial safety and soundness of the two housing Government sponsored enterprises [GSE's], the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation. The Office was authorized in the Federal Housing Enterprise Safety and Soundness Act of 1992, which also instituted a three-part capital standard for the GSE's, and gave the regulator enhanced authority to enforce those standards.

COMMITTEE RECOMMENDATION

The Committee recommends \$30,000,000 for the Office of Federal Housing Enterprise Oversight, which is the same as the budget request and \$3,000,000 more than the fiscal year 2002 enacted level.

ADMINISTRATIVE PROVISIONS

The Committee recommends 20 administrative provisions. A brief description follows.

SEC. 201. Financing Adjustment Factor. Promotes the refinancing of bonds.

SEC. 202. Fair Housing and Free Speech. Provides free speech protections.

SEC. 203. HOPWA. Technical correction for allocations.

SEC. 204. HOPWA Technical. Extends provision requiring HUD to allocate funds directly to Wake County, North Carolina.

SEC. 205. Assisted Living Project Waiver. Extends the authority to waive the 40 percent rent ceiling under section 8 for certain projects.

SEC. 206. HUD Reform Act Compliance. Requires HUD to award funds on a competitive basis.

SEC. 207. Section 811 Housing. Includes Section 811 housing as eligible housing in the definition of "federally assisted housing".

SEC. 208. Public Housing Financing. Facilitates the financing of rehabilitation and development of public housing.

SEC. 209. Payments to Public Housing Units. Prohibits assistance for housing units defined under section 9(n) of the United States Housing Act of 1937.

SEC. 210. Administrative Funds Reimbursement. Allows funds to be used to reimburse GSEs and other Federal entities for various administrative expenses.

SEC. 211. Restrictions on Spending Activities. Limits spending to amounts set out in the budget justification.

SEC. 212. Government Corporation Control Act. Clarifies expenditure authority for entities subject to the Government Corporation Control Act.

SEC. 213. Repeal of Federalization of Public Housing Units. Amends federalization provisions.

SEC. 214. Multifamily Disposition. Requires HUD to maintain section 8 assistance on properties occupied by elderly or disabled families.

SEC. 215. Welfare-to-Work Vouchers. Amends the welfare-to-work housing voucher program.

SEC. 216. Exemption from requirement of resident on board of PHA. Exempts Alaska, Iowa, and Mississippi from the requirement of having a PHA resident on the board of directors for fiscal year 2003. Instead, the public housing agencies in these States are required to establish advisory boards that include public housing tenants and section 8 recipients.

SEC. 217. Renewal Requirements. Requires HUD to include the specific funds needed to renew expiring housing assistance grants in future budgets.

SEC. 218. Sunset of HOPE VI Program. Sunsets the HOPE VI program on September 30, 2004.

SEC. 219. Section 8 Prohibition on Funds. Prohibits HUD from waiving income eligibility on section 8 housing. Applies to instances in which a refinancing of the project occurs.

SEC. 220. Reports on Uncommitted, Unobligated, and Excess Funds. Requires quarterly reports on all uncommitted, unobligated and excess funds associated with HUD programs.

SEC. 221. Multifamily Disposition and Revitalization. Allows flexible use of certain FHA grants to be used in the revitalization of properties.

SEC. 222. Reports on Section 8 Costs. Requires HUD to report on the number of units being assisted under section 8 and the per unit cost of these units.

SEC. 223. Allows use of a HOPE III grant in the East Baltimore, Maryland community to serve people who are not first-time homeowners. All other program requirements, including any low-income requirements, must be adhered to.

SEC. 224. Provides a waiver for a technical violation the CDBG program.

TITLE III—INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$35,466,000
Budget estimate, 2003	30,400,000
Committee recommendation	30,400,000

PROGRAM DESCRIPTION

The American Battle Monuments Commission [ABMC] is responsible for the maintenance and construction of U.S. monuments and memorials commemorating the achievements in battle of our Armed Forces where they have served since April 1917; for controlling the erection of monuments and markers by U.S. citizens and organizations in foreign countries; and for the design, construction, and maintenance of permanent military cemetery memorials in foreign countries. The Commission maintains 24 military memorial cemeteries and 31 monuments, memorials, markers, and offices in 15 countries around the world, including three large memorials on U.S. soil. It is presently charged with erecting a World War II Memorial in the Washington, DC, area.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$30,400,000 for the American Battle Monuments Commission, which is \$5,066,000 below the fiscal year 2002 enacted level.

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

SALARIES AND EXPENSES

Appropriations, 2002	\$7,850,000
Budget estimate, 2003	7,850,000
Committee recommendation	7,850,000

PROGRAM DESCRIPTION

The Chemical Safety and Hazard Investigation Board was authorized by the Clean Air Act Amendments of 1990 to investigate accidental releases of certain chemical substances resulting in serious injury, death, or substantial property damage. It became operational in fiscal year 1998.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$7,850,000 for the Chemical Safety and Hazard Investigation Board, equal to the fiscal year 2002 enacted level.

The Committee believes that the Chemical Safety and Hazard Investigation Board serves the very important mission of promoting the prevention of accidents at chemical plants. The Committee is deeply concerned that the Board's management deficiencies, as identified in a March 2002, FEMA IG report, have done a disservice to the

Board's main constituency—the workers in our Nation's chemical plants.

The Committee recognizes that the Board has accepted the FEMA IG's recommendations to rectify these unacceptable deficiencies, and has taken positive steps to implement the recommendations. The Committee continues to support the FEMA IG's ongoing review of the Board's activities.

The Committee has included bill language authorizing the Inspector General of FEMA to act as the Inspector General of the Chemical Safety Board. Funds have been included to accomplish this requirement in the FEMA OIG appropriation.

Not later than March 1, 2002, and each year thereafter, the Chief Operating Officer of the Board shall prepare a financial statement for the preceding fiscal year, covering all accounts and associated activities of the Board. Each financial statement of the Board will be prepared according to the form and content of the financial statements prescribed by the Office of Management and Budget for executive agencies required to prepare financial statements under the Chief Financial Officers Act of 1990, as amended by the Government Management Reform Act of 1994. Each financial statement prepared under 31 USC 3515 by the Board shall be audited according to applicable generally accepted government auditing standards by the Inspector General of the Board or an independent external auditor, as determined by the Inspector General. The IG shall submit to the Chief Operating Officer of the Board a report on the audit not later than June 30 following the fiscal year for which a statement was prepared.

The Committee has again included bill language limiting the number of career senior executive service positions to three.

DEPARTMENT OF THE TREASURY

COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS

COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS FUND PROGRAM ACCOUNT

Appropriations, 2002	\$80,000,000
Budget estimate, 2003	68,000,000
Committee recommendation	73,000,000

PROGRAM DESCRIPTION FOR CDFI FUND

The Community Development Financial Institutions Fund makes investments in the form of grants, loans, equity investments, deposits, and technical assistance grants to new and existing community development financial institutions (CDFIs), through the CDFI program. CDFIs include community development banks, credit unions, venture capital funds, revolving loan funds, and microloan funds, among others. Recipient institutions engage in lending and investment for affordable housing, small business and community development within underserved communities. The CDFI Fund administers the Bank Enterprise Award (BEA) Program, which provides a financial incentive to insured depository institutions to undertake community development finance activities. The CDFI Fund also administers the New Markets Tax Credit Program, a newly created program that will provide an incentive to investors in the form of a tax credit, which is expected to stimulate private community and economic development activities.

COMMITTEE RECOMMENDATION

The Committee recommends \$73,000,000 for the CDFI Fund, which is \$7,000,000 below the fiscal year 2002 level and \$5,000,000 above the administration's request.

The Committee also recommends a set-aside of \$5,000,000 for grants, loans, and technical assistance and training programs to benefit Native American, Alaskan Natives,

and Native Hawaiian communities in the coordination of development strategies, increased access to equity investments, and loans for development activities. This amount is an increase of \$5,000,000 above the budget request and the same as the fiscal year 2002 enacted level. The Committee is concerned that the CDFI Fund has not released all funds appropriated in fiscal years 2001 and 2002 for this purpose. The Committee has included this set-aside in fiscal year 2003 because the Native American, Alaskan Natives, and Native Hawaiian communities have been historically underserved by CDFIs.

The Department of the Treasury's November 2001 Native American Lending Study confirmed the inadequacy of capital investment in Indian communities and found that the investment gap between Native American economies and the United States overall totals \$44,000,000,000. The Committee directs the Fund to submit a 5-year strategic plan to the Committee that outlines its efforts to improve the economic needs of Native Americans. This report is due to the Committee by February 17, 2003.

The Committee remains concerned over the CDFI Fund's lack of data on its programs' outputs and outcomes. The Committee has difficulty making funding decisions for the Fund without an accurate accounting of the activities that the Fund has contributed to in low-income communities. The Committee recognizes that this has been a long-standing problem with the CDFI Fund, and urges the Administration to improve its monitoring systems. This is especially important now that the CDFI Fund will have administrative responsibilities for the New Markets Tax Credit Program.

INTERAGENCY COUNCIL ON THE HOMELESS

OPERATING EXPENSES

Appropriations, 2002	\$500,000
Budget estimate, 2003	1,000,000
Committee recommendation	1,500,000

PROGRAM DESCRIPTION

The Interagency Council on the Homeless is an independent agency created by the McKinney-Vento Homeless Assistance Act of 1987 to coordinate and direct the multiple efforts of Federal agencies and other designated groups. The Council was authorized to review Federal programs that assist homeless persons and to take necessary actions to reduce duplication. The Council can recommend improvements in programs and activities conducted by Federal, State and local government as well as local volunteer organizations. The Council consists of the heads of 18 Federal agencies such as the Departments of Housing and Urban Development, Health and Human Services, Veterans Affairs, Agriculture, Commerce, Defense, Education, Labor, and Transportation; and other entities as deemed appropriate.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,500,000 for the Interagency Council on the Homeless (ICH), \$500,000 more than the budget request and \$1,000,000 more than the fiscal year 2002 enacted level. These funds are for carrying out the functions authorized under section 203 of the McKinney-Vento Homeless Assistance Act.

The Council was previously funded under the HUD Homeless assistance grants account. The Committee has created a separate account for the Council to reflect better the law's intent that it operate and function as an independent agency. The Committee, however, expects HUD to continue providing administrative support for the Council as mandated under section 204(d) of the McKinney-Vento Homeless Assistance Act.

The Committee expects the primary activity of the ICH to be the development of a comprehensive Federal approach to end homelessness. In order for the ICH to be successful in this endeavor relevant Federal departments and agencies should defer to the ICH on policy and funding proposals that affect homelessness. The Committee understands that homelessness is affected by factors that cut across Federal agencies, including housing costs, job readiness, education, substance abuse and mental health. The Committee believes it is important to have an independent ICH in order to assess how the multitude of Federal programs have contributed to the rise in homelessness, and how they can contribute to ending homelessness.

CONSUMER PRODUCT SAFETY COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$55,200,000
Budget estimate, 2003	56,767,000
Committee recommendation	56,767,000

PROGRAM DESCRIPTION

The Commission is an independent regulatory agency that was established on May 14, 1973, and is responsible for protecting the public against unreasonable risks of injury from consumer products; assisting consumers to evaluate the comparative safety of consumer products; developing uniform safety standards for consumer products and minimizing conflicting State and local regulations; and promoting research and investigation into the causes and prevention of product-related deaths, illnesses, and injuries.

In carrying out its mandate, the Commission establishes mandatory product safety standards, where appropriate, to reduce the unreasonable risk of injury to consumers from consumer products; helps industry develop voluntary safety standards; bans unsafe products if it finds that a safety standard is not feasible; monitors recalls of defective products; informs and educates consumers about product hazards; conducts research and develops test methods; collects and publishes injury and hazard data, and promotes uniform product regulations by governmental units.

COMMITTEE RECOMMENDATION

The Committee recommends \$56,767,000 for the Consumer Product Safety Commission, equal to the budget request and an increase of \$1,567,000 above the fiscal year 2002 enacted level.

The Committee does not recommend the administration's request for an exemption of CPSC's litigation travel from the travel ceiling imposed by General Provision 401 of this Act. Instead, the Committee will continue to consider CPSC's increased travel requirements through regular reprogramming requests.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

NATIONAL AND COMMUNITY SERVICE PROGRAMS

OPERATING EXPENSES

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$401,980,000
Budget estimate, 2003	631,342,000
Committee recommendation	407,242,000

PROGRAM DESCRIPTION

The Corporation for National and Community Service, a Corporation owned by the Federal Government, was established by the National and Community Service Trust Act of 1993 (Public Law 103-82) to enhance opportunities for national and community service and provide national service educational awards. The Corporation makes grants to States, institutions of higher education, pub-

lic and private nonprofit organizations, and others to create service opportunities for a wide variety of individuals such as students, out-of-school youth, and adults through innovative, full- and part-time national and community service programs. National service participants may receive education awards which may be used for full-time or part-time higher education, vocational education, job training, or school-to-work programs.

The Corporation is governed by a Board of Directors and headed by the Chief Executive Officer. Board members and the Chief Executive Officer are appointed by the President of the United States and confirmed by the Senate.

COMMITTEE RECOMMENDATION

The Committee recommends \$407,242,000 for the Corporation for National and Community Service, approximately the same as the fiscal year 2002 enacted level and \$224,600,000 below the budget request.

The Committee has included bill language that caps the number of AmeriCorps volunteers at 50,000 for program year 2003. The Committee has taken this step in light of recent information that the Corporation had committed more enrollment slots than it could fund under its budget. In a preliminary report to the Committee, the Corporation recently revealed that the AmeriCorps program had both approved and enrolled far more volunteer slots than budgeted. Specifically, in program year 2000, 50,000 slots were budgeted, but the Corporation approved 67,000 slots, and actually enrolled 53,000. In program year 2001, 50,000 slots were budgeted, but the Corporation approved 71,800 slots and enrolled 59,200 slots. The Corporation has also exceeded its target level for 2002. Because of these practices, the Committee is deeply concerned that the Corporation may not have adequate funds in the National Service Trust Fund to meet its outstanding liabilities, and the Committee has requested investigations by both GAO and the IG into this matter to ensure the solvency of the National Service Trust. To that end, the Committee has included \$15,000,000 for the Trust Fund and \$240,492,000 in the AmeriCorps program account to fund 50,000 volunteers in program year 2003. The Committee, however,

recognizes that the Corporation and the Office of Management and Budget are still reviewing the AmeriCorps program budgetary needs and will work with the administration on ensuring that the Corporation has adequate funds to enroll 50,000 members. The Committee applauds the recent steps taken by the Corporation's CEO and CFO and will continue to work closely with the Corporation to ensure that the AmeriCorps budgetary and management problems are resolved as expeditiously as possible. The Committee expects the Corporation to submit a final report to the Committee on its budgetary needs for fiscal year 2003 and any legislative language, if necessary, to ensure that the Corporation is able to meet its outstanding liabilities to those AmeriCorps members enrolled in the program. In this report, the Committee directs the Corporation to include details on the steps implemented to prevent the Corporation from over-enrolling members in the future and disciplinary actions taken to those individuals responsible for the problems with the Trust Fund.

The Committee recommends the following changes to the budget request:

-\$162,277,000 for AmeriCorps Grants, National Direct and State Funds, for a total of \$290,342,000. This amount is equal to the fiscal year 2002 enacted level.

Within the amount provided, the Committee directs the Corporation to continue at least the current level of support for

programs designed to help teach children to read by the third grade (\$100,000,000), and for activities dedicated to developing computer and information technology skills for students and teachers in low-income communities (\$25,000,000). The Committee directs the Corporation to provide specifics in its fiscal year 2003 operating plan detailing how the Corporation will fulfill these directives.

The Committee is aware that the Corporation has recently added a new criterion in its AmeriCorps application process that takes into account the leveraging of unpaid volunteers. The Committee supports this new criterion and encourages the Chief Executive Officer to focus heavily on an applicant's ability to leverage and mobilize unpaid volunteers when awarding grants under the National and Community Service Act.

In order to ensure that as many qualified grant applicants as possible have the opportunity to access Corporation resources, the Committee supports efforts to reduce grantee reliance on Federal funding, and expects that some grantees should eventually be able to operate without Federal funding. The Inspector General recently reviewed the Corporation's National Direct Grant Application Review Process and recommended that the Corporation establish a means of clearly measuring a grantee's reliance on Federal funding and consider developing a performance goal for reducing grantees' reliance on Federal funds. Accordingly, the Committee directs the Corporation to provide a report by February 21, 2003, that details its efforts to measure a grantee's reliance on Federal funding and to reduce grantee reliance on Federal funds both in terms of total Corporation resources provided to grantees, and as a percentage of grantee operating costs. Further, the Committee directs the Corporation to provide quarterly reports with the initial report due on March 5, 2003 that lists every grantee that receives a minimum of \$500,000 from the Corporation. These quarterly reports should include the name of the grantee, the amount of Corporation funds it has received, the Corporation program source of funding, the amount of private sector funds it has received, and sources of other Federal or public funding.

The Committee is encouraged by the Corporation's goal to improve the accountability of its grantees. Accordingly, the Committee directs the Corporation to establish, in consultation with grantees receiving assistance under all parts of the National and Community Service Act, performance measures for each grantee. The Corporation shall require any grantee that does not achieve the established levels of performance on the measures, as determined by the Corporation, to submit to the Corporation for approval a plan of correction. If the grantee fails to achieve the established levels of performance, the Committee directs the Corporation to either reduce some portion or terminate the entire amount of assistance provided to the grantee consistent with established due process requirements.

The Committee does not recommend the request to transfer the Education Award and Promise Fellows programs from Innovation Activities to AmeriCorps grants. The Committee supports the Administration's efforts to integrate AmeriCorps activities. However, the request to transfer the program would require legislative language to exempt grantee organizations from AmeriCorps administration cost, matching requirements, and participant benefit requirements. The Committee notes that these requirements have never been part of the Education Award or Promise Fellows programs, but the Committee believes that any necessary exemptions should be addressed in the context of reauthorization of the Corporation's programs.

-\$8,638,000 for innovation, demonstration, and assistance activities, for a total of \$29,850,000. Within the amount provided, the Committee recommends \$10,000,000 for demonstration programs, an increase of \$5,000,000 above the request. The Committee directs that the Corporation use this increase to provide seed funding to start-up organizations to foster the “next generation” of National Direct organizations. Also within the amount provided, the Committee recommends \$10,000,000 for Challenge Grants, the same as the request. The Committee intends for these grants to be administered in a manner that allows eligibility of: (1) AmeriCorps organizations; (2) non-profit organizations that may not otherwise qualify for AmeriCorps funding because they do not use AmeriCorps volunteers; and (3) non-profit organizations that are not direct service organizations. The Committee also intends for Challenge Grants to require a match of \$1 in private funding for every \$1 in Challenge Grant funding. The Committee directs the Corporation to notify the Committee at least 5 business days in advance of making any Challenge Grant award. Finally, the Committee’s recommendation for AmeriCorps grants includes sufficient funding for the Corporation to continue the Education Award and Promise Fellows programs within this amount.

-\$2,500,000 for America’s Promise, for a total of \$5,000,000. This amount is \$2,500,000 below the fiscal year 2002 enacted level. The Committee directs America’s Promise to provide the Committee a full accounting of funds from the Federal Government and non-public sources, a breakdown of these funds for its operating expenses, and performance outputs and outcomes such as the number of volunteers it has leveraged with Federal dollars and the number of communities it has served since its inception. The report should be submitted by March 1, 2003.

-\$10,000,000 for the National Civilian Community Corps, for a total program level of \$25,000,000 in fiscal year 2003. This amount is equal to the fiscal year 2002 enacted level. The Committee does not recommend funding for two additional NCCC campuses. The Committee emphasizes that it has taken this action without prejudice to a future expansion of the program, and directs the Corporation to provide a report by March 4, 2003, with a comprehensive, strategic expansion plan. The plan should include dates and milestones for establishing new campuses, including cost estimates.

-\$2,575,000 for program administration/State commissions, for a total of \$32,500,000 to provide support for an oversight of the Corporation’s programs and projects. This amount is \$1,500,000 above the fiscal year 2002 enacted level. The Committee directs the Corporation to set-aside up to \$2,000,000 for the Office of the Chief Financial Officer (CFO). These funds are to be used at the CFO’s sole discretion for staffing, information systems, and other relevant purposes for ensuring the financial and management integrity of the Corporation’s programs. The Committee intends \$19,500,000 for program administration, including staffing, compensation, and operating expenses, and \$13,000,000 as support for Governor-appointed State Commissions on National and Community Service. The Committee notes that State Commissions are required to provide a 50 percent match of this funding.

The Committee commends the Corporation for the significant improvements it has made in management and financial accounting and for its second consecutive “clean” opinion on its financial statements audit. Nevertheless, the Committee remains concerned about the Corporation’s remaining reportable condition related to grants management. Many

grantees fail to provide accurate and timely information on grant expenditures and in some cases, the Inspector General has identified significant questionable costs. The Committee commends the Corporation’s progress in ensuring that its new grants management and cost accounting system is fully operational by no later than the fall of 2002. The Committee also supports the recommendations from a recent PriceWaterhouseCoopers (PWC) report, especially the recommendation that the new cost accounting system is able to calculate cost per grant or cost per grant dollar so that improvements in administrative cost management can be monitored.

-\$42,000,000 for the National Service Trust, for a total of \$15,000,000 to support service awards, interest forbearance, and President’s Student Service Scholarship payments. This reduction reflects the Committee’s recommendation not to fund the Senior Service Initiative, which is a proposed new activity to allow senior volunteers to transfer their education awards to a child or grandchild. Instead, the Committee recommends that this proposal be considered in the context of reauthorization of the Corporation’s programs. Further, the Committee recognizes that the Corporation may need additional funds in the Trust to meet its outstanding liabilities in 2003. The Committee did not appropriate funding into the Trust in fiscal year 2002 as it was determined that sufficient funds were available from previous years to cover all estimated awards for fiscal year 2002. The Committee directs the Corporation to provide quarterly activity reports to the Committee and the Inspector General on the expenditure of awards under the National Service Trust Fund. The initial report should be submitted by February 25, 2003.

The Committee’s recommendation for the Trust includes up to \$5,000,000 to support an estimated 8,000 President’s Student Service Scholarship awards. This program provides \$1,000 scholarships to high school juniors and seniors who have performed outstanding service to their communities during their high school years. The Corporation provides one-half of the scholarship, and local funding from schools, businesses, nonprofit organizations, or civic groups provides the other half.

The Committee also recommends the budget request of \$5,000,000 for audits and evaluations, \$43,000,000 for Learn and Save America, and \$10,000,000 for the Points of Light Foundation. The Committee supports the Corporation’s efforts to track the performance of its programs and measure outcomes.

OFFICE OF INSPECTOR GENERAL
Appropriations, 2002 \$5,000,000
Budget estimate, 2003 5,000,000
Committee recommendation 6,900,000

PROGRAM DESCRIPTION

The Office of Inspector General within the Corporation for National and Community Service is authorized by the Inspector General Act of 1978, as amended. The goals of the Office are to increase organizational efficiency and effectiveness and to prevent fraud, waste, and abuse. The Office of Inspector General within the Corporation for National and Community Service was transferred to the Corporation from the former ACTION agency when ACTION was abolished and merged into the Corporation in April 1994.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$6,900,000 for the Office of Inspector General (OIG). This amount is \$1,400,000 above the budget request and the 2002 level. The Committee recommends an increase for the Office of Inspector General in order to in-

crease oversight of the Corporation’s activities.

ADMINISTRATIVE PROVISIONS

The Committee recommends bill language to ensure that loans made, insured, or guaranteed by State agencies are considered to be qualified student loans for the purpose of making AmeriCorps education awards. A modified version of this provision has been carried in prior year appropriations acts.

The Committee also recommends new bill language to allow disability placement funds, which are primarily used to pay for reasonable accommodations and other efforts to make AmeriCorps programs accessible to persons with disabilities, available to any AmeriCorps program funded under subtitle C.

U.S. COURT OF APPEALS FOR VETERANS CLAIMS**SALARIES AND EXPENSES**

Appropriations, 2002	\$13,221,000
Budget estimate, 2003	14,326,000
Committee recommendation	14,612,000

PROGRAM DESCRIPTION

The Court of Appeals for Veterans Claims was established by the Veterans’ Judicial Review Act. The court is an independent judicial tribunal with exclusive jurisdiction to review decisions of the Board of Veterans’ Appeals. It has the authority to decide all relevant questions of law; interpret constitutional, statutory, and regulatory provisions; and determine the meaning or applicability of the terms of an action by the Department of Veterans Affairs. It is authorized to compel action by the Department unlawfully withheld or unreasonably delayed. It is authorized to hold unconstitutional or otherwise unlawful and set-aside decisions, findings, conclusions, rules and regulations issued or adopted by the Department of Veterans Affairs or the Board of Veterans’ Appeals.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$14,612,000 for the Court of Appeals for Veterans claims, an increase of \$1,105,000 above the fiscal year 2002 enacted level.

DEPARTMENT OF DEFENSE—CIVIL**CEMETERIAL EXPENSES, ARMY****SALARIES AND EXPENSES**

Appropriations, 2002	\$22,537,000
Budget estimate, 2003	24,445,000
Committee recommendation	24,445,000

PROGRAM DESCRIPTION

Responsibility for the operation of Arlington National Cemetery and Soldiers’ and Airmen’s Home National Cemetery is vested in the Secretary of the Army. As of September 30, 2001, Arlington and Soldiers’ and Airmen’s Home National Cemeteries contained the remains of 289,494 persons and comprised a total of approximately 628 acres. There were 3,727 interments and 2,212 inurnments in fiscal year 2001; 3,800 interments and 2,500 inurnments are estimated for the current fiscal year; and 3,925 interments and 2,700 inurnments are estimated for fiscal year 2003.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$24,445,000 for the Army’s cemeterial expenses. This amount is \$1,908,000 above the fiscal year 2002 enacted level.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**NATIONAL INSTITUTES OF HEALTH****NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES**

Appropriations, 2002	\$80,728,000
----------------------------	--------------

Budget estimate, 2003	174,471,000
Committee recommendation	76,074,000
¹ Does not include \$1,603,000 proposed transfer from the National Cancer Institute.	

PROGRAM DESCRIPTION

The National Institute of Environmental Health Sciences, an agency within the National Institutes of Health, was authorized in section 311(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, to conduct multidisciplinary research and training activities associated with the Nation's Hazardous Substance Superfund program, and in section 126(g) of the Superfund Amendments and Reauthorizations Act of 1986, to conduct training and education of workers who are or may be engaged in activities related to hazardous waste removal or containment or emergency response.

COMMITTEE RECOMMENDATION

The Committee recommends \$76,074,000 for the National Institute of Environmental Health Sciences, which is \$4,654,000 below the fiscal year 2002 enacted level. The recommendation includes \$27,137,520 for worker training grants and \$48,936,480 for research.

AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY

TOXIC SUBSTANCES AND ENVIRONMENTAL PUBLIC HEALTH	
Appropriations, 2002	\$78,235,000
Budget estimate, 2003	77,388,000
Committee recommendation	81,000,000

PROGRAM DESCRIPTION

The Agency for Toxic Substances and Disease Registry (ATSDR), an agency of the Public Health Service, was created in section 104(i) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The ATSDR's primary mission is to conduct surveys and screening programs to determine relationships between exposure to toxic substances and illness. Other activities include the maintenance and annual update of a list of hazardous substances most commonly found at Superfund sites, the preparation of toxicological profiles on each such hazardous substance, consultations on health issues relating to exposure to hazardous or toxic substances, and the development and implementation of certain research activities related to ATSDR's mission.

COMMITTEE RECOMMENDATION

The Committee recommends \$81,000,000 for the Agency for Toxic Substances and Disease Registry, which is \$3,612,000 above the budget request and \$2,765,000 above the fiscal year 2002 enacted level.

Within the amount provided, the Committee directs ATSDR to continue at least the current level of support for the Great Lakes Fish Consumption Study. Additionally, the Committee directs ATSDR to establish a fish consumption advisory pilot program in Michigan based on the information included in the Agency's December 2001 feasibility report.

Also within the amount provided, the Committee directs ATSDR to implement a multifaceted health study of polychlorinated biphenyl (PCB) exposure in Anniston, Alabama. The study should be undertaken in consultation with community residents and in cooperation with the Alabama Department of Public Health.

The Committee also directs that within the amount provided, ATSDR monitor and assess the long-term health status of children, adolescents and young adults in Herculaneum, Missouri regarding their potential exposure to lead.

ENVIRONMENTAL PROTECTION AGENCY	
Appropriations, 2002	\$8,078,813,000
Budget estimate, 2003	7,620,513,000
Committee recommendation	8,205,436,000

¹ Includes \$175,600,000 in fiscal year 2002 supplemental funding.

GENERAL DESCRIPTION

The Environmental Protection Agency [EPA] was created through Executive Reorganization Plan No. 3 of 1970 designed to consolidate certain Federal Government environmental activities into a single agency. The plan was submitted by the President to the Congress on July 8, 1970, and the Agency was established as an independent agency in the executive branch on December 2, 1970, by consolidating 15 components from 5 departments and independent agencies.

A description of EPA's pollution control programs by media follows:

Air.—The Clean Air Act Amendments of 1990 authorize a national program of air pollution research, regulation, prevention, and enforcement activities.

Water quality.—The Federal Water Pollution Control Act, as amended, provides the framework for protection of the Nation's surface waters. The law recognizes that it is the primary responsibility of the States to prevent, reduce, and eliminate water pollution. The States determine the desired uses for their waters, set standards, identify current uses and, where uses are being impaired or threatened, develop plans for the protection or restoration of the designated use. They implement the plans through control programs such as permitting and enforcement, construction of municipal waste water treatment works, and nonpoint source control practices. The CWA also regulates discharge of dredge or fill material into waters of the United States, including wetlands.

Drinking water.—The Safe Drinking Water Act of 1974, as amended in 1996, charges EPA with the responsibility of implementing a program to assure that the Nation's public drinking water supplies are free of contamination that may pose a human health risk, and to protect and prevent the endangerment of ground water resources which serve as drinking water supplies.

Hazardous waste.—The Resource Conservation and Recovery Act of 1976 mandated EPA to develop a regulatory program to protect human health and the environment from improper hazardous waste disposal practices. The RCRA Program manages hazardous wastes from generation through disposal.

EPA's responsibilities and authorities to manage hazardous waste were greatly expanded under the Hazardous and Solid Waste Amendments of 1984. Not only did the regulated universe of wastes and facilities dealing with hazardous waste increase significantly, but past mismanagement practices, in particular prior releases at inactive hazardous and solid waste management units, were to be identified and corrective action taken. The 1984 amendments also authorized a regulatory and implementation program directed to owners and operators of underground storage tanks.

Pesticides.—The objective of the Pesticide Program is to protect the public health and the environment from unreasonable risks while permitting the use of necessary pest control approaches. This objective is pursued by EPA under the Food Quality Protection Act, the Federal Insecticide, Fungicide, and Rodenticide Act and the Federal Food, Drug, and Cosmetic Act through three principal means: (1) review of existing and new pesticide products; (2) enforcement of pesticide use rules; and (3) research and development to reinforce the ability to evaluate the risks and benefits of pesticides.

Radiation.—The radiation program's major emphasis is to minimize the exposure of persons to ionizing radiation, whether from naturally occurring sources, from medical or industrial applications, nuclear power sources, or weapons development.

Toxic substances.—The Toxic Substances Control Act establishes a program to stimulate the development of adequate data on the effects of chemical substances on health and the environment, and institute control action for those chemicals which present an unreasonable risk of injury to health or the environment. The act's coverage affects more than 60,000 chemicals currently in commerce, and all new chemicals.

Multimedia.—Multimedia activities are designed to support programs where the problems, tools, and results are cross media and must be integrated to effect results. This integrated program encompasses the Agency's research, enforcement, and abatement activities.

Superfund.—The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 established a national program to protect public health and the environment from the threats posed by inactive hazardous waste sites and uncontrolled spills of hazardous substances. The original statute was amended by the Superfund Amendments and Reauthorization Act of 1986. Under these authorities, EPA manages a hazardous waste site cleanup program including emergency response and long-term remediation.

Leaking underground storage tanks.—The Superfund Amendments and Reauthorization Act of 1986 established the leaking underground storage tank [LUST] trust fund to conduct corrective actions for releases from leaking underground storage tanks that contain petroleum or other hazardous substances. EPA implements the LUST response program primarily through cooperative agreements with the States.

COMMITTEE RECOMMENDATION

The Committee recommends a total of \$8,205,436,000 for EPA. This is an increase of \$584,923,000 above the budget request and an increase of \$126,623,000 above the fiscal year 2002 enacted level.

The Agency is directed to notify the Committee prior to each reprogramming in excess of \$500,000 between objectives, when those reprogrammings are for different purposes. The exceptions to this limitation are as follows: (1) for the "Environmental programs and management" account, Committee notification is required at \$500,000; Committee approval is required only above \$1,000,000; and (2) for the "State and tribal assistance grants" account, reprogramming of performance partnership grant funds is exempt from this limitation.

SCIENCE AND TECHNOLOGY

Appropriations, 2002	\$788,397,000
Budget estimate, 2003	670,008,000
Committee recommendation	707,203,000

¹ Includes \$90,308,000 in fiscal year 2002 supplemental funding.

PROGRAM DESCRIPTION

EPA's "Science and technology" account provides funding for the scientific knowledge and tools necessary to support decisions on preventing, regulating, and abating environmental pollution and to advance the base of understanding on environmental sciences. These efforts are conducted through contracts, grants, and cooperative agreements with universities, industries, other private commercial firms, nonprofit organizations, State and local government, and Federal agencies, as well as through work performed at EPA's laboratories and various field stations and field offices. In addition, Hazardous

Substance Superfund Trust Fund resources are transferred to this account directly from the Hazardous Substance Superfund.

COMMITTEE RECOMMENDATION

The Committee recommends \$707,203,000 for science and technology, \$37,195,000 above the budget request and \$81,194,000 below the enacted level including supplemental funding. In addition, the Committee recommends the transfer of \$86,168,000 from the Superfund account, for a total of \$793,371,000 for science and technology.

The Committee recommends the following changes to the budget request:

+\$9,750,000 for the STAR Fellowships Program. The budget request proposed to transfer this program to the National Science Foundation.

-\$9,750,000 for the National Environmental Technology Competition. The Committee supports the Agency's efforts to foster private and public sector development of new, cost-effective environmental technologies, and has instead recommended full funding of the budget request of two existing Agency programs designed to achieve this objective—the Small Business Innovation Research (SBIR) Program, whereby 2.5 percent of all extramural research funding is set-aside for work with small businesses, and the Environmental Technology Verification (ETV) Program (\$3,618,000). The Committee urges EPA to develop a "one stop shop" office to coordinate these programs to ensure the greatest impact without duplication or overlap, and directs the Agency to report to the Committee by March 3, 2003, detailing such efforts.

+\$10,000,000 for small system arsenic removal research, for a total of \$16,800,000 in fiscal year 2003. The Committee strongly encourages EPA to utilize a significant portion of this funding to carry out demonstrations of implementation of low-cost treatment technology, and directs the Agency to report to the Committee by March 3, 2003, on its plans to carry out such demonstrations.

The following increases to the budget request are each to be reduced by 10 percent:

+\$700,000 for the Center for the Conservation of Biological Resources at Black Hills State University, South Dakota.

+\$750,000 for Clean Air Counts of Northeastern Illinois to develop an innovative and cost effective method to reduce smog-causing emissions in the Chicago metropolitan region. The funding will provide support for an ongoing partnership involving EPA, the Metropolitan Mayors Caucus, Illinois EPA, and the Delta Institute.

+\$800,000 for the Contra Costa Water District, California, for applied research studies related to the water quality and water treatment challenges facing Bay Delta water users.

+\$800,000 for Lake Superior State University for education and research on aquatic biota and their associated habitats.

+\$750,000 for the Louisiana Environmental Research Center at McNeese State University for research into wetland ecology and the environmental effects of oil spills.

+\$300,000 for the Foundation for the Advancement of Science and Education's pesticides recording project.

+\$750,000 for the Southwest Clean Air Quality Agency's Columbia Gorge Air Quality Technical Foundation Study.

+\$500,000 for the Center for the Study of Metals in the Environment.

+\$1,200,000 for the Center for Air Toxic Metals at the Energy and Environmental Research Center.

+\$100,000 for the University of Vermont's Proctor Maple Research Center to continue mercury deposition monitoring effects.

+\$350,000 for acid rain research at the University of Vermont.

+\$500,000 for the City of Glendale, California for research and development of technology for the removal of Chromium 6 from water.

+\$750,000 for the Integrated Public/Private Energy and Environmental Consortium (IPEC) to develop cost-effective environmental technology, improved business practices, and technology transfer for the domestic petroleum industry.

+\$500,000 for the Consortium for Plant Biotechnology Research

+\$1,000,000 for the National Environmental Respiratory Center at the Lovelace Respiratory Research Institute.

+\$3,900,000 for the Mine Waste Technology Program at the National Environmental Waste Technology, Testing, and Evaluation Center.

+\$1,500,000 for the Connecticut River Airshed-Watershed Consortium.

+\$3,600,000 for the Water Environment Research Foundation.

+\$3,600,000 for the American Water Works Association Research Foundation.

+\$700,000 for the Mid-America Regional Council to apply urban agroforestry technologies to meet community green infrastructure needs.

+\$1,000,000 for the Center for Estuarine Research at the University of South Alabama.

+\$1,000,000 for the Alabama Department of Environmental Management for the Alabama Water and Wastewater Training Program.

+\$1,000,000 for the Environmental Lung Center at the National Jewish Medical and Research Center.

+\$2,000,000 for air quality program for Fairbanks North Star Borough, Alaska.

Drinking Water Security.—The Committee supports the budget request of \$21,900,000 in fiscal year 2003, which includes \$16,900,000 in Science and Technology and \$5,000,000 in STAG for water security coordinator State grants to address the security of our Nation's drinking water and wastewater systems. The Committee notes these funds, in addition to the approximately \$140,000,000 provided by the Committee in previous supplemental appropriations acts, will result in the Committee's having recommended a total of \$160,000,000 for drinking water security efforts. The Committee is disappointed that the Administration did not release \$50,000,000 of this funding. The Committee directs that by March 31, 2003, the Agency provide a full accounting of how these funds have been or will be expended. Additionally, within the funds provided, the Committee strongly encourages EPA to support water infrastructure research and development activities as well as security vulnerability assessments. The Committee is also aware of efforts to develop a Water Information Security Analysis Center (ISAC), and strongly encourages EPA to provide support for the implementation of this system to provide a secure communications network linking law enforcement and local drinking water systems.

Emission standards study.—EPA is directed to submit a report no later than February 15, 2004 on the practices and procedures by which States develop separate emission standards, including standards for nonroad engines or vehicles, as compared to the development by EPA of national emission standards under the Clean Air Act. This report shall include an assessment of the procedures, practices, standards and requirements used by States as opposed to those used by the EPA, including how States and the EPA take into account technological feasibility, economic feasibility, impact on the economy, costs, safety, noise and energy factors associated in the development of these standards.

Coeur d'Alene Superfund site.—In accordance with the Record of Decision (ROD) for the Bunker Hill Mining and Metallurgical Complex Operable Unit 3 issued in September 2002, remediation work has begun in the Coeur d'Alene River Basin in northern Idaho. Because of the estimated expense and duration of this remediation, the Committee makes available \$850,000 from within available funds for the Agency to contract with the National Academy of Sciences (NAS) so that the NAS can independently evaluate the Coeur d'Alene Superfund site. This evaluation is to include an examination of EPA's scientific and technical practices in Superfund site area definition, human and ecological risk assessment, remedial planning, and decision making. NAS further is expected to assess the adequacy and application of EPA's own Superfund guidance in this case in terms of currently available scientific and technical knowledge and best practices, as well as to provide guidance to facilitate scientifically based and timely decision making for the Coeur d'Alene site. This funding is intended to implement the specific tasks outlined in an NAS plan of action dated June 11, 2002.

The Agency is directed to execute a contract with the NAS for this study within 120 days of approval of this legislation, and the NAS is expected to complete the study within 24 months of the contract date. In directing this study, it is the intent of the Committee that ongoing and planned remediation activities within the 21-square mile Bunker Hill site and Coeur d'Alene Basin under the Records of Decision not be disrupted, delayed, or adversely impacted in any way prior to completion of the NAS study. The EPA may choose to amend the RODs based on the findings of the NAS study once it has been completed, consistent with CERCLA.

The Committee has not included proposed bill language relative to the environmental services fund.

ENVIRONMENTAL PROGRAMS AND MANAGEMENT Appropriations, 2002	\$2,093,511,000
Budget estimate, 2003	2,047,703,800
Committee recommendation	
	2,136,569,000

¹ Includes \$39,000,000 in fiscal year 2002 supplemental funding.

PROGRAM DESCRIPTION

The Agency's "Environmental programs and management" account includes the development of environmental standards; monitoring and surveillance of pollution conditions; direct Federal pollution control planning; technical assistance to pollution control agencies and organizations; preparation of environmental impact statements; enforcement and compliance assurance; and assistance to Federal agencies in complying with environmental standards and insuring that their activities have minimal environmental impact. It provides personnel compensation, benefits, and travel and other administrative expenses for all agency programs except hazardous substance Superfund, LUST, Science and Technology, Oil Spill Response, and OIG.

COMMITTEE RECOMMENDATION

The Committee recommends \$2,136,569,000 for environmental programs and management, an increase of \$88,865,200 above the budget request and \$82,058,000 above the fiscal year 2002 enacted level.

The Committee recommends the following changes to the budget request:

+\$20,100,000 to fully fund enforcement FTEs at no less than the 2001 level, consistent with the 2001 operating plan. The Committee does not recommend the Administration's request to reduce funding for Federal enforcement of environmental laws to

instead fund a new State enforcement grant program.

+ \$9,160,000 for Environmental Education, equal to the 2002 level. The budget request proposed to eliminate this program.

+ \$2,000,000 for Environmental Justice, for a total of \$6,079,000. This amount is \$1,915,000 above the 2002 program level.

+ \$5,275,000 for the National Estuary Program, for a total of \$24,521,000. This amount is equal to the 2002 program level.

+ \$5,200,000 for the Energy Star program, for a total program level of \$55,000,000. This amount is \$6,400,000 above the 2002 level.

- \$8,969,000 for regulatory development, for a total program level of \$27,412,000, equal to the 2002 level.

- \$3,156,500 as a general reduction, subject to normal reprogramming guidelines.

+ \$2,000,000 for Chesapeake Bay small watershed grants. The Committee expects that the funds provided for this program, managed by the Fish and Wildlife Foundation, shall be used for community-based projects including those that design and implement on-the-ground and in-the-water environmental restoration or protection activities to help meet Chesapeake Bay Program goals and objectives. This increase will result in a total of \$22,651,000 available in fiscal year 2003 for the Chesapeake Bay Program, which is \$1,383,600 above the fiscal year 2002 program level.

+ \$1,372,000 for the Great Lakes National Program Office, for a total program level of \$16,500,000. This amount is \$1,570,000 above the 2002 program level.

+ \$2,320,000 for the Lake Champlain Basin Program, for a total program level of \$3,275,000. This amount is \$775,000 above the 2002 program level.

+ \$2,000,000 for the Lake Pontchartrain Basin Restoration Program. The Committee directs the Administrator to give priority consideration to the proposals of the Lake Pontchartrain Basin Foundation.

+ \$2,523,000 for the Long Island Sound Program, for a total program level of \$3,000,000. This amount is \$500,000 above the 2002 program level.

The following increases to the budget are each to be reduced by 10 percent:

+ \$250,000 for the Maryland Bureau of Mines for an acid mine drainage remediation project.

+ \$5,000,000 for America's Clean Water Foundation for implementation of on-farm environmental assessments for livestock operations.

+ \$1,000,000 for projects demonstrating the benefits of Low Impact Development along the Anacostia Watershed in Prince Georges County, Maryland.

+ \$500,000 for the University of Arkansas to develop bio-environmental engineering solutions to watershed management.

+ \$50,000 for the Northwest Straits Commission.

+ \$700,000 for the Northwest Indian Fisheries Commission with distribution as follows: \$160,000 to the Northwest Indian Fisheries Commission for coordination and \$540,000 to be divided among the 26 participating tribes to implement this tribal initiative by integrating state, Federal, tribal and local governmental efforts to develop common water quality protection goals and reduce jurisdictional barriers.

+ \$200,000 for the Columbia Basin Groundwater Area Management Study.

+ \$500,000 for the Gateway Cities Council of Governments, California, pilot program to reduce diesel emissions.

+ \$750,000 for Columbus Water Works, Georgia, biosolids thermophilic treatment technology demonstration.

+ \$250,000 for the Illinois Department of Agriculture's Council on Best Management

Practices initiative to reduce nitrate contamination in drinking water.

+ \$250,000 for the CropLife Foundation North Carolina environmental stewardship project.

+ \$500,000 for the Central California ozone study.

+ \$500,000 for the Center for Agricultural and Rural Development at Iowa State University for the Resource and Agricultural Policy Systems program.

+ \$500,000 for the Small Business Pollution Prevention Center at the University of Northern Iowa.

+ \$750,000 for the painting and coating assistance initiative through the University of Northern Iowa.

+ \$100,000 for the American Farmland Trust Center for Agriculture in the Environment for sustainable agriculture in Hawaii and the American Pacific.

+ \$500,000 for the Economic Development Alliance of Hawaii promote biotechnology to reduce pesticide use in tropical and subtropical agricultural production

+ \$250,000 for the County of Hawaii and the Hawaii Island Economic Development Board to establish and implement a community development model for renewable resource management by upgrading solid waste transfer stations into community recycling centers.

+ \$250,000 for a storm water research initiative at the University of Vermont.

+ \$200,000 for the Vermont small business compliance assistance project conducted by the Vermont Small Business Development Center.

+ \$500,000 for Boston Metropolitan Area Planning Council (MAPC) and the Massachusetts Technology Collaborative (MTC) to develop regional solutions for managing and protecting water resources.

+ \$160,000 for the Great Lakes Fish and Wildlife Commission Crandon Mine analysis.

+ \$500,000 for the Sand County Foundation in Wisconsin for an incentive program to promote the reduction of nitrogen discharge in the Upper Mississippi River Basin.

+ \$250,000 for Livingston Parish, Louisiana, for a water and wastewater infrastructure feasibility study.

+ \$250,000 for the Vermont Department of Agriculture to work with conservation districts and local communities to reduce non-point source run-off in the Potash Brook watershed.

+ \$500,000 for the Lohontan Regional Water Quality Control Board in California for the Board, working with California water officials and the State of Nevada, to address Lake Tahoe water quality issues.

+ \$50,000 for the Tioga County Department of Economic Development and Planning, New York, for the Owego infrastructure master plan.

+ \$200,000 for design, engineering, and planning activities related to the pollution prevention of Wreck Pond and nearby beaches in Spring Lake, New Jersey.

+ \$150,000 for the New Jersey EnvironMentors project.

+ \$350,000 for planning and engineering studies for the Storm Lake, Iowa, cleanup project.

+ \$250,000 for a study to address the characterization and remediation of ash sites in Jacksonville, Florida.

+ \$16,000,000 for rural water training and technical assistance activities and source water protection initiatives with distribution as follows: \$9,000,000 for the National Rural Water Association, \$3,500,000 for the Rural Community Assistance Program, \$750,000 for the Ground Water Protection Council, \$750,000 for the Water Systems Council to assist in the effective delivery of water to rural citizens nationwide, and

\$2,000,000 for the source water protection program.

+ \$200,000 for the Northeast Waste Management Officials Association to continue solid waste, hazardous waste, cleanup, and pollution prevention programs.

+ \$200,000 for the Northeast States for Coordinated Air Use Management (NESCAUM).

+ \$2,500,000 for the National Alternative Fuels Training Consortium.

+ \$1,500,000 for the Ecological and Water Resources Assessment Project.

+ \$500,000 for the Valley Water Mill Watershed Education and Demonstration Center.

+ \$175,000 for the Hypoxia Education and Stewardship Project.

+ \$200,000 for the Sutherlin, Oregon Water Control District's Watershed Assessment Project.

+ \$500,000 for the Kenai river Center in Kenai, Alaska.

+ \$2,000,000 for Region 10 environmental compliance activities in Alaska.

+ \$2,000,000 for the Coeur d'Alene Basin Commission to continue a pilot program for environmental response, natural resource restoration and related activities.

+ \$1,500,000 for the Ohio River Pollution Reduction Program.

+ \$500,000 for the University of Southern Maine for environmental education activities.

+ \$1,500,000 for the University of Louisville for the Stream Restoration Institute.

+ \$2,500,000 for the Southwest Center for Environmental Research and Policy.

+ \$4,000,000 for the Small Public Water System Technology Centers at Western Kentucky University, the University of New Hampshire, the University of Alaska-Sitka, Pennsylvania State University, the University of Missouri-Columbia, Montana State University, the University of Illinois, and Mississippi State University.

+ \$1,000,000 to complete the full feasibility study/environmental impact statement for the Medford, Oregon, effluent reuse project.

Brownfields.—The Committee supports the request of \$29,500,000 for Brownfields administrative costs, and has included bill language, as requested by the administration, to specify that funds in this account are available for these purposes. The Committee notes that this amount, coupled with the \$170,500,000 provided in the State and Tribal Assistance Grants accounts, makes \$200,000,000 available in fiscal year 2003 for implementation of the Small Business Liability Relief and Brownfields Revitalization Act of 2002.

Enforcement.—The Committee is deeply concerned that the Agency's implementation of fiscal year 2002 enforcement funding has been inconsistent with the Committee's direction. Specifically, the fiscal year 2002 VA-HUD conference report rejected proposed cuts to enforcement, and directed the Agency to restore enforcement funding in a manner consistent with the fiscal year 2001 operating plan. Instead, the Agency has redirected 30 civil enforcement FTE to the criminal enforcement program. The Agency asserts that the conference directive occurred prior to management's understanding of the full scope and role of the EPA's participation in criminal enforcement efforts associated with homeland security. The Committee recognizes and appreciates the vital investigative expertise of EPA's criminal enforcement program—that is why the Committee also provided an additional \$6,000,000 in fiscal year 2002 supplemental funds to assist the Agency's increased response to terrorism in the area of criminal investigations. Instead, the Agency has planned to spend this funding on other homeland security related priorities that the Committee did not intend to fund. The Committee maintains that any increase in criminal enforcement activities necessary should

be funded through these additional supplemental funds, not at the expense of other important enforcement functions. Therefore, the Committee directs the Agency to halt the redirection of enforcement positions from civil to criminal activities, to restore civil enforcement funding to not less than the 2001 level. The Committee notes that the Agency submitted a report responding to this directive, and further directs the Agency to report to the Committee no later than February 3, 2003, on how the Agency has accomplished this directive. Additionally, the Committee continues to be concerned about the vacancy rate in the Office of Enforcement and Compliance (OECA), where over 100 FTE positions are unfilled. The Committee directs the Agency to report by February 3, 2003, with an aggressive plan to fill and retain these vacancies.

Chromated copper arsenate (CCA).—The Committee continues to be concerned about whether there are significant health and safety risks related to CCA-treated consumer products, including playground equipment, decks, picnic tables, walkways/boardwalks, landscaping timers and fences. In a February 2002 report required by the Committee, EPA informed the Committee that the Agency is currently conducting a risk assessment of CCA-treated consumer products. The Committee directs the Agency to accelerate the schedule for this risk assessment and to complete it by February 3, 2003. The Committee expects this assessment to include concrete findings and conclusions about whether there are significant health and safety risks of CCA-treated wood products. The Committee also expects the assessment to include recommendations on ways to mitigate potential risks, and the Agency's plans to conduct public education to ensure that consumers, local governments, and school systems are aware of potential risks and ways to mitigate them.

Food Quality Protection Act.—The Committee directs EPA to submit to Congress by February 3, 2003, a resource plan detailing the number of pesticide tolerance re-assessments and re-registrations required under FQPA, the number and kind of such activities completed since 1996, the status of the remaining activities, including the projected number to be completed year-by-year under FQPA, and the level of resources needed to meet these deadlines. In estimating resources, EPA should indicate the number of FTEs or contracted activities that would be required for these activities.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$34,019,000
Budget estimate, 2003	35,325,000
Committee recommenda-	

tion 37,325,000

PROGRAM DESCRIPTION

The Office of Inspector General (OIG) provides audit, evaluation, and investigation products and advisory services to improve the performance and integrity of EPA programs and operations.

Trust fund resources are transferred to this account directly from the hazardous substance Superfund.

COMMITTEE RECOMMENDATION

The Committee recommends \$37,325,000 for the Office of Inspector General, \$2,000,000 above the budget request and \$3,306,000 above the fiscal year 2002 level. In addition, \$12,742,000 will be available by transfer from the Superfund account, for a total of \$48,067,000. The trust fund resources will be transferred to the inspector general "General fund" account with an expenditure transfer.

BUILDINGS AND FACILITIES

Appropriations, 2002	\$25,318,000
----------------------------	--------------

Budget estimate, 2003	42,918,000
Committee recommenda-	42,918,000

PROGRAM DESCRIPTION

The appropriation for buildings and facilities at EPA covers the necessary maintenance, and major repairs and improvements to existing installations which are used by the Agency. This appropriation also covers new construction projects when appropriate.

COMMITTEE RECOMMENDATION

The Committee recommends \$42,918,000 for buildings and facilities, \$17,600,000 above the fiscal year 2002 level and the same as the budget request.

The Committee notes that with this appropriation, the Committee has provided a total of \$49,000,000 account-wide in fiscal years 2002 and 2003 for EPA to better secure its offices and laboratory facilities. The Committee directs that by March 31, 2002, the Agency supply an accounting of how these funds have provided a safer working environment for its employees. This report should include a description of activities undertaken at each office or facility.

HAZARDOUS SUBSTANCE SUPERFUND (INCLUDING TRANSFERS OF FUNDS)

Appropriations, 2002	¹ \$1,311,292,000
Budget estimate, 2003	1,272,888,000
Committee recommenda-	

tion 1,272,888,000
¹Includes \$41,292,000 in fiscal year 2002 supplemental funding.

PROGRAM DESCRIPTION

On October 17, 1986, Congress amended the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 [CERCLA] through the Superfund Amendments and Reauthorization Act of 1986 [SARA]. SARA reauthorized and expanded the Hazardous Substance Superfund to address the problems of uncontrolled hazardous waste sites and spills. Specifically, the legislation mandates that EPA: (1) provide emergency response to hazardous waste spills; (2) take emergency action at hazardous waste sites that pose an imminent hazard to public health or environmentally sensitive ecosystems; (3) engage in long-term planning, remedial design, and construction to clean up hazardous waste sites where no financially viable responsible party can be found; (4) take enforcement actions to require responsible private and Federal parties to clean up hazardous waste sites; and (5) take enforcement actions to recover costs where the fund has been used for cleanup. Due to the site-specific nature of the Agency's Superfund program, site-specific travel is not considered part of the overall travel ceiling set for the Superfund account.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,272,888,000 for Superfund, equal to the budget request and \$38,404,000 below the fiscal year 2002 enacted level including supplemental funding. The amount provided includes equal amounts of \$636,444,000 from general revenues.

The Committee recommends the following changes to the budget request:

- + \$25,000,000 for response, for a total response level of \$856,900,000.
- \$25,000,000 for building decontamination research. The Committee commends EPA for its leadership role in anthrax decontamination of the Capitol complex, and supports the Agency's increased efforts in developing new technologies to decontaminate buildings from future re-

leases of chemical and biological substances. However, the Committee is concerned that the budget proposed to fund this initiative at the expense of core Superfund cleanup activities. The Committee notes that this reduction will result in a total of \$50,000,000 for EPA's building decontamination research initiative for fiscal year 2003.

The Committee does not recommend the past practice of delaying the availability of Superfund resources until later in the year.

LEAKING UNDERGROUND STORAGE TANK TRUST FUND

Appropriations, 2002	\$73,000,000
Budget estimate, 2003	72,313,000
Committee recommenda-	

tion 72,313,000

PROGRAM DESCRIPTION

The Superfund Amendments and Reauthorizations Act of 1986 [SARA] established the leaking underground storage tank [LUST] trust fund to conduct corrective actions for releases from leaking underground storage tanks containing petroleum and other hazardous substances. EPA implements the LUST program through State cooperative agreement grants which enable States to conduct corrective actions to protect human health and the environment, and through non-State entities including Indian tribes under section 8001 of RCRA. The trust fund is also used to enforce responsible parties to finance corrective actions and to recover expended funds used to clean up abandoned tanks.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$72,313,000 for the Leaking Underground Storage Tank Trust Fund, a decrease of \$687,000 below the fiscal year 2002 enacted level. The Committee directs that not less than 85 percent of these funds be provided to the States and tribal governments.

OIL SPILL RESPONSE

Appropriations, 2002	\$15,000,000
Budget estimate, 2003	15,581,000
Committee recommenda-	

tion 15,581,000

PROGRAM DESCRIPTION

This appropriation, authorized by the Federal Water Pollution Control Act of 1987 and amended by the Oil Pollution Act of 1990, provides funds to prepare for and prevent releases of oil and other petroleum products in navigable waterways. Also EPA is reimbursed for incident specific response costs through the Oil Spill Liability Trust Fund managed by the United States Coast Guard. EPA is responsible for: directing all cleanup and removal activities posing a threat to public health and the environment; conducting site inspections, including compelling responsible parties to undertake cleanup actions; reviewing containment plans at facilities; reviewing area contingency plans; pursuing cost recovery of fund-financed cleanups; and conducting research of oil cleanup techniques. Funds for this appropriation are provided through the Oilspill Liability Trust Fund which is composed of fees and collections made through provisions of the Oil Pollution Act of 1990, the Comprehensive Oil Pollution Liability and Compensation Act, the Deepwater Port Act of 1974, the Outer Continental Shelf Lands Act Amendments of 1978, and the Federal Water Pollution Control Act as amended. Pursuant to law, the Trust Fund is managed by the United States Coast Guard.

COMMITTEE RECOMMENDATION

The Committee recommends \$15,581,000 for the oil spill response trust fund, \$581,000

above the fiscal year 2002 enacted and the level budget request.

STATE AND TRIBAL ASSISTANCE GRANTS
 Appropriations, 2002 ¹\$3,738,276,000
 Budget estimate, 2003 3,463,776,000
 Committee recommendation 3,920,639,000

¹ Includes \$5,000,000 in fiscal year 2002 supplemental funding.

PROGRAM DESCRIPTION

The "State and tribal assistance grants" account funds grants to support the State revolving fund programs; State, tribal, regional, and local environmental programs; and special projects to address critical water and waste water treatment needs.

Included in this account are funds for the following infrastructure grant programs: Clean Water and Drinking Water State Revolving Funds; United States-Mexico Border Program; Alaska Native villages; and Brownfield assessment and revitalization grants.

It also contains the following environmental grants, State/tribal program grants, and assistance and capacity building grants: (1) nonpoint source (sec. 319 of the Federal Water Pollution Control Act); (2) water quality cooperative agreements (sec. 104(b)(3) of FWPRA); (3) public water system supervision; (4) air resource assistance to State, regional, local, and tribal governments (secs. 105 and 103 of the Clean Air Act); (5) radon State grants; (6) water pollution control agency resource supplementation (sec. 106 of the FWPRA); (7) wetlands State program development; (8) underground injection control; (9) Pesticides Program implementation; (10) lead grants; (11) hazardous waste financial assistance; (12) pesticides enforcement grants; (13) pollution prevention; (14) toxic substances compliance; (15) Indians general assistance grants; (16) underground storage tanks; (17) enforcement and compliance assurance; (18) BEACHES Protection grants (sec. 406 of FWPRA as amended); and (19) PWSS State Counter-terrorism Coordinator grants; (20) Brownfields cleanup grants; (21) targeted watershed grants; and (22) pesticides enforcement. As with the case in past fiscal years, no reprogramming requests associated with States and Tribes applying for Performance Partnership Grants need to be submitted to the Committee for approval should such grants exceed the normal reprogramming limitations.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$3,920,639,000 for State and tribal assistance grants, an increase of \$456,863,000 over the budget request and an increase of \$187,363,000 above the fiscal year 2002 enacted level.

The Committee recommends the following changes to the budget request:

+ \$213,000,000 for the Clean Water State Revolving Loan Fund, for a total of \$1,425,000,000. This amount is \$75,000,000 above the 2002 level.

+ \$25,000,000 for the Drinking Water State Revolving Fund, for a total of \$875,000,000. This amount is \$25,000,000 above the 2002 level.

+ \$3,459,900 for Section 103 and 105 State and Local Assistance grants, for a total of \$225,000,000.

+ \$12,100,000 for the Section 106 State Pollution Control Grant Program, which includes support for State Total Maximum Daily Load programs, for a total program level of \$192,477,000. This amount is equal to the 2002 level.

+ 5,000,000 for Alaska Native Villages, for a total of \$45,000,000.

+ \$3,000,000 for remediation of above ground leaking fuel tanks in Alaska as authorized by Public Law 106-554.

— \$15,000,000 for State Multimedia Enforcement Grants. Instead, the Committee has recommended increased funding for Federal enforcement activities in the Environmental Programs and Management account.

— \$25,000,000 for Information Exchange Network grants. The Committee supports the Agency's efforts to build an internet-based system that will enable environmental information exchanges among States, tribes, localities, the regulated community, the public and the Agency. In fiscal year 2002, the Committee provided \$25,000,000 for these grants, which the Committee understands will be awarded late in fiscal year 2002 and should be sufficient to cover State needs for fiscal year 2003. Instead, the Committee has provided only the requested \$20,157,000, which includes \$3,100,000 in Superfund and \$17,057,000 in EPM, for the Agency's component of the information integration project.

— \$8,000,000 for Homestake Mine.

— \$10,000,000 for targeted watershed grants, for a total of \$11,000,000 for this new program, which includes \$10,000,000 within the STAG account and \$1,000,000 in EPM.

+ \$140,000,000 for special needs infrastructure grants. This amount is to be reduced by 10 percent by reducing each grant by 10 percent. This amount, together with an additional \$2,241,450 previously made available in fiscal year 2000, is to be allocated in the following manner:

\$885,000 for Washoe County, Nevada for the Spanish Valley Nitrate Remediation Pilot Program;

\$875,000 for the Orleans Parish Sewer and Water Board, New Orleans, Louisiana, for an inflow and infiltration project;

\$875,000 for East Baton Rouge Parish, Louisiana, for water and wastewater infrastructure improvements;

\$770,000 for the Mason County Public Utility District, Washington to construct a wastewater and collection facility in Hoodsport, Washington;

\$750,000 for the Village of Pomeroy, Ohio for the construction of an iron and manganese removal water treatment plant;

\$875,000 for the City of Lake Charles, Louisiana, for wastewater treatment plant improvements;

\$2,000,000 for South and North Valley of Albuquerque and Bernalillo County, New Mexico, for water and wastewater treatment;

\$2,000,000 for San Antonio, Texas for water and sewer improvements;

\$2,000,000 for Flowood, Mississippi for the Hogg Creek Interceptor System;

\$1,850,000 for the City of Cynthiana, Kentucky for the Cynthiana Water Treatment Plant;

\$1,800,000 for the Palmer, Alaska for a water main;

\$1,700,000 to Kansas City, Missouri for the water component of the Beacon Hill Redevelopment Plan;

\$875,000 for Jefferson Parish, Louisiana, for sewer infrastructure improvements;

\$750,000 for the Village of Belmont, Ohio for the construction of a wastewater treatment plant and collection system;

\$750,000 for the County of Nassau, New York for water quality infra-

structure improvements at Nassau County Park facilities;

\$750,000 for the City of Van Wert, Ohio for the expansion of the reservoir;

\$750,000 for the City of Huntington Beach, California for the Alabama Storm Drain project;

\$750,000 for the City of Compton, California, for a water well replacement project;

\$750,000 for the City of Centerville, South Dakota, for drinking water infrastructure improvements;

\$575,000 for the Alabama Rural Utilities Authority for remedial on-site and collective wastewater treatment systems in Lowndes County, Alabama;

\$550,000 for the State of Hawaii Health Department, for cesspool system replacement;

\$550,000 for the City of Hood River, Oregon, drinking water infrastructure improvements;

\$500,000 to Dudley, Missouri for the City Water Expansion Project;

\$500,000 for Wrangell, Alaska for sewer expansion;

\$1,000,000 for the Town of Bridgeville, Delaware, for wastewater treatment plant improvements;

\$1,000,000 for the Sisseton-Wahpeton Sioux Tribe in Agency Village, South Dakota, for the expansion of the Brown Marshall Day Water System;

\$1,000,000 for the Mount Pleasant Waterworks Commission, South Carolina, for the Snowden Community Wastewater Collection Project;

\$1,000,000 for the Fairbanks City, Alaska sewer and storm drain connection;

\$1,000,000 for the Coolin Sewer District in Idaho for a wastewater facility upgrade project;

\$500,000 for Vinalhaven, Maine for its sewer system;

\$500,000 for Vigo County, Indiana for the Sugar Creek Township Sanitary Sewer Project;

\$500,000 for the Village of Port Byron, Illinois for drinking water improvements;

\$500,000 for the Township of Vernon, New Jersey, for wastewater improvement;

\$500,000 for the Town of Robbins, North Carolina, for water treatment plant improvements;

\$600,000 for the Pawtucket Water Supply Board for the purchase of the City of Central Falls Water Distribution System;

\$200,000 for water and sewer improvements in Morgantown, North Carolina;

\$150,000 for water and sewer improvements in Albermarle, North Carolina;

\$200,000 for water and sewer improvements in Gastonia, North Carolina;

\$50,000 for water and sewer improvements in Valdese, North Carolina;

- \$500,000 for the Town of Coventry, Rhode Island, for drinking water infrastructure improvements;
- \$500,000 for the Northeast Public Sewer District, Missouri for the Old Highway 141 Collection System;
- \$1,000,000 for the City of Akron, Ohio for sewer infrastructure improvements;
- \$1,000,000 for Meridian, Mississippi for wastewater improvements;
- \$1,000,000 for Jackson, Mississippi for water infrastructure improvements;
- \$1,000,000 for the Upper and Lower River Road Water and Sewer District, Montana for wastewater infrastructure improvements;
- \$1,000,000 for Fayette, Mississippi for Jefferson County water and sewer improvements project;
- \$500,000 for the Kodiak, Alaska for water and sewer upgrades;
- \$500,000 for the Holland Regional Water System in Effingham, Illinois for a water treatment facility to improve regional drinking water;
- \$500,000 for the Glaize Creek Public Sewer District, Missouri for the Barnhart Subdivisions Project;
- \$500,000 for the Fairfax County Water Authority, Virginia for infrastructure enhancements;
- \$500,000 for the City of Wilmington, Illinois to develop a new wastewater facility;
- \$500,000 for the City of Whittier, California, for water and sewer infrastructure improvements;
- \$500,000 for the City of West Liberty, Iowa, for wastewater treatment improvements;
- \$500,000 for the City of Shelton, Washington for design and construction of the Shelton Area Regional Water and Sewer Project;
- \$500,000 for the City of Sacramento, California, for Combined Sewer System Improvement and Rehabilitation Project;
- \$500,000 for the City of Pevely, Missouri, for wastewater treatment plant improvements;
- \$500,000 for the City of Omaha, Nebraska, for sewer separation construction;
- \$500,000 for the City of Moline, Illinois for drinking water improvements;
- \$500,000 for the City of Middletown, New York for the City of Middletown Filtration Plant;
- \$500,000 for the City of Huron, South Dakota, for drinking water infrastructure improvements;
- \$500,000 for the City of Georgetown, Illinois for drinking water improvements;
- \$500,000 for the City of Gallup, New Mexico, for wastewater treatment plant improvements and upgrades;
- \$500,000 for the City of Galena, Illinois to expand and improve wastewater facilities;
- \$500,000 for the City of Flint, Michigan to upgrade the Pierson Road water main system;
- \$500,000 for the City of Fayetteville, Arkansas for regional wastewater system improvements;
- \$500,000 for the City of Eureka, California, for the Martin Slough Interceptor project;
- \$500,000 for the City of Alexandria, Virginia for wastewater treatment facility upgrades;
- \$500,000 for the City and County of Honolulu, Hawaii, for wastewater treatment technologies;
- \$500,000 for Sumiton, Alabama for the Sumiton Sanitary Sewer System;
- \$500,000 for Saco, Maine for its sewer system; \$500,000 for Latimer, Kansas for a pipeline project;
- \$500,000 for Lake County, California, for the Clear Lake Basin 2000 project;
- \$500,000 for Box Elder, South Dakota, for water and wastewater system improvements;
- \$500,000 for Berry, Alabama for the construction of a new sanitary wastewater lagoon system;
- \$500,000 for Augusta, Maine for its sewer system;
- \$500,000 for a water supply project in Guin, Alabama;
- \$450,000 to Bolivar, Missouri for the Bolivar Industrial Park Sewer and Water System;
- \$450,000 for Talladega, Alabama for county water supply facilities upgrades and construction;
- \$400,000 for the City of Deadwood, South Dakota, for a drinking water extension project;
- \$400,000 for Mountain Village, Colorado for water infrastructure investment;
- \$4,000,000 for Baltimore City, Maryland, for sewer infrastructure improvements;
- \$350,000 to Warrenton, Missouri for the Warrenton Industrial Park Lift Station;
- \$350,000 for the Community of Dakota Dunes, South Dakota, for a drinking water infrastructure connection project;
- \$325,000 for the Town of Notasulga, Alabama for the Notasulga Wastewater System;
- \$300,000 for Tillamook, Oregon for infrastructure;
- \$300,000 for the Albany-Millersburg Joint Water Project in Oregon;
- \$300,000 for Muscle Shoals, Alabama for a wastewater project;
- \$300,000 for Mountain Village, Colorado for remediation of above-ground storage tanks;
- \$250,000 to Warrensburg, Missouri for the water component of the Warrensburg Downtown Revitalization Project;
- \$250,000 for the Wahkiakum County Public Utility District, Washington for the Puget Island Drinking Water Project;
- \$250,000 for the United Water Conservation District of Ventura County, California, for the Oxnard Plain Groundwater Recharge Project;
- \$250,000 for the Metropolitan Wastewater Management Commission,
- Eugene and Springfield, Oregon, drinking and wastewater improvements;
- \$250,000 for the Community Water System Public Water Authority of Arkansas in Lonoke and White Counties for the Green Ferry drinking water project;
- \$250,000 for the City of St. George, Utah for water and sewer line extensions;
- \$250,000 for the City of South Salt Lake, Utah for water infrastructure improvements;
- \$250,000 for the City of Filer, Idaho for a new drinking water system;
- \$250,000 for Park City, Utah for the Judge Tunnel Water Treatment Facility;
- \$200,000 for Eva, Alabama for a sewer system project;
- \$2,500,000 for the Narragansett Bay Commission in Providence and other Bay communities in Rhode Island for sewer infrastructure improvements;
- \$2,500,000 for the City of Mason City, Iowa, for the Municipal Water System Radium Removal Project;
- \$2,500,000 for Monticello, Utah for a primary water supply pipeline;
- \$2,000,000 to Joplin, Missouri for the Crossroads Relief Sewer #2 and Sewer Extension Project;
- \$2,000,000 for the Three Rivers Wet Weather Demonstration Program, Allegheny County, Pennsylvania to fund several innovative demonstration projects in municipalities in the greater Pittsburgh area to plan, design, and construct projects to eliminate separate sewer overflows;
- \$2,000,000 for the Maryland Department of Environment for Woodland Village sewer and water improvements;
- \$2,000,000 for the City of Park River, North Dakota for the Park River Water System Improvements;
- \$2,000,000 for the City of Milwaukee, Wisconsin for the Central Metropolitan Interceptor Improvement Project;
- \$2,000,000 for the City of Atlanta, Georgia for the Nancy Creek sewer infrastructure improvement project;
- \$1,700,000 for the Champlain Water District, Vermont, for Chittenden County stormwater infrastructure improvements;
- \$500,000 for the Durango Water Treatment Facility in Durango, Colorado
- \$1,650,000 for the Town of Klickitat, Washington, to construct a new wastewater water treatment facility;
- \$1,600,000 for Brownsville District Sewer Development, Colorado for water and wastewater investments;
- \$1,500,000 to Monett, Missouri for the Monett Sewer Treatment Plant Upgrade;

\$1,500,000 for the Town of Warren, Vermont, for wastewater treatment facility upgrades;

\$1,500,000 for the City of Safford, Arizona for wastewater treatment plant construction;

\$1,500,000 for the City of Norman, Oklahoma for wastewater system improvements;

\$1,500,000 for the City of Lead, South Dakota, for water and wastewater system improvements;

\$1,500,000 for the City of Franklin, Tennessee for water quality improvements;

\$1,500,000 for the City of Conrad, Montana for a wastewater and drinking water project;

\$1,500,000 for the City of Belgrade, Montana, for wastewater treatment;

\$1,500,000 for the Camden County Municipal Authority, New Jersey, for sewer infrastructure improvements;

\$1,500,000 for Nacogdoches, Texas for the development of a water and sewer drainage system;

\$1,500,000 for Missoula, Montana for the Mullan Road Corridor Project;

\$1,300,000 for the Town of Richmond, Vermont, for wastewater treatment facility upgrades;

\$1,250,000 for South Florida Water Management District Tri-County (Palm Beach, Martin and St. Lucie Counties) Biosolids Project;

\$1,250,000 for Eastern Orange and Seminole Counties, Florida, for the Regional Reuse Project;

\$1,200,000 for the Anchorage Water and Wastewater Utility for the development of a water and sewer facility in Anchorage, Alaska;

\$1,100,000 for the City of Fallon, Nevada, for construction of an arsenic treatment facility;

\$1,000,000 to the Eastern Snyder County Regional Authority in Pennsylvania to upgrade its wastewater treatment plant, including replacing equipment, improving the treatment system, and installing new technology for nutrient removal, in order to improve the water quality of the Chesapeake Bay;

\$700,000 for Virgin Valley Water District, Mesquite, Nevada, for construction of an arsenic treatment facility;

\$1,000,000 for Upper Allen Township, Cumberland County, Pennsylvania to increase sewer treatment capacity by repairing inflow and infiltration problems in older sections of the collection system, divert sewage to a treatment plant, and install new sanitary sewer collection system extensions to replace malfunctioning on-lot disposal systems;

\$1,000,000 for the Wasilla, Alaska for water and sewer improvements;

\$1,000,000 for the Town of Harrington, Delaware, for waste-

water treatment plant improvements;

\$1,000,000 for the Pioneer Valley Planning Commission in West Springfield, Massachusetts, for combined sewer overflow improvements;

\$1,000,000 for the Commission of Public Works of the City of Charleston, South Carolina, for wastewater tunnel replacement;

\$1,000,000 for the City of Saginaw, Michigan, for sewer infrastructure improvements;

\$1,000,000 for the City of Racine, Wisconsin for the Racine Advanced Water Treatment System;

\$1,000,000 for the City of Port Huron, Michigan, for sewer infrastructure improvements;

\$1,000,000 for the City of New Britain, Connecticut for the New Britain Water Filtration Replacement Project;

\$1,000,000 for the City of Nashua, New Hampshire to upgrade the waste water treatment system;

\$1,000,000 for the City of Manchester, New Hampshire to assist in the water treatment plant upgrade and renovation;

\$1,000,000 for the City of Greenville, South Carolina, for water and sewer infrastructure related to the Greenline-Spartanburg Neighborhood Redevelopment Project;

\$750,000 for the City of Bancroft, Idaho for water system upgrades;

\$750,000 for Morristown, Ohio for a sanitary sewer collection system;

\$750,000 for Blanding, Utah for water infrastructure improvements;

\$300,000 for the City of Las Vegas, Nevada, sewer replacement project;

\$650,000 for the City of Sebree, Kentucky for the City of Sebree Sewer project,

\$650,000 for Autauga County, Alabama for a sewer infrastructure construction project;

\$600,000 for the Gold Hill, Oregon for a water intake relocation project;

\$580,000 for the City of Richland, Washington, for wastewater infrastructure improvements;

\$1,000,000 for the City of Grafton, North Dakota for the Grafton Water Treatment Plant Improvement;

\$1,000,000 for the City of Española, New Mexico for water and wastewater treatment;

\$1,000,000 for the City of Clay, Kentucky for the Clay Sewer project;

\$1,000,000 for the City of Burley, Idaho for improvements to the wastewater treatment system;

\$1,000,000 for the City of Berlin, New Hampshire to assist in construction of water delivery infrastructure;

\$1,000,000 for Eastern Calhoun County, Michigan, for regional wastewater treatment infrastructure improvements;

\$1,000,000 for Corinna, Maine for its sewer system;

\$1,000,000 for Bristol County, Massachusetts, for sewer infrastructure improvements;

\$1,000,000 for Alamogordo, New Mexico for the Alamogordo Regional Desalination Project.

Of the amount provided for high priority water and wastewater facilities in the area of the United States-Mexico border, the Committee intends \$4,000,000 for the El Paso-Las Cruces Sustainable Water Project and \$2,000,000 for the Brownsville water supply project.

EPA is to work with the grant recipients on appropriate cost-share arrangements consistent with past practice.

In addition, the Committee recommends the budget request for the following programs: BEACH grants (\$10,000,000); Section 319 non-point source pollution grants (\$238,476,800); United States-Mexico Border (\$75,000,000); the Indian General Assistance Program (\$57,469,700); and Brownfields infrastructure projects and grants (\$170,500,000). The Committee notes that this amount, along with \$29,500,000 provided in the Environmental Programs and Management account, brings total funding for Brownfields activities to \$200,000,000 for fiscal year 2003.

The Committee has included bill language, as carried in previous appropriations acts, to clarify that drinking water health effects studies are to be funded through the science and technology account.

The Committee has also included bill language, as requested by the administration and as carried in previous appropriations acts, to: (1) extend for an additional year the authority for States to transfer funds between the Clean Water SRF and the Drinking Water SRF; (2) waive the 1.5 percent cap on the Tribal set aside from non-point source grants; (3) increase to 1.5 percent the cap on the Tribal set-aside for the Clean Water SRF; and (4) require that any funds provided to address the water infrastructure needs of colonias within the United States along the United States-Mexico border be spent only in areas where the local governmental entity has established an enforceable ordinance or rule which prevents additional development within colonias that lacks water, wastewater, or other necessary infrastructure.

Finally, the Committee has included bill language making a technical correction to a grant provided to the City of Welch, West Virginia, in fiscal year 2000.

ADMINISTRATIVE PROVISIONS

Cooperative Agreements with Tribes.—The Committee has included bill language, as proposed in the budget request and as carried in previous appropriations acts, permitting EPA, in carrying out environmental programs required or authorized by law in the absence of an acceptable tribal program, to use cooperative agreements with federally-recognized tribes and inter-tribal consortia.

Pesticide Tolerance Processing Fees.—The Committee has included a provision prohibiting the Agency from collecting pesticide tolerance processing fees as envisioned in the proposed rule issued on June 9, 1999. The budget request assumes that in 2003, EPA will have available to spend approximately \$25,000,000 in both retroactive and current fees based on this proposed rule. However, the Committee notes that the conference agreement on the Farm Bill (H. Rpt. 107-424, page 666) questioned the legal basis of this proposed rule, and strongly encouraged the EPA to withdraw the proposed rule and work with the appropriate House and Senate oversight Committees to develop comprehensive pesticide user fee legislation. Because of this lack of consensus on the tolerance processing fee, the Committee believes it would be irresponsible to assume the availability of

any funding for the Agency under this proposed rule, as the budget request does. Furthermore, the Committee believes that making such an assumption would leave the Agency without sufficient funding to run its pesticides programs, which would ultimately result in reductions to other important core environmental activities to pay the approximately 200 FTE in the pesticides programs. Therefore, to ensure that that Agency has sufficient funding to run its pesticide programs, the Committee has also included provisions to extend the pesticide maintenance fee for an additional year, including the collection of up to \$23,200,000 for operation of the registration, re-registration, and tolerance assessment programs. The Committee notes that these provisions are similar to provisions included in the fiscal year 2002 VA-HUD conference agreement. Furthermore, the Committee stresses that it recommends these actions for one additional year only in order to allow for the development of a consensus proposal for all pesticide fees, and notes that it has directed the Agency to issue a final pesticide tolerance processing fee rule, exclusive of retroactivity, no later than September 3, 2003. The Committee expects these issues to be resolved for the fiscal year 2004 budget cycle, and does not intend to include this or any similar stop-gap measure as part of the fiscal year 2004 bill.

EXECUTIVE OFFICE OF THE PRESIDENT

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Appropriations, 2002	\$5,267,000
Budget estimate, 2003	5,368,000
Committee recommendation	5,368,000

PROGRAM DESCRIPTION

The Office of Science and Technology Policy [OSTP] was created by the National Science and Technology Policy, Organization, and Priorities Act of 1976 (Public Law 94-238) and coordinates science and technology policy for the White House. OSTP provides authoritative scientific and technological information, analysis, and advice for the President, for the executive branch, and for Congress; participates in formulation, coordination, and implementation of national and international policies and programs that involve science and technology; maintains and promotes the health and vitality of the U.S. science and technology infrastructure; and coordinates research and development efforts of the Federal Government to maximize the return on the public's investment in science and technology and to ensure Federal resources are used efficiently and appropriately.

OSTP provides support for the National Science and Technology Council [NSTC].

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of \$5,368,000 for the Office of Science and Technology Policy. This represents an increase of \$101,000 or 1.9 percent over the fiscal year 2002 level.

The Committee supports the administration's interagency initiatives in nanoscience and engineering and information technology research. These are cutting-edge interagency programs that are important for the long term health of the Nation. In the area of nanotechnology, the National Academy of Sciences has made a number of recommendations that would strengthen the interagency National Nanotechnology Initiative (NNI). The Committee urges OSTP to give serious consideration to the Academy's recommendations. The Committee is particularly supportive of the recommendation for an independent advisory council, modeled after the one used for the information technology initiative. The Committee views such outside advice as vital to help focus the

interagency program on critically important challenges. The Committee also supports the recommendation calling for increased interagency investments in areas related to nanotechnology and the life sciences. It is already apparent that applications of nanotechnology can have significant impacts in disease diagnosis and treatment. Accordingly, the Committee calls on OSTP to ensure the active participation of the National Institutes of Health in this interagency research initiative.

The Committee is concerned with recent changes made in the administration's interagency global change research program. It is vital this interagency program be based on a broad, well-balanced research agenda, focused on both short-term and long-term needs and questions, and implemented using an open peer review process to ensure scientific excellence. The Committee believes that the Science Advisor must play the lead role in the Federal Government's global environmental research program to ensure scientific excellence is maintained. OSTP is requested to provide the Committee with a progress report on this matter by February 3, 2003.

The Committee believes that the deployment of next-generation broadband networking infrastructure will stimulate cutting edge research activities, create jobs, increase productivity, and improve our quality of life. With appropriate support from the Federal Government, the research community can develop innovative last-mile technologies, cutting-edge, high-bandwidth applications such as telepresence, and advances in wide-area networking technologies. The Committee urges OSTP to expeditiously re-establish the Presidential Information Technology Advisory Committee (PITAC), and as part of their work, request PITAC to develop a proposal to support research into applications that will stimulate and promote ubiquitous broadband deployment.

The Committee remains concerned about the balance among fields in the Federal research portfolio, particularly as it relates to the physical sciences and engineering. Advances in the biomedical area are dependent on progress in such areas as physics, chemistry, electrical engineering, and chemical engineering. However, progress in these fields is being hindered by funding shortfalls. Therefore, the Committee directs the Science Advisor, in conjunction with the Presidential Council of Advisors on Science and Technology (PCAST), to develop an action plan to address this issue as a part of the fiscal year 2004 budget proposal.

The Committee is concerned that too few U.S. students are pursuing undergraduate and advanced degrees in science and engineering to meet the Nation's workforce needs. The Committee recognizes that for advanced education to be effective, it must be pursued at colleges and universities with active research programs. The NSF, NASA, and other agencies are in a unique position to help ensure that our universities are well positioned to meet the Nation's needs. The Committee believes that an overarching Federal strategy should be developed. OSTP, in cooperation with the National Science and Technology Council (NSTC) and the Nation's colleges and universities, is urged to develop a comprehensive strategy to increase the number of students pursuing degrees in science and engineering. The plan should include means to increase the number of university research and educational groups, to increase the number of new, young faculty; to build cooperative relationships between universities and the various Federal agencies; and means for attracting and supporting undergraduate and graduate students. The plan should be submitted to the Committee by March 15, 2003.

The Committee is concerned about the health of the infrastructure needed for a 21st century oceans research program, including ships, observatories and related data processing and communication capabilities. In December 2001 the Federal Oceanographic Facilities Committee reported to the National Ocean Research Leadership Council on a long range plan for the renewal of the academic research fleet. In addition, last year this Committee asked OSTP, on behalf of the administration, to develop an interagency plan for an ocean observing system. The administration's plans for fleet renewal and ocean observatories have not yet been submitted to the Committee. Nevertheless, the Committee believes OSTP should coordinate with the NORLC to exert leadership among the agencies with research responsibilities related to the oceans. Moving ahead with the modernization of the Nation's oceanographic infrastructure should be a critical priority for the administration. Therefore, the Committee directs OSTP to submit a report with recommendations and management options on the establishment of an oceans infrastructure modernization fund. Such a fund could be established in one or more agencies to be used to address issues related to modernizing the ocean research fleet, establishing an integrated ocean observation system, acquiring related instrumentation and equipment, and for other related purposes. This report should be submitted to the Committee on Appropriations by April 7, 2003.

The Committee is concerned about the long term health of this country's semi-conductor manufacturing capabilities. Other nations are moving aggressively to build up their own capabilities and this has clear implications for U.S. national and economic security. The Committee directs OSTP to assemble an interagency committee involving the defense, intelligence and civilian science and technology agencies to assess the current state and the public policy implications of future directions in semi-conductor manufacturing capabilities. This report should make recommendations to the Congress on the options available to retain a substantial manufacturing capability in the United States. In addition, the report should also include measures to ensure the domestic retention of a world class semi-conductor R&D and design capability. This report should be submitted to the Committee by June 30, 2003.

COUNCIL ON ENVIRONMENTAL QUALITY AND

OFFICE OF ENVIRONMENTAL QUALITY

Appropriations, 2002	\$2,974,000
Budget estimate, 2003	3,031,000
Committee recommendation	3,031,000

PROGRAM DESCRIPTION

The Council on Environmental Quality/Office of Environmental Quality was established by the National Environmental Policy Act and the Environmental Quality Improvement Act of 1970. The Council serves as a source of environmental expertise and policy analysis for the White House, Executive Office of the President agencies, and other Federal agencies. CEQ promulgates regulations binding on all Federal agencies to implement the procedural provisions of the National Environmental Policy Act and resolves interagency environmental disputes informally and through issuance of findings and recommendations.

COMMITTEE RECOMMENDATION

The Committee has provided \$3,031,000 for the Council on Environmental Quality, an increase of \$57,000 above the fiscal year 2002 enacted level and equal to the budget request. The Committee directs CEQ to provide quarterly reports on all ongoing activities, including use of detailees and agency representatives.

FEDERAL DEPOSIT INSURANCE CORPORATION OFFICE OF INSPECTOR GENERAL	
Appropriations, 2002	\$33,660,000
Budget estimate, 2003	30,848,000
Committee recommendation	30,848,000

PROGRAM DESCRIPTION

Prior to 1998, the FDIC inspector general's budgets have been approved by the FDIC's Board of Directors from deposit insurance funds as part of FDIC's annual operating budget that is proposed by the FDIC Chairman. A separate appropriation more effectively ensures the independence of the OIG.

COMMITTEE RECOMMENDATION

The Committee recommends \$30,848,000 for the FDIC inspector general, \$2,812,000 less than the 2002 enacted level and the same as the budget request. Funds are to be derived by transfer from the bank insurance fund, the savings association insurance fund, and the FSLIC resolution fund.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Appropriations, 2002	\$7,555,546,000
Budget estimate, 2003	6,441,846,000
Committee recommendation	3,203,117,000

GENERAL DESCRIPTION

FEMA is responsible for coordinating Federal efforts to reduce the loss of life and property through a comprehensive risk-based, all hazards emergency management program of mitigation, preparedness, response, and recovery.

COMMITTEE RECOMMENDATION

The Committee recommends \$3,203,117,000 for the Federal Emergency Management Agency. This appropriation provides funding for disaster relief, emergency management planning, emergency food and shelter and the Inspector General.

DISASTER RELIEF**(INCLUDING TRANSFER OF FUNDS)**

Appropriations, 2002	\$6,520,871,000
Budget estimate, 2003	1,842,843,000
Committee recommendation	842,843,000

PROGRAM DESCRIPTION

Through the Disaster Relief Fund (DRF), FEMA provides a significant portion of the total Federal response to victims in Presidential declared major disasters and emergencies. Major disasters are declared when a State requests Federal assistance and has proven that a given disaster is beyond the State's capacity to respond. Under the DRF, FEMA provides three main types of assistance: individual and family assistance; public assistance, which includes the repair and reconstruction of State, local and non-profit infrastructure; and hazard mitigation.

COMMITTEE RECOMMENDATION

The Committee has provided \$842,843,000 for FEMA disaster relief, which is \$1,000,000,000 below the budget request. These are adequate funds to meet all current needs. If there are additional needs, these will be addressed when the Committee considers supplemental appropriations.

DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT**(LIMITATION ON DIRECT LOANS)****STATE SHARE LOAN**

	Program account	Administrative expenses
Appropriations, 2002	\$405,000	\$543,000
Budget estimate, 2003	557,000	
Committee recommendation	557,000	

PROGRAM DESCRIPTION

Disaster assistance loans authorized by the Robert T. Stafford Disaster Relief and Emer-

gency Assistance Act 42 U.S.C. 5121 et seq. are loans to States for the non-Federal portion of cost sharing funds and community disaster loans to local governments incurring substantial loss of tax and other revenues as a result of a major disaster. The funds requested for this program include direct loans and a subsidy based on criteria including loan amount and interest charged.

COMMITTEE RECOMMENDATION

For the State Share Loan Program, the Committee has provided \$25,000,000 in loan authority and \$557,000 in administrative expenses.

NATIONAL PRE-DISASTER MITIGATION FUND

Appropriations, 2002	\$300,000,000
Budget estimate, 2003	
Committee recommendation	25,000,000

GENERAL DESCRIPTION

This account supports the new grant program for pre-disaster mitigation. Grants are available through a competitive process to eligible States and local jurisdictions to reduce the risk of future damage in hazard areas and to ultimately reduce the future needs for Federal disaster assistance by encouraging the building of an environment increasingly resistant to the effects of natural hazards.

COMMITTEE RECOMMENDATION

The Committee recommends \$25,000,000 for pre-disaster mitigation. This is \$275,000,000 below the budget request and \$25,000,000 above the fiscal year 2002 enacted level.

SALARIES AND EXPENSES

Appropriations, 2002	\$266,114,000
Budget estimate, 2003	239,690,000
Committee recommendation	239,690,000

PROGRAM DESCRIPTION

This account provides the necessary resources to administer the Agency's various programs at headquarters and in the regions; and the general management and administration of the Agency in legal, congressional, intergovernmental, international, and media affairs, and financial and personnel management, as well as the management of the Agency's facilities.

COMMITTEE RECOMMENDATION

The Committee recommends \$239,690,000 for FEMA salaries and expenses. This is equal to the request and a decrease of \$26,424,000 from the fiscal year 2002 enacted level.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$10,303,000
Budget estimate, 2003	11,549,000
Committee recommendation	17,754,000

PROGRAM DESCRIPTION

This appropriation provides agency-wide audit and investigative functions to identify and correct management and administrative deficiencies, which create conditions for existing or potential instances of fraud, waste, and mismanagement. The audit function provides internal audit, contract audit, and inspection services. Contract audits provide professional advice to agency contracting officials on accounting and financial matters relative to the negotiation, award, administration, repricing, and settlement of contracts. Internal audits review and evaluate all facets of agency operations.

COMMITTEE RECOMMENDATION

The Committee recommends \$17,754,000 for the Office of the Inspector General, an increase of \$7,451,000 above the fiscal year 2002 enacted level.

Bill language has been retained which authorizes the FEMA Inspector General to

serve also as the IG for the Chemical Safety and Hazard Investigation Board.

The Committee has included funding for FEMA to continue to undertake new initiatives to enhance State and local terrorism preparedness and to improve disaster prevention strategies as a response to the terrorist attacks of September 11, 2001. Consequently, additional funds have been recommended to enable the OIG to acquire the necessary staffing and contract support services for the audit, investigation, and inspection of these new initiatives.

The Committee directs the FEMA Inspector General to review the Assistance to Firefighters Grants program to assess the extent to which FEMA is implementing the "maintenance of needs" requirements under to this program. A report is due no later than August 15, 2003.

EMERGENCY MANAGEMENT PLANNING AND ASSISTANCE**(INCLUDING TRANSFER OF FUNDS)**

Appropriations, 2002	\$617,310,000
Budget estimate, 2003	3,747,214,000
Committee recommendation	1,615,214,000

PROGRAM DESCRIPTION

The emergency management planning and assistance appropriation provides resources for the following activities: readiness, response, and recovery; information technology services; fire prevention and training; national preparedness; policy and regional operations; mitigation programs; and executive direction.

COMMITTEE RECOMMENDATION

The Committee recommends \$1,615,214,000 for emergency management planning and assistance. This is an increase of \$997,904,000 above the fiscal year 2002 level and \$2,132,000,000 below the request. Of this amount, \$900,000,000 is for the fire grant program; \$114,000,000 is for interoperable communications equipment for firefighters and EMS personnel; \$75,000,000 is for Urban Search and Rescue Teams; \$75,000,000 is for State and local emergency planning grants; \$114,000,000 is for emergency operations centers; \$15,000,000 is for mutual aid; \$60,000,000 is for emergency responder training; \$15,000,000 is for the CERT program; and \$1,100,000 is for security clearances for State and local emergency management personnel.

Fire Grants.—The Committee has provided \$900,000,000 for the fire grant program, the fully authorized level. This amount is \$540,000,000 above the fiscal year 2002 enacted level. The Committee has provided the fully authorized level of funding for the fire grant program to provide the maximum level of funding directly to the Nation's firefighters. The Committee notes that FEMA has done an exemplary job in administering the program by obligating almost all of the funds within 1 year. Nevertheless, to ensure the continued effective use of these funds, the Committee has made the fiscal year 2003 funding for fire grants available for 2 years instead of 1 year.

Interoperable Communications Equipment.—The Committee has provided \$114,000,000 for grants to firefighters and related emergency medical services for interoperable communications equipment. The Committee urges that grants under this program be used to purchase cost effective solutions which allow entities to make existing communications interoperable such as cross band repeaters, frequency band patching and other network level solutions. In addition, equipment provided under these programs should be compatible with public safety analog ANSI/TIA-603 and/or digital radio ANSI/TIA-102 Standards.

Emergency Operations Centers.—The Committee has included \$114,000,000 for grants to

State emergency operations centers. The Committee is aware that many State and local emergency operation centers are in need of physical and technical improvements to enable them to provide an effective command and control structure in response to large catastrophic disasters as well as acts of terrorism.

Search and Rescue Teams.—The Committee has included \$75,000,000 to upgrade all 28 existing search and rescue teams to ensure that each team has the necessary equipment to respond to any disaster including weapons of mass destruction.

State and Local Planning Grants.—The Committee has provided \$75,000,000 for grants to States to upgrade their State and local emergency operations plans. This funding is provided to ensure that State and local emergency operations plans cover all hazards including natural disasters and weapons of mass destruction. The Committee urges FEMA to work with the Office of Domestic Preparedness to ensure coordination at the State and local level.

Community Emergency Response Teams (CERT).—The Committee has included the budget request of \$15,000,000 for CERT.

Emergency Responder Training.—The Committee has provided \$60,000,000 for emergency responder training. FEMA offers training to local first responders through the U.S. Fire Administration and other institutions to provide first responders with new and improved training procedures and management expertise.

Mutual Aid.—The Committee has included \$15,000,000 to help initiate mutual aid agreements among State and local governments to maximize local resources in the event of a natural disaster or an act of terrorism.

First Responder Training.—The Committee commends the Nation's first responders for their dedicated service to their communities in times of natural or man-made disasters. In 1996, Congress first recognized the potential for terrorist attacks using weapons of mass destruction with the creation of the Nunn-Lugar-Domenici program to train first responders in 120 major U.S. cities. Department of Justice programs continue to prepare first responders for potential terrorist attacks. In addition, FEMA has longstanding experience in consequence management as the primary Federal agency with responsibility for responding to natural and man-made disasters. As FEMA becomes incorporated in the new Department of Homeland Security, the Committee urges that priority be given to maintaining comprehensive and coordinated training programs to best serve our first responders and all America.

In addition, the Committee has included transfer authority of up to 5 percent of the amounts made available for both the fire grant program and for the urban search and rescue task force assistance program (USAR program) for salaries and expenses for the administrative costs associated with these programs. Each program is to be independently administered at the Fire Academy in Emmitsburg, Maryland. In addition, FEMA is directed to administer the new USAR program as a competitive grants program designed to fund fully all training and equipment needs of the existing 28 USAR task forces as well as the administrative costs of these teams. FEMA is expected to issue interim regulations for the USAR program that are published in the Federal Register no later than March 15, 2003.

RADIOLOGICAL EMERGENCY PREPAREDNESS FUND

The Radiological Emergency Preparedness [REP] Program assists State and local governments in the development of offsite radiological emergency preparedness plans within

the emergency planning zones of commercial nuclear power facilities licensed by the Nuclear Regulatory Commission [NRC].

The fund is financed from fees assessed and collected from the NRC licensees to recover the amounts anticipated by FEMA to be obligated in the next fiscal year for expenses related to REP program activities. Estimated collections for fiscal year 2003 are \$347,000.

CERRO GRANDE FIRE GRANTS

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$100,000,000

PROGRAM DESCRIPTION

The Cerro Grande Fire grants program is Federal respond to the failure of the National Park Service to maintain control of a "controlled" burn in New Mexico on May 5, 2000. Under this program, FEMA is tasked to assess the damage from this fire and make reparations.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$100,000,000 to close out this program. This will be adequate to meet all claims by private citizens, at a minimum. While FEMA recently increased the estimate on the costs needed to close out this program to \$155,000,000, the Committee is concerned that this estimate currently is unsubstantiated since neither the FEMA Inspector General nor GAO have finished their audits of the awards. The Committee will consider additional funds after the audits have been completed and may require an additional audit by a private auditor. The Committee also is concerned that the Administration has not submitted a budget amendment nor proposed funding for this program.

EMERGENCY FOOD AND SHELTER PROGRAM

Appropriations, 2002	\$140,000,000
Budget estimate, 2003	¹ 153,000,000
Committee recommendation	153,000,000

¹The fiscal year 2003 budget request proposed to transfer this program to the Department of Housing and Urban Development.

PROGRAM DESCRIPTION

The Emergency Food and Shelter Program originated as a one-time emergency appropriation to combat the effects of high unemployment in the emergency jobs bill (Public Law 98-8) which was enacted in March 1983. It was authorized under title III of the Stewart B. McKinney Homeless Assistance Act of 1987, Public Law 100-177.

The program has been administered by a national board and the majority of the funding has been spent for providing temporary food and shelter for the homeless, participating organizations being restricted by legislation from spending more than 3.5 percent of the funding received for administrative costs.

COMMITTEE RECOMMENDATION

The fiscal year 2003 budget request proposed the transfer of Emergency Food and Shelter program to the Department of Housing and Urban Development. The Committee did not agree with this proposal and has decided to retain the program within FEMA. The Committee recommends \$153,000,000 for the Emergency Food and Shelter Program, the same as the budget request.

FLOOD MAP MODERNIZATION FUND

Appropriations, 2002	
Budget estimate, 2003	\$300,000,000
Committee recommendation	300,000,000

GENERAL DESCRIPTION

This program provides funds to modernize and digitize FEMA's inventory of over 100,000

flood maps. These flood maps are used to determine appropriate risk-based premium rates for the National Flood Insurance Program, complete hazard determinations required for the Nation's lending institutions, and to develop appropriate disaster response plans for Federal, State, and local emergency management personnel.

COMMITTEE RECOMMENDATION

The Committee has provided \$100,000,000 for a new floodplain map modernization program, instead of the budget request of \$300,000,000.

Floodplain mapping, including both new mapping as well as updates of existing floodplain maps, is critical to successful community planning for purposes of mitigation and risk of loss associated with flooding. Unfortunately, much of the floodplain mapping throughout the Nation is out of date and in many cases obsolete. This new program will allow FEMA to move forward in meeting these floodplain mapping needs.

NATIONAL FLOOD INSURANCE FUND

(INCLUDING TRANSFER OF FUNDS)

PROGRAM DESCRIPTION

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities which enact and enforce appropriate flood plain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In 2003, the budget assumes collection of all the administrative and program costs associated with flood insurance activities from policyholders.

Under the Emergency Program, structures in identified flood-prone areas are eligible for limited amounts of coverage at subsidized insurance rates. Under the regular program, studies must be made of different flood risks in flood prone areas to establish actuarial premium rates. These rates are charged for insurance on new construction.

The Committee remains very concerned that FEMA has not taken the necessary steps to ensure the success of the National Flood Insurance program. In particular, participation in the National Flood Insurance is very low in many areas of the country vulnerable to flooding, including areas which have been damaged in the recent past by extreme flooding. In addition, without increased participation, the flood insurance program will continue to suffer large financial losses that cannot be sustained by premiums and are covered instead by borrowing from the United States Treasury. The Committee believes that much of the problem of low participation is the result of inattention to the National Flood Insurance program by FEMA, including decisions that are inconsistent with program requirements and good policy. In particular, the Committee expects FEMA to require all homeowners to obtain flood insurance if they have received assistance in replacing, repairing or restoring property damaged by flooding. Consistent with section 532 of the National Flood Insurance Reform Act of 1994, FEMA is expected to deny flood disaster assistance, including buyout assistance, to any homeowner that has failed to obtain or maintain flood insurance as required by this section.

COMMITTEE RECOMMENDATION

The Committee has included bill language, providing up to \$32,393,000 for administrative costs from the Flood Insurance Program for salaries and expenses. The Committee has also included bill language providing up to

\$77,666,000 for flood mitigation activities including up to \$20,000,000 for expenses under section 1366 of the National Flood Insurance Act.

The bill includes retroactive authority to extend certain authorities under the National Flood Insurance program, including the authority to issue and renew flood insurance policies. These authorities lapsed on January 1, 2003 and these provisions are designed to ensure that FEMA has the authority to maintain the program throughout any lapsed period of time. Without retroactive authority, some 400,000 homeowners risk flood damage without needed financial protection against flooding. It is expected that lenders will continue to process flood insurance policies and collect flood insurance premiums during the lapse.

**NATIONAL FLOOD MITIGATION FUND
(INCLUDING TRANSFER OF FUNDS)**

PROGRAM DESCRIPTION

Through fee-generated funds transferred from the National Flood Insurance Fund, this fund supports activities to eliminate pre-existing, at-risk structures that are repetitively flooded, and provides flood mitigation assistance planning support to States.

COMMITTEE RECOMMENDATION

Through fee-generated funds totaling \$20,000,000 transferred from the National Flood Insurance Fund, the National Flood Mitigation Fund will provide a mechanism to reduce the financial burden of pre-existing, at-risk structures that are repetitively flooded by removing or elevating these structures out of flood hazard areas, as well as provide flood mitigation assistance planning support to States and communities.

**GENERAL SERVICES ADMINISTRATION
FEDERAL CONSUMER INFORMATION CENTER
FUND**

Appropriations, 2002	\$7,276,000
Budget estimate, 2003	12,541,000
Committee recommendation	12,541,000

PROGRAM DESCRIPTION

The Consumer Information Center [CIC] was established within the General Services Administration [GSA] by Executive Order on October 26, 1970, to help Federal departments and agencies promote and distribute consumer information collected as a byproduct of the Government's program activities.

On January 28, 2000, the Consumer Information Center assumed responsibility for the operations of the Federal Information Center [FIC] program with the resulting organization being officially named the Federal Consumer Information Center [FCIC]. The FIC program was established within the General Services Administration in 1966, and was formalized by Public Law 95-491 in 1980. The program's purpose is to provide the public with direct information about all aspects of Federal programs, regulations, and services. To accomplish this mission, contractual services are used to respond to public inquiries via a nationwide toll-free telephone call center. The FIC was previously funded by the Treasury and General Government Appropriations Act.

The Federal Consumer Information Center combines the nationwide toll-free telephone assistance program and the database of the FIC with the CIC website and publications distribution programs. The FCIC is a one-stop source for citizens to get information about government programs and everyday consumer issues.

During fiscal year 2002, FCIC became a critical part of GSA's newly established Office of Citizen Services and Communications which brings together all of GSA's citizen-centered programs. The new Office will serve

as a central Federal gateway for citizens, businesses, other governments, and the media to easily obtain information and services from the government. Under this new organization, FCIC remains committed to its consumer information outreach mission mandate but adds additional channels to broaden its scope to provide all citizens with access to the information and services available from government. FCIC assumed operational control of the FirstGov.gov website and plans to begin accepting e-mail and fax inquiries from the public in fiscal year 2003.

Public Law 98-63, enacted July 30, 1983, established a revolving fund for the CIC. Under this fund, FCIC activities are financed from the following: annual appropriations from the general funds of the Treasury, reimbursements from agencies for distribution of publications, user fees collected from the public, and any other income incident to FCIC activities. All are available as authorized in appropriation acts without regard to fiscal year limitations.

COMMITTEE RECOMMENDATION

The Committee recommends \$12,541,000 for the Federal Consumer Information Center, an increase of \$5,265,000 above the fiscal year 2002 enacted level. This increase is provided to enable FCIC to begin accepting and responding to e-mail and fax inquiries from the public in fiscal year 2003.

The appropriation will be augmented by a projected \$556,000 reimbursements from Federal agencies for distribution of consumer publications, user fees from the public, and other income. FCIC's anticipated resources for fiscal year 2003 will total approximately \$13,097,000.

**NATIONAL AERONAUTICS AND SPACE
ADMINISTRATION**

Appropriations, 2002	\$14,901,600,000
Budget estimate, 2003	15,000,000,000
Committee recommendation	15,125,500,000

GENERAL DESCRIPTION

The National Aeronautics and Space Administration (NASA) was established by the National Aeronautics and Space Act of 1958 to conduct space and aeronautical research, development, and flight activities for peaceful purposes designed to maintain U.S. pre-eminence in aeronautics and space. NASA's unique mission of exploration, discovery, and innovation is intended to preserve the United States' role as both a leader in world aviation and as the pre-eminent space-faring nation. It is NASA's mission to: advance human exploration, use and development of space; advance and communicate scientific knowledge and understanding of the Earth, the Solar System and the Universe; and research, develop, verify and transfer advanced aeronautics and space technologies.

COMMITTEE RECOMMENDATION

The Committee recommends \$15,125,500,000 for the National Aeronautics and Space Administration for fiscal year 2003, an increase of \$125,500,000 above the budget request and \$300,400,000 above the fiscal year 2002 enacted level.

The Committee remains sensitive to continuing risks regarding the illegal transfer and theft of sensitive technologies that can be used in the development of weapons by governments, entities and persons who may be hostile to the United States. The Committee commends both NASA and the NASA Inspector General (IG) for their efforts to protect sensitive NASA-related technologies. Nevertheless, this will remain an area of great sensitivity and concern as the development of technological advances likely will continue to accelerate. The Committee directs NASA and the NASA IG to report annually on these issues, including an assessment of risk.

HUMAN SPACE FLIGHT

Appropriations, 2002	\$6,830,100,000
Budget estimate, 2003	6,130,900,000
Committee recommendation	6,095,900,000

GENERAL DESCRIPTION

NASA's "Human Space Flight" account provides for human space flight activities, and for safety, mission assurance and engineering activities supporting the Agency. The HSF activities are centered around the operation of the Space Shuttle as well as high priority investments to improve the safety of the Space Shuttle and required construction projects in direct support of the Space Station and Space Shuttle programs. This appropriation also provides for: salaries and related expenses (including travel); design, repair, rehabilitation, and modification of facilities and construction of new facilities; maintenance and operation of facilities; and other operations activities supporting human space flight programs; and space operations, safety, mission assurance and engineering activities that support the Agency.

COMMITTEE RECOMMENDATION

The Committee has provided \$6,095,900,000 for the Human Space Flight account. This amount is \$35,000,000 below the President's request for these activities in fiscal year 2003.

Space Station.—The Committee has provided \$1,457,100,000 for the International Space Station (ISS). This amount is \$35,000,000 below the President's request. This funding level will continue assembly missions through U.S. Core Complete (Flight 10A), and support early research commensurate with the build-up of on-orbit utilization capabilities.

In previous years, the Committee has criticized NASA's management of the ISS program. The lack of credible budget estimates, program mismanagement and the absence of any credible oversight forced the Committee to cut funding and impose cost caps on the program. Despite these actions by Congress, NASA was unable to correct the underlying problems associated with the program. In 2001, NASA announced that the ISS would require an additional \$4,800,000,000 over previous estimates to complete the ISS, as planned.

As a result of these cost overruns, NASA and the Office of Management and Budget (OMB) eliminated certain program elements to reduce cost and provide additional time to re-scope the ISS with the international partners. In addition, NASA created an independent assessment team known as the ISS Management and Cost Evaluation (IMCE) Task Force to evaluate program management. The Committee supports the recommendations of the (IMCE) Task Force and the development of a Cost Analysis Requirements Document (CARD) to support cost estimates of the U.S. Core Complete baseline. Furthermore, the Committee notes the agency's intention to develop an integrated management action plan based on recommendations of the IMCE Task Force. The Committee fully supports this approach in order to provide the Congress with reliable cost estimates for the U.S. Core Complete and beyond.

In addition, the Committee supports the recommendations of the Research Maximization and Prioritization Task Force (REMAP) as it pertains to ISS research. The Committee views the Task Force report as the foundation upon which the OBPR sets ISS research priorities and its organizational structure. The Committee notes that a final report on the REMAP recommendations is to be provided by the NASA Advisory Council during the third quarter of calendar year

2002. Given the importance of the REMAP report to the future of the ISS and the agency's overall research agenda, the Committee directs the Administrator to report to the Committees on Appropriations by December 1, 2001 on the implementation of the REMAP recommendations in relation to the ISS as well as the overall structure of the OBPR.

The Committee remains concerned about Russia's continued policy of selling time on the ISS for tourists, especially since the guiding purpose for the construction of the ISS was to have a world class microgravity research platform, a goal which is still far away. The Committee urges NASA to strictly enforce the protocols developed in cooperation with the international partners to ensure that any space tourist is fully trained and physically capable of participating as a crew member on the ISS.

Space Shuttle.—The Committee has provided \$3,208,000,000 for the Space Shuttle program, the same as the budget request. In fiscal year 2003, five Space Shuttle flights are planned in support of ISS. The proposed budget also supports key Space Shuttle safety investments as part of the Integrated Space Transportation Plan.

The Committee believes there is no higher priority than improving the safety of the Shuttle orbiters. The Committee directs NASA to proceed with implementation of the Cockpit Avionics Upgrade, the Advanced Health Management System and the External Tank Friction stir weld project.

In March 2002, NASA's Aerospace Safety Advisory Panel issued its Annual Report. The Committee commends the Panel for its thorough assessment of the Human Space Flight Program and its recommendations to improve ISS and Space Shuttle safety. The Committee recognizes that NASA has made safety its top priority and applauds the agency for the steps it has taken to date to reduce risks and improve the safety and reliability of all programs within the HEDS Enterprise including operation of the Space Shuttle.

However, the Panel stated that current budget projections for the Space Shuttle are insufficient to accommodate significant safety upgrades, infrastructure upgrades and maintenance of critical workforce skills over the long term. The Committee concurs with this assessment. While the Committee recognizes that NASA is studying the overall space transportation architecture, including second and third generation re-usable launch vehicles to eventually replace the Shuttle, it is clear that the Space Shuttle will continue to operate for at least the next decade, and possibly as long as two decades, as NASA's main heavy lift vehicle for human space flight. Therefore, the Committee directs the Administrator to include, as part of the fiscal year 2004 budget, a thorough assessment of flight systems, logistics, infrastructure and workforce readiness costs that would be needed to maintain and improve Space Shuttle safety over the expected operational life of the Shuttle.

The Committee remains concerned about the overall state of the infrastructure of the Space Shuttle program. While the committee is aware that NASA has conducted an assessment of some of its infrastructure, there has been no official comprehensive study of Shuttle infrastructure needs with reliable cost estimates. Therefore, the Committee directs the Administrator to report the Committees on Appropriations by May 1, 2003, on the critical infrastructure needs for the Space Shuttle program ranked by order of priority including cost estimates for each project identified.

Payload and Expendable Launch Vehicle (ELV) Support.—The Committee recommends \$87,500,000 for payload and ELV support, the

same as the budget request. This account provides technical expertise, facilities, flight carrier hardware and capabilities necessary to provide servicing of multiple payloads to be flown aboard the Space Shuttle. In 2002 and 2003, over 20 major and secondary payloads will be flown on the Shuttle.

In addition, this account provides funds for technical and management insight of commercial launch services, including advanced mission design/analysis and leading-edge integration services which are provided for the full range of NASA missions under consideration for launch on ELVs. In 2003, support for 10 ELV launches, including 1 secondary, is planned.

Investments and Support.—The Committee recommends \$1,178,200,000 for investments and support, the same as the budget request. Funding in the account provides institutional support to the Human Exploration and Development of Space (HEDS) Enterprise through research and program management, construction of facilities, rocket propulsion testing and engineering and technical support to maintain "core" technical skills and capability at the NASA centers involved in human space flight.

Space Communications and Data Systems.—The Committee has provided \$117,500,000 for space communications and data systems, the same as the budget request. Funding in this account provides space communications services for all NASA Enterprises not otherwise covered by each Enterprise.

Safety, Mission Assurance and Engineering.—The Committee recommends \$47,600,000 for safety, mission assurance and engineering, the same as the budget request. This account provides funding for agencywide safety and engineering programs to ensure uniform safety programs, practices and procedures are implemented throughout all NASA Enterprises.

SCIENCE, AERONAUTICS, AND TECHNOLOGY
Appropriations, 2002 \$8,047,800,000
Budget estimate, 2003 8,844,500,000
Committee recommendation 9,003,000,000

PROGRAM DESCRIPTION

NASA's "Science, aeronautics and technology" account provides funding for science, aeronautics and technology activities supporting the Agency. These activities include space science, biological and physical research, Earth science, aerospace technology and academic programs. This appropriation also provides for salaries and related expenses (including travel); design, repair, rehabilitation, and modification of facilities and construction of new facilities; maintenance and operation of facilities; and other operations activities supporting science, aeronautics, and technology programs.

COMMITTEE RECOMMENDATION

The Committee recommends \$9,003,000,000 for the Science, Aeronautics and Technology account, an increase of \$158,500,000 above the President's request and \$955,200,000 above the fiscal year 2002 enacted level.

Space Science.—The activities of NASA's Space Science Enterprise seek to chart the evolution of the universe, from origins to destiny, and understand its galaxies, stars, planetary bodies, and life. The Enterprise asks basic questions that have eternally perplexed human beings, such as how the universe began and evolved and whether there is other intelligent life in the universe. The Space Science Enterprise develops space observatories and directs robotic spacecraft into the solar system and beyond to investigate the nature of the universe.

The quest for this information, and the answers themselves, is intended to maintain

scientific leadership, excite and inspire our society, strengthen education and scientific literacy, develop and transfer technologies to promote U.S. competitiveness, foster international cooperation to enhance programs and share their benefits, and set the stage for future space ventures.

The Committee has made the following adjustments to the budget request:

An increase of \$105,000,000 for the New Horizons Program for the Pluto-Kuiper Belt (PKB) mission to be used for the spacecraft, instruments, project management, the radioisotope thermoelectric generator and the launch vehicle. The Committee has added funding to continue development work on the Pluto-Kuiper Belt mission as the first mission in the New Horizons Program. The Committee notes that the PKB mission meets all of the criteria for the New Horizons Program and expects the agency to include funding for PKB in subsequent budget submissions in order to launch the mission by 2006.

The following increases to the budget request are reduced by 10 percent:

An increase of \$2,000,000 for a center on life in extreme thermal environments at Montana State University.

An increase of \$500,000 to the University of Alaska, Anchorage, for broadband riverine research in Alaska.

A decrease of \$16,500,000 from the flight projects building at the Jet Propulsion Laboratory. The Committee makes this reduction without prejudice in light of the Agency's decision to postpone construction in fiscal year 2002.

A decrease of \$9,000,000 from the proposed Nuclear Power Program and a decrease of \$4,000,000 from the proposed Nuclear Electric Propulsion program. The Committee supports both new programs, but believes that the necessary technology will be slow to ramp up. Moreover, the Committee is concerned about out year budget costs of these programs, the Space Launch Initiative and Shuttle upgrades, all program that will need to complement each other.

Mars Program.—The Committee has provided the full budget request for the Mars Program.

Hubble Space Telescope.—The Committee has provided the full budget request for the Hubble Space Telescope and the Next Generation Space Telescope. The Committee has provided an additional \$23,400,000 to the Office of Space Science for costs associated with the SM-4 servicing mission of the Hubble Space Telescope. The Committee is concerned with additional costs that will result from further delays in the scheduling of the mission. Accordingly, the Committee has provided additional funds to offset the increase in costs. The Committee commends the Agency for the continued success of the Hubble Space Telescope and the extraordinary contributions it has made to the advancement of science.

Solar Probe.—The Committee fully expects NASA to provide sufficient funds in the fiscal year 2003 budget for the solar probe mission to retire technical risk on the program in anticipation of a decision about the mission's future thereafter.

Living With A Star.—The Committee remains strongly supportive of the Living With A Star program because of the critical role its missions will play in understanding the effect of the Sun on our solar system particularly its impact on space weather which can have a profound impact on the Earth. Therefore, the Committee has provided the full budget request for technology development requested for the magnetospheric multiscale mission (MMS), the Solar Dynamics Observatory (SDO) and the Geospace Missions. Should the Agency wish to reallocate

funds within these missions, the Committee will entertain a re-programming request in the operating plan provided that any re-programming preserves the LWS objective of maintaining contemporaneous science.

Earth Science.—The activities of NASA's Earth Science Enterprise seek to understand the total Earth system and the effects of humans on the global environment. This pioneering program of studying global climate change is developing many of the capabilities that will be needed for long-term environment and climate monitoring and prediction. Governments around the world need information based on the strongest possible scientific understanding. The unique vantage-point of space provides information about the Earth's land, atmosphere, ice, oceans, and biota as a global system, which is available in no other way. In concert with the global research community, the Earth Science Enterprise is developing the understanding needed to support the complex environmental policy decisions that lie ahead.

However, the Committee is concerned about the potential for the administration to diminish NASA's pre-eminent role in earth science and earth science applications. As the Committee noted during its fiscal year 2003 hearings, the Agency's development and launch of a series of major earth science missions combined with a successful ground system that is processing and distributing the largest volumes of data ever received by civilian users from space are among NASA's highest technological and scientific achievements. The Committee wishes to affirm its unequivocal support for expanding NASA's role in earth science and earth science applications.

Within the applications program, the Committee believes that the Agency's approach needs more refinement and integration of emerging programs, like Synergy, the Regional Earth Science Applications Centers (RESACs), the Earth Science Information Partnerships (ESIPS) and the considerable in-house scientific capability at the NASA Centers. Such integration should not disrupt the existing program structure in 2003, but should plan for an evolutionary approach in fiscal year 2004. The Committee is pleased with efforts to integrate key Federal agency requirements as objectives of the applications program and expects a progress report on these efforts in the operating plan.

The Committee strongly supports the development of remote sensing research and technology as a collaboration and partnership between NASA, universities and the private sector. The Committee commends both SSC and Goddard for their investment and commitment to the commercial aspects of remote sensing research and technology. There already have been significant advances made with regard to remote sensing applications in agriculture, flood mapping, environmental protection, urban planning, firefighting and land use issues. The Committee urges both Goddard and SSC to work together to continue to develop those remote sensing research and technology projects that have the strongest potential for commercial applications.

The following increases to the budget request are reduced by 10 percent:

An increase of \$25,000,000 for EOSDIS for the Synergy Program at the Goddard Space Flight Center.

An increase of \$20,000,000 for pre-formulation studies. The additional funding provided for this program is to be used to continue pre-formulation studies for solar irradiance, total column ozone and ocean vector winds.

An increase of \$2,500,000 to the University of Washington, Pacific Northwest Regional Collaboratory to develop applications and end-uses for earth science data in the Northwest.

An increase of \$750,000 for Utah State University for landscape analysis, planning and monitoring at the Intermountain Region Digital Image Archive and Processing Center.

An increase of \$1,000,000 for the University of Montana for an International Earth Observing System Natural Resource Training and Data Center.

An increase of \$2,000,000 for joint weather and ocean research at the University of Massachusetts and the University of Alaska.

An increase of \$1,500,000 for the University of Louisville for the Bio-MEMS Microtechnology Center in Louisville, Kentucky.

An increase of \$2,000,000 for the University of New Mexico for the development of the Center for Rapid Environmental Assessment and Terrain Evaluation (Create) which would provide for the rapid acquisition, processing and dissemination of environmental data.

An increase of \$1,500,000 for George Mason University in Fairfax, Virginia for the Mid-Atlantic Geospatial Information Consortium.

A decrease of \$3,400,000 from the flight projects building at JPL. The Committee makes this reduction without prejudice in light of the Agency's decision to postpone construction in fiscal year 2002.

Biological and Physical Research.—NASA's Biological and Physical Research (BPR) Enterprise recognizes the essential role biology will play in the 21st century and pursues the core of biological and physical sciences research needed to support NASA's strategic objectives. BPR fosters and enhances rigorous interdisciplinary research, closely linking fundamental biological and physical sciences in order to develop leading-edge, world-class research programs. BPR uses the unique characteristics of the space environment to understand biological, physical, and chemical processes, conducting science and technology research required to enable humans to safely and effectively live and work in space, and transferring knowledge and technologies for Earth benefits. BPR also fosters commercial space research by the private sector toward new or improved products and/or services on Earth, in support of the commercial use of space.

The following increases to the budget request are reduced by 10 percent:

An increase of \$7,500,000 for the National Space Biomedical Research Institute.

An increase of \$600,000 to North Carolina State University, Raleigh, North Carolina for gravitational and space biology.

An increase of \$1,000,000 to the University of Connecticut Health Center, Farmington, Connecticut for bone and muscle loss studies.

An increase of \$1,500,000 for interactive biological crystallization technology development.

Aero-Space Technology.—NASA's Aerospace Technology Enterprise works to maintain U.S. preeminence in aerospace research and technology. The Enterprise aims to radically improve air travel, making it safer, faster, and quieter as well as more affordable, accessible, and environmentally sound. The Enterprise is also working to develop more affordable, reliable, and safe access to space; improve the way in which air and space vehicles are designed and built; and ensure new aerospace technologies are available to benefit the public.

The Committee is concerned about the status of aerospace technology within NASA's budget and emphasizes the important role that NASA plays in developing new aerospace technologies that are key to the continued development of such aircraft needs as long range aircraft, supersonic transports, global reach transports as well as cost-effective access to space. The Committee espe-

cially is interested in the viability of "intelligent" engine systems such as "Propulsion 21" which could build on current investments in the Ultra Efficient Engine Technology (UEET) and Quiet Aircraft Technology (QAT) because of the potential benefits to the U.S. aerospace industry.

However, the Committee recognizes that the budget will not permit the funding of all proposals or promising technologies. The Committee also believes that the development of aerospace technologies must be based in public/private partnerships guided by cost-sharing principles. Therefore, the Committee directs NASA to submit a report by August 30, 2003 on NASA's 5-year investment plan for aerospace technology including a list of technology goals and priorities, funding needs of these goals and priorities, the criteria used for selecting these priorities and goals, and the nature of the public-private partnership in reaching these priorities and goals.

The following increases to the budget request are reduced by 10 percent:

An increase of \$3,000,000 for the Chesapeake Information Based Aeronautics Consortium based in partnership at Morgan State University, Baltimore, Maryland, Bowie State University and the University of Maryland, Eastern Shore.

An increase of \$3,000,000 for the Stennis Space Center for the development of a visitors center.

An increase of \$1,000,000 for the Educational Training Center at the U.S. Space & Rocket Center in Huntsville, Alabama.

An increase of \$3,000,000 for the Alabama Science Center Alliance (Sci Quest) for the acquisition of addition "immersive reality laboratories" and networking capacity.

An increase of \$2,000,000 for the University of Alabama in Huntsville to augment the UAH Propulsion Test Facility.

An increase of \$750,000 for the National Institute for Aviation Research for icing aviation safety research in Kansas;

An increase of \$1,500,000 for the Glenn Research Center for the Glennan Microsystems Initiative.

An increase of \$1,000,000 for the Glenn Research Center for the Garrett Morgan Commercialization Initiative.

An increase of \$7,000,000 to build on investments in the Ultra Efficient Engine Technology and Quiet Aircraft Technology by demonstrating related engine technology including low noise, active control of engine air flows and combustion processes, emissions and fuel reduction concepts and a "virtual engine simulation" capability.

An increase of \$4,500,000 to for propulsion test complex upgrades and other basic infrastructure upgrades at the Stennis Space Center. An increase of \$2,000,000 for the National Technology Transfer Center at Wheeling Jesuit University.

Aviation.—The Committee has provided \$541,400,000 for aviation programs, the same as the budget request. This includes funding for aviation safety, vehicle systems and aerospace systems programs.

Advanced Space Transportation.—The Committee recommends \$800,000,000 for advanced space transportation. On November 13, 2002, the Committee received a budget amendment regarding proposed changes to the Strategic Launch Initiative for fiscal year 2003. The Committee agrees with the proposed change to the program at modified funding levels. Accordingly, the Committee recommends \$800,000,000 for advanced space transportation of which \$115,000,000 shall be for the Orbital Space Plane. Furthermore, the Committee concurs with the request to transfer \$120,000,000 from the Third Generation Reusable Launch Vehicle to the Strategic Launch Initiative. The Committee will

conduct a thorough review of the Orbital Space Plane and other changes to the SLI in the context of the fiscal year 2003 appropriations bill.

The Committee recognizes the Wallops Flight Facility (WFF) as a launch and recovery site for small commercial and scientific payloads. The Committee directs the Marshall Space Flight Center (MSFC) to utilize the WFF as a site for testing and demonstration of new launch vehicle technologies that are appropriate for the facility. The Committee directs NASA to report to Congress by May 1, 2003 on how the MSFC will utilize Wallops as a testing and launch facility.

Revolutionary Technology.—The Committee has provided \$274,900,000 for revolutionary technology development, the same as the budget request. Funding in this initiative includes computing, information and communications technology, engineering for complex systems and enabling concepts and technologies.

Commercial Technology.—The Committee recommends \$146,900,000 for commercial technology development including commercial technology transfer and the Small Business Innovation Research Programs. This is the same amount as the budget request.

Aerospace Institutional Support.—The Committee recommends \$973,200,000 for aerospace institutional support, the same as the budget request.

Academic Programs.—The objective of NASA's academic programs is to promote excellence in America's education system through enhancing and expanding scientific and technological competence. Activities conducted within academic programs capture the interest of students in science and technology, develop talented students at the undergraduate and graduate levels, provide research opportunities for students and faculty members at NASA centers, and strengthen and enhance the research capabilities of the Nation's colleges and universities. NASA's education programs span from the elementary through graduate levels, and are directed at students and faculty. Academic programs includes the Minority University Research Program, which expands opportunities for talented students from underrepresented groups who are pursuing degrees in science and engineering, and to strengthen the research capabilities of minority universities and colleges.

The Committee recommendation has included \$10,000,000 for the NASA EPSCoR Program, \$5,400,000 above the budget request and the same as the fiscal year 2002 level. The Committee expects NASA EPSCoR to support a broad range of research areas in each EPSCoR State, drawn from Earth science, space science, aeronautics and space transportation technology, and human exploration and development of space, and to distribute the awards, competitively, to the largest number of eligible States possible.

The Committee has provided \$82,100,000 for NASA's minority university research and education activities. This is the same as the budget request. Furthermore, the Committee supports the continuation of a stand-alone Minority University Research and Education Division.

The following increases to the budget request are reduced by 10 percent:

An increase of \$1,000,000 to the Delaware Aerospace Education Foundation, Kent County, Delaware.

An increase of \$750,000 to the Chabot Space and Science Center, Oakland, California.

An increase of \$2,500,000 to Marshall University, Bridgeport, West Virginia, for the Hubble Telescope Project.

An increase of \$1,500,000 to the University of Missouri-Columbia for the Life Sciences Center.

An increase of \$1,000,000 to Wesleyan College, Macon, Georgia for the Monroe Science Center.

An increase of \$1,000,000 to Morehouse College, Atlanta, Georgia, for the Center of Excellence in Telecommunication and Space.

An increase of \$1,000,000 to the Montefiore Medical Center, Bronx, New York for the Discovery Center.

An increase of \$1,000,000 to Rutgers University, Piscataway, New Jersey for the Biomedical Engineering Facility.

An increase of \$3,000,000 to the University of North Dakota Upper Midwest Aerospace Consortium, Grand Forks, North Dakota, for earth science education and remote sensing activities.

An increase of \$1,000,000 to the Museum of Science and Industry, Chicago, Illinois, for the Henry Crown Space Center.

An increase of \$2,500,000 to Iowa State University, Ames, Iowa for non-destructive evaluation studies.

An increase of \$750,000 to the City of Des Moines, Iowa, for the Des Moines Science Center.

An increase of \$750,000 for the California Science Center.

An increase of \$2,000,000 to the South Carolina Association of School Administrators, Columbia, South Carolina for the Blue Ribbon School Reform Project and Interactive Library.

An increase of \$2,000,000 to the College of Charleston, Charleston, South Carolina, for the School of Science and Mathematics.

An increase of \$4,000,000 to the University of Hawaii, Hilo, for the Mauna Kea Astronomy Education Center.

An increase of \$2,000,000 to the University of Wisconsin, Green Bay, for the Wisconsin Initiative for Math, Science and Technology Education.

An increase of \$4,000,000 to develop advanced metallic joining technologies for aerospace applications at Michoud Space Center.

An increase of \$250,000 for the University of Vermont for muscle, bone blood studies related to human space flight.

An increase of \$3,000,000 to the Mitchell Foundation, Portland, Maine for an endowment for science and engineering education.

An increase of \$1,500,000 to the Maryland Science Center, Baltimore, Maryland for expansion of the earth science hall.

An increase of \$750,000 to the University of Arkansas, Little Rock, for minority recruitment in science and engineering.

An increase of \$2,500,000 to Brown University, Providence, Rhode Island for the Life Sciences Building.

An increase of \$1,000,000 to the State University of New York, Buffalo, for the Center of Excellence in Bioinformatics.

An increase of \$1,000,000 to Lane County, Oregon for the Planetarium Learning Center.

An increase of \$500,000 for Virginia Commonwealth University for advance research in batteries and fuel cells.

An increase of \$2,000,000 for the Gulf of Maine Aquarium Foundation for the construction of a Gulf of Maine Laboratory.

An increase of \$1,000,000 for the University of North Carolina-Chapel Hill for the Destiny Mobile Science Laboratory.

An increase of \$500,000 for Widener University in Pennsylvania for the development of a rooftop observatory.

An increase of \$1,500,000 for the University of Missouri's Center for Gender Physiology for infrastructure and research needs.

An increase of \$3,500,000 for the University of Missouri-Rolla for a Center of Excellence for Aerospace Propulsion Particulate Emissions Reduction.

An increase of \$1,500,000 for Montana State University in Bozeman, Montana for space science and engineering laboratory.

An increase of \$2,000,000 for the University of Montana in Missoula, Montana for the Northern Rockies Center for space privatization of microgravity research.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$23,700,000
Budget estimate, 2003	24,600,000
Committee recommendation	26,600,000

PROGRAM DESCRIPTION

The Office of Inspector General was established by the Inspector General Act of 1978. The Office is responsible for providing agencywide audit and investigative functions to identify and correct management and administrative deficiencies which create conditions for existing or potential instances of fraud, waste, and mismanagement.

COMMITTEE RECOMMENDATION

The Committee recommends \$26,600,000 for fiscal year 2003, \$2,000,000 above the President's budget request. The Committee commends the NASA IG's diligence in addressing issues of fraud and abuse.

ADMINISTRATIVE PROVISIONS

The Committee recommendation includes a series of provisions, proposed by the administration, which are largely technical in nature, concerning the availability of funds. These provisions have been carried largely, in prior-year appropriation acts.

NATIONAL CREDIT UNION ADMINISTRATION

CENTRAL LIQUIDITY FACILITY

	Direct loan limita- tion	Administrative ex- penses
Appropriations, 2002	\$1,500,000,000	\$309,000
Budget estimate, 2003	1,500,000,000	309,000
Committee recommendation	1,500,000,000	309,000

PROGRAM DESCRIPTION

The National Credit Union Administration [NCUA] Central Liquidity Facility [CLF] was created by the National Credit Union Central Liquidity Facility Act (Public Law 95-630). The CLF is a mixed-ownership Government corporation managed by the National Credit Union Administration Board and owned by its member credit unions.

The purpose of the facility is to improve the general financial stability of credit unions by meeting their seasonal and emergency liquidity needs and thereby encourage savings, support consumer and mortgage lending, and provide basic financial resources to all segments of the economy. To become eligible for facility services, credit unions invest in the capital stock of the CLF, and the facility uses the proceeds of such investments and the proceeds of borrowed funds to meet the liquidity needs of credit unions. The primary sources of funds for the CLF are stock subscriptions from credit unions and borrowings.

The CLF may borrow funds from any source, with the amount of borrowing limited to 12 times the amount of subscribed capital stock and surplus.

Loans are available to meet short-term requirements for funds attributable to emergency outflows from managerial difficulties or local economic downturns. Seasonal credit is also provided to accommodate fluctuations caused by cyclical changes in such areas as agriculture, education, and retail business. Loans can also be made to offset protracted credit problems caused by factors such as regional economic decline.

COMMITTEE RECOMMENDATION

The Committee recommends the budget request of limiting administrative expenses for the Central Liquidity Fund [CLF] to \$309,000 in fiscal year 2003. The Committee recommends a limitation of \$1,500,000 for the principal amount of new direct loans to

member credit unions. These amounts are the same as the budget request. Funds provided for administrative expenses are the same as the fiscal year 2002 enacted level.

The Committee directs the National Credit Union Administration (NCUA) to continue to provide reports on the lending activities under CLF. This information should be provided to the Committee on a quarterly basis through September 2003.

COMMUNITY DEVELOPMENT REVOLVING LOAN FUND

Appropriations, 2002	\$1,000,000
Budget estimate, 2003	1,000,000
Committee recommendation	1,000,000

PROGRAM DESCRIPTION

The Community Development Revolving Loan Fund Program (CDRLF) was established in 1979 to assist officially designated “low-income” credit unions in providing basic financial services to low-income communities. Low-interest loans and deposits are made available to assist these credit unions. Loans or deposits are normally repaid in 5 years, although shorter repayment periods may be considered. Technical assistance grants are also available to low-income credit unions. Until fiscal year 2001, only earnings generated from the CDRLF were available to fund technical assistance grants. Grants are available for improving operations as well as addressing safety and soundness issues.

COMMITTEE RECOMMENDATION

The Committee provides \$1,000,000 for loans and technical assistance to community development credit unions. These amounts are equal to the budget request and the fiscal year 2001 enacted level.

The Committee's recommendation includes \$700,000 for loans to community development credit unions and \$300,000 for technical assistance to low-income and community development credit unions.

NATIONAL SCIENCE FOUNDATION

Appropriations, 2002	¹ \$4,789,240,000
Budget estimate, 2003	5,028,220,000
Committee recommendation	5,268,980,000

¹Includes \$300,000 in fiscal year 2002 emergency supplemental funding.

GENERAL DESCRIPTION

The National Science Foundation was established as an independent agency by the National Science Foundation Act of 1950 (Public Law 81-507) and is authorized to support research and education programs that promote the progress of science and engineering in the United States. The Foundation supports research and education in all major scientific and engineering disciplines, through grants, contracts, and other forms of assistance awarded to more than 2,000 colleges and universities, nonprofit organizations, small businesses, and other organizations in all parts of the United States. The Foundation also supports international programs and unique, large scale, national user research facilities.

COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$5,268,980,000 for the National Science Foundation in fiscal year 2003. This represents an increase of \$460,440,000 over the fiscal year 2002 level and \$240,770,000 more than the budget request. The Committee was guided in its allocation of resources for the Foundation by two central considerations.

First, productivity growth, powered by new knowledge and technological innovation, makes the economic benefits of a comprehensive fundamental research and education enterprise abundantly clear. New

products, processes, entire new industries, and the employment opportunities that result, depend upon rapid advances in research and their equally rapid movement into the marketplace. In today's global economy, continued progress in science and engineering and the transfer of the knowledge developed is vital if the United States is to maintain its competitiveness.

In addition, the events of September 11 and subsequent anthrax attacks demonstrate that a nation strong in science and technology can respond rapidly and effectively to crises and changing national circumstances. Fundamental research across the full spectrum of science and engineering disciplines in an appropriately balanced manner, together with the highly skilled workforce that makes research and innovation possible, provides the intellectual capital for the nation to draw upon in times of need. A growing stock of knowledge focused on the frontiers of research increases the options available for response. A diverse, internationally competitive, and globally engaged science and engineering workforce accelerates the development of new technologies to meet unexpected needs.

The Committee reiterates its long standing requirement for reprogramming, initiation of new programs or activities, and reorganizations. The Committee directs the Foundation to notify the chairman and ranking minority member prior to each reprogramming of funds in excess of \$250,000 between programs, activities, or elements unless an alternate amount is specified elsewhere by the Committee. The Committee expects to be notified of reprogramming actions which involve less than the above-mentioned amount if such actions would have the effect of changing the agency's funding requirements in future years or if programs or projects specifically cited in the Committee's reports are affected. Finally, the Committee wishes to be consulted regarding reorganizations of offices, programs, and activities prior to the planned implementation of such reorganizations.

RESEARCH AND RELATED ACTIVITIES

Appropriations, 2002	¹ \$3,598,640,000
Budget estimate, 2003	3,783,210,000
Committee recommendation	4,081,650,000

¹Includes \$300,000 in fiscal year 2002 emergency supplemental funding.

PROGRAM DESCRIPTION

The research and related activities appropriation addresses the Foundation's three strategic outcomes: people—developing a diverse, internationally competitive and globally-engaged workforce of scientists, engineers, and well-prepared citizens; ideas—enabling discovery across the frontiers of science and engineering, connected to learning, innovation, and service to society; and tools—providing broadly accessible, state-of-the-art information bases and shared research and education tools. Research activities will contribute to the achievement of these outcomes through expansion of the knowledge base; integration of research and education; stimulation of knowledge transfer among academia and the public and private sectors; and bring the perspectives of many disciplines to bear on complex problems important to the Nation. The Foundation's discipline-oriented research programs are: biological sciences; computer and information science and engineering; engineering; geosciences; mathematical and physical sciences; and social, behavioral and economic sciences. Also included are U.S. polar research programs and related logistical support and integrative activities.

COMMITTEE RECOMMENDATION

The Committee recommends \$4,081,650,000 for research and related activities. This

amount is \$483,010,000 or 13.4 percent more than the fiscal year 2002 level and \$298,440,000 more than the budget request. This funding level is consistent with proposals to double the NSF research budget over 5 years.

The Committee is concerned that the size and number of awards made by the Foundation are far below what is needed to enable our research scientists and engineers to meet the challenges presented by our global competitors. The Committee urges the Foundation, to the maximum extent possible, to use the growth in resources being provided to make a marked and substantial increase in the average award, as well as increase the number of awards being made with special efforts made to include those individuals and institutions not well represented in the Nation's research enterprise.

The Committee's recommendation includes a total of \$604,000,000 for computer and information science and engineering. This is \$77,060,000 more than the request of which \$67,000,000 is for information technology research and \$10,000,000 is for the terascale computing systems. Within the additional funds provided for information technology research, the Committee directs NSF to provide \$25,000,000 for cyber security research for individual investigators and multidisciplinary research centers and \$15,000,000 is for advanced broadband research.

The Nation has become vulnerable to cyber-attacks, in part, because critical aspects of daily life rely on computer systems, networks, and the internet (e.g., water systems and electricity grids). Currently available technologies provide inadequate protection, yet relatively little research is being conducted to develop new approaches to protecting computer systems and networks. The private sector has had little incentive to invest in cyber security because the market emphasizes only speed and convenience. The Federal Government has not filled the gap, but instead has chronically underinvested in cyber security. As a result, what little research has been done on cyber security has been incremental, leaving the basic approaches to cyber security unchanged for decades. As a field with relatively modest support, few researchers, and minimal attention, cyber security fails to attract the interest of students, perpetuating the problems of a lack of trained personnel. Therefore, the Committee is providing \$25,000,000 to be used to strengthen support for research in computer and network security. The Committee expects these funds will be used to support both individual investigators and a number of interdisciplinary research centers in computer and network security research.

The universal availability of broadband in the United States will increase productivity, create high-wage jobs, and expand access to healthcare and life-long learning. The Committee believes that the NSF and research community can and should do more to support this national imperative along the lines suggested in the recent National Academy of Sciences report, *Broadband: Bringing Home the Bits*. In particular, R&D on innovative “last mile” technologies (both wired and wireless) could significantly reduce the cost of national broadband deployment, particularly in remote and rural areas. NSF should use the additional \$15,000,000 being provided to support research and education activities in this area.

The Committee is aware of the recent report by the NSF's Blue-Ribbon Advisory Committee on Cyber-infrastructure. This advisory Committee called for a significant expansion in high-performance computing, optical networking, software applications for “e-science,” and large-scale digital libraries. Such an initiative, if focused around a number of critically important challenges, could

accelerate the pace of discovery in all science and engineering disciplines, and serve as a “multiplier” for the Government’s substantial investment in R&D. The Committee urges NSF to give this careful consideration in developing the fiscal year 2004 proposal.

The Committee’s recommendation provides \$556,400,000 for engineering. This is \$68,000,000 more than the request. These additional funds are to strengthen the nanoscience and engineering initiative in the engineering directorate.

The Committee is providing \$1,056,570,000 for the mathematical and physical sciences. The Committee has increased the fiscal year 2003 request for the physics, chemistry, astronomy, materials research and multidisciplinary research subactivities by a total of \$135,000,000. The Committee remains concerned that support for the physical sciences has not kept pace with the growth in other disciplines. Yet it is the sustained investment in these disciplines that has enabled the development of today’s advanced weapon systems, state-of-the-art medical diagnostic equipment, and improved communications systems. The Committee’s recommendation will strengthen the core research and instrumentation programs in these subactivities as well as adequately support the national astronomy centers in West Virginia, New Mexico, and elsewhere, and other NSF physical science facilities. The Committee also directs NSF to provide adequate support for preparatory work for the Giant Segmented Mirror Telescope (GSMT). The GSMT was one of the highest priorities recommended in the National Academy of Sciences Astronomy and Astrophysics Committee’s decadal survey.

The Committee also encourages NASA and NSF to work together on the Large-aperture Synoptic Survey Telescope (LSST). The LSST was highly recommended in the recent National Academy of Sciences decadal survey and is designed to survey the visible sky to a much fainter level than that reached by existing surveys. It is expected to catalog 90 percent of the near-Earth objects larger than 300 meters and assess the threat they pose to life on Earth. Its ability to find and catalog primitive objects in the Kuiper Belt is expected to significantly aid in the success of NASA’s Pluto-Kuiper Belt Explorer mission.

From the additional funds provided for the mathematical and physical sciences directorate, the Committee is adjusting the request by providing an additional \$7,300,000 for the national radio astronomy observatories, \$4,200,000 for the national optical astronomy observatories, and \$14,500,000 for the National Nano-fabrication Users Network, the National High Magnetic Field Laboratory, the Wisconsin Synchrotron Radiation Center, and other facilities. The Committee’s recommendation also includes the \$4,000,000 requested for the continuation of the Telescope System Instrumentation Program which was initiated by the Committee in fiscal year 2002.

The Committee is recommending that the mathematical sciences be funded at \$162,000,000, an increase of \$10,000,000 over the fiscal year 2002 level. With this appropriation, the mathematical sciences will have grown by over 50 percent since fiscal year 2000. Consistent with the NSF budget request, nearly \$13,000,000 in additional support for interdisciplinary mathematics is available in the other research and education directorates within the Foundation. The Committee directs NSF to provide a report documenting what has been accomplished as a result of this growth in mathematics research. The report should be submitted to the Committee by March 31, 2003.

The Committee recommends \$535,000,000 for the biological sciences activity, of which

\$85,000,000 is to support ongoing research on the genomics of plants of major economic importance. With this support, researchers will be able to focus on functional genomics, large-scale sequencing, and developing tools and resources for plant genomics studies. Also within the biological sciences activity, the Committee is providing \$26,000,000 for biocomplexity research; this represents a 53 percent increase over the comparable fiscal year 2002 level.

The Committee encourages the NSF to continue its participation in the interagency microbial genomics sequencing program, especially as it relates to sequencing of plant pathogens, and to support comparable interagency efforts on sequencing the genomes of domesticated animals. In terms of the plant genome program, the Committee continues to be interested in the sequencing of economically important crops, such as corn, wheat, and barley. Accordingly, the Committee directs the NSF to fund the sequencing of one or more of the crops that are the most economically important to the United States and expects the NSF to complete the sequencing of at least one of the crops by 2004. To accomplish this objective, the Committee expects the Foundation to work with the large-scale sequencing centers involved in sequencing the human genome, the Department of Energy Joint Genome Institute, the Department of Agriculture, and other large-scale sequencing centers to ensure that the funding is utilized in the most cost-effective and timely manner. Finally, the Committee is interested in developing research partnerships supporting plant biotechnology targeted to the needs of the developing world and encourages NSF to work with the U.S. Agency for International Development in creating opportunities for U.S. research institutions to partner with research institutions in a developing country.

The Committee’s recommendation provides \$680,000,000 for geosciences research. This is \$70,530,000 more than the fiscal year 2002 level. The Committee has rejected the Administration’s proposal to transfer programs from NOAA, EPA and the USGS. In lieu of the transfer, the Committee is directing that the funds provided be used to augment high priority research activities in the earth, atmospheric, and ocean sciences. The Committee supports the efforts being made to develop multi-year strategic plans in the atmospheric sciences and in ocean drilling. As a result, the Committee expects NSF will use \$15,000,000 of the increase to augment support for the national user facilities in this directorate and move forward on the integrated ocean drilling program.

The Committee supports the important research being performed at the International Arctic Research Center (IARC). The Committee understands that the cooperative agreement between the Foundation and the International Arctic Research Center (IARC) will expire on April 30, 2003. Accordingly, the Committee urges NSF to work with the Center and the University of Alaska to renew the cooperative agreement.

The Committee provided funds in fiscal year 2001 to begin the design and model testing of a vessel to replace the R/V Alpha Helix. While NSF has made some progress in the design and model testing stages, the Committee is concerned that it may not be developed adequately for its consideration in the fiscal year 2004 budget. The Committee, therefore, urges the Foundation to expedite the completion of the design of the vessel and submit the proposal to the Board for its consideration so that the next phase of construction can go forward in fiscal year 2004.

The Committee has also increased the request for U.S. polar research programs by \$10,260,000 to support priority research and infrastructure needs.

As a key part of the Administration’s climate change research initiative, the Committee recognizes the Nation needs substantially better information on the current and future state of the ocean and its role in environmental change. Adequate predictive capability is a prerequisite to the development of sound policies at the national and regional level, policies ranging from maritime commerce to public health, from fisheries to safety of life and property, from climate change to national security. The Committee urges NSF to move ahead to support an ocean observatories initiative that is tightly integrated with the Administration’s interagency climate change science program.

The Committee supports the social, behavioral and economic sciences. Within the \$190,000,000 the Committee is recommending, a total of \$6,000,000 should be made available for the children’s research initiative.

The Committee is providing an additional \$30,000,000 to augment the request for the major research instrumentation program. The Committee reiterates its long-standing concern about the infrastructure needs of developing institutions, historically black colleges and universities; and other minority-serving colleges and universities. The Committee directs NSF to use these additional funds to support the merit-based instrumentation and infrastructure needs of these institutions.

The Committee’s recommendation includes an additional \$5,000,000 for the innovation partnership program. With these funds, NSF is to support competitive, merit-based partnerships, consisting of States, local and regional entities, industry, academic institutions, and other related organizations for innovation-focused local and regional technology development strategies.

MAJOR RESEARCH EQUIPMENT AND FACILITIES CONSTRUCTION	
Appropriations, 2002	\$138,800,000
Budget estimate, 2003	126,280,000
Committee recommendation	59,280,000

PROGRAM DESCRIPTION

The major research equipment and facilities construction appropriation supports the acquisition, procurement, construction, and commissioning of unique national research platforms, research resources and major research equipment. Projects supported by this appropriation will push the boundaries of technology and will offer significant expansion of opportunities, often in new directions, for the science and engineering community. Preliminary design and development activities, and on-going operations and maintenance costs of the facilities are provided through the research and related activities appropriation account.

COMMITTEE RECOMMENDATION

The Committee recommends \$59,280,000 for major research equipment and facilities construction. Support for the terascale computing systems has been provided in the Research and Related Activities Appropriations Account. Within this account, the Committee’s recommendation includes funding for the following projects:

\$30,000,000 for the Atacama Large Millimeter Array telescope; \$9,720,000 for the Large Hadron Collider; \$13,560,000 for the Network for Earthquake Engineering Simulation; and \$6,000,000 for South Pole Station.

The Committee remains concerned about the Foundation’s management of large scale construction projects and the priority setting process used to select projects to be funded. The Committee received a report from NSF required by Public Law 107-73 which addressed a number of issues of concern to the Committee. However neither the

report nor the budget justifications addressed the way in which criteria are used by the agency and the National Science Board in setting priorities among new and potential new starts. A recent audit by the Inspector General identified a number of issues in both the financial management and project management of previously funded projects. In addition, since 2001 NSF has been recruiting for a Deputy Director for Large Facility Projects. However, this position has not yet been filled on a permanent basis. Finally the National Academy of Sciences has been asked by the Committee and NSF's authorizing committees to assist in the development of a process for prioritizing projects to be funded out of this account. The Committee directs NSF to provide up to \$750,000 to support the Academy's work on this matter. These funds should be made available from resources used for Planning and Evaluation. As a result of all of these continuing concerns, the Committee has deferred support for the two "new starts" proposed by the administration—Earthscope and the National Ecological Observatory Network.

The Committee also supports provisions under consideration by the authorizing committees to establish a more transparent process for the establishment of priorities with respect to the funding of major research equipment and facilities construction. The Committee believes a more open and understandable process, which includes National Science Board and NSB Committee meetings, are important aspects of such a priority setting process.

In addition, despite repeated concerns expressed by the Congress and the Inspector General, NSF has not addressed adequately the management and funding problems associated with large research facilities funded through the major research equipment and facilities construction account (formerly named the major research equipment or MRE account). The Inspector General's May 1, 2002 report found that the lack of adequate guidance "have allowed NSF to use multiple appropriation accounts to fund the acquisition and construction costs of major research equipment and facilities, and led to inconsistencies in the types of costs funded through the MRE account." This practice has led to the use of funds from the research and related activities account to pay for cost overruns and scope increases of large facility projects without adequate notification and consultation with the Committee. Accordingly, the Committee directs NSF to include in its fiscal year 2003 operating plan to the Committee a report that details approved budgeted and actual expenditure information on each individual large research facility projects approved by the Congress. The report should include information on the amount of funds approved by the Congress from its inception by year, the amount of actual funds spent on the project by year, and a breakdown of the budgeted and actual expenditures by appropriation account. In addition, the Committee notes the findings and recommendations contained in the OIG report pertaining to NSF's cost accounting system. As a result, the Committee also directs NSF to address the deficiencies in its cost accounting system to ensure that the system is capable of readily and reliably providing the Foundation and the Committee with information on the actual cost of NSF programs and activities.

The Committee urges NSF to continue moving forward with the IceCube Neutrino Detector Observatory. The technology developed by IceCube's precursor project has proven successful at detecting high-energy atmospheric neutrinos. Continued development is expected to lead to a new era in astronomy in which researchers will have unique oppor-

tunities to analyze some of the most distant and significant events in the formulation and evolution of the universe.

EDUCATION AND HUMAN RESOURCES

Appropriations, 2002	\$875,000,000
Budget estimate, 2003	908,080,000
Committee recommendation	932,730,000

PROGRAM DESCRIPTION

The education and human resources appropriation supports a comprehensive set of programs across all levels of education in science, technology, engineering and mathematics (STEM). The appropriation supports activities that unite school districts with institutions of higher learning to improve precollege education. Other precollege activities include development of the next generation of precollege STEM education leaders; instructional materials; and the stem instructional workforce. Undergraduate activities support curriculum, laboratory, and instructional improvement; expand the STEM talent pool through scholarships and attracting STEM participants to teaching; augment advanced technological education at 2-year colleges; and develop dissemination tools. Graduate support is directed to research and teaching fellowships and traineeships, and linking precollege systems with higher education to improve the instructional workforce. Programs also seek to broaden the participation of groups underrepresented in the STEM enterprise; build State and regional capacity to compete successfully for research funding; and promote informal science education. Ongoing evaluation efforts and research on learning strengthen the base for these programs. In addition to this appropriation, the Foundation supports private-public K-12 partnerships and undergraduate scholarships in high-need fields through H-1B Nonimmigrant Petitioner Fees provided through Public Law 105-277, as amended.

COMMITTEE RECOMMENDATION

The Committee has recommended \$932,730,000 for this account. This amount is \$57,730,000 more than the fiscal year 2002.

The Committee provided \$160,000,000 last year to start the new Math and Science Partnership program. NSF was unable to obligate all of these funds in fiscal year 2002. As a result, the Committee is providing \$105,000,000 in new funds for fiscal year 2003. NSF should augment this funding with the funds carried over from fiscal year 2002.

To support additional K-12 math and science education efforts, the Committee is also providing a total of \$223,550,000 for elementary, secondary, and informal science education, of which \$37,460,000 is from the H-1B nonimmigrant petitioner fees.

The Committee is aware of the unique and important relationship between historically black colleges and universities (HBCUs) and their surrounding communities, especially with schools located in some of the nation's most underserved, economically disadvantaged, and isolated areas, and recognizes that there is a natural linkage between school districts with high minority enrollments and HBCUs. The Committee expects the National Science Foundation will take explicit actions to include HBCUs among the set of institutions of higher education participating in its efforts to increase this nation's supply of math and science teachers.

Recent data suggest a number of important trends regarding the development of the Nation's high-tech workforce. Student interest has shifted markedly from the physical sciences and mathematics to the life sciences and computer science. This trend seems to parallel Federal funding trends for research support. In addition, in a number of

fields, the percentage of degrees awarded to foreign students has been steadily increasing. At the same time, the demand for jobs requiring technical expertise is growing. Given the demands of our knowledge-based economy, the United States needs to increase the number and diversity of our scientific and technical workforce and facilitate an understanding of basic scientific principles among non-scientists. For this reason, the Committee has focused on a set of NSF programs that relate to education and training at all levels of math and science education.

The Committee has increased the budget request for NSF's graduate and professional education programs by \$25,000,000. These additional funds are to be used to increase graduate student stipends in the fellowship programs and the traineeship program to a level of \$30,000 per year. The Committee recognizes that graduate stipends in science and engineering need to be made more attractive to students to compensate for the cost of education and mounting student debt, and to offset opportunities for higher salaries offered by employers to science and engineering baccalaureate degree holders.

The Informal Science Education program, which provides support to museums and science centers, is funded at \$70,000,000. This represents the first increase in this program in 3 years.

The undergraduate "tech talent" expansion program is increased by \$20,000,000. The Committee is informed that nearly \$70,000,000 was requested by the proposals submitted for the fiscal year 2002 competition in which only \$5,000,000 was available. The Committee is also providing an additional \$5,000,000 to increase the Advanced Technological Education program. This important NSF program supports undergraduate science education activities at the Nation's community colleges. The Committee strongly encourages NSF to develop a robust and comprehensive plan for undergraduate science and engineering education that builds on the "tech talent" program and other NSF undergraduate activities.

The Committee is recommending an increase for the HBCU-Research University Science & Technology (THRUST) initiative within the Centers of Research Excellence in Science and Technology (CREST) program of \$10,000,000. Eligibility for THRUST should not exclude CREST recipients, but funds provided in fiscal year 2003 should be used to first fully-fund multi-year awards to recipients of THRUST awards in the program's first year.

The Committee does not agree with the budget request to reduce funding for the Louis Stokes Alliances for Minority Participation program (LSAMP) or the Historically Black Colleges and Universities—Undergraduate Program (HBCU-UP). Both of these programs play important roles in attracting and retaining minorities into science and engineering. In lieu of the reductions proposed by the Administration, the Committee is adding \$5,000,000 to LSAMP and \$5,000,000 to HBCU-UP.

The Committee has included \$110,000,000 for the States currently participating in the Experimental Program to Stimulate Competitive Research (EPSCoR). These funds will allow full implementation of the infrastructure awards as well as continuation of other activities. The Committee's recommendation is \$35,000,000 more than the budget request and reverses the Administration's proposed \$10,000,000 reduction from the fiscal year 2002 level. In addition, the Committee notes that at least \$30,000,000 will be available for EPSCoR activities from the research programs through their share of co-funding.

SALARIES AND EXPENSES

Appropriations, 2002	\$170,040,000
----------------------------	---------------

Budget estimate, 2003	202,950,000
Committee recommendation	182,160,000

PROGRAM DESCRIPTION

The salaries and expenses appropriation provides funds for staff salaries, benefits, travel, training, rent, advisory and assistance services, communications and utilities expenses, supplies, equipment, and other operating expenses necessary for management of the agency's research and education activities.

COST COMMITTEE RECOMMENDATION

The Committee is providing \$182,160,000 for salaries and expenses. This represents an increase of 7 percent over the fiscal year 2002 level. In light of the Committee's rejection of the transfer of programs from NOAA, EPA, and the U.S. Geological Survey, the Committee has not provided the resources requested for the 17 full-time equivalents that had been proposed in connection with the program transfers. The balance of the adjustment to the request should be taken at the Foundation's discretion.

OFFICE OF THE NATIONAL SCIENCE BOARD

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$3,500,000

PROGRAM DESCRIPTION

The National Science Board is the governing body of the National Science Foundation. The Board is composed of 24 members, appointed by the President and confirmed by the Senate. The Board is charged with serving as adviser to the President and Congress on policy matters related to science and engineering. By law, the Board establishes the policies of the National Science Foundation, providing oversight of its programs and activities, and approval of its strategic directions and budgets. The Board reviews and approves NSF awards, at levels above its delegation of authority to the NSF Director.

COST COMMITTEE RECOMMENDATION

The Committee has established a separate appropriation account with \$3,500,000 for the Office of National Science Board. The Committee directs that these funds be used for salaries and compensation for the staff the Office of the National Science Board as well as the Members of the Board. The funding in this account should also be used for travel, training, general operating expenses, Board operating expenses, representational expenses, honorary awards, NSB reports and contracts. Support for the Science and Engineering Indicators report, including the staff support provided by the Division of Science Resources Studies for this NSB report should continue to be provided by the Foundation on a non-reimbursable basis. Further, the NSF shall continue to provide, on a non-reimbursable basis, budget development and execution assistance, personnel assistance, space, NSB Committee staff support and other assistance in the same manner has it did in fiscal year 2002.

The Committee strongly urges the authorizing committees to consider the merits of having the selection of the Chairman of the Board subject to Senate confirmation to further ensure the independence of the Chairman and the Board. The Committee also urges the authorizing committees to consider enacting legislation that would give the executive committee of the National Science Board the authority to elect its chairman.

The Committee supports the Board's new authority to hire its own professional staff. The Committee directs the Foundation to support fully the Board's efforts to meet its staffing needs.

OFFICE OF INSPECTOR GENERAL	
Appropriations, 2002	\$7,040,000
Budget estimate, 2003	7,700,000
Committee recommendation	9,060,000

PROGRAM DESCRIPTION

The Office of Inspector General appropriation provides audit and investigation functions to identify and correct deficiencies which could create potential instances of fraud, waste, or mismanagement.

COST COMMITTEE RECOMMENDATION

The Committee is providing \$9,060,000 for the Office of Inspector General to support the increasing audit and oversight activities of this office driven by the substantial growth in the size and complexity of NSF research and education programs.

NEIGHBORHOOD REINVESTMENT CORPORATION

PAYMENT TO THE NEIGHBORHOOD REINVESTMENT CORPORATION	
Appropriations, 2002	\$105,000,000
Budget estimate, 2003	105,000,000
Committee recommendation	110,000,000

PROGRAM DESCRIPTION

The Neighborhood Reinvestment Corporation was created by the Neighborhood Reinvestment Corporation Act (title VI of the Housing and Community Development Amendments of 1978, Public Law 95-557, October 31, 1978). Neighborhood Reinvestment helps local communities establish working partnerships between residents and representatives of the public and private sectors. These partnership-based organizations are independent, tax-exempt, nonprofit entities and are often known as Neighborhood Housing Services [NHS] or mutual housing associations. Collectively, these organizations are known as the NeighborWorks® network.

Nationally, over 225 NeighborWorks® organizations serve over 2,100 urban, suburban and rural communities in 49 States, the District of Columbia, and Puerto Rico. In fiscal year 2001, the NeighborWorks® network assisted nearly 64,000 families obtain and maintain safe and affordable rental and homeownership housing, where 71 percent of the people served are in the very low and low-income brackets.

The NeighborWorks® network improves the quality of life in distressed neighborhoods for current residents, increases homeownership through targeted lending efforts, exerts a long-term, stabilizing influence on the neighborhood business environment, and reverses neighborhood decline. NeighborWorks® organizations have been positively impacting urban communities for nearly 25 years, and more recent experience is demonstrating the success of this approach in rural communities when adequate resources are available.

Neighborhood Reinvestment will continue to provide grants to Neighborhood Housing Services of America [NHS], the NeighborWorks® network's national secondary market. The mission of NHS is to utilize private sector support to replenish local NeighborWorks® organizations' revolving loan funds. These loans are used to back securities that are placed with private sector social investors.

COST COMMITTEE RECOMMENDATION

The Committee recommends \$110,000,000 for the Neighborhood Reinvestment Corporation, \$5,000,000 above the budget request and \$5,000,000 above the fiscal year 2002 enacted level. The Committee has also included a set-aside of \$5,000,000 for the section 8 homeownership program. The administration requested \$10,000,000 for this program.

The Committee is including \$5,000,000 above the budget request to continue the

Corporation's multi-family rental housing initiative. The Corporation has demonstrated success with this program; in fiscal year 2002, 110 extremely low-income people benefited from the production of new multi-family housing units.

The Committee continues to support the work being done by NeighborWorks® members to combat predatory lending practices. The Committee recognizes the importance that financial literacy and homeownership counseling have in preventing people from becoming victims of predatory schemes. The Committee also recognizes that NeighborWorks® members have successfully counseled 50,000 people who went on to become homeowners and encourages the Neighborhood Reinvestment Corporation and its network to expand its education and counseling programs.

SELECTIVE SERVICE SYSTEM**SALARIES AND EXPENSES**

Appropriations, 2002	\$25,003,000
Budget estimate, 2003	26,480,000
Committee recommendation	26,480,000

PROGRAM DESCRIPTION

The Selective Service System [SSS] was reestablished by the Selective Service Act of 1948. The basic mission of the System is to be prepared to supply manpower to the Armed Forces adequate to ensure the security of the United States during a time of national emergency. Since 1973, the Armed Forces have relied on volunteers to fill military manpower requirements. However, the Selective Service System remains the primary vehicle by which men will be brought into the military if Congress and the President should authorize a return to the draft.

In December 1987, Selective Service was tasked by law (Public Law 100-180, sec. 715) to develop plans for a postmobilization health care personnel delivery system capable of providing the necessary critically skilled health care personnel to the Armed Forces in time of emergency. An automated system capable of handling mass registration and inductions is now complete, together with necessary draft legislation, a draft Presidential proclamation, prototype forms and letters, et cetera. These products will be available should the need arise. The development of supplemental standby products, such as a compliance system for health care personnel, continues using very limited existing resources.

COST COMMITTEE RECOMMENDATION

The Committee recommends an appropriation of \$26,480,000 for the Selective Service System. This amount is the same as the budget request for fiscal year 2003 and an increase of \$1,477,000 over the fiscal year 2002 enacted level.

TITLE IV—GENERAL PROVISIONS

The Committee recommends inclusion of 19 general provisions previously enacted. There are three new provisions that are non-controversial. They are largely standard limitations which have been carried in the VA, HUD, and Independent Agencies appropriations bill in the past.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of Rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing certificate fund: \$16,928,697,228.

Fair housing activities: \$45,899,000.	FEDERAL EMERGENCY MANAGEMENT AGENCY	COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE			
HOME Investment Partnerships Program: \$1,950,000,000.	Salaries and expenses: \$239,690,000.	Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."			
Homeless assistance grants: \$1,215,025,000.	Emergency management planning and assistance: \$1,547,214,000.	With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.			
Community development block grants: \$5,000,000,000.	Emergency food and shelter: \$153,000,000.				
Rural housing and economic development: \$25,000,000.	GENERAL SERVICES ADMINISTRATION				
DEPARTMENT OF THE TREASURY	Federal Consumer Information Center: \$15,000,000.				
Community Development Financial Institutions Fund: \$73,000,000.	NATIONAL SCIENCE FOUNDATION				
CONSUMER PRODUCT SAFETY COMMISSION	Research and related activities: \$4,131,630,000.				
Salaries and expenses: \$56,767,000.	Major research equipment and facilities management: \$79,280,000.				
ENVIRONMENTAL PROTECTION AGENCY	Education and human resources: \$947,730,000.				
Environmental programs and management: \$2,136,569,000.	Salaries and expenses: \$182,160,000.				
Science and technology: \$793,371,000.	National Science Board: \$3,500,000.				
State and tribal assistance grants: \$3,920,639,000.	Office of Inspector General: \$9,660,000.				
Superfund: \$1,272,888,000.

DIVISION L—HOMELAND SECURITY ACT OF 2002 AMENDMENTS

The Committee recommends the following general provisions that modify the Homeland Security Act of 2002 (Public Law 107-296):

SEC. 101. Modifies sections 308 and 835 of Public Law 107-296 as follows—

Conduct of research, development, demonstration, testing, and evaluation.—Amends section 308 by granting discretion to the Homeland Secretary in his application of the listed criteria when designating one (or more) of the Nation's colleges or universities as a college- or university-based center for homeland security that shall conduct extramural research, development, demonstration, testing, and evaluation programs.

Prohibition on contracts with corporate expatriates.—Amends subsection 835(d) to limit the authority of the Secretary of the Department of Homeland Security to waive the prohibition on entering into contracts with a foreign incorporated entity which is treated as an inverted domestic corporation; the amendment would restrict the waiver authority only to contracts for which the Secretary determines that the waiver is required in the interest of homeland security.

SEC. 102. *Clarification of definition of manufacturer; Clarification of definition of vaccine-related injury or death; Clarification of definition of vaccine; Effective date.*—Repeals sections 1714 through 1717 as if such sections never were effective and replaces these sections with alternative language regarding the application of the Public Health Service Act. No legal inference regarding existing law prior to or after the enactment and repeal of these sections shall be drawn by the courts from the enactment and subsequent repeal of these provisions. The repeal leaves unaffected pre-existing case law, such as *Leroy v. Secretary of Health and Human Services, Office of Special Master*, N. 02-392V (October 11, 2002).

The alternative language also states the Sense of the Senate that the Committee on Health, Education, Labor, and Pensions should report legislation within six months to protect the public health and the Nation's ability to produce existing vaccines, as well as to develop new and more effective vaccines, particularly in these critical times. This legislation should ensure that patients injured by vaccines have the opportunity to seek fair and timely redress and should provide vaccine manufacturers, manufacturers

of components or ingredients of vaccines, and physicians and other administrators of vaccines with adequate protection. Such legislation should be based upon expert recommendations, including those of the Secretary of Health and Human Services' Advisory Commission on Childhood Vaccines.

SEC. 103. Modifies subsections 232(f), 234(b), 873(b), and 1511(e)(2) and adds a new section at the end of the Act as follows—

Mission of office; Duties; Transfer of funds/Abolishment of Office of Science and Technology of National Institute of Justice; Transfer of functions; Transfer of personnel and assets.—Amends subsections 232(f) and 234(b) to ensure that transfers of funds, personnel, and assets within and from the Department of Justice are governed by the procedures established in section 605 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2002 (Public Law 107-77).

Use of appropriated funds; Gifts.—Amends subsection 873(b) to permit the Coast Guard to use pre-existing authority to accept gifts and donations of services.

Transitional authorities; Prohibition on use of transportation trust funds.—Amends subsection 1511(e)(2) to permit the Coast Guard to continue to receive funds from the Aquatic Resources Trust Fund of the Highway Trust Fund for boating safety programs.

Reports and notifications to, and consultations with, the Committees on Appropriations.—Recommends a new section at the end of Public Law 107-296 that requires that any report or notification to, or consultation with, the Congress or any Congressional committee required by the Act, and addressing directly or indirectly the use of appropriated funds, also be submitted to or held with the Committees on Appropriations of the Senate and the House of Representatives.

OVERTSIGHT AND USE OF APPROPRIATED FUNDS

The Committee is aware of many sections of the Homeland Security Act of 2002 that directly or indirectly address the oversight and use of appropriated funds—matters that fall within the jurisdiction and purview of the Committees on Appropriations of the Senate and the House of Representatives. In order to ensure the expeditious consideration and passage of the final version of the Homeland Security Act, the Committee did not raise these issues during the necessarily foreshortened period between the time that the final version became available for review and the vote on final passage.

The Committee intends to review these provisions in depth. The Committee's preliminary review of the Homeland Security Act indicates that, at a minimum, these provisions include:

(1) subsection 201(f)(4) regarding the non-reimbursable status of personnel detailed from other agencies to the Directorate for Information Analysis and Infrastructure Protection;

(2) section 305 regarding federally funded research and development centers (FRRDCs);

(3) section 307 regarding the Homeland Security Advanced Research Projects Agency and the Acceleration Fund for Research and Development of Homeland Security Technologies;

(4) section 312 regarding establishment of a Homeland Security Institute FFRDC;

(5) section 413 regarding the transfer of funds from the U.S. Customs Service or of funds collected under certain provisions of the Consolidated Omnibus Budget Reconciliation Act of 1985;

(6) section 419 regarding Customs User Fees;

(7) subsections 421(e) and (f) regarding the transfer of functions and funds by the Secretary of Agriculture to the Department of Homeland Security;

(8) subsection 422(b)(2) regarding the use of funds transferred by the Administrator of the General Services Administration;

(9) section 456 regarding the transition and transfer and allocation of appropriations and personnel to the Bureau of Citizenship and Immigration Services;

(10) subsection 462(f)(3) regarding the transfer and allocation of appropriations and personnel to be transferred to the Office of Refugee Resettlement of the Department of Health and Human Services;

(11) section 476 regarding separation of funding for the Bureau of Citizenship and Immigration Services and the Bureau of Border Security, especially with respect to the deposit and transfer of fees;

(12) subsection 502(C) regarding the provision of funds to the Department of Energy and the Environmental Protection Agency;

(13) section 507 regarding the role of the Federal Emergency Management Agency with respect to all hazards;

- (14) section 831 regarding research and development projects;
- (15) section 833 regarding special streamlined acquisition authorities;
- (16) section 855 regarding the application of certain commercial items authorities to certain procurements;
- (17) section 872 regarding the reorganization authority of the Secretary;
- (18) subsection 1114(c)(2) regarding the availability of funds for an Explosives Training and Research Facility;
- (19) section 1502 regarding a departmental reorganization plan;
- (20) section 1511 regarding transitional authorities; and
- (21) section 1516 regarding incidental transfer and dispositions of personnel, assets, and liabilities.

DIVISION M—OTHER MATTERS

TITLE I—DEFENSE RELATED TECHNICAL CORRECTIONS

The Committee has included several technical corrections to enacted fiscal year 2003 appropriations acts. These correct errors or omissions made in either the Department of Defense Appropriations Act, 2003 (Public Law 107–248) or the Military Construction Appropriation Act, 2003 (Public Law 107–249).

Section 101 specifies a sum available to settle disputes related to a land taking at the Army Tooele Depot.

Section 102 provides authority to allow for the scrapping of ships.

Section 103 clarifies the cost cap related to Partnership for Peace activities.

Section 104 makes funds available to the Air Force's reserve component instead of the Air Force's active component.

Section 105 clarifies the purpose of funds available for land acquisition at Nellis Air Force Base.

Section 106 revises the expense/investment threshold for items purchased with Operation and maintenance funds.

Section 107 transfers \$104,000,000 based upon an urgent reprogramming request (fiscal year 2003–02 PA) received from the Department of Defense. The \$13,900,000 trans-

ferred from Research, Development, Test & Evaluation, Defense-Wide, 2003/2004, is to be sourced only from sea-based mid-course defense X-band radar. The \$10,100,000 transferred from Procurement of Ammunition, Army, 2002/2004, is to be sourced only from Budget Activity 1 for close-out liability and items less than \$5,000,000.

Section 108 provides authority for a grant to aid in the Quecreek Mine disaster rescue and recovery efforts.

Section 109 provides additional appropriations for the Department of Defense. The purposes for which these funds are appropriated are described in the classified annex.

REPROGRAMMING LIMITATIONS

The Committee recognizes that current thresholds below which the Department of Defense may reprogram funds without requiring the prior approval of the congressional defense committees were established in 1961. These limitations have not been significantly modified over the past twenty years nor kept pace with inflation.

The Committee recommends increasing these below threshold reprogramming ceilings. The Department shall submit a Prior Approval reprogramming request, DD Form 1415-1, in those instances when reprogramming of funds exceed the following thresholds:

- An increase of \$20,000,000 or more in any budget activity in Military Personnel.
- An increase of \$20,000,000 or more in any budget activity in Operation and Maintenance.
- An increase of \$20,000,000 for any program year for a Procurement line item.
- An increase of \$10,000,000 for any program year for a Research, Development, Test and Evaluation program element.

Each of the reprogramming ceilings described above reflects aggregate levels of reprogramming activity within Military Personnel or Operation and Maintenance budget activities, Procurement line items, and Research, Development, test and Evaluation program elements.

The reprogramming of funds below these ceilings shall not increase lines specifically

reduced by congressional action or decrease congressional interest items. No below threshold decrease may exceed twenty percent of congressional levels for each budget activity, procurement line, or program element. Below threshold reprogramming may restore non-specific reductions to the original level of the budget request or the level determined in account tables, whichever is less.

TITLE II—PRICE ANDERSON ACT AMENDMENTS

The Committee recommendation includes the Price-Anderson Amendments Act of 2002 which provides an extension of indemnification authority to certain Nuclear Regulatory Commission licensees, Department of Energy contractors, and nonprofit educational institutions.

DIVISION N—EMERGENCY RELIEF AND OFFSETS

TITLE I—ELECTION REFORM

Section 101 establishes a grant program to improve the administration of Federal elections.

TITLE III—WILDLAND FIRE EMERGENCY APPROPRIATION

The Committee has provided a total of \$825,000,000, as requested by the President, to repay funds which were advanced from various Forest Service and Department of the Interior accounts during wildfire suppression emergencies in fiscal year 2002. Specifically, this title provides funds to repay \$636,000,000 of the total amount borrowed by the Forest Service and would repay \$189,000,000 of the total amount borrowed by the Department of the Interior.

TITLE VI—OFFSETS

The Committee recommends an across-the-board rescission of ____ percent to the eleven appropriations bills contained in divisions A through K of this joint resolution. This rescission offsets the budget authority added in this division.

N O T I C E

Incomplete record of Senate proceedings. Senate proceedings for today will be continued in Part II
