

hate crimes legislation; they have shown it by cutting funding on programs that would provide meaningful opportunities, especially in education, especially in those areas where with additional investment we could help those who are disenfranchised and disadvantaged; they have shown it in their rulings in the Justice Department; they have shown it on virtually every single occasion when actions spoke louder than words. But of all of the times they have shown it, I don't know that they could have shown it any more unequivocally than they have shown it this afternoon.

So as I said, I am troubled, disheartened, and I am still looking for evidence that this administration truly means what it says; that this administration is willing to support by actions, rather than just by its rhetoric, meaningful change in civil rights and diversity in this country today.

THE OMNIBUS APPROPRIATIONS BILL

Mr. DASCHLE. Mr. President, I note that we are about ready to move to the omnibus appropriations bill. I know Senator BYRD is on the floor and we are awaiting Senator STEVENS. I must say that we have not yet seen the bill. So it will be very difficult for us to speak to the bill or amend the bill until we have had an opportunity to see it. This is an unusual situation in that we are taking a bill that really represents 11 appropriations bills to the floor in this manner. But I, as Senator BYRD, believe it is important for us to continue to get our work done and to move this process along. So I will not object, of course, to moving to the bill.

It is my understanding that deep cuts were made in a number of areas—in fact, across the board—to accommodate investments in election reform, drought assistance, and maybe other things. But we will not know until we see it. We will certainly have amendments, as I noted this morning. We will amend the bill in ways we have expressed earlier. Senator BYRD will have amendments on homeland defense. We will have amendments on education. We will certainly have amendments relating to other shortcomings in the dramatic cuts that will be reflected in this bill.

This cut across the board is doubly troubling to us. It may mean a significant cut in funds for veterans, for kids, for transportation. Before we come to any final conclusion, obviously, we need to see the details. It is my hope that we can begin the debate, look at the legislation, and, as we become more knowledgeable about the bill itself, offer amendments.

So I expect that could begin this afternoon, and I look forward to seeing the bill just as soon as our Republican friends can share it with us.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Ms. COLLINS). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FRIST. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—H.J. RES. 2

Mr. FRIST. Madam President, I ask unanimous consent the Senate now proceed to the consideration of H.J. Res. 2; further, that immediately upon the reporting of the bill Senator STEVENS be recognized in order to make his opening statement; I further ask unanimous consent that following the remarks of Senator STEVENS, Senator BYRD be recognized for an opening statement only; further, following those remarks, Senator STEVENS be recognized to offer an amendment; provided that the amendment be agreed to and be considered original text for the purpose of further amendment, with no points of order waived. I further ask unanimous consent that following any comments by Senator STEVENS, Senator BYRD be recognized in order to offer a first-degree amendment relating to homeland security; further, that when the Senate resumes consideration of the joint resolution tomorrow at 10 a.m., there be an additional 2 hours for debate, equally divided in the usual form, in relation to the pending Byrd amendment; provided further that following the use or yielding back of time, the Senate proceed to a vote in relation to the Byrd amendment with no second-degree amendments in order to the amendment prior to the vote. I would finally ask unanimous consent that following the disposition of any additional amendments and the completion of any additional debate, the resolution be read a third time and the Senate proceed to a vote on passage of the resolution, provided further that following passage, the Senate insist on its amendment, request a conference with the House, and the Chair be authorized to appoint conferees on the part of the Senate and that the conferees be the entire Appropriations Committee as proposed by the committee resolutions, with 15 Republicans and 14 Democratic members.

The PRESIDING OFFICER. Is there objection?

Mr. REID. Reserving the right to object, Madam President, on just a couple of housekeeping matters, I ask the majority leader, it appears we will have no morning business in the morning?

Mr. FRIST. That is correct.

Mr. REID. And it appears there will be no further rollcall votes tonight; the next vote will be tomorrow at noon.

Mr. FRIST. That is the understanding that is in the unanimous consent request.

The PRESIDING OFFICER. Is there objection to the unanimous consent request? Without objection, it is so ordered.

MAJORITY PARTY APPOINTMENTS

Mr. FRIST. Madam President, let me also give my colleagues a very short update on progress made on the committee resolutions. As I said earlier, I think I said it last night and this morning, and I will say it once again, we are making progress. We are making progress, again, in a very cooperative, bipartisan way. I mentioned my previous conversations with the Democratic leader have set as our goal to have these committee resolutions passed as soon as possible, and everybody is working in good faith.

I am very hopeful that tonight—as they say, in 10 minutes, in 15, or in 30 minutes, but whenever final agreement is reached—I will come to the floor and I will be able to do that, and I expect to be able to do that by unanimous consent.

Again, it is confusing to people because we have the underlying committee resolutions. But by unanimous consent agreement, we are proceeding with this very important appropriations proposal and bill. I am glad we are addressing that. Again, we are making progress on that.

Mr. BYRD. Madam President, I would like to ask a question of either the manager of the bill or the majority leader.

According to the agreement, an up-or-down vote did not seem to be agreed to on the amendment.

Mr. STEVENS. No. We have agreed to have an up-or-down vote on the amendment.

Mr. BYRD. I thank the Senator.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is now closed.

MAKING FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 2003

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res 2) making further continuing appropriations for the fiscal year 2003, and for other purposes.

The PRESIDING OFFICER. Under the previous order, the Senator from Alaska is recognized.

Mr. STEVENS. Madam President, because of the circumstances, I really don't have a prepared statement. I wish to outline for the Senate how we intend to proceed. We have been working for some time trying to obtain a process by which we could proceed to act on the 11 appropriations bills for the fiscal year 2003 which were not completed by the end of the last Congress.

I commend my good friend from West Virginia and his staff for assistance in working with us to work out this procedure. These bills that will soon be included in an omnibus amendment to

this continuing resolution are familiar to the Senate. We worked on them throughout the last year. And I wish to say that to the best of my knowledge the components of this bill, except for one portion, were worked on on a bipartisan basis by the staffs of the 11 subcommittees that handled these 11 bills. I can't say that there has been total agreement on the part of anybody as to what we have done, but we have proceeded to reduce the 11 bills that were involved to the amount of the President's request, which was \$750.5 billion, plus an amount that is represented by a budget request for the fire items that are included in the bill of \$825 million. In doing so, we come down considerably in many of these bills.

But I point out to the Senate that the Government has been operating under the CRs that have been passed since October 1. All of the agencies affected by these bills have been operating on the basis of the 2002 appropriations level—the enacted level of funds for those agencies. If we do not finish these bills now, they will continue to act under the 2002 level until obviously we do something to take us down to the end of this fiscal year.

I have taken the position that the sooner we can enact these 11 bills the better off all the agencies are, and the better off the Congress is because our job is to turn to the requirements of the law to deal with the fiscal year 2004 bills through the budget process and through the consideration of the 13 bills that we have in the Appropriations Committee through the individual subcommittees and get them done this year—God willing—according to the normal schedule and before September 30. We cannot do that if we labor over these bills intensively for a period of time.

I am pleased to say that everyone concerned has been very cooperative, and, above all, the members of the Appropriations Committee on both sides of the aisle have worked hard to get us where we are today.

The amendment that I will soon present contains not only that portion that I mentioned in terms of a series of bills but it contains the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies appropriations for fiscal year 2003. It provides budget authority for Agriculture, rural development, and the nutritional programs.

There is in this bill \$670.4 million—more than the President's request—and more than \$1.1 billion more than 2002.

I have a whole series of highlights on this bill. I don't want to take the time of the Senate to outline the individual ones. We will do that as we proceed on the bill. There are definitely needs for the programs for each of these items.

The second bill we have is the Commerce, State, Justice and related agencies appropriations bill. Again, this is the recommendation of the subcommittee as adjusted by the process I

just outlined. It is approximately \$2.5 billion above the 2002 enacted funding level.

These, of course, are a series of highlights. I may later ask to put them all in the RECORD as part of my opening statement. I want to review these outlines later. I do not make that request now.

We also have the District of Columbia appropriations bill. It makes appropriations for the District of Columbia. It is an item that is substantially higher than the President's request. It is a total of \$512 million in discretionary budget authority for the District of Columbia.

We have the energy and water appropriations bill. It recommends \$26.164 billion for 2003. It exceeds the President's request by \$649 million, and it exceeds the 2002 level by \$900 million.

We have the foreign operations bill among the 11 included in this amendment. This bill is \$221 million below the President's request. It is also below the fiscal year 2002 level by \$73.5 million.

The Department of the Interior bill provides \$19.18 billion in total discretionary budget authority—an increase of \$641 million over the enacted level of 2002. It is \$36 million over the President's budget request for 2003.

The Labor-Health and Human Services bill deals with the President's request, which was \$131.9 billion. This bill as recommended by my amendment will be \$131.3 billion. The details will be in the items that I will put in the RECORD.

On the Department of Transportation and related agencies, we recommend \$64.6 billion for 2003. This is \$9.4 billion more than the President's request of \$55.2 billion. I do not have a figure above the 2002 level. I will put it in the RECORD later.

We have the Treasury and general government appropriations bill. This provision is in the bill at \$34.5 billion. The President's request was \$34.2 billion, and the 2002 level was \$32.8 billion. This is another area where it is above the President's request.

The last section is the section that deals with items that have been added to the 13 bills. One is to fund the election reform bill that was enacted in the last Congress. The maximum authorized level for that program for 12 months for fiscal 2003 was \$2.35 billion. For the remainder of the bill, this amendment that I offer will fund election reform at \$1.5 billion.

For drought relief, we have set a target of \$3.1 billion. The provisions of the bill as presented by the Agriculture Committee and others will adjust the mandatory programs in order to provide relief for the drought that has occurred.

We also have a provision dealing with Medicare adjustments, dealing with physicians' payments and payments for rural hospitals. The total amount would be \$1.6 billion. These items would be offset by a 1.6-percent across-the-board cut on the other 11 bills.

We have done our best to present to the Senate—I have, working with the members of the committee and their staffs—a bill to meet the requirements of the administration, to meet the requirements of the agencies, and to present a bill that can be taken to conference and worked out with the House in conference.

Madam President, I point out, the House has not passed any bills. The House has passed this continuing resolution, to give us a House-passed bill, to return this bill to the House for their consideration. We are hopeful that the House will enact its own version and send it to conference. As has been outlined already by the unanimous consent agreement that is in place, we will seek a conference with the House at the earliest possible time.

I urge Senators to consider the problem we face, and that is the problem of catching up with the bills we should have enacted last year. I point no fingers as to reasons we did not. The Senate Appropriations Committee, under the chairmanship of Senator BYRD, did report out all the bills. We were prepared to act, but circumstances at that time made it impossible for us to pass those bills.

Under the circumstances now, we cannot afford the process of passing separate bills, facing vetoes or veto threats, and having bills go back and forth between the Houses. If we are going to catch up and start the process of dealing with the 2004 appropriations, as is our duty in this new Congress, we must put these requests of the past, for the remainder of this fiscal year, in place. We must pass this amendment or something similar to it as soon as is possible, as soon as the Congress can agree and the President will concur with our actions.

I will say, I have discussed this at length with the Office of Management and Budget. I cannot say they approve of what we are doing, but I can say they approve of the fact that we are doing something. So that is what I am asking the Senate to do tonight, to start the process of doing something on these accumulated items that must be faced by this Congress as quickly as possible.

Madam President, I ask unanimous consent to have printed in the RECORD summaries from which I read partially.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, FY 2003

The bill provides \$74.2 billion in total obligational budget authority for agriculture, rural development, and nutrition programs for FY 2003. This is \$670.4 million more than the President's budget request and \$1.1 billion more than FY 2002.

Of this total, \$17.4 billion is discretionary spending and the remainder is mandatory spending for such programs as food stamps (\$26.3 billion), child nutrition (\$10.6 billion), payments to the Federal Crop Insurance Corporation fund (\$2.9 billion) and the Commodity Credit Corporation (\$16.3 billion).

The bill continues to fund rental payments to the General Services Administration (GSA) in the United States Department of Agriculture's (USDA's) buildings and facilities account. The President's budget proposes to fund rental costs in the budgets of each USDA agency.

Over half (56%) of the FY 2003 spending in this bill (\$41.9 billion) is devoted to domestic food assistance (Title IV of the bill): food stamps, child nutrition, WIC (supplemental nutrition program for women, infants, and children), commodity and other food assistance programs.

HIGHLIGHTS

HIGHLIGHTS FROM TITLE I, AGRICULTURAL PROGRAMS

The bill provides \$986.9 million in appropriations for Farm Service Agency salaries and expenses, an increase of \$47.9 million over the fiscal year 2002 level. This amount is supplemented by \$281 million in transfers from other USDA program accounts for a total amount of \$1.278 billion.

The bill provides \$4.07 billion in authorized loan levels for agricultural credit programs for farmers, \$175 million more than the fiscal year 2002 level.

Funding for the Food Safety and Inspection Service is \$759.8 million, an increase of \$44 million from last year.

Agricultural research, education, and extension activities total \$2.3 billion. This includes a decrease of \$18.0 million for Agricultural Research Service (ARS) buildings and facilities, an increase of \$74.1 million for research activities for ARS, and a \$128.2 million increase in total funding for the Cooperative State Research, Education, and Extension Service (CSREES). The ARS is provided \$1.15 billion, and activities of the CSREES are funded at a level of \$1.16 billion.

The Committee provides \$16.3 billion in mandatory payments required to reimburse the Commodity Credit Corporation (CCC) for net realized losses.

HIGHLIGHTS OF TITLE II, CONSERVATION PROGRAMS

The bill provides a total funding level of \$1.04 billion for the various conservation programs of the Department of Agriculture. This is an increase of \$74.6 million from the regular appropriations for fiscal year 2002. Funding of \$840 million is provided for the conservation operations account of the Natural Resources Conservation Service. This is \$61 million above the fiscal year 2002 level.

HIGHLIGHTS OF TITLE III, RURAL DEVELOPMENT

Rural housing loan authorizations are \$3.9 billion. This is \$553.6 million less than the fiscal year 2002 level.

Funding for rural rental assistance is \$730 million, an increase of \$28 million from the fiscal year 2002 level.

Funding for the Rural Community Advancement Program, which includes funds for water and waste disposal loans and grants, solid waste management grants, community facility loans and grants, and rural business enterprise grants, is increased to \$867.2 million. This is \$60.6 million above the fiscal year 2002 level.

HIGHLIGHTS OF TITLE IV, DOMESTIC FOOD PROGRAMS

The bill provides \$10.6 billion for child nutrition programs.

Funding for the Food Stamp program totals \$26.29 billion. This amount includes a \$2 billion reserve, \$140 million for the emergency food assistance program, and \$1.377 billion for nutrition assistance for Puerto Rico.

The Special Supplemental Feeding Program for Women, Infants, and Children (WIC) is funded at \$4.751 billion. This is an increase

of \$403 million from the fiscal year 2002 level and the same as the President's budget request.

The Commodity Assistance Program is funded at \$167 million.

As proposed in the President's budget, the Department of Health and Human Services will fund the elderly feeding program beginning in fiscal year 2003. Funding is no longer provided to the Department of Agriculture for this program.

HIGHLIGHTS OF TITLE V, FOREIGN ASSISTANCE PROGRAMS

Funding for salaries and expenses for the Foreign Agricultural Service is \$135.4 million, \$9.4 million more than the fiscal year 2002 level.

Public Law 480 programs are funded at the following program levels: Title I—\$154.7 million; and Title II—\$1.185 billion, \$335 million more than the fiscal year 2002 level.

HIGHLIGHTS OF TITLE VI, FDA AND RELATED AGENCIES

Total direct appropriations for the Food and Drug Administration (FDA) is \$1.4 billion, which is \$25.4 million more than the fiscal year 2002 level.

Total funding for the Commodity Futures Trading Commission is \$93.98 million, \$6 million more than the fiscal year 2002 level.

BILL PROVISIONS

TITLE I—AGRICULTURAL PROGRAMS

Total Funding: Title I provides a total of \$25.5 billion in mandatory and discretionary funding for various agricultural programs. Of this total, \$16.3 billion is for the Commodity Credit Corporation and \$2.9 billion is for the Federal Crop Insurance Corporation fund. The remainder funds the agricultural research, executive operations, agricultural marketing services, cooperative state research, extension service, animal and plant health inspection, food safety and inspection, and farm assistance programs.

Commodity Credit Corporation (CCC): Funds CCC at such sums as may be necessary, estimated in the budget to be \$16.3 billion for net realized losses incurred from the commodity price and farm income support activities. This is \$4 billion less than the estimated fiscal year 2002 level.

Federal Crop Insurance Corporation Fund: Recommends an appropriation of such sums as necessary, estimated to be \$2.9 billion. This is \$13.8 million less than the estimated fiscal year 2002 level.

Food Safety and Inspection Service (FSIS): The bill provides \$759.8 million in direct appropriations, which is \$44 million more than the fiscal year 2002 level.

Farm Service Agency (FSA): The bill provides \$1.27 billion for Farm Service Agency Salaries and Expenses, an increase of \$55 million over the fiscal year 2002 level.

Farm Credit Programs: The bill provides an estimated \$4.1 billion for farm loans, \$175 million more than the fiscal year 2002 level. Included in this amount is \$1.147 billion for farm ownership direct and guaranteed loans and \$2.817 billion for farm operating direct and guaranteed loans.

Research and Extension: Agricultural research and extension programs are increased \$74.1 million from the fiscal year 2002 levels. Appropriations recommended for the Agricultural Research Service total \$1.15 billion. For the Cooperative State Research, Education, and Extension Service, \$1.16 billion is recommended, including \$651 million for research and education activities, \$453 million for extension activities, and \$48 million for integrated activities.

Animal and Plant Health Inspection Service (APHIS): The Animal and Plant Health Inspection Service is funded at \$748.8 million.

Agriculture Marketing and Inspection: The Agricultural Marketing Service is funded at \$91.7 million and the Grain Inspection, Packers and Stockyards Administration is funded at \$44.5 million.

TITLE II—CONSERVATION PROGRAMS

Conservation Programs: The bill increases funding to \$1.04 billion for the Natural Resources Conservation Service, which is a \$74 million increase from the fiscal year 2002 regular appropriations bill. Within the Natural Resources Conservation Service \$840 million is included for conservation operations, \$10.96 million for watershed surveys and planning, \$105 million for watershed and flood prevention operations, \$30 million for watershed rehabilitation, and \$50 million for resource conservation and development.

TITLE III—RURAL ECONOMIC AND COMMUNITY DEVELOPMENT PROGRAMS

Rural Housing and Community Development: The total funded rural housing loan authorization level is \$3.93 billion, including \$3.76 billion for single-family housing direct and guaranteed loans, \$120 million for rental housing loans, and \$35 million for housing repair loans. No funding is recommended for multi-family housing guaranteed loans.

Rural Rental Assistance: Funding for rural rental assistance is \$730 million, \$28 million more than the fiscal year 2002 level.

Rural Community Advancement Program (RCAP): Funding for the Rural Community Advancement Program (RCAP), which includes funds for water and waste disposal loans and grants, solid waste management grants, community facility loans and grants, and rural business enterprise grants, is increased \$60.6 million from the fiscal year 2002 level to \$867.2 million.

Rural Electric and Telecommunications: The bill funds a total rural electric and telecommunications loan level of \$5.6 billion, \$1 billion more than the fiscal year 2002 level.

Distance Learning and Telemedicine Program: A funding level of \$52 million is provided for the Distance Learning and Telemedicine program for grants and loan subsidy costs, which supports a \$129.5 million loan level.

TITLE IV—DOMESTIC FOOD PROGRAMS

Food Stamp Program (FSP): Funding for the Food Stamp program totals \$26.29 billion. This amount includes a \$2 billion reserve, \$140 million for the emergency food assistance program, and \$1.377 billion for nutrition assistance for Puerto Rico.

Women, Infants and Children (WIC) Feeding Program: Recommends an appropriation of \$4.751 billion for WIC, which is \$403 million more than the fiscal year 2002 level and the same as the budget request. This amount includes a \$125 million contingency reserve and \$25 million for the farmer's market nutrition program.

Child Nutrition Programs (CNP): To improve the health and well-being of the nation's children, the child nutrition programs include school breakfast and lunch programs, child and adult care food programs, summer food services, and nutrition education and training programs. In addition, the special milk program provides funding for milk service in schools, nonprofit child care centers, and camps which have no other federally assisted food programs. For these programs, the Committee provides an appropriation of \$5.8 billion, plus a transfer from section 32 of \$4.7 billion, for a total program level of \$10.6 billion, which is \$492.9 million more than the fiscal year 2002 level.

Commodity Assistance Program (CAP): The Commodity Assistance Program is funded at \$167 million.

Food Donations Programs: As proposed in the President's budget, the Department of

Health and Human Services will fund the elderly feeding program beginning in fiscal year 2003. Funding is no longer provided to the Department of Agriculture for this program.

TITLE V—FOREIGN ASSISTANCE AND RELATED PROGRAMS

Foreign Agricultural Service: The Committee provides \$135.5 million, which is a \$9.4 million increase from the fiscal year 2002 level.

Public Law 480 (Food for Peace): The bill appropriates \$1.3 billion for Public Law 480 accounts, which serve as the primary means for the U.S. provision of food assistance overseas. A total program level of \$1.185 billion is for grants under Title II for food aid for humanitarian relief through private voluntary organizations or through multilateral organizations like the World Food Program, an amount which is a \$335 million increase from the fiscal year 2002 level. It further funds a Title I direct loan level of \$154.7 million (the same as the fiscal year 2002 level) and appropriates \$25.2 million for ocean freight differential costs.

TITLE VI—FDA AND RELATED AGENCIES

Food and Drug Administration (FDA): Funding for salaries and expenses of the Food and Drug Administration totals \$1.632 billion. This is \$135 million more than the fiscal year 2002 level, and includes an increase of \$48.7 million in new budget authority from the fiscal year 2002 level (including supplemental emergency appropriations), a \$61 million increase in prescription drug user fee collections, and \$25.1 million in new medical device user fee collections. The FDA buildings and facilities account is funded at \$11 million.

Commodity Futures Trading Commission: Appropriates \$93.9 million, which is \$23.3 million more than the fiscal year 2002 level. Increased funding is provided for pay comparability with other Federal financial institutions.

Farm Credit Administration: Recommends a limitation on administrative expenses of \$38.4 million, which is \$1.7 million above the fiscal year 2002 administrative expense limitation.

TITLE VII—GENERAL PROVISIONS

Total appropriations of \$2,496 million are appropriated for Bill Emerson and Mickey Leland Hunger Fellowships through the Congressional Hunger Center.

The bill continues a provision to allow proprietary centers to participate in the Child and Adult Care Feeding Program if at least 25 percent of the children served are eligible to receive a free or reduced-price meal, at a cost of \$22 million.

Limitations are established on mandatory funding for sections 2505, 6030, 6405, and 9010 of P.L. 107-171, as well as the export enhancement program.

COMMERCE, JUSTICE, STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS BILL FOR FY 2003

Noteworthy:

The recommendation for the Commerce, Justice, State, the Judiciary, and related agencies appropriation bill for fiscal year 2003 is \$47.1 billion. This is approximately \$2.5 billion above the fiscal year 2002 funding level. The President's budget request for fiscal year 2003 was \$44.0 billion.

Bill Highlights:

This bill makes appropriations for the Departments of Commerce, Justice, State, the Judiciary, and related agencies for the period of October 1, 2002 through September 30, 2003. The bill provides funding to combat terrorism, fight crime, enhance drug enforcement, address the shortcomings of the immi-

gration process, support the judicial process, manage the commerce of the United States, improve State Department operations, and fulfill the needs of the independent agencies that fall under the Subcommittee's jurisdiction.

The following are just a few of the initiatives within this bill:

Fighting Terrorism: The bill provides funding to allow State and Local first responders to purchase equipment and undergo training necessary to prevent and respond to acts of terrorism. The bill also addresses the root causes of terrorism by promoting democracy in underdeveloped regions of the world.

Protecting America's Children: The bill includes funding to protect our children in their schools. This effort includes training School Resource Officers to prevent and deter acts of terrorism. Funding is also provided to enhance the security of schools attended by American children overseas.

Protecting Small Investors: The bill allows the Securities and Exchange Commission to hire at least 700 new staff to pursue corporate malfeasance and financial fraud, ensure enhanced public disclosure by corporations and stock analysts, and expand its examination and inspection program.

Justice: \$24.1 billion

\$284.2 million for Anti-Terrorism, Joint Terrorism, and Foreign Terrorist Tracking Task Forces, \$3.9 billion for the FBI, \$1.5 billion for the DEA, \$5.7 billion for the INS, \$2.0 billion for training, equipment, exercise, and research and development programs to combat domestic terrorism, \$1.4 billion for State and local law enforcement grants.

Commerce: \$6.0 billion

\$100.2 million for BIS, \$72.2 million for economic and statistical analysis, \$559.0 million for the Census Bureau, \$73.5 million for NTIA, \$1.2 billion for the PTO, \$721.2 million for NIST, \$3.3 billion for NOAA.

Judiciary: \$5.0 billion

\$97.7 million for the Supreme Court, including renovation of the building and grounds, \$276.3 million for court security.

State: \$7.2 billion

\$3.6 billion for Diplomatic and Consular Program, \$296.0 million for information technology initiatives, \$237.9 million for educational and cultural exchange programs, \$1.3 billion for embassy security and construction, \$1.5 billion for U.S. obligations to international organizations and peacekeeping, \$470.2 million for international broadcasting activities.

Related Agencies:

\$320.4 million for the EEOC, \$275.4 million for the FCC, \$175.1 million for the FTC, \$329.4 million for Legal Services Corporation, \$656.7 million for the SEC, \$788.5 million for SBA.

DISTRICT OF COLUMBIA APPROPRIATIONS BILL FOR FY 2003

Noteworthy:

FY'03 Senate Recommendation—\$512 million, FY'03 President's Request—\$378.8 million, FY'02 Enacted—\$608 million.

Bill Highlights:

Makes appropriations for the government of the District of Columbia for the period of October 1, 2002 through September 30, 2003.

\$10 million for hospital bioterrorism preparedness in the District—These funds will begin to prepare the District's hospitals for a possible attack that may include the use of biological, chemical, radiological, and nuclear weapons, as well as high yield explosives. Funds will be used for the construction of decontamination and quarantine facilities at Children's Hospital and Washington Hospital Center.

\$20 million for DC charter school facilities—These funds will support a credit en-

hancement fund to assist charter schools in securing financing, a direct loan program for facilities, and a per-pupil facilities allocation.

\$166 million for the DC Courts—Of this amount, \$31.2 million will support the Family Court.

\$55 million for the Anacostia Waterfront Initiative. Most of these funds will be used to begin to clean up the severely-polluted Anacostia River in order to attract development and recreation to this area.

\$17 million for DC resident tuition support—These funds allow DC residents to attend State schools at the in-State tuition rate.

\$15 million for Emergency planning and security costs in the District.

ENERGY & WATER APPROPRIATIONS BILL FOR FY2003

Noteworthy:

The Senate bill in total recommends \$26,164 billion for FY03. The Senate bill exceeds the President's request by \$649 million. The Senate bill exceeds the FY02 level by \$900 million.

Bill Highlights:

Army Corps of Engineers; The Senate bill provides \$4.55 billion that is, \$375 million above the President's request, \$61 million above the FY02 bill.

Bureau of Reclamation and related Interior accounts, The Senate bill provides \$956 million, which is, \$75 million above the President's request, \$41 million above the current year level.

Department of Energy, The Senate bill provides \$20.93 billion, which is, \$31 million over the President's request, \$960 million over the current year level.

MAJOR HIGHLIGHTS WITHIN THE DEPARTMENT OF ENERGY

NNSA Weapons Activities (Stockpile Stewardship), The Senate bill provides \$6.1 billion, which is, \$242 million over the President's request, \$543 million over the current year level.

NNSA Nonproliferation activities, The Senate bill provides \$1.1 billion, which is, \$2 million over the President's request, \$14 million below the current year level.

Environmental clean-up, The Senate bill provides \$7.3 billion, which is, \$141 million below the President's request, \$174 million above the current year level.

Nuclear Waste Disposal (Yucca Mountain), The Senate bill provides \$336 million, which is, \$255 million below the President's request, \$39 million below the current year level.

Renewable Energy R&D, The Senate bill provides \$448 million, which is, \$41 million above the President's request, \$52 million above the current year level.

Nuclear Energy R&D, The Senate bill provides \$324 million, which is, \$75 million above the President's request, \$48 million above the current year level.

Science Research, The Senate bill provides \$3.33 billion in basic scientific research, which is, \$50 million more than the President's request, \$96 million above the current year level.

INDEPENDENT AGENCIES

The bill provides \$74 million for the Appalachian Regional Commission, an increase of \$8 million over the President's request and \$3 million over the current year.

The bill provides \$15 million for the Delta Regional Authority, an increase of \$5 million over the President's request and \$5 million over the current year.

The bill provides a total budget of \$585 for the Nuclear Regulatory Commission, the same as the budget request and an increase of \$62 million over the current year.

FOREIGN OPERATIONS APPROPRIATION BILL
FOR FY 2003*Noteworthy:*

The FY 2003 bill provides \$16,249,314,000 in discretionary funds for Foreign Operations, Export Financing and Related Programs. This is \$221,418,000 below the President's FY 2003 request of \$16,470,732,000, and \$73,586,000 below the FY 2002 enacted level.

Bill Highlights:

The bill includes the FY 2003 Economic Support Fund (ESF) and Foreign Military Financing (FMF) requests for the Camp David countries: \$600,000,000 and \$2,100,000,000, respectively, for Israel; and, \$615,000,000 and \$1,300,000,000, respectively, for Egypt. The bill also includes \$250,000,000 in ESF and \$198,000,000 in FMF assistance for Jordan, and \$75,000,000 in ESF assistance for the West Bank and Gaza.

The bill provides a total of \$220,000,000 for assistance for Afghanistan from all accounts, including \$5,000,000 for women's development activities.

The bill provides \$530,000,000 for the Assistance for Eastern Europe and Baltic States (SEED) account and \$765,000,000 for the Assistance for Independent States of the former Soviet Union (FSA) account, an increase of \$35,000,000 and \$10,000,000, respectively, over the FY 2003 request.

The bill provides \$1,790,000,000 for the Child Survival and Health Programs Fund—an increase of \$356,500,000 over the FY 2002 enacted level—of which \$791,500,000 is for assistance for HIV/AIDS programs, including \$50,000,000 for the President's International Mother and Child HIV Prevention Initiative and \$200,000,000 for a contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria.

The bill provides \$650,000,000 for the Andean Counterdrug Initiative (ACI)—an increase of \$25,000,000 over the FY 2002 enacted level. The bill also provides the authority to transfer \$35,000,000 from the International Narcotics Control and Law Enforcement account to the ACI, resulting in an appropriation to ACI that is \$46,000,000 lower than the FY 2003 request.

The bill provides \$80,000,000 for International Military Training and Education Programs which equals the FY 2003 request. It also includes \$4,072,000,000 for Foreign Military Financing grants, which is \$35,000,000 below the FY 2003 requested level.

The bill restricts \$75,000,000 for assistance for the Korean Peninsula Energy Development Organization (KEDO). The President may waive this restriction and provide up to \$3,500,000 to KEDO, if he determines that it is vital to national security interests to do so, and provides a written policy justification to appropriate congressional committees.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATION BILL FOR FY 2003

Noteworthy:

The bill provides \$19 billion in total discretionary budget authority. The omnibus package contains \$825 million to repay amounts borrowed in FY 2002 for wildland fire suppression.

Bill Highlights:

The bill makes appropriations for the Department of the Interior (except the Bureau of Reclamation), the Forest Service, portions of the Department of Energy, the Indian Health Service, and various related agencies for the period of October 1, 2002 through September 30, 2003.

Interior: \$9.43 billion

\$1.86 billion for the Bureau of Land Management. The amount provided restores the \$45 million cut proposed in the budget for Payments in Lieu of Taxes (PILT).

\$1.21 billion for the U.S. Fish and Wildlife Service. The amount provided increases Fish and Wildlife Service operating programs by \$52 million, including a \$46 million increase specifically for refuge operations and maintenance.

\$2.29 billion for the National Park Service, including increases of \$50 million for park maintenance and \$30 million for park operations (\$15 million over the request). The bill provides the full increase requested (\$16 million) for the Natural Resource Challenge; an effort to better document and understand the natural resources present in the park system.

\$915 million for the U.S. Geological Survey, an increase of \$47 million over the budget request. Reinstates cuts for water programs proposed in the budget request.

\$170 million for the Minerals Management Service.

\$297 million for the Office of Surface Mining and Reclamation Enforcement, including an increase of \$18 million to restore a portion of cuts proposed for the abandoned mine land reclamation program.

\$2.27 billion for the Bureau of Indian Affairs, including \$554 million for Indian education programs and \$296 million for Indian education construction. Rejects administration proposed decrease for Tribal Community Colleges by adding \$4 million over the budget request (\$2 million over enacted level).

The Senate bill fully funds increases requested for Indian trust reform in both the Bureau of Indian Affairs and the Office of the Special Trustee.

Forest Service: \$3.95 billion

\$1.35 billion for Forest Service operations, an increase of \$22 million. Rejects research reorganization proposed in the budget request, and funds new Pest and Pathogen fund (\$14 million) to allow the Forest Service to respond to forest health concerns in an expedited manner.

Provides funding for wildland fire suppression by the Forest Service and the Bureau of Land Management at the 10 year average level (\$421 FS/\$160m BLM). The bill also provides \$415 million for Hazardous Fuels Reduction work by the Forest Service and BLM, a level slightly above the budget request and \$20 million over the FY 2002 level.

The bill also includes \$825 million (\$189m DOI/\$636m FS) in supplemental funds to repay amounts borrowed from other accounts in FY 2002 to pay for wildland fire suppression. This amount is equal to the amount requested by the Administration, but less than the \$1.25 billion in total borrowing.

Department of Energy: \$1.76 billion

\$626 million for Fossil Energy R&D (including \$150 million for Clean Coal).

\$884 million for Energy Conservation, including \$225 million for the Weatherization Assistance Program and \$45 million for State Energy Grants.

\$80 million for the Energy Information Administration.

\$179 million for the Strategic Petroleum Reserve and Northeast Home Heating Oil Reserve.

Indian Health Service: \$2.82 billion

Increases funding for Indian Health Service by \$62 million over enacted level.

Other Related Agencies:

\$531 million for the Smithsonian Institution. The bill provides the Smithsonian with an additional \$6 million to complete the National Museum of the American Indian on the Mall.

\$93 million for the National Gallery of Art, including funds to restore cuts proposed in the Special Exhibitions program.

\$34 million for the John F. Kennedy Center for the Performing Arts.

\$116 million for the NEA and \$126 million for the NEH.

LEGISLATIVE BRANCH APPROPRIATION BILL
FOR FY 2003*Noteworthy:*

The bill totals \$2.34 billion. It is \$66 million below the request level and \$66 million above the FY02 enacted level. Increases are aimed primarily at security-related requirements.

Bill Highlights:

The Legislative Branch bill provides funding for the Senate and all legislative branch support agencies including the Library of Congress, the General Accounting Office, Capitol Police, and the Architect of the Capitol.

Senate: \$667.6 million

Funds are provided to accommodate cost-of-living increases and security-related requirements.

Joint Items: \$17 million

Includes \$3.66 million for the Joint Economic Committee, \$7.3 million for the Joint Committee on Taxation, \$3 million for the Office of Attending Physician, and \$3 million for the Capitol Guide Service

Capitol Police: \$203.8 million

Provides for an increase of 269 employees, for a total of 1,839, and allows for a 9.1% payraise for officers.

*Office of Compliance: \$2 million**Congressional Budget Office: \$32 million**Architect of the Capitol: \$334 million**Library of Congress: \$497 million*

Provides resources to eliminate the backlog of new material which has not been cataloged, improve the financial management system, and enhance the digital futures program. Additional security-related funds are also included.

Includes \$87 million for the Congressional Research Service.

Government Printing Office: \$119.8 million

Includes \$90 million for Congressional Printing and Binding and \$29.7 million for the Superintendent of Documents program.

*General Accounting Office: \$451 million**Center for Foreign Leadership Development: \$13 million*

LABOR, HEALTH & HUMAN SERVICES, EDUCATION, AND RELATED AGENCIES APPROPRIATIONS BILL FOR FY 2003

Noteworthy:

FY03 Recommendation \$131,399,000,000, FY03 President's Request \$131,946,026,000, FY02 Funding Level \$127,658,471,000.

Bill Highlights:

This bill makes appropriations for the Departments of Labor, Health and Human Services, Education, and related agencies for the fiscal year ending September 30, 2003.

Labor: \$11,821,000,000

\$10.8 billion for the Employment & Training Administration, \$1.37 billion for Dislocated Worker Assistance, \$900 million for Adult training, \$1.5 billion for the Job Corps, \$218 million for Veterans Employment & Training.

Health & Human Services: \$60,750,000,000, \$3.74 billion for anti-bioterrorism programs, \$27.1 billion for the National Institutes of Health, \$4.4 billion for the Centers for Disease Control and Prevention, \$6.7 billion for Head Start, \$2.03 billion for Substance Abuse Treatment, \$2.026 billion for Ryan White AIDS programs including ADAP, \$1.55 billion for Community Health Centers, \$741 million for the Maternal & Child Health Block Grant, \$1.7 billion for Low Income Home Energy Assistance, \$305 million for Title VII

Health Professions, \$674 million for Health Professions, Total, \$285 million for Children's Hospitals Graduate Medical Education, \$505 million for Promoting Safe & Stable Families, \$45 million for the Compassion Capital Fund, \$12.5 million for Mentoring Children of Prisoners, \$60 million for the Healthy Communities Innovation Initiative, \$741 million for Abstinence Education.
Education: \$49,418,000,000

\$11.35 billion for Title I Grants to Local Education Agencies, \$832.5 million for Federal TRIO Programs, \$2.85 billion for Teacher Quality State Grants, \$1 billion for 21st Century Community Learning Centers, \$15 million for Literacy through School Libraries, \$4,100 for maximum grants available through the Pell Grant program, \$1 billion for Reading First, \$8.5 billion for Special Education—Grants to States Part B, \$200 million for Charter Schools \$27.5 million for Voluntary Public School Choice.

Related Agencies

\$351 million for Domestic Volunteer Service Programs, \$395 million for the Corporation for Public Broadcasting (FY05), \$48.7 million for the CPB digitalization program.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS BILL, FY 2003 (S. XXX)

Noteworthy:

The Committee recommendation includes \$64.6 billion in total budget resources for FY 03. This amount is \$9.4 billion more than the President's Request of \$55.2 billion.

Bill Highlights:

S. XX makes appropriations for the Department of Transportation and related agencies for the period of October 1, 2002 through September 30, 2003. This includes funding for the U.S. Coast Guard, the Transportation Security Administration, the Federal Aviation Administration, the Federal Highway Administration, the National Highway Traffic Safety Administration, the Federal Railroad Administration, Amtrak, Federal Transit Administration, Surface Transportation Board, and the National Transportation Safety Board.

The Committee recommendation restores the \$8.6 billion cut to the Highway Program and funds the program at \$31.8 billion—the same level provided in FY 02.

The bill provides full funding for essential functions of the newly created Department of Homeland Security, including the U.S. Coast Guard and the Transportation Security Administration.

The committee recommendation also includes: Increased funding for highway and aviation safety programs, Full funding for the transit program and the FAA capital program, 46% increase in funding for Amtrak.

The bill rejects new user fees requested by the administration, which total \$230 million. The proposed new user fees have the effect of artificially reducing the budgetary impact of the President's budget request, because they assume authorization and enactment of the new fees and include the offsetting collections in the budget, as though this money was "cash in hand."

OFFICE OF THE SECRETARY: \$83.1 MILLION

The Committee recommendation is \$15.9 million above the FY 02 enacted level.

TRANSPORTATION SECURITY ADMINISTRATION (TSA): \$5.3 BILLION

As a critical agency of the newly created Department of Homeland Security, the TSA is charged with ensuring security across the U.S. transportation system, including aviation, railways, highways, pipelines, and waterways.

The Transportation Security Administration has been funded at the requested level for FY03. This bill provides \$124 million for the procurement of certified explosive detection systems to screen all checked baggage and \$250 million for installation of these machines at our nation's airports.

The bill also includes \$100 million for grants to enhance security at our nation's ports.

U.S. COAST GUARD: \$6 BILLION

The Committee recommendation includes full funding for the U.S. Coast Guard. This level of funding will allow the Coast Guard to maintain their critical functions, including search and rescue, drug enforcement, fisheries enforcement and migrant interdiction as well as integrate additional responsibilities as part of the new Department of Homeland Security.

The amount included is \$206 million above the President's request and \$604.3 million above the FY 02 enacted level.

The bill provides \$480 million for the Integrated Deepwater System (IDS).

FEDERAL AVIATION ADMINISTRATION (FAA): \$13.5 BILLION

The Committee recommendation is \$249.7 million above the FY 02 enacted level. This level of funding is \$219 billion more than the FY 02 enacted level.

FEDERAL HIGHWAY ADMINISTRATION (FHWA): \$31.8 BILLION

This program includes Federal-aid to highways, highway research, and administration. The Committee recommendation rejects the \$8.6 billion cut that would have been required under the Transportation Equity Act for the 21st Century.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION (FMCSA): \$117.4 MILLION

The funding provided in the bill is consistent with the budget request and is \$7.5 million above the FY 02 level.

NATIONAL HIGHWAY TRAFFIC ADMINISTRATION (NHTA): \$440 MILLION

This program includes operations and research, and highway safety grants to states. (FY 2002 enacted—\$423.3 million). The budget request \$16.7 million more than President's request.

The Committee recommendation also includes: \$10 million for mobilizations to apprehend drunk drivers.

FEDERAL RAILROAD ADMINISTRATION: \$985.1 MILLION

The funding included in the bill is \$273.8 million above the Administration's request. This level of funding includes \$762.5 million for Amtrak—\$241 million above the requested level.

The Committee recommendation includes: \$118.3 million for railroad safety and operations, \$30 million for next generation high-speed rail.

FEDERAL TRANSIT ADMINISTRATION (FTA): \$7.2 BILLION

The Committee recommendation includes funding for formula grants, research, capital discretionary transit programs, "access to jobs" and administrative expenses. This is a substantial increase above the FY 02 level consistent with the budgetary "firewalls" in TEA21.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION: \$43.7 MILLION

The Committee recommendation is \$5.3 million above the President's budget request and \$6.4 million above the FY 02 request. This funding is provided for hazardous materials transportation safety programs, research, and pipeline safety program.

The Committee recommendation also includes: \$63.9 million for Pipeline safety.

OFFICE OF THE INSPECTOR GENERAL: \$57.4 MILLION

The Committee recommendation is consistent with the President's budget request. Funding is provided for transportation-related audits and investigations.

SURFACE TRANSPORTATION BOARD: \$19.5 MILLION

The Committee has included \$19.5 million, with \$1 million to be recovered by already established offsetting collections.

NATIONAL TRANSPORTATION SAFETY BOARD: \$72.5 MILLION

The Committee recommendation is \$3.8 million above the amount provided in FY 02 and is \$2 million more than the President's budget request.

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION: \$13.3 BILLION

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD: \$5.1 MILLION

The VA/HUD FY 2003 Appropriations Bill makes appropriations for the period of October 1, 2002 through September 31, 2003 for the Departments of Veterans Affairs, Housing and Urban Development, and Independent Agencies.

Among the key areas of primary funding in the bill are \$23.9 billion for VA Medical Care, \$16.9 billion for the HUD Certificate program which will provide the needed funding for the renewal of all expiring section 8 vouchers, \$5 billion for the HUD Community Development Block Grant program, \$1.95 billion for the HUD HOME program, \$1.2 billion for HUD Homeless Assistance, \$8.2 billion for EPA (including \$1.425 billion for the Clean Water SRF and \$875 million for the Drinking Water SRF), \$3.2 billion for FEMA (including \$843 million for Disaster Assistance [FEMA currently has some \$2.9 billion in unobligated funds], \$900 million for FIRE Act grants, and \$100 million for Cerro Grande fire grants), \$15.123 billion for NASA (including \$1.5 billion for the International Space Station and \$115 million for the initial investment in a new Orbital Space Plane), and \$5.268 billion for the NSF.

TREASURY AND GENERAL GOVERNMENT APPROPRIATION BILL FOR FY 2003 (BILL NUMBER WHEN AVAILABLE)

Noteworthy:

FY03 Recommendation: \$34,533,464,000, FY03 President's Request: \$34,276,277,000, FY02 Funding Level: \$33,817,112,000.

Bill Highlights:

Treasury: \$16.128 billion; ATF: \$888.4 million, Customs Service: \$3.1 billion, IRS: \$9.9 billion, Secret Service: \$1 billion.

United States Postal Service: \$29 million. Executive Office of the President: \$728,384 million; OMB: \$70,752 million, Office of National Drug Control Policy: Salaries and Expenses: \$26,456 million, Counter-drug Technology Assessment Center: \$40 million, HIDTA: \$226,35 million, Special Forfeiture Fund: \$172.7 million.

Independent Agencies: \$17,569 million; GSA construction: \$631,663 million, GSA repairs/alterations: \$997,839 million, National Archives: \$270,939 million, Office of Personnel Management: \$261,791 million.

Mr. STEVENS. Madam President, again, I thank my friend from West Virginia for his courtesy. I know that while I have been working on these other matters, my friend has had a very erudite statement prepared, and I am prepared to listen to it.

I thank the Chair.

The PRESIDING OFFICER. The Senator from West Virginia is recognized under the previous order.

Mr. BYRD. Madam President, first, I thank my esteemed colleague and dear

friend, Senator TED STEVENS, for his characteristic courtesy, and for his friendship, and for the cooperation he has shown to me over many years of working together.

I thank him for joining with me, last year, in reporting out of our committee all appropriations bills before the close of July.

I thank all of the Republican members as well as the Democratic members of my committee who voted unanimously to report those 13 bills out of the Appropriations Committee, without a single vote cast against those bills.

I am sorry that the situation has developed, as it has, when I must oppose the distinguished Senator's amendment. I always do whatever I have to do to meet my own conscience and to deal with requirements that are incumbent upon me as the chairman of the committee or as the ranking member of the committee, whichever is my role at the particular time.

I do not like to be in a position of differing with my friend from Alaska, but there are times when we do have to differ. In this case, I find myself at odds with him, but I want to say here that it is only for the purposes of advancing this bill. It certainly does not cut across our friendship, as far as I am concerned, when I have to differ with Senator STEVENS, and differ with him vigorously. He is still my friend.

I understand what he has to do, as he sees his responsibilities. And I have to do what I have to do as I see my responsibilities. Our friendship is unaffected. I want to assure him of that, as far as I am concerned.

Last July, almost 6 months ago, the Senate Appropriations Committee completed action on all 13 of our appropriations bills, each on a bipartisan unanimous vote. These bills restored essential funding for programs that the President proposed to cut.

We provided \$1.1 billion more than the President requested for veterans medical care. We restored the \$8.6 billion cut proposed by the President in highway funding. The President proposed only a 1 percent increase for education programs. He would have turned the No Child Left Behind bill into another unfunded mandate. Our bill provided a 6 percent increase for education, including key funding to reduce class size.

We included sufficient funding to keep Amtrak operating. We restored over \$1 billion of cuts that the President proposed for State and local law enforcement programs.

We fully funded the President's proposed increases for homeland security programs, but we provided the funds through existing programs that our Nation's fire and police organizations support. We provided a significant increase for the Securities and Exchange Commission in order to investigate corporate fraud. We provided \$400 million for election reform.

Now this White House believes that these increases represent wasteful and

unnecessary spending. Last year this White House worked with the House Republican leadership to slow the appropriations process down. The House has not passed a regular appropriations bill in nearly 6 months.

Let me repeat that. The House of Representatives has not passed a regular appropriations bill in nearly 6 months.

The domestic agencies of the Government are now operating under the sixth—the sixth—continuing resolution, which expires on Friday, January 31.

My friend, Senator TED STEVENS—who is the very able ranking minority member of the Appropriations Committee, who will soon succeed me as chairman of the Senate Appropriations Committee, and who has already succeeded me as President pro tempore of the Senate—and I worked together to produce those 13 bi-partisan bills last summer. Each of those 13 appropriations bills was reported by the Senate Appropriations Committee with a unanimous vote—not a single vote cast against any one of the 13 appropriations bills.

After the election, however, the President indicated his determination to limit discretionary spending to the arbitrary figure of \$751.3 billion. This level will necessitate cuts of \$9.8 billion from 11 of the bills approved last July. After providing for modest increases for homeland security programs, the substitute that Senator STEVENS is forced to offer provides for a virtual freeze in all other domestic spending.

I oppose the \$9.8 billion cut that is contained in the substitute. The needs of the American people for homeland security, for education, for transportation, for veterans, for public health, and for other programs have not gone away. The needs are still there as plain as ever.

I am not being critical of my colleague, Senator STEVENS. I am not being critical of the chairman of the House Appropriations Committee, Mr. YOUNG of Florida. However, the President has now thrown down the gauntlet and is insisting on a \$9.8 billion reduction, resulting in cuts in priority programs designed for what? Designed to defend our homeland, to educate our children, to improve our transportation systems, and strengthen our law enforcement programs.

I am extremely disappointed, not with Senator STEVENS or the other members of the Senate Appropriations Committee or my friend, the chairman of the House Appropriations Committee, Mr. YOUNG, or his ranking member, Mr. OBEY, but with this administration, with this White House and its lack of vision and knowledge regarding the needs of the people of this country.

With great fanfare, the President signed numerous authorization bills this year that would increase spending demands for many of these same im-

portant programs. Last January he signed the No Child Left Behind Act with great fanfare. The President signed the No Child Left Behind Act which had passed the Senate 87 to 10 and which endorsed additional resources in important education programs for our children. Last May, the President, Mr. Bush, signed a border security bill with great fanfare, which had passed the Senate 97 to nothing, which authorized strengthening glaring and dangerous weaknesses in our border security. Last July, President Bush signed the Sarbanes-Oxley Act which had passed the Senate 89 to nothing, and which addressed shameful corporate fraud that bilks innocent people. In October, Mr. Bush signed the election reform bill with great fanfare which had passed the Senate 92 to 2 to help State governments overhaul the Nation's outdated and corruptible electoral system. In November, President Bush signed legislation which had passed the Senate 95 to nothing to improve security at our ports.

Yet in order to reduce our bills by \$9.8 billion, the omnibus legislation that we will consider this week will cut education by \$1.5 billion. It will cut homeland security programs by \$1 billion, including cuts of \$627 million for border security, \$23 million from port security and \$132 million from first responder funds. It will cut Securities and Exchange Commission funding below the levels in Senator HOLLINGS' bill by \$94 million.

This omnibus legislation will reduce Head Start funding by \$202 million. It will reduce job training by \$534 million. It will reduce low income home energy assistance by \$300 million.

The new omnibus bill will cut Amtrak funding by \$374 million, a level that will result, I am told, in the termination of Amtrak service.

In addition, the bill includes 1.6 percent across the board cut on all domestic programs. This represents a \$435 million cut in the National Institutes of Health. It represents a \$182 million cut to Education for the Disadvantaged. It represents a \$372 million cut in Veterans Medical Care. On top of these cuts, every homeland security initiative in this package is reduced by 1.6 percent. This is no way to govern. We must move forward on this legislation. As much as I chafe about these mindless cuts, we cannot allow the domestic agencies of our government to continue operating on automatic pilot for the rest of the fiscal year. The people elected us to make choices about how we invest their tax dollars. There will be amendments offered in the coming days to restore some of the cuts contained in the substitute to be offered by Senator STEVENS for homeland security, for education, and for other worthy programs. I urge Members to consider these amendments carefully and to ponder the impact of the reductions in this bill.

These should not be up or down party-line votes. When the Congress

passed, with broad bi-partisan votes, and President Bush signed, authorization bills for homeland security, for port security, for border security, for investigating corporate fraud, and for No Child Left Behind, we all recognized that these programs required adequate resources. We did not vote to address these critical problems with rhetoric alone. We have heard plenty of rhetoric. We collectively decided that these were real problems that needed real solutions. To solve these problems requires resources, not empty promises. I urge every Member to reflect on their support of these authorization bills as they decide how to vote on amendments that will be offered in the coming days. Let's make the rhetoric match the resolve.

While I oppose the \$9.8 billion in cuts which are being required by the administration as the price to move these bills, I recognize that an even worse alternative is to fail in our duty to enact appropriation bills and allow the United States Government to operate without sufficient funding for the remainder of this fiscal year. I believe my colleague, Senator STEVENS, is of a similar frame of mind. He is doing what he sees as his duty. He is a good soldier. He has my profound empathy.

This is the U.S. Senate. We are 100 Senators who have taken an oath of office to protect and defend the Constitution of the United States. We serve with Presidents. We don't serve under any President, I have served with 11 Presidents, not under any President. The votes that we will take on this important legislation, especially those relating to the defense of our homeland and the education of our children, are not about politics. They are about doing what is right and what was promised to the people of this country.

I ask unanimous consent that a summary of the \$9.8 billion of cuts contained in the substitute compared to the fiscal year 2003 bills reported last July by unanimous vote in the full Appropriations Committee, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF \$9.8 BILLION OF REDUCTIONS FROM THE FY 2003 APPROPRIATIONS BILLS REPORTED IN JUNE AND JULY OF 2002

Homeland Security—Homeland security accounts are cut by nearly \$1 billion (when a \$465 million increase for Transportation Security is included, the net cut is \$0.5 billion):

\$362 million is not provided to the INS for the Entry-Exit system, which will, when funded, track the arrival and departure of non-U.S. citizens. Funding would have supported design of additional lanes and facilities at ports-of-entry; the acquisition of land to support the additional lanes; the development of the new entry/exit system, including the enhancement of the Inspection Program's information systems; and the administration of this large project. From October 1, 2001 to September 30, 2002, 439.7 million people were admitted to the United States (700,000 were not admitted), with lengthy delays.

\$265 million is cut from the INS for construction of border security facilities. INS

has experienced rapid growth in staffing in recent years, particularly with respect to Border Patrol agents and inspectors. For example, in FY 2002, INS received funding to hire 744 additional border patrol agents and 1,265 additional inspectors. However, INS facility and infrastructure have not kept pace with this growth. From FY 1995 through FY 2002, the backlog in needed additional and ungraded facilities has grown to over \$5.2 billion. Nationwide, at the end of FY 2001, the Border Patrol had only 52 percent of the facilities and space needed to adequately support its current workforce.

\$46 million is not provided for the FBI for requested aviation enhancements, including funding for additional pilots and mechanics; two Blackhawk helicopters and a surveillance aircraft; and funding for maintenance, equipment, and other items needed by the Aviation program. These aviation assets are used to respond to critical incidents, including terrorist attacks, for the hostage rescue team, and to support domestic and international operations. If additional funding is not provided, the FBI would be forced to dismantle the existing surveillance infrastructure and curtail operations in a time when additional capability is needed.

\$92 million is not provided for FBI information technology enhancements.

\$51 million is cut from embassy construction for projects to help protect U.S. citizens overseas.

\$8 million is cut from the Customs Service container security initiative. During Senate Appropriations Committee homeland security hearings, there was extensive testimony about security vulnerability at our ports, particularly with regard to the 50,000 containers and trucks that come through our 361 ports and our border facilities each day, with only a 2 percent inspection rate. The Customs Service developed a program for increased inspections and for conducting inspections at overseas ports. Between the FY 2002 supplemental and the FY 2003 Treasury/Postal bill, the Committee included \$75 million for the project. But because the President blocked the funding for this project in the supplemental and now with the \$8 million cut in the substitute, the funding is down to \$10 million.

In addition, the Customs Service budget is reduced by \$15 million to force Customs to absorb the costs of the 4.1 percent pay raise. Customs will likely have to forgo filling 630 positions, including port inspectors, as a result of the cut.

\$132 million cut from FEMA first responders. Of this amount: \$66 million is cut from interoperable communications equipment for firefighters and \$66 million is cut from state and local emergency operations centers. The cut to interoperable communications equipment means less money to local fire departments to purchase badly needed communications equipment—a major priority for local fire departments. The cut to emergency operations centers means less money to help state and local governments upgrade their emergency operations centers—many of which are outdated and in need of expansion and new equipment.

\$465 million is added for the Transportation Security Administration (TSA). After the Committee marked up the Transportation bill last July, the President blocked Congress' effort to add \$480 million for TSA. The President then requested another \$546 million for the TSA. The new bill fully funds the President's revised request.

Agriculture (\$580 million)

The Export Enhancement Program, which is a program designed to combat unfair trade practices, is cut by \$450 million. However, USDA has no plans to use the program in FY 2003. The House included a similar provision.

Various pay accounts are cut by \$55.9 million. This reduction will force Agriculture agencies to absorb the cost of the increase in the pay raise from 2.6 percent to 4.1 percent that is included, government-wide, in the Treasury/General Government bill. This could result in a reduction in staffing of 1,048, potentially including farm services agency personnel, rural housing loan officers and food safety inspectors.

Competitive Agricultural research grants are cut by \$19.8 million.

Summer Feeding program funds are cut by \$24 million.

A \$2 million Rural Telework pilot program is eliminated.

Commerce/Justice/State (-\$2,135 million)

In addition to the \$816 million of homeland security cuts from CJS programs noted above, funding for pursuing corporate fraud through the SEC is reduced by \$93.8 million.

At a time when States are facing \$65 billion in revenue shortfalls, funding for State and local law enforcement is being cut by \$500 million. Funding for the Byrne Formula Grant Program is eliminated. The Byrne Formula Grant Program is distributed to the States and territories based on population to provide grants to local law enforcement agencies with the goal of improving Statewide drug and violent crime strategies. Funds can be spent on equipment, systems, and programs aimed at improving intra- and interjurisdictional crime control strategies. The elimination of the Byrne formula program will deny much needed equipment and program funds to the nation's State and local law enforcement agencies at a time when they are being held responsible for acting as the front line against future domestic terrorism.

The Economic Development Administration is cut by \$77 million.

Energy and Water (-\$136 million)

\$100 million is cut from the Corps of Engineers construction program.

The Central and Southern Florida (Everglades) restoration project is cut by \$8.2 million. This is an extremely environmentally sensitive project. The Southeast Louisiana project is facing a \$15 million cut from the original Senate bill. The Administration severely underbudgeted this project for FY03 and the Committee bill had restored those cuts in an attempt to expedite completion of this project. When completed, the Southeast Louisiana project will protect 30 percent of the state's population from severe flood threats. The revised bill will delay the project, forcing the local citizens to continue to endure the threat of severe flooding.

Foreign Operations (-\$100 million)

The biggest cut is \$75 million that was going to be given to North Korea (KEDO, the Korea Energy Development Organization) for purchasing heavy oil. Funding for the United Nations Population Fund is reduced by \$15.4 million. International Financial Institutions funding is reduced by about \$18 million, with some of the reduction reallocated to the Andean Counter Drug Initiative.

Interior (-\$373 million)

Federal Land Acquisition program. Cuts of approximately \$30 million (10% of the program) will result in thousands of acres of environmentally sensitive lands not being given federal protection.

Dept. of Energy Weatherization grants. Cuts of approximately \$16 million (\$5 million below enacted) will result in thousands of homes not being weatherized. This results in increased energy use nationwide.

National Park Service, construction/cyclic maintenance. Cuts of approximately \$37 million will result in a severe setback to the

goal of eliminating the \$5 billion in backlogged maintenance. This will result in hundreds of health and safety projects being deferred to FY 04.

Indian Health Service, facilities and services. Cuts of approximately \$19.8 million will reduce critical health services to the American Indian population. In addition, numerous clinic and hospital renovation projects will not proceed until FY 04 at the earliest.

Fish and Wildlife Service programs. Cuts of \$22 million in basic refuge and hatchery operations along with \$43 million in cuts to various wildlife conservation grant programs. These cuts will significantly reduce the level of effort being put forward by state and private wildlife preservation officials.

Forest Service. Cuts of \$49 million in areas such as basic forest-health research, assistance to State forestry offices, capital improvements and maintenance, and forest operations.

Labor/HHS/Education (-\$3,033 million)

Education programs are cut by \$1.5 billion. The substitute FY 2003 bill reduces funding for Title I Education State Grants by \$500 million compared to the FY 2003 bill marked up in July, 2002. This \$500 million would have allowed school districts to serve an additional 447,000 low-income children. This cut comes at a time that many State education budgets are being cut and all States are facing huge costs to implement the "No Child Left Behind Act" enacted just last year. The substitute FY 2003 bill eliminates the \$250 million increase provided by the Committee in July for teacher quality initiatives. These funds could have been used to hire an additional 7,150 teachers to reduce class size. The substitute FY 2003 bill eliminates the \$50 million of the \$75 million increase provided by the Committee in July for bilingual education programs. The number of students needing such services has increased from less than one million in 1980 to more than 3.6 million in 1999.

Job training programs are cut by \$534 million resulting in levels that are \$182 million below the FY 2002 level. These cuts will result in 20,000 less training slots for adult workers, 1,030 less training slots for older workers, and 50,600 less training slots for youth, at a time when unemployment rate is increasing.

The substitute bill cuts funding for Head Start by \$20.5 million as compared to the LHHS marked up in July. That means that more than 17,000 children, almost half of whom are infants and toddlers, will be denied the opportunity to benefit from the Head Start program. Currently, only half of eligible 3 and 4 year olds are enrolled in Head Start and less than 1 in 20 of infants and toddlers are enrolled in Early Head Start.

Low Income Home Energy Assistance is reduced from \$2 billion to \$1.7 billion at a time that the number of unemployed is increasing and heating prices are increasing.

Various HHS health programs, including the Centers for Disease Control, Health Professions training and programs designed to improve access to health care for low income people are reduced by \$235 million.

Legislative Branch (-\$51 million)

Noncontroversial reductions in the Architect of the Capitol and the Capitol Police.

Transportation (-\$400 million)

The substitute bill would cut the funding for Amtrak by \$374 million or 31 percent below the \$1.2 billion level approved by the Committee back in July. The substitute bill would fund Amtrak at \$762 million which is the same as the level included in the FY2003 Transportation Bill as reported by the House Committee. This funding level will result in the bankruptcy and termination of Amtrak.

Federal Transit Administration: The substitute bill also cuts \$75 million (6 percent) from the Federal Transit Administration's "New Starts" program for a new funding level of \$1.24 billion. The New Starts program provides capital funding for major new transit projects.

Federal Aviation Administration: Funding for the Federal Aviation Administration's (FAA) operations was reduced by \$34 million (\$30 million below the President's request) bringing the total funding to \$7.047 billion. This account provides funding for all of FAA's operations, including the air traffic controllers and the FAA's safety inspection workforce.

Federal-aid Highways: The substitute bill deletes \$200 million of contract authority.

Agency-wide Administrative Expenses: The substitute bill makes a DOT-wide reduction in administrative expenses of \$57 million—\$51 million more in administrative cuts than was proposed in the bill reported back in July.

Transportation Security Administration: The substitute bill would increase the funding for the Transportation Security Administration (TSA) by \$465 million bringing the total funding for TSA up to the President's request of \$5.146 billion. After rejecting the \$5.1 billion in emergency Homeland Defense funds included in the Supplemental, including \$480 million for TSA, the Administration immediately sent up a budget amendment requesting an additional \$546 million for TSA. This amendment was sent up after the Committee reported the bill back in July.

Treasury/General Government (-\$281 million)

In addition to the \$8 million of homeland security cuts noted above, \$116 million is cut from Treasury and other agency pay accounts. The bill includes a government-wide pay raise of 4.1 percent, compared to the president's request of 2.6 percent and the 3.1 percent raise that the President implemented in early January. The 4.1 percent pay raise is the same as the raise included in the bill approved last July and approved for the military in the Defense Authorization Act. Agencies funded by this bill are expected to absorb the \$116 million increased cost.

The IRS is cut by \$14 million (funds provided in the July supplemental).

A Postal Service payment is cut by \$31 million and funded, as requested as an advance appropriation.

An OMB effort to increase investments in electronic government initiatives is cut by \$40 million from \$45 million to \$5 million.

The Counterterrorism fund of \$40 million is cut by \$20 million.

GSA Courthouse and Treasury Member projects are cut by \$72.8 million.

VA/HUD (-\$2,584 million)

In addition to the \$132 million of homeland security cuts noted above, FEMA Disaster Relief is cut by \$1 billion. FEMA has sufficient funds available to meet current and future disaster needs consistent with its historical averages.

\$200 million is cut from FEMA flood plain mapping. \$100 million remains in the bill. FEMA's flood plain maps are old and out of date. Local planners, developers and homeowners need updated flood plain maps from FEMA. This cut will delay updating the maps.

Housing programs are cut by nearly \$900 million.

National Service is cut by \$110 million, reducing the number of volunteers by 10,000.

NASA is cut by \$70 million.

National Science Foundation is cut by \$85 million.

EPA is cut by \$96 million from \$8.3 billion to \$8.2 billion.

VA Construction is cut by \$49 million in the substitute compared to the bill reported last July.

In addition, the bill includes 1.6% across the board cut on all domestic programs. This represents a \$435 million cut in the National Institutes of Health, a \$182 million cut to Education for the Disadvantaged and a \$372 million cut in Veterans Medical Care. On top of these cuts, every homeland security initiative in this package is reduced by 1.6%.

The PRESIDING OFFICER (Mr. ALEXANDER). The Senator from Alaska.

MR. STEVENS. Mr. President, I believe under the unanimous consent request that now is the time for me to offer my amendment.

AMENDMENT NO. 1

MR. STEVENS. Mr. President, there is an amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 1.

MR. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in today's RECORD under "Text of Amendments.")

MR. STEVENS. The Senator from West Virginia has an amendment to offer. I thank him for his comments. We are in substantial agreement, except in the conclusion. We both feel that the Government of the United States should not operate under a continuing resolution. What it means is that our agencies are not moving forward in 2003 at the rate actually requested by the President in 2001 for the fiscal year 2002.

Times have changed. They have changed considerably. Each of these agencies are subject to new laws that were passed both in 2001 and 2002 with regard to the programs that they administer. They cannot do those new programs without new money.

As the Senator from West Virginia said, they are currently operating on autopilot. I am an old pilot and autopilot is a wonderful thing to have, but it doesn't know how to change course unless someone turns the dials. Autopilot cannot take you off or land you. It only continues on the course that it is on. It will fly right into a mountain if you don't change the course. There is a mountain ahead of us, which is the mountain of unfulfilled commitments in the Federal Government, which both the President and Congress have made and changes that were made since the President first conceived the budget of 2002.

I do believe that the Senator is right. I would have joined him last year in proceeding as we did with the bill as reported. But it is different now. We are ready to start a new Congress. We, hopefully, will have our organization resolution soon, and we will be working toward complying with the laws that we work under—the Budget Act—and the requirement that we pass 13 appropriations bills for 2004.

We cannot get there if we pass these bills separately. As I said before, we

will face the prospect of disagreement with the House and endless conferences on 11 bills, and possibilities of vetoes and motions to override, and all the time it will take. Mr. President, it will be June before we get down to the business of this Congress if we do not follow the recommendation to proceed that has been made now by me on behalf of the President and on behalf, I believe, of all the members of our committee.

We have differences on what should be in the bill, but the main thing is that we should proceed. I await the offering of the Senator's amendment. I know pretty well what is in it, and I regret that I cannot join him this year in supporting it.

Is the amendment now pending before the Senate, Mr. President?

The PRESIDING OFFICER. The amendment is pending.

Mr. STEVENS. I yield to the Senator from West Virginia.

AMENDMENT NO. 2

Mr. BYRD. Mr. President, I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD] proposes an amendment numbered 2.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in today's RECORD under "Text of Amendments.")

Mr. BYRD. Mr. President, this Nation faces a turning point as we are challenged once again by the threat of attack on our shores. We know that terrorists live among us. Yet we do not know where they will strike, or when, or how they will strike. With endless warnings in mind, and with a clear realization of our many homeland security gaps, it is time that Congress invest the necessary resources in homeland security to match its rhetoric and to match the rhetoric of this administration. So I have offered an amendment that would accomplish three goals:

First, it would restore the \$1 billion in reductions in homeland security initiatives made from the original committee-passed appropriations bills and for which every member of the Appropriations Committee voted—every member, 29 members of the Appropriations Committee, with 15 Democrats and 14 Republicans.

Second, it would restore much of the \$2.5 billion in emergency homeland security funds that passed this Congress overwhelmingly in the summer of last year, but which was rejected by this White House.

Finally, this amendment would fund the priorities that Congress has found so necessary and that President Bush has signed into law. This amendment would fund the Airport Security Act that created the Transportation Security Administration and placed rig-

orous, new safety standards on the Nation's airports. This amendment would fund the border security authorization bill that passed the Senate by a vote of 97 to 0 and that President Bush signed into law last May. This amendment would fund the port security authorization bill that passed the Senate by a vote of 95 to 0 and that President Bush signed into law last November.

These dollars address our Nation's most critical needs. These funds would help to shore up our Nation's defenses and save lives at home.

The Congress has voted to create the Department of Homeland Security, but that Department is months—if not years—away. I read in the Washington Post today about the slowdown in the fulfillment of that dream, but that Department is months—if not years—away from being a strong defense against terrorist attacks. There are many details to be worked out. We cannot wait to address gaps in our Nation's defenses while this new Department is organized. Terrorists will not wait to attack. We cannot afford delay. I urge my colleagues to support this amendment.

I ask unanimous consent that a summary of the amendment be printed in the RECORD at this point so that all Senators, members of the press, and the people at large may read on tomorrow the contents of the amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Major Elements of \$5 Billion Homeland Security Package

[In millions]

State and Local Assistance to Combat Terrorism	\$1,406
To implement the President's smallpox vaccination plan, grants to make first responder radio equipment interoperable, emergency planning and training for terrorist attacks, and study long-term health consequences of attacks of 9/11.	
Border Security	1,008
Customs and TSA container security improvements both at the ports and as containers are shipped within the country, improved INS Entry/Exit System, improved INS border security, more INS agents to apprehend absconders, seven additional Coast Guard patrol boats, and Customs northern and southern border security improvements.	
Airport Security	720
Airport security hardening to comply with new statutory security requirements, cockpit door security improvements, and increases to fully fund Transportation Security Administration needs.	
Port Security	585
To help implement the more rigorous security requirements in the new port security law that the President signed in November.	
Nuclear Security/Energy Security	296

Major Elements of \$5 Billion Homeland Security Package—Continued

Secure nuclear weapons and materials nationwide and conduct vulnerability assessments for energy supply and distribution systems.

Mass Transit Security	300
Chemical and biological sensors and other monitoring equipment for potential terrorist attacks in mass transit systems.	
Federal Law Enforcement (FBI)	212
FBI, Secret Service, additional security for terrorism trials in Federal courts, and Law enforcement training for new TSA personnel	
Water Security	178
Improved security at Corps reservoirs and dams, vulnerability studies for urban and rural water systems.	
Cyber Security	128
Food safety, securing biohazardous materials at USDA facilities, embassy security, research to combat chemical attacks, improved security at Washington Monument and Jefferson Memorial, and DC emergency response plan.	
	167
	5,000

Mr. BYRD. Mr. President, I yield the floor.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DORGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, I rise to support the amendment offered by the distinguished chairman, perhaps ranking member, depending on the time of the month in January of this year, of the Senate Appropriations Committee. He has led the fight in the Senate on these issues dealing with homeland security, an extremely important subject for this Senate.

I wish to talk about why his amendment is a very important choice for us to make. This is, after all, about making choices. It is not a case that there is not the money to do one thing or the other; it is a matter of making the choices of what the right things are for this country's future. Emerson once said that common sense is genius dressed in work clothes. Common sense with respect to homeland security to me is to understand that post-9/11, we are in an urgent situation to protect our country at home. We are prosecuting the war against terrorists here and abroad, and we have an urgent requirement to protect our homeland.

The head of the CIA just a couple months ago said to the Nation that we are as vulnerable today to a terrorist attack as we were on September 10, the day before that devastating terrorist attack on our Nation. The head of the CIA said: We are as vulnerable today as we were the day before that devastating attack.

If that is the case, then the question is, What more do we need to do and how soon must we do it to give a measure of assurance to the American people that we are doing everything possible to thwart those terrorists who would attack our country?

I wish to talk about a couple areas of homeland security that my colleague, Senator BYRD, has spoken about previously and spoke about again this evening, and addresses in his amendment. I wish to talk about the security of our country's ports.

I come from a State that does not have any ports. North Dakota is not surrounded by oceans, so we do not have ports. I did recently tour one of our large ports in this country. That follows on the heels of a tour I did several years previous. I was curious as to what kind of security exists in America's ports.

I know we get 5.7 million containers coming into this country every year stacked on container ships. These 5.7 million containers pull up to a dock at 2 miles an hour, then are offloaded on to 18-wheel trucks, and they motor off to the rest of the country. I also know of the 5.7 million containers that come into our country every year, 100,000 of them are inspected, 5.6 million are not.

One asks the question: We spend a lot of money and time talking about an antiballistic missile program or a missile defense system to protect against an incoming ballistic missile or a ballistic missile traveling 10 or 15,000 miles an hour. So we spend \$8 billion creating a ballistic missile defense system.

How much money do we spend protecting against the threat of a ship with a container carrying a weapon of mass destruction coming to a dock at 2 miles an hour at one of America's major ports in America's major cities? The answer is we do not spend nearly enough.

I recently, with the Customs Service and others, toured one of our country's major ports. This is a port that gets a great deal of freight and commerce from Asia. I was very impressed with the men and women who worked there. I was very impressed with what they do there. I took a look at their x-ray technology in which they x-ray containers that are on an 18-wheel truck, having been taken from the deck of a ship. This technology is remarkable. What they are doing at the Customs Service is extraordinary, but they are desperately short of funds. They are incapable, in my judgment, of assuring the American people that of these 5.7 million containers reaching America's ports, they are able to inspect a sufficient number to give us a measure of confidence that terrorists will not use these containers with which to attack our country.

We might all remember the story about a fellow who was a suspected terrorist who actually put himself in one of those large containers. In that container, he included a heater, a cot,

water supply, a GPS system, a computer—he had all the comforts of home locked with him in a container, shipping himself from the Middle East to Canada, presumably then to go from Canada into the United States.

If someone decides to ship a weapon of mass destruction in a container aimed at this country with only 2 percent of the containers being inspected at our docks, how confident are we that we have the homeland security and homeland protection we need and deserve at this point?

Senator BYRD includes in this amendment the resources that are necessary to add to that measure of confidence, to create more inspections, to provide more security at America's ports, and that is important.

He also in this amendment deals with the issue of border security. I do represent a State that has a long and common border with the country of Canada. Just a couple of months ago, there were concerns across our country about five men, suspected terrorists, who apparently entered the U.S. through Canada. We did not know who they were. We did not know where they entered our country. We did not know what they planned to do. But there was a national manhunt for five men from those parts of the world from which terrorists have originated who entered our country, and we were searching for these individuals. Apparently they were never found.

The point is, they were supposed to have entered our country through Canada. How would one do that? Along the border between the United States and Canada, we have a great many ports of entry where we have very little security, as a matter of fact. Prior to our Appropriations Committee adding some money in the last year and a half, at many ports of entry in North Dakota, when the ports of entry closed because they are open only a certain portion of the day, at the end of the day, at 9 o'clock or 10 o'clock at night, they put up an orange rubber cone, and that was the security to keep terrorists out of this country or to keep out those who are not supposed to enter this country.

The polite ones who enter this country illegally say they would get out of the car, remove the cone, drive into this country, and replace the orange cone. Those not so polite would shred that cone at 60 or 70 miles an hour, with nothing to stop them.

We changed some of that at ports of entry, but we have a 4,000-mile border. There is not a ghost of a chance that the Border Patrol and others who are required to provide the security on this country's northern border can possibly do all that is necessary to keep terrorists from entering our country.

Despite that, we have the Immigration Service, the Customs Service, the Border Patrol, and others doing heroic work, but they need more resources. They are short of money. And that also is included in Senator BYRD's proposal.

Last July in Congress, we on the Appropriations Committee passed by a wide margin a supplemental appropriations bill that included \$2.5 billion for homeland defense, port security, as I mentioned, the security of nuclear plants in our country, airport security, cyber security, and training for police and fire personnel, the first responders for any terrorist attack. Yet the President decided he would not use that \$2.5 billion. He blocked it, and this amendment restores much of those funds.

I know earlier today we had people come to the Chamber and talk about those who want to spend money. There are those who say this is all about spending money. This is a rather small amount compared to what we did for Defense, for example, in this year.

The President asked for and we agreed to increase Defense spending nearly \$45 billion in this year. We face some very significant challenges in Iraq, North Korea, terrorists. We call on young men and women in this country to put on their uniform and, in a moment's notice, be called up, put on a ship or airplane and shipped to the farthest points of the world to protect our country. We increased that spending in a very significant way.

Just a year ago—in fact, a year ago this week—I was in central Asia. I was in Afghanistan and Uzbekistan and toured those areas where our young men and women—American soldiers—were defending our liberty and freedom.

I do not think anyone will ever want to shortchange them in what we do to spend money to protect them, and I commend Senator BYRD, Senator STEVENS, and Senator INOUYE for their leadership in making certain we make that investment. But it is not only with respect to this Nation's defense that we must make investment. We also must make those investments in our homeland security. If we fail to do that, there will be a time, after some additional national tragedy as a result of a terrorist attack, when we will ask the question: Why did we not plug that hole? Why did we not add those resources? Why did we not have those additional inspections?

We can avoid all of that if we simply make wise and prudent investments in homeland security in this legislation. I prefer we not be required to spend any money on homeland security. I prefer we live in a world in which there is not a terrorist threat, in which those who have evil in their hearts, such as Saddam Hussein and others, would not exist and we would live in peace and harmony and not have to worry about protecting our homeland. But the attacks of 9/11, which killed thousands of innocent Americans, by those holed up in caves in the mountains of Afghanistan plotting the murder of innocent people tell us we can never again be sure that that kind of world will exist.

We must understand that terrorists want to do damage to this country and kill innocent Americans. As a result,

we simply must have adequate homeland security and adequate protection. That is all this amendment offered by Senator BYRD does.

We will have an opportunity to discuss other issues with respect to the omnibus bill. Although I have been talking about homeland security, I fully agree with Senator STEVENS and Senator BYRD that we should handle these appropriations bills this way. It is the only way we can solve this issue of getting the eleven bills done, getting to a conference, getting them to the President, and getting them signed. So there is no disagreement about that. Senator BYRD and Senator STEVENS are absolutely correct. This is what we should do. We should do it this month and get these priorities funded. But as I say that, the question is: What priorities? What choices?

I have not yet seen the entire amendment or the entire omnibus bill that has been offered. I expect I will be able to review some of it this evening and perhaps tomorrow. But this is significant legislation. I know what part of it is. Chairing one of the subcommittees on appropriations, I know what is in that subcommittee. With Senator CAMPBELL and me working closely together, I know what is in that particular part, but the rest of it I am not aware of, and I think most Members would not be aware of the specific provisions. We need to work together in the coming days to make sure the choices we make in terms of priorities are the right choices.

I will have a lot to say on a couple of other issues, but I want to specifically say to Senator BYRD, I think this amendment makes eminent good sense. It is an important amendment, an urgent amendment, and represents one of our first priorities: Making the right investment for homeland security.

There is a part in this omnibus bill that deals with disaster legislation, drought relief, for farmers. I do not know this for sure, but my understanding is the money for that actually comes out of the agricultural spending base, which in my judgment should not happen. Second, it is only about half the size of what is needed.

By a very wide margin, we passed last year a \$5.9 billion disaster relief bill for drought relief for a major part of the country's agricultural producers. That is about what we need. In my judgment, we are going to have to amend this provision.

My understanding also is that in order to get part of this money, there is an across-the-board reduction, and I believe there are certain areas where we cannot do across-the-board reductions. Having said all of that, we need to debate those amendment by amendment. This first amendment is an important amendment. As Senator BYRD said, and let me hasten to say as well because I serve on this committee, the leadership of Senator STEVENS is exemplary. I am proud to be on this committee, whether under his leadership or

Senator BYRD's. Our differences in choices with respect to both the White House and those who support this amendment are not meant to be disrespectful but are an assertive difference, representing what we believe to be an urgent priority.

There is no greater priority than to make sure we have done what we can do to thwart the efforts of terrorists to attack this country, and in a number of areas we are markedly and substantially deficient in homeland security investment. We have known that for some long while. This is the time to correct it. It is not spending, it is an investment, just as it is an investment in this country when we make the kind of appropriations we need to make for defense. We have done that. Now we need to make the same judgment with respect to homeland security.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COLEMAN). Without objection, it is so ordered.

Mr. REID. Mr. President, Senator BYRD has offered an amendment. I would like to address that amendment.

Senator BYRD has been an advocate, for many months now, of doing something to properly fund homeland security. One member of our caucus referred to it as hometown security. The Senator from Nebraska, Mr. NELSON, referred to it as hometown security, and that is really what it is. It is to make sure the cities and towns in our States have the protection that is necessary as a result of the terrible events of September 11.

The bill I am interested in is part of S. 11 from the Energy and Water Subcommittee. For the next half hour or so, I will be the chairman of that committee. That will change sometime this evening.

Senator DOMENICI and I have had a longtime relationship on this subcommittee. I have been chairman; he has been chairman; we really have worked extremely well together. He has been, from my perspective, extremely good to work with. He is an absolute expert on numbers, having been the chairman of the Budget Committee and having been so long with the Appropriations Committee. It has been a pleasure to work with him.

But Senator DOMENICI, I am sure, recognized that this bill, our bill, should have more money—more money as it relates to homeland security. During last year's consideration of the supplemental spending bill for homeland security, when we were in the majority, we included hundreds of millions of dollars for nuclear security, funding that had been requested by the administration and by the Department of En-

ergy but was rejected by the Office of Management and Budget. During final negotiations on that supplemental, we agreed to provide funding for these activities on a contingency basis. In essence, we provided the money but gave the President the opportunity to accept it or not. He decided not to accept it. I think that is really wrong. I am disappointed and sorry that is the case. I believe it was unreasonable that the President declined to request emergency funding for nuclear security for which his own Department of Energy was screaming. We didn't invent this. This came from his own Department of Energy.

So this evening Senator BYRD has offered it again and is making another effort to give this administration the funds they need to keep nuclear and other deadly material safe and secure in this country. As always, I am grateful to Senator BYRD for his leadership in this area.

The bill Senator DOMENICI and I have brought to the floor for many years is a big bill, approximately \$24- or \$25 billion, and it is all discretionary. It is the only subcommittee in which the money is discretionary, all of it. It has many important components. Tonight we are only going to talk about that part relating to nuclear security.

This amendment provides \$25 million to enhance the safety and security of nuclear and other materials at the Department of Energy Office of Science Laboratories, nationwide; another \$25 million for the National Nuclear Security Administration, to enhance security during the transport of nuclear weapons and materials nationwide; and \$35 million for construction and renovation activities of the National Center for Combating Terrorism, again funding that the Department of Energy asked the White House to provide.

Again, we didn't dream it up, saying this would be great for New Mexico because they have a lot of things going on there, or Nevada, or Idaho, or Mississippi, where a lot of these activities take place. The Department of Energy came forward with this recommendation. Again, the White House refused the recommendation that its own Department brought forward.

We are also requesting \$90 million for increased safeguards and security needs throughout the nuclear weapons complex. Funding is provided for explosive detection equipment, protective force support, hardened perimeter barriers, and consolidation of special nuclear materials and complex-wide security improvements. A minimum of \$25 million is provided for cybersecurity activities.

Just reading this off should give every person within the sound of my voice pause. Why have we been asked this by the Department of Energy? We have been asked to do this because we need safeguards throughout the nuclear weapons complex that are not now there.

Funding is provided for explosive detection equipment. We don't have that

equipment. I hate to say it here on the Senate floor, but we don't. We are lacking.

Protective force support. That means we don't have enough people making sure the materials are safe, that the facilities are safe.

Hardened perimeter barriers. It seems to me, if we have been told by the Department of Energy that we should have hardened perimeter barriers, that means that what we have now is inadequate.

Consolidation of special nuclear materials, and complex-wide security improvements.

Also, \$56 million is provided for the Defense Environmental Administration Restoration and Waste Management Program at the Department of Energy to enhance safeguards and security at nuclear and weapons cleanup sites at Savannah River in South Carolina, Hanford in Washington, Idaho, and in Tennessee.

Mr. President, you, as a new Senator, did not come and say: Senator DOMENICI, Senator REID, will you give us some money for Oak Ridge, in Tennessee? You didn't do that. The Department of Energy recognized there were needs at that very important facility, important for this country, and that is why Senator BYRD has stuck in this amendment before this body, \$56 million, part of which would go to Oak Ridge to make sure there is enhancement of safeguards and security at nuclear weapons cleanup sites, at this facility and these facilities.

There is \$14 million for the Defense Facilities Closure Projects, the program at DOE, to enhance the safeguard and security of these sites nationwide.

The amendment also provides \$25 million for the National Infrastructure Simulation and Analysis Center in New Mexico and \$25 million for the National Energy Laboratory to conduct critical infrastructure assessments at critical energy supply facilities nationwide.

The funds provided in the Byrd amendment for nuclear safety are critical for ensuring the safety of the American people in the post-9/11 era. I don't expect the White House to take my word for it. They should, however, listen to their own Department of Energy. I did, and the nuclear safety language in the Byrd amendment reflects what we were told, what they said was needed.

We also have some new information that has come out. We have a report that has been done, and we know there are some Nuclear Regulatory Commission employees who worry that safety training requirements for the nuclear facilities are outdated and "leave the security of the nuclear sites . . . vulnerable to sabotage."

Should we not go forward with this work? Yes, we should. It is extremely important that we provide this money. If there were ever an emergency need in the history of this country, it would be to take care of the nuclear facilities.

They have inadequate security guards. One security company is working at one facility and another, which has the lowest bid, at another facility. It simply is not the way to do business.

All over America we have 101 nuclear powerplants. There are workers who are questioning the safety of these facilities. A recent survey commissioned by the NRC found that a third of its employees question the agency's commitment to safety, and almost one-half say they are afraid to speak up at the NRC. Employees who are designated to protect these plants from terrorists and others are afraid to speak up for fear they will get fired or their jobs will be changed or they will be transferred.

According to the survey conducted by an outside firm, these people complained that the NRC is influenced by the nuclear industry and that its regulatory powers have atrophied. The poll was based on surveys completed by one-half of the agency's employees. The most dramatic findings came up when pollsters sorted responders by rank. Although almost 90 percent of the agency's executive-level employees answered favorably on the questions regarding the Commissions's commitment to safety, less than two-thirds of those in the midlevel ranks answered that they were afraid.

The study said those differences point to the political influence of the nuclear industry. NRC officials declined comment.

We should be very concerned about workers at the NRC who are afraid to come forward and say: We do not have proper safety standards, and we are afraid to come forward and tell our own bosses what is wrong. Why? Because they are so driven by the nuclear power industry.

It has been nearly a year since the President warned us in his last State of the Union Address how vulnerable our nuclear facilities are. But the NRC has still not taken any clear steps to secure the safety and security of our Nation's nuclear powerplants. That is not acceptable.

We know the inspector general of the NRC paints a very bleak picture of their safety and security. A few days ago, the NRC's inspector general released a survey of the employees. I have talked about that to some extent.

This amendment is a very important amendment if we are concerned—I know everyone is concerned—about the safety and security of our nuclear-generating facilities.

Senator BYRD is to be commended for asking us to support him in making sure that we have adequate resources to protect our nuclear facilities.

I repeat what I said earlier when I talked about some of the things that the Department of Energy has said is so important. If we ignore them, and if the administration ignores them, it is simply not right.

This money enhances the safety and security of nuclear and other mate-

rials. It will enhance security during the transport of nuclear weapons and materials. There is money for construction and renovation activities of the National Center for Combating Terrorism; for increased safeguards and security needs throughout the nuclear weapons complex. Funding is provided for explosive detection equipment, protective force support, hardened perimeter barriers, consolidation of special nuclear materials, and complex-wide security improvements.

I see the Senator from Washington is on the floor. There is \$56 million, as I have mentioned, for the Defense Environmental Restoration and Waste Management Program to enhance safeguards and security at nuclear and weapons cleanup sites, such as the one at Hanford in Washington. I would place it throughout our complex.

There is money for the Defense Facilities Closure Projects Program to enhance safeguards and security at these sites. This is important. If we pass the Byrd amendment for no other reason—and there are lots of other reasons to talk about—money is provided in my subcommittee of appropriations for making our nuclear weapons facilities throughout the country and our nuclear powerplants throughout our country safe and secure. They are not safe and secure now. That should be of concern for every American.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, I rise this evening in strong support of the homeland security amendment that was offered earlier this evening by Senator BYRD. I am pleased that I had the opportunity to work closely with Senator BYRD on the details of the amendment because it impacts the security of our transportation system.

Before I start, I wish to align myself with the very thoughtful and important remarks of the Senator from North Dakota made earlier regarding the northern border. Senator DORGAN has brought some real attention to the northern border issues that are so important to my home State of Washington. This work must continue despite the President's cuts to the border security initiative that the Senate previously approved.

This amendment represents months of work on behalf of Senator BYRD and the Appropriations Committee. Senator BYRD, as chairman of the Appropriations Committee, convened a series of hearings last spring to discuss homeland security needs. We heard from numerous Cabinet Secretaries, including Secretary Powell, Secretary Rumsfeld, and Secretary Mineta. Several respective national security experts gave us very valuable testimony. We also heard from several Governors, including Governor Locke from Washington State. Mayors appeared before the Appropriations Committee as did fire chiefs, health department officials, and water and sewer authorities.

Senator BYRD and the Appropriations Committee worked very hard to identify real needs for homeland security. The Byrd homeland security amendment is in large part the result of those hearings and our continued efforts to work with the true first responders.

Homeland security is an enormous task. We all know this. It is going to be enormously expensive. We all know this. Sadly, the administration has not requested adequate funding for homeland security needs throughout our country. The President refused to spend homeland security money previously approved in a bipartisan fashion by this Congress.

The bill before us today, at the President's insistence, makes further cuts in homeland security funding.

Homeland security is about our entire country. However, I must tell you that this issue is tremendously important to Washington State. Already, thanks to an alert Customs agent, we arrested a terrorist suspect crossing into Washington State with explosive materials.

We are an international State with vulnerabilities in our ports, our rail and highway infrastructure, and our international airports.

We are a trade State with an economy that is closely linked to the world. We have significant military assets, nuclear facilities, and many popular tourist-gathering points. My State is aggressively moving forward to protect Washingtonians. We need a partner in the President and the Federal Government. Unfortunately, the underlying bill does not address all of our homeland security needs. Homeland security should not be an unfunded mandate.

As a nation, we are working hard to close the security gaps that still exist. We know the transportation systems are a frequent target of terrorist attack. In fact, when you look at the worldwide statistics, one-third of terrorist attacks that take place around the world target transportation systems, including aircraft, highways, rail systems, subways, commercial ships, and ferries.

As many have observed, our security is only as strong as our weakest link. This amendment offered by Senator BYRD will help strengthen some of our weakest links in port security, aviation, and mass transit.

Let me start with port security. We have a lot of work to do to protect our Nation's ports. As my colleagues will recall, we passed the Maritime Transportation Security Act 95 to 0. That act puts new requirements on our ports. However, effectively no funds have been provided to our Nation's port authorities to implement those new requirements, which will cost billions of dollars.

The underlying bill that we are looking at this evening, provides very little money to enhance port security. So I am really, pleased that the Byrd amendment would dramatically increase the security funds available to our ports.

I ask Senators to reflect for a moment on what a terrorist incident in our Nation's ports would mean to our Nation's economy.

Just look at what happened this past fall, when West Coast dockworkers were locked out of their jobs. It is estimated that the lockout cost our economy \$1 billion a day.

A terrorist attack on our ports—or an attack carried out through our cargo container system—would undermine our Nation's confidence in the hundreds of thousands of containers that crisscross our country every single day.

And beyond the human toll—an attack on, or through, our ports would have a dramatic economic impact and could bring the flow of commerce to a dead stop.

It is not enough just to pass an authorization bill saying that we have better secured our ports. We have to actually provide the resources to make our ports more secure.

The Byrd amendment boosts—by almost half a billion dollars—the amount of grant money available to our public port authorities. I commend the Senator for his vision and leadership on this critical challenge.

Another way to secure our ports is through Operation Safe Commerce, an initiative that I started in last year's emergency supplemental appropriations bill. This TSA initiative was launched with the cooperation of the Customs Service. For the first time, it provides us a mechanism to track containers from their point of origin to their point of destination. As a result, we will have much better information about where the container came from, what is in it, and whether or not it requires either x-ray or further inspection.

With the initial funding that we provided for this initiative—and the \$30 million that is included in the underlying bill—we have had to limit these grants to the three major container ports in our country. Those three ports take in roughly three-quarters of all the containers entering the United States. With the additional funding provided under Senator BYRD's amendment, we will be able to greatly expand the number of ports that can participate in this important initiative.

Finally, as I talk about port security, I want to talk about the new demands being placed on our Coast Guard. For a long time I have been very concerned that these new homeland security requirements mean the Coast Guard isn't getting adequate resources—or paying adequate attention—to its traditional missions, such as search and rescue, fisheries enforcement, and marine environmental protection.

In order to get the Coast Guard the kind of assets it needs to conduct port security, Senator BYRD's amendment includes sufficient funds to boost the Coast Guard's inventory of coastal patrol boats. These are the ideal platform for the Coast Guard's homeland secu-

rity mission. Unfortunately the Coast Guard has not been able to buy enough of them, in part because of other major contract obligations that are outstanding.

We cannot continue to burden the Coast Guard with additional missions without providing them with the resources and the tools they need to do their job. I am pleased the Byrd amendment provides these resources.

Another weak link this amendment will address concerns mass transit. I think we should all recognize that the majority of fatalities resulting from transportation terrorist incidents have been in the area of mass transit, specifically from buses.

The challenge in securing our mass transit systems is daunting. By their very nature, transit systems are designed to be open and accessible and to accommodate many people in a very short period of time. It is a real challenge, but we have to address it.

The amendment that Senator BYRD has offered states that we are not going to shrink away from this vulnerability. It says we will better protect the millions of citizens who commute to their jobs every day. The \$300 million included in this amendment will make a serious downpayment and get our Nation's transit systems focused on mechanisms that will simultaneously protect their passengers without clogging our transit systems.

I commend Senator BYRD for recognizing this vulnerability and for addressing it.

Finally, I want to talk about aviation security. I commend the Senator for including an additional \$250 million for our Nation's airports.

As my colleagues know, the Aviation Transportation Security Act mandated that we check all passengers' checked baggage for explosives. Just a few weeks ago, the Transportation Security Administration met that deadline. But the truth is, there is a huge amount of construction that needs to be done to transition our Nation's airports from the interim explosive detection solutions to more permanent and efficient systems to check all bags for explosives.

From the very first day that this requirement was put into law, the Transportation Security Administration has consistently refused to request adequate funds to compensate the airports for these costs. They have consistently underestimated the true costs to implement these massive retrofits in order to leave our airports "holding the bag" for these costs.

The amendment offered by Senator BYRD provides an extra \$200 million—over and above the \$250 million included in the underlying bill—to more accurately reflect the real cost of this initiative in fiscal year 2003.

We will be paying the cost to implement the Transportation Security Act for many years to come. Our airports do not have easy access to the kind of resources that will be needed to make

these very necessary investments. The airlines—which the airports depend on for rates and charges—are almost uniformly in serious financial difficulty. Many airports have already extended about as many bonds as they can currently afford to pay off. So this amendment would provide very critical support.

I am proud of the progress this amendment makes in adequately funding port security, mass transit, and aviation security. I commend Chairman BYRD for this amendment, and I urge all my colleagues to support it.

We cannot let the protection of the American people be ignored because an OMB director—a few blocks down the road—has said that discretionary spending will not exceed a certain arbitrary figure.

We have serious security needs in this country, and this amendment will help us meet them.

Mr. President, I yield the floor.

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I understand we are now on the Byrd amendment to the appropriations measure before us; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HARKIN. I thank the Presiding Officer.

First, I thank Senator BYRD for offering this important amendment which provides much-needed funding for our homeland security.

Secondly, I thank Senator BYRD for including funding in his amendment to help States implement the President's plan for inoculating our first responders against the smallpox virus. A month ago, on December 13, President Bush announced his policy for vaccinating U.S. citizens against smallpox. He had a tough decision to make, and I support that decision.

That same day, the Government began inoculating 500,000 armed services personnel and other Government officials working overseas, people who are most likely to encounter the smallpox virus.

The second phase involves inoculating on a voluntary basis first responders and health care workers across the United States against smallpox. It is estimated that up to about 10 million Americans may fall into this category. Senator SPECTER and I have worked with the administration and Senators BYRD and STEVENS since the events of September 11 to provide sufficient funds to produce the smallpox vaccine necessary to inoculate every American against smallpox if that becomes necessary. That money has been

appropriated, and I understand the production of vaccine is well underway and that sufficient vaccine will be available by the end of the year. That was a good first step.

It is one thing to produce the vaccine, but the administration of the vaccine also costs money. That financial burden will fall on our State and local public health departments. Local public health departments will absorb the costs of the needles and personnel to administer the vaccine. But then again, personnel and equipment and needles only represent a part of the cost to local health departments. That is because the smallpox vaccination is a far more resource-intensive activity than any other type of vaccination activity.

For example, costs include specialized training for the vaccinators. You cannot just have someone off the street doing the vaccinating; they have to be specially trained. And since we have not administered the smallpox vaccine for a number of years, people would have to be trained. There would also have to be prevaccination screening for individuals to make sure you don't have something else that might interfere with the vaccination. It will also include postvaccination monitoring because it is estimated that 1,000 out of every 1 million vaccinated will experience a serious adverse effect. Then you add to those costs the cost of extra security for the vaccine.

I have received estimates from those involved in public health that the cost of administering the vaccine to State and local health departments under the President's plan may be \$85 a person, or \$850 million to inoculate 10 million first responders and health care personnel.

The amendment before us—the Byrd amendment—includes that \$850 million appropriated to HHS for distribution to the States for this first 10 million first responders' vaccination.

When I first saw this figure of \$85 a person, I thought that was pretty expensive. I remember when I was a kid and got my smallpox vaccination in school. They lined you up, and the public health nurse gave you your vaccination. I cannot believe it costs, in equivalent dollars, \$85 to get that vaccination. So I think we here on the Appropriations Committee and on the Oversight Committee and those at Health and Human Services under Secretary Thompson really need to look at this and to make sure these estimates are valid estimates.

Again, I know that, as I said, there are other things we have to do, such as prescreening and training of inoculators; there has to be postvaccination monitoring and safety. There are other considerations that perhaps we didn't have maybe 50 years ago when I got my smallpox vaccination.

I do think we are going to have to be careful stewards of the public's money to make sure we are getting our money's worth and to make sure every dime is accounted.

Some may say we have already provided significant new funding to State and local health departments since the events of September 11, and that is true. Senator SPECTER and I and the Appropriations Committees have worked hard to provide those funds, and those funds were sorely needed because we had let our public health departments stagnate over the years.

The money we provided over the last couple of years was just to begin to repair the benign neglect of our public health system, to upgrade public health monitoring, to increase the lab capacity in our State labs to identify possible bioterrorism agents, to improve communications between CDC, the Centers for Disease Control and Prevention, health departments, and other health providers. That was just a few of the needed improvements that, again, had been consigned to benign neglect over the years.

I guess what I am saying is, we should not put a stop to those improvements by forcing our local public health departments to use those funds to administer the smallpox vaccine. We are making strides in this country to bring our public health resources back up to where they should be. We should not be robbing those resources to administer the smallpox vaccine.

Local health departments are concerned that the financial burden of administering the smallpox vaccine will force them to make cuts in other areas. For example, Dr. Floyd Novak, president of the New York State Association of County Health Officials and the commissioner of health of the county that includes Syracuse, said, according to an article in the New York Times:

We have to transfer staff from other functions to do this. It just cannot be absorbed as business as usual. We need more resources.

Dr. Novak said his department would conduct 221 fewer screening tests for breast and cervical cancer and 835 fewer pediatric dental examinations, among other lost services, in the 2 months when vaccinations are to be performed. That is why the amendment we have before us is so crucial.

The Byrd amendment we are considering includes funds not only for smallpox vaccinations but also for other important homeland security needs, and it means that Dr. Novak in New York and other county health officials throughout the United States will not have to stop the important functions of breast and cervical cancer screening, pediatric dental examinations, and other functions we sorely need, in order to conduct the smallpox vaccinations.

I urge my colleagues to support this much-needed amendment. Of the \$5 billion amendment that Senator BYRD has proposed, \$850 million will go to make sure we have the needed resources to inoculate the 10 million estimated first responders—police, fire, emergency personnel, guardsmen, and others who will be our first responders in this country. These resources would, indeed, ensure we can do that without

robbing or stopping the other needed services of our public health departments.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the distinguished Senator from West Virginia, Mr. BYRD, presented a chart showing the major elements of the \$5 billion homeland security package. Eventually, this homeland security money, since it is money that people involved in that area want, we will address not only this year, in this 2003 bill, not only in the 2004 bill, but out into 2005. This Homeland Security Department has not even formed yet, as we know. There are several components in the existing Government that will be transferred into homeland security, and they have funding in this amendment I have offered.

For instance, Senator BYRD wants to add to this amendment I have offered \$1.4 billion for State and local assistance to combat terrorism, but we already have spread throughout the 11 bills \$2.2 billion to deal with the same concepts. We have money for first responder radio equipment. We have money for emergency planning and training.

Last year, I supported this money that Senator BYRD wants in his amendment for this bill—in a series of bills, as a matter of fact. The problem we face now is, should we continue to operate at the 2002 level until we can find an agreement with the President as to the amounts Senator BYRD wants to add to the President's request or should we move forward through the way we allocated money in the bill for the various elements of homeland security in the existing Departments? The money we put in the existing Departments will be transferred to Homeland Security as that Department is formed.

Senator BYRD wants to put up an additional \$1.8 billion for border security. Again, in the period ahead we will spend money like that, but in these bills already is a total of \$4.3 billion, and we are looking at a period of less than 8 months to spend that money.

I have presented the amendment that is before the Senate now because we want to find a way to work with the President to close the books on the 2003 appropriations. We cannot do that if we continue to battle with the administration and try to give them money beyond what they believe is necessary.

At the time we were looking at this last year, we thought the Homeland Security Department would have been created before September 30 of last year. We wanted to put up money so it would be there for the Homeland Secu-

rity Department to be transferred to start spending in October. This money would be started to be spent in late February or March.

I am trying to make a point. Take airport security; Senator BYRD wants an additional \$720 million. We have already appropriated substantial monies that are in the supplemental from last year for airport security. We have tried to fund the needs of the Transportation Security Administration. We already have an additional \$374 million in these separate portions of the amendment I have offered.

I am trying to emphasize the fact that we do not need to give this Department of Homeland Security more money beyond what has been asked.

On nuclear and energy security, I do not disagree with the statements that have been made about the needs for additional money. In this amendment I have offered is \$1.650 billion for that function. Senator BYRD wants to add another \$296 million. I understand he is trying to fully fund the estimated needs of homeland security for the future, which is a laudable goal, but we are trying to stay within some sort of budget constraint.

As I said, let's finish the job of getting the books closed on how much the agencies have to spend in the remainder of fiscal year 2003.

On Federal law enforcement with the FBI, Senator BYRD wants to add \$212 million to the \$1.2 billion already in the bill. I am urging the Senate to listen in terms of the concepts we have worked out. Stop this battle with the President over how much is needed for the agency that has not even been established yet. The various components of that agency, the Homeland Security Department, will have enough money coming into this new Department to fully fund whatever they can do by the time they get organized as a Department.

I urge the Senate to oppose the amendment offered by the Senator from West Virginia—not because he is not right at estimating the future needs of homeland security—because we believe we are right in saying, let's fund now the money that can be spent before the end of this fiscal year, be spent before September 30. I am confident we have sufficient moneys in this amendment that we have offered in the 11 separate sections which would normally be separate appropriations bills, enough money to deal with the problems of homeland security.

Beyond that, I remind the Senate the President still has some money left from the \$20 billion we gave him after 9/11. If there are any defects here, he has more than \$5 billion in that account and can allocate it if it is necessary to establish Homeland Security so long as it is working toward establishing the facilities and entities we need to prevent further repetition of the catastrophe of September 11.

I hope the Senate will listen. To adopt the Byrd amendment will be to

prolong the conference. If it was in a bill that would go to the President, he would veto it. Then where are we? Maybe I am too pragmatic about this, but it is time to get this job done. The amendment I have offered will get the job done. There will still be some differences with the House. As a matter of fact, there will still be some differences with the administration because we have increased some items that they do not want to see increased and we have decreased some they do not want decreased. But overall, we are within the total limit and parameters of the requests of the President.

I hope tomorrow the Senate will be looking at this. There will be further debate tomorrow morning. The leader will, of course, state what the procedure will be. We expect a vote sometime around noon or soon thereafter on the Byrd amendment. I am hopeful that the Senate will work with us to try and understand my job now is to get this amendment to conference.

As I told the Senate Members, the House has not passed any of these bills. It passed some of them last year. We did not act on them. We passed some last year and they did not act on them. We are trying to restart the 2003 conference and there will be an overall conference on all 11 bills at one time if the Senate will give us the support to pass this bill and take it to conference.

There will be individual differences as far as amendments are concerned. As a matter of fact, there are some things in this amendment I personally would change, but they have been brought here by the work of the subcommittee chairmen and ranking Members of the individual areas covered by these bills. I think it is the best course to follow, to take this amendment to conference, to go to the House and say, let's get these 11 bills finished so the agencies will know for certain the money they have. Even the homeland security bill was not passed when we originally contemplated passing the appropriations to fund it.

I am confident we have done the best we can under the circumstance. Again, I do not criticize Senator BYRD. Eventually, we will spend more than \$5 billion in addition to what we have in the amendment before the Senate. However, we do not need it now. I sat through all the hearings that have been mentioned, that Senator BYRD had on the needs for homeland security across the Nation. I remember going to small towns in my State when the mayor told me they needed a new fire truck. They needed a new fire truck? They have never had a fire truck. There is not anyone in the country that does not want some of this homeland security money. The question is, what is needed now to go on with the job and protect the country. I believe our amendment does it.

I send to the desk a statement prepared by the individual subcommittees that goes along with 11 components of this bill. Had we had the meetings of

the separate subcommittees and reported separate bills, we would have prepared 11 reports. Instead, I am submitting for the RECORD to be printed the overview and summary of each of the components so there will be no question in the future of what is intended by the provisions of the amendment I have offered if it is enacted. I ask unanimous consent it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, AS FOLLOWS:

**AGRICULTURE, RURAL DEVELOPMENT,
FOOD AND DRUG ADMINISTRATION,
AND RELATED AGENCIES APPROPRIA-
TIONS BILL, 2003**

JANUARY ___, 2003.—Ordered to be printed

Mr. COCHRAN, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Title I: Agricultural programs	\$29,252,688,000	\$25,521,466,000
Title II: Conservation programs	1,056,139,000	1,036,864,000
Title III: Rural economic and community development programs	2,569,924,000	2,739,526,000
Title IV: Domestic food programs	37,945,627,000	41,926,581,000
Title V: Foreign assistance and related programs	1,124,518,000	1,463,645,000
Title VI: Related agencies	1,456,651,000	1,488,490,000
Title VII: General provisions	-327,104,000	24,496,000
Total, new budget (obligational) authority	73,078,443,000	74,201,068,000

¹ Includes emergency supplemental appropriations.

OVERVIEW AND SUMMARY OF THE BILL

The Agriculture, Rural Development, Food and Drug Administration, and Related Agencies appropriations bill provides funding for a wide array of Federal programs, mostly in the U.S. Department of Agriculture [USDA]. These programs include agricultural research, education, and extension activities; natural resources conservation programs; farm income and support programs; marketing and inspection activities; domestic food assistance programs; rural economic and community development activities, and telecommunications and electrification assistance; and various export and international activities of the USDA.

The bill also provides funding for the Food and Drug Administration [FDA] and the Commodity Futures Trading Commission [CFTC], and allows the use of collected fees for administrative expenses of the Farm Credit Administration [FCA].

Given the budgetary constraints that the Committee faces, the bill as reported provides the proper amount of emphasis on agricultural and rural development programs and on other programs and activities funded by the bill. It is within the subcommittee's allocation for fiscal year 2003.

All accounts in the bill have been closely examined to ensure that an appropriate level of funding is provided to carry out the programs of USDA, FDA, CFTC, and FCA. Details on each of the accounts, the funding level, and the Committee's justifications behind the funding levels are included in the report.

The Committee has encouraged the consideration of grant and loan applications from various entities. The Committee expects the Department only to approve those applications judged meritorious when subjected to the established review process.

**GOVERNMENT PERFORMANCE AND RESULTS
ACT**

Public Law 103-62, the Government Performance and Results Act [GPRA] of 1993, requires Federal agencies to develop succinct and precise strategic plans and annual performance plans that focus on results of funding decisions made by the Congress. Rather than simply providing details of activity lev-

els, agencies will set outcome goals based on program activities and establish performance measures for use in management and budgeting. In an era of restricted and declining resources, it is paramount that agencies focus on the difference they make in citizens' lives.

The Committee supports the concepts of this law and intends to use the agencies' plans for funding purposes. The Committee considers GPRA to be a viable way to reduce Federal spending while achieving a more efficient and effective Government and will closely monitor compliance with this law. The Committee is fully committed to the success and outcome of GPRA requirements as envisioned by the Congress, the administration, and this Committee.

**ACCURAL FUNDING OF RETIREMENT COSTS AND
POST-RETIREMENT HEALTH BENEFITS**

The President's Budget includes a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requests an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill," as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice,

<i>Total obligational authority, fiscal year 2003</i>	
Amount of bill as reported to the Senate	\$
Amount of 2002 appropriations acts to date	73,078,443,000
Amount of estimates, 2003	73,530,625,000
The bill as recommended to the Senate:	
Over the appropriations provided in 2002	
Over the estimates for 2003	

BREAKDOWN BY TITLE

The amounts of obligational authority for each of the six titles are shown in the following table. A detailed tabulation, showing comparisons, appears at the end of this report. Recommendations for individual appropriation items, projects and activities are carried in this report under the appropriate item headings.

	2002 ¹	2003 Committee recommendation
Title I: Agricultural programs	\$29,252,688,000	\$25,521,466,000
Title II: Conservation programs	1,056,139,000	1,036,864,000
Title III: Rural economic and community development programs	2,569,924,000	2,739,526,000
Title IV: Domestic food programs	37,945,627,000	41,926,581,000
Title V: Foreign assistance and related programs	1,124,518,000	1,463,645,000
Title VI: Related agencies	1,456,651,000	1,488,490,000
Title VII: General provisions	-327,104,000	24,496,000
Total, new budget (obligational) authority	73,078,443,000	74,201,068,000

which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

**FEDERAL EMPLOYEES COMPENSATION ACT
(FECA)**

The President's budget includes a legislative proposal to allow the Department of Labor (DOL) to charge agencies for administrative costs related to FECA benefits paid to employees. Currently, although DOL bills agencies for FECA benefits; it does not bill agencies for the costs of administering these benefits.

The President's budget includes the administrative costs in each agency's budget, as opposed to the DOL budget, where the funds have previously been appropriated. The Committee's recommendation, however, assumes that this proposal will not be enacted into law, and excludes these administrative costs.

RENTAL PAYMENTS TO GSA

In recent years, funding for General Services Administration (GSA) rental payments has been appropriated to the USDA Agriculture Buildings and Facilities and Rental Payments account. The budget request proposes decentralizing these expenses and appropriating the proper amounts to each separate agency and activity. The Committee does not support this request, and provides funding for rental payments in the same account as previous years. The Committee expects each agency to properly manage its rental space needs to ensure the most efficient use of limited Federal resources.

**TITLE I—AGRICULTURAL PROGRAMS
PRODUCTION, PROCESSING, AND MARKETING
OFFICE OF THE SECRETARY**

Appropriations, 2002 ¹	\$2,992,000
Budget estimate, 2003 ²	36,667,000
Committee recommendation	3,412,000

¹ Excludes \$80,919,000 in emergency supplemental appropriations provided by Public Law 107-117.

² Excludes \$74,000 requested for employee pension and health benefits.

The Secretary of Agriculture, assisted by the Deputy Secretary, Under Secretaries and Assistant Secretaries, Chief Information Officer, Chief Financial Officer, and members of their immediate staffs, directs and coordinates the work of the Department. This includes developing policy, maintaining relationships with agricultural organizations and others in the development of farm programs, and maintaining liaison with the Executive Office of the President and Members of Congress on all matters pertaining to agricultural policy.

The general authority of the Secretary to supervise and control the work of the Department is contained in the Organic Act (7 U.S.C. 2201-2202). The delegation of regulatory functions to Department employees and authorization of appropriations to carry out these functions is contained in 7 U.S.C. 450c-450g.

COMMITTEE RECOMMENDATIONS

For the Office of the Secretary, the Committee recommends an appropriation of \$3,412,000. This amount is \$420,000 more than the 2002 appropriation and \$33,255,000 less than the budget request.

This amount does not include \$28,250,000, as requested in the President's budget, for security improvements, as these funds were provided in the fiscal year 2002 emergency supplemental appropriations bill. This amount also does not include an increase of \$5,000,000 for Service Center Agencies streamlining, or \$5,000 for FECA administrative charges, as proposed in the budget.

Environmentally preferable products.—The Secretary shall work with the General Services Administration, the Department of Defense, the Environmental Protection Agency, and other appropriate agencies to maximize the purchases of environmentally preferable products, as defined by Executive Order 13101 on Federal Acquisition, Recycling and Waste Prevention. Such products are not only useful in improving the environment, but they can, when the product contains a substantial amount of agri-based content, also open considerable markets for farmers.

The Department should actively participate in joint task forces and other multi-agency entities in this area. It should actively work to properly define standards for agri-based content of products and work towards the development of such environmentally preferable products.

Drought mitigation.—The Committee is concerned by the lack of a coherent national policy to combat drought. When drought strikes, it is a very serious disaster bringing economic and personal hardships to large sections of the nation. Current conditions in the Pacific Northwest, as one example, have resulted in water supplies for agriculture falling to within only 20 to 30 percent of normal supply. The report of the National Drought Commission, "Preparing for Drought in the 21st Century", recommends that Congress pass a National Drought Preparedness Act. Such an act would establish a Federal/non-Federal partnership through a National Drought Council responsible for implementing a national drought policy. The Committee expects the Secretary to carry out the recommendations of the National

Drought Commission and coordinate USDA mission areas to provide a response to drought-stricken areas in as prompt and meaningful a way as possible.

Administrative convergence.—The Secretary is expected to seek the Committee's approval before implementing a merger or reduction of any administrative or information technology functions relating to the Farm Service Agency, Natural Resources Conservation Service, USDA Rural Development, or any other agency of the Department.

Lower Mississippi River Delta.—The Committee remains supportive of actions by the Department to improve economic and social conditions in the Lower Mississippi River Delta. The Committee encourages the Secretary to give consideration to utilizing locations in the Delta for Department-wide functions, such as training sessions, for USDA personnel and other activities, where practicable, in order to help bring added economic stimulus to the region. The Committee is aware that property in Helena, Arkansas, may be available through a gift to the Department for such purposes. The Committee requests the Secretary to investigate this opportunity and to provide a report to the Committee on this subject by March 1, 2003.

Federal procurement of biobased products.—The Secretary, after consultation with the Administrator, the Administrator of General Services, and Secretary of Commerce (acting through the Director of the National Institute of Standards and Technology) shall prepare and from time to time revise guidelines for the use of procuring agencies in complying with the requirements of Public Law 107-171, section 9002. The Secretary shall also work to carry out all other requirements of section 9002.

Ground and surface water conservation program.—The Committee is concerned that the Secretary may restrict access to funding under the ground and surface water conservation program authorized in the Farm Security and Rural Investment Act to producers in one region of the country. The Committee directs the Secretary to provide access to funds under this program to all eligible producers, and in determining allocations for fiscal year 2003, to give priority to eligible producers who did not benefit from fiscal year 2002 funds.

EXECUTIVE OPERATIONS

Executive operations were established as a result of the reorganization of the Department to provide a support team for USDA policy officials and selected Departmentwide services. Activities under the executive operations include the Office of the Chief Economist, the National Appeals Division, and the Office of Budget and Program Analysis.

CHIEF ECONOMIST

Appropriations, 2002	\$7,704,000
Budget estimate, 2003 ¹	12,117,000
Committee recommendation	12,016,000

¹ Excludes \$391,000 requested for employee pension and health benefits.

The Office of the Chief Economist advises the Secretary of Agriculture on the economic implications of Department policies and programs. The Office serves as the single focal point for the Nation's economic intelligence and analysis, risk assessment, energy and new uses, and cost-benefit analysis related to domestic and international food and agriculture issues, and is responsible for coordination and review of all commodity and aggregate agricultural and food-related data used to develop outlook and situation material within the Department.

COMMITTEE RECOMMENDATIONS

For the Office of the Chief Economist, the Committee recommends \$12,016,000. This

amount is \$4,312,000 more than the 2002 appropriation and \$101,000 less than the budget request.

This amount does not include an increase of \$101,000 for rental payments to GSA, as requested in the budget.

NATIONAL APPEALS DIVISION

Appropriations, 2002	\$12,869,000
Budget estimate, 2003 ¹	14,334,000
Committee recommendation	13,759,000

¹ Excludes \$928,000 requested for employee pension and health benefits.

The National Appeals Division conducts administrative hearings and reviews of adverse program decisions made by the rural development mission area, the Farm Service Agency, the Risk Management Agency, and the Natural Resources Conservation Service.

COMMITTEE RECOMMENDATIONS

For the National Appeals Division, the Committee recommends \$13,759,000. This amount is \$890,000 more than the 2002 appropriation and \$575,000 less than the budget request.

This amount does not include an increase of \$575,000 for rental payments to GSA, as requested in the budget.

OFFICE OF BUDGET AND PROGRAM ANALYSIS

Appropriations, 2002	\$7,041,000
Budget estimate, 2003 ¹	7,358,000
Committee recommendation	7,358,000

¹ Excludes \$530,000 requested for employee pension and health benefits.

The Office of Budget and Program Analysis provides direction and administration of the Department's budgetary functions including development, presentation, and execution of the budget; reviews program and legislative proposals for program, budget, and related implications; analyzes program and resource issues and alternatives, and prepares summaries of pertinent data to aid the Secretary and departmental policy officials and agency program managers in the decisionmaking process; and provides departmentwide coordination for and participation in the presentation of budget-related matters to the committees of the Congress, the media, and interested public. The Office also provides departmentwide coordination of the preparation and processing of regulations and legislative programs and reports. This amount includes an increase of \$269,000 for pay parity costs and benefits.

COMMITTEE RECOMMENDATIONS

For the Office of Budget and Program Analysis, the Committee recommends \$7,358,000. This amount is \$317,000 more than the 2002 appropriation and the same as the budget request.

OFFICE OF THE CHIEF INFORMATION OFFICER

Appropriations, 2002	\$10,029,000
Budget estimate, 2003 ¹	31,277,000
Committee recommendation	31,275,000

¹ Excludes \$455,000 requested for employee pension and health benefits.

The Office of the Chief Information Officer was established in August 1996, pursuant to the Clinger-Cohen Act of 1996, which required the establishment of a Chief Information Officer for major Federal agencies. This office provides policy guidance, leadership, coordination, and direction to the Department's information management and information technology investment activities in support of USDA program delivery. The Office provides long-range planning guidance, implements measures to ensure that technology investments are economical and effective,

coordinates interagency information resources management projects, and implements standards to promote information exchange and technical interoperability. In addition, the Office of the Chief Information Officer is responsible for certain activities financed under the Department's working capital fund (7 U.S.C. 2235). The Office also provides telecommunication and automated data processing [ADP] services to USDA agencies through the National Information Technology Center with locations in Fort Collins, CO, and Kansas City, MO. Direct ADP operational services are also provided to the Office of the General Counsel, Office of Communications, the Office of the Chief Financial Officer, and Executive Operations.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$31,275,000 for the Office of the Chief Information Officer. This amount is \$21,246,000 more than the 2002 appropriation and \$2,000 less than the budget request.

This amount does not include an increase of \$2,000 for FECA administrative charges, as requested in the budget.

COMMON COMPUTING ENVIRONMENT

Appropriations, 2002	\$59,369,000
Budget estimate, 2003	133,155,000
Committee recommendation	133,155,000

The Department of Agriculture Reorganization Act of 1994 requires the Secretary of Agriculture to procure and use computer systems in a manner that enhances efficiency, productivity, and client services, and that promotes computer information sharing among agencies of the Department. The Clinger-Cohen Act of 1996 requires USDA to maximize the value of information technology acquisitions to improve the efficiency and effectiveness of USDA programs. Since its beginning in 1996, the USDA Service Center Modernization initiative has been working to restructure county field offices, modernize and integrate business approaches and replace the current, aging information systems with a modern Common Computing Environment that optimizes information sharing, customer service, and staff efficiencies.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$133,155,000 for the Common Computing Environment. This is \$73,786,000 more than the 2002 appropriation and the same as the budget request.

OFFICE OF THE CHIEF FINANCIAL OFFICER

Appropriations, 2002	\$5,384,000
Budget estimate, 2003 ¹	7,918,000
Committee recommendation	7,877,000

¹ Excludes \$481,000 requested for employee pension and health benefits.

Under the Chief Financial Officers Act of 1990, the Chief Financial Officer is responsible for the continued direction and oversight of the Department's financial management operations and systems. The Office is also responsible for the management and operation of the National Finance Center. In addition, the Office provides budget, accounting, and fiscal services to the Office of the Secretary, departmental staff offices, Office of the Chief Information Officer, Office of Communications, and executive operations.

COMMITTEE RECOMMENDATIONS

For the Office of the Chief Financial Officer, the Committee recommends \$7,877,000. This amount is \$2,493,000 more than the 2002 appropriation and \$41,000 less than the budget request.

This amount does not include an increase of \$41,000 for FECA administrative charges, as requested in the budget.

The Committee recognizes the broad range of activities carried out by the National Finance Center (NFC), and the importance of these activities to both the Department of Agriculture and the other customers it serves. In responding to a directive of this Committee, the Secretary provided a report on the Department's plans for continuing operation of the NFC. While that report included general objectives of enhanced performance and improved effectiveness, few details were included in regard to immediate plans regarding the NFC location or infrastructure. The report concluded that while the Department had every intention of continuing those NFC activities relating to its controllership function, intermediate or long-term plans focusing on other issues would be best addressed within the context of integrated Federal initiatives rather than by USDA unilaterally. The Committee is aware that the physical plant in which the NFC is located needs improvements, and certain cyber-security issues, such as "mirroring" backup systems, require immediate attention. The Committee expects the Chief Financial Officer to complete a review of NFC needs in regard to physical location and cyber security and to include in future budget requests those items necessary and proper to maintain the NFC in a safe and secure setting.

WORKING CAPITAL FUND

Appropriations, 2002
Budget estimate, 2003	\$21,000,000
Committee recommendation

The Working Capital Fund was established in the 1944 Appropriations Act. It was created for certain central services in the Department of Agriculture, including duplicating and other visual information services, art and graphics, video services, supply, centralized accounting system, centralized automated data processing system for payroll, personnel, and related services, voucher payments services, and ADP systems. The National Finance Center's expenses are also funded through this fund.

COMMITTEE RECOMMENDATIONS

The Committee does not provide an appropriation to the Working Capital Fund, as requested in the budget. This is the same as the 2002 level and \$21,000,000 less than the budget request.

The Committee is aware that approximately \$21,700,000 of fiscal year 2002 unobligated balances have been transferred to the Working Capital Fund and will be available for fiscal year 2003 to meet the needs for which an appropriation was requested.

OFFICE OF THE ASSISTANT SECRETARY FOR CIVIL RIGHTS

Appropriations, 2002
Budget Estimate, 2003
Committee recommendation	\$400,000

COMMITTEE RECOMMENDATIONS

The Committee recommends \$400,000 to establish the Office of the Assistant Secretary for Civil Rights. This amount is \$400,000 more than the 2002 level and the budget request.

The Committee believes that additional policy level oversight provided through this new Assistant Secretary will be beneficial in addressing these concerns and in establishing policies to improve civil rights performance at the Department.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

Appropriations, 2002	\$647,000
Budget estimate, 2003 ¹	780,000
Committee recommendation	780,000

¹ Excludes \$17,000 requested for employee pension and health benefits.

The Office of the Assistant Secretary for Administration directs and coordinates the work of the departmental staff in carrying out the laws enacted by the Congress relating to real and personal property management, personnel management, equal opportunity and civil rights programs, ethics, and other general administrative functions. In addition, the Office of the Assistant Secretary for Administration is responsible for certain activities financed under the Department's working capital fund (7 U.S.C. 2235).

COMMITTEE RECOMMENDATIONS

For the Office of the Assistant Secretary for Administration, the Committee recommends \$780,000. This amount is \$133,000 more than the 2002 level and the same as the budget request.

AGRICULTURE BUILDINGS AND FACILITIES AND RENTAL PAYMENTS

Appropriations, 2002	\$187,647,000
Budget estimate, 2003 ¹	70,499,000
Committee recommendation	197,662,000

¹ Excludes \$493,000 requested for employee pension and health benefits, and includes no funding for rental payments.

Rental payments.—Annual appropriations are made to finance the appropriated portion of the payments to the General Services Administration [GSA] for rental of space and for related services to all USDA agencies, except the Forest Service, which is funded by another appropriations bill.

The requirement that GSA charge commercial rent rates to agencies occupying GSA-controlled space was established by the Public Buildings Amendments of 1972. The methods used to establish commercial rent rates in GSA space follow commercial real estate appraisal practices. Appeal and rate review procedures are in place to assure that agencies have an opportunity to contest rates they feel are incorrect.

Building operations and maintenance.—On October 1, 1984, the General Services Administration [GSA] delegated the operations and maintenance function for the buildings in the D.C. complex to the Department. This activity provides departmental staff and support services to operate, maintain, and repair the buildings in the D.C. complex. GSA expanded the delegation to include two additional buildings on October 1, 1986. One building is the Government-owned warehouse for forms in Lanham, MD, and the other is a leased warehouse for the excess property operation located at 49 L Street SW, Washington, DC. GSA retains responsibility for major nonrecurring repairs. In fiscal year 1999, USDA began operations and maintenance of the Beltsville office facility.

Strategic space plan.—The Department's headquarters staff is presently housed in a four-building Government-owned complex in downtown Washington, DC, and in leased buildings in the Metropolitan Washington, DC, area. In 1995, USDA initiated a plan to improve the delivery of USDA programs to the American people, including streamlining the USDA organization. A high-priority goal in the Secretary's plan is to improve the operation and effectiveness of the USDA headquarters in Washington, DC. To implement this goal, a strategy for efficient reallocation of space to house the restructured headquarters agencies in modern and safe facilities has been proposed. This USDA strategic space plan will correct serious problems USDA has faced in its facility program, including the inefficiencies of operating out of scattered leased facilities and serious safety hazards which exist in the Agriculture South Building.

During fiscal year 1998, the Beltsville Office Facility was completed. This facility

was constructed with funds appropriated to the Department and is located on Government-owned land in Beltsville, Maryland. In fiscal year 1999, USDA began operations at the Beltsville Office Facility.

COMMITTEE RECOMMENDATIONS

For U.S. Department of Agriculture buildings and facilities and payments for the rental of space and related services, the Committee recommends \$197,662,000. This amount is \$10,015,000 more than the 2002 appropriation and \$127,163,000 more than the budget request. The Committee does not concur with the President's proposal to fund rental payments in the accounts of USDA agencies occupying GSA controlled space and provides \$130,266,000 in this account for rental payments.

The following table reflects the Committee's specific recommendations for this account as compared to the fiscal year 2002 and budget request levels:

[In thousands of dollars]

	2002 estimate	2003 budget request	Committee recommendation
Rental Payments	130,266	130,266
Building Operations	31,438	36,522	33,419
Strategic Space Plan ..	25,943	33,977	33,977
Total	187,647	70,499	197,662

HAZARDOUS MATERIALS MANAGEMENT

Appropriations, 2002	\$15,665,000
Budget estimate, 2003 ¹	15,685,000
Committee recommendation	15,685,000

¹ Excludes \$59,000 requested for employee pension and health benefits.

Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act, the Department has the responsibility to meet the same standards regarding the storage and disposition of hazardous materials as private businesses. The Department is required to contain, clean up, monitor, and inspect for hazardous materials in areas under the Department's jurisdiction.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$15,685,000 for hazardous materials management. This amount is \$20,000 more than the 2002 appropriation and the same as the budget request.

DEPARTMENTAL ADMINISTRATION

Appropriations, 2002	\$37,079,000
Budget estimate, 2003 ¹	46,398,000
Committee recommendation	42,479,000

¹ Excludes \$2,144,000 requested for employee pension and health benefits.

Departmental administration is comprised of activities that provide staff support to top policy officials and overall direction and coordination of administrative functions of the Department. These activities include departmentwide programs for human resource management, management improvement, occupational safety and health management, real and personal property management, procurement, contracting, motor vehicle and aircraft management, supply management, civil rights and equal opportunity, participation of small and disadvantaged businesses and socially disadvantaged farmers and ranchers in the Department's program activities, emergency preparedness, small and disadvantaged business utilization, and the regulatory hearing and administrative proceedings conducted by the Administrative Law Judges and Judicial Officer. Departmental Administration also provides administrative support to the Board of Contract Appeals. Established as an independent entity within the Department, the Board adju-

dicates contract claims by and against the Department, and is funded as a reimbursable activity.

Departmental administration is also responsible for representing USDA in the development of Governmentwide policies and initiatives; and analyzing the impact of Governmentwide trends and developing appropriate USDA principles, policies, and standards. In addition, departmental administration engages in strategic planning and evaluates programs to ensure USDA-wide compliance with applicable laws, rules, and regulations pertaining to administrative matters for the Secretary and general officers of the Department.

COMMITTEE RECOMMENDATIONS

For Departmental Administration, the Committee recommends an appropriation of \$42,479,000. This amount is \$5,400,000 more than the fiscal year 2002 appropriation and \$3,919,000 less than the budget request.

This amount does not include an increase of \$3,898,000 for rental payments to GSA, or \$21,000 for FECA administrative charges, as requested in the budget.

OFFICE OF THE ASSISTANT SECRETARY FOR CONGRESSIONAL RELATIONS

Appropriations, 2002	\$3,718,000
Budget estimate, 2003 ¹	4,157,000
Committee recommendation	4,157,000

¹ Excludes \$65,000 requested for employee pension and health benefits.

The Office of the Assistant Secretary for Congressional Relations maintains a liaison with the Congress and White House on legislative matters. It also provides for overall direction and coordination in the development and implementation of policies and procedures applicable to the Department's intra- and inter-governmental relations.

COMMITTEE RECOMMENDATIONS

For the Office of the Assistant Secretary for Congressional Relations, the Committee recommends an appropriation of \$4,157,000. This amount is \$439,000 more than the 2002 level and the same as the budget request.

The Committee allows these funds to be transferred to support congressional relations' activities at the agency level. Within 30 days from the enactment of this Act, the Secretary shall notify the House and Senate Committees on Appropriations on the allocation of these funds by USDA agency, along with an explanation for the agency-by-agency distribution of the funds.

OFFICE OF COMMUNICATIONS

Appropriations, 2002	\$8,894,000
Budget estimate, 2003 ¹	9,637,000
Committee recommendation	9,637,000

¹ Excludes \$516,000 requested for employee pension and health benefits.

The Office of Communications provides direction, leadership, and coordination in the development and delivery of useful information through all media to the public on USDA programs. The Office serves as the liaison between the Department and the many associations and organizations representing America's food, fiber, and environmental interests.

COMMITTEE RECOMMENDATIONS

For the Office of Communications, the Committee recommends an appropriation of \$9,637,000. This amount is \$743,000 more than the 2002 appropriation and the same as the budget request.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$70,839,000
Budget estimate, 2003 ¹	82,231,000
Committee recommendation	78,127,000

¹ Excludes \$4,878,999 requested for employee pension and health benefits.

The Office of the Inspector General was established October 12, 1978, by the Inspector General Act of 1978. This act expanded and provided specific authorities for the activities of the Office of Inspector General which had previously been carried out under the general authorities of the Secretary of Agriculture.

The Office is administered by an inspector general who reports directly to the Secretary of Agriculture. Functions and responsibilities of this Office include direction and control of audit and investigative activities within the Department, formulation of audit and investigative policies and procedures regarding Department programs and operations, and analysis and coordination of program-related audit and investigation activities performed by other Department agencies.

The activities of this Office are designed to assure compliance with existing laws, policies, regulations, and programs of the Department's agencies, and to provide appropriate officials with the means for prompt corrective action where deviations have occurred. The scope of audit and investigative activities is large and includes administrative, program, and criminal matters. These activities are coordinated, when appropriate, with various audit and investigative agencies of the executive and legislative branches of the Government.

COMMITTEE RECOMMENDATIONS

For the Office of Inspector General, the Committee recommends an appropriation of \$78,127,000. This is \$7,288,000 more than the 2002 appropriation and \$4,104,000 less than the budget request. This amount does not provide an increase of \$4,034,000 for rental payments to GSA, or \$70,000 for FECA administrative charges, as requested in the budget.

OFFICE OF THE GENERAL COUNSEL

Appropriations, 2002	\$32,627,000
Budget estimate, 2003 ¹	37,287,000
Committee recommendation	35,588,000

¹ Excludes \$2,554,000 requested for employee pension and health benefits.

The Office of the General Counsel, originally known as the Office of the Solicitor, was established in 1910 as the law office of the Department of Agriculture and performs all of the legal work arising from the activities of the Department. The General Counsel represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of various programs and acts. The office also serves as general counsel for the Commodity Credit Corporation and the Federal Crop Insurance Corporation and reviews criminal cases arising under the programs of the Department for referral to the Department of Justice.

COMMITTEE RECOMMENDATIONS

For the Office of the General Counsel, the Committee recommends an appropriation of \$35,588,000. This amount is \$2,961,000 more than the 2002 appropriation and \$1,699,000 less than the budget request.

This amount does not include an increase of \$1,693,000 for rental payments to GSA, or \$6,000 for FECA administrative charges, as requested in the budget.

OFFICE OF THE UNDER SECRETARY FOR RESEARCH, EDUCATION, AND ECONOMICS

Appropriations, 2002	\$573,000
Budget estimate, 2003 ¹	780,000
Committee recommendation	780,000

¹ Excludes \$17,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Research, Education, and Economics provides direction and coordination in carrying out the laws enacted by the Congress for food and agricultural research, education, extension, and economic and statistical information. The Office has oversight and management responsibilities for the Agricultural Research Service; Cooperative State Research, Education, and Extension Service; Economic Research Service; and National Agricultural Statistics Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Research, Education, and Economics, the Committee recommends an appropriation of \$780,000. This amount is \$207,000 more than the 2002 level and the same as the budget request.

Nutrition monitoring activities are vital to shaping policies for food safety, child nutrition, food assistance, and dietary guidance. While the Committee supports the process underway to integrate the National Health and Nutrition Examination Survey (NHANES) conducted by the Department of Health and Human Services and the Continuing Survey of Food Intakes by Individuals (CSFII) conducted by USDA, it is concerned that USDA has failed to continue to conduct the CSFII in 2000 and 2001 as the integration process continues. The Committee directs USDA to conduct the CSFII to ensure that the quality of dietary data collected is not diminished, and survey methods capture statistically valid intakes of various population groups, especially at-risk groups, and has provided a \$1,000,000 increase to ARS for this purpose.

ECONOMIC RESEARCH SERVICE

Appropriations, 2002	\$67,200,000
Budget estimate, 2003 ¹	79,243,000
Committee recommendation	65,123,000

¹Excludes \$2,789,000 requested for employee pension and health benefits

The Economic Research Service [ERS] provides economic and other social science information and analysis for public and private decisions on agriculture, natural resources, food, and rural America. The information ERS produces is for use by the general public and to help the executive and legislative branches develop, administer, and evaluate agricultural and rural policies and programs.

COMMITTEE RECOMMENDATIONS

For the Economic Research Service, the Committee recommends an appropriation of \$65,123,000. This amount is \$2,077,000 less than the 2002 level and \$14,120,000 less than the budget request. This amount does not include an increase of \$5,914,000 for rental payments to GSA, or \$11,000 for FECA administrative charges, as requested in the budget.

The Committee encourages ERS to fully fund activities relating to the improvement of retail price reporting.

The Committee provides \$1,000,000 for the ERS to carry out food and nutrition studies through the Small Research Grants Program. The Committee provides funding under the Food and Nutrition Service for other studies and evaluations relating to that agency's programs and that agency's responsibilities for administering the food assistance programs within USDA. The Committee directs the ERS to work fully with the FNS to ensure that all ongoing studies and evaluations are completed to their full scope. Further, the Committee provides the Secretary with the authority to transfer up to \$2,000,000 from FNS to ERS, if such a transfer is deemed necessary for ERS to complete ongoing studies, or if the Secretary determines that a particular proposed study

would be more effectively carried out by ERS. The Committee expects to be notified each time that such a transfer of funds occurs, including the amount of the transfer, and a summary of the study for which the transfer was deemed necessary.

NATIONAL AGRICULTURAL STATISTICS SERVICE
Appropriations, 2002

\$113,786,000

Budget estimate, 2003¹

143,659,000

Committee recommendation

140,854,000

¹Excludes \$5,410,000 requested for employee pension and health benefits.

The National Agricultural Statistics Service [NASS] administers the Department's program of collecting and publishing current national, State, and county agricultural statistics. These statistics provide accurate and timely projections of current agricultural production and measures of the economic and environmental welfare of the agricultural sector which are essential for making effective policy, production, and marketing decisions. NASS also furnishes statistical services to other USDA and Federal agencies in support of their missions, and provides consulting, technical assistance, and training to developing countries.

The Service is also responsible for administration of the Census of Agriculture, which was transferred from the Department of Commerce to the Department of Agriculture in fiscal year 1997 to consolidate agricultural statistics programs. The Census of Agriculture is taken every 5 years and provides comprehensive data on the agricultural economy including: data on the number of farms, land use, production expenses, farm product values, value of land and buildings, farm size and characteristics of farm operators, market value of agricultural production sold, acreage of major crops, inventory of livestock and poultry, and farm irrigation practices. The 1997 Census of Agriculture was released on February 1, 1999. The next agricultural census will be conducted beginning in January 2003 for the calendar year 2002.

COMMITTEE RECOMMENDATIONS

For the National Agricultural Statistics Service, the Committee recommends an appropriation of \$140,854,000. This amount is \$27,068,000 more than the 2002 appropriation and \$2,805,000 less than the budget request. This amount does not include an increase of \$2,801,000 for rental payments to GSA, or \$4,000 for FECA administrative charges, as requested in the budget.

The Committee recognizes the importance of the Census of Agriculture to collect reliable, accurate data about agriculture in the United States, providing a statistical overview of U.S. farms and ranches every 5 years. This information is critical in order to make informed decisions regarding all aspects of the agricultural sector and rural America. The Committee's recommendation includes an increase of \$15,924,000 over the 2002 level for Census of Agriculture activities. The Committee understands this increase is necessary for NASS to carry out the majority of information gathering activities related to the 2002 Census of Agriculture.

The Committee also encourages NASS to conduct Monthly Hogs and Pigs Inventory reporting, and Barrow and Gilt Slaughter reporting.

AGRICULTURAL RESEARCH SERVICE SALARIES AND EXPENSES

Appropriations, 2002 ¹	\$979,464,000
Budget estimate, 2003 ²	971,445,000
Committee recommendation	1,053,597,000

¹Excludes \$40,000,000 in emergency supplemental appropriations provided by Public Law 107-117.

²Excludes \$42,641,000 requested for employee pension and health benefits.

The Agricultural Research Service [ARS] is responsible for conducting basic, applied, and developmental research on: soil, water, and air sciences; plant and animal productivity; commodity conversion and delivery; human nutrition; and the integration of agricultural systems. The research applies to a wide range of goals; commodities; natural resources; fields of science; and geographic, climatic, and environmental conditions.

ARS is also responsible for the Abraham Lincoln National Agricultural Library which provides agricultural information and library services through traditional library functions and modern electronic dissemination to agencies of the USDA, public and private organizations, and individuals.

As the U.S. Department of Agriculture's in-house agricultural research unit, ARS has major responsibilities for conducting and leading the national agricultural research effort. It provides initiative and leadership in five areas: research on broad regional and national problems, research to support Federal action and regulatory agencies, expertise to meet national emergencies, research support for international programs, and scientific resources to the executive branch and Congress.

The mission of ARS research is to develop new knowledge and technology which will ensure an abundance of high-quality agricultural commodities and products at reasonable prices to meet the increasing needs of an expanding economy and to provide for the continued improvement in the standard of living of all Americans. This mission focuses on the development of technical information and technical products which bear directly on the need to: (1) manage and use the Nation's soil, water, air, and climate resources, and improve the Nation's environment; (2) provide an adequate supply of agricultural products by observing practices that will maintain a sustainable and effective agriculture sector; (3) improve the nutrition and well-being of the American people; (4) improve living in rural America; and (5) strengthen the Nation's balance of payments.

COMMITTEE RECOMMENDATIONS

For salaries and expenses of the Agricultural Research Service, the Committee recommends \$1,053,597,000. This is \$74,133,000 more than the 2002 level and \$82,152,000 more than the budget request.

This amount does not include an increase of \$2,807,000 for rental payments to GSA, or \$234,000 for FECA administrative charges, as requested in the budget.

The Committee recommendation includes \$4,623,000 of the savings from project terminations proposed in the budget. These savings are to be redirected to those research areas for which increased funding is provided by the Committee. The Committee does not provide funding for contingencies.

For fiscal year 2003, the Committee recommends funding increases, as specified below, for new and ongoing research activities. The remaining increase in appropriations from the fiscal year 2003 level is to be applied to mandatory pay and related cost increases to prevent the further erosion of the agency's capacity to maintain a viable research program at all research locations.

The Committee expects the agency to give attention to the prompt implementation and allocation of funds provided for the purposes identified by Congress.

In complying with the Committee's directives, ARS is expected not to redirect support for programs from one State to another without prior notification to and approval by the House and Senate Committees on Appropriations in accordance with the reprogramming procedures specified in the Act. Unless

otherwise directed, the Agricultural Research Service shall implement appropriations by programs, projects, commodities, and activities as specified by the Appropriations Committees. Unspecified reductions necessary to carry out the provisions of this Act are to be implemented in accordance with the definitions contained in the "Program, project, and activity" section of this report.

The Committee's recommendations with respect to specific areas of research are as follows:

Aerial application research.—Aerial application is a necessary crop protection tool in farming and permits large areas to be covered rapidly, thus ensuring timely and effective applications of large farming areas. The Committee provides an increase of \$120,000 from the fiscal year 2002 funding level for expanded ARS aerial application research at the College Station, TX, research station.

Agricultural genomes.—The Committee recognizes the importance of plant/crop genome sequencing and the need to identify genes that influence disease resistance, reproduction, and nutrition and provides an increase of \$1,175,000 from the fiscal year 2002 funding level for the proposed research as follows: Beltsville, MD, \$475,000; Kerrville, TX, \$350,000; and St. Paul, MN, \$350,000.

Agricultural genome bioinformatics.—The Committee provides an increase of \$600,000 from the fiscal year 2002 level to continue work on the Bioinformatics Institute for Model Plant Species at the National Center for Genome Resources in New Mexico, as authorized in Section 227 of the Agriculture Risk Protection Act (Public Law 106-224).

Agricultural law, Drake University.—The field of agricultural law and policy is developing rapidly, with many ramifications for agricultural producers and the food and agriculture industry. Developments in food and agricultural law and policy at the State and local level, in particular, are increasingly important to future opportunities for agricultural producers and rural communities. The Committee provides an increase of \$150,000 from the fiscal year 2002 level for support of a national center focusing on State and local food and agricultural law and policy. Drake University in Des Moines, Iowa, is highly qualified to serve as the location of the center. Of the funding available for this increase, \$20,000 is available to the Leflar School of Law at Fayetteville, AR.

Agroforestry research.—The Committee expects the ARS to continue its support for the South Central Family Farm Research Center at Booneville, AR. The Committee expects no less than the fiscal year 2002 level of funding to continue agroforestry research in conjunction with work at the University of Missouri.

In addition, emerging research indicates that shiitake mushrooms and other similar agroforestry products contain important cancer defeating and cholesterol reducing chemicals. The Committee provides an increase of \$50,000 from the fiscal year 2002 level to the ARS research station at Booneville, AR, for expanded cooperative research with the University of Missouri Agroforestry Center on plants, and in particular, shiitake mushrooms, which contain optimal amounts of these chemicals and to test models to substantiate health and nutrition claims.

Animal vaccines.—The U.S. food animal economy continues to be threatened by infectious diseases that can devastate the cattle, swine, and poultry industries. Increased research to investigate the adverse impacts of diseases on cattle, swine, and poultry are critically needed to avoid potential economic disasters, such as the spread of food and mouth disease. The Committee provides

an increase of \$150,000 from the fiscal year 2002 level to expand current collaborative research between ARS and the Universities of Connecticut and Missouri to develop more effective animal vaccines.

Appalachian Fruit Research Station.—The Committee recognizes the importance of the fruit research program carried out at the Appalachian Fruit Research Station in Kearneysville, WV, and provides an increase of \$350,000 from the fiscal year 2002 level for essential staffing to support the station's ongoing research to identify new alternatives for chemical control of insects, and to develop disease-resistant trees.

Appalachian pasture-based beef systems.—The Committee is aware of the benefits to be derived from the pasture-raised beef research program currently underway at the ARS Appalachian Farming Systems Research Center located in Beaver, WV. The research partnership, which includes West Virginia University, Virginia Tech, and ARS, is targeted to Appalachian cattle farmers. The Committee provides an increase of \$125,000 from the fiscal year 2002 level for this research, which will ensure the economic viability of these farmers and conserve and protect the region's environment.

Aquaculture research.—The Committee acknowledges the importance of avoiding duplication in research administered by the U.S. Department of Agriculture at various locations throughout the country. In order to ensure that duplication does not occur in the field of warmwater aquaculture research, the Stuttgart research facility should not engage in channel catfish research related to production systems, nutrition, water quality, genetics, disease diagnosis, or food processing which is ongoing at the National Warmwater Aquaculture Research Center at Stoneville, MS.

The Committee notes the tremendous opportunities provided through advancements in research related to aquaculture species in terms of producer income, U.S. balance of trade, and healthy diets for Americans. In view of the variety of ARS aquaculture research locations, the Committee believes that adequate sharing of information will best facilitate the operations of all research locations and requests the ARS to provide a listing of specific research projects in the field of aquaculture to the Committees on Appropriations of the House and the Senate.

Aquaculture research.—The Committee provides an increase of \$300,000 from the fiscal year 2002 funding level to the USDA/ARS National Small Grains and Potato Germplasm Research Laboratory, Aberdeen, ID, for support for an ARS cereal grain chemist/processing specialist assigned to the UI Hagerman Station to work on value-added processing of barley and oats to produce high-protein concentrates suitable for use in feeds for fish, and soluble fiber and starches for food and industrial uses.

Arid lands research.—The challenges for agricultural production and natural resource management in the desert Southwest and adjoining border regions are immense. Technologies for arid land agriculture are needed for the remediation of arid and semi-arid rangelands, sustainable agriculture production for growers of irrigated cotton and selected crops, and the restoration of disturbed lands. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for expanded research in rangeland resource management, irrigated farming technology, and environmental horticulture at the Jornada Experimental Range Station at Las Cruces, NM.

Arkansas Children's Nutrition Center, Little Rock, AR.—The Committee notes the importance of optimizing the nutrition and health of children from conception through adoles-

cence. The Center is leading major research efforts to understand the relationship between chronic disease and diet, genetics, and lifestyle. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for expanded investigations on these issues.

Biobased products from agricultural commodities.—The Committee is aware of the expanded effort required to develop biobased products and bioenergy from agricultural commodities which will create new demand for U.S. crops. The Committee provides an increase of \$1,800,000 over the fiscal year 2002 level for increased research on agricultural biomass feedstock and the production of biobased products from agricultural commodities. The research will be conducted at the following research locations: Madison, WI, \$400,000; New Orleans, LA, \$300,000; Wyndmoor, PA, \$500,000; Peoria, IL, \$300,000 and Albany, CA, \$300,000.

Biological control research.—The Committee has been impressed by results of the various approaches which have been taken by the Jamie Whitten Delta States Research Center in the area of biological controls of cotton insect pests. The economic and environmental benefits of this research could eventually reduce the vulnerability of crops to major insect pests and create alternatives to traditional crop protection methods. The Committee continues funding for this project at the fiscal year 2002 level.

Biomass crop production.—The Committee provides an increase of \$600,000 from the fiscal year 2002 level for increased cooperative research between ARS and South Dakota State University to further investigate the applicability of using a method of fiber extrusion to dry and process wet distiller grains from ethanol production into high value feed for cattle, as well as conversion to increased ethanol production.

Biomedical materials in plants.—Increased research is needed to carry out studies on tobacco and other plants as a medium to produce vaccines and other biomedical products for the prevention of many human and animal diseases. The Committee provides an increase of \$425,000 from the fiscal year 2002 level for expanded ARS cooperative research with the Biotechnology Foundation.

Biotechnology research to improve crops and livestock.—Biotechnology research has opened the path for sequencing and mapping the genes of crops and livestock, marking genes for adding precision to breeding of improved plants and animals, and identifying gene products through proteomics technology. Other technological advancements can be achieved in the livestock industry through the development of imaging at the molecular level using light, heat, and/or fluorescing signatures. These biotechnology efforts generate huge volumes of data, which must be managed, transmitted electronically, and analyzed. The Committee provides an increase of \$1,500,000 from the fiscal year 2002 level to ARS at Stoneville, MS, to support cooperative research in genomics and bioinformatics and in the use of biophotonics for the imaging of animal physiological processes at the cellular level.

Biotechnology risk assessment.—The National Academy of Sciences in a report of April, 2000, "Genetically Modified Pest-Protected Plants," affirms that genetically engineered organisms are not inherently more dangerous than similar organisms derived from conventional selection and breeding. It did, however, identify areas that needed further study. The Committee provides an increase of \$1,100,000 for fiscal year 2003 for research proposed in the President's budget as follows: Corvallis, OR; Ames, IA; Phoenix, AZ; \$300,000 each and Wapato, WA, \$200,000.

Broiler production in the Mid South.—Reduced broiler production costs are essential

for the industry to increase net profit and remain competitive internationally. The Committee recognizes the importance of the cooperation between the ARS Poultry Research Unit and the Mississippi Agricultural and Forestry Experiment Station at Mississippi State. This cooperation has resulted in improved bird nutrition, control of mycoplasma disease with vaccines, and overall health, vigor, and growth of the birds through improved housing environmental controls. The Committee provides an increase of \$1,000,000 from the fiscal year 2002 level to expand cooperative research on reducing ammonia levels in poultry litter, improving environmental controls, and reducing mortality in broiler flocks.

Canal Point sugarcane research.—The ARS sugarcane research laboratory at Canal Point, FL, has successfully contributed to the needs of sugarcane growers for 80 years, providing breed stock to the growers in Texas, Florida, Louisiana and Hawaii. The Committee provides an increase of \$750,000 from the fiscal year 2002 funding level to improve the utilization and application of ongoing research that will enhance this sugarcane variety program.

Catfish Health.—Disease-causing bacteria, viruses, and parasites threaten the economic viability of the Nation's billion dollar catfish industry. Rapid expansion of the U.S. channel catfish industry increases the vulnerability of the industry to outbreaks of diseases and parasites. Research urgently is needed to identify disease vectors, modes of transmission, life cycles and methods for controlling catfish diseases caused by parasites, fungi, bacteria, and viruses. A thorough understanding of the impact of environmental factors on disease will lead to improved management practices for conventional catfish culture in earthen ponds. The Committee provides an increase of \$550,000 from the fiscal year 2002 level for the comprehensive catfish health research program based at the Stoneville, MS, National Warmwater Aquaculture Center. This Center is strategically located in the mid-delta, proximal to the vast majority of the U.S. commercial catfish farming acreage and already has a critical mass of scientists, facilities, and instrumentation addressing the disease issue. Ongoing research in genomics and breeding can be expanded to select for fish with disease and parasite resistance, but additional scientists, including a parasitologist and virologist, are required for a comprehensive disease and parasite genetic resistance research program.

Center for Food Safety and Postharvest Technology.—The Committee is aware of the significance of the research currently underway relating to catfish and other food products at the Mississippi Center for Food Safety and Postharvest Technology and continues funding at the fiscal year 2002 level for research on shellfish safety and methods of decreasing risks to consumers.

Central Great Plains Research Station.—This is the only ARS station conducting research aimed at solving dryland production problems in Colorado, Nebraska, Kansas, and Wyoming. The Committee provides an increase of \$600,000 from the fiscal year 2002 funding level to the Central Great Plains Research Station at Akron, CO, for research on extensive crop rotation strategies. Increased research will focus on biological diversity to reduce weed, disease, and insects inherent in single crop rotation and utilize a complete systems approach to quantify comparative yield benefits under various rotation schemes.

Cereal disease research.—The Committee provides an increase of \$300,000 from the fiscal year 2002 level to support the core group of scientists currently performing research

at the Cereal Disease Research Laboratory, St. Paul, Minnesota. The Committee directs that the current number of scientists be maintained to effectively tackle the rust and fusarium head blight (FHB) disease which caused \$3,000,000,000 in losses to wheat and barley farmers over the last several years.

Children's Nutrition Research Center.—The Children's Nutrition Research Center at the Baylor College of Medicine, Houston, TX, has helped define the role of nutrition in children's health, growth, and development; contributed to nutritional guidelines used by physicians, parents, and others responsible for the care and feeding of children, and is unique in its ability to address a broad array of children's nutritional issues. The Committee provides an increase of \$600,000 from the fiscal year 2002 level for increased investigation of the nutritional needs of pregnant and nursing women, and children from conception to adolescence, at the Children's Nutrition Research Center, Houston, TX.

Chronic Wasting Disease (CWD).—In order to reduce livestock losses and to improve efficiency of production, it is important to eradicate transmissible spongiform encephalopathies (TSE) in domestic animals. Scrapie of sheep and goats, bovine spongiform encephalopathies (BSE) and chronic wasting disease (CWD) of deer and elk are classes of TSE's of ruminant animals and are fatal diseases that can affect both animals and humans. The Committee provides an increase of \$1,000,000 from the fiscal year 2002 funding level to the Animal Disease Laboratory, Pullman, WA, and the National Animal Disease Laboratory, Ames, IA, for urgent research on CWD.

Coffee and cocoa.—The disease resistance and alternative crop research program for coffee and cocoa has important economic benefits and implications for foreign policy goals in South Central America and West Africa. As a globally marketable cash crop, cocoa can provide an alternative, environmentally beneficial choice for small farmers and an incentive to Andean farmers to abandon illegal crops for those that can provide stable long-term economic benefit. Cocoa is produced primarily by small farmers in the tropics of South Central America and West Africa that is also under severe disease pressure which threatens the stability of world supply of cocoa and the economies of other cocoa-producing nations. The Committee provides an increase of \$900,000 from the fiscal year 2002 funding level to fully realize the research potential of coffee and cocoa as alternatives to illegal crops.

Conservation research.—The Committee provides an increase of \$250,000 from the fiscal year 2002 funding level to expand important non-irrigated dryland research conducted at the ARS Soil Conservation Laboratory, Pendleton, OR. The research is directed toward developing better management practices and techniques required for sound natural resource conservation in the Columbia River Plateau and regional resource areas for sustainable crop production.

Cotton genomics, breeding, variety development, and pest resistance.—The Committee recognizes the progress that has been made through the cooperative efforts of the ARS and the Mississippi Agricultural and Forestry Experiment Station at Stoneville, MS, in the research, development, and transfer of improved cotton germplasm to the cotton industry. This cooperative research must be accelerated to incorporate new genetic material into agronomically-acceptable varieties and to transfer reniform nematode and other pest resistance into improved cotton lines. An increase of \$700,000 is provided from the fiscal year 2002 funding level to enhance the public cotton breeding program conducted by ARS at Stoneville, MS.

Corn germplasm.—Corn is a key resource in Iowa and throughout the world, providing food, industrial uses, livestock feed and export. It is important to broaden the germplasm base of corn hybrids grown by American farmers to establish genetic diversity and stability in corn production. The Committee provides an increase of \$600,000 from the fiscal year 2002 level for the ARS Corn Germplasm Research Laboratory at Ames, Iowa for expanded research to increase the productivity and genetic diversity of maize grown in the United States.

Cotton ginning laboratory.—The Committee continues funding at the fiscal year 2002 level for ginning research at the Stoneville, MS, laboratory.

Cotton genetics research.—Global competition in the textile industry has caused domestic textile manufacturers to adopt more efficient cotton farm spinning technologies. These new technologies require higher fiber strength to operate resistance to nematodes and insect pests that annually inflict significant losses to the cotton industry. There is a need to broaden the genetic base of cotton germplasm with fiber properties that will meet today's more efficient yarn spinning machines, as well as cotton varieties with improved host resistance to insects and pathogens. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for support of a cotton geneticist position at the ARS Cotton Breeding laboratory, Florence, SC.

Crop Production and Food Processing.—The Committee provides the fiscal year 2002 level to ARS to continue collaborative research with Purdue University on a genomics project to continue in the identification and execution of critical steps in the development of pest resistance in wheat.

Dairy forage research.—The Committee recognizes the important research on dairy forage carried out by ARS at the U.S. Dairy Forage Research Center in Madison, WI. The Committee provides an increase of \$1,150,000 from the fiscal year 2002 level for expanded dairy forage research at the center. Of the total increase, \$150,000 is provided for increased support of the Wisconsin Integrated Cropping Systems (WICTS) program.

Delta nutrition intervention initiative.—The Lower Mississippi Delta Nutrition Intervention Research Initiative is a research consortium consisting of ARS and six universities located in Louisiana, Mississippi and Arkansas. Current appropriations have allowed the consortium to develop important research on the health and nutrition status, food security and diet intake of people who live in the Delta regions of Louisiana, Mississippi, and Arkansas. The Committee provides an increase of \$1,000,000 from the fiscal year 2002 level for nutrition intervention activities that cannot be carried out within currently available funding. Increased funding will allow the consortium to initiate community involved planning, implement interventions, and initiate research to assess the effects on health and nutrition status in a number of counties in each of the three States over the next 5 years.

Emerging diseases of plants and animals.—The Committee recognizes the importance of research in support of new prevention and control strategies for emerging, reemerging and exotic diseases of plants and animals. The Committee provides an increase of \$1,400,000 from the fiscal year 2002 level for exotic plant disease research at the following locations: Beltsville, MD, \$300,000; Frederick, MD, \$300,000; Prosser, WA, \$200,000; Raleigh, NC, \$350,000; and Prosser, WA, \$250,000. The Committee provides an additional \$3,050,000 for exotic animal disease research as follows: Marek's disease, East Lansing, MI, \$500,000; Porcine Respiratory

disease, Ames, IA, \$250,000; Foot and Mouth disease, Greenport, NY, \$500,000; Newcastle disease, Athens, GA, \$300,000; BSE/TSE at Albany, CA; Ames, IA; and Pullman, WA; \$500,000 each.

Fish disease research.—The development of safe and effective vaccines for prevention of disease in catfish is essential to the growth of the catfish industry. There are currently only a number of approved therapeutic compounds available for farmers to heal diseases of fish. Vaccinations, successful in other animals, appear to be the best means of preventing diseases. The Committee provides an increase of \$600,000 from the fiscal year 2002 funding level to the ARS Fish Disease and Parasitic Research Laboratory at Auburn, AL, for increased research on the development of commercially approved vaccines for catfish.

Floriculture and nursery research.—Nursery and greenhouse products rank third in production in the Nation. As the public demands more plants and trees to help clean the air, prevent water runoff and soil erosion, and improve water conservation and quality, the nursery industry is playing an expanding and significant role in enhancing environmental quality. The Committee provides an increase of \$750,000 from the fiscal year 2002 level for expanded ARS floriculture and nursery research aimed at reducing chemical use, improved post-harvest life of flowers and plants, disease and pest resistant flowers and plants, control of root diseases, robotics research, and control of run-off from greenhouse and nursery operations.

Food Safety and Engineering.—The Committee provides an additional \$600,000 from the fiscal year 2002 level for increased collaborative research with Purdue University in the area of food safety and engineering.

Forage-Livestock Systems.—The Committee provides an increase of \$1,000,000 from the fiscal year 2002 funding level to ARS to continue a cooperative project with the University of Kentucky on tall fescue breeding and improvement efforts to develop an enhanced national forage base.

Forage and range research.—The Committee recognizes the important research being carried out by ARS at the Forage and Range Research Laboratory, Logan, UT. The research program seeks to develop and improve range and pasture plants, reinvigorate disturbed and over-used rangelands, effect revegetation following wild fires, combat invasive weeds, and provide improved forages for livestock. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for additional research required to develop range and pasture plant varieties.

Formosan Subterranean Termite.—The management of this termite is essential to Louisiana economic well-being. This termite has infested 32 parishes in Louisiana, with the most severe infestations occurring in the New Orleans and Lake Charles areas. This insect has caused millions of dollars worth of damage with an astonishing \$300,000,000 impact in New Orleans alone. The Committee provides an increase of \$300,000 from the fiscal year 2002 level to the Southern Regional Research Center at New Orleans, LA, for expanded research efforts focusing on improved termite detection systems, evaluation of wood products for protecting building materials, and enhancement of bait technology.

Fort Keogh Livestock and Range Research Laboratory.—The Committee recognizes the threat to long-term sustainability of the Northern Great Plains range livestock industry from infestations of noxious weeds such as leafy spurge and spotted knapweed. The objective of the Fort Keogh, MT, station is to develop low-input rangeland management strategies that impede or control the spread of noxious weeds into native rangelands and

planted pastures. The Committee provides an increase of \$600,000 for this research for the fiscal year 2002 level.

Glassy-winged sharpshooter.—The Committee continues to be concerned about the serious costs that the Glassy-winged sharpshooter (GWSS) and Pierce's disease (PD) inflict on U.S. vineyards. Citrus and nursery stock growers now have costly new shipping requirements to inspect and treat plants and crops to curb the spread of GWSS-PD. The Committee provides an increase of \$750,000 from the fiscal year 2002 level to the ARS Parlier, CA, laboratory to continue its research efforts and collaborations to control and eradicate this devastating carrier and disease.

Grain sorghum.—The Committee provides an increase of \$200,000 from the fiscal year 2002 funding level to the ARS Energy, Soil, and Animal Waste Resources Research Unit in Bushland, TX, to evaluate the feed value of distillers dried grain (DDG). More sorghum is being used for ethanol as farmers look to add value to locally produced crops and to provide oxygenates for gasoline and DDG for livestock feed. Research is needed to determine the relative feeding values of sorghum distillers grains so that it can be nutritionally and economically evaluated for the cattle feeding industry.

Grapefruit juice/drug interaction research.—With the consumption of grapefruit juice dramatically declining, there is a need to examine and attain more precise data on the effect of grapefruit juice on the absorption rates of certain medications. The Committee provides an increase of \$300,000 from the fiscal year 2002 level to the ARS Citrus Research Laboratory at Winterhaven, FL, for research to identify and characterize the components of grapefruit juice responsible for enzyme suppression, understand the dosage affected, and determine the rate of consumption for safety and efficacy.

Grand Forks Human Nutrition Laboratory.—Research is needed to study rural health problems related to diet in the Northern Great Plains. Particular emphasis will be given to the diets of Native Americans and the rural elderly. The Committee provides \$300,000 from the fiscal year 2002 level for this program to be carried out by the ARS Grand Forks Human Nutrition Center in cooperation with the University of North Dakota School of Medicine and Health Sciences.

Harbor Branch aquaculture initiative.—The Committee recognizes that continued expansion of aquaculture enterprises in the United States would increase domestic competitiveness in seafood markets, ease harvest pressures on wild fish stocks, as well as help in offsetting existing trade deficits. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for expanded ARS collaborative research with the Harbor Branch Oceanographic Institute and the Florida State University (FSU) on sustainable marine aquaculture systems. The objectives are to design and operate low-cost, energy efficient, zero discharge aquaculture production systems to produce warm water fish species year round; to expand use of inland agricultural land through aquaculture of salt water species that are adaptable to fresh water; and to generate new aquaculture enterprises.

Harry Dupree National Aquaculture Research Center.—Arkansas leads the Nation in raising hybrid striped bass, as well as in producing 80 percent of the Nation's baitfish and other food fishes. The Committee understands that this Center plays a significant role in meeting the needs of the U.S. aquaculture industry by conducting research aimed at improving yields, food quality, disease control, and stress tolerance. The Committee provides an

increase of \$300,000 from the fiscal year 2002 funding level for increased research on the genetic improvement of hybrid striped bass.

Hawaii Agriculture Research Center.—The Committee provides the fiscal year 2002 level for the Hawaii Agriculture Research Center to enhance the competitiveness of U.S. sugarcane producers and to continue to support the expansion of new crops and products, including those from agroforestry, to complement sugarcane production in Hawaii.

Hides and leather research.—The USDA's only hides and leather research is carried out at the Eastern Regional Research Center in Wyndmoor, PA. The research provides the hides and leather industry with cost-effective and environmentally safe tanning processes which will enhance U.S. producers' competitiveness in world markets. The Committee provides an increase of \$100,000 from the fiscal year 2002 funding level for this research.

Horticulture research.—The Committee recognizes the importance of the cooperation between the ARS Small Fruits Research Unit and the Mississippi Agricultural and Forestry Experiment Station at Poplarville, MS. This cooperation catalyzed and now undergirds the Gulf Coast blueberry and other small fruit industries. This cooperation has expanded into the development of vegetable, melon, and ornamental industries and can revitalize small farms in the south. The Committee provides an increase of \$500,000 from the fiscal year 2002 funding level to expand the cooperative research and development efforts on ornamentals, vegetables, and melons at Poplarville, MS.

In addition, Tennessee has a vibrant nursery industry and a growing floricultural and ornamental horticulture industry. The Agricultural Research Service is establishing a research laboratory at the University of Tennessee to jointly conduct and collaborate in plant pathology, entomology, horticulture, germplasm, and biotechnology research to improve rural and suburban economies, and enhance international quality. The Committee supports this ARS/UT collaborative initiative to establish the Appalachian Horticulture Research Institute at Knoxville, TN, and provides an increase of \$1,000,000 for staffing at this location from the fiscal year 2003 level.

Human Nutrition Research Center on Aging (HNRCA).—The HNRCA at Tufts University is one of six USDA research centers that study the effects of human nutrition on health. The program at HNRCA requires additional resources to maintain existing scientists and staff as well as to offset inflation and spiraling energy costs. The Committee provides an increase of \$625,000 to ARS from the fiscal year 2002 level to meet these resource needs.

Hyperspectral Imaging Technology for Protection of the Food Supply and Agricultural Production.—Through a cooperative agreement with the ARS, the Institute for Technology Development at the Stennis Space Center has successfully applied its hyperspectral imaging capabilities to detect fecal contamination on poultry, furthering efforts to increase the safety of the Nation's food supply. The Committee is aware that this technology could be applied to detection of crop diseases such as Karnal bunt and rusts, animal diseases such as bovine spongiform encephalopathy, and mold/toxins found in food and feed. The Committee provides fiscal year 2003 funding of \$700,000, which is to be redirected from the current hyperspectral poultry project, to explore hyperspectral imaging as a possible tool for finding, identifying, and quantifying diseases and infestations that have economic impact and health risks either naturally or as a terrorist act.

Integrated farming systems.—The Committee understands that Integrated Farming Systems represents the agriculture operation in

its entirety, including finances, natural resources and off-farm environmental impacts. The National Soil Tilth Laboratory in Ames, IA, conducts this research with special emphasis on nutrient management. The Committee provides an additional \$300,000 for this work from the fiscal year 2002 level.

IPM strategies for northern climate.—Insect pests, plant pathogens, and weed pests are serious threats to Alaska's economic viability. The Committee recognizes the importance of agricultural research to enhance productivity and profitability of Alaska's farming industry, including the preservation and management of its valuable natural resources utilizing IPM strategies. The Committee provides an increase of \$700,000 from the fiscal year 2002 funding level for expanded research to develop IPM application approaches suitable to northern latitudes that support viable crop and nursery production systems and the sustainability of natural resources.

Invasive species.—The Committee understands the serious impact that invasive species have on production agriculture. Invasive species are second only to loss of habitat in causing negative impacts on environmental areas and loss of biological diversity. The Committee provides an increase of \$1,800,000 from the fiscal year 2002 level for the continued development of biological control programs as follows: Beltsville, MD; Davis, CA; Wooster, OH; and Ft. Collins, CO; \$300,000 each. The Committee provides \$300,000 for expanded research on the Asian Longhorned Beetle. The Committee also provides \$300,000 for systematics of invasive insects and weeds at Beltsville, MD.

John's Disease (Bovine Paratuberculosis).—John's is a contagious disease that causes chronic wasting or debilitating enteritis and eventual death in cattle, sheep, goats, deer and other wild and domestic ruminants. Infected animals intermittently shed the microorganisms into milk and feces. Infection is difficult to diagnose because of the fastidious, slow growth of the microorganisms and the poor reliability of the sero-diagnostic tools. Additional research is needed to develop improved diagnostics and vaccines, and better understanding of the pathogenicity of the organism. The Committee provides an increase of \$1,200,000 from the funding level available in fiscal year 2002 for expanded research to control this devastating disease affecting this Nation's beef and dairy industries.

Karnal Bunt.—The Committee is aware of the significant threat karnal bunt poses to the U.S. wheat industry and U.S. wheat exports. To aid in development of karnal bunt resistance and control methods, the Committee provides \$300,000 from the fiscal year 2002 level for research in this area. The Committee expects ARS to work with Kansas State University to establish a consortium in Manhattan, KS, that will work with other land grant universities in this research area.

Livestock genome sequencing.—The Committee provides an increase of \$300,000 in fiscal year 2003 for the U.S. Meat Animal Research Center at Clay Center, NE, for expanded genomics research to identify the genes that influence disease resistance, reproduction, nutrition, and other economically important traits in livestock. This research is to be performed in collaboration with the University of Illinois.

Malignant Catarrhal Fever (MCF) Virus.—The Committee acknowledges the importance of research for the sheep-associated virus, Malignant Catarrhal Fever (MCF), infecting small ruminants. The Committee continues the fiscal year 2002 funding level for research on the development of vaccines critical to the systematic eradication of MCF virus in small ruminants at the ARS

laboratory at Pullman, WA, in cooperation with the ARS sheep station at Dubois, ID, and Washington State University.

Michael Fields Agricultural Institute.—The Committee provides an increase of \$500,000 from the fiscal year 2002 level for ARS to initiate collaborative research with the Michael Fields Agricultural Institute. This research will develop high-quality corn in Wisconsin and other Mid-Western States for increased nutritional value and adaptation to sustainable farming systems. Collaborative research will be directed at corn breeding, analysis, corn quality, on-farm research and information dissemination.

Microbial Genomics.—The Committee recognizes the importance and significance of the joint microbial genomics initiative between the ARS Animal Disease Research Unit at Pullman, WA, and the ARS Tick Research Unit at Kerrville, TX, and continues the fiscal year 2002 level of funding.

National Agricultural Library.—The Committee provides an increase of \$400,000 from the fiscal year 2002 level for the National Agricultural Library for the continued development of information technology including new software, telecommunications and networking capabilities. These resources are recommended in the President's fiscal year 2003 budget.

National Cold Water Marine Aquaculture Center.—The Committee notes the importance of aquaculture research to the State of Maine, which leads the Nation in Atlantic salmon cultivation. Other important aquaculture species in Maine include shellfish and trout. Research on marine finfish is virtually important to Maine's aquaculture program. Finfish, including haddock, halibut, and cod, are primary candidates for future diversity of Maine's aquaculture industry. The Committee provides an increase of \$300,000 from the fiscal year 2002 funding level for this research, which will be undertaken at the Franklin, Maine, research location.

National Corn to Ethanol Research Pilot Plant.—The National Corn to Ethanol Research Pilot Plant at Edwardsville, IL, was constructed to avail researchers and commercial producers with a state-of-the-art facility to develop more efficient production of ethanol. The plant is scheduled to begin operations in early 2003 and will operate on a time-share basis to Federal and State agencies, universities, and commercial producers. The plant has the near-term potential to improve the efficiency and decrease the cost of corn conversion for ethanol production. The Committee provides an increase of \$750,000 from the fiscal year 2002 level to fund ARS research at the pilot plant. The research will utilize both wet milled and dry milled projects and will focus on processing efficiencies that can be adapted commercially in the near term.

National nutrition monitoring system.—Health and dietary information gathered from a combined U.S. Department of Agriculture/Department of Health and Human Services is critical to the Nation and plays a key role in shaping national food policies and programs including food safety, food labeling, child nutrition, food assistance and dietary guidance. The Committee provides an increase of \$1,000,000 from the fiscal year 2002 level for the combined national nutrition monitoring program.

National Peanut Research Laboratory, Dawson, GA.—The Committee concurs with the authority to purchase land for research at the National Peanut Laboratory at Dawson, GA, as provided under Section 7506, Title VII of the Farm Security and Rural Investment Act of 2002. The Dawson laboratory, which has been conducting research on this property, has entered a lease with an option to

purchase this land. The Agency will utilize available funds and will not require additional appropriations to purchase this property.

National Soil Erosion Laboratory.—The Committee provides an increase of \$300,000 from the fiscal year 2002 level for salaries and related research expenses for a water quality researcher stationed at the USDA-ARS National Soil Erosion Laboratory at West Lafayette, Indiana.

National sclerotinia initiative.—The Committee recognizes the importance of controlling this disease which affects sunflowers, soybeans, canola, edible beans, peas and lentils. The Committee provides an increase of \$600,000 from the fiscal year 2002 level for this research initiative which is centered at the ARS research station at Fargo, ND.

Natural products.—The Committee provides an increase of \$400,000 from the fiscal year 2002 level for the ARS to continue and accelerate its cooperative research with the National Center for Natural Products Research to discover and develop natural product chemicals for use in agriculture.

Northern Grains Insect Research Laboratory.—Diverse economic and environmental pressures have impacted agriculture in the Northern Plains. The Northern Grains Insect Research Laboratory in Brookings, South Dakota focuses on production agriculture problems for the Northern Plains. This laboratory is working on research that directly benefits farmers, such as new cropping systems and innovative crop rotations that minimize use of chemicals and tillage. The Committee provides an increase of \$600,000 from the fiscal year 2002 level for support of two additional scientist positions required by the laboratory to assemble a team of scientists to address the diverse economic and environmental problems in the Northern Plains.

Northern Great Plains Ecosystem.—The Committee is aware of the research and outreach programs conducted by the ARS Biological Control and Soil Conservation Laboratory at Sidney, Montana. A major focus of research at the station is targeted to biocontrol of invasive and noxious weeds and enhancing the long-term sustainability of range, irrigated and dryland agriculture. Invasive weeds alter ecosystem structure and function, reduces biodiversity, displaces native plants and requires widespread use of herbicides. The Committee provides an increase of \$1,000,000 from the fiscal year 2002 level to strengthen this program.

Noxious weeds in the desert southwest.—Invasive and noxious weeds are expected to infest 140 million acres in the United States by the year 2010. Rangeland and pastures will be the primary land types invaded by these species. The Committee supports the biocontrol research on invasive non-native and tree species carried out by ARS at the Jornada Experimental Range in Las Cruces and provides an increase of \$300,000 from the fiscal year 2002 funding level for this research.

Ogallala Aquifer.—Surface water in the Central High Plains region is severely limited and the Ogallala Aquifer, which underlies this area, has provided water for the development of a highly significant agricultural economy. However, the Ogallala Aquifer is a finite resource. The Committee provides the Agricultural Research Service an increase of \$900,000 from the fiscal year 2002 level for research into the complex nature of water availability, potential uses, and costs which will help determine future water policy in this region. This research is to be based in Texas but coordinated with other affected States, including Kansas.

Ornamental and horticulture research.—The Committee recognizes the collaborative research program between ARS and the University of Vermont (UVM). Research currently underway at UVM includes Pear

thrips and the Asian Long-horned Beetle. UVM research is critical to the protection of the ornamental and horticulture industries throughout New England. The Committee provides an increase of \$150,000 for Pear thrips research from the fiscal year 2002 level.

Papaya Ringspot Virus.—The Committee provides the fiscal year 2002 level to the University of Hawaii College of Tropical Agriculture and Human Resources to monitor and refine control of the papaya ringspot virus and to expand the techniques and knowledge obtained from this program to other diseases and pests; and to coordinate a program to induce nematode resistance, flowering control, and mealy bug wilt disease resistance in commercial pineapple varieties and to seek funds from the private sector to complement Federal funds. The Committee views the nematode and ringspot virus activities as supportive of a national agricultural research agency and that of Hawaii.

Phytoestrogens research.—The Committee is aware of the increased consumption of soy products and controversies surrounding the health claims from those products. Phytoestrogens, plant-derived products that can mimic or block estrogen, remain a priority issue for USDA researchers. Research studies have suggested that phytoestrogens have a range of human health benefits that can prevent certain diseases. However, extensive studies on their long-term benefits and side effects are lacking. The Committee provides an increase of \$900,000 for this research from the fiscal year 2002 level. Current research is carried out at the Southern Regional Research Center in New Orleans in collaboration with other universities. The Committee directs \$300,000 of these resources be used in collaboration with the University of Toledo to fingerprint and isolate novel products in stressed and unstressed soy.

Plant and animal pathogen research.—The Committee provides an increase of \$500,000 from the fiscal year 2002 level for expanded plant pathogen research to be carried out at Frederick, MD. The Committee also provides \$500,000 for rapid detection of poultry diseases at the ARS Poultry Disease Laboratory at Athens, GA. New technologies will enhance U.S. food security and strengthen the Nation's competitiveness in global markets.

Potato Production.—The Committee recognizes the important contributions made by the USDA-ARS research units at Prosser and Yakima, Washington, but encourages closer cooperation between the units in conducting research and solving problems in potato production.

Potato research.—The Committee is concerned that funding levels and lack of personnel resources limit ARS' ability to address some aspects of potato variety research. The Committee provides an additional \$30,000 from the fiscal year 2002 level to meet research staffing needs at the Aberdeen, ID, research laboratory.

Precision agriculture research.—The Committee provides a \$750,000 increase from the fiscal year 2002 level for the Mandan North Great Plains Research Laboratory for a precision agriculture research project and global climate change research recommended in the budget request at \$135,000. The precision agriculture research should be conducted in cooperation with the Upper Midwest Aerospace Consortium and DigitalGlobe. In addition, the Committee has restored the funding provided last year for the Hettinger Extension Service Southwest Feeders Program. ARS researchers can contribute significantly to the knowledge base UMAC can transfer to producers.

Program continuations.—The Committee directs the Agricultural Research Service to

continue to fund the following areas of research in fiscal year 2003 at the same funding level provided in fiscal year 2002: Conservation Research, Pendleton, OR; Dryland Production Research, Akron, CO; Improved Animal Waste Management, Florence, SC; Improved Crop Production Practices, Auburn, AL; Irrigated Cropping Systems in the Mid South, Stoneville, MS; Manure Management Research, Ames, IA; Mid-West/Mid-South Irrigation, Columbia, MO; National Sedimentation Lab, Yazoo/TMDL's, Oxford, MS; National Sedimentation Lab, Acoustics, Oxford, MS; National Sedimentation Lab, Yazoo Basin, Oxford, MS; National Soil Dynamics Laboratory, Auburn, AL; New England Plant, Soil, and Water Laboratory, Orono, ME; Northern Great Plains Research Laboratory, Mandan, ND; Pasture Systems and Watershed Management, University Park, PA; Soil, Plant Nutrient Research, Ft. Collins, CO; Seismic and Acoustic Technologies in Soils, Oxford, MS; Soil Tilth Research, Ames, IA; Source Water Protection Initiatives, Columbus, OH/West Lafayette, IN; Waste Management Research, Starkville, MS; Watershed Research, Colombia, MO; Western Grazinglands, Burns, OR; Aerial Application Research, College Station, TX; Alternative Crops and Value Added Products, Stoneville, MS; Appalachian Fruit Research Station, Kearneysville, WV; Appalachian Pasture Based Beef Systems, Beaver, WV; Arctic Germplasm, Palmer, AK; Bee Research, Logan, UT/Weslaco, TX; Binational Agricultural Research and Development Program (BARD); Bioinformatics Institute for Model Plant Species at the National Center for Genome Resources, Santa Fe, NM; Biomedical Materials in Plants, Beltsville, MD; Cereal Crops Research, Fargo, ND; Cereal Crops Research, Madison, WI; Citrus and Horticulture Research, Ft. Pierce, FL; Coffee and Cocoa Research, Miami, FL/Beltsville, MD; Corn Germplasm, Starkville, MS; Cotton Genomics, Breeding, and Variety Development, Stoneville, MS; Corn Resistant to Aflatoxin for the Mid-South, Starkville, MS; Crop Production and Food Processing, Peoria, IL; Ecology of Tamarix, Reno, NV; Endophyte Research, Booneville, AR; Floriculture/Nursery Crops Research; Ft. Pierce Horticultural Research Lab, Ft. Pierce, FL; Golden Nematode, Ithaca, NY; Grain Legume, Pullman, WA; Grain Research, Manhattan, KS; Grape Rootstock, Geneva, NY; Great Basin Rangelands, Boise ID/Reno, NV; Greenhouse and Hydroponics Research, Wooster, OH; Honey Bee Research, Baton Rouge, LA; Hops Research, Corvallis, OR; Improved Forage Livestock Production, Lexington, KY; Integrated Farming Systems/Dairy Forage, Madison, WI; IPM for Northern Climate Crops, Fairbanks, AK; Jornada Experimental Range, Las Cruces, NM; Late Blight Fungus, Orono, ME; Medicinal Botanical Production and Processing, Beaver, WV; Microbial Genomics, Pullman, WA/Kerrville, TX; Minor Use Pesticides (IR-4); National Germplasm Resources Program; National Sclerotinia Initiative, Fargo, ND; National Wheat and Barley Scab Initiative (Fusarium Head Blight), various locations; Northern Grain Insect Laboratory, Brookings, SD; Northwest Small Fruits Research, Corvallis, OR; Oat Virus, West Lafayette, IN; Olive Fruit Fly, Parlier, CA/Montpellier, France; Pecan Scab Research, Byron, GA; Pierce's Disease, Parlier, CA/Ft. Pierce, FL; Plant Stress and Water Conservation, Lubbock, TX; Potato Breeding, Aberdeen, ID; Potato Research Enhancement, Prosser, WA; Rangeland Resources Research, Cheyenne, WY; Rangeland Resource Management, Las Cruces, NM; Red Imported Fire Ants, Stoneville, MS; Residue Management in Sugarcane, Houma, LA; Rice Research, Stuttgart, AR; Risk Assessment for Bt. Corn, Ames, IA; Root Diseases in Wheat and Barley, Pullman, WA; Small Farms, Booneville, AR; Small Fruits Research, Poplarville, MS; Sorghum Research, Manhattan, KS/Bushland, TX/Stillwater, OK/Lubbock, TX; Southwest Pecan Research, College Station, TX; Soybean and Nitrogen Fixation, Raleigh, NC; Soybean Cyst Nematode, Stoneville, MS; Soybean Genetics, Columbia, MO; Soybean Research in the South, Stoneville, MS; Sudden Oak Disease, Ft. Detrick, MD; Sugarbeet Research, Kimberly, ID; Sugarcane Variety Research, Canal Point, FL; Sweet Potato, Stoneville, MS; Temperate Fruit Flies, Yakima, WA; Turfgrass Research, Washington, DC; U.S. Pacific Basin Agricultural Research Center, Hilo, HI; Vegetable Crops Research, Madison, WI; Virus-free Potato Germplasm, Palmer, AK; Viticulture Research, Corvallis, OR; Wheat Quality Research, Pullman, WA/Wooster, OH/Manhattan, KS/Fargo, ND; Wild Rice, St. Paul MN; Woody Genomics and Breeding for the Southeast, Poplarville, MS; Animal Vaccines, Greenport, NY; Aquaculture Initiative, Harbor Branch Oceanographic Institute, Stuttgart, AR; Aquaculture Initiative for Mid-Atlantic Highlands, Leetown, WV; Aquaculture Fisheries Center, Pine Bluff, AR; Aquaculture Systems (Rainbow Trout), Leetown, WV; Asian Bird Influenza, Athens, GA; Avian Pneumovirus, Athens, GA; Bovine Genetics, Beltsville, MD; Broiler Production in the Mid South, Starkville, MS; Catfish Genome, Auburn, AL; Catfish Health, Stoneville, MS; Dairy Forage, Madison, WI; Dairy Genetics Research, Beltsville, MD; Formosan Subterranean Termite, New Orleans, LA; Livestock and Range Research, Miles City, MT; Livestock Genome Mapping Initiative, Clay Center, NE (including the cooperative agreement carried out at Urbana-Champaign, IL); National Center for Cool and Coldwater Aquaculture, Leetown, WV; Aquaculture Systems (Freshwater Institute), Leetown, WV; Malignant Catarrhal Fever (MCF), Pullman, WA; National Warmwater Aquaculture Center, Stoneville, MS; Poult Enteritis-Mortality Syndrome (PEMS), Athens, GA; Poultry Diseases, Beltsville, MD/Athens, GA; Seafood Waste, Fairbanks, AK; Shellfish Genetics, Newport, OR; Stuttgart National Aquaculture Research Center, Stuttgart, AR; Trout Genome Mapping, Leetown, WV; Vaccines and Microbe Control for Fish Health, Auburn, AL; Aflatoxin in Cotton, Phoenix, AZ; Biomass Crop Production, Brookings, SD; Biotechnology Research and Development Corporation, Peoria, IL; Cotton Ginning Research, Las Cruces, NM; Food Safety for Listeria and E.coli; Natural Products, Oxford, MS; Barley Food Health Benefits Research, Beltsville, MD; Diet and Immune Function, Little Rock, AR; Nutritional Requirements Research, Houston, TX; Animal Welfare Information Center (NAL), Beltsville, MD; National Center for Agriculture Law (NAL); Honey Bee Research Laboratory, Tuscon, AZ; Bee Research Laboratory, Beltsville, MD; Wild Rice, St. Paul, MN; National Sedimentation Laboratory/Seismic and Acoustics Technologies in Soils, Oxford, MS; Midwest/Mid-South Irrigation, Columbia, MO; Soft Wheat Research Laboratory, Wooster, OH; Wheat Quality Research, Wooster, OH; and Minor Use Pesticides, Corvallis, OR.

Proposed closure and consolidation of laboratories and programs.—The President's budget recommends a number of location closures, consolidations and reductions of ongoing research. The Committee does not concur with proposals to close selected research laboratories and consolidate and terminate related ongoing research programs. The Committee directs the Agency to maintain these important research programs and laboratories and maintains funding which was eliminated

under the President's budget. The research laboratories and ongoing base programs to be continued and restored by this Committee are as follows: the Avian Disease and Oncology Laboratory, East Lansing, MI; Water Management Research Laboratory, Brawley, CA; new England Plant, Soil, and Water Research Laboratory, Orono, ME; the Honey Bee Research Laboratories located at Beltsville, MD; Baton Rouge, LA; and Tucson, AZ; the Cereal Crops Quality Research Laboratories located at Fargo, ND; Madison, WI; and Wooster, OH; Biotechnology Research and Development Corporation, Peoria, IL; Animal Health Consortium, Peoria, IL; and the research and laboratories impacted at the Western Regional Research Center, Albany, CA.

Regional grains genotyping research.—Current regional ARS laboratories characterize germplasm and improve resistance to rusts, blights and insect pests. Regional genotyping centers will overcome the barriers to practical use through DNA extraction and high-throughout marker screening procedures. The Committee strongly supports this regional research program and provides an increase of \$300,000 from the fiscal year 2002 level for this research to be carried out at the ARS research laboratory at Raleigh, NC.

Resistance Management and Risk Assessment in Bt Cotton and Other Plant Incorporated Protectants.—Transgenic Bt cottons have provided outstanding control of insecticide-resistant tobacco budworms and suppressed other cotton caterpillar pests. However, potential evolution of resistance in caterpillar pests to the Bt protein(s) in transgenic cotton threaten the viability of the Bt plant protectant technology. The Environmental Protection Agency has imposed strategies for managing the evolution of resistance to preserve the Bt technology, but it is important to develop data to validate these strategies. The Committee provides an increase of \$1,100,000 from the fiscal year 2002 level to ARS at Stoneville, MS, to coordinate a national program for devising the most effective and economically sustainable production systems for ensuring the long-term integrity of Bt crop protection and resistance management.

Seafood waste.—The disposal of seafood waste continues to be a national and international problem. Additional research is needed to determine alternative uses of discarded fish as a possible source of additional income for seafood producers. The Committee supports the existing ARS/University of Alaska collaborative research project on feedstuff that can be generated from materials usually wasted during processing of seafoods. The Committee provides an increase of \$200,000 from the level of funding available in fiscal year 2002 for expanded research to address this problem.

Sedimentation issues in flood-control dam rehabilitation.—Nearly 11,000 flood control dams have been constructed by the United States Department of Agriculture nationwide in 2,000 watersheds since 1944. These watershed projects represent a \$14,000,000,000 infrastructure, providing flood control, municipal water supply, recreation, and wildlife habitat enhancement. The life expectancy of these dams is projected to be 50 years. Sedimentation has reduced water-holding capacity, structural components have deteriorated, and safety regulations have become more strict. The Committee provides an increase of \$500,000 from the fiscal year 2002 funding level to ARS at Oxford, MS, for assessing the efficiency of these structures in regulating floodwater, including the use of acoustics techniques, and hazards that the sediments may pose if introduced into the environment.

Shellfish genetics.—The West Coast has become the largest regional producer of oysters in the United States with an annual value of \$69,000,000. Domestic production does not meet national demands. ARS has established a shellfish genetics research program that focuses on genetics, ecology and food quality. The Committee recognizes the importance of this multi-State research program and provides an additional \$300,000 from the fiscal year 2002 funding level for shellfish genetics research at the Oregon State University Hatfield Marine Science Center in Newport, OR.

Silverleaf Whitefly.—The silverleaf whitefly, also known as the sweetpotato whitefly, causes millions of dollars in crop damage in several States, including Hawaii. The Committee recommends participation by all affected States in the collaborative effort to control this pest.

Small fruits research.—The Committee supports the ongoing research conducted by the Small Fruit Genetics and Pathology Research unit at Corvallis, OR. The demand for fresh and processed berries and grapes in both domestic and international markets continues to grow at a rapid rate. The Committee provides an increase of \$300,000 from the fiscal year 2002 level of funding for this research which involves cooperation between industry, State and Federal research.

Soil dynamics research.—The extent of soil degradation in the South not only impairs soil and water quality but also reduces profitability and economic sustainability of farms in the region. Improving profitability of farms in the South is critical to rural economies as farm numbers continue to decline. The Committee provides an increase of \$300,000 from the fiscal year 2002 funding level to the ARS Soil Dynamics Laboratory at Auburn, AL, for expanded research to develop technologies and strategies for managing soils to increase farm profitability, and preserve the soil resource for future generations.

Soil, plant, nutrient research.—The Committee understands the important contributions made by the ARS Ft. Collins Soil, Plant, Nutrient Laboratory and provides an additional \$120,000 from the fiscal year 2002 funding level to support the cropping systems and nitrogen management research program carried out at this laboratory.

Sorghum research.—Sorghum is fourth on the list of economically important grains, behind corn, soybeans, and wheat. However, very little is known about the alternative uses of this major U.S. cash crop with an estimated value of over \$2,100,000,000 in 1999. The Committee provides an increase of \$150,000 from the fiscal year 2002 funding level for expanded research at the ARS Grain Sorghum Research Laboratory, Manhattan, KS, on the measurement of sorghum quality and the development of alternative uses of this important crop.

Sudden oak disease syndrome.—This is a fungus that has afflicted wood and nursery products in California and Oregon in the last several years. Very little is known on how the fungus is spread, which species are vulnerable, and how afflicted species can be treated. The Committee is concerned about the potential spread of the fungus to other parts of the country without the appropriate treatment and management of the disease. The Committee provides an increase of \$150,000 from the fiscal year 2002 level to the ARS Ft. Detrick, MD, research laboratory for research critical in stemming the spread of this disease.

Sugarbeet research.—There are 230,000 acres of sugarbeets grown in Idaho and eastern Oregon requiring research technologies to maintain and enhance production and profitability. The Committee provides an increase

of \$150,000 from the fiscal year 2002 funding level to support research to reduce irrigation and energy costs essential to sugarbeet production. This research is carried out at the ARS Kimberly, ID, research station.

Sugarcane research.—The Committee is aware of the urgent need for ARS research to provide viable, cost-effective "green cane" harvesting methods that will provide alternatives to burning cane in the field. The Committee provides an increase of \$300,000 from the fiscal year 2002 funding level for this research to be carried out at the Houma, LA, research station.

Sweet Potato Research.—Sweet potato is a high value, nutritious, alternative crop for the Mid South. Improved production practices, including timing of planting, agro-economic practices, and pest control, have the potential for doubling the level of production per acre, further increasing the profitability of this small farm crop. The Committee provides an increase of \$350,000 from the fiscal year 2002 funding level for ARS, Stoneville, MS, to conduct research on sweet potato production in cooperation with the Alcorn State University Demonstration Farm at Mound Bayou, MS.

Swine lagoon alternatives research.—The Committee is aware of the research carried out at the ARS Florence, SC, laboratory to treat the waste on small swine farms at a reasonable cost while meeting stringent environmental regulations. The Committee provides an increase of \$600,000 for this research from the fiscal year 2002 funding level.

Tree Fruit Industry.—The Committee believes the U.S. tree fruit industry is a vital part of the economy in many regions of this country, and its economic viability is seriously threatened by an unprecedented downturn in profitability. To enhance its competitiveness, the Committee believes the industry needs additional tools to reduce its costs. The Committee recommends that USDA consult with the U.S. tree fruit industry to develop, enhance and disseminate a range of new approaches and technologies, including: fruit genomics, fruit quality, precision agriculture applications, sensor technology, and intelligent and automated orchard and fruit handling systems that will lower costs and improve fruit quality. The Committee requests that USDA develop a plan to address the tree fruit industry's needs and report its progress to the Committee no later than January 1, 2003.

Trout genome mapping.—The Committee recognizes the important tools of molecular genetics and biotechnology, and their application to solve problems facing the cool and cold water aquaculture industry, which has had a flat growth profile nationally, but is an emerging industry in the Appalachian region. The Committee provides an increase of \$600,000 from the fiscal year 2002 funding level for research on cool and cold water species at the National Center for Cool and Cold Water Aquaculture, in collaboration with West Virginia University.

Tomato Spotted Wilt Virus.—The Committee is aware of the widespread losses caused by the tomato spotted wilt virus in Hawaii and encourages the agency to collaborate with a fund as appropriate University of Hawaii scientists to transfer generic resistance to tomato spotted wilt virus into University of Hawaii breeding lines for the impacted vegetable crops.

USDA-ARS New England Plant, Soil, and Water Laboratory.—The USDA-ARS New England Plant, Soil, and Water Laboratory, Orono, ME, performs a critical function that benefits not only the Maine economy, but the agriculture industry as a whole. The research performed at this laboratory—including cropping systems and management practices, efficient use of nutrients and water,

and control of pathogens, insects and weeds—benefits numerous agricultural interests, most notably the potato and livestock industries.

It is especially vital to New England potato growers that this lab continue and even increase its important research. The laboratory conducts experiments to address unique challenges that face potato growers both in the region and across the Nation. Research at the Orono facility, for example, has included tracking late blight disease, a devastating epidemic that costs potato growers approximately \$3,000,000 annually. Of the nation-wide locations of USDA-ARS laboratories, this is the only laboratory located in New England and it should be noted that 95 percent of the potato acreage in the six New England States are in Maine where the laboratory has the benefit of being in close proximity to the grower's fields.

The Committee provides funding at no less than the fiscal year 2002 level to maintain the New England Plant, Soil, and Water Laboratory and research programs.

U.S. National Plant Germplasm System.—The Committee recognizes the need to collect, identify, characterize and incorporate plant germplasm into centralized gene banks. The value of the U.S. germplasm collections is increasingly clear with the discovery of new genomics tools that can rapidly identify scientifically and commercially useful genes. The Committee provides an increase of \$2,650,000 from the fiscal year 2002 level for this program as requested in the budget for the following locations: Beltsville, MD, \$300,000; Riverside, CA, Parlier, CA, Fort Collins, CO, Corvallis, OR, Davis, CA, Raleigh, NC, Madison, WI, Hilo, HI, and Mayaguez, PR, \$250,000 each; and Pullman, WA, \$100,000.

Pacific Basin Agricultural Research Center.—The Committee restores base funding not included in the Administration's budget request, and provides an increase of \$300,000 from the fiscal year 2002 level for operating the U.S. Pacific Basin Agricultural Research Center. Of the amount restored for fiscal year 2002 and the added amount provided for fiscal year 2003, one-third is for the Center to continue the recruitment and hiring of scientists and technicians at rates consistent with construction of the Center and its mission; one-third is for the University of Hawaii Hilo to increase its capacity to complement the research of the Center; and one-third is for the University of Hawaii Manoa for improving its statewide capacity to transfer research results and to communicate industry-identified needs and issues to the research community.

U.S. Vegetable Laboratory.—The Committee is aware of the important scientific staffing requirements of the newly completed U.S. Vegetable Laboratory located at Charleston, SC. Additional scientists are necessary to conduct priority research and to maximize

use of the facility. An increase of \$600,000 is provided from the fiscal year 2002 level for plant virologist and pathologist positions.

Virus free fruit tree cultivars.—The Committee recognizes the need for rapid foreign and domestic exchange of varieties to sustain economic vitality of the U.S. tree fruit and nursery industries. The Committee provides an increase of \$300,000 for fiscal year 2003 to implement new technologies for more rapid and dependable methods of pathogen detection and to provide secure production and maintenance of virus-free fruit tree cultivars. The collaborative research is to be carried out at the Prosser, WA research station with the Irrigated Agriculture Research and Extension Center.

Viticulture research.—With the emerging importance of the grape and wine industry in the Pacific Northwest, the Committee provides an increase of \$300,000 from the fiscal year 2002 funding level for the viticulture research position at the University of Idaho Parma Research and Extension Center, for research at the Center, and for cooperative research agreements with University of Idaho researchers for viticulture research. It also provides an additional \$400,000 from the fiscal year 2002 funding level to enhance viticulture research at the Northwest Center for Small Fruit Research (NWCSFR). Of this funding increase, \$200,000 is to support additional research at the USDA/ARS NWCSFR, and \$200,000 is to be awarded competitively for collaborative research between the University of Idaho, Washington State University and Oregon State University. In addition, the Committee supports research carried out at ARS' Prosser, Washington laboratory and provides an increase of \$150,000 from the fiscal year 2002 level for collaborative work with Washington State University on winegrape plant virus research.

Waste management research.—The Committee provides an increase of \$1,000,000 from the fiscal year 2002 level to the ARS to continue an expanded joint research project with Western Kentucky University to examine the use of chicken litter as a fertilizer source for fescue pasture, as a nutrient source for cattle, and other agricultural applications such as mushroom culturing.

Water quality/water use research.—Agricultural producers in the Southeast are seeking solutions to meet reduced irrigation requirements while maintaining or enhancing their net returns. The National Peanut Research Laboratory at Dawson, GA, is conducting research to find solutions to a more restrictive water supply that impacts agriculture and rural economies in Southwest Georgia. The Committee provides an increase of \$300,000 from the fiscal year 2002 level for these investigations at the Dawson laboratory.

Watershed research, Columbia, MO.—The Committee continues the fiscal year 2002 level of funding to ARS for laboratory anal-

ysis of water samples collected during implementation of, and in accordance with, the Missouri Watershed Research, Assessment, and Stewardship Project.

Western grazinglands research.—The Committee is aware of the important rangeland research program conducted at the Burns, OR, laboratory to control invasive weeds which affect the Great Basin. Research is targeted to management of rangelands, conservation, and sustainable practices. The Committee provides an increase of \$750,000 from the fiscal year 2002 level for this research.

Western Wheat Quality Laboratory.—The Committee recognizes the important contributions made by the Western Wheat Quality Laboratory in Pullman, Washington. The Committee provides an additional \$150,000 from the fiscal year 2002 level to enhance its ability to handle more samples, modernize equipment, and develop new predictive quality tests.

Wind erosion research.—The Committee provides funding for the Wind Erosion Unit in Manhattan, KS, at the fiscal year 2002 level. The Committee directs the ARS to avoid reprogramming or routing any of the provided funds to or through other wind erosion facilities in the ARS system during fiscal year 2003.

Wheat and barley scab initiative.—The Committee recognizes the importance of the research carried out through the ARS National Wheat and Barley Scab Initiative. Fusarium head blight is a major threat to agriculture, inflicting heavy losses to yield and quality on farms in 18 States. The Committee provides an additional \$600,000 from the fiscal year 2002 level of funding for this research.

BUILDINGS AND FACILITIES

Appropriations, 2002 ¹	\$118,987,000
Budget estimate, 2003	16,580,000
Committee recommendation	100,955,000

¹ Excludes emergency supplemental appropriations of \$73,000,000 for provided by Public Law 107-117.

The ARS "Buildings and Facilities" account was established for the acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of, or used by, the Agricultural Research Service. Routine construction or replacement items continue to be funded under the limitations contained in the regular account.

COMMITTEE RECOMMENDATIONS

For Agricultural Research Service, Buildings and Facilities, the Committee recommends an appropriation of \$100,955,000. This is \$18,032,000 less than the 2002 appropriation and \$84,375,000 more than the budget request. The Committee's specific recommendations are indicated in the following table:

ARS BUILDINGS AND FACILITIES

[In thousands of dollars]

State and facility	Fiscal year—		
	2002 enacted	2003 budget estimate	Committee recommendation
Arizona: Water Conservation and Western Cotton Laboratory, Maricopa	8,400
California:			
Western Human Nutrition Research Center, Davis	5,000
Western Regional Research Center, Albany	3,800
District of Columbia: U.S. National Arboretum	4,600	3,000	3,000
Hawaii: U.S. Pacific Basin Agricultural Research Center, Hilo	3,000	3,000
Idaho: Advanced Genetics Laboratory, Aberdeen	500	4,600
Illinois:			
National Center for Agricultural Utilization Research, Peoria	6,500
Iowa: National Animal Disease Center, Ames	40,000	20,000
Kansas: U.S. Grain Marketing and Production Research Center, Manhattan	3,000	4,280
Maine: Northeast Marine Cold Water Aquaculture Research Center, Orono/Franklin	3,000	9,150
Maryland:			
Abraham Lincoln National Agricultural Library, Beltsville	1,800	7,400
Beltsville Agricultural Research Center, Beltsville	3,000	4,180	7,180
Minnesota: Cereal Disease Laboratory, St. Paul	300	3,200

ARS BUILDINGS AND FACILITIES—Continued

(In thousands of dollars)

State and facility	Fiscal year—		
	2002 enacted	2003 budget estimate	Committee recommendation
Mississippi:			
Southern Horticultural Laboratory, Poplarville	800	9,200
National Biological Control Laboratory, Stoneville	8,400	2,000
Plant Propagation Facility, Oxford			
New Mexico: Jornada Experimental Range Management Research Laboratory, Las Cruces	475	
New York: Plum Island Animal Disease Center, Greenport	3,762	2,000	2,000
Oklahoma: Southern Plains Range Research Station, Woodward	1,500	8,000
Pennsylvania: Eastern Regional Research Center, Wyndmoor	5,000	
South Carolina: U.S. Vegetable Laboratory, Charleston	4,500	1,400
South Dakota: Northern Grain Insects Research Laboratory, Brookings	850	8,600
Utah: Poisonous Plant Laboratory, Logan	5,600	1,495
West Virginia:			
National Center for Cool and Cold Water Aquaculture, Leetown	2,200	
Appalachian Fruit Laboratory, Kearneysville			475
Wisconsin:			
Cereal Crops Research Unit, Madison	3,000	8,400
Nutrient Management Laboratory, Marshfield			5,000
Total	118,987	16,580	100,955

The Committee provides funds for the design of the U.S. Vegetable Laboratory. Funds are provided for design and construction of the Nutrient Management Research Laboratory. The Committee provides \$5,000,000 for planning, design, and construction of a nutrient management research facility to be located in Marshfield, WI. The Committee expects that these funds be used solely toward the establishment of a Federal facility at that location and not be used to replace State funding in related University of Wisconsin facility projects. Funds are also provided to complete construction of the Cereal Disease Laboratory, the Cereal Crops Laboratory, Phases III and IV of the U.S. Grain Marketing Research Laboratory, the Franklin location of the Northeast Marine Cold Water Aquaculture Research Center, the Southern Horticultural Research Laboratory, the Northern Grain Insects Research Laboratory, the Plant Propagation Facility, Phase I of the Southern Plains Research Center, and greenhouse facilities in conjunction with the Poisonous Plant Laboratory. The funds provided for the Beltsville Agricultural Research Center are for the construction of the poultry facility and to complete the restoration effort of the damaged and destroyed facilities as a result of the deadly tornado strike on September 24, 2001. Additional funds are provided toward modernization and construction of the U.S. Pacific Basin Agricultural Research Center, Advanced Genetics Laboratory, National Animal Disease Center, the Plum Island Animal Disease Center, the Appalachian Fruit Research Station, and the U.S. National Arboretum. Due to budgetary constraints, the Committee is unable to provide the full amount required to complete construction of all projects.

Columbia, MO.—The Committee directs the ARS to provide a report on the requirements, feasibility, and scope for construction of a new facility to accommodate space needs for personnel located at the ARS Plant Genetics Research laboratory in Columbia, MO. The report should detail building size, cost, associated facilities, scientific capacity, and other requirements required in collaboration with the University of Missouri. The report should detail existing and planned program and resource requirements for this location. The report is to be submitted to the Committee on Appropriations of the House and Senate by March 1, 2003.

Jamie Whitten Delta States Research Center.—The Jamie Whitten Delta States Research Center is strategically located in the agriculturally important Yazoo-Mississippi River Delta. Millions of acres of cotton, soybean, rice, and corn are located in this Delta area of Mississippi and millions more are in the Mississippi Floodplain of Louisiana, Arkansas, and Tennessee. The Delta leads the

world in channel catfish production with approximately 100,000 acres of ponds. Approximately 200 ARS personnel are located at the Whitten Center, of which 65 are scientists conducting research to increase the efficiency of food and fiber production. The ARS Mid South Area Office is located in the Whitten Center along with the Area Information Technology Office.

The Committee is aware that the main buildings of the Whitten Center were constructed in 1968 and that present design of these facilities is obsolete and the laboratories do not efficiently accommodate modern biotechnology research. A fiscal year 1999 facility condition survey revealed the need to replace all HVAC and utility support systems and stripping of all laboratories and offices to the concrete walls and rebuilding to meet all current codes and standards for safety, fire protection, accessibility, and air quality. The Committee directs the ARS to report to the Committees on Appropriations of the House and Senate by March 1, 2003, on its plan for facilities modernization at this location, including building requirements, costs and schedule for completion of this work, and urges the Administration to request funding for this modernization project in its fiscal year 2004 budget.

National Agricultural Library.—The Committee notes that the Abraham Lincoln National Agricultural Library completed a facility condition study in 1991. The estimate to correct identified deficiencies at that time was \$18,000,000. Because of escalating costs, funds required to correct these deficiencies are now estimated to be \$32,000,000, a 78 percent increase over the original estimate. The Committee directs the Agency to review the costs and deficiencies identified 12 years ago; reassess those requirements; and compare current requirements and costs in light of new program technologies and needs. Detail infrastructure needs and phase requirements and options, related costs, and detail appropriated funds already committed to this project.

Pullman, WA.—The Committee is aware of the need for facilities to accommodate scientists at Pullman, WA and directs the ARS to conduct a feasibility study on the location's facility requirements including scientific capacity, size, and cost including greenhouse and other support facility space requirements. The report is to be submitted to the Committee on Appropriations of the House and Senate by March 1, 2003.

COOPERATIVE STATE RESEARCH, EDUCATION,
AND EXTENSION SERVICE

The Cooperative State Research, Education, and Extension Service was established by the Secretary of Agriculture on October 1, 1994, under the authority of the De-

partment of Agriculture Reorganization Act of 1994 (7 U.S.C. 6912). The Service was created by the merger of the Cooperative State Research Service and the Extension Service. The mission is to work with university partners and customers to advance research, extension, and higher education in the food and agricultural sciences and related environmental and human sciences to benefit people, communities, and the Nation.

RESEARCH AND EDUCATION ACTIVITIES

Appropriations, 2002	\$542,062,000
Budget estimate, 2003 ¹	552,549,000
Committee recommendation	651,411,000

¹Excludes \$1,084,000 requested for employee pension and health benefits.

The research and education programs administered by the Cooperative State Research, Education, and Extension Service [CSREES] are the U.S. Department of Agriculture's principal entree to the university system of the United States to support higher education in food and agricultural sciences and to conduct agricultural research as authorized by the Hatch Act of 1887 (7 U.S.C. 361a–361i); the Cooperative Forestry Research Act of 1962 (16 U.S.C. 582a–7); Public Law 89–106, section (2) (7 U.S.C. 450i); the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.); the Equity in Educational Land-Grant Status Act of 1994 (7 U.S.C. 301); the Agricultural Research, Extension and Education Reform Act of 1998; and the Farm Security and Rural Investment Act of 2002. Through these authorities, the U.S. Department of Agriculture participates with State and other cooperators to encourage and assist the State institutions to conduct agricultural research and education through the State agricultural experiment stations of the 50 States, the District of Columbia, and the territories; by approved schools of forestry; by the 1890 land-grant institutions and Tuskegee University; by colleges of veterinary medicine; and by other eligible institutions.

The research and education programs participate in a nationwide system of agricultural research program planning and coordination among the State institutions, U.S. Department of Agriculture, and the agricultural industry of America.

COMMITTEE RECOMMENDATIONS

For research and education activities of the Cooperative State Research, Education, and Extension Service, the Committee recommends \$651,411,000. This amount is \$109,349,000 more than the 2002 appropriation and \$98,862,000 more than the budget request. This does not include an increase of \$51,000 for FECA administrative charges, as requested in the budget.

The following table summarizes the Committee's recommendations for research and education activities of the Cooperative State Research, Education, and Extension Service, as compared to the fiscal year 2002 and budget request levels:

COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICES [CSREES]—RESEARCH AND EDUCATION ACTIVITIES
 [In thousands of dollars]

	2002 appropriation	2003 budget	Committee rec- ommendation
Payments under Hatch act	180,148	180,148	185,553
Cooperative forestry research (McIntire-Stennis)	21,884	21,884	22,541
Payments to 1890 colleges and Tuskegee University	34,604	34,604	35,643
Special research grants (Public Law 89-106):			
Advanced genetic technologies (KY)	600	600	750

¹ Critical issue is now reflected in Integrated Activities.

Hatch Act.—The Committee acknowledges the beneficial impact Hatch Act funding has on land-grant universities. Hatch Act provides the base funds necessary for higher education and research involving agriculture. The Committee recommends a funding level of \$185,553,000 for payments made under the Hatch Act.

Special research grants under Public Law 89-106.—The Committee recommends a total of \$103,834,000. Specifics of individual grant allowances are included in the table above. Special items are discussed below.

The Committee is aware of the need for special research grants in order to conduct research to facilitate or expand promising breakthroughs in areas of food and agricultural sciences that are awarded on a discretionary basis. In addition to these grants, the Committee believes research should be supplemented by additional funding that is obtained on a competitive basis.

Alternative milk policies.—The Committee directs that of funds made available to the Food and Agriculture Policy Research Institute, \$250,000 shall be provided for collaborative work between the University of Missouri and the University of Wisconsin/Madison, for an analysis of dairy policy

changes, including trade related matters, and assist Congress in making policy decisions. This project will be a one-stop shop for Congressional requests for analysis of alternative dairy policies.

Aquaculture centers.—The Committee recommends \$5,000,000, an increase of \$1,004,000 from the fiscal year 2002 level.

The Committee is aware of and supports aquaculture research efforts at the University of Wisconsin-Milwaukee Great Lakes Wisconsin Aquatic Technology and Environmental Research Institute that is carried out in collaboration with the North Central Regional Aquaculture Center.

Technology transfer.—The Committee directs CSREES to continue to support at the fiscal year 2002 level the cotton technology transfer coordinator at Stoneville, MS.

Aquaculture (LA).—Of the amount provided for Aquaculture (LA), the Committee expects that \$70,000 shall be used to initiate a multi-year program to conduct clinical epidemiologic research on diseases associated with intensive reptile disease research in Louisiana.

Aquaculture (Stoneville).—Of the \$592,000 provided for this grant, the Committee recommends at least \$90,000 for continued stud-

ies of the use of acoustics in aquaculture research to be conducted by the National Center for Physical Acoustics in cooperation with the Mississippi Agricultural and Forestry Experiment Station [MAFES] and the Delta Research and Extension Center in Stoneville.

Potato research.—The Committee expects the Department to ensure that funds provided to CSREES for potato research are utilized for varietal development testing. Further, these funds are to be awarded competitively after review by the potato industry working group.

Wood utilization research.—The Committee recommends \$6,170,000 for wood utilization research. Of the increase provided, an additional \$500,000 is made available for the Mississippi Forest and Wildlife Research Center to conduct forest inventories.

Competitive research grants.—The Committee supports the National Research Initiative Competitive Grants Program [NRI] and provides funding of \$204,263,000 for the program, an increase of \$83,811,000 from the fiscal year 2002 level and \$35,737,000 less than the budget request.

The Committee remains determined to see that quality research and enhanced human

resources development in the agricultural and related sciences be a nationwide commitment. Therefore, the Committee continues its direction that not less than 10 percent of the competitive research grant funds be used for USDA's agricultural research enhancement awards program (including USDA-EPSCoR), in accordance with 7 U.S.C. 450i.

Alternative crops.—The Committee recommends \$1,000,000 for alternative crop research to continue and strengthen research efforts on canola, an increase of \$76,000 from the fiscal year 2002 level.

Sustainable agriculture.—The Committee recommends \$15,000,000 for sustainable agriculture, an increase of \$2,500,000 from the fiscal year 2002 level.

Increased funds provided for sustainable agriculture research and education should include, but in no way be limited to, projects on organic agriculture. While organic production practices are included under the umbrella of sustainable agriculture, it is critical that funding increases be directed also to research on broader sustainable agriculture production systems and practices. The Committee also directs the Department to allocate a portion of funding increases to on-farm demonstration and producer-research projects.

Higher education.—The Committee recommends \$15,331,000 for higher education. The Committee provides \$2,993,000 for graduate fellowships; \$4,340,000 for challenge grants; \$998,000 for multicultural scholarships; \$3,500,000 for grants for Hispanic education partnership grants; and \$3,500,000 for Alaska native-serving and native Hawaiian-serving institutions.

The Committee notes that the Department's higher education multicultural scholars program enhances the mentoring of scholars from under-represented groups. The Committee directs the Department to ensure that Alaska Natives participate fully in this program.

Alaska Native-serving and Native Hawaiian-serving Institutions education grants.—The Committee provides \$3,500,000 for non-competitive grants to individual eligible institutions or consortia of eligible institutions in Alaska and in Hawaii, with grant funds to be awarded equally between Alaska and Hawaii to carry out the programs au-

thorized in 7 U.S.C. 3242 (Section 759 of Public Law 106-78). The Committee directs the agency to fully comply with the use of grant funds as authorized.

Federal administration.—The Committee provides \$26,310,000 for Federal administration. The Committee's specific recommendations are reflected in the table above.

Geographic information system program.—The Committee recommends \$1,600,000, an increase of \$401,000 from the fiscal year 2002 level, for the Geographic Information System Program. The Committee recommends the amount provided shall be made available for program activities of entities in the same areas as in 2002 on a proportional basis. In addition, it is expected that program management costs will be kept at a minimum and any remaining funds will be distributed to the sites.

NATIVE AMERICAN INSTITUTIONS ENDOWMENT FUND

Appropriations, 2002	\$7,100,000
Budget estimate, 2003	7,100,000
Committee recommendation	7,100,000

The Native American Institutions Endowment Fund authorized by Public Law 103-382 provides an endowment for the 1994 land-grant institutions (31 tribally controlled colleges). This program will enhance educational opportunity for Native Americans by building educational capacity at these institutions in the areas of student recruitment and retention, curricula development, faculty preparation, instruction delivery systems, and scientific instrumentation for teaching. Beginning with 2001, income funds are also available for facility renovation, repair, construction, and maintenance. On the termination of each fiscal year, the Secretary shall withdraw the income from the endowment fund for the fiscal year, and after making adjustments for the cost of administering the endowment fund, distribute the adjusted income as follows: 60 percent of the adjusted income from these funds shall be distributed among the 1994 land-grant institutions on a pro rata basis, the proportionate share being based on the Indian student count; and 40 percent of the adjusted income shall be distributed in equal shares to the 1994 land-grant institutions.

COMMITTEE RECOMMENDATIONS

For the Native American Institutions Endowment Fund, the Committee recommends \$7,100,000. This is the same as the 2002 level and the budget request.

EXTENSION ACTIVITIES

Appropriations, 2002	\$439,473,000
Budget estimate, 2003 ¹	419,989,000
Committee recommendation	452,767,000

¹Excludes \$1,046,000 requested for employee pension and health benefits.

Cooperative extension work was established by the Smith-Lever Act of May 8, 1914. The Department of Agriculture is authorized to provide, through the land-grant colleges, cooperative extension work that consists of the development of practical applications of research knowledge and the giving of instruction and practical demonstrations of existing or improved practices or technologies in agriculture, uses of solar energy with respect to agriculture, home economics, related subjects, and to encourage the application of such information by demonstrations, publications, through 4-H clubs, and other means to persons not in attendance or resident at the colleges.

To fulfill the requirements of the Smith-Lever Act, State and county extension offices in each State, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Marianas, and Micronesia conduct educational programs to improve American agriculture and strengthen the Nation's families and communities.

COMMITTEE RECOMMENDATIONS

For extension activities of the Cooperative State Research, Education, and Extension Service, the Committee recommends an appropriation of \$452,767,000. This amount is \$13,294,000 more than the 2002 appropriation and \$32,778,000 more than the budget request. This amount does not include an increase of \$46,000 for FECA administrative charges, as requested in the budget.

The following table summarizes the Committee's recommendations for extension activities, as compared to the fiscal year 2002 and budget request levels:

COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE (CSREES)—EXTENSION ACTIVITIES—Continued

Subtotal, federal administration	17,610	7,909	20,666
Total, Extension activities	439,473	419,989	452,767

Ag in the Classroom.—The Committee recommends \$700,000 for the Ag in the Classroom program. The Committee is aware of interest in expansion of the Illinois program in cooperation with the Illinois Farm Bureau.

Farm safety.—Of the funds recommended for farm safety, the Committee recommends a funding level of \$4,050,000 for the AgrAbility project being carried out in cooperation with the National Easter Seal Society.

Pest management.—Included in the amount provided by the Committee for pest management Smith-Lever 3(d) funds is continued funding at the fiscal year 2002 level for potato late blight control, including \$400,000 for early disease identification, comprehensive composting for cull disposal, and late blight research activities in Maine.

Rural health and safety.—The Committee recommends \$2,622,000, the same as the fiscal year 2002 level, for rural health and safety education. Included in this amount is \$2,190,000 for the ongoing rural health pro-

gram in Mississippi to train health care professionals to serve in rural areas, and \$432,000 for the ongoing rural health and outreach initiative in Louisiana.

Urban Horticulture.—The Committee provides \$875,000 for urban horticulture activities in Wisconsin. Of this total, \$600,000 is directed to the University of Wisconsin Extension, and \$275,000 is directed to Growing Power of Milwaukee for community food systems.

World Food and Health Center.—The Committee is aware of an effort to establish a World Food and Health Center at the University of Illinois, Urbana-Champaign. The Center will conduct and coordinate research, technology and information transfer, and educational programs related to malnutrition, food insecurity, and food safety. The Committee encourages the Department to provide appropriate technical assistance in the development of the Center.

INTEGRATED ACTIVITIES

Appropriations, 2002	\$42,853,000	
Budget estimate, 2003	44,865,000	

COOPERATIVE STATE RESEARCH, EDUCATION, AND EXTENSION SERVICE (CSREES)—INTEGRATED ACTIVITIES

[In thousands of dollars]

Committee recommendation

48,218,000

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 authorizes an integrated research, education, and extension competitive grants program. Water Quality, Food Safety, and Regional Pest Management Centers programs previously funded under Research and Education and/or Extension Activities are included under this account, as well as new programs that support integrated or multi-functional projects.

COMMITTEE RECOMMENDATIONS

For integrated activities of the Cooperative State Research, Education, and Extension Service, the Committee recommends \$48,218,000. This amount is \$5,365,000 more than the 2002 level and \$3,353,000 more than the budget request.

The following table summarizes the Committee's recommendations for integrated activities:

	Fiscal year 2002 enacted	Fiscal year 2003 budget	Committee recommendation
Critical Issues—Plant & Animal Diseases ¹	500	500
Rural Development Centers ¹	1,513	1,513
Water Quality	12,971	12,971	12,971
Food Safety	14,967	14,967	14,967
Pesticide Impact Assessment	4,531	4,531	4,531
International Science & Education Grants	1,000
Crops at Risk from FQPA: Implementation	1,497	1,497	1,497
FQPA Risk Mitigation Program for Major Food Crop Systems	4,889	4,889	4,889
Methyl Bromide Transition Program	2,498	2,498	3,000
Organic Transition Program	1,500	499	1,750
Agriculture Technologies	2,600
Total	42,853	44,865	48,218

¹ Critical Issue SRGs and Rural Development Centers SRG and Smith-Lever 3(d) programs that were previously funded under Research & Education Activities and/or Extension Activities, are now reflected in Integrated Activities.

Organic transition program.—The organic transition program shall be administered by the Cooperative State, Research, Education, and Extension Service (CSREES) in order to address all issues that are applicable to the transition process to certified organic production, including soil and crop fertility; marketing; weed, insect, and other pest management; and other issues.

OUTREACH FOR SOCIALLY DISADVANTAGED FARMERS

Appropriations, 2002	\$3,243,000
Budget estimate, 2003	3,243,000
Committee recommendation	3,493,000

This program is authorized under section 2501 of title XXV of the Food, Agriculture, Conservation, and Trade Act of 1990. Grants are made to eligible community-based orga-

nizations with demonstrated experience in providing education on other agriculturally-related services to socially disadvantaged farmers and ranchers in their area of influence. Also eligible are the 1890 land-grant colleges, Tuskegee University, Indian tribal community colleges, and Hispanic-serving postsecondary education facilities.

COMMITTEE RECOMMENDATIONS

For outreach for socially disadvantaged farmers, the Committee recommends an appropriation of \$3,493,000. This amount is \$250,000 more than the 2002 level and the budget request.

OFFICE OF THE UNDER SECRETARY FOR MARKETING AND REGULATORY PROGRAMS

Appropriations, 2002	\$654,000
Budget estimate, 2003 ¹	780,000

Committee recommendation

780,000

¹ Excludes \$17,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Marketing and Regulatory Programs provides direction and coordination in carrying out laws enacted by the Congress with respect to the Department's marketing, grading, and standardization activities related to grain; competitive marketing practices of livestock, marketing orders, and various programs; veterinary services; and plant protection and quarantine. The Office has oversight and management responsibilities for the Animal and Plant Health Inspection Service; Agricultural Marketing Service; and Grain Inspection, Packers and Stockyards Administration.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Marketing and Regulatory Programs, the Committee recommends an appropriation of \$780,000. This is \$126,000 more than the 2002 level and the same as the budget request.

The Committee is aware of the nutritional and economic benefits of farmers' market programs such as the WIC and Senior Farmers' Market Nutrition Programs, currently funded through the Food and Nutrition Service. These programs improve nutrition among low-income mothers, children and senior citizens by giving them access to locally grown fresh fruits and vegetables, as well as benefit the farmers who participate. The Committee directs the Under Secretary to work with the Under Secretary for Food, Nutrition and Consumer Services to study the potential for a broad Farmers' Market Program within the Agricultural Marketing Service, which would encompass the WIC Farmers' Market Nutrition Program, the Senior Farmers' Market Nutrition Program, and the recently authorized Farmers' Market Promotion Program. The Committee requests a report on the the Department's analysis for program recommendations, including cost estimates, by March 1, 2003.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE
SALARIES AND EXPENSES

	Appropriations	User fees ¹	Total, APHIS appropriations
Appropriations, 2002 ²	\$535,677,000	\$84,813,000	\$620,490,000
Budget estimate, 2003 ³	767,119,000	767,119,000
Committee recommendation	735,673,000	735,673,000

¹ Excludes additional resources from the Federal Agriculture Improvement and Reform [FAIR] Act of 1996 direct appropriation.

² Excludes \$105,000,000 emergency supplemental appropriations provided by Public Law 107-117.

³ Excludes \$15,108,000 requested for employee pension and health benefits.

The Secretary of Agriculture established the Animal and Plant Health Inspection Service [APHIS] on April 2, 1972, under the authority of reorganization plan No. 2 of 1953, and other authorities. The major objectives of APHIS are to protect the animal and plant resources of the Nation from diseases and pests. These objectives are carried out under the major areas of activity, as follows:

Pest and disease exclusion.—The Agency conducts inspection and quarantine activities at U.S. ports of entry to prevent the introduction of exotic animal and plant diseases and pests. The Agency also participates in inspection, survey, and control activities in foreign countries to reinforce its domestic activities.

Agricultural quarantine inspection (AQI).—The agency collects user fees to cover the cost of inspection and quarantine activities at U.S. ports of entry to prevent the introduction of exotic animal and plant diseases and pests. The Federal Agriculture Improvement and Reform [FAIR] Act of 1996 (Public Law 104-127) provides that beginning in 2003, all AQI user fee collections will become available without the need for annual appropriations, and the program will operate like a typical user fee program, with spending determined by the demand for AQI services.

Plant and animal health monitoring.—The Agency conducts programs to assess animal and plant health and to detect endemic and exotic diseases and pests.

Pest and disease management programs.—The Agency carries out programs to control and eradicate pest infestations and animal diseases that threaten the United States; reduce agricultural losses caused by predatory animals, birds, and rodents; provide technical assistance to other cooperators such as

States, counties, farmer or rancher groups, and foundations; and ensure compliance with interstate movement and other disease control regulations within the jurisdiction of the Agency.

Animal care.—The Agency conducts regulatory activities that ensure the humane care and treatment of animals and horses as the Animal Welfare and Horse Protection Acts require. These activities include inspection of certain establishments that handle animals intended for research, exhibition, and as pets, and monitoring certain horse shows.

Scientific and technical services.—The Agency performs other regulatory activities, including the development of standards for the licensing and testing of veterinary biologicals to ensure their safety and effectiveness; diagnostic activities to support the control and eradication programs in other functional components; applied research to reduce economic damage from vertebrate animals; development of new pest and animal damage control methods and tools; and regulatory oversight of genetically engineered products.

COMMITTEE RECOMMENDATIONS

For salaries and expenses of the Animal and Plant Health Inspection Service, the Committee recommends total funding of \$735,673,000. This is \$115,183,000 more than the 2002 appropriation and \$31,446,000 less than the budget request.

This amount does not include an increase of \$26,709,000 for rental payments to GSA, or \$277,000 for FECA administrative charges, as requested in the budget.

The following table reflects the Committee's specific recommendations for the Animal and Plant Health Inspection Service:

¹ Does not include additional AQI resources provided in the Federal Agricultural Improvement and Reform (FAIR) Act of 1996 direct appropriation.² Does not require a direct appropriation in fiscal year 2003 by operation of the FAIR Act of 1996.³ Includes a transfer of \$3,615,000 from the emerging plants pest account to the grasshopper account.

The Committee is unable to provide the full increases requested in the President's budget for the Animal and Plant Health Inspection Services. However, the Committee does provide increases for a number of specific animal and plant health programs. The Committee does not concur with the President's request to amend the Agriculture Risk Protection Act to prevent the Secretary of Agriculture from transferring funds from the Commodity Credit Corporation to combat emergencies for plant pest or noxious weed infestations that the Commodity Credit Corporation funded the previous year. The Committee directs the Secretary to continue use of contingency funding from Commodity Credit Corporation monies, as in past fiscal years, to cover needs as identified in the President's budget and any additional emergencies as the Secretary determines necessary.

Pest and Disease Exclusion

AQI.—For fiscal year 2003, the Committee provides an appropriation of \$64,188,000 for the AQI appropriated account. The Committee provides an increase of \$3,000,000 above the budget request to conduct preclearance quarantine inspections of persons, baggage, cargo, and other articles destined for movement from the State of Hawaii to the continental United States, Guam, Puerto Rico, or the United States Virgin Islands.

The Committee urges the Department to establish protocols that allow shipment of untreated fruits and vegetables grown in Hawaii to cold-weather States during winter months while maintaining reasonable assurances that potential transshipment of such produce will not jeopardize the phytosanitary standards of warm weather States.

The Committee continues its interest in more efficient and less disruptive inspection of passengers and cargo at Hawaii airports and, from within available funds, directs APHIS to provide not less than the number of inspectors and inspection equipment required in the APHIS-Hawaii staffing plan for fiscal year 2002. The Committee also encourages the agency to aggressively identify and evaluate flexible hiring and staff deployment arrangements, such as the Senior Environmental Employment Program, to minimize overtime rates charged to agricultural shippers. The Committee further encourages APHIS to acquire and deploy commercially available, state-of-the art inspection technology and equipment for key ports of entry, such as Hawaii, to screen passenger luggage

for banned agricultural products to reduce the introduction of dangerous agricultural pests and diseases in the United States.

The Committee urges APHIS to continue working closely with U.S. avocado growers to implement procedures for the importation of Mexican avocados. The Committee directs APHIS to report on the status of Mexican avocado imports, including problems in pest surveys, oversight by APHIS personnel, and the diversion of Mexican avocados to other than approved destinations. The Committee directs APHIS to include independent, third party scientists in the development of any pest risk assessment for Mexican avocados, prior to the publication of any such pest risk assessment in the Federal Register. The Committee also directs APHIS to report to Congress prior to publishing any rules expanding the approved areas or lengthening time periods for the importation of Mexican avocados.

Fruit fly exclusion and detection.—The Committee provides \$64,924,000 for the fruit fly exclusion and detection program, which includes an increase of \$23,258,000 to enhance international activities to prevent Medflies from moving into the United States, and an increase of \$3,182,000 to enhance activities at U.S. borders.

Plant and animal health monitoring

Animal health monitoring and surveillance.—The Committee provides \$93,526,000 for the Animal Health Monitoring and Surveillance account. The Committee provides continued funding of \$750,000 for a cooperative agreement with the Wisconsin Animal Health Consortium for ongoing activities related to animal and animal-based product tracking and database management. The Committee also provides continued funding of \$500,000 for the National Farm Animal Identification and Records Project, and an increase of \$300,000 for the New Mexico Rapid Syndrome Validation Program to develop an early detection and reporting system for infectious animal diseases. The Committee encourages APHIS to work with the Wisconsin Animal Health Consortium, the National Farm Animal Identification and Records Project, and the Rapid Syndrome Validation Program to ensure that program duplication does not occur, and to develop a coordinated, comprehensive plan for future activities. The Committee requests a report on the progress on the development of this plan by April 1, 2003.

The Committee provides \$100,000, an increase of \$50,000 above the fiscal year 2002 level, to continue the cooperative agreement

with the Murray State University, Breathitt Veterinary Center, Hopkinsville, KY, to determine the impact on animal health from common agricultural chemical usage.

The Committee provides an increase of \$1,000,000 toward the placement of alkaline digesters for destroying and disposing of animal carcasses suspected of transmissible spongiform encephalopathy infection and other animal diseases. Of this amount, the Committee provides \$750,000 for Auburn University College of Veterinary Medicine at the J.B. Taylor Diagnostic Laboratory in Elba, AL, and \$250,000 for the Mississippi Animal Disease and Research Diagnostic Laboratory in Jackson, MS.

The Committee is concerned about the recent avian influenza outbreak that has resulted in the destruction of poultry flocks in order to contain the disease. The Committee recommends that the Department implement a program to control and eradicate this disease, with inclusion of such a program in the President's fiscal year 2004 budget request.

Animal and plant health regulatory enforcement.—The Committee provides an increase of \$160,000 for the animal and plant health regulatory enforcement account for additional activities in support of increased Animal Welfare Act compliance inspections.

The Committee is very concerned about reports of illegal animal fighting activities and directs the Secretary to work with relevant agencies on the most effective and proper means for investigating and enforcing laws and regulations regarding these activities. The Committee requests that the Secretary provide a report by March 1, 2003, on actions taken to address this matter.

Emergency management systems.—The Committee provides \$11,043,000 for the emergency management systems program. The Committee encourages APHIS to work with the North Carolina Department of Agriculture's Emergency Programs Division to establish a viable and effective disease surveillance and detection program for the prevention or rapid control of potential foreign animal diseases, plant pests, or similarly dangerous pathogens, toxins, and hazardous substances.

Pest detection.—The Committee provides an increase of \$175,000 above the budget request for the pest detection program for a baseline survey of pinewood nematode in Alaska to comply with phytosanitary export requirements necessary to export timber.

Pest and disease management

Aquaculture.—The Committee provides \$1,397,000 for the aquaculture program, an increase of \$247,000 above the fiscal year 2002

level. The Committee provides an increase of \$100,000 from the fiscal year 2002 level to expand telemetry and population dynamics studies to develop environmentally and economically sustainable methods to help catfish farmers manage cormorant and pelican populations. The Committee also provides an increase of \$150,000 to create, manage, and operate an Invasive Aquatic Species Program with the Florida Department of Agriculture and Consumer Services.

Boll weevil.—The Committee provides \$62,000,000 for fiscal year 2003 to continue the Boll Weevil Eradication Program. This funding will provide the active eradication zone areas with a 30 percent cost share and possible exceptions to address special funding requirements arising from extraordinary circumstances in some States.

Brucellosis eradication.—The Committee provides \$558,000 above the fiscal year 2002 level for the brucellosis program. This amount continues funding of \$750,000 for the State of Montana to protect the State's brucellosis-free status and for the operation of the bison quarantine facility and the testing of bison that surround Yellowstone National Park.

The Committee provides \$900,000, an increase of \$300,000 above the fiscal year 2002 level, for the Greater Yellowstone Interagency Brucellosis Committee, and encourages the coordination of Federal, State, and private actions to eliminate brucellosis from wildlife in the Greater Yellowstone area. This amount shall be equally divided between the States of Idaho, Montana, and Wyoming.

The Committee provides an increase of \$100,000 for the Arkansas Livestock and Poultry Commission Brucellosis Program.

Chronic wasting disease.—The Committee is very concerned about the escalating number of deer and elk in different regions of the U.S. testing positive for chronic wasting disease and provides \$14,900,000, which is \$7,667,000 above the budget request, to expand the chronic wasting disease certification and control program to include additional surveillance and disease control activities with free-ranging cervids, and to increase State testing capacity for the timely identification of the presence of this disease.

The Committee is aware of the development of a rapid prion assay that would more effectively test for BSE in meat processing facilities and for Chronic Wasting Disease in the field for evaluating wild game. The Committee directs the Department to undertake a review of this testing technology and, if warranted, to move forward with a pilot program using this technology.

Emerging plant pests.—The Committee provides an increase of \$29,900,000 above the fiscal year 2002 level for emerging plant pests. Within this total, the Committee provides \$9,000,000 for Pierce's disease; \$8,000,000 for the Asian long-horned beetle program in Illinois and New York, of which no less than \$1,500,000 shall be for activities in the area of Chicago, IL; \$10,000,000 for citrus canker; and \$2,000,000 for sudden oak death syndrome. The Committee expects the Secretary to make funds available from the Commodity Credit Corporation for activities related to these and other plant pests in fiscal year 2003, as necessary.

The Committee is aware that APHIS has a compensation program in place for wheat producers, grain handlers, and facilities that Karnal Bunt impacts. However, the compensation provided for handlers and facilities does not adequately represent the costs these facilities incur when they receive deliveries of Karnal Bunt-infected wheat. This inadequate compensation has led to many facilities refusing to participate in activities to prevent the spread of Karnal Bunt in the

United States. Due to the serious threat that Karnal Bunt poses to U.S. wheat production and exports, the Committee expects APHIS to work with the grain handling industry to develop an adequate compensation plan, and to report back to the Committee on its recommendations and actions no later than March 1, 2003.

The Committee notes that APHIS signed a cooperative agreement with the Washington State Department of Agriculture to survey and eradicate the citrus longhorned beetle. The Committee recognizes that the citrus longhorned beetle presents a severe threat to hardwood trees and tree fruit crops, and urges APHIS to direct the resources necessary to eradicate the citrus longhorned beetle.

Grasshopper.—The Committee provides \$4,369,000 for the grasshopper account, an increase of \$150,000 above the budget request. Of this amount, no less than \$650,000 shall be for grasshopper and Mormon cricket activities in the State of Utah: \$150,000 to prepare necessary environmental documents, and \$500,000 to continue control measures; and no less than \$300,000 shall be for grasshopper and Mormon cricket activities in the State of Nevada, including survey, control, and eradication of crickets.

Imported fire ant.—The Committee provides \$3,000,000 for the imported fire ant account, \$868,000 above the budget request, to continue sharing responsibility with the States to conduct detection and nursery surveys; compliance monitoring; enforcement for quarantine of nursery stock; and production, field release, and evaluation of promising control agents. This amount includes an increase of \$260,000 to the State of Tennessee for additional control activities.

Johne's disease.—The Committee provides \$21,000,000 for Johne's disease, which is \$17,946,000 above the budget request, to expand the agency's efforts to coordinate State certification programs for herd-testing, and to provide additional assistance to States to develop herd management plans that comply with APHIS's national standards for certification. The Committee expects APHIS to work with the Agricultural Research Service to coordinate activities to research and develop an effective diagnostic test for Johne's disease with appropriate field validation and methods development.

Noxious weeds.—The Committee provides \$1,611,000 for the noxious weeds account, which is an increase of \$356,000 above the fiscal year 2002 level. This amount includes an increase of \$100,000 for the Nez Perce Bio-Control Center to increase the availability and distribution of biological control organisms used in an integrated weed management system. The Committee provides an increase of \$250,000 for implementation of an invasive species program to prevent the spread of cogongrass in Mississippi, and requests that the agency take necessary steps to address this invasive weed as a regional infestation problem, and provide a report on those activities by March 1, 2003.

The Committee continues its concern for the serious threat to pastures and watersheds resulting from the introduction of alien weed pests, such as gorse and miconia, into Hawaii, and directs APHIS to work with the Hawaii Department of Agriculture and the Natural Resources Conservation Service to develop an integrated approach, including environmentally safe biological controls, for eradicating these pests, and to provide funds as necessary.

Scrapie eradication.—The Committee provides \$8,178,000, an increase of \$5,059,000 above the fiscal year 2002 level, for the scrapie eradication program, and directs the Secretary to use funds from the CCC, as necessary, for additional eradication activities in fiscal year 2003.

Tuberculosis.—The Committee provides \$14,895,000 for the tuberculosis program. Of this amount, no less than \$5,000,000 shall be for activities in Michigan. The Committee is concerned about the potential threats that wildlife poses for transmitting tuberculosis to domestic livestock and directs the agency to increase technical and operational assistance to Michigan producers to prevent or reduce the transmission of tuberculosis between wildlife and cattle. The Committee also encourages the agency to continue its research for developing methods to minimize the interaction between wildlife and livestock. The Committee directs the Secretary to use funds from the CCC, as necessary, for additional surveillance and eradication activities in fiscal year 2003.

Wildlife services operations.—The Committee does not concur with the President's request to reduce funding in the wildlife services operations account to allow cooperators to assume a larger share of the costs associated with preventing and reducing wildlife damage. The Committee restores fiscal year 2002 funding to continue cooperating with States to conduct wildlife management programs such as livestock protection, migratory bird damage to crops, invasive species damage, property damage, human health and safety, and threatened and endangered species protection.

The Committee is pleased with the success of the oral rabies vaccination program and provides an increase of \$6,600,000 for rabies control activities in fiscal year 2003. The Committee directs the Secretary to use funds from the CCC, as necessary, for additional control activities in fiscal year 2003. Of the amount provided, no less than \$350,000 shall be for operations in Maryland.

The Committee provides an increase of \$1,636,000 to fully implement the recommendations of the Aviation Safety Review Committee.

The Committee provides an increase of \$6,225,000 to conduct wildlife monitoring and surveillance activities to prevent the spread of foreign animal diseases in the United States. Of this amount, \$2,000,000 is for remote diagnostic and wildlife disease surveillance activities with North Dakota State University and Dickinson State University.

The Committee is concerned about the growing number of livestock that are killed or injured by preying animals, especially wolves, in the Western Great Lakes and Southwest regions of the United States. The Committee provides an increase of \$1,400,000 for integrated predation management activities in Minnesota, Wisconsin, Michigan, Arizona, and New Mexico. Of this amount, no less than \$1,200,000 shall be available for activities in the Western Great Lakes States.

The Committee provides continued funding of \$1,300,000 for the Tri-state predator control program for livestock operators in Montana, Idaho, and Wyoming. Due to the increase in federally listed endangered species, the States' operations accounts for wildlife services have suffered financially.

The Committee provides continued funding of \$625,000 for a cooperative agreement with the University of Georgia, Auburn University, and the Wildlife Services Operations in the State of Georgia to address the fluctuations in game bird and predator species resulting from recent changes in land use throughout the southeastern United States.

The Committee provides continued funding of \$300,000 for the operation of the State Wildlife Services office in Hawaii to provide on-site coordination of prevention and control activities in Hawaii and the American Pacific. The Committee also continues funding of \$500,000 for the Hawaii Department of Agriculture to coordinate and operate a comprehensive brown tree snake prevention and

detection program for Hawaii and to initiate eradication and control of coqui frogs.

The Committee provides \$750,000, an increase of \$150,000 above the fiscal year 2002 funding level, for wildlife service operations with the South Dakota Department of Game, Fish, and Parks to meet the growing demands of controlling predatory, nuisance, and diseased animals.

The Committee provides \$550,000, an increase of \$100,000 from the fiscal year 2002 level, for the management of beavers in Mississippi. The Committee commends the agency's assistance in cooperative relationships with local and Federal partners to reduce beaver damage to cropland and forests.

The Committee provides an increase of \$200,000 to support the establishment of a USDA, APHIS, Wildlife Services State Office in Pennsylvania to address escalating wildlife-related nuisance and property damage complaints in rural and urban Pennsylvania.

The Committee provided \$240,000 in fiscal year 2002 for the agency to conduct an environmental impact study for cattail management and blackbird control activities. The Committee provides continued funding at the fiscal year 2002 level of \$240,000 to implement control measures for minimizing blackbird damage to sunflowers in North Dakota and South Dakota. The Committee continues the fiscal year 2002 funding level of \$150,000 for blackbird management efforts in Louisiana.

The Committee provides an increase of \$500,000 to assist the Nevada Division of Wildlife with returning displaced wildlife back to its natural habitat. This rescue initiative shall be a cooperative effort between Federal, State, local, and private sources.

The Committee provides an increase of \$300,000 for a cooperative agreement with the Eastern Idaho Sandhill Crane Lure Crop Project for integrated predator management activities to reduce sandhill crane depredations and grain crop damage in Eastern Idaho.

Animal Care

Animal welfare.—The Committee provides an increase of \$800,000 from the fiscal year 2002 funding level for the Animal Care Unit for enforcement of the Animal Welfare Act.

The Committee does not assume collections from unauthorized animal welfare inspection user fees, as proposed in the President's budget.

Scientific and Technical Services

Veterinary diagnostics.—The Committee provides \$23,921,000 for the veterinary diagnostics account for fiscal year 2003. The Committee notes that the Secretary is utilizing \$10,000,000 from Public Law 107-117 to coordinate a comprehensive, modernized national animal health laboratory network for addressing emergent biological and chemical threats to animal agriculture and the U.S. food supply, and encourages the department to continue efforts for this activity.

Wildlife services methods development.—The Committee provides \$15,258,000 for wildlife services methods development, which is \$1,836,000 above the budget request. Of this amount, the Committee provides an increase of \$300,000 from the fiscal year 2002 level to enhance existing research efforts at the National Wildlife Research Center field station in Starkville, MS, for resolving problems regarding bird damage to aquaculture farms in the Southeast. The Committee also provides an increase of \$700,000 from the fiscal year 2002 level to expand the existing program at the Jack Berryman Institute for addressing wildlife damage management issues, including wildlife disease threats and wildlife economics, and facilitating a cooperative relationship with the Mississippi Agricultural and Forestry Experiment Station. The Com-

mittee emphasizes the importance of close collaboration between the Jack Berryman Institute and the National Wildlife Research Center. The remaining increase, beyond pay costs, is for maintenance and operations necessary to support wildlife methods development at the National Wildlife Research Center in Fort Collins, CO.

The Committee provides continued funding of \$240,000 for the cooperative agreement with the Hawaii Agriculture Research Center for rodent control only in active agricultural areas.

Projects identified in Senate Report 107-41 and Conference Report 107-275 that the Committee directed to be funded for fiscal year 2002 are not funded for fiscal year 2003 unless specifically mentioned herein.

In complying with the Committee's directives, the Committee expects APHIS not to redirect support for programs and activities without prior notification to and approval by the House and Senate Committees on Appropriations in accordance with the reprogramming procedures specified in the Act. Unless otherwise directed, the Animal and Plant Health Inspection Service shall implement appropriations by programs, projects, and activities as specified by the Appropriations Committees. Unspecified reductions necessary to carry out the provisions of this Act are to be implemented in accordance with the definitions contained in the "Program, project, and activity" section of this report.

BUILDINGS AND FACILITIES

Appropriations, 2002 ¹	\$7,189,000
Budget estimate, 2003	13,189,000
Committee recommendation	13,189,000

¹ Excludes \$14,081,000 in emergency supplemental appropriations provided by Public Law 107-117.

The APHIS appropriation for "Buildings and Facilities" funds major nonrecurring construction projects in support of specific program activities and recurring construction, alterations, preventive maintenance, and repairs of existing APHIS facilities.

The following table represents the Committee's specific recommendation for this account as compared to the fiscal year 2002 and budget request levels:

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

(In thousands of dollars)

	Fiscal year 2002 en- acted	Fiscal year 2003 budget re- quest	Committee rec- ommen- dation
Basic buildings and facilities re- pair, alterations, and preven- tive maintenance	1,996	4,996	4,996
Plum Island, NY	3,193	3,193	3,193
Miami Animal Import Center, FL	2,000	5,000	5,000
Total, Buildings and Fa- cilities	7,189	13,189	13,189

COMMITTEE RECOMMENDATIONS

For buildings and facilities of the Animal and Plant Health Inspection Service, the Committee recommends an appropriation of \$13,189,000. This amount is \$6,000,000 more than the 2002 level and the same as the budget request.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

Appropriations, 2002	\$71,430,000
Budget estimate, 2003 ¹	75,411,000
Committee recommendation	75,411,000

¹ Excludes \$2,278,000 requested for employee pension and health benefits.

The Agricultural Marketing Service was established by the Secretary of Agriculture on April 2, 1972. AMS carries out programs authorized by some 31 different statutory au-

thorities, the primary ones being the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627); the U.S. Cotton Standards Act (7 U.S.C. 51-65); the Cotton Statistics and Estimates Act (7 U.S.C. 471-476); the Tobacco Inspection Act (7 U.S.C. 511-511q); the Perishable Agricultural Commodities Act (7 U.S.C. 499a-499s); the Egg Products Inspection Act (21 U.S.C. 1031-1056); and section 32 (15 U.S.C. 713c).

Programs administered by this Agency include the market news services, payments to States for marketing activities, the Plant Variety Protection Act, the Federal administration of marketing agreements and orders, standardization, grading, classing, and shell egg surveillance services, transportation services, and market protection and promotion.

COMMITTEE RECOMMENDATIONS

For marketing services of the Agricultural Marketing Service, the Committee recommends an appropriation of \$75,411,000. This amount is \$3,981,000 more than the 2002 appropriation and the same as the budget request. This amount does not include an increase of \$709,000 for rental payments to GSA, or \$167,000 for FECA administrative charges, as requested in the budget.

The Committee provides \$14,843,000 for the Pesticide Data Program, as requested in the budget. The Committee recognizes the importance of the Pesticide Data Program (PDP) to collect reliable, scientific-based pesticide residue data that benefits consumers, food processors, crop protection, pesticide producers, and farmers. The PDP is of particular importance since the passage of the Food Quality Protection Act, which requires thorough re-evaluation of agricultural pesticides and tolerances for uses on individual crops. The PDP is an effective tool to maintain the availability of critical products which allow the production of safe and affordable foods.

The Committee encourages the Department to make grants to the Kenai Peninsula Borough and Alaska regional marketing organizations to promote wild salmon.

The Committee provides \$6,000,000 for costs associated with implementing the Livestock Mandatory Price Reporting Act of 1999.

The State of Alaska has developed the Alaska Grown Program to promote the sale of Alaskan products in both military and civilian markets. The Committee fully supports this program and expects the Department again to give full consideration to funding applications submitted for the Alaska Grown Program, which includes Alaska agricultural products and seafood harvested in the State. The Alaska Grown Program should coordinate with other regional marketing entities such as the Alaska Fisheries Development Foundation and the Lower Kuskokwim Economic Development Council.

The amount provided also includes \$6,256,000 for the microbiological data program so that baselines may be established for the incidence, number and types of foodborne microorganisms. The Committee expects AMS to coordinate with other agencies of USDA, other public health agencies of the government, and industry to avoid duplication of effort and to ensure that the data collected can be used by all interested parties.

The Committee is aware of the unique factors that affect dairy production in Alaska. Because of these factors, only 51 percent of Alaska's dairy needs can be produced in-State. Further, because of the perishable nature of milk and the cost to ship it, alternatives to increase milk production at Alaska's existing State-owned facility, Matanuska Maid Dairy, must be sought. Therefore, the Committee expects AMS, working with other USDA agencies, to continue its assistance to the State of Alaska in addressing this unique problem.

The Committee requests a report on the treatment of organic agricultural products under Federal marketing order regulations.

The Committee is concerned with the allocation of independent voting members on the Cranberry Marketing Committee and encourages the Secretary, beginning with the 2003 nominations, to allocate independent voting members seats on the Cranberry Marketing Committee in a manner that provides for representation by District to the total Independent Cranberry crop. Districts may be combined in order to obtain this result. Allocation of Alternate Voting members should be utilized to guarantee that each District will have at a minimum an Alternate Member as a representative of the Committee.

LIMITATION ON ADMINISTRATIVE EXPENSES

Limitation, 2002	(\$60,596,000)
Budget limitation, 2003 ¹	(61,619,000)
Committee recommendation	(61,619,000)

¹ Excludes \$1,836,000 requested for employee pension and health benefits.

The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) initiated a system of user fees for the cost of grading and classing tobacco, cotton, naval stores, and for warehouse examination. These activities, authorized under the U.S. Cotton Standards Act, the Tobacco Inspection Act, the Naval Stores Act, the U.S. Warehouse Act, and other provisions of law are designed to facilitate commerce and to protect participants in the industry.

COMMITTEE RECOMMENDATIONS

The Committee recommends a limitation on administrative expenses of the Agricultural Marketing Service of \$61,619,000. This amount is \$1,023,000 more than the 2002 funding level and the same as the budget request.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND SUPPLY (SECTION 32)

MARKETING AGREEMENTS AND ORDERS

Appropriations, 2002	\$13,995,000
Budget estimate, 2003	¹ 14,910,000

Committee recommendation

14,910,000

¹ Excludes \$575,000 requested for employee pension and health benefits.

Under section 32 of the act of August 24, 1935, (7 U.S.C. 612c), an amount equal to 30 percent of customs receipts collected during each preceding calendar year and unused balances are available for encouraging the domestic consumption and exportation of agricultural commodities. An amount equal to 30 percent of receipts collected on fishery products is transferred to the Department of Commerce. Additional transfers to the child nutrition programs of the Food and Nutrition Service have been provided in recent appropriations Acts.

The following table reflects the status of this fund for fiscal years 2001–2003:

SECTION 32 ESTIMATED TOTAL FUNDS AVAILABLE AND BALANCE CARRIED FORWARD—FISCAL YEARS 2001–2003

	Fiscal year—		
	2001 actual	2002 estimate	2003 estimate
Appropriation (30 percent of Customs Receipts)	\$5,738,448,921	\$6,139,942,369	\$5,798,093,321
Agricultural Risk Protection Act (Public Law 106-224)	200,000,000		
Less Recission			
Less Transfers:			
Food and Nutrition Service	- 5,127,579,000	- 5,172,458,000	- 4,745,663,000

¹ The remainder of Child Nutrition entitlement purchases will be made using unobligated balances in the Child Nutrition Programs and the Commodity Credit Corporation.

COMMITTEE RECOMMENDATIONS

The Committee recommends a transfer from section 32 funds of \$14,910,000 for the formulation and administration of marketing agreements and orders. This amount is \$915,000 more than the 2002 level and the same as the budget estimate.

In previous fiscal years, section 32 funds have been spent to purchase and distribute salmon for donation to schools, institutions, and other domestic feeding programs. The Committee expects the Agricultural Marketing Service [AMS] to continue to assess the existing inventories of pink salmon, salmon nuggets, and pouched salmon and determine whether or not there is a surplus and continued low prices in fiscal year 2003. The Committee also expects the AMS to assess existing inventories of surplus Alaska grown potatoes. If there is a surplus of potatoes or a surplus of salmon and continued low prices in fiscal year 2003, the Committee expects the Department to purchase surplus

salmon for use in the aforementioned feeding programs or for humanitarian food aid.

PAYMENTS TO STATES AND POSSESSIONS

Appropriations, 2002	\$1,347,000
Budget estimate, 2003	1,347,000
Committee recommendation	1,347,000

The Federal-State Marketing Improvement Program [FSMIP] is authorized by section 204(b) of the Agricultural Marketing Act of 1946 and is also funded from appropriations. Payments are made to State marketing agencies to: identify and test market alternative farm commodities; determine methods of providing more reliable market information, and develop better commodity grading standards. This program has made possible many types of projects, such as electronic marketing and agricultural product diversification. Current projects are focused on the improvement of marketing efficiency and effectiveness, and seeking new outlets for existing farm produced commodities. The

legislation grants the U.S. Department of Agriculture authority to establish cooperative agreements with State departments of agriculture or similar State agencies to improve the efficiency of the agricultural marketing chain. The States perform the work or contract it to others, and must contribute at least one-half of the cost of the projects.

COMMITTEE RECOMMENDATIONS

For payments to States and possessions for Federal-State marketing projects and activities, the Committee provides \$1,347,000. This amount is the same as the 2002 appropriation and the budget request.

GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION

SALARIES AND EXPENSES

Appropriations, 2002	\$33,117,000
Budget estimate, 2003 ¹	41,164,000
Committee recommendation	44,475,000

¹ Excludes \$1,744,000 requested for employee pension and health benefits.

The Grain Inspection, Packers and Stockyards Administration [GIPSA] was established pursuant to the Secretary's 1994 reorganization. Grain inspection and weighing programs are carried out under the U.S. Grain Standards Act and other programs under the authority of the Agricultural Marketing Act of 1946, including the inspection and grading of rice and grain-related products; conducting official weighing and grain inspection activities; and grading dry beans and peas, and processed grain products. Under the Packers and Stockyards Act, assurance of the financial integrity of the livestock, meat, and poultry markets is provided. The administration monitors competition in order to protect producers, consumers, and industry from deceptive and fraudulent practices which affect meat and poultry prices.

COMMITTEE RECOMMENDATIONS

For salaries and expenses of the Grain Inspection, Packers and Stockyards Administration, the Committee recommends an appropriation of \$44,475,000. This amount is \$11,358,000 more than the 2002 appropriation and \$3,311,000 more than the budget request.

This amount does not include an increase of \$1,418,000 for rental payments to GSA, or \$41,000 for FECA administrative charges, as requested in the budget.

The Committee provides \$400,000 for market contract catalog reporting activities. Additional increases are provided to enhance concentration and other anti-competitive investigative activities.

The Committee does not assume the \$28,848,000 in net savings from collections from new user fees proposed in the budget.

The Committee expects the Department to continue the market catalog reporting.

The Committee provides an increase to GIPSA of \$2,311,000 for fiscal year 2003 and includes funds for the agency to work with the Iowa Corn Growers Association and the Iowa Department of Agriculture to further develop a pilot process verification program. The program will establish agricultural interpretation of ISO standards, so that the principles can be used on-farm as well as train farmers to participate in quality assurance program based on ISO 9000 principles during the planning, planting, harvest, and handling of feed grains. The program could also be used to assist with the orderly handling of new biotech varieties.

LIMITATION ON INSPECTION AND WEIGHING SERVICES EXPENSES

Limitation, 2002	(\$42,463,000)
Budget limitation, 2003	(42,463,000)
Committee recommendation	(42,463,000)

The Agency provides an official grain inspection and weighing system under the U.S. Grain Standards Act [USGSA], and official inspection of rice and grain-related products under the Agricultural Marketing Act [AMA] of 1946. The USGSA was amended in 1981 to require the collection of user fees to fund the costs associated with the operation, supervision, and administration of Federal grain inspection and weighing activities.

COMMITTEE RECOMMENDATIONS

The Committee recommends a \$42,463,000 limitation on inspection and weighing services expenses. This amount is the same as the 2002 level and the budget request.

OFFICE OF THE UNDER SECRETARY FOR FOOD SAFETY

Appropriations, 2002	\$476,000
----------------------------	-----------

Budget estimate, 2003 ¹	780,000
Committee recommendation	780,000

¹ Excludes \$17,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Food Safety provides direction and coordination in carrying out the laws enacted by the Congress with respect to the Department's inspection of meat, poultry, and egg products. The Office has oversight and management responsibilities for the Food Safety and Inspection Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Food Safety, the Committee recommends an appropriation of \$780,000. This amount is \$304,000 more than the 2002 level and the same as the budget request.

FOOD SAFETY AND INSPECTION SERVICE

Appropriations, 2002 ¹	\$715,642,000
Budget estimate, 2003 ²	763,049,000
Committee recommendation	759,759,000

¹ Excludes \$15,000,000 in emergency supplemental appropriations provided by Public Law 107-117.

² Excludes \$40,549,000 requested for employee pension and health benefits.

The major objectives of the Food Safety and Inspection Service are to assure that meat and poultry products are wholesome, unadulterated, and properly labeled and packaged, as required by the Federal Meat Inspection Act and the Poultry Products Inspection Act; and to provide continuous in-plant inspection to egg processing plants under the Egg Products Inspection Act.

The Food Safety and Inspection Service was established on June 17, 1981, by Secretary's Memorandum No. 1000-1, issued pursuant to Reorganization Plan No. 2 of 1953.

The inspection program of the Food Safety and Inspection Service provides continuous in-plant inspection of all domestic plants preparing meat, poultry or egg products for sale or distribution; reviews foreign inspection systems and establishments that prepare meat or poultry products for export to the United States; and provides technical and financial assistance to States which maintain meat and poultry inspection programs.

COMMITTEE RECOMMENDATIONS

For the Food Safety and Inspection Service, the Committee recommends an appropriation of \$759,759,000. This amount is \$44,117,000 more than the 2002 level and \$3,290,000 less than the budget request.

This amount does not include an increase of \$7,256,000 for rental payments to GSA, or \$1,035,000 for FECA administrative charges, as requested in the budget.

The Committee has provided an increase of \$97,000 from the fiscal year 2002 funding level for activities related to the Codex Alimentarius.

The Committee provides an increase of \$5,000,000 for FSIS to hire inspection personnel to work solely on enforcement of the Humane Methods of Slaughter Act (HMSA). The Committee is extremely concerned that although the HMSA requires that livestock be rendered unconscious before they are slaughtered, FSIS does not have adequate inspection personnel dedicated to checking for or reporting violations of the HMSA. The Committee recognizes that all inspectors are instructed to stop the production line as soon as an HMSA violation is observed. However, the Committee does not believe this is

the most effective and efficient tool to prevent these violations. The Committee strongly believes that stronger HMSA enforcement will not only reduce animal suffering, but also decrease the chances that plant workers and inspection personnel will be injured by an animal conscious and reacting to pain. Therefore, the Committee directs that these funds be used to hire at least 50 additional inspection personnel to work solely on HMSA enforcement through full-time ante-mortem inspection, particularly unloading, handling, stunning and killing of animals at slaughter plants. The Committee further expects that the 17 District Veterinary Medical Specialist positions created in fiscal year 2001 will continue in fiscal year 2003.

The Committee is aware that FSIS uses two methods to determine whether the inspection systems of foreign countries that sell meat and poultry to the United States meet the same standards as our domestic meat inspection system. These methods include USDA audits of foreign plants and laboratories, and USDA inspection of foreign meat and poultry at the U.S. border. While all meat and poultry items which cross the border are subject to inspection, the Committee understands that less than 1 percent of all such food items are currently inspected. The Committee believes that both of these activities need to be enhanced in order to protect consumers from intentionally or unintentionally contaminated foreign meat and poultry, and supplemental funds were provided in fiscal year 2002 to enhance these activities. Accordingly, when a significant number of plants initially audited in a particular country fail to meet U.S. safety standards, the Committee expects the Department to exercise all authorities to appropriately limit imports from all plants in that country that have not been audited in the previous 12 months, as well as imports from those plants that failed initial audits until subsequent findings establish that proper inspection systems are in place.

The Committee is extremely concerned with recent reports of food safety violations and the quantity of product recalls necessary to ensure public safety and consumer confidence. As the Federal agency charged with ensuring the safety of meat and poultry in this country, the Committee fully expects FSIS to stringently enforce its safety standards, and to work with industry to diligently fulfill its responsibilities to American consumers. The Committee notes that the General Accounting Office (GAO) is preparing to release a report regarding FSIS and its inspection services, and strongly encourages FSIS to promptly and fully respond to recommendations made in that report. The Committee directs FSIS to provide a detailed report to the Committee within 60 days of the publication of the GAO report on the FSIS response, and all activities FSIS is undertaking to correct any problems identified.

The Committee directs FSIS to submit a report on the status of its regulatory effort to establish science-based performance standards for on-line antimicrobial reprocessing of pre-chill poultry carcasses, including a timeline for completion, within 60 days of enactment of this Act.

The following table represents the Committee's specific recommendations for the Food Safety and Inspection Service as compared to the fiscal year 2002 and budget request levels:

FOOD SAFETY AND INSPECTION SERVICE SALARIES AND EXPENSES
[In thousands of dollars]

	Fiscal year 2002 enacted ¹	Fiscal year 2003 budget request ²	Committee recommendation
Federal food inspection	608,730	651,816	649,082
Import/export inspection	12,127	12,907	12,767
Laboratory services	36,548	38,829	38,440
Field automation	8,005	8,005	8,005
Grants to States	42,517	43,672	43,672
Special assistance for State programs	5,220	5,220	5,220
Codex Alimentarius	2,495	2,600	2,573
Total	715,642	763,049	759,759
Food safety inspection:			
Federal	638,513	682,624	679,502
State	47,418	49,702	49,702

FAIM	11,872	11,872	11,872
Total	715,642	763,049	759,759

¹ Excludes \$15,000,000 in emergency supplemental appropriations provided by Public Law 107-117.² Excludes \$40,549,000 requested for employee pension and health benefits.OFFICE OF THE UNDER SECRETARY FOR FARM
AND FOREIGN AGRICULTURAL SERVICES

Appropriations, 2002	\$606,000
Budget estimate, 2003 ¹	899,000
Committee recommendation	899,000

¹ Excludes \$24,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Farm and Foreign Agricultural Services provides direction and coordination in carrying out the laws enacted by the Congress with respect to the Department's international affairs (except for foreign economics development) and commodity programs. The Office has oversight and management responsibilities for the Farm Service Agency, including the Commodity Credit Corporation, Risk Management Agency, and the Foreign Agricultural Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Farm and Foreign Agricultural Services, the Committee recommends an appropriation of \$899,000. This amount is \$293,000 more than the 2002 appropriation and the same as the budget request.

The Committee is concerned that allocation of section 416 funds for humanitarian assistance programs may disadvantage certain private voluntary organizations in regard to the amount of those funds allowable for administrative costs. In addition, the Committee continues to urge the Secretary to work with representatives of the dairy industry and appropriate non-governmental organizations to increase the amount of fortified dry milk exported under humanitarian assistance programs.

The Committee urges USAID and USDA to manage the Food Security Commodity Reserve effectively to meet international food aid commitments of the United States, including supplementing Public Law 480 title II funds to meet emergency food needs.

FARM SERVICE AGENCY

The Farm Service Agency [FSA] was established by the Department of Agriculture Reorganization Act of 1994, Public Law 103-354, enacted October 13, 1994. Originally called the Consolidated Farm Service Agency, the name was changed to the Farm Service Agency on November 8, 1995. The FSA administers the commodity price support and production adjustment programs financed by the Commodity Credit Corporation, the warehouse examination function, the Conservation Reserve Program [CRP], and several other cost-share programs; the Non-insured Crop Disaster Assistance Program [NAP]; and farm ownership and operating, and emergency disaster and other loan programs.

Agricultural market transition program.—The Federal Agriculture Improvement and Reform Act of 1996, Public Law 104-127 (1996 act), enacted April 4, 1996, mandates that the Secretary offer individuals with eligible cropland acreage the opportunity for a one-time signup in a 7-year, production flexibility contract. Depending on each contract participant's prior contract-crop acreage history and payment yield as well as total program participation, each contract participant shares a portion of a statutorily specified, annual dollar amount. In return, participants must comply with certain requirements regarding land conservation, wetland protection, planting flexibility, and agricultural use. Contract crops, for the purposes of determining eligible cropland and payments, include wheat, corn, grain sorghum, barley, oats, upland cotton, and rice. This program does not include any production adjustment requirements or related provisions, except for restrictions on the planting of fruits and vegetables.

Marketing assistance loan program, price support programs, and other loan and related programs.—The 1996 act provides for marketing assistance loans to producers of contract commodities, extra long staple [ELS] cotton, and oilseeds for the 1996 through 2002 crops. With the exception of ELS cotton, these non-recourse loans are characterized by loan repayment rates that may be determined to be less than the principal plus accrued interest per unit of the commodity. However, with respect to cotton and rice, the Secretary must allow repayment of marketing loans at the adjusted world price. And, specifically with respect to the cotton marketing assistance loan, the program continues to provide for redemption at the lower of the loan principal plus accrued storage and interest, or the adjusted world price. The three-step competitiveness provisions are unchanged.

The 1996 act also provides for a loan program for sugar for the 1996 through 2002 crops of sugar beets and sugarcane. The Fiscal Year 2001 Agriculture Appropriations Act eliminated the recourse feature. The 1996 act provides for a milk price support program, whereby the price of milk is supported through December 31, 1999, via purchases of butter, cheese, and nonfat dry milk. The rate of support is fixed each calendar year, starting at \$10.35 per hundredweight in 1996 and declining each year to \$9.90 per hundredweight in 1999. The milk price support program is extended through May 31, 2002. The 1996 act and the 1938 act provide for a peanut loan and poundage quota program for the 1996 through 2002 crops of peanuts. Finally, the Agricultural Act of 1949, as amended (1949 act), and the 1938 act provide for a price support, quota, and allotment program for tobacco.

The interest rate on commodity loans secured on or after October 1, 1996, will be 1 percentage point higher than the formula which was used to calculate commodity loans secured prior to fiscal year 1997. The CCC monthly commodity loan interest rate will in effect be 1 percentage point higher than CCC's cost of money for that month.

The 1996 act amended the payment limitation provisions in the Food Security Act of 1985, as amended (1985 act), by changing the annual \$50,000 payment limit per person for deficiency and diversion payments to an annual \$40,000 payment limit per person for contract payments. The annual \$75,000 payment limit per person applicable to combined marketing loan gains (MLG's) and loan deficiency payments (LDP's) for all commodities that was in effect for the 1991 through 1995 crop years continues through the 2002 crop year. Similarly, the three-entity rule is continued.

For combined MLG's plus LDP's received for the 1999, 2000, and 2001 crops, the payment limit was increased to \$150,000 per person in separate pieces of legislation. Moreover, Congress enacted discretionary authority in 1999 for the Secretary of Agriculture to offer commodity certificate exchanges for loan repayment purposes. Indirect gains received by producers due to a certificate exchange are not subject to the MLG and LDP payment limitation.

Commodity Credit Corporation program activities.—Various price support and related programs have been authorized in numerous legislative enactments since the early 1930's. Operations under these programs are financed through the Commodity Credit Corporation. Personnel and facilities of the Farm Service Agency are utilized in the administration of the Commodity Credit Corporation, and the Administrator of the Agency is also Executive Vice President of the Corporation.

The 1996 act created new conservation programs to address high-priority environmental protection goals and authorizes CCC funding for many of the existing and new conservation programs. The Natural Resources Conservation Service administers many of the programs financed through CCC.

Foreign assistance programs and other special activities.—Various surplus disposal programs and other special activities are conducted pursuant to specific statutory authorizations and directives. These laws authorize the use of CCC funds and facilities to implement the programs. Appropriations for these programs are transferred or paid to the Corporation for its costs incurred in connection with these activities, such as Public Law 480.

Farm credit programs.—FSA reviews applications, makes and collects loans, and provides technical assistance and guidance to

borrowers. Under credit reform, administrative costs associated with agricultural credit insurance fund [ACIF] loans are appropriated to the ACIF program account and transferred to FSA salaries and expenses.

Risk management.—FSA administers the noninsured Crop Disaster Assistance Program [NAP] which provides crop loss protection for growers of many crops for which crop insurance is not available.

SALARIES AND EXPENSES

[In thousands of dollars]

	Appropriations	Transfers from program accounts	Total, FSA, salaries and expenses
Appropriations, 2002	939,030	(274,357)	(1,213,387)
Budget estimate, 2003 ¹	993,620	(281,036)	(1,274,656)
Committee recommendation	986,913	(281,036)	(1,267,949)

¹ Excludes \$69,092,000 requested for employee pension and health benefits.

The account “Salaries and expenses, Farm Service Agency,” funds the administrative expenses of program administration and other functions assigned to FSA. The funds consist of appropriations and transfers from the CCC export credit guarantees, Public Law 480 loans, and agricultural credit insurance fund program accounts, and miscellaneous advances from other sources. All administrative funds used by FSA are consolidated into one account. The consolidation provides clarity and better management and control of funds, and facilitates accounting, fiscal, and budgetary work by eliminating the necessity for making individual allocations and allotments and maintaining and recording obligations and expenditures under numerous separate accounts.

COMMITTEE RECOMMENDATIONS

For salaries and expenses of the Farm Service Agency [FSA], including funds transferred from other program accounts, the Committee recommends \$1,267,949,000. This is \$54,562,000 more than the 2002 level and \$6,707,000 less than the budget request.

This amount does not include an increase of \$16,882,000 for rental payments to GSA, or \$110,000 for FECA administrative charges, as requested in the budget. The Committee includes funds to assist agency implementation of the newly enacted farm bill.

The Committee recognizes the pressures FSA has been under to downsize staff levels. However, concerns have been raised about the criteria being used for further staff reductions and the potential impact these reductions will have on farm services in all States. Until these concerns have been addressed, States in compliance with the original Espy reorganization plan should not be required to undertake further staff reductions.

The Committee is concerned that FSA should allocate more staff resources to the farm loan programs in both the field and in the St. Louis Information Technology and Finance Center. Without more farm loan staff in the field, FSA cannot adequately perform the supervised credit functions which ensure the success of the program, including but not limited to such functions as real estate appraisals, chattel appraisals, and year-end farm analysis. The Committee directs the Department to report on the numbers of staff positions, by type and location, and to provide a detailed explanation by object class, of funds obligated from the Salaries & Expenses Account, to support the farm loan programs by April 1, 2003.

The Committee supports farmer participation in the Conservation Reserve Enhance-

ment Program (CREP) as a means to coordinate conservation and producer objectives of natural resource stewardship. The Committee encourages the Department, acting through the Farm Service Agency, to improve outreach and technical assistance for CREP in States where enrollment and participation is not commensurate with enrollment expectations.

The Committee is concerned with the reluctance on the part of the Agency to grant producers relief from farm program fines or penalties who unintentionally violated program rules. The Committee expects the Department to exercise the authorities granted in current law to provide appropriate relief in determining penalties in cases involving unintentional violations.

In addition, the Committee notes the difficulty of States with high land values competing for enrollment in CREP. The Committee urges the agency to evaluate the conservation benefits of CREP enrollment in all States and not give undue consideration to enrollment opportunities based on land values or rental rates.

The Committee is concerned that many county governments are given the responsibility of implementing the Conservation Reserve Enhancement Program. The Committee encourages the Farm Service Agency to work with participating States that use counties as the local administering unit to ensure counties are fairly reimbursed for the costs associated with CREP implementation.

The Committee encourages for Agency to examine the possibility to cost-sharing through existing conservation program types of cover (including plastic mulch) that would promote the successful establishment of tree shrub and other prescribed plantings used for wind erosion practices.

STATE MEDIATION GRANTS

Appropriations, 2002	\$3,493,000
Budget estimate, 2003	4,000,000
Committee recommendation	4,000,000

This program is authorized under title V of the Agricultural Credit Act of 1987. Originally designed to address agricultural credit disputes, the program was expanded by the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 to include other agricultural issues such as wetland determinations, conservation compliance, rural water loan programs, grazing on National Forest System lands, and pesticides. Grants are made to States whose mediation programs have been certified by the Farm Service Agency [FSA]. Grants will be solely for operation and administration of the State's agricultural mediation program.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$4,000,000 for State mediation grants. This is \$507,000 more than the 2002 level and the same as the budget request.

DAIRY INDEMNITY PROGRAM

Appropriations, 2002	\$100,000
Budget estimate, 2003	100,000
Committee recommendation	100,000

Under the program, the Department makes indemnification payments to dairy farmers and manufacturers of dairy products who, through no fault of their own, suffer losses because they are directed to remove their milk from commercial markets due to contamination of their products by registered pesticides. The program also authorizes indemnity payments to dairy farmers for losses resulting from the removal of cows or

dairy products from the market due to nuclear radiation or fallout.

COMMITTEE RECOMMENDATIONS

For the dairy indemnity program, the Committee recommends \$100,000. This is the same as the 2002 level and the same as the budget request.

AGRICULTURAL CREDIT INSURANCE FUND PROGRAM ACCOUNT

The Agricultural Credit Insurance Fund Program Account is used to insure or guarantee farm ownership, farm operating, and emergency loans to individuals, as well as the following types of loans to associations: irrigation and drainage, grazing, Indian tribe land acquisition and boll weevil eradication. The insurance endorsement on each insured loan may include an agreement by the Government to purchase the loan after a specified initial period.

FSA is also authorized to provide financial assistance to borrowers by guaranteeing loans made by private lenders having a contract of guarantee from FSA as approved by the Secretary of Agriculture.

The following programs are financed through this fund:

Farm ownership loans.—Made to borrowers who cannot obtain credit elsewhere to restructure their debts, improve or purchase farms, refinance nonfarm enterprises which supplement but do not supplant farm income, or make additions to farms. Total indebtedness to FSA may not exceed \$200,000 for direct loans and \$759,000 for guaranteed loans. Loans are made for 40 years or less.

Farm operating loans.—Provide short-to-intermediate term production or chattel credit to farmers who cannot obtain credit elsewhere, to improve their farm and home operations, and to develop or maintain a reasonable standard of living. Total indebtedness to FSA may not exceed \$200,000 for direct loans and \$759,000 for guaranteed loans. The term of the loan varies from 1 to 7 years.

Emergency disaster loans.—Made available in designated areas (counties) and in contiguous counties where property damage and/or severe production losses have occurred as a direct result of a natural disaster. Areas may be declared by the President or designated for emergency loan assistance by the Secretary of Agriculture. The loan may be up to \$500,000.

Credit sales of acquired property.—Property is sold out of inventory and is made to an eligible buyer by providing FSA loans.

Indian tribe land acquisition loans.—Made to any Indian tribe recognized by the Secretary of the Interior or tribal corporation established pursuant to the Indian Reorganization Act which does not have adequate uncommitted funds to acquire lands or interest in lands within the tribe's reservation or Alaskan Indian community, as determined by the Secretary of the Interior, for use of the tribe or the corporation or the members thereof.

Boll weevil eradication loans.—Made to assist foundations in financing the operations of the boll weevil eradication programs provided to farmers.

COMMITTEE RECOMMENDATIONS

The Committee recommends a total level for farm loans of \$4,065,725,000. This is \$175,000,000 more than the 2002 level and \$263,725,000 more than the budget request.

The following table reflects the program levels for farm credit programs administered by the Farm Service Agency recommended by the Committee, as compared to the fiscal year 2002 and the budget request levels:

AGRICULTURAL CREDIT PROGRAMS—LOAN LEVELS

[In thousands of dollars]

	Fiscal year 2002 enacted	Fiscal year 2003 budget	Committee rec- ommendation
Farm ownership:			
Direct	(146,996)	(100,000)	(146,996)
Guaranteed	(1,000,000)	(1,000,000)	(1,000,000)
Farm operating:			
Direct	(611,198)	(600,000)	(611,198)
Guaranteed unsubsidized	(1,500,000)	(1,700,000)	(1,700,000)

Committee recommendation	117,993	108,769	243,781	8,000	279,176	513,938

The Federal Credit Reform Act of 1990 established the program account. Appropriations to this account are used to cover the lifetime subsidy costs associated with the di-

rect loans obligated and loan guarantees committed, as well as for administrative expenses.

[In thousands of dollars]

	2002 enacted	2003 budget	Committee rec- ommendation
Loan subsidies:			
Farm ownership:			
Direct	3,866	11,610	17,066
Guaranteed	4,500	7,500	7,500

¹No cost since subsidy rate is negative.

RISK MANAGEMENT AGENCY

Appropriations, 2002	\$74,752,000
Budget estimate, 2003 ¹	72,771,000
Committee recommendation	70,708,000

¹Excludes \$3,291,000 requested for employee pension and health benefits.

The Risk Management Agency performs administrative functions relative to the Federal crop insurance program that is authorized by the Federal Crop Insurance Act (7 U.S.C. 1508), as amended by the Agricultural Risk Protection Act of 2000 (ARPA), Public Law 106-224, and the Farm Security and Rural Investment Act of 2002 (2002 Act), Public Law 107-171.

ARPA authorized significant changes in the crop insurance program. This Act provides higher government subsidies for producer premiums to make coverage more affordable; expands research and development for new insurance products and under-served areas through contracts with the private sector; and tightens compliance. Functional areas of risk management are: research and development; insurance services; and compliance, whose functions include policy formulation and procedures and regulations development.

The 2002 Act maintains the basic crop insurance program largely without change. This Act also requires the continuation of the Adjusted Gross Revenue (AGR) pilot program, which provides insurance coverage for crops for which traditional crop insurance is not available. However, the 2002 Act elimi-

nates the ARPA provision that allowed selection of continuous coverage levels, rather than coverage levels at fixed intervals.

COMMITTEE RECOMMENDATIONS

For administrative and operating expenses for the Risk Management Agency, the Committee recommends an appropriation of \$70,708,000. This is \$4,044,000 less than the 2002 level and \$2,063,000 less than the budget request.

This amount does not include an increase of \$2,045,000 for rental payments to GSA, or \$18,000 for FECA administrative charges, as requested in the budget.

The Committee does not agree with the President's legislative proposal to cap the underwriting gain on crop insurance at 12.5 percent. As opposed to an arbitrary change in legislation, the Committee feels that the Administration should follow the procedures set forth in the current Standard Reinsurance Agreement. Notice of intent to cancel the current agreement should be given by December 13, 2002, and all interested parties should then be allowed to negotiate a new agreement.

The Risk Management Agency is currently developing a Cost of Production (COP) crop insurance pilot program that includes 12 crops: almonds, apricots, cotton, corn, cranberries, nectarines, onions, peaches, soybeans, sugarcane, rice, and wheat. The Committee instructs RMA to include hard, soft, and durum sub-classes of wheat when implementing the COP pilot program for wheat.

The Committee is aware of the benefits to producers of risk management programs like

the Dairy Options Pilot Program. The program introduces dairy farmers to the futures and options markets and gives producers first-hand experience in buying put options contracts to ensure a minimum price for their milk. The Committee encourages the Agency to continue funding this important risk management program.

CORPORATIONS

FEDERAL CROP INSURANCE CORPORATION FUND

The Federal Crop Insurance Reform Act of 1994 was designed to replace the combination of crop insurance and ad hoc disaster payment programs with a strengthened crop insurance program.

Producers of insurable crops are eligible to receive a basic level of protection against catastrophic losses, which cover 50 percent of the normal yield at 55 percent of the expected price. The only cost to the producer is an administrative fee of \$100 per crop per policy. At least catastrophic [CAT] coverage was required for producers who participate in the commodity support, farm credit, and certain other farm programs. Under the Federal Agriculture Improvement and Reform [FAIR] Act of 1996, producers are offered the option of waiving their eligibility for emergency crop loss assistance instead of obtaining CAT coverage to meet program requirements. Emergency loss assistance does not include emergency loans or payment under the Noninsured Assistance Program [NAP]. Beginning with the 1997 crop, the Secretary began phasing out delivery of CAT coverage

through the FSA offices, and in 1998 designated the private insurance providers as the sole source provider of CAT coverage.

The Reform Act of 1994 also provides increased subsidies for additional buy-up coverage levels which producers may obtain from private insurance companies. The amount of subsidy is equivalent to the amount of premium established for catastrophic risk protection coverage for coverage up to 65 percent level at 100 percent price. For coverage equal to or greater than 65 percent at 100 percent of the price, the amount is equivalent to an amount equal to the premium established for 50 percent yield indemnified at 75 percent of the expected market price.

The reform legislation included the NAP program for producers of crops for which there is currently no insurance available. NAP was established to ensure that most producers of crops not yet insurable will have protection against crop catastrophes comparable to protection previously provided by ad hoc disaster assistance programs. While the NAP program was implemented under the Deputy Administrator for Risk Management, under the FAIR Act of 1996, the NAP program will remain with the Farm Service Agency and be incorporated into the Commodity Credit Corporation program activities.

The Agricultural Risk Protection Act of 2000 (ARPA) amended the Federal Crop Insurance Act to strengthen the safety net for agricultural producers by providing greater access to more affordable risk management tools and improved protection from production and income loss, and to improve the efficiency and integrity of the Federal crop insurance program. ARPA allows for the improvement of basic crop insurance products by implementing higher premium subsidies to make buy-up coverage more affordable for producers; make adjustments in actual production history guarantees; and revise the administrative fees for catastrophic (CAT) coverage. More crops and commodities have become insurable through pilot programs effective with the 2001 crop year. ARPA provides for an investment for over \$8.2 billion in five years to further improve Federal crop insurance.

FEDERAL CROP INSURANCE CORPORATION FUND
 Appropriations, 2002¹ \$2,900,000,000
 Budget estimate, 2003^{1,2} 2,886,000,000
 Committee recommendation¹ 2,886,000,000

¹Current estimate. Such sums as may be necessary, to remain available until expended, are provided.

²Does not include a reduction of \$115,154,000 to reflect the impact of proposed Section 722.

The Federal Crop Insurance Act, as amended by the Federal Crop Insurance Reform Act of 1994, authorizes the payment of expenses which may include indemnity payments, loss adjustment, delivery expenses, program-related research and development, startup costs for implementing this legislation such as studies, pilot projects, data processing improvements, public outreach, and related tasks and functions.

All program costs, except for Federal salaries and expenses, are mandatory expenditures subject to appropriation.

COMMITTEE RECOMMENDATIONS

For the Federal Crop Insurance Corporation fund, the Committee recommends an appropriation of such sums as may be necessary, estimated to be \$2,886,000,000. This is \$14,000,000 less than the current fiscal year 2002 estimate and the same as the budget request.

COMMODITY CREDIT CORPORATION FUND

The Commodity Credit Corporation [CCC] is a wholly owned Government corporation

created in 1933 to stabilize, support, and protect farm income and prices; to help maintain balanced and adequate supplies of agricultural commodities, including products, foods, feeds, and fibers; and to help in the orderly distribution of these commodities. CCC was originally incorporated under a Delaware charter and was reincorporated June 30, 1948, as a Federal corporation within the Department of Agriculture by the Commodity Credit Corporation Charter Act, approved June 29, 1948 (15 U.S.C. 714).

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feed, and fibers. Its purposes include stabilizing, supporting, and protecting farm income and prices; maintaining the balance and adequate supplies of selected commodities; and facilitating the orderly distribution of such commodities. In addition, the Corporation makes available materials and facilities required in connection with the storage and distribution of such commodities. The Corporation also disburses funds for sharing of costs with producers for the establishment of approved conservation practices on environmentally sensitive land and subsequent rental payments for such land for the duration of Conservation Reserve Program contracts.

Corporation activities are primarily governed by the following statutes: the Commodity Credit Corporation Charter Act, as amended; the Agricultural Act of 1949, as amended (1949 Act); the Agricultural Adjustment Act of 1938, as amended (the 1938 Act); the Food Security Act of 1985, as amended (1985 Act); and the Farm Security and Rural Investment Act of 2002 (2002 Act), enacted May 13, 2002.

Under the 2002 Act, the Secretary is required to offer a program of direct and counter-cyclical payments and extend non-recourse marketing assistance loans and loan deficiency payments for contract commodities (soybeans, wheat, corn, grain sorghum, barley, oats, upland cotton, rice, other oilseeds, and peanuts). The 2002 Act also provides for marketing loans for wool, mohair, honey, small chickpeas, lentils and dry peas. A national Dairy Market Loss Payment (DMLP) program is established by the 2002 Act, providing that producers enter into contracts extending through September 30, 2005. A milk price support program is also provided to support the price of milk via purchases of butter, cheese, and nonfat dry milk. The rate of support is \$9.90 per hundredweight.

The 2002 Act directs the Secretary to operate the sugar program at no cost to the U.S. Treasury by avoiding sugar loan forfeitures in the nonrecourse loan program. The nonrecourse loan program is reauthorized through fiscal year 2007 at 18 cents per pound for raw cane sugar and 22.9 cents per pound for refined beet sugar.

In the conservation area, the 2002 Act extends and expands the conservation reserve program (CRP), the wetlands reserve program (WRP), the environmental quality incentives program (EQIP), the farmland protection program (FPP), and the wildlife habitat incentives program (WHIP). Each of these programs is funded through the CCC.

The 2002 Act also authorizes and provides CCC funding for other conservation programs, including the conservation security program and the grassland reserve program.

Management of the Corporation is vested in a board of directors, subject to the general supervision and direction of the Secretary of Agriculture, who is an ex-officio director and chairman of the board. The board consists of seven members, in addition to the Secretary, who are appointed by the President of the United States with the advice and consent of

the Senate. Officers of the Corporation are designated according to their positions in the Department of Agriculture.

The activities of the Corporation are carried out mainly by the personnel and through the facilities of the Farm Service Agency [FSA] and the Farm Service Agency State and county committees. The Foreign Agricultural Service, the General Sales Manager, other agencies and offices of the Department, and commercial agents are also used to carry out certain aspects of the Corporation's activities.

The Corporation's capital stock of \$100,000,000 is held by the United States. Under present law, up to \$30,000,000,000 may be borrowed from the U.S. Treasury, from private lending agencies, and from others at any one time. The Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all notes and other obligations evidencing loans made by such agencies and others. All bonds, notes, debentures, and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury.

Under Public Law 87-155 (15 U.S.C. 713a-11, 713a-12), annual appropriations are authorized for each fiscal year, commencing with fiscal year 1961. These appropriations are to reimburse the Corporation for net realized losses.

REIMBURSEMENT FOR NET REALIZED LOSSES	
Appropriations, 2002 ¹	\$20,279,000,000
Budget estimate, 2003 ¹	16,285,000,000
Committee recommendation ¹	16,285,000,000

¹Current estimate. Such sums as may be necessary are provided.

COMMITTEE RECOMMENDATIONS

For the payment to reimburse the Commodity Credit Corporation (CCC) for net realized losses, the Committee recommends an appropriation of such sums as may be necessary, estimated in fiscal year 2003 to be \$16,285,000,000. This is \$3,994,000,000 less than the current estimated level and the same as the budget request.

HAZARDOUS WASTE MANAGEMENT

Limitation, 2002	(\$5,000,000)
Budget estimate, 2003	(5,000,000)
Committee recommendation	(5,000,000)

The Commodity Credit Corporation's [CCC] hazardous waste management program is intended to ensure compliance with the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act. The CCC funds operations and maintenance costs as well as site investigation and cleanup expenses. Investigative and cleanup costs associated with the management of CCC hazardous waste are also paid from USDA's hazardous waste management appropriation.

COMMITTEE RECOMMENDATIONS

For Commodity Credit Corporation hazardous waste management, the Committee provides a limitation of \$5,000,000. This amount is the same as the 2002 level and the budget request.

TITLE II—CONSERVATION PROGRAMS

OFFICE OF THE UNDER SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT	
Appropriations, 2002	\$730,000
Budget estimate, 2003 ¹	902,000
Committee recommendation	902,000

¹Excludes \$21,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Natural Resources and Environment provides direction and coordination in carrying out the

laws enacted by the Congress with respect to natural resources and the environment. The Office has oversight and management responsibilities for the Natural Resources Conservation Service and the Forest Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Natural Resources and Environment, the Committee recommends an appropriation of \$902,000. This amount is \$172,000 more than the 2002 appropriation and the same as the budget request.

NATURAL RESOURCES CONSERVATION SERVICE

The Natural Resources Conservation Service [NRCS] was established pursuant to Public Law 103-354, the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6962). NRCS combines the authorities of the former Soil Conservation Service as well as five natural resource conservation cost-share programs previously administered by the Agricultural Stabilization and Conservation Service. Through the years, this Service, together with the agricultural conservation programs and over 2 million conservation district cooperatives, has been a major factor in reducing pollution. The Natural Resources Conservation Service works with conservation districts, watershed groups, and the Federal and State agencies having related responsibilities to bring about physical adjustments in land use that will conserve soil and water resources, provide for agricultural production on a sustained basis, and reduce damage by flood and sedimentation. The Service, with its dams, debris basins, and planned watersheds, provides technical advice to the agricultural conservation programs, where the Federal Government pays about one-third of the cost, and, through these programs, has done perhaps more to minimize pollution than any other activity. These programs and water sewage systems in rural areas tend to minimize pollution in the areas of greatest damage, the rivers and harbors near our cities.

The conservation activities of the Natural Resources Conservation Service are guided by the priorities and objectives as set forth in the National Conservation Program [NCP] which was prepared in response to the provisions of the Soil and Water Resources Conservation Act of 1977 [RCA] (Public Law 95-192). The long-term objectives of the program are designed to maintain and improve the soil, water, and related resources of the Nation's nonpublic lands by: reducing excessive soil erosion, improving irrigation efficiencies, improving water management, reducing upstream flood damages, improving range condition, and improving water quality.

CONSERVATION OPERATIONS

Appropriations, 2002	\$779,000,000
Budget estimate, 2003 ¹	840,963,000
Committee recommendation	840,002,000

¹ Excludes \$56,227,000 requested for employee pension and health benefits.

Conservation operations are authorized by Public Law 74-46 (16 U.S.C. 590a-590f). Activities include:

Conservation technical assistance.—Provides assistance to district cooperators and other land users in the planning and application of conservation treatments to control erosion and improve the quantity and quality of soil resources, improve and conserve water, enhance fish and wildlife habitat, conserve energy, improve woodland, pasture and range conditions, and reduce upstream flooding; all to protect and enhance the natural resource base.

Inventory and monitoring provides soil, water, and related resource data for land

conservation, use, and development; guidance of community development; identification of prime agricultural producing areas that should be protected; environmental quality protection; and for the issuance of periodic inventory reports of resource conditions.

Resource appraisal and program development ensures that programs administered by the Secretary of Agriculture for the conservation of soil, water, and related resources shall respond to the Nation's long-term needs.

Soil surveys.—Inventories the Nation's basic soil resources and determines land capabilities and conservation treatment needs. Soil survey publications include interpretations useful to cooperators, other Federal agencies, State, and local organizations.

Snow survey and water forecasting.—Provides estimates of annual water availability from high mountain snow packs and relates to summer stream flow in the Western States and Alaska. Information is used by agriculture, industry, and cities in estimating future water supplies.

Plant materials centers.—Assembles, tests, and encourages increased use of plant species which show promise for use in the treatment of conservation problem areas.

COMMITTEE RECOMMENDATIONS

For conservation operations, the Committee recommends an appropriation of \$840,002,000. This amount is \$61,002,000 more than the 2002 level and \$961,000 less than the budget request.

This amount does not include an increase of \$18,289,000 for rental payments to GSA or \$189,000 for FECA administrative charges, as requested in the budget.

For fiscal year 2003, the Committee recommends funding increases, as specified below, for new and ongoing conservation activities. Amounts provided by the Committee for specific conservation measures shall be in addition to levels otherwise made available to States.

Projects identified in Senate Report 107-41 and Conference Report 107-275 that were directed to be funded by the Committee for fiscal year 2002 are not funded for fiscal year 2003, unless specifically mentioned herein.

The Committee is aware of the severe water problems occurring in the State of Georgia, especially in the Flint River watershed in Southwest Georgia and the coastal watershed in Southeast Georgia. Surface and ground water are being severely depleted by drought and further exacerbated by salt water intrusion into coastal agriculture areas. The Committee provides \$1,500,000 in fiscal year 2003 funding for the Georgia Agricultural Water Conservation Initiative.

The Committee directs the agency to maintain a national priority area pilot program under the guidelines of the Environmental Quality Incentives Program (EQIP) in the delta of the State of Mississippi.

The Committee provides \$800,000 for fiscal year 2003 for a study to characterize the on-site consequences, estimate off-site impacts, and develop strategies to facilitate land use change while preserving critical natural resources. The agency is directed to work in cooperation with Clemson University in conducting this study.

The Committee provides the fiscal year 2002 level of funding to expand the cooperative efforts with the Claude E. Phillips Herbarium, Delaware.

The Committee provides the fiscal year 2002 level of funding to maintain a partnership between USDA and the National Fish and Wildlife Foundation.

The Committee provides \$2,500,000 to continue work on the Great Lakes Basin Program for soil and erosion sediment control.

The Committee provides \$23,500,000 for fiscal year 2003 level for the grazing lands conservation assistance program, of which no less than \$250,000 shall be for grazing land conservation activities in Wisconsin.

The Committee provides the fiscal year 2002 level of funding for the National Water Management Center in Arkansas.

The Committee provides the fiscal year 2002 level for the Chesapeake Bay Program.

The Committee continues its concern for the serious threat to pastures and watersheds resulting from the introduction of alien weed pests into Hawaii. The Committee directs the agency to work with the Hawaii Department of Agriculture and the Animal Plant and Health Inspection Service to develop an integrated approach, including environmentally-safe biological controls, for eradicating these pests.

The Committee provides \$350,000 to obtain and evaluate materials and seeds of plants indigenous to regions north of 52 degrees North Latitude and equivalent vegetated regions in the Southern Hemisphere (south of 52 degrees South Latitude). The Committee directs the agency to continue working in conjunction with the Alaska Division of Agriculture in this effort.

The Committee continues funding at the fiscal year 2002 level of funding for plant material centers and continued development of warm season grasses for use in the Conservation Reserve Program (CRP) and the Wildlife Habitat Initiatives Program (WHIP).

The Committee encourages the agency to provide \$300,000 to support the emerging alternative technology to reduce phosphorous loading into Lake Champlain.

The Committee provides the fiscal year 2002 level of funding to continue support of agricultural development and resource conservation on the Island of Molokai and the transition from small-scale conservation projects to those that benefit the community through sustainable economic impact.

The Committee provides the fiscal year 2002 level for the Kenai streambank restoration water project for fiscal year 2003.

The Committee recognizes the need for a special outreach effort so that USDA can serve small-scale Appalachian farmers in sustaining agriculture production while protecting natural resources. The Committee provides the fiscal year 2002 level of funding for the Appalachian Small Farmer Outreach Program. Sound economic grazing systems, marketing strategies, and uniformity of production quality will ensure the competitiveness of livestock operations and help maintain small farm enterprises. This initiative will provide livestock producers access to the needed one-on-one assistance.

The Committee provides the fiscal year 2002 level of funding for technical assistance for Franklin County Lake, MS.

The Committee continues the fiscal year 2002 level of funding for existing NRCS offices in Alaska and includes funding for new offices in Kodiak and Dillingham at a level of \$250,000 each in fiscal year 2003. Also, the Committee provides funding necessary to support at least one staff position for each soil and water conservation district, a public information program, and assistance in rural Alaska.

The Committee provides the fiscal year 2002 level of funding to complete the Squirrel Branch Drainage Project, Mississippi.

The Committee continues funding for the implementation of the Delta Study at the fiscal year 2002 level. Local sponsors are to work cooperatively with the NRCS so that water conservation, water supply evaluations, and environmental planning can proceed.

The Committee directs the agency to work with soil scientists at regional land-grant

universities to continue the pilot project in Washington, Sharkey and Yazoo Counties, Mississippi, to determine the proper classification and taxonomic characteristics of Sharkey soils.

The Committee provides \$1,200,000 to address the erosion in the Loess Hills/Hungry Canyon area in western Iowa. The Committee is aware that the Eastern Red Cedar and other invasive species of woody plants are having a very negative effect on prairies in the Loess Hills, a unique soil important to many rare animals and plants. The Committee encourages the Department to support efforts to reduce this problem.

The Committee provides the fiscal year 2002 level of funding to conduct nitrogen soil tests and plant-available nitrogen tests, and to demonstrate poultry litter and wood composting in an effort to improve farmers' economic returns and minimize potential water quality conditions resulting from excess application of nutrients from manure and fertilizers on West Virginia's cropland.

The Committee provides an increase of \$125,000 from the fiscal year 2002 funding level for the Delta Conservation Demonstration Center, Washington County, MS.

The Committee provides \$200,000 for fiscal year 2003 for the Idaho One-Plan, a test of the prototype Conservation Planning Module in the field with farmers and ranchers in Canyon County, ID.

The Committee provides funding to continue the expansion of the Potomac and Ohio River Basins Soil Nutrient Project to include Jefferson, Berkeley, and Greenbrier Counties. This funding will enable the NRCS, in cooperation with West Virginia University and the Appalachian Small Farming Research Center, to identify and characterize phosphorous movement in soils to determine appropriate transportation, the holding capacity, and the management of phosphorous. This information is critical in helping Appalachian farmers deal with nutrient loading issues and in protecting the Chesapeake Bay from eutrophication and the Ohio River, Mississippi River, and Gulf of Mexico from depletion of life-sustaining oxygen.

The Committee provides the fiscal year 2002 level of funding for evaluating and increasing native plant materials in Alaska.

The Committee provides \$1,000,000 for technical assistance for the Seward/Resurrection River watershed project, Alaska.

The Committee provides \$800,000 for the continued development of a geographic information system (GIS)-based model in South Carolina to integrate commodity and conservation program data at the field level for watershed analysis purposes.

The Committee provides \$8,707,000 for Snow Survey and Water Supply Forecasting, which includes full funding for activities related to SNOWpack TELlemetry (SNOTEL).

The Committee provides \$1,750,000 for the Little Wood River Irrigation District Gravity Pressure Delivery System in Idaho.

The Committee provides \$400,000 for the Backyard Conservation Program as part of the National Cooperative Soil Program. This funding is to be used to provide technical assistance on grazing lands and backyard containment of water runoff in order to improve nutrient management and protect water resources in the Lake Tahoe Basin.

The Committee provides \$375,000 for the Little Red River Irrigation Project in Arkansas.

Recurring floods along the Red River in recent years have resulted in tremendous loss of property and have endangered residents throughout the basin. A number of methods, such as enhanced water storage capacity, more efficient drainage, and shifts in agricultural land use, may be employed to retard the flow of flood waters and reduce down-

stream flooding. It is important that these improvements be pursued in a manner beneficial to agriculture and result in minimal loss of productive farm land. Accordingly, the Committee provides \$1,500,000 for the Red River Basin Flood Prevention Project in North Dakota in cooperation with the Energy and Environmental Research Center.

The Committee provides \$3,000,000 to provide technical assistance for the Kentucky Soil Erosion Control/Soil Survey Program.

The Committee provides an increase above the fiscal year 2002 level of \$525,000 for cattle and nutrient management in stream crossings in cooperation with Mississippi conservation districts.

The Committee provides \$300,000 to implement the Certified Environmental Management Systems for Agriculture (CEMSA) in cooperation with the Iowa Soybean Association. CEMSA will be designed to assist producers to voluntarily adopt certifiable conservation plans, with additional funds to be provided from non-Federal sources.

The Committee provides \$300,000 for planning and design associated with the Walnut Bayou Irrigation Project, Arkansas.

The Committee directs the NRCS to develop a plan to establish a Geographic Information Systems Center of Excellence in cooperation with West Virginia University that will provide expertise to design, field, and support new applications for capturing, managing, analyzing, and delivering soil survey information in an easily accessible manner.

The Committee encourages the agency to support watershed management and demonstration projects in cooperation with the National Pork Producers Council.

The Committee provides the fiscal year 2002 level for a cooperative agreement between NRCS and Alcorn State University to analyze soil erosion and water quality by using demonstration sites.

The Committee provides an increase of \$850,000 from the fiscal year 2002 level of funding for the Wildlife Habitat Management Institute (WHMI) for developing and transferring fish and wildlife technology to States and field offices. Of the funds made available for the WHMI, the Committee expects WHMI to develop a pilot program to provide technical assistance to landowners to enhance the natural habitats of bobwhite quail.

The Committee provides \$1,000,000 to assist in the conversion to sprinkler irrigation in the vicinity of Minidoka, ID, in order to reduce water quality impairments resulting from the return of water runoff to the aquifer by way of agricultural drain wells.

The Committee provides \$100,000 for fiscal year 2003 to perform a feasibility study for a surface impoundment in Choctaw County, MS.

The Committee is aware of the additional demands for conservation technical assistance resulting from the New Jersey State Conservation Cost Share Program and provides an additional \$900,000 for assistance in cooperation with that program.

The Committee encourages NRCS to continue assistance for conservation programs related to cranberry production in the States of Massachusetts and Wisconsin.

The Committee provides \$150,000 for the Upper Petit Jean Watershed Project, Arkansas.

The Committee expects the National Resource Conservation Service (NRCS) to continue to support the work of the Southwest Strategy and its coordinated effort to help address the natural resource, cultural resource, and economic issues facing the people of New Mexico and Arizona.

The Committee encourages the Agency to examine the possibility of cost-sharing through existing conservation program types

of cover (including plastic mulch) that would promote the successful establishment of tree shrub and other prescribed plantings used for wind erosion practices.

The Committee provides \$900,000 to proceed with the Bayou Meto project in Arkansas.

The Committee provides \$500,000 to provide expedited conservation planning of the Lake Okeechobee Watershed project in Florida. It is expected the agency will work in cooperation with the Florida Department of Agriculture and Consumer Services.

The Committee provides \$400,000 to provide assistance to the Waynewood Drainage project in Illinois.

The Committee provides \$50,000 to provide assistance for the Native Seed Program which has been developed in cooperation with Oregon State University and the Native Plant Society of Oregon.

The Committee provides \$250,000 for fiscal year 2003 for repair of Askalmore Watershed Dam Y-17a-11, Tallahatchie County, MS.

The Committee expects the NRCS to provide \$150,000 for the State of Rhode Island to address drought-related issues, including ways in which producers can minimize their risks, diversify their operations, and expand into alternative practices such as organic farming.

The Committee provides \$400,000 for fiscal year 2003 for flood protection around the Humphreys County Hospital and the City of Belzoni, Humphreys County, MS.

The Committee provides \$325,000 for reach at the Oregon Garden, including studying of wetland plant materials for non-point source run-off, point-source treatment of drainage from parking lots, sewage waste treatment, carbon storage crediting, reestablishment of wetlands, and for other environmental sustainability purposes.

The Committee provides \$250,000 for the Utah CAFO/AFO pilot project.

The Committee provides \$150,000 to continue implementation of pilot projects designed for nutrient reducing waste treatment systems for dairy operations in Florida. The Committee provides \$500,000 for fiscal year 2003 for drainage improvements in the City of Petal, MS.

The Committee provides an increase of \$1,000,000 above the fiscal year 2002 level for increased technical assistance in the State of Oregon.

The Committee provides \$300,000 for assistance to the Dry Creek/Neff's Grove project in the State of Utah. The Committee provides \$100,000 for fiscal year 2003 for drainage improvements on Watkins Drive in the City of Jackson, MS.

The Committee provides \$650,000 to assist the Lincoln Parish in the development of a stormwater and conservation management program.

The Committee encourages NRCS to provide assistance for activities in the following counties in Kentucky: Knott County for technical assistance relating to water and sewer disposal for \$250,000; Boone County for conservation projects in the amount of \$300,000; and Kenton County relating to flood prevention in the amount of \$250,000.

The Committee provides \$300,000 for fiscal year 2003 for drainage improvements in the City of Port Gibson, MS.

The Committee provides \$400,000 for assistance regarding the Jefferson River Watershed in Montana.

The Committee provides \$200,000 in regard to an Environmental Impact Statement for Leslie County, KY.

The Committee encourages the Secretary to promulgate rules and regulations pursuant to section 1001D of Farm Security and Rural Investment Act of 2002 on payment eligibility based on adjusted gross income in a manner that allows non-profit entities to

continue to receive a payment, including through direct participation, cooperative agreements, or as providers of technical assistance in conservation programs under Title XII of the Food Security Act of 1985 or Title II of the Farm Security and Rural Investment Act of 2002.

The Committee provides \$450,000 for assistance regarding the St. John the Baptist Parish Lakes Bank Retention project in Louisiana.

The Committee provides \$500,000 for a study to examine the environmental benefits of using vegetative buffers along waterways. The agency is directed to work in cooperation with the University of Wisconsin-Madison.

The Committee provides \$150,000 for fiscal year 2003 for drainage improvements in the City of Mount Olive, MS.

The Committee provides \$500,000 to conduct a Great Lakes pilot in Michigan for conservation program decision support capability to better evaluate and implement conservation programs in the Great Lakes Watershed. The Committee provides \$500,000 for fiscal year 2003 for drainage improvements in the City of Meridian, MS.

The Committee expects the NRCS to work in conjunction with the ARS Dairy Forage Laboratory in Madison, WI, regarding dairy waste management and in the development of a working arrangement regarding planned expansion of the Dairy Forage Laboratory activities at Marshfield, WI and the possible establishment of a NRCS Waste Management Institute at that location.

The Committee provides \$150,000 to assist in the False River Sedimentation Reduction project in Louisiana.

The Committee provides \$1,500,000 to assist in the Montana Watershed Planning project.

The Committee provides \$1,000,000 to implement the Source Water Protection Program and encourages that these funds be used in the State with the greatest need.

The Committee provides \$300,000 to assist in the Wyoming Soil Survey Mapping project.

The Committee provides \$120,000 for the Conservation Land Internship Program in Wisconsin to help students learn about resource conservation.

The Committee provides \$500,000 for a study to examine the environmental benefits of using nutrient management plans for phosphorus and related conservation practices. The agency is directed to work in cooperation with the University of Wisconsin-Madison.

The Committee provides \$500,000 for fiscal year 2003 for technical assistance in North Carolina to address concerns with the application of phosphorous on agricultural lands.

The Committee provides \$500,000 for assistance to the Walla Walla Watershed Alliance in Washington.

The Committee provides \$800,000 to provide additional Conservation Technical Assistance funding for NRCS in Kentucky to provide grants to Kentucky Soil Conservation Districts.

The Committee encourages the Secretary to enter into a stewardship agreement with the Iowa Department of Agriculture and Land Stewardship and the Iowa Corn Growers Association to initiate a stewardship program focusing on nutrient best management practices to reduce the environmental impact of nitrogen in the State of Iowa pursuant to the authority under Partnerships and Cooperation [subsection (f) of Section 1243 of the Food Security Act of 1985 (16 U.S.C. 3843)].

The Committee provides no less than the same level available in fiscal year 2002 to support NRCS Plant Materials Centers. The Committee provides the fiscal year 2002 level

for improvements to the existing building and facilities at the Jamie Whitten Plant Materials Center.

The Committee opposes the Department's obligation of Conservation Operations (CO) appropriations to pay for technical assistance for conservation programs reauthorized by Public Law 107-171. The General Accounting Office (GAO), in a legal opinion issued October 8, 2002, found that the Conservation Operations appropriation is not available to provide technical assistance to carry out conservation programs authorized by Section 2701 of Public Law 107-171. In a further opinion issued December 13, 2002, GAO found that the United States Department of Agriculture improperly obligated funds in violation of the Antideficiency Act, 31 U.S.C. 1341(a). The Committee urges the Department to take immediate corrective action to properly report this violation, and to adjust the appropriations account accordingly by deobligating the improper amount charged to the CO appropriation and instead charging that amount to the Commodity Credit Corporation.

The Committee has included a prohibition in the CO account to prevent further misuse of these funds.

WATERSHED SURVEYS AND PLANNING

Appropriations, 2002	\$10,960,000
Budget estimate, 2003	
Committee recommendation	10,960,000

The Watershed Protection and Flood Prevention Act, Public Law 88-566, August 4, 1954, provided for the establishment of the Small Watershed Program (16 U.S.C. 1001-1008), and section 6 of the act provided for the establishment of the River Basin Surveys and Investigation Program (16 U.S.C. 1006-1009). A separate appropriation funded the two programs until fiscal year 1996 when they were combined into a single appropriation, watershed surveys and planning.

River basin activities provide for cooperation with other Federal, State, and local agencies in making investigations and surveys of the watersheds of rivers and other waterways as a basis for the development of coordinated programs. Reports of the investigations and surveys are prepared to serve as a guide for the development of agricultural, rural, and upstream watershed aspects of water and related land resources, and as a basis for coordination of this development with downstream and other phases of water development.

Watershed planning activities provide for cooperation between the Federal Government and the States and their political subdivisions in a program of watershed planning. Watershed plans form the basis for installing works of improvement for floodwater retardation, erosion control, and reduction of sedimentation in the watersheds of rivers and streams and to further the conservation, development, utilization, and disposal of water. The work of the Department in watershed planning consists of assisting local organizations to develop their watershed work plan by making investigations and surveys in response to requests made by sponsoring local organizations. These plans describe the soil erosion, water management, and sedimentation problems in a watershed and works of improvement proposed to alleviate these problems. Plans also include estimated benefits and costs, cost-sharing and operating and maintenance arrangements, and other appropriate information necessary to justify Federal assistance for carrying out the plan.

COMMITTEE RECOMMENDATIONS

For watershed surveys and planning, the Committee recommends an appropriation of

\$10,960,000. This amount is the same as the 2002 appropriation and \$10,960,000 more than the budget request.

WATERSHED AND FLOOD PREVENTION OPERATIONS	
Appropriations, 2002	\$106,590,000
Budget estimate, 2003	
Committee recommendation	105,000,000

The Watershed Protection and Flood Prevention Act (Public Law 566, 83d Cong.) (16 U.S.C. 1001-1005, 1007-1009) provides for cooperation between the Federal Government and the States and their political subdivisions in a program to prevent erosion, floodwater, and sediment damages in the watersheds or rivers and streams and to further the conservation, development, utilization, and disposal of water.

The Natural Resources Conservation Service has general responsibility for administration of activities, which include cooperation with local sponsors, State, and other public agencies in the installation of planned works of improvement to reduce erosion, floodwater, and sediment damage; conserve, develop, utilize, and dispose of water; plan and install works of improvement for flood prevention, including the development of recreational facilities and the improvement of fish and wildlife habitat; and loans to local organizations to help finance the local share of the cost of carrying out planned watershed and flood prevention works of improvement.

COMMITTEE RECOMMENDATIONS

For watershed and flood prevention operations, the Committee recommends an appropriation of \$105,000,000. This amount is \$1,590,000 less than the 2002 appropriation and \$105,000,000 more than the budget request.

The Committee continues the fiscal year 2002 level of funding for the Little Sioux Watershed and Mosquito Creek Watershed projects, Iowa.

The Committee encourages the agency to provide assistance for the Seward Resurrection River Flood Mitigation Project and the Matanuska River, AK erosion control project.

The Committee encourages the agency to support the increased demands for project completions dedicated to increasing water storage capacity, improving the efficiency of delivery systems, and conserving water through flood control projects, Hawaii. In particular, the Committee recommends that the agency provide funding to complete design and construction for the following approved watershed projects: Lower Hamakua Ditch Watershed, Upcountry Maui Watershed, Lahaina Watershed, and the Wailuku-Alenoa Watershed. In addition, the Committee recommends providing sufficient staff to complete the planning and design of these projects. The Committee also urges the agency to continue to provide leadership to coordinate water use and conservation activities of agencies of government and the private sector in Hawaii.

The Committee expects the agency to provide funds for continuing work in connection with the Big Creek/Hurricane Creek, Grassy Creek, Moniteau Creek, East Locust Creek, West Fork of Big Creek, East Yellow Creek, McKenzie Creek, Hickory Creek, East Fork of Grand River, Troublesome Creek and the Upper Locust Creek projects, all located in Missouri.

The agency is encouraged to fund completion of construction of the Bayou Bourbeaux Watershed Project in Opelousas, LA.

The Committee urges the agency to complete design and initiate construction of the Upper Tygart Valley Watershed project in West Virginia. In addition, the agency is provided funds to proceed with Phase III of the

Little Whitestick Creek Channel Improvements in Raleigh County, WV. Also, the agency should continue to provide assistance to carry out the Potomac Headwaters Land Treatment Watershed project in West Virginia at no less than the fiscal year 2002 level.

The Committee provides funds for NRCS to provide assistance for bank stabilization and channel improvement work in Mississippi in the Tillatoba Creek Watershed, Yalobusha County; Oaklimeter Creek Watershed; and the Skuna River Watershed.

The Committee provides funds for the completion of Phase II of the Kuhn Bayou (Point Remove) project, Arkansas.

The Committee continues to be aware of flooding in the Devils Lake basin in North Dakota, and notes that the lake has risen more than 25 feet since 1993. The Committee encourages the agency, with the cooperation of the Farm Service Agency, to assist in the locally coordinated flood response and water management activities. NRCS and FSA should continue to utilize conservation programs in providing water holding and storage areas on private land as necessary intermediate measures in watershed management.

The Committee urges NRCS to proceed with construction of Phase II of the watershed flood control project in the vicinity of Truth or Consequences, NM.

The Committee encourages the NRCS to continue assistance for watershed projects in Iowa for which funds were provided in fiscal year 2002 in addition to the following projects: Fox River, Upper Locust, Turkey Creek, Indian Creek, Mill-Picayune Creek, Hacklebarney, and A&T Longbranch.

The Committee continues funding in order to complete the Pocasset River watershed project, Rhode Island.

The Committee provides funds to provide assistance to construct grade control structures in the Piney Creek Watershed, Yazoo County, MS, and to provide assistance for construction of Town Creek Floodwater Retarding Structure #8, Lee County, MS.

The Committee provides funding for the Square Butte project in North Dakota.

WATERSHED REHABILITATION PROGRAM

Appropriations, 2002	\$10,000,000
Budget estimate, 2003	
Committee recommendation	30,000,000

The Committee recommends a new watershed rehabilitation program account for technical and financial assistance to carry out rehabilitation of structural measures, in accordance with Section 14 of the Watershed Protection and Flood Prevention Act, approved August 4, 1954 (U.S.C. 1001 et seq.), as amended by Section 313 of Public Law 106-472, November 9, 2000 (16 U.S.C. 1012), and by section 2505 of the Farm Security and Rural Investment Act of 2002 (Public Law 107-171).

COMMITTEE RECOMMENDATIONS

For the watershed rehabilitation program, the Committee recommends \$30,000,000. This amount is \$20,000,000 more than the fiscal year 2002 level and \$30,000,000 more than the budget request.

The Committee directs that funding under this program be provided for rehabilitation of structures determined to be of high priority need in order to protect property and ensure public safety.

RESOURCE CONSERVATION AND DEVELOPMENT

Appropriations, 2002	\$48,048,000
Budget estimate, 2003 ¹	49,079,000
Committee recommendation	50,000,000

¹ Excludes \$2,952,000 requested for employee pension and health benefits.

The Natural Resources Conservation Service has general responsibility under provisions of section 102, title I of the Food and Agriculture Act of 1962, for developing overall work plans for resource conservation and development projects in cooperation with local sponsors; to help develop local programs of land conservation and utilization; to assist local groups and individuals in carrying out such plans and programs; to conduct surveys and investigations relating to the conditions and factors affecting such work on private lands; and to make loans to project sponsors for conservation and development purposes and to individual operators for establishing soil and water conservation practices.

COMMITTEE RECOMMENDATIONS

For resource conservation and development, the Committee recommends an appropriation of \$50,000,000. This amount is \$1,952,000 more than the 2002 level and \$921,000 more than the budget request. The full increase is intended to provide additional support for existing resource conservation and development councils and to allow for consideration of newly authorized areas in states.

The Committee is aware of applications for the establishment of new RC&D areas and encourages the Secretary to give consideration to those requests.

FORESTRY INCENTIVES PROGRAM

Appropriations, 2002	\$6,811,000
Budget estimate, 2003	
Committee recommendation	

The Forestry Incentives Program is authorized by the Cooperative Forest Assistance Act of 1978 (Public Law 95-313), as amended by section 1214, title XII, of the Food, Agriculture, Conservation, and Trade Act of 1990 and the Federal Agriculture Improvement and Reform Act of 1996. Its purpose is to encourage the development, management, and protection of nonindustrial private forest lands. This program is carried out by providing technical assistance and long-term cost-sharing agreements with private landowners.

COMMITTEE RECOMMENDATIONS

The Committee does not provide funding for the Forestry Incentive Program. The authorization for this program was repealed by section 8001 of Public Law 107-171. Section 8002 of that Act established the Forest Land Enhancement Program which provides assistance to owners of non-industrial private forest lands in a manner similar to the Forestry Incentives Program. Public Law 107-171 makes available \$100,000,000 from funds of the Commodity Credit Corporation during the period 2002 through 2007.

TITLE III—RURAL DEVELOPMENT PROGRAMS

The Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Public Law 103-354) abolished the Farmers Home Administration, Rural Development Administration, and Rural Electrification Administration and replaced those agencies with the Rural Housing and Community Development Service, (currently, the Rural Housing Service), Rural Business and Cooperative Development Service (currently, the Rural Business-Cooperative Service), and Rural Utilities Service and placed them under the oversight of the Under Secretary for Rural Economic and Community Development, (currently, Rural Development). These agencies deliver a variety of programs through a network of State, district, and county offices.

In the 1930's and 1940's, these agencies were primarily involved in making small loans to

farmers; however, today these agencies have a multi-billion dollar assistance program throughout all America providing loans and grants for single-family, multi-family housing, and special housing needs, a variety of community facilities, infrastructure, and business development programs.

OFFICE OF THE UNDER SECRETARY FOR RURAL DEVELOPMENT

Appropriations, 2002	\$623,000
Budget estimate, 2003 ¹	898,000
Committee recommendation	898,000

¹ Excludes \$25,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Rural Development provides direction and coordination in carrying out the laws enacted by the Congress with respect to the Department's rural economic and community development activities. The Office has oversight and management responsibilities for the Rural Housing Service, Rural Business-Cooperative Service, and the Rural Utilities Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Rural Development, the Committee recommends an appropriation of \$898,000. This amount is \$275,000 more than the 2002 level and the same as the budget request.

The Committee is aware the Department has previously provided funding for the National Rural Development Partnership (NRDP). The NRDP, and its associated State Rural Development Councils, provide technical support and guidance for rural development at the State and local level. The Committee encourages the Department to continue support for this important organization from within available funds.

The Committee provides the Department \$1,000,000 to conduct a capital needs assessment as outlined in the GAO report, GAO-02-397. The Committee expects the Department to document the need for additional affordable housing in rural areas. The Committee also expects the Department to compare the costs associated with the Section 515 program with other Federal programs and incentives serving the same eligible rural population.

The Committee is aware of a proposal for a Rural Economic Area Partnership (REAP) Zone designation for 17 southern Illinois counties. The proposal was drafted by a coalition of regional planning and development organizations in Southern Illinois. The Committee encourages the Department to give the proposal serious review and to provide appropriate funding and technical assistance.

The Committee is aware of and supports the ongoing efforts and activities of the Farm Worker Institute for Education and Leadership Development (FIELD). The Committee encourages the Secretary to work with FIELD through ongoing outreach and technical assistance programs to enhance ongoing research, skill set and workforce development.

RURAL COMMUNITY ADVANCEMENT PROGRAM

Appropriations, 2002	\$806,557,000
Budget estimate, 2003	791,499,000
Committee recommendation	867,176,000

The Rural Community Advancement Program [RCAP], authorized by the Federal Agriculture Improvement and Reform Act of 1996 (Public Law 104-127), consolidates funding for the following programs: direct and guaranteed water and waste disposal loans, water and waste disposal grants, emergency community water assistance grants, solid waste management grants, direct and guaranteed community facility loans, community facility grants, direct and guaranteed

business and industry loans, rural business enterprise grants, and rural business opportunity grants. This proposal is in accordance with the provisions set forth in the Federal Agriculture Improvement and Reform Act of 1996, Public Law 104-127. Consolidating funding for these 12 rural development loan and grant programs under RCAP provides greater flexibility to tailor financial assistance to applicant needs.

With the exception of the 10 percent in the "National office reserve" account, funding is allocated to rural development State directors for their priority setting on a State-by-State basis. State directors are authorized to transfer not more than 25 percent of the amount in the account that is allocated for the State for the fiscal year to any other account in which amounts are allocated for the State for the fiscal year, with up to 10 percent of funds allowed to be reallocated nationwide.

Community facility loans were created by the Rural Development Act of 1972 to finance a variety of rural community facilities. Loans are made to organizations, including certain Indian tribes and corporations not operated for profit and public and quasi-public agencies, to construct, enlarge, extend, or otherwise improve community facilities providing essential services to rural residents. Such facilities include those providing or supporting overall community development, such as fire and rescue services, health care, transportation, traffic control, and community, social, cultural, and recreational benefits. Loans are made for facilities which primarily serve rural residents of open country and rural towns and villages of not more than 20,000 people. Health care and fire and rescue facilities are the priorities of the program and receive the majority of available funds.

The Community Facility Grant Program authorized in the Federal Agriculture Improvement and Reform Act of 1996 (Public Law 104-127), is used in conjunction with the existing direct and guaranteed loan programs for the development of community facilities, such as hospitals, fire stations, and community centers. Grants are targeted to the lowest income communities. Communities that have lower population and in-

come levels receive a higher cost-share contribution through these grants, to a maximum contribution of 75 percent of the cost of developing the facility.

The Rural Business and Industry Loans Program was created by the Rural Development Act of 1972, and finances a variety of rural industrial development loans. Loans are made for rural industrialization and rural community facilities under Rural Development Act amendments to the Consolidated Farm and Rural Development Act authorities. Business and industrial loans are made to public, private, or cooperative organizations organized for profit, to certain Indian tribes, or to individuals for the purpose of improving, developing or financing business, industry, and employment or improving the economic and environmental climate in rural areas. Such purposes include financing business and industrial acquisition, construction, enlargement, repair or modernization, financing the purchase and development of land, easements, rights-of-way, buildings, payment of startup costs, and supplying working capital. Industrial development loans may be made in any area that is not within the outer boundary of any city having a population of 50,000 or more and its immediately adjacent urbanized and urbanizing areas with a population density of more than 100 persons per square mile. Special consideration for such loans is given to rural areas and cities having a population of less than 25,000.

Rural business enterprise grants were authorized by the Rural Development Act of 1972. Grants are made to public bodies and nonprofit organizations to facilitate development of small and emerging business enterprises in rural areas, including the acquisition and development of land; the construction of buildings, plants, equipment, access streets and roads, parking areas, and utility extensions; refinancing fees; technical assistance; and startup operating costs and working capital.

Rural business opportunity grants are authorized under section 306(a)(11) of the Consolidated Farm and Rural Development Act, as amended. Grants may be made, not to exceed \$1,500,000 annually, to public bodies and private nonprofit community development

corporations or entities. Grants are made to identify and analyze business opportunities that will use local rural economic and human resources; to identify, train, and provide technical assistance to rural entrepreneurs and managers; to establish business support centers; to conduct economic development planning and coordination, and leadership development; and to establish centers for training, technology, and trade that will provide training to rural businesses in the utilization of interactive communications technologies.

The water and waste disposal program is authorized by sections 306, 306A, 309A, 306C, 306D, and 310B of the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq., as amended). This program makes loans for water and waste development costs. Development loans are made to associations, including corporations operating on a nonprofit basis, municipalities and similar organizations, generally designated as public or quasipublic agencies, that propose projects for the development, storage, treatment, purification, and distribution of domestic water or the collection, treatment, or disposal of waste in rural areas. Such grants may not exceed 75 percent of the development cost of the projects and can supplement other funds borrowed or furnished by applicants to pay development costs.

The solid waste grant program is authorized under section 310B(b) of the Consolidated Farm and Rural Development Act. Grants are made to public bodies and private nonprofit organizations to provide technical assistance to local and regional governments for the purpose of reducing or eliminating pollution of water resources and for improving the planning and management of solid waste disposal facilities.

COMMITTEE RECOMMENDATIONS

For the Rural Community Advancement Program [RCAP], the Committee recommends \$867,176,000. This amount is \$60,619,000 more than the fiscal year 2002 level and \$75,677,000 more than the budget request.

The following table provides the Committee's recommendations, as compared to the fiscal year 2002 and budget request levels:

RURAL COMMUNITY ADVANCEMENT PROGRAM [Budget authority in thousands of dollars]

	Fiscal year—		
	2002 appropria- tion	2003 budget request	Committee rec- ommendation
Community:			
Community facility direct loan subsidies	13,545	15,600	15,600
Community facility grants	20,000	17,000	27,000
Economic impact initiative grants	20,000	25,000
High energy costs grants	30,000	30,000
Subtotal, community	83,545	32,600	97,600
Business:			
Business and industry loan subsidies:			
Direct			
Guaranteed	27,400	29,085	35,730
Rural business enterprise grants	41,000	44,000	47,032
Rural business opportunity grants	5,100	3,000	4,000
Department of Energy matching grants	3,000	
Subtotal, business	76,500	76,085	86,762
Utilities:			
Water and waste disposal loan subsidies: Direct	60,497	92,302	92,302
Water and waste disposal grants	582,515	587,012	587,012
Solid waste management grants	3,500	3,500	3,500
Subtotal, utilities	646,512	682,814	682,814
Total, loan subsidies and grants	806,557	791,499	867,176

Rural Community Advancement Program.—The Committee provides the fiscal year 2002 level of funding for transportation technical assistance.

The Committee directs the Department to continue the Rural Economic Area Partnership [REAP] initiative.

The Committee directs that of the \$24,000,000 provided for loans and grants to

benefit Federally Recognized Native American Tribes, \$250,000 be used to implement an American Indian and Alaska Native passenger transportation development and assistance initiative.

Community facility loans and grants.—The Committee is aware of and encourages the Department to give consideration to applications relating to community facilities for structural and other essential needs of the following: The City of Craig's Marine Industrial Park, AK; City of Park Falls, WI; Town of Sunset, LA; Dillingham Dock, AK; Cave City Agricultural Center, Barren County, KY; Rosebud Sioux Tribe Headquarters Facility, South Dakota; USC Salkehatchie Leadership Center, South Carolina; West Baton Rouge Paris Agriculture Facility, Louisiana; Fort Peck Interpretative Center, Montana; Casey County Agricultural Center, Kentucky; Union and Wallowa Counties Rail Line, Oregon; Mashantucket Pequot Tribe, Connecticut; and the Freewoods Farm, South Carolina.

Economic impact initiative grants.—The Committee includes bill language to provide \$25,000,000 for the Rural Community Facilities Grant Program for areas of extreme unemployment or severe economic depression.

High energy cost grants.—The Committee includes bill language to provide \$30,000,000 for the Rural Community Advancement Program for communities with extremely high energy costs which is to be administered by the Rural Utilities Service.

Business and Industry Loan Program.—The Committee encourages the Department to give consideration to applications for rural business opportunity grants (RBOG) from the following: The Menominee Tribal Enterprises, Rural Technical Assistance Program, Iowa; Wisconsin; Missouri Regional Councils; and the Quinebaug-Shetucket Corridor, Connecticut.

Rural business enterprise grants.—The Committee is also aware of and encourages the Department to give consideration to applications for rural business enterprise grants (RBEG) from the following: Agricultural Heritage & Resources, Inc., Wisconsin; The City of Crandon Industrial Park, WI; Louisiana Biobased Technology Development and Commercialization Initiative; Cumberland Valley Milling Cooperative, Kentucky; Value-Added Pork Products, Springfield, KY; Boone-Sang Cooperative Association, Kentucky; Sustainable Woods Cooperative, Wisconsin; Walla Walla Community

College, Washington; Cheyenne River Sioux Tribe Buffalo Jerky Processing Plant, South Dakota; Salem County Storage Facility, New Jersey; Shorebank Enterprise Pacific, Washington; Forest Enterprises Technology Center, Wisconsin; Mission Valley Market, Montana; Grants to Public Broadcasting Systems Programs; Hibbins Technology Business Center, Minnesota; University of Montana Business Incubators; City of Park Hills, MO; South Dakota Public Broadcasting; Business and Technology Extension Program, Oregon; Dairy Value-Added Cheese Manufacturing, Kentucky; Vermont Maple Industry Council; Cape Fox Native Corporation, Alaska; Chesterfield County Industrial Park, South Carolina; Old North State Winegrowers Cooperative Association, North Carolina; and the Power Applications Resource Center at Montana State University-Northern.

The Committee expects the Department to ensure that the system by which applications for rural business enterprise grants are considered does not discriminate against applications which may benefit multiple States.

Water and waste disposal loans and grants.—The Committee is aware of and encourages the Department to consider applications for water and waste disposal loans and grants relating to the following projects: The Chimayo, Bloomfield, Truth or Consequences and Carnuel communities in New Mexico; Tell City Branchville Sewer Line Project, IN; Nashville, AR; Fort Belknap Reservation, MT; Neuse North Carolina Regional Water System; Abbeville County Development Board, South Carolina; South Kona, HI; La Pine County Waste System, Oregon; Connect Peculiar and Raymore Water Systems, Missouri; Lake County Wastewater, Illinois; Port Orford Drinking Water and Sewer District, Oregon; and the Belknap Heights Community Water System, New Hampshire.

The Committee also includes language in the bill to make up to \$30,000,000 in water and waste disposal loans and grants available for village safe water for the development of water systems for rural communities and native villages in Alaska. In addition, the Committee is aware of and encour-

ages the Department to consider applications to the national program from small, regional hub villages in Alaska with a populations less than 5,000 which are not able to compete for village safe water funding; \$20,000,000 for water and waste systems for the colonias along the United States-Mexico border; and \$18,000,000 for water and waste disposal systems for Federally Recognized Native American Tribes. In addition, the Committee makes up to \$12,100,000 available for the circuit rider program of which the \$1,100,000 increase from fiscal year 2002 shall be provided to those States that have the most water and waste needs including coverage of their existing systems.

The Committee encourages the Department to continue working with the city of Blaine, Washington, on water and infrastructure needs and to use existing funds to help with environmental remediation of Semiahmoh.

Water and waste technical assistance training grants.—The Committee encourages the Rural Utilities Service to consider an increase in the grant request from the National Drinking Water of Clearinghouse, for which an increase in this account is provided. The Committee is aware of and encourages the Department to consider applications from the Alaska Village Safe Water Program to provide statewide training in water and waste systems operation and maintenance.

The Committee encourages the Department to consider a pilot program within available funds to offer inspector training and certification program that would include proper well construction, maintenance, sampling, treatment and ensuring the overall safety of private wells in rural areas.

Solid Waste Management Grants.—The Committee is aware of the need for landfill improvements for Point Barrow, Alaska, and urges the Department to give priority consideration for an application for a solid waste management grant.

The Committee expects the Department to consider only those applications judged meritorious when subjected to the established review process.

Total, RD salaries and expenses	600,778	646,773	628,539

¹ Excludes \$38,603,000 requested for employee pension and health benefits.

These funds are used to administer the loan and grant programs of the Rural Utilities Service, the Rural Housing Service, and the Rural Business-Cooperative Service, including reviewing applications, making and collecting loans and providing technical assistance and guidance to borrowers; and to assist in extending other Federal programs to people in rural areas.

Under credit reform, administrative costs associated with loan programs are appropriated to the program accounts. Appropriations to the salaries and expenses account will be for costs associated with grant programs.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$628,539,000 for salaries and expenses for the Rural Economic and Community Development Programs. This amount is \$27,761,000 more than the fiscal year 2002 level and \$18,234,000 less than the budget request.

This amount does not include an increase of \$17,065,000 for rental payments to GSA or \$169,000 for FECA administrative charges, as requested in the budget.

The Committee expects that none of the funds provided for Rural Development, Salaries and Expenses should be used to enter into or renew a contract for any activity that is best suited as an inherent function of Government, without prior approval from the Committees on Appropriations of the

House and Senate. Such activities may include, but are not limited to, any function that affects eligibility determination, disbursement, collection or accounting for Government subsidies provided under any of the direct or guaranteed loan programs of the Rural Development mission area or the Farm Service Agency.

RURAL HOUSING SERVICE

The Rural Housing Service [RHS] was established under Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994, dated October 13, 1994.

The mission of the Service is to improve the quality of life in rural America by assisting rural residents and communities in obtaining adequate and affordable housing and

access to needed community facilities. The goals and objectives of the Service are: (1) facilitate the economic revitalization of rural areas by providing direct and indirect economic benefits to individual borrowers, families, and rural communities; (2) assure that benefits are communicated to all program eligible customers with special outreach efforts to target resources to underserved, impoverished, or economically declining rural areas; (3) lower the cost of programs while retaining the benefits by redesigning more

effective programs that work in partnership with State and local governments and the private sector; and (4) leverage the economic benefits through the use of low-cost credit programs, especially guaranteed loans.

COMMITTEE RECOMMENDATIONS

The Committee recommends total appropriations of \$1,585,266,000 for the Rural Housing Service. This is \$110,789,000 more than the 2002 level and \$56,749,000 more than the budget request.

RURAL HOUSING INSURANCE FUND PROGRAM ACCOUNT

This fund was established in 1965 (Public Law 89-117) pursuant to section 517 of title V of the Housing Act of 1949, as amended. This fund may be used to insure or guarantee rural housing loans for single-family homes, rental and cooperative housing, and rural housing sites. Rural housing loans are made to construct, improve, alter, repair, or replace dwellings and essential farm service buildings that are modest in size, design, and cost. Rental housing insured loans are made to individuals, corporations, associations, trusts, or partnerships to provide moderate-cost rental housing and related facilities for elderly persons in rural areas. These loans

are repayable in not to exceed 30 years. Loan programs are limited to rural areas, which include towns, villages, and other places of not more than 10,000 population, which are not part of an urban area. Loans may also be made in areas with a population in excess of 10,000, but less than 20,000, if the area is not included in a standard metropolitan statistical area and has a serious lack of mortgage credit for low- and moderate-income borrowers.

An increased priority should be placed on long term rehabilitation needs within the existing multi-family housing portfolio including increased equity loan activity and financial and technical assistance support for acquisition of existing projects.

The Committee urges the Department to consider decreasing the guarantee fee in the single family unsubsidized guaranteed program consistent with other Federal housing programs including fees charged for refinancing existing loans.

LOAN SUBSIDY AND ADMINISTRATIVE EXPENSES LEVELS

The Federal Credit Reform Act of 1990 established the program account. Appropriations to this account will be used to cover the lifetime subsidy costs associated with the direct loans obligated and loan guarantees committed in 2002, as well as for administrative expenses. The following table presents the loan subsidy levels as compared to the 2002 levels and the 2003 budget request:

[In thousands of dollars]

	Fiscal year—		
	2002 level	2003 request	Committee recommendation
Loan subsidies:			
Single family (sec. 502):			
Direct	142,108	185,429	194,700
Unsubsidized guaranteed	40,166	19,800	19,800
Housing repair (sec. 504)	10,386	10,857	10,857
Multifamily housing guarantees (sec. 538)	3,921	4,500
Rental housing (sec. 515)	48,274	27,978	55,956
Site loans (sec. 524)	28	55	55
Credit sales of acquired property	750	934	934
Self-help housing land development fund	254	221	221
Total, loan subsidies	245,887	249,774	282,523
Administrative expenses	422,241	455,630	455,630

RENTAL ASSISTANCE PROGRAM

Appropriations, 2002 \$701,004,000
Budget estimate, 2003 712,000,000
Committee recommendation 730,000,000

The Housing and Community Development Act of 1974 established a rural rental assistance program to be administered through the rural housing loans program. The objective of the program is to reduce rents paid by

low-income families living in Rural Housing Service financed rental projects and farm labor housing projects. Under this program, low-income tenants will contribute the higher of: (1) 30 percent of monthly adjusted income; (2) 10 percent of monthly income; or (3) designated housing payments from a welfare agency.

Payments from the fund are made to the project owner for the difference between the

tenant's payment and the approved rental rate established for the unit.

The program is administered in tandem with Rural Housing Service section 515 rural rental and cooperative housing programs and the farm labor loan and grant programs. Priority is given to existing projects for units occupied by rent over burdened low-income families and projects experiencing financial difficulties beyond the control of the owner;

any remaining authority will be used for projects receiving new construction commitments under sections 514, 515, or 516 for very low-income families with certain limitations.

COMMITTEE RECOMMENDATIONS

For rural rental assistance payments, the Committee recommends an appropriation of \$730,000,000. This amount is \$28,996,000 more than the 2002 level and \$18,000,000 more than the budget request.

The Committee provides an increase in this account and expects the Department to provide rental assistance for new construction, servicing and debt forgiveness including offering assistance to units that are occupied by tenants that are rent overburdened and projects experiencing financial difficulties beyond the control of the owner.

MUTUAL AND SELF-HELP HOUSING GRANTS

Appropriations, 2002	\$35,000,000
Budget estimate, 2003	34,000,000
Committee recommendation	35,000,000

This grant program is authorized by title V of the Housing Act of 1949. Grants are made to local organizations to promote the development of mutual or self-help programs under which groups of usually 6 to 10 families build their own homes by mutually exchanging labor. Funds may be used to pay the cost of construction supervisors who will work with families in the construction of their homes and for administrative expenses of the organizations providing the self-help assistance.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$35,000,000 for mutual and self-help housing grants. This is the same as the 2002 level and \$1,000,000 more than the budget request.

RURAL HOUSING ASSISTANCE GRANTS

Appropriations, 2002	\$38,914,000
Budget estimate, 2003	42,498,000
Committee recommendation	47,498,000

This program consolidates funding for rural housing grant programs. This consolidation of housing grant funding provides greater flexibility to tailor financial assistance to applicant needs.

Very low-income housing repair grants.—The Very Low-Income Housing Repair Grants Program is authorized under section 504 of title V of the Housing Act of 1949. The rural housing repair grant program is carried out by making grants to very low-income families to make necessary repairs to their homes in order to make such dwellings safe and sanitary, and remove hazards to the health of the occupants, their families, or the community.

These grants may be made to cover the cost of improvements or additions, such as repairing roofs, providing toilet facilities, providing a convenient and sanitary water supply, supplying screens, repairing or providing structural supports or making similar repairs, additions, or improvements, including all preliminary and installation costs in obtaining central water and sewer service. A grant can be made in combination with a section 504 very low-income housing repair loan.

No assistance can be extended to any one individual in the form of a loan, grant, or combined loans and grants in excess of \$27,500, and grant assistance is limited to persons, or families headed by persons who are 62 years of age or older.

Supervisory and technical assistance grants.—Supervisory and technical assistance grants are made to public and private nonprofit organizations for packaging loan applications for housing assistance under sections 502, 504, 514/516, 515, and 533 of the Housing Act of 1949. The assistance is directed to very low-income families in underserved areas where at least 20 percent of the population is below the poverty level and at least 10 percent or more of the population resides in sub-standard housing. In fiscal year 1994 a Homebuyer Education Program was implemented under this authority. This program provides low-income individuals and families education and counseling on obtaining and/or maintaining occupancy of adequate housing and supervised credit assistance to become successful homeowners.

Compensation for construction defects.—Compensation for construction defects provides funds for grants to eligible section 502 borrowers to correct structural defects, or to pay claims of owners arising from such defects on a newly constructed dwelling pur-

chased with RHS financial assistance. Claims are not paid until provisions under the builder's warranty have been fully pursued. Requests for compensation for construction defects must be made by the owner of the property within 18 months after the date financial assistance was granted.

Rural housing preservation grants.—Rural housing preservation grants (section 522) of the Housing and Urban-Rural Recovery Act of 1983 authorizes the Rural Housing Service to administer a program of home repair directed at low- and very low-income people.

The purpose of the preservation program is to improve the delivery of rehabilitation assistance by employing the expertise of housing organizations at the local level. Eligible applicants will compete on a State-by-State basis for grants funds. These funds may be administered as loans, loan write-downs, or grants to finance home repair. The program will be administered by local grantees.

The Committee is also aware of and encourages the Department to give consideration to applications for rural housing preservation grants from the following. The Campbellsville University of Kentucky Heartland Outreach.

COMMITTEE RECOMMENDATIONS

For the Rural Housing Assistance Grants Program the Committee recommends \$47,498,000. This is \$8,584,000 more than the 2002 level and \$5,000,000 more than the budget request.

The Committee encourages the Secretary to administer the Demonstration Housing Grants for Agriculture Processing Workers through non-profits community based organizations, including cooperatives, and allow grant funding up to 75 percent total development costs for each project awarded. The Department should also require on-site tenant services in the selection criteria. The Committee provided funding for this purpose in fiscal year 2001 and requests that the Department make necessary changes in any notice for available funds from lessons learned.

The following table compares the grant program levels recommended by the Committee to the fiscal year 2002 levels and the budget request:

RURAL HOUSING ASSISTANCE GRANTS

[In thousands of dollars]

	Fiscal year—		Committee recommendation
	2002 level	2003 request	
Very low-income housing repair grants	29,934	31,500	31,500
Supervisory and technical assistance	998	998	998
Rural housing preservation grants	7,982	10,000	10,000
Demonstration housing grants for agriculture processing workers			5,000
Total	38,914	42,498	47,498

FARM LABOR PROGRAM ACCOUNT [In thousands of dollars]

	Loan level	Subsidy level	Grants
Appropriations, 2002	(28,459)	13,464	17,967
Budget estimate, 2003	(36,000)	17,647	16,968
Committee recommendation	(36,000)	17,647	16,968

The direct farm labor housing loan program is authorized under section 514 and the rural housing for domestic farm labor housing grant program is authorized under section 516 of the Housing Act of 1949, as amended. The loans, grants, and contracts are made to public and private nonprofit organizations for low-rent housing and related facilities for domestic farm labor. Grant assistance may not exceed 90 percent of the cost of a project. Loans and grants may be used for construction of new structures, site

acquisition and development, rehabilitation of existing structures, and purchase of furnishings and equipment for dwellings, dining halls, community rooms, and infirmaries.

Under credit reform, administrative costs associated with loan programs are appropriated to the program accounts. Appropriations to the salaries and expenses account will be for costs associated with grant programs.

COMMITTEE RECOMMENDATIONS

For the cost of direct farm labor housing loans and grants, the Committee recommends \$34,615,000. This is \$3,184,000 more than the 2002 level and the same as the budget request.

RURAL BUSINESS-COOPERATIVE SERVICE

The Rural Business-Cooperative Service [RBS] was established by Public Law 103-354, Federal Crop Insurance Reform and Depart-

ment of Agriculture Reorganization Act of 1994, dated October 13, 1994. Its programs were previously administered by the Rural Development Administration, the Rural Electrification Administration, and the Agricultural Cooperative Service.

The mission of the Rural Business-Cooperative Service is to enhance the quality of life for all rural residents by assisting new and existing cooperatives and other businesses through partnership with rural communities. The goals and objectives are to: (1) promote a stable business environment in rural America through financial assistance, sound business planning, technical assistance, appropriate research, education, and information; (2) support environmentally sensitive economic growth that meets the needs of the entire community; and (3) assure that the

Service benefits are available to all segments of the rural community, with emphasis on those most in need.

RURAL DEVELOPMENT LOAN FUND PROGRAM
ACCOUNT
[In thousands of dollars]

	Fiscal year— 2002 level	Committee recommendation 2003 request
Estimated loan level	(38,171)	(40,000)
Direct loan subsidy	16,494	19,304
Administrative expenses	3,733	4,290

The rural development (intermediary lending) loan program was originally authorized by the Economic Opportunity Act of 1964 (Public Law 88-452). The making of rural development loans by the Department of Agriculture was reauthorized by Public Law 99-425, the Human Services Reauthorization Act of 1986.

Loans are made to intermediary borrowers (this is, small investment groups) who in turn will reloan the funds to rural businesses, community development corporations, private nonprofit organizations, public agencies, et cetera, for the purpose of improving business, industry, community facilities, and employment opportunities and diversification of the economy in rural areas.

The Federal Credit Reform Act of 1990 established the program account. Appropriations to this account will be used to cover the lifetime subsidy costs associated with the direct loans obligated in 2003, as well as for administrative expenses.

COST COMMITTEE RECOMMENDATIONS

For rural development (intermediary lending) loans, the Committee recommends a total loan level of \$40,000,000. This is \$1,829,000 more than the 2002 loan level and the same as the budget request.

The Committee encourages the agency to consider the following for intermediary lending loans: The Menominee Tribal Enterprises, Wisconsin; Impact Seven, Inc., Wisconsin; Northern Economic Initiatives Corporation, Michigan; Southern Financial Partners, Arkansas; and the Southwestern Pennsylvania Progress Fund.

RURAL ECONOMIC DEVELOPMENT LOANS
PROGRAM ACCOUNT
[In thousands of dollars]

	Fiscal year— 2002 level	Committee recommendation 2003 request
Estimated loan level	(14,966)	(14,967)
Direct loan subsidy	3,616	3,197

¹ Offset by a rescission from interest on the cushion of credit payments as authorized by section 313 of the Rural Electrification Act of 1936.

The rural economic development loans program was established by the Reconciliation Act of December 1987 (Public Law 100-203), which amended the Rural Electrification Act of 1936, by establishing a new section 313. This section of the Rural Electrification Act (7 U.S.C. 901) established a cushion of credits payment program and created the rural economic development subaccount. The Administrator of RUS is authorized under the act to utilize funds in this program to provide zero interest loans to electric and tele-

communications borrowers for the purpose of promoting rural economic development and job creation projects, including funding for feasibility studies, startup costs, and other reasonable expenses for the purpose of fostering rural economic development.

COST COMMITTEE RECOMMENDATION

The Committee recommends a direct loan subsidy appropriation for rural economic development loans of \$3,197,000. This amount is \$419,000 less than the 2002 level and the same as the budget request. As proposed in the budget, the \$3,197,000 provided is derived by transfer from interest on the cushion of credit payments.

RURAL COOPERATIVE DEVELOPMENT GRANTS

Appropriations, 2002	\$7,750,000
Budget estimate, 2003	9,000,000
Committee recommendation	9,000,000

Rural cooperative development grants are authorized under section 310B(e) of the Consolidated Farm and Rural Development Act, as amended. Grants are made to fund the establishment and operation centers for rural cooperative development with their primary purpose being the improvement of economic conditions in rural areas. Grants may be made to nonprofit institutions or institutions of higher education. Grants may be used to pay up to 75 percent of the cost of the project and associated administrative costs. The applicant must contribute at least 25 percent from non-Federal sources, except 1994 institutions, which only need to provide 5 percent. Grants are competitive and are awarded based on specific selection criteria.

Cooperative research agreements are authorized by 7 U.S.C. 2204b. The funds are used for cooperative research agreements, primarily with colleges and universities, on critical operational, organizational, and structural issues facing cooperatives.

Cooperative agreements are authorized under 7 U.S.C. 2201 to any qualified State departments of agriculture, university, and other State entity to conduct research that will strengthen and enhance the operations of agricultural marketing cooperatives in rural areas.

The Appropriate Technology Transfer for Rural Areas (ATTRA) program was first authorized by the Food Security Act of 1985. The program provides information and technical assistance to agricultural producers to adopt sustainable agricultural practices that are environmentally friendly and lower production costs.

COST COMMITTEE RECOMMENDATIONS

The Committee recommends \$9,000,000 for rural cooperative development grants. This is \$1,250,000 more than the 2002 level and the same as the budget request.

The Committee is aware of and encourages the Department to consider the following applications for cooperative development grants: the Alaska Network Systems for Internet Facilities Mission Valley, Montana; Montana State University-Northern Cooperative Development Center; Mississippi Association of Cooperatives; and a rural cooperative located in Elko, Pershing, and Humboldt Counties, Nevada.

Of the funds provided, \$2,500,000 is provided for the Appropriate Technology Transfer for

Rural Areas program through a cooperative agreement with the National Center for Appropriate Technology.

The Committee has included language in the bill that not more than \$1,500,000 shall be made available to cooperatives or associations of cooperatives whose primary focus is to provide assistance to small, minority producers.

RURAL EMPOWERMENT ZONES AND ENTERPRISE COMMUNITIES GRANTS

Appropriations, 2002	\$14,967,000
Budget estimate, 2003
Committee recommendation	14,967,000

COST COMMITTEE RECOMMENDATIONS

The Committee recommends \$14,967,000 for Rural Empowerment Zones and Enterprise Communities Grants. This amount is the same as the 2002 level and \$14,967,000 more than the budget request.

RURAL UTILITIES SERVICE

The Rural Utilities Service [RUS] was established under the Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (Public Law 103-354), October 13, 1994. RUS administers the electric and telephone programs of the former Rural Electrification Administration and the water and waste programs of the former Rural Development Administration.

The mission of the RUS is to serve a leading role in improving the quality of life in rural America by administering its electric, telecommunications, and water and waste programs in a service oriented, forward looking, and financially responsible manner. All three programs have the common goal of modernizing and revitalizing rural communities. RUS provides funding and support service for utilities serving rural areas. The public-private partnerships established by RUS and local utilities assist rural communities in modernizing local infrastructure. RUS programs are also characterized by the substantial amount of private investment which is leveraged by the public funds invested into infrastructure and technology, resulting in the creation of new sources of employment.

RURAL ELECTRIFICATION AND TELECOMMUNICATIONS LOANS PROGRAM ACCOUNT

The Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) provides the statutory authority for the electric and telecommunications programs.

The Federal Credit Reform Act of 1990 established the program account. An appropriation to this account will be used to cover the lifetime subsidy costs associated with the direct loans obligated and loan guarantees committed in 2003, as well as for administrative expenses.

COST COMMITTEE RECOMMENDATIONS

The following table reflects the Committee's recommendation for the "Rural electrification and telecommunications loans program" account, the loan subsidy and administrative expenses, as compared to the fiscal year 2002 and budget request levels:

	[In thousands of dollars]		
	Fiscal year— 2002 level	2003 request	Committee recommendation

RURAL TELEPHONE BANK PROGRAM ACCOUNT [In thousands of dollars]

	Loan level	Direct loan subsidy	Administrative expenses
Appropriations, 2002	(174,615)	3,737	3,082
Budget estimate, 2003			3,082
Committee recommendation ..	(174,615)	2,410	3,082

The Rural Telephone Bank [RTB] is required by law to begin privatization (repurchase of federally owned stock) in fiscal year 1996. RTB borrowers are able to borrow at private market rates and no longer require Federal assistance.

The Rural Telephone Bank is managed by a 13-member board of directors. The Administrator of RUS serves as Governor of the Bank until conversion to private ownership, control, and operation. This will take place when 51 percent of the class A stock issued to the United States and outstanding at any time after September 30, 1996, has been fully redeemed and retired. Activities of the Bank are carried out by RUS employees and the Office of the General Counsel of the U.S. Department of Agriculture.

The Federal Credit Reform Act of 1990 established the program account. Appropriations to this account will be used to cover the lifetime subsidy costs associated with the direct loans obligated in 2003, as well as for administrative expenses.

COMMITTEE RECOMMENDATIONS

The Committee recommends \$2,410,000 which supports a loan level of \$174,615,000. This amount is \$1,327,000 less than the 2002 level and \$2,410,000 more than the budget request.

DISTANCE LEARNING AND TELEMEDICINE PROGRAM LOANS AND GRANTS [In thousands of dollars]

	Fiscal year—		Committee recommendation
	2002 level	2003 request	
Distance learning and telemedicine direct loan	(300,000)	(50,000)	(50,000)
Broadband telecommunications direct loans	(80,000)	(79,535)	(79,535)
Direct loan subsidy ¹	4,104	4,104	
Grants	49,441	26,945	47,837
Total Budget Authority	49,441	31,049	51,941

¹Negative subsidy rate for fiscal year 2002 is calculated for this program.

The Distance Learning and Telemedicine Program is authorized by the Food, Agriculture, Conservation and Trade Act of 1990 (104 Stat. 4017, 7 U.S.C. 950aaa et seq.), as amended by the Federal Agriculture Improvement and Reform Act of 1996. This program provides incentives to improve the quality of phone services, to provide access to advanced telecommunications services and computer networks, and to improve rural opportunities.

This program provides the facilities and equipment to link rural education and medical facilities with more urban centers and other facilities providing rural residents access to better health care through technology and increasing educational opportunities for rural students. These funds are available for loans and grants.

COMMITTEE RECOMMENDATIONS

For the Distance Learning and Telemedicine Program, the Committee recommends \$51,941,000. This amount is \$2,500,000 more than the 2002 level and \$20,892,000 more than the budget request.

The Committee is aware that public television stations are facing a deadline of May, 2003 to meet the Federal Communications Commission's mandate to broadcast digital television signals and understands the difficulty that many stations will incur in meeting that deadline. Of the funds provided for Distance Learning and Telemedicine, the

Committee has provided \$15,000,000 in grants for public broadcasting systems to meet this goal.

In addition, of the funds provided, \$10,000,000 in grants shall be made available to support broadband transmission and local dial-up Internet services for rural areas. The Department should continue to provide financial support in addition to the Distance Learning and Telemedicine grant and loan accounts.

The Committee is aware of and encourages the Department to give consideration to the following applications for grants and loans: The Lakeshore Technical College, Wisconsin; Alaska Federal Health Care Access Network; South Dakota Community Healthcare Association's Integrated Management Information System; Kentucky Telehealth Network; Maui Community College Sky Bridge Interactive Television Network, Hawaii; Farm Resource Center, Illinois; Montana Agriculture Knowledge Network; Lane County, OR; Fresno Community Medical Centers, California; City of Jackson, TN; Troy State Alabama Technology Network; Huntington College, Alabama; and the Educational Services District 105, Washington.

The Committee encourages the Department to fund a demonstration project to build upon existing resources and to further the use of advanced telecommunications by rural communities.

TITLE IV—DOMESTIC FOOD PROGRAMS OFFICE OF THE UNDER SECRETARY FOR FOOD, NUTRITION AND CONSUMER SERVICES

Appropriations, 2002	\$587,000
Budget estimate, 2003 ¹	774,000
Committee recommendation	774,000

¹Excludes \$23,000 requested for employee pension and health benefits.

The Office of the Under Secretary for Food, Nutrition and Consumer Services provides direction and coordination in carrying out the laws enacted by the Congress with respect to the Department's food and consumer activities. The Office has oversight and management responsibilities for the Food and Nutrition Service.

COMMITTEE RECOMMENDATIONS

For the Office of the Under Secretary for Food, Nutrition and Consumer Services, the Committee recommends an appropriation of \$774,000. This amount is \$187,000 more than the 2002 level and the same as the budget request.

The Committee remains aware of innovative work in Wisconsin and Iowa making milk available through school vending machines as an alternative to other beverages. In 2002, the Under Secretary was directed to examine the merits of these experiments and their potential to improve child health and nutrition. Based upon that information, the Under Secretary is now directed to expand these efforts as pilot programs in these States.

The Committee is aware of the benefits of programs such as the WIC and Senior Farmers' Market Nutrition Programs, which improve nutrition among low-income mothers, children and senior citizens by giving them access to locally grown fresh fruits and vegetables. The Committee also recognizes the benefits these and all farmers' markets provide for local farmers. Therefore, the Committee directs the Under Secretary to work with the Under Secretary for Marketing and Regulatory Programs to study the potential for a broad Farmers' Market Program within the Agricultural Marketing Service, which would encompass the WIC Farmers' Market Nutrition Program, the Senior Farmers' Market Nutrition Program, and the recently authorized Farmers' Market Promotion Program. The Committee requests a report on the potential of such a program, including cost estimates, by March 1, 2003.

The Committee is alarmed at the level of obesity in this country, and the health-related problems this causes. It has been recently reported that over 300,000 Americans die each year from obesity-related causes, and the economic costs of these illnesses is significant. The FNS mission area is directed to help Americans follow the Dietary Guidelines, including guidelines urging Americans to "aim for a healthy weight" and "be physically active." The Committee is pleased that FNS is currently planning specific program directions and activities for "Breaking the Barriers: Practical Approaches to Improve Americans' Eating Behaviors," an initiative that will focus on changing Americans' eating behaviors and exercise patterns, and encourages FNS to continue these activities.

Further, the Committee is aware that the administration is developing its Healthier U.S. Initiative, promoting nutritious diets, physical activity, preventative screenings, and healthy lifestyles as means to combat increasing obesity and diabetes rates, particularly among children. The Committee is encouraged by this approach, and believes that a media component, including in-school educational networks, would be an effective part of this initiative.

FOOD AND NUTRITION SERVICE

The Food and Nutrition Service represents an organizational effort to eliminate hunger and malnutrition in this country. Nutrition assistance programs provide access to a nutritionally adequate diet for families and persons with low incomes and encourage better eating patterns among the Nation's children. These programs include:

Child Nutrition Programs.—The National School Lunch and School Breakfast, Summer Food Service, and Child and Adult Care Food programs provide funding to the States, Puerto Rico, the Virgin Islands, and Guam for use in serving nutritious lunches and breakfasts to children attending schools of high school grades and under, to children of preschool age in child care centers, and to

children in other institutions in order to improve the health and well-being of the Nation's children, and broaden the markets for agricultural food commodities. Through the Special Milk Program, assistance is provided to the States for making reimbursement payments to eligible schools and child care institutions which institute or expand milk service in order to increase the consumption of fluid milk by children. Funds for this program are provided by direct appropriation and transfer from section 32.

Special Supplemental Nutrition Program for Women, Infants, and Children [WIC].—This program safeguards the health of pregnant, post partum, and breast-feeding women, infants, and children up to age 5 who are at nutritional risk because of inadequate nutrition and income by providing supplemental foods. The delivery of supplemental foods may be done through health clinics, vouchers redeemable at retail food stores, or other approved methods which a cooperating State health agency may select. Funds for this program are provided by direct appropriation.

Food Stamp Program.—This program seeks to improve nutritional standards of needy persons and families. Assistance is provided to eligible households to enable them to obtain a better diet by increasing their food purchasing capability, usually by furnishing benefits in the form of electronic access to funds. The program also includes Nutrition Assistance to Puerto Rico. The Farm Security and Rural Investment Act of 2002 (Public Law 107-171) authorizes block grants for Nutrition Assistance to Puerto Rico and American Samoa, which provide broad flexibility in establishing nutrition assistance programs specifically tailored to the needs of their low-income households.

The program also includes the Food Distribution Program on Indian Reservations which provides nutritious agricultural commodities to low-income persons living on or near Indian reservations who choose not to participate in the Food Stamp Program.

The Farm Security and Rural Investment Act of 2002, Public Law 107-171, enacted May 13, 2002, provides that \$140,000,000 from funds appropriated in the Food Stamp account be used to purchase commodities for The Emergency Food Assistance Program.

Commodity Assistance Program [CAP].—This program provides funding for the Commodity Supplemental Food Program [CSFP], and administrative expenses for The Emergency Food Assistance Program [TEFAP].

CSFP provides supplemental foods to infants and children up to age 6, and to pregnant, post partum, and breast-feeding women with low incomes, and who reside in approved project areas. In addition, this program operates commodity distribution projects directed at low-income elderly persons.

TEFAP provides commodities and grant funds to State agencies to assist in the cost of storage and distribution of donated commodities. The Soup Kitchen/Food Bank Program was absorbed into TEFAP under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104-193), by an amendment to section 201A of the Emergency Food Assistance Act.

Food Donations Programs.—Nutritious agricultural commodities are provided to residents of the Federated States of Micronesia and the Marshall Islands. Cash assistance is provided to distributing agencies to assist them in meeting administrative expenses incurred. It also provides funding for use in non-Presidentially declared disasters, and for FNS' administrative costs in connection with relief for all disasters. Funds for this program are provided by direct appropriation.

Food Program Administration.—Most salaries and Federal operating expenses of the Food and Nutrition Service are funded from this account. Also included is the Center for Nutrition Policy and Promotion [CNPP] which oversees improvements in and revisions to the food and guidance systems, and serves as the focal point for advancing and coordinating nutrition promotion and education policy to improve the health of all Americans. As of September 30, 2001, there were 1,504 full-time permanent and 72 part-time and temporary employees in the agency. FNS's headquarters staff, which is located in Alexandria, VA, totals 555, and 1,021 FNS employees are located in the field. There are 7 regional offices employing 637 employees, and the balance of the agency is located in 4 food stamp compliance offices, 1 computer support center in Minneapolis, MN, 1 administrative review office, and 69 field offices. Funds for this program are provided by direct appropriation.

CHILD NUTRITION PROGRAMS

[In thousands of dollars]

	Appropriation	Section 32 transfers	Total
Appropriations, 2002	4,914,788	5,172,458	10,087,246
Budget estimate, 2003 ¹	5,382,179	5,193,990	10,576,169
Committee recommendation	5,834,506	4,745,663	10,580,169

¹ Excludes \$553,000 requested for employee pension and health benefits.

The Child Nutrition Programs, authorized by the Richard B. Russell National School Lunch Act and the Child Nutrition Act of 1966, provide Federal assistance to State agencies in the form of cash and commodities for use in preparing and serving nutritious meals to children while they are attending school, residing in service institutions, or participating in other organized activities away from home. The purpose of these programs is to help maintain the health and proper physical development of America's children. Milk is provided to children either free or at a low cost, depending on their family income level. FNS provides cash subsidies to States administering the programs and directly administers the program in the States which choose not to do so. Grants are also made for nutritional training and surveys and for State administrative expenses. Under current law, most of these payments are made on the basis of reimbursement rates established by law and applied to lunches and breakfasts actually served by the States. The reimbursement rates are adjusted annually to reflect changes in the Consumer Price Index for food away from home.

The William F. Goodling Child Nutrition Reauthorization Act of 1998, Public Law 105-336, contains a number of child nutrition provisions. These include:

Summer Food Service Program [SFSP].—Reauthorizes the program through 2003 and relaxes the site limitations for private nonprofit sponsors in SFSP.

Child and Adult Care Food Program [CACFP].—Permanently authorizes payments for snacks provided to children through age 18 in after-school programs, and provides funds for demonstration projects to expand services to homeless children and family day care homes in low-income areas. On July 1, 1999, the Homeless Child Nutrition Program and the Homeless Summer Food Service Program was transferred into the CACFP.

National School Lunch Program [NSLP].—(1) Significantly expands reimbursement for snacks for children up to age 18 in after-school care programs; (2) provides for free snacks in needy areas; and (3) requires participating schools to obtain a food safety inspection conducted by a State or local agency.

A description of Child Nutrition Programs follows:

1. Cash payments to States.—The programs are operated under an agreement entered into by the State agencies and the Department. Funds are made available under letters of credit to State agencies for use in reimbursing participating schools and other institutions. Sponsors apply to the State agencies, and if approved, are reimbursed on a per-meal basis in accordance with the terms of their agreements and rates prescribed by law. The reimbursement rates are adjusted annually to reflect changes in the Consumer Price Index for food away from home.

(a) *School Lunch Program.*—Assistance is provided to the States for the service of lunches to all school children, regardless of family income. States must match some of the Federal cash grant. In fiscal year 2003, the School Lunch Program will provide assistance for serving an estimated 4.8 billion school lunches including 2.0 billion for children from upper-income families and 2.8 billion for children from lower and low-income families. An estimated 28.4 million children are expected to participate in the program daily during the school year.

(b) *Special assistance for free and reduced-price lunches.*—Additional assistance is provided to the States for serving lunches free or at a reduced price to needy children. In fiscal year 2003, under current law, the program will provide assistance for about 2.8 billion lunches, of which 2.4 billion will be served free of charge and 0.4 billion at reduced price. About 17 million needy children will participate in the program on an average school day during the year.

(c) *School Breakfast Program.*—Federal reimbursement to the States is based on the number of breakfasts served free, at a reduced price, or at the general rate for those served to nonneedy children. Certain schools are designated in severe need because, in the

second preceding year, they served at least 40 percent of their lunches at free or reduced prices and because the regular breakfast reimbursement is insufficient to cover cost. These schools receive higher rates of reimbursement in both the free and reduced-price categories. In fiscal year 2003, the program will serve an estimated 1.4 billion breakfasts to a daily average of 8.3 million children.

(d) *State administrative expenses.*—The funds may be used for State employee salaries, benefits, support services, and office equipment. Public Law 95-627 made the State administrative expenses grant equal to 1.5 percent of certain Federal payments in the second previous year. In fiscal year 2003, \$133,583,000 will be allocated among the States to fund ongoing State administrative expenses and to improve the management of various nutrition programs.

(e) *Summer Food Service Program.*—Meals served free to children in low-income neighborhoods during the summer months are supported on a performance basis by Federal cash subsidies to State agencies. Funds are also provided for related State and local administrative expenses. During the summer of 2003, approximately 153.3 million meals will be served.

(f) *Child and Adult Care Food Program.*—Preschool children receive year-round food assistance in nonprofit child care centers and family and group day care homes under this program. Public Law 97-35 permits profitmaking child care centers receiving compensation under title XX of the Social Security Act to participate in the program if 25 percent of the children served are title XX participants. Certain adult day care centers are also eligible for participation in this program, providing subsidized meals to non-impaired individuals age 60 years or older. The Child and Adult Care Food Program reimburses State agencies at varying rates for

breakfasts, lunches, suppers, and meal supplements and for program-related State audit expenses. In fiscal year 2003, approximately 1.8 billion meals will be served.

2. *Commodity procurement.*—Commodities are purchased for distribution to the school lunch, child care food, and summer food service programs. The minimum commodity support rate for all school lunch and child care center lunches and suppers served is mandated by law and adjusted annually on July 1 to reflect changes in the producer price index for food used in schools and institutions. The commodities purchased with these funds are supplemented by commodities purchased with section 32 funds.

3. *Nutrition studies and education.*—The National Food Service Management Institute provides instruction for educators and school food service personnel in nutrition and food service management.

4. *Special milk.*—In fiscal year 2003, approximately 116.1 million half-pints will be served in the Special Milk Program. These include about 111.2 million half-pints served to children whose family income is above 130 percent of poverty. During fiscal year 2003, the average full cost reimbursement for milk served to needy children is expected to be 18.1 cents for each half-pint. Milk served to nonneedy children is expected to be reimbursed at 14.0 cents for each half-pint.

COMMITTEE RECOMMENDATIONS

For the child nutrition programs, the Committee recommends an appropriation of \$5,834,506,000, plus transfers from section 32 of \$4,745,663,000, for a total program of \$10,580,169,000. This amount is \$492,923,000 more than the 2002 level and \$4,000,000 more than the budget request.

The Committee's recommendation provides for the following annual rates for the child nutrition programs.

TOTAL OBLIGATIONAL AUTHORITY

[In thousands of dollars]

Child nutrition programs ¹	2002 estimate	2003 budget	Committee recommendation
School Lunch Program	5,842,358	6,074,648	6,074,648
School Breakfast Program	1,574,654	1,660,870	1,660,870
State administrative expenses	126,853	133,583	133,583
Summer Food Service Program	311,897	334,686	334,686
Child and Adult Care Food Program	1,799,735	1,904,494	1,904,494
Special Milk Program	16,891	16,449	16,449
Commodity procurement, processing, and computer support	398,362	435,334	435,334
Coordinated review system	4,507	5,080	5,080

Food safety education	1,998	1,000	1,000
School Breakfast Grant Startup Program	500	3,300
Common Roots Program	200
Child Nutrition Archive Resource Center	500

¹ Includes studies and evaluations.

The Committee provides \$10,025,000 for TEAM nutrition. Included in this amount is \$4,000,000 for food service training grants to States; \$1,600,000 for technical assistance materials; \$800,000 for National Food Service Management Institute cooperative agreements; \$400,000 for print and electronic food service resource systems; and \$3,225,000 for other activities.

Of the amount provided, no more than \$3,195,000 is available for studies and evaluations. Of these funds, no more than \$500,000 may be transferred to the Economic Research Service if determined by the Secretary. The Committee expects to be notified each time that such a transfer of funds occurs, including the amount of the transfer, and a summary of the study for which the transfer was deemed necessary. The Committee also requests a report within 60 days of the enactment of this Act summarizing all studies and evaluations planned by FNS for fiscal year 2003.

The Committee expects FNS to utilize the National Food Service Management Insti-

tute to carry out the food safety education program.

The Committee is aware of a survey taken in Wisconsin studying the effects of the School Breakfast Program startup grants. In schools that have received a startup grant, approximately 66 percent of teachers indicated they have observed positive benefits of instituting a school breakfast program. Benefits included "increased learning readiness," "increased socialization," and "improved student behavior." Therefore, the Committee provides \$3,300,000 to continue the School Breakfast Startup Grant Program in order to help cover appropriate costs associated with the program and to expand the availability of school breakfasts for children. Of these funds, no less than \$1,000,000 is to be directed to the State of Wisconsin, up to \$175,000 of which shall be available for administrative costs related to program outreach and expansion. The balance of funds is to be directed to no less than five States that have had a significantly lower percentage of participation in the School Breakfast

Program than the national average over the past 3 years.

The Committee provides \$200,000 to Food Works of Vermont for the Common Roots program. This program integrates school gardens into the curriculum in order to encourage students to learn about and appreciate our agrarian and cultural heritage, and to provide interesting, hands-on instruction in a variety of classes including math, biology, science and social studies. The program also coordinates with other programs that are offered as a way to increase community involvement in the free summer lunch program and integrate fresh foods into the lunches served through this program.

The Committee provides \$500,000, available for 2 years, to establish a Child Nutrition Archive Resource Center at the National Food Service Management Institute.

The Committee continues a general provision in the bill to expand the number of low-income children in child care centers that receive nutritious meals through the Child and Adult Care Food Program. This language

eliminates the outdated requirement that eligible children receive Title 20 funds in order to receive the CACFP meal subsidy. This would allow proprietary centers to participate in CACFP if at least 25 percent of the children they serve are eligible for a free or reduced price meal.

The Committee also encourages States to conduct outreach to recruit new providers into the CACFP program through the 25 percent free or reduced price meal eligibility criteria option. The Committee recognizes the value that pooling has played in increasing participation in the CACFP program. Under current law, which provides two options of participation, States are encouraged to use this flexibility to maximize participation until the 25 percent free or reduced-price meal eligibility criteria is made permanent.

The Committee believes that while there are many beneficial programs to feed low-income children throughout the school year, such as the National School Lunch Program and the School Breakfast Program, there are significantly fewer opportunities for low-income children to receive balanced meals during the summer months. One such opportunity exists as part of the Federal Summer Food Service Program (SFSP). This program provides free, nutritious meals and snacks to help children in low-income areas receive the nutrition they need throughout the summer months. The benefits of SFSP are multiple: not only does SFSP provide children with a healthy meal, many of the approved SFSP sponsors include school districts, local government agencies, or camps that provide programming for recreational and educational opportunities that foster learning throughout the summer months while parents are working. However, SFSP is currently underutilized. According to a recent report, for every 100 children who receive a free or reduced-price lunch during the regular school year, only 21.1 children receive meals during the summer.

The Committee is aware that in 2000, a pilot program was introduced that allowed 13 states to improve their use of SFSP by simplifying cost accounting requirements for some sponsors, reducing paperwork, and allowing for a modestly higher reimbursement for meals and snacks provided under SFSP. In these pilot states, SFSP participation increased by 8.9 percent between July 2000 and July 2001. The Committee believes it would be beneficial to expand this pilot program to all 50 States and recommends that this program be considered during the Child Nutrition Act reauthorization in 2003.

SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN [WIC]	
Appropriations, 2002 ¹	\$4,348,000,000
Budget estimate, 2003	4,751,000,000
Committee recommendation	4,751,000,000

¹ Excludes \$39,000,000 in emergency supplemental appropriations provided by Public Law 107-117.

The special supplemental nutrition program for women, infants, and children [WIC] is authorized by section 17 of the Child Nutrition Act of 1966. Its purpose is to safeguard the health of pregnant, breast-feeding and post partum women and infants, and children up to age 5 who are at nutritional risk because of inadequate nutrition and inadequate income. The budget estimate assumes an average monthly participation of 7.8 million participants at an average food cost of \$35.86 per person per month in fiscal year 2003.

The WIC program food packages are designed to provide foods which studies have demonstrated are lacking in the diets of the WIC program target population. The author-

ized supplemental foods are iron-fortified breakfast cereal, fruit or vegetable juice which contains vitamin C, dry beans, peas, and peanut butter.

There are three general types of delivery systems for WIC foods: (1) retail purchase in which participants obtain supplemental foods through retail stores; (2) home delivery systems in which food is delivered to the participant's home; and (3) direct distribution systems in which participants pick up food from a distribution outlet. The food is free of charge to all participants.

The William F. Goodling Child Nutrition Reauthorization Act of 1998, Public Law 105-336, reauthorizes the program through 2003 and adds several provisions to the program. For example, the Act requires that an individual seeking certification or recertification in the program must provide documentation of family income. In addition, the Act permits State agencies to award infant formula rebate contracts to the bidder offering the lowest net wholesale price, unless the State agency demonstrates to the satisfaction of the Secretary that the weighted average retail price for different brands of formula in that State does not vary by more than 5 percent.

Public Law 105-336 also includes many provisions to improve retailer integrity and help to prevent fraud, waste and abuse in the program.

The WIC Farmers' Market Nutrition Program [FMNP] is also funded from the WIC appropriation, and in fiscal year 2002 will receive Commodity Credit Corporation funds as authorized by the Farm Security and Rural Investment Act of 2002. FMNP is designed to accomplish two major goals: (1) to improve the diets of WIC (or WIC-eligible) participants by providing them with coupons to purchase fresh, nutritious, unprepared food, such as fruits and vegetables, from farmers markets; and (2) to increase the awareness and use of farmers' markets by low-income households. Although directly related to the WIC Program, about one-half of the current FMNP operations are administered by State departments of agriculture rather than the State WIC agencies.

COMMITTEE RECOMMENDATIONS

For the Special Supplemental Food Program for Women, Infants, and Children [WIC], the Committee recommends an appropriation of \$4,751,000,000. This amount is \$403,000,000 more than the 2002 appropriation and the same as the budget request.

The Committee is aware that in recent years, the WIC Program has increasingly been in need of supplemental appropriations throughout the fiscal year due to unexpected economic changes that have resulted in higher participation, higher food costs, and other increased needs. The Committee realizes the difficulty in providing the highest level of service to WIC recipients when there is uncertainty whether or not the necessary amount of funding will be available throughout the entire fiscal year, and this uncertainty could potentially result in low-income mothers and children being turned away from this extraordinarily successful and beneficial program. Therefore, the Committee provides a WIC funding reserve of \$125,000,000, to become available when the Secretary deems necessary.

The Committee is aware that the WIC Farmers' Market Program provides fresh fruits and vegetables to low income mothers and children, benefiting not only WIC participants, but local farmers as well. Therefore, the Committee provides \$25,000,000 for the WIC Farmers' Market Nutrition Program, and directs the Secretary to obligate these funds within 45 days.

The Committee also provides \$14,000,000 for infrastructure funding, and \$2,000,000 for a study of WIC vendor practices.

The Committee is concerned that the proposed rules to revise the regulations governing the WIC food packages have not yet been published. The Committee notes that the WIC food package has changed little since 1974. In the past decade, USDA has twice solicited comments, in 1994 and 1998, on a draft policy on food substitutions to accommodate food preferences and ethnic cultural eating patterns. However, the Department has not moved forward with the development of a WIC food package that responds to the needs of the culturally sensitive populations WIC serves and with comprehensive revisions in the overall food package rule to ensure consistency with the Dietary Guidelines for Americans and USDA's Food Guide Pyramid. The Committee expects the Department to immediately publish for public comment a proposed food package rule responding to these needs and to report quarterly to the Committee regarding the status of the proposal's publication and the review of comments until a final rule is published.

The Committee notes that Federal regulations set a maximum amount for infant formula to be issued to WIC participants each month at a rate of 8 lbs. of powdered formula, or 403 fluid ounces of concentrated liquid formula. Infant formula manufacturers offer powdered formula in a variety of can sizes, which they change periodically. Because the maximum amount can't be exceeded and because the powdered can size variations rarely exactly match the authorized amount, WIC clients may be provided less formula than they are authorized to receive. The Committee strongly encourages the Department to change WIC regulations to allow State WIC agencies to round up to the next whole can size of infant formula to ensure that all infants receive at least 8 lbs. or 128 ounces of powdered infant formula, or 944 reconstituted fluid ounces, at standard dilution, per month.

While the Committee continues to support and encourage State and local agency efforts to utilize WIC as an important means of participation referral to other health care services, it also continues to recognize the constraints that WIC programs are experiencing as a result of expanding health care priorities and continuing demand for core WIC program activities. The Committee wishes to clarify that while WIC plays an important role in screening and referral to other health care services, it was never the Committee's intention that WIC should perform aggressive screening, referral and assessment functions in such a manner that supplants the responsibilities of other programs, nor was it the Committee's intention that WIC State and local agencies should assume the burden of entering into and negotiating appropriate cost sharing agreements. The Committee again includes language in the bill to preserve WIC funding for WIC services authorized by law to ensure that WIC funds are not used to pay the expenses or to coordinate operations or activities other than those allowable pursuant to section 17 of the Child Nutrition Act of 1996, unless fully reimbursed by the appropriate Federal agency. Within the context of authorized activities, the Committee notes an Executive Memorandum issued by the President on December 11, 2000, on the subject of improving immunization rates for children at risk. The Committee supports the goal of the Executive Memorandum, but remains concerned that the delivery of core WIC objectives may suffer without properly shared responsibilities and resources from other agencies.

[In thousands of dollars]

	Expenses ¹	Amount in reserve	Puerto Rico	TEFAP commodity purchases	Total
Appropriations, 2002	19,556,436	2,000,000	1,335,550	100,000	22,967,986
Budget estimate, 2003 ³	22,772,692	2,000,000	1,377,000	100,000	26,249,692
Committee recommendation ⁴	22,772,692	2,000,000	1,377,000	140,000	26,289,692

¹ Including studies and evaluations.² Includes \$24,000,000 rescission pursuant to Public Law 107-206.³ Excludes \$281,000 requested for employee pension and health benefits.⁴ Includes an additional \$40,000,000 for TEFAP Commodity Purchases provided by the Farm Security and Rural Investment Act of 2002.

The Food Stamp Program, authorized by the Food Stamp Act of 1964, attempts to alleviate hunger and malnutrition among low-income persons by increasing their food purchasing power. Eligible households receive food stamp benefits with which they can purchase food through regular retail stores. They are thus enabled to obtain a more nutritious diet than would be possible without food stamp assistance. The Farm Security and Rural Investment Act of 2002, Public Law 107-171, enacted May 13, 2002, reauthorizes the Food Stamp Program through fiscal year 2007.

The Food Stamp Program is currently in operation in all 50 States, the District of Columbia, the Virgin Islands, and Guam. Participating households receive food benefits, the value of which is determined by household size and income. The cost of the benefits is paid by the Federal Government. As required by law, the Food and Nutrition Service annually revises household stamp allotments to reflect changes in the cost of the thrifty food plan. The last revision was made on October 1, 2001.

At the authorized retail store, the recipient presents his/her card and enters a unique personal identification number into a terminal that debits the household's account for the amount of purchases. Federal funds are shifted from the Federal Reserve to the EBT processor's financial institution so that it may reimburse the grocer's account for the amount of purchases. The grocer's account at a designated bank is credited for the amount of purchases. The associated benefit cost is accounted for in the same manner as those benefit costs that result from issuance of coupons.

As of September 30, 2001, 40 EBT projects were operating Statewide in: Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, Wisconsin and Wyoming. EBT is also operating in part of California, Indiana, and Iowa. All other States are in some stage of planning EBT implementation. Puerto Rico has implemented an EBT system that operates island-wide. Welfare reform mandates EBT for all States by October 2002. Under this system, each recipient household is issued a plastic benefit card with a magnetic strip or computer chip to make food purchases. Neither cash nor food coupons are involved.

Nutrition Assistance to Puerto Rico.—The Farm Security and Rural Investment Act of 2002, Public Law 107-171, authorized block grants for Nutrition Assistance to Puerto Rico and American Samoa which gives the Commonwealth broad flexibility to establish a nutrition assistance program that is specifically tailored to the needs of its low-income households. However, the Commonwealth must submit its annual plan of operation to the Secretary for approval. The

Farm Security and Rural Investment Act of 2002, Public Law 107-171, enacted May 13, 2002, reauthorizes appropriations through fiscal year 2007. In addition to the provision of direct benefits to the needy, a portion of the grant may be used to fund up to 50 percent of the cost of administering the program. The grant may also be used to fund projects to improve agriculture and food distribution in Puerto Rico.

The program also includes the Food Distribution Program on Indian Reservations which provides nutritious agricultural commodities to low-income persons living on or near Indian reservations who choose not to participate in the Food Stamp Program.

Effective October 1, 2001, The Farm Security and Rural Investment Act of 2002, Public Law, 107-171, enacted May 13, 2002, provides that \$140,000,000 be used to purchase commodities for the Emergency Food Assistance Program.

Administrative costs.—All direct and indirect administrative costs incurred for certification of households, issuance of food coupons, quality control, outreach, and fair hearing efforts are shared by the Federal Government and the States on a 50-50 basis. The Farm Security and Rural Investment Act of 2002, (Public Law 107-171), substantially revised the performance requirements for States under the Quality Control (QC) System. States with poor performance over 2 years will face sanctions. States that demonstrate a high degree of accuracy or substantial improvement in their degree of accuracy under the QC system will be eligible to share in a \$48,000,000 "bonus fund" established by Congress to reward States for good performance. The new system begins in fiscal year 2003 for measuring performance, and in fiscal year 2004 the new funding begins.

State administration also includes State anti-fraud activities.—Under the provisions of the Food Stamp Act of 1977, as amended by the Mickey Leland Childhood Hunger Relief Act of 1993, States are eligible to be reimbursed for 50 percent of the costs of their food stamp fraud investigations and prosecutions.

States are required to implement an employment and training program for the purpose of assisting members of households participating in the Food Stamp Program in gaining skills, training, or experience that will increase their ability to obtain regular employment. In fiscal year 1987, the Department of Agriculture implemented a grant program to States to assist them in providing employment and training services.

COMMITTEE RECOMMENDATIONS

For the Food Stamp Program, the Committee recommends \$26,289,692,000. This is \$3,321,706,000 more than the 2002 appropriation level and \$40,000,000 more than the budget request. Of the amount provided, \$2,000,000,000 is made available as a contingency reserve. This is the same as the 2002 contingency reserve level and the budget request.

Of the amount provided, no more than \$5,000,000 may be used for studies and evaluations. Of these funds, no more than \$1,500,000 may be transferred to the Economic Research Service if determined by the Secretary. The Committee expects to be notified

each time that such a transfer of funds occurs, including the amount of the transfer, and a summary of the study for which the transfer was deemed necessary. The Committee also requests a report within 60 days of the enactment of this Act summarizing all studies and evaluations planned by FNS for fiscal year 2003.

Included in this amount is up to \$4,000,000 to purchase bison for the Food Distribution Program on Indian Reservations from Native American producers and Cooperative Organizations without competition.

The Committee is aware that there continues to be a pressing need for infrastructure development in the Food Distribution Program on Indian Reservations (FDPIR). Warehousing facilities on some reservations do not allow for the proper and efficient storage and distribution of commodities, and Indian Tribal Organization must be able to replace and upgrade equipment such as tractor trailers and fork lifts. Facilities have not always been able to keep pace with improvements in the food package, including the addition of fresh produce and more frozen foods as program options, which generates the need for cooler and freezer equipment.

Pursuant to 7 U.S.C. 2028, the Commonwealth of Puerto Rico must submit for the Secretary's approval a yearly plan that contains information regarding how food and assistance benefits under the Nutrition Assistance Program (NAP) for Puerto Rico are provided during the following fiscal year. While the Committee notes the program flexibility normally afforded to Puerto Rico, the Committee encourages the Secretary not to approve any NAP plan that does not require at least 75 percent of NAP funds to be spent on food at certain stores with point-of-sales devices.

The Committee notes the Secretary's recent waiver of Section 11(e)(6)(B) of the Food Stamp Act. The Committee believes it is important to study any potential risks it may pose to State and Federal oversight of the Food Stamp Program, as well as to families in need of food assistance. The Committee directs that no additional waivers of this provision be granted until a thorough and independent evaluation of the current waiver is complete. This evaluation should assess costs to the Federal Government; the private entity's compliance with all requirements of the Food Stamp Act, particularly program integrity and the Privacy Act; and access to benefits as measured by food stamp participation rates and service to the most disadvantaged households. The evaluation should also compare the hiring and personnel policies of the contractor with the merit systems standards of the State, and provide an analysis of the issues associated with shifting governmental responsibilities to a private contractor, including potential disruption, cost, and the State's capacity to re-assume program administration. The Committee requests a report on the evaluation findings on this waiver, including the previously listed items, prior to the Secretary granting any further waivers of Section 11(e)(6)(B) of the Food Stamp Act.

The Committee urges the Secretary of Agriculture to work with States to reduce Food

Stamp error rates. The Congress recently simplified the Food Stamp program and reformed the quality control system, including the methodology for calculating error rate penalties in recognition of the difficulty in administering the Food Stamp program. The Committee encourages the Department to continue to negotiate with States that were sanctioned in fiscal year 2001.

COMMODITY ASSISTANCE PROGRAM

Appropriations, 2002 ¹	\$152,813,000
Budget estimate, 2003	144,991,000
Committee recommendation	167,000,000

¹ Does not reflect \$3,300,000 rescission of available prior year appropriations.

The Commodity Assistance Program includes funding for the Commodity Supplemental Food Program and funding to pay expenses associated with the storage and distribution of commodities through The Emergency Food Assistance Program.

The Commodity Supplemental Food Program (CSFP).—Authorized by section 4(a) of the Agricultural and Consumer Protection Act of 1973, as amended in 1981 by Public Law 97-98, this program provides supplemental food to infants and children up to age 6, and to pregnant, post partum, and breast-feeding women who have low incomes, and reside in approved project areas. In addition, the program operates commodity distribution projects directed at low-income elderly persons 60 years of age or older.

In fiscal year 2003 approximately 76,700 women, infants, and young children and 369,381 elderly are authorized to receive food packages each month. The foods are provided by the Department of Agriculture for distribution through State agencies. The authorized commodities are iron-fortified infant formula, rice cereal, canned juice, evaporated milk and/or nonfat dry milk, canned vegetables or fruits, canned meat or poultry, egg mix, dehydrated potatoes, farina, and peanut butter or dry beans. Elderly participants may receive all commodities except iron-fortified infant formula and rice cereal.

The Farm Security and Rural Investment Act of 2002 (2002 Farm Bill), reauthorizes the program through fiscal year 2007 and establishes a specific administrative funding level for each caseload slot assigned, adjusted each year for inflation.

The Emergency Food Assistance Program (TEFAP).—Authorized by the Emergency Food Assistance Act of 1983, as amended, the program provides nutrition assistance to low-income people through prepared meals served on site and through the distribution of commodities to low-income households for home consumption. The commodities are provided by USDA to State agencies for distribution through State-established networks. State agencies make the commodities available to local organizations, such as soup kitchens, food pantries, food banks, and community action agencies, for their use in providing nutrition assistance to those in need.

Funds are administered by FNS through grants to State agencies which operate commodity distribution programs. Allocation of the funds to States is based on a formula which considers the States' unemployment rate and the number of persons with income below the poverty level.

In fiscal year 2001, \$329,000,000 worth of surplus commodities were distributed to assist needy individuals. Donations will continue in fiscal year 2002. Precise levels depend upon the availability of surplus commodities and requirements regarding displacement. In fiscal year 2002, \$20,820,000 will be used to help State and local authorities with the storage and distribution costs of providing surplus commodities to needy individuals. Although

the \$20,820,000 was allocated to each State in the form of administrative funds, each State is authorized to redirect funding for the purchase of additional commodities.

The Farm Security and Rural Investment Act of 2002 reauthorizes funding to support the storage and distribution of commodities through fiscal year 2007, and increases the amount authorized to be appropriated from \$50,000,000 to \$60,000,000. The law permits State and local agencies to use these funds to pay costs associated with the storage and distribution of USDA commodities and commodities secured from other sources. At the request of the State, these funds can be used by USDA to purchase additional commodities. The Farm Security and Rural Investment Act of 2002 also reauthorizes funding for the purchase of TEFAP commodities and increases the amount of funds available from \$100,000,000 to \$140,000,000. In addition to the commodities purchased specifically for TEFAP, commodities obtained under agriculture support programs are donated to States for distribution through TEFAP.

COMMITTEE RECOMMENDATIONS

For the Commodity Assistance Program, the Committee recommends an appropriation of \$167,000,000. This amount is \$14,187,000 more than the 2002 funding level and \$22,009,000 more than the budget request.

The Committee continues to encourage the Department to distribute Commodity Assistance Program funds equitably among the States, based on an assessment of the needs and priorities of each State and the State's preference to receive commodity allocations through each of the programs funded under this account.

The Committee is aware that since 1997, commodities provided through TEFAP have increased by approximately 400 percent, with most of the increase coming through surplus or bonus commodities purchased by USDA. The Committee is further aware that during difficult economic times, the number of Americans in need of assistance through State and local food banks increases. The Farm Security and Rural Investment Act of 2002 provides an additional \$40,000,000 for TEFAP commodities to be purchased with food stamp funds, even further increasing the need for additional administrative funding. Therefore, the Committee provides an increase of \$5,000,000 for TEFAP administrative funding over the fiscal year 2002 level, for a total of \$55,000,000. In addition, the Committee provides the Secretary authority to transfer up to an additional \$5,000,000 from TEFAP commodities for this purpose.

The Committee is aware that a significant quantity of food products are made available by hunters and other game harvesting operations which are approved through USDA or State inspected facilities, and present an additional source of donated commodities. The Department should give consideration to this opportunity as a means to supplement and provide variety to food assistance programs, and allow the use of TEFAP administrative funds for this purpose.

The Committee provides \$107,000,000 for the Commodity Supplemental Food Program. This is an increase of \$4,187,000 above the fiscal year 2002 level, and \$12,810,000 above the President's request. This funding level is adequate to continue funding for five States added in fiscal year 2002, and will allow CSFP to expand to Alaska, Indiana, Nevada and South Carolina. Of this amount, no less than \$24,000,000 shall be available for administrative funding.

The Committee recognizes the success of the Seniors Farmers' Market Nutrition Program, which provided fresh fruits and vegetables to more than 400,000 low-income senior citizens and benefited more than 14,000

farmers in fiscal year 2001. The Committee notes that \$15,000,000 in funding was provided in the Farm Security and Rural Investment Act of 2002 for this program, and provides an additional \$5,000,000 for the Seniors Farmers' Market Nutrition Program for fiscal year 2003.

FOOD DONATIONS PROGRAMS

Appropriations, 2002	\$150,749,000
Budget estimate, 2003 ¹	1,081,000
Committee recommendation	1,081,000

¹ The fiscal year 2003 budget recommends moving commodity support for the Nutrition Service Incentive Program to the Department of Health and Human Services Administration on Aging.

Nutrition Services Incentive Program.—Commodity support for the Nutrition Service Incentive Program is authorized by titles III and VI of the Older Americans Act of 1965. The foods provided are used in preparing meals which are served in senior citizen centers and similar settings or delivered to the homebound elderly. These meals are the focal point of the nutrition projects for the elderly which have the dual objective of promoting better health and reducing the isolation of old age.

Currently, commodities or cash in lieu of commodities are distributed through State agencies to the local meal sites. Some States elect to take all of their subsidy in cash and some States choose to receive a combination of cash and commodities. The commodities made available to the Nutrition Services Incentive Program are generally the same as those provided to schools under the Child Nutrition Programs. In previous years, the State agencies that elected to receive cash in lieu of commodities were funded on a payment per meal basis. The Older Americans Act of 2000, Public Law 106-501, enacted November 13, 2000, revised the funding formula. The Act requires that each State or grantee receive a proportion of available funds equal to the proportion of meals served by that State or grantee in the preceding fiscal year. The Act reauthorizes the program through 2005.

Pacific Island assistance.—This program provides funding for assistance to the nuclear-affected islands in the form of commodities and administrative funds. It also provides funding for use in non-Presidentially declared disasters and for FNS' administrative costs in connection with relief for all disasters.

COMMITTEE RECOMMENDATIONS

For the food donations programs for selected groups, the Committee recommends \$1,081,000. This amount is \$149,668,000 less than the 2002 appropriation and the same as the budget request. The full amount recommended by the Committee is for the needy family program.

The Committee agrees with the Administration's request to shift funding for the Nutrition Services Incentive Program (NSIP) from the Food and Nutrition Service within USDA to the Administration on Aging within the Department of Health and Human Services (DHHS). It is the Committee's belief, however, that it is critically important for several aspects of NSIP to remain intact, as the program is shifted into DHHS. This includes the allocation of NSIP funds on the basis of the number of meals served in a State in the previous year, as opposed to the number of seniors that reside in that State. Further, NSIP funds are not currently, and should not become, subject to transfer or administrative match requirements, and States should continue to have the option of receiving benefits in the form of cash or commodities. The Committee directs the Under Secretary to work with the Assistant Secretary

for Aging within DHHS to ensure this transfer of funding and responsibilities is carried out in a manner that in no way disrupts the delivery of services provided by NSIP.

FOOD PROGRAM ADMINISTRATION

Appropriations, 2002	\$127,546,000
Budget estimate, 2003 ¹	147,944,000
Committee recommendation	136,865,000

¹ Excludes \$7,911,000 requested for employee pension and health benefits.

The Food Program Administration appropriation provides for most of the Federal operating expenses of the Food and Nutrition Service, which includes the Child Nutrition Programs; Special Milk Program; Special Supplemental Nutrition Program for Women, Infants, and Children [WIC], including the Farmers' Market Nutrition Program; Food Stamp Program; Nutrition Assistance for Puerto Rico; the Commodity Assistance Program, including the Commodity Supplemental Food Program, and the Emergency Food Assistance Program; and the Food Donations Programs, including Pacific Island Assistance.

The major objective of Food Program Administration is to efficiently and effectively carry out the nutrition assistance programs mandated by law. This is to be accomplished by the following: (1) giving clear and consistent guidance and supervision to State agencies and other cooperators; (2) assisting the States and other cooperators by providing program, managerial, financial, and other advice and expertise; (3) measuring, reviewing, and analyzing the progress being made toward achieving program objectives; and (4) carrying out regular staff support functions.

COMMITTEE RECOMMENDATIONS

For Food Program Administration, the Committee recommends an appropriation of \$136,865,000. This amount is \$9,319,000 more than the 2002 level and \$11,079,000 less than the budget request.

Included in this amount is an increase of \$4,500,000 for activities to enhance program integrity in the Food Stamp and Child Nutrition Programs. This amount does not include an increase of \$11,047,000 for rental payments to GSA or \$32,000 for FECA administrative charges, as requested in the budget.

TITLE V—FOREIGN ASSISTANCE AND RELATED PROGRAMS

FOREIGN AGRICULTURAL SERVICE

SALARIES AND EXPENSES

[In thousands of dollars]

	Appropriations	Transfers from loan accounts	Total
Appropriations, 2002	121,813	(4,257)	(126,070)
Budget estimate, 2003 ¹	131,668	(4,257)	(135,925)
Committee recommendation	131,198	(4,257)	(133,445)

¹ Excludes \$3,902,000 requested for employee pension and health benefits.

The Foreign Agricultural Service [FAS] was established March 10, 1953, by Secretary's Memorandum No. 1320, supplement 1. Public Law 83-690, approved August 28, 1954, transferred the agricultural attachés from the Department of State to the Foreign Agricultural Service.

The Agency maintains a worldwide agricultural intelligence and reporting service to provide U.S. farmers and traders with information on world agricultural production and trade that they can use to adjust to changes in world demand for U.S. agricultural products. This is accomplished through a continuous program of reporting by 63 posts located throughout the world covering some 130 countries.

The Foreign Agricultural Service analyzes agricultural information essential to the as-

essment of foreign supply and demand conditions in order to provide estimates of the current situation and to forecast the export potential for specific U.S. agricultural commodities. Published economic data about commodities are combined with attaché reports and subjected to analysis through advanced econometric techniques to generate these estimates.

In addition, the Service is now using advanced techniques for identifying, delineating, and assessing the impact of events which may affect the condition and expected production of foreign crops of economic importance to the United States. The crop condition activity relies heavily on computer-aided analysis of satellite, meteorological, agricultural, and related data.

The mission of FAS overseas is to represent U.S. agricultural interests, to promote export of domestic farm products, improve world trade conditions, and report on agricultural production and trade in foreign countries. FAS staff are stationed at 80 offices around the world where they provide expertise in agricultural economics and marketing, as well as provide attaché services.

The Foreign Agricultural Service works in conjunction with market development cooperators, trade associations, State departments of agriculture and their affiliates, and U.S. sales teams to develop foreign markets for U.S. farm products. FAS sponsors overseas trade exhibits to promote U.S. agricultural products, provides information about foreign importers, and performs a wide range of market development activities.

FAS carries out several export assistance programs to counter the adverse effects of unfair trade practices by competitors on U.S. agricultural trade. The Export Enhancement Program uses CCC-owned commodities as export bonuses to provide export enhancements to U.S. producers. The Market Access Program [MAP] conducts both generic and brand-identified promotional programs in conjunction with nonprofit agricultural associations and private firms financed through reimbursable CCC payments.

These programs are supplemented by the Cooperator Program, a joint FAS-nonprofit private trade and producer association partnership program developing strategies for U.S. agriculture export expansion. Through 2001, nonprofit private trade and producer associations have generated an estimated \$1,391,000,000 in contributions to more than match the \$854,000,000 contributed by FAS to finance overseas market promotion activities under the Cooperator Program. In addition, GSM credit guarantee programs play an integral role in the recent progress of American agriculture in the world marketplace.

The Agricultural Trade Act of 1978 includes authority to establish up to 25 agricultural trade offices. Currently, 16 such offices are in operation at key foreign trading centers to assist U.S. exporters, trade groups, and State export marketing officials in trade promotion.

The Service initiates, directs, and coordinates the Department's formulation of trade policies and programs with the goal of maintaining and expanding world markets for U.S. agricultural products. It monitors international compliance with bilateral and multilateral trade agreements. It identifies restrictive tariff and trade practices which act as barriers to the import of U.S. agricultural commodities, then supports negotiations to remove them. It acts to counter and eliminate unfair trade practices by other countries that hinder U.S. agricultural exports to third markets.

FAS also carries out the mission of the former Office of International Cooperation and Development [OICD] to promote U.S. ag-

riculture and to advance the agriculture of developing countries as parts of a complementary global agricultural system capable of providing ample food and fiber for all people. To accomplish this mission, FAS applies USDA policies and U.S. agricultural perspectives in its programs of international agricultural cooperation and development, and in its work with foreign countries, international organizations, U.S. universities and other institutions, agencies of the U.S. Government, and the U.S. private sector.

The General Sales Manager was established pursuant to section 5(f) of the charter of the Commodity Credit Corporation and 15 U.S.C. 714-714p. The funds allocated to the General Sales Manager are used for conducting the following programs: (1) CCC Export Credit Guarantee Program (GSM-102), including supplier credit guarantees and facilities financing guarantees, (2) Intermediate Credit Guarantee Program (GSM-103), (3) Public Law 480, (4) section 416 Overseas Donations Program, (5) Export Enhancement Program, (6) Market Access Program, and (7) programs authorized by the Commodity Credit Corporation Charter Act including barter, export sales of most CCC-owned commodities, export payments, and other programs as assigned to encourage and enhance the export of U.S. agricultural commodities.

COMMITTEE RECOMMENDATIONS

For the Foreign Agricultural Service, the Committee recommends an appropriation of \$131,198,000. This is \$9,385,000 more than the 2002 appropriation and \$470,000 less than the budget request.

This amount does not include an increase of \$454,000 for rental payments to GSA or \$16,000 for FECA administrative charges, as requested in the budget.

The Committee expects the FAS to fund the Foreign Market Development Cooperator Program at no less than the fiscal year 2002 level.

The Committee provides the fiscal year 2003 budget request level of \$5,000,000 for the Cochran Fellowship Program. The Committee encourages the Secretary to continue to provide additional support for the program through the Commodity Credit Corporation Emerging Markets Program.

The Committee continues to include language in a general provision in the bill, as requested in the budget, to allow up to \$2,000,000 of the amount appropriated to the FAS to remain available until expended solely for the purpose of offsetting fluctuations in international currency exchange rates, subject to documentation.

The Committee expects the Secretary to use the fully-authorized levels of the Dairy Export Incentive Program (DEIP), consistent with GATT Uruguay commitments, in order to ensure U.S. producers have fair access to foreign markets.

The Committee is concerned that the Dairy Export Incentive Program (DEIP) loses a substantial percentage of its tonnage every year due to cancellation or nullification of DEIP awards by foreign buyers or for other reasons beyond the control of U.S. dairy producers. Because the permitted DEIP tonnage is strictly limited each year under United States commitments made to the World Trade Organization (WTO), it is vital that this lost tonnage be reallocated during the applicable export year under WTO rules so that it can be used, not wasted.

The Committee encourages the Foreign Agricultural Service to assist the Alaska Seafood Marketing Institute and the Alaska Fisheries Development Foundation in marketing Alaska salmon and other seafood to overseas markets.

To promote the export of domestic farm products and improve world agriculture

trade conditions, the Foreign Agricultural Service must increase its efforts to improve the understanding among trading partners of the safety of biotechnology and the thoroughness of the U.S. regulatory oversight of biotechnology. As trading partners construct regulatory systems for biotechnology and commodity trade, FAS is frequently requested to provide experts for the purpose of educating foreign government officials on the U.S. regulatory system. If the U.S. fails to participate in such discussions, those attempting to limit the access to foreign markets by U.S. producers will be presented an opportunity to undermine confidence in the benefits and safety of the technology while reducing trade opportunities for American producers. The Committee directs FAS to allocate adequate funding to meet the needs of our trading partners so that officials from the Department of Agriculture may, when requested, educate foreign regulators on the safety of the technology and the thoroughness of the U.S. regulatory process.

In addition, the Committee continues to urge the Secretary to work with representatives of the dairy industry and appropriate non-governmental organizations to increase the amount of fortified dry milk exported under humanitarian assistance programs.

The Committee is aware of the continuing buildup of surplus non-fat dry milk acquired by the CCC through the dairy price support program. The Committee is concerned with increasing storage costs associated with this buildup and encourages the agency to utilize all existing food donation programs to reduce this growing surplus.

The Committee encourages FAS to support the Central Asia/Krasnodar, Turkey and China Initiative project for the development of biotechnological and conservation activities and to develop services modeled on the Cooperative Extension Service. The Committee also recommends FAS support for the "Good Neighbor Partnership—Azores" initiative by the Azores Collaborative Research and Education Group (ACREG).

PUBLIC LAW 480 TITLE I PROGRAM ACCOUNT

[In thousands of dollars]

	Credit level	Loan sub-sidy	Administrative expenses
Appropriations, 2002	(154,664)	126,409	2,005
Budget estimate, 2003	(131,676)	98,904	2,059
Committee recommendation	(154,664)	116,171	2,059

The Federal Credit Reform Act of 1990 established the program account. Appropriations to this account will be used to cover the lifetime subsidy cost associated with direct loans obligated in 2003 and beyond, as well as for administrative expenses.

Financing sales of agricultural commodities to developing countries and private entities for dollars on credit terms, or for local currencies (including for local currencies on credit terms) for use under section 104; and for furnishing commodities to carry out the Food for Progress Act of 1985, as amended (title I).—Title I of the act authorizes financing of sales to developing countries for local currencies and for dollars on credit terms. Sales for dollars or local currency may be made to foreign governments. The legislation provides for repayment terms either in local currencies or U.S. dollars on credit terms of up to 30 years, with a grace period of up to 5 years.

Local currencies under title I sales agreements may be used in carrying out activities under section 104 of the Agricultural Trade Development and Assistance Act of 1954, as amended. Activities in the recipient country for which these local currencies may be used include developing new markets for U.S. agricultural commodities, paying U.S. obligations, and supporting agricultural development and research.

Title I appropriated funds may also be used under the Food for Progress Act of 1985 to furnish commodities on credit terms or on a grant basis to assist developing countries and countries that are emerging democracies that have a commitment to introduce and expand free enterprise elements in their agricultural economies.

COMMITTEE RECOMMENDATIONS

For Public Law 480, title I, the Committee recommends total appropriations of \$118,230,000. This amount is \$10,184,000 less than the 2002 level and \$17,267,000 more than the budget request. This appropriation will support a Public Law 480, title I, credit level of \$154,664,000 for fiscal year 2003, the same as the 2002 level and \$22,988,000 more than the budget request. The corresponding loan levels, loan subsidy amounts, and administrative expenses are reflected in the table above, as compared to the fiscal year 2002 and budget request levels.

PUBLIC LAW 480 TITLE I OCEAN FREIGHT DIFFERENTIAL GRANTS

Appropriations, 2002	\$20,277,000
Budget estimate, 2003	28,000,000
Committee recommendation	25,159,000

Ocean freight differential costs in connection with commodity sales financed for local currencies or U.S. dollars (title I).—The Commodity Credit Corporation pays ocean freight differential costs on shipments under this title. These costs are the difference between foreign flag and U.S. flag shipping costs.

COMMITTEE RECOMMENDATIONS

For Public Law 480 ocean freight differential costs, the Committee recommends \$25,159,000. This is \$4,882,000 more than the fiscal year 2002 level and \$2,841,000 less than the budget request.

PUBLIC LAW 480 TITLE II GRANTS

Appropriations, 2002	\$850,000,000
Budget estimate, 2003	1,185,000,000
Committee recommendation	1,185,000,000

The Committee recognizes the important mission of the Public Law 480 Program to combat hunger and malnutrition; promote broad-based equitable and sustainable development; expand international trade; develop and expand export markets for U.S. agricultural commodities; and to foster and encourage the development of private enterprise and democratic participation in developing countries. The Committee strongly supports the continued efficient operation of this important program.

Commodities supplied in connection with dispositions abroad (title II) (7 U.S.C. 1721–1726).—Commodities are supplied without cost through foreign governments to combat malnutrition and to meet famine and other emergency requirements. Commodities are also supplied for nonemergencies through public and private agencies, including intergovernmental organizations. The Commodity Credit Corporation pays ocean freight on shipments under this title, and may also pay overland transportation costs to a landlocked country, as well as internal distribution costs in emergency situations. The funds appropriated for title II are made available to private voluntary organizations and cooperatives to assist these organizations in meeting administrative and related costs.

Commodities supplied in connection with dispositions abroad (title III).—Commodities are supplied without cost to least developed countries through foreign governments for direct feeding, development of emergency food reserves, or may be sold with the proceeds of such sale used by the recipient coun-

try for specific economic development purposes. The Commodity Credit Corporation may pay ocean freight on shipments under this title, and may also pay overland transportation costs to a landlocked country, as well as internal distribution costs.

COMMITTEE RECOMMENDATIONS

For Title II, the Committee recommends a program level of \$1,185,000,000. This is \$335,000,000 more than the fiscal year 2002 level and the same as the budget request.

The Committee strongly supports programs, including title II, that provide humanitarian food assistance throughout the world. Commodities and assistance provided through title II are one weapon in the U.S. arsenal against world hunger, and the Committee believes that a program level of \$1,185,000,000 is a proper level of support in view of other subcommittee priorities for limited direct appropriations. The Committee wants to make clear that providing the President's request does not overcome a strong disagreement with policies suggested by this administration that certain other authorities, notably section 416(b) of the Agricultural Act of 1949, shall not be actively pursued toward relieving world hunger, and thereby result in a net decrease in U.S. contributions for world food aid. America is a land rich in natural resources, the richest among nations, and one to which the world's hungry look for relief from malnutrition and starvation. Over the past several years, employment of the section 416(b) authority has resulted in the channeling of substantial surplus commodities to areas of intense need. Today, the United States has on hand substantial levels of surplus commodities commonly used for humanitarian food assistance, and the Committee strongly urges the Department to use all available authorities to apply these surpluses toward levels necessary to meet targeted world needs.

The Committee is aware that the administration has recently drawn from the Bill Emerson Humanitarian Trust to supplement food assistance needs. While use of this Trust is appropriate in the event of emergency conditions for which no alternative is available, it is the Committee's belief that the Trust was never intended to serve as a substitute for other food assistance programs, such as 416(b), and is concerned that subsequent transfers of title II funds to replenish the Trust will effectively further reduce food assistance resources in fiscal year 2003. Accordingly, the Committee expects the Secretary to utilize resources of the Commodity Credit Corporation to maintain the Bill Emerson Humanitarian Trust.

At this point in history, the U.S.'s world leadership role is more important, and under more scrutiny than ever, and the Committee firmly believes that this is not the time for this country to retreat from its dominant humanitarian role and relating contributions toward world stabilization and peace.

COMMITTEE RECOMMENDATIONS

The Committee expects the administration to allocate no less than 1,875,000 metric tons of the commodities provided under Title II to non-emergency programs. Unanticipated emergency needs, such as the famine in southern Africa, should be met primarily through the section 416b program, the Bill Emerson Humanitarian Trust, or emergency appropriations.

The Committee directs the administration not to place arbitrary limits on monetization under the Public Law 480 title II program. In food-deficit, import-reliant countries, monetization stimulates the economy and allows needed commodities to be provided in the marketplace. Food aid proposals should be approved based on the merits of the program plan to promote food security

and improve people's lives, not on the level of monetization.

The Committee supports the use of title II funds in fiscal year 2003 to continue the fiscal year 2002 level of funding for the orphan feeding program in Haiti.

The Committee notes the extraordinary effort made by the people of Alaska through Rotary International, the Interfaith Council, the Municipality of Anchorage, and other groups to collect and distribute food and other assistance to people living in the Russian Far East. The Committee urges the Administration to work with these entities to take advantage of their volunteer efforts in feeding people in the Russian Far East, particularly abandoned children living in orphanages and hospitals.

As proposed in the budget, the Committee provides no new funding for title III grants. Authority is provided by law (7 U.S.C. 1736f) to transfer up to 15 percent of the funds available for any fiscal year for carrying out any title of Public Law 480 to any other title of the program. This authority may be used to transfer funds to title III should a transfer be deemed appropriate.

**COMMODITY CREDIT CORPORATION EXPORT LOANS PROGRAM ACCOUNT
(EXPORT CREDIT PROGRAMS, GSM-102 AND GSM-103)**

[In thousands of dollars]

	Guaranteed loan levels	Guaranteed loan subsidy	Administrative expenses
Appropriations, 2002	1 3,926,000	1 265,063	4,014
Budget estimate, 2003	1 4,225,000	1 293,927	4,058

¹ No appropriation required since export credit authorizations are permanent authority.

In 1980, the Commodity Credit Corporation [CCC] instituted the Export Credit Guarantee Program (GSM-102) under its charter authority. With this program, CCC guarantees, for a fee, payments due U.S. exporters under deferred payment sales contracts (up to 36 months) for defaults due to commercial as well as noncommercial risks. The risk to CCC extends from the date of export to the end of the deferred payment period covered in the export sales contract and covers only that portion of the payments agreed to in the assurance agreement. Operation of this program is based on criteria which will assure that it is used only where it is determined that it will develop new market opportunities and maintain and expand existing world markets for U.S. agricultural commodities. The program encourages U.S. financial institutions to provide financing to those areas where the institutions would be unwilling to provide financing in the absence of the CCC guarantees. Other credit activities may also be financed under the Export Credit Guarantee programs including sup-

plier credit guarantee, under which CCC guarantees payments due to importers under short term financing (up to 180 days) that exporters extend directly to importers for the purchase of U.S. agricultural products. CCC also provides facilities financing guarantees.

In 1986, the Intermediate Export Credit Guarantee Program (GSM-103) was implemented by CCC under its charter authority as required by the Food Security Act of 1985. The program is similar to the Export Credit Guarantee Program (GSM-102), but provides for CCC guarantees to exporters for commodities sold on credit terms in excess of 3 years, but not more than 10 years. The program also provides for adjusting the maximum amount of interest which CCC guarantees to pay under the payment guarantee and permits freight costs to be covered for breeding animals financed under the GSM-102 and GSM-103 programs.

The Federal Credit Reform Act of 1990 establishes the program account. The subsidy costs of the CCC export guarantee programs are exempt from the requirement of advance appropriations of budget authority according to section 504(c)(2) of the Federal Credit Reform Act of 1990, Public Law 101-508. Appropriations to this account will be used for administrative expenses.

TITLE VI—RELATED AGENCIES AND FOOD AND DRUG ADMINISTRATION

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

The Food and Drug Administration (FDA) is a scientific regulatory agency whose mission is to promote and protect the public health and safety of Americans. FDA's work is a blending of science and law. The Food and Drug Administration Modernization Act of 1997 (FDAMA) reaffirmed the responsibilities of the FDA: to ensure safe and effective products reach the market to a timely way, and to monitor products for continued safety after they are in use. In addition, FDA is entrusted with two critical functions in the Nation's war on terrorism: preventing willful contamination of all regulated products, including food, and improving the availability of medications to prevent or treat injuries caused by biological, chemical or nuclear agents.

The FDA Foods program has the primary responsibility for assuring that the food supply, quality of foods, food ingredients and dietary supplements are safe, sanitary, nutritious, wholesome, and honestly labeled, and that cosmetic products are safe and properly labeled. The variety and complexity of the food supply has grown dramatically while new and more complex safety issues, such as emerging microbial pathogens, natural toxins, and technological innovations in production and processing, have developed. This

program plays a major role in keeping the United States food supply among the safest in the world.

The FDA Drugs programs are comprised of three separate areas, Human Drugs, Animal Drugs and Biologics. FDA is responsible for the life cycle of the product, including pre-market review and postmarket surveillance of human, animal and biological products to ensure their safety and efficacy. For Human Drugs this includes assuring that all drug products used for the prevention, diagnosis and treatment of disease are safe and effective. Additional procedures include the review of investigational new drug applications; evaluation of market applications for new and generic drugs, labeling and composition of prescription and over-the-counter drugs; monitoring the quality and safety of products manufactured in, or imported into, the United States; and, regulating the advertising and promotion of prescription drugs. The Animal Drugs and Feeds Program ensures only safe and beneficial veterinary drugs, intended for the treatment and/or prevention of diseases in animals and the improved production of food-producing animals, are approved for marketing.

The FDA Biologics program assures that blood and blood products, blood test kits, vaccines, and therapeutics are pure, potent, safe, effective, and properly labeled. The program inspects blood banks and blood processors, licenses and inspects firms collecting human source plasma, evaluates and licenses biologics manufacturing firms and products; lot releases licensed products; and monitors adverse events associated with vaccine immunization.

The FDA Devices and Radiological program ensures the safety and effectiveness of medical devices and eliminates unnecessary human exposure to manmade radiation from medical, occupational, and consumer products. In addition, the program enforces quality standards under the Mammography Quality Standards Act. Medical devices include thousands of products from thermometers and contact lenses to heart pacemakers, hearing aids, MRIs, microwave ovens, and video display terminals.

FDA's National Center for Toxicological Research in Jefferson, Arkansas, serves as a specialized resource, conducting peer-review scientific research that provides the basis for FDA to make sound science-based regulatory decisions through its premarket review and postmarket surveillance. The research is designed to define and understand the biological mechanisms of action underlying the toxicity of products and developing methods to improve assessment of human exposure, susceptibility and risk of those products regulated by FDA.

SALARIES AND EXPENSES

							Total
	Appropriation	Prescription drug user fees	Medical device user fees	Mammography clinics inspection fees	Export and certification fees		
Appropriations, 2002	1,183,670	161,716	15,590	6,181	1,367,157	
Budget estimate, 2003	1 ² 1,369,385	3 222,900	25,125	16,112	6,378	1 ² 3 1,614,775	
Committee recommendation	1,383,505	222,900	16,112	6,378	1,654,020	

¹ Excludes \$62,569 requested for employee pension and health benefits.

² Includes proposed consolidation of Public Affairs and Legislation offices to HHS and other proposed management efficiencies.

³ PDUFA total reflects reauthorization of the Prescription Drug User Fee Act as part of Public Law 107-180.

COMMITTEE RECOMMENDATIONS

For salaries and expenses, the Committee recommends an appropriation of \$1,383,505,000. This amount is \$199,835,000 more than the 2002 level and \$14,120,000 more than the budget request. The Committee also recommends \$222,900,000 in Prescription Drug User Fee Act user fee collections, \$25,125,000

in Medical Device User Fee and Modernization Act user fee collections, \$16,112,000 in Mammography Quality Standards Act fee collections, and \$6,378,000 in export and certification fees, as assumed in the President's budget. These amounts are \$61,184,000, \$25,125,000, \$522,000, and \$197,000 more than the 2002 levels, respectively. The Committee

includes bill language which prohibits FDA from developing, establishing, or operating any program of user fees authorized by 31 U.S.C. 9701.

The following table reflects the Committee's recommendations, as compared to the fiscal year 2002 and budget request levels:

FOOD AND DRUG ADMINISTRATION SALARIES AND EXPENSES
[In thousands of dollars]

	Fiscal year—		Committee recommendation
	2002 enacted ¹	2003 requested ^{2,3}	
Centers and related field activities:			
Foods	309,853	412,097	412,404
Center for Food Safety and Applied Nutrition [CFSAN]	135,988	148,112	148,457

Rent and related activities	29,798	36,498	36,498
Rental payments to GSA	98,876	98,876	98,876
Total, FDA salaries and expenses, new budget authority	1,183,670	1,369,385	1,383,505

¹ Reflects approved reprogramming of fiscal year 2002 funds for UFMS and other management initiatives.

² Excludes \$62,569 requested for employee pension and health benefits.

³ Includes proposed consolidation of public affairs and legislation offices to DHHS and other proposed management efficiencies.

The Committee recommends the following increases in budget authority requested in the budget for FDA salaries and expenses activities, as follows: \$5,000,000 to enhance the identification of risks associated with the use of medical products and to reduce the occurrence of adverse events; \$4,582,000 for improvements to the generic drug review program; and \$152,276,000 to maintain counter terrorism activities funded in the fiscal year 2002 emergency supplemental appropriations bill relating to food safety, safe and effective medical products, and physical security, including an increase of \$1,176,000, as requested in the budget. The Committee also recommends a decrease in budget authority requested in the budget of \$2,578,000 associated with efficiency improvements and consolidations of administrative functions.

The Committee does not recommend a decrease of \$7,317,000 in budget authority to consolidate the FDA Office of Public Affairs and the FDA Office of Legislation into the DHHS Office of the Secretary. However, the Committee does support the Secretary's efforts to streamline and coordinate the activities of DHHS agencies to ensure the ability of DHHS to provide clear, consistent messages to Congress and the American public.

The Committee also does not recommend an increase in budget authority of \$5,200,000 for the DHHS Unified Financial Management System. These funds were provided through a reprogramming of fiscal year 2002 funds, and are no longer necessary as an increase in fiscal year 2003.

Rent payments.—The Committee recommends \$98,876,000 for FDA rental payments to the General Services Administration [GSA], the same as the 2002 level.

Food safety.—An increase of approximately \$19,059,000 from the fiscal year 2002 level is

recommended by the Committee for FDA food safety activities, bringing total funding for food safety to \$502,263,000.

The Committee notes that in recent years, FDA has expanded the types of activities it classifies as relating to food safety. Prior to fiscal year 2002, the Food Safety Initiative definition was limited to activities relating to the microbiological safety of foods. This definition was applied from the inception of FSI through fiscal year 2001. In fiscal year 2002, the definition was expanded to include chemical safety of foods and pesticides, pre-market review activities, activities relating to Bovine Spongiform Encephalopathy, and activities related to counter-terrorism. In fiscal year 2003, FDA has further expanded the definition to include activities relating to the safety of dietary supplements.

Within the total funding available, at least \$2,100,000 is for FDA activities in support of *Codex Alimentarius*.

The Committee provides \$2,000,000, an increase of \$503,000 over the fiscal year 2002 level, for FDA to continue its contract with New Mexico State University's Physical Science Laboratory to operate the Agricultural Products Food Safety Laboratory, and to conduct evaluation and development of rapid-screening methodologies, technologies, instrumentation, and data analysis for food safety and product surely to facilitate FDA's regulation of food safety, bioterrorism, and other initiatives.

The Committee expects the FDA to continue its support for the Waste Management Education and Research Consortium (WERC) and its work in food safety technology verification and education at no less than the fiscal year 2002 level.

With the growing threat of foodborne illness to the public health, the Committee believes that collaborative research in food

safety should continue among Government, academia, and private industry. The national model for that collaboration has been the National Center for Food Safety and Technology (NCFST) in Summit-Argo, Illinois. The Committee expects the FDA to maintain sufficient funding for the National Center to continue the important work done there.

In addition, the funding provided for food safety will ensure the continuation of food contract inspections in the State of Alaska. Specifically, it will allow the FDA to renew its contract with the State of Alaska for inspections of food and seafood processors operating in Alaska. The current contract became effective on May 23, 2002. It will fund at least 300 inspections, approximately 281 seafood/HACCP inspections and 19 other food inspections, at a cost of approximately \$250,776. The establishments to be inspected will be mutually agreed upon by FDA and the State of Alaska.

Seafood Safety.—Two recent General Accounting Office (GAO) reports on the safety of seafood have documented the inadequacy of the FDA efforts to address foodborne hazards in seafood, including shellfish. Both reports found FDA's seafood inspection system provides consumers with inadequate protection for seafood-related foodborne illness. The Committee urges FDA to promote the development of new food safety technologies such as irradiation, flash freezing, high-pressure processing, or others that can cost-effectively reduce the incidence of pathogens, and technologies that can ensure constant safe temperatures of seafood throughout the food chain.

The Committee supports the ongoing work of the Interstate Shellfish Sanitation Conference and its joint efforts with the FDA and the shellfish industry to formulate shellfish safety regulations through the National

Shellfish Sanitation Program. The Committee recommends no less than the fiscal year 2002 level be directed through the Office of Seafood Inspection to continue these activities, and directs that \$200,000 be directed to the Interstate Shellfish Sanitation Conference for the *Vibrio Vulnificus* Education Program.

The Committee is concerned that FDA has not taken effective action to address foodborne illness risks from the consumption of raw shellfish. In particular, the Committee is concerned that Interstate Shellfish Sanitation Commission's (ISSC) proposed steps to reduce the rates of death and illness due to consumption of *Vibrio vulnificus*-contaminated raw shellfish may not effectively address public health concerns.

The Committee also continues its concern with the agency's failure to bring FDA-regulated seafood into compliance with HACCP. However, the Committee is aware that special or unique circumstances may exist for particular seafood processors. While ultimate HACCP compliance is not in question, the Committee is aware of Hawaii's lengthy and culturally important history of hook-and-line fisheries, auction markets, and the high consumption of raw tuna and other pelagic fish in Hawaii, and believes the agency should take into account both the history and the industry's practical experience in approving a plan that is consistent with healthy seafood products and national standards for seafood safety.

Omega 3.—The Committee has become aware of new and continued research in Circulation (April 9, 2002), the Journal of the American Medical Association (April 10, 2002) and the New England Journal of Medicine (April 11, 2002) that indicates potential positive health benefits of Omega 3 fatty acids in the diet. In a previous report to the Committee, the FDA concluded that there was no evidence of the value of salmon, which is a source of Omega 3 fatty acids, in the diet. Taking current research into consideration, the Committee believes the FDA should reconsider the health claim that "Consumption of Omega 3 fatty acids in salmon can prevent and reverse heart disease" and report back to the Committee by April 15, 2003.

Latex Allergies.—The Committee remains concerned about the increasing prevalence of latex allergies, which can, in some instances, be deadly. The Committee understands that FDA is currently studying the incidence of latex allergies related to food handling, and will report back to the Committee in August on the agency's plan to eliminate exposure to latex from food handling, if data currently being reviewed warrants such a decision. The Committee looks forward to receiving this report, and encourages FDA to take all necessary steps to eliminate unnecessary exposure to natural rubber latex.

The Committee is also aware that DHHS is currently working to ensure that health care providers and first responders are vaccinated in the event of a public health emergency. The Committee applauds this effort. Taking into consideration the NIOSH Alert in DHHS Publication No. 97-135, "Preventing Allergic Reactions to Natural Rubber Latex in the Workplace," which indicates that between 8 percent and 12 percent of the exposed health care workforce is allergic to natural rubber latex, the Committee encourages the Secretary to ensure that all products utilized in these efforts are latex free.

The Committee is aware that FDA proposed regulations in 1999 to reclassify all surgeon's and patient examination gloves as Class II medical devices. The Committee is further aware that the use of some surgeon's and patient examination gloves has been associated with a number of adverse health ef-

fects, including allergic reactions, in patients and users. Therefore, the Committee encourages FDA to finalize these proposed regulations.

National Antimicrobial Resistance Monitoring Service.—The Committee supports the work of the National Antimicrobial Resistance Monitoring Service (NARMS) and its collaborative relationship between FDA, the Department of Agriculture, and the Centers for Disease Control and Prevention. The Committee expects the coordination of activities among these three areas of Government to result in the most unbiased presentation of timely, accurate data in the best interest of public health.

Orphan Products Grants.—Included in the Center for Drug Evaluation and Research is \$13,357,000 for the Orphan Products Grants Program. This is the same as the fiscal year 2002 level.

Dietary Supplements.—The Committee believes that the potential for dietary supplements to have positive health benefits has been realized in many cases. However, it is essential that FDA continue its efforts to ensure their safety, and to fully enforce the prohibition of false, misleading or unsubstantiated claims regarding dietary supplements implemented in the Dietary Supplement and Health Education Act (DSHEA) of 1994. The budget request includes total funding of \$5,600,000 for the CFSAN Adverse Events Reporting System (CAERS), of which approximately \$1,500,000 is for dietary supplements. The Committee provides an increase of \$2,000,000 for CAERS, bringing total funding to \$7,600,000. These funds are to be used to ensure prompt identification of and response to adverse health events related to foods, including dietary supplements.

FDA has indicated that the ability to identify and analyze specific components in ingredients, including botanical ingredients, is an essential component of research and regulatory programs directed at ensuring the safety and effectiveness of dietary supplements. The Committee provides \$2,000,000 in new budget authority for fiscal year 2003 to continue the review of botanicals in dietary supplements. This work is being carried out by FDA in collaboration with the National Center for Natural Products Research, Oxford, MS.

Biotechnology.—The Committee understands that the FDA frequently receives requests from foreign governments for FDA regulators to visit foreign countries to educate regulators on the evaluation of the safety of biotechnology. Providing information on the soundness of the U.S. regulatory process will promote the understanding of the benefits of biotechnology to human health and the environment and improve the climate for acceptance of U.S. agricultural products abroad. The Committee directs the FDA to allocate adequate funding so that agency representatives may perform this service.

Blood product safety.—The Committee remains concerned that FDA has not moved forward in finalizing its proposed rule to require manufacturer tracking of blood-derived products and prompt patient notification of adverse events. The Committee urges FDA to complete implementation of this important blood product safety mechanism and requests quarterly reports on its progress.

Blood Safety and Adequacy.—The Committee is aware of several factors that have affected that Nation's blood supply, including a recently implemented FDA deferral policy which restricts eligibility of blood donors who have traveled or lived in Europe or the United Kingdom because of the theoretical risk of variant Creutzfeldt-Jakob Disease. The Committee is concerned about existing blood shortages, and the possibility of

increasingly severe shortages in the future because of the elimination of blood donors, confusion about donor criteria, and the potential loss of up to 25 percent of the U.S. military donor base. The Committee understands that additional FDA donor restrictions will become effective October 31, 2002.

The Committee believes that maintaining an adequate blood supply is critical for the Nation's public health and is essential for national preparedness in the event of public health emergencies. The Committee urges that FDA and the Department of Health and Human Services to address this issue and consider the potential need for modification of donor deferral criteria or other measures if serious blood shortages continue.

Generic Drugs.—The Committee is deeply concerned about the high cost of prescription drugs, and believes that generic drugs play an important role in the reduction of these costs. Prompt approval of generic drug applications is imperative to making generic drugs available at the earliest possible date to American consumers. Latest statistics, however, indicate that it currently takes 18.4 months, on average, for a generic drug application to be reviewed by FDA. Therefore, the Committee is providing \$45,282,000 for the generic drugs program, an increase of \$6,082,000 over the fiscal year 2002 level, and \$1,500,000 more than the budget request. The Committee expects that this increase will result in more than 75 percent of generic drug applications being reviewed within 6 months of submission.

Standards of Identity.—The Committee is aware of the ongoing debate surrounding increased importation and use of milk protein concentrate. A recent General Accounting Office investigation highlighted a dramatic increase in milk protein concentrate imports. The Committee is concerned with FDA's current lack of enforcement of standards of identity as it relates to the potential illegal use of milk protein concentrate in standardized cheese.

Office of Women's Health.—The Committee believes that it is imperative for FDA to pay sufficient attention to gender-based research, ensuring that products approved by the FDA are safe and effective for women as well as men. The Committee notes that in the budget request, the Office of Women's Health at FDA is funded at approximately \$3,000,000 for program operation and oversight. The Committee encourages FDA to ensure that the Office of Women's Health is sufficiently funded to carry out its activities, and to enhance its funding if necessary.

Orange Book.—The Committee is aware of the contributions of pharmaceutical products to public health and the high cost of product development, but is extremely concerned about the high cost of prescription drugs to American consumers, and is aware that generic drugs, once they reach the marketplace, are available to consumers at a significantly lower cost than the original drug. The FDA maintains a listing of "Approved Drug Products with Therapeutic Equivalence Evaluations," also known as the "Orange Book." Patent information for approved drugs submitted to the FDA are listed and published in this book. FDA has indicated to the Committee that FDA intends to commence a process of providing guidance in the near future on patents which it believes should and should not be listed in the Orange Book. The Committee is supportive, and encourages the Secretary to work with the pharmaceutical and generic industries in this effort. The Committee requests a report on these activities by January 15, 2003.

Medical Device Application Review.—The Committee is aware that for the last several years, premarket approval applications for breakthrough medical technologies have

taken more than a year, despite the 180-day statutory maximum for approval or denial of such applications. Specifically, it is the Committee's understanding that the average length of time for medical device premarket reviews is currently over 400 days. Moreover, the medical technology industry has doubled the investment in research and development in the last decade, and FDA has stated that device technology advances and global impact will continue to affect review performance. In addition, FDA has stated that submissions are becoming increasingly more complex, also contributing to review performance. Therefore, the Committee provides an increase of \$8,000,000 from the fiscal year 2002 level for activities relating to premarket reviews of medical devices. These funds are to be used solely for premarket review activities, with the intention of decreasing review times. The Committee directs the FDA to provide a report within 90 days of the enactment of this Act on how these funds will be obligated, including the number of employees that will be hired, a description of their duties, and the effect these funds will have on premarket review times for medical devices.

Reused Medical Devices.—The Committee recognizes the important role that FDA plays in ensuring that every medical device used on a patient in the United States is both safe and effective for its intended use. Adhering to this principle, the FDA has issued new guidance for the reprocessing of single-use medical devices. The Committee is concerned that the FDA may consider allowing a single premarket submission for reprocessing of multiple models of a certain medical devices. FDA's own research indicates that minor modifications to a device can substantially alter the device's properties with regard to sterilization and reprocessing. This was stated by FDA's own scientists at the 1999 AAMI/FDA Conference entitled "The reuse of single-use devices." Therefore, the Committee urges the FDA to require a premarket submission for every model that is to be reprocessed, if an application was required for the original manufactured device.

Implanted Medical Devices.—The Committee acknowledges the FDA's final rule to improve post-market surveillance for medical devices, and strongly encourages FDA to devote the necessary resources to require registries and monitor well-designed long-term safety studies for implanted devices, including but not limited to jaw implants. As the aging U.S. population becomes more dependent on implanted devices, the Committee believes it is essential that the FDA allocate adequate resources to patient safety activities related to these devices, such as registries, post-market surveillance, and long-term phase IV trials.

Adverse Events Reporting System.—The Committee is concerned about the lack of oversight over reprocessed medical devices when they fail. The General Accounting Office reported that the incidence of failure was unknown. This may be in part due to the fact that FDA's adverse reporting system used by health professionals does not capture data on whether a defective device has been reprocessed. The MEDWATCH system includes on its mandatory reporting form a box for the identification of whether a defective device was or was not reprocessed. The voluntary reporting form, however, does not allow for such reporting. The Committee strongly encourages the agency to update the voluntary reporting form to allow for the identification of whether a defective device has been reprocessed, and if it has been reprocessed, information on how many times the device has been reused.

Tissue Safety.—The Committee remains concerned about the safety of tissue proc-

essing. FDA first initiated oversight of tissue by regulation in 1993. Since then, additional safety concerns have led FDA to publish the "Proposed Approach to the Regulation of Cellular and Tissue-Based Products" on February 28, 1997. Since 1997, FDA has proposed three new regulations to deal with registration of tissue processors and the listing of their products, donor suitability and good manufacturing practice. Only one of these three proposed rules, relating to registration and listing, has been finalized. The Committee is concerned that FDA still has not finalized the donor suitability and good manufacturing practices rules. The urgency of establishing new safety rules has been highlighted by the unfortunate death of one young person due to contaminated tissue. Therefore, the Committee directs the agency to finalize the tissue safety rules within 9 months of the enactment of this Act.

BUILDINGS AND FACILITIES

Appropriations, 2002	\$34,281,000
Budget estimate, 2003	8,000,000
Committee recommendation	11,000,000

In addition to Washington, DC, area laboratories which are in six separate locations, FDA has 16 laboratories at other locations around the country, including regular field laboratories and specialized facilities, as well as the National Center for Toxicological Research complex. Repairs, modifications, improvements and construction to FDA headquarters and field facilities must be made to preserve the properties, ensure employee safety, meet changing program requirements, and permit the agency to keep its laboratory methods up to date.

COMMITTEE RECOMMENDATIONS

For continued repairs and improvements of FDA buildings and facilities, the Committee recommends \$11,000,000. This amount is \$23,281,000 less than the 2002 appropriation and \$3,000,000 more than the budget request.

Included in the amount provided is \$8,000,000 for repair and improvement projects, and \$3,000,000 to complete renovation of the National Center for Toxicology Research.

INDEPENDENT AGENCIES

COMMODITY FUTURES TRADING COMMISSION	
Appropriations, 2002	\$70,700,000
Budget estimate, 2003 ¹	79,884,000
Committee recommendation	93,985,000

¹ Excludes \$2,916,000 requested for employee pension and health benefits.

The Commodity Futures Trading Commission [CFTC] was established as an independent agency by the Commodity Futures Trading Commission Act of 1974 (88 Stat. 1389; 7 U.S.C. 4a).

The Commission administers the Commodity Exchange Act, 7 U.S.C. section 1, et seq. The 1974 Act brought under Federal regulation futures trading in all goods, articles, services, rights, and interests; commodity options trading; and leverage trading in gold and silver bullion and coins; and otherwise strengthened the regulation of the commodity futures trading industry. It established a comprehensive regulatory structure to oversee the volatile futures trading complex.

The purpose of the Commission is to protect and further the economic utility of futures and commodity options markets by encouraging their efficiency, assuring their integrity, and protecting participants against manipulation, abusive trade practices, fraud, and deceit. The objective is to enable the markets to better serve their designated functions of providing a price discovery mechanism and providing price risk insur-

ance. In properly serving these functions, the futures and commodity options markets contribute toward better production and financial planning, more efficient distribution and consumption, and more economical marketing.

Programs in support of the overall mission include market surveillance analysis and research; registration, audits, and contract markets; enforcement; reparations; proceedings; legal counsel; agency direction; and administrative support services. CFTC activities are carried out in Washington, DC; two regional offices located in Chicago and New York; and smaller offices in Kansas City, Los Angeles, and Minneapolis.

COMMITTEE RECOMMENDATIONS

For the Commodity Futures Trading Commission, the Committee recommends \$93,985,000. The amount provided is \$23,285,000 more than the 2002 appropriation and \$14,101,000 more than the budget request.

The Committee is aware that the Farm Security and Rural Investment Act of 2002 exempted CFTC from the salary restrictions imposed by Title V of the United States Code. The Committee is also aware that Title V pay restrictions have historically been a significant factor in CFTC's high turnover rate, nearly triple the government average, among attorneys and economists, which are the Commission's two largest occupational series. The Committee has been informed that this high attrition rate impedes the Commission's ability to develop and sustain a cadre of legal and financial professionals necessary to detect, prosecute, and deter fraud in the expanding and complex financial markets. Therefore, the Committee is providing \$15,915,000 for CFTC to provide compensation and benefits comparable to other Federal financial regulators, or other program costs, if necessary. It is the Committee's understanding that CFTC is currently developing a plan to implement pay comparability with other Federal financial regulators, and the Committee requests a full report on these activities, including their effect on the CFTC attrition rate, quarterly.

FARM CREDIT ADMINISTRATION

LIMITATION ON ADMINISTRATIVE EXPENSES	
Limitation, 2002	(\$36,700,000)
Budget estimate, 2003 ¹	(36,700,000)
Committee recommendation	(38,404,000)

¹ Excludes \$1,796,000 requested for employee pension and health benefits.

The Farm Credit Administration [FCA] is the independent agency in the executive branch of the Government responsible for the examination and regulation of the banks, associations, and other institutions of the Farm Credit System.

Activities of the Farm Credit Administration include the planning and execution of examinations of Farm Credit System institutions and the preparation of examination reports. FCA also establishes standards, enforces rules and regulations, and approves certain actions of the institutions.

The administration and the institutions under its jurisdiction now operate under authorities contained in the Farm Credit Act of 1971, Public Law 92-181, effective December 10, 1971. Public Law 99-205, effective December 23, 1985, restructured FCA and gave the agency regulatory authorities and enforcement powers.

The act provides for the farmer-owned cooperative system to make sound, adequate, and constructive credit available to farmers and ranchers and their cooperatives, rural residences, and associations and other entities upon which farming operations are dependent, and to modernize existing farm

credit law to meet current and future rural credit needs.

The Agricultural Credit Act of 1987 authorized the formation of the Federal Agricultural Mortgage Corporation [FAMC] to operate a secondary market for agricultural and rural housing mortgages. The Farm Credit Administration, under section 8.11 of the Farm Credit Act of 1971, as amended, is assigned the responsibility of regulating this entity and assuring its safe and sound operation.

Expenses of the Farm Credit Administration are paid by assessments collected from the Farm Credit System institutions and by assessments to the Federal Agricultural Mortgage Corporation.

COMMITTEE RECOMMENDATIONS

The Committee recommends a limitation of \$38,404,000 on administrative expenses of the Farm Credit Administration [FCA]. This is \$1,704,000 more than the fiscal year 2002 level and the budget request.

The Committee recommends an increase in the limitation of FCA's administrative expenses for two reasons. First, it is the Committee's understanding that pending a study scheduled to be completed this summer, the FCA may be unable to comply with a statute requiring it to provide employees with comparable compensation to other Federal financial regulatory agencies. Second, the FCA is facing the potential loss of many seasoned examiners and other employees through retirement. There is a need to hire up to an additional 13 examiners to prevent a loss that could significantly strain FCA's ability to effectively carry out its financial safety and soundness examination and enforcement functions. It is the Committee's understanding that this increase in FCA's limitation on administrative expenses will not result in an increase in the amount of the assessments on system institutions. The Committee requests a report on the outcome of studies currently underway related to this increase, including the actual limitation amount necessary, the amount of carryover funds in FCA's reserve, and the change, if any, in the amount of the assessments on system institutions.

TITLE VII—GENERAL PROVISIONS

Sections 701–731 of the general provisions are essentially the same as those included in the fiscal year 2002 and previous years' appropriations acts.

In addition, the Committee recommends the following provisions:

Section 732 to provide eligibility for rural development programs to the city of Dunkirk, NY.

Section 733 to provide assistance through the Rural Housing Assistance Grants program for agriculture processing workers in the State of Wisconsin.

Section 734 to provide eligibility for conservation projects in the State of Illinois.

Section 735 to allow up to 20 percent of competitive research funds to be used to carry out awards under the same terms and conditions as those pursuant to section 401 of the Agriculture Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7621).

Section 736 to provide eligibility for a conservation program in the State of West Virginia.

Section 737 to allow a reimbursement to the USDA Office of General Counsel from salaries and expenses accounts of agencies

for which the General Counsel will provide certain services, subject to prior approval of the Committees on Appropriations of the House and the Senate.

Section 738 to prohibit funds from being used to carry out section 14(h)(i) of the Watershed Protection and Flood Prevention Act.

Section 739 to prohibit funds from being used to carry out section Subtitle I of the Consolidated Farm and Rural Development Act.

Section 740 to prohibit funds from being used to carry out section 6405 of Public Law 107–171.

Section 741 to limit funds available to carry out section 9010 of Public Law 107–171.

Section 742 to provide eligibility for a conservation program in the State of Arkansas.

Section 743 to provide eligibility for a conservation program in the State of Alaska.

Section 744 to provide direction in the implementation of the Food for Progress program.

Section 745 to rescind unobligated balances of funds appropriated to the Cooperative State Research, Education, and Extension Service by Public Law 104–180.

Section 746 to limit the use of funds for programs under 7 U.S.C. 1736f–1.

Section 747 to provide eligibility for conservation programs in the States of Utah and Nebraska.

Section 748 to establish certain authorities regarding the Denali Commission.

Section 749 to rescind funds to carry out the Rural Clean Water program.

Section 750 to establish a program for loans and grants related to the dairy industry in the State of Alaska.

Section 751 to allow the Secretary to transfer up to \$2,000,000 from the Food and Nutrition Service to the Economic Research Service for studies and evaluations on behalf of the Food and Nutrition Service.

Section 752 to complete the project regarding the John Ogonowski farm in a manner consistent with the rules and regulations of the Farmland Protection Program. Because of the strong national demand for Farmland Protection Program funds and the need to provide full access to Program funds nationally, the Committee directs the Secretary to carry out the project without providing additional funding under the Program for projects in the State of Massachusetts.

Section 753 to authorize Department of Agriculture employees to carry firearms for personal protection in remote locations that may be populated by bears and other dangerous wildlife.

Section 754 to limit funds available for the Export Enhancement Program.

Section 755 to structure the schedule of payments for the rural development guaranteed underwriting loan program.

PROGRAM, PROJECT, AND ACTIVITY

During fiscal year 2003, for purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) or the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119), the following information provides the definition of the term "program, project, and activity" for departments and agencies under the jurisdiction of the Agriculture, Rural Development, and Related Agencies Subcommittee. The term "program, project, and activity" shall include the most specific level of budget items iden-

tified in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2003, the House and Senate Committee reports, and the conference report and accompanying joint explanatory statement of the managers of the committee of conference.

If a sequestration order is necessary, in implementing the Presidential order, departments and agencies shall apply any percentage reduction required for fiscal year 2003 pursuant to the provisions of Public Law 99–177 or Public Law 100–119 to all items specified in the explanatory notes submitted to the Committees on Appropriations of the House and Senate in support of the fiscal year 2003 budget estimates, as amended, for such departments and agencies, as modified by congressional action, and in addition:

For the Agricultural Research Service the definition shall include specific research locations as identified in the explanatory notes and lines of research specifically identified in the reports of the House and Senate Appropriations Committees.

For the Natural Resources Conservation Service the definition shall include individual flood prevention projects as identified in the explanatory notes and individual operational watershed projects as summarized in the notes.

For the Farm Service Agency the definition shall include individual, regional, State, district, and county offices.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports accompanying general appropriations bills identify each recommended amendment which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

The Committee recommends funding for the following program which currently lacks authorization for fiscal year 2003:

Compact of Free Association Act of 1985.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italics; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

[COMMITTEE PRINT]

[NOTICE: This is a draft for use of the Committee and its staff only, in preparation for markup.]

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. GREGG, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the Departments of Commerce, Justice, and State, the judiciary, and related agencies for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amount in new budget (obligational) authority

Total bill as reported to	
Senate	\$47,067,043,000
Amount of appropriations, 2002	44,601,829,000
Amount of budget esti- mates, 2003, as amended	44,007,407,000
The bill as reported to the Senate:	
Above the appropriations for 2002	+330,214,000
Above the estimates for 2003	+924,636,000

BACKGROUND**PURPOSE OF THE BILL**

This bill makes appropriations for the functions of the Departments of Commerce, Justice, State, the Judiciary and Related Agencies for the period October 1, 2002, through September 30, 2003. Functional areas include the pay, allowances, and support of personnel, operation and maintenance, procurement of equipment and systems, and research.

The bill provides funds for responding to the threat of terrorism, fighting crime, enhancing drug enforcement, addressing the shortcomings of the immigration process, continuing the judicial process, conducting commerce within the United States, improving State Department operations, and fulfilling the needs of various independent agencies.

HEARINGS

The Subcommittee on Commerce, Justice, State, the Judiciary and Related Agencies Appropriations began hearings on the fiscal year 2003 budget request on February 26, 2002, and concluded them on March 21, 2002, after holding 7 separate sessions. The subcommittee heard testimony from representatives of the Departments of Commerce, Justice, State, the Judiciary, and various commissions.

SUMMARY OF THE BILL

The budget estimates for the departments and agencies included in the accompanying bill are contained in the budget of the United States for fiscal year 2003 submitted on January 30, 2002.

The total amount of new budget authority recommended by the Committee for fiscal year 2003 is \$44,932,043,000. This amount is an increase of \$330,214,000 above appropriations enacted for fiscal year 2002 for these departments and agencies. The Committee recommendation is \$924,636,000 above the budget estimates. The following paragraphs highlight major themes contained in this bill:

FIGHTING TERROR AT ITS ROOTS THROUGH DEMOCRACY

The Committee has responded to the threat of terrorism by reinforcing the Na-

tion's preparedness and response capabilities. However, this threat also requires a long term response that addresses the root causes of terrorism. The United States can begin to do this by supporting organizations that work to bring democracy to countries that suffer under authoritarian regimes. Together with our allies, we must work to ensure peaceful and stable political and economic transitions in the troubled areas of the Middle East, Africa, South and Central Asia, and other regions where terrorism has flourished over the last decade. Our ultimate goal must be greater than mere regime-change. It must be for democratic principles to win the hearts and minds of all those who have never experienced democracy. We cannot do this unless we are willing to commit resources to fostering more open political systems, more transparent and effective governments and legal systems, more engaged and responsible civil societies, and open markets. The recommendation therefore includes initial funding to establish a center in Turkey, the mission of which will be to promote mutual understanding between the Muslim nations of the world and the West. The recommendation also includes substantial increases for certain U.S.-based non-profit organizations to augment their work in critical parts of the world, particularly the Middle East. In addition to the pioneering work of such independent organizations, the Department of State has a role to play in altering inaccurate perceptions of the United States. From direct U.S. assistance, which does not fall under this Committee's jurisdiction, to public diplomacy, which does, the Committee understands that the Department is developing a strategy to address the root causes of terrorism. The Committee looks forward to working with the State Department to engineer and execute this strategy.

PROTECTING AMERICA'S CHILDREN

The Commerce, Justice, State, and the Judiciary appropriations bill is the natural home of programs that keep our children safe. Programs such as the Safe Schools Initiative and Cops In Schools have for years enhanced the physical security of schools while creating a rapport between law enforcement officials and youths. Coupled with anti-drug, youth violence, and after-school programs, these initiatives have improved the condition of America's at-risk youth. This year, the Committee expanded the concept of protecting our children to include training School Resource Officers to prevent and deter acts of terrorism. September 11 demonstrated that terrorists are in constant search of new ways to harm the United States. We cannot ignore the disturbing reality that our schools could be targeted. The bill therefore includes a \$10,000,000 "down payment" for schools to begin taking steps to prepare for this contingency. The threat to American children does not end at U.S. borders, however, and the Committee has begun an initiative under the State Department to enhance the security of schools attended by American children overseas.

REFORMING THE INS AND FBI

Perhaps no agencies face greater challenges in the wake of September 11 than the Federal Bureau of Investigation [FBI] and the Immigration and Naturalization Service [INS]. Both agencies awoke that dreadful day in the midst of the greatest internal crises in their respective histories. Years of mismanagement, neglect, and confusion left otherwise dedicated professionals ill-equipped and ill-prepared for the daily challenges of enforcing the Nation's criminal and immigration laws, much less deal with a security catastrophe that many liken to the attack on Pearl Harbor. "What is to be

done?" is the question on everyone's lips and there are as many answers as there are observers. After appropriating more than \$1,200,000,000 in emergency spending to the FBI and INS, it is unclear what improvements, if any, have been achieved in their domestic security posture. The Committee recommendation for the FBI and the INS provides an opportunity for both agencies to reflect, regroup, and refocus in anticipation of the fiscal year 2004 budget request.

CONTINUED UNITED NATIONS REFORM

At the insistence of the United States, the United Nations [U.N.] has undertaken significant management and budgetary reforms. But the fulfillment of Helms-Biden does not mean the United Nations can revert to its old ways. The U.N. now faces an even greater challenge: to sustain and build upon the positive reforms that have occurred over the last few years. Only by moving forward with an aggressive reform agenda—continually updating the organization's budget practices, improving internal oversight, and containing unnecessary growth in the U.N. bureaucracy—will the U.N. be able to meet the demands of a rapidly-changing global security environment. The Commerce, Justice, State, and the Judiciary appropriations bill provides an opportunity for the American people, who pay one-quarter of the U.N.'s annual operating costs, to demand the continued improvement and reform of U.N. operations. The Committee acknowledges the importance of this task, and looks forward to working with the U.N. towards our common goals.

PROTECTING SMALL INVESTORS

From the events of September 11, 2001 to the recent major accounting scandals and subsequent demise of multiple nationally recognized corporations, the confidence of U.S. small investors in the integrity and fairness of our Nation's securities industry and markets has been shaken severely. Small investors have lost billions of dollars in their retirement accounts, college funds, and portfolios. At the same time, they have had to endure the spectacle of those corporate executives with whom they entrusted their life savings skirt their corporate responsibilities and enrich themselves at the expense of shareholders. In addition, small investors have begun to learn more about the mixed and often conflicting incentives analysts face when making stock recommendations.

In response to these challenges and the need to revive the faith of small investors, the Committee recommends an appropriation of \$656,700,000 for the U.S. Securities and Exchange Commission [SEC] for fiscal year 2003. This amount will allow the SEC to hire at least 700 new staff to assist in pursuing corporate malfeasance and financial fraud, require enhanced public disclosure by corporations and stock analysts, expand its examination and inspection program, and continue working on market structure issues. This amount will also allow the SEC to develop a robust electronic document management system that will increase staff productivity while decreasing the SEC's reliance on paper documents. In addition, at this funding level the Committee expects that the SEC will begin addressing its backlog of information technology needs so that staff can begin performing more in-depth analytical reviews. The Committee believes that by providing the SEC with this funding increase, the SEC will be able to begin reinforcing and strengthening the foundation upon which the confidence of America's small investors and the entire investing public is built.

REPROGRAMMINGS, REORGANIZATIONS, AND
RELOCATIONS

As in previous years, the Committee is inserting section 605 under title VI of the general provisions of the bill.

The Committee directs that both the House and Senate chairmen of the Subcommittees on the Departments of Commerce, Justice, and State, the Judiciary, and related agencies will be notified by letter at least 15 days prior to:

- Reprogramming of funds, whether permanent or temporary, in excess of \$500,000 or 10 percent, whichever is less, between programs or activities. In addition, the Committee desires to be notified of reprogramming actions which are less than these amounts if such actions would have the effect of committing the agency to significant funding requirements in future years;
- Increasing funds or personnel by any means for any project or activity for which funds have been denied or restricted;
- Creating new programs, offices, agencies, or commissions, or substantially augmenting existing programs, offices, agencies, or commissions;
- Relocating offices or employees;
- Reorganizing offices, programs, or activities, including consolidations, expansions, and changes in names or designations;
- Contracting out or privatizing any functions or activities presently performed by Federal employees funded by this subcommittee;
- Initiating construction projects in excess of \$500,000 not specifically approved by the Committee; and
- Adding, expanding, converting, or altering of space in any newly constructed facility for a period of one year after contract close-out of the new facility.

For the purpose of this section, a construction project includes all cost activities necessary to produce a complete and usable facility. Projects include construction, addition, expansion, conversion, or acquisition of an existing building, land, or structure. This limitation applies to the total cost of the project without regard for the fiscal year that funds designated, or used, for the project were appropriated. This includes renovation projects which substantially expand or result in a change in the type of space or facility (garage to office, storage to garage, storage to office, etc.). This includes construction involving more than one building or structure or utility system or site improvements at a location which support the provision of a complete and usable facility.

The Committee directs each department, commission, or agency to provide their current number of political appointees and the number as of January 30, 2003. These amounts should be broken out by pay level. This report should be provided to the Committees on Appropriations no later than April 10, 2003. Also the Committee shall be notified, when the number of political appointees rises above 10 percent from either of the previous 2 years or when five or more political appointees are added in a given year. The Committee should be notified 30 days before either of these situations occurs. Similar notification should be provided when the same number of personnel positions is converted from political appointments to civil service positions.

In addition, the Committee directs departments or agencies funded in the accompanying bill that are planning to conduct a reduction in force to notify the Committees by letter 30 days in advance of the date of the proposed personnel action. Also, the

Committee directs that any items which are subject to interpretation will be reported.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget [OMB] decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. In the future, long-established procedures, with respect to discretionary spending proposals that require legislative action, should be followed.

Proper budgeting.—The Committee is aware that it is routine practice at the Office of Management & Budget [OMB] to non-recur capital investments and to force agencies to seek operations and maintenance, repair, and modernization funds as program increases rather than adjustments to base. The result, seen again and again by the Committee, is that new investments quickly degrade, leading to a costly and inefficient "collapse-crisis-rebuild" cycle for computer and communications networks, specialized equipment, vehicles, and facilities. The Committee, as the agent for the taxpayer, has made substantial capital investments in the Departments of Justice, Commerce, and State in the last 6 years. The Committee intends to protect that investment and expects the agencies to do the same. Therefore, the Committee urges OMB to properly recur capital investments in the fiscal year 2004 budget request and thereafter.

Liaison.—The Committee shares the desire of the House to channel most of its inquiries and requests for information and assistance through the budget offices or comptroller organizations, but reserves the right to call upon all organizations throughout the agencies. The Committee continues to stress the natural affinity between these offices and the Appropriations Committee, which makes such a relationship imperative.

TITLE I—DEPARTMENT OF JUSTICE

The Committee has made funding for combating terrorism and law enforcement the centerpiece of the fiscal year 2003 appropria-

tions bill. The Committee recommends \$24,059,727,000 in new budget (obligational) authority in the accompanying bill for the Department of Justice with a strong emphasis on combating terrorism and law enforcement activities for fiscal year 2003.

Modular cost budgeting and chronic shortfalls.—Built into the cost of every new Justice Department employee are funds to partially cover so-called "modular costs", the costs of equipment, vehicles, facilities, and training integral to an employee's ability to perform his or her duty. Yet components are, almost without exception, desperately short of equipment, vehicles, facilities, and training. The reasons for this are unclear. However, it seems apparent that the modular cost approach has lulled components into ignoring necessary capital investments. It has also grossly inflated the cost of new employees without commensurate benefit. Built-in capital investment funds are siphoned off for purposes unknown while the Committee finds itself responsible for pulling together funds to address significant shortfalls in everything from computers to fingerprint powder. The Committee believes that the long-term health of the Department requires a new approach to budgeting. Therefore, the Justice Department is directed to drop modular cost budgeting beginning with the fiscal year 2004 request. The costing of new employees shall only include personnel salaries and benefits. Costs associated with new hires characterized broadly as "Contractual Services and Supplies", "Acquisition of Assets", and "Items with Multiple Object Classes" shall be budgeted directly in separate and identifiable capital investment lines in the request of each component. Justice Management Division is directed to submit a report on how this was achieved not later than February 5, 2003. The Committee recognizes that this report is required shortly before the fiscal year 2004 President's budget request is submitted to Congress. However, the intent of the Committee was made known to the Department in July of 2002.

Morale.—The Committee is aware that the Justice Department intends to cap the reimbursement per employee for professional liability insurance [PLI] at \$50, a cut of up to \$65, due to "budget shortfalls". The Committee is unaware of any shortfalls. PLI is all that may stand between a law enforcement officer and his or her family and impoverishment should the proper performance of his or her duties result in a liability claim. The Committee can think of few things more apt to demoralize line officers who confront split second decisions every day. Regardless of other considerations, the Justice Department is directed to reimburse employees for the full amount policy allows for PLI. The Assistant Attorney General for Administration is directed to issue a circular to components to that effect and to confirm by letter, with circular attached, to the Committees on Appropriations that this directive has been implemented.

Budget restructuring.—The Committee is perplexed by the administration's pursuit of budget restructuring. Justice Department components have shown such contempt for the reprogramming process that reducing the number of decision units per component to allow greater "flexibility" seems entirely unnecessary. There have been so many violations of section 605 of the fiscal year 2002 Commerce, Justice, State Appropriations Act that there is not room enough to enumerate them all. While the Attorney General's [AG's] December 9, 2002 memo and the Deputy Attorney General's December 10, 2002 memo regarding the reprogramming process are commendable, a means of compelling agencies to follow established procedures remains elusive. In the hopes of enforcing the

AG's will, the recommendation includes a variety of mechanisms that should help promote the reprogramming process.

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

Appropriations, 2002	\$91,668,000
Budget estimate, 2003	114,579,000
Committee recommendation	99,696,000

The Committee recommends an appropriation of \$99,696,000. The recommendation is \$14,883,000 below the budget request. The Committee recommendation includes a 4.1 percent pay raise for Federal employees.

This account funds the development of policy objectives and the overall management of the Department of Justice.

Deputy Attorney General.—The Committee has concentrated terrorism resources in the hands of the Attorney General with some trepidation, knowing that day to day oversight of terrorism operations will be left to the Office of the Deputy Attorney General [ODAG]. Nine months ago, the Committee asked the ODAG for a list of its responsibilities. That list was provided just days before this report went to print. The Committee remains concerned that the expansion of the ODAG's "chop authority" will create a serious bottleneck at the Justice Department. If the simplest administrative tasks take the ODAG almost a year to address, the delays that will result from the ODAG's assumption of control of terrorism task forces will be significant. No more than \$4,663,000 of the amount provided under this heading may be made available to the ODAG until that office demonstrates to the Committee's satisfaction that it has organized itself to properly lead the war on terrorism. Should such leadership be demonstrated, the Committee will consider a reprogramming to further bolster the ODAG's capabilities.

Office of Intelligence Policy and Review.—The unprecedented public dispute between the Foreign Intelligence Surveillance Court and the Justice Department emphasizes the need for the most robust oversight of the Foreign Intelligence Surveillance Act [FISA] warrant process. The Committee expects the Office of Intelligence Policy and Review [OIPR] to continue balancing Constitutional protections against investigative imperatives. In that capacity, the Committee expects OIPR to be directly involved at every stage of every wiretap case. The Committee recommendation provides an increase of \$2,234,000 over fiscal 2002 to enhance OIPR oversight capabilities. OIPR is directed to provide quarterly briefings to the Committees on Appropriations beginning April 1, 2003 on FISA-related activities, issues, compliance with Congressional directives, perceived abuses, and needed statutory corrections.

International Law Enforcement Training Academy/Mexico.—Language regarding the establishment of an International Law Enforcement Training Academy [ILEA] in Mexico was included in Public Law 107-77. Public Law 107-77 required the Attorney General to submit a report on the feasibility of establishing an ILEA—Mexico, including a timeline, cost analysis, and implementation plan no later than May 12, 2002. While the report, submitted on September 11, 2002, included comprehensive sections on the background, objectives, program strategy, and organization and administration of ILEAs, it swiftly dismissed ILEA—Mexico as a possibility. The Committee disagrees with the Attorney General's assessment that a resort location would be better suited to host the ILEA and directs the Department to submit a report to the Committees on Appropriations no later than June 4, 2003, that includes

a cost estimate and timeline for constructing ILEA—Mexico in one of the following States: Chiapas, Durango, Oaxaca, or Yucatan.

Security Locks Initiative.—It is imperative for the Justice Department to store classified materials securely and in compliance with Federal security standard FF-L-2740A. The recommendation includes \$2,000,000 to upgrade security locks to ensure the safety of such critical information.

Continuity of Operations.—The collapse of local communications networks in New York in the immediate wake of the destruction of the World Trade Center highlighted the value of a mobile situation room for maintaining continuity of operations during a crisis. Though various components have fixed situation rooms, palletized versions of deployable command posts, or both, none have vehicle-based mobile situation rooms that are both instantly deployable and remain on-line, capable of command and control, from the moment of departure to arrival and thereafter. Many crises will require that the Attorney General or other high-level Justice Department officials be on-site for the duration. A self-contained, self-sufficient, mobile command post offers significant advantages over distant or ad hoc situation rooms. The Committee is aware that the Department of Justice has completed concept definition for such a vehicle. The Committee endorses the concept, as currently defined, and recommends \$4,000,000 for design, development, and procurement of a mobile situation room. The Committee expects the vehicle to be universally available to the Department of Justice component heads as needed. Crew positions should be permanently filled by specialists from the various components and "gold" and "blue" crews should train and deploy as a team. The Committee also recommends that day to day care of the vehicle when not deployed be left to the United States Marshals Service.

ANTI-TERRORISM TASK FORCES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$63,700,000

The Committee recommends an appropriation of \$63,700,000.

This new account funds Anti-Terrorism Task Forces [ATTFs].

Previously, funding for ATTFS was provided under the heading "Salaries and Expenses, United States Attorneys". ATTFS are charged with facilitating information sharing between Federal, State, and local authorities and coordinating anti-terrorism activities within each judicial district. The Committee believes that centralizing task force funding under the Attorney General [AG] will ensure proper operational control of ATTFS. The Committee expects to receive regular updates from the AG on the activities of the ATTFS.

JOINT TERRORISM TASK FORCES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$158,547,000

The Committee recommends an appropriation of \$158,547,000.

This new account funds Joint Terrorism Task Forces [JTTFs].

Previously, funding for JTTFs was provided under the headings "Salaries and Expenses, United States Marshals Service", "Federal Bureau of Investigation, Salaries and Expenses", and "Immigration and Naturalization Service, Salaries and Expenses, Enforcement and Border Affairs". JTTFs are charged with facilitating information sharing between Federal, State, and local au-

thorities and coordinating terrorism investigations in more than 50 cities. The Committee believes that centralizing task force funding under the Attorney General [AG] will ensure proper operational control of JTTFs. The Committee expects to receive regular updates from the AG on the activities of the JTTFs.

FOREIGN TERRORIST TRACKING TASK FORCE

Appropriations, 2002	
Budget estimate, 2003	\$49,000,000
Committee recommendation	62,000,000

The Committee recommends an appropriation of \$62,000,000.

This new account funds the Foreign Terrorist Tracking Task Force [FTTTF]. The recommendation is \$13,000,000 above the amount requested in a budget amendment received November 14, 2002.

Previously, funding for the FTTTF was provided under the heading "Immigration and Naturalization Service, Salaries and Expenses, Enforcement and Border Affairs". The FTTTF is an inter-agency data fusion operation stood up on an ad hoc basis last year. The FTTTF's advanced information technology capabilities are intended to compensate for profound shortcomings in Justice Department, particularly FBI and INS, data warehousing, mining, and analysis capabilities. These advanced networking capabilities are also intended to eliminate the barriers that had led to past communications and information sharing failures. Besides heavy Justice Department participation, Treasury, State, DOD, CIA, NSA, HHS, SSA, and OPM all have staff onboard. The FTTTF is charged with denying terrorists entry into the United States and locating, detaining, prosecuting, and deporting terrorists that have already entered the country.

Although described as a stop gap measure, it has become clear that the FTTTF is at least a semi-permanent activity. Its ultimate permanence will depend upon the degree that the FTTTF is or is not duplicating existing or planned Justice Department and Homeland Security operations, a persistent and troubling concern that has yet to be resolved.

The Committee believes that centralizing task force funding under the Attorney General [AG] will ensure proper operational control of the FTTTF. The Committee expects to receive regular updates from the AG on the activities of FTTTF.

IDENTIFICATION SYSTEMS INTEGRATION

Appropriations, 2002	
Budget estimate, 2003	\$24,478,000
Committee recommendation	

The Committee does not recommend an appropriation for this new account. Instead, funding is provided in separate accounts within this title.

There are no advantages in merging funding for the Joint Automated Booking System and Automated Biometric Identification System/Integrated Automated Fingerprint Identification System integration into a single account. Historically, such mergers have hindered program progress and complicated program oversight.

JOINT AUTOMATED BOOKING SYSTEM

Appropriations, 2002	\$1,000,000
Budget estimate, 2003	
Committee recommendation	15,973,000

The Committee recommends an appropriation of \$15,973,000.

This account centrally funds development, acquisition, and deployment of the Joint Automated Booking System [JABS].

The Committee has not adopted an Administration proposal to merge funding for

JABS and Automated Biometric Identification System/Integrated Automated Fingerprint Identification System integration into a single new account.

JABS incentive funds are to be distributed to the component or components making the best progress in installing and operating the system.

AUTOMATED BIOMETRIC IDENTIFICATION SYSTEM/INTEGRATED AUTOMATED FINGERPRINT IDENTIFICATION SYSTEM INTEGRATION

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$9,000,000

The Committee recommends an appropriation of \$9,000,000. The recommendation is identical to the budget request and to last year's funding level, which included funding from available resources within the Department.

This new account funds integration of the Automated Biometric Identification System and the Integrated Automated Fingerprint Identification System [IDENT/IAFIS].

Previously, funding for IDENT/IAFIS integration was provided under the heading "General Administration, Salaries and Expenses". The Committee has not adopted an Administration proposal to merge funding for IDENT/IAFIS integration and the Joint Automated Booking System into a single account.

There are considerable cost implications with this effort. As the Inspector General noted in a December 2001 report, and the Justice Department confirmed in March 2002 briefings, procurement, and particularly operational, costs to the Immigration and Naturalization Service [INS] of an integrated IDENT/IAFIS system could approach \$1,900,000,000. This does not include additional significant costs that indirectly would be incurred by the Marshals Service, U.S. Attorneys, Executive Office of Immigration Review, and Bureau of Prisons. The Committee will have difficulty meeting these cost requirements in the foreseeable future. Rather than focusing on the relatively simple matter of integrating the two systems, Justice must craft an affordable, comprehensive plan that addresses border security throughout the Department. Therefore, 25 percent of \$8,000,000 provided under this heading shall be available for obligation and expenditure only after the Justice Management Division delivers to the Committees on Appropriations a cost and operational effectiveness analysis [COEA] for IDENT/IAFIS. The COEA should cover all Justice Department costs, not just those of the Border Patrol or the INS. The remaining \$1,000,000 shall be for a pilot program for software for IAFIS that is capable of expedited background checks and that is capable of 10-fingerprint to 2-fingerprint comparisons.

CHIMERA

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$83,400,000

The Committee recommends an appropriation of \$83,400,000. The recommendation is \$83,400,000 above the budget request. This request is identical to a requested Homeland Security program increase under INS.

This new account funds the design, development, testing, and deployment of an interoperable computer network, "Chimera", for the Immigration and Naturalization Service.

INS suffers to an extreme from information technology [IT] "stovepiping". Over the years, INS has developed a myriad of independent systems to address specific needs or missions. These systems tend not to replace, but serve as an adjunct to, paper-driven

processes. The systems have limited capability and are rarely compatible either internally or with other agencies. The significant amount of funds invested in these systems have yielded little results.

Chimera will be a common hardware/software backbone deployed INS-wide. It will serve as the searchable, shareable repository of data bases migrated from existing ("legacy") INS systems that are incompatible with one another and with other law enforcement, State Department, and intelligence community systems. It also will serve as the foundation for student tracking and entry/exit applications.

To start, JMD shall undertake a comprehensive survey of existing INS IT systems to build a definitive baseline of current capabilities and deficiencies. The design of Chimera's architecture should build directly upon this foundation.

Prior to the release for obligation and expenditure of the funds provided under this heading or "Atlas" funding provided under the heading "Immigration and Naturalization Service, Salaries and Expenses", JMD shall brief the Committees on Appropriations on: (1) current INS IT systems capabilities and shortcomings, (2) opportunities to leverage technical solutions developed, or lessons learned, by other Federal agencies and private industry, (3) program priorities designed to maximize INS performance as quickly as possible, and (4) projected schedule, with modular and measurable milestones, and costs, by fiscal year. JMD shall also assess the value of developing and testing a prototype integrated database.

LEGAL ACTIVITIES OFFICE AUTOMATION

Appropriations, 2002	\$15,765,000
Budget estimate, 2003	15,942,000
Committee recommendation	77,127,000

The Committee recommends an appropriation of \$77,127,000. The recommendation is \$61,185,000 above the budget request and \$42,527,000 more than the total amount provided last year. The Committee has not adopted a recommendation to use prior year funds and has instead appropriated the entire amount sought for LAOA.

This account centrally funds acquisition, deployment, and maintenance of Legal Activities Office Automation [LAOA] systems, the largest components of which are the Justice Consolidated Network [JCN] and the Justice Consolidated Office Network [JCON].

LAOA is the computer modernization program for the legal divisions, including the Antitrust Division, the U.S. Attorneys, the U.S. Marshals Service, the U.S. Trustees, the Executive Office for Immigration Review, the Community Relations Service, and the offices funded through the "General Administration" and "General Legal Activities" accounts. The Committee has pushed hard in previous years to increase the funds for, and widen the scope of, JCN and JCON to maximize the benefits of a common computer system across components. This year, the Committee recommendation incorporates the Bureau of Prisons and Office of Justice Programs into the network.

NARROWBAND COMMUNICATIONS

Appropriations, 2002	\$94,615,000
Budget estimate, 2003	149,254,000
Committee recommendation	149,254,000

The Committee recommends an appropriation of \$149,254,000. The recommendation is identical to the budget request. The recommendation includes a 4.1 percent pay adjustment for Federal employees.

This account centrally funds development, acquisition, deployment, and operation and maintenance of the Justice Department's

narrowband wireless communications network. By law, all Justice components operating Land Mobile Radio systems in the VHF band must convert by January 1, 2005.

A number of critical development milestones should be reached by March 2003, and the Committee expects the Wireless Management Office to keep it fully apprised of program progress.

COUNTERTERRORISM FUND

Appropriations, 2002	\$4,989,000
Budget estimate, 2003	
Committee recommendation	

The Committee does not recommend an appropriation for the "Counterterrorism fund" account. The recommendation is identical to the request and \$4,989,000 below the fiscal year 2002 appropriation. The Committee is aware that there will be carryover balances available in fiscal year 2003 in excess of \$43,000,000.

The purpose of the fund is to cover the costs incurred in reestablishing the operational capability of an office or facility which has been damaged or destroyed as a result of any domestic or international terrorist incident. It may also be used to cover the costs of providing support to counter, investigate, or prosecute domestic or international terrorism.

ADMINISTRATIVE REVIEW AND APPEALS

Appropriations, 2002	\$177,147,000
Budget estimate, 2003	193,535,000
Committee recommendation	180,466,000

The Committee recommends an appropriation of \$180,466,000. The recommendation is \$13,069,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Executive Office for Immigration Review [EOIR] includes the Board of Immigration Appeals, immigration judges, and administrative law judges who decide through administrative hearings whether to admit or exclude aliens seeking to enter the country, and whether to deport or adjust the status of aliens whose status has been challenged. This account also funds the Office of the Pardon Attorney which receives, investigates, and considers petitions for all forms of executive clemency.

DETENTION TRUSTEE

Appropriations, 2002	\$1,000,000
Budget estimate, 2003	1,388,566,000
Committee recommendation	1,385,966,000

The Committee recommends an appropriation of \$1,385,966,000. The recommendation is \$2,600,000 below the budget request.

The Detention Trustee oversees Federal detainees.

Last year, the Committee's recommendation for the Detention Trustee included funding for the Justice Prisoner and Alien Transportation System [JPATS] and requested that the Justice Department include in its fiscal year 2003 budget request a proposal to centralize all detention funding under the Trustee. The Committee recommendation included that direction because only with control of funding can the Detention Trustee effectively oversee and manage detention. The Committee is pleased that the budget request met the Committee's recommendation last year to the extent that it centralizes funding for the Federal Prisoner Detention Program and the Immigration and Naturalization Service's [INS] Service Processing Centers within the Department of Justice Detention Trustee.

However, while the Trustee has management responsibility for detention, and finally has been given control of funding for

bed space, detention personnel still remain under the control of the various components. Without control of personnel, the Trustee will be forced to regularly contend with Presidential-appointed officials in the Marshals Service [USMS], the INS, and the Bureau of Prisons [BoP] of this or any future Administration who may disagree with his "guidance". If the Trustee is to effectively manage bed space, he must control the experts that negotiate inter-governmental agreements. Therefore, not later than 45 days after enactment of this Act, the Justice Department is directed to transfer such personnel from the USMS, INS, and BoP to the Detention Trustee as may be necessary to give the Trustee full operational control of bed space management. To the degree possible, such transfers should be voluntary and involve a minimum of disruption. Should said transfers not occur by this date, the \$1,870,000 provided under this heading for additional management personnel shall immediately be transferred to the Working Capital Fund.

National clearinghouse for detention space.—The Committee fully supports the notion of a one-stop shop for detention space. Such a clearinghouse may be the only way to break the current "seller's market" that has allowed local bed space providers to charge excessive daily rates. The Committee believes that existing Justice networks, such as Law Enforcement Online, may serve as a vehicle for the clearinghouse or that lessons learned in the FBI's Internet cafe program may speed development of the clearinghouse. In cooperation with the Justice Department's Chief Information Officer, the Trustee is directed to pursue any and all cost-effective means of establishing the clearinghouse as rapidly as possible. The Committee recommendation includes \$5,000,000 for this effort. The Committee expects to be regularly briefed on the Trustee's progress in making the clearinghouse a reality.

Justice Prisoner and Alien Transportation System.—The Committee is disappointed by the Justice Department's failure to make the Trustee the head of the JPATS. As the Committee noted last year, endless disputes between JPATS "customers" are distracting managers from the complex task of operating an airline in a high security environment. As importantly, the lack of a sufficiently powerful manager leaves the program without an advocate in all-important budget debates. The result is a wide-body fleet in such a ruinous condition that only the dedication of the maintenance personnel and pilots keep these aircraft in the air. These problems leave managers little time to explore possible efficiencies in routing, scheduling, or other operational areas. The Department's proposed solution, outsourcing, fails to address the real issues affecting JPATS and is unacceptable except on a carefully limited, piecemeal basis. There should be no confusion that ultimate responsibility for the safe and secure transportation of prisoners rests solely with the Justice Department. That being so, the Trustee is directed to assume control of JPATS operations not later than May 1, 2003. The Committee will consider a reprogramming request to fund a business process re-engineering study after the Trustee has taken over JPATS and after the immediate need to replace aging wide-body aircraft has been fully addressed.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$50,735,000
Budget estimate, 2003	63,937,000
Committee recommenda-	
tion	54,825,000

The Committee recommends an appropriation of \$54,825,000. The recommendation is

\$9,112,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Committee recommendation includes an increase of \$3,000,000 for 3 attorneys, 10 agents, and 12 auditors or program analysts to provide effective oversight of the Department's counterterrorism program. As the Inspector General [IG] noted in his budget justification, the Department's Strategic Plan for 2001-2006 "notes the significant management challenge facing the Department as it seeks to effectively manage its counterterrorism program and avoid potential gaps in coverage or duplicate services provided by state and local governments. In addition, the infusion of billions of dollars into the Department's efforts to combat terrorism presents its own set of challenges." The Committee concurs with the judgment of the IG and looks forward to regular progress reports.

U.S. PAROLE COMMISSION SALARIES AND EXPENSES

Appropriations, 2002	\$9,876,000
Budget estimate, 2003	10,862,000
Committee recommenda-	
tion	10,114,000

The Committee recommends an appropriation of \$10,114,000. The recommendation is \$748,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Commission is an independent body within the Department of Justice which makes decisions regarding requests for parole and supervision of Federal prisoners.

LEGAL ACTIVITIES GENERAL LEGAL ACTIVITIES

Appropriations, 2002	\$561,676,000
Budget estimate, 2003	645,299,000
Committee recommenda-	
tion	537,502,000

The Committee recommends an appropriation of \$537,502,000. The recommendation is \$107,797,000 below the budget request. The Committee recommendation includes, within available resources, a 4.1 percent pay adjustment for Federal employees.

This appropriation funds the establishment of litigation policy, conduct of litigation, and various other legal responsibilities, through the Office of the Solicitor General, the Tax Division, the Criminal Division, the Civil Division, the Environmental and Natural Resources Division, the Civil Rights Division, the Office of Legal Counsel, and Interpol.

The Committee recommendations, by division, are displayed in the following table:

Legal Divisions

Office of the Solicitor Gen-	
eral	\$7,130,000
Tax Division	72,142,000
Criminal Division	116,895,000
Civil Division	156,797,000
Environment & Natural	
Resources Division	70,303,000
Office of Legal Counsel	4,928,000
Civil Rights Division	91,963,000
Interpol USNCB	7,679,000
Radiation Exposure Com-	
pensation Act Adminis-	
tration	1,996,000
Courtroom Technology	5,200,000
Office of Dispute Resolu-	
tion	319,000
Automated Litigation Sup-	
port	2,150,000
Total	537,502,000

Professional standards.—The more than 10,000 Justice Department attorneys making up the class suing the Justice Department

for nearly \$500,000,000 in unpaid overtime recently prevailed in their suit. Thus, some of the highest paid employees in the Federal service, with an average salary of more than \$104,000, will now receive benefits heretofore limited to hourly wage employees. The Committee recommendation includes provisions designed to address attorney working conditions and the manner in which the expected judgment will be paid.

Radiation Exposure Compensation Act Adminis-
trative Expenses.—The recommendation includes \$1,996,000 for the administrative expenses associated with the Radiation Exposure Compensation Act [RECA], previously funded under a separate account. The Committee expects that additional resources required to process RECA will be absorbed from within other resources available to the Civil Division. This program was established to permit the payment of claims to individuals exposed to radiation as a result of atmospheric nuclear tests and uranium mining in accordance with the Radiation Exposure Compensation Act of 1990.

Courtroom technology.—To further enhance the presentation of evidence, as well as rapidly accelerate the pace of trials, the Committee recommendation provides \$5,200,000 for courtroom technology to be distributed among the divisions on the basis of need.

THE NATIONAL CHILDHOOD VACCINE INJURY ACT
Appropriations, 2002

\$4,028,000

Budget estimate, 2003

4,028,000

Committee recommenda-

tion

4,028,000

The Committee recommends a reimbursement of \$4,028,000 for legal costs. The recommendation is identical to the fiscal year 2002 funding level and the budget request.

This account covers Justice Department expenses associated with litigating cases under the National Childhood Vaccine Injury Act of 1986.

ANTITRUST DIVISION SALARIES AND EXPENSES

Appropriations, 2002	\$130,791,000
Budget estimate, 2003	137,799,000
Committee recommenda-	
tion	133,133,000

The Committee recommendation assumes a total of \$133,133,000 in budget (obligational) authority. The recommendation is \$4,666,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Antitrust Division investigates potential violations of Federal antitrust laws, represents the interests of the United States in cases brought under these laws, acts on antitrust cases before the Supreme Court, and reviews decisions of regulatory commissions relating to antitrust law.

U.S. ATTORNEYS SALARIES AND EXPENSES

Appropriations, 2002	\$1,403,338,000
Budget estimate, 2003	1,506,373,000
Committee recommenda-	
tion	1,320,160,000

The Committee recommends an appropriation of \$1,320,160,000. The recommendation is \$186,213,000 below the budget request. The Committee recommendation includes, within available resources, a 4.1 percent pay adjustment for Federal employees. Some of the reduction from the request is attributable to the transfer of Anti-Terrorism Task Forces from the U.S. Attorneys to the Attorney General. The Committee is aware that the U.S. Attorneys will receive \$91,993,000 in reimbursements in fiscal year 2003.

This account supports the Executive Office for U.S. Attorneys [EOUSA] and the 94 U.S. attorneys offices throughout the United

States and its territories. The U.S. attorneys serve as the principal litigators for the U.S. Government for criminal and civil matters. As in the past, Committee recommendations focus the efforts of the U.S. Attorneys on those crimes where the unique resources, expertise, or jurisdiction of the Federal Government can, or must, be most effective.

Professional standards.—The more than 10,000 Justice Department attorneys making up the class that sued the Justice Department for nearly \$500,000,000 in unpaid overtime recently prevailed in their case. Thus, some of the highest paid employees in the Federal service, with an average salary of more than \$104,000, will now receive benefits heretofore limited to hourly wage employees. The Committee recommendation includes provisions designed to address attorney working conditions and the manner in which the expected judgment will be paid.

IT Infrastructure.—The Committee recommends a total of \$8,000,000 for the third and final phase of the overall telecommunications convergence initiative to implement Internet Protocol [IP] Technology. These funds will allow the U.S. Attorneys to improve performance, reliability, capacity, efficiency and security of the U.S. Attorneys infrastructure by securely converging data, video, and voice transport over a single IP network.

Fundamental Reform.—Last year, in an attempt to fix the U.S. Attorneys' resource allocation process, the Committee waived all previous congressional guidance to the U.S. Attorneys regarding initiatives and the designation of funds. In addition, the Committee requested that the EOUSA submit a report to the Committees on Appropriations on these proposed reforms no later than March 17, 2002. While the submitted report included a number of activities currently underway by EOUSA to determine whether the resource allocation process places attorneys where the workload demand dictates and where productive use of the resources is assured, the report provided no specific information about the implementation of actual reform. The Committee therefore requests the EOUSA to submit an updated status report on actions planned or taken for actual reform to the Committees on Appropriations no later than May 15, 2003.

Anti-Terrorism Task Forces.—Though the Committee remains somewhat perplexed by the establishment of Anti-Terrorism and Joint Terrorism Task Forces [ATTFs/JTTFs] in the same judicial districts, the Committee is willing to give the administration the benefit of the doubt for now. However, the Committee believes that only the Attorney General [AG] can properly coordinate the activities of ATTJs and JTTFs. Therefore, funding for ATTJs has been transferred from this account to a new separate account under the direct control of the AG. The AG is directed to submit to the Committees on Appropriations a master plan outlining the planned activities of ATTJs, JTTJs, and the Foreign Terrorist Tracking Task Force for fiscal year 2003 not later than March 1, 2003.

Civil Defensive Litigation.—In light of the recent waiver of congressional designations of caseloads, the Committee does not recommend including additional resources specifically for civil defensive litigation. Rather, the Committee recommends an increase in the number of authorized positions and full-time equivalent workyears for the U.S. Attorneys. With this increase, the U.S. Attorneys may allocate resources as needed to better address the significant increase and complexity of cases in civil defensive litigation over the last several years.

Courtroom technology.—The Committee recommendation provides \$5,000,000 for additional personnel, equipment, and training to support courtroom technology activities.

Cyber Crime and Intellectual Property Enforcement.—The U.S. Attorneys, in cooperation with the U.S. Customs Service, shall report to the Committee not later than April 30, 2003 on the number of copyright law investigations and prosecutions undertaken in the preceding year, including those under Public Law 105-147, by type and location.

Port Security Pilot Project.—The Committee remains concerned about security at U.S. seaports. The potential for crew members, passengers, and dangerous cargo to illegally enter the country and pose a threat to the country's security remains a harsh reality. The recommendation therefore includes \$20,000,000 for four pilot projects to enhance security at our Nation's ports. Each of the pilot projects shall be coordinated under an ATTF and shall include Federal, State, and local law enforcement.

Legal education.—The Committee recommendation provides \$18,842,000 for legal education and distance learning at the National Advocacy Center [NAC] as requested by the Administration. If merited, the NAC may expand or include antiterrorism and cybercrime classes. Also, the Committee includes an additional \$6,000,000 to acquire, upgrade, and equip space from the University of South Carolina to expand, among other things, distance learning capabilities at the NAC. NAC State and local training funds are provided under the Office of Justice Programs.

Violent crime task forces.—The Committee recommends an additional \$1,000,000 within available resources to continue and expand task force activities associated with Operation Streetsweeper.

U.S. TRUSTEE SYSTEM FUND

Appropriations, 2002	\$147,000,000
Budget estimate, 2003	167,510,000
Committee recommendation	150,381,000

The Committee recommends a total of \$150,381,000 in budget authority. The recommendation is \$17,129,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The U.S. trustee system provides administrative support to expeditiously move bankruptcy cases through the bankruptcy process and ensures accountability of private trustees appointed to administer bankruptcy estates.

The Committee recommendation includes not less than \$750,000 for the Bankruptcy Training Center at the National Advocacy Center, in support of the Trustees' continuing education program.

FOREIGN CLAIMS SETTLEMENT COMMISSION

Appropriations, 2002	\$1,136,000
Budget estimate, 2003	1,136,000
Committee recommendation	1,136,000

The Committee recommends an appropriation of \$1,136,000. The recommendation is identical to the fiscal year 2002 funding level and the budget request and fully provides for the adjudication of claims against: Germany relating to World War II; Cuba relating to the Castro regime; and Iraq relating to the U.S.S. *Stark* incident and Desert Shield/Storm.

The Foreign Claims Settlement Commission settles claims of American citizens arising from nationalization, expropriation, or other takings of their properties and interests by foreign governments.

U.S. MARSHALS SERVICE

SALARIES AND EXPENSES

Appropriations, 2002	\$643,896,000
Budget estimate, 2003	700,343,000
Committee recommendation	673,146,000

The Committee recommends an appropriation of \$673,146,000. The recommendation is \$27,197,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The U.S. Marshals Service [USMS] is responsible for the apprehension of fugitives, protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and the custody and transportation of accused and unsentenced prisoners.

The Committee recommendations are displayed in the following table:

	Committee recommendation
Prisoner moves	30,754

Adjustments for prior year activi- ty	750
Total, United States Mar- shals Service	661,085

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003. The Committee recommendations are discussed in more detail in the following paragraphs.

The Committee recommendation includes \$2,766,000 (excluding a \$500,000 transfer from the Justice Detainee Information System) to improve and maintain the Warrant Information Network and to continue subscriptions to various government and private networks and on-line services and \$3,300,000 for Electronic Surveillance Unit recurring costs.

Special assignments.—Special assignment funding is intended for contingencies such as the Vieques and World Bank protests. Unfortunately, the Marshals persist in using this account to pay for long established missions or capital investments. The Committee has transferred what is truly base funding, including perimeter security and longstanding protective details, from this subaccount to the "District Expenses" subaccount. Other lines have been stripped of padding. If the Committee finds that routine items creep back into "Special Assignments", it is prepared to eliminate the subaccount and let the Marshals handle contingency funding the way all other law enforcement agencies do, through the reprogramming process.

Courthouse Security Personnel.—The Committee is aware that the Marshals are manipulating vacancies to recover funds to cover shortfalls in other areas. Until the Marshals hire up to authorized levels, the Committee sees little reason to fund additional personnel. The Committee directs the Marshals to provide a report to the Committees on Appropriations describing the nature and extent of chronic shortfalls in their base budget. The report should be delivered not later than February 15, 2003.

Reimbursable positions.—The Committee believes that the Marshals made a mistake by allowing themselves to be distracted by the pursuit of reimbursable positions that do nothing to improve the ability of the agency to execute its core missions. Senior criminal investigators lost to collateral duties actually weaken performance. Therefore, the 106 reimbursable Deputy U.S. Marshals [DUSMs] designated as security managers for the courts have been transferred back to the control of, and hereafter shall be funded by, the Marshals. These DUSMs should be uti-

lized as follows: (1) not less than two and not more than five roving security teams, including physical security specialists, shall regularly survey courthouses and make recommendations regarding security, (2) such number of DUSMs as are necessary shall be distributed to the Southwest border to address the acute manpower shortage being experienced by those courts, and (3) remaining DUSMs will be distributed on a priority basis to the most undermanned courthouses. Finally, the Administrative Office of the U.S. Courts, USMS, and Federal Protective Service [FPS] shall report to the Committees on Appropriations on the strengths and weaknesses of the proposal to place FPS officers under the operational control of Marshals under certain circumstances. The report shall be delivered not later than March 1, 2003.

As part of the fiscal year 2004 budget process, the Marshals should be prepared to justify both the relationship forged with the Centers for Disease Control and retention of the seized asset mission as opposed to transfer of that mission to Justice Management Division.

Courthouse security equipment.—This account funds security equipment, furnishings, relocations, and telephone systems and cabling. The Committee recommendation provides \$12,061,000 for courthouse security equipment. This equipment will outfit courthouses in the following locations:

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

The recommendation transfers funding for the Marshal's safety and health program from the "Salaries and Expenses" account to this subaccount.

Fugitive apprehensions.—Last year, the Committee directed the Marshals to establish task forces in New York City and Los Angeles dedicated full-time to the pursuit of the most dangerous fugitives on the eastern and western seaboard. The Committee notes with concern that the annualization of costs for the two task forces appears inadequate. In addition, the Committee believes that the establishment of two additional centrally-managed fugitive task forces in the heartland is essential to properly cover fugitive caseload. Therefore, the Committee recommendation includes an additional \$2,268,000 to fully annualize the two existing task forces, and \$5,832,000 for two new task forces, of which \$3,856,000 is for the full year costs of 1811s and support staff on the task forces, \$485,000 is for equipment and expenses, \$335,000 is for State and local overtime and informant payments, and \$1,155,000 is for permanent change of station moves. In addition, the Committee recommendation provides an increase of \$5,500,000 over the fiscal year 2003 request for electronic surveillance unit [ESU] personnel, training, and equipment, including funding for surveillance vans and light aircraft, bucket trucks, a central signal collection system, secure communications equipment, various tracking systems, and night vision equipment.

International fugitives.—The Committee is aware that the Marshals Service was forced to close temporary offices in Jamaica, the Dominican Republic, and Mexico due to budget irregularities. Afterwards, the Federal Bureau of Investigation legal attache offices in, or responsible for, those countries proved unable or unwilling to pick up the fugitive apprehension mission. To avoid creating a safe haven for felons in the Caribbean, the Committee has provided \$3,850,000 to establish a permanent Marshals Service presence in Jamaica, the Dominican Republic, and Mexico. The Committee expects these offices to report annually on their fugitive apprehension efforts. The Committee also directs the Marshals to report to the Committees on Appropriations on the global requirements for fugitive apprehension for the next 5 years.

Vehicles.—The Marshals Service's approach to fleet management is "run to failure". Though Federal guidelines call for replacing sedans after 3 years or 60,000 miles and SUVs after 4 years or 40,000 miles to avoid chronic problems with availability and excessive operations and maintenance costs, the Marshals have no fleet replacement cycle. As a result, deputies are chasing fugitives or transporting prisoners in vehicles whose unreliability pose an unnecessary risk. The Committee has scrutinized the Marshals' budget looking for low priority items that could be reduced or eliminated to free up resources for vehicle purchases. The Committee recommendation provides \$10,424,000 for vehicle purchases. This shall be treated as a permanent increase to the base. None of these vehicles are to be assigned to headquarters.

Information Technology.—The Justice Department's Inspector General [IG] just released an audit report (03-03) concerning the Marshal Network [MNET] and Warrant Information Network [WIN]. The Committee expects the Marshals, overseen by the Justice Department's Chief Information Officer [CIO], to immediately implement the recommendations listed on pages iii-vi of the IG's report. The Committee expects to be

briefed quarterly on progress by the CIO until all of the recommendations have been implemented. The Committee recommendation provides an increase of \$10,564,000 to implement the IG's recommendations, including the hiring of additional computer personnel, for circuit costs, courthouse moves, licenses, help desk and other operations and maintenance costs, and for technology refreshment. The Committee expects information technology costs to be properly recurred in the fiscal year 2004 request as an adjustment to base.

CONSTRUCTION

Appropriations, 2002	\$24,125,000
Budget estimate, 2003	15,126,000
Committee recommendation	17,378,000

The Committee recommends an appropriation of \$17,378,000. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

This account funds construction, security, and furniture at existing courthouses.

The Committee is aware that a recently-conducted national survey of Federal courthouses revealed that 95 percent of prisoner holding and transit facilities have serious security deficiencies. Of 392 courthouses surveyed: 84 percent lack enough courtroom holding cells; 78 percent do not have secure prison elevators; 74 percent do not have enclosed sallyports; 72 percent lack enough interview rooms; 57 percent do not have adequate cellblock space; and 38 percent lack cameras, monitors, and alarms.

Years of neglect have created this deplorable situation, posing risks to the judicial family, the public, and the Marshals themselves. The Committee is intent on remedying courthouse deficiencies before a tragedy occurs. The Committee recommendations, by project, are displayed in the following table:

USMS Construction

[In thousands of dollars]

Security specialist consultants/ construction engineers	750

Total, USMS Construction	17,378
-------------------------------	--------

The Committee considers this an important step in reducing the backlog of critical security-related projects. As with courthouse security equipment, the Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

Construction engineering consultants.—The Committee is aware that the Marshals have been using funds allocated by Congress for consulting services on construction projects to pay the Federal salaries of 9 permanent employees hired in fiscal year 2000. Apparently, this diversion of funds was prompted by confusion over terms and dollar amounts used by the Marshals and Congress. The Committee expects the salaries of permanent employees to be paid out of the "Salaries and Expenses" account and the salaries for construction consultants to be paid out of this account. The Marshals are directed to report on the proper execution of the construction engineering funds not later than 30 days after enactment of this Act.

Billings, MT.—The funds provided for construction for Billings shall only be available to renovate the Marshals Service space, including designated prisoner movement and holding areas, in the existing Federal courthouse, space previously occupied by the Bureau of Indian Affairs. No other proposals are to be considered.

JUSTICE PRISONER AND ALIEN TRANSPORTATION SYSTEM

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$77,694,000

The Committee recommends an appropriation of \$77,694,000. The recommendation is \$77,694,000 above the budget request.

This account funds prisoner air transportation operations and maintenance, aircraft procurement, and facilities.

The Justice Prisoner and Alien Transportation System's [JPATS] per passenger pricing structure makes no provision for the capitalization of assets. The result is that large body aircraft responsible for prisoner movements will be flown until grounded for structural failure or other safety reasons. No replacements are planned. Therefore, unless Congress intervenes, the JPATS fleet will be allowed to diminish until no aircraft remain. Justice has no plan for dealing with the resulting crisis. The Committee recommendation has provided the funds necessary to avert disaster before it occurs. The funds provided will allow the Marshals to procure four modern, fuel efficient, wide body aircraft and spares to replace four first generation airliners that have reached the end of

their useful service lives. The Marshals shall report to the Committees on Appropriations on its procurement strategy not later than February 28, 2003.

FEDERAL PRISONER DETENTION

Appropriations, 2002	\$706,182,000
Budget estimate, 2003
Committee recommenda- tion

No funds are requested or recommended under the Federal Prisoner Detention Program. The budget request met the Committee's recommendation last year by centralizing funding for detention activities within the Federal Prisoner Detention Program and the Immigration and Naturalization Service under the Department of Justice Detention Trustee. This recommendation is identical to the budget request.

FEES AND EXPENSES OF WITNESSES

Appropriations, 2002	\$156,145,000
Budget estimate, 2003	156,145,000
Committee recommenda- tion	156,145,000

The Committee recommends an appropriation of \$156,145,000. The recommendation is identical to the fiscal year 2002 funding level and the budget request.

This account provides for fees and expenses of witnesses who appear on behalf of the Government in cases in which the United States is a party, including fact and expert witnesses. These funds are also used for mental competency examinations as well as witness and informant protection.

COMMUNITY RELATIONS SERVICE

Appropriations, 2002	\$9,269,000
Budget estimate, 2003	9,364,000
Committee recommenda- tion	9,474,000

The Committee recommends an appropriation of \$9,474,000, which is \$110,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Community Relations Service [CRS] provides assistance to communities and persons in the prevention and resolution of disagreements relating to perceived discriminatory practices.

ASSETS FORFEITURE FUND

Appropriations, 2002	\$22,949,000
Budget estimate, 2003	22,949,000
Committee recommenda- tion	22,949,000

The Committee recommends an appropriation of \$22,949,000. The recommendation is identical to the fiscal year 2002 funding level and the budget request. This account provides funds to supplement existing resources to cover additional investigative expenses of the FBI, DEA, IRS, and U.S. Marshals, such as awards for information, purchase of evidence, equipping of conveyances, and investigative expenses leading to seizure. Funds for these activities are provided from receipts deposited in the assets forfeiture fund resulting from the forfeiture of assets. Expenses related to the management and disposal of assets are also provided from the assets forfeiture fund by a permanent indefinite appropriation.

RADIATION EXPOSURE COMPENSATION

ADMINISTRATIVE EXPENSES

Appropriations, 2002	\$1,996,000
Budget estimate, 2003	1,996,000
Committee recommenda- tion

No funds are recommended under this account. Rather, full funding for the administrative expenses of the Radiation Exposure Compensation Fund is provided under the Civil Division of General Legal Activities.

INTERAGENCY LAW ENFORCEMENT

INTERAGENCY CRIME AND DRUG ENFORCEMENT	
Appropriations, 2002	\$338,577,000
Budget estimate, 2003	362,131,000
Committee recommendation	400,102,000

The Committee recommends an appropriation of \$400,102,000. The recommendation is \$37,971,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees. The increase is attributable to a transfer of DEA resources to this account. This additional \$53,000,000 shall only be available to reimburse the DEA for participation in task force operations.

The Interagency Crime and Drug Enforcement Program, through its 9 regional task forces, utilizes the combined resources and expertise of its 11 member Federal agencies, in cooperation with State and local investigators and prosecutors, to target and disband major narcotics trafficking and money laundering organizations.

State and Local Overtime.—Overtime for State and local law enforcement officers who support OCDETF investigations has traditionally been funded by the Department of Justice Assets Forfeiture Fund [AFF]. This year, OCDETF has included \$8,000,000 in its request for State and local overtime out of concern that declining AFF receipts will be insufficient to cover these costs. The Committee supports the role of State and local law enforcement with OCDETF, but believes the AFF remains the proper source of funding for overtime. Should funds not be available for this purpose within AFF, the Committee will entertain a reprogramming request from an alternative source of funding.

To ensure that the Immigration and Naturalization Service [INS] only seeks reimbursable funds if INS agents are actually performing task force work, the INS is directed to match at least 25 percent of each reimbursable dollar from their direct appropriation on Organized Crime and Drug Enforcement Task Force cases before they can be reimbursed from this account.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

Appropriations, 2002	\$4,236,073,000
Budget estimate, 2003	4,202,587,000
Committee recommendation	3,927,587,000

The Committee recommends an appropriation of \$3,927,587,000. The recommendation is \$275,000,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment. The reduction is mostly attributable to the full use of large carryover balances and the transfer of joint terrorism task force resources to the Attorney General. The Committee is aware that up to \$103,300,000 in uncommitted carryover will be available to apply to this account and expects that new found efficiencies (Chiarradio's "elimination of sixth men") will free up additional resources.

The Committee recommendation highlights the following initiatives:

Reorganization.—The Committee commends Director Mueller for focusing the FBI on its core missions: counterterrorism, counterintelligence, and cybercrime. Not in memory has a Justice Department agency identified its priorities and then moved base resources to address those priorities. The Committee was impressed by the Director's initiative and urges other agencies to follow suit.

Still, the establishment of clear goals and the shifting of personnel in response are only the first tentative steps in what must be an almost total recreation of the FBI. When intent replaces action and possibilities replace

certainties in the pursuit of crime the Bureau faces a revolution without precedent.

FBI spending jumped \$1,017,591,000 (32 percent) between fiscal year 2001 and fiscal year 2002, and would hold steady from last year to this if the President's request were adopted. What we got for these increases is debatable, but what is not debatable is that this level of investment cannot be sustained. We must make far better use of the assets already in hand.

The FBI must re-validate every expense in its base. How, for example, does the Hostage Rescue Team contribute to counterterrorism, counterintelligence, or cybercrime? What about Safe Street Task Forces? Or the Federal Convicted Offender Program? In time of war, the FBI must weigh programs against priorities. Those that don't measure up must be transferred to sister law enforcement agencies, reduced, or terminated. Only then will resources meet needs.

Finally, it remains a question whether a command structure totally dominated by agents can accomplish this. Are the greatest efficiency experts in America really FBI agents? The Committee believes that outside talent may have more to offer when streamlining the bureaucracy is the goal.

Trilogy.—The Committee was informed last month that Trilogy is experiencing a cost overrun of \$137,900,000, a 30 percent increase, which, when combined with an earlier overrun, translates into a more than 50 percent increase in one year in the projected total cost of the program. This is not a surprise. The attempt to make up for 20 years of neglect in 2 years of frenzied spending was destined to fail. The Committee, foreseeing this, provided a cushion of \$100,000,000 in no-year funds in the counterterrorism supplemental as a "rainy day" fund for Trilogy. Unfortunately, over the objections of the Committee, the FBI chose to squander this reserve. Now, when the funds are needed, none are available. Nevertheless, Trilogy remains the Committee's top FBI priority. The FBI is directed to put together a reprogramming package to cover the overrun. That package should be submitted to the Committees on Appropriations not later than February 15, 2003.

Intelligence Production.—The recommendation includes an additional \$7,731,000 to enhance headquarters and field office analytical capabilities to support the FBI's counterterrorism program, including 20 headquarters Intelligence Research Specialists [IRSS] and 90 field IRS positions. IRSS provide time-sensitive analyses in support of investigations, operations, and programmatic issues and strategic analyses aimed at identifying investigative priorities. Expertise in understanding current and projected terrorist threats shall be a prerequisite for these positions.

Hazardous Materials Response Capabilities.—Now more than ever, law enforcement personnel must be properly trained and equipped to encounter crime scenes where hazardous materials may be present. The Committee therefore includes an additional \$9,333,000 for the FBI's Hazardous Materials Response Unit [HMRU] and an additional \$3,272,000 for the Hazardous Devices School [HDS].

The HMRU provides an integrated approach to ensuring the safe and effective response to criminal acts and incidents involving hazardous materials, including specialized response teams, a national training program, interagency liaison, technical assistance to FBI field and Headquarters divisions, and the development of field response programs. The Unit trains, equips, and certifies FBI field office personnel for hazardous materials operations.

The HDS prepares public safety bomb technicians [BTs] to locate, identify, render safe, and dispose of improvised hazardous devices, including those containing explosives, incendiary materials, and materials classified as weapons of mass destruction. The program also includes training in the use of specialized equipment and protective clothing needed for the safe disposal of explosive materials. These funds will provide additional courses for BTs and provide necessary operations and maintenance funding associated with practical training villages.

Evidence Response Team Program.—The Evidence Response Team Program provides management and training for field personnel who are responsible for providing forensic and crime scene services. These personnel must respond to case investigations with the most current techniques, procedures, and equipment to ensure that critical evidence is identified and gathered for forensic analysis. The recommendation includes an additional \$5,722,000 for personnel, training, field office supplies, equipment, surveying stations, underwater equipment and contractor support, physicals, canine evidence recovery, and technology assisted search team operational travel and equipment.

Intellectual Property Enforcement.—Twenty-five percent of the software produced in the United States has been copied illegally in violation of U.S. copyright laws. Other industries have similarly suffered from high rates of counterfeiting, including pharmaceuticals, automobile manufacturing, videos and music. The estimate of lost revenue to such industries exceeds \$300,000,000,000 annually. The Committee provides \$9,674,000 within available white collar crime resources for the vigorous pursuit of Federal copyright law violations.

Federal Convicted Offender Program.—The recommendation includes an additional \$867,000 for the Federal Convicted Offender [FCO] Program. Last year, the FCO Program's authority to collect DNA samples was expanded to include additional crimes of violence and terrorism-related offenses. This funding will support 5 positions to manage and type Federal convicted offender samples, purchase equipment, and fund additional expenses related to this effort.

Polygraph Program.—In the past, the FBI only conducted polygraphs on new employees and individuals with access to certain sensitive programs or cases. The recommendation includes an additional \$6,804,000 to expand the FBI's polygraph program to include periodic polygraph examinations for individuals who have broad access to the FBI's most sensitive information and for employees leaving for and returning from permanent foreign assignments.

Forensic research.—The FBI Laboratory's forensic research spending plan for fiscal year 2002 was very impressive. The Committee is aware that the FBI Laboratory still has a long list of unfunded research projects. The Committee recommendation includes an increase of \$8,056,000 over last year's level to fund the highest priority forensic research proposals submitted to the Committee as part of the fiscal year 2002 spend plan. The FBI shall report back to the Committees on Appropriations on the disposition of these resources not later than April 5, 2003.

Investigative data warehousing.—Investigative data warehousing is phase II of Trilogy, the FBI's computer modernization initiative. Phase I of Trilogy will fuse into an enterprise database, the so-called Virtual Case File [VCF], a handful of key legacy databases, currently stovepiped, that are central to the day-to-day investigatory and intelligence gathering activities of the Bureau. Investigative data warehousing will migrate

an additional 34 priority, highly specialized legacy databases, also currently stovepiped, into the VCF. This program is essential for the FBI to fully access its collected data. Unfortunately, progress on data warehousing is threatened by Trilogy's cost overruns and schedule delays. Should Trilogy's problems be overcome, the FBI may spend up to \$50,300,000 in available prior year funds on investigative data warehousing. Knowing the magnitude of this project, the Committee looks forward to regular updates on its progress. The first briefing shall occur within 30 days of the enactment of this Act and shall address in detail the execution plan for fiscal year 2003.

Information assurance.—The Committee has been very impressed by the comprehensive approach to, and rapid development of, information assurance capabilities at the Bureau. A series of wide ranging and very comprehensible briefings provided excellent insight into the program's scope, capabilities, and goals. The Committee recommendation includes \$18,435,000 to continue information assurance initiatives undertaken last year. The Committee expects that the "one stop shopping" information desk for security customers will be fully operational by the end of the fiscal year. The Committee recommendation also includes \$29,738,000 for the Enterprise Security Operations Center [ESOC]. With the lack of information included in the FBI's budget request about the ESOC, funding was provided only as a result of a candid and thorough briefing at the unclassified level. The Committee notes the necessity of total disclosure to ensure funding for initiatives.

Collaborative capabilities.—Collaborative capabilities are phase III of Trilogy. Collaborative capabilities will open the FBI's heretofore closed, classified computer network to other Federal, State, and local law enforcement and intelligence agencies. There is concern with this effort. An open network is inherently vulnerable to attack. Fortunately, Internet cafe, a stand-alone system for web access, should provide the Bureau with time to perfect a secure, shared network. The Committee believes that extensive lab testing followed by thorough piloting is essential to the success of this initiative. The Committee looks forward to observing lab and field demonstrations at every critical milestone in the development of collaborative capabilities. Additionally, progress on collaborative capabilities is threatened by Trilogy's cost overruns and schedule delays. Should Trilogy's problems be overcome, the FBI may spend up to \$11,000,000 in available prior year funds on collaborative capabilities.

Analytical tools for data mining and visualization.—The Committee is familiar with the demonstrated value of these software tools and has provided money in the past for the acquisition of earlier versions. The Committee recommendation provides \$5,000,000 for analytical tools from the \$30,000,000 in National Infrastructure Protection Center funds on hold. The Committee directs the Bureau to provide the Committees on Appropriations with a detailed spend plan that shall not require Congressional approval after it is submitted.

Internet cafe.—The FBI is wrestling with the risks of opening its previously closed computer network to the Web. The Committee is fully aware that no security system can fully protect its host from threats on the Internet. Still, an enormous amount of freely- or commercially-available information can be found on the Web that could prove very useful in pursuing criminal or national security investigations. As an interim measure, the Bureau has requested funds to establish stand alone access to the Web, referred to as Internet cafes. The Committee

considers this a prudent step. The recommendation includes an additional \$3,620,000 for Internet cafes from the \$30,000,000 in National Infrastructure Protection Center funds on hold. The Bureau shall provide a report to the Committees on Appropriations on the distribution and use of Internet cafes not later than May 1, 2003.

Physical Surveillance Program.—As the FBI expands its efforts to collect intelligence about potential domestic and international terrorists groups and respond to threats against the United States and other extraordinary incidents, the need for surveillance technology and equipment grows. The recommendation includes an additional \$5,137,000 for development, deployment, and support of core technologies associated with tracking and locating fugitives, mobile surveillance, and design and fabrication capabilities from the \$30,000,000 in National Infrastructure Protection Center funds on hold.

Tactical Operations.—Court ordered tactical operations only serve as an effective investigative tool if the FBI has the resources to address emerging technologies, such as advanced digital communications, command and control and computers, radio frequency communications and data links, and sophisticated encryption. The Committee therefore includes in its recommendation an additional \$12,612,000 for research and development and for engineering to support ongoing and new strategic initiatives directed against new technologies posed by the high-technology industries.

Re-engineering the workforce.—The FBI request for additional analysts and technological enhancements highlights the Bureau's shift from a manpower-intensive approach to an information-intensive approach to intelligence gathering and crime fighting. However, this shift has come, thus far, without a comprehensive approach to human capital investment. The Director's stated priorities: counterterrorism [CT], counterintelligence [CI], and cybercrime ["cyber"], will require marked shifts in the skills of the Bureau workforce. A far more diversified workforce of scientists, engineers, technicians, analysts, support, and other staff, as well as agents, will be required. To maintain and enhance the proficiency of this new workforce during the current information and technology revolution, employees will need constant field exposure and continual in-service training and education to keep skills finely honed. For that reason, the Bureau must develop and maintain a manpower master plan that, at a minimum, includes an analysis of, and justification for: (1) the proper mix of agent, specialist, and support personnel in foreign and domestic field offices and headquarters at the squad, unit, section, and division levels, (2) mandatory, substantive in-service training programs of at least 40 hours per year for all personnel that include both in-house, other Federal, and private sector training and development opportunities, (3) career paths for personnel in specialized areas, especially CT, CI, cyber, and security, with an emphasis on lifetime commitment to specialization, (4) the proper balance of personnel versus capital investments to ensure that Bureau employees are properly equipped with the essential tools of their particular trade, and (5) a deployment strategy that maximizes the benefits of mentor-protege relationships and cross-pollination between highly specialized personnel. The report shall be completed not later than December 31, 2003. The Bureau shall provide a progress report to the Committees on Appropriations by July 1, 2003 and shall provide the Committees with a final copy of the plan upon completion.

Aviation.—The FBI is directed to submit a 5-year aviation master plan that includes: (1)

current fleet assets by type, (2) logged flight hours by mission by aircraft/helicopter, (3) projected useful service life remaining (under what assumptions) by aircraft/helicopter, (4) utilization of current fleet assets, by mission type, for the last 5 years by year, and (5) basing, by aircraft/helicopter locations. The plan should also discuss the costs and benefits of maintaining versus replacing current fleet assets through 2008, maldeployments or other causes of underutilization of current fleet assets, if applicable, and capabilities of current fleet assets versus current and projected mission requirements. The report shall be delivered not later than March 3, 2003.

Rapid Deployment Logistics Unit.—The Rapid Deployment Logistics Unit [RDLU] was created unbeknownst to the Committee through an internal reallocation of resources. The number and composition of Rapid Deployment Teams [RDTs] were settled by the Bureau without the Committee's approval. To date, the Committee has never received a briefing on the RDLU or RDTs. That being so, the Committee expects the FBI to submit a comprehensive report on the purpose of the RDLU, the justification for the number and configuration of RDTs, the capabilities of the RDLU and RDTs, and the personnel and equipment requirements of both for the next 5 years, by year.

Joint Terrorism Task Force.—The Bureau is seeking to quadruple the amount of funding available for Joint Terrorism Task Forces [JTTFs]. The increased funding would be used for space to house JTTFs and backfill the FBI slots transferred to JTTFs. The FBI's goal is to establish a JTTF in every field office by the end of fiscal year 2003. The value of JTTFs, both in general and relative to their cost, remains open to debate as does the value of having JTTFs in more than 56 locations. Since JTTFs are now competing with Regional Terrorism Task Forces, Anti-Terrorism Task Forces and the Foreign Terrorist Tracking Task Force, not to mention the Counterterrorism Division, for resources to meet the same mission, a thorough review of the program is in order. The Bureau is directed to submit a report to the Committees on Appropriations that, at a minimum, includes a thorough discussion of JTTF caseload over the last 5 years by type (domestic/foreign), offense(s), and disposition (referred for prosecution, prosecuted, convicted, etc.) on a task force by task force basis. The report should also include an explicit discussion of threats in existing or proposed JTTF locations. The report shall be delivered not later than April 30, 2003. In the meantime, the Committee has transferred JTTF funding from this account to a new separate account under the direct control of the Attorney General to ensure proper coordination of the various terrorism task forces.

National Infrastructure Protection Center [NIPC].—A March 2001 report on computer intrusion squad training, promotion, and retention has yet to be delivered to the Committee on Appropriations. As a result, almost \$30,000,000 in NIPC funding remains unavailable for obligation or expenditure. In July, the Committee directed that a reasonable plan regarding these funds to be submitted to, and approved by, the Committees on Appropriations by September 30, 2002. To date, no such plan has been delivered. Therefore, the Committee directs that \$17,221,000 of the \$30,000,000 in NIPC funds on hold be provided to the Special Technologies and Applications Unit [STAU] to fund phase II of a three phase research and development initiative being run by the STAU. The Committee fully expects the STAU to have occupied the 4,000 square feet of space on the 4th floor of its new location in Virginia not later than March 31, 2003.

Emergency communications.—The FBI has established a requirement for the Critical Response Unit [CRU] to respond to five crisis sites simultaneously with state-of-the-art secure communications equipment and personnel. How this requirement was arrived at is unknown. It is also unclear how the CRU's communications suite integrates with that of the Foreign and Domestic Emergency Support Teams, the Hostage Rescue Team, the Critical Incident Response Group, the Strategic Information & Operations Center, Special Weapons & Tactics Teams, and a host of other specialized units, all of which have communications suites of their own. The Committee presumes that communications gear deployed by the CRU is fully interoperable with that of all other emergency response units it is charged with supporting and that duplication of gear between units has been eliminated, but expects the FBI to formally confirm both presumptions. Also, the Bureau is directed to submit a CRU communications master plan to the Committees on Appropriations not later than March 15, 2003 that: (1) outlines in detail the criteria that must be met for the CRU to deploy, (2) justifies in detail the five simultaneous crisis sites requirement, and (3) outlines in detail the personnel and non-personnel needs of the CRU for the next 5 years by year.

Technically Trained Agents.—The Committee has been supportive of Technically Trained Agents [TTAs], though the Committee has differed with the Bureau on priorities. The Committee continues to believe that properly equipping and training TTAs is a higher priority than simply adding more bodies. As justification material accompanying the request for 50 new positions notes, one-third of TTAs are probationary. Clearly, TTAs need more seasoning. The Bureau is directed to report on its strategy for using intense supervision and continuing in-service training and education to compensate for the distinct lack of experience in its TTA force. The report shall be delivered not later than April 25, 2003.

Legal attaches.—The Committee notes that the legal attache [Legat] offices in, or responsible for, Jamaica, the Dominican Republic, and Mexico were unable or unwilling to develop plans for picking up the fugitive apprehension mission when the Marshals Service was forced to shut down operations in those countries. The Committee also notes that the apparent measure of effectiveness for Legats is the number of "leads" pursued, the equivalent of measuring congressional effectiveness by the number of phone calls answered. The Committee directs that the FBI provide a report detailing the stated national security or law enforcement goals underpinning the establishment of each Legat office and the specific steps being taken to reach those goals. The report shall be delivered to the Committees on Appropriations not later than June 1, 2003. No more than 75 percent of the funds provided for Legats in fiscal year 2003 shall be made available for expenditure until the aforementioned report is delivered.

Budget restructuring.—As part of the fiscal year 2004 budget request, the Committee expects the FBI to adopt a new budget structure premised on eight decision units: (1) Counterterrorism, (2) National Security, (3) Cyber-investigations, (4) Criminal Enterprises & Federal Crimes, (5) Forensic & Technical Services, (6) Field Support, (7) Training & Education, and (8) Criminal Justice Services. The Committee notes that an on-going review of classification issues has precluded the need for any decision unit totals to be rolled up in the formal budget submission or any supporting documents. The Committee congratulates the Bureau on this breakthrough.

Last year, the Committee concluded that the FBI's inability to respond swiftly to changing patterns of crime was in part attributable to an antiquated budget structure that did little to protect the Director's strategic priorities, ease management of high risk programs, or provide the transparency necessary for effective oversight.

The new structure, all but identical to last year's proposed restructuring, will: (1) focus FBI resources on the Director's top three priorities, (2) elevate and sustain a number of longstanding Congressional priorities, (3) afford field-level managers the flexibility to use their workforce to maximum advantage in addressing local criminal investigatory priorities, (4) consolidate the funding of a number of mutually-supportive initiatives that are currently scattered across multiple decision units, and (5) eliminate the current artificial isolation of a number of cross-cutting functions and activities.

The Committee believes that the new budget structure will significantly enhance FBI performance and commends the Bureau for its support in developing this proposal.

CONSTRUCTION

Appropriations, 2002	\$33,791,000
Budget estimate, 2003	1,250,000
Committee recommendation	1,250,000

The Committee recommends an appropriation of \$1,250,000. The recommendation is identical to the fiscal year 2002 funding level, less non-recurring costs, and to the budget request.

DRUG ENFORCEMENT ADMINISTRATION SALARIES AND EXPENSES

Appropriations, 2002	\$1,481,783,000
Budget estimate, 2003	1,545,919,000
Committee recommendation	1,477,470,000

The Committee recommends an appropriation of \$1,477,470,000. The recommendation is \$68,449,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees. The reduction in this account is largely attributable to a transfer of resources described below. The Committee expects the large balance of prior year Violent Crime Reduction Trust Fund carryover to be expended not later than April 1, 2003 on vehicles, bullet proof vests, and other basic equipment essential to officers in the performance of their duties. The Committee directs the DEA to provide it with an accounting of carryover spending not later than April 2, 2003.

Enhancements.—The recommendation provides \$24,683,000 for DEA's requested Homeland Security enhancements for information security and anti-terrorism security measures. None of these funds shall be obligated until a spend plan has been submitted to and approved by the Committees on Appropriations.

Information security.—The DEA is seeking funds to initiate an information security program. The FBI has just completed a thorough review of its information security needs, and has undertaken wide-ranging improvements noteworthy for their simplicity and cost effectiveness. Prior to the release of funds for the DEA's information security program, the DEA shall sign with the head of the FBI's Security Division and the Chief Information Officer of the Justice Department a memorandum of understanding [MOU] that charges the latter two signatories with providing technical assistance to DEA program managers with an emphasis on no- or low-cost government- or commercial-off-the-shelf solutions. The Committee expects to be briefed on the details of DEA's plan, the contents of the MOU, and FBI and Justice con-

tributions to a successful rollout not later than 60 days after the signing of the MOU.

Financial Investigations.—The Committee also provides \$4,121,000 for financial investigations to increase efforts to target drug organizations that finance terrorist activities. Additional personnel shall work closely with Federal, State, and local law enforcement as well as private and regulatory sectors of the financial community to identify individuals and institutions for investigation, and identify money laundering techniques employed by terrorists. Additional personnel and emphasis shall be placed in the following locations: Denver, Colorado, Wilmington, Delaware, Chicago, Illinois, New York City, New York, Charleston, South Carolina, and Dallas, Texas.

Overseas Offices.—While DEA repeatedly defends its presence overseas, very little effort has been made to monitor and evaluate the need for all of these foreign offices after they have been opened. The DEA is therefore directed to submit a report to the Committees on Appropriations that provides the productivity level, workload, and mission for each existing overseas office no later than February 28, 2003. The report shall include a review and rightsizing proposal for each of the overseas offices to ensure that the most urgent needs are being met with the limited resources available.

Integrated Drug Enforcement Assistance.—The Committee is pleased with the Administrator's new initiative for drug prevention and treatment, known as Integrated Drug Enforcement Assistance [IDEA]. IDEA is a coordinated anti-drug plan that combines law enforcement with intensive community follow-up designed to reduce drug demand. IDEA teams DEA agents with State and local law enforcement to arrest and prosecute drug traffickers within designated communities, and then forms coalitions to reduce demand through drug prevention and treatment. The recommendation provides \$5,926,000 to expand IDEA. The DEA is directed to report back to the Committees on Appropriations on how it intends to use these funds not later than March 15, 2003.

Aviation assets.—Helicopters and light aircraft play an essential role in the covert surveillance, pursuit, and capture of drug traffickers. The Committee understands that the DEA's aging fleet of air assets suffers from low availability and high maintenance hours, and costs, per flight hour. The Committee recommendation provides \$6,336,000 for single engine light enforcement helicopters. The DEA is directed to report back to the Committees on Appropriations on how it intends to use these funds not later than March 15, 2003.

Methamphetamine lab clean-up.—The Committee remains alarmed by the public health and safety menace posed by methamphetamine labs. The by-products of methamphetamine production: anhydrous ammonia, ether, sulfuric acid, and other toxins are volatile, corrosive, and poisonous. Often, lab operators secrete these waste products in abandoned or little-used buildings located in populous areas or dump them in rivers and streams. Danger of explosion is real and the potential for serious environmental contamination well documented. Therefore, the Committee recommendation includes \$20,000,000 that shall only be available to reimburse the DEA, States and localities for the costs associated with assisting in, or undertaking, the removal and disposal of hazardous materials at clandestine methamphetamine labs.

Drug Enforcement Equipment.—The effectiveness of DEA agents is threatened by shortfalls and delays in the distribution of critical equipment. The Committee believes that agents must have state-of-the-art equipment in order to stay ahead of or merely

keep pace with that of drug traffickers. The Committee recommendation therefore provides \$4,733,000 for high priority equipment. The DEA is directed to report back to the Committees on Appropriations on how it intends to use these funds not later than March 1, 2003.

Northern New Mexico Anti-Drug Initiative.—The Committee acknowledges the need for a focused response to illegal drug trafficking in northern New Mexico and expects the DEA to continue to devote sufficient resources to this problem in cooperation with other Federal law enforcement agencies.

Division of labor.—The “war on drugs” is in the midst of the most significant restructuring in memory. The terrorist attack on America has forced many agencies to redirect manpower and resources from the drug war to homeland security and combating terrorism. This has stretched DEA resources thin. Under these circumstances, the Committee believes that every effort should be made to decapitate the leadership of drug cartels and the businesses that aid and abet drug trafficking. This calls into question the value of DEA’s Mobile Enforcement Teams [METs], which target street-level dealers by swarming localities for short periods of time. While emotionally satisfying and useful for boosting arrest statistics, METs, ultimately, are taking pawns in a deadly game of chess. Kingpins, their lieutenants, and “legitimate” businessmen in league with drug lords are the pieces the Committee is most interested in seeing swept from the board. Therefore, the Committee has transferred MET resources in this account to the DEA line in the “Interagency Crime and Drug Enforcement” [ICDE] account. Joint operations funded by the ICDE account focus on the most long-term, resource-intensive, high payoff drug cases. The Committee has left in place funding for Regional Enforcement Teams, and will monitor their results to determine whether they should be retained or transferred to the ICDE account.

“Drug Diversion Control Fee” Account.—The Committee has provided \$89,021,000 for DEA’s Drug Diversion Control Program. The Committee notes that the request included an additional \$24,616,000 for program enhancements based on an unresolved Final Rule. The draft rule proposing a fee increase to support these enhancements has not been published yet. Moreover, the earliest new collections could begin is July 1, 2003, 2 months prior to the end of fiscal year 2003. The request clearly precipitates the ability of the DEA to collect the fees to support these program increases. Should the DEA determine that these enhancements more accurately reflect the mission of the Drug Diversion Control Program than current activities, the DEA may redirect existing resources within this account through the reprogramming process.

IMMIGRATION AND NATURALIZATION SERVICE (INCLUDING OFFSETTING FEE COLLECTIONS)

SALARIES AND EXPENSES

Appropriations, 2002	\$3,371,440,000
Budget estimate, 2003	3,241,787,000
Committee recommendation	3,076,509,000

The Committee recommends an appropriation of \$3,076,509,000. The recommendation is \$165,278,000 below the budget request.

The Committee recommendation includes a 4.1 percent pay increase. The reduction is attributable to the termination of a single program, discussed below, the transfer of Chimera funding to a separate account, and the transfer of terrorism task force resources to the Attorney General. The Committee is aware that up to \$51,366,000 in carryover will be available to apply to this account and ex-

pacts that new found efficiencies will free up additional resources.

Managing into crisis.—Despite clear language in last year’s conference report directing the INS to report shortfalls in the “user fee account” and instructing INS to fully cover “base” expenses in that account before undertaking program initiatives, the INS approached the Committee in June 2002 regarding an impending shortfall in the “user fee account”. Congressional direction had been ignored, new spending initiated, and, predictably, crisis resulted. In earlier years, INS has allowed excessive, unbudgeted, temporary duty and overtime expenditures to eat deeply into capital investment accounts, resulting in serious shortfalls of basic equipment, vehicles, and facilities. There is only so much that can be done to nurse the INS through these self-inflicted wounds. Therefore, not later than 30 days after date of enactment of this Act, the INS shall submit to the Committees on Appropriations detailed spend plans for each appropriated and fee account under this heading. Each plan shall clearly demonstrate INS’ strategy for living within its means in fiscal year 2003. The Committee will not entertain reprogrammings or supplemental requests increasing funding for any INS accounts short of the most extraordinary of circumstances.

Training.—The long-awaited report on the effectiveness of basic training for Detention Enforcement Officers [DEOs] confirms the Committee’s worst fears about the inadequacy of DEO training. INS has undertaken four initiatives to better prepare DEOs for their duties: (1) a review and reclassification of the DEO position description, (2) a revision of the course curriculum development process and training methodology, (3) an increase in the scope and length of the DEO basic training program, and (4) an expansion of continuing education to include all officers in the DEO program. The Committee is anxious to learn whether these initiatives are improving DEO preparedness for an increasingly complex job. Therefore, the Committee directs the INS to provide a follow up report on the effectiveness of basic training and continuing education for DEOs. The report shall be delivered not later than March 1, 2004.

Information technology.—In a sense, the INS has the most difficult job of all in the war on terrorism. The volume of people moving across our border on a daily basis is staggering. Aliens that already have visas arriving at ports of entry benefit from a presumption of innocence, because they have been screened and passed by the U.S. Government once. Cues that inspectors might think indicate suspiciousness, such as an unwillingness to lock eyes, often have cultural roots that will muddle the results of spot interviews. How does an inspector pick out the terrorist from thousands of innocent people?

Intelligence is the key, but this is intelligence of an order we have never seen. Many of the perpetrators of terrorist attacks are from good families, have no criminal record, and give no indication of a propensity for violence until they immolate themselves and everyone near. It is not enough to target and eliminate the masterminds. We must also identify and neutralize the recruit before his or her mission is accomplished.

The current approach taken by the INS to address this problem, more bodies, more overtime, more of everything, will only hinder the most clumsy or conscience-stricken terrorists, a record borne out by whom we have picked up and whom we haven’t. INS inspectors and Border Patrol agents must have real-time access to intelligence files. Not back in headquarters or at their offices, but at their posts or in their vehicles. Only

then can they hope to discern targets from clutter.

Unfortunately, the tangle of stovepiped data bases that comprise the INS’ current information technology [IT] capabilities will take years to untangle. The Chimera system, mentioned above, will someday provide the backbone for a universal network, but the dream will not become reality for several years. In the meantime, investments must be targeted at existing systems that will ultimately integrate into Chimera. New stand alone systems, or antiquated systems scheduled for decommissioning as Chimera comes on line, do not merit further investment. The Committee looks forward to the IT strategy that will be proposed by Justice Management Division on behalf of the INS.

Border Patrol Staff and Equipment.—Since the terrorist attacks on September 11, 2001, the security of our borders has become paramount. To ensure there are sufficient personnel to protect our borders, the Committee recommendation includes an additional \$76,276,000 for 570 additional Border Patrol agents, as authorized. Along with additional personnel, the recommendation includes an additional \$28,000,000 to enhance the Enforcement Case Tracking System [Enforce] database and to deploy additional biometric equipment to better document and track the investigation, identification, apprehension, detention, and/or removal of immigration law violators.

Entry-exit system.—The Committee has begun to analyze the full implications of the Enhanced Border Security and Visa Entry Reform Act of 2002, the USA PATRIOT Act of 2001, the Visa Waiver Permanent Program Act of 2000, the Immigration and Naturalization Service Data Management Improvement Act of 2000, the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, and the Immigration Act of 1990 regarding travel to and from the United States by Americans and foreigners. In brief, to fully implement laws currently on the books, it will be necessary for every traveler leaving or entering the United States, be they U.S. citizens or not, to be fingerprinted and to carry a machine-readable, tamper-proof travel document with at least one unique biometric identifier. Information on all travelers, including biographical information, biometrics, and entry and exit dates, will be retained within a central database, readily available to Federal, State, and local law enforcement agencies. Mandatory interviews for visa applicants will be required to provide necessary intelligence information and certain aliens will be required to register periodically. Cost estimates to properly implement the current body of law runs into the tens of billions of dollars. Based upon information provided to date, it is unclear what the proposed entry-exit system is or will become, and how it will address these expansive directives. More importantly, the case has yet to be made as to how entry-exit would stop would-be terrorists from entering the country. Therefore, no funds have been provided for this project.

Border security.—On its own initiative, the Justice Department recently unveiled the National Security Entry-Exit Registration System [NSEERS]. The ignoring of reprogramming requirements aside, it is alarming to see INS establishing what appears to be a new application to a stovepiped legacy computer system. It was exactly this kind of system development, the narrow design of systems or applications to replicate paperwork transactions that were unable or only marginally able to communicate with other databases, that created the information technology disaster that confronts the INS. NSEERS should be an application of Chimera. Also, the value of NSEERS remains

questionable. Billed as a terrorist dragnet, only the most feeble-minded terrorist is apt to be tripped up by the questioning of an INS inspector. Although the Department recently claimed that NSEERS had nabbed 180 people, the implication being that they were terrorists, all 180 were routine criminals. commendable, to be sure, but an inadvertent gain rather than mission success. The Committee cannot support expanding this program until it has a far better idea of how NSEERS fits into the INS' new enterprise database and how brief interviews will reveal terrorists for whom they are.

Pay Upgrades.—Attrition rates among Border Patrol agents and INS inspectors is at an all time high. To help address this ever increasing crisis, the Committee recommendation includes an additional \$37,200,000 for a Border Patrol pay increase from the GS-9 level to the GS-11 level for journeymen with 1 year of successful work experience and \$20,600,000 for a pay increase for INS inspectors with 1 year of successful work experience at the GS-9 level.

Land Border Inspectors.—The recommendation includes \$34,000,000 to hire, train and deploy 460 additional immigration inspectors that will enhance border security at land border ports-of-entry.

Staffing Levels.—The Committee notes that INS staffing levels at the Santa Teresa and Columbus Ports of Entry [PoEs] in New Mexico are not sufficient to meet the needs of those ports. In particular, though non-commercial traffic has significantly increased over the past year at Santa Teresa, INS staffing has not kept pace. The Committee urges the INS to give full consideration to the needs of the New Mexico PoEs when making staffing decisions.

The Committee is aware of a growing number of illegal aliens in Iowa and Illinois. The Committee directs the INS to review the INS law enforcement needs of the Quad Cities, a metropolitan area incorporating the Iowa communities of Davenport and Bettendorf, and the Illinois communities of Moline and Rock Island.

In addition, the Committee recognizes the heavy and increasing workload in the upper Shenandoah Valley, and encourages the INS to establish a sub-office with an officer-in-charge in Roanoke, Virginia.

Alternatives to Detention.—The Committee recommendation includes \$7,300,000 for the Alternatives to Detention Program. This funding will allow community-based organizations to screen asylum seekers and other INS detainees for community ties, provide them with necessary services, and help to assure their appearance at court hearings.

Legal Orientation Programs.—The Committee recommends \$2,800,000 for non-governmental agencies to provide "live presentations" to persons in INS detention prior to their first hearing before an immigration judge. These presentations will provide immigration detainees with essential information about immigration court procedures and the availability of legal remedies to assist detainees in distinguishing between meritorious cases and frivolous cases.

Information Resource Management.—The Committee recommendation includes an additional \$83,400,000 for an "interoperable law enforcement and intelligence data system" for the INS, referred to as Chimera, within a separate account under General Administration to be managed by the Justice Management Division.

Green Cards.—The Committee is aware that resident aliens in the United States are using over 2,000,000 green cards with no expiration date. These documents do not have the secure features of the optical memory cards currently used as green cards, and thus could be subject to extensive counterfeiting

and represent a major impediment to securing the nation's borders. The Committee directs the INS to submit a report not later than July 1, 2003 to the Committees on Appropriations with the number of green cards currently issued with no expiration date, the original date they were issued, as well as a proposed plan to replace these older green cards.

The recommendation also includes \$6,544,000 for the Debt Management Center, \$16,289,000 for the Law Enforcement Support Center, and an additional \$100,000,000 to address shortfalls in vehicles and equipment.

OFFSETTING FEE COLLECTIONS

As in past years, the Committee directs the INS to allocate funding for base activities before it undertakes any program enhancements.

IMMIGRATION USER FEE

The Committee recommends a spending level of \$658,295,000, the full amount requested.

To the degree that fee resources are available, the Committee includes an increase of \$51,503,000 over fiscal year 2002 for 760 additional inspectors and support staff for inspections operations at airports and seaports.

INS Inspector Staffing.—The Committee recommends the INS give full consideration to the needs of the Miami International Airport and the Ed McNamara Terminal Northwest Airlines World Gateway when making air-port inspector staffing decisions.

Passenger and Crew Manifests.—The Committee directs the INS to fully cooperate with and provide up to \$25,000,000 as a reimbursement to the Transportation Security Administration's [TSA's] Office of Maritime and Land Security in developing and establishing a Maritime Intelligence System [MIS], as defined in Section 70113 of the Maritime Transportation Security Act of 2002 (Public Law 107-295). The MIS system shall integrate and analyze collected data on passenger and crew manifests and any other information that could be construed as potential threats against the United States.

IMMIGRATION EXAMINATIONS FEE

The Committee recommends a spending level of \$1,462,803,000, the full amount requested.

To the degree that fee resources are available, the Committee recommendation includes an increase of \$50,496,000 to accelerate the pace of efforts to reduce the time required to adjudicate immigration benefit applications. With this funding, the INS claims it will be able to attain a 6-month national average for the processing of all benefits applications and ensure application processing and related services are timely, consistent, fair and of high quality.

BREACHED BOND/DETENTION FUND

The Committee recommends a spending level of \$171,275,000, the full amount requested.

Detention and Removals.—The Committee recommendation includes \$50,069,000 for the planning and construction of additional detention bed space. This funding will address the increasing number of apprehended illegal aliens, which consistently exceeds available detention space.

CONSTRUCTION

Appropriations, 2002	\$228,054,000
Budget estimate, 2003	267,138,000
Committee recommendation	267,138,000

The Committee recommends an appropriation of \$267,138,000. The recommendation is identical to the budget request.

The recommendation includes \$14,000,000 for building demolition, perimeter security,

and dormitory and classroom construction at the Charleston Border Patrol Academy and \$250,000 for the construction of an INS processing and office facility in Nome, Alaska.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

Appropriations, 2002	\$3,808,600,000
Budget estimate, 2003	4,081,765,000
Committee recommendation	4,068,237,000

The Committee recommends an appropriation of \$4,068,237,000, including, within available resources, a 4.1 percent pay increase. The recommendation is \$13,528,000 below the budget request.

Activation of new prisons.—The Committee recommendation includes funding for activation of four new facilities which will add 4,416 beds: FCI Gilmer, West Virginia, USP Big Sandy, Kentucky, USP McCreary County, Kentucky, and USP Victorville, CA. The Committee also recommends activation funding for expansions at USP Marion, Illinois and FCI Safford, Arizona. These two expansions will add nearly 800 beds.

Female inmates.—The Committee supports the National Institute of Corrections' continuing work with correctional systems (State and Federal) to address the issue of staff sexual misconduct involving female inmates in correctional institutions through the provision of technical assistance, education and training, and other monitoring activities pursuant to the recommendations of the General Accounting Office.

BUILDINGS AND FACILITIES

Appropriations, 2002	\$813,552,000
Budget estimate, 2003	395,243,000
Committee recommendation	470,221,000

The Committee recommends a total of \$470,221,000 for fiscal year 2003 for the construction, modernization, maintenance, and repair of prison and detention facilities housing Federal prisoners. This amount is \$74,978,000 above the budget request.

The Committee continues to strongly support the BOP's construction program, designed to provide sufficient inmate beds to manage overcrowding in facilities and maintain them in a safe and secure manner for staff, inmates and surrounding communities. The funding provided for facilities includes:

Sentenced Capacity Projects

Expansion of Existing Facilities:

FCI Sandstone, MN (Housing Unit)	5,300,000
FCI Otisville, NY (Wit- ness Security Unit)	11,600,000
USP Florence, CO (Spe- cial Housing Unit)	5,600,000
Subtotal	22,500,000

New Facilities:

Hazleton, WV (Secure Fe- male Unit)	66,600,000
FCI Pollock, LA	116,872,000
USP Berlin, NH (With Work Camp and Pro- tective Custody Unit) ..	20,000,000
FCI Mid-Atlantic Region	34,837,000

Subtotal	238,309,000
----------------	-------------

Total New Construc- tion Program Increases	260,809,000
---	-------------

The Committee commends the BOP for working diligently to increase inmate housing capacity by expanding existing facilities within available funds. The Committee fully supports these cost effective efforts and expects the BOP to provide reprogramming and

funding transfer requests in a timely manner to expedite these construction projects.

FEDERAL PRISON INDUSTRIES, INC.

(LIMITATION ON ADMINISTRATIVE EXPENSES)

Appropriations, 2002	\$3,429,000
Budget estimate, 2003	3,429,000
Committee recommendation	3,429,000

This Committee recommends a limitation on administrative expenses of \$3,429,000 for the Federal Prison Industries, Inc. This amount is equal to the fiscal year 2002 funding level and to the amount requested.

The Committee continues to strongly support Federal Prison Industries [UNICOR] and recognizes its importance in the efficient and safe management of Federal prisons. UNICOR provides prison inmates with the opportunity to learn important work habits, participate in meaningful employment which keeps them productively occupied during work hours, and develop improved job skills which reduces recidivism. The Committee also recognizes the necessity for UNICOR to grow as the inmate population increases. Finally, UNICOR is a self-supporting revolving fund the resources of which are derived from sales of its products. In the future, the BOP is directed to submit only UNICOR's appropriations language exhibit.

OFFICE OF JUSTICE PROGRAMS

JUSTICE ASSISTANCE

Appropriations, 2002	\$437,008,000
Budget estimate, 2003	214,024,000
Committee recommendation	2,232,057,000

The Committee recommends an appropriation of \$2,232,057,000. The recommendation is \$2,018,033,000 above the budget request.

The funding provided for justice assistance includes funds to States for research, evaluation, statistics, information sharing, emergency assistance, missing children assistance, counterterrorism programs, and the management and administration of grants provided through the Office of Justice Programs.

Justice Assistance

	Committee recommendation
National Institute of Justice	\$64,879,000
The Office of Science and Technology	(38,000,000)
The National Law Enforcement and Corrections Technology Centers	(22,000,000)
Bureau of Justice Statistics	32,335,000
Missing children	29,000,000
Regional information sharing system	28,278,000
White Collar Crime Center	9,230,000
Office of Domestic Preparedness	2,038,000,000
Management and administration	30,335,000
Total justice assistance	2,232,057,000

National Institute of Justice [NIJ].—The Committee recommends an appropriation of \$64,879,000. The recommendation is \$13,422,000 below the budget request and \$10,422,000 above the fiscal year 2002 level.

Office of Science and Technology.—The Committee commends the efforts of the leadership of the National Institute of Justice's [NIJ] Office of Science and Technology [OS&T]. This office has assisted local law enforcement in making significant advances in the areas of non-intrusive, concealed weapons and contraband detection, vehicle stop-

ping, DNA testing, public safety standards development, officer protection, less-than-lethal incapacitation, public safety communications, information management, counterterrorism, crime mapping, location and tracking, secure communications, and noninvasive drug detection. In addition, the Committee commends and encourages the continuing partnership that OS&T has developed with the National Institute of Standards and Technology with the goal of developing standards and carrying out scientific and engineering research related to the public safety community.

To implement the mission of OS&T, pursuant to The Homeland Security Act of 2002 (Public Law 107-296), the Committee recommends \$38,000,000 for OS&T from within the overall amount provided for NIJ. In addition, within the funds provided for the local law enforcement block grant program, \$20,000,000 is for OS&T to assist local law enforcement units in identifying, selecting, developing, modernizing, and purchasing new technologies in accordance with the aforementioned Act.

The National Law Enforcement and Corrections Technology Centers.—Since 1994, the National Law Enforcement and Corrections Technology Centers [NLECTC] have served the State and local law enforcement and corrections communities by providing support, research findings, and technical expertise on issues that allow them to perform their jobs safer and more effectively. The NLECTC system consists of facilities located across the country and each facility specializes in one or more specific areas of research and development. The Committee commends the work that NIJ's Office of Science and Technology [OST], and through it the NLECTC system, has done to improve the capabilities of the law enforcement and corrections communities. To further the work of the NLECTC system, the Committee recommends \$22,000,000 for the continued support of the system. Within available funds, the Committee recommends that NIJ consider funding the Center for Civil Force Protection and the Public Safety Technology Assessment Facility at Sandia National Laboratories in New Mexico. The Center provides important physical security counterterrorism assistance to Federal, State, and local law enforcement. Of the amount provided, the Committee directs that funds be distributed in the following manner to the six Regional Centers:

The National Law Enforcement and Corrections Technology Regional Centers

[In thousands of dollars]

	Amount
Northeast Regional Center	3,000
Southeast Regional Center	3,000
Rocky Mountain Regional Center	3,000
Western Regional Center	3,000
Rural Law Enforcement Technology Center	3,000
Northwest Center	3,000

Total for Regional Centers 18,000

In addition to the above activities, within the amounts provided, NIJ is to provide grants for the following projects:

- \$750,000 for Lane County, Oregon's Breaking the Cycle of Juvenile Drug Abuse program to decrease juvenile crime and drug abuse through early identification and intervention;
- \$1,500,000 is for the Center for Task Force Training Program;
- \$750,000 to the North Carolina Attorney General's Office for Telemarketing Fraud Enforcement and Privacy Project; and
- \$650,000 for the Mistral Security Non-Toxic Drug Detection and Identification Aerosol Technology.

—\$350,000 for the Pennsylvania Task Force on Prison Overcrowding;

—\$750,000 for Operation Ceasefire in Charleston, SC for overtime for response teams.

Bureau of Justice Statistics [BJS].—The Committee recommends an appropriation of \$32,335,000. The BJS is responsible for the collection, analysis, and publication of statistical information on crime, criminal offenders, victims of crime, and the operations of the Nation's justice systems.

Office of Victims of Crime.—The Office of Victims of Crime [OVC] administers formula and discretionary grants designed to benefit victims, provide training to professionals who work with victims, develops projects to enhance victims' rights and services, and undertakes public education and awareness activities on behalf of crime victims. In fiscal year 2002, OVC was provided \$68,100,000 to respond to the September 11, 2001 terrorist attacks. The Committee directs that the OVC provide a report to the Committee no later than March 15, 2003 on the status of how the emergency funds have been spent.

Missing Children Program.—The issue of child exploitation has been raised to the forefront of the national conscience due to the recent string of child pornography and missing children cases that have been highlighted in the media over the last few months. The Committee continues to strongly support the Missing and Exploited Children Program run by the Bureau of Justice Assistance. The Committee recommends \$29,000,000 to continue and expand efforts to protect the nation's children, especially in the areas of locating missing children, as well as the growing wave of child sexual exploitation found on the Internet.

Within the amounts provided, the Committee has included the following:

(1) \$12,500,000 to expand the Internet Crimes Against Children Task Forces [ICAC Task Force]. These task forces assist State and local law enforcement agencies in acquiring the knowledge, equipment, and personnel resources necessary to successfully prevent, interdict, and investigate cases of child exploitation on the Internet.

(2) \$12,500,000 for National Center for Missing and Exploited Children [NCMEC]. The NCMEC is the clearinghouse and national resource center regarding the issue of missing and exploited children. Last year the Center accepted over 155,000 hotline calls from law enforcement, prosecutors, and citizens requesting information or services. The Center also assisted in the recovery of more than 5,000 missing, abducted, and runaway children.

In addition, the Committee created the CyberTipline under the NCMEC in fiscal year 1999. The CyberTipline provides online users an effective means of reporting Internet-related child sexual exploitation in the areas of distribution of child pornography, online enticement of children for sexual acts, and child prostitution. Within the amounts provided for the NCMEC, the Committee recommends \$2,245,000 for the continuation of the CyberTipline.

(3) \$3,000,000 for the Jimmy Ryce Law Enforcement Training Center for training of State and local law enforcement officials investigating missing and exploited children cases.

Regional Information Sharing System [RISS].—The Committee recommends an appropriation of \$28,278,000. The RISS program provides funds to maintain six regionally-based information sharing centers which allow for information and intelligence services to be disseminated nationwide addressing major, multi-jurisdictional crimes. The Committee supports the current effort to link the RISS system with the Law Enforcement On-Line [LEO] information system,

which will greatly expand access to critical law enforcement information at the Federal, State, and local level.

Management and Administration.—The Committee provides \$30,335,000 for management and administration of the Bureau of Justice Assistance account. The Committee directs that the current hiring freeze that has been placed on the Office of Justice Programs [OJP] be lifted and that OJP actively fill all authorized vacant positions. Furthermore, the OJP is directed to provide quarterly reports to the Committee on the status of its hiring process.

Competitive sourcing.—The Department has reported to the Committee that “OJP is not outsourcing OJP activities. OJP is undertaking a ‘competitive sourcing’ effort”. The Committee supports this effort if it can be assured that effectiveness is improved and savings are attained. However, utilizing competitive sourcing for a large percentage of the OJP workforce is not acceptable. The Department still needs a majority of personnel who are sworn to support and defend the Constitution of the United States against all enemies. The Committee directs that, before proceeding with any change, OJP shall provide a detailed plan to the Committees on Appropriations. The plan shall be approved by both Committees before the Department proceeds with “competitive sourcing”.

The Office of Domestic Preparedness.—The Committee has long viewed State and local jurisdictions' ability to detect, prevent and respond to a terrorist attack as one of its highest priorities. State and local responders are first to arrive on the scene when a terrorist attack occurs and must be prepared to protect life and property. This function is inherently non-Federal, although Federal resources and expertise are needed to manage the crisis and provide support to State and local assets when an attack overwhelms their resources.

The recommendation demonstrates the Committee's continued support for the Office of Domestic Preparedness [ODP]. ODP must continue its vital and successful program for assisting State and local response agencies. Continued funding to ODP is more critical now than ever, given the unprecedented threat to our national security that we currently face. Responding to an act of terrorism is manifestly different than responding to natural disasters. Grouping terrorism preparedness and response, especially as it concerns weapons of mass destruction [WMD], under an emergency management “all hazards” approach puts our first responders, as well as the general public, at risk. Treating both types of catastrophe response in the same manner does not account for the fundamental differences between the national security/law enforcement response to terrorism and the emergency management response to terrorism.

[In thousands of dollars]

	Committee recommendation
State Strategic Planning	60,000
Web Site Pilot	5,000
Equipment:	
Grants	1,047,000
Pine Bluff	10,000
Equipment Standards and Testing	15,000
POD Enhancements	20,000
NSSE POD	5,000
IAB	1,000
Emerging Equipment Demo/Test-bed program	15,000

	Committee recommendation
T/A for State Plans	15,000
Subtotal, Equipment	1,128,000
Training:	
NDPC Training Program	190,000
CDP	[50,000]
LSU	[35,000]
NMT	[35,000]
TEEX	[35,000]
NTS	[35,000]
Dugway	10,000
Continuing and Emerging Training	125,000
Consequence Training	[5,000]
State Training Competitive Discretionary Grants	
New Training Centers	80,000
Virtual Medical Campus	60,000
Dartmouth Institute for Security and Technology Studies	2,000
Oklahoma City National Memorial Institute for the Prevention of Terrorism	18,000
Subtotal, Training	18,000
Subtotal, Training	503,000
Exercises:	
Grants	200,000
Top Officials [TOPOFF] Exercise Series	15,000
Federal, State and Local [FSL] Regional Exercise Series	5,000
Improved Response Program [IRP]	10,000
Interagency Exercise Fund	8,000
Cross-border Exercises	3,000
Prepositioned Equip. Program POD Exercises	3,000
Evaluation & After Action Program	5,000
Emerging Exercise Needs	3,000
Exercise Support Program	20,000
Subtotal, Exercises	272,000
Technical Assistance [TA]	50,000
Management and Administration	20,000
Total, Office of Domestic Preparedness	2,038,000

The recommendation includes \$60,000,000 for State Strategic Planning. This funding will allow States to begin formalizing their planning for homeland security, a process that will be headed by the homeland security offices established by the Governors. ODP is directed to work with the States to reassess their response capabilities and to update and enhance their Three-Year Statewide Domestic Preparedness Strategies in fiscal year 2003. In updating and enhancing their Strategies, States are expected to consult with local governments on all aspects of their respective strategies and on the allocation of resources in support of those strategies. Also, of the funds provided, \$5,000,000 is for ODP to continue a pilot project to develop a comprehensive, interactive web site to support the Nation's State and local first responders and disseminate to them a wide spectrum of critical information needed for domestic preparedness.

Equipment.—The recommendation includes \$1,128,000,000 for the equipment grant program managed by the Office of Domestic Preparedness [ODP]. This program provides funding to enhance the capabilities of State and local jurisdictions to respond to and mitigate the consequences of terrorist attacks. The Committee urges ODP to work with the States to develop procedures that expedite the awarding of equipment grants. The Committee does not support the concept

of requiring States to match equipment grants funds in order to qualify for funding under this program.

Of the funds provided for equipment, the recommendation includes \$1,047,000,000 for grants to the States based on their approved Three-Year Statewide Domestic Preparedness Strategies. These funds are available to all States on a formula basis, as authorized by section 1014 of the USA PATRIOT ACT, (Public Law 107-56). Also of the funds provided for equipment, \$10,000,000 is recommended to continue and expand ODP's successful mobile equipment training program at Pine Bluff Arsenal. The augmentation of this program will be required because of the significant increases in funding for equipment for first responders contained in this Act. Also of the funds provided for equipment, \$15,000,000 is for the development of standards for personal protective, decontamination, detection, and communications equipment. These types of equipment are lacking in operational standards for use in a WMD incident. Also within the funds provided for equipment, \$1,000,000 is for the Interagency Board [IAB] to continue its efforts to develop equipment standards. The IAB was established by the Justice Department in 1999 to advise and make recommendations to the Attorney General on matters concerning first responder equipment and standards. Also of the funds provided for equipment, \$20,000,000 is for ODP's Prepositioned Equipment [POD] Program. This program has established sets of prepositioned equipment designated to be deployed immediately to the scene of a terrorist attack for use by first responders. This funding will provide for the maintenance and operational costs of the 11 equipment pods currently funded under this program. Also of the funds provided for equipment, \$5,000,000 is recommended for the purchase and operation of an equipment pod that can be strategically positioned during designated National Security Special Events [NSSE]. This pod will provide specialized equipment for 150 responders to immediately replenish equipment that is lost, damaged, or destroyed during a WMD attack at a NSSE. Also of the funds provided for equipment, \$15,000,000 is for the development of an Emerging Equipment Demonstration and Test-bed Program. This program is designed to rapidly deploy new and emerging technologies into the field for true operational testing. This program will help bring state-of-the-art technologies to first responders in the field. Finally, \$15,000,000 is recommended for technical assistance for State plans.

Training.—The recommendation includes \$503,000,000 for ODP for first responder training programs. Of the funding provided for training, \$190,000,000 is for the continuation and expansion of the training currently underway at the existing Consortium training centers. Of this amount, the Center for Domestic Preparedness shall receive \$50,000,000; Louisiana State University, New Mexico Institute for Mining and Technology, Texas A&M University, and Nevada Test Site, shall each receive \$35,000,000.

The Three-Year Statewide Domestic Preparedness Strategies exposed a “preparedness gap” in this Nation. The number of individuals that must receive training before we can consider ourselves prepared for terrorism involving WMD is considerable. However, in order to provide training to greater numbers of responders, additional capacity must be built. Of the funding provided for training, \$10,000,000 shall be used to continue an already-established program between Dugway Proving Ground and the National Domestic Preparedness Consortium [NDPC] to develop and deliver advanced bio-terrorism training utilizing the Dugway Proving Ground's specialized facility.

The Committee further expects that, with the funding provided, ODP will develop and implement a comprehensive and aggressive training standardization program. This should include the establishment of training standards for each of the key public safety disciplines involved in terrorism response. The Committee expects that all current and future training will adhere to these standards, once developed.

New Training Centers.—Of the funds provided, \$60,000,000 shall be to establish new training centers. Decisions concerning the establishment of the new training centers shall be made by ODP in consultation with the Committees on Appropriations.

Dartmouth Institute for Information Infrastructure Protection.—Of the funds provided, \$18,000,000 is recommended for the Institute for Information Infrastructure Protection [IIP], a consortium of not-for-profit and academic research institutions (including national laboratories operated by private contractors) managed and led by the Institute for Security Technology Studies at Dartmouth College. Within this amount, \$15,000,000 is for grants. The IIP will collaborate with the Office of Science and Technology Policy, the President's Critical Infrastructure Protection Board, other relevant government agencies, and the private sector to develop a prioritized national research and development [R&D] agenda in cyber security and information infrastructure protection [IIP]. It will also fund research to address R&D priorities identified by the IIP agenda and leadership, and promote collaboration and information sharing among cyber security and IIP research institutions in academia, industry, and government.

Oklahoma City National Memorial Institute for the Prevention [MIPT].—Of the funds provided, \$18,000,000 is recommended for MIPT. MIPT's Best Practices/Lessons Learned Knowledge Base is an Internet repository where emergency responders can share best practices, observations, and lessons learned to improve our ability to combat terrorism on U.S. soil. It provides a forum for responders in every State, Territory, and community across the United States. This information sharing will allow trend analysis to strengthen civilian responder training programs, identify equipment shortfalls, and focus research agendas.

Exercises.—The recommendation includes \$272,000,000 for ODP to assist State and local jurisdictions in planning and conducting WMD exercises to test and validate their terrorism response plans and make determinations regarding future needs. Based on its pre-September 11 review of the Statewide Strategies, ODP estimated that more than 2,500 State and local jurisdictions needed to conduct WMD exercises. Within the amount provided for exercises, \$200,000,000 is for grants to meet critical combating terrorism exercise needs identified in the Three-year Statewide Domestic Preparedness Strategies. These grants will provide the resources to properly design, develop, conduct, and evaluate performance-based exercises under a State-administered multi-year exercise program.

In May, 2000, ODP ran the highly successful “Top Officials”, or “TOPOFF”, exercise. This was an exercise series which provided a cycle of performance-based exercises for Federal, State, and local officials and first responders. TOPOFF demonstrated coordinated national crisis and consequence management capabilities in response to a range of WMD threats. The Committee recommends \$15,000,000 for the continuation of the TOPOFF series, with TOPOFF II scheduled to take place in May, 2003. TOPOFF II involves 9 major exercise activities, culminating in a full-scale national exercise.

Within the funds made available for exercises, \$5,000,000 is for the Federal, State, and local [FSL] exercise program. This program integrates regional homeland security activities through a comprehensive cycle of exercises. This program's particular emphasis is on rural homeland security, multi-State emergency management assistance compacts [EMACS], and multi-jurisdictional mutual aid agreements [MAAs].

For the continuation of the Nunn-Lugar-Domenici [NLD] Domestic Preparedness Program, the Committee recommends \$10,000,000 for the NLD Chemical and Biological Improved Response Program [IRP] to conduct analysis and evaluations of response improvements, including doctrine, plans, policies, procedures, protocols, equipment, and exercises to address terrorism involving chemical or biological weapons.

Federal, State, and local participation in national-level combating terrorism exercises is hampered by inadequate and uneven funding. This results in incomplete or diminished participation by State and local jurisdictions, thwarting effective analysis of combating terrorism preparedness. Of the funds made available for exercises, \$8,000,000 shall be to establish an exercise fund, to be administered by ODP, to ensure full participation by key Federal, State, and local entities in national-level combating terrorism exercises. For periodic exercises required to test and evaluate pod deployment and use, the Committee recommends \$3,000,000. Also, \$3,000,000 is recommended for Cross Border Exercises with Mexico and Canada.

Due to the scope, pace, and complexity of the National exercise program, \$5,000,000 is recommended for an evaluation program. This program will allow ODP to conduct evaluations of programs and program activities conducted in support of existing ODP training, exercise, technical assistance, and equipment programs.

For emerging exercise needs, \$3,000,000 is recommended. The Committee directs ODP to conduct a comprehensive review of government and commercial exercise and simulation applications and methodologies. This will augment the capacity of State and local jurisdictions to effectively address their exercise requirements.

Also within funds made available for exercises, \$20,000,000 is for specialized technical support to assist States and local jurisdictions in administering multi-year combating terrorism exercise programs. This assistance shall consist of direct technical support to States and local jurisdictions for exercise design, development, and evaluation, and the conduct of performance-based exercises.

Technical assistance.—The recommendation includes \$50,000,000 for the ODP's technical assistance and planning support for the States. The Committee directs ODP to provide targeted, site-specific assistance to local jurisdictions. Of this amount, \$7,000,000 is to develop a pilot program to field and evaluate strategies for assessing and reducing vulnerabilities at events involving large concentrations of people in both urban and rural environments. This program should establish generic vulnerability assessment tools for State and local government self-assessments; provide assistance for the application of such tools in support of State and local public and private entities responsible for coordinating such events; work with event coordinators, emergency managers, and first responders to expose vulnerabilities via exercises and simulations; identify, field, and evaluate emerging technologies and structural procedures to mitigate vulnerabilities; prepare and circulate a newsletter that describes and evaluates the performance of emerging technologies; and evaluate overall vulnerability assessment

program impacts, and transition “lessons learned” in support of State and local planning activities.

Management and administration.—The Committee recommends \$20,000,000 for the Office of Domestic Preparedness to manage the expansion of its domestic preparedness programs, as directed in this Act.

STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE

Appropriations, 2002	\$2,654,454,000
Budget estimate, 2003	751,878,000
Committee recommendation	1,368,415,000

The Committee recommends an appropriation of \$1,368,415,000. This recommendation is \$616,537,000 above the budget request. These funds provide assistance to State and local governments in their drug control and other law enforcement efforts as follows:

<i>Office of Justice Programs—State and local law enforcement assistance [In thousands of dollars]</i>	<i>Committee recommendation</i>
Local law enforcement block grant	400,000
Boys and Girls Clubs	[90,000]
Law Enforcement Technology	[20,000]
Cooperative agreement program	20,000
Indian assistance	48,000
Indian Country Prison Grants	[35,000]
Alcohol and Substance Abuse	[5,000]
Indian tribal courts program	[8,000]
Byrne grants:	
Discretionary	134,700
Drug courts	50,000
Juvenile accountability incentive block grant	249,450
Violence Against Women Act programs	390,565
Substance abuse treatment for state prisoners	70,000
Safe Return Program	900
Law enforcement family support programs	1,500
Senior citizens against marketing scams	2,000
Motor Vehicle Theft Prevention	1,300
Total, State and local law enforcement assistance	1,827,715

Local law enforcement block grant.—The Committee recommendation includes \$400,000,000 to continue the local law enforcement block grant program which provides grants to localities to reduce crime and improve public safety. Of the amounts provided, \$20,000,000 will be provided to NIJ to assist local units to identify, select, develop, modernize, and purchase new technologies for use by law enforcement. The recommendation for funding for the local law enforcement block grant continues the commitment to provide local governments with the resources and flexibility to address specific crime problems in their communities.

Boys and Girls Clubs.—Within the amounts provided for the local law enforcement block grants, the Committee recommends \$90,000,000 for the Boys and Girls Clubs. The Committee commends Boys and Girls Clubs of America for its effort to reach all children who are in need of support and affirmation.

Indian Country Grants.—The recommendation provides \$48,000,000 for Indian Country grants. Of this amount, \$8,000,000 is to assist tribal governments in the development, enhancement, and continuing operation of tribal judicial systems by providing resources

for the necessary tools to sustain safer and more peaceful communities and to implement Section 201 of title II of the Indian Tribal Justice Technical and Legal Assistance Act of 2000, and \$35,000,000 is for Indian Country Prison Construction. The Committee understands that the Comprehensive Indian Resources for Community Law Enforcement (CIRCLE) initiative is working well in three Indian communities in which it is deployed. The Committee urges the department to consider ways to expand the CIRCLE project into other communities. In addition, the Committee requests that not later than June 15, 2003, the Department submit a proposal to expand the CIRCLE project by integrating and coordinating resources from across the Federal agencies for purposes of Indian law enforcement, public safety, substance abuse, tribal justice systems, and facilities construction into a small grant program to Indian tribes and tribal consortia.

Within the amount for prison construction, the Committee directs that grants be provided for the following projects:

- \$5,000,000 to the Standing Rock Sioux Tribe in South Dakota for a Juvenile Detention and Recovery Facility;
- \$2,900,000 to the Yankton Sioux Tribe in South Dakota for the construction of a Juvenile Detention Facility;
- \$900,000 to the Lower Brule Sioux Tribe for the construction of a detention facility.

Edward Byrne Grants to States.—The Committee recommendation provides \$134,700,000 for the Edward Byrne Memorial State and Local Law Enforcement Assistance Program, which is for discretionary grants.

Within the amount provided for BJA discretionary grants, the Committee expects the Bureau of Justice Assistance to provide:

- \$12,000,000 for the continuation of Project HomeSafe for safety packets which include a gun locking device and information on how to handle and store guns safely. These safety packets are distributed by the foundation at no charge to any municipality that adopts the program. The Committee continues to expect that no funds be obligated for this purpose until at least an interim gun lock standard is adopted to ensure that the locks being distributed are not vulnerable to accidental or intentional disengagement. In addition, the Committee expects that a final gun lock standard be adopted no later than March 1, 2003.
- \$4,500,000 for the motor vehicle title information system, as authorized by the Anti-car Theft Improvement Act.
- \$500,000 for the Adams County, Pennsylvania Emergency Services Training Facility for program enhancements;
- \$150,000 to the University of North Dakota's Agricultural Law Program to ensure that farmers, agribusiness and other rural residents are well informed and represented on agriculture related issues;
- \$1,100,000 for an alcohol interdiction program designed to investigate and prosecute bootlegging crimes as part of a statewide effort to reduce fetal alcohol syndrome in Alaska;
- \$210,000 to the Alaska D.A.R.E. Drug Rehabilitation Program for a statewide coordinator and for the implementation new DARE curriculum;
- \$1,000,000 for the Alaska Native Justice Center for a restorative justice program;
- \$1,540,000 for the City of Alexandria for costs related to the Moussaoui, Lind, and Hanssen trials;
- \$1,500,000 for New York's Alfred University Rural Justice Institute to provide support services to youths and families who are victims of domestic violence;

- \$1,500,000 for the An Achievable Dream in Newport News, Virginia, which provides services to at-risk youth to help them perform better academically and socially;
- \$750,000 for the Arizona Criminal Justice Commission;
- \$250,000 to the Beaverton, Oregon Police Department for the Identity Theft Prevention Initiative;
- \$200,000 to the Bristol, Rhode Island Police Department for the outfitting of, and support training for, a mobile command post;
- \$500,000 for the Oglala Sioux Tribe in South Dakota to automate the functions of the court system, so as to enhance the capacity of the Oglala Sioux Tribe justice system to arrest, prosecute, convict, and rehabilitate offenders;
- \$350,000 for the Children's Medical Assessment Center in South Carolina to extend forensic healthcare services to outlying rural areas, and to extend the tracking and medical case management programs to all law enforcement jurisdictions in the local Tri-County area;
- \$150,000 to the Chattanooga Endeavors program in Tennessee to expand services and establish new public-private partnerships;
- \$500,000 for the Chicago Project for Violence Prevention in Illinois;
- \$750,000 to the City of Cincinnati, Ohio to improve training for police recruits and current officers;
- \$1,000,000 to the City of Ocean Springs, Mississippi to equip an Emergency Management and Public Safety Facility;
- \$250,000 for the City of Wellston, Missouri for a holding cell;
- \$500,000 for the Community Safety Initiative in Kansas City, Missouri;
- \$100,000 for the Criminal Justice Institute in Arkansas for DNA training and law enforcement;
- \$750,000 to Iowa State University for the creation of a Cyber Protection Laboratory which will test and evaluate computer crime defense mechanisms;
- \$2,750,000 for the D.A.R.E. program to retrain all D.A.R.E. officers nationwide and produce D.A.R.E. workbooks;
- \$1,000,000 to the Alaska Department of Corrections for a web based corrections offender information system, to be implemented in cooperation with Utah, New Mexico, Colorado, and Idaho;
- \$499,477 for the New Mexico Administrative Office of the Courts to establish Dependency Drug Courts in three judicial districts;
- \$80,000 to the Marysville, California police department for a mobile command center;
- \$2,000,000 to the South Carolina Department of Natural Resources for expanded responsibilities related to homeland security;
- \$300,000 to the Metropolitan Family Services in Illinois for the Domestic Violence and Substance Abuse program;
- \$600,000 for Tulane University in Louisiana for a domestic violence clinic;
- \$200,000 to the Native American Community Board in Lake Andes for the continuation of the Domestic Violence shelter and Community Prevention Program;
- \$300,000 to the Rhode Island Coalition Against Domestic Violence for the establishment of the Rhode Island Supreme Court's Domestic Violence Training and Monitoring Unit (DV Unit);
- \$1,000,000 for the TRIAD senior fraud prevention program;
- \$550,000 for the Albuquerque, NM DWI Resource Center to fund drunk driving awareness and prevention programs;
- \$215,000 to Edmunds County, South Dakota for a county-wide emergency warning system;
- \$4,000,000 for the Eisenhower Foundation for the Youth Safe Haven program;
- \$5,750,000 to establish the Emergency Providers Access Directory [EPAD], which provide a comprehensive list of all State and local first responders so that resources can be quickly marshaled in the case of future large scale disaster.
- \$50,000 for the Court Appointed Special Advocate [CASA] program in Davison, South Dakota which will provide advocates for children in the First Circuit;
- \$200,000 for Franklin County, New York's Domestic Violence Intervention Program to establish a third shelter in Northern New York and to increase the program's outreach efforts;
- \$500,000 to Gallatin County, Montana for the Gallatin County Re-Entry Program to provide supervision, support, and training to offenders referred by Gallatin County Courts;
- \$500,000 for the Las Vegas Metropolitan Police Department's Hispanic American Resources Team [HART] to provide enhanced resources to Las Vegas' Hispanic community;
- \$30,000 to the Huntingdon County, Pennsylvania Courthouse for security enhancements;
- \$750,000 for the Sam Houston State University in Texas to establish the Institute for the Study of Violent Groups;
- \$750,000 for the Iowa Elderly Fraud Prevention Initiative;
- \$1,000,000 to the Iowa Department of Public Health for an intense drug treatment initiative aimed at nonviolent drug offenders serving time in Polk, Linn, and Story counties;
- \$1,000,000 for Jane Doe, Inc. in Massachusetts;
- \$1,500,000 to Jefferson County Alabama for an county-wide Emergency Warning System;
- \$1,970,000 for the Lewis and Clark Bicentennial Bi-State Safety Project to provide safety mechanisms, medical services, and communications systems for visitors to the Lewis and Clark trail during the Bicentennial Commemoration;
- \$2,000,000 for the New Hampshire Department of Safety to train safety and municipal officers in the North Country (Littletown Area Learning Center);
- \$3,000,000 for the Mental Health Courts Program in accordance with the America's Law Enforcement and Mental Health Project Act;
- \$300,000 for Louisiana's Metropolitan Battered Women's Program;
- \$240,000 to the Minneapolis, Minnesota Police Department for its Crises Intervention Team;
- \$1,000,000 to the University of Mississippi for TechLaw online training for police;
- \$400,000 to continue support for an innovative and effective program which helps single head-of-household women with children reject a life of crime and drugs and build a self supporting lifestyle;
- \$4,750,000 for the Executive Office of U.S. Attorneys to support the National District Attorneys Association's participation in legal education training at the National Advocacy Center;
- \$400,000 for the New Hampshire Department of Safety to purchase two Remotec Andres V-A1 hazardous duty robot;
- \$5,000,000 for the National Center for Justice and the Rule of Law at the University of Mississippi School of Law to sponsor research and produce judicial education seminars and training for judges and other criminal justice professionals;

- \$6,000,000 to continue the effective crime prevention program (McGruff the Crime Dog) and meet the enormous demand from local law enforcement organizations regarding effective crime prevention practices;
 - \$3,000,000 for the National Fatherhood Institute, the National Physicians Center for Family Resources, and the Alabama Police Institute to study the causes and consequences of out-of-wedlock child-birth and its impact on criminal activity;
 - \$150,000 to the University of North Dakota's Native Americans into Law program to recruit and retain American Indian law students;
 - \$270,000 to the University of South Carolina for the National Center for Prosecution Ethics;
 - \$250,000 to the University of South Carolina's Children's Law Office for programs to improve the professional practice in child maltreatment and juvenile justice in South Carolina;
 - \$600,000 to the New Hampshire Department of Corrections for the purchase of digital radios to allow officers in the Department to communicate with other law enforcement officers around the State;
 - \$500,000 for program expansion at the Northeastern Illinois Public Safety Training Academy;
 - \$185,000 for South Dakota's Northern Hills Area court Appointed Special Advocate [CASA] Program for the expansion of the volunteer advocate network and to create an extension office to serve the Fourth Circuit;
 - \$5,000,000 to the New York City Police Department for safety equipment to respond to a chemical or biological incident;
 - \$3,000,000 for the New Hampshire State Police's and US Attorneys Office's cooperative effort to combat crime at the border, gang-related crime, and in investigating outlaw motorcycle gangs;
 - \$350,000 to Alaska's Partners for Downtown Progress for an innovative program for alcohol offenders, using treatment in lieu of incarceration;
 - \$500,000 for the Philadelphia, Pennsylvania Safe Streets Initiative;
 - \$500,000 for the Pittsburgh, Pennsylvania Police Bureau's Virtual Perimeter Video Surveillance system, which allows live monitoring of multiple locations by robotic cameras;
 - \$410,781 for the Colorado Springs, Colorado Police Department to integrate the Police Accountability and Service Standards (PASS) Model department-wide;
 - \$300,000 to the Rhode Island Select Commission on Race and Police-Community Relations for its Police Professionalism Initiative;
 - \$350,000 for Turtle Mountain Community College's 'Project Peacemaker' which seeks to increase the number of American Indians trained in either Tribal government or law;
 - \$8,250,000 for the South Carolina State Ports Authority [SCSPA] for the implementation of Project Seahawk. This project is designed to enhance security at and around the Port of Charleston. Funding is provided for the acquisition of communications equipment, computer software and hardware technology, and research and development needed to execute the project;
 - \$3,000,000 to include New Hampshire police, medical and fire services in a comprehensive public safety training and communications system;
 - \$105,000 for the Multnomah County, Oregon sheriff's Office to purchase portable

radios to be used by the fifty-one members of its reserve unit:

- \$1,000,000 for the Ridge House Treatment Facility to provide stabilization, habilitation, and re-entry skills to the Nevada criminal justice population;
 - \$250,000 for Riverfront District Community Policing Stations in Montgomery, Alabama;
 - \$500,000 to the Robinson Community Learning Center in South Bend, Indiana to support efforts at reducing the rate of local youth violence and young adult homicide;
 - \$100,000 to the Safe Harbor Domestic Violence Shelter in Aberdeen, South Dakota for equipment and programming;
 - \$2,500,000 for the Salt Lake Valley, Utah Emergency Communications Center;
 - \$2,000,000 for the San Joaquin Valley, California Rural Agricultural Crime Prevention Program;
 - \$450,000 for the City of Savannah, Georgia to expand the Savannah Impact Program [SIP];
 - \$2,000,000 for continued support for the expansion of Search Group, Inc. and the National Technical Assistance and Training Program to assist States, such as West Virginia, to accelerate the automation of fingerprint identification processes;
 - \$1,750,000 to the City of Fairfield, California for planning, equipment, and training necessary for response in the event of an emergency involving hazardous materials;
 - \$2,000,000 for Standing Against Global Exploitation [SAGE] to replicate and expand training materials, regional training modules, and intensive technical assistance for survivors of prostitution, sexual exploitation, violence, abuse, and trauma;
 - \$250,000 to the State of Wisconsin Court Interpreter's Program for statewide training programs for current and potential court interpreters;
 - \$1,000,000 to Stop the Violence in South Carolina for programs to reduce crime and create sustainable neighborhood development through a successful model of community involvement;
 - \$180,000 for the Homeless Outreach Team [HOT] in San Diego, California which assists the homeless in San Diego in being placed in the appropriate social services programs;
 - \$1,500,000 for the National Judicial College in Reno, Nevada to provide education and training to judges, focusing particularly on judicial proficiency, competency, skills, and productivity;
 - \$2,500,000 for the Tools for Tolerance Program;
 - \$5,000,000 for grants to implement Sections 101, 102, and 103 of Title I of the Indian Tribal Justice Technical and Legal Assistance Act of 2000;
 - \$508,476 for the Shoshone-Bannock Tribe at the Fort Hall Reservation in Idaho. Funds will be used for the architectural and engineering fees associated with construction of a new Justice Center;
 - \$400,000 to the University of New Hampshire for the violent crime against women on campus reduction program;
 - \$3,000,000 for the development of a security system at the Emergency Operations Center located in Virginia;
 - \$1,000,000 for Washington County, Oregon for its County Alcohol and Drug Free Housing project;
 - \$250,000 to the University of Southern Colorado for the Western Forensic Science and Law Enforcement Training Center;

- \$200,000 to the Yell County, Arkansas Juvenile Detention Center for drug and alcohol detoxification, counseling, and rehabilitation program; and
- \$500,000 for Montana's Yellowstone County Family Drug Court which provides services to parents and guardians whose children have been removed from the home because of abuse or neglect due to substance abuse.

Drug courts.—The Committee recommends \$50,000,000 for drug courts. The Committee notes that localities can also access funding for drug courts from the Local Law Enforcement Block Grant and Juvenile Accountability Block Grant. In addition, the Committee directs OJP to provide a report to the Committee no later than December 31, 2003, on the long term sustainability of the drug courts being established under this program.

Juvenile accountability incentive block grant.—The Committee recommends \$249,450,000 for the Juvenile Accountability Incentive Block Grant Program to address the growing problem of juvenile crime by encouraging accountability-based reforms at the State and local level.

Violence Against Women Act programs.—The Committee recommends \$390,565,000 for grants to support the Violence Against Women Act. Grants provided under this recommendation are for the following programs:

Violence Against Women Act programs

[In thousands of dollars]

	Committee recommendation
General formula grants	184,765
National Institute of Justice	5,200
OJJDP-Safe Start Program	[10,000]
BJS Study of domestic violence case processing	1,000
Grants to encourage arrest policies	65,000
Rural domestic violence	40,000
Legal Assistance Program	40,000
Campus Violence Program	10,000
Elder Abuse, Neglect, and Exploitation	5,000
Safe Haven Program	15,000
Education and Training to Assist Disabled Female Victims	7,500
Stalker Database Expansion	3,000
Training programs	5,000
Victims of child abuse programs:	
Court appointed special advocates [CASA]	12,000
Training for judicial personnel	2,300
Grants for televised testimony	1,000
Total, VAWA programs	390,565,000

The fiscal year 2003 funding will be used to develop and implement effective arrest and prosecution policies to prevent, identify, and respond to violent crimes against women, strengthen programs addressing stalking, and provide much needed victims services. This includes specialized domestic violence court advocates who obtain protection orders. In addition, programs should be strengthened to encourage reporting of domestic violence by providing assurances that law enforcement and attorney support systems would be available. This funding is to be distributed to States to significantly enhance the availability of services, prosecutors, and law-enforcement officials to women and children who are subjected to domestic

violence. The fiscal year 2002 Senate Report required the Department to submit a report detailing a plan to address violence against women with particular emphasis on Alaska which ranks first in the Nation for domestic violence and child abuse. The report was to be completed by May 1, 2002, but has yet to be received by the Committee. The Department is directed to provide monthly updates on its progress until the report is completed as required.

Substance abuse treatment for State prisoners.—The Committee recommends \$70,000,000 for the Residential Substance Abuse Treatment Program for State Prisoners [RSAT]. The RSAT Program provides financial and technical assistance to assist State and local governments in developing and implementing residential treatment programs within State and local correctional and detention facilities in which inmates are incarcerated for a period of time sufficient to permit substance abuse treatment. Consistent with the authorizing statute, States must agree to require drug testing of individuals enrolled in the treatment program and give preference to projects that assist in the placement of program participants with community-based aftercare services, such as parole supervision, education and job training, and halfway houses. In addition, as in fiscal year 2002, up to 10 percent of the total program level maybe used for the treatment of parolees. These grants should only fund treatment for individuals up to 1 year after they are released from a State prison.

Safe Return Program.—The Committee recommends \$900,000 to continue and expand training of law enforcement and other emergency response personnel to locate missing Alzheimer patients.

Law enforcement family support programs.—The Committee recommendation provides \$1,500,000 for this program to assist Federal, State, and local law enforcement agencies in developing and implementing policies and programs to reduce stress and provide appropriate support services for law enforcement officers and their families.

Senior citizens against marketing scams.—The recommendation provides \$2,000,000 for this program to assist law enforcement in preventing and stopping marketing scams against the elderly. The Committee requests that some program sessions be held at the National Advocacy Center. Also, the Committee directs that this effort be coordinated with the Federal Trade Commission.

Motor Vehicle Theft Prevention.—The recommendation provides \$1,300,000 for grants to combat motor vehicle theft.

WEED AND SEED PROGRAM

Appropriations, 2002	\$58,925,000
Budget estimate, 2003	58,925,000
Committee recommendation	58,925,000

The Committee recommends an appropriation of \$58,925,000. The recommendation is identical to the budget request.

The Committee also recommends bill language, similar to that included in previous fiscal years, making funds available for grants or agreements with State agencies or to reimburse Federal agencies in order to execute the weed and seed strategy, and also allows for the use of other Department of Justice funds to support the Weed and Seed Program.

COMMUNITY ORIENTED POLICING SERVICES

VIOLENT CRIME REDUCTION PROGRAMS

Appropriations, 2002	\$1,050,440,000
Budget estimate, 2003	1,381,034,000
Committee recommendation	1,120,228,000

The Committee recommends \$1,120,228,000 for the Community Oriented Policing Serv-

ices [COPS]. The recommendation is \$310,406,000 below the budget request, which included \$800,000,000 for the proposed Justice Assistance Grant Program that was to be transferred to OJP and that the Committee does not fund. The Committee provides funding under this account as follows:

Public Safety and Community Policing Programs

COPS Hiring Program.—The Committee recommends \$330,000,000 for the COPS hiring program. Within the amounts available for officer hiring, up to \$180,000,000 is available for the hiring of school resource officers. To date, the COPS Office has made over 32,700 grants to more than 12,400 of the Nation's 18,000 law enforcement agencies. Through its hiring grant programs, COPS has funded over 114,000 officers, including 4,500 School Resource Officers. The Committee does not support the Administration's proposal of eliminating the COPS hiring programs. There continues to be a need at the State and local level for additional law enforcement officers, especially in light of the fact that the nation's first responders are now recognized as the front line of defense against future terrorist attacks.

The Committee also recognizes that State and law enforcement agencies depend on technology and communications equipment to perform their jobs safely and effectively. Therefore, the Committee includes language for a new communications technology grant program under the COPS Crime-Fighting Technologies section of this report.

Protecting our children.—Terrorists have the ability to confront the United States with contingencies we have never considered. One such contingency involves our children. Therefore, the Committee provides \$10,000,000 for training to assist school resource officers in preventing terrorist acts aimed at schools. The officers will be trained in non-intrusive defensive measures to reduce the vulnerability of schools to terrorist attacks and offensive measures to prevent, deter, and respond to terrorism. The Committee directs that a report be provided to the Committees on Appropriations no later than April 5, 2003, to include a spending plan for this effort.

Training and Technical Assistance.—The COPS Office has created a network of Regional Community Policing Institutes [RCPIs] that are strategically located throughout the country and make up a national network that disseminates training and technical assistance to officers and community members on a diverse array of issues, including community policing, the effective use of computers and communications technology, and police integrity. To date, more than 173,000 law enforcement personnel and community members have been trained through the RCPI network and the Community Policing Consortium. The Committee recommendation includes \$21,000,000 for COPS to continue providing training and technical assistance to the law enforcement community.

Indian Country.—The Committee recommendation includes \$40,000,000 to be used to improve law enforcement capabilities on Indian lands and native villages, both for hiring uniformed officers, including village public safety officers, and for the purchase of equipment and training for new and existing officers. The Committee recommends that 5 percent of the COPS funds be provided directly to tribal judicial systems to assist Tribal courts with the increased caseload associated with the increased arrests as a result of the additional funds for tribal law enforcement.

Police Corps.—The Committee recommends \$15,000,000 for the Police Corps Program. The Committee understands that the Police

Corps program has sufficient unobligated balances available to allow the program to maintain its activities in fiscal year 2003 at the prior year level.

Methamphetamine Enforcement and Clean-Up.—The Committee recommends \$45,000,000 for State and local law enforcement programs to combat methamphetamine production and distribution, to target drug "hot spots," and to remove and dispose of hazardous materials at clandestine methamphetamine labs. Since fiscal year 1998, COPS has provided \$141,900,000 in funding to more than 60 State and local law enforcement agencies to hire personnel, purchase equipment, and clean-up labs, as well as obtain training in methamphetamine related interdiction tactics, investigation, and prosecution.

Within the amounts provided, the Department is expected to review, in consultation with DEA, the following proposals, provide grants if warranted, and report to the Committees on its intentions:

- \$500,000 for personnel, training, and equipment under the Arizona Methamphetamine Initiative;
- \$2,000,000 to the Arkansas State Police for the Arkansas Methamphetamine Law Enforcement Initiative;
- \$414,977 for the Oklahoma Bureau of Narcotics and Dangerous Drug Control to properly train and equip officers for operations involving clandestine methamphetamine labs;
- \$150,000 for the Criminal Justice Institute at the University of Arkansas at Little Rock to train rural law enforcement officers in the issues of safety, investigation, and evidence collection related to methamphetamine production;
- \$1,000,000 for the Iowa Office of Drug Control Policy to combat the spread of methamphetamine in east central counties through intelligence gathering, enforcement, and lab clean up operations;
- \$5,000,000 for Hawaii County, Hawaii to carry out enforcement, prosecution, and cleanup activities associated with the manufacture, use, and distribution of methamphetamine;
- \$1,500,000 for the Indiana State Police to combat the production, distribution, and use of methamphetamine;
- \$500,000 to the Iowa Office of Drug Control Policy to create a secure intelligence system;
- \$400,000 for the Iowa Tanks-A-Lock project to equip anhydrous ammonia tanks with locking mechanisms that prevent theft by manufacturers of methamphetamine;
- \$250,000 for the Jackson County, Mississippi Sheriff's Department to combat methamphetamine;
- \$1,000,000 to the Nebraska State Patrol for a Methamphetamine Drug Use Enforcement and Research Program. Funding is provided for drug treatment, enforcement enhancements, and laboratory enhancements;
- \$200,000 to Marion County, Oregon for its Meth Lab Surveillance and Eradication project, which will provide law enforcement with training, equipment, and an improved communications system;
- \$5,000,000 for the continuation of the Washington State Methamphetamine Program;
- \$1,750,000 for the Mississippi Bureau of Narcotics to combat methamphetamine and to train officers on the proper recognition, collection, removal, and destruction of methamphetamine;
- \$3,500,000 for the Missouri Drug Eradication Initiative, to be divided among Missouri's 29 drug task forces. This

amount includes \$200,000 for the Jefferson County Sheriff's Office, and \$50,000 for the Phelps County Sheriff's Department I-44 Drug Interdiction Project;—\$1,500,000 for MoSmart. Funding is to assist sheriffs and rural drug task forces in combating methamphetamine production, use, and distribution by providing needed equipment, training, and lab clean up resources;—\$1,500,000 for the Sioux City, Iowa Regional Methamphetamine Training Center, to provide training to officers from eight States;—\$500,000 for the Minot State University, ND, rural methamphetamine project;—\$1,000,000 to the Central Utah Narcotics Task Force for the Sevier Region Methamphetamine Project;—\$500,000 for the Iowa Office of Drug Control Policy to combat the spread of methamphetamine in south central Iowa through intelligence gathering, enforcement, and lab clean-up operations;—\$1,000,000 to the Vermont Department of Public Safety to support the Vermont Drug Task Force;—\$1,400,000 for the Wisconsin Methamphetamine Law Enforcement Initiative; and—\$1,250,000 for Yellowstone County, Montana's Methamphetamine Initiative which will focus on increased drug enforcement and clean-up.

Bullet-proof Vests Grant Program.—The Committee recommendation includes \$26,000,000 to continue this program for formula grants to States, local governments, and Indian tribes to be used for the purchase of armored vests for law enforcement officers in the jurisdiction of the grantee.

Crime-Fighting Technologies Programs

Law Enforcement Technology Program.—The Committee recommends \$128,815,000 for continued development of technologies and automated systems to assist State and local law enforcement agencies in investigating, responding to and preventing crime.

Within the amount provided, the COPS office should examine each of the following proposals, provide grants if warranted, and submit a report to the Committees on its intentions for each proposal:

- \$650,000 to the City of El Centro, California for the purchase of 800 MHZ portable and mobile radios for emergency operations;
- \$3,000,000 to the City of Owensboro, Kentucky and Daviess County, Kentucky to implement an improved emergency responder and 911 operations system;
- \$250,000 to the City of Flint, Michigan for upgrades to its 911 emergency response system;
- \$750,000 for the Abilene, Texas Police Department to upgrade and expand the emergency response and communications network;
- \$2,000,000 to the State of Alaska to build statewide shared multi-agency communications network;
- \$1,500,000 for the Alaska Department of Public Safety to upgrade its communications systems;
- \$100,000 for the Brooklyn, Ohio Police Department to purchase a computer aided dispatch system and mobile data terminals;
- \$1,500,000 for Brown County, South Dakota to replace radio equipment, modernize the telephone infrastructure, and purchase computer-aided dispatch technology for the county's Regional Communications Center;
- \$3,500,000 to the City of Jackson, Mississippi for the public safety automated technologies system;
- \$375,000 for South Dakota's Cheyenne River Sioux Tribe to modernize its cur-

- rent court system by upgrading computer systems and acquiring court service processors;
- \$200,000 to the Choctaw County, Alabama Emergency Management Agency for a Emergency Warning Notification System;
- \$1,400,000 for the City of Cincinnati, Ohio to implement a record management system;
- \$2,000,000 to the City of Seattle, Washington for digital video surveillance cameras;
- \$2,000,000 to the City of Oceanside, California to upgrade the public safety radio system;
- \$30,000 to the Charter Township of Mt. Morris, Michigan for closed circuit video camera technology;
- \$8,000,000 for a grant to the Southeastern Law Enforcement Technology Center's Coastal Plain Police Communications initiative for regional law enforcement communications equipment. The State capitol of Columbia should be given due consideration in this year's implementation;
- \$1,250,000 to the Columbia, Mississippi Police Department for technology;
- \$8,000,000 for the Consolidated Advanced Technologies for Law Enforcement [CAT lab] Program;
- \$910,000 for the City and Borough of Juneau, Alaska for equipment and technology enhancements at the Juneau Dispatch and Evidence Center;
- \$300,000 for the City and Borough of Ketchikan, Alaska for an Emergency and 911 Dispatch system;
- \$3,400,000 to Montgomery County, Maryland to establish an integrated criminal justice information system;
- \$1,500,000 for the Rockville, Maryland Police Department to upgrade communications, records management, and emergency services systems;
- \$1,000,000 to the City of Wasilla, Alaska for a regional dispatch center;
- \$800,000 for the City of Jackson, Tennessee to install mobile data terminals in police vehicles;
- \$1,000,000 to the City of Memphis, Tennessee to install a regional law enforcement communications system;
- \$2,000,000 for Cowlitz County, Washington to replace its emergency response radio system;
- \$7,100,000 for the Southwest Border Anti-Drug Information System of which \$3,500,000 is to go to the State of Idaho;
- \$950,000 to equip the Critical Infrastructure Protection Project [CIPP] in Virginia;
- \$500,000 for Curry County, Oregon to fund upgrades and repairs needed to maintain the integrity of the communications system;
- Up to \$3,000,000 for the acquisition or lease and installation of dashboard mounted cameras for State and local law enforcement on patrol. One camera may be used in each vehicle, which is used primarily for patrols. These cameras are only to be used by State and local law enforcement on patrol;
- \$1,500,000 for the Delaware State Police to upgrade communications and video capabilities, purchase a real-time x-ray machine, and portable receivers;
- \$250,000 to the City and County of Denver, Colorado for an intelligent emergency service dispatch system;
- \$1,500,000 for the City of Des Moines, Iowa to develop a regional geographic information system that will enhance homeland defense and emergency response capabilities;
- \$500,000 for the Downriver Mutual Aid Data Network for an 800 mhz digital communications system;
- \$500,000 to Eau Claire County, Wisconsin's Police Communications Project for a computer aided dispatch and records management system;
- \$500,000 to the Sandy City, Utah Police Department for an automated records storage and communications system to operate in conjunction with the court system;
- \$4,250,000 for the Montana Public Safety Services Office to acquire enhanced 9-1-1 communications technology;
- \$1,000,000 for Hamilton County, Ohio to replace and upgrade the current dispatch system;
- \$2,500,000 to the Harrison County, Mississippi Sheriff's Department for the Public Safety Automated Systems project;
- \$400,000 to the Indianapolis, Indiana Police Department to upgrade the existing laptop computer system to a wireless land area network;
- \$850,000 to the National Center for Victims of Crime INFOLINK Program;
- \$1,500,000 for Jefferson County, Alabama to upgrade the public safety radio system and improve interoperability;
- \$1,000,000 to the Johnson County, Kansas Sheriff's Department for a computer-aided dispatch system;
- \$200,000 for the Town of Johnston, Rhode Island to acquire mobile data computers, a video surveillance system for police headquarters, and an automated telephone system;
- \$1,000,000 to the State of Kansas for the Public Safety Communications Network;
- \$25,000 to Bath and Menifee Counties in Kentucky for the purchase of law enforcement equipment;
- \$60,000 to the Rowan County, Kentucky Sheriff's Office and the Morehead Police Department for the purchase of radar units, mobile cameras, communications equipment, a records management system, and other investigative equipment;
- \$3,000,000 for Law Enforcement On-Line [LEO] information system which provides criminal justice information to law enforcement agencies throughout the country;
- \$1,000,000 to the University of Houston in Texas to acquire, test, evaluate, and expand upon existing police vehicle technology;
- \$95,000 for Leake County, Mississippi for police technology and equipment;
- \$3,000,000 for the Louisiana Commission on Law for a statewide Technology Coordination Project;
- \$1,500,000 to the City of Madison, Wisconsin Police Department's Consolidated Communications Project for new hardware, software, data conversion, training, and project administration;
- \$1,000,000 to the Maine State Police for a new voice and data communications system;
- \$1,500,000 to the Metropolitan Radio Board in Minnesota for a regional, digital public safety communications system;
- \$2,000,000 for the City of Milwaukee, Wisconsin's Police Department to purchase and install mobile digital radios in its squad cars, and to increase public access to data through GIS crime mapping and other technologies;
- \$5,000,000 for Minnehaha County, South Dakota to upgrade its existing communications system and to link with the new State of South Dakota Radio System;

- \$2,250,000 to the Missouri Police Chiefs Association for technology, equipment, and regional training;
- \$250,000 to the Madisonville, Kentucky Police Department for mobile data terminals;
- \$500,000 to the City of Montrose, Colorado for a records management system and related technology to interface with the public safety communications system;
- \$20,000 to Moody County, South Dakota for upgrades to the emergency response communications system;
- \$750,000 to the Town of Mountain Village, Colorado for a regional public safety communications system;
- \$2,500,000 for the County of Bergen, New Jersey to implement a multi-agency radio communications system that will provide interoperability capability across all agencies and integrate the operations of the Bergen County government;
- \$5,000,000 to the Pegasus Research Foundation, Inc., in coordination with the National Sheriff's Association, for a multi-state information system that will enable local law enforcement agencies to share important criminal justice information;
- \$2,500,000 for the New Castle County, Delaware Police Department for a new records management system, additional computers and software, and surveillance equipment;
- \$1,200,000 to the Kenton County, Kentucky Sheriff's Office for communications system improvements;
- \$400,000 to the New Hampshire Department of Public Safety to provide equipment and technology to ten small law enforcement agencies throughout New Hampshire;
- \$400,000 to the Newago County Office of Administration for the acquisition of an 800 mhz digital communications system;
- \$4,000,000 to the New Hampshire Police Standards and Training Facility to purchase technology and equipment for training recruits;
- \$350,000 for the City of Huntsville, Alabama to upgrade computer systems in police headquarters and district stations;
- \$575,000 for the Billings, Montana Police Department for vehicle enhancements, including automatic vehicle locators, in-car report writing modules, and mobile roaming technology;
- \$1,050,000 for the Towns of Barre, St. Albans, and Springfield, Vermont to be divided equally, providing \$350,000 for each. This funding will be used to upgrade communications capabilities and for the purchase of mobile data terminals;
- \$1,000,000 for the Lubbock, Texas Police Department to purchase mobile data terminals and related software;
- \$1,000,000 for Project Hoosier SAFE-T, a Statewide emergency response and telecommunications project;
- \$3,250,000 for the County of Passaic, New Jersey for the purchase of a trunked radio system;
- \$1,500,000 for the Oklahoma Department of Public Safety to provide comprehensive radio and data communications capabilities for all emergency response agencies units in Oklahoma;
- \$400,000 for the Louisville-Jefferson County, Kentucky Public Safety Communications System to study requirements and develop a plan to implement a common interoperable voice and data communications system for public safety organizations in the metropolitan area;
- \$500,000 to the City of Santa Rosa, California for radio communications and emergency response systems upgrades;

- \$1,500,000 for the Borough of Fort Lee, New Jersey to improve the emergency services radio system;
 - \$2,000,000 to the North Carolina State Highway Patrol for the development and implementation of an interoperable Voice Trunking Network [VTN] real-time voice communication system throughout the State;
 - \$300,000 to REJIS for the establishment of a computer information system to serve the St. Louis Region;
 - \$2,000,000 for the Montana Sheriff's & Peace Officers Association for a reverse 9-1-1 system which will allow State and local officials to distribute emergency information to citizens over their phone lines using auto-dialing technologies;
 - \$800,000 to the Rockdale County, Georgia Sheriff's Office to purchase mobile data computers and in-car video systems;
 - \$1,850,000 to San Miguel County, New Mexico Emergency Services for a county wide communications system;
 - \$1,850,000 to Simpson County, Mississippi for a public safety automated technologies system;
 - \$2,500,000 for South Dakota's Sheriffs and Police Chiefs Association to acquire communications equipment, computers, and other crime-fighting technologies;
 - \$4,000,000 for a grant for the Southeastern Law Enforcement Technology Center to partner with SPAWAR to advance research and development into software radio technology;
 - \$1,500,000 to the Oklahoma Department of Public Safety for a statewide public safety communications system;
 - \$1,500,000 to the Kansas City, Missouri Police Department for mobile data terminals;
 - \$2,500,000 to Wake County, North Carolina's Department of Public Safety and Emergency Management for technology infrastructure improvements for law enforcement vehicles;
 - \$300,000 for the Pike County, Illinois Sheriff's Department to upgrade law enforcement technologies and modernize equipment;
 - \$50,000 for the City of West Point, Kentucky for the purchase of law enforcement equipment;
 - \$2,000,000 for the training of village public safety officers and small village police offices and acquisition of emergency response and search and rescue equipment for rural communities;
 - \$8,000,000 for a grant to the Statewide Communications System initiative in Virginia for regional law enforcement interoperable communications equipment;
 - \$250,000 to the Warren County, Mississippi Sheriff's Department for technology enhancements;
 - \$125,000 for the Wilkinson County, Mississippi Sheriff's Department for police technology and equipment;
 - \$1,500,000 for the Wilmington, Delaware Police Department to purchase surveillance cameras, metal detectors, and protective suits for responding to hazardous materials incidents; and
 - \$300,000 to the Wyoming Law Enforcement Academy in Douglas, Wyoming for technology upgrades.
- The COPS Interoperable Communications Technology Program.*—The Committee recommends \$100,000,000 for the Office of Community Oriented Policing Services [COPS] Interoperable Communications Technology program, to be designed and implemented by the COPS Office, in consultation with the Office of Science and Technology [OS&T] within the National Institute of Justice, as well as the Bureau of Justice Assistance [BJA].

The Committee seeks to utilize the expertise of all three organizations so as to create a grant program that is highly responsive to the immediate needs of the State and local law enforcement community and that takes full advantages of the expertise and lessons learned from OS&T's and BJA's research and development in the field of interoperable law enforcement communications, particularly project AGILE. In addition, the Committee is aware that the Office of Domestic Preparedness and the National Institute of Standards and Technology [NIST] have significant experience in law enforcement communications, and therefore it is also recommended that COPS seek guidance from these agencies when designing and implementing this program.

This program should address the critical need of law enforcement to improve cross-jurisdictional communication and information sharing. The Committee directs the COPS Office to develop and submit to the Committee, no later than 45 days after the implementation of this Act, proposed guidelines for the program. Consistent with the COPS Office's existing grant programs, the COPS Interoperable Communications Technology program should include a 25 percent local match requirement. The Committee is aware that the Federal Emergency Management Administration [FEMA] has a similar program designed for Fire Departments and EMS, and therefore COPS should consult with FEMA to ensure that these programs are providing compatible communications equipment that will allow interoperability among all first responders in a given jurisdiction. The Committee urges that grants under these programs be used, when applicable, to purchase cost effective solutions, which allow agencies to make existing communications systems interoperable. Because of the complexities associated with these systems, the Committee provides \$3,000,000, within available amounts, to be transferred to the Bureau of Justice Assistance to provide technical assistance, utilizing OS&T's expertise, to grantees regarding the implementation of the equipment.

The Committee understands and supports the need for minimum standards for law enforcement communications technology. Therefore, OS&T should assist COPS in incorporating existing minimum standards into the formulation of this grant program. The Committee also provides, within available amounts, \$5,000,000 to be transferred to NIST to continue the efforts of the Office of Law Enforcement Standards [OLES] regarding the development of a comprehensive suite of minimum standards for law enforcement communications.

In addition, the Committee is aware that a number of cross band repeaters have been distributed by the Federal Government to local jurisdictions throughout the United States. The Committee directs that NIJ provide an inventory no later than March 1, 2003 regarding the locations of all of these systems.

Crime Identification Technology Act.—The Committee recommends \$45,000,000 to be used and distributed pursuant to the Crime Identification Technology Act of 1998, Public Law 105-251, of which \$11,000,000 is to be transferred to the NIJ to develop technologies to improve school safety. Under that Act, eligible uses of the funds are (1) upgrading criminal history and criminal justice record systems; (2) improvement of criminal justice identification, including fingerprint-based systems; (3) promoting compatibility and integration of national, State, and local systems for criminal justice purposes, firearms eligibility determinations, identification of sexual offenders, identification of domestic violence offenders, and

background checks for other authorized purposes; (4) capture of information for statistical and research purposes; (5) developing multi-jurisdictional, multi-agency communications systems; and (6) improvement of capabilities of forensic sciences, including DNA.

Within the overall amounts recommended, the OJP should examine each of the following proposals, provide grants if warranted, and submit a report to the Committees on its intentions for each proposal:

- \$500,000 to the Arkansas Crime Information Center and the Arkansas Sheriff's Association for Phase II of the JailNet project;
- \$2,000,000 to the Arkansas State Police for its Automated Fingerprint Identification System;
- \$1,500,000 to the Ogden City, Utah Police Department for an automatic finger print identification system [AFIS];
- \$800,000 for a Centralized Sex Offender Registry Program for the State of Colorado;
- \$2,000,000 for CJIS WareNET to connect all State law enforcement agencies into one information database;
- \$250,000 to the Ogden City, Utah Police Department for a consolidated records management system;
- \$2,500,000 for the Alaska Criminal Justice Information System to integrate Federal, State, and local criminal records along with social service and other records. It expects the system design to include the capability to provide background checks on potential child care workers for child care providers and families with the permission of the job applicant. The State should consult with the National Instant Check System for technical expertise;
- \$7,500,000 for the South Carolina Judicial Department to purchase equipment for the integration of the case docket system into a state-of-the-art comprehensive database to be shared between the court system and law enforcement;
- \$2,000,000 to the Vermont Department of Public Safety for the Criminal Justice Integration System Project;
- \$3,000,000 to the Minnesota Department of Public Safety for the integrated criminal justice information system titled CrIMNet;
- \$200,000 for Pennsylvania's Cross Current Corporation Criminal Justice County Integration Project;
- \$1,500,000 to the Sandy City, Utah Police Department for an automated records storage and communications system to operate in conjunction with the court system;
- \$100,000 to the Ogden City, Utah Police Department for a facial recognition system;
- \$2,000,000 to the Great Cities Universities Coalition in Georgia for criminal justice data gathering and analysis;
- \$1,250,000 to the City of Gulfport, Mississippi for the Gulfport Critical Incident Response Technologies;
- \$1,000,000 to the Missouri Office of the State Court Administrator for computer upgrades and modernizations of the juvenile court system;
- \$450,000 for implement a Louisiana State-wide Sex Offender Database;
- \$500,000 Whatcom County, Washington's Multi-Jurisdictional Criminal Justice Data Integration Project to develop and implement an integrated county-wide communications system;
- \$500,000 for the Offenders' Unified Tracking for Rehabilitation, Enforcement, Assistance, and Community Health [OUT-

REACH] program at the University of Pennsylvania Lee Center of Criminology;

- \$2,000,000 for the Ohio Bureau of Criminal Investigation to purchase Live-Scan machines for use by Ohio law enforcement agencies;
- \$4,000,000 for the South Carolina Law Enforcement Division to obtain equipment, convert existing databases and integrate systems for accurate and rapid processing of information to support identifications for criminal and civil purposes;
- \$250,000 to the South Bend, Indiana Police Department for the purchase of an automated fingerprint imaging system [AFIS];
- \$75,000 to the St. Louis, Missouri Police Department to enhance an existing web-based crime analysis and information sharing system;
- \$1,500,000 for the Syracuse University Cross-Information Language Retrieval system to assist law enforcement in the search and analysis of foreign Internet document databases;
- \$1,900,000 to upgrade automated finger-print identification systems [AFIS] in Hawaii; and
- \$1,850,000 for the University of Southern Mississippi for crime identification technology training.

Upgrade Criminal History Records (Brady Act).—Within the amounts available for crime identification technology, the Committee recommends \$35,000,000 for States to upgrade criminal history records so that these records can interface with other databases holding information on other categories of individuals who are prohibited from purchasing firearms under Federal or State statute. Additionally, the national sexual offender registry [NSOR] component of the Criminal History Records Upgrade Program has two principal objectives. The registry assists States in developing complete and accurate in-State registries. It will also assist States in sharing their registry information with the FBI system which identifies those offenders for whom special law enforcement interest has been noted.

Crime Laboratory Improvement Program.—The Committee recommends \$35,000,000 for the crime laboratory improvement program.

DNA Backlog Elimination.—The Committee recommends \$40,000,000 to reduce the DNA sample backlog. Within this amount, \$5,000,000 is available for Paul Coverdell Forensics Sciences Improvement grants.

Within the overall amounts recommended for the Crime Laboratory Improvement and DNA Backlog Elimination Programs, the OJP should examine each of the following proposals, provide grants if warranted, and submit a report to the Committees on its intentions for each proposal:

- \$500,000 to Allegheny County, Pennsylvania for the Allegheny County Forensics Laboratory for improvements;
- \$180,000 to the Arkansas State Crime Lab for the continuation of the Arkansas Crime Lab DNA Backlog Reduction program;
- \$142,900 to the Broome County, New York Government Security Division for a computer and video forensics laboratory;
- \$1,500,000 to establish the Metropolitan Forensic Science Center in Albuquerque, New Mexico which will serve law enforcement agencies involved in Indian Country;
- \$1,800,000 for the National Academy for Forensic Computing in Central Piedmont, North Carolina;
- \$2,000,000 for the DNA Testing Center at Florida Gulf Coast University;
- \$750,000 for the Commonwealth of Virginia to enhance existing State forensic laboratory capabilities for analysis and training;

—\$400,000 for the Birmingham Police Department to improve and update their forensic laboratory;

- \$500,000 for the Forensics Laboratory at East Stroudsburg University, Pennsylvania to assist Pennsylvania's law enforcement community by expediting the processing of the State's DNA backlog;
- \$500,000 to the Indiana State Police, Laboratory Division for personnel, equipment, supplies, and contractual needs in order to meet the increased demands on the DNA Analysis Unit;

—\$500,000 to the Kansas Bureau of Investigation for lab equipment and an information management system to track evidence;

—\$3,000,000 for the Marshall University [MU] Forensic Science Program in West Virginia;

—\$1,750,000 for the Mississippi Crime Lab;

—\$750,000 for the University of Tennessee to continue the development of technology, forensic training, and research;

—\$2,500,000 for the State University of New York at Albany to establish the North East Regional Forensic Institute;

—\$500,000 for upgrades at the Northern Illinois Police Crime Laboratory;

—\$800,000 to the Ohio Bureau of Criminal Investigation for improvements to its Forensic Science Lab;

—\$900,000 to the Pikes Peak Metro Crime Lab in Colorado for renovations necessary to meet the demand for DNA analysis services;

—\$2,000,000 to the South Carolina Law Enforcement Division for equipment to support a Federal and State collaboration of investigators and forensics experts to solve high technology crimes through one center;

—\$3,000,000 to the South Carolina Law Enforcement Division for continued funding to support the growing State and local law enforcement needs in the only full service forensic laboratory in South Carolina;

—\$970,000 to the Southeast Missouri Crime Lab for modernizations and equipment;

—\$500,000 to Texas Tech University for the Southwest Institute for Forensic Sciences;

—\$2,250,000 for the State of Maryland and the City of Baltimore DNA Labs to be evenly divided among each; and

—\$4,000,000 for the West Virginia University [WVU] Forensic Identification Program.

Prosecution Assistance Programs

Southwest Border Prosecutions.—The Committee recommends \$50,000,000 to provide assistance to State and local prosecutors located along the Southwest border, including the integration and automation of court management systems. This program will provide financial assistance to Texas, New Mexico, Arizona, and California for the State and local costs associated with the handling and processing of drug and alien cases referred from Federal arrests.

Gun Violence Reduction Program.—The Committee recommends \$50,000,000 for a new program that will encourage States to increase the prosecution of gun criminals. This program encompasses a broad range of gun violence strategies, including hiring and training of local prosecutors and implementing public awareness campaigns to advertise tough sentences for gun crimes and foster community support.

Community Crime Prevention

Police Integrity Program.—The Committee recommends \$17,000,000 for the Police Integrity Program. This program promotes police integrity, the appropriate use of police authority, and community policing through delivering training and technical assistance to

local communities, as well as by providing grants that will help agencies create or strengthen local programs that help build trust between police and their communities.

The Offender Re-entry Program.—The Committee recommends \$15,000,000 for the Offender Re-entry Program. The Department of Justice, in collaboration with the Departments of Labor, Health and Human Services, Housing and Urban Development, and Education, OJP will provide grants to communities to design, implement, enhance, and evaluate reentry programs for serious, violent offenders.

Project Sentry.—The Committee recommends \$15,000,000 for Project Sentry. This program will create a new Federal and State partnership establishing safe schools task forces across the country that will prosecute and supervise juveniles who violate Federal and State firearms laws and adults who illegally furnish firearms to them. An additional \$5,000,000 is provided for this initiative through the Juvenile Justice programs, for a total funding level of \$20,000,000.

Safe Schools Initiative.—The Committee recommends \$20,013,000 for programs aimed at preventing violence in public schools, and to support the assignment of officers to work in collaboration with schools and community-based organizations to address the threat of terrorism, crime, disorder, gangs, and drug activities.

Within the amount provided, the COPS office should examine each of the following proposals, provide grants if warranted, and submit a report to the Committees on its intentions for each proposal:

- \$500,000 for the Alaska Community in Schools Mentoring Program;
- \$1,000,000 for the Police Athletic League of New Jersey to implement a short term residential summer camp program for youth;
- \$1,500,000 for the East Orange Police Athletics League to provide services and programs, including parenting classes, computer training, GED preparation, mentoring and recreational programs;
- \$1,000,000 for Wisconsin's Families & Schools Together [FAST] Prevention Program to provide services to at-risk youth;
- \$60,000 for Washington County, Oregon's Hillsboro Boys and Girls Club Gang Prevention Program which is a targeted outreach program to deter young people from gang involvement;
- \$1,000,000 for the Safe Schools Initiative in the City of Macon, Georgia to allow public schools to expand programs that are dedicated to addressing gangs, drugs, and violence;
- \$500,000 for the Juvenile Justice and Delinquency Program in Macon, Georgia. This funding will be used to improve mentoring programs that are dedicated to reducing incidences of juvenile crime, violence, and substance abuse;
- \$1,500,000 to the National "I Have A Dream" Foundation for at-risk youth;
- \$400,000 for the New Mexico Police Athletic League to continue the statewide Law enforcement and Professional Business Volunteer Technology and Mentoring program and to expand its program to assist at-risk youth to 14 additional sites;
- \$3,300,000 for the University of Montana to facilitate a statewide community based curriculum development initiative that promotes responsible behavior and reduces youth violence in schools and communities;
- \$100,000 for the Jefferson County, Illinois Sheriff's Office and Hamilton-Jefferson County Regional Office of Education to implement a safe schools program;

- \$500,000 for New Mexico's School Security Technology and Resource Center [SSTAR] to provide public schools with physical security assessments, to test existing school security systems, and to implement tailored security plans;
- \$2,295,000 for the Watch D.O.G.S. Across America in Springdale, Arkansas to enhance school safety; and
- \$1,500,000 to provide community-based, cost-effective alternative programs for juveniles who are, have been or maybe subject to compulsory care, supervision or incarceration in public or private institutions in several States including South Carolina.

Management and Administration.—The Committee recommends \$35,000,000 for the management and administration of the COPS Office. Within the funds provided, the Committee directs the COPS office to maintain a staffing level of no less than 215 full-time positions. The Committee shall be provided a report no later than December 31, 2002 on the efforts being made by COPS to achieve this staffing goal.

JUVENILE JUSTICE PROGRAMS

Appropriations, 2002	\$305,860,000
Budget estimate, 2003	257,801,000
Committee recommendation	315,425,000

The Committee recommends an appropriation of \$315,425,000. The recommendation is \$57,624,000 above the budget request.

Juvenile justice and delinquency prevention.—The Committee recommendation includes a total of \$298,425,000 for administrative expenses and grants to States and localities for projects in the areas of education, research, prevention, and rehabilitation including:

1. \$7,112,000 for the Office of Juvenile Justice and Delinquency Prevention [OJJDP] (Part A).
2. \$88,800,000 for formula grants for assistance to State and local programs (Part B).
3. \$60,415,000 for discretionary grants for national programs and special emphasis programs (Part C).

Within the amounts provided for Part C discretionary grants and all of the other funds provided under Juvenile Justice programs, the Committee directs OJJDP to provide the following grants:

- \$500,000 to the Saginaw Chippewa Indian Tribe of Michigan for a victims of crime program;
- \$550,000 to the After School and Counseling Programs for At-Risk Native American Youth in South Dakota;
- \$600,000 to Task Inc. for a demonstration project with the Circuit Court of Cook County, Illinois to serve non-violent offenders who demonstrate mental illness and/or substance abuse;
- \$35,000 for the City of Fort Thomas, Kentucky to develop and implement a drug education and prevention program in the school system;
- \$90,000 to Lewis County, Kentucky and the City of Vanceburg, Kentucky to develop and implement a drug education and prevention program in the school system and provide additional resources to address law enforcement problems associated with drug use;
- \$500,000 to the Patriot Center in Rockford, Illinois for programs for at-risk youth;
- \$750,000 to the Bethesda Home for Boys in Savannah, Georgia to assist in providing delinquency intervention counseling;
- \$500,000 to the Birmingham, Alabama Education Technology [BET] Center for at-risk-youth programs;
- \$3,000,000 for the Cal Ripken, Sr. Foundation for youth prevention programs aimed at leadership, teamwork, and drug prevention;

- \$500,000 for the Camden City, New Jersey Housing Authority to establish a drug prevention program for children in low income housing developments;

—\$840,000 for Oregon Partnership's Champions for Healthy Kids and Communities program to provide local youth and adult leadership development education and training on underage drinking and drug use;

—\$60,000 to the South Coast Inter-Agency Narcotics Team, Coquille, Oregon for drug prevention;

—\$600,000 to the United Way of Chittenden County, Vermont to continue the Champlain Mentoring Initiative Project;

—\$700,000 to Charles Mix County, South Dakota for a full-time substance abuse counselor for local youth, and for the expansion of youth programs in Lake Andes and Wagner, South Dakota;

—\$5,000,000 to I-Safe America for internet safety education for grades K-12 to prevent child predation on the internet;

—\$75,000 to the Nez Perce Tribe in Lapwai, Idaho for the Child Protection Program to coordinate the services of human resource programs;

—\$4,000,000 to the National Center for Missing and Exploited Children for the Child Sexual Exploitation Campaign to expand services to law enforcement in cases of child pornography, child molestation, and sexual exploitation;

—\$400,000 to Ohio's Children Who Witness Violence Program for crisis intervention, assessment and treatment services to children and families impacted by violence;

—\$400,000 for Parents and Children Together (PACT) to provide gang prevention services, counseling and outreach, and supervised, alternative activities to youth in the Kuhio Park Terrace and Kuhio Homes housing units in Honolulu, Hawaii;

—\$5,000,000 to the University of New Hampshire's Crimes Against Children Research Center;

—\$400,000 for the Elizabeth Buffum Chace Family Resource Center in Warwick, Rhode Island to provide services for members of the community affected by domestic violence;

—\$100,000 for the Family Ties Supervised Visitation Services in Wakefield, Rhode Island to provide domestic violence prevention and services;

—\$4,500,000 to Fox Valley Technical College of Appleton, Wisconsin to increase and expand services offered to local law enforcement involved in the investigation of child abuse and neglect;

—\$200,000 to From Darkness to Light in Charleston, South Carolina which seeks to prevent child abuse and obtain services for victims of child abuse by providing information about the prevalence and consequences of child sexual abuse;

—\$2,500,000 to expand and replicate the Beyond Bars program;

—\$1,500,000 for Girls and Boys Town, USA;

—\$2,500,000 for the National Council of Juvenile and Family Court Judges to improve the juvenile and family court judicial system, specifically in handling child abuse and neglect cases;

—\$900,000 for the Iowa Big Brothers Big Sisters Rural Youth Mentoring Initiative;

—\$300,000 to the City of Jackson, Mississippi for a juvenile justice program;

—\$2,000,000 to Western Kentucky University for the Juvenile Delinquency Project;

—\$1,890,000 for the Juvenile Fire Setters program;

—\$2,000,000 to the State of Alaska for a Child Abuse Investigation Program;

—\$750,000 to Alaska's LOVE Social Services to establish and enhance after school programs in Fairbanks, AK for at risk youth;

—\$400,000 to the Second Judicial District Juvenile Justice Center in Albuquerque, New Mexico, for a truancy prevention program to help reduce juvenile delinquency and juvenile crime;

—\$600,000 for the Boys and Girls Home of Nebraska to expand programs geared towards youth who have committed minor offenses and/or have unique mental, psychological and behavioral problems;

—\$500,000 for a statewide at-risk youth mentoring program in Alaska involving community based organization, schools, and non-profit entities including Boys and Girls Clubs and Big Brother-Big Sisters.

—\$500,000 for Juvenile Offender Treatment and Prevention Project to provide mental health treatment and prevention services to youth and families involved with or at high risk of involvement with the Tulsa County juvenile justice system;

—\$500,000 for the Kansas Big Brothers Big Sisters to expand services to all 105 counties in the State;

—\$1,000,000 to the City of Los Angeles, California for the Family Violence Program;

—\$100,000 for Marion County, Oregon's Life Directions Peer Mentoring Partnership which seeks to break the cycle of drug addiction, violent crime, and teenage pregnancy;

—\$1,000,000 to Montana's Yellowstone Boys and Girls Ranch for the Living Independently and Fostering Empowerment (LIFE) program, which prepares emotionally troubled youth between ages 18 and 22 for independent living;

—\$125,000 to Virginia's Lonesome Pine Office on Youth for the continuation of delinquency prevention and youth development programs;

—\$1,000,000 to the Low County Children's Center in South Carolina for continued support for a collaborative effort among local organizations in Charleston that provide full services to children who have been abused;

—\$400,000 for Pennsylvania's Martin Luther King, Jr. Center for Non-Violence to continue its Life Skills program which enables students to work alongside business and industry mentors;

—\$1,500,000 to Mission St. Joseph's child protection program in North Carolina, which addresses the abuse and neglect of children in the Southern Appalachians who suffer from developmental disabilities;

—\$1,400,000 for the National Child Protection Development and Training Center in Minnesota;

—\$3,000,000 for the National Council of Juvenile and Family Court Judges to provide special training and education for judges assigned to juvenile and family courts nationwide;

—\$600,000 to Prevent Child Abuse America for the National Family Support Roundtable;

—\$2,000,000 to the National Center for Missing and Exploited Children for the NETSMARTZ Initiative to expand the program into schools, homes, and youth organization nationwide;

—\$250,000 for Nevada Child Seekers to assist in locating missing children and providing resources for the families of missing children;

—\$750,000 for the Afterschool Services Pilot program operated by the New Mexico

State University Cooperative Extension Service to serve youth who are at home alone or are unsupervised between 2 and 6 in the afternoon;

—\$60,000 for the North Shore Youth Council in Long Island, New York to provide family counseling and youth development services to underserved children in the Miller Place and Rocky Point school districts;

—\$3,000,000 for Parents Anonymous, Inc., to develop partnerships with local communities to build and support strong, safe families and to help break the cycle of abuse and delinquency;

—\$3,000,000 for the 'Innovative Partnerships for High Risk Youth' demonstration;

—\$1,250,000 for Prairie View Prevention Services in Sioux Falls, South Dakota to establish a pilot project for the long-term treatment of juvenile methamphetamine abuse and dependence;

—\$150,000 to the Crow Creek Sioux Tribe in South Dakota for Project Safe;

—\$400,000 for the Rapid Response Program in Washington and Hancock Counties in the State of Maine;

—\$500,000 for the Safer Learning Center in Chicago, Illinois for expansion of mentoring and peer-learning programs;

—\$500,000 to Boysville of Michigan and SER Metro Detroit for the Samaritan Center;

—\$4,800,000 for the South Carolina Truancy and Dropout Prevention Initiative;

—\$580,000 for St. Joseph's Indian School in South Dakota for juvenile delinquency prevention programs;

—\$100,000 for the St. Louis for Kids program to provide afterschool programs for at-risk elementary school students in inner city St. Louis, Missouri;

—\$450,000 for the State of Pennsylvania Witness Protection Program;

—\$1,000,000 for the Arkansas Boys and Girls Clubs to expand after-school programs, drug and violence prevention activities, and mentoring of at-risk children;

—\$400,000 for a grant for the Milwaukee Summer Stars Program;

—\$2,250,000 for the Teens, Crime and Community program;

—\$60,000 to the Child Advocacy Center in Springfield, Missouri for support services;

—\$2,500,000 to The Family Development Foundation in Las Vegas, Nevada for domestic violence prevention and intervention;

—\$1,900,000 for law related education for continued support;

—\$300,000 for the University of Southern Mississippi Juvenile Justice Prevention Partnership program;

—\$300,000 to the Vermont Children's Forum to expand the teen leadership training program as well as develop strategies to combat teen delinquency and promote teen leadership development;

—\$300,000 for a grant to the Vermont Coalition of Teen Centers;

—\$1,000,000 for the Wisconsin Safe & Sound Program which combines aggressive enforcement, community organizing, and the establishment of "safe places" for children to go during non-school hours in Milwaukee's highest crime areas;

—\$600,000 to Utah State University for the Youth and Families with Promise Program;

—\$300,000 for the Youth Center of Wyoming Valley, Pennsylvania to provide preventative substance abuse education programs;

—\$500,000 for the Vermont Department of Employment and Training to establish a

statewide young offender reentry system targeted at young men aged 18-21;

—\$250,000 to Jefferson County, Colorado for the Youth System Improvement Project;

—\$500,000 for the Youth Violence Prevention Research Project at the University of South Alabama;

—\$200,000 for the City of Aberdeen, South Dakota to establish a Youth-Adult Partnership of Aberdeen [YAPA] community youth center, which will provide structured out-of-school activities for teens; and

—\$1,000,000 for Kansas YouthFriends to expand the school mentorship program.

4. \$12,000,000 for the Youth Gangs (Part D) Program which provides grants to public and private nonprofit organizations to prevent and reduce the participation of at-risk youth in the activities of gangs that commit crimes.

5. \$10,000,000 for discretionary grants for State challenge activities (Part E). This program authorizes the OJJDP Administrator to award grants which could increase the amount of a State's formula grant by up to 10 percent, if that State agrees to undertake all of the 10 challenge activities included in this program. These challenge activities are designed to improve various aspects of a State's juvenile justice and delinquency prevention program.

6. \$16,000,000 for the Juvenile Mentoring Program [JUMP] (Part G). This program seeks to reduce juvenile delinquency, improve academic performance, and reduce the dropout rate among at-risk youth through the use of mentors. This program has proven successful in reaching at-risk youth and has significant support at the local level. The program brings together young people in high crime areas with law enforcement officers and other responsible adults who are willing to serve as long-term mentors. The Committee encourages OJP to focus on applications submitted by community based organizations with a proven history of providing effective and efficient one-on-one services. Within the amounts provided, the Committee provides \$5,000,000 for the Big Brothers/Big Sisters program to expand its capacity to serve more at-risk youth.

7. \$95,000,000 for the At Risk Children's Program (Title V). Under Title V of juvenile justice programs, the At Risk Children's Program provides funding to support comprehensive delinquency prevention plans formulated at the community level. The program targets truancy and school violence; gangs, guns, and drugs; and other influences that lead juveniles to delinquency and criminality. Within the amounts provided, up to \$5,000,000 may be used for the Project Sentry program.

Safe Schools Initiative (SSI).—The Committee includes \$15,000,000 within the Title V grants for the Safe Schools Initiative. This effort may include training and services such as: training for teachers to recognize terrorist activities, accountability and responsibility training; violence reduction training, including dispute resolution; juvenile mentoring; training for teachers and families to recognize troubled children; and parent accountability and family strengthening education. Of the amounts provided for the School Safety Initiative, the Committee directs that \$10,000,000 be transferred to the Part C discretionary grant program to fund juvenile justice prevention programs that seek to improve the lives of the nation's youth, and thereby improve children's educational environments.

Tribal Youth Program.—The Committee includes \$12,500,000 within Title V grants for programs to reduce, control, and prevent crime both by and against tribal and Native youth; for interventions for court-involved

tribal youth; for improvement to tribal and Native juvenile justice systems; and for prevention programs focusing on alcohol and drugs, including the Alaska Federation of Natives to develop an underage drinking prevention program in rural Alaska that includes assessment and education and focuses on the children of alcoholics. Within this amount, the Committee directs that \$2,000,000 be provided for a grant to fund the Alaska Illegal Drug and Alcohol Use Initiative.

Enforcing the Underage Drinking Laws Program.—The Committee recommends \$25,000,000 within Title V grants to assist States in enforcing underage drinking laws. Each State shall receive \$360,000 and \$6,640,000 shall be available for discretionary grants to States. The Office of Justice Programs is directed to provide a report to the Committee no later than March 1, 2003 on the accomplishments of the program to date. Within the amounts provided for underage drinking, OJP shall make an award to the Alaska Federation of Natives to develop an underage drinking prevention program in rural Alaska including assessment and education, focusing on the children of alcoholics.

Juvenile justice research, evaluation, training, and technical assistance.—The Committee recognizes that high quality research, evaluation, and statistical analysis are critical to understanding and addressing the causes of youth crime, understanding the scope of delinquency and its impact on the juvenile justice system, and identifying effective approaches to delinquency control that can be replicated at the State and local levels. The Committee recommendation allows the Office of Juvenile Justice and Delinquency Prevention Programs [OJJDP] to set aside 2 percent for training and technical assistance and 10 percent for research, evaluation, and statistics activities.

Report card.—Over many years the Committee has provided hundreds of millions of dollars for juvenile justice programs. The Committee directs the Office of Juvenile Justice and Delinquency Prevention to provide \$250,000 to the American Prosecutors Research Institute to create and report on benchmarks to measure the use of individual programs and juvenile justice system performance in up to four pilot States. This funding shall be provided from the 2 percent set-aside under the Juvenile Accountability Block Grant program for technical assistance.

8. Victims of Child Abuse Act.—The Committee recommends \$11,000,000 for the various programs authorized under the Victims of Child Abuse Act [VOCA]. Funds, provided to establish regional and local children's advocacy centers, may not be used to provide legal aid. The recommendation includes \$11,000,000 to improve investigations and prosecutions (subtitle A) as follows:

- \$2,500,000 to establish regional children's advocacy centers, as authorized by section 213 of VOCA;
- \$5,500,000 to establish local children's advocacy centers, as authorized by section 214 of VOCA;
- \$1,000,000 for the National Children's Advocacy Center in Huntsville, Alabama to develop and implement a training program; and
- \$850,000 for a continuation grant to the National Network of Child Advocacy Centers for technical assistance and training, as authorized by section 214a of VOCA.

ELECTION REFORM GRANT PROGRAM

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$50,000,000

The Committee recommends \$50,000,000 for the Office of Justice Programs to establish an election reform grant program as authorized by The Help America Vote Act of 2002 (Public Law 107-252). In the awarding of grants under this heading, priority shall be given to districts where greater than 50 percent of registered voters are Federally-recognized racial or ethnic minorities and disabled persons.

PUBLIC SAFETY OFFICERS BENEFITS

Appropriations, 2002	\$37,724,000
Budget estimate, 2003	53,054,000
Committee recommendation	53,054,000

The Committee recommends an appropriation of \$53,054,000. The recommendation is equal to the budget request and provides all mandatory funding for death benefits under the Public Safety Officers Benefits Program. This program provides a lump-sum death benefit payment to eligible survivors of Federal, State, and local public safety officers whose death was the direct and proximate result of a traumatic injury sustained in the line of duty. In addition, \$4,000,000 is provided to pay for disability benefits to public safety officers who are permanently disabled in the line of duty. Within the available carryover balances, sufficient funding is available for the program which provides payments for education purposes to the dependents of Federal, State, and local public safety officers who are killed or permanently disabled in the line of duty. No additional funding is provided to expand the education benefits program in fiscal year 2003.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

The Committee recommends the following general provisions:

Section 101 makes up to \$60,000 of the funds appropriated to the Department of Justice available for reception and representation expenses.

Section 102 allows the Department of Justice to spend up to \$10,000,000 for rewards for information regarding acts of terrorism against U.S. citizens or property at levels not to exceed \$2,000,000 per reward and makes payments available for a judgment against the United States.

Section 103 allows the Department of Justice, subject to the Committee's reprogramming procedures, to transfer up to 5 percent between appropriations, but limits to 10 percent the amount that can be transferred into any one appropriation.

Section 104 provides technical assistance funds to improve oversight of certain grant programs.

Section 105 transfers certain collections from one fee account to another under the Immigration and Naturalization Services.

Section 106 allows Justice to collect reimbursements from manufacturers for warranty work done in-house.

Section 107 delays implementation dates for Juvenile Justice reauthorization changes.

Section 108 establishes a baseline for Justice Department capital planning and investment for education and training facilities.

Section 109 begins to dismantle modular cost budgeting.

TITLE II—DEPARTMENT OF COMMERCE AND RELATED AGENCIES

The Committee recommends a total of \$6,068,173,000 for the U.S. Trade Representative, the International Trade Commission, and the Department of Commerce for fiscal year 2003. This amount is \$429,673 above the total request.

TRADE AND INFRASTRUCTURE DEVELOPMENT

The Committee has included under this section of title II, the U.S. Office of the

Trade Representative, the International Trade Commission, and the Department of Commerce agencies responsible for trade promotion and enforcement and economic infrastructure development.

RELATED AGENCIES

OFFICE OF THE U.S. TRADE REPRESENTATIVE

SALARIES AND EXPENSES

Appropriations, 2002	\$30,097,000
Budget estimate, 2003	32,299,000
Committee recommendation	33,000,000

The Committee recommends an appropriation of \$33,000,000 for the U.S. Trade Representative. The recommendation is \$701,000 above the budget request. The recommendation includes a 4.1 percent pay adjustment for Federal employees. The budget request recommended shifting jurisdiction over the U.S. Trade Representative to the Executive Office of the President. The Committee does not concur with this recommendation.

The Office of the U.S. Trade Representative is responsible for developing and coordinating U.S. international trade, commodity, and direct investment policy, and leading negotiations with other countries on such matters. The U.S. Trade Representative's areas of responsibility include all matters within the World Trade Organization, including implementation of the Uruguay Round of multilateral trade agreements; trade, commodity, and direct investment matters dealt with by international institutions such as the Organization for Economic Cooperation and Development and the United Nations Conference on Trade Development; industrial, agricultural and services trade policy, and trade-related intellectual property protection and environmental issues.

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$51,440,000
Budget estimate, 2003	54,000,000
Committee recommendation	54,600,000

The Committee recommends an appropriation of \$54,600,000. The recommendation is \$600,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The International Trade Commission [ITC] is an independent, quasi-judicial agency responsible for conducting trade-related investigations, providing Congress and the President with independent technical advice relating to U.S. international trade policy, and performing other statutory responsibilities such as quasi-judicial determinations on trade matters filed with the Commission.

DEPARTMENT OF COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

Appropriations, 2002	\$345,547,000
Budget estimate, 2003	363,678,000
Committee recommendation	350,242,000

The Committee recommends an appropriation of \$350,242,000. In addition, the Committee anticipates \$3,000,000 in fees. The recommendation is \$13,436,000 below the budget request and includes a 4.1 pay adjustment for Federal employees. The recommendation includes a \$13,100,000 increase to hire 82 full-time equivalents within Market Access and Compliance, Import Administration, and the U.S. Foreign and Commercial Service for continuation of the trade compliance and monitoring initiatives.

The Committee does not recommend the Administration's estimate of \$13,000,000 in fees during fiscal year 2003. Rather, as in past years, the Committee recommends

\$3,000,000 in fees. The Administration proposed a \$10,000,000 fee increase as part of its fiscal year 2003 budget request. The ITA's plan was to commission a study during fiscal year 2002 to identify areas of cost recovery on fee collections. The Administration has not provided the Committee with findings from such a study or an explanation of the fees' source. Until such an explanation is available, the Committee will not recommend that there be an increase in fee collections.

The Committee recommendation includes \$13,325,000 for Administration and Executive Direction. The Administration's proposal included a \$10,375,000 increase over the fiscal year 2002 level for this line office. Under the Administration's proposal, to fund this increase, \$8,700,000 would be removed from the U.S. Foreign and Commercial Service budget; \$775,000 would be removed from the Import Administration budget; \$350,000 would be removed from the Market Access and Compliance budget; and \$550,000 would be removed from the Trade Development budget. This increase would reflect ITA's consolidation of Chief Information Officer [CIO] activities to ensure that all systems within the bureau communicate and compliment each other. The Administration maintains that this transfer would assure centralized leadership and management of ITA information technology decisions, planning, management and updating. The Committee finds the goal of streamlining CIO functions laudable and recommends that in the future, the Department of Commerce work with the Committee to promote such an effort throughout the Department. To date, however, the Department has not submitted a plan as to exactly how such a consolidation would move forward. The Committee therefore does not recommend this effort and rather recommends restoration of funds to the ITA line offices. These funds may be transferred to the Administration and Executive Director account upon approval of a section 605 reprogramming by the Committee on Appropriations.

The recommended funding levels are reflected in the following table:

<i>ITA Funding</i>	
Trade development	\$68,083,000
Market access and compliance	28,197,000
Import Administration	44,006,000
U.S. and Foreign Commercial Service	199,631,000
Administration/executive direction	13,325,000
Offsetting Fee Collections	(3,000)
ITA total appropriation	350,242,000

Trade Development.—The Committee recommends an appropriation of \$68,083,000. The recommendation is \$10,687,000 above the budget request. The Committee recommends continued funding for the enhancement of the agency's export data base, funding for the National Textile Center at a level of \$10,000,000 and the Textile/Clothing Technology Center at a level of \$3,000,000.

Market Access and Compliance.—The Committee recommends an appropriation of \$28,197,000. The recommendation is \$7,619,000 below the budget request. Assuring that U.S. companies receive the full benefit of our trade agreements is critically important. In fiscal year 2002, the Committee approved a large increase for compliance and enforcement. The Committee directs the Office of Market Access and Compliance [MAC] to continue with their compliance effort and recommends \$23,525,000 within available funds for this purpose.

The Committee recommends \$1,500,000 within available funds for ITA to continue to

place and maintain support for compliance officers in China, Japan, and the European Union, and other key markets so that they can detect and swiftly address compliance problems U.S. companies face in these markets.

Import Administration.—The Committee recommends an appropriation of \$44,006,000. The recommendation is \$7,741,000 below the budget request. The Committee recommendation includes \$1,500,000 for the Import Administration to continue to place and maintain enforcement officers, including monitoring compliance with the World Trade Organization and other international commitments on antidumping and subsidies.

The Committee recommendation provides \$3,500,000 for the Import Administration to monitor import data and customs flows for surges in key markets and sectors, such as steel and lumber, and take immediate action when such surges are detected. Such action should include using resources to expedite unfair trade cases so U.S. companies can receive relief at the earliest possible date. In addition, Import Administration must vigorously monitor foreign subsidies so that action can be taken if the subsidies violate trade agreements.

The Committee recommends \$2,500,000 to review and evaluate in-depth China and Japanese compliance with antidumping and countervailing duty commitments. China and Japan represent the majority of unfair trade actions, and the Committee believes there is an urgent need for greater attention to both Japanese and Chinese trade practices.

U.S. and Foreign Commercial Service [US&FCSS].—The Committee recommends an appropriation of \$199,631,000. The recommendation is \$5,713,000 below the request.

The Committee supports the Commercial Service's work on the Appalachian-Turkish Trade Project, a project to promote opportunities to expand trade, encourage business interests, stimulate foreign studies, and to build a lasting and mutually meaningful relationship between the Appalachian States and the Republic of Turkey, as well as the neighboring regions, such as Greece. The Committee expects the agency to support the project.

Administration and Executive Direction.—The Committee recommends an appropriation of \$13,325,000. The recommendation is \$1,540,000 below the budget request. Bill language is included which prohibits certain offices from taking funds from other accounts. If additional funds are needed, a reprogramming request should be submitted to the Committee for approval.

BUREAU OF INDUSTRY AND SECURITY
Appropriations, 2002 \$70,649,000
Budget estimate, 2003 100,198,000
Committee recommendation 100,198,000

The Committee recommends an appropriation of \$100,198,000. The recommendation is identical to the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Bureau of Industry and Security [BIS] is the principal agency involved in the development, implementation, and enforcement of export controls for dual-use technologies and weapons of mass destruction. The Export Enforcement Division detects, prevents, investigates, and assists in the sanctioning of illegal dual-use exports. Within available funds, the Committee recommends \$33,441,000 for Export Administration; \$33,122,000 for Export Enforcement; and \$6,879,000 for Management and Policy Coordination. Also within available funds, \$26,756,000 is for Critical Infrastructure and Information Intelligence/Homeland Security, within which \$20,000,000

is for a public-private partnership on critical infrastructure protection. Of the funds recommended for Export Enforcement, \$5,356,000 is for BIS to enhance its export control efforts, including a new initiative under which BIS will send a limited number of export enforcement agents (attachés) overseas to conduct end-use checks. The Committee directs that, prior to the assignment of any attachés at U.S. missions overseas, BIS provide a detailed report to the Committees on Appropriations describing where the attachés will be posted and what their specific responsibilities will be. Additionally, the report should provide details about the arrangement between BIS and the Department of State concerning accommodations for the attachés at Department of State facilities. This is to ensure that facilities to which the attachés will be assigned are adequately sized and outfitted to meet all of their requirements.

The Committee directs BIS to conduct a comprehensive study on the health, competitiveness, and the contribution of the U.S. textile and apparel industry to the U.S. economy and in particular to the U.S. armed forces. The study should include a review of whether the United States is increasing its dependency on foreign sources for critical textile-related materials; potential threats to internal security from increased foreign sourcing and dependency; whether the Berry amendment and other Buy-American restrictions are being effectively enforced by the Department of Defense. The Committee requests that the study be completed no later than July 1, 2003 and recommends \$750,000 within available funds for this purpose.

The Committee recommendation fully funds the fiscal year 2003 request for authorized CIAO activities. The Committee does not recommend funding for the Technology and Evaluation Program, which exceeds CIAO's authority. Rather, the Committee recommendation includes \$20,000,000 for the Bureau to develop a program under CIAO to address the private sector's inattention to the threat of terrorism against our national critical infrastructure. The Committee directs CIAO to develop under this program a public-private partnership, to consist of a team of experts that have both the technological and legal expertise to provide support to the private sector. This initiative should first target those sectors and companies that are highest in importance to U.S. national security. The Committee directs that the CIAO develop a spending plan for this initiative, to be submitted to the Committees on Appropriations for approval before any funds are expended.

ECONOMIC DEVELOPMENT ADMINISTRATION
Appropriations, 2002 \$365,557,000
Budget estimate, 2003 348,000,000
Committee recommendation 288,651,000

The Committee recommends an appropriation of \$288,651,000. The recommendation is \$59,349,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Economic Development Administration [EDA] provides grants to local governments and nonprofit agencies for public works, planning, and other projects designed to facilitate economic development. Funding amounts for the two appropriations accounts under this heading are displayed below.

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS
Appropriations, 2002 \$335,000,000
Budget estimate, 2003 317,235,000
Committee recommendation 257,886,000

The Committee recommends an appropriation of \$257,886,000. The recommendation is \$59,349,000 below the budget request.

The Committee recommendation provides funding of \$172,886,000 for public works grants (title I), \$24,000,000 for planning assistance, \$10,500,000 for trade adjustment assistance, \$40,900,000 for economic adjustment grants (title IX), and \$9,100,000 for technical assistance.

The Committee is aware of several proposals for economic development or adjustment assistance and strongly urges EDA to consider applications for the following proposals within applicable procedures and guidelines and provide a grant, if warranted: (1) the Vermont Economic Development Fund; (2) infrastructure improvement at Discovery Square and Lancaster Square, PA; (3) a proposal for economic development in Albuquerque, New Mexico; (4) development of a multi-purpose dock in Seward, AK; (5) a proposal for a wireless initiative in Taylor County, KY; and (6) a proposal for technology initiatives at Mississippi Valley State University.

The Committee lauds EDA for its continued efforts to strengthen private sector business activity and development on Indian lands, and urges that it act expeditiously to develop an implementation plan for the recently enacted Native American Business Development, Trade Promotion, and Tourism Act.

The Committee expects EDA to continue its efforts to assist communities impacted by economic dislocations relating to industry downswings as well as to assist communities impacted by downturns due to environmental concerns. This includes the timber and coal industries, United States-Canadian trade-related issues, communities in New England, the mid-Atlantic, Hawaii, and Alaska impacted by fisheries regulations, and communities in the Southeast impacted by downturns due to NAFTA.

SALARIES AND EXPENSES

Appropriations, 2002	\$30,557,000
Budget estimate, 2003	30,765,000
Committee recommendation	30,765,000

The Committee recommends an appropriation of \$30,765,000. The recommendation is identical to the budget request.

MINORITY BUSINESS DEVELOPMENT AGENCY

MINORITY BUSINESS DEVELOPMENT

Appropriations, 2002	\$28,381,000
Budget estimate, 2003	28,906,000
Committee recommendation	28,906,000

The Committee recommends an appropriation of \$28,906,000. The recommendation is identical to the budget request. The Committee recommendation includes the fiscal year 2002 funding level and a 4.1 percent pay adjustment for Federal employees. The Committee notes that since its inception in 1969, neither the Minority Business Development Agency nor its predecessor, the Office of Minority Business Enterprise, have ever been authorized.

ECONOMIC AND INFORMATION INFRASTRUCTURE
The Committee includes under this section of the bill the Department of Commerce agencies responsible for the Nation's basic economic and technical information infrastructure, as well as the administrative functions which oversee the development of telecommunications and information policy.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

Appropriations, 2002	\$62,515,000
Budget estimate, 2003	73,220,000
Committee recommendation	72,158,000

The Committee recommends an appropriation of \$72,158,000. The recommendation is

\$1,062,000 below the budget request and includes funding to continue the necessary task of updating and improving statistical measurements of the U.S. economy and international transactions. The recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Economic and Statistics Administration is responsible for the collection, tabulation, and publication of a wide variety of economic, demographic, and social statistics and provides support to the Secretary of Commerce and other Government officials in interpreting the state of the economy and developing economic policy. The Bureau of Economic Analysis [BEA] and the Under Secretary for Economic Affairs are funded in this account.

The Committee recommends \$66,961,000 for BEA. The recommendation includes an increase of \$4,810,000 for BEA to generate more timely economic data. The recommendation also includes an increase of \$3,598,000 to upgrade BEA's statistical processing systems. The economic data produced and disseminated by BEA is important to the health of the U.S. economy. The recommendation for BEA represents an 18 percent increase over the fiscal year 2002 level.

BUREAU OF THE CENSUS

Appropriations, 2002	\$490,800,000
Budget estimate, 2003	705,316,000
Committee recommendation	558,919,000

The Committee recommends an appropriation of \$558,919,000. The recommendation is \$146,397,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees. The Committee's recommendations for the Census Bureau accounts are described in more detail below.

SALARIES AND EXPENSES

Appropriations, 2002	\$169,424,000
Budget estimate, 2003	204,996,000
Committee recommendation	173,223,000

The Committee recommends an appropriation of \$173,223,000. The recommendation is \$31,773,000 below the budget request. This account provides for the salaries and expenses associated with the statistical programs of the Bureau of the Census, including measurement of the Nation's economy and the demographic characteristics of the population. These programs are intended to provide a broad base of economic, demographic, and social information used for decision-making by governments, private organizations, and individuals.

The Committee has provided funding for the key programs of the Census Bureau. The Committee is particularly concerned that key reports on manufacturing, general economic and foreign trade statistics are maintained and issued on a timely basis.

The Committee recommendation includes an increase of \$5,463,000 to improve estimates of the Nation's Gross Domestic Product and an increase of \$5,192,000 to measure the impact of electronic business on the economy. The Committee does not recommend funding increases for trade statistics or restoration of the Survey of Income and Program Participation.

The Committee requests that the Bureau provide the Committee on Appropriations a report on the reimbursements it has received for work requested by other Federal agencies or private organizations. The report should be provided no later than May 1, 2003.

PERIODIC CENSUSES AND PROGRAMS

Appropriations, 2002	321,376,000
Budget estimate, 2003	500,320,000
Committee recommendation	385,696,000

The Committee recommends an appropriation of \$385,696,000. The recommendation is \$114,624,000 below the budget request. This amount, when combined with approximately \$15,000,000 in carryover, will fully fund periodic censuses and programs.

This account provides for the constitutionally mandated decennial census, quinquennial censuses, and other programs which are cyclical in nature. Additionally, individual surveys are conducted for other Federal agencies on a reimbursable basis.

The Committee recommends \$85,682,000 for the 2000 Census. The Committee recommends \$94,995,000 for the 2010 Decennial Census. Within this amount, \$42,757,000 is for Design and Planning and \$52,238,000 is for Master Address File/Topologically Integrated Geographic Encoding and Referencing [MAF/TIGER].

For other programs under this account, the Committee recommends the following: \$85,475,000 for economic censuses; \$5,773,000 for census of governments; \$6,092,000 for intercensal demographic estimates; \$27,131,000 for continuous measurements; \$12,658,000 for demographic survey sample design; \$6,284,000 for electronic information collection; \$37,811,000 for geographic support; and \$23,795,000 for data processing systems.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

Appropriations, 2002	\$81,273,000
Budget estimate, 2003	60,349,000
Committee recommendation	73,528,000

The Committee recommends on appropriation of \$73,528,000. The Committee recommendation is \$13,179,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

SALARIES AND EXPENSES

Appropriations, 2002	\$14,054,000
Budget estimate, 2003	16,581,000
Committee recommendation	14,352,000

The Committee recommends on appropriation of \$14,352,000. The recommendation is \$2,229,000 below the budget request.

The Committee retains language from previous years allowing the Secretary of Commerce to charge Federal agencies for a portion of the cost of coordination of spectrum management, analysis, and operations.

PUBLIC BROADCASTING FACILITIES, PLANNING, AND CONSTRUCTION

Appropriations, 2002	\$51,716,000
Budget estimate, 2003	43,556,000
Committee recommendation	43,616,000

The Committee recommends an appropriation of \$43,616,000. The recommendation is \$60,000 above the budget request. Public broadcasters face a significant challenge in making the transition from analog to digital broadcasting. The public broadcasters, as well as commercial broadcasters, are required to make the change from analog to digital broadcasting by 2005. This is an expensive task, and is going to be particularly challenging for public broadcasters whose networks include numerous translator stations.

These challenges are particularly great for those broadcasters who are located in, or who serve, largely rural areas. As in past years, the Committee continues to urge NTIA to place emphasis on the needs of these stations, and to support focusing resources on distance learning initiatives targeting rural areas.

TECHNOLOGY OPPORTUNITIES PROGRAM

Appropriations, 2002	\$15,503,000
----------------------------	--------------

Budget estimate, 2003	212,000
Committee recommendation	15,560,000

The Committee recommends an appropriation of \$15,560,000. The recommendation is \$15,348,000 above the budget request. The Committee expects NTIA to limit eligibility for this program.

In its February 2002 annual report on Internet use, "A Nation Online: How Americans Are Expanding Their Use of the Internet," the Department of Commerce reported that while Internet use among the poor and minorities has increased rapidly over the last 3 years, these groups still lag behind a majority of Americans who have access to the Internet. In its fiscal year 2003 budget request, the administration slated the Technology Opportunities Program (TOP) for elimination. According to the Department's fiscal year 2003 Budget in Brief, the reason for the elimination is that the program has fulfilled its mission. There are great numbers of people that would continue to benefit from the TOP program and the Committee recommends its full funding.

The regional information sharing system (RISS) under the Department of Justice provides funding for law enforcement entities which have traditionally obtained funding from the TOP Program. The Committee recommendation excludes law enforcement entities eligible for the RISS Program from applying for TOP funds. The Committee expects NTIA to give preference to applications from consortia and for purposes such as public safety or other uses for which there is no other funding source available.

The Committee is aware of several proposals for information infrastructure grants and strongly urges NTIA to consider applications for the following proposals within applicable procedures and guidelines and provide a grant, if warranted: (1) a broadband access initiative in Vermont; (2) a technology training initiative proposal by Morgan State University; (3) graduate education and applied research in South Dakota; and (4) a business to business electronic commerce program in Kentucky.

PATENT AND TRADEMARK OFFICE

SALARIES AND EXPENSES

Appropriations, 2002	\$1,127,501,000
Budget estimate, 2003	1,304,357,000
Committee recommendation	1,205,571,000

The Committee recommends total budget resources of \$1,205,571,000. The recommendation is \$98,786,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees. The recommendation does not include the \$207,000,000 surcharge on patent and trademark fees proposed in the President's fiscal year 2003 budget.

The Patent and Trademark Office [PTO] is charged with administering the patent and trademark laws of the United States. PTO examines patent applications, grants patent protection for qualified inventions, and disseminates technological information disclosed in patents. PTO also examines trademark applications and provides Federal registration to owners of qualified trademarks. The PTO is subject to the policy direction of the Secretary of Commerce, but the agency has independent control of its budget, expenditures, personnel, procurement and other administrative and management functions.

Patent laws administered by the PTO encourage invention, innovation and investment. The PTO plays a critical role in promoting the continued development of intellectual property in this country. For established companies, new patents improve com-

petitiveness, increase productivity, help bring new products and services to market, and create jobs.

Preparing PTO for the Workload Associated with the 21st Century Economy.—For fiscal year 2002, the Committee directed the PTO to develop a 5-Year Strategic Plan for the PTO with three core objectives: (1) prepare the agency to handle the workload associated with the 21st century economy, (2) improve patent quality, and (3) reduce patent and trademark pendency. The Committee directed that the plan include recommendations to improve retention and productivity of the examiner workforce, target hiring increases to deal with high-growth areas, improve training, and increase productivity through E-Government and other capital improvements. The Committee directed that the plan also include benchmarks for measuring progress in achieving each of those objectives.

While the PTO has briefed the Committee on the outlines of a 5-Year Strategic Plan for the agency that is generally responsive to direction from Congress, the plan calls for some of the most sweeping changes to the patent review process in 200 years.

The Committee recommendation supports efforts to shift PTO resources to high priority areas and a more gradual increase in staffing to ensure that examiners have the expertise, tools, and training necessary to produce quality patents on a timely basis. This approach is consistent with the outline of the PTO 5-Year Strategic Plan released in June 2002.

Within the total amounts recommended, the Committee directs that PTO cover all proposed adjustments to base and implement \$42,510,000 in proposed fiscal year 2003 savings resulting from implementation of the PTO 5-year Strategic Plan. In addition, the Committee recommends the following targeted funding increases: (1) \$9,737,000 to hire 250 new patent examiners to help improve patent quality and reduce patent pendency; (2) \$13,400,000 for an e-government initiative. Of this amount, \$2,000,000 is provided to begin implementing the PTO's e-trademark initiative, and \$11,400,000 is provided for the PTO's e-patent initiative; (3) \$1,100,000 is to implement the PTO's information technology initiative; and (4) \$4,257,000 for improved patent examiners hiring, training, and supervision.

SCIENCE AND TECHNOLOGY

The Committee includes agencies involved in technology research and development, scientific assessment and prediction of environmental phenomena, and the administrative and policy functions providing oversight for these activities.

TECHNOLOGY ADMINISTRATION

UNDER SECRETARY FOR TECHNOLOGY/OFFICE OF TECHNOLOGY POLICY

SALARIES AND EXPENSES

Appropriations, 2002	\$8,238,000
Budget estimate, 2003	7,886,000
Committee recommendation	7,886,000

The Committee recommends an appropriation of \$7,886,000. The recommendation is identical to the budget request and will fully fund the current operations of the Technology Administration. The Committee recommendation includes a 4.1 pay adjustment for Federal employees.

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

Appropriations, 2002	\$686,751,000
Budget estimate, 2003	563,110,000
Committee recommendation	720,869,000

The Committee recommends a total of \$720,869,000 for the National Institute of

Standards and Technology [NIST]. The recommendation is \$157,759,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

Competitive sourcing.—The Committee is concerned about efforts within the Department of Commerce to use the implementation of the President's Management Initiative for Competitive Outsourcing (the A-76 process) at the National Institute of Standards and Technology [NIST] as a way to reduce staff by more than 50 percent regardless of the impact on NIST's missions. This initiative is designed to compete or directly convert 15 percent of those positions identified as commercial competitive. However, efforts are underway to identify roughly 75 percent of NIST's positions as commercial for purposes of this initiative. While the Committee agrees that there are certain advantages to competitive outsourcing, it is also concerned that blind implementation could severely inhibit the operations of the Institute in the future. For more than a century, the scientists, engineers, and supporting organizations of the Institute have had the mission of establishing the standards that touch nearly every aspect of life and work in America, from the doses of radiation in medical X-rays to the level of protection in bullet-resistant vests used by police officers. NIST's mission plays an ever more critical role today by supporting Homeland Security through the development of standards for mail irradiation, cyber security for Federal IT systems, and by conducting the Federal investigation of the collapse of the World Trade Center buildings. The Committee directs that before proceeding with further implementation, NIST shall provide a detailed plan to the Committees on Appropriations. The plan shall be approved by both Committees before the Department proceeds with "competitive outsourcing" in any manner.

A description of each NIST account and the Committee recommendation follows:

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

Appropriations, 2002	\$321,111,000
Budget estimate, 2003	384,809,000
Committee recommendation	363,433,000

The Committee recommends an appropriation of \$363,443,000. The recommendation is \$21,376,000 below the budget request.

The Committee recommendations are displayed in the following table:

Electronics and Electrical Engineering	\$53,132,000
Manufacturing Engineering	21,341,000
Chemical Science and Technology	40,313,000
Physics	37,015,000
Material Science and Engineering	64,878,000
Building and Fire Research	24,765,000
Computer Science and Applied Mathematics	55,297,000
Technology Assistance	18,467,000
National Quality Program	5,522,000
Research Support Activities	42,703,000

Total, STRS

\$363,433,000

Within the funds made available for Electronics and Electrical Engineering, \$10,000,000 is for the development of standards and guidelines for first responders. This effort shall be administered by the Office of Law Enforcement Standards within the Electronics and Electrical Engineering Program. Within the funds made available for Chemical Science and Technology, \$1,000,000 is to

restore reductions in environmental measurements at the Hollings Marine Laboratory, and \$2,000,000 is for measurements and standards related to In-vitro diagnostic medical devices. Within the funds made available for Physics, \$2,500,000 is for nanotechnology research coordinated with the National Nanotechnology Initiative. Within the funds made available for Material Science, \$5,000,000 is to enhance the operations of the NIST Center for Neutron Research and \$835,000 is for instrumentation. Within the funds made available for Building and Fire Research, \$4,000,000 is for the development of standards pertaining to the construction of high-rise buildings and for the continuation of NIST's investigation into the collapse of the World Trade Center towers on September 11, and \$2,500,000 is for the continued funding of the Wind Research Program, a cooperative agreement between NIST and Texas Tech University. Within the funds made available for Computer Science and Applied Mathematics, \$1,000,000 is to fund the Computer Security Expert Assist Teams, \$2,100,000 is for the development of computer security checklists and guidelines for computer hardware and software systems, and \$500,000 is provided to begin support of NIST's efforts related to the Help America Vote Act. Within the funds made available for Research Support Activities, \$3,900,000 funds utility costs associated with the Advanced Measurement Laboratory, and not more than \$12,100,000 is to be used for business systems, also known as the Commerce Administrative Management System [CAMS]. The Committee recommends that no funds be used for FAIR Act studies, in support of the A 76 contracting process.

INDUSTRIAL TECHNOLOGY SERVICES

Appropriations, 2002	\$291,032,000
Budget estimate, 2003	119,607,000
Committee recommendation	291,976,000

The Committee recommends an appropriation of \$291,976,000. The recommendation is \$172,369,000 above the budget request.

Manufacturing Extension Partnership Program [MEP].—The Committee recommends an appropriation of \$106,623,000 to fully fund all of the MEP centers.

Advanced Technology Program [ATP].—The Committee recommends an appropriation of \$185,353,000. The recommendation is \$39,198,000 above the budget request. This amount, when combined with approximately \$34,000,000 in carryover, will fully fund ATP awards at current levels. Within the amounts made available, \$45,000,000 shall be used for administrative costs, internal laboratory support, and for Small Business Innovation Research Program [SBIR] requirements. NIST may not apply a contracts and grants processing surcharge to the ATP program.

In fiscal year 2002, the Committees on Appropriations provided \$60,700,000 for new ATP awards, yet the Department committed to issuing only \$35,000,000. The Committees on Appropriations clarified Congressional intent on this matter by modifying bill language in the fiscal year 2002 Supplemental Appropriations bill. The Committee recommends similar modified bill language which obligates the Department of Commerce to spend \$60,700,000 in fiscal year 2003 towards the awards.

CONSTRUCTION OF RESEARCH FACILITIES

Appropriations, 2002	\$62,393,000
Budget estimate, 2003	54,212,000
Committee recommendation	65,460,000

The Committee recommends an appropriation of \$65,460,000. The recommendation is \$11,248,000 above the budget request and fully

funds the highest priority safety, capacity, maintenance, and repair projects at NIST. Of the amounts provided, \$15,000,000 is for equipment and relocation expenses related to NIST's Advanced Measurement Laboratory in Gaithersburg, MD.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION (INCLUDING TRANSFERS OF FUNDS)

Appropriations, 2002	\$3,258,848,000
Budget estimate, 2003	3,130,614,000
Committee recommendation	3,349,506,000

The Committee recommends an appropriation of \$3,349,506,000 for National Oceanic and Atmospheric Administration [NOAA]. Transfers and de-obligations total \$75,200,000. The recommendation is \$218,892,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees. During this time of continued budgetary constraint, the Committee recommendation continues to make funding for ocean, coastal, fisheries, and atmospheric programs a high priority.

As in past years, the Committee expects NOAA and the Department to adhere to the direction given in this section of the Committee report and to observe the reprogramming procedures detailed in section 605 in the general provisions of the accompanying bill.

OPERATIONS RESEARCH, AND FACILITIES

The Committee recommends discretionary appropriations of \$2,352,301,000. The recommendation is \$138,219,000 above the budget request.

Sea Grant College Program.—Through its budget request, the administration slated the National Sea Grant College Program for termination under NOAA and reconstitution under the National Science Foundation [NSF]. The Committee does not support this ill-conceived notion. Instead, the Committee recommends a total appropriation of \$63,410,000 for the program. Under the NSF, the program would lose its State matching requirement and it would lack authorization to continue its successful Extension Program. The Sea Grant program has a long-standing commitment to problem-oriented scientific research and education that responds to the needs of industry, government, resource managers, university scientists, and the broader public. The outreach and technology transfer services of the Sea Grant program have improved science-based fisheries management, pollution remediation, seafood safety, marine safety, and marine engineering. The Committee is concerned that NSF, with its tradition of funding basic science, will be less responsive to the research agenda successfully developed by Sea Grant.

Ocean and Coastal Observing Systems.—The Committee reaffirms its support for the establishment of an integrated interagency ocean and coastal observing system that will provide critical information to a wide variety of users of ocean and coastal information and services. Substantially better information on the current and future state of the ocean and its role in environmental change is needed. Adequate predictive capability is a prerequisite to the development of sound policies at the national and regional level, policies ranging from maritime commerce to public health, from fisheries to safety of life and property, from climate change to national security.

Broad scale discussions have been underway for almost three decades on this topic, but coordinated attention at the Federal level has begun in earnest only in recent years. In Senate Report 107-42, the Committee directed the Office of Science and

Technology Policy to develop an interagency plan for the research, technology demonstration, and ultimately, the implementation of an integrated ocean observing system. The Committee notes that efforts are underway to develop such a plan, but to date, no such interagency plan has been submitted.

The Committee directs NOAA to work with its partners on the National Ocean Research Leadership Council to submit a plan to the Committee prior to the release of the President's budget for fiscal year 2004. This plan will detail an implementation strategy for the establishment of an integrated ocean and coastal observing system. This plan shall, at a minimum: (1) include an interagency governance structure; (2) define the roles and responsibilities of each agency in implementing and operating the system; (3) provide multi-year funding estimates by agency; and (4) include a process for regional coordination and technical support to ensure development of integrated regional systems with a national observing initiative.

In addition, as development of an integrated long-term Federal plan proceeds, the Committee urges NOAA to coordinate existing or planned regional coastal observing systems, particularly those for which funding has been provided or those which use Federal platforms such as buoys. The Committee directs NOAA to utilize the data management and technical expertise of the Coastal Services Center to perform this function as well as provide education and outreach to participating Federal agencies, academic institutions, State agencies, and other interests.

Ocean Health Initiative.—One area where coastal observing systems would be useful is in exploring the relationship between the oceans and human health. In 1999, a National Research Council report, *From Monsoons to Microbes: Understanding the Ocean's Role in Human Health*, focused attention on the implications of ocean phenomena for human health. The phenomena include climate change, weather events, coastal hazards, infectious diseases, and harmful algal blooms. As the nation faces increasing coastal pressures and scientists identify alarming changes in coastal systems, including changes in sentinel species such as dolphins and fish, NOAA is uniquely positioned to play a strong role in identification, prediction, and prevention of such changes. In addition, genetic and other characteristics of marine organisms can be used for medical advances and NOAA can help build a bridge between marine scientists and human health experts.

The Committee directs the Under Secretary to establish an Ocean Health Initiative to coordinate and focus agency activities on critical areas of concern and identify critical gaps in coverage. The Committee is providing \$10,000,000 that shall be used for critical research and projects aimed at closing identified gaps. The Committee directs NOAA to: (1) work with the NSF and the National Institute of Environmental Health Sciences in developing a joint program that builds on and complements existing NOAA programs; (2) establish an external peer reviewed grant process; and (3) provide for the selection and funding of internationally recognized "distinguished" scholars to work in collaboration with NOAA researchers. NOAA will submit a spend plan for approval by the Committees on Appropriations before program funding is obligated.

Fisheries Management Reform.—The Committee continues to be gravely concerned over the need for reform of the Federal fishery management system. In June 2002, the National Academy of Public Administration [NAPA] and the National Research Council [NRC] issued the report requested by the

Committee that continues and expands the review begun in the June 2000 report prepared for NOAA, *An Independent Assessment of the Resource Requirements for the National Marine Fisheries Service*. The NAPA/NRC report confirmed that the agency is in a management crisis that will require years to resolve, and stated that the National Marine Fisheries Service [NMFS] must demonstrate leadership to ensure the necessary changes are made in the fishery management structure. The Committee supports current efforts by the Agency to strengthen accountability in both the Councils and the Agency.

However, the Committee is concerned that implementation of the changes has been extremely slow, even when the funds have been provided. More aggressive action is needed, particularly in strengthening analytical capabilities and litigation preparedness. The Committee directs NOAA, no later than June 30, 2003, to report to the Committees on Appropriations on its progress in implementing the reforms identified in the NAPA/NRC report, as well as issues identified by NMFS, including how the budget request for fiscal year 2004 helps achieve these reforms.

Pacific Salmon Funding.—The Committee notes the lack of accountability and performance standards for resources distributed to restore endangered and threatened salmon through the Pacific Coastal Salmon Recovery Fund. For fiscal year 2002, the Committees on Appropriations provided the National Marine Fisheries Service \$111,700,000 to be distributed among certain States and tribes for habitat restoration and salmon recovery. The Secretary of Commerce is imposed with substantial legal obligations under the Endangered Species Act because no less than twenty six runs of Pacific salmon are listed as endangered. Failure to make progress toward recovery under the Endangered Species Act poses adverse legal consequences for the agency. The Committee has no assurances from the Administration that any of these funds have contributed to the recovery of Pacific salmon. This is particularly important at a time when the Department is struggling to respond to a huge litigation case-load, which the Committee has provided substantial funds to help reduce. Furthermore, there appears to be no way to accurately estimate total annual Federal expenditures for Pacific salmon recovery, but funds provided to the various agencies are more than \$500,000,000 per year.

The Committee believes that some mechanism assuring legal and fiscal accountability is required for distribution of funds to States with listed salmon species. Section 6 of the Endangered Species Act provides for such a mechanism, linking the distribution of recovery funds to assurances that the State has an adequate and active program for endangered species conservation. The Committee directs NOAA to enter into Section 6 cooperative agreements with the States and tribes that are using funds for recovery of listed species to clarify State and tribal involvement in regional and local recovery programs. In addition, the Committee directs NOAA to provide an annual report to the Committee no later than March 30 of each year on the projects funded through the Pacific Salmon Recovery Fund and their projected and actual results, particularly focusing on progress toward recovery of endangered and threatened salmon species and projected ending date for funding needs based on recovery schedules. The Committee recommends that not less than 1 percent of the amounts made available for the Pacific Coastal Salmon Recovery Fund be made available to NOAA to accomplish this task.

Enforcement of International Dolphin Agreement.—The Committee is concerned that Mexico and other non-U.S. parties to the

International Dolphin Conservation Program [IDCP], of which the United States is a member, are not fully complying with the requirements of the IDCP, particularly with respect to accurate reporting of dolphin interactions and mortality. The Committee directs the Department, in conjunction with NOAA, and in consultation with key U.S. stakeholders, to evaluate and document any lack of compliance by the non-U.S. parties to the IDCP with its provisions, including through on-site visits and discussions with government officials, observers and others with first-hand knowledge of country practices, and to submit a written report describing the findings to the Committee no later than May 1, 2003. The report should include an evaluation of compliance with the on-board observer program, with a focus on national observers; reporting of dolphin interactions and mortality; operational requirements for vessels; and actions by parties to follow-up on infractions identified by the international review panel.

Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

The Committee recommends an appropriation of \$406,243,000 for the National Ocean Service [NOS].

Navigation.—The Committee recommends \$4,250,000 for the Joint Hydrographic Center. In addition, the Committee recommends \$3,200,000 for bathymetric surveys off the Northeast Coast of the United States and around the Aleutian Chain in accordance with the data needs identified by a Joint Hydrographic Center on the potential expansion of United States lands beyond the Exclusive Economic Zone. Within the funding recommendation for Shoreline Mapping, the Committee recommends that NOS focus on mapping the shoreline of the North Slope of Alaska.

Ocean Resources Conservation and Management.—The Committee recommends continued funding for the Coastal Observation Technology System within the NOS to provide a national framework, technical assistance, and support for sustained coastal ob-

servation systems, with particular emphasis on coordinating regional systems. The Committee recommendation includes \$15,700,000 for this program.

The Committee recommends \$500,000 for Nowcast/Forecast Operational Systems to coordinate research on waves, temperature, and current dynamics to forecast weather and ocean conditions affecting both wildlife and human safety.

The Committee recommendation includes \$14,000,000 for the Coral Reef Program, subject to approval of a spend plan by the Committees on Appropriations. The Committee recommends \$3,000,000 for the Beaufort Laboratory and encourages the lab to pursue opportunities for collaborative research with area universities. Under Response and Restoration, \$750,000 is provided for Coastal Remediation Technology to develop a cooperative program with the Cooperative Institute for Coastal and Estuarine Environmental Technology to evaluate innovative environmental technologies for estuary remediation. Under funding for the Coastal Ocean Program, the Committee directs the program to work with and continue its current levels of support for the Baruch Institute's research and monitoring of small, high-salinity estuaries and to continue its current levels of support for the LUCES program. Within the funds provided for the MERHL, the Committee directs NOAA to create a scientific and professional [ST] position to act as Chief Scientist for NCCOS.

Ocean and Coastal Management.—The Committee recommendation includes full funding for Coastal Zone Management Act Administration. The Committee recommends \$3,483,000 under the Administration account. The Committee recommends \$33,500,000 for the National Marine Sanctuary Program [NMSP]. The Committee supports elevation of the NMSP to that of Office of National Marine Sanctuaries. Further, the Committee recommends that this Office have authority to create Regional Offices and recommends an additional five full-time equivalents to implement this regional approach.

The Committee encourages NOAA to continue its work with the Mariner's Museum and the Navy on efforts to recover and preserve the Monitor.

The Committee recommends an appropriation of \$603,052,000 for the National Marine Fisheries Service [NMFS]. Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

White paper.—Late this summer, NMFS released a white paper entitled, “Fiscal Year 2003 Senate Appropriations Committee Mark Impacts—NOAA Fisheries”. Suspiciously, the paper alleged that a host of Congressional priorities might be eliminated were Senate levels enacted into law, even though NMFS was receiving hundreds of millions of dollars in funding. Efforts by the Committee to clarify just what NMFS would do with the money allotted to it by the Senate proved unsuccessful. Therefore, NMFS is directed to fully fund and execute every initiative cited in the aforementioned white paper as well as every initiative listed in the table above and described in the narrative below. No other activities shall be undertaken or continued. NMFS is directed to submit a spending plan to the Committees on Appropriations accounting for every dollar to be spent. The spending plan shall be delivered not later than April 15, 2003, and the Committee cautions NMFS and NOAA not to be late as is often the case.

Base funding.—The Committee has worked closely with NMFS to differentiate between fixed and variable costs, leading to the first accurate accounting of so-called base funding. The Committee commends those who participated in this endeavor. Transfers of funds between subaccounts within the base account, or into or out of the base account, shall be subject to reprogramming requirements regardless of dollar amount.

Fisheries Litigation Issues.—The Committee recommendation includes \$5,000,000 for the NMFS to address National Environmental Policy Act [NEPA] issues. To date, \$42,000,000 has been appropriated to NOAA to maintain an up-to-date litigation docket and conduct periodic analyses of its litigation record and pending caseload. In the past, the Committee has also directed NMFS to improve its administrative record keeping by employing standardized methods uniformly throughout the regional fisheries management councils, fisheries management regions, and fisheries science centers. The Committee directed that such an administrative record should contain all required analyses, so that officials involved in the process could assure themselves by inspection that the record supported their proposed actions prior to their approval.

To date, NMFS has ignored this direction. Furthermore, NMFS has provided no jus-

tification of how it has spent the funds that have been appropriated for these purposes. The Committee recommends \$5,000,000 to establish an Office of National Environmental Policy Act Compliance. This Office will be coordinated by a Senior Executive Service level employee who will report directly to the Undersecretary of Commerce for Oceans and Atmosphere. Under the direction of this National Coordinator, each fisheries management regional office or fisheries management council will house a regional NEPA Coordinator. At a minimum, NOAA will employ 50 individuals by September 30, 2003 to work on its NEPA issues. None of the funds recommended for this effort will be made available for regional council support without prior Committee approval. NMFS shall submit for approval to the Committees on Appropriations a spend plan on this action before April 20, 2003.

The Committee is pleased with the work conducted by National Academy of Public Administration [NAPA] and the National Research Council [NRC] on its report, *An Independent Assessment of the Resource Requirements for the National Marine Fisheries Service*. The Committee recommends that NAPA continue to review NMFS management systems and recommends \$750,000 for it to do so. The Committee also recommends \$300,000 for the NRC Ocean Studies Board to focus on issues at the interface between research and management such as adequacy of equipment, and staff training. The Committee looks forward to hearing from the NAPA and the NRC on their progress.

The Committee recommendation includes \$7,000,000 for North Atlantic right whale research, management activities, and Atlantic coastal States’ implementation of cooperative Federal-State right whale recovery plans, such as those concluded under section 6 of the Endangered Species Act [ESA], to be distributed in the manner described in the following table:

NORTHERN RIGHT WHALE PRESERVATION	
Reduce ship strikes	\$1,430,000
Whale detection technologies	[400,000]
Passive acoustic	[160,000]
Active acoustic	[95,000]

Other	400,000
State programs	1,750,000
Northeast Consortium	1,000,000

Within the amounts provided, the Committee expects NMFS to expedite right whale recovery in consultation with the Implementation Team and the Take Reduction Team. The NMFS is expected to support priority management, enforcement, and ship strike prevention activities, including expedited development and deployment of innovative fishing gear and whale tracking technologies, improved stranding response and procedures, a whale-sighting advisory system, and a mandatory ship-reporting system. No more than 20 percent of funds provided to NMFS may be used for salaries of existing personnel.

Fisheries Research and Management.—The Committee recommends \$3,450,000 for the recreational fishing information network [RECFIN] program, and expects that the Pacific, Atlantic, and Gulf States shall each re-

ceive one-third of these funds with funding for inshore recreational species assessment and tagging efforts in South Carolina. In addition, the Committee expects that \$500,000 will be used to continue the effort to enhance the annual collection and analysis of economic data on marine recreational fishing. The Committee recommends that the \$750,000 for the Interstate Fish Commissions be equally divided among the three commissions. As in prior fiscal years, funds appropriated for the Hawaii Fisheries Development and Hawaii Stock Management Plan programs shall be administered by the Oceanic Institute. The Committee recommends that NMFS double its effort with regard to California Cooperative Fisheries Investigation cruises. Of the amounts recommended for the Stellar Sea Lion Recovery Plan, \$1,000,000 is for Alaska Fisheries Foundation to study innovative methods to deter whale predation of sea lions. In addition, the Committee expects NOAA to continue its research initiative on Pacific decadal oscillation, predator-prey relationships with particular emphasis on killer whale predation on sea lion pups, and to explore other factors in the marine environment that may be contributing to the decline of Stellar sea lions and other marine mammal populations.

Of the amounts recommended for SCORE, \$1,000,000 is provided for New Hampshire, \$1,000,000 is provided for South Carolina, and \$1,000,000 is provided for the Mote Marine Laboratory.

Protected Resources Research and Management.—Of the amounts provided for Native Marine Mammals, \$100,000 is to enable the Alaska Eskimo Whaling Commission to participate in International Whaling Commission meetings.

Habitat Conservation.—The Committee recommendation includes \$3,500,000 for Chesapeake Bay Studies, of which \$500,000 is for sea grass restoration. In addition, the Committee recommends that NOAA continue a micro-grant program allowing local governments and non-profit organizations to perform fisheries and shellfish restoration on the Chesapeake Bay. The Committee recommendation includes \$1,500,000 for seven full-time equivalents for the Oxford Laboratory to support the NOAA Chesapeake Bay Office’s fisheries, habitat restoration, and ecosystem research needs. The Committee provides a total of \$3,500,000 for the Bay Watersheds Education and Training Program to be administered by the NOAA Chesapeake Bay Office. Of this amount, \$2,000,000 is to continue the program in the Chesapeake Bay Watershed and \$1,500,000 is for pilots in three locations.

Enforcement and Surveillance.—The Committee recommendation provides \$350,000 for a fisheries research vessel for the South Carolina Department of Natural Resources. The Committee recommends continued support at last year’s level for marine forensics and southeast fisheries’ law enforcement, and the Committee expects continued cooperative laboratory activities between NMFS and State and local governments and the academic community. The Committee recommends that the three interstate marine fisheries commissions may be eligible to receive a portion of the Cooperative Enforcement Program funds for use in providing law enforcement coordination among the States and NMFS. Of the amounts provided for Enforcement and Surveillance-Cooperative Agreements with States, the Committee recommends \$3,500,000 for the South Carolina Department of Natural Resources.

TOTAL NOAA RESEARCH—ORF

395,685

The Committee recommends an appropriation of \$395,685,000 for Oceanic and Atmospheric Research [OAR]. Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

Base funding.—The Committee has worked closely with OAR to differentiate between fixed and variable costs, leading to the first accurate accounting of so-called base funding. The Committee commends those who participated in this endeavor. The amounts recommended under OAR “Laboratories and Joint Institutes”, “Climate and Global Change-Base Program”, and “U.S. Weather Research Program-Base”, are subject to the following funding guidelines: 32 percent is for direct labor; 8 percent is for personnel benefits; 1 percent is for former personnel; 2 percent is for travel of persons; 6 percent is for rent and utilities; 20 percent is for contractual services; 4 percent is for supplies and materials; 3 percent is for equipment; 23 percent is for grants and fixed charges; and 1 percent is for miscellaneous expenses. Transfers of funds between these guidelines, or into or out of the base accounts, shall be subject to reprogramming requirements regardless of dollar amount.

Climate Change Research Initiative.—The Committee does not recommend \$18,000,000 as requested, for the Climate Change Research Initiative. The Committee has, for many years, supported robust funding for the Climate and Global Change Program and activities under Climate Observations and Services. The Committee is concerned that the administration’s proposed increases for Climate Change Research are not provided under the Global Change Research Program,

but under a separate Climate Change Research Initiative not related to the research program being conducted pursuant to the coordinated Federal process established in the Global Change Research Act of 1990. The Committee supports increased funding for global climate change but the funding should be provided to NOAA for research priorities established under the U.S. Global Climate Research Program decision making structure. The Committee has provided \$159,201,000 for climate research. This funding level does not include funds appropriated for climate research elsewhere within NOAA's budget.

Of the amounts provided for Tsunami Hazard Mitigation, \$1,000,000 is for the Tsunami Warning and Environmental Observing in Alaska.

Ocean Exploration.—The Committee recommendation includes \$20,000,000 for Ocean Exploration, an increase of \$6,000,000 over the fiscal year 2002 level. Of this amount, the Committee recommends \$1,000,000 for the Center for Marine Cultural Resources. These amounts will be administered by NOAA to establish a Cooperative Institute of Marine Cultural Resources, in collaboration with the University of Rhode Island and NOAA's Ocean Exploration program.

NISA.—The Committee recommends \$2,250,000 for National Invasive Species Act/Ballast Water Demonstrations. The amount recommended is for the Chesapeake Bay and Great Lakes ballast water demonstrations to be allocated according to the fiscal year 2002 level. Of the amounts provided, \$250,000 is for the Center for Innovative Technologies to continue activities begun in fiscal year 2002.

NISA Alaska.—The Committee recommends \$1,750,000 to address the proliferation of exotic species such as Atlantic salmon in the marine environment in the North Pacific. Of this amount, \$750,000 is for the Pacific States Marine Fisheries Commission to prevent the escapement of Atlantic salmon from Alaska streams and to address other invasive species issues including mitten crab, and green crab.

Ocean, Coastal, and Great Lakes Research.—Within the amount provided for the Great Lakes Environmental Research Lab, the Committee recommends that NOAA support research programs on aquatic invasive species mitigation and reduction in the Lake Champlain Basin. Of the amounts recommended for the National Sea Grant College Program, no less than \$3,000,000 shall be for hiring of additional personnel, at the State program level, to act as liaisons between NOAA, Sea Grant Institutions, and the commercial and recreational fishing industries. The Committee recommends \$13,770,000 for the National Undersea Research Program [NURP]. Of the amount provided, \$6,885,000 is for research conducted through the east coast NURP centers and \$6,885,000 is for the west coast NURP centers, including the Hawaiian and Pacific Center and the West Coast and Polar Regions Center. The Committee expects level funding will be available for Aquarius, ALVIN, and program administration.

The Committee recommends \$12,000,000 for the next generation undersea laboratory/habitat. The Committee directs the Administrator of NOAA, working with NURP, the Office of Ocean Exploration, the Director of the National Marine Sanctuaries in Key Largo, Florida as well as the University of North Carolina Wilmington to design and build a new relocatable undersea laboratory/habitat. This new, modern laboratory/habitat supported by the Committee's recommendation will significantly improve the Nation's ability to conduct valuable research and promote understanding and education of our oceans and its resources. Before deployment, an operational plan shall be put in place to

identify locations only within the waters of the United States where this laboratory will be used to address our most important marine challenges in priority order. This plan shall be submitted to the Committees on Appropriations for approval. This new platform shall be deployed first in the Florida Keys National Marine Sanctuary, in an area such as the Tortugas reserve.

The Committee recommendation includes \$2,000,000 for Arctic Research. Of this amount, \$350,000 is for the Cooperative Institute for Arctic Research.

TOTAL NATIONAL WEATHER SERVICE—ORF 682,610 |

The Committee recommends an appropriation of \$682,610,000 for the National Weather Service [NWS] for operations, acquisitions, and research. Various Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

Local Warnings and Forecasts.—The "1995 Secretary's Report to Congress on Adequacy of NEXRAD Coverage and Degradation of Weather Services" requested further studies of several sites, including Williston, ND and Erie, PA. The Committee provided funds to

begin mitigation in fiscal year 1999 at these sites. The Committee has provided \$4,790,000 to continue current operations at these sites. In addition, the Committee directs the NWS to make appropriate arrangements to maintain a local presence for the maintenance of the NOAA weather radio antenna in Erie, PA and develop a strategy to adequately address the prediction of lake-effect snow in the area.

The Committee recommendation includes \$3,000,000 to complete analysis of the air quality pilot program, finalize a concept of operations, and begin procurement of the information technology infrastructure necessary to support operational air quality forecasts by the end of fiscal year 2004. In addition, \$3,000,000 is provided to complete the operational implementation of the temperature forecasting pilot in New England. The Committee recommendation provides for the modernization of a total of 200 meteorological observing stations and for the operational use of high resolution forecasts models at 8 sites in fiscal year 2003.

Flash floods.—The Committee directs NOAA to commission the National Academy of Sciences to conduct a study to assess the availability, performance, and capability of the NWS NEXRAD located on Sulphur Mountain in Ventura County, California to detect heavy precipitation and aid forecasters at the Los Angeles Weather Forecast Office in providing flash flood warnings and forecasts, and on the basis of that study, to provide the Under Secretary of Commerce for Oceans and Atmosphere with a report on the performance of that mission by the NWS. The report also should include any recommendations for improving the accuracy and timeliness of flash flood warnings in and around western Los Angeles and Ventura Counties, California.

The Committee recommendation provides \$903,410,000 for Procurement, Acquisition, and Construction. The recommendation is \$92,023,000 above the request.		Budget estimate, 2003	110,000,000
Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.		Committee recommendation	98,650,000
<i>National Ocean Service.</i> —The Committee recommends \$60,000,000 for the coastal and estuarine land conservation program. This program provides funds for matching grants to States, communities, and groups engaged in land conservation efforts that benefit coastal and estuarine areas. These funds will be used expressly to acquire lands or interests in lands that include significant conservation, recreation, ecological, historical or aesthetic values to further the goals of a federally approved Coastal Zone Management Program or a National Estuarine Research Reserve.		The Committee recommends \$98,650,000 for Pacific Coastal Salmon conservation. Of this amount, \$78,650,000 is for the Pacific Coastal Salmon Recovery Fund. Within the funding for the Pacific Coastal Salmon Recovery Fund, the Committee recommends \$23,750,000 for the State of Washington, \$20,650,000 for the State of Alaska, \$11,000,000 for the State of Oregon, \$11,000,000 for the State of California, \$8,950,000 for the Pacific Coastal Tribes, and \$3,300,000 for the Columbia River Tribes. Of the funds provided for the State of Alaska, \$5,000,000 is for the Arctic Yukon-Kuskokwim Sustainable Salmon initiative, \$1,000,000 is for construction of salmon mitigation passes, \$1,000,000 is for the Cook Inlet Fishing Community Assistance Program, \$500,000 is for the Yukon River Drainage Association, \$500,000 is for Fort Richardson fisheries, \$500,000 is for Elmendorf AFB hatcheries, \$500,000 is for Fort Wainwright fisheries, \$450,000 is for universal quality standards, \$450,000 is for competitive analysis of global salmon, \$250,000 is to restore the king salmon runs in Coffman Cove, \$250,000 is to enable the State of Alaska to participate in discussions regarding the Columbia River hydrosystem management, and \$100,000 is for United Fishermen of Alaska's subsistence program. Of the amounts provided for the State of Washington, \$5,000,000 is for the Washington State Department of Natural Resources and other State and Federal agencies for purposes of implementing the State of Washington's Forest and Fish Report. The funding shall be spent in accordance with the terms and conditions of the Forest and Fish Report and consistent with the requirements of the Endangered Species Act and Clean Water Act. Of the amount provided to the State of Oregon, \$1,100,000 is for conservation mass marking at the Columbia River Hatcheries.	
The Committee recommends \$500,000 for repairs and facilities improvements at the Beaufort Laboratory. In recognition of the dilapidated conditions at the laboratory due to decades of neglect, the Committee encourages the lab to develop a 10-year facilities plan for Pivers Island.		FISHERMEN'S CONTINGENCY FUND	
<i>Program Support.</i> —The Committee recommendation provides \$9,000,000 for a Small Waterplane Area Twin Hull vessel to be homeported in New Castle, NH.		Appropriations, 2002	\$952,000
OTHER		Budget estimate, 2003	954,000
[In thousands of dollars]		Committee recommendation	954,000
OPERATIONS, RESEARCH, FACILITIES [ORF]:		The Committee recommends an appropriation of \$954,000 for the fishermen's contingency fund.	
Direct Obligations	2,424,301	The fisherman's contingency fund provides compensation to U.S. fishermen for damage or loss of fishing gear and any resulting loss because of natural or man-made obstructions related to oil and gas exploration, development, and production on the Outer Continental Shelf. The Secretary of Commerce is authorized to establish an area account	
De-Obligations	(17,000)

Direct Obligations	906,610		

within the fund for any area within the Outer Continental Shelf. A holder of a lease, permit, easement, or right-of-way in such area is required to pay a fee into the appropriate area account in the fund. Each area account, if depleted, will be replenished by assessment. The authorization stipulates that amounts available in each area account can be disbursed only to the extent provided by appropriations acts. Since receipts collected may not be sufficient for this appropriation, the Committee has included language which provides that the sums necessary to eliminate the insufficiency may be derived from the general fund of the Treasury.

FOREIGN FISHING OBSERVER FUND

Appropriations, 2002	\$191,000
Budget estimate, 2003	191,000
Committee recommendation	191,000

The Committee recommends an appropriation of \$191,000 for the foreign fishing observer fund.

Fees paid into the fund are collected from owners and operators of certain foreign fishing vessels that fish within the U.S. fishery conservation zone. The fund supports salaries of U.S. observers and program support personnel, other administrative costs, and the cost of data management and analysis.

FISHERIES FINANCE PROGRAM ACCOUNT

Appropriations, 2002	\$287,000
Budget estimate, 2003
Committee recommendation

The Committee notes that an appropriation is not necessary for the fisheries finance program account. Of the loan authority provided through bill language, \$5,000,000 is for entry level and small vessel individual fishery quota [IFQ] obligation guarantees in the halibut and sablefish fisheries off Alaska pursuant to section 1104A(a)(7) of the Merchant Marine Act of 1936. These funds are provided for IFQ loans in accordance with section 303(d)(4) of the Magnuson-Stevens Act and section 108(g) of the Sustainable Fisheries Act.

DEPARTMENT MANAGEMENT SALARIES AND EXPENSES

Appropriations, 2002	\$37,652,000
Budget estimate, 2003	48,254,000
Committee recommendation	41,494,000

The Committee recommends an appropriation of \$41,494,000 for Departmental Management. The recommendation is \$6,760,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$20,176,000
Budget estimate, 2003	22,670,000
Committee recommendation	20,635,000

The Committee recommends an appropriation of \$20,635,000 for the Commerce Department's Office of the Inspector General. The recommendation is \$2,035,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

Section 201 makes Commerce Department funds available for advanced payments only upon certification of officials designated by the Secretary that such payments are considered to be in the public interest.

Section 202 makes appropriations for salaries and expenses available for the hire of passenger motor vehicles, and for services,

uniforms, and allowances as authorized by law.

Section 203 prohibits any funds from being used to support hurricane reconnaissance aircraft and activities that are under the control of the U.S. Air Force or the U.S. Air Force Reserve.

Section 204 provides the authority to transfer funds between Department of Commerce accounts. The language provides that no account may be decreased by more than 5 percent or increased by more than 10 percent. The language also makes the transfers subject to the Committee's standard reprogramming procedures.

Section 205 allows the Secretary to award contracts for certain mapping and charting activities in accordance with the Federal Property and Administrative Services Act.

Section 206 permits the Department of Commerce franchise fund to retain a percentage of earnings from services provided for capital investments.

Section 207 provides funding for 4 grants and a cooperative agreement.

Section 208 clarifies allowable applications of a grant program.

Section 209 further clarifies allowable applications of a grant program.

Section 210 promotes foreign tourism to the United States.

Section 211 salvages an inter-island shipping capability.

TITLE III—THE JUDICIARY

The funds provided in title III of the accompanying bill are for the operation and maintenance of the U.S. courts and include the salaries of judges, magistrates, supporting personnel, and other expenses of the Federal judiciary.

The Committee recommends a total appropriation of \$4,951,051,000 for the judiciary. The recommendation is \$290,559,000 below the budget request. The Committee is aware that a total of \$331,462,000 in fees, reimbursables, and carryover is available in various accounts across this title to supplement direct appropriations.

Steady growth in costs associated with Defender Services, court security, GSA rental payments, and pay and benefits at a time of declining resources continues to put serious pressure on the judiciary budget. The Committee urges the judiciary to make every effort to contain "mandatory" costs.

SUPREME COURT OF THE UNITED STATES

SALARIES AND EXPENSES

Appropriations, 2002	\$39,988,000
Budget estimate, 2003	46,324,000
Committee recommendation	44,399,000

The Committee recommends an appropriation of \$44,399,000 for the Justices, their supporting personnel, and the costs of operating the Supreme Court, excluding the care of the building and grounds. The recommendation is \$1,925,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment and certain mandatory increases for judicial officers.

Adjustments to Base.—The Supreme Court included as adjustments to base an elevated pay increase, as compared to the 2.6 percent pay increase proposed in the budget for all other Federal employees, as well as police pay parity and overtime. The Committee does not agree with the Court's practice of displaying significant program increases as adjustments to base. Accordingly, in developing future budget requests, the Committee directs the Court to include any non-mandatory increases, including cost of living increases above that proposed in the budget for Federal employees, as program increases.

CARE OF THE BUILDING AND GROUNDS

Appropriations, 2002	\$67,530,000
----------------------------	--------------

Budget estimate, 2003	53,626,000
Committee recommendation	53,304,000

The Committee recommends an appropriation of \$53,304,000 for personnel and other services relating to the Supreme Court building and grounds, which is supervised by the Architect of the Capitol. The recommendation is \$322,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

Adjustments to Base.—The Court included a number of non-mandatory increases as adjustments to base, including: an elevated pay increase, as compared to the 2.6 percent pay increase proposed in the budget for all other Federal employees; increases in the cost of training; and exterior painting and caulking. As previously stated, the Committee does not agree with the Court's practice of displaying significant program increases as adjustments to base and directs the Court to include any non-mandatory increases as program increases in all future budget requests.

Security.—The Committee believes insufficient attention is being paid to the security of the Supreme Court. The Architect of the Capitol's Office [AOC] is being overwhelmed by the construction of the Capitol Visitors Center, a mammoth undertaking. The AOC does not have the resources to manage well both the Visitors Center and the Court's renovation. The Committee believes that the Justices would be better served if management of the Court's upgrade were turned over to the Administrative Office of the U.S. Courts [AO]. The AOC is directed to transfer all project management responsibilities and functions associated with the Court's rehabilitation to the AO not later than March 15, 2003. The Committee expects the AO to continue to utilize AOC expertise as necessary and appropriate in a cooperative, mutually beneficial manner. The Committee directs the AO to deliver to the Committees on Appropriations a meaningful schedule and cost estimate for the renovation project based upon updated design plans not later than June 6, 2003.

U.S. COURT OF APPEALS FOR THE FEDERAL CIRCUIT

SALARIES AND EXPENSES

Appropriations, 2002	\$19,287,000
Budget estimate, 2003	21,893,000
Committee recommendation	20,136,000

The Committee recommends an appropriation of \$20,136,000. The recommendation is \$1,757,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment and certain mandatory increases for judicial officers.

U.S. COURT OF INTERNATIONAL TRADE

SALARIES AND EXPENSES

Appropriations, 2002	\$13,064,000
Budget estimate, 2003	13,777,000
Committee recommendation	13,529,000

The Committee recommends an appropriation of \$13,529,000. The recommendation is \$248,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment and certain mandatory increases for judicial officers.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

SALARIES AND EXPENSES

Appropriations, 2002	\$3,599,259,000
Budget estimate, 2003	4,014,107,000
Committee recommendation	

The Committee does not recommend any funding for this account. Instead, the rec-

ommendation establishes a more sophisticated budget structure for Federal court operations, described below, to better identify and highlight court priorities.

COURT OF APPEALS, DISTRICT, MAGISTRATE, AND BANKRUPTCY COURT JUDGES AND STAFF SALARIES AND EXPENSES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$718,736,000

The Committee recommends an appropriation of \$718,736,000.

This new account funds the salaries of judges and judges' immediate staff.

COURT SUPPORT SALARIES AND EXPENSES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$1,051,661,000

The Committee recommends an appropriation of \$1,051,661,000.

This new account funds the salaries of court staff, including circuit executives, clerks' office personnel, attorneys, court reporters and interpreters, librarians, Administrative Office of the United States Courts personnel, and other specialized staff, as well as other expenses associated with core court operations. This account also funds administrative costs associated with implementation of the National Childhood Vaccine Injury Act.

Pay.—A little noticed provision in the Homeland Security bill puts the pay of the Director of the Administrative Office of the U.S. Courts and Circuit Executives on par with that of the Vice President and the Chief Justice of the Supreme Court. This legislation was enacted while judges were pleading for a modest cost of living adjustment [COLA]. At \$192,600 per year, these functionaries will make more than Supreme Court Justices (\$184,400), Circuit judges (\$159,100), and District judges (\$150,000). The cost implications of this unexpected pay increase are not yet known, and the Committee is concerned that it may have been placed in the position of having to choose between providing judges COLAs and senior staff pay raises.

COURT SERVICES SALARIES AND EXPENSES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$1,394,039,000

The Committee recommends an appropriation of \$1,394,039,000.

This new account funds court services, including supplies, equipment, and the rental payment to the General Services Administration.

PROBATION AND PRETRIAL SERVICES SALARIES AND EXPENSES

Appropriations, 2002	
Budget estimate, 2003	
Committee recommendation	\$717,214,000

The Committee recommends an appropriation of \$717,214,000.

This new account funds probation and pretrial services, including mental health and drug dependency programs.

DEFENDER SERVICES

Appropriations, 2002	\$500,671,000
Budget estimate, 2003	588,741,000
Committee recommendation	531,792,000

The Committee recommends an appropriation of \$531,792,000. The recommendation is \$56,949,000 below the budget request.

The Committee recommendation includes a 4.1 percent pay adjustment and other enhancements, including increases in the number of representations by the Federal Defender Organization and Criminal Justice Act [CJA] Panel Attorneys. The Committee continues to support the \$90 hourly rate for CJA panel attorneys.

This account funds the operations of the Federal public defender and community defender organizations and the compensation, reimbursement, and expenses of attorneys appointed to represent persons under the CJA, as amended.

Criminal Justice Act Panel Attorney Rates.—In fiscal year 2002, the Committee provided a significant increase in CJA panel attorney hourly rates from \$75 to \$90 in-court and from \$55 to \$90 out-of-court. This large increase was funded and approved by Congress because the hourly rates authorized in 1986 had not kept pace with inflation and many Federal judges were reporting difficulty in finding qualified counsel willing to accept CJA appointments at rates that were one-third to one-half the rates charged in private practice.

This year, the request included an additional increase in the CJA hourly rate to \$113, a 25 percent increase over the recently approved increased rate of \$90 for fiscal year 2002. The Committee believes this request is premature since the current hourly rate of \$90 was only implemented in May, 2002, and it is too soon to determine whether the new \$90 rate will address the problem of obtaining adequate counsel.

The Committee does not agree with the judiciary practice of displaying significant increases in CJA panel attorney hourly rates as an adjustment to base. Accordingly, in developing future budget requests, the Committee directs the judiciary to include any increase in CJA panel attorney hourly rates, above the cost of living increase proposed in the budget for Federal employees, as a program increase.

FEES OF JURORS AND COMMISSIONERS

Appropriations, 2002	\$48,131,000
Budget estimate, 2003	57,826,000
Committee recommendation	54,636,000

The Committee recommends an appropriation of \$54,636,000. The recommendation reflects the judiciary's reestimate of fiscal year 2003 requirements.

This account provides for the fees and allowances of grand and petit jurors and for the compensation of land commissioners and jury commissioners.

COURT SECURITY

Appropriations, 2002	\$220,677,000
Budget estimate, 2003	298,235,000
Committee recommendation	276,342,000

The Committee recommends an appropriation of \$276,342,000. The recommendation is \$21,893,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment and various requested program increases. The decrease from the request is largely due to a redistribution of security responsibilities discussed below. The amount provided includes the funds necessary for personnel from Judicial Security Division/Judicial Security Systems to conduct a courthouse security survey.

Security accountability.—The Committee believes that the current model for courthouse security has failed. The awkward arrangement of providing court security funds to the Judiciary but insisting that those funds be transferred to, and managed by, the U.S. Marshals Service [USMS] has done little to improve performance or accountability, but

has promoted a poisonous atmosphere of mutual hostility and distrust between the Administrative Office of U.S. Courts [AO], the USMS, and the Federal Protective Service [FPS]. The Committee believes that a few simple actions can clarify lines of command and improve resource utilization. First, the Committee recommendation makes the AO solely responsible for directing activities funded under this account. In effect, control of Court Security Officers [CSOs], their equipment, and their space will revert to the AO. Beyond coordination at the operational (courthouse) level, the USMS shall have no input into the number, training, deployment, or equipping of CSOs. Conversely, the 106 reimbursable Deputy U.S. Marshals [DUSMs] designated as security managers shall be funded by the Marshals and redistributed as follows: (1) not less than two and not more than five roving security teams, including physical security specialists, shall regularly survey courthouses and make recommendations regarding security, (2) such number of DUSMs as are necessary shall be distributed to the Southwest border to address the acute manpower shortage being experienced by those courts, and (3) remaining DUSMs will be distributed on a priority basis to the most undermanned courthouses. Finally, the AO, USMS, and FPS shall report to the Committee on Appropriations on the strengths and weaknesses of the proposal to place FPS officers under the operational control of Marshals under certain circumstances. The report shall be delivered not later than March 1, 2003.

Growth in the Court Security Program.—The Committee notes the substantial growth in funding experienced in the Court Security Program. In the past 5 years, the program has nearly doubled—increasing from \$167,000,000 in fiscal year 1998 to a total appropriation of almost \$300,000,000 in fiscal year 2002. In light of this growth, the Committee wants to ensure that these resources are being efficiently managed and spent for the purposes for which they have been appropriated. Therefore, the Committee requires the submission of a court security program spending plan, in accordance with Section 605 of this Act, prior to the obligation of no more than 25 percent of the funds appropriated herein.

Court Security Officers Revised Medical Standards.—In January 2001, the USMS began implementing new CSO medical examination procedures and revised medical standards based on the results of a requirements study of CSO duties conducted by the Public Health Service's Office of Federal Law Enforcement Medical Programs. To ensure that CSOs are as physically fit as necessary to perform their security functions and respond in emergency situations, the Committee fully supports the implementation of these new medical procedures and standards.

ADMINISTRATIVE OFFICE OF THE U.S. COURTS SALARIES AND EXPENSES

Appropriations, 2002	\$64,543,000
Budget estimate, 2003	66,912,000
Committee recommendation	

The Committee does not recommend any funding for this account. As part of the restructuring of the budget of the Federal judiciary, described above, this account has been folded into the new "Court Support" account.

FEDERAL JUDICIAL CENTER SALARIES AND EXPENSES

Appropriations, 2002	\$19,735,000
Budget estimate, 2003	21,885,000
Committee recommendation	20,156,000

The Committee recommends an appropriation of \$20,156,000. The recommendation is

\$1,729,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment.

The Federal Judicial Center improves the management of Federal judicial dockets and court administration through education for judges and staff and research, evaluation, and planning assistance for the courts and the judicial conference.

JUDICIAL RETIREMENT FUNDS

PAYMENT TO JUDICIARY TRUST FUNDS	
Appropriations, 2002	\$37,000,000
Budget estimate, 2003	35,300,000
Committee recommendation	35,300,000

The Committee recommends an appropriation of \$35,300,000 for payments to the Judicial Officers' Retirement Fund and the Claims Court Judges Retirement Fund. The recommendation is identical to the budget request.

These funds cover the estimated annuity payments to be made to retired bankruptcy judges and magistrate judges, claims court judges, and spouses and dependent children of deceased judicial officers.

U.S. SENTENCING COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$11,575,000
Budget estimate, 2003	13,200,000
Committee recommendation	11,835,000

The Committee recommends an appropriation of \$11,835,000. The recommendation is \$1,365,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment.

The purpose of the Commission is to establish, review, and revise sentencing guidelines, policies, and practices for the Federal criminal justice system. The Commission is also required to monitor the operation of the guidelines and to identify and report necessary changes to the Congress.

GENERAL PROVISIONS—THE JUDICIARY

The Committee recommends the following general provisions for the judiciary, all of which were included in previous appropriations acts.

Section 301 allows the Judiciary to expend funds for employment of experts and consultant services.

Section 302 allows the Judiciary, subject to the Committee's reprogramming procedures, to transfer up to 5 percent between appropriations, but limits to 10 percent the amount that can be transferred into any one appropriation.

Section 303 limits official reception and representation expenses incurred by the Judicial Conference of the United States to no more than \$45,000.

Section 304 provides a pay raise for Justices and judges.

TITLE IV—DEPARTMENT OF STATE AND RELATED AGENCY

DEPARTMENT OF STATE

The Committee recommends an appropriation of \$7,210,936,000. The recommendation is \$420,939,000 below the budget request. Security, technology, and infrastructure accounts have received the maximum funding deemed prudent.

ADMINISTRATION OF FOREIGN AFFAIRS

DIPLOMATIC AND CONSULAR PROGRAMS

Appropriations, 2002	\$3,630,012,000
Budget estimate, 2003	3,937,179,000
Committee recommendation	3,621,182,000

The Committee recommends an appropriation of \$3,621,182,000. The recommendation is \$315,997,000 below the budget request. The Committee recommendation includes a 4.1

percent pay adjustment for Federal employees.

This appropriation account provides for the formulation and execution of U.S. foreign policy, including the conduct of diplomatic and consular relations with foreign countries, diplomatic relations with international organizations, and related activities. This account primarily funds the overseas programs and operations of the Department of State.

Within the amount provided, the Committee recommendation includes \$175,000 to support the United States' membership in the Arctic Council and \$40,000 for the Bering Straits Commission. The former includes funds for representation expenses and travel for U.S. delegates.

The Committee recommendations, by bureau or operation, are displayed in the following table:

DIPLOMATIC & CONSULAR PROGRAMS

[Dollars in thousands]

	Positions	Committee recommendation
Overseas Bureaus:		
African Affairs	1,241	\$214,372
Near Eastern Affairs	950	141,398
South Asian Affairs	745	62,952
East Asian & Pacific Affairs	1,517	226,301
European Affairs	2,713	496,656
Western Hemispheric Affairs	2,197	235,936
International Organization Affairs	355	46,805
International Conferences		4,813
FSN Separation Liability Trust Fund		7,677
Subtotal	1,436,910	
Functional Bureaus:

Center for Antiterrorism Training		52,000
Frontline Security Readiness	22,197	
Federal Employee Pay Adjustment		1,588
Subtotal	579,086	
Total	3,621,182	

Some of the Committee recommendations displayed in the table are described in more detail in the following paragraphs.

New post openings.—The Committee is aware that regional bureaus have discovered a clever way to influence the process by which Congress must consider and approve any request by the Department of State to

open a new post. The Committee is aware of an instance in which a post, with the support of its parent bureau, arranged for temporary and long term office space and housing, hired local nationals onto the staff, and began conducting relations with the local and national government before the request was even transmitted to Congress. By establishing this foothold presence, the embassy and the bureau make it all but impossible for State and the Committee to deny the request, even if it makes good policy sense to do so. While posts should have input into decisions about expanding the U.S. presence, they should not drive the process. Decisions about post openings must be based on both overall foreign policy objectives and resource limitations of the Department. All future requests to establish new U.S. posts must hereafter be accompanied by a full accounting of an embassy's expenditures in the region in question, including costs associated with local hires, operational expenses, Temporary Duty Assignment [TDY] personnel, and travel. Additionally, each regional bureau must, on an annual basis, submit to the Committee a comprehensive accounting of the cost of any Department activities that take place outside of a geographic radius of 200 miles of an existing post. These reports should be compiled and delivered to the Committee at the time of the Department's yearly budget submission.

Diplomatic Security.—Explosive growth in personnel at the Bureau of Diplomatic Security [DS] has created an imbalance between seasoned and unseasoned agents that can only be solved with time. The total number of DS agents now stands at 1,150, with just under half of these agents having been hired in fiscal years 2001 and 2002. The best training available does not compare to experience. The Committee therefore directs that DS utilize at least one-quarter of the funding provided to it under Frontline Security Readiness for the training of new agents.

Additionally, the Committee remains concerned about the Department's decisions relating to the placement of DS agents. This is a time of heightened threat to our overseas posts, as demonstrated by recent attacks against U.S. diplomatic and military installations around the world. Given this security environment, the Committee is alarmed by DS' continued stubbornness on the issue of placement of DS agents overseas. There are currently 530 DS agents stationed in the United States, not including agents in training. There are 490 DS agents posted abroad. DS is responsible for the protection of only 100 domestic locations, whereas it is responsible for 260 locations overseas. It is therefore illogical to station 52 percent of trained DS agents in the United States versus overseas. The Committee directs that, by January 1, 2004, no fewer than 844 out of a projected 1,284 DS agents be stationed overseas at the Department's most critical posts. Of the funds provided under Frontline Security Readiness, \$16,697,000 is for the hiring of 100 new DS agents and \$5,500,000 is for training.

Diplomatic Readiness Initiative.—The Committee supports the Department's Diplomatic Readiness Initiative [DRI], under which the Department plans to hire 399 new foreign service officers [FSOs] in fiscal year 2003. This will bring the total number of FSOs hired to 799 out of a projected 1,158 total new positions. The initiative will allow the Department to meet its full diplomatic human resources requirements and to reform its recruitment and hiring processes. The Department is directed to utilize funding available under Diplomatic and Consular Programs for DRI, with the expectation that the balance shall be provided in a forthcoming supplemental.

Worldwide security upgrades.—The Committee recommendation includes \$579,086,000

for worldwide security upgrades, of which \$504,889,000 is for ongoing security activities and \$52,000,000 is for the Center for Anti-Terrorism Security Training. Full funding is provided for procedural and technical security enhancements as well as for training, operational support, and infrastructure. Of the funding provided for guards-worldwide protection, \$5,000,000 is for uniformed protection officers to provide additional perimeter patrol, and continuous delivery vehicle inspections for an additional 19 high-risk posts. None of the funds provided for security may be obligated until a complete and thorough accounting of prior year security funds has been submitted to the Committee.

Security enhancements.—At this time of heightened threat to American posts abroad, the benefits of the security enhancement funds the Committee has provided to the Department since the Dar and Nairobi bombings in 1998 are being realized. The most recent indicator of improved physical security at U.S. posts overseas came on June 14, 2002, when a suicide bomber detonated a 500-pound fertilizer bomb outside the U.S. Consulate General in Karachi. The physical damage to the building was minimized due to recent security upgrades to the embassy compound. The Consulate's perimeter wall had recently been reinforced, and barriers installed between the wall and the street prevented the vehicle from reaching the building. Shatter resistant window film also significantly mitigated damage from the blast. An earlier reconfiguration of interior office space, undertaken to provide additional blast separation, also proved helpful. Continual security upgrades to existing properties are as important as the Department's Capital Security Construction program. Accordingly, the Committee recommendation includes \$26,086,000 above the request, a 19 percent increase over the fiscal year 2002 funding level, for worldwide security upgrades.

Host country relations.—The Committee recommendation includes \$2,000,000 out of available funds to continue the Ambassador's Fund for Cultural Preservation. U.S. Ambassadors serving in less developed countries may submit competitive proposals for awards for one-time or recurring projects. Awards will be based on the importance of the site, the country's need, and the potential of the award to make a meaningful contribution to the preservation of the site, object, or form of expression. The Department is directed to submit an annual report to the Committees on Appropriations on winning projects.

Public diplomacy.—Within the funds made available for Diplomatic and Consular Programs, \$200,000,000 is recommended for public diplomacy activities. In fiscal year 2002, \$310,359,000 was provided for public diplomacy initiatives, \$30,100,000 above the requested level. The Committee has still not received the Department's plan for how its public diplomacy programs will support the war on terror. The Committee acknowledges the critical role that public diplomacy plays both in addressing the root causes of terrorism and in U.S. foreign relations generally. However, the Committee cannot make informed decisions about funding levels for public diplomacy without this plan. The Committee would consider a request for additional public diplomacy funding in a fiscal year 2003 supplemental, contingent upon the submission and approval of the Public Diplomacy Plan.

International Center for Muslim-Western Dialogue.—The Committee recommendation includes \$5,000,000 out of available funds for the restoration of the original U.S. consular facility in Istanbul, Turkey. The Committee

directs that the facility be used as an International Center for Muslim-Western Dialogue, henceforward referred to as “the Center”, the mission of which is to promote Democracy. The Committee directs the Secretary to collaborate with existing non-profit organizations that focus on Western-Muslim relations such as the Asia Foundation, the National Endowment for Democracy [NED], and other U.S.-based centers for Islamic studies in developing a plan for the creation and administration of the Center. The Committee encourages the non-profit organizations involved in the planning of the Center to play a continuing role both in the administration of the Center and in the execution of its programs. The Department is directed to submit this plan to the Committees on Appropriations no later than May 15, 2003.

Bureau of Consular Affairs.—The Bureau of Consular Affairs is tasked with providing support to U.S. citizens abroad, facilitating travel to and from and immigration to the United States, and serving as the first firewall of our national border security framework. Because of these responsibilities, the Bureau of Consular Affairs has more daily interaction with the public, both United States and foreign, than any other branch of the State Department. The Committee is aware that the overwhelming majority of Consular Affairs personnel respond to inquiries, requests, and crises in a professional and courteous manner. However, the Committee also is aware of number of complaints by Americans and foreign nationals about discourteous treatment at certain U.S. posts overseas. The Committee recommendation includes \$500,000, to be transferred to the Office of the Inspector General of the Department of State, with which it shall undertake a thorough review of the quality of service Consular Affairs provides to both the U.S. and non-U.S. public it is intended to serve. This review should consider the nature and quantity of the complaints received, to the extent that such information is available. It should also include an analysis of those policies and procedures currently in place within the Bureau of Consular Affairs that may cause the Bureau’s service to be less than optimal, and recommendations for how consular services can be improved. The Inspector General’s report should be submitted to the Committees on Appropriations no later than September 31, 2003.

The Committee is committed to building a first-rate consular service. However, no agency or program can achieve excellence unless its deficiencies are identified through regular, independent assessments. It is hoped, therefore, that Consular Affairs will view this Inspector General report as an opportunity to identify and address its weaknesses in the area of customer service, and not as an attempt to derogate the work performed by dedicated consular officers worldwide.

Consular workspace improvement initiative.—The Department’s consular mission is critical to our national security. Consular workspace must be adequately sized and outfitted in order to ensure that the processing of visas and visa applicants takes place in an organized and efficient manner. To ensure this, and to improve the overall working environment for Consular Affairs Officers, the Committee directs the Office of Overseas Buildings Operations [OBO] to undertake a 3-year Consular Workspace Improvement Initiative. The Committee is aware that, traditionally, OBO considers posts’ facilities requirements in a holistic manner, and does not single out specific bureaus for workspace improvements. However, the Committee is also aware of the direct link between the quality of consular workspace and the effi-

ciency and accuracy of consular work. There is a pressing need for additional consular windows and interview space, enlarged reception and waiting areas, office space, and document storage space. The Initiative should identify posts for consular workspace rehabilitation where errors in visa issuance present the greatest threat to our national security, as determined by OBO in consultation with the Bureau of Consular Affairs. The Committee expects construction to begin on priority projects no later than 60 days after the enactment of this Act. The Committee directs that \$10,000,000 within the funds made available under Diplomatic and Consular Programs be used for this initiative.

Language training.—Several reports have identified a serious shortage within the Federal Government of personnel who possess the language skills required for their positions. This challenge appears particularly acute at the Department of State where language skills are, in so many instances, directly linked to the execution of the Core Missions. Reliable aggregate data on the language capabilities of Foreign Service Officers [FSOs] is, however, not generally available or, when available, is seriously flawed. The Department has indicated that the primary factor contributing to its inability to meet its language staffing and proficiency goals is an overall staffing shortfall of more than 1,100 people, as identified in the Department’s Diplomatic Hiring Report. This report precipitated the Diplomatic Readiness Initiative, a program under which 1,158 new Foreign Service Officers will be hired over a 3-year period. However, the Diplomatic Readiness Initiative does little to address the specific problem of language proficiency at the Department. Funds available for salaries should be leveraged to provide pay incentives to FSOs who gain expertise in hard-to-learn languages, to provide an attractive career path for linguists, to enhance the retention of FSOs with desired language skills, and to provide ample training opportunities to FSOs willing to learn a difficult language mid-career. Funds provided for workforce retention should also be utilized to recruit native speakers of difficult and hard to fill languages, drawing upon the vast human resources afforded by a demographically diverse United States. Language proficiency must be a criterion in the selection of FSOs. If our diplomats truly are our “first line of defense” against foreign threats, then their ability to converse fluently in the languages of the countries to which they are posted is critical to national security. The Committee therefore directs that not less than 20 percent of the FSOs hired during fiscal year 2003 possess language skills of at least level 3 (General Professional) or greater on the foreign language proficiency scale. Further, the Committee directs that not less than 2 percent of the foreign service officers hired during fiscal year 2003 possess a proficiency level of 2 (Limited Working) or greater in one or more of the following difficult languages: Mandarin Chinese, Arabic, Japanese, Korean, and Cantonese Chinese. Finally, the Committee directs the Department to develop a proposal, to be submitted to the Committees on Appropriations by September 31, 2003 for approval, for a pay incentive package exclusively for current and future Foreign Service Officers who have achieved level 4 (Advanced Professional) proficiency or greater in at least one of the aforementioned difficult languages.

Continuing language education.—Language skills ensure that dependents of Department of State personnel are not overwhelmed by isolation and alienation, resulting in lowered post morale. Within available funds, the Committee recommendation directs that

\$10,000,000 shall be available only for continuing language education programs for both employees and dependents at posts worldwide. Language classes should also be open to non-State Department (Federal) employees on a space-available, reimbursable basis.

Office of Foreign Missions.—The Committee directs that the Office of Foreign Missions [OFM] be moved out of Bureau of Diplomatic Security [DS] and placed under the Deputy Secretary of State for Management and Resources [M]. The Committee is aware that OFM has linkage to law enforcement issues, however, the Office is more appropriately situated under M. OFM and DS should continue to coordinate closely after the transfer.

International conservation of sea turtles.—The Committee remains concerned with the increasing threat to sea turtles, particularly those listed under the Convention on International Trade on Endangered Species of Wild Fauna and Flora [CITES], from incidental capture by foreign fishing fleets, particularly in the longline fishery. The Department has ignored the Committee’s direction for the past 2 years. Specifically, the Department ignored direction stating that the Secretary should, on an expedited basis, negotiate strong, enforceable management, reporting, and data collection measures (including economic measures) focused on reducing incidental capture of sea turtles in commercial fisheries under regional management agreements for living marine resources. These agreements include the Inter-American Sea Turtle Conservation Treaty, the Inter-American Tropical Tuna Convention, the International Convention for the Conservation of Atlantic Tunas, and the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (the Multilateral High Level Conference). The Committee is concerned that no international agreements specifically addressing turtle by-catch from longline fishing have been negotiated, and the Department has negotiated only voluntary initiatives rather than binding agreements to this end.

Therefore, the Committee directs the Secretary, in cooperation with the Secretary of Commerce, to use all appropriate means available to broaden the participation of other nations in the Convention on the Conservation and Management of Highly Migratory Species in the Western and Central Pacific Ocean. Of the funding provided for the Bureau of Oceans and International Environmental and Scientific Affairs, \$4,000,000 shall be available only for negotiating, in consultation with the Department of Commerce, a binding agreement providing for annual reductions in sea turtle mortality in the longline fisheries of the Western and Central Pacific, that shall, by 2008, result in at least a 30 percent reduction in takes, and thereafter result in such fisheries meeting sea turtle take levels comparable to those achieved by the U.S. longline fleet.

Rule of law.—The Committee recognizes that there is a need for a continuing global dialogue about the rule of law and its importance for the stability and viability of all nations. Within the amounts provided under Diplomatic and Consular Programs, \$1,800,000 is for the Rule of Law Forum for foreign government and non-government officials to be hosted by the Dedman School of Law.

Globalization.—Globalization is a process through which different cultures have an increasing impact on each other as a result of trade, immigration, and the exchange of ideas and information. Advances in communications and economic interdependence have accelerated the rate of globalization dramatically in recent decades. Because of

globalization's demonstrated impact on the cultures of the world, and because of the impact globalization is certain to have in the future, there is a great need to study this phenomenon. Within available funding, \$2,500,000 is therefore recommended for the continuation of the Globalization Research Network [GRN]. This is a research consortium comprised of George Washington University, the University of South Florida, the University of California at Los Angeles, and the University of Hawaii [UH]. One of the GRN's core missions is to enhance the public's understanding of globalization. The consortium conducts interdisciplinary, international studies of pressing problems faced by humanity. The consortium also investigates causes, arguments, and alternatives to present trends relating to globalization.

International trade.—Every year, the State Department attempts to pursue international trade activities that fall under the jurisdiction of the Commerce Department's International Trade Administration, and in particular under the jurisdiction of the United States and Foreign Commercial Service. The State Department's efforts to expand its jurisdiction in this area counters the intent of the Committee, which notes the expansive and intractable foreign policy issues already confronting the Department. No funding is recommended for this initiative.

Secure Card Technology.—The Committee is aware that the U.S. Embassy in Mexico City began issuing secure laser visa border crossing cards to Mexican visitors in May, 2002. The Committee directs the Department, in consultation with the Immigration and Naturalization service, to report no later than May 5, 2003 on the success of this secure visa issuance program in Mexico City. The report should provide recommendations to the Committee regarding the expansion of this visa issuance process to all visa types and the potential for application of the secure card technology at U.S. foreign missions.

Fingerprint services.—The Committee directs U.S. embassies and consulates with fingerprinting capabilities to fingerprint aliens seeking first-time flight training in aircraft weighing 12,500 pounds or more and transmit those fingerprints to the Department of Justice and other relevant agencies for the purposes of checking fingerprints against appropriate terrorist watch-lists.

International Child Abductions.—The Committee remains concerned about the adequacy of the Department's efforts to counter the serious problem of international child abductions. Within 90 days of enactment of this Act, the Department is directed to submit a report to the Committees on Appropriations which includes the following information: the country and location and number of all known U.S. citizens under the age of 18 who have been abducted by a parent or relative as the result of a custody dispute and who are being held abroad in contravention of U.S. laws or judicial orders; a summary of actions taken by the Department of State to secure the repatriation of abducted American children; and a list of diplomatic measures, including treaties and agreements, that can be used to facilitate the repatriation of abducted American children.

The Committee directs the Department to complete and release the State Department's report on compliance with the Hague Convention on the International Aspects of Child Abduction ("the Hague"). The Hague Convention, which the United States and many of our Allies have signed, is in place to facilitate the return of internationally abducted children to their countries of "habitual residence" for custody determination. The Committee recognizes the importance of

compliance with the Hague and requests this report be sent to the Committee on Appropriations no later than February 1, 2003.

CAPITAL INVESTMENT FUND

Appropriations, 2002	\$203,000,000
Budget estimate, 2003	177,000,000
Committee recommendation	210,000,000

The Committee recommends \$210,000,000. The recommendation is \$33,000,000 above the budget request. The account provides resources for investments in new information and communications systems. The Committee recommendations, by initiative, are displayed in the following table:

<i>Capital investment fund</i>	[In thousands of dollars]
Technology Infrastructure:	
Modernization of world-wide IT infrastructure	164,790
OpenNet Plus	[36,500]
Classified Connectivity Program	[94,235]
Secure Voice Program	[3,960]
Post High Frequency Communications	[5,057]
Public Key Infrastructure	[7,345]
Other IT Infrastructure	[17,693]
Integrated Messaging	9,802
Centrally Managed Infrastructure	35,408
 Total, Capital Investment Fund	 210,000

The following table displays further information technology initiatives funded through Expedited Passport Fees within the Information Resource Management (IRM) Central Fund:

<i>Other Information Technology Initiatives</i>	[In thousands of dollars]
Applications and Software Development:	
Ready Access to International Affairs and Information	7,835
Leveraging IT	48,278
Integrated Logistics Management System [ILMS]	[18,878]
Regional Financial Management System [RFMFS]	[6,597]
Integrated Personnel Management System [IPMS]	[11,166]
Other Applications and Software Development	[11,637]
 Subtotal, Applications and Software Development	 56,113

Foreign Affairs Systems Integration [FASI]	22,102
 Project Management and Training	 7,785

Total, Other Information Technology Initiatives	86,000
 Total, IRM Central Fund	 296,000

Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

Information Technology.—The Committee commends the Department for its commitment to overhauling its Information Technology [IT] infrastructure. Having received ample funding in fiscal year 2002 for its IT priorities, the Department is meeting the Committee's requirements to execute certain priority programs more quickly than originally planned. Two major initiatives, the deployment of OpenNet Plus and the overhaul of the Department's classified network, are

on-schedule and on-budget, with OpenNet Plus scheduled for completion in April, 2003, and the Classified Connectivity Program scheduled for completion in early fiscal year 2004. Providing the Department with state-of-the-art communications, data, and knowledge management systems is, once again, one of the Committee's top priorities for the Department. Full funding is therefore provided for the IRM Central Fund, per the above chart. The Committee expects the Department's next major IT initiative, replacement of the cable system with a modern, integrated messaging system, to proceed as expeditiously as have its other global-scale projects.

Enterprise architecture.—The Committee has invested hundreds of millions of dollars to overhaul the State Department's IT infrastructure, which had been allowed to grow outmoded and obsolete, with a state-of-the-art IT infrastructure. The Committee remains concerned, however, that the next time the Department faces slowed budget growth or even budget cutbacks, it will choose to hire more analysts and open more posts at the expense of the necessary annual investments in infrastructure. The Committee therefore directs that the Chief Information Officer of the Department develop an annex to the existing IT Strategic Plan which outlines in detail the Department's 5-year strategy for maintaining and upgrading its existing IT infrastructure. This strategy will help ensure that the significant investments the Committee has made in the last 2 years are not lost, and that the Department's current IT infrastructure is leveraged both to capitalize on these prior investments and to meet the needs of the Department. The Department is directed to submit this annex to the Committees on Appropriations no later than July 1, 2003.

IT human capital.—The success of OpenNet Plus and the Classified Connectivity Program is due to the Department's establishment of a permanent, professional IT planning staff within the Bureau of Information Resource Management. This staff has been tasked with developing an enterprise architecture to address all of the Department's current and future technology needs. It is crucial that the Department's IT personnel be drawn from among the best in their fields. The Committee therefore directs the Bureau of Human resources, in consultation with the Chief Information Officer of the Department, to report to the Committees on Appropriations on how the Department plans to meet its short and long-term human capital needs in the area of information technology. The report should address such issues as pay incentives, specialized recruitment strategies, and preventing attrition to the private sector.

Centralized management.—The Committee supports the trend at the Department towards the central management of information. The Committee is aware that, at a time of increased threat to our overseas posts, the ability to store and manage information, particularly classified information, domestically can greatly enhance the security of that information. The cost of centrally managing information is higher due to the cost of acquiring bandwidth. However, the benefits of a more robust security construct far outweigh the additional cost. One technology that appears particularly promising is the high-assurance virtual wide area network [WAN]. This technology would allow the Department to minimize the information stored at post and permit computer terminals to be "sanitized" of sensitive information when not in use. Of the funds made available under the IRM Central Fund for Centrally Managed Infrastructure, \$10,000,000 shall be for a pilot project to develop a high-

assurance virtual WAN architecture and prototype in support of Department of State activities. The Committee expects the Bureau of Information Resource Management to collaborate closely with the Bureau of Diplomatic Security and with other relevant agencies on this pilot project. This will ensure that any technologies employed by the Department to centrally manage its information meet all of the security requirements set forth by DS and by other relevant agencies. The Committee directs the Department to present a preliminary plan for this project within 60 days of enactment of this Act.

IT Common Platform.—The events of September 11, 2001, have caused Federal agencies and departments to reexamine the way they communicate, particularly on matters relating to national security. Inadequate communication and coordination among the foreign affairs agencies, including the Department of State, increases our vulnerability to terrorism. Since September 11, agencies have taken steps to close the loopholes that existed with respect to information-sharing. However, the key to better communication and coordination among these agencies does not necessarily lie in their ability to interface, but rather in the individual department cultures that compel them to do so. Foreign affairs agencies have the capability to share unclassified and classified information, but they are not intrinsically inclined to do so. What is required to change these cultures is a dynamic, user-friendly portal through which these agencies can, on a daily basis, share information and collaborate their efforts. The Committee supports the continued development of the Foreign Affairs System Integration [FASI] project, sometimes referred to as the Collaboration Zone, which is currently in the pilot phase. The Department should henceforth provide a written, bi-monthly status report on the progress of this initiative to the Committees on Appropriations.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$29,000,000
Budget estimate, 2003	29,264,000
Committee recommendation	30,844,000

The Committee recommends an appropriation of \$30,844,000. The recommendation is \$1,580,000 above the budget request. The Committee recommendation includes the 4.1 percent pay adjustment for Federal employees. The Committee does not support the Office of Inspector General's [OIG] efforts to reinstate the requirement that all posts be inspected every 5 years. The Committee notes that, if reinstated, this policy would lead to a decrease in the quantity and quality of reporting on posts of importance to U.S. national interests.

EDUCATIONAL AND CULTURAL EXCHANGE PROGRAMS

Appropriations, 2002	\$237,000,000
Budget estimate, 2003	245,306,000
Committee recommendation	237,881,000

The Committee recommends an appropriation of \$237,881,000. The recommendation is \$7,425,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Committee recognizes that international education and exchange programs are critical components of U.S. national security and foreign policy. In light of the tragic events of September 11, 2001, this type of engagement with the world is more important than ever. International educational and exchange programs enable the United States to augment the foreign language and foreign area expertise of each successive generation of rising leaders, prepare U.S. stu-

dents to function effectively in a global environment through study abroad, and promote international understanding through professional, scholarly, and citizen exchanges. The Committee recommendations for the Educational and Cultural Exchanges Account are displayed, by program, in the following table:

<i>Educational and Cultural Exchanges</i>	
[In thousands of dollars]	
	Committee recommendation
Academic Programs:	
Fulbright Program:	
Students, Scholars, Teachers	116,495
Hubert H. Humphrey Fellowship Program	6,222
Regional Scholars Program ...	2,049
Subtotal	<u>124,766</u>
Other Academic Programs:	
Educational Advising & Student Services	3,500
English Language Programs ..	3,000
Edmund S. Muskie Fellowship Program	559
North-South Center	1,200
South Pacific Exchange	500
Subtotal	<u>8,759</u>
Other Special Academic Programs: American Overseas Research Centers	2,465
Subtotal, Academic Programs	<u>135,990</u>
Professional & Cultural Programs:	
International Visitors Program	50,186
Citizen Exchange Program	16,572
Subtotal	<u>66,758</u>
Other Professional & Cultural Programs:	
Mike Mansfield Fellowships Programs	2,200
Irish Institute	500
Atlantic Corridor USA	500
George Mitchell Fellowship Program	500
Institute for Representative Government	540
National Forensics League for High School Debates	1,000
PSC U.S.-Pakistan Educator Development Program	1,000
Subtotal	<u>6,240</u>
Subtotal, Professional & Cultural	<u>72,998</u>

Exchanges Support:	
Employee Compensation & Benefits	25,071
Program Direction & Administration	3,051
Federal Employee Pay Parity ..	771
Subtotal	<u>28,893</u>
Total, Educational and Cultural Exchanges	<u>237,881</u>

Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.

Of the funds made available for the Council of American Overseas Research Centers, \$33,000 is for a grant for research to develop a diamond fingerprinting technology that will facilitate the monitoring of the international trade in conflict diamonds.

REPRESENTATION ALLOWANCES

Appropriations, 2002	\$6,485,000
Budget estimate, 2003	9,000,000
Committee recommendation	6,485,000

The Committee recommends an appropriation of \$6,485,000. The recommendation is \$2,515,000 below the budget request.

Representation allowances provide partial reimbursement to Foreign Service officers for expenditures incurred in their official capacities abroad in establishing and maintaining relations with officials of foreign governments and appropriate members of local communities.

PROTECTION OF FOREIGN MISSIONS AND OFFICIALS

Appropriations, 2002	\$9,400,000
Budget estimate, 2003	11,000,000
Committee recommendation	9,400,000

The Committee recommends an appropriation of \$9,400,000. The recommendation is \$1,600,000 below the budget request.

This account reimburses local governments and communities for the extraordinary costs incurred in providing protection for international organizations, foreign missions and officials, and foreign dignitaries under certain circumstances.

The Committee directs that local jurisdictions that incur such costs submit a certified billing for such costs in accordance with program regulations. The Committee also recommends that in those circumstances where a local jurisdiction will realize a financial benefit from a visit from a foreign dignitary through increased tax revenues, that such circumstances should be taken into account by the Department in assessing the need for reimbursement under this program. The Committee expects the Department to treat such submissions diligently and provide reimbursement to local jurisdictions on a timely basis if claims are fully justified.

EMBASSY SECURITY, CONSTRUCTION, AND MAINTENANCE

Appropriations, 2002	\$1,273,960,000
Budget estimate, 2003	1,305,000,000
Committee recommendation	1,255,700,000

The Committee recommends an appropriation of \$1,255,700,000. The recommendation is \$49,350,000 below the budget request.

This account allows the Department to manage U.S. Government real property in over 200 countries worth an estimated \$12,500,000,000 and to maintain almost 14,000 residential, office, and functional properties, not only for the Department of State, but for all U.S. employees overseas.

The Committee recommendations by project or program are displayed in the following table:

<i>Embassy security, construction, and maintenance</i>	
[In thousands of dollars]	
	Committee recommendation
Worldwide Security Upgrades:	
Capital Projects	488,450
Astana, Kazakhstan New Office Building [NOB]	[78,400]
Athens, Greece New Office Annex Building	[37,600]
Bamako, Mali NOB	[69,900]

Main State/Domestic Renovations	20,000
Subtotal, Operations	<u>13,000</u>
Headquarters:	
Salaries and Training	6,500
Subtotal, Headquarters	<u>6,500</u>
Embassy Security, Construction, and Maintenance Total	1,255,700
Some of the Committee recommendations displayed in the table above are described in more detail in the following paragraphs.	
<i>Vulnerability.</i> —The 1998 embassy bombings in Kenya and Tanzania significantly changed the way we approach the security of our facilities abroad. The June 14, 2002, attack on a church in Islamabad, Pakistan, which U.S. citizens were widely known to attend, brought into focus a new kind of threat against our interests abroad, specifically, threats against so-called “soft targets”. The Committee directs the State Department to formulate a strategy for addressing, both in the long term and in the short term, threats to locales that are either frequented by Americans or symbolic of the United States. The Committee is particularly concerned about the safety of American schools abroad, as well as international schools attended by American children. The recommendation therefore includes \$44,000,000 for the Department to provide both temporary and long term security enhancements for locations that are affiliated with the United States by virtue of the activities and individuals they accommodate. Of this amount, \$21,000,000 is for security enhancements at schools attended by American children overseas. The Committee expects to be consulted by the	

Department prior to the release of these funds. The Committee is aware that providing funds for security enhancements for overseas schools deviates from Department policy. It is the Committee's expectation that this and all other Department policies pertaining to soft targets will be reexamined in the aforementioned strategy.

Buyout of uneconomic leases.—High lease costs deplete Department resources. The Committee supports efforts by the Department to selectively acquire properties in cities with volatile rental markets, thus generating significant out-year savings. The Committee recommendation provides \$35,000,000 for opportunity purchases.

Marine Security Guard housing.—Marine Security Guards are essential to the Department's ability to carry out its mission overseas. In fiscal year 2002, the Department completed the final phase of a multi-year effort, undertaken at the insistence of the Committee, to address the long-neglected capital needs of many Marine Security Guard [MSG] housing facilities worldwide. The Committee supports the Department's new policy of incorporating MSG housing costs into the initial cost estimates, and thus the budget requests, for overseas construction or rehabilitation projects. The Committee notes that MSG housing costs for fiscal year 2003 are embedded within the capital projects account and will therefore not constitute a separate line item in the above chart.

The Department is directed, under the terms and conditions that follow, to submit for the Committee's review and approval within 60 days after enactment of this Act only those projects or subaccounts funded under this account, whether from direct appropriations or proceeds of sales, that deviate from the above chart. Any deviation shall include project-level detail and shall be treated as a reprogramming under section 605 of this Act in the case of an addition greater than \$500,000, or as a notification in the case of a deletion, a project cost overrun exceeding 25 percent, or a project schedule delay exceeding 6 months. Notification requirements also extend to the “rebaselining” of a given project's cost estimate, schedule, or scope of work. By focusing the financial plan only on deviations, the Committee expects the Department to move projects toward contract obligation promptly after funds are appropriated. Immediate access to funds for the projects that are unchanged from the above chart allows the Department to negotiate contracts and obligate funds more efficiently over the entire fiscal year.

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

Appropriations, 2002	\$6,500,000
Budget estimate, 2003	15,000,000
Committee recommendation	6,500,000

The Committee recommends an appropriation of \$6,500,000. The recommendation is \$8,500,000 below the budget request.

This account provides resources for the Department of State to meet emergency requirements while conducting foreign affairs. The Committee recommendation provides funds for: (1) travel and subsistence expenses for relocation of Americans, U.S. Government employees, and their families from troubled areas to the United States and/or safe-haven posts; (2) allowances granted to State Department employees and their dependents evacuated to the United States for the convenience of the Government; (3) payment of rewards for information concerning terrorists and war criminals; and (4) representation expenses for senior Administration officials.

REPATRIATION LOANS PROGRAM ACCOUNT

Appropriations, 2002	\$1,219,000
----------------------------	-------------

Budget estimate, 2003	1,219,000
Committee recommendation	1,219,000

The Committee recommends an appropriation of \$1,219,000. The recommendation is identical to the budget request.

This account provides emergency loans to assist destitute Americans abroad who have no other source of funds to return to the United States.

In the past, less than 20 percent of repatriation loans have ever been repaid. The Committee strongly endorses efforts by consular services to limit assistance only to victims of unforeseen circumstances or travelers whose mental instability presents a risk to themselves or others.

PAYMENT TO THE AMERICAN INSTITUTE IN TAIWAN

Appropriations, 2002	\$17,044,000
Budget estimate, 2003	18,817,000
Committee recommendation	17,044,000

The Committee recommends an appropriation of \$17,044,000. The recommendation is \$1,773,000 below the budget request.

The Taiwan Relations Act requires that programs concerning Taiwan be carried out by the American Institute in Taiwan [AIT]. The Institute administers programs in the areas of economic and commercial services, cultural affairs, travel services, and logistics. The Department of State contracts with the AIT to carry out these activities.

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

Appropriations, 2002	\$135,629,000
Budget estimate, 2003	138,200,000
Committee recommendation	138,200,000

The Committee recommends an appropriation of \$138,200,000. The recommendation is identical to the budget request.

This appropriation is authorized by the Foreign Service Act of 1980 which provides for an appropriation to the fund in 30 equal annual installments of the amount required for the unfunded liability created by new benefits, new groups of beneficiaries, or increased salaries on which benefits are computed.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

Appropriations, 2002	\$850,000,000
Budget estimate, 2003	891,378,000
Committee recommendation	866,000,000

The Committee recommends an appropriation of \$866,000,000. The recommendation is \$25,378,000 below the budget request.

This account funds payment of the obligations of U.S. membership in international organizations as authorized by treaties or specific acts of Congress.

The Committee recommendations, by organization, are displayed in the following table:

Contributions to international organizations

[In thousands of dollars]

	Committee recommendation
United Nations and affiliated agencies:	
Food and Agriculture Organization	72,741
International Atomic Energy Agency	52,230
International Civil Aviation Organization	12,011
International Labor Organization	50,333

International Tropical Timber Organization	159
International Union/Conservation of Nature and Natural Resources	247
International Grains Council ...	429
International Union/Protection of New Varieties of Plants	161
Organization for the Prevention of Chemical Weapons	13,769

as the original U.N. building. This plan therefore describes a capital expansion, in addition to the planned renovation, and the Committee directs the Department of State to represent it as such.

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING ACTIVITIES

Appropriations, 2002	\$844,139,000
Budget estimate, 2003	725,981,000
Committee recommendation	<u>673,710,000</u>

The Committee recommends an appropriation of \$673,710,000. The recommendation is \$52,271,000 below the budget request.

The Committee is aware of the availability of \$38,515,000 in fiscal year 2002 funding under this account. This amount, when combined with the fiscal year 2003 Committee recommendation, fully funds the U.S. contribution to international peacekeeping at the adjusted assessment rate.

This account funds U.S. payments for contributions for international peacekeeping activities. The Committee recommendations by mission are displayed in the following table:

Contributions for International Peacekeeping Activities

[In thousands of dollars]

U.N. Disengagement Observer Force [UNDOF]	8,365
U.N. Interim Force in Lebanon [UNIFIL]	33,520
U.N. Iraq/Kuwait Observer Mission [UNIKOM]	4,479
U.N. Mission for the Referendum in Western Sahara [MINURSO]	11,792
U.N. Mission in Kosovo [UNMIK]	96,534
U.N. Peacekeeping Force in Cyprus [UNFICYP]	5,219
U.N. Observer Mission in Georgia [UNOMIG]	6,516
War Crimes Tribunal—YUGOSLAVIA	7,000
War Crimes Tribunal—RWANDA	6,000
U.N. Mission in Sierra Leone [UNAMSIL]	145,803
U.N. Transitional Administration in East Timor [UNTAET]	58,177
U.N. Operation in the Democratic Republic of the Congo [MONUC]	273,226
U.N. Mission in Ethiopia and Eritrea [UNMEE]	55,594

Subtotal

712,225

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

Democratic Republic of Congo.—The Committee recommendation provides the full authorized amount for the United Nations Organization Mission in the Democratic Republic of the Congo [MONUC]. Prior to the release of these funds, the Department of State must certify to the Committees on Appropriations that the following conditions have been met. First, firm benchmarks for what constitutes a successful mission must be determined, articulated, and followed. Second, the security of The Democratic Republic of the Congo's [DROC] neighbors must be factored in to all of MONUC's strategic and contingency planning, and must be heavily considered in the negotiation of a final political settlement. Third, the United Nations must construct an arrangement for the withdrawal of foreign forces from the DROC that, to the greatest degree possible, does not destabilize DROC's neighbors. Fourth, contingency plans must be developed and implemented for the safe withdrawal of peacekeepers in the event of a resumption of hostilities.

Sierra Leone.—The Committee is encouraged by the May, 2002 national elections in

Sierra Leone, which were conducted in a credible and peaceful manner. The elections underscored that the people of Sierra Leone do not wish the Revolutionary United Front, a rebel group notorious for its use of forced amputations to terrorize local populations, to have a role in the future governance of their country. As previously inaccessible areas of Sierra Leone become accessible due to the completion of disarmament, demobilization, and reintegration [DDR], it is expected that more evidence of atrocities committed during the conflict will come to light. The Committee strongly supports the work of the Special Court for Sierra Leone, the purpose of which is to prosecute those who bear the greatest responsibility for serious violations of international humanitarian law, crimes against humanity, and some Sierra Leonean criminal laws, perpetrated during the course of the conflict in Sierra Leone since 1996. The Committee notes that the Special Court will face the momentous challenge of prosecuting a disproportionately high number of crimes involving sexual violence and crimes against children. The Committee directs the Department of State to consider ways it can support, and encourage international and private organizations to undertake, new efforts to prevent, respond to, and document sexual violence in African countries, including Sierra Leone, Guinea, Liberia, Ivory Coast, and the Democratic Republic of Congo.

Three important goals remain for the U.N. Peacekeeping Mission to Sierra Leone [UNAMSIL]: the extension of state authority, the reintegration of ex-combatants, and full restoration of the government's control over diamond mining. It is imperative that the international community and the U.N. safeguard the progress made in Sierra Leone by remaining engaged until all of the objectives are met. The recommendation therefore provides the full authorized amount for UNAMSIL. The Committee supports the adjustments to the current strength, composition, and deployment of UNAMSIL troops based on recent changes and anticipated further changes in the security situation in Sierra Leone.

East Timor.—Despite progress towards a peaceful, constructive relationship between the two nations, East Timor is not yet ready to stand entirely on its own, as evidenced by recent rioting in the capital city of Dili. The fledgling nation is still in the beginning stages of establishing a criminal justice system, basic social services, and professional police and defense forces. The Committee therefore supports the continued presence of the U.N. Transitional Administration in East Timor [UNTAET] at the levels required by the U.N. Secretary General.

Peacekeeping reports.—The Committee recently received notification that the Department would discontinue the practice of transmitting U.N. Security Council reports on peacekeeping to the Committee. These reports are a crucial source of information on U.N. peacekeeping missions because they are not influenced by State Department opinions. The Department is directed to resume transmission of these reports to the Committees on Appropriations.

INTERNATIONAL COMMISSIONS

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

SALARIES AND EXPENSES

Appropriations, 2002	\$24,705,000
Budget estimate, 2003	27,404,000
Committee recommendation	25,155,000

The Committee recommends an appropriation of \$25,155,000. The recommendation is \$2,249,000 below the budget request. The Com-

mittee recommendation includes the fiscal year 2002 funding level, and a 4.1 percent pay adjustment for Federal employees.

The Committee recommendations are displayed in the following table:

International Boundary & Water Commission Salaries and Expenses

[In thousands of dollars]

Administration	5,375
Engineering	2,131
Operations and maintenance	17,199
Federal Employee Pay Adjustment	450
CONSTRUCTION	

Appropriations, 2002	\$5,450,000
Budget estimate, 2003	9,401,000
Committee recommendation	5,488,000

The Committee recommends an appropriation of \$5,488,000. The recommendation is \$3,913,000 below the budget request.

The Committee recommendations, by project, are displayed in the following table:

International Boundary & Water Commission Construction

[In thousands of dollars]

Committee recommendation	
Boundary-wide construction:	
Facilities renovation construction	656
Heavy equipment replacement	500
Land mobile radio systems replacement	594
Hydrological data collection system rehabilitation	500
Subtotal, boundary-wide construction	2,250
Rio Grande construction:	
Rio Grande American Canal extension	250
Rio Grande canalization continuation	800
Rio Grande flood control system rehabilitation	1,150
Safety of dams rehabilitation	1,000
Subtotal, Rio Grande construction	3,200
Federal Employee Pay Adjustment	
.....	38
Total	5,488

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

Appropriations, 2002	\$9,911,000
Budget estimate, 2003	10,682,000
Committee recommendation	10,023,000

The Committee recommends an appropriation of \$10,023,000. The recommendation is \$659,000 below the budget request.

This account funds the U.S. share of expenses of the International Boundary Commission [IBC], the International Joint Commission [IJC], and the Border Environment Cooperation Commission [BECC].

The Committee recommendations, by commission, are displayed in the following table:

American Sections, International Commissions

[In thousands of dollars]

Committee recommendation	
International Boundary Commission:	
Commission operations	514
Maine-Quebec project	118

Committee recommendation	
Washington-British Columbia ..	234
Montana-Alberta, British Columbia ..	143

Studies & investigations/solid waste projects	320
All other operations	1,720
Subtotal, BECC	2,040

Committee recommendation	
Total, American sections	10,023

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

INTERNATIONAL FISHERIES COMMISSIONS

Committee recommendation	
Appropriations, 2002	\$20,480,000
Budget estimate, 2003	19,780,000

The Committee recommends an appropriation of \$20,480,000. The recommendation is \$700,000 above the budget request.

This account funds the U.S. share of the expenses of international fisheries commissions; participation in the International Council for the Exploration of the Sea; participation in the North Pacific Marine Sciences Organization; travel expenses of the U.S. commissioners and their advisors; and salaries of non-Government employees of the Pacific Salmon Commission for days actually worked as commissioners and panel members and alternates.

The Committee recommendations, by commission, organization, or council, are displayed in the following table:

International Fisheries Commissions

[In thousands of dollars]

Committee recommendation	
Inter-American Tropical Tuna Commission	
.....	1,950
Great Lakes Fishery Commission	
.....	13,248
Pacific Salmon Commission	
.....	2,193

North Pacific Marine Science Organization	
.....	66
Inter-American Sea Turtle Convention Commission	
.....	150
Expenses of the U.S. Commissioners	
.....	100
Total	20,480

The Committee expects to be consulted prior to any deviation from the above plan for fiscal year 2003.

Of the amount provided for the Great Lakes Fishery Commission [GLFC], not less than \$300,000 shall be used to treat Lake Champlain with lampricide and lampricide alternative. The GLFC is directed to give priority to States that have provided matching grants when distributing lampricide funds.

OTHER

PAYMENT TO THE ASIA FOUNDATION	
Appropriations, 2002	\$9,250,000
Budget estimate, 2003	9,444,000
Committee recommendation	10,250,000

The Committee recommends an appropriation of \$10,250,000. The recommendation is \$806,000 above the budget request.

The Asia Foundation plays a complementary role in advancing U.S. foreign policy interests in Asia and the Pacific through grants, services, and exchange programs. The Committee supports the Foundation's efforts to reestablish its program and presence in Afghanistan, which was in existence from 1954 until the Soviet invasion in 1979. The Committee encourages the Foundation to use its expertise in developing programs to encourage women's political participation in Central Asia, and specifically Afghanistan.

Within the funds provided, \$1,000,000 is to support the Asia Foundation's work in Nepal aimed at strengthening the performance of district courts and building dispute resolution mechanisms in the local communities. A comprehensive research study carried out last year confirmed that there are severe weaknesses in the Nepalese court system. The additional funding will allow the Asia Foundation to expand its current training to include judges, prosecutors, and court personnel throughout Nepal. Also, the additional funding will allow the Asia Foundation to provide the technical support, training, awareness programs, and assistance in building local capacity necessary to have effective dispute resolution mechanisms at the local level.

EISENHOWER EXCHANGE FELLOWSHIP PROGRAM
EISENHOWER EXCHANGE FELLOWSHIP PROGRAM
TRUST FUND

Appropriations, 2002	\$500,000
Budget estimate, 2003	500,000
Committee recommendation	500,000

The Committee recommends an appropriation of \$500,000 for interest and earnings in the Eisenhower Exchange Fellowship Program Trust Fund, authorized by the Eisenhower Exchange Fellowship Act of 1990 (Public Law 101-454). The recommendation is identical to the budget request.

The Eisenhower Exchange Fellowship Act of 1990 authorized a permanent endowment for the Eisenhower Exchange Fellowship Program. The act established the Eisenhower Exchange Fellowship Program Trust Fund in the U.S. Treasury for these purposes. A total of \$7,500,000 has been provided to establish a permanent endowment for the program, from which interest and earnings in the fund are appropriated to Eisenhower Exchange Fellowships, Inc.

ISRAELI-ARAB SCHOLARSHIP PROGRAM

Appropriations, 2002	\$375,000
Budget estimate, 2003	375,000
Committee recommendation	375,000

The Committee recommends an appropriation of interest and earnings for the Israeli-Arab Scholarship Endowment Fund estimated to be \$375,000. The recommendation is identical to the budget request.

A permanent endowment of \$4,978,500 was established in fiscal year 1992 with funds

made available under section 556(b) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990, as amended. The income from the endowment is to be used for a program of scholarships for Israeli-Arabs to attend institutions of higher education in the United States.

EAST-WEST CENTER

Appropriations, 2002	\$14,000,000
Budget estimate, 2003	14,280,000
Committee recommendation	18,000,000

The Committee recommends an appropriation of \$18,000,000. The recommendation is \$3,720,000 above the request.

Of the funding provided, the Committee recommends \$2,500,000 for renovation of existing East-West Center facilities which are more than 40 years old. The funding provided will be used to upgrade the facilities to make them compliant with current safety standards and to improve telecommunications services.

NATIONAL ENDOWMENT FOR DEMOCRACY

Appropriations, 2002	\$33,500,000
Budget estimate, 2003	36,000,000
Committee recommendation	46,500,000

The Committee recommends an appropriation of \$46,500,000. The recommendation is \$10,500,000 above the budget request.

The National Endowment for Democracy [NED] is a private, non-profit organization created in 1983 to strengthen democratic institutions around the world. NED's mission is to support peaceful and stable transitions to more open political and economic systems characterized by effective governance and legal systems, engaged and responsible civil societies, and open markets. Although NED was first created to help the United States win the cold war, its mission of promoting democracy is still relevant today particularly in the new war against terrorism.

This Committee recommendation responds to the immediate threat of terrorism by taking steps to provide for the security of the U.S. homeland. However, the threat of terrorism also requires a long-term response which addresses the root causes of terrorism. This can be accomplished by helping to establish democracies throughout the Middle East, Africa, South and Central Asia, and other regions where terrorism has flourished over the last decade. Building democracies helps sever the link between terror and tyranny which, unfortunately, have become commonplace in these regions.

NED has already established a network of Muslim organizations and professionals in these regions that work to promote democracy from within the Islamic tradition. The Committee believes that NED's existing networks in these regions can be used to further the broader objectives of the war against terror. The recommendation therefore includes funding above the requested level for NED to expand its work with political leaders, legislators, and political parties in Muslim countries, and to capitalize on new opportunities to expand outreach and develop and promote contacts.

The Committee recommendation includes \$7,000,000 above current funding levels for programs that support the development of effective ties with modernist Muslim groups, programs that are developing pro-democracy networks, independent journalists, and women's business organizations.

The Muslim world consists of more than 1 billion people and stretches some 10,000 miles from Morocco to Indonesia. Only by establishing democracies in those countries in the Middle East, Africa, South and Central Asia, and other regions that support terrorists can we permanently stop terrorism. It is here

that terrorist recruits have been found among the disadvantaged. Muslim countries face four challenges. The first is to end repression, permit freedom of expression, and introduce genuine political parties. The second is to modernize their economies, with the goal of reducing poverty and inequality so that young people can have hope and opportunity. The third is to control corruption and establish the genuine rule of law. And the fourth is to end the political abuse of religion and reconcile Islam with modern concepts of citizenship and individual rights. The Committee therefore recommends increases for NED programs in Muslim-populated countries, as reflected in the following table:

	Committee recommendation
Africa	6,341
Asia	7,182
Middle East	8,605
Central Asia/Afghanistan	2,000
Central and Eastern Europe	2,180
Newly Independent States	5,540
Latin American/Caribbean	5,737
Multiregional	3,280
Democratic Activities	1,272
Administration	4,363
Total	46,500

The Committee expects that these funding increases will be distributed throughout NED's four core institutes in the same manner as NED's core budget.

Africa.—The Committee recognizes that funding constraints have limited the success of NED in the Democratic Republic of the Congo, Sierra Leone, Sudan, and Nigeria. Therefore, \$1,000,000 above current funding levels is provided for NED to increase its support for independent women's cultural and human rights organizations in these countries.

Asia.—Of the funding provided for Asia, the Committee recommendation includes \$1,500,000 above the request for enhanced programs in The Peoples Republic of China, including Tibet, Burma, and North Korea.

Middle East.—Of the funding provided for NED programs in the Middle East, the Committee recommendation includes an increase of \$1,000,000 above current funding levels to expand a women's rights and democracy training program for Lebanon's Shiite female educators, students, and mothers.

Afghanistan.—The Committee recommends \$2,000,000 for NED to establish a program for women's rights in Afghanistan.

None of the funds provided under this heading shall be obligated until a detailed spend plan has been submitted to and approved by the Committees on Appropriations, in keeping with section 605 of this Act.

RELATED AGENCY

BROADCASTING BOARD OF GOVERNORS	
INTERNATIONAL BROADCASTING OPERATIONS	
Appropriations, 2002	\$437,434,000
Budget estimate, 2003	467,898,000
Committee recommendation	431,456,000

The Committee recommends an appropriation of \$431,456,000. The recommendation is \$36,442,000 below the request. The recommendation includes a 4.1 percent pay adjustment for Federal employees. This account funds the operating and engineering costs of Voice of America [VOA], Radio Free Europe/Radio Liberty [RFE/RL], Radio Free Asia [RFA], Worldnet Television, and the Broadcasting Board of Governors [BBG].

Of the funds made available under this heading, not more than \$17,757,000 shall be used for Agency Direction. No funding is recommended for the Office of General Counsel.

Shifting requirements.—The Committee commends Radio Free Europe/Radio Liberty [RFE/RL] for developing programming in Avar, Chechen, and Circassian and for expanding broadcasting to the Northern Caucasus. The Committee recognizes the continuing importance of reaching the isolated minorities of the Northern Caucasus in their native languages. The Chechen crisis is ongoing and there is still a great need in this region for objective, uncensored information. Within the funding provided for RFE/RL, not less than \$2,400,000 shall be for the North Caucasus Unit.

The Committee recommendation includes \$1,157,000 for Radio Free Asia to continue daily Uyghur broadcasts. Radio Free Asia's Uyghur broadcasts are proving successful in northwest China in spite of top level officials efforts to erect a steel wall against "hostile radio stations from abroad".

Africa Broadcasting.—The problem of AIDS in Africa is ubiquitous. Radio broadcasting is an underutilized tool in the fight against the African AIDS epidemic. Its accessibility to even the most impoverished communities make it an ideal way to transmit information about the disease. Radio broadcasts could be a major component of sustained prevention efforts undertaken by the governments of many African countries, humanitarian organizations, and U.S. assistance programs. The recommendation includes \$11,000,000 for Voice of America's Africa Division for broadcasting to Africa. The Committee directs VOA to incorporate AIDS education into its regular programming. VOA is directed to report to the Committee on its progress no later than 90 days after enactment of this Act.

Of the funds made available for Voice of America, \$8,579,000 is for the Middle East Radio Network.

Security of RFE/RL headquarters.—The Committee is aware that RFE/RL and the government of the Czech Republic have jointly developed a preliminary plan to relocate RFE/RL headquarters from St. Wenceslas Square in Prague, the Czech Republic, to a new and safer location. The Committee expects to be consulted on all decisions concerning a future capital project, particularly decisions that concern security. RFE/RL is directed to report to the Committee on all aspects of the relocation currently being considered. The report should explain whether it would be desirable, from both a security and from an economic perspective, to move RFE/RL headquarters to a location outside of the Czech Republic. The BBG is directed to consider Turkey as a possible host nation for the new RFE/RL headquarters.

Security of worldwide broadcasting facilities.—In the post-September 11 environment, the broadcasting services no longer have the luxury of ignoring the security of their personnel and facilities. The Broadcasting Board of Governors is therefore directed to develop, in consultation with the Department of State and other relevant U.S. agencies, a 5-year capital worldwide security plan. The plan shall be transmitted to the Committees on Appropriations no later than July 1, 2003.

Within the funding made available for Radio Free Asia, not less than \$2,898,000 is for the Korea Service.

BROADCASTING TO CUBA

Appropriations, 2002	\$24,872,000
Budget estimate, 2003	25,362,000
Committee recommendation	24,996,000

The Committee recommends an appropriation of \$24,996,000. The recommendation is \$366,000 below the budget request. The recommendation includes a 4.1 percent pay raise for Federal employees. This account funds

the operating and engineering costs of Radio and Television Marti.

BROADCASTING CAPITAL IMPROVEMENTS

Appropriations, 2002	\$25,900,000
Budget estimate, 2003	13,740,000
Committee recommendation	13,740,000

The Committee recommends an appropriation of \$13,740,000. The recommendation is identical to the budget request.

This account funds necessary maintenance, improvements, replacements, and repairs of broadcasting sites; satellite and terrestrial program feeds; and engineering support activities, broadcast facility leases, and land rentals.

GENERAL PROVISIONS—DEPARTMENT OF STATE AND RELATED AGENCIES

The Committee recommends the following general provisions:

Section 401 permits funds appropriated in this Act for the Department of State to be available for allowances and differentials, services, and hire of passenger transportation.

Section 402 permits up to 5 percent of any appropriation made available in the bill for the Department of State and the U.S. Information Agency to be transferred between their respective appropriations. The language also provides that no appropriation shall be decreased by more than 5 percent or increased by more than 10 percent by any such transfer. In addition, the language provides that any transfer pursuant to this subsection shall be treated as a reprogramming of funds under section 605 of the accompanying bill and shall not be available for obligation or expenditure except in compliance with the procedures set forth in that section.

Section 403 prohibits the use of Department of State funds to support the Palestinian Broadcasting Corp.

Section 404 requires that a consulate or diplomatic facility in Jerusalem be under the supervision of the U.S. Ambassador to Israel.

Section 405 requires government publications to list Jerusalem as the capital of Israel.

Section 406 allows Israel to be recorded as the place of birth on registrations of birth, certifications of nationality, and passport applications for U.S. citizens born in Jerusalem.

Section 407 requires that property currently being occupied by the Department of State be transferred to the Department of State.

TITLE V—RELATED AGENCIES

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

Appropriations, 2002	\$224,732,000
Budget estimate, 2003	207,120,000
Committee recommendation	225,600,000

The Committee recommends a total appropriation of \$225,600,000, which is \$18,480,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment for Federal employees.

The Maritime Administration [MarAd] in the Department of Transportation is responsible for administering several programs for the maritime industry relating to U.S. foreign and domestic commerce and for national defense purposes.

The Committee's recommendations for specific accounts are described below.

MARITIME SECURITY PROGRAM

Appropriations, 2002	\$98,700,000
Budget estimate, 2003	98,700,000
Committee recommendation	98,700,000

The Committee recommends an appropriation of \$98,700,000. The recommendation is identical to the budget request.

The Maritime Security program maintains a U.S.-flag merchant fleet crewed by U.S. citizens who serve both the commercial and national security needs of the United States. The Committee's recommendation fully funds the 47 ships authorized to participate in this program.

OPERATIONS AND TRAINING

Appropriations, 2002	\$89,054,000
Budget estimate, 2003	93,133,000
Committee recommendation	89,904,000

The Committee recommends an appropriation of \$89,904,000. The recommendation is \$3,229,000 below the budget request.

This account funds operations of MarAd, the U.S. Merchant Marine Academy, and provides grants to State maritime academies.

The recommendation includes \$49,890,000 for the U.S. Merchant Marine Academy and \$7,563,000 for the State maritime schools. Within the amounts provided for the U.S. Merchant Marine Academy, \$13,000,000 is included to reduce the maintenance and repair backlog at the Academy, and to begin to make needed capital improvements. Within the amounts for State maritime schools, \$1,200,000 is for student incentive payments, \$1,200,000 is for direct scholarship payments, and \$5,163,000 is for schoolship maintenance and repair. The Committee notes that MarAd anticipates using \$2,000,000 in Ready Reserve funds to support the schoolship maintenance and repair program.

MARITIME GUARANTEED LOAN PROGRAM

Appropriations, 2002	\$36,978,000
Budget estimate, 2003	4,126,000
Committee recommendation	36,996,000

The Committee recommends an appropriation of \$36,996,000. The recommendation includes \$4,144,000 for administrative expenses. The recommendation is \$32,870,000 above the budget request.

The Maritime Guaranteed Loan Program (title XI) provides subsidies for guaranteed loans for purchasers of vessels built in U.S. shipyards and includes the guarantee for facilities or equipment pertaining to marine operations related to any of those vessels.

The Committee is concerned that the Administration did not request a title XI subsidy for fiscal year 2003. Projects currently under consideration, and many future maritime projects would be in jeopardy under this proposal. The recommended subsidy amount, when combined with \$10,000,000 in anticipated carryover balances, should provide sufficient funding to cover expected out-year requirements.

SHIP DISPOSAL PROGRAM

Appropriations, 2002	
Budget estimate, 2003	\$11,161,000
Committee recommendation	

The Committee does not recommend an appropriation within this title for the Ship Disposal Program. The recommendation is \$11,161,000 below the budget request.

COMMISSION FOR THE PRESERVATION OF AMERICA'S HERITAGE ABROAD

SALARIES AND EXPENSES

Appropriations, 2002	\$489,000
Budget estimate, 2003	499,000
Committee recommendation	659,000

The Committee recommends an appropriation of \$659,000. This amount is \$160,000 above the budget request and includes a 4.1 pay adjustment. The recommendation will allow

the Commission to fund its administrative expenses through appropriated funds while relying on privately donated funds for the actual purchase and restoration of property.

The purpose of the Commission is to encourage the preservation of cemeteries, monuments, and historic buildings associated with the foreign heritage of the American people.

Revolutionary War heroes.—The Committee supports the Commission's preliminary survey (phase I) of sites abroad associated with the lives and deeds of foreign-born heroes of the American Revolution. The Commission has identified at least 31 Revolutionary period heroes that are, or should be, commemorated abroad that qualify for site assessment (phase II). Phase II will involve: (1) collection of first hand information at foreign commemorative sites, (2) formulation of recommendations regarding necessary repairs to, or expansion of, existing monuments, rewriting of commemorative inscriptions, and placement of new commemorative markers or monuments, and (3) dissemination of information on commemorative sites to American citizens and foreign governments and organizations. The Committee recommendation includes \$160,000 to conduct phase II. The Committee looks forward to receiving a report on the completion of phase II at the earliest convenience of the Commission.

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

Appropriations, 2002	\$9,096,000
Budget estimate, 2003	9,096,000
Committee recommendation	9,096,000

The Committee recommends an appropriation of \$9,096,000 for the salaries and expenses of the Commission on Civil Rights. The recommendation is identical to the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available.

COMMISSION ON INTERNATIONAL RELIGIOUS FREEDOM

Appropriations, 2002	\$3,000,000
Budget estimate, 2003	3,000,000
Committee recommendation	3,000,000

The Committee recommends an appropriation of \$3,000,000. The recommendation is identical to the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available.

COMMISSION ON OCEAN POLICY

Appropriations, 2002	\$3,000,000
Budget estimate, 2003	3,000,000
Committee recommendation	3,000,000

The Committee recommends an appropriation of \$3,000,000 for the Commission on Ocean Policy. The recommendation is \$3,000,000 above the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available. Legislation directing the President to establish a Commission on Ocean Policy, as the successor to the objective, science-based 1966 Stratton Commission passed during the 106th Congress. To date \$7,500,000 has been appropriated for the Commission.

COMMISSION ON SECURITY AND COOPERATION IN EUROPE

SALARIES AND EXPENSES

Appropriations, 2002	\$1,499,000
Budget estimate, 2003	1,607,000
Committee recommendation	1,550,000

The Committee recommends an appropriation of \$1,550,000. The recommendation is

\$57,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available.

The Commission was established in 1976 to ensure compliance with the final act of the Conference on Security and Cooperation in Europe with particular regard to provisions dealing with humanitarian affairs.

CONGRESSIONAL-EXECUTIVE COMMISSION ON THE PEOPLE'S REPUBLIC OF CHINA

SALARIES AND EXPENSES

Appropriations, 2002	\$1,000,000
Budget estimate, 2003	1,700,000
Committee recommendation	1,000,000

The Committee recommends an appropriation of \$1,000,000. The recommendation is \$700,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$310,406,000
Budget estimate, 2003	320,436,000
Committee recommendation	320,436,000

The Committee recommends an appropriation of \$320,436,000. The recommendation is identical to the budget request. The Committee recommendation includes a 4.1 percent pay adjustment to the degree resources are available.

The Committee recommendation includes \$33,000,000 to fund fair employment practices agencies. This should permit the EEOC to increase the contract rate for cases closed to \$500. In order to ensure the EEOC understands the importance the Committee places on the work of State and local fair employment practices agencies, bill language is included to direct the agency to increase funding for the charge rate paid to these agencies.

The Committee expects the agency to use its anticipated fiscal year 2002 carryover funds and the remainder not used for the above purposes to modernize its computer systems.

FEDERAL COMMUNICATIONS COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$245,071,000
Budget estimate, 2003	268,327,000
Committee recommendation	275,400,000

The Committee recommends a total of \$275,400,000 for the salaries and expenses of the Federal Communications Commission [FCC], of which the entire amount is to be derived from collection of existing fees. The recommendation is \$7,073,000 above the budget request. The Committee recommendation includes the fiscal year 2002 funding level and a 4.1 percent pay adjustment. The Committee supports an increase for the FCC's Technology requirements and initiatives to improve the agency's program performance. This funding will provide for continued support and critical improvements for existing systems, and will ensure compliance with government-wide standards pertaining to system security, accessibility and financial management. The funding will impact on all five key FCC activities, which includes licensing, competition, enforcement, consumer information, and spectrum management.

The FCC is an independent agency charged with regulating interstate and foreign communications, including radio, television, wire, wireless, cable, and satellite. The FCC's primary mission is to promote competition,

innovation, and deregulation in the communications industry.

Broadcast television standards.—The Committee is concerned about the declining standards of broadcast television and the impact this decline is having on America's children. An analysis of all prime-time programming has found that overall sexual content, foul language and violence have tripled over the past decade. In December 1999, the FCC issued a notice of inquiry regarding the public interest obligations of broadcasters during and after the transition to digital transmission. The Committee directs the FCC to continue to report to Congress on the issues associated with resurrecting a broadcast industry code of conduct for content of programming that, if adhered to by the broadcast industry, would protect against the further erosion of broadcasting standards.

FEDERAL MARITIME COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$16,458,000
Budget estimate, 2003	17,440,000
Committee recommendation	16,795,000

The Committee recommends an appropriation of \$16,795,000. The recommendation is \$645,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment.

The Federal Maritime Commission is an independent regulatory agency charged with administering several laws relating to the waterborne domestic and foreign offshore commerce of the United States.

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$155,982,000
Budget estimate, 2003	187,599,000
Committee recommendation	175,148,000

The Committee recommends an appropriation of \$175,148,000. The recommendation is \$12,451,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment.

The Federal Trade Commission [FTC] administers a variety of Federal antitrust and consumer protection laws. Activities in the antitrust area include detection and elimination of illegal collusion, anticompetitive mergers, unlawful single-firm conduct, and injurious vertical agreements. The FTC regulates advertising practices, service industry practices, marketing practices, and credit practices as it addresses fraud and other consumer concerns.

The Committee recommendation for fiscal year 2003 provides funding for a total of 1,074 full time equivalents. The recommendation provides requested increases to pay non-personnel services, and space costs, and does not provide for increased costs of the Consumer Response Center. The recommended program level will be partially offset by fees assessed on Hart-Scott-Rodino Act premerger notification filings as authorized by section 605 of Public Law 101-162.

Child Protection.—The FTC released a report 2 years ago that was very critical of the entertainment industry and their persistent and calculated marketing of violent games, movies, and music to children. In response to this report the entertainment industry has promised to place tougher regulations on itself and voluntarily comply with the report's recommendations. The Committee believes that the FTC should continue and expand its efforts in this area and directs the Commission to continue to engage in consumer research and workshops, underage shopper-retail compliance surveys, and marketing data collection.

Internet.—The FTC is charged with monitoring compliance with the Children's Online

Privacy Protection Act. The Committee's recommendation ensures the agency is adequately prepared to meet the challenges of increased fraud on the Internet and the agency's recognition that Internet fraud is an international phenomenon since the Internet has no borders.

Do-Not-Call Initiative.—The Committee recommends an additional \$16,000,000 for the Federal Trade Commission and authority to collect offsetting fees for the Commission's Do-Not-Call initiative under its Telemarketing Sales Rule. The Do-Not-Call initiative will establish a national database of telephone numbers of consumers who choose not to receive telephone solicitations from telemarketers. The Committee understands that the Commission plans to adopt, prior to enactment of this legislation, the Do-Not-Call initiative as an amendment to its Telemarketing Sales Rule. The Committee further understands that the Commission has developed a spending plan for the Do-Not-Call initiative. The Committee recognizes that these additional funds and fee collection authority are needed to implement the Do-Not-Call initiative, which has received broad support from, and will provide significant benefits to, consumers throughout the United States.

LEGAL SERVICES CORPORATION
PAYMENT TO THE LEGAL SERVICES
CORPORATION

Appropriations, 2002	\$329,300,000
Budget estimate, 2003	329,300,000
Committee recommendation	329,397,000

The Committee recommends an appropriation of \$329,397,000. The recommendation is \$97,000 above the budget request and includes funds for a 4.1 pay adjustment. The Committee recommendation includes \$310,097,000 for basic field programs, to be used for competitively awarded grants and contracts, \$13,300,000 for management and administration, \$3,400,000 is for client self-help and information technology, and \$2,600,000 for the Office of the Inspector General.

ADMINISTRATIVE PROVISIONS

The Committee recommendation continues the administrative provisions contained in the fiscal year 1998 appropriations act (Public Law 105-119) regarding operation of this program to provide basic legal services to poor individuals and the restrictions on the use of Legal Services Corporation [LSC] funds.

Grantees must agree not to engage in litigation and related activities with respect to a variety of matters including (1) redistricting; (2) class action suits; (3) representation of illegal aliens; (4) political activities; (5) collection of attorney fees; (6) abortion; (7) prisoner litigation; (8) welfare reform; (9) representation of charged drug dealers during eviction proceedings; and (10) solicitation of clients. The exception to the restrictions in a case where there is imminent threat of physical harm to the client or prospective client remains in place.

The manner in which LSC grantees are audited through contracts with certified public accountants for financial and compliance audits are continued along with the provisions on recompetition and debarment.

MARINE MAMMAL COMMISSION
SALARIES AND EXPENSES

Appropriations, 2002	\$1,957,000
Budget estimate, 2003	1,856,000
Committee recommendation	2,050,000

The recommendation provides \$2,050,000 for the Marine Mammal Commission in fiscal year 2003. The recommendation is \$194,000 above the budget request and includes a 4.1 percent pay adjustment.

The Committee has long been aware that noise pollution in the world's oceans has a deleterious effect on the health and safety of marine mammals. The Committee recommendation includes \$4,000,000 to be transferred from the Small Business Administration to the Marine Mammal Commission to conduct original research or to fund grants designed to determine the actual near-, medium-, and long-term effects of low, medium, and high frequency sounds on the health and safety of marine mammals, focusing on the most endangered species first. The amount provided is also intended to fund an international conference, or series of conferences, to share findings, survey acoustic "threats" to marine mammals, and develop means of reducing those threats while maintaining the oceans as the global highway of international commerce.

NATIONAL VETERANS' BUSINESS DEVELOPMENT CORPORATION

Appropriations, 2002	\$4,000,000
Budget estimate, 2003	2,000,000
Committee recommendation	2,000,000

The Committee recommends an appropriation of \$2,000,000. The recommendation is identical to the budget request. The Committee recommendation includes funds for a 4.1 pay adjustment.

SECURITIES AND EXCHANGE COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$489,505,000
Budget estimate, 2003	566,900,000
Committee recommendation	656,700,000

The Committee recommendation provides total budget (obligational) authority of \$656,700,000. This amount is \$89,800,000 above the budget request.

The strength of the American economy is dependent upon investors' confidence in the financial disclosures and statements released by publicly traded companies. The public must receive full and transparent information regarding the financial status of publicly traded companies so that limited dollars are efficiently invested, for the good of the private investor, and the American economy. Recent accounting scandals related to Enron and Worldcom have shaken the public's faith in this country's financial markets. The Securities and Exchange Commission [SEC], an independent agency, was created to administer many of the Nation's laws regulating the areas of securities and finance, and to act on behalf of the public to prevent fraud and misrepresentation in securities transactions.

The recommendation supports the continuation of pay parity for the SEC's staff, adds additional staff, and provides the funds necessary to improve the agency's monitoring systems. The Committee expects the SEC to provide quarterly reports to the Committee on the status of the implementation of these funds and the measures it is taking to restore the public's confidence in the financial markets.

The Commission is required, pursuant to the "Investor and Capital Markets Fee Relief Act", to make annual adjustments to the rates for fees paid under Section 6(b) of the Securities Act of 1933 and Sections 13(e), 14(g), and 31 of the Securities Exchange Act of 1934. Effective October 1, 2002, or 5 days after the date on which the Commission receives its fiscal 2003 regular appropriation, whichever date comes later, the Section 6(b) fee rate applicable to the registration of securities, the Section 13(e) fee rate applicable to the repurchase of securities, and the Section 14(g) fee rates applicable to proxy solicitations and statements in corporate control

transactions will be reduced to \$80.90 per million from the current rate of \$92.00 per million. In addition, effective October 1, 2002, or 30 days after the date on which the Commission receives its fiscal 2003 regular appropriation, whichever date comes later, the Section 31 fee rate applicable to securities transactions on the exchanges and Nasdaq will be reduced to \$25.20 per million from the current rate of \$30.10 per million. These fees are available to offset all funds recommended by the Committee for the SEC.

The Committee recommendation includes sufficient funding to permit the Commission to continue implementation of the pay parity program authorized in the "Investor and Capital Markets Fee Relief Act", which was enacted in January 2002. In March, the Committee approved the reprogramming of \$24,800,000 in available balances to permit the Commission to implement this program to bring the salaries for SEC employees in line with those of other Federal financial regulatory agencies. The Committee believes that the Commission's ability to retain and adequately support staff up to its authorized staffing level is critical to the success of its role in restoring confidence in U.S. financial markets.

The Committee recommends that the Commission continue to emphasize the investigation and prosecution of financial fraud and reporting cases. In the first quarter of calendar year 2002 the SEC enforcement staff opened 64 cases investigating financial fraud and reporting, compared to 31 cases opened in the same period last year. The Committee commends the SEC for its heightened enforcement efforts and recent initiatives to protect investors through strengthened corporate disclosure, accounting, and reporting requirements.

The Committee understands the Commission plans on receiving 700 new staff and that the majority of these new staff would be allocated to the Divisions of Enforcement and Corporation Finance and the agency's inspection and examination program. The Committee requires a spending plan be provided and approved before funds for this effort are obligated or expended.

The inability of Commission staff to conduct data-intensive analyses and examinations has hampered the Commission's investigative and enforcement efforts. In particular, the Commission has continued to struggle with the massive inflows of paper documents received in the course of its investigations. For this reason, the Committee recommendation specifically includes a \$47,200,000 increase for information technology. This funding increase will allow for the development of a pilot document management system and the deployment of substantially more robust analytical tools for SEC examination staff. This increase also will allow the Commission to undertake a requirements analysis to determine how best to improve its corporate disclosure review activities so that investors are provided with enhanced protections and assurances of the validity of corporate financial disclosures.

The Committee's recommendation includes funds for the one-time advancement of not more than \$10,000,000 to the new Professional Company Accounting Oversight Board for start-up costs associated with its first fiscal year. In the event that start-up costs exceed \$10,000,000, the Commission shall request a reprogramming from the Committee that fully describes the additional amounts required. The Committee requires a spending plan be provided and approved before these funds are obligated or expended.

The recommendation provides \$6,000,000 to cover the costs of additional immediate security measures now required at the Commission's new headquarters building as a result of the September 11 attack and continuing threats to Federal facilities. The Committee recommends bill language, similar to that included in previous appropriations acts, which: (1) allows for the rental of space; (2) makes up to \$3,000 available for official reception and representation expenses; (3) makes up to \$10,000 available for a permanent secretariat for the International Organization of Securities Commissions; and (4) makes up to \$100,000 available for governmental and regulatory officials.

Exercise of options.—The Committee is concerned that corporate insiders are enriching themselves at the expense of the corporations for which they work and the stockholders by exercising stock options immediately prior to companies' financial collapse. In fact, exercising stock options may actually contribute to the bankruptcy of teetering corporations. Therefore, the SEC is directed to provide the Committees on Appropriations with a report listing every corporate officer or director whose exercise of options under section 12 of the Securities and Exchange Act exceeds \$100,000 during each 30 day reporting period. The report shall be delivered monthly beginning 30 days after date of enactment of this Act.

SMALL BUSINESS ADMINISTRATION

Appropriations, 2002	\$888,514,000
Budget estimate, 2003	783,048,000
Committee recommendation	788,537,000

The Committee recommends an appropriation of \$788,537,000. The recommendation is \$5,489,000 above the budget request. The Committee recommendation includes a 4.1 percent pay increase for Federal employees. The total funding is distributed among the five SBA appropriation accounts as described below.

SALARIES AND EXPENSES

Appropriations, 2002	\$308,476,000
Budget estimate, 2003	352,968,000
Committee recommendation	364,357,000

The Committee recommends a direct appropriation of \$364,357,000 for the salaries and expenses of the Small Business Administration. The recommendation is \$11,389,000 above the budget request. The Committee does not recommend funding for gainsharing, workforce restructuring, program evaluations, and an E-Government initiative.

NON-CREDIT BUSINESS ASSISTANCE PROGRAMS

The Committee recommends an appropriation of \$149,775,000 for SBA's non-credit business assistance programs. The Committee recommends the following amounts for these programs:

Small Business Development Centers	\$88,000,000
USEAC Program	3,100,000
Drug-free Workplace Grants	3,000,000
Regulatory Fairness Boards	500,000
SCORE	5,000,000
BICs	475,000
Women's Business Centers	12,000,000
Business LINC	2,000,000
Women's Council	750,000
7(j) Technical Assistance	3,600,000
Native American Economic Development Initiative	1,000,000
Advocacy Research/Database	1,100,000
Microloan Technical Assistance	17,500,000
Veteran's Business Development Assistance	750,000
PRO-Net	500,000
SBIR Technical Assistance	500,000
Federal and State Technology Partnership Program	3,000,000

HubZone Progam	2,000,000
PRIME Technical Assistance	5,000,000

The Committee believes the Small Business Development Centers [SBDCs] provide useful services to small businesses nationwide. Federal funding of SBDC's constitutes the seed funding for the program, which is leveraged one or two times by State, local, and private funds.

The Committee recommendation provides funding of \$17,500,000 for the Microloan Technical Assistance Program and \$5,000,000 for the PRIME technical assistance program. The Committee believes the PRIME program has great promise for providing assistance to the entrepreneurs who have no access to capital and has a training component for assisting these small businesses which is missing in some of the other SBA assistance programs.

The Committee recommends \$500,000 for Small Business Innovation Research [SBIR] technical assistance and \$3,000,000 for the Federal and State Technology Partnership Program [FAST]. The FAST program encourages organizations in States to assist in the development of small high-technology businesses. The Committee believes that increasing the overall participation in the SBIR program by high-technology small businesses will ultimately lead to an overall increase in the quality of SBIR proposals and completed projects.

OFFICE OF INSPECTOR GENERAL

Appropriations, 2002	\$11,464,000
Budget estimate, 2003	14,500,000
Committee recommendation	11,600,000

The Committee recommends an appropriation of \$11,600,000 for the Office of Inspector General of the Small Business Administration. The recommendation is \$2,900,000 below the budget request. The Committee expects the office to report on its progress in reviewing and auditing the agency's financial management systems. The bill contains language making \$500,000 available to the Inspector General's office from funds made available to the disaster loan program for its activities.

BUSINESS LOANS PROGRAM ACCOUNT

Appropriations, 2002	\$283,860,000
Budget estimate, 2003	218,086,000
Committee recommendation	218,086,000

The Committee recommends an appropriation of \$218,086,000 for the business loans program account. The recommendation is identical to the budget request. Of the amount provided, \$129,000,000 is for administrative expenses related to this account. The administrative expenses may be transferred to and merged with SBA salaries and expenses to cover the common overhead expenses associated with the business loan programs.

The Committee recommendation includes an appropriation of \$85,360,000 to support a \$4,850,000,000 7(a) loan program. This assumes a subsidy rate of 1.76 percent. The small business community is dependent on the SBA 7(a) program to obtain long-term financing at a competitive interest rate. Each year, 40,000 or more small business concerns, who cannot obtain comparable credit elsewhere, turn to the 7(a) program for critical financing. Furthermore, the Committee believes the SBA should achieve a goal of a zero subsidy rate for the 7(a) loan program. However, the same result can be achieved by a comprehensive review of subsidy cost estimates for the 7(a) program. Previous reports from the GAO indicate that subsidy costs have been inflated. OMB estimates of the subsidy cost of the 7(a) program consistently show execution rates are inflated. This could lead to the overcharging of small business

owners. The Committee believes that the 7(a) program is already operating near a zero subsidy rate and that the budget request should contain a one-time accurate accounting change to reflect that reality. The Committee recommends that this one-time accounting change be reflected in future budget requests. The recommendation includes \$3,726,000 in subsidy budget authority for the Microloan program, which will support a program level of approximately \$26,553,000 in fiscal year 2003, assuming a subsidy rate of 13.05 percent.

DISASTER LOANS PROGRAM ACCOUNT

Appropriations, 2002	\$284,714,000
Budget estimate, 2003	197,494,000
Committee recommendation	194,494,000

The Committee recommends an appropriation of \$194,494,000 for the disaster loan program. The recommendation does not include \$3,000,000 for gainsharing. The recommendation is \$3,000,000 below the budget request. Of the amount provided, \$76,140,000 is for direct loan subsidies. This amount, combined with carryover and recoveries of \$35,000,000 will provide for a program level of \$795,000,000. The remaining \$118,354,000 is made available for administrative expenses for the program, and can be merged with the agency's salaries and expenses account.

ADMINISTRATIVE PROVISIONS

The Committee wishes to underscore the reprogramming requirements outlined in section 605. This recommendation includes an administrative provision in the bill language, as in last year's bill, providing the authority to transfer funds between the Small Business Administration's appropriations accounts. The language provides that no account may be decreased by more than 5 percent or increased by more than 10 percent. The language also makes the transfers subject to the Committee's standard reprogramming procedures under section 605. In addition, a reprogramming notification is required in any proposed organization, whether or not funding transfers will be associated with the proposed reorganization.

STATE JUSTICE INSTITUTE

SALARIES AND EXPENSES

Appropriations, 2002	\$3,000,000
Budget estimate, 2003	13,550,000
Committee recommendation	3,100,000

The Committee recommends an appropriation of \$3,100,000. The recommendation is \$10,450,000 below the budget request. The Committee recommendation includes a 4.1 percent pay adjustment.

The Institute was created in 1984 to further the development and adoption of improved judicial administration in State courts.

UNITED STATES-CANADA ALASKA RAIL COMMISSION

SALARIES AND EXPENSES

Appropriations, 2002	\$2,000,000
Budget estimate, 2003
Committee recommendation

The Committee does not recommend funding for the United States-Canada Alaska Rail Commission. The recommendation is identical to the budget request.

TITLE VI—GENERAL PROVISIONS

The Committee recommends the following general provisions for the departments and agencies funded in the accompanying bill.

Section 601 prohibits any appropriation act from being used for publicity or propaganda purposes not authorized by law.

Section 602 prohibits any appropriation contained in the act from remaining available for obligation beyond the current year unless expressly so provided.

Section 603 provides that the expenditure for any appropriation contained in the act for any consulting service through procurement contracts shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection except where otherwise provided under existing law or under existing Executive order issued pursuant to existing law.

Section 604 limits the availability of funds for a memorandum of agreement.

Section 605 stipulates Committee policy concerning the reprogramming of funds. Section 605(a) prohibits the reprogramming of funds which: (1) create new programs; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates offices or employees; (5) reorganizes offices, programs, or activities; (6) contracts out or privatizes any function or activity presently performed by Federal employees—unless the Appropriations Committees of the House and Senate are notified 15 days in advance.

Section 605(b) prohibits a reprogramming of funds in excess of \$500,000 or 10 percent, whichever is less, that (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by Congress; or (3) results from any general savings due to a reduction in personnel which would result in a change in existing programs, activities, or projects as approved by Congress unless the Appropriations Committees of the House and Senate are notified 15 days in advance.

Section 606 prohibits construction, repair, overhaul, conversion, or modernization of NOAA ships outside of the United States.

Section 607 ties grant eligibility to retired law enforcement disability benefits.

Section 608 limits the availability of funds for tobacco promotion.

Section 609 prohibits funds from being used to issue a visa to any alien involved in extrajudicial and political killings in Haiti and establishes working conditions for plaintiffs in a recently settled Federal lawsuit.

Section 610 prohibits a user fee from being charged for background checks conducted pursuant to the Brady Handgun Control Act of 1993 and prohibits implementation of a background check system that does not re-

quire and result in the immediate destruction of certain information.

Section 611 delays obligation of some receipts deposited into the Crime Victim Fund.

Section 612 ties visa issuance to cooperation on so-called “non-returnables”.

Section 613 limits the placement of maximum or high security prisoners to appropriately secure facilities.

Section 614 restricts Federal prisoner access to certain amenities.

Section 615 makes appropriations for the Small Business Administration.

Section 616 clarifies section 626 of Public Law 107-77 that allows a cause of action for the Iranian hostages.

TITLE VII—RESCISSES

DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

WORKING CAPITAL FUND

(RESCISSON)

The Committee recommends a rescission of \$36,230,000 from the unobligated balances available in the “Working Capital Fund”.

LEGAL ACTIVITIES

ASSET FORFEITURE FUND

(RESCISSON)

The Committee recommends a rescission of \$50,874,000 from the unobligated balances available in the “Asset Forfeiture Fund”.

DEPARTMENT OF COMMERCE AND RELATED AGENCIES

DEPARTMENT OF COMMERCE

UNITED STATES PATENT AND TRADEMARK OFFICE

SALARIES AND EXPENSES

(RESCISSON)

The Committee recommends a rescission of \$120,000,000 from the unobligated balances available in the “United States Patent and Trademark Office, Salaries and Expenses” account.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI OF THE STANDING RULES OF THE SENATE

Rule XVI, paragraph 7 requires that every report on a general appropriation bill filed by the Committee must identify items of appropriation not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

The following appropriations have not been authorized either in whole or in part and fall under this rule:

Title II—Department of Commerce and related agencies: Office of the U.S. Trade Representative, salaries and expenses; International Trade Commission, salaries and expenses; Export Administration, operations and administration; International Trade Administration, operations and administration; economic development assistance programs; Patent and Trademark Office; National Institute of Standards and Technology, scientific and technical research and services; NIST industrial technology services; NIST construction of research facilities; National Oceanic and Atmospheric Administration operations, research, and facilities; NOAA construction; and Minority Business Development Agency.

Title V—Related agencies: Department of Transportation; Maritime Administration, operations and training; Commission on Civil Rights; Federal Communications Commission (except offsetting fee collections); Legal Services Corporation; and Securities and Exchange Commission.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of the rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include “(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee.”

In compliance with this rule, the following changes in existing law proposed to be made by this bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 2003 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR FISCAL YEAR 2004

[In thousands of dollars]

¹The President's budget proposed nothing for State Justice Institute.**[COMMITTEE PRINT]****[NOTICE: This is a draft for use of the Committee and its staff only, in preparation for markup.]****DISTRICT OF COLUMBIA APPROPRIATIONS BILL, 2003**

JANUARY ___, 2003.—Ordered to be printed

Mr. DEWINE, from the Committee on Appropriations, submitted the following

R E P O R T

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

SUMMARY OF BILL

The following discussion of the bill includes general information on initiatives and

concerns of the Committee and an analysis of the total resources estimated to be available to the District of Columbia in the coming fiscal year. The Committee considered requests from the President for Federal funds totaling \$378,752,000 in budget authority for the District of Columbia appropriation. This amount was contained in the Budget of the U.S. Government—2003, transmitted to the Congress on February 4, 2002. The President requested: \$154,707,000 for the D.C. Court Services and Offender Supervision Agency; \$159,045,000 for the D.C. Courts operations and capital improvements; \$32,000,000 for Defender Services in the District of Columbia Courts; \$17,000,000 for payment for D.C. resident tuition support; \$15,000,000 for security costs related to the presence of the Federal Government; and \$1,000,000 for transportation systems management. In addition, the Committee received requests from the District of Columbia and related agencies for \$319,695,000 in Federal funds in excess of the President's request. The Committee recommendation totals \$512,000,000 in Federal funds appropriated as follows: (1) \$17,000,000 for a program of District of Columbia resident tuition support; (2) \$10,000,000 for hos-

pital bioterrorism preparedness; (3) \$166,193,000 for the District of Columbia Courts; (4) \$34,000,000 for Defender Services in the District of Columbia Courts; (5) \$154,707,000 for the Court Services and Offender Supervision Agency for the District of Columbia; (6) \$15,000,000 for security costs related to the presence of the Federal Government in the District of Columbia; (7) \$1,000,000 for transportation systems management; (8) \$15,000,000 for security, economic development, education and health projects; (9) \$55,000,000 for support of the Anacostia Waterfront Initiative; (10) \$20,000,000 for expansion of charter schools; (11) \$4,000,000 for expansion of a family literacy program; (12) \$7,000,000 for payments to the Children's National Medical Center and St. Coletta's of Greater Washington expansion; and (13) \$13,100,000 for capital infrastructure development. The Senate bill includes a recommendation of \$7,419,886,780 for the local budget. The Committee recommends an appropriation of \$512,000,000 in Federal funds for the operations itemized below.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts

Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

GENERAL STATEMENT

The Committee highly values the priorities of the Mayor and the Council of the District of Columbia, and this bill reflects those priorities. In testimony before the Subcommittee, the Mayor conveyed his priorities for the city; the first among them is investing in high quality education. The city's budget increases funding for District Public Schools and Charter Schools to renovate school buildings, and creates initiatives to recruit and train highly talented principals and teachers. A second major priority of the Mayor is to enhance clean and safe neighborhoods through environmental remediation and economic development. The Committee supports the city's investments in public

safety, cleanup of the Anacostia River, and health care to the city's most vulnerable citizens. Thirdly, the Committee commends the Mayor and Council for continuing to make a priority the financial responsibility and strength of the city. The Committee shares the city's priorities in education, the environment, and fiscal strength and joins with the District of Columbia in a partnership for progress. The Committee encourages the District to build upon the dramatic reform created under the Control Board.

The Committee has a three-part responsibility to the Government and the citizens of the District of Columbia and all United States citizens.

The first is to carry out the responsibilities transferred to Federal authority

through the 1997 District of Columbia Revitalization Act. Public safety and social services are critical functions of government in any city. In the capital city, the Federal Government shares in the responsibility to the citizens of the District, the employees of the Government seated here in the capital, and a more broad responsibility to all people who visit the capital, to provide services that ensure a safe city for all. These agencies play a key role in promoting public safety and justice in the District. That responsibility entails oversight of three quasi-Federal agencies that provide services to the District: the Superior Court and the Court of Appeals of the District of Columbia, the Court Services and Offender Supervision Agency, and the Defender Services Agency.

The second main responsibility the Congress has to the District is to act as partner with the city in maintaining the financial stability and strong management of the city created by the federally-conceived Control Board, enacted in the 1995 Financial Responsibility and Management Assistance Act. In 2001, the District fulfilled the benchmarks set forth in the Financial Responsibility and Management Assistance Act to end a control period and return to home rule; all obligations arising from the Authority's issuance of bonds, notes, or other obligations have been discharged; all borrowing by the District from the United States Treasury has been repaid; the District government has adequate access to short and long-term credit markets at reasonable rates to meet its borrowing needs; and the District has achieved balanced or surplus budgets for four consecutive fiscal years.

The Congress has a responsibility to engage with the city in transitioning back to local control the financial and budgetary oversight and management responsibility functions that the Control board provided. Part of that transition was addressed in Public Law 106-522, the fiscal year 2001 District of Columbia Appropriations Act. The responsibility for financial management duties, established by the Control Board Act of 1995 and vested in the Control Board, were transferred to the Office of the Chief Financial Officer. These duties include administering all debt and cash management of the District government, preparing financial reports and the District's annual budget. The Committee is determined to ensure that the requirements set forth in the Control Board Act continue to be adhered to in non-Control years. Additionally, the Committee is specifically concerned that the entity identified to ensure fiscal responsibility in the District, the Chief Financial Officer, also has the appropriate and sufficient tools to carry out that responsibility. To that end, the Committee supported language in the fiscal year 2002 Emergency Supplemental to clarify that the Office of the Chief Financial Officer maintains independence.

The third responsibility that the Congress has to the District of Columbia is to carry out the Constitutional mandate to approve the local budget of the District.

In addition to approving the local budget and Federal funds for the three quasi-Federal public safety and justice agencies, the Committee supports a partnership with the District of Columbia to support infrastructure development in select initiatives. The Committee recommendation supports three specific goals in the District: a cleaner environment, more school choice, and better public safety.

To address the first goal, the Committee is including \$55,000,000 for the Anacostia Waterfront Initiative, which will prevent further deterioration of the river, begin the process of restoring the river to health, rebuild water and sewer infrastructure, and invest in

waterfront development. To address the second goal, the Committee is including \$20,000,000 for school choice to support Charter School facility loans and enhance the ability of charter schools to provide improved educational opportunities in the District. To address the third goal, the Committee is including \$39,100,000 for public safety, to invest in the infrastructure necessary to support modern emergency response capacity. Most notably, the Committee has included \$10,000,000 to begin to prepare the District's hospitals for a possible attack that may include the use of biological, chemical, radiological, and nuclear weapons, as well as high yield explosives. In such a circumstance, decontamination and quarantine become critical components of any response plan. Patients must be decontaminated before they can be treated, otherwise their contamination could potentially shut down entire facilities. Of the funds provided, the Committee recommendation includes \$5,000,000 for Children's National Medical Center, and \$5,000,000 for Washington Hospital Center.

The Committee has also included funding for education, public safety, the environment and economic development in the District.

DISTRICT OF COLUMBIA FINANCIAL CONDITION

In the past year, the District of Columbia has enjoyed some notable successes, including the fifth consecutive "unqualified" (or clean) opinion from the city's independent auditors, with the fiscal year 2001 Comprehensive Annual Financial Report (CAFR) completed ahead of time and with a balanced budget. Overall, the city ended fiscal year 2001 with a surplus of \$77,600,000 and a positive fund balance of \$562,200,000. In fiscal year 1996, there was a negative fund balance of \$518,000,000, reflecting a turnaround of over a billion dollars. This result is another milestone for the financial turnaround that began in fiscal year 1997. It is a fitting beginning for the District's return to Home Rule on October 1, 2001, with the end of the Financial Responsibility and Management Assistance Authority (or Control Board). The Committee recognizes that the Control Board initiated critical reforms that provided a framework for the District's current financial stability. However, the Committee notes several areas where the national economic slowdown and reduced revenues have impacted the District's financial stability, particularly in agencies still struggling to improve financial management and accountability.

Use of Reserve Funds

The Committee notes that the District has expended all but \$3,000,000 of the budgeted reserve fund in fiscal year 2002. The Committee commends the District for fully funding the emergency and contingency reserves, ahead of the congressionally mandated schedule, totaling \$275,000,000 in local funds to ensure their availability for potential rainy day requirements. The District was not immune to the overall economic slow-down in fiscal year 2002, and the Committee is pleased that the District was able to utilize reserves to address spending pressures. However, the Committee is concerned that spending from the reserve funds should not replace accurate revenue estimating and budgeting for each agency. District agencies should not depend on the reserves to address spending pressures. Reductions in spending must occur to maintain long-term economic security.

PUBLIC EDUCATION

As with every city and state in America, the stability of the economic future of the District depends, in great part, on its ability to provide a quality education to its children. Congress recently enacted one of the

most sweeping education reform since 1965. The Committee urges the Superintendent of the District Public Schools to begin to implement programs that are consistent with the goals espoused by the reform: accountability for results, increased investments that get to the classrooms, smaller classes, increased local control, increasing numbers of qualified teachers, improved early childhood education, and research-based literacy programs. Several of these concepts are reflected in both the Mayor's budget and the Superintendent's Plan for Reform. The Committee recommendation includes significant investments in charter school development to support this important model in the District. The Committee intends that the projects funded under this bill will supplement, not supplant, the efforts of the District to improve performance in their schools. In addition, the Committee joins in the District's concern about the increasing need for highly qualified teachers and commends the Superintendent for continuing efforts in this regard.

Special Education

On October 2, 2001, the President appointed a Special Commission to recommend reforms to improve America's special education system and move it from a culture of compliance to a culture of accountability for results. After almost a year of study and public hearings, the Commission reported that while IDEA has gone a long way toward bringing children with disabilities out of the shadows and into our classrooms, there is room for improvement. Specifically, the Commission found that 80 percent of those identified with "specific learning disabilities" are labeled this way simply because they were never properly taught to read. What's more, they found that minority—particularly low-income—children are over represented in special education categories.

The findings of the President's Special Commission provide a solid foundation on which to build real reform. Armed with the information gained from the public hearings, Members of Congress can use the upcoming reauthorization to make America's education system—special education or otherwise—into a system that aspires to excellence. District of Columbia public schools (DCPS) certainly stand to benefit from the reforms suggested by the findings of this report. The Committee hopes that DCPS will take advantage of the information gained, as well as the upcoming reauthorization process to ensure that the special education system in the District is first on the list of model programs.

In 1999, a District Court assigned a special master to monitor the District's performance in providing for its special education students. Soon after Federal intervention, the District of Columbia's Special Council Committee on Special Education conducted a study of the District's delivery of special education services. Among the recommendations contained in an unreleased draft report by the Special Council were the following: that DCPS strengthen the commitment to provide adequate and qualified staff in the delivery of special education services; that DCPS improve the management of transportation costs and the dependability of transportation services; and that DCPS improve the process to assess and place students with special needs.

The Committee continues to be concerned that a consensus strategy to address the problems in the delivery of special education services, particularly assessment and transportation services, has not been developed.

The District of Columbia operating budget for fiscal year 2003 includes a new initiative to reallocate \$27,000,000 of debt service savings during fiscal year 2003 and fiscal year

2004 to the Special Education and Medicaid Reform Fund. The Committee is encouraged that these funds are available to the District of Columbia Public Schools once the Superintendent submits a savings plan to the Mayor equaling \$27,000,000 over the next 5 years. The Committee supports this approach and is pleased to see that the savings plan must be approved by the Special Education Taskforce and certified by the Chief Financial Officer to ensure that true savings will be achieved. The Committee supports the effort of the Mayor and Council to reform public education through achievement and savings. The Committee encourages the Mayor and the Special Education Taskforce to solicit outside reviews of the savings plan from best practices experts in other jurisdictions.

The Committee applauds the Mayor and Council for their commitment to reform by requiring a multi-year financial plan and performance goals for Special Education for fiscal years 2003 through 2006. The Committee encourages the Mayor and Council to tie funding for Special Education reform to the performance goals agreed upon by the locally elected leaders.

Infrastructure Development

The Mayor of the District of Columbia requested \$237,650,000 in Federal funding to invest in critical infrastructure and supplement a few select city services. The requested funding would support nineteen different projects, of which ten projects are ongoing and supported by local funds in the District of Columbia operating budget. The other nine projects are new initiatives in which the Mayor sees a Federal role (i.e., a traditional Federal relationship or a so-called "state-level" cost).

The Committee recommends \$92,100,000 above the President's request for investments in infrastructure in the District of Columbia, including charter school facility loans, creation of an interoperable communications system, and revitalization of the Anacostia Waterfront. The Committee recommendation is \$112,550,000 less than the Mayor of the District of Columbia request.

FEDERAL FUNDS

A total of \$2,531,331,000 in Federal funds are estimated to be available to the District government, the D.C. Courts, the D.C. Court Services and Offender Supervision Agency, and other District of Columbia entities. A total of \$512,000,000 of Federal funds is included in this bill. A total of \$2,019,331,000 in Federal funds will be received by the District government from the various Federal grant programs. In addition, Federal reimbursements are received from such programs as Medicaid and Medicare.

The following table summarizes the various Federal funds estimated to be available to the District government during fiscal year 2003:

Federal Funds

<i>Item</i>	
Federal payment for resident tuition support	\$17,000,000
Federal Payment for Emergency Planning and Security Costs in the District of Columbia	15,000,000
Federal payment for hospital bioterrorism preparedness in the District of Columbia	10,000,000
Federal Payment to the Chief Financial Officer of the District of Columbia	15,000,000
Federal payment to the District of Columbia Courts	166,193,000
Defender Services in the District of Columbia Courts	34,000,000

Federal Funds—Continued

<i>Item</i>	
Federal payment to the Court Services and Offender Supervision Agency for the District of Columbia	154,707,000
Federal Payment to Children's National Medical Center	5,000,000
Federal Payment to St. Coletta School	2,000,000
Federal Payment to the Department of Public Works Division of Transportation	1,000,000
Federal Payment for Anacostia Waterfront Initiative	55,000,000
Federal Payment to D.C. for Capital Infrastructure Development	13,100,000
Federal Payment to D.C. for Family Literacy	4,000,000
Federal Payment to D.C. Charter School Facilities	20,000,000
Total, Federal funds in bill	512,000,000
Federal Grants	2,019,331,000
Total, Federal funds	2,531,331,000

FEDERAL PAYMENT FOR DISTRICT OF COLUMBIA RESIDENT TUITION SUPPORT

The Committee recommends \$17,000,000 in Federal funds for the District of Columbia Tuition Assistance Program. Initial funding of \$17,000,000 for this program was included in the Fiscal Year 2000 Appropriations Act. On November 12, 1999, Public Law 106-98, the District of Columbia College Access Act of 1999, was signed into law. The Act established the Tuition Assistance Program, a scholarship fund under the direction of the Mayor of the District of Columbia, in consultation with the Secretary of Education.

Under the Act, scholarships are awarded to District residents for undergraduate education within 3 years of graduation or getting a graduate equivalent degree [GED]. The applicant must be a District resident for 12 consecutive months before the academic year of the award. Scholarships pay the difference between in-State and out-of-State tuition, with a cap of \$10,000 per student per school year, at public universities. Scholarships may also be used for tuition at private colleges in the metropolitan area and at private Historically Black Colleges and Universities anywhere in Maryland or Virginia, with a cap of \$2,500 per student per year. In addition, the District of Columbia College Access Improvement Act of 2001 (Public Law 107-157) expanded the Tuition Assistance Program to individuals who enroll in an institution of higher education more than 3 years after graduating from a secondary school and to individuals who attend private, historically black colleges and universities nationwide.

In addition to expanding the number of students served by the D.C. Tuition Assistance grant program, the Committee urges the Mayor and the City Council to look for ways to further develop public/private partnerships, such as the existing one with the D.C. College Access Program, as such partnerships can dramatically increase access to college.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA COURTS

The Revitalization Act requires that, commencing in fiscal year 1998, the Federal Government finance the D.C. courts, including the operations of the D.C. Court of Appeals,

Superior Court, and the court system. Beginning with the fiscal year 1999 appropriations act, the Federal Government also provided funds for capital improvements. By law, the annual budget includes estimates of the expenditures for the operations of the courts prepared by the Joint Committee on Judicial Administration and the President's recommendation for funding the courts' operations.

The President's recommended level for fiscal year 2003 is \$159,045,000, which includes \$127,394,000 for the courts operations; \$31,651,000, to remain available until September 30, 2004, for capital improvements for District courthouse facilities.

D.C. Courts Budget Request

The D.C. Court system submitted a budget request totaling \$181,416,000 in Federal funds for fiscal year 2003. The operations request of \$131,064,000 exceeds the President's proposed operations budget by \$3,670,000 and would be used for superior court staffing, equipment and program requests. The capital request of \$50,352,000 exceeds the President's proposed capital budget by \$18,701,000, of which \$12,100,000 would be used for the restoration and renovation of the Old Courthouse as the new D.C. Court of Appeals, \$16,068,000 for creation of Family Court space within the existing courthouse facilities and the balance for ongoing capital projects.

Committee Recommendation for Operations

The President's budget proposal recommends \$127,394,000 for the court's operations. The Courts requested \$131,064,000 for operations, which includes \$13,596,000 for the Family Court of the Superior Court. The Committee recommends \$130,992,000 for the courts' operations, of which \$15,096,000 is to support reform of the Family Court through the hiring of additional judges, magistrates, clerks and the necessary support staff. The Committee has also included a new Guardian ad litem program to improve the processing of child abuse and neglect cases in the District of Columbia Superior Court.

Committee Recommendation for Capital Budget

The President's budget proposal recommends \$31,651,000, to remain available until September 30, 2004, for capital improvements for District courthouse facilities. The Courts requested \$50,352,000 for infrastructure. The Committee recommends \$35,201,000 for capital improvements to District courthouse facilities.

Family Court

The President's request supports the entire Family Court budget for fiscal year 2003 and is included in the normal operations and capital accounts for the Courts. The Court's budget includes \$13,596,000 for operating costs of the Family Court, reflecting a \$6,782,000 increase over fiscal year 2002 to implement the necessary increases in staffing. The President's request supports \$16,068,000 for Capital improvements to be used for continued creation of a family-friendly court (including the continued installation and operation of the Family Court module of the Integrated Justice Information System). This amount is approximately the same as was dedicated to Family Court capital improvements in fiscal year 2002 (\$16,673,000). The Committee notes that the funding provided to the Family Court in fiscal year 2002 was not available to the Courts until June 24, 2002, as required by specific language in the fiscal year 2002 District of Columbia Appropriations Act (Public Law 107-96 115; Stat. 929). The Committee supports the President's recommendation for the Family Court and adds \$1,500,000 for a Guardian ad litem Program, described below. The total Committee recommendation for the Family Court is \$31,164,000 in fiscal year 2003.

Guardian ad Litem Program

The Committee recommends an increase of \$1,500,000 above the President's request to establish the Guardian ad Litem Program, to be administered by the District of Columbia Superior Court, to provide guardians ad litem to abused and neglected children. The Program will develop the capacity to improve the quality, training and recruitment of guardians ad litem to abused and neglected children. In establishing the program, the Courts shall enter into a contract with a non-profit organization to improve the quality of guardian ad litem representation to abused and neglected children. The Courts shall use the funds provided to establish the infrastructure to support a permanent guardian ad litem program operating in close coordination with the D.C. Courts. The Courts may use these funds in support of the necessary recruitment and training programs, supervision, technology and facilities to support the establishment of the program. In addition, the Committee encourages the Courts and the non-profit organization to examine the program's ability to represent foster parents and relative caregivers in child welfare cases.

The Committee is concerned that the Family Court of the Superior Court of the District of Columbia is facing a shortage of lawyers qualified to represent children in abuse and neglect cases. The Committee also believes that the court needs to improve the quality of representation and ensure that a capable and qualified group of lawyers continue to embark on careers representing children in abuse and neglect cases.

The current procedure involves paying individual practitioners on an hourly basis to represent children. This system has several shortcomings, including a lack of supervision and accountability, lack of prestige, and lack of professional support and training for attorneys.

As the Superior Court implements the new Family Court, works to improve compliance with the Adoptions and Safe Families Act, and sets attorney practice standards in compliance with the Family Court Act of 2001, it is imperative that these problems be addressed quickly.

The Committee understands that the Superior Court is interested in implementing a mixed system of representation—one in which an organization provides representation to a significant percentage of children and individual practitioners represent the remaining children. An organization that can provide supervision and training to its own staff attorneys and that can provide training and technical assistance to individual practitioners will raise the standard of practice in the Family Court.

The Committee understands that the cost of providing the organizational support to a mixed system of representation involves more than simply hiring lawyers to represent children. In order for the court to achieve the necessary accountability, high quality of representation and assistance in supporting and recruiting sole practitioners, the court needs to invest in the infrastructure that will allow for long-lasting change. Therefore, the Committee has included additional appropriations to ensure that the organization builds the capacity to represent children in future years.

Administration of Justice in Courtroom Operations

The Court has requested \$3,670,000 above the President's request to enhance court-wide support staff, training and support. The Committee recommends an increase of \$2,098,000 and 28 FTE above the President's request to improve the efficiency of the operations of the Court. The D.C. Courts staffing

level per courtroom is considerably lower than best practice standards, which affects the fair and expeditious adjudication of cases. The Committee has received testimony that the lack of support staff slows case processing and the accessibility of information to District residents. Investments made in the fiscal year 2001 District of Columbia Appropriations Act to provide pay parity among the D.C. Courts' non-judicial employees and the Federal non-judicial employees has resulted in a significant reduction in turnover, from 10.92 percent to 5.52 percent annually.

The Committee recommendation builds upon this investment. In addition, the Court has undertaken several new responsibilities without additional resources. In particular, the Committee recommendation supports the efforts of the Domestic Violence Unit to improve services; the expansion of the juvenile probation monitoring program; effective maintenance of facilities; and improved financial management. The Committee recommends the following allocation of the increase of \$2,098,000 above the President's budget:

The Committee recommends an increase of \$840,000 and 12 FTE for courtroom operations and support of the Domestic Violence Unit, Criminal Division, and Appeals Court. In particular, the increases for the Domestic Violence Unit will operate the Multi-Door Dispute Resolution Program and coordinate the calendars for judges, attorneys, and social workers to maintain the One Judge-One Family model.

The Committee recommends an increase of \$321,000 and 6 FTE above the President's request to improve financial management in the Court System and to oversee the management of timely voucher payments to Defender Services court-appointed attorneys. This function, previously managed by the Public Defender Service, was taken over by the Courts in 2002 to centralize the payment of court-appointed attorneys.

The Committee recommends an increase of \$382,000 and 6 FTE above the President's request for the Court System to improve the management of courthouse facilities. This increase supports a project director for the Old Courthouse restoration, a general project manager for all facilities improvements, and four engineer/mechanics to improve maintenance of the Courts.

The Committee recommends an increase of \$154,000 and 2 FTE above the President's request to expand court wide technology and ensure adequate support staff for information technology.

The Committee recommends an increase of \$401,000 and 2 FTE above the President's request for the Social Services Division of the Superior Court to continue a successful grant-started Probation Monitoring program to monitor high-risk juveniles on probation. In addition, this increase will provide for two initiatives to improve the operation and standing of the court: accreditation with the American Psychological Association; and technical assistance for evaluation of Juvenile Probation Program.

Committee Recommendation for Capital Improvements

The Committee recommends an increase of \$3,550,000 above the President's budget to enhance capital improvements.

Old Courthouse Rehabilitation

Restoration of the Old Courthouse at 451 Indiana Avenue is an 8-year, approximately \$60,000,000 project that began in 1998. The project will enable the Courts to readapt this historic structure to house the District of Columbia Court of Appeals, thereby alleviating the critical space shortage for the Superior Court in the Moultrie Courthouse,

while protecting the integrity of this historic structure. The Old Courthouse, which was constructed from 1820 to 1849, is listed on the National Register of Historic Places. It has also been designated an Official Project of Save America's Treasures, a partnership between the White House Millennium Council and the National Trust for Historic Preservation dedicated to celebration and preservation of the nation's threatened cultural treasures.

In addition, the National Law Enforcement Memorial has been granted legislative authority to construct a museum on a portion of the site. The Courts are working with the Memorial to coordinate construction plans.

The Committee provided funds in fiscal year 2002 to help prevent further deterioration of the structure; permit removal of asbestos and other hazardous materials; finance historical significance and other studies; and fund the first stage of detailed design work and project management costs.

The Committee has included funds to continue to support the restoration and re-adaptive use of the Old Courthouse. The restoration of the Old Courthouse is integral to the expansion of the Family Court, as services will move from the Moultrie Building to the Old Courthouse as space becomes available.

This investment will improve efficiencies by co-locating the offices that support the Court of Appeals and by providing some 37,000 sq. ft. of critically needed space for Superior Court functions in the existing Moultrie Courthouse. Built in 1978 for 44 trial judges. The courthouse now houses 59 trial judges and 15 hearing commissioners in the Superior Court, 9 judges in the D.C. Court of Appeals, additional Senior Judges in both Courts, and additional administrative support staff. Clearly, the main courthouse is filled beyond capacity. In addition, the Committee recommends a net increase of 18 new staff to strengthen the Family Court and improve case processing. It is necessary for the Courts to begin the process this year of creating a dedicated Family Court space in or near the District court facilities, as required in the Family Court Reform Act of 2001. The Committee directs the Courts to report to the Congress on the expenditure of this year's appropriation for Family Court reforms and capital investments by June 1, 2003. In this report, the Committee seeks an analysis of the expenditure of funding to meet the requirements of the D.C. Family Court Reform Act of 2001.

Integrated Justice Information System

The Committee recommends \$4,220,000 for the Courts to continue implementation of the Integrated Justice Information System, which is \$1,500,000 above the President's request. The Committee is encouraged by the progress the Courts have made in developing a detailed plan for integrating the 18 different computer systems necessary to track offender information and swiftly adjudicate cases. The Committee directs the Courts to coordinate information systems with entities in the District of Columbia, especially the D.C. Child and Family Services Agency and the Metropolitan Police Department. The Committee is encouraged that the General Accounting Office's evaluation of the IJIS Plan determined IJIS would be effective in increasing the quality and efficiency of court operations, once implemented. The Committee intends to continue closely monitoring the implementation of IJIS, as it is critical to efficient case processing, and ensuring fair, swift, and accessible justice.

Transfer Authority

The Committee authorizes the Courts to transfer up to \$1,000,000 between entities within the Federal Payment to the District

of Columbia Courts account. This flexibility will be especially important in implementing Family Court reforms.

Reporting requirements

The courts are directed to submit monthly reports, through the General Services Administration, to the Senate and House Committees on Appropriations, within 15 calendar days after the end of each month, on the status of obligations by object class and a monthly personnel summary by position, full-time equivalent positions (FTE's), and program/function. The obligation report should show, at a minimum, the original operating plan, current operating plan, obligations year to date, percent obligated, planned obligations year to date, percentage deviation from plan year to date, projected total obligations end of year, and projected surplus/deficit.

In addition, the obligation report shall: (1) under the Court System Spending Plan, include a breakdown of expenditures for the Counsel for Child Abuse and Neglect Program and the program of representation of indigents in criminal cases under the Criminal Justice Act; (2) include a monthly breakdown of expenditures for the District of Columbia courts' capital improvements; and (3) where year-to-date obligations exceed or fall below the plan estimates by 1 percent or more, include an explanation of why a category is over- or under-budgeted.

D.C. courts capital expenditures

The Committee requests OMB to report to the Committee during fiscal year 2003 on any capital improvements to the District's courthouse facilities. The report shall: (1) identify the facility undergoing improvement; (2) include a complete description of the project to be undertaken; (3) itemize each improvement, renovation, or service and its cost; (4) include the contracting date, contracting party, and a timeline for the completion of each contracted improvement, renovation, or service; and (5) identify any design studies for which funding is sought.

DEFENDER SERVICES IN DISTRICT OF COLUMBIA COURTS

The Committee recommends \$34,000,000 for attorney programs for indigent defendants, child abuse and guardianship cases administered by the District of Columbia Courts. The President's request of \$32,000,000 maintains the current rates for attorneys and investigators.

The D.C. Court request of \$45,014,000 consists of: (1) \$31,355,000 for the Criminal Justice Act [CJA] program; (2) \$12,661,000 for the Counsel for Child Abuse and Neglect [CCAN] program; and (3) \$988,000 for the Guardianship program.

The Office of Defender Services request includes an additional \$13,014,000 in Federal funds, not requested by the President, for an increase in the hourly rate paid to attorneys and investigators in the CJA and CCAN Programs from \$65 per hour to \$90 per hour. The Committee requests that the District of Columbia courts provide quarterly reports to the Committees on Appropriations of the Senate and the House of Representatives on obligations from and remaining unobligated balances of the Defender Services account.

Defender Services Rate Increase

The Committee recommends an increase of \$2,000,000 above the President's request to increase the hourly rate of Defender Services attorneys from \$65 per hour to \$75 per hour. Court-appointed attorneys provide constitutionally mandated assistance of legal counsel to the District's indigent defendants. Promoting equity in the quality of legal services provided to District of Columbia residents, regardless of economic status, is vitally important to the fair administration

of justice. It is particularly challenging to the D.C. Courts in light of the considerably higher hourly rates paid in the nearby Federal court (\$90 per hour). The Federal hourly rate is currently 39 percent higher for attorneys. Therefore, the Committee recommends an increase to \$75 per hour in fiscal year 2003. The recommended increase would allow the D.C. Courts to provide a more attractive rate for both attorneys and investigators, especially needed considering local economic conditions.

Court-appointed attorneys in the Counsel for Child Abuse and Neglect [CCAN] serve in family proceedings in which child abuse or neglect is alleged, or where the termination of the parent-child relationship is under consideration and the parent, guardian, or custodian of the child is indigent. The assistance of these attorneys is essential to the Courts' effort to ensure that vulnerable children are well represented in Court and that they are placed in stable, permanent homes expeditiously. The proposed rated increase would help attract qualified attorneys to the program and support reform of the Family Court.

D.C. Courts Administrative Provisions

The Committee recommends an Administrative Provision to increase the hourly rate paid to court-appointed attorneys representing indigent defendants in the District of Columbia from \$65 per hour to \$75 per hour. In addition, the Committee recommends an increase from \$75 per hour to \$90 per hour on October 1, 2003, to match the rate currently paid to Federal attorneys.

The Committee recommends a provision to allow employees of the District of Columbia Courts to enroll in the Federal long-term care insurance program, consistent with other Federal benefits provided to D.C. Courts employees. Long term care insurance is available to other quasi-Federal agencies and to other District agencies under Federal oversight pursuant to the National Capital Revitalization and Self-Government Improvement Act of 1997, the Court Services and Offender Supervision Agency.

The Committee recommends a modification to the administration of outreach activities under the District's Crime Victims Compensation Fund. The Committee recommends that funds designated for outreach activities shall be deposited into the Crime Victims Assistance Fund, rather than be paid to the Mayor. This provision will allow the District of Columbia to immediately begin implementing programs designated for victims outreach.

The Committee recommends that fines collected by the Superior Court of the District of Columbia in Driving Under the Influence ("DUI") and Driving While Impaired ("DWI") cases be transferred to the District of Columbia Office of the Corporation Counsel to enhance the prosecution of these cases. The Superior Court of the District of Columbia will continue to collect fines in criminal cases under the District's traffic alcohol laws and be deposited into the Crime Victims Compensation Fund. The Committee does not recommend making this provision retroactive, as requested by the District, but does support increasing the District's capacity to prosecute "DUI" and "DWI" cases effectively.

Drunken driving offenses accounted for over 30 percent of the approximately 12,000 criminal cases the General Crimes Section papered in fiscal year 2001. This represents a staggering caseload for each of the eight attorneys who prosecute. Additionally, with the implementation of the Community Court Project, the attorneys in the General Crimes Section have been given more work than ever before. Meeting these additional de-

mands, while maintaining prosecutorial intensity in drunken driving cases, necessitates the transfer of funds.

FEDERAL PAYMENT TO THE COURT SERVICES AND OFFENDER SUPERVISION AGENCY FOR THE DISTRICT OF COLUMBIA

The Revitalization Act established the Court Services and Offender Supervision Agency [CSOSA] for the District of Columbia to assume the functions of the District's pretrial services, adult probation, parole, and adult offender supervision functions. CSOSA was certified as an independent Executive Branch agency on August 4, 2000, ending a 3-year period of trusteeship.

The Revitalization Act relieved the District of Columbia of "state-level" financial responsibilities and restructured a number of criminal justice functions, including pretrial services, parole, and adult probation. Following passage of the Revitalization Act, under the direction of a Trustee appointed by the U.S. Attorney General, three separate and disparately functioning entities of the District of Columbia government were reorganized into one Federal agency. CSOSA assumed its probation function from the D.C. Superior Court and its parole function from the D.C. Board of Parole. The Revitalization Act transferred the parole supervision functions to CSOSA and the parole decision-making functions to the U.S. Parole Commission (USPC). On August 5, 1998, the parole determination function was transferred to the USPC, and on August 4, 2000, the USPC assumed responsibility for parole revocation and modification with respect to felons. The CSOSA appropriation is comprised of three components: The Community Supervision Program (CSP), the District of Columbia Pretrial Services Agency (PSA), and the Public Defender Service (PDS) for the District of Columbia. PDS is a federally funded independent D.C. agency responsible for the defense of indigent individuals and receives funding by transfer from the CSOSA appropriation. The CSP is responsible for supervision of offenders (either on probation or parole), and the PSA is responsible for supervising pretrial defendants.

The Committee recommends \$154,707,000 for fiscal year 2003 for CSOSA. The Committee does not recommend the amount associated with Federal employee retirement costs, \$7,218,000.

The funding provided will enable CSOSA to enhance its community-based and sanctions-based supervision strategy and support the fair administration of justice by providing the courts and the U.S. Parole Commission with timely, accurate and complete information required in their decision-making process. The Committee recommendation also includes transfers to the D.C. Pretrial Services Agency for the D.C. Public Defender Service.

The mission of CSOSA for the District of Columbia is to increase public safety, prevent crime, reduce recidivism, and support the fair administration of justice in close collaboration with the community.

The Community Supervision Program's operations focus on using proven best practices to improve offender supervision and reduce recidivism. Caseloads have been reduced and officers relocated to community field offices to facilitate close supervision. Every offender is assessed to determine both risk to public safety and need for treatment and other interventions. Conditions of release are enforced through drug testing, home and work monitoring visits, and other means. A system of graduated sanctions is being put in place to meet every violation with a swift and appropriate response. There is some evidence that these initiatives are beginning to work. For example, parolee re-arrests sustained a 67 percent drop from May 1998 through the end of 2000.

The Committee notes with concern that the 1997 District of Columbia Revitalization Act shifted the responsibility for D.C. parolees to the United States Parole Commission (USPC). Subsequently, the 1998 Phase-Out Act terminates the USPC by November of 2002. Additionally, the Committee notes that the government of the District of Columbia has proposed several modifications to the current structure of criminal justice functions performed by Federal agencies as a result of the 1997 District of Columbia Revitalization Act. The Committee requests that the District of Columbia, the Court Services and Offender Supervision Agency, and the United States Parole Commission submit a plan, to the President and Committees on Appropriations of the Senate and the House of Representatives no later than March 1, 2003, for the continuation of the parole determination, parole revocation, and parole modification functions with respect to District of Columbia resident adult sentenced felons, currently performed by the United States Parole Commission, by the appropriate, authorized, Federal entity. The intent of the Revitalization Act was to relieve the District of the responsibility of parole decision-making functions and vested parole supervision functions in the Court Services and Offender Supervision Agency. The continuation of these responsibilities is imperative to effective criminal justice in the District of Columbia. The USPC currently faces a backlog to process cases efficiently with only 15 case examiners to supervise 9,000 D.C. inmates and over 4,000 Federal inmates. The USPC and CSOSA estimate that the current population of 3,300 active D.C. parolees will grow to 3,800 next year, and continue to expand, with no corresponding expansion of Agency supervision or halfway house bed space.

The fiscal year 2002 appropriation provided \$147,300,000, including \$34,773,000 in program increases, for CSOSA. Resources were provided to build agency infrastructure, establish and improve mission critical programs, enhance drug testing and sanctions-based treatment, improve supervision of pre-trial defendants and post conviction offenders, expand intermediate sanctions and offender re-entry programs, to continue planning and design proposals for a residential sanctions center, and to make improvements in information technology.

Based on the results the Agency has achieved to date and the anticipated outcomes expected in the future, the Committee is recommending an increase of \$7,407,000 over the fiscal year 2002 appropriation for the purpose of funding non-policy adjustments to base, improving supervision, drug testing, intervention and treatment, including funds for defender services program enhancements. The Committee recommends the following program changes:

Supervision.—\$7,070,000 and 102 positions to establish a new field office east of the Anacostia River, to continue to reduce general supervision case loads from 64 to 50, and to establish new diagnostic teams.

Drug Testing.—\$2,238,000 and 22 positions to enhance drug lab capacity and to establish drug testing collection capabilities at the community supervision program's new field offices.

Treatment and Support Services.—\$848,000 and 16 positions to provide additional sanction-based substance abuse treatment.

Learning Lab and Support.—\$464,000 and 8 positions for learning labs to provide literacy training and job placement assistance and for relocation of staff from Building B of the D.C. Courts.

Sanctions.—\$13,015,000 for a re-entry and sanctions center so that swift and appropriate sanctions can be imposed on individ-

uals under supervision at the first sign of relapse, and to improve offender re-entry programs;

D.C. Pretrial Services Agency.—\$1,733,000 and 6 positions to reduce supervision caseload ratios for high-risk felony defendants, to complete enhancement of automated case management systems, and to provide sanctions-based substance abuse treatment for an additional 400 defendants; and

Public Defender Service.—\$874,000 and 6 positions to provide effective legal and rehabilitative transition services through the community re-entry program.

The Committee strongly encourages the Director of the Court Services and Offender Supervision Agency to immediately begin renovation of the Re-entry and Sanctions Center (RSC). The Center provides residential drug treatment and re-entry counseling to the highest risk offenders returning to the District. The Committee provided \$13,015,000 in fiscal year 2002 for renovation of the RSC.

The Committee understands that planning efforts with the government of the District of Columbia have been underway since 2001. However, the treatment and successful transition of offenders and defendants is a principal concern. It is estimated that 1,900 offenders and defendants require residential treatment services annually and do not receive those services because of limited resources. A fully operational RSC will greatly prevent rearrest of offenders and improve the safety of the greater community. The Director of the CSOSA shall provide a status report to the Committee on Appropriations on the renovation of the Center and improvement of services no later than September 1, 2003.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA FOR SECURITY COSTS RELATED TO THE PRESENCE OF THE FEDERAL GOVERNMENT

The Committee is aware that the District police, fire, and emergency personnel have had to provide security for a number of events due to the fact that the District of Columbia is the seat of the Federal Government and headquarters of many international organizations. Recently, the need for D.C. to provide security has increased, thereby increasing over-time costs for personnel and pulling police from neighborhood patrols. The President has supported reimbursing the District for these costs. The Committee recommends \$15,000,000 to support this fund, while ensuring accountability from the city on how the funds are expended.

The Committee is pleased that the District and the Washington Metropolitan Area Transit Authority (WMATA) have agreed upon a plan for ensuring interoperable communications in and around Metro Rail tunnels. The Committee encourages the District and WMATA to sign the Memorandum of Agreement and implement the radio interface system expeditiously.

The Committee is concerned that security measures taken by Federal law enforcement agencies in the District of Columbia since September 11, 2001 are unattractive and contribute to a sense that the Nation's Capital is an armed fortress. Certainly, security is a matter of the highest importance as Washington, D.C. remains a prime target for future attacks. Security does not have to be unsightly. The National Capital Planning Commission (NCPC) Interagency Task Force issued a report in October, 2001 entitled "Designing for Security in the Nation's Capital" which sets forth recommendations for developing coordinated urban security design that will maintain the city's safety without detracting from its historic beauty. The Committee directs the Office of Management and Budget, in consultation with the United

States Park Police, the National Park Service, the Secret Service, the Federal Bureau of Investigation, the United States Protective Service, the Department of State, and the General Services Administration to review the NCPC study and submit a report to the Committees on Appropriations in the Senate and the House, no later than February 5, 2003, on their plans to improve the appearance of security in accordance with the recommendations of the NCPC report.

FEDERAL PAYMENT FOR HOSPITAL BIOTERRORISM PREPAREDNESS IN THE DISTRICT OF COLUMBIA

The Committee has included \$10,000,000 to begin to prepare the District's hospitals for a possible attack that may include the use of biological, chemical, radiological, and nuclear weapons, as well as high yield explosives. In such a circumstance, decontamination and quarantine become critical components of any response plan. Patients must be decontaminated before they can be treated, otherwise their contamination could potentially shut down entire facilities.

Of the funds provided, the Committee recommendation includes \$5,000,000 for Children's National Medical Center and \$5,000,000 for Washington Hospital Center. The Committee recognizes that, as the only children's hospital in this region, Children's National Medical Center would likely be the place that children would be treated in the event of a terrorist attack. Similarly, the Committee understands that Washington Hospital Center is the largest hospital by a factor of three in the District of Columbia and that it played a central role in responding to the effects of the September 11 attack on the Pentagon. Having the city's largest trauma center and its only burn center, Washington Hospital Center would undoubtedly play a critical role in treating the city's residents and tourists in the event of an attack.

If the District of Columbia were attacked by weapons of mass destruction or a biological agent, decontamination of patients would occur prior to transport to the emergency department at Children's Hospital and Washington Hospital Center to avoid endangering other patients and medical personnel. To accomplish this, both Children's Hospital and Washington Hospital Center plan to construct buildings adjacent to their emergency departments which would have separate air handling and filtration systems.

In addition to containment facilities, the Committee is providing funds for quarantine units which will need to function independently of the hospitals. To enter the unit, patients and staff would need to be decontaminated and fitted with protective equipment. Space would be designed to allow for this essential process. In a self-contained unit, air filter and negative pressure systems are utilized to limit the possibility of contagion, while supporting patients. These units could be sealed off, protecting other patients from infection, and would require sufficient supplies for potentially prolonged periods, which is characteristic of these diseases.

FEDERAL PAYMENT TO THE CHILDREN'S NATIONAL MEDICAL CENTER

The Committee recommends a Federal payment of \$5,000,000 to the Children's National Medical Center for capital improvements.

FEDERAL PAYMENT TO ST. COLLETA OF GREATER WASHINGTON

The Committee recommends a Federal payment of \$2,000,000 for St. Colleta of Greater Washington for costs associated with establishing a school for mentally retarded and multiple-handicapped adolescents and adults in the District of Columbia.

FEDERAL PAYMENT TO THE DEPARTMENT OF
TRANSPORTATION IN THE DISTRICT OF CO-
LUMBIA

The Committee recommends \$1,000,000 included in the President's budget, to be used to implement Transportation Systems Management initiatives recommended by the National Capital Planning Commission (NCPC). The District of Columbia and NCPC requested \$16,000,000 to implement transportation solutions, to alleviate pressure caused by the closure of Pennsylvania Avenue.

FEDERAL PAYMENT TO THE CHIEF FINANCIAL
OFFICER OF THE DISTRICT OF COLUMBIA

For a Federal payment to the Chief Financial Officer of the District of Columbia, \$15,000,000 for education, security, economic development, and health initiatives in the District of Columbia.

FEDERAL PAYMENT TO THE DISTRICT OF
COLUMBIA FOR CHARTER SCHOOL FACILITIES

The Committee recommends an increase of \$20,000,000 for the Charter School Credit Enhancement Fund to facilitate the purchase, construction and/or renovation of facilities for public charter schools in the District of Columbia. These funds would add to Federal seed money (\$5,000,000) provided in 1996. The Mayor requested \$5,000,000, however the Committee is committed to providing a significant investment in school choice in the District. D.C. public schools are consistently not providing adequate services to students, particularly in Special Education. The Mayor requested \$9,000,000 to construct Special Education facilities in the District to alleviate some of the need for children with special needs to go to schools outside of the city. The Committee is supportive of providing alternative educational opportunities for children with special needs. The Committee recommends that at least three of the loans provided to charter schools contribute to schools that educate children with special needs.

The District of Columbia has over 40 charter schools, the most of any public school system in the country. The Committee commends the work that these schools are doing in providing real choice to District school children and their families. Many charter schools, however, are beginning to outgrow their current facilities and need more space. Some new charter schools have not been able to open because of their inability to identify and acquire suitable and affordable facilities. This situation is made more difficult by the high cost of real estate in the District of Columbia. Charter schools face an additional challenge in that many have not been operating long enough to establish a sufficient credit history to qualify for commercial bank loans. To address this problem, the Committee recommends enhancing three charter school initiatives in the District of Columbia. The cornerstone of the commitment of school choice in the District is the Committee's recommendation of \$20,000,000 for critical investments in the development of charter schools. The Committee recommendation includes \$5,000,000 for the Credit Enhancement Fund for Public Charter Schools to assist schools in securing financing for facilities improvements and \$10,000,000 to establish a Direct Loan Program for Public Charter Schools. In addition, the Committee recommendation includes \$4,000,000 to supplement the Public Charter School per pupil facility allocation in fiscal year 2003. These funds will be used to set a floor of \$1,500 per pupil for facilities. Finally, the Committee recommendation provides \$1,000,000 for the District to establish an Office of Charter School Financing to administer the programs described above.

In addition to investments in financing and loans to charter schools for the purchase

or renovation of facilities, as well as the cost of equipment, the Committee recommends two initiatives to greatly increase the administration and effectiveness of local funds provided to public charter schools.

The Committee recommendation of \$4,000,000 to supplement the funding available to Public Charter Schools in the District of Columbia in fiscal year 2003, is to be used to establish a floor of no less than \$1,500 per pupil for Charter Schools. The Committee is greatly concerned by the continued decline in the rate of per pupil allotments given to charter schools to assist them with facility maintenance and repair. The Committee recognizes that charter schools' ability to secure the private financing necessary to sustain their daily operations are extremely dependent on their ability to demonstrate a stable income and dependable sources of ongoing revenue. The Committee encourages the Mayor and Council of the District of Columbia to establish a permanent minimum rate of allotment to charter schools of \$1,500.

The Committee recommendation of \$1,000,000 to be used by the District to establish an Office of Charter School Financing will increase the efficiency of the administration of charter school funds. Currently, the District of Columbia does not designate one office to meet the specific needs of charter schools seeking financing. The Committee recommends that a new Office of Charter School Financing should provide expert evaluation of charter school's applications for financing, as well as technical assistance to applicants.

Charter schools may repay the loans with the facilities allotment they receive as part of their per-pupil allocation. To ensure that these funds are invested in successful charter schools, the Committee directs that a charter school submit an application demonstrating concrete achievements of the school's educational mission and goals.

ADMINISTRATIVE PROVISIONS

Report to Congress

The Committee recommends various administrative provisions to improve the administration of charter schools; oversight of funding provided to promote adoption; and require more strict accountability of special education expenditures.

The Committee requires that the Comptroller General submit a study no later than April 1, 2003 detailing the national efforts to establish adequate charter school facilities and include recommendations for establishing a charter school incubator in the District of Columbia. A charter school incubator would house a small number of charter schools for up to 4 years of the school's first years in operation. The incubator would provide the schools with stable facilities for their students while giving school leaders the opportunity to identify and acquire permanent facilities. During their tenure in the incubator, charter school leaders would receive technical assistance on real estate development, equity development, fundraising, and guidance on effective school management.

The Committee recommends that GAO consult with the General Services Administration and other experts with relevant knowledge of the District of Columbia in the following areas: real estate development, charter school management, equity development and management, banking, municipal finance, and education. These experts shall include the Mayor, members of the Council, the Chief Financial Officer, the Superintendent of the District of Columbia Public Schools, the President of the District of Columbia Board of Education, the District of Columbia Public Charter School Board, and

the District of Columbia Charter School Consortium. The report should identify and examine any issues relating to charter school incubators including, but not limited to: the availability of surplus District, Federal, or private buildings that may be suitable for incubators; options for private development through existing tax incentives, special bonding authority, and other programs to encourage private development of public education facilities; financing strategies for ongoing incubator operations; incubator administration; facility design; legal issues; technical assistance needs of charter school officials in real estate development and fund-raising; selection process for charter schools to participate in the incubator; and any other issues the GAO identifies. Once the GAO has completed its study and issued its report, the Mayor of the District of Columbia and the Chairman of the Council of the District of Columbia shall develop, in consultation with the Chief Financial Officer of the District of Columbia, the Superintendent of the District of Columbia Public Schools, the President of the District of Columbia Board of Education, the District of Columbia Public Charter School Board, and the District of Columbia Charter School Consortium, as well as representatives of parents, advocacy groups and the private sector, a plan for establishing an incubator for charter schools in the District of Columbia. The Committee requests that this plan be submitted to the Committees on Appropriations of the Senate and the House of Representatives no later than 6 months from the time the GAO report is received by the Government of the District of Columbia.

Surplus Buildings

The Committee recommends that the Mayor of the District of Columbia and the Chairman of the Council of the District of Columbia, in consultation with the General Services Administration, shall conduct an assessment of all buildings currently held in surplus and those that might be made available within 1 year of the date of enactment of this Act. The Committee requires that, within 180 days of enactment, the Mayor submit a report to Congress on the findings of the assessment along with a plan for occupying at least 50 percent of the space available at the time such report is submitted. The Committee encourages the District of Columbia to provide surplus space to charter schools, consistent with the preferences as outlined in the D.C. School Reform Act.

Closure of Low Performing Schools

The Committee is concerned that several poor performing charter schools have not been closed by the District government. The Committee strongly supports charter schools, especially because of the strict accountability required of them. It is imperative that the District government close charter schools that are not meeting the education needs of students, either through mismanagement or a lack of resources. The Committee understands the need for charter school closures and encourages such action when necessary and appropriate. However, the Mayor shall ensure that the closure process allows for detained notice of failures and opportunity to contest or remedy such failures. Therefore, the Committee requires that the Mayor of the District of Columbia and the Chairman of the Council of the District of Columbia report to the Committees on Appropriations of the Senate and the House of Representatives no later than August 26, 2002 on the status of charter school closure. The Committee is seeking a detailed report on the actions taken by the District of Columbia Board of Education, the District of Columbia Public Charter School Board and the

District government to close poor performing charter schools in the District of Columbia. The Committee is particularly concerned by the delays in closure if the local government and oversight boards have determined certain charter schools must be closed.

Incentives to Promote the Adoption of Children

The Committee is concerned that funds provided in 1999 to the District of Columbia government to promote the adoption of children have yet to be expended. The Committee supported the extension of the availability of funds in 2000 and the expansion of the purpose for which the funds may be used in 2001. However, the funds have still not met their original intent, to increase adoption of children in the foster care system in the District of Columbia.

Therefore, the Committee recommends that the Mayor implement and fulfill the following performance measures to ensure that the intended services have begun with the ultimate goal of markedly improving the lives of the over 9,800 children served by the Child and Family Services Agency. Within 9 months of the date of enactment of this Act the Mayor must have established the following measures: (1) the Chief Financial Officer of the District of Columbia shall certify that not less than 50 percent of the funds provided for attorney fees and home studies have been expended; (2) the Mayor shall establish an outreach program to inform adoptive families and children without parents about the scholarship fund established with these funds; (3) the Mayor shall establish the location, necessary personnel and mission of the adoptive family resource center in the District of Columbia; (4) the Mayor shall identify not less than 25 percent of the eligible children in the District of Columbia foster care system with special needs and obligate not less than 25 percent of the funds provided in Public Law 106-113 (113 Stat. 1501) for adoption incentives and support for children with special needs; (5) the Mayor and District of Columbia Child and Family Services Agency shall increase the number of waiting children listed in their adoption photo-listing by 75 percent. In addition, the Committee requires that quarterly reports on the expenditure of these funds and reporting on the performance of the District in implementing the required measures is submitted to the Committees on Appropriations of the Senate and the House of Representatives.

Special Education Accountability

The Committee is concerned that a lack of oversight and regulation in the District of Columbia has resulted in a corruption of the process by which children are assessed for special education needs, referred for services to meet those educational needs, and represented in legal cases brought against the District of Columbia Public Schools under the Individuals with Disabilities Education Act (IDEA). The Committee is concerned that individuals providing representation to children and their parents are referring clients to an affiliated diagnostic testing service and affiliated special education school, further degrading the special education services provide to children in the District of Columbia.

The Committee recommends that the Chief Financial Officer of the District of Columbia require disclosure by attorneys in IDEA cases of any financial, corporate, legal, board memberships, or other relationships with special education diagnostic services, schools, or other special education service providers before paying any attorneys fees. The Chief Financial Officer may also require attorneys in special education cases to certify that all services billed in special edu-

cation were rendered. The Committee further recommends that the Chief Financial Officer will prepare and submit quarterly reports to the Committees on Appropriations of the Senate and the House of Representatives on the certifications and the amount paid by the government of the District of Columbia, including the District of Columbia Public Schools, to attorneys in cases brought under IDEA. The Committee's intent is that these reports would encompass all services for which attorneys receive awards, including those received under a settlement agreement or as part of an administrative proceeding, under the IDEA from the District of Columbia. The Committee recommends that the Inspector General of the District of Columbia conduct audits of the certification to ensure attorney compliance. The Committee highly recommends that the Council of the District of Columbia, in cooperation with the Mayor of the District of Columbia and the District of Columbia School Board, develop legislation to address conflicts of interest in special education cases.

FEDERAL PAYMENT FOR THE ANACOSTIA WATERFRONT INITIATIVE IN THE DISTRICT OF COLUMBIA

The Committee recommends \$55,000,000 to implement the Anacostia Waterfront Initiative. Of this amount, the Committee recommends \$5,000,000 to be used for development of parks and recreation facilities at Kenilworth Park on the Anacostia River. The President requested no funds for this activity. The Committee is dedicated to partnering with the District to develop local and Federal lands for sports and recreation in all areas of the city. The Committee intends that funds provided under this heading will establish a long-term commitment to the creation of clean, safe parks in every neighborhood. The Committee encourages the District to promote public/private investments that will contribute to parks of this kind.

In addition, the Committee recommends \$50,000,000, to be matched 100 percent with local funds, for the Water and Sewer Authority to implement the Combined Sewer Overflow Program. The Authority will begin system upgrades and design work on a new system to address combined sewer overflows (CSOs). The combined sewer system, serving 33 percent of the District, was constructed in 1890 by the Federal Government. The District has developed a Long Term Control Plan (LTCP) to deal with overflows of sanitary waste and storm-water into the surrounding rivers that occur during heavy rains. The overflows occur approximately 60-75 times per year.

The Committee believes that funds provided in fiscal year 2003 for the Combined Sewer Overflow Program represent a long-term commitment by the Federal Government to rebuild this infrastructure. The Committee expects that D.C. rate payers will bear half of the cost of this project. Twenty-four percent of the total cost can be attributed to EPA requirements of the District; however, EPA will only contribute approximately 13 percent of the cost to address these requirements. The Federal Government represents 17 percent of the usage. The plan totals \$1,200,000,000 over 15-20 years.

The Committee recommend this significant investment because of the Federal Government's role in building the original system and its responsibility to maintain the infrastructure that the government uses. This partnership with the District is the cornerstone of the Anacostia Waterfront Initiative. The Congress has made similar commitments to other areas, such as Boston, San Diego, and the United States-Mexico border.

The scale and cost of this project exemplifies how critical infrastructure, starved over the years, is now nearly non-functional.

FEDERAL PAYMENT FOR CAPITAL INFRASTRUCTURE DEVELOPMENT

The Committee recommends \$13,100,000 to invest in capital infrastructure development. Of this amount, \$10,000,000 is for the creation of an interoperable Unified Communications Center to serve as the central communications and command center for all D.C. first responders. The President requested no funds. The fiscal year 2002 Department of Defense and Emergency Supplemental Appropriations Act (Public Law 107-117; 115 Stat. 2303) provided \$9,000,000 to the District for a portion of the technology to support this center. This project is already up and running and any additional funds will be implemented quickly and effectively to expand technology, train staff, and renovate facilities.

In addition, the Committee recommends \$100,000 for restoration of Eastern Market. The District requested \$150,000 for restoration of Eastern Market. The District is undertaking a major renovation and restoration of the historic Eastern Market near the Capitol Hill neighborhood. This renovation would contribute to the economic development of the Pennsylvania Avenue SE corridor and restore an historic building.

The Committee recommends \$3,000,000 in fiscal year 2003 for the design and construction of a state-of-the art forensic laboratory in the District of Columbia. The President requested no funds for this purpose. The Committee understands that this laboratory will consolidate functions that are critical to the investigation of crimes in the city, while reducing the District's reliance on Federal entities. Currently, local law enforcement personnel often rely on the facilities of the Federal Bureau of Investigation (FBI), Drug Enforcement Agency (DEA), and the Bureau of Alcohol Tobacco, and Firearms (ATF) when investigating crimes. Aside from diverting space and resources from Federal investigators, this reliance on Federal facilities results in an increased risk of contamination, poor communications, and possible degradation of evidence.

The Committee also understands that the District's own forensics facilities are antiquated and do not meet national standards. Ultimately, poor space and equipment impairs the quality of evidence gathered by investigators and has been one factor in the District's inability to prosecute many violent crimes. The Committee expects that the city will bolster this Federal contribution with additional local funds so that this project will be on a pace for completion by fiscal year 2005.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA FOR FAMILY LITERACY

The Committee recommends \$4,000,000 to expand the Family Literacy Program in public schools in the District of Columbia. The Family Literacy program will address the needs of literacy-challenged parents while endowing their children with an appreciation for literacy and strengthening familial ties. The program will be targeted at the District's so-called T-9 public schools, identified in the District's initiative to transform low-performing schools.

FEDERAL GRANTS

The District of Columbia participates as a State, county, and city in the various Federal grant programs. At the time the fiscal year 2002 budget was submitted, the District estimated that it would receive a total of \$2,019,330,000 in Federal grants during the coming fiscal year.

The following table shows the amount of Federal grants the District expects to receive and the office or agency that expects to receive them:

<i>Summary of Federal grants assistance to the District of Columbia</i>	
<i>Agency</i>	<i>2003 estimate</i>
Governmental Direction and Support:	
Office of the Mayor	\$849,000
Office of the City Administrator	18,142,000

SUMMARY OF ESTIMATES AND RECOMMENDATIONS FOR DISTRICT OF COLUMBIA FUNDS

DISTRICT OF COLUMBIA FUNDS

A total of \$7,307,787,000 was requested in the budget from the District of Columbia for fiscal year 2003 which was received by the Congress on July 12, 2002 and printed as House Document No. 107-242.

COUNCIL OF THE DISTRICT OF COLUMBIA

The Committee recommends \$13,604,000 and 163 full-time equivalent positions from local funds for the elected legislative branch of the District government.

The Council of the District of Columbia is the elected legislative branch of the District government. Its mission is to enact laws, approve the operating budget and financial plan, establish and oversee the programs and operations of government agencies, and set policy for the government.

OFFICE OF THE DISTRICT OF COLUMBIA AUDITOR

The Committee recommends \$1,596,000 and 17 full-time equivalent positions from local

funds for the operation of the Office of the District of Columbia Auditor.

The Office of the District of Columbia Auditor conducts thorough audits of the accounts and operations of the District government, with the goal of promoting economy, efficiency, and accountability.

ADVISORY NEIGHBORHOOD COMMISSIONS

A total of \$894,000 and 2 full-time equivalent position from local funds are included for the Advisory Neighborhood Commissions.

The mission of the Advisory Neighborhood Commissions is to serve as a liaison between the District government and the community.

Based on recommendations in the bill, a total of \$7,442,185,000 will be available to the District government during the next fiscal year. Included in this figure are appropriations from local funds, Federal grants, and private and other funds. In addition, \$156,121,000 from intra-District funds are available. The financing of the appropriations from District funds is from Federal payments and revenues from various local taxes, fees, charges and other collections received by the District government.

BALANCED BUDGET RECOMMENDED

The Committee is recommending a balanced budget in accordance with the District government's request. It is estimated that sufficient resources will be available from current revenue authority to finance operating expenses.

PERSONNEL

The Committee recommends a total of 32,799 continuing full-time equivalent positions to be financed from District of Columbia funds, Federal grants, private and other, and intra-District funds during fiscal year 2003 consisting of 32,685 positions under the general operating expenses and 114 from the enterprise funds.

A summary of the total resources by appropriation title follows:

DISTRICT OF COLUMBIA FUNDS

OPERATING EXPENSES

GOVERNMENTAL DIRECTION AND SUPPORT

The Committee recommends a total of \$295,136,000 and 2,655 full-time equivalent positions for the various department, agencies and activities funded through this appropriation. A comparative summary by agency follows:

OFFICE OF THE MAYOR

The Committee recommends \$7,844,000 and 77 full-time equivalent positions (including \$6,995,000 and 73 full-time equivalent positions from local funds and \$849,000 and 4 full-time equivalent positions from Federal funds) for the Office of the Mayor for fiscal year 2003.

The Office of the Mayor serves the needs of the public setting priorities, providing management direction and support to agencies, and restoring one government, good government, and self-government to the District of Columbia.

OFFICE OF THE SECRETARY

A total of \$2,609,000 and 27 full-time equivalent positions (including \$2,516,000 and 25 full-time equivalent positions from local funds and \$93,000 and 2 full-time equivalent positions from other funds) are included in the bill for the operation of the Office of the Secretary.

The mission of the Office of the Secretary of the District of Columbia is to serve as the sole custodian of the Seal of the District of Columbia and to authenticate its proper use in accordance with the law.

CITY-WIDE CALL CENTER

The Committee recommends \$2,238,000 and 38 full-time equivalent positions from local funds for the City-Wide Call Center.

The City-Wide Call Center serves as the District government's primary point of entry for citizens and customers attempting to access non-emergency services and information. The Call Center connects callers to agencies and individuals, and enters and tracks service requests.

OFFICE OF THE CITY ADMINISTRATOR

The bill includes, \$29,726,000 and 114 full-time equivalent positions (including \$11,584,000 and 98 full-time equivalent positions from local funds and \$18,142,000 and 16 full-time equivalent positions from Federal funds) for the Office of the City Administrator for fiscal year 2003.

The Office of the City Administrator provides District agencies with direction and support to improve government operations and enhance service delivery.

OFFICE OF PERSONNEL

The Committee recommends \$11,462,000 and 124 full-time equivalent positions (including \$10,652,000 and 113 full-time equivalent positions from local funds and \$812,000 and 11 full-time equivalent positions from other funds) for the Office of Personnel for fiscal year 2003.

The Office of Personnel provides comprehensive human resource management services that strengthen individual and organizational performance and enables the government to attract, develop and retain a highly qualified, diverse workforce.

HUMAN RESOURCES DEVELOPMENT FUND

A total of \$3,553,000 and 10 full-time equivalent positions from local funds are recommended for the Human Resources Development fund for fiscal year 2003.

The mission of the Human Resources Development Fund is to improve the performance of the employees of the District of Columbia by creating learning and development programs that enhance productivity and improve the quality and delivery of services for our citizens.

OFFICE OF FINANCE AND RESOURCE MANAGEMENT

The bill includes \$1,905,000 and 25 full-time equivalent positions from local funds for the Office of Finance and Resource Management for fiscal year 2003.

The Office of Finance and Resource Management provides financial services and management for client agencies, collect intra-District funds from District agencies to provide a central payments system District-Wide for all fixed costs, and provides all financial management services to agencies receiving capital funding.

OFFICE OF CONTRACTING AND PROCUREMENT

The Committee recommends \$13,503,000 and 166 full-time equivalent positions from local funds for the Office of Contracting and Procurement for fiscal year 2003.

The Office of Contracting and Procurement provides every city agency with procurement

service to effectively perform the functions of government in a customer-focused, timely, and cost-effective manner.

OFFICE OF THE CHIEF TECHNOLOGY OFFICER

A total of \$15,083,000 and 90 full-time equivalent positions (including \$15,069,000, 90 full-time equivalent positions from local funds, \$14,000 from other funds and \$0 from Federal funds) is recommend for the Office of the Chief Technology Officer for fiscal year 2003.

The mission of the Office of the Chief Technology Officer is to articulate the manner in which the government leverages its investments in information technology to attain the government's goal of being an efficient and effective service provider.

OFFICE OF PROPERTY MANAGEMENT

The Committee recommends \$12,623,000 and 62 full-time equivalent positions (including \$10,929,000 and 57 full-time equivalent positions from local funds and \$1,694,000 and 5 full-time equivalent positions from other funds) for the Office of Property Management for fiscal year 2003.

The mission of the Office of Property Management is to meet the needs of our clients by providing a building and work environment of the highest quality and services that meet industry best standards of excellence.

CONTRACT APPEALS BOARD

The total budget request of \$746,000 and 6 full-time equivalent positions from local funds is included in the bill for the Contract Appeals Board for fiscal year 2003.

The Contract Appeals Board provides an impartial expeditious, inexpensive, and knowledgeable forum for redressing and resolving contractual disputes between the District and the contracting communities.

BOARD OF ELECTIONS AND ETHICS

The Committee recommends \$3,585,000 and 50 full-time equivalent positions from local funds for the Board of Elections and Ethics for fiscal year 2003.

The mission of the Board of Elections and Ethics is to administer and enforce the election law of the District of Columbia by providing voter registration, qualifying candidates and measures for ballot access, and conducting elections in the District of Columbia.

OFFICE OF CAMPAIGN FINANCE

The total budget request of \$1,260,000 and 15 full-time equivalent positions from local funds is included in the bill for the Office of Campaign Finance for fiscal year 2003.

The Office of Campaign Finance ensures public trust in the integrity of the election process and government services by regulating the financial disclosure process and conduct of political campaigns and candidates, lobbyists, public officials, and political committees, pursuant to the D.C. Campaign Finance Reform and Conflict of Interest Act, the D.C. Merit Personnel, and the Federal Ethics Reform Act.

PUBLIC EMPLOYEE RELATIONS BOARD

The Committee recommends \$649,000 and 4 full-time equivalent positions from local funds for the Public Employee Relations Board for fiscal year 2003.

The Public Employee Relations Board provides for the impartial resolution of labor-management disputes in the District government pursuant to the District of Columbia Comprehensive Merit Personnel Act of 1978.

OFFICE OF EMPLOYEE APPEALS

The bill includes \$1,625,000 and 16 full-time equivalent positions from local funds for the Office of Employee Appeals for fiscal year 2003.

The Office of Employee Appeals renders legally sufficient, impartial, timely decisions

on appeals in which District government employees have challenged decisions regarding adverse actions, reductions in force, performance evaluations, and classifications of positions.

METROPOLITAN WASHINGTON COUNCIL OF GOVERNMENTS

The budget request of \$397,000 from local funds is included in the bill as the District's share of the Council of Government's budget for fiscal year 2003.

The mission of the Metropolitan Washington Council of Governments is to enhance quality of life in the Washington metropolitan region and to strengthen the region's competitive advantage in the global economy by providing a forum for consensus building and policy making; implementing intergovernmental policies, plans, and programs; and supporting the region as an expert information resource.

OFFICE OF THE CORPORATION COUNSEL

The Committee recommends \$52,397,000 and 531 full-time equivalent positions (including \$31,189,000 and 394 full-time equivalent positions from local funds, \$15,366,000 and 121 full-time equivalent positions from Federal funds and \$5,842,000 and 16 full-time equivalent positions from other funds) for the Office of the Corporation Counsel for fiscal year 2003.

The Office of the Corporation Counsel achieves the best outcome for its clients by (1) prosecuting crimes fairly and aggressively, (2) defending or initiating actions, (3) providing expert advice and counsel, and (4) executing commercial-style transactions on behalf of the government of the District of Columbia.

OFFICE OF THE INSPECTOR GENERAL

The Committee recommends \$12,089,000 and 108 full-time equivalent positions (including \$10,824,000 and 92 full-time equivalent positions from local funds and \$1,265,000 and 16 full-time equivalent positions from Federal funds) for the Office of the Inspector General for fiscal year 2003.

The mission of the Office of the Inspector General is to independently conduct and supervise audits, investigations, and inspections relating to the programs and operations of District government departments and agencies.

OFFICE OF THE CHIEF FINANCIAL OFFICER

The Committee recommends \$90,648,000 and 968 full-time equivalent positions (including \$79,823,000 and 919 full-time equivalent positions from local funds, \$932,000 and 3 full-time equivalent positions from Federal funds, and \$9,893,000 and 46 full-time equivalent positions from other funds) for the Office of the Chief Financial Officer for fiscal year 2003. The Committee recommends \$15,000,000 for the Office of the Chief Financial Officer to make payments for various economic development, health, security and education projects in the District.

The Office of the Chief Financial Officer administers the financial management operations of the District of Columbia to assure fiscal stability and integrity, supports public services, and provides financial information to policy makers necessary for making informed decisions while minimizing the cost to the government.

ECONOMIC DEVELOPMENT AND REGULATION

The Committee recommends a total of \$258,539,000 and 1,517 full-time equivalent positions for fiscal year 2003 for the department and agencies funded through this appropriation.

ECONOMIC DEVELOPMENT AND REGULATION

OFFICE OF THE DEPUTY MAYOR OF PLANNING

The Committee recommends \$31,065,000 and 23 full-time equivalent positions (including \$5,149,000 and 16 full-time equivalent positions from local funds, and \$25,916,000 and 7 full-time equivalent positions from other funds) for the Office of the Deputy Mayor of Planning for fiscal year 2003.

OFFICE OF PLANNING

The Committee recommends \$7,966,000 and 69 full-time equivalent positions (including \$7,410,000 and 66 full-time equivalent positions from local funds, and \$556,000 and 3 full-time equivalent positions from Federal funds) for the Office of Planning for fiscal year 2003.

OFFICE OF LOCAL BUSINESS DEVELOPMENT

The Committee recommends \$1,093,000 and 10 full-time equivalent positions from local funds for the Office of Local Business Development for fiscal year 2003.

OFFICE OF MOTION PICTURES AND TELEVISION

The Committee recommends \$574,000 and 5 full-time equivalent positions from local funds for the Office of Motion Pictures and Television for fiscal year 2003.

OFFICE OF ZONING

The Committee recommends \$2,527,000 and 17 full-time equivalent positions from local funds for the Office of Zoning for fiscal year 2003.

The Office of Zoning provides administrative, professional, and technical assistance to the Zoning Commission and the Board of Zoning Adjustment in the maintenance and regulation of zoning in the District of Columbia.

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT

The bill includes \$65,032,000 and 137 full-time equivalent positions (including \$7,002,000 and 12 full-time equivalent positions from local funds, \$42,168,000 and 125 full-time equivalent positions from Federal funds, and \$15,862,000 from other funds) for the Department of Housing and Community Development for fiscal year 2003.

The Department of Housing and Community Development facilitates the production and preservation of housing, and community and economic development opportunities in partnership with for-profit and nonprofit organizations by leveraging Department dollars with other financing resources in order to create and maintain stable neighborhoods and retain and expand the District's tax base.

DEPARTMENT OF EMPLOYMENT SERVICES

The Committee recommends \$89,775,000 and 564 full-time equivalent positions (including \$12,913,000 and 42 full-time equivalent positions from local funds, \$54,947,000 and 365 full-time equivalent positions from Federal

funds, and \$21,915,000 and 157 full-time equivalent positions from other funds) for the Department of Employment Services for fiscal year 2003.

The Department of Employment Services serves as the primary vehicle for the District of Columbia to develop a world-class work force and work environment that supports a sound, stable economic foundation for families, individuals, and the general community.

BOARD OF APPEALS AND REVIEW

The Committee recommends \$277,000 and 3 full-time equivalent positions from local funds for the Board of Appeals and Review for fiscal year 2003.

The Board of Appeals and Review hears citizen complaints about adverse decisions on license revocations and civil infractions from the Department of Consumer and Regulatory Affairs; litter control violations from the Department of Public Works; certificates of need, program reimbursements, and providers agreements from the Department of Public Health; and denials of security guard and private detective agency licenses from the Metropolitan Police Department.

BOARD OF REAL PROPERTY ASSESSMENTS AND APPEALS

The Committee recommends \$347,000 and 3 full-time equivalent positions from local funds for the Board of Real Property Assessments and Appeals for fiscal year 2003.

The Board of Real Property Assessments and Appeals ensures that properties in the District of Columbia are assessed at 100 percent of their estimated market value and equal to properties similar in size and utility that share the same tax burden.

DEPARTMENT OF CONSUMER AND REGULATORY AFFAIRS

The Committee recommends \$30,517,000 and 397 full-time equivalent positions (including \$27,061,000 and 364 full-time equivalent positions from local funds and \$3,456,000 and 33 full-time equivalent positions from other funds) for the Department of Consumer and Regulatory Affairs for fiscal year 2003.

The Department of Consumer and Regulatory Affairs protects the health, safety, and welfare of District residents through the regulatory and compliance process of business activities, occupational and professional services, land and building use, and rental housing condominium conversion.

ALCOHOLIC BEVERAGE REGULATION ADMINISTRATION

The bill includes \$3,016,000 and 36 full-time equivalent positions for the Alcoholic Beverage Regulation Administration from other funds for fiscal year 2003.

The Alcoholic Beverage Regulation Administration issues beverage alcohol licenses to qualified applicants; educates beverage alco-

hol establishments to prevent the sale of beverage alcohol to minors; and investigates license violations, adjudicates contested cases, and enforces compliance with the District's beverage alcohol laws.

OFFICE OF BANKING AND FINANCIAL INSTITUTIONS

The Committee recommends \$2,637,000 and 27 full-time equivalent positions (including \$200,000 from local funds and \$2,437,000 and 27 full-time equivalent positions from other funds) for the Office of Banking and Financial Institutions for fiscal year 2003.

The Office of Banking and Financial Institutions promotes a climate in which financial institutions will organize to do business in the District of Columbia and contribute to the economic development of the District through the increased availability of capital and credit, and expands advantageous financial services to the public in a nondiscriminatory manner.

PUBLIC SERVICE COMMISSION

The Committee recommends \$6,796,000 and 70 full-time equivalent positions (including \$0 and 0 full-time equivalent position from Federal funds and \$125,000 and 2 full-time equivalent positions from other funds) for the Public Service Commission for fiscal year 2003.

The Public Service Commission serves the public and the District's interest by ensuring that natural gas, electricity, and telecommunications services are safe, reliable, and affordable for residential, business, and government customers of the District of Columbia.

OFFICE OF PEOPLE'S COUNSEL

The Committee recommends \$3,978,000 and 33 full-time equivalent positions from other funds for the Office of People's Counsel for fiscal year 2003.

The Office of the People's Counsel seeks to advocate for utility consumers of natural gas, electricity, and telephone services in the District of Columbia before District and Federal decision-making bodies.

DEPARTMENT OF INSURANCE AND SECURITIES REGULATION

The bill includes \$9,766,000 and 103 full-time equivalent positions from other funds for the Department of Insurance and Securities Regulation for fiscal year 2003.

The Department of Insurance and Securities Regulation provides regulatory supervision of the insurance and securities businesses for the protection of the people of the District of Columbia.

OFFICE OF CABLE TELEVISION AND TELECOMMUNICATIONS

The Committee recommends \$3,173,000 and 20 full-time equivalent positions from other funds for the Office of Cable Television and Telecommunications for fiscal year 2003.

The Office of Cable Television and Telecommunications regulates cable television services to District citizens, provides citizen access to government hearings and programming that addresses community issues, and

coordinates the city's telecommunications policy.

PUBLIC SAFETY AND JUSTICE

The Committee recommends a total of \$639,892,000 and 7,634 full-time equivalent po-

sitions for fiscal year 2003 for the public safety activities funded through this appropriation.

METROPOLITAN POLICE DEPARTMENT

The Committee recommends \$319,022,000 and 4,594 full-time equivalent positions (including \$301,964,000 and 4,367 full-time equivalent positions from local funds, \$9,605 and 202 full-time equivalent positions from Federal funds, and \$7,453,000 and 25 full-time equivalent positions from other funds) for the Metropolitan Police Department for fiscal year 2003.

The Metropolitan Police Department seeks to prevent crime and the fear of crime, and to work with others to build safe and healthy neighborhoods throughout the District of Columbia.

FIRE AND EMERGENCY MEDICAL SERVICES

The Committee recommends \$29,751,000 and 2,006 full-time equivalent positions from local funds for the Fire and Emergency Medical Services for fiscal year 2003.

The mission of the Fire and Emergency Medical Services Department is to improve the quality of life for those who live, work, visit, and conduct business in the District of Columbia by preventing and extinguishing fires and providing emergency medical, ambulance, and technical rescue.

POLICE AND FIRE RETIREMENT SYSTEM

The bill includes \$68,900,000 from local funds for the Police and Fire Retirement System for fiscal year 2003.

The Police and Fire Retirement System provides annuity payments and other retirement and disability benefits for the District Metropolitan Police and Fire Department retirees and survivors.

DEPARTMENT OF CORRECTIONS

The Committee recommends \$105,338,000 and 842 full-time equivalent positions (including \$104,388,000 and 842 full-time equivalent positions from local funds and \$950,000 and 0 full-time equivalent positions from other funds) for the Department of Corrections for fiscal year 2003.

The mission of the Department of Corrections is to ensure public safety and uphold the public's trust by providing for the safe and secure confinement of pretrial detainees and sentenced inmates. The agency is completing the transition from a State/county prison system to primarily a city/county jail system in accordance with the National Capital Revitalization Act.

NATIONAL GUARD

The Committee recommends \$2,896,000 and 43 full-time equivalent positions (including

\$2,390,000 and 30 full-time equivalent positions from local funds and \$506,000 and 13 full-time equivalent positions from Federal funds) for the National Guard for fiscal year 2003.

The mission of the District of Columbia National Guard is to protect life, property, and the interests of the District of Columbia during civil emergencies and to serve as an integral component of the Nation's military forces, when activated.

EMERGENCY MANAGEMENT SERVICES

The Committee recommends \$4,318,000 and 39 full-time equivalent positions (including \$3,100,000 and 26 full-time equivalent positions from local funds and \$1,218,000 and 13 full-time equivalent positions from Federal funds for the Emergency Management Services for fiscal year 2003.

The mission of the District of Columbia Emergency Management Services Agency is to reduce the loss of life and property and protect citizens and institutions from all hazards by administering a comprehensive community-based emergency management program.

COMMISSION ON JUDICIAL DISABILITIES AND TENURE

The Committee recommends \$190,000 and 2 full-time equivalent positions from local funds for the Commission on Judicial Disabilities and Tenure for fiscal year 2003.

The Commission on Judicial Disabilities and Tenure provides for the preservation of an independent and fair judiciary by making determinations concerning the discipline, involuntary retirement, and reappointment of judges for the District of Columbia Superior Court and the District of Columbia Court of Appeals.

JUDICIAL NOMINATION COMMISSION

The Committee recommends \$110,000 and 1 full-time equivalent position from local funds for the Judicial Nomination Commission for fiscal year 2003.

The Judicial Nomination Commission screens, selects, and recommends nominees to the President of the United States to fill judicial vacancies in the District of Columbia Superior Court and the Court of Appeals.

OFFICE OF CIVILIAN COMPLAINT REVIEW

The Committee recommends \$1,481,000 and 19 full-time equivalent positions from local funds for the Office of Citizens Complaint Review for fiscal year 2003.

The Office of Citizens Complaint Review provides the public with an independent and impartial forum for the review and resolution of complaints against officers of the Metropolitan Police Department and Special Police officers employed by the District of Columbia government.

ADVISORY COMMISSION ON SENTENCING

The Committee recommends \$633,000 and 6 full-time equivalent positions from local funds for the Advisory Commission on Sentencing for fiscal year 2003.

The Advisory Commission on Sentencing advises the District of Columbia Council on issues relating to sentences imposed for felonies committed within the District.

OFFICE OF THE CHIEF MEDICAL EXAMINER

The Committee recommends \$6,544,000 and 76 full-time equivalent positions (including \$6,432,000 and 74 full-time equivalent positions from local funds and \$112,000 and 2 full-time equivalent positions from other funds) for the Office of the Chief Medical Examiner for fiscal year 2003.

The mission of the Office of the Chief Medical Examiner is to investigate and certify all deaths in the District of Columbia that occur by any means of violence (injury), and those that occur unexpectedly, without medical attention, in custody, or which pose a threat to the public health.

OFFICE OF ADMINISTRATIVE HEARINGS

The Committee recommends \$300,000 and 2 full-time equivalent positions from local funds for the Office of Administrative Hearings for fiscal year 2003.

CORRECTIONS INFORMATION COUNCIL

The Committee recommends \$240,000 and 2 full-time equivalent positions from local funds for the Corrections Information Council for fiscal year 2003.

CRIMINAL JUSTICE COORDINATING COUNCIL

The Committee recommends \$169,000 and 2 full-time equivalent positions from local funds for the Criminal Justice Coordinating Council for fiscal year 2003.

PUBLIC EDUCATION SYSTEM

A total of \$1,220,201,000 and 11,900 full-time equivalent positions is recommended for the operation of the activities included within this appropriation title.

PUBLIC EDUCATION SYSTEM

PUBLIC SCHOOLS

The Committee recommends \$903,157,000 and 10,466 full-time equivalent positions (including \$743,715,000 and 9,821 full-time equivalent positions from local funds, \$147,800,000 and 506 full-time equivalent positions from Federal funds and \$11,642,000 and 119 full-time equivalent positions from other funds) for the public school system for fiscal year 2003.

The District of Columbia Public Schools seeks to make dramatic improvements in the achievement of all students today in preparation for their world tomorrow.

STATE EDUCATION OFFICE

The Committee recommends \$49,687,000 and 43 full-time equivalent positions (including \$22,594,000 and 33 full-time equivalent positions from local funds, \$26,917,000 and 10 full-time equivalent positions from Federal funds and \$176,000 and 0 full-time equivalent positions from other funds) for the State Education Office for fiscal year 2003.

The District of Columbia State Education Office seeks to enhance the administrative efficiency of State-level education functions and ensure the equitable distribution of educational resources.

DISTRICT OF COLUMBIA CHARTER SCHOOLS

The bill includes \$132,865,000 from local funds for the District of Columbia Charter Schools for fiscal year 2003.

The District of Columbia Charter Schools provide an alternative free education for students who reside in the District of Columbia.

UNIVERSITY OF THE DISTRICT OF COLUMBIA

The Committee recommends \$83,990,000 and 972 full-time equivalent positions (including \$52,272,000 and 541 full-time equivalent positions from local funds, \$12,688,000 and 171 full-time equivalent positions from Federal funds, and \$19,050,000 and 260 full-time equivalent positions from other funds) for the University of the District of Columbia for fiscal year 2003.

The University of the District of Columbia is an urban land grant institution of higher education with an open admissions policy.

PUBLIC LIBRARY

The Committee recommends \$28,150,000 and 430 full-time equivalent positions (including \$27,003,000 and 421 full-time equivalent positions from local funds, \$610,000 and 9 full-time equivalent positions from Federal funds, and \$537,000 and 0 full-time equivalent positions from other funds) for the Public Library for fiscal year 2003.

The District of Columbia Public Library provides environments that invite reading, learning, and community discussion; trained staff and technology to help in finding, evaluating, and using information; and opportunities for children, teenagers, adults, and senior citizens to learn to read and use infor-

mation resources for personal growth and development.

COMMISSION ON THE ARTS AND HUMANITIES

The bill includes \$2,352,000 and 9 full-time equivalent positions (including \$1,757,000 and 2 full-time equivalent positions from local funds, \$475,000 and 7 full-time equivalent positions from Federal funds and \$120,000 from other funds) for the Commission on the Arts and Humanities for fiscal year 2003.

The Commission on the Arts and Humanities was created to enrich the quality of life for the residents of the District of Columbia through the arts and humanities.

CHARTER SCHOOL FACILITIES

The Committee recommends a Federal Payment of \$20,000,000 to the District of Columbia for expansion of charter school facilities in the District of Columbia and the reorganization of the "New Charter School Fund".

HUMAN SUPPORT SERVICES

A total of \$2,500,297,000 and 7,378 full-time equivalent positions is recommended for the departments and agencies funded through this appropriation title.

DEPARTMENT OF HUMAN SERVICES

The Committee recommends \$441,407,000 and 2,051 full-time equivalent positions (including \$208,054,000 and 969 full-time equivalent positions from local funds, \$231,567,000 and 1,082 full-time equivalent positions from Federal funds and \$1,786,000 from other funds) for the Department of Human Services for fiscal year 2003.

The Department of Human Services provides comprehensive quality human services and develops social service policies and programs to foster the rehabilitation and self-sufficiency of District residents.

DEPARTMENT OF HEALTH

An appropriation of \$1,468,135,000 and 1,396 full-time equivalent positions (including \$457,419,000 and 472 full-time equivalent positions from local funds, \$982,542,000 and 822 full-time equivalent positions from Federal funds, and \$28,174,000 and 102 full-time equivalent positions from other funds) are recommended for the Department of Health for fiscal year 2003.

The mission of the Department of Health is to assure equitable access to comprehensive high quality public health services to all District of Columbia residents and visitors and

undertake activities that will support the highest quality of life achievable for District residents and visitors.

CHILD AND FAMILY SERVICES AGENCY

The Committee recommends \$202,134,000 and 920 full-time equivalent positions (including \$119,680,000 and 610 full-time equivalent positions from local funds, and \$81,804,000 and 310 full-time equivalent positions from Federal funds) for the Child and Family Services Agency for fiscal year 2003.

The mission of the Child and Family Services Agency is to protect and promote the health and well-being of the children of the

District of Columbia through public and private partnerships focused on strengthening and preserving families with services that ensure cultural competence, accountability and professional integrity.

DEPARTMENT OF MENTAL HEALTH

The Committee recommends \$227,663,000 and 2,161 full-time equivalent positions (including \$141,234,000 and 1,501 full-time equivalent positions from local funds, and \$67,100,000 and 638 full-time equivalent positions from Federal funds, and \$19,329,000 and 22 full-time equivalent positions from other funds) for the Department of Mental Health for fiscal year 2003.

The Department of Mental Health seeks to provide mental health services to children, youth, adults and their families and develop and retain a highly qualified workforce and to facilitate organizational effectiveness.

DEPARTMENT OF PARKS AND RECREATION

The Committee recommends \$35,613,000 and 741 full-time equivalent positions (including \$33,257,000 and 658 full-time equivalent positions from local funds, \$0 from Federal funds, and \$2,356,000 and 83 full-time equivalent positions from other funds) for the Department of Parks and Recreation for fiscal year 2003.

The Department of Parks and Recreation seeks to enhance the physical, mental, and social well-being of our children, youth, families, and individuals by providing quality, customer-focused leisure and recreation services in environmentally protected parks and safe, attractive facilities.

OFFICE ON AGING

The Committee recommends \$20,507,000 and 23 full-time equivalent positions (including \$14,747,000 and 14 full-time equivalent positions from local funds, \$5,760,000 and 9 full-time equivalent positions from Federal funds) for the Office on Aging for fiscal year 2003.

The Office on Aging advocates, plans, implements, and monitors programs in health, education, employment, and social services to promote longevity, independence, dignity, and choice for the District's senior citizens.

UNEMPLOYMENT COMPENSATION FUND

A total of \$6,199,000 from local funds is recommended for the Unemployment Compensation Fund for fiscal year 2003.

The Unemployment Compensation Fund seeks to provide unemployment compensation benefits to former District government employees during periods of unemployment that are a result of separation through no fault of their own.

DISABILITY COMPENSATION FUND

A total of \$27,959,000 from local funds is recommended for the Disability Compensation Fund for fiscal year 2003.

The Disability Compensation Fund aims to proactively integrate managed care principles with rehabilitation expertise in order to safely return employees to work, as soon as possible, reduce costs, and manage issues created by employees' work related injuries and/or illnesses.

OFFICE OF HUMAN RIGHTS

The Committee recommends \$2,179,000 and 35 full-time equivalent positions (including \$2,073,000 and 35 full-time equivalent positions from local funds and \$106,000 from Federal funds) for the Office of Human Rights for fiscal year 2003.

The mission of the Office of Human Rights is to mediate, investigate, conciliate, prosecute, and address illegal discriminatory practices in employment, housing and commercial space, public accommodations, and educational institutions.

OFFICE ON LATINO AFFAIRS

The Committee recommends \$3,256,000 and 12 full-time equivalent positions from local funds for the Office on Latino Affairs for fiscal year 2003.

The Office on Latino Affairs ensures that a full range of health, education, employment, and social services are available to the Latino community in the District of Columbia.

ENERGY OFFICE

The bill includes \$5,925,000 and 33 full-time equivalent positions (including \$432,000 and 3 full-time equivalent positions from local funds, \$4,801,000 and 21 full-time equivalent positions from Federal funds and \$692,000 and 9 full-time equivalent positions from other funds) for the Energy Office for fiscal year 2003.

The mission of the Energy Office is to help improve the District's quality of life and economic competitiveness by making the

District of Columbia energy efficient. The Energy Office also helps low-income residents by providing energy assistance and conservation services.

OFFICE ON ASIAN AND PACIFIC ISLANDER AFFAIRS

The Committee recommends \$213,000 and 3 full-time equivalent positions from local funds for the Office on Asian and Pacific Islander Affairs for fiscal year 2002. The Office of Asian and Pacific Islander Affairs seeks to ensure that a full range of health, education, employment and social services are available to the Asian and Pacific Island community in the District of Columbia.

OFFICE OF VETERANS' AFFAIRS

A total of \$240,000 and 3 full-time equivalent positions from local funds is recommended for the Office of Veterans' Affairs for fiscal year 2003.

The Office of Veterans' Affairs seeks to advocate for veterans and their dependents in obtaining their rights, privileges and benefits; provides mandatory counsel and assistance to veterans and their dependents in acquiring Veterans Administration benefits and privileges.

CHILDREN YOUTH INVESTMENT FUND

The Committee recommends \$5,000,000 and 0 full-time equivalent positions from local funds for the Children Youth Investment Fund for fiscal year 2003.

MEDICAID RESERVE

The Committee recommends \$49,867,000 and 0 full-time equivalent positions from local funds for the Children Youth Investment Fund for fiscal year 2003.

FAMILY LITERACY PROGRAM

The Committee recommends \$4,000,000 from Federal funds, appropriated earlier in this Act, to the District of Columbia of for the Family Literacy Program to address the needs of literacy-challenged parents while endowing their children with an appreciation for literacy and strengthening familial ties.

PUBLIC WORKS

A total of \$324,828,000 and 1,601 full-time equivalent positions is recommended for fiscal year 2002 for activities funded through this appropriation.

PUBLIC WORKS

Agency/activity	Fiscal year 2002 approved	Fiscal year 2003 request	Intra-District	Fiscal year 2003 request less intra-District	Committee recommendation	Intra-District	Committee recommendation less intra-District	Bill compared with—

DEPARTMENT OF PUBLIC WORKS

The Committee recommends the appropriation of \$91,529,000 and 1,099 full-time equivalent positions (including \$89,287,000 and 1,059 full-time equivalent positions from local funds, \$0 and 0 full-time equivalent positions from Federal funds, and \$2,242,000 and 40 full-time equivalent positions from other funds) for the Department of Public Works for fiscal year 2003.

The Department of Public Works seeks to help improve the quality of life in the District of Columbia and enhance the District's ability to compete for residents, business, tourism and trade.

DEPARTMENT OF TRANSPORTATION

The Committee recommends \$34,486,000 and 130 full-time equivalent positions (including

\$29,157,000 and 123 full-time equivalent positions from local funds, and \$4,669,000 and 0 full-time equivalent positions from Federal funds, and \$660,000 and 7 full-time equivalent positions from other funds) for the Department of Transportation for fiscal year 2003.

DEPARTMENT OF MOTOR VEHICLES

The bill includes \$39,558,000 and 353 full-time equivalent positions (including \$32,852 and 256 full-time equivalent positions from local funds and \$6,706 and 97 full-time equivalent positions from other funds) for the Department of Motor Vehicles for fiscal year 2003.

The Department of Motor Vehicles develops, administers, and enforces the vehicular laws of the District of Columbia and pro-

motes a safe, environmentally clean, and economically vibrant community.

D.C. TAXICAB COMMISSION

The Committee recommends \$1,534,000 and 19 full-time equivalent positions (including \$817,000 and 16 full-time equivalent positions from local funds and \$717,000 and 3 full-time equivalent positions from other funds) for the D.C. Taxicab Commission for fiscal year 2003. The D.C. Taxicab Commission ensures that the public receives safe and reliable taxicab and other transportation services.

WASHINGTON METROPOLITAN AREA TRANSIT COMMISSION

The Committee recommends \$90,000 from local funds for the Washington Metropolitan Area Transit Commission for fiscal year 2003.

The Washington Metropolitan Area Transit Commission helps to assure that the public is provided passenger transportation services by licensing fit and financially responsible, privately owned, for-hire carriers to serve the region.

WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

The Committee recommends \$154,531,000 from local funds for the Washington Metro-

politan Area Transit Authority for fiscal year 2003.

The Washington Metropolitan Area Transit Authority ensures safe, convenient, and cost-effective transit service within the District of Columbia and throughout the Washington metropolitan region.

SCHOOL TRANSIT SUBSIDY

The Committee recommends \$3,100,000 from local funds for the School Transit Subsidy for fiscal year 2003.

The School Transit Subsidy ensures the safe passage of school children by subsidizing Metrobus and Metrorail ridership for eligible D.C. students.

RECEIVERSHIP PROGRAMS

There are no agencies in receivership in the District of Columbia in fiscal year 2003.

RECEIVERSHIP PROGRAMS

Agency/activity	Fiscal year 2002 approved	Fiscal year 2003 request	Intra-District	Fiscal year 2003 request less intra-District	Committee recommendation	Intra-District	Committee recommendation less intra-District	Bill compared with—

WORKFORCE INVESTMENTS

The Committee recommends \$54,186,000 from local funds for fiscal year 2003. The workforce investments include the estimated fiscal impact of compensation increases for fiscal year 2001 and fiscal year 2002 for all District employees, union and nonunion.

RESERVE

The Committee recommends \$70,000,000 from local funds for replacement of funds expended, if any, during fiscal year 2001 from the Budgeted Reserve established by section 202(j) of the District of Columbia Financial Responsibility and Management Assistance Act of 1995, Public Law 104-8.

REPAYMENT OF LOANS AND INTEREST

The bill includes \$267,451,000 from local funds for debt service costs on long-term general obligation bonds, which are associated with the District's borrowings to finance capital project expenditures of general fund agencies.

REPAYMENT OF GENERAL FUND RECOVERY DEBT

The Committee recommends \$39,300,000 from local funds for Repayment of General Fund Recovery Debt for fiscal year 2003. The Repayment of General Fund Recovery Debt represents debt service associated with financing the District's \$331,589,000 accumulated general fund deficit, as of end of fiscal year 1990.

PAYMENT OF INTEREST ON SHORT-TERM BORROWING

The Committee recommends \$1,000,000 from local funds for the payment of interest and costs associated with borrowings to meet short-term seasonal cash needs.

WILSON BUILDING

The bill includes \$4,194,000 from local funds for rent and security at the John A. Wilson Building.

CERTIFICATES OF PARTICIPATION

The Committee recommends \$7,950,000 from local funds to be used for principal and interest payments on the District's Certificates of Participation, issued to finance the ground lease underlying the building located at One Judiciary Square.

SETTLEMENTS AND JUDGMENTS

The Committee recommends \$22,822,000 from local funds to be used for making refunds and for the payment of legal settlements or judgments that have been entered against the District of Columbia government.

TOBACCO SETTLEMENT TRUST FUND TRANSFER PAYMENT

The Committee recommends \$50,867,000 for the Tobacco Settlement Trust Fund established pursuant to section 2302 of the Tobacco Settlement Trust Fund Establishment Act of 1999 (D.C. Official Code, sec. 7-1811.01) and the Tobacco Settlement Financing Act of 2000, effective October 19, 2000 (D. C. Law 13-172; D. C. Official Code, sec. 7-1831.03 et seq.). The Committee recommends that no

more than \$27,000,000 is authorized to be transferred to the Public Education System and that no more than \$23,867,000 is authorized to be transferred to Human Support Services.

EMERGENCY PREPAREDNESS

The Committee recommends \$15,000,000 from Federal funds appropriated earlier in this Act under the heading "Federal Payment for Emergency Preparedness and Security Costs in the District of Columbia," to reimburse the District of Columbia for the costs of public safety expenses related to security events in the District of Columbia. The further Committee recommends that the Chief Financial Officer of the District of Columbia shall provide a report, within 15 days of expenditure, to the President and to the Committees on Appropriations of the Senate and the House of Representatives, detailing any expenditure of these funds for public safety purposes.

PAY-AS-YOU-GO CAPITAL

The Committee recommends \$16,750,000 for Pay-As-You-Go Capital funds in lieu of capital financing, to be transferred to the Capital Fund, subject to the "Criteria for Spending Pay-as-You-Go Funding Amendment Act of 2002, approved by the Council of the District of Columbia on 1st reading, May 7, 2002 (Title 34 of Bill 14-609).

CAPITAL INFRASTRUCTURE DEVELOPMENT

The Committee recommends \$13,100,000 from Federal funds, appropriated earlier in

this Act, to the District of Columbia for improvement of city-wide capital infrastructure. The Committee recommends the following allocation of these funds: \$10,000,000 for construction of the Unified Communications Center; \$100,000 for capital improvements of Eastern Market; and \$3,000,000 for a state-of-the-art forensics laboratory.

EMERGENCY AND CONTINGENCY RESERVE FUNDS

The Committee recommends that the Mayor deposit from local funds the proceeds required pursuant to Section 159(a) of Public Law 106-522 and Section 404(c) of Public Law 106-554 in the Emergency and Contingency Reserve Funds in fiscal year 2003 consistent with the requirements established in Section 450A(b) of the District of Columbia Home Rule Act (Public Law 98-198; D.C. Official Code. sec. 1-204.50a(b)).

NON-DEPARTMENTAL

The Committee recommends \$5,799,000 from local funds for the non-departmental agency for fiscal year 2003. The non-departmental agency is a financial entity designed to account for costs that cannot be allocated to specific agencies during the development of the proposed budget.

ADMINISTRATIVE PROVISIONS

The Committee recommends various administrative provisions requested by the District of Columbia, as follows:

The Committee recommends a modification to the administration of the New Charter School Fund in the District of Columbia. The New Charter School fund was established in Public Law 106-100, the fiscal year 1998 District of Columbia Appropriations Act, as a fund for new public charter schools, comprised of unexpended and unobligated amounts appropriated from local funds for public charter schools. The purpose of the New Charter School Fund is to assist existing or new charter schools meet start-up or operating costs. The modifications recommended by the Committee will cap the fund at \$10,000,000, transfer \$5,000,000 to the Charter School Credit Enhancement Fund, and rename the fund the "Charter School Fund". In addition, the purpose for these funds shall be to supplement the operating costs of charter schools whose total audited enrollment exceeds the student enrollment in which the annual appropriation is based in that fiscal year.

The Committee recommends a modification to the administration of the New Char-

ter School Fund in the District of Columbia. The New Charter School Fund was established in Public Law 106-100, the fiscal year 1998 District of Columbia Appropriations Act, as a fund for new public charter schools, comprised of unexpended and unobligated amounts appropriated from local funds for public charter schools. The purpose of the New Charter School Fund is to assist existing or new charter schools meet start-up or operating costs. The modifications recommended by the Committee will cap the fund at \$10,000,000, transfer \$5,000,000 to the Charter School Credit Enhancement Fund, and rename the fund the "Charter School Fund". In addition, the purpose for these funds shall be to supplement the operating costs of charter schools whose total audited enrollment exceeds the student enrollment in which the annual appropriation is based in that fiscal year.

ENTERPRISE FUNDS

The Committee recommends a total of \$669,914,000 from other funds for the activities funded through these appropriation titles.

ENTERPRISE FUNDS

WATER AND SEWER AUTHORITY

The Committee recommends \$253,743,000 from other funds for fiscal year 2003 for the Water and Sewer Authority.

The Water and Sewer Authority delivers reliable potable water and wastewater collection services to the residents of the District of Columbia, and wastewater treatment services that are essential for public health and safety for the District.

FEDERAL PAYMENT FOR ANACOSTIA WATERFRONT INITIATIVE IN THE DISTRICT OF COLUMBIA

The Committee recommends \$50,000,000 from Federal funds, appropriated earlier in this Act as under the heading "Federal Payment for Anacostia Waterfront Initiative in the District of Columbia", to be for the District of Columbia Water and Sewer Authority for the Combined Sewer Overflow Long-Term Control Plan, to be used for system design and upgrades. The District of Columbia Water and Sewer Authority will provide a 100 percent match for the fiscal year 2003 Federal contribution.

WASHINGTON AQUEDUCT

The bill includes \$57,847,000 from other funds for the Washington Aqueduct for fiscal year 2003.

The Washington Aqueduct collects, purifies, and pumps an adequate supply of potable water to the District of Columbia, Arlington County, and the City of Falls Church, Virginia.

STORMWATER PERMIT COMPLIANCE

The Committee recommends \$3,100,000 from other funds for Stormwater Permit Compliance for fiscal year 2003.

The Stormwater Permit Compliance is responsible for ensuring compliance with EPA requirements under the District's storm water permit issued in April 2000.

LOTTERY AND CHARITABLE GAMES BOARD

The Committee recommends \$232,881,000 and 100 full-time equivalent positions from other funds for the Lottery and Charitable Games Board for fiscal year 2003.

The Lottery and Charitable Games Board generates revenues for the general fund and regulates charitable games in order to support programs and services for the residents of the District of Columbia.

SPORTS AND ENTERTAINMENT COMMISSION

The Committee recommends \$20,510,000 from other funds for the Sports and Entertainment Commission for fiscal year 2003.

The Sports and Entertainment Commission improves the quality of life and enhances economic development in the District by operating RFK Stadium, managing the non-military functions of the D.C. National Guard Armory, promoting the District as venue for sports and entertainment activities, and supporting youth recreational activities. The Committee recommends \$5,000,000 from Federal funds, appropriated earlier in this Act as under the heading "Federal Payment for Anacostia Waterfront Initiative in the District of Columbia", to be used for environmental and infrastructure costs related to the ongoing development of parks and recreation on the Anacostia River.

DISTRICT OF COLUMBIA RETIREMENT BOARD

The Committee recommends \$13,388,000 and 14 full-time equivalent positions from other

funds for the District of Columbia Retirement Board for fiscal year 2003.

The mission of the District of Columbia Retirement Board is to invest, control, and manage the assets of the D.C. Teachers' Retirement System and the D.C. Police Officers' and Fire Fighters' Retirement System.

WASHINGTON CONVENTION CENTER

The Committee recommends \$78,700,000 from other funds for the Washington Convention Center for fiscal year 2003.

The Washington Convention Center plans to expand the revenue base of the District by promoting and hosting large national and international conventions and trade shows that bring hundreds of thousands of out-of-town delegates, exhibitors, and businesses to Washington, D.C.; and to provide expanded employment and business opportunities for residents of the District.

NATIONAL CAPITAL REVITALIZATION CORPORATION

The Committee recommends \$6,745,000 from other funds for the National Capital Revitalization Corporation for fiscal year 2003.

The mission of the National Capital Revitalization Corporation is to spur economic development throughout the District of Columbia primarily in neighborhoods of need.

CAPITAL OUTLAY

The Committee recommends a net increase of \$981,527,780 for fiscal years 2002-2007 of which, \$639,069,780 is for general capital projects in the District of Columbia and \$342,458,000 is for the Water and Sewer Authority.

GENERAL PROVISIONS

The Committee has carefully reviewed the 41 general provisions that were included in the fiscal year 2002 District of Columbia Appropriations Act and has reduced the number of provisions included in last year's act to 34. The Committee recommendation deletes 7 general provisions because they made a permanent change to law or were a one-time provision.

The Committee has modified Sec. 125 to allow the District to use locally-generated revenues to support programs that provide individuals with sterile needles and syringes. This is consistent with a provision approved by the Senate and included in the fiscal year 2002 Senate bill. The Committee has included language that maintains a complete prohibition on the use of Federal funds for this purpose.

The Committee has modified Sec. 111 to strike paragraphs (b) through (e), regarding the personnel requirements of the Office of the Chief Technology Officer and the Office of the Chief Financial Officer, because it made a permanent provision of law.

The Committee has deleted Sec. 130 regarding enforcement of tobacco prohibitions, consistent with the President's fiscal year 2003 budget request.

The Committee has deleted Sec. 133 regarding the reserve requirements because it made a permanent provision of law. The District Government requested that the date of deposit of funds into the Emergency and Contingency Reserve Funds be changed from October 1 to February 15. The Committee understands that the District of Columbia Appropriations bill is not often enacted before December each year. This delay prevents the District from taking any action to fulfill the requirements of the reserve fund until February. The Committee does not recommend this modification to the reserve fund requirements.

The Committee would like to clarify that the District of Columbia is not required to make deposits into the budgeted reserve fund, pursuant to Section 202(j) of Public Law 104-8 after the deposits made in fiscal year 2003. Instead, the Committee recommends that the District establish a cumula-

tive cash reserve of \$50,000,000 in fiscal years 2004 and 2005, as mandated in the District of Columbia Appropriations Act of 2002, Public Law 107-96 (115 Stat. 956). The District of Columbia must replenish only the amount necessary to maintain the required balance in the following fiscal year. The cumulative cash reserve would be maintained in addition to cash reserve requirements under section 450A of the District of Columbia Home Rule Act, Public Law 93-198, as amended. The District of Columbia may expend funds from the reserves consistent with the conditions associated with such reserve funds.

The Committee has deleted Sec. 134 regarding Integrated Product Teams because it was a one-time provision requested by the District of Columbia government.

The Committee has included a provision (Sec. 135) to limit the amount paid to an attorney who brings a suit against the District of Columbia Public Schools under the Individuals with Disabilities Education Act. The provision caps attorneys' fees at \$3,000 per action.

The Committee has deleted Sec. 136 regarding the salary of the Council Chair because it made a permanent provision of law.

The Committee has deleted Sec. 138 regarding the legislative review period of Council legislation regarding the closing of 2nd and N Street, NE because it made a permanent provision of law.

The Committee has deleted Sec. 140 regarding the prior year's attorney's fees because it made a permanent provision of law.

The Committee has deleted Sec. 141 regarding a General Accounting Office report because it made a permanent provision of law.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

Items providing funding for fiscal year 2003 which lack authorization are as follows:

Federal Payment for Emergency Planning and Security Costs in the District of Columbia	\$15,000,000
Federal Payment for Hospital Bioterrorism Preparedness	10,000,000
Federal Payment to the Department of Transportation	1,000,000
Federal Payment to the Chief Financial Officer of the District of Columbia	15,000,000
Federal Payment to Children's National Medical Center	5,000,000
Federal Payment to St. Coletta School	2,000,000
Federal Payment for Anacostia Waterfront Initiative	55,000,000
Federal Payment to D.C. Charter School Facilities	20,000,000
Federal Payment to D.C. for Capital Infrastructure Development	13,100,000
Federal Payment to D.C. for Family Literacy	4,000,000
Total, Federal funds which lack authorization	140,100,000

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

ENERGY AND WATER DEVELOPMENT APPROPRIATION BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. DOMENICI, from the Committee on Appropriations, submitted the following

REPORT

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for energy and water development for the fiscal year ending September 30, 2003, and for other purposes, favorably thereon and recommends that the bill do pass.

Amount in new budget (obligational) authority, fiscal year 2003

Budget estimates considered by Senate	\$25,876,981,000
Amount of bill as reported to the Senate	26,163,515,000
The bill as reported to the Senate—	
Above the budget estimate, 2003	286,534,000
Over enacted bill, 2002	858,156,000

PURPOSE

The purpose of this bill is to provide appropriations for the fiscal year 2003 beginning October 1, 2002, and ending September 30, 2003, for energy and water development, and for other related purposes. It supplies funds for water resources development programs and related activities of the Department of the Army, Civil Functions—U.S. Army Corps of Engineers' Civil Works Program in title I; for the Department of the Interior's Bureau of Reclamation in title II; for the Department of Energy's energy research activities (except for fossil fuel programs and certain conservation and regulatory functions), including environmental restoration and waste management, and atomic energy defense activities of the National Nuclear Security Administration in title III; and for related independent agencies and commissions, including the Appalachian Regional Commission, Delta Regional Authority, Denali Commission, and the Nuclear Regulatory Commission in title IV.

SUMMARY OF ESTIMATES AND RECOMMENDATIONS

The fiscal year 2003 budget estimates for the bill total \$25,876,981,000 in new budget (obligational) authority. The recommendation of the Committee totals \$26,163,515,000. This is \$286,534,000 above the budget estimates and \$858,156,000 over the enacted appropriation for the current fiscal year.

The bill, as recommended, is in compliance with the subcommittee allocation agreed to by the Committee and entered into the Congressional Record on June 28, 2002.

BILL HIGHLIGHTS

ATOMIC ENERGY DEFENSE ACTIVITIES

The amount recommended in the bill includes \$15,739,217,000 for atomic energy defense activities. Major programs and activities include:

Weapons activities	\$6,108,959,000
Defense nuclear non-proliferation	1,115,630,000
Naval reactors	706,790,000
Other defense activities	537,664,000
Defense waste management and environmental restoration	5,370,532,000
Defense facilities closure projects	1,125,314,000
Defense environmental privatization	158,399,000

ENERGY SUPPLY

The bill recommended by the Committee provides a total of \$815,306,000 for energy research programs including:

Renewable energy resources	\$448,062,000
Nuclear energy	323,608,000

NONDEFENSE ENVIRONMENTAL MANAGEMENT

An appropriation of \$176,000,000 is recommended for nondefense environmental management activities of the Department of Energy.

SCIENCE

The Committee recommendation also provides a net appropriation of \$3,329,456,000 for general science and research activities in life sciences, high energy physics, and nuclear physics. Major programs are:

High energy physics research	\$729,980,000
Nuclear physics	387,370,000
Basic energy sciences	1,044,600,000
Biological and environmental R&D	531,215,000
Fusion energy sciences	259,310,000

REGULATORY AND OTHER INDEPENDENT AGENCIES

Also recommended in the bill is \$909,584,000 for various regulatory and independent agencies of the Federal Government. Major programs include:

Appalachian Regional Commission	\$74,400,000
Delta Regional Authority	15,000,000
Denali Commission	50,000,000
Federal Energy Regulatory Commission	192,000,000
Nuclear Regulatory Commission	578,184,000

WATER RESOURCES DEVELOPMENT

Corps of Engineers:	
General Investigations ...	\$148,304,000
Construction, General	1,636,602,000
Flood Control, Mississippi River and Tributaries	346,437,000
Operation and Maintenance, General	1,956,182,000
Regulatory Program	144,252,000
Formerly Utilized Sites Remedial Action Program	140,298,000

General Expenses

155,651,000

Central Utah Project Completion Account

36,228,000

Bureau of Reclamation:

Water and Related resources

919,921,000

Central Valley Project Restoration Fund

48,904,000

Policy and Administration

54,870,000

The Committee has recommended appropriations totaling approximately \$5,540,330,000 for Federal water resource development programs. This includes projects and related activities of the U.S. Army Corps of Engineers—Civil and the Bureau of Reclamation of the Department of the Interior. The Federal water resource development program provides lasting benefits to the Nation in the area of flood control, municipal and industrial water supply, irrigation of agricultural lands, water conservation, commercial navigation, hydroelectric power, recreation, and fish and wildlife enhancement.

Water is our Nation's most precious and valuable resource. It is evident that water supply in the near future will be as important, if not more so, than energy. There is only so much water available. Water cannot be manufactured. Our Nation cannot survive without water, and economic prosperity cannot occur without a plentiful supply.

While many areas of the country suffer from severe shortages of water, others suffer from the other extreme—an excess of water which threatens both rural and urban areas with floods. Because water is a national asset, and because the availability and control of water affect and benefit all States and jurisdictions, the Federal Government has historically assumed much of the responsibility for financing of water resource development.

The existing national water resource infrastructure in America is an impressive system of dams, locks, harbors, canals, irrigation systems, reservoirs, and recreation sites with a central purpose—to serve the public's needs.

Our waterways and harbors are an essential part of our national transportation system—providing clean, efficient, and economical transportation of fuels for energy generation and agricultural production, and making possible residential and industrial development to provide homes and jobs for the American people.

Reservoir projects provide hydroelectric power production and downstream flood protection, make available recreational opportunities for thousands of urban residents, enhance fish and wildlife habitat, and provide our communities and industries with abundant and clean water supplies which are essential not only to life itself, but also to help maintain a high standard of living for the American people.

SUBCOMMITTEE HEARINGS

The Subcommittee on Energy and Water Development of the Committee on Appropriations held four sessions in connection

with the fiscal year 2003 appropriation bill. Witnesses included officials and representatives of the Federal agencies under the subcommittee's jurisdiction.

Although it is the policy of the subcommittee to receive oral and written testimony from representatives of all of the major Department and Agencies within its jurisdiction, the Army Corps of Engineers provided written testimony only. The administration fired Mike Parker, the Assistant Secretary of the Army for Civil Works, early in the week in which the Army Corps of Engineers hearing was scheduled to take place. Given the confusion and controversy surrounding Mr. Parker's dismissal, the subcommittee elected to accept written testimony in lieu of an oral statement from a lower level appointee in an acting capacity.

In addition, the subcommittee received numerous statements and letters from Members of the U.S. Senate and House of Representatives, Governors, State and local officials and representatives, and hundreds of private citizens of all walks of life throughout the United States. Information, both for and against many items, was presented to the subcommittee. The recommendations for fiscal year 2003 therefore, have been developed after careful consideration of available data.

VOTES IN THE COMMITTEE

By a vote of 00 to 00 the Committee on _____, recommended that the bill, as amended, be reported to the Senate.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

TITLE I—DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

INTRODUCTION

The Committee remains concerned about the level of the budget requests for the water resources programs of the U.S. Army Corps of Engineers. The budget request for fiscal year 2003 is about \$600,000,000 less than the amount appropriated to the Corps in fiscal year 2002. The budget request is extraordinarily unbalanced. Four projects account for 30 percent of the proposed Construction, General budget with the remainder of the projects severely underfunded. The proposed General Investigations budget, which provides funding for studies of water resources needs, is decimated. Only studies in their final year were adequately funded, the remainder were severely underfunded. The proposed Operations and Maintenance budget appears to show an increase, however, when accounting for inflation and a proposed funding transfer that is unlikely to be enacted, the final total is less than the amount appropriated in fiscal year 2002. The budget proposed for the Mississippi River and Tributaries project, is equally inadequate.

If the proposed budget request were enacted, the Corps would be forced to terminate on-going construction contracts costing the government some \$200,000,000 in termination fees.

As has been the practice for the last several years, the budget proposal contained no new discretionary study or construction "starts". The budget proposal stated that this was done in order to only fund the backlog of on-going work (estimated at \$21,000,000,000 in the budget proposal) and that within 10 years, this backlog would be reduced to zero. Followed to conclusion, that would mean that within 10 years the Corps would only be an operation and maintenance agency to oversee past constructed work. Since there are no other nationwide agencies that address water resource problems and needs, one can only assume that all water resource problems will be solved in the next 10 years or that the Federal Government intends to no longer fund water resource development.

The Committee does not share the views in the budget proposal and remains concerned about the huge and increasing backlog of infrastructure development, maintenance, and repair over which the Corps has jurisdiction. The proposed budget causes the backlog of unconstructed projects to increase from \$40,000,000,000 to \$44,000,000,000 and ignores an accelerating critical maintenance backlog which increases from \$702,000,000 to \$884,000,000. This maintenance backlog will soon become entirely unmanageable under the weight of an aging and crumbling inventory. Proposing no new study or discretionary construction starts, underfunding on-going projects, and providing minimal O&M funding for completed projects leads the Committee to believe that the budget preparation may have been influenced by very narrow interest groups as opposed to providing for a robust national water resources development program. The situation that the proposed budget poses to the Nation's economy and quality of life leave the Committee no option but to step forward in support of these vital projects.

The Committee recommendation for the Corps of Engineers totals \$4,547,953,000. This is \$374,999,000 above the budget request for fiscal year 2003, and is \$109,143,000 above the appropriation for the current year.

BUILDING AND SITE SECURITY

Given the events of September 11, 2001, there is an evident need for improving the

security of the Nation's infrastructure. The Committee is aware of the increased costs all Federal agencies are beginning to realize. Therefore, the Committee encourages the Corps of Engineers to utilize technology that is presently available in both the private and public sector as it evaluates its future infrastructure security needs.

CENTERS OF EXCELLENCE

The Committee is concerned that Corps of Engineers technical and planning capabilities have diminished over the past decade. This diminished capability has been evident in recent controversial studies such as the Upper Mississippi River and Illinois Waterway System Navigation Study and the Delaware River Deepening Study. The Committee urges the Corps of Engineers to review ways in which it can improve its capability, to include concentrating its technical and planning expertise in regional centers. The Corps should report back to this Committee within 1 year on its findings.

BUDGET CONSTRAINTS

The budget allocation for non-Defense discretionary programs contained in the Energy and Water Development bill for fiscal year 2003 are constrained below what is necessary for a robust, balanced national water resources program. Faced with these budget realities, the Committee has had to make tough decisions and choices in the development of the Corps of Engineers' budget request for fiscal year 2003. However, while the budget resources for non-Defense discretionary programs have remained flat or have declined in real terms, the number of requests of the Committee continue to increase. This year the Committee received more than 1,200 requests for funding for water projects within the Corps' Civil Works program. Many supported the funding level in the budget request, but a majority of the requests made of the Committee sought increases over the budgeted amounts or items not contained in the President's budget for fiscal year 2003.

BASIS OF COMMITTEE RECOMMENDATION

In development of the fiscal year 2003 funding recommendation for the Corps of Engineers, the Committee is not able to include any new construction starts, and has recommended only a limited number of new study starts in an effort to restore balance to the water resource program of the Corps, and to address high priority requests made to the Committee. The limited resources available have been focused on on-going projects where the Corps has contractual commitments. While the Committee has not been able to fund all projects at the optimum level, it has endeavored to provide sufficient funding on each project to mitigate delays and increased costs, to the greatest extent possible, across the entire Corps' Civil Works program. Finally, the Committee received numerous requests to include project authorizations in the energy and water development appropriations bill. In an effort to support and honor congressional authorizing committees jurisdiction, the Committee has not included new project authorizations

GENERAL INVESTIGATIONS

Appropriations, 2002	\$154,350,000
Budget estimate, 2003	102,483,000
Committee recommendation	148,304,000

This appropriation funds studies to determine the need, engineering feasibility, economic justification, and the environmental and social suitability of solutions to water and related land resource problems; and for preconstruction engineering and design work, data collection, and interagency coordination and research activities.

The budget request and the recommended Committee allowance are shown on the following table:

CORPS OF ENGINEERS—GENERAL INVESTIGATIONS—Continued
[In thousands of dollars]

Knik Bridge Crossing, AK.—The Committee has included \$100,000 to initiate feasibility.

Hot Springs, AR.—The Committee has provided \$100,000 for a reconnaissance study to identify and evaluate alternatives for flood damage prevention.

Red River Navigation, Southwest Arkansas, AR and LA.—The Committee recommendation includes \$583,000 to complete the cost-shared navigation study. The Committee understands that navigation in the Shreveport, LA, to Index, AR reach is an extension of the existing J. Bennett Johnston Waterway, and as such, urges the Corps to perform an additional analysis using the same discount rate and local cost-sharing requirements as required for the existing waterway. This analysis should be displayed as a part of all study and project documents.

Southwest Arkansas Study, Little River Basin, AR.—The Committee has provided \$200,000 to initiate and complete an expanded reconnaissance study to address flooding, environmental restoration, water quality and

other water resource needs in the Red River and Little Red River basins.

Rio de Flag, Flagstaff, AZ.—The Committee recommendation includes \$880,000 for preconstruction engineering and design phase for Rio de Flag, Flagstaff, AZ.

American River Watershed, CA.—The Committee has provided \$2,600,000 for continuing analyses on the American River Watershed Long-Term Study, which recommends authorization of the so-called Folsom Dam Mini-Raise. In the Water Resources Development Act of 1999, Congress directed the Corps of Engineers to study a potential increase in flood storage at the Folsom reservoir. The Corps has completed its review and has concluded that raising the existing dam by 7 feet would provide substantially increased flood control benefits, and is technically feasible, economically justified and environmentally preferable, to other flood control options for the Sacramento region. The Congress has methodically authorized and funded improvements in the Sacramento region to reduce flooding and these efforts should

continue without further delay. The Mini-Raise is widely supported by virtually all of the congressional delegation as well as State and local officials and the environmental community. However, the project continues to have narrow but persistent opposition. The Committee believes it is time to provide Sacramento with much needed and deserved flood protection. It is the Committee's understanding that the Chief's report for this project is currently under review. The longer the review drags on, the longer tens of thousands of citizens in the Sacramento, California, region will remain in jeopardy from catastrophic flooding. The Committee directs that this review be expedited such that the project will be eligible for authorization in 2002. The Committee also strongly urges the congressional authorizing committees to authorize the Folsom Mini-Raise in the next Water Resources Development Act.

Coast of California, South Coast Region, Los Angeles County, CA.—The Committee has provided \$400,000 to continue data collection and surveys

Huntington Harbor Dredging, CA.—The Committee recommendation includes \$100,000 for a reconnaissance study for ecosystem restoration of Huntington Harbor, CA.

Napa River Salt Marsh Restoration, CA.—The Committee recommendation includes \$1,000,000 to complete the feasibility study and to initiate preconstruction engineering and design activities for Napa River Salt Marsh Restoration, CA.

Sacramento and San Joaquin Comprehensive Basin Study, CA.—The Committee recommendation includes \$3,173,000 to complete the feasibility study and to initiate preconstruction engineering and design.

Tahoe Basin, CA & NV.—The Committee has included \$1,500,000 to continue the comprehensive watershed study of the Lake Tahoe Basin Watershed.

Adams County, CO.—The Committee recommendation includes \$100,000 for a reconnaissance study for ecosystem restoration study for Adams County, CO.

New Savannah Bluff Lock and Dam, GA & SC.—The Committee has provided \$176,000 to continue the preconstruction engineering and design phase of the New Savannah Bluff Lock and Dam, GA & SC.

Savannah Harbor Estuary Restoration Study, GA.—The Committee recommendation includes \$100,000 for a reconnaissance study for ecosystem restoration study for the Savannah Harbor Estuary Restoration Study, GA.

Waikiki Erosion Control, HI.—The Committee has provided \$250,000 to continue preconstruction engineering and design for the Waikiki Erosion Control, HI, project.

Upper Mississippi & Illinois Navigation Study, IL, IA, MN, MO, & WI.—The Committee recommendation includes \$3,685,000 to continue the system feasibility phase of this study to ensure timely completion in fiscal year 2004. The Committee understands that the Corps has submitted an Interim Report in compliance with direction in the fiscal year 2003 Senate Energy and Water Development bill.

Columbus Waterfront Development Project, Columbus, IN.—The Committee has provided \$100,000 to initiate and complete a reconnaissance study of the Columbus, IN waterfront area.

Vincennes Waterfront Development Project, Vincennes, IN.—The Committee has provided \$100,000 to initiate and complete a reconnaissance study of the Vincennes, IN waterfront area.

Covington Waterfront Development Project, Covington, KY.—The Committee has provided \$200,000 to initiate and complete a reconnaissance study of the Covington, KY waterfront area.

Muddy River, Brookline and Boston, MA.—The Committee recommendation includes \$322,000 to complete the preconstruction engineering and design phase of the flood damage reduction and ecosystem restoration for the Muddy River in Boston and Brookline, MA.

Detroit River Environmental Dredging, MI.—The Committee has provided \$100,000 to initiate the feasibility study of dredging and disposal requirements of contaminated sediments in the Detroit River.

Detroit River Master Plan, Detroit, MI.—The Committee has provided \$100,000 to continue the Detroit River Master Plan study.

Detroit River Seawalls, Detroit, MI.—The Committee recommendation includes \$100,000 for continued studies of the Detroit River Seawalls.

Rouge River Environmental Dredging, MI.—The Committee has provided \$100,000 for a reconnaissance study on remediation of contaminated sediments in the Rouge River.

Red River of the North Basin, MN, ND, SD, & Manitoba, Canada.—The Committee rec-

ommendation includes \$2,078,000 to continue feasibility studies and incorporate the Fargo Southside, ND, project formerly being studied under the Continuing Authorities Program.

The Committee is aware that several stakeholder groups in the Red River Basin are coordinating water resource management efforts across State and international borders by forming the Red River Basin Commission (RRBC). The Committee recognizes this Commission, which includes local, provincial, State, and Federal interests, as a non-profit entity registered in the States of Minnesota, North Dakota, South Dakota, and the Canadian Province of Manitoba.

Missouri River Levee System, Units L455 & R 460-471, MO & KS.—The Committee has provided \$331,000 to complete the feasibility study.

Portsmouth Harbor & Piscataqua River, Upper Turnagain Basin, NH & ME.—The Committee recommendation includes \$100,000 for a reconnaissance study of navigation improvements at Portsmouth Harbor.

Hudson-Raritan Estuary — Hackensack Meadowlands Ecosystem Restoration, NJ.—The Committee has provided \$100,000 to initiate the feasibility study.

Onondaga Lake County Watershed Management Study, NY.—The Committee recommendation includes \$100,000 to initiate comprehensive watershed studies for the Onondaga County Watershed.

Duck Creek Watershed, OH.—The Committee recommendation includes \$100,000 to initiate and complete a reconnaissance study and negotiate a feasibility cost sharing agreement.

Ohio Riverfront Study, Cincinnati, OH.—The Committee has provided \$400,000 to initiate a feasibility study.

James River, SD.—The Committee recommendation provides \$1,000,000 to complete reconnaissance studies and to initiate feasibility studies for flood damage reduction in the James River basin.

Watertown, SD.—The Committee recommendation provides \$750,000 for initiation of a general reevaluation report for a flood protection project at Watertown, SD.

Guadalupe and San Antonio River Basins, TX.—The Committee has provided \$1,050,000 to continue basinwide environmental restoration studies and for basin hydrologic studies to update flood plain mapping in Goliad, Karnes, and Wilson Counties.

Harris Gully, Houston, TX.—The Committee has provided \$100,000 for studies to determine the feasibility of alternative measures relating to flood damage reduction, ecosystem restoration, and other allied purposes for Harris Gully, Houston, TX.

Matagorda Ship Channel (Port Lavaca), TX.—The Committee has provided \$650,000 for studies of navigation improvements of the Matagorda Ship Channel.

Duwanish and Green River Basin, WA.—The Committee recommendation includes \$265,000 to complete the preconstruction engineering and design phase for ecosystem restoration of the Duwanish and Green River Basin.

Coastal Field Data Collection.—Within the funds provided, the Committee has provided \$1,000,000 for the Southern California Beach Processes Study and \$1,000,000 for Hurricane Evaluation Studies in the State of Hawaii and U.S. Territories.

Flood Plain Management Services.—Within the amount provided for the Flood Plain Management Services Program, the Committee urges the Corps to develop information and decision-support tools for hurricane preparedness in the State of Hawaii and U.S. Territories and to conduct a flood plain man-

agement study for Dexter, MO, and a flood plain management study for Cumberland County, TN.

Other Coordination Programs.—Within the funds provided, the Committee recommendation includes \$500,000 for activities related to the Environmental Improvement Program for the Lake Tahoe Basin, CA & NV, \$200,000 for the American Heritage Rivers Program, \$500,000 for international waters studies, and \$600,000 for the Tri-Service CADD/GIS Technology Center.

Planning Assistance to States.—The Committee has provided \$6,500,000 for the Planning Assistance to States Program. Within the funds provided, the Committee urges the Corps of Engineers to assist in the development of a watershed management assessment plan for Lamar County, AL, initiate studies for Cross Lake, LA, and a drought watershed management plan for Big Hole, MT.

Research and Development.—Within the funds provided for the Corps of Engineers R&D Program, \$2,000,000 is provided for innovative technology demonstrations for urban flooding and channel restoration. These demonstrations shall be conducted in close coordination and cooperation with the Urban Water Research Program of the Desert Research Institute of Nevada. \$500,000 is provided to conduct investigations, assessment, and demonstrations on large-scale submerged aquatic vegetation restoration techniques and technologies. Appropriate demonstration activities should be considered within the Chesapeake Bay, MD.

The Committee is aware that WRDA 1999, Sec. 503 authorized the test and demonstration of innovative technologies for environmentally sound management of contaminated sediments. The Committee encourages the Corps of Engineers to continue its work in this matter in cooperation with the University of New Hampshire.

CONSTRUCTION, GENERAL

Appropriations, 2002	\$1,715,951,000
Budget estimate, 2003	1,415,612,000
Committee recommendation	1,636,602,000

This appropriation includes funds for construction, major rehabilitation and related activities for water resources development projects having navigation, flood control, water supply, hydroelectric, environmental restoration, and other attendant benefits to the Nation. The construction and major rehabilitation projects for inland and coastal waterways will derive one-half of the funding from the Inland Waterway Trust Fund. Funds to be derived from the Harbor Maintenance Trust Fund will be applied to cover the Federal share of the Dredged Material Disposal Facilities Program.

The appropriation provides funds for the Continuing Authorities Program (projects which do not require specific authorizing legislation), which includes projects for flood control (Section 205), emergency streambank and shoreline protection (Section 14), beach erosion control (Section 103), mitigation of shore damages (Section 111), navigation projects (Section 107), snagging and clearing (Section 208), aquatic ecosystem restoration (Section 206), beneficial uses of dredged material (Section 204), and project modifications for improvement of the environment (Section 1135).

The budget request and the approved Committee allowance are shown on the following table:

Bethel Emergency Bank Stabilization, Bethel, AK.—The Committee is aware that extenuating circumstances and the dire situation with regard to the Bethel Emergency Bank Stabilization project. Therefore, the Committee urges the Corps of Engineers to take all steps necessary to address the rapidly deteriorating seawall in order to prevent its imminent collapse.

Kake, AK.—The Committee has provided an additional \$2,000,000 to previously appropriated amounts for the Kake, AK, project.

Montgomery Point Lock and Dam, AR.—The Committee recommendation includes \$24,000,000. The Committee understands that this is far less than the Corps capability for this important navigation project that contributes to the Nation's economic security, but in a constrained budget environment, is an increase over the budget amount.

Red River Below Denison Dam, AR, LA, OK & TX.—The Committee recommendation includes \$2,500,000 to continue the levee rehabilitation and bank stabilization project in Arkansas.

Red River Emergency Bank Protection, AR, LA, OK & TX.—The Committee recommendation includes \$4,000,000 to continue the project.

Harbor/South Bay Water Recycling, CA.—The Committee recommendation includes \$7,000,000 to continue construction of the project.

Los Angeles Harbor Main Channel Deepening, CA.—The Committee has provided \$10,300,000 to continue construction of the channel deepening project.

Petaluma River, CA.—The Committee recommendation includes \$2,200,000 for this project.

San Francisco Bay to Stockton, CA.—The Committee recommendation includes \$1,150,000 for continuation of the General Re-evaluation Reports on the Avon Turning Basin and for the minimal deepening of the San Francisco Bay to the Port of Stockton.

South Sacramento County Streams, CA.—The Committee recommendation includes \$7,000,000.

Central and Southern Florida, FL.—The Committee recommendation includes \$90,000,000 to continue Everglades Restoration projects. This is a \$18,202,000 reduction from the budget request. This should in no way be considered any diminution of interest or support for these vitally important ecosystem restoration projects by the Committee. Rather, this cut is due to recent questions raised concerning implementation of the restoration project. The Committee is concerned that the project may be too heavily weighted in favor of commercial development of water supplies rather than the restoration of historic water flow characteristics and water quality needed to save the Everglades. The Committee believes that the Corps should respond to these concerns and provide written notification to the Committee that addresses these concerns.

Hawaii Water Management, HI.—The Committee recommendation includes \$2,000,000 for continued construction of the Hawaii Water Management Project.

Kaumalapau Harbor, HI.—The Committee has provided \$2,000,000 for continued construction of the harbor project.

Missouri River Fish and Wildlife Mitigation, IA, NE, KS, and MO.—The Committee recommendation includes \$1,100,000 above the budget amount for habitat acquisition. Additional funding should be focused on acquisition of lands at the confluence of the Missouri and Mississippi Rivers near St. Louis, MO.

Des Plaines River, IL (Phase I).—The Committee recommendation includes \$2,500,000 to continue construction of the project.

Olmsted Locks and Dam, Ohio River, IL & KY.—The Committee recommendation includes \$65,000,000 to continue construction of the replacement navigation structure. This is a \$12,000,000 reduction from the budget request, but should in no way be considered any diminution of interest in this critically important portion of the Nation's inland waterway system by the Committee. Rather it reflects the extraordinarily unbalanced nature of the budget request and the Committee's attempt to restore some balance to this account. None of the funds provided for the Olmsted Locks and Dam Project are to be used to reimburse the Claims and Judgement Fund.

McAlpine Lock and Dam, IN & KY.—The Committee recommendation includes \$16,000,000. The Committee understands that this is considerably less than the Corps capability for this important navigation project that contributes to the Nation's economic

security, but in a constrained budget environment, it is an increase over the budget request.

Kentucky Lock and Dam, Tennessee River, KY.—The Committee recommendation includes \$31,000,000. The Committee understands that this is considerably less than the Corps capability for this important navigation project that contributes to the Nation's economic security, but in a constrained budget environment, it is an increase over the budget request.

Inner Harbor Navigation Canal Lock, LA.—The Committee recommendation includes \$15,000,000. The Committee understands that this is considerably less than the Corps capability for this important navigation project, but in a constrained budget environment, it is an increase over the budget request.

J. Bennett Johnston Waterway, LA.—The Committee recommendation includes \$17,000,000 to continue construction of necessary navigation channel refinements, land purchases and development for mitigation of project impacts, and construction of project recreation and appurtenant features.

Ouachita River Levees, LA.—The Committee recommendation includes \$1,500,000 to continue construction of the project.

Southeast Louisiana, LA.—The Committee recommendation includes \$40,000,000. While this is a significant increase over the budget request, it is still far below the amount needed to fund the project at an optimum level.

Chesapeake Bay Environmental Restoration and Protection, MD, PA, and VA.—The Committee recommendation includes \$2,000,000 for continuation of the Taylor's Island Marsh Creation Project, and the Baltimore Harbor Middle Branch Wetland Creation Project.

Cumberland, MD.—The Committee has provided \$5,000,000 to continue this flood control project.

Sault Ste. Marie (Replacement Lock), MI.—The Committee recommendation includes \$2,000,000 to continue construction of the replacement lock.

Breckenridge, MN.—\$2,000,000 is included to continue construction of this vital flood control project.

Mississippi Infrastructure (Section 592), MS.—The Committee recommendation includes \$12,000,000. Within the funds provided the Corps should continue ongoing work at Pearlington, Hancock County, MS; Jefferson County, MS; Picayune, Pearl River County, MS; Gulfport, Harrison County, MS and is directed to give priority for initiation of assistance to Helena, Jackson County, MS; City of Macon, MS; and City of Tupelo, MS.

Fort Peck Fish Hatchery, MT.—The Committee recommendation includes \$8,000,000 for continuation of construction.

Rural Montana, MT.—The Committee recommendation includes \$3,500,000 to continue the Rural Montana Project. Within the funds provided, the Corps should give consideration to Grant Creek, Missoula County, and the cities of Belgrade, Helena, and Conrad.

Stanly County Wastewater, NC.—The Committee has provided \$1,000,000 for continued construction of this project.

Wilmington Harbor, NC.—The Committee recommendation includes \$38,000,000. The Committee understands that this is considerably less than the Corps capability for this important harbor project that contributes to the Nation's economic security, but in a constrained budget environment, it is an increase over the budget request.

Devils Lake, ND.—The Committee recommendation includes \$5,000,000 for construction of the Devils Lake outlet subject to certain conditions. The Committee also recognizes that the Corps has authority to use up to an additional \$10,000,000 of pre-

viously appropriated funds for construction if the conditions mandated by Congress are met.

Grafton, Park River, ND.—The Committee recommendation has included \$1,000,000 to continue construction of this flood control project.

Grand Forks, ND.—East Grand Forks, MN.—The Committee recommendation includes \$40,000,000. While this is an increase over the budget request, it is still far below the amount needed to fund the project at an optimum level.

Antelope Creek, NE.—The Committee recommendation includes \$2,000,000 to continue construction of the project.

Delaware Main Channel, NJ, PA, & DE.—The Committee recommendation includes \$2,000,000 for construction of this project. However, the Committee has serious concerns about the project due to concerns raised in the General Accounting Office's review of the project's economic analysis. It is the Committee's understanding that the Corps is currently conducting an entirely new economic analysis to address the concerns that were raised in the GAO report and that this analysis will be subject to two independent peer reviews. The Committee believes this is a prudent action, however, until the project is shown to be technically sound, environmentally sustainable, and economically viable, the Committee directs that none of the funds provided should be used to award construction contracts. Further, the Secretary is required to provide written notification to the Committee that these requirements have been met before funds can be used for this purpose.

Rural Nevada, NV.—The Committee recommendation includes \$13,000,000 to continue the Rural Nevada project. Within the funds provided, the Corps is directed to give consideration to projects at Boulder City, Lyon County (Carson River Regional Water System), Gerlach, Incline Village, Round Hill, Mesquite, Moapa, Spanish Springs, Battle Mountain, Virgin Valley, Lawton-Verdi, and Esmeralda County.

Tropicana and Flamingo Washes, NV.—The Committee has provided \$45,000,000 to continue construction of the project. The Committee recommendation includes \$5,000,000 for reimbursement of work performed by the project non-Federal sponsor in accordance with Section 211 of the Water Resources Development Act of 1996.

Holes Creek, West Carrollton, OH.—The Committee recommendation has included \$3,900,000 to continue construction of the project.

Columbia River Channel Improvements, OR & WA.—The Committee recommendation includes \$5,000,000 for continuation of the project.

Lower Columbia River Ecosystem Restoration, OR & WA.—In keeping with the Committee's decision to not initiate any construction "new starts" in the fiscal year 2003 Committee recommendation, no funding has been provided.

Locks and Dams 2, 3 and 4, Monongahela River, PA.—The Committee recommendation includes \$43,000,000. The Committee understands that this is considerably less than the Corps capability for this important navigation project that contributes to the Nation's economic security, but in a constrained budget environment, it is an increase over the budget request.

Presque Isle Peninsula, PA.—The Committee has provided \$1,080,000 for the beach nourishment project at Presque Isle for both annual periodic nourishment and for construction of modifications to the North Pier to facilitate the stockpiling of sand.

Charleston Harbor (Deepening/Widening), SC.—The Committee recommendation in-

cludes \$6,500,000 for continued construction of the project.

Myrtle Beach, SC.—The Committee has provided \$400,000 for dune restoration work at Surfside Beach/Garden City authorized as a part of the Myrtle Beach Project but not constructed at the time of sand placement due to funding constraints.

Cheyenne River Sioux Tribe, Lower Brule Sioux, SD.—The Committee notes that Title VI of the Water Resources Development Act of 1999, as amended, authorizes funding to pay administrative expenses, implementation of terrestrial wildlife plans, activities associated with land transferred or to be transferred, and annual expenses for operating recreational areas. Within the funds provided, the Committee directs that not more than \$1,000,000 shall be provided for administrative expenses, and that the Corps is to distribute remaining funds as directed by Title VI to the State of South Dakota, the Cheyenne River Sioux Tribe and Lower Brule Sioux Tribe.

Dallas Floodway Extension, TX.—The Committee has provided \$9,744,000 to continue the overall project, including the Cadillac Heights feature, generally in accordance with the Chief of Engineers Report dated December 7, 1999.

North Padre Island, Packery Channel, TX.—The Committee is aware that design and environmental studies have been completed and construction initiated to ensure the project meets provisions of Section 556 of WRDA 99. To that end, the Committee has provided \$5,000,000 to continue construction of the project.

Red River Basin Chloride Control, TX.—The Committee has provided \$2,000,000 to complete the reevaluation effort, initiate plans and specifications, and continue monitoring for the Wichita River Basin portion of the project. Further, the Committee urges budgeting for this critical project that improves Red River water quality.

Sandbridge Beach, VA.—The Committee recommendation includes \$1,400,000 to continue the project.

Columbia River Fish Mitigation, WA, OR, and ID.—The Committee recommendation includes \$85,500,000 to continue efforts associated with Columbia River Fish Mitigation. This is an \$12,500,000 reduction from the budget request, but should in no way be considered any diminution of interest or support for these vitally important mitigation projects by the Committee. Rather it reflects the fiscal constraints with which the Committee is faced with.

Within the funds provided, the Committee recommendation includes \$300,000 for a reconnaissance level investigation of Columbia River flood control operations to determine what changes, if any, would benefit endangered species, particularly salmon. Evaluation beyond the reconnaissance phase is subject to agency review and congressional notification.

Mud Mountain Dam, WA.—The Committee has provided \$2,500,000 to continue work on dam safety measures and the fish passage facility.

Levisa and Tug Forks of the Big Sandy River and Upper Cumberland River, WV, KY, & VA.—The Committee has provided \$16,900,000 for continuation of the project. Within the funds provided, the Committee recommendation includes \$500,000 for Buchanan County, VA; \$500,000 for Dickenson County, VA; and \$10,400,000 for Grundy, VA. Further, the Committee recommendation includes \$800,000 for Kermit, Lower Mingo County, WV; \$3,800,000 for McDowell County, WV; \$700,000 for Upper Mingo County, WV; and \$200,000 for Wayne County, WV.

Aquatic Plant Control Program.—The Committee has provided \$5,000,000 for the Aquatic

Plant Control Program, the Nation's only Federally authorized research program for technology that focuses on the management of non-indigenous aquatic species. The Committee is aware of the growing problem of invasive plant infestation around the country and supports the Corps' and industries efforts to develop new management and control technologies. The Committee believes that success in management of these invasive species is dependent upon the research and development activities of this program. In an effort to maximize limited funding for eradication and harvesting, the Committee strongly recommends that these efforts be undertaken only where a local sponsor agrees to provide 50 percent of the cost of the work. Within the funds provided, \$300,000 is for a cost shared effort with the State of South Carolina and \$400,000 is for a cost shared effort with the State of Vermont.

Dam Safety and Seepage/Stability Correction Program.—The Committee recommendation includes \$10,000,000 for the program. Within the funds provided, \$5,000,000 is provided for the Corps to continue work on Waterbury Dam in Vermont.

Idaho Dam Safety, ID.—The Committee encourages the Corps to provide assistance, within the authorities available to it, to the State of Idaho as it evaluates the need for maintenance of these deteriorating structures as well as the need for increased security.

Ability to pay.—Section 103(m) of the Water Resources Development Act of 1986, as amended, requires that all project cooperation agreements for flood damage reduction projects, to which non-Federal cost sharing applies, will be subject to the ability of non-Federal sponsors to pay their shares. Congress included this section in the landmark 1986 Act to ensure that as many communities as possible would qualify for Federal flood damage reduction projects, based more on needs and less on financial capabilities. The Secretary published eligibility criteria in 33 CFR 241, which requires a non-Federal sponsor to meet an ability-to-pay test. However, the Committee believes that the Secretary's test is too restrictive and operates to exclude most communities from qualifying for relief under the ability-to-pay provision. For example, 33 CFR 241.4(f) specifies that the test should be structured so that reductions in the level of cost-sharing will be granted in "only a limited number of cases of severe economic hardship," and should depend not only on the economic circumstances within a project area, but also on the conditions of the state in which the project area is located. While within the letter of the law, the Secretary's policies do not appear to be keeping the spirit of the law. The Secretary is directed to report to the Appropriations Committees within 90 days of enactment of this Act on a proposal intended to be published in the Federal Register to revise 33 CFR 241 eligibility criteria to allow a more reasonable and balanced application of the ability-to-pay provision.

CONTINUING AUTHORITIES PROGRAM

The continuing project authorities listed below, allow the Corps great flexibility to respond to various, limited-scope, water resource problems facing communities throughout the Nation. This program has proven to be remarkably successful in providing a quick response to serious local problems. These problems range from flood control and navigation to bank stabilization and environmental restoration. The Committee has provided funds in excess of the budget request for virtually all of these accounts. As a general rule, once a project has received funds for the initial phases of any of these authorities, the project will continue to be

funded as long as it proves to be environmentally sound, technically feasible, and economically justified, as applicable. With this in mind, the Committee has chosen to limit explicit direction of these project authorities.

The Committee is aware that there are funding requirements for ongoing, continuing authorities projects that may not be accommodated within the funds provided for each program. It is not the Committee's intent that ongoing projects be terminated. If additional funds are needed to keep ongoing work in any program on schedule, the Committee urges the Corps to reprogram the necessary funds.

Aquatic Ecosystem Restoration (Section 206).—The Committee has provided \$20,000,000 for the Section 206 Program. Within the amount provided, the recommendation includes:

\$250,000 for the Arroyo Mocho, Ecosystem Restoration, CA, for the preliminary restoration plan; \$185,000 for the Sweetwater Ecosystem Restoration, CA, for the preliminary restoration plan; \$100,000 for a preliminary restoration plan and planning and design analysis for the St. Joseph River, South Bend, IN; \$400,000 for the Chariton River/Rathbun Lake Watershed, IA, to continue feasibility study and initiate plans and specifications; \$114,000 for the Duck Creek-Fairmont Park Wetland Restoration, IA for planning and design analysis; \$250,000 for developing the plans and specifications for the Squaw Creek, IL, Ecosystem Restoration project; \$285,000 to complete feasibility studies for the Lake Killarney, LA, restoration; \$150,000 to complete the feasibility study for the Mill Creek, Littleton Pond, MA, restoration; \$161,000 for plans and specifications and construction of the Belle Isle Piers, MI restoration; \$100,000 for feasibility studies for controlling Eurasian watermilfoil in Clearwater Lake, MI; \$250,000 to conduct a feasibility study of alternatives to control Eurasian watermilfoil in Houghton Lake, MI; \$40,000 for the Little Sugar Creek, NC, restoration; \$200,000 to prepare a preliminary restoration plan for the West Cary Stream Restoration, NC; \$100,000 for the preliminary restoration plan and planning and design analysis for the Mason's Point Dike, NJ; \$380,000 for Bottomless Lakes, NM; \$233,000 for Jemez River, NM; \$1,600,000 to initiate planning, design, and implementation of various restoration projects for Tillamook Bay, OR; \$50,000 for the preliminary restoration plan for Roaring Branch, VT; \$240,000 to complete plans and specifications and to initiate construction for the Lake Poygan, WI restoration; \$140,000 to complete feasibility studies and initiate plans and specifications for the Menominee River Watershed, WI; and \$100,000 to initiate the planning and design analysis for the Trinity Creek, Mequon, WI, restoration.

Navigation Projects (Section 107).—The Committee has provided \$9,100,000 for the Section 107 Program. Within the amount provided, the recommendation includes:

\$40,000 to complete the detailed project report for the Oyster Point Marina, CA, project; \$300,000 to complete the feasibility study for the Short Cut Canal project in Terrebonne Parish, LA; \$125,000 to complete feasibility studies for the Rouge River, MI, navigation project; \$100,000 to complete the feasibility study for the Tri State Commerce Park navigation Project in Iuka, MS; and \$100,000 to initiate studies for the navigation project at Charlestown Breachway and Ninigret Pond, RI.

Tatilik Harbor, AK.—Given concerns over the safety and security of port and maritime harbors in the wake of terrorist attacks on the United States, the Committee recognizes the importance of ensuring there is an ade-

quate response in the case of a major oil spill near the Valdez terminal facility in Valdez, Alaska. The Committee also recognizes that nearly 20 percent of the domestic oil supply of the United States flows via tanker from Valdez terminal to the Lower 48 States, and that a terrorist attack on the facility, or a natural or man-made disaster around the terminal could temporarily suspend the flow of Alaska oil to the Lower 48 market. Further the Committee acknowledges that Tatilik, Alaska is strategically located and designated as the primary alternate response site to stage an oil spill clean up effort if the port of Valdez is inaccessible. To this end, the Committee authorizes and directs the Corps of Engineers to take whatever steps necessary with existing funds authorized and appropriated under section 107 to begin and finalize construction of a small boat harbor at Tatilik, Alaska.

Navigation Mitigation Projects (Section 111).—The Committee has provided \$2,000,000 for the Section 111 Program. Within the amount provided, the recommendation includes:

\$1,220,000 to initiate construction of the Saco River and Camp Ellis Beach, ME project to mitigate shoreline damages caused by the Federal navigation project.

Project Modifications for Improvement of the Environment (Section 1135).—The Committee has provided \$23,000,000 for the Section 1135 Program. Within the amount provided, the recommendation includes:

\$130,000 for feasibility studies for restoration of Ditch 28, Mississippi County, AR; \$25,000 for feasibility studies for modifications to Big Creek Spillway, IA; \$90,000 to complete the planning design analysis for the Honey Creek Wetlands project in IA; \$25,000 for the Trail Creek, IN, for the planning and design analysis for a sea lamprey barrier; \$30,000 for the Black Mallard Creek, MI, for the planning and design analysis for a sea lamprey barrier; \$100,000 to complete the feasibility studies for the project at Henepin Marsh, MI; \$70,000 for the planning and design analysis for a sea lamprey barrier at Rapid River, Delta County, MI; \$451,000 to complete the analysis and for construction of the Lemay Wetlands Restoration, MO; \$740,000 to complete feasibility studies and plans and specifications for the Pine Mountain Creek, (Cohansey River), NJ, project; \$150,000 to complete feasibility studies of the Middle Harbor Restoration at East Harbor State Park, Marblehead, OH; \$150,000 to continue a feasibility study for the Sheldon's Marsh, OH project; \$450,000 for construction of the Boyd's Marsh restoration project in Portsmouth, RI; and \$1,351,000 for construction of Phase I of Drakes Creek, Hendersonville, TN project and initiation of Phase II.

Emergency Streambank & Shoreline Protection Projects (Section 14).—The Committee has provided \$9,000,000 for the Section 14 Program. Within the amount provided, the recommendation includes:

\$185,000 for construction of the Baker Canal, East Baton Rouge, LA project; \$100,000 for the planning and design analysis for the Bell Isle South Shore, Detroit, MI project; \$800,000 for completion of design and construction of the Detroit River Shoreline, Detroit, MI, project; \$500,000 to initiate construction on the St. Cloud, MN project; \$687,000 for I-40 Rio Puerco, NM; \$167,000 Paseo del Norte, NM; \$415,000 for Unnamed Arroyo, NM; and \$600,000 for construction of the Cincinnati Waterworks, Hamilton County, OH project.

Flood Control Projects (Section 205).—The Committee has provided \$45,000,000 for the Section 205 Program. Within the amount provided, the recommendation includes:

\$100,000 for feasibility studies of flooding problems at Grubbs, AR; \$200,000 for feasibility studies of flood protection measures

for the Santa Venetia Flood Control Zone 7, CA; \$4,500,000 to continue construction of the project for Van Bibber Creek at Arvada, CO; \$100,000 to complete feasibility studies and initiate plans and specifications for Mosquito Creek at Council Bluffs, IA; \$100,000 to initiate feasibility studies of flooding problems along the Cedar River in Waverly, IA; \$1,000,000 to investigate flooding problems along Bayou Choupique in the vicinity of the Chitimacha Reservation in St. Mary Parish, LA; \$1,000,000 to complete plans and specifications and initiate construction for the Braithwaite Park, Plaquemines Parish, LA, project; \$300,000 to complete plans and specifications and initiate construction for the Dawson, MN, project; \$100,000 to continue feasibility studies of flooding problems at Jordan, MN; \$100,000 to initiate feasibility studies for Tchula Lake in Tchula, MS; \$2,000,000 for continued construction of the Wahpeton, ND, flood control project. The Committee is aware of the close hydraulic connection between this project and the Breckenridge, MN, project and encourages the Corps to coordinate these projects closely; \$1,600,000 for Little Puerco Wash, Gallup, NM; \$300,000 to initiate studies for the Spanish Springs Valley, NV flood prevention project; \$3,000,000 to complete plans and specifications for the nonstructural flood damage reduction project for Little Duck Creek, Cincinnati and Fairfax, OH; \$100,000 for plans

and specifications for the Beaver Creek, Bristol TN and VA, project; and \$100,000 for feasibility studies for a flood damage reduction project along Richland Creek, Nashville, TN.

Beneficial Uses of Dredged Material (Section 204).—The Committee has provided \$1,500,000 for the Section 204 Program. Within the amount provided, the recommendation includes \$25,000 to initiate the feasibility phase for the Blackhawk Bottoms, Des Moines County, IA, project.

Shoreline Protection Projects (Section 103).—The Committee has provided \$5,000,000 for the Section 103 Program. Within the amount provided, the recommendation includes \$100,000 to complete feasibility and initiate plans and specifications for the Luna Pier, MI, project and \$250,000 to continue design and plans and specifications for the Chesapeake Bay Shoreline, Hampton, VA, project.

Tribal Partnership Program.—The Committee acknowledges the serious impacts of coastal erosion and flooding due to continued climate change and other factors in the following communities in Alaska: Bethel, Dillingham, Shishmaref, Kivalina, Unalakleet, and Newtok. The Committee directs the Corps to perform an analysis of the costs associated with continued erosion of these communities, potential costs associated with moving the affected communities to new locations (including EIS

work on only the collocation of villages with existing communities), and to identify the expected time line for a complete failure of the useable land associated with each community. An additional \$2,000,000 above the President's request has been provided for this work, of which \$1,000,000 is for Shishmaref, AK.

Due to rapid erosion occurring at Shishmaref, AK, the Committee directs the Corps to expedite all necessary environmental studies to document the impacts of this severe and continuing erosion.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI, AND TENNESSEE

Appropriations, 2002	\$345,992,000
Budget estimate, 2003	280,671,000
Committee recommendation	346,437,000

This appropriation funds planning, construction, and operation and maintenance activities associated with water resource projects located in the lower Mississippi River Valley from Cape Girardeau, Missouri to the Gulf of Mexico.

The budget request and the approved Committee allowance are shown on the following table:

CORPS OF ENGINEERS—FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

[In thousands of dollars]

TOTAL, FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES	280,671	346,437

The Committee believes that it is essential to provide adequate resources and funding to the Mississippi River and Tributaries program in order to protect the large investment in flood control facilities. Although much progress has been made, considerable work remains to be done for the protection and economic development of the rich national resources in the Valley. The Committee expects the additional funds to be used to advance ongoing studies, initiate new studies, and advance important construction and maintenance work. In conjunction with efforts to optimize use of the additional funding provided, the Committee expects the Corps to make the necessary adjustments in lower priority activities and non-critical work in order to maximize the public benefit within the Mississippi River and Tributaries program.

General investigations

Bayou Meto Basin, AR.—The Committee has included \$1,633,000 to complete preconstruction engineering and design.

Construction

Channel Improvement, AR, IL, KY, LA, MS, MO, & TN.—The Committee recommendation includes \$36,690,000 for continuation of construction of various bank stabilization and river training measures to ensure an efficient flood control channel as well as to pro-

vide a safe and reliable navigation alignment.

Mississippi River Levees, AR, IL, KY, LA, MS, MO, and TN.—The Committee has provided \$49,885,000 for continued construction of the various elements of the Mississippi River Levee Project. Within the funds provided, \$500,000 is provided to continue engineering and design of the Lower Mississippi River Museum and Interpretive Site.

Yazoo Basin, Mississippi Delta Headwaters Project, MS.—The Committee recommendation includes \$21,000,000 to continue construction of the Mississippi Delta Headwaters Project, a joint effort of the Corps of Engineers and the Natural Resources Conservation Service. The Committee expects the Corps to continue design work, acquire real estate, monitor results for all watersheds, and initiate continuing contracts as required for completion of the total program.

Yazoo Basin, Yazoo Backwater Pumping Plant, MS.—The Committee recommendation includes \$15,000,000 to complete design, continue real estate activities and to initiate the pump supply contract.

Maintenance

Mississippi River Levees, AR, IL, KY, LA, MS, MO, and TN.—The Committee recommendation includes \$8,130,000 and includes

\$945,000 to provide gravel surfacing to selected locations on levee roads in Mississippi.

St. Francis River and Tributaries, AR & MO.—An additional \$600,000 has been provided above the budget request for maintenance items in Missouri.

Atchafalaya Basin, LA.—An additional \$1,808,000 has been provided above the budget request for dewatering and major lock repairs to Berwick Lock.

Lower Red River, South Bank Levees, LA.—The Committee recommendation includes \$2,375,000 for completion of the Bayou Rapides Pumping Plant and to continue routine operation and maintenance activities of the project.

Yazoo Basin, (Bogue Phalia), Big Sunflower River, MS.—The Committee has provided \$3,000,000 above the budget request to continue channel maintenance items.

OPERATION AND MAINTENANCE, GENERAL

Appropriations, 2002	\$1,874,803,000
Budget estimate, 2003	1,913,760,000
Committee recommenda-tion	1,956,182,000

The budget request and the approved Committee allowance are shown on the following table:

The Committee continues to believe that it is essential to provide adequate resources and attention to operation and maintenance requirements in order to protect the large Federal investment. Yet, current and projected budgetary constraints require the Committee to limit the amount of work that can be accomplished in the fiscal year. In order to cope with the current situation, the Corps has had to defer or delay scheduled maintenance activities.

Maintenance backlogs continue to grow, with much of the backlog being essential maintenance dredging needed to keep the Nation's ports, harbors, and waterways open and able to efficiently handle important national and international trade activities.

Yet, the Committee is aware that out-year budget planning guidance for the Corps of Engineers projects that the current appropriations for their critical operation and maintenance activities will continue to decline for the foreseeable future. If additional resources are not made available, the Committee will be forced to cut back on services, and begin to terminate and close many projects and activities.

The Committee is aware of the Corps' efforts to stretch the limited resources to cover all of its projects and to effect savings through a variety of means. With an increasing number of projects entering the inventory, and budgetary constraints increasing, it is clear that the Corps will have to find in-

novative ways of accomplishing required maintenance work, while reducing operational and other costs. Adjustments in lower-priority programs and noncritical work should optimize limited resources while maximizing the public benefit.

The budget request has proposed that no navigation project with less than one billion ton-miles of cargo be eligible for maintenance dredging. The Committee believes that this is in direct conflict with the way projects are analyzed. Project analysis is based upon Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies (1983), the Corps of Engineers Planning Guidance Notebook (2000), and other policies

and procedures. For navigation studies, the analysis centers on transportation savings to the Nation considering the ultimate origins and destinations of commodities to be moved. Operation and maintenance costs are considered as a part of this analysis and are figured into the benefit to cost ratio utilized to make the investment decision. By applying an arbitrary ton-mile figure to determine O&M funding decisions, the budget request has essentially obviated the need for any of the previous studies undertaken to determine the investment decision.

The Committee is concerned about the annual proposals for reductions of maintenance funding for “low use waterways and ports”. These tributary waterways naturally do not enjoy the same level of relative efficiencies as mainstem waterways. The Mississippi and Ohio Rivers handle tremendous volumes of traffic over long distances and so generate impressive ton-mile statistics. Tributaries, by nature, provide generally short, smaller channels with lower traffic densities. Consequently, “ton-mile” statistics for tributary waterways are dwarfed by statistics for the mainstem waterways. It is important to recognize that the commerce on the tributaries is usually only a small part of the total journey between producer and consumer. When these statistics are compared on a system basis, nearly all of these waterways appear to “pay their way” and are performing as the economic analysis indicated when they were originally authorized.

Uncertainties in maintenance funding for lower use projects, seriously impact their abilities to compete and become higher use facilities. Without funding to provide a stable channel and authorized depths and widths, industries and shippers are reluctant to make the necessary investments in using these projects. The Committee believes that proposed elimination of maintenance funding for authorized projects is not only a serious disservice to the public, but is demonstrates a profound lack of respect for the congressional oversight committees that have jurisdiction for authorization and de-authorization of such projects.

The Committee is not in favor of funding projects that are no longer economically viable or environmentally sustainable however, we believe that they should be proposed for deauthorization through the proper congressional oversight committees. Therefore, the Committee has restored funding to most of the low use waterways and port projects not included in the budget request and encourages the administration to budget accordingly.

Alabama Coosa River, AL.—The Committee has provided \$200,000 above the budgeted amount for implementation of a systemwide geographic information system for the Alabama-Coosa River.

Tennessee-Tombigbee Waterway, AL & MS.—The Committee recommendation includes \$26,800,000. Within the funds provided, \$2,000,000 is provided for to maintain mitigation on State managed lands and \$1,717,000 is provided to accomplish additional dredging of navigation channels.

McClellan-Kerr Arkansas River Navigation System, AR.—The Committee has provided \$2,000,000 above the budget request to perform advance maintenance dredging to assure the authorized depth of 9 feet is maintained.

Ouachita/Black Navigation Project, AR & LA.—The Committee recommendation includes \$8,325,000. Funds provided above the budget request are for yearly maintenance dredging, and backlog maintenance.

White River, AR.—The Committee has provided \$2,200,000 for routine operation and maintenance activities and for minimum expected dredging and snagging requirements.

Humboldt Harbor and Bay, CA.—The Committee has provided an additional \$1,500,000 to the administration’s budget request of \$3,426,000 for Humboldt Bay, California, for advanced maintenance dredging to remove the source of shoaling that has impeded navigational safety in the entry channel to the harbor. The shoaling has caused loss of life, property, oil spills and interruptions in the flow of commerce to and from Humboldt Bay.

Los Angeles County Drainage Area, CA.—Within the funds provided, \$3,160,000 is for the Hansen Dam unit of the project. The Committee urges the Corps to work with the Santa Monica Mountains Conservancy, or its local designee, concerning development and management of the natural areas within the Hansen Dam Recreation Area.

Ventura Harbor, CA.—The Committee recommendation includes an additional \$1,300,000 for the repair of the weir at Ventura Harbor.

Cherry Creek, Chatfield, and Trinidad Lakes, CO.—An appropriations request of \$1,500,000 over the budget for these three lakes has been provided. Frequent inundation of recreation areas are causing health and safety concerns requiring repair or replacement of the facilities. A total of \$1,500,000 above the budget request has been provided for these three lakes. This action in no way is intended to alter the Corps of Engineers’ lease and property accountability policies. It is the Committee’s understanding that the State of Colorado has agreed to cost share this project on a 50-50 basis. It is also the understanding of the Committee that the Secretary is not to assume, nor share in the future cost of the operation and maintenance of these recreation facilities.

Treatment of Dredged Material from Long Island Sound, NY.—\$250,000 is provided to initiate a demonstration program for the use of innovative technologies for the treatment of dredged materials from Long Island Sound.

Intracoastal Waterway, Delaware River to Chesapeake Bay, DE & MD.—The Committee recommendation is \$12,853,000. Funds are provided for routine operation and maintenance activities and for immediate reimbursement to the State of Delaware for normal operation and maintenance costs incurred by the State for the SR-1 Bridge, from station 58+00 to station 293+00, between October 1, 2002 and September 30, 2003. The reimbursable costs include electric lighting and associated late fees, power sweeping, drainage cleaning, snow removal, surface deicing, and periodic bridge inspections. The Corps shall initiate necessary repairs to the SR-1 bridge once repair recommendations from the bridge inspections are received.

Intracoastal Waterway, Jacksonville to Miami, FL.—The Committee has provided \$2,500,000 for maintenance activities along the Atlantic Intracoastal Waterway.

Apalachicola, Chattahoochee and Flint Rivers, GA, FL, & AL.—The Committee recommendation includes \$4,709,000 which includes annual dredging of the river channel, annual operations and maintenance of the George W. Andrews Lock, spot dredging of shoals continue and routine operations and maintenance of the project. With funds previously provided, the Committee expects the Corps to continue restoration efforts in the Corley Slough reach.

Missouri River—Rulo to the Mouth, IA, NE, KS, & MO.—The Committee recommendation includes \$500,000 above the budget request to continue implementation of actions related to the U.S. Fish and Wildlife Service biological opinion.

Red Rock Dam and Lake Red Rock, IA.—The Committee has provided \$800,000 above the budget request to complete repairs to the SE Des Moines Remedial Works Levee.

Mississippi River between Missouri River and Minneapolis, IL, IA, MN, MO, & WI.—The Committee has provided \$500,000 above the budget request for ongoing major maintenance items and initiation of major maintenance activities at Lock and Dam 11.

Clinton Lake, KS.—An additional \$366,000 has been provided above the budget request for Lewis and Clark Commemoration events.

Big Sandy Harbor, KY.—\$1,135,000 has been provided by the Committee for annual dredging requirements.

Wolf Creek Dam, Lake Cumberland, KY.—The Committee recommendation includes \$1,200,000 above the budget request for the Corps to make safety and other necessary improvements to the boat ramps at Old Fall Creek, Tate Access, Camp Atrahunt and Ramsey Point.

J. Bennett Johnston Waterway, LA.—The Committee recommendation includes \$12,224,000. Within the funds provided, \$1,000,000 is provided for bank stabilization repairs, \$408,000 is provided for dredging entrances to oxbow lakes, with the remainder provided for routine operation and maintenance activities, annual dredging requirements, and backlog maintenance items.

Narraguagus River, Milbridge, ME.—The Committee has provided \$50,000 for the Corps to complete necessary environmental documentation and plans and specifications for restoring the project to authorized widths and depths.

Black River, Port Huron, MI.—The Committee recommendation includes \$500,000 to complete plans and specifications and initiate maintenance dredging of the project.

Morehead City Harbor, NC.—\$300,000 has been provided above the budget request to complete the Section 933 study concerning placement of maintenance material on the beaches of Bogue Banks.

Garrison Dam, Lake Sakakawea, ND.—The Committee has provided \$300,000 above the budget request for mosquito control and continued improvements to low water lake accessibility.

Cocheco River, NH.—\$500,000 has been provided for needed maintenance dredging of the authorized project.

Upper Rio Grande Water Operations Model, NM.—The Committee recommendation includes \$2,050,000 for the daily water operations model for the Upper Rio Grande Basin.

Cochiti Partnering Initiative, Cochiti Pueblo, NM.—The Committee is aware of the joint efforts made by both the Corps of Engineers and the Cochiti pueblo in an attempt to resolve residual differences regarding the construction of the Cochiti dam and encourages both sides to continue to build further on this relationship.

Delaware River, Philadelphia to the Sea, NJ, PA, & DE.—The Committee has provided \$500,000 above the budget request to continue restoration work at Pea Patch Island.

Copan Lake, OK.—The Committee is aware of the need to complete a study of the need to determine the feasibility of reallocating available storage at Copan Lake, OK to meet the future water supply needs for the city of Bartlesville, OK. Therefore the Committee has provided \$1,521,000 for routine operations and maintenance and the reallocation study.

Bonneville Lock and Dam, OR & WA.—The Committee has provided \$400,000 above the budget request for continue actions to implement the Federal Columbia River Power System Biological Opinion.

Columbia River at the Mouth, OR & WA.—The Committee recommendation includes \$10,702,000. Funds provided are for routine operations and maintenance, increased dredging costs, jetty evaluation, studies of alternate dredged material disposal and a dredged material disposal demonstration project at Benson Beach.

John Day Lock and Dam, OR & WA.—The Committee has provided \$1,584,000 above the budget request for significant safety repairs to the navigation lock, to continue the major rehabilitation evaluation report to address significant foundation problems, and to continue actions to implement the Federal Columbia River Power System Biological Opinion.

Francis E. Walter Dam, PA.—The Committee has provided \$3,500,000 above the budget request to complete the relocation of the frequently inundated access road.

Point Judith Pond and Harbor of Refuge, RI.—The Committee recommendation includes \$120,000 to survey the breakwaters and determine if repairs are warranted.

Providence River and Harbor, RI.—The Committee recommendation includes \$20,000,000 to initiate dredging of the authorized project.

Cooper River, Charleston Harbor, SC.—The Committee has provided \$7,050,000 for the Cooper River, Charleston Harbor, SC project. Within the funds provided, \$3,750,000 is provided to make a lump sum payment to the South Carolina Department of Natural Resources to perform all future operation of the fish lift at St. Stephen, South Carolina.

Cheyenne River Sioux Tribe, Lower Brule Sioux, SD.—The Committee notes that Title VI of the Water Resources Development Act of 1999, as amended, requires that funding to inventory and stabilize cultural and historic sites along the Missouri River in South Dakota, and to carry out the terrestrial wildlife habitat programs, shall be provided from the Operation and Maintenance account. The Committee has provided \$5,000,000 to protect cultural resource sites and provide funding to the State and Tribes for approved restoration and stewardship plans and in compliance with the requirements of Title VI, directs the Corps to contract with or reimburse the State of South Dakota and affected Tribes to carry out these duties.

Texas Water Allocation Assessment, TX.—The Committee recommendation includes \$500,000 for the Texas Water Allocation Assessment for the Corps to work with the Texas regional planning groups in the evaluation of technologies and the exploration of water supply opportunities in the State including (where appropriate) water reuse, aquifer storage and recovery, and development of new multi-purpose facilities.

Burlington Harbor Breakwater, VT.—The Committee recommendation includes \$800,000 to complete repairs to the south breakwater.

Connecticut River Basin Master Plans, VT.—The Committee recommendation includes \$300,000 to complete master plans for Ball Mountain, North Springfield, Townshend, and Union Village Reservoirs in Vermont.

Grays Harbor and Chehalis River, WA.—The Committee recommendation includes \$12,281,000 for routine operation and maintenance, to complete the North Jetty rehabilitation contract, to continue entrance channel study, for maintenance of the South Jetty.

Facility Protection.—The Committee has provided \$35,000,000. The Committee has been informed that this is the average annual cost for guards at critical facilities.

REGULATORY PROGRAM

Appropriations, 2002	\$127,000,000
Budget estimate, 2003	144,252,000
Committee recommendation	144,252,000

An appropriation of \$144,252,000 is recommended for the regulatory program of the Corps of Engineers.

This appropriation provides for salaries and costs incurred administering regulation of activities affecting U.S. waters, including wetlands, in accordance with the Rivers and

Harbors Act of 1899, the Clean Water Act of 1977, and the Marine Protection, Research and Sanctuaries Act of 1972.

The appropriation helps maintain program performance, protects important aquatic resources, and supports partnerships with States and local communities through watershed planning efforts.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

Appropriations, 2002	\$140,000,000
Budget estimate, 2003	140,298,000
Committee recommendation	140,298,000

The Committee recommends an appropriation of \$140,298,000 to continue activities related to the Formerly Utilized Sites Remedial Action Program (FUSRAP) in fiscal year 2003.

The responsibility for the cleanup of contaminated sites under the Formerly Utilized Sites Remedial Action Program was transferred to the Army Corps of Engineers in the Fiscal Year 1998 Energy and Water Development Appropriations Act, Public Law 105-62.

FUSRAP is not specifically defined by statute. The program was established in 1974 under the broad authority of the Atomic Energy Act and, until fiscal year 1998, funds for the cleanup of contaminated defense sites had been appropriated to the Department of Energy through existing appropriation accounts. In appropriating FUSRAP funds to the Corps of Engineers, the Committee intended to transfer only the responsibility for administration and execution of cleanup activities at eligible sites where remediation had not been completed. It did not intend to transfer ownership of and accountability for real property interests that remain with the Department of Energy.

The Corps of Engineers has extensive experience in the cleanup of hazardous, toxic, and radioactive wastes through its work for the Department of Defense and other Federal agencies. The Committee always intended for the Corps' expertise be used in the same manner for the cleanup of contaminated sites under FUSRAP. The Committee expects the Corps to continue programming and budgeting for FUSRAP as part of the Corps of Engineers—Civil program.

The Committee notes that portions of the Iowa Army Ammunition Plant in Middleton, Iowa, have recently been deemed eligible for inclusion into the FUSRAP program. The Committee encourages the Corps to reprogram available FUSRAP funds to initiate work on this site as soon as practicable and to budget for this site in future budget submissions.

GENERAL EXPENSES

Appropriations, 2002	\$153,000,000
Budget estimate, 2003	155,651,000
Committee recommendation	155,651,000

This appropriation finances the expenses of the Office, Chief of Engineers, the Division Offices, and certain research and statistical functions of the Corps of Engineers.

Executive direction and management.—The Office of the Chief of Engineers and eight division offices supervise work in 38 district offices.

Humphreys Engineer Center Support Activity.—This support center provides administrative services (such as personnel, logistics, information management, and finance and accounting) for the Office of the Chief of Engineers and other separate field operating activities.

Institute for Water Resources.—This institute performs studies and analyses and develops planning techniques for the management and development of the Nation's water resources.

United States Army Corps of Engineers Finance Center.—This center provides centralizes support for all Corps finance and accounting sites.

The Committee has included statutory language for the past several years prohibiting any funds from being used to fund an Office of Congressional Affairs within the executive office of the Chief of Engineers. The Committee believes that an Office of Congressional Affairs for the Civil Works Program would hamper the efficient and effective coordination of issues with the Committee staff and Members of Congress. The Committee believes that the technical knowledge and managerial expertise needed for the Corps headquarters to effectively address Civil Works authorization, appropriation, and Headquarters policy matters resides in the Civil Works organization. Therefore the Committee strongly recommends that the office of Congressional Affairs not be a part of the process by which information on Civil Works projects, programs, and activities is provided to Congress.

The Committee reminds the Corps that the General Expenses Account is to be used exclusively for executive oversight and management of the Civil Works Program.

In 1998, The Chief of Engineers issued a Command Directive transferring the oversight and management of the General Expenses account, as well as the manpower associated with this function, from the Civil Works Directorate to the Resource Management Office. General Expense funds are appropriated solely for the executive management and oversight of the Civil Works Program under the direction of the Director of Civil Works. This Committee continues to be concerned about the priority setting and decision making process being employed by the Corps for the usage of General Expense funds. A number of the general expense funded items seem to be only remotely associated with the direct management and oversight of the Civil Works Program. Accordingly, the Committee is establishing some guidelines by which non-labor discretionary general expense dollars appropriated are to be allocated within the Corps of Engineers.

These guidelines include: any allocation of discretionary, non-labor General Expense dollars exceeding \$100,000 for a specific activity in any one fiscal year, needs to obtain prior approval of the Senate Appropriations Committee before obligating funds. Within 60 days of enactment of this Act, the Corps of Engineers is directed to submit to the Committee, for approval, a written procedure for setting priorities and allocating General Expense dollars assuring that General Expense dollars will be managed consistent with this direction.

The Committee has further determined that the allocation of General Expense funds will be provided through the following line items and funds can only be moved between these line items with the concurrence of the Committee: labor, travel, congressionally mandated studies, improving the technical capability of the Corps of Engineers, implementing the Project Management Business Process, and updating and maintaining current regulations and procedures for implementing Civil Works projects.

The Committee recommends an appropriation of \$155,651,000.

FLOOD CONTROL AND COASTAL EMERGENCIES

Appropriations, 2002
Recissions	-\$25,000,000
Budget estimate, 2003	20,227,000
Committee recommendation	20,227,000

This account provides funds for preparedness activities for natural and other disasters, response, and emergency flood fighting

and rescue operations, hurricane response, and emergency shore protection work. It also provides for emergency supplies of clean water where the source has been contaminated or where adequate supplies of water are needed for consumption.

The Committee is aware of the successful testing of the Rapid Deployment Flood Wall at the Engineering Research and Development Center in Vicksburg, Mississippi. This technology has proven to be promising in the effort to fight floods, cost-effective, quick to deploy and successful in protecting property from flood damage, damages which total millions each year.

The Committee is aware that the Corps of Engineers intends to revise 33 CFR 203.82 and implement cost-sharing conditions for emergency response and recovery activities funded by the Flood Control and Coastal Emergencies (FCCE) account. Public Law 8499 provides the Secretary of the Army, acting through the Chief of Engineers, with broad discretionary authority to respond to disasters, preserve human life, and protect critical infrastructure. Appropriations to the FCCE account allow the Corps to provide assistance to distressed areas before, during and after natural disasters—events that usually require rapid response and extract heavy tolls on community resources. Under such urgent and extreme circumstances, Federal cost-sharing should not impose delay and unreasonable financial burdens on state and local governments trying to rebuild their communities. The Committee expects the Secretary to administer the FCCE program in accordance with the terms and conditions of Public Law 84-99 in a fair, reasonable and balanced manner, and to inform the Appropriations Committees of any specific cost sharing required in law for the FCCE program and to modify 33 CFR 203.82 accordingly. Further, the Appropriations Committees shall be informed of any Corps of Engineers proposal intended to be published in the Federal Register.

GENERAL PROVISIONS—CORPS OF ENGINEERS—CIVIL

Language included under Section 101 restates language contained in the Energy and Water Development Appropriations Act, 2000, Public Law 106-60 which places a limit on credits and reimbursements allowable per project and annually.

The bill includes language in Section 102 which directs that none of the funds made available in fiscal year 2002 may be used to

carry out any activity relating to closure or removal of the St. Georges Bridge across the Intracoastal Waterway, Delaware River to Chesapeake Bay, Delaware and Maryland.

SEC. 103. The Committee has included language to make changes to Sec. 595(h)(1) of Public Law 106-53.

SEC. 104. The Committee has included language concerning private sector contracting percentages.

SEC. 105. The Committee has included language making technical corrections to the St. Paul Harbor, Alaska project.

SEC. 106. The Committee has included language making technical corrections to the Abiquiu Dam Emergency gate project.

SEC. 107. The Committee has included language concerning relocations credit for the Tropicana Flamingo project.

SEC. 108. The Committee has included language concerning rehabilitation of the dredge McFARLAND. The Committee believes that a determination for how the dredge is to be utilized following this rehabilitation should be deferred until after the GAO report requested in Public Law 107-66 has been received and has undergone a thorough review by the appropriate Committees.

SEC. 109. The Committee has included a new provision regarding the AIWW bridge replacement.

SEC. 110. The Committee has included a provision regarding the Corps Civil Works missions.

SEC. 111. The Committee has included a new provision regarding the American and Sacramento Rivers, CA project.

SEC. 112. The Committee has included a new provision regarding the Terminus Dam, CA project.

TITLE II—DEPARTMENT OF THE INTERIOR

CENTRAL UTAH PROJECT COMPLETION ACCOUNT

Appropriations, 2002	\$36,228,000
Budget estimate, 2003	36,228,000
Committee recommendation	36,228,000

The Committee recommendation for fiscal year 2003 to carry out the provisions of the Central Utah Project Completion Act totals \$36,228,000. An appropriation of \$23,643,000 has been provided for Central Utah project construction; \$11,259,000 for fish, wildlife, and recreation, mitigation and conservation. The Committee recommendation provides \$1,326,000 for program administration and oversight.

BUREAU OF RECLAMATION—WATER AND RELATED RESOURCES [In thousands of dollars]

The Central Utah Project Completion Act (titles II–VI of Public Law 102-575) provides for the completion of the central Utah project by the Central Utah Water Conservancy District. The Act also authorizes the appropriation of funds for fish, wildlife, recreation, mitigation, and conservation; establishes an account in the Treasury for the deposit of these funds and of other contributions for mitigation and conservation activities; and establishes a Utah Reclamation Mitigation and Conservation Commission to administer funds in that account. The Act further assigns responsibilities for carrying out the Act to the Secretary of the Interior and prohibits delegation of those responsibilities to the Bureau of Reclamation.

BUREAU OF RECLAMATION

WATER AND RELATED RESOURCES

Appropriations, 2002	\$762,531,000
Budget estimate, 2003	726,147,000
Committee recommendation	816,147,000

An appropriation of \$816,147,000 is recommended by the Committee for general investigations of the Bureau of Reclamation. The water and related resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies.

The Committee is aware the Bureau has undertaken an investigation into the extent to which Alkali Silica Reactivity (ASR) effects projects within the Bureau's domain. The Committee commends the Bureau for this initiative. The Committee requests that information from the investigations be provided to the relevant Senate and House authorizing and appropriating subcommittees within 6 months of enactment of this Act, along with recommendations for a course of action to prevent and mitigate ASR in the future.

The amounts recommended by the Committee are shown on the following table along with the budget request.

TOTAL, LOAN PROGRAM	7,495	7,495

Colorado River Front Work and Levee System, AZ.—The Committee has provided an additional \$1,000,000 for the Bureau of Reclamation to continue design and Environmental compliance activities for water management reservoirs to be constructed along the All American Canal.

Fryingpan-Arkansas Project, CO.—The Committee has provided an additional \$200,000 for the reevaluation report.

Central Valley Project, CA.—The Committee recommendation provides an additional \$30,000,000 for this project for activities in support of the California Bay-Delta Restoration. These activities are more fully described under the heading for the California Bay-Delta Restoration.

CVP, Sacramento River Division, CA.—The Committee has provided \$400,000 above the budget request to continue the Colusa Basin Integrated Resource Management Plan.

Lake Tahoe Regional Wetlands Development, CA.—The Committee has provided \$3,000,000 to continue the environmental restoration projects in the vicinity of Lake Tahoe, California and Nevada.

The Bureau of Reclamation is authorized hereafter to negotiate and enter into financial assistance agreements with public and private agencies, organizations, and institutions for activities under the Lake Tahoe Regional Wetlands Development Program. Costs associated with such activities will be non-reimbursable.

Animas La-Plata Project, CO and NM.—The bill contains \$35,000,000 for the Animas La-Plata, Colorado Project. The Committee recognizes that with constrained resources it will be difficult to maintain the schedule established by the Colorado Ute Settlement Act Amendments of 2000.

Arrowrock Dam, ID.—The Committee expects continued and full compliance by the Bureau with Section 206 of Public Law 107-066, with regard to the Valve Rehabilitation Project at the Arrowrock Dam on the Arrowrock Division of the Boise Project in Idaho, for the full period of recovery of expenses prescribed in that Section.

Columbia and Snake River Salmon Recovery Project, ID, OR, and WA.—The Committee has provided \$500,000 above the budget request for continued fishery habitat improvements in the John Day River Subbasin Project, OR.

Lucky Peak, ID.—The Committee is aware of the Bureau collecting from water users for NEPA compliance work associated with the Lucky Peak water service contract renewals. The Committee believes that, with respect to these water service contracts, the Bureau of Reclamation should incur these costs as part of its regular activities and shall report to the Committee within 180 days within enact-

ment of this bill on how it intends to address this situation.

Halfway Wash, NV.—The Committee recommendation has provided \$390,000 to studies of Halfway Wash in Mesquite, County, NV.

Conchus Project Study, NM.—The Committee has included \$100,000 to conduct a yield and seepage study.

Middle Rio Grande Project, NM.—The Committee is aware of the pending biological opinion in effect on the Rio Grande. When combined with the drought conditions facing New Mexico, and municipalities, farmers and the silvery minnow all competing for the same scarce resource, water, a delicate balance must be maintained. The recommendation includes funding for the following activities: \$5,100,000 for modifications to river habitat; \$2,180,000 for silvery minnow population management; \$1,100,000 for monitoring of stream effects on the silvery minnow; \$130,000 to combat non-native species endangering the silvery minnow; \$650,000 for Bureau of Reclamation's repayment obligations under the agreement; \$950,000 for water quality studies and improvements; and \$2,500,000 for the Bureau of Reclamation's purchase of water. In addition, the Committee directs the Bureau of Reclamation to consult with the Fish and Wildlife Service on silvery minnow monitoring and habitat efforts. Finally, the Committee has included statutory language which requires the Bureau to submit a report on the status and results of fiscal year 2002 funding and, to submit to the Committee for approval, a detailed spending plan for fiscal year 2003 within 60 days of enactment.

Middle Rio Grande Levees, NM.—The Committee is very concerned about the state of disrepair of the Middle Rio Grande levees due to the lack of sufficient and regular maintenance within the river bed, including both the levees and the low-flow channel. The Committee has included an additional \$10,000,000 to address this problem and expects the Bureau to expedite its work in order to begin the repair of the project in order to address the life and safety issues. Additionally, the Committee expects that the Bureau will take all steps necessary to maintain the project in a responsible manner such that additional levees will not be at risk. Finally the Commissioner is directed to submit an annual report to the Senate Appropriations Committee on the status of the levee repairs.

Pecos River Basin Water Supply Salvage Project, NM.—The Committee is aware that the Bureau of Reclamation carries out the Pecos River Basin Water Supply Salvage project in collaboration with the State of New Mexico. The Committee directs the Bureau of Reclamation, within funds appro-

priated for the Facility Maintenance and Rehabilitation, not to provide less than \$500,000 for this eradication effort.

Garrison Diversion Unit, ND.—The Committee recommendation includes \$24,000,000. While this is an increase over the budget request, it is still far below the amount needed to fund the project at an optimum level.

Bandon Cranberry Water Control District, OR.—The Committee is aware that over the last several years, the Bureau of Reclamation has been working with the Bandon Cranberry Water Control District on several proposals for water storage capacity and reservoir upgrades. The Committee encourages the Bureau of Reclamation to continue its work in an effort to determine the Federal interest in these projects and the needs of the water district.

Klamath Project, OR.—The Committee recommendation includes \$19,377,000. The additional funds are for continued construction of the A-Canal fish screen.

Mni Wiconi Project, SD.—The Committee has provided \$30,772,000 for the Mni Wiconi Project. While this is an increase over the budget request, it is still far below the amount needed to fund the project at an optimal level.

Columbia Basin Project, WA.—The Committee recommendation includes \$400,000 above the president's request for design documents, plans and specifications for stream habitat restoration along Icicle Creek, WA.

Salmon Creek Watershed Restoration Feasibility Study, WA.—The Committee has provided \$250,000 for feasibility studies to improve fisheries habitat in the Salmon Creek Watershed.

Departmental Irrigation Drainage Program.—The Committee has provided \$750,000 above the budget request for the Uncompahgre Valley Water Users Association Selenium Remediation Demonstration Project.

Drought Emergency Assistance.—The Committee has provided \$5,399,000. Within the funds provided, \$3,500,000 is for a regional weather modification program and \$1,000,000 is for assistance to the State of Montana, now in its fourth year of drought.

The Committee is concerned about the impact of the current drought on farmers, municipalities, and other water users. Unfortunately, being that this issue was unanticipated, the President's budget did not contain any significant funds to address drought. Therefore, the Committee expects that the Bureau will utilize its drought emergency assistance program which enables the Bureau to construct temporary facilities and provide assistance in the form of contingency planning for communities in an effort to minimize the impacts of drought.

From the funds appropriated for drought emergency assistance, the Committee urges

the Bureau to provide full and fair consideration of the request for drought assistance from the State of Hawaii and fund, if meritorious.

Science and Technology, Desalination Research and Development Program.—The Committee recommendation includes \$4,000,000 for desalination research and development of which, \$3,000,000 is provided for desalination laboratory research, pilot, and demonstration projects to continue efforts for an additional 2 years as originally established by Public Law 104-298, Water Desalination Act of 1996. The Committee recommends that funding shall be subject to the guidelines identified in Section 7 of the Water Desalination Act of 1996. To that end, the Committee wishes to ensure that the Bureau of Reclamation continue as the lead Federal entity responsible for identifying the most cost effective and technologically efficient means by which usable water can be produced from saline or water otherwise impaired or contaminated. As such, the Committee directs that the Secretary of the Interior to collaborate on research activities managed or conducted by the National Laboratories.

The Committee has included \$3,000,000 for the continuation of the collaborative process with regard to the Bureau of Reclamation and Sandia National Lab on desalination. It is the Committee's intent that these funds will not be obligated until the progress plan is submitted for approval by the Senate Committee on Appropriations. It is the understanding of the Committee that the design review of the project is approximately 90 percent complete. With the funds provided, the Bureau of Reclamation, shall implement the technology progress plan developed in conjunction with Sandia National Laboratories during fiscal year 2002. The Committee recognizes that effective desalination cost reduction is the key to wider use of desalination for improving the quality of life in water-scarce regions. Within the funds provided, the Commissioner is also directed to assess the potential use of advanced water treatment technologies as a resource to create net new water supplies and to evaluate project benefits, economic values and environmental effects. Further, the Commissioner should identify resource needs that can be met through these technologies and interparty transfers and to identify obstacles to be overcome (physical, financial, institutional, and regulatory). The assessment should include an assessment of life cycle cost effectiveness and validate new technology and practices.

Title XVI Water Reclamation and Reuse Program.—The Committee recognizes the progress the WaterReuse Foundation program has accomplished in providing important research into the science and technological aspects of water reclamation and public health. The Committee is further aware that the Foundation has continued to meet its cost share requirement as directed. Accordingly, the Committee provides that within funds provided, the Bureau of Reclamation is to provide \$2,000,000 to support the WaterReuse Foundation in its research activities. A high priority of this research shall be related to aquifer storage and recovery.

Within funds provided for the Title XVI Program, the Bureau is directed to undertake feasibility studies of the potential for water reclamation and reuse in North Las Vegas, NV in cooperation with the Southern Nevada Water Authority.

Water Management and Conservation Program.—The Committee has provided \$500,000 above the President's budget for urban water conservation programs within the service area of the Metropolitan Water District of Southern California.

Nonreimbursability of Security Funding.—Funds made available in Public Law 107-117 for Water and Related Resources to respond to the September 11, 2001 terrorist attacks on the United States and sums appropriated under this heading for increased site security/counter-terrorism activity shall be nonreimbursable.

BUDGET LIMITATIONS AND REDUCTIONS

Constrained spending limits have made it difficult for the Committee to formulate a balanced Energy and Water Development appropriations bill for fiscal year 2003. In order to adhere to the subcommittee's allocations, address the critical ongoing activities, correct program imbalances contained in the President's fiscal year 2003 budget, and respond to the numerous requests of the Members, the Committee finds it necessary to recommend numerous adjustments to funding levels proposed in the budget. Finally, the Committee regrets that many worthwhile projects could not be recommended for funding because of the lack of authorization and the shortfall in resources.

The Committee received numerous requests to include project authorizations in the Energy and Water Development appropriations bill. However, in an effort to support and honor the congressional authorizing committees' jurisdiction, the Committee has not included new project authorizations.

CENTRAL VALLEY PROJECT RESTORATION FUND

Appropriations, 2002	\$55,039,000
Budget estimate, 2003	48,904,000
Committee recommendation	48,904,000

The Committee recommends an appropriation of \$48,904,000, the same as the budget request for the Central Valley Project Restoration Fund.

The Central Valley Project Restoration Fund was authorized in the Central Valley Project Improvement Act, title 34 of Public Law 102-575. This fund was established to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley project area of California. Revenues are derived from payments by project beneficiaries and from donations. Payments from project beneficiaries include several required by the Act (Friant Division surcharges, higher charges on water transferred to non-CVP users, and tiered water prices) and, to the extent required in appropriations acts, additional annual mitigation and restoration payments.

CALIFORNIA BAY-DELTA RESTORATION (INCLUDING TRANSFER OF FUNDS)

Appropriations, 2002	\$15,000,000
Budget estimate, 2003	
Committee recommendation	

This account funds activities that are consistent with the CALFED Bay-Delta Program, a collaborative effort involving 18 State and Federal Agencies and representatives of California's urban, agricultural, and environmental communities. The goals of the program are to improve fish and wildlife habitat, water supply reliability, and water quality in the San Francisco Bay-San Joaquin River Delta, the principle hub of California's water distribution system.

The CALFED Program was established in May 1995, for the purpose of developing a comprehensive, long-term solution to the complex and inter-related problems in the San Francisco Bay-Delta area of California. The program's focus is on the health of the ecosystem and improving water management. In addition, this program addresses the issues of uncertain water supplies, aging levees, and threatened water quality.

The Committee is aware that legislation has been introduced in the House and Senate to reauthorize the comprehensive program. Absent this legislation, the Committee has recommended no funding under the California Bay-Delta Ecosystem Restoration Project. In order to support the efforts of the State of California to provide a safe, clean water supply and improve the environment, the Committee has provided funds for previously authorized studies under the Central Valley Project. These studies will support and further the goals of the overall CALFED Program until such time as the California Bay-Delta Ecosystem Restoration Project is reauthorized.

The Committee has provided an additional \$30,000,000 over the budget request for the Central Valley Project. Additional funds to support the goals of CALFED are provided as follows:

CENTRAL VALLEY PROJECT

ENVIRONMENTAL WATER ACCOUNT

Miscellaneous Project Programs.—\$15,000,000 to acquire water and ground water storage.

PLANNING AND MANAGEMENT ACTIVITIES

Delta Division Oversight.—\$2,500,000 to continue coordination, administration, planning, performance tracking and science activities in coordination with CALFED Program Implementation Plan.

STORAGE

Delta Division.—\$250,000 to continue evaluations of the Delta Wetlands project and other in-delta storage proposals. \$2,000,000 for Reclamation to continue participating in planning activities associated with enlarging Los Vaqueros reservoir.

Friant Division.—\$1,750,000 to continue developing a plan of study for a feasibility level investigation for storage in the Upper San Joaquin Watershed.

Sacramento River Division.—\$500,000 to continue planning activities as agreed to in the Sites MOU.

Shasta Division.—\$3,000,000 to continue evaluating the potential impacts of the proposed Shasta raise.

CONVEYANCE

Delta Division.—\$5,000,000 to construct the Tracy Test Fish Facility.

POLICY AND ADMINISTRATION

Appropriations, 2002	\$52,968,000
Budget estimate, 2003	54,870,000
Committee recommendation	54,870,000

The Committee recommendation for general administrative expenses is \$54,870,000. This is the same as the budget request.

The policy and administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's offices in Washington, DC, Denver, CO, and five regional offices. The Denver office and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

Section 201 of the bill includes language that States requirements for purchase or lease of water from the Middle Rio Grande or Carlsbad Projects, New Mexico.

Section 202 of the bill includes language concerning Drought Emergency Assistance.

Section 203 of the bill includes language concerning natural desert terminal lakes.

Section 204 of the bill includes language concerning private sector contracting percentages.

Section 205 of the bill includes language directing the Bureau to undertake studies for

the North Central Montana Rural Water Supply project using prior appropriated funds.

Section 206 of the bill includes language to make changes to Section 8 of Public Law 104-298.

Section 207 of the bill includes language regarding the San Luis Unit and the Kesterson Reservoir in California.

TITLE III—DEPARTMENT OF ENERGY

Title III provides for the Department of Energy's defense and nondefense functions, the power marketing administrations, and the Federal Energy Regulatory Commission.

CONTRACTOR TRAVEL

The Committee believes that earlier statutory restrictions on contractor travel established new appreciation by contractors for propriety and cost effectiveness in their travel expenditures. For fiscal year 2003, no statutory travel restrictions are included. Nevertheless, the Committee directs the Department to maintain contractor travel summaries adequate for periodic reviews of programmatic relevance and costs of contractor travel.

ENERGY SUPPLY

Appropriations, 2002	\$666,726,000
Budget estimate, 2003	693,934,000
Committee recommendation	815,306,000

RENEWABLE ENERGY RESOURCES

Appropriations, 2002	\$396,000,000
Budget estimate, 2003	407,000,000
Committee recommendation	448,062,000

The Committee recommendation provides \$448,062,000, for renewable energy resources.

The recommendation for Renewable Energy Resources reflects the Committee's strong belief that only a balanced portfolio of production and distribution technologies and strategies will fulfill our Nation's long-term needs and goals for both energy and the environment. For that reason, the Committee recommendation includes substantial investments in renewable energy resources above the Administration's request.

The Committee has modified the request for low emission energy technologies, including hydro, renewable, and nuclear, with the view toward post 2010 application of new technologies. As a result, with few exceptions, the Committee recommends basic research that will provide significant improvements over existing technologies.

Each year the Energy and Water Development Appropriations Conference Report contains a handful of "Congressionally-directed activities" (to use the Department's description). To date, the Renewable Energy Resources Office has funded fifteen of these Congressionally-mandated activities for fiscal year 2002. This is an unacceptable rate at this point in the fiscal year. These activities are not optional and are to be given the same priority as the rest of the fiscal year spending program. The Committee fully expects the Department to address this situation before the Conference Committee completes action on the final Energy and Water funding bill.

Although the Renewable Energy Resources Office is currently undergoing a reorganization, it is not yet complete. It is both unwise and impractical to appropriate funds to accounts that may or may not exist at the start of the fiscal year. For that reason, the Committee recommendation appropriates funds generally in accordance with the Administration's fiscal year 2003 budget request. If the reorganization is complete when the Conference Committee convenes, the Committee will consider re-aligning the accounts.

Solar energy.—The Committee recommendation for solar energy programs is \$95,000,000. This account is broken up into three sub-accounts, each of which is described below.

Solar building technology research.—The Committee recommends \$12,000,000 to fund solar building technology development, including enhanced support to the zero energy building program.

Photovoltaic energy systems.—The Committee recommends \$77,000,000 for photovoltaic energy systems. The Committee recommendation includes \$3,000,000 for continuation of the Million Solar Roofs program at current year levels and \$2,500,000 for the Southeast and Southwest photovoltaic experiments stations. Additionally, the Committee recommends \$3,000,000 for the Navajo electrification project.

Concentrating solar power.—The Committee recommends \$6,000,000 for concentrating solar power. The Department is directed to begin implementation of a program to deploy 1000 MW of new solar capacity supplying the Southwestern United States by the year 2006.

Biomass/biofuels—energy systems.—The Committee recommendation includes \$100,000,000 for biomass/biofuels energy systems. The final Energy and Water Development Conference Report for fiscal year 2002 combined the power systems and transportation sub-accounts to increase the programmatic flexibility available to the Department. Thus far, the Committee is encouraged with the results of this consolidation and has maintained the new program structure.

Not less than \$27,000,000 shall be used for a competitive solicitation for Biomass Integrated Biorefinery Process Development which shall be funded from within the totals available under the biomass/biofuels energy account.

The Department has indicated a desire to end direct support to the Regional Biomass Energy Program (RBEP). The Committee believes that the RBEP has been a successful partnership with the five distinct regions it has served. The Committee recommendation includes \$5,000,000 and directs the Department to work with regional governors' organizations to make RBEP even more successful. The Committee recommendation also includes \$2,500,000 for the Consortium for Plant Biotechnology Research, a successful consortium of 34 universities and 33 agribusinesses and trade associations.

Wind.—The Committee recommendation includes \$50,000,000 for wind. The Committee expects the Department to utilize the additional funds to accelerate development and deployment of low wind speed turbines. The Wind Powering America initiative is to be continued at last year's funding level. The Committee continues to recognize the need for a set-aside for small wind programs.

Renewable energy production incentive.—The Committee recommendation includes \$5,000,000 for the renewable energy production incentive.

Renewable program support.—The Committee recommendation includes \$6,059,000 for technical analysis and assistance within renewable program support. The Committee recommendation includes \$4,000,000 to continue the collaboration and integration of multi-program activities by the National Renewable Energy Laboratory (NREL) to develop renewable energy resources and address the electric power needs of the Southwestern United States. NREL will provide expertise through a virtual laboratory or site office in Nevada that enables partnerships among universities, researchers, technology developers, and those interested in deployment.

Departmental Energy Management.—The Committee recommendation includes

\$3,000,000 for departmental energy management.

International renewable programs.—The Committee strongly supports the U.S. international joint implementation program funded in this account and recommends \$6,500,000 for that purpose. The Committee supports efforts to increase international market opportunities for the export and deployment of advanced clean energy technologies—end-use efficiency, fossil, renewable, and nuclear energy technologies. The Committee is pleased that the Administration has decided to expand its international renewable energy activities.

National Renewable Energy Laboratory.—The Committee recommendation includes \$6,800,000, for capital equipment and general plant projects at the National Renewable Energy Laboratory. Of this amount, \$1,000,000 is provided to reduce the maintenance backlog and \$800,000 is for construction.

Geothermal.—The Committee recommends \$37,000,000 for geothermal technology development, including continued funding (at current year levels) for GeoPowering the West. The Committee is concerned that the Department appears to be cutting funds for these important research efforts prematurely. The decision to cut funds for geothermal technology development flies in the face of the recommendations of the President's Committee of Advisors on Science and Technology (PCAST) made in 1997. The PCAST report recommends an escalation of funding over a short period of time to \$50,000,000-\$60,000,000. The Committee has provided a substantial increase and expects the Department to use the additional funds, in part, to foster university research and public private partnerships.

Hydrogen research.—The Committee strongly supports research and development of hydrogen technology and recognizes it to be a highly promising and cost effective energy carrier. The Committee recommends \$45,000,000.

The Committee continues to encourage demonstration of a dedicated fleet of vehicles, including buses, powered by hydrogen.

Industrial consumption of hydrogen, especially by the petro-chemical and fertilizer communities is large and growing. The rate of petro-chemical hydrogen consumption necessary for gasoline-powered vehicles will accelerate as global reserves of sweet crude oil diminish. The dominant resource for hydrogen production today is natural gas whose reformation into hydrogen and carbon dioxide contributes significantly to atmospheric greenhouse gases. Moreover, natural gas reserves are insufficient to service simultaneously domestic heating and electricity requirements, industrial hydrogen consumption, and future demands by hydrogen powered vehicles and other fuel cell applications that would accompany the future "Hydrogen Economy." Accordingly, the Committee supports investment in exploration of feasible concepts for renewable production of hydrogen with no greenhouse gas emissions and no other waste products by adding \$2,000,000 for an engineering study and evaluation of solar-powered thermo-chemical production of hydrogen from water.

Hydropower.—The Committee recommends \$7,489,000 for hydropower.

Renewable Indian energy resources.—The Committee recommendation includes \$9,307,000 for Indian renewable energy resource development. The Committee expects these funds to be administered as competitively awarded grants to federally-recognized tribes throughout the United States. Within available funds, the Committee recommendation includes \$1,000,000 for the Council of Renewable Energy Resource Tribes (CERT) to provide technical expertise

and training of Native Americans in renewable energy resource development and electric generation facilities management.

Electric energy systems and storage.—The Committee recommendation includes \$75,000,000 for electric energy systems and storage.

This program provides funding for transmission reliability, energy storage systems and high temperature superconductivity research and development.

The Committee strongly supports the activities of the high temperature superconductor development program, which will revolutionize the way electric power is generated, transmitted and ultimately used by the consumer, and therefore urges the Department of Energy to submit as part of future budgets an independent funding request for HTS research and development, as it does for programs such as wind, solar and geothermal power.

The Committee recommendation includes \$50,000,000 for high temperature superconductor research and development and \$25,000,000 for distributed energy systems. The Committee recommendation includes the budget request of \$9,000,000 for the effort jointly led by Oak Ridge National Laboratory and Los Alamos National Laboratory to develop high-performance, low-cost, second-generation, high-temperature superconducting wire.

Renewable program direction.—The Committee recommendation includes \$16,907,000 for program direction within this account.

Use of prior year balances.—The recommendation includes the use of \$15,000,000 of prior year funds to be carried over from fiscal year 2002 to offset the fiscal year 2003 funding requirements. The Department may not cut congressionally directed activities to implement this offset.

NUCLEAR ENERGY PROGRAMS

Appropriations, 2002	\$226,773,000
Budget estimate, 2003	249,798,000
Committee recommendation	324,108,000

The Committee recommendation provides \$324,108,000 for nuclear energy.

Nuclear energy presently contributes about 21 percent of our nation's electrical power and emits no atmospheric pollutants, although disposal of spent fuel remains a major technical and social challenge. While the Committee supports continued nuclear power research and development activities as part of a balanced approach to meeting our Nation's energy needs, industry and the Department are strongly encouraged to focus their research efforts on a broader array of disposal options, including reprocessing, transmutation, and dry cask storage, all of which reduce or eliminate the need for a geologic repository. The Committee recommendation includes enhanced funding for the advanced accelerator applications program as described below.

University reactor fuel assistance and support.—The Committee recommends \$19,500,000 for university reactor fuel assistance and support. University nuclear engineering programs and university research reactors represent a fundamental and key capability in supporting our national policy goals in health care, materials science and energy technology.

The Committee strongly supports both the University Reactor Fuel Assistance and Support program's efforts to provide fellowships, scholarships, and grants to students enrolled in science and engineering programs at U.S. universities, as well as efforts to provide fuel assistance and reactor upgrade funding for university-owned research reactors.

The Committee notes the progress of the Department in carrying out congressional di-

rection to establish and support regional university reactor consortia. Although progress is visible, the Committee remains concerned about the ability of the Nation to respond to the growing demand for trained experts in nuclear science and technology in the face of financial and other challenges affecting engineering programs and research reactor facilities at American universities. The Committee recommendation includes an increase of \$3,000,000 over the request to fund additional consortia and strongly encourages the Department to request sufficient funding in future years to fund all meritorious proposals.

Nuclear energy plant optimization.—The Committee recommends a total of \$5,000,000, an increase of \$5,000,000 over the budget request. The Department is encouraged to continue this cost-shared research and development program to improve the reliability, availability, and productivity of existing nuclear power plants.

Nuclear Energy Research Initiative.—The Committee recommends a total of \$29,000,000, an increase of \$4,000,000 over the budget request. The Department's budget request would not allow for any new NERI projects in the coming year. The proposed increase is necessary to continue to grow the scope of the technology and the people for a growing nuclear industry.

Nuclear Energy Technologies.—The Committee recommends a total of \$48,500,000. The Committee directs the Department to prepare a report by March 31, 2003, regarding how it intends to carry out the results of the Generation IV Roadmap.

To further the introduction of advanced reactors, especially those that are not conventional, it is important to establish a process by which research/demonstration reactors can be built and tested in a manner that will allow a regulatory process to focus on the safety of the technologies for which there is not a large regulatory history. Therefore, \$1,000,000 is provided for a joint DOE and NRC development of a licensing process employing "risk information" that would be technology neutral for future licensing of advanced reactors that would lead to eventual certification.

The Committee supports the Department's efforts to establish the fuels resource and infrastructure ultimately essential to the realization of the President's vision for the future "Hydrogen Economy." Accordingly, the Committee provides an additional \$3,000,000 for the purpose of accelerating the engineering evaluation of an integrated sulfur/iodine thermo-chemical water-splitting cycle for coupling with a high temperature nuclear reactor power source. Of the additional \$3,000,000, the Committee directs that \$1,000,000 be provided to the Research Foundation of the University of Nevada, Las Vegas for the purpose of establishing a public-private partnership to develop and evaluate innovative high temperature heat exchangers.

The Committee remains interested in the potential use and application of small modular reactors with attractive characteristics for remote communities that otherwise must rely on shipments of relatively expensive and environmentally undesirable fuels for their electric power. To be acceptable, such a reactor would have to be inherently safe, be relatively cost effective, contain intrinsic design features which would deter sabotage or diversion, require infrequent refuelings, and be primarily factory constructed and deliverable to remote sites. The Committee recommendation includes \$3,000,000 to begin design work for a plant to demonstrate the viability of such small modular reactors.

Radiological facilities management.—The Committee recommendation includes

\$92,699,000, \$9,600,000 above the request, for radiological facilities management.

The Committee funding recommendation includes \$600,000 in additional funding for, the Cyclotron Isotope Research Center. Within available funds the Department is also directed to provide \$7,000,000 for hot cell upgrades/establishment of the Bethel Valley Hot Cell Complex; and \$5,000,000 for Pu238 production and Np237 storage. Construction projects are funded at the level of the administration's request.

Production of Medical Isotopes.—The Committee commends the Department for issuing a request for proposal to dispose of U233 in building 3019 at the Oak Ridge Reservation and to process that material to produce medical isotopes. The Committee's long support of this effort is a matter of record, and the Committee again emphasizes the importance of this project for the treatment of cancer. Initial human trials utilizing thorium-229, which can be derived from the uranium-233 stored in Building 3019, have yielded tremendously encouraging results which indicate this radio-isotope may be able to effectively treat leukemia and other cancers. The Committee also recognizes that an essential part of this project is the disposition of the U233 at the Oak Ridge Reservation. The Committee, cognizant that 1,800 people in the United States die every month of leukemia, is frustrated that the Department is now 2 years behind schedule on this project and has proposed a schedule that includes unusually long pauses between phases (such as the proposed 6 months between completion of phase I and initiation of phase II). The Committee recommendation makes available \$5,000,000 for this project in fiscal year 2003. The Department is directed to fully fund the disposition of U233 and the processing of the material to produce medical isotopes in future years and proceed with this project as swiftly as possible.

Fast flux test facility.—The Committee has provided the budget request of \$36,100,000 for the FFTF. The Committee expects the Department to move forward quickly on the permanent deactivation of this facility.

Advanced fuel cycles program.—The Committee recommendation includes \$77,870,000 for the Advanced Fuel Cycle Program of which \$18,000,000 is allocated to EBR-II Spent Fuel Treatment.

This program subsumes the Advanced Accelerator Applications program and its activities and will focus on the development of advanced fuel cycles, including recycling or reprocessing of spent fuel, and transmutation technologies. The Committee intends the Department to use national laboratory, university and industrial expertise to perform research in advanced nuclear materials recycle technologies, proliferation-resistant nuclear fuels, and transmutation systems, including both reactor- and accelerator-based approaches. The program goals shall include enabling better utilization of uranium resources and minimizing the amount and toxicity of final waste products. The program shall begin pre-conceptual design of an advanced recycling facility for performing research on scalable recycling technologies that are proliferation resistant, economical, and minimize environmental impact. The program shall use international collaborations to provide cost effective use of research funding and expand both university collaborations and domestic industry participation.

The University of Nevada Las Vegas shall continue research activities in the area of transmutation science and testing of spallation target technology established under the Advanced Accelerator Applications program. Funding of \$4,500,000 is provided for these efforts. The program shall undertake evaluation and may initiate design and development of a fuels and materials testing

station using the LANSCE accelerator facility.

Finally, the program shall be coordinated with other programs such as Generation IV and Nuclear Power 2010, but shall maintain separate program and financial management. Within the increased funding levels, the Department is directed to continue the Advanced Accelerator Applications program, including funding for the UNLV program at current year levels and the Idaho Accelerator program at \$8,500,000. Additionally, the Department is directed to restore the nuclear energy program funding to current year levels at Argonne National Lab and ANL-West.

Left unchecked, the administration's budget cut would dismantle the last remaining nuclear development team in the United States. Such an action is completely inconsistent with the Administration's Nuclear Power 2010 goals. The Committee is pleased that the Department has agreed that the Nuclear Energy Program is an appropriate home for this robust research and development effort.

University Consortium for Transmutation Research.—As discussed above, the right mix of treatment and transmutation technologies must be found to reduce the amount of highly-toxic spent nuclear fuel and waste slated to be buried in a geologic repository, and to avoid the need for more repositories. High-energy accelerators could be central to a future strategy to transmute spent nuclear fuel into less toxic, shorter-lived materials.

Innovative transmutation technologies promise to be the most cost-effective and proliferation-resistant means of reducing nuclear waste toxicity. Accelerator-based research on transmutation of radioactive waste would also supply facilities for medical diagnostics and therapy and become a national source of large-scale isotope production for radio-pharmaceuticals.

The Department of Energy is urged to establish a consortium of U.S. universities to develop accelerator-based technologies for transmutation of radioactive waste. The consortium should include, at a minimum, the University of Nevada-Las Vegas, University of New Mexico, New Mexico State University, Washington State University, Idaho State University, the University of Texas, Texas A&M University, and the University of California at Santa Barbara, Berkeley and Davis.

Program direction.—The Committee recommendation includes \$23,439,000 for program direction, the amount of the request.

ENVIRONMENT, SAFETY, AND HEALTH

Appropriations, 2002	\$30,500,000
Budget estimate, 2003	29,211,000
Committee recommenda-	
tion	19,211,000

The Committee recommendation includes \$19,211,000 for non-defense environment, safety, and health which includes \$13,871,000 for program direction.

ENERGY SUPPORT ACTIVITIES

Appropriations, 2002	\$7,770,000
Budget estimate, 2003	7,925,000
Committee recommenda-	
tion	6,925,000

Technical information management.—The Committee recommendation for the technical information management program is \$1,400,000.

Program direction.—The Committee recommendation for program direction is \$5,525,000.

ENERGY SUPPLY INFRASTRUCTURE

Appropriations, 2002	
Budget estimate, 2003	
Committee recommenda-	
tion	\$17,000,000

The Committee recommendation provides \$17,000,000 for energy supply infrastructure.

The Energy Supply Infrastructure program provides assistance, technical support, and project funding to specific energy projects. The Committee recommendation includes \$5,000,000 for the Upper Lynn Canal power supply project, \$5,000,000 to the Swan Lake-Lake Tyee segment of the Southeastern Alaska Intertie System, and \$2,000,000 to the Tok to Chistochina transmission project. All funds made available in this and prior year appropriations acts for the Swan Lake-Lake Tyee segment of the Southeastern Alaska Intertie System may be expended prior to the full Federal project share being appropriated.

The Committee recommendation also includes \$1,000,000 for the Unalaska grid renovation powerhouse upgrade which shall be utilized from \$1,000,000 previously made available for the Pyramid Creek project in fiscal year 1999. The Department is directed to terminate the Reynolds Creek hydro project and utilize all available funds appropriated to date for that project on the Swan Lake-Lake Tyee intertie.

The Committee recommendation also includes \$5,000,000 for the National Center on Energy Management and Building Technologies.

ENVIRONMENTAL MANAGEMENT

(NONDEFENSE)

Appropriations, 2002	\$236,372,000
Budget estimate, 2003	166,000,000
Committee recommenda-	
tion	176,000,000

The Committee recommendation provides \$176,000,000 for non-defense environmental management.

The non-defense Environmental Management program is responsible for managing and addressing the environmental legacy resulting from nuclear energy and civilian energy research programs, primarily the Office of Science within the Department of Energy. Research and development activities of DOE and predecessor agencies generated waste and other contaminants which pose unique problems, including unprecedented volumes of contaminated soils, water and facilities. The funding requested and provided here supports the Department's goal of cleaning up as many of its contaminated sites as possible by 2006 in a safe and cost-effective manner.

Site Closure.—The Committee directs the Department to continue to monitor the groundwater at the Weldon Springs, Missouri, site and to immediately utilize whatever funds may be necessary to completely remediate the site if the results from the ongoing monitoring or other studies indicate additional treatment is required.

Site completion.—The Committee recommendation provides \$67,272,000 for site completion. The Committee recommendation includes an additional \$15,000,000 for the Brookhaven National Laboratory; and \$1,000,000 in additional funding for the Lawrence Berkeley National Laboratory.

Post 2006 completion.—The Committee recommendation provides \$123,887,000. The Committee recommendation includes an additional \$3,134,000 for the Department to prepare a scientifically sound remediation plan for the Atlas site in Moab, Utah. The Committee expects the Department to undertake an objective evaluation of costs, benefits, and risks associated with remediation alternatives of the site, including removal and stabilization in place or variations on these two options. The Committee recommendation also includes an additional \$3,000,000 for the Energy Technology Engineering Center in California.

West Valley.—The Committee recommendation includes an additional \$5,000,000 for the

West Valley Demonstration project. The Committee is concerned that the Department and State of New York have not yet entered into an agreement regarding the scope of the clean-up at the site.

Excess Facilities.—The Committee recommendation provides \$1,841,000 for the transfer of excess facilities at the Brookhaven National Laboratory, Los Alamos National Laboratory, and Oak Ridge from other DOE organizations.

URANIUM FACILITIES MAINTENANCE AND REMEDIATION

Appropriations, 2002	\$418,425,000
Budget estimate, 2003	382,154,000
Committee recommenda-	
tion	471,154,000

Uranium Enrichment Decontamination and Decommissioning.—The Committee recommendation provides \$334,523,000 for the Uranium Enrichment Decontamination and Decommissioning Fund.

The Committee provides a total of \$134,048,000, an increase of an additional \$34,000,000 for clean-up at the Paducah Gaseous Diffusion Plant to ensure compliance with applicable State and Federal obligations. The Committee directs the Department to fund the Kentucky Consortium for Energy and Environment from within available funds.

The Committee recommendation also includes \$65,000,000 in additional funding for the East Tennessee Technology Park.

Other Uranium Activities.—The Committee recommends \$136,631,000. The Committee recommendation includes \$10,000,000 in support of preliminary environmental planning, siting studies, and related activities for the Depleted Uranium Hexafluoride (DUF-6) projects at that gaseous diffusion plants at Paducah, Kentucky, and Portsmouth, Ohio, consistent with the direction (ignored for many years by the Department but reiterated legislatively by Congress this year) of Section 1 of Public Law 105-204 (112 Stat. 681) as amended.

The Committee recommendation includes uranium program activity funding of \$16,381,000 for East Tennessee Technology Park, \$19,737,000 for the Paducah Gaseous Diffusion Plant, and \$89,714,000 for the Portsmouth Gaseous Diffusion Plant.

NUCLEAR WASTE DISPOSAL FUND

Appropriations, 2002	\$95,000,000
Budget estimate, 2003	209,702,000
Committee recommenda-	
tion	56,000,000

The Committee recommendation includes \$336,000,000 for nuclear waste disposal. Of that amount, \$56,000,000 is derived from the nuclear waste fund, and \$280,000,000 shall be available from the "Defense nuclear waste disposal" account.

The Committee has provided \$6,000,000 for the State of Nevada and \$2,500,000 for affected units of local government in accordance with the statutory restrictions contained in the Nuclear Waste Policy Act.

The Committee directs that \$2,500,000 from within the amount provided to Defense Nuclear Waste Disposal for Yucca Mountain Site Characterization be provided to the Research Foundation of the University of Nevada, Las Vegas for the purpose of continuing and expanding its efforts in groundwater characterization and research into the transport and fate of radionuclides in the vicinity of the proposed Yucca Mountain repository.

SCIENCE

Appropriations, 2002	\$3,233,100,000
Budget estimate, 2003	3,279,456,000
Committee recommenda-	
tion	3,329,456,000

Investment in the physical sciences and engineering plays a critical role in enabling U.S. technological innovation and global economic leadership. It is essential to the development of our energy resources and utilization as well as our defense, environment, communications and information technologies, health and much more. Over the past 50 years, half of U.S. economic growth has come from prior investment in science and technological innovation. Life expectancy has grown from 55 years in 1900 to nearly 80 years today.

The Department of Energy is the leading source of Federal investment for R&D facilities and fundamental research in the physical sciences. Yet investment in the Department's R&D has declined in constant dollars from \$11,200,000,000 in 1980 to \$7,700,000,000 in 2001. As a percentage of GDP, total Federal investment in the physical sciences and engineering has been cut roughly in half since 1970.

Shrinking investment in the physical sciences and engineering poses serious risks to DOE's ability to perform its mission. It also threatens the Nation's science and technology enterprise. DOE faces a shortage of nearly 40 percent in its technical workforce over the next 5 years. To meet its needs, DOE must compete with industry for a shrinking pool of skilled workers, many of whose leaders also report serious shortages of scientists and engineers.

American educational institutions are failing to attract sufficient numbers of U.S. students, especially women and minorities, into undergraduate and graduate programs in the physical sciences and engineering. For these skills we now are more heavily dependent on foreign nations than ever before. The H1-B visa has become a main element of U.S. technology policy.

As fewer foreign students choose to pursue their education in the United States, and too few U.S. students enter these fields, our vulnerability grows. NSF reports that between 1996 and 1999, the number of Ph.D.s in science and engineering awarded to foreign students declined by 15 percent. Only 5 percent of U.S. students now earn bachelors degrees in natural science or engineering. Since 1986, the total number of bachelors degrees in engineering is down 15 percent. Between 1994 and 2000, the number of Ph.D.s awarded in physics in the United States declined by 22 percent.

These trends must be reversed. Many DOE user facilities do not operate at their designed capacity. As a result, opportunities and momentum are lost as researchers and students encounter barriers to the pursuit of inquiry of national importance, including promising research opportunities at the boundaries of the life sciences, physical sciences, engineering, and computer sciences. Future U.S. global leadership and technological leadership will rely upon today's investment in research in all the sciences and engineering.

The Committee strongly supports and encourages increased investment in the research and education initiatives of the DOE Office of Science.

HIGH ENERGY PHYSICS

Appropriations, 2002	\$716,100,000
Budget estimate, 2003	724,990,000
Committee recommenda-	
tion	729,980,000

The Committee recommendation includes \$729,980,000 for high energy physics. The Committee has included an additional \$5,000,000 for operations and activities of the program. The Committee recognizes that the High Energy Physics Advisory Panel has recommended that the Next Linear Collider (NLC) should proceed into design and construction.

NUCLEAR PHYSICS

Appropriations, 2002	\$360,510,000
Budget estimate, 2003	382,370,000
Committee recommenda-	
tion	387,370,000

The Committee recommends \$387,370,000 for nuclear physics. The Committee recommends that the additional funds be used to enhance operation of the Relativistic Heavy Ion Collider (RHIC) at Brookhaven National Laboratory and the Continuous Electron Beam Accelerator Facility at the Thomas Jefferson National Accelerator Facility in Virginia.

BIOLOGICAL AND ENVIRONMENTAL RESEARCH

Appropriations, 2002	\$527,405,000
Budget estimate, 2003	504,215,000
Committee recommenda-	
tion	531,215,000

The Committee recommendation includes \$531,215,000 for biological and environmental research. The recommendation includes an additional \$10,000,000 above the requested level for the Genomes to Life program and \$25,000,000 in total funding for the low dose effects program. The recommendation also continues the free air carbon dioxide experiments at the current year level and \$3,000,000 in additional funding for the EMSL computer.

The Committee strongly encourages the Department to budget for additional resources for the Genomes to Life Program in fiscal year 2004. This program shows tremendous potential and deserves enhanced support.

Environmental Remediation.—The Committee recommendation includes an additional amount of \$6,000,000 for a program to evaluate improved technologies for removal of arsenic from municipal water supplies, with a focus on minimization of operating costs and reducing energy requirements. This program shall include peer-reviewed research projects as well as cost-shared demonstration projects conducted with municipal water systems. Demonstration programs shall focus on technologies applicable in the arid Southwestern United States. The program shall be administered through contracts with the American Water Works Association Research Foundation, which shall utilize capabilities of WERC, A Consortium for Environmental Education and Technology Development, for evaluations of cost effectiveness of alternative treatment methodologies.

BASIC ENERGY SCIENCES

Appropriations, 2002	\$1,003,705,000
Budget estimate, 2003	1,019,600,000
Committee recommenda-	
tion	1,044,600,000

The Committee recommendation includes \$1,044,600,000. For purposes of reprogramming in fiscal year 2003, the Department may allocate funding among all operating accounts within basic energy sciences upon written notice to the appropriate Congressional Committees.

The Committee recommendation includes \$12,000,000 for the Department's Experimental Program to Stimulate Competitive Research and \$4,500,000 in additional funding to complete preliminary engineering and design (PED) and move to construction at the Center for Integrated Nanotechnology. Within available funds, the Committee recommendation includes full funding for the operation of the National Synchrotron Light Source, the Spallation Neutron Source, and the Nanoscale Science Centers Initiative, including \$24,000,000 for design and construction of the Center for Nanophase Materials Sciences and Oak Ridge National Laboratory. Construction projects are all funded at the level of the administration's request.

The Committee is pleased with the progress of the Department's Nanoscience Initiative. The Committee understands the Department has recently announced its intention to fund a Nanocenter at Brookhaven National Laboratory. The Committee has included \$1,000,000 to begin preliminary engineering and design in fiscal year 2003 for the Nanocenter at Brookhaven (Project 02-SC-2). The Committee strongly supports the nanoscale science research centers.

Additionally, the Committee recommends that the additional funds be used to support the following important activities: facility operations user support; completion of the Nanoscience Research Center project engineering and design; and additional work in computational sciences in materials and chemistry.

ADVANCED SCIENTIFIC COMPUTING RESEARCH

The Committee recommendation provides \$169,625,000 for advanced scientific computing research.

SCIENCE LABORATORIES INFRASTRUCTURE

The Committee recommends \$42,735,000, the amount of the request, for science energy laboratories infrastructure. The program supports infrastructure activities at the five national labs under the direction of the Office of Science.

FUSION ENERGY SCIENCES

Appropriations, 2002	\$248,495,000
Budget estimate, 2003	257,310,000
Committee recommenda-	
tion	259,310,000

The Committee recommendation for fusion energy sciences is \$259,310,000, an amount that is \$2,000,000 above the budget request. The Committee is aware of significantly increased neutron yields from compressed fuel elements heated by an extremely short pulse, high power laser beam. Such advances promise significant acceleration of the schedule for achieving ignition of compressed fusion pellets. Accordingly, the Committee adds \$2,000,000 to Fusion Energy Sciences for the purpose of evaluating this so-called "fast ignition" concept. The Department is directed to report back to the Committee no later than August 1, 2003 with the results of this evaluation along with any recommendations the Department would make regarding the schedule and milestones of the High Energy Density Physics Program.

SAFEGUARDS AND SECURITY

The Committee recommendation provides \$48,127,000 for safeguards and security.

SCIENCE PROGRAM DIRECTION

The Committee recommendation provides \$134,837,000 for science program direction.

DEPARTMENTAL ADMINISTRATION

(GROSS)

Appropriations, 2002	\$210,853,000
Budget estimate, 2003	299,220,000
Committee recommenda-	
tion	235,000,000

(MISCELLANEOUS REVENUES)

Appropriations, 2002	\$137,810,000
Budget estimate, 2003	137,524,000
Committee recommenda-	
tion	137,524,000

The Department recommends \$235,000,000 for departmental administration, a net appropriation of \$97,476,000.

The Committee has been overwhelmed by the timeliness and level of detail in the Department's responses to the Committee's requests for the additional budget information required to evaluate the administration's requests to Congress. The Department needs to focus on providing timely, detailed, and transparent budget information to Congress when making requests for appropriations.

International affairs.—The Committee strongly urges the Department of Energy, the Department of Commerce, U.S. AID, and other Federal agencies associated with the Clean Energy Technology Exports Program to finalize and implement the strategic plan and establish the advisory board. The strategic plan is a critical component of a broad range of international and domestic policy interests, including those promoting economic development, energy, trade, employment, environmental, and climate change policies.

INSPECTOR GENERAL

Appropriations, 2002	\$32,430,000
Budget estimate, 2003	37,671,000
Committee recommendation	37,671,000

The Committee has provided \$37,671,000 for the Office of the Inspector General.

RECOMMENDATION SUMMARY

Details of the Committee's recommendations are included in the table at the end of this title.

ATOMIC ENERGY DEFENSE ACTIVITIES

Atomic energy defense activities of the Department of Energy are provided for in two categories—the National Nuclear Security Administration and Other Defense Related Activities. Appropriation accounts under the National Nuclear Security Administration (NNSA) are weapons activities, defense nuclear non-proliferation, naval reactors, and the Office of the Administrator. Other defense related activities include appropriation accounts for defense environmental restoration and waste management, defense facilities closure projects, defense environmental management privatization, other defense activities, and defense nuclear waste disposal.

NATIONAL NUCLEAR SECURITY

ADMINISTRATION

WEAPONS ACTIVITIES

Appropriations, 2002	\$5,429,238,000
Budget estimate, 2003	5,867,000,000
Committee recommendation	6,108,959,000

Weapons activities provide for the continuing assurance of safety, reliability, and security of the nuclear weapons in our enduring nuclear weapons stockpile while adhering to the spirit of the Comprehensive Test Ban Treaty. Necessary ingredients for success in this important mission include: a highly skilled and motivated workforce; advanced experimental and computational facilities and equipment; adequately capitalized and maintained physical plants and supporting infrastructure; and an exceptionally focused and dedicated management.

DIRECTED STOCKPILE WORK

An appropriation of \$1,234,467,000 is recommended for the directed stockpile work of the NNSA.

Directed stockpile work encompasses all activities that directly support specific weapons in the nuclear stockpile as directed by the Nuclear Weapons Stockpile Plan. These activities include current maintenance and day-to-day care of the stockpile as well as planned refurbishments as outlined by the stockpile life extension program (SLEP). This category also includes research, development and certification activities in direct support of each weapon system, and long-term future-oriented research and development to solve either current or projected stockpile problems.

Stockpile research and development.—The Committee recommends \$467,149,000, the same as the budget request. Stockpile R&D provides for assessment, certification, surveillance and maintenance research and development for systems comprising our enduring

nuclear weapons stockpile. The additional \$118,149,000 above the current year is meant to support acceleration in stockpile life extension research and development activities for the W80 and W76 systems, necessary additional sub-critical experiments at the Nevada Test Site for pit certification, and a vigorous program in advanced concepts research and development.

Stockpile maintenance.—The Committee recommends \$401,157,000 to provide for stockpile maintenance and production and exchange of limited life components in the enduring stockpile, as well as major refurbishment activities to extend the stockpile life of the W87, W76, W80, and B61 weapons systems.

Stockpile evaluation.—The Committee recommends \$197,184,000 to support new material laboratory tests, new material flight tests, stockpile laboratory tests, stockpile flight tests, quality evaluations, special testing, and surveillance of weapons systems to support assessment of the safety and reliability of the nuclear weapons stockpile, all of which contributes to the Annual Certification to the President.

Dismantlement/disposal.—The Committee recommends \$24,378,000. The program includes all activities associated with weapon retirement and disassembly. The slight decrease below current year reflects reduced activity involving the W-56 at Y-12 and contractor efficiencies at Pantex.

Production Support.—The Committee recommends \$137,706,000.

CAMPAIGNS

An appropriation of \$2,148,210,000 is recommended for the campaigns of the NNSA, an increase of \$80,376,000 over the budget request.

The stockpile stewardship campaigns program establishes and applies a number of highly focused and integrated scientific and technical capabilities to maintain indefinitely the safety, security, and reliability of the Nation's nuclear weapons stockpile without nuclear testing. The present structure of the campaigns program reflects the current investment in developing advanced facilities and capabilities while simultaneously applying existing and developing capabilities to important stewardship tasks.

Primary certification.—The Committee recommends \$47,159,000 to support sub-critical experiments and other activities necessary to support the required delivery date for a certified pit.

Dynamic materials properties.—The Committee recommends \$90,594,000. The Committee commends the administration for its investment in the future through university grants, partnerships and cooperative agreements. Using \$5,000,000 of the available funds, the Administration is directed to make full use of existing and developing capabilities for materials properties studies, including the subcritical experiments at the U1a facility, Joint Actinide Shock Physics Experimental Research facility and the Atlas facility at the Nevada Test Site, and the High Pressure Collaborative Access Team facility at the synchrotron light source at Argonne National Laboratory. The Committee understands that this materials work is essential to predicting the safety and reliability of nuclear weapons in the absence of nuclear weapons testing.

The Committee recommendation includes \$8,110,000 for University Partnerships, a reduction of \$5,000,000 from the request.

Advanced radiography.—The Committee recommends \$82,925,000, an increase of \$30,000,000 over the request. The recommendation includes \$25,000,000 to continue research, development, and conceptual design activities for an advanced hydrodynamics test facility, including fur-

ther development and evaluation of proton radiography. It is the intent of the Committee to continue this important effort even though any decision on whether to proceed to construction is still several years away. The additional \$5,000,000 is provided to fund other experiments that might be conducted in the Contained Firing Facility, the U1a tunnel complex, or other appropriate experimental facilities. The Committee also directs the Department to fully support the DHART facility, proton radiography, and radiation flow diagnostics.

Secondary certification and nuclear systems margins.—The Committee recommends \$47,790,000 for radiation source development, radiation, case dynamics studies radiation transport and the effects of aging, and refurbishment on secondary performance. From the funds available, the administration is encouraged to continue, and expand as appropriate, its investments in high energy density physics research through university grants, partnerships and cooperative agreements.

Enhanced surety.—The Committee recommends \$32,000,000, an amount comparable to current year, to develop and demonstrate advanced initiation concepts and enhanced use denial concepts, and to enhance efforts to establish high precision, micro system technologies for enhanced surety of future weapon systems.

Weapons systems engineering certification.—The Committee recommends \$27,007,000 to accelerate the acquisition of experimental data necessary to validate new models and simulation tools being developed in the Advanced Simulation and Computing Campaign.

Nuclear survivability.—The Committee recommends \$23,394,000 to develop and validate tools to simulate nuclear environments for survivability assessments and certification; restore the capability to provide nuclear-hardened microelectronics and microsystem components for the enduring stockpile; and accelerate the qualification and certification of the neutron generator and the arming, fusing and firing system for the refurbished W76.

ICF ignition and high yield.—The Committee recommends \$487,293,000.

The Committee recommendation includes \$214,045,000 for National Ignition Facility construction, Project 96-D-111, and \$273,248,000 is for the ICF ignition and high yield program.

The National Ignition Facility (NIF) was originally justified as a way of attracting, training, and evaluating the next generation of nuclear weapons scientists, who would then help maintain the capabilities of our existing nuclear stockpile. The Department of Energy has long maintained that achieving ignition with this multibillion dollar facility was a top priority for the Stockpile Stewardship and Management Program, because the scientific and engineering challenges of achieving ignition with the NIF could be used to induce first-rate scientists to contribute to the nuclear weapons program. It was the ignition objective that determined the original size, performance criteria, and cost of the multibillion dollar NIF construction project, and the ignition objective that has justified continued support by this Committee in spite of large cost overruns and long delays.

The Committee is therefore disturbed to see that the NNSA has now changed the title of its campaign from "Inertial Confinement Fusion Ignition and High Yield" to "High Energy Density Physics", in other words, from a focus on achieving the specific goal of ignition to a generalized physics research program. Ignition is now only one of several objectives for the NIF.

The Committee is likewise concerned that the NNSA will downgrade the NIF Project's long-standing "Functional Requirements and Primary Criteria" into a set of "eventual goals" and adopt new reduced performance criteria for acceptance testing of the NIF beams that are significantly below what is required to support ignition experiments.

The possibility of these various changes leaves the Committee with the overall impression that NNSA is not committed to the NIF Project and might down scope the project to the point where laser performance that is needed to evaluate ignition targets would never be realized. And that would raise the question of the appropriate size for the NIF, and its future funding level. This is an alarming prospect, given NIF's estimated project cost of more than \$3,500,000,000, and the greater amounts that will eventually be required to operate and maintain the facility for various experiments.

At this late stage in the construction project, the Committee has every right to expect that the confidence in achieving the ignition objective should be increasing, not decreasing. The apparent retreat from ignition signified in this budget request raises anew the question of the appropriate size and role of the NIF Project within the overall Stewardship Program, and its future level of funding.

The Committee rejects this reprioritization and down-scoping. Ignition is now and will remain the primary objective for the National Ignition Facility. The Committee fully expects the NIF to meet its original "Functional Requirements and Primary Criteria" and to perform at the levels required for ignition and directs the NNSA to maintain the original scope of the project. Additionally, the Committee rejects the proposed name change and expects the fiscal year 2004 request to revert to Inertial Confinement Fusion and High Yield.

The Committee is disappointed that the administration, while apparently committed to the construction of the multi-billion dollar National Ignition Facility (NIF), has not requested funds that are essential to the achievement of the ignition goal. Accordingly, the Committee adds \$15,000,000 to the administration's request for the NIF Director to support the development of cryogenic targets and essential NIF diagnostics. The Committee, recognizing the "national" character of NIF, encourages the participation of appropriate entities of the national technical community in these activities.

Petawatt lasers.—Short pulse, petawatt class lasers will significantly increase the capabilities of the administration's high energy density facilities such as the Z-pinch pulsed power facility at Sandia National Laboratories, the Trident Laser at Los Alamos National Laboratory, the Omega Laser at the Laboratory for Laser Energetics of the University of Rochester, and the National Ignition Facility at the Lawrence Livermore National Laboratory.

The Committee recommendation includes an additional \$13,000,000 to realize the benefits of such laser technology. Within this amount, \$5,000,000 is provided to modify the beamlet laser at Sandia National Laboratories; \$3,000,000 is provided to continue petawatt laser development at Lawrence Livermore National Laboratory; \$2,000,000 is provided for technical community activities in developing critical short-pulse, high power laser technology, such as damage resistant gratings; and \$3,000,000 is provided for petawatt laser development at the Laboratory for Laser Energetics (LLE) at the University of Rochester. This funding will allow the LLE to continue operations of the OMEGA laser at full capacity. The Department should provide a report before May 31,

2003, addressing the need for a new high energy OMEGA-EP (extended performance). The Committee is concerned that the existing facility will be unable to meet national science-based stockpile stewardship requirements in light of the current oversubscription of OMEGA.

The Committee also includes an additional \$4,500,000 for university grants and other support. Within this amount, \$2,000,000 is provided for short pulse, high power laser development at the University of Texas; and \$2,500,000 is provided to continue short pulse, high power laser development and research at the University of Nevada, Reno.

Advanced simulation and computing.—The Committee recommends \$704,335,000, an amount that is \$20,527,000 below the budget request.

The Committee notes the intriguing development of the Japanese vector-based Earth Simulator Computer which is now several times faster than any current ASCI computer and 33 percent faster than the NNSA's newest platform, the Q machine. The NNSA has put forth a credible case for their decision to abandon custom-designed chips and vector architecture for the much cheaper commodity chip-based, massively parallel, scalar systems which are the foundation of ASCI.

However, the Committee is not convinced that the NNSA is aggressively pursuing alternative hardware architectures or software solutions that will result in better interconnection and more efficient use of the NNSA's substantial computer investment. The Committee requires more evidence that the current ASCI approach is the most cost-effective and efficient way of achieving the desired capability and capacity when needed.

While the Committee recognizes the central importance of the ASCI program to the success of stockpile stewardship, the Committee remains unconvinced that the NNSA's platform acquisition strategy is driven by identified requirements, rather than a well intentioned, but insufficiently justified, desire to aggressively acquire larger and faster computing assets on an accelerated time-scale. The NNSA procurements represent a very small percentage of the U.S. supercomputing market, and the Committee is not convinced that the NNSA's acquisition strategy is taking full advantage of the steady fall in the price per teraflop that characterizes this market.

The NNSA is directed to commission two related studies, the first to be performed in collaboration with the Department's Office of Science and the second focused solely on issues relevant to the stockpile stewardship program. These studies should address issues of alternative computer architectures and the requirements that drive them.

The first study, to address alternative architectures, should be a joint venture with the Office of Science to commission the National Academy of Science (NAS) to study the appropriate computer architectures necessary to meet the needs of the stewardship program, the broad scientific community, and other elements of the national security community, including, particularly, the National Security Agency.

The second study, to be performed by an independent study group, should identify the distinct requirements of the stockpile stewardship program and its relation to the ASCI acquisition strategy. The report of this study should clearly describe the linkage between the development of software applications and the acquisition of hardware capability and capacity, with consideration of the needs of the stockpile life extension programs and the underlying weapons science programs. Finally, this second report should include an evaluation of the cost trade-offs

between the dates on which specific computing resources are required and reduced future costs for computational power. The Committee expects the NNSA to fully support these studies, including the provision of expedited clearances to participants as necessary.

The reports are due to the appropriate congressional committees on August 1, 2003.

The Committee recommends the following amounts for ASCI construction projects:

Project 01-D-101 Distributed information systems laboratory, SNL, Livermore, CA.—The Committee recommends \$13,305,000.

Project 00-D-103 Terascale simulation facility, LLNL, Livermore, CA.—The Committee recommends \$35,030,000.

Project 00-D-107 Joint computational engineering laboratory, SNL, Albuquerque, NM.—The Committee recommends \$7,000,000.

Pit manufacturing and certification.—The Committee recommendation includes a total of \$246,000,000 for the Pit Manufacturing and Certification Campaign, an increase of \$51,516,000 over the budget request. This amount includes \$242,000,000 to support the manufacturing and certification of a W88 pit as the September, 2001, project baseline indicated. The recommendation also includes the requested amount of \$2,000,000 for pit manufacturing capability and \$2,000,000 for the modern pit facility.

The Committee remains greatly concerned about the NNSA's refusal to request funds consistent with its own project plan submitted less than 1 year ago. Although the Committee acknowledges the NNSA is reporting substantial progress in the effort, the NNSA has not revised its September, 2001, project baseline to reflect a lower and presumably more accurate cost projection.

Instead, the Committee has been forced to reduce other items in the budget request to fully fund a program both the Congress and the NNSA have identified as one of the most important tests of the success of the Stockpile Stewardship and Management program. The Committee directs the NNSA to revise as appropriate the pit production and certification plan and submit the report to the relevant congressional committees by March 31, 2003, and annually thereafter.

Stockpile readiness campaign.—The Committee recommends \$61,027,000 for the stockpile readiness campaign. This program, initiated in fiscal year 2001, enables the Y-12 National Security Complex to replace or restore production capability and to modernize aging facilities. At present, the critical manufacturing capabilities required for weapons refurbishments at Y-12 do not exist. The Committee agrees that "stockpile readiness campaign" is a more appropriate and indicative program title than "secondary readiness campaign".

High explosives manufacturing and weapons assembly/disassembly readiness.—The Committee recommends \$12,093,000 to establish production-scale high explosives manufacturing and qualification; to deploy and validate technologies and facilities for production re-qualification; and, to demonstrate and validate Enterprise Integration and Collaborative Manufacturing.

Non-nuclear readiness.—The Committee recommends \$22,398,000 to deploy commercial products and processes for components supporting the B61, W80, and W76 stockpile life extension programs; to modify existing tritium loading and cleaning facilities to support stockpile life extension programs; and, to support neutron target loading and detonator production.

Tritium readiness.—The Committee recommendation includes \$112,899,000 for the tritium readiness campaign, including the budget request of \$70,165,000 for construction and \$42,734,000 for operations, a reduction of

\$13,400,000 from the request. The NNSA has acknowledged that the Tritium Extraction Facility construction project has experienced serious cost-overruns and schedule delays. The NNSA has proposed initiating the use of commercial reactors for the irradiation of tritium producing rods in fiscal years 2004 and 2005. This schedule would have required the delivery of fuel in the fourth quarter of fiscal year 2003. However, the delays in the construction of the Tritium Extraction Facility and the resulting delays in start of facility operations will necessitate a delay in the commercial light water reactor tritium production program. As such the Committee recommends a reduction of \$13,400,000 from the budget request.

Cooperative agreements.—The Committee recognizes that cooperative agreements with universities are important resources for developing essential technical data for stockpile stewardship. Additionally, such long-term relationships with universities allow considerable opportunity for promoting advanced studies and recruiting the future workforce in technical areas that are critical to the continuing stewardship enterprise. The Committee understands that the NNSA has established a new office to be responsible for administering university partnerships, cooperative agreements and/or other long-term university relationships. The Committee remains supportive of this activity and directs the administration to honor existing cooperative agreements as this new office implements its responsibilities.

READINESS IN TECHNICAL BASE AND FACILITIES

An appropriation of \$1,849,812,000 is recommended for readiness in technical base and facilities. Readiness in technical base and facilities encompasses efforts to provide for the physical infrastructure and operational readiness required to conduct the directed stockpile work and campaign activities at the laboratories, the test site and the production plants.

Operations of facilities.—The Committee recommends \$1,026,000,000 to maintain warm standby readiness for all RTBF facilities with some allowance for inflation. Within available funds, \$6,000,000 is provided for full single shift operations of Sandia National Laboratories' Z-pinch pulsed power facility, and \$56,725,000 is provided for continuing operations of the Device Assembly Facility, the Joint Actinide Shock Physics Experimental Research facility, operations associated with the Atlas relocation project, U1a operations, general plant projects and other NTS support facilities.

For continued facility upgrades, refurbishments, operations and maintenance costs associated with and for the National Center for Combating Terrorism, an additional \$27,000,000 is provided.

The Committee recommendation also includes an additional \$10,000,000 for facility operations at Pantex and an additional \$10,000,000 for operation of facilities at Y-12.

Technology transfer and industrial partnerships.—The Committee recognizes that partnerships with industry may enable the weapons complex to accomplish its mission more efficiently. Such partnership can provide access to new technologies, processes, and expertise that improve NNSA's mission capabilities. One of the most successful technology transfer and commercialization efforts in the Department of Energy has occurred with the not-for-profit Technology Ventures Corporation around Sandia National Laboratories, resulting in over 30 start-up ventures and thousands of jobs created. The Committee has included an additional \$3,000,000 and directs the NNSA to use this successful public/private partnership at the other interested NNSA laboratories and the Nevada Test Site.

Program readiness.—The Committee recommends \$218,000,000, an increase of \$9,911,000 above the budget request, to enhance readiness and maintain materials processing and component manufacturing readiness.

Within available funds, \$64,201,000 is provided for test site readiness including archiving, resumption planning, activities required for enhanced test readiness planning including test scenarios and cost/benefit trade offs. Funds are also provided for Testing Drillback Borehole management, as well as experimental and direct stockpile activities included in DSW and campaigns which contribute to the test readiness posture.

Special projects.—The Committee recommendation includes \$50,500,000 for special projects. Within available funds, \$600,000 is provided as the Federal contribution to the Oral History of the Nevada Test Site; \$6,900,000 is provided for the New Mexico Education Enrichment Foundation; \$2,500,000 is provided for the National Museum of Nuclear Science and History relocation project; \$500,000 for the design, fabrication, and installation of exhibits at the Atomic Testing History Institute; and \$1,000,000 is provided for the UNLV Research Foundation, which is integrating the Nevada community reuse organization during fiscal year 2003, for operations in support of stockpile stewardship and homeland security activities at the Nevada Test Site. The Los Alamos County Schools Program is funded at the level of the President's request.

As a result of the events of September 11, 2001, which have placed increased demands, and a heightened availability requirement on the aircraft required for Aerial Measurements, Sensing and Monitoring, the Committee is concerned that asset deployed at NNSA facilities at Nellis Air Force Base and Andrews Air Force Base may not be safely deployed due to dated avionics. In order to assure the safety and reliability of these assets under all conditions, the Committee recommends \$4,000,000 to update aircraft navigation and other related avionics.

The Committee encourages the Administration to support a joint Air Force/NNSA research and development program in physical security systems and technologies at the Sandia National Laboratory.

The National Laboratories have long served as test beds for the development and deployment of advanced technologies. The Committee is impressed with laboratory work designed to protect critical U.S. transportation infrastructure and encourages the Department to continue research and deployment in this area. Within available funds, the Department is directed to conduct a field installation of the truck stopping device developed at Lawrence Livermore National Laboratory and to build a prototype of a portable, remotely controlled, truck stopping device for positive control of trucks in critical areas. The Committee further directs the Department to continue research regarding suspension bridges and new techniques for scanning shipping containers.

Material recycle and recovery.—The Committee recommends \$98,816,000, the amount of the budget request.

Nuclear weapons incident response.—The Committee recommends \$96,000,000, to enhance the state of response readiness at various locations, particularly in light of the events of September 11, 2001. The Committee is very pleased with the performance of DOE's Emergency Response assets in the aftermath of September 11, 2001. These emergency response teams have done remarkable work with relatively meager resources. The Department is encouraged to maintain these programs in a robust posture and provides \$5,000,000 in additional funding for this purpose.

Construction projects.—The Committee recommends an appropriation of \$328,182,000, for construction projects under Readiness in Technical Base and Facilities.

The following list details changes in appropriations for construction projects under Readiness in Technical Base and Facilities:

Project 01-D-108 Microsystems and engineering science applications, SNL.—The Committee recommends \$123,000,000, an increase of \$48,100,000 above the budget request.

Project 03-D-102 LANL administration building (SM-43) replacement project, LANL.—The Committee recommendation includes \$16,000,000, an increase of \$16,000,000 above the Administration's request.

Project 01-D-103 PED, Various locations, TA-18 relocation at LANL.—As a result of the NNSA's announced preferred option that this equipment and material be transferred to the Device Assembly Facility, the Committee recommends the NNSA suspend planning related to relocation of the facility at Los Alamos and instead utilize previously appropriated funds to support planning consistent with the eventual Record of Decision. The Committee recommends no funding.

FACILITIES AND INFRASTRUCTURE

The Committee recommends \$242,512,000, to support re-capitalization of existing operational facilities to halt their deterioration and restore the robust and enduring mission readiness that relies on them.

SECURE TRANSPORTATION ASSET

The Committee recommends \$152,989,000. Of the amount appropriated, \$100,863,000 is provided for operations and equipment, and \$52,126,000 is provided for program direction.

SAFEGUARDS AND SECURITY

The Committee recommends an appropriation of \$509,954,000. The Committee recommendation includes \$8,900,000 for construction of the nuclear material safeguard and security upgrade project at Los Alamos.

The Committee directs the NNSA to continue to improve its ability to build an integrated multi-year budgeting process and eliminate the separate line-item treatment of the security budget in a manner consistent with April 2002 Report of the Commission on Science and Security, ("Hamre Commission").

DEFENSE NUCLEAR NONPROLIFERATION

Appropriations, 2002	\$803,586,000
Budget estimate, 2003	1,113,630,000
Committee recommendation	1,115,630,000

The Committee recommendation provides \$1,115,630,000 for defense nuclear nonproliferation.

The fiscal year 2002 Energy and Water Development Appropriations Act provided \$861,419,000 for nuclear nonproliferation activities. Since that time, Congress has appropriated an additional \$326,000,000 for defense nuclear nonproliferation in supplemental appropriations bills. Unfortunately, a substantial portion of the total appropriated funding for fiscal year 2002 remains unspent and unobligated.

These programs are of critical interest to this Committee and to Congress as a whole. However, the Committee is concerned that the rate of expenditure for nonproliferation programs lags substantially behind that of the rest of the National Nuclear Security Administration. Carry-over rates of 40 percent are not uncommon. Although the Committee recognizes the difficulty in implementing nonproliferation activities in Russia, the Committee strongly urges the Department to improve on this level of performance. However, the Committee does not expect the Department to carry out these programs with any less rigorous oversight in

ensuring efficient and cost-effective implementation. The securing and safeguarding of fissile nuclear material abroad is a critical component of our Nation's terrorism prevention effort.

Defense Nuclear Nonproliferation activities of the NNSA are directed to reducing the serious global danger of the proliferation weapons of mass destruction (WMD). The NNSA utilizes the highly specialized scientific, technical, analytical, and operational capabilities of the NNSA and its national laboratories, as well as other Department of Energy laboratories to implement its nonproliferation programs. Its mission is to prevent the spread of WMD materials, technology and expertise; detect the proliferation of WMD worldwide; reverse the proliferation of nuclear weapons capabilities; dispose of surplus materials in accordance with terms set forth in agreements between the United States and Russia; and store surplus fissile materials in a safe and secure manner pending disposition. The Committee continues to strongly support these important national security programs.

Nonproliferation and verification research and development.—The Committee recommends \$293,407,000.

The recommended level continues the important remote sensing and verification technology research, development and deployment, and continues to invest in the development of essential technologies for responding to the growing threat of chemical and biological terrorism.

The Nonproliferation and Verification, Research and Development program is essential for stable long-term research and the development of unique science and technology competencies needed for the increasing demands of arms control, nonproliferation, domestic nuclear safeguards and security, energy security, and emergency management.

Within available funds, the Committee has provided \$15,000,000 to support on-going activities at the Remote Sensing Test and Evaluation Center including sensor test bed development, support for field testing, and deployment of sensors, applied technology activities, the HAZMAT Spill Center, the RSL, and the STL. Within available funds, the Committee recommendation also includes \$500,000 for the Remote Sensing Test and Evaluation Center to conduct a site-wide survey of the Iowa Army Ammunition Plant (IAAP) in Middletown, Iowa, for radiological contamination. This study shall be done in conjunction with the Army Corps of Engineers and the State of Iowa. The Committee recommends \$2,500,000 in support of the 3-year research effort by the Caucasus Seismic Information Network. The Committee recommendation includes \$5,250,000 for the Incorporated Research Institutions for Seismology PASSCAL Instrument Center.

The Committee recommendation includes an additional \$10,000,000 in support of the nuclear and radiological national security program. The NNSA is directed to provide for the sustained development of advanced technologies needed to counter nuclear terrorism threats and should focus on improving capabilities through research and development in threat assessment and prediction, basic nuclear understanding, sensors and detection systems, consequence mitigation, forensics and attribution and render-safe technologies.

Nonproliferation and International Security.—The Committee recommends \$92,668,000 for Nonproliferation and International Security.

The Department's Nonproliferation and International Security program supports the U.S. arms control and nonproliferation policies, and provides leadership and representation within the Department in the international arms control and nonproliferation

community. The goal is to reduce the threat of nuclear proliferation by integrating the Department's assets and efforts, including those of the national laboratories and contractors, to provide technical support to the U.S. Government's foreign policy and national security objectives. The Committee recommendation includes \$8,100,000 for continuing the efforts for disposition of spent nuclear fuel in Kazakhstan.

The Committee commends the NNSA for engaging the wider U.S. scientific community in contributions to the treaty monitoring program. The Committee will not continue direction that the NNSA compete a specific portion of the treaty monitoring program, but strongly encourages the laboratories to continue to incorporate more industry and academic involvement and to establish metrics that will allow the Committee to track progress in this effort.

Russian Transition Initiatives.—The Committee recommends \$39,334,000 for Russian Transition Initiatives. The recommendation is meant to continue important activities that counter "brain drain" to potential proliferant states and terrorist organizations from the nuclear weapons complex laboratories and production plants of the former Soviet Union. The request includes \$16,748,000 for the Nuclear Cities Initiative (NCI), and \$22,586,000 for Initiatives for Proliferation Prevention (IPP).

International materials protection, control, and accounting.—The recommendation provides \$233,077,000 for international material protection, control, and accounting (MPC&A) activities. The Committee continues to consider these activities extremely important to reducing the threat created by the breakup of the former Soviet Union.

The increased funding from fiscal year 2002 supplemental appropriations and the fiscal year 2003 recommendation will allow for additional material consolidation and control work, an expanded program of MPC&A at several Russian Navy sites, and expanded MPC&A efforts within defense-related and important civilian and regulatory sites in Russia. In addition, the Committee supports the NNSA pursuing opportunities to work with the Russian Strategic Rocket Forces in securing additional weapons sites. The Committee continues to believe that these activities are critical elements of the United States nonproliferation efforts.

The Committee recommendation includes \$14,000,000 to develop and implement efforts with the Russian Federal for blending or otherwise securing highly enriched uranium so that the concentration of U-235 is below 20 percent or otherwise secured consistent with appropriate international standards. These efforts may include the purchase of highly enriched uranium from the Russian Federation and transporting it to the United States.

The Committee recommendation includes \$5,000,000 for the NNSA's radiological dispersion devices (RDD) program for the protection, control and accounting of RDD materials in countries other than Russia and the newly independent states.

Second Line of Defense.—From within available funds, an additional \$15,000,000 is provided for expanded activities within NNSA's Second Line of Defense (SLD) program. This program is responsible for improving border and transportation security against the illicit movement of material used in weapons of mass destruction (WMD). The Committee supports expanded program work in major transit/transportation hubs and ports in countries other than Russia and the Newly Independent States.

HEU (Highly Enriched Uranium) Transparency Implementation.—The Committee recommendation includes \$17,229,000, the

amount of the budget request for the HEU Transparency Implementation program of the Department of Energy. This program is responsible for ensuring that the non-proliferation aspects of the February 1993 agreement between the United States and the Russian Federation are met. This Agreement covers the purchase over 20 years of low enriched uranium [LEU] derived from at least 500 metric tons of HEU removed from dismantled Russian nuclear weapons. Under the Agreement, conversion of the HEU components into LEU is performed in Russian facilities. The purpose of this program is to put into place those measures agreed to by both sides, that permit the United States to have confidence that the Russian side is abiding by the Agreement.

International nuclear safety.—The Committee recommends \$14,576,000 to implement permanent improvements in Russian nuclear safety culture as well as improvements in the regulatory framework for Soviet-design reactor operations in nine former Soviet Union countries.

Elimination of weapons-grade plutonium production.—The Committee recommendation includes \$49,339,000 for the elimination of weapons-grade plutonium production program. The Committee supports the administration's request to transfer the Elimination of Weapons-Grade Plutonium program (EWGPP) from the Department of Defense to the NNSA. However, the Committee is concerned with the inherent complexity, delays, and the concomitant problems of cost increases and schedule, when working in the Russian weapons complex's closed cities.

Fissile materials disposition.—The Committee recommends \$448,000,000, to maintain operations, in the United States and in Russia, according to the plan under the budget request.

Excess weapons grade plutonium in Russia is a clear and present danger to the security of the United States because of the possibility that it will fall into the hands of non-Russian entities or provide Russia with the ability to rebuild its nuclear arsenal at a rate the United States may be unable to equal. For that reason, the Committee considers the Department's material disposition program of comparable importance to weapons activities; both are integral components of our national effort to reduce any threat posed to the United States and to deter the threat that remains.

The Committee recommendation includes \$194,000,000 for U.S. surplus materials disposition, the same as the budget request.

The Committee urges the Department to continue the thorium-based fuel cycle program currently being conducted by the Russian Research Initiative in conjunction with their U.S. industrial partners.

Construction.

Project 99-D-141 Pit Disassembly & Conversion Facility.—The Committee recommends \$33,000,000, the same as the budget request.

Project 99-D-143 Mixed Oxide (MOX) Fuel Fabrication Facility.—The Committee recommends \$93,000,000, the same as the budget request.

Project 01-D-407 Highly Enriched Uranium (HEU) Blend Down Project.—The Committee recommends \$30,000,000, the same as the budget request.

NAVAL REACTORS

Appropriations, 2002	\$688,045,000
Budget estimate, 2003	706,790,000
Committee recommendation	706,790,000

The Naval Reactors Program within the NNSA provides for the design, development, testing, and evaluation of improved naval nuclear propulsion plants and reactor cores having long fuel life, high reliability, improved performances, and simplified operating and maintenance requirements. The

nuclear propulsion plants and cores cover a wide range of configurations and power ratings suitable for installation in naval combat vessels varying in size from small submarines to large surface ships. The Committee recommendation is \$706,790,000, the amount of the budget request.

OFFICE OF THE ADMINISTRATOR

Appropriations, 2002	\$312,596,000
Budget estimate, 2003	335,929,000
Committee recommendation	335,929,000

The Committee has included \$335,929,000 for the expenses of the Office of the Administrator of the National Nuclear Security Administration (NNSA).

The NNSA is taking the long-overdue steps necessary to re-engineer the entire nuclear weapons complex to reflect new national security realities. In the field, the Operations Offices are being converted to Service Centers and the 8 Site Offices are being given greater authority over the contractors. The NNSA has announced its first major Headquarters re-engineering to consolidate management and oversight.

When fully implemented, the layers of Federal headquarters management will be reduced. The Committee recognizes that there will be increased costs for permanent change of stations associated with the re-deployment of existing staff. The Committee expects the NNSA to aggressively pursue these efforts without negatively impacting critical national security missions.

The National Nuclear Security Administration Act and subsequent Appropriations Acts have included requirements or direction to develop and implement a planning, programming, and budgeting system. The Committee directs the Department conduct an independent assessment of the NNSA's PPBS process and structure, including its comparability to that of the Department of Defense. The review should also determine whether the NNSA's PPBS is capable of being used as the central decision making process for resource allocation decisions and the extent to which it has been incorporated by NNSA M&O contractors.

RECOMMENDATION SUMMARIES

Details of the Committee's recommendations are included in the table at the end of this title.

OTHER DEFENSE RELATED ACTIVITIES

DEFENSE ENVIRONMENTAL RESTORATION AND WASTE MANAGEMENT

Appropriations, 2002	\$5,234,576,000
Budget estimate, 2003	4,544,133,000
Committee recommendation	5,370,532,000

The Committee recommends an appropriation of \$5,370,532,000 for Defense Environmental Restoration and Waste Management programs for fiscal year 2003. This is \$826,399,000 over the budget request.

The Department's Environmental Management program is responsible for identifying and reducing health and safety risks, and managing waste at sites where the Department carried out defense nuclear energy or weapons research and production activities which resulted in radioactive, hazardous, and mixed waste contamination. The Environmental Management program goals are to eliminate and manage the urgent risk in the system; emphasize health and safety for workers and the public; establish a system that increases managerial and financial control; and establish a stronger partnership between DOE and its stakeholders. The "Defense environmental restoration and waste management" appropriation is organized into two program accounts, site/project completion and post-2006 completion to reflect

the emphasis on project completion and site closures.

ENVIRONMENTAL MANAGEMENT CLEAN-UP REFORM

The Department's top-to-bottom review of the Environmental Management program concluded that cleaning up the legacy of the Cold War is costing billions more than it should and will take many years longer than anticipated to complete. The Department's position, correct in the view of the Committee, is that the status quo is unacceptable. The Department, during the last year, has embarked on a mission to quickly and markedly improve the program's performance in achieving clean-up and closure, and ensure that the primary goal is reducing risk to workers, the public, and the environment.

In the fiscal year 2003 budget submittal, the Department recommended the creation of an \$1,100,000,000 clean-up reform account in an attempt to lure sites and States into re-negotiating binding agreements to accelerate clean-ups throughout the DOE complex. This pot of money was created largely by cutting fiscal year 2003 funding levels at nearly every DOE clean-up site. The Department wanted the \$1,100,000,000 to be completely unallocated by Congress as an incentive to bring States and sites to the bargaining table quickly rather than risk not receiving any of the funding. The Department has entered into negotiations with the vast majority of the sites in the complex and has completed final performance management plans in most cases.

The Committee recommendation does not include a separate clean-up reform account. The Committee is unwilling to provide a completely unallocated \$1,100,000,000 to the Department. Rather, the Committee has sought to fairly distribute the resources based on the announced agreements or, where there has not been an announced agreement, on a reasonably informed expectation. In almost all cases, the sites have been provided substantially more than what they received in the current fiscal year. To the extent the Committee has provided funds for acceleration or reform of cleanup beyond the current year level for any affected site or laboratory, the Committee directs that the Department should not release the additional amounts to the sites or laboratories until the Department has entered into a final revised cleanup agreement and a final performance management plan.

In conclusion, the Committee reiterates its support for the Department's efforts to expedite the clean-up of the legacy of the Cold War in an efficient and effective manner. To the extent that the clean-up reform initiative has improved the legally binding agreements between the Department and the States, the Committee is pleased. However, once these agreements are in place, the Committee expects the annual budget submission from this and future administrations to fully fund the Federal portion of each of these agreements.

The Committee expects the Department to continue to seek every opportunity to bring about more efficiencies and tough business-like approaches to program execution. The Department should continue the critical review concerning the need and requirement for each individual support service contract, and duplicative and overlapping organizational arrangements and functions.

SITE AND PROJECT COMPLETION

An appropriation of \$981,350,000 is recommended for site and project completion activities, including \$973,106,000 for operation and maintenance, and \$8,244,000 for construction.

This account will provide funding for projects that will be completed by fiscal year

2006 at sites or facilities where a DOE mission (for example, environmental management, nuclear weapons stockpile stewardship, or scientific research) will continue beyond 2006. These activities are focused on completing projects by 2006 and distinguishes these projects from the long-term projects or activities at the sites, such as high level waste vitrification or the Department's other enduring missions. The largest amount of funding requested is for activities at the Hanford, WA, Savannah River, SC, and Idaho sites. A significant amount of work is expected to be completed at these sites by 2006, although environmental management and other stewardship activities will continue beyond 2006.

For construction, the Committee recommendation includes all requested projects.

The Committee recommendation includes additional funding above the level of the administration's request for the following activities: \$40,000,000 to accelerate cleanup at Savannah River Site in South Carolina; \$5,000,000 for cleanup activities at Idaho National Engineering and Environmental Laboratory in Idaho; \$141,000,000 for accelerated cleanup at the Hanford site in Washington; \$8,000,000 to accelerate cleanup activities at Sandia National Lab in New Mexico; and \$5,000,000 for accelerated cleanup at the Pantex site in Texas.

The Committee provides \$1,000,000 to the State of Oregon to cover costs of its cleanup effort, including emergency drills, planning activities, technical review of DOE's waste management and cleanup plans, participation in the Hanford Advisory Board meetings and other meetings at Hanford.

The Committee recommendation includes an additional \$1,500,000 for the Savannah River Ecology Laboratory and recommends that the Department continue its relationship with the University of South Carolina's Center for Water Resources at current year levels.

The Committee understands the Department is prepared to transfer up to 2,000 acres for the use of Pueblo of San Ildefonso and approximately 100 acres to the County of Los Alamos. The Committee recommendation includes an additional \$4,000,000 to cover appropriate expenditures necessary to expedite conveyance of the land consistent with the direction of section 632 of Public Law 105-119.

POST-2006 COMPLETION

The Committee recommendation for Post-2006 completion activities is \$3,353,098,000, which includes \$2,211,240,000 in operating expenses for Post-2006 completion, \$455,256,000 in operating expenses for the Office of River Protection, and \$671,732,000 for ORP construction.

The Post-2006 completion request supports projects that are projected to continue well beyond 2006. As cleanup is completed, it will be necessary for environmental management to maintain a presence at most sites to monitor, maintain, and provide information on the continued residual contamination. These activities are required to ensure the reduction in risk to human health is maintained.

Post-2006 construction.—The Committee recommends the amount of the administration's request.

Post-2006 operation and maintenance.—The Committee recommendation includes additional funding above the level of the administration's request for the following activities: \$229,000,000 for vitrification plant work at the Office of River Protection in Washington; \$176,000,000 to accelerate cleanup and nuclear materials stabilization at Savannah River Site in South Carolina; \$105,000,000 for cleanup activities at Idaho National Engineering and Environmental Laboratory in

Idaho; \$63,000,000 for accelerated cleanup of the River Corridor and tank waste management at the Hanford site in Washington; \$54,000,000 to accelerate remediation, waste management, and nuclear materials stewardship activities at Los Alamos National Lab in New Mexico; \$40,000,000 for accelerated cleanup at the Oak Ridge National Lab and Oak Ridge Reservation in Tennessee; \$33,000,000 for accelerated cleanup at the Nevada Test Site in Nevada; \$22,000,000 for accelerated cleanup at the Lawrence Livermore National Lab; and \$2,000,000 for the University of Alaska to address environmental contamination and the health effects of residual radiation in the food chain.

The Department is expected to continue making PILT payments to counties that have the Hanford reservation within their boundaries and at last year's level.

Within available funds, the Committee also directs the Department to fund the Hazardous Waste Worker Training Program and the HAMMER programs at levels consistent with fiscal year 2001 levels.

The Department is directed to pay its Title V air permitting fees at the INEEL consistent with prior year levels.

Last year the Committee encouraged the Department to utilize alternative dispute resolution to resolve the Pit 9 issue currently in Federal court. The Committee is aware the district court has ordered the parties to enter into mediation. The Committee commends that initiative and encourages the pursuit of the action to avert continued costly and protracted litigation. The Committee expects the Department to participate directly in that mediation, not through the M&O contractor. If mediation is not successful, the Committee expects the Department to initiate and participate in arbitration to resolve this dispute.

Carlsbad Field Office.—The recommendation includes an additional \$14,000,000 for Carlsbad to accelerate shipping and disposing of transuranic waste around the complex; an additional \$5,000,000 to continue the U.S. Mexico Border Health Commission/Materials Corridor Partnership Initiative. The recommendation also includes an additional \$3,500,000 which shall be made available to the Carlsbad community for educational support, infrastructure improvements, and related initiatives to address the impacts of accelerated operations.

In order to provide more timely information in a useable format to citizens, researchers, stakeholders, and regulators, the Committee directs the Department to consolidate at Carlsbad, all record archives relevant to the operations of WIPP and the TRU waste in the repository.

SCIENCE AND TECHNOLOGY

The Committee recommendation includes \$77,000,000 for science and technology, \$15,000,000 below the administration's request. The Committee notes that the administration's request is a cut of nearly \$164,000,000 from the current year.

The Science and Technology program provides new or improved technologies and research results that reduce risks to workers, the public and the environment; reduce cleanup costs; and/or provide solutions to environmental problems that currently have no solutions. New and improved technologies have the potential to reduce environmental restoration and cleanup costs by an estimated several billion dollars.

The Committee is aware of the Department's plan to "re-focus" the Science and Technology program and to discontinue all focus area activities, all technology applications activities, as well as other university and industry programs under this account. This recommendation is a result of the De-

partment of Energy's recent Top-to-Bottom Review of the Environmental Management program.

The Committee disagrees with this decision and is skeptical that a robust Science and Technology program can be maintained given the \$164,000,000 cut. Long-term investment in research and development is the single most important thing the Department can do to ensure that clean-ups are completed quickly and efficiently. The solutions to many of the technical problems facing clean-up sites throughout the DOE complex have not yet been invented. Sharp cuts to science and technology are not the answer and the Committee hopes the Department will reconsider for fiscal year 2004.

Within available funds, the Committee provides \$7,000,000 for the Western Environmental Technology Office; \$3,150,000 to conduct advanced conceptual design of the Subsurface Geosciences Laboratory; \$6,000,000 for the Subsurface Science Research Institute (operated by the Inland Northwest Research Alliance and INEEL); \$5,000,000 for the National Spent Nuclear Fuel program; \$6,000,000 for the Diagnostic Instrumentation and Analysis Laboratory; \$3,000,000 to continue micro-sensing technology development and prototype development and prototype deployment for the Underground Test Area; and \$4,350,000 for the University Research Programs in Robotics.

An additional \$5,000,000 is provided to establish the Critical Infrastructure Testbed at INEEL to implement the recommendations of the Energy Infrastructure Assurance Task Force.

Within available funds, the Committee provides additional funding of \$7,500,000 to INEEL for the research and development of technologies to address environmental challenges.

The Committee urges the Department to continue its previous commitment to seek alternative cost-effective technologies from outside the Department in cleaning up legacy waste. The Committee is aware that the international agreement with AEA Technology has been successful in accomplishing this vital task and urges the Department to expand use of this Agreement.

The Committee recommendation includes \$3,000,000 for basic science experiments requiring the specialized underground environment of the Waste Isolation Pilot Plant, including continuation of evaluation of the mass of the neutrino through study of double beta decay of xenon-136 as initiated in fiscal year 2002. The Committee recommends close coordination between the Office of Science and the Assistant Secretary for Environmental Management to assure that basic science studies at WIPP do not interfere with the TRU waste responsibilities of WIPP. The Committee also notes with concern that funds provided to initiate this work in fiscal year 2002 were not released by the Department until well into that fiscal year, seriously jeopardizing progress. Therefore, the Committee directs that funds be promptly released in fiscal year 2003.

The Committee agrees with DOE's testimony that proven innovative technology should be deployed in clean-up operations as quickly as possible. As in previous years, the Committee continues to support proving out the advanced vitrification technology, which holds the potential to significantly lower clean-up costs and future appropriation requirements. The advanced vitrification system also represents technology and innovation which have been invented, developed, and produced in the United States and should be a national security priority for government-funded nuclear waste management programs.

Therefore, the Committee directs the Department, from within available funds, to de-

velop the vitrification-in-the-final-disposal-container AVS system in accordance with the work plan.

Finally, the Department is directed to renew its cooperative agreement with the University of Nevada-Las Vegas through its Research Foundation.

EXCESS FACILITIES

The Committee recommendation for excess facilities is \$1,300,000, which is the same as the budget request. These funds are provided to manage the transfer for the final disposition of excess contaminated physical facilities leading to significant risk and cost reductions. In fiscal year 2003, these funds are to be used for the transfer of excess facilities at the Pantex Plant, Savannah River Site, and the Y-12 Plant from other DOE organizations.

MULTI-SITE

The Committee recommendation includes \$479,871,000 for multi-site activities.

This program account supports management and oversight for various crosscutting Environmental Management and Department initiatives, including the program's contribution to the Uranium Enrichment De-contamination and Decommissioning Fund.

Within available funds, the Committee provides \$14,000,000 for the National Energy Technology Laboratory to support the implementation of an integrated program for closing small DOE clean-up sites and to serve as the DOE field service center for the long-term stewardship of former DOE sites in the eastern United States. The Committee further directs that no action shall be taken to diminish the fiscal year 2002 Environmental Management employee levels at NETL in any way as the Laboratory's workload transitions from the Science and Technology program.

The Department shall continue its support of WERC, the Consortium for Environmental Education and Technology Development, at current year levels consistent with its contractual obligations and shall extend the Tribal Colleges Initiative grant, involving Crownpoint Institute of Technology, Dine College, Southwestern Indian Polytechnic Institute, to develop high-quality environmental programs at tribal colleges.

Within available funds, the Committee provides additional funding of \$7,500,000 to INEEL for the research and development of technologies to address environmental challenges.

SAFEGUARDS AND SECURITY

The Committee recommendation for safeguards and security is \$228,260,000, the same as the budget request.

PROGRAM DIRECTION

The Committee recommendation for program direction totals \$324,000,000, a reduction of \$20,000,000 from the budget request.

Program direction provides the overall direction and administrative support for the environmental management programs of the Department of Energy.

FUNDING ADJUSTMENTS

The Committee recommendation for Defense Environmental Restoration and Waste Management includes a funding adjustment of \$70,000,000 for use of prior year balances and anticipated schedule slippage. The budget request proposed a \$34,000,000 use of prior year balances. Due to the difficulty the Department has had in some cases reaching final performance management plans, the limitations of the continuing resolution, and the resulting delay in the ability of the Department to initiate all planned acceleration and reform activities, the Committee recommendation includes an additional reduction for anticipated schedule slippage of \$36,000,000.

The Committee recommendation includes the \$4,347,000 security charge for reimbursable work included in the budget request.

DEFENSE FACILITY CLOSURE PROJECTS

Appropriations, 2002	\$1,092,878,000
Budget estimate, 2003	1,091,314,000
Committee recommendation	1,125,314,000

The Committee recommends an appropriation of \$1,125,314,000 for the site closure program, an increase of \$34,000,000 over the request.

The “Site closure” account includes funding for sites where the Environmental Management program has established a goal of completing the cleanup mission by the end of fiscal year 2006. After the cleanup mission is complete at a site, no further DOE mission is envisioned, except for limited long-term surveillance and maintenance. This account provides funding to cleanup the Rocky Flats, Fernald, Mound, Ashtabula, and Columbus sites.

The Committee recommendation includes additional funding above the administration’s request to maintain the 2006 closure goal at the following sites in Ohio: \$25,000,000 for Fernald; \$4,000,000 for the Mound site; \$5,000,000 for the Columbus Environmental Management project.

DEFENSE ENVIRONMENTAL MANAGEMENT PRIVATIZATION

Appropriations, 2002	\$153,537,000
Budget estimate, 2003	158,399,000
Committee recommendation	158,339,000

An appropriation of \$158,339,000 is recommended for the environmental management privatization initiative.

RECOMMENDATION SUMMARIES

Details of the Committee’s recommendations are included in the table at the end of this title.

OTHER DEFENSE ACTIVITIES

Appropriations, 2002	\$544,044,000
Budget estimate, 2003	468,664,000
Committee recommendation	537,664,000

ENERGY SECURITY AND ASSURANCE

The Committee recommendation for Energy Security and Assurance is \$56,686,000. This program supports the national security of the United States by working to protect the Nation against severe energy supply disruptions by working with the private sector and the National Infrastructure Simulation and Analysis Center (NISAC) to provide technical response support during an emergency. The Committee recommendation includes \$5,000,000 for a pilot project in Washington, DC, to be carried out in conjunction with the local power provider and the Washington Metropolitan Council of Governments, to protect and harden electricity infrastructure in the Nation’s Capital, an area uniquely susceptible to terrorist attack.

The Committee recommendation includes a total of \$30,000,000 in support of the National Infrastructure Simulation and Analysis Center. This funding will enable the continuation of work authorized in the U.S.A. Patriot Act to develop sophisticated models and simulation capabilities for critical infrastructures. The additional resources are to be available for additional operations, construction of general plant projects and acquisition of equipment to support the Center.

The Committee recommendation also includes \$16,000,000 for the National Energy Technology Laboratory to assist the Office of Energy Assurance in support of research and development to monitor and protect the physical assets of the U.S. energy infrastructure, including power plants, pipelines,

transmissions lines, gaseous and liquid fuel storage, depots, processing plants, and refineries.

The Committee strongly urges the Department, when conducting critical infrastructure assessments, to use entities with a proven global information technology infrastructure, and with experience in cyber-security and energy information management.

INTELLIGENCE

The Committee recommendation totals \$41,246,000 for intelligence.

The Office of Intelligence provides information and technical analysis on international arms proliferation, foreign nuclear programs, and other energy-related matters to policymakers in the NNSA, the Department and other U.S. Government agencies. The focus of the Department’s intelligence analysis and reporting is on emerging proliferant nations, nuclear technology transfers, foreign nuclear materials production, and proliferation implications of the breakup of the former Soviet Union.

SECURITY

The Committee recommendation for security and emergency operations is \$185,515,000.

Nuclear Safeguards.—The Committee recommendation provides \$91,102,000 for nuclear safeguards.

Security Investigations.—The Committee recommendation provides \$45,870,000, the amount of the budget request.

Program Direction.—The Committee recommendation provides \$48,543,000 for program direction.

Coordination with local communities.—The Committee recognizes the unique emergency response role carried out by local governments adjacent to Departmental facilities and directs the Department to use available resources to improve local government emergency response capabilities through better communications and stronger coordination of training and response activities.

INDEPENDENT OVERSIGHT AND PERFORMANCE ASSURANCE

The Committee recommendation provides \$22,430,000 for independent oversight and performance assurance, the amount of the budget request.

The Independent Oversight and Performance Assurance program provides independent evaluation and oversight of safeguards, security, emergency management and cyber security for the Department at the Secretary’s direction.

COUNTERINTELLIGENCE

An appropriation of \$45,955,000, the amount of the request, is provided for the counterintelligence activities of the Department of Energy.

The Counterintelligence program has the mission of enhancing the protection of sensitive technologies, information, and expertise against foreign intelligence, industrial intelligence, and terrorist attempts to acquire nuclear weapons information or advanced technologies from the National Laboratories.

ENVIRONMENT, SAFETY AND HEALTH

The Committee recommendation provided \$114,041,000 for Environmental, Safety and Health activities including \$17,149,000 for program direction. The mission of the Office of Environmental, Safety and Health is to protect the health and safety of Department of Energy workers, the public, and the environment and is to be the Department’s independent advocate for safety, health and the environment.

The Committee recommendation includes \$5,000,000 to continue the DOE worker records digitization project through the Research Foundation at the University of Nevada-Las Vegas.

The Committee continues to be concerned that the Department has failed to recognize the importance of automating records management processes and continues to encumber extraordinary costs by employing labor intensive procedures in support of these requirements. Though the Committee recommended a Department-wide standardization of processes to ensure data preservation and access, the Committee is not aware of a comprehensive coordinated effort being undertaken within the Department. The Committee is also aware that even within the Environment Safety & Health organization, parallel activities were undertaken to digitize worker records while another part of the organization sought the digitization of similar worker records to support the Employee Compensation Initiative. To the extent that there is a desire to digitize records in support of the ECI, the Committee strongly encourages the Department to utilize the existing program at UNLV.

The Committee is concerned that the Department is waiving in its commitment to medical screening and health studies of current and former workers. Many of these medical screenings are required by law. The Committee expects the Department to expand \$60,000,000, a slight increase above the current year rather than the \$7,000,000 cut proposed by the Administration, on health studies.

The Committee recommends \$5,200,000, an increase of \$4,150,000 above the request, for medical monitoring at the gaseous diffusion plants at Paducah, Kentucky, Portsmouth, Ohio, and Oak Ridge, Tennessee. This will fully fund, as required by law, the worker screening program for both current and former workers. The Committee strongly supports and requires the continued use of helical low-dose CAT scanning for early lung cancer detection in workers with elevated risks of lung cancer. Such tests may detect lung cancers at an early stage even when they are not visible with conventional x-rays. The program in place at the gaseous diffusion plants is successfully identifying early lung cancers at a stage when they are treatable and can be expected to dramatically increase survival rates. The recommendation also includes \$1,000,000 for health studies at the Iowa Army Ammunition Plant.

The Committee directs the Department to initiate a beryllium screening and outreach program for those workers employed at vendors in the Worcester, Massachusetts, area who supplied beryllium to the Atomic Energy Commission for use in the nuclear weapons program. The DOE is directed to expedite the screening program by using one of the DOE’s existing former worker medical screening program providers. The Committee recommends \$250,000 for this program.

Energy Employees Compensation Initiative.—The Committee recommendation includes \$16,000,000, the amount of the request, for the Energy Employees Compensation Initiative. Title 36 of the National Defense Authorization Act of 2001 (Public Law 106-398) established the Energy Employees Occupational Illness Compensation program to provide benefits to DOE contractor workers made ill as a result of exposures from nuclear weapons production. The Department is responsible for establishing procedures to assist workers in filing compensation claims.

The Committee understands that a proposed final rule implementing Part D of the Energy Employees Occupational Illness Compensation program is currently under review within the Administration. Any final rule implementing Part D should prohibit contractor challenges, specify that a majority determination of the Physicians’ Panel is

sufficient, and rely on the independent judgment of a physicians' panel with respect to the burden of proof and medical causation.

WORKER AND COMMUNITY TRANSITION

The Committee has provided an appropriation of \$25,683,000 for these activities for fiscal year 2003. This is the same as the budget request.

The Worker and Community Transition budget provides funding for activities associated with enhanced benefits beyond those required by contract, existing company policy or collective bargaining agreements at defense nuclear facilities. The goals of the program are to mitigate the impacts on workers and communities from contractor work force restructuring, and to assist community planning for all site conversions, while managing the transition to the reduced work force that will better meet ongoing mission requirements through the application of best business practices.

NATIONAL SECURITY PROGRAMS ADMINISTRATIVE SUPPORT

The Committee recommendation includes \$50,587,000 for National Security Programs Administrative support. This fund pays for departmental services that are provided in support of the National Nuclear Security Administration.

OFFICE OF HEARINGS AND APPEALS

An appropriation of \$2,933,000 is recommended for the Office of Hearings and Appeals. The Office of Hearings and Appeals conducts all of the Department's adjudicative process and provides various administrative remedies as may be required. The goal is to promote successful and uninterrupted DOE operations through the deliberate, expeditious, and equitable resolution of all claims of adverse impact emanating from the operations of the Department.

DEFENSE NUCLEAR WASTE DISPOSAL

Appropriations, 2002	\$280,000,000
Budget estimate, 2003	315,000,000
Committee recommendation	280,000,000

The Committee recommends \$280,000,000 for defense nuclear waste disposal.

RECOMMENDATION SUMMARIES

Details of the Committee's recommendations are included in the table at the end of this title.

POWER MARKETING ADMINISTRATIONS

Public Law 95-91 transferred to the Department of Energy the power marketing functions under section 5 of the Flood Control Act of 1944 and all other functions of the Department of the Interior with respect to the Bonneville Power Administration, Southeastern Power Administration, Southwestern Power Administration, and the power marketing functions of the Bureau of Reclamation, now included in the Western Area Power Administration.

All Power Marketing Administrations except Bonneville are funded annually with appropriations, and related receipts are deposited in the Treasury. Bonneville operations are self-financed under authority of Public Law 93-454, the Federal Columbia River Transmission System Act of 1974, which authorizes Bonneville to use its revenues to finance operating costs, maintenance and capital construction, and sell bonds to the Treasury if necessary to finance any remaining capital program requirements.

Purchase power and wheeling.—The Committee is recommending the elimination of the phase out by the end of fiscal year 2004 of the use of receipts by the Southeastern Power Administration, the Southwestern Power Administration, and the Western Area Power Administration for purchase power and wheeling.

This approach was originally proposed in the Administration's fiscal year 2001 budget request and endorsed in the Energy and Water Development Appropriations Act, Fiscal Year 2002 (Public Law 106-377). In recognition of the Western energy crisis during the previous year, the Committee did not adhere to the Public Law 106-377 limitations on purchase power and wheeling in fiscal year 2002, with the largest increase being for the Western Area Power Administration. The budget request for fiscal year 2003 proposed resuming the phase-out of purchase power and wheeling along the schedule contained in Public Law 106-377. However, the Committee finds that there is no compelling reason to continue the phase out of purchase power and wheeling, particularly since this activity is budget neutral.

The Committee recommendation for fiscal year 2003 maintains purchase power and wheeling activities at the fiscal year 2002 level. The Committee will continue to establish ceilings on the use of receipts for purchase power and wheeling, and also establish the amount of offsetting collections.

BONNEVILLE POWER ADMINISTRATION FUND

The Bonneville Power Administration (BPA) is the Federal electric power marketing agency in the Pacific Northwest, a 300,000-square-mile service area that encompasses Oregon, Washington, Idaho, western Montana, and small portions of adjacent Western States in the Columbia River drainage basin. Bonneville markets hydroelectric power from 31 Corps of Engineers and Bureau of Reclamation projects, as well as thermal energy from non-Federal generating facilities in the region. Bonneville also markets and exchanges surplus electric power interregionally over the Pacific Northwest-Pacific Southwest Intertie with California, and in Canada over inter-connections with utilities in British Columbia.

Bonneville constructs, operates, and maintains the Nation's largest high-voltage transmission system, consisting of over 15,000 circuit-miles of transmission line and 324 substations with an installed capacity of 21,500 megawatts. BPA is the largest power wholesaler in the northwest and provides about 46 percent of the region's electric energy supply and about three-fourths of the region's electric power transmission capacity.

Public Law 93-454, the Federal Columbia River Transmission System Act of 1974, placed Bonneville on a self-financed basis. With the passage in 1980 of Public Law 96-501, the Pacific Northwest Electric Power Planning and Conservation Act, Bonneville's responsibilities were expanded to include meeting the net firm load growth of the region, investing in cost-effective, regionwide energy conservation, and acquiring generating resources to meet these requirements.

Borrowing Authority.—Bonneville Power Administration presently has available \$3,750,000,000 in permanent borrowing authority, authorized by the Transmission System Act (Public Law 93-454). For fiscal year 2003, the Committee recommendation includes an estimate of use of \$630,800,000 of authorized borrowing authority, the same as the budget request and \$256,300,000 more than fiscal year 2002. This borrowing authority is available for capital investments in power systems (including fish and wildlife measures), transmission systems, and capital equipment. Bonneville forecasts that it will fully utilize its remaining borrowing authority during fiscal year 2004.

The Administration has submitted a legislative proposal to increase the current Bonneville borrowing authority by \$700,000,000, for a new total borrowing authority of \$4,450,000,000. The Committee recommenda-

tion does not include this additional borrowing authority at this time because the matter is presently committed to the House-Senate conference on energy legislation.

Limitation on direct loans.—The Committee recommends that no new direct loans be made in fiscal year 2003.

Budget revisions and notification.—The Committee expects Bonneville to adhere to the borrowing authority estimates recommended by the Congress and promptly inform the Committee of any exceptional circumstances which would necessitate the need for Bonneville to obligate borrowing authority in excess of such amounts.

The Committee recommendation includes \$34,463,000 for purchase power and wheeling activities, the same as the current year and consistent with the terms described above.

OPERATION AND MAINTENANCE, SOUTHEASTERN POWER ADMINISTRATION

Appropriations, 2002	\$4,891,000
Budget estimate, 2003	4,534,000
Committee recommendation	4,534,000

The Southeastern Power Administration markets hydroelectric power produced at Corps of Engineers projects in 11 Southeastern States. There are 23 projects now in operation with an installed capacity of 3,092 megawatts. Southeastern does not own or operate any transmission facilities and carries out its marketing program by utilizing the existing transmission systems of the power utilities in the area. This is accomplished through transmission arrangements between Southeastern and each of the area utilities with transmission lines connected to the projects. The utility agrees to deliver specified amounts of Federal power to customers of the Government, and Southeastern agrees to compensate the utility for the wheeling service performed.

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

Appropriations, 2002	\$28,038,000
Budget estimate, 2003	27,378,000
Committee recommendation	27,378,000

The Southwestern Power Administration is the marketing agent for the power generated at Corps of Engineers' hydroelectric plants in the six-State area of Kansas, Oklahoma, Texas, Missouri, Arkansas, and Louisiana with a total installed capacity of 2,158 megawatts. It operates and maintains some 1,380 miles of transmission lines, 24 generating projects, and 24 substations, and sells its power at wholesale primarily to publicly and cooperatively owned electric distribution utilities.

The Committee recommendation includes \$2,200,000 for purchase power and wheeling activities, the same as the current year and consistent with the terms described above.

CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE WESTERN AREA POWER ADMINISTRATION

Appropriations, 2002	\$171,938,000
Budget estimate, 2003	162,758,000
Committee recommendation	168,858,000

The Western Area Power Administration is responsible for marketing electric power generated by the Bureau of Reclamation, the Corps of Engineers, and the International Boundary and Water Commission which operate hydropower generating plants in 15 Central and Western States encompassing a 1.3-million-square-mile geographic area. Western is also responsible for the operation and maintenance of almost 17,000 miles of high-voltage transmission lines with 258 substations. Western distributes power generated by 55 plants with a maximum operating capacity of 10,576 megawatts.

Western, through its power marketing program, must secure revenues sufficient to meet the annual costs of operation and maintenance of the generating and transmission facilities, purchased power, wheeling, and other expenses, in order to repay all of the power investment with interest, and to repay that portion of the Government's irrigation and other nonpower investments which are beyond the water users' repayment capability. Under the Colorado River Basin Power Marketing Fund, which encompasses the Colorado River Basin, Fort Peck, and Colorado River storage facilities, all operation and maintenance and power marketing expenses are financed from revenues.

Of the total resources available to the Western Power Administration, \$6,100,000 shall be transferred to the Utah Reclamation Mitigation and Conservation Commission.

The Committee recommendation includes \$186,124,000 for purchase power and wheeling activities, the same as the current year and consistent with the terms described above.

FALCON AND AMISTAD OPERATING AND MAINTENANCE FUND

Creation of the Falcon and Amistad Operating and Maintenance Fund was directed by the Foreign Relations Authorization Act, fiscal years 1994-95. This legislation also directed that the fund be administered by the Administrator of the Western Area Power Administration for use by the Commissioner of the United States Section of the International Boundary and Water Commission to defray operation, maintenance, and emergency costs for the hydroelectric facilities at the Falcon and Amistad Dams in Texas.

The Committee recommendation is \$2,734,000, the same as the budget request.

GENERAL PROVISIONS—DEPARTMENT OF ENERGY

The following list of general provisions are recommended by the Committee. The recommendation includes several provisions which have been included in previous Energy and Water Development Appropriations Acts and new provisions as follows:

Language under section 301 prohibits the use of funds to award, amend or modify a contract in a manner that deviates from the Federal Acquisition Regulations unless on a case-by-case basis, a waiver is granted by the Secretary of Energy. Similar language was contained in last year's Energy and Water Development Act, Public Law 107-66.

Language is included under section 302 which prohibits the use of funds in this Act to develop or implement a workforce restructuring plan or enhanced severance payments and other benefits for Federal employees of the Department of Energy under section 3161 of the National Defense Authorization Act of Fiscal Year 1993, Public Law 484. A similar provision was contained in the Energy and Water Development Act, 2002, Public Law 107-66.

Language is included under section 303 which prohibits the use of funds for severance payments under the worker and community transition program.

Language is included under section 304 which prohibits the use of funds in this Act to initiate requests for proposals or expression of interest for new programs which have not yet been presented to Congress in the annual budget submission, and which have not yet been approved and funded by Congress. A similar provision was contained in the Energy and Water Development Act, 2002, Public Law 107-66.

Language is included under section 305 which permits the transfer and merger of unexpended balances of prior appropriations with appropriation accounts established in this bill. A similar provision was contained in the Energy and Water Development Act, 2002, Public Law 107-66.

Language is included under section 306 which provides that none of the funds in this Act may be used to dispose of transuranic waste in the Waste Isolation Pilot Plant which contains concentrations of plutonium in excess of 20 percent by weight for the aggregate of any material category on the date of enactment of this Act, or generated after such date. A similar provision was contained in the Energy and Water Development Act, 2002, Public Law 107-66.

Language is included under section 307 which provides that the Administrator of the National Nuclear Security Administration may authorize 2 percent of the amount allocated to a nuclear weapons production plant for the production plant to engage in research, development, and demonstration activities with respect to the engineering and manufacturing capabilities of the plant in order to maintain and enhance such capabilities at the plant. A similar provision was contained in the Energy and Water Development Act, 2002, Public Law 107-66.

Language is included under section 308 which provides that the Administrator of the

National Nuclear Security Administration may authorize 2 percent of the amount allocated for national security operations at the Nevada Test Site for investment in innovative research, development, and demonstration activities with respect to the development, test, and evaluation capabilities necessary for operations and readiness of the Nevada Test Site.

Language is included under section 309 which provides that funds appropriated in Public Law 107-066 for the Kachemak Bay submarine cable project may be available to reimburse the local sponsor for the Federal share of the project costs assumed by the local sponsor prior to final passage of that Act.

Language is included under section 310 which provides for the stay and reinstatement of Federal Energy Regulatory Commission license no. 11393.

Language is included under section 311 which limits the availability of environmental management cleanup reform funding for sites or laboratories except where the Department has entered into a final revised clean-up agreement and a final performance management plan for that site or laboratory.

TITLE IV—INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

Appropriations, 2002	\$71,290,000
Budget estimate, 2003	66,290,000
Committee recommenda- tion	74,400,000

The Appalachian Regional Commission (ARC) is a regional economic development agency established in 1965. It is composed of the Governors of the 13 Appalachian States and a Federal cochairman who is appointed by the President.

The Committee recommendation for the Appalachian Regional Commission totals \$74,400,000, \$8,000,000 more than the request.

The Committee recommendation includes \$8,000,000 for the newly authorized telecommunications program within the ARC. This program will broaden the availability of advanced telecommunications services throughout Appalachia.

Consistent with the administration's budget request, the Committee recommendation does not include funding for ARC highways. Funding for ARC development highways is provided through the Highway Trust Fund in fiscal years 1999 through 2004 consistent with provision contained in the Intermodal Surface Transportation Efficiency Act.

The Committee recognizes the importance of trade and investment opportunities to the Appalachian region, and is encouraged by a preliminary trade report determining that Appalachian firms might find significant trade and investment opportunities, particularly in the energy, high technology, and transportation sectors, in the Republic of Turkey and the surrounding region. In this regard, the Committee supports the Appalachian-Turkish Trade Project (ATTP), a project to promote opportunities to expand trade, encourage business interests, stimulate foreign studies, and to build a lasting and mutually meaningful relationship between the Appalachian States and the Re-

public of Turkey, as well as the neighboring regions, such as Greece. The Committee commends the ARC for its leadership role in helping to implement the mission of the ATTP. The Committee expects the ARC to continue to be a prominent ATTP sponsor.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD SALARIES AND EXPENSES

Appropriations, 2002	\$18,500,000
Budget estimate, 2003	19,000,000
Committee recommenda- tion	19,000,000

An appropriation of \$19,000,000, the amount of the request, is recommended for fiscal year 2003. This is the same as the budget request.

The Defense Nuclear Facilities Safety Board was created by the Fiscal Year 1989 National Defense Authorization Act. The Board, composed of five members appointed by the President, provides advice and recommendations to the Secretary of Energy regarding public health and safety issues at the Department's defense nuclear facilities. The Board is also responsible for investigating any event or practice at a defense nuclear facility which has or may adversely affect public health and safety. The Board is responsible for reviewing and evaluating the content and implementation of the standards relating to the design, construction, operation, and decommissioning of defense nuclear facilities of the Department of Energy.

DELTA REGIONAL AUTHORITY

Appropriations, 2002	\$10,000,000
Budget estimate, 2003	10,000,000
Committee recommenda- tion	15,000,000

The Delta Regional Authority (DRA), authorized by Public Law 106-554, was established to assist an eight-state, 236-county region of demonstrated distress in obtaining transportation and basic public infrastructure, skills training, and opportunities for economic development essential to strong local economies.

The Committee recommends an appropriation of \$15,000,000 for the Delta Regional Authority. The recommended appropriations will be used to carry out the activities of Authority during fiscal year 2003.

DENALI COMMISSION

Appropriations, 2002	\$38,000,000
Budget estimate, 2003	29,939,000
Committee recommenda- tion	50,000,000

The Denali Commission is a regional economic development agency established in 1998 for the intended purpose of delivering basic utilities, including affordable power, and other essential infrastructure to the nation's most geographically isolated communities. The Committee is encouraged by the progress of the Denali Commission in assisting distressed communities throughout Alaska, and urges continued work among local and State agencies, non-profit organizations and other participants in meeting the most pressing infrastructure needs.

The Committee recommendation includes \$50,000,000 for the Denali Commission.

From within those funds, \$5,000,000 shall be made available for basic infrastructure and facilities for those communities without running water including Red Devil and Kaktovik; \$10,000,000 for community facilities that can serve multiple purposes in villages such as Anaktuvuk Pass, Atqasuk, Brevig Mission, Elim, Gambell, Koyuk, Savoonga, St. Michael, Stebbins, Teller, Unalakleet, and Barrow. None of the funds may be used for clean-up of leaking fuel tanks.

The Committee recommendation also includes funding for the Pt. MacKenzie gas line extension, Nome power upgrades, Fire Island power upgrade, North Slope grid upgrade, Calista power generation, and the Parks Highway electric line extension. The Committee recommendation includes up to \$1,000,000 to study the rural development opportunities, costs and logistics of shipping and marketing new domestic water supplies outside of Alaska.

NUCLEAR REGULATORY COMMISSION	
SALARIES AND EXPENSES	
GROSS APPROPRIATION	
Appropriations, 2002	\$516,900,000
Budget estimate, 2003	578,184,000
Committee recommendation	578,184,000
REVENUES	
Appropriations, 2002	\$473,520,000
Budget estimate, 2003	492,545,000
Committee recommendation	520,087,000
NET APPROPRIATION	
Appropriations, 2002	\$79,380,000
Budget estimate, 2003	85,639,000
Committee recommendation	58,097,000

The Committee recommendation includes \$578,174,000, the same amount as the request, for the Commission.

Nuclear energy received a strong endorsement in the National Energy Policy of May 2001 and serious industry interest has emerged in building a new generation of nuclear power plants in the United States to meet the Nation's electricity demands. Three nuclear utilities have announced intentions to submit early site permit applications to the Nuclear Regulatory Commission (NRC). Others are also expected to submit early site permit applications over the next few years. Industry has proposed a new risk-informed regulatory framework to license the next generation of plants. The framework would build on the successful structure of the revised reactor oversight process and be reactor design neutral. NRC should evaluate the merits of this approach and establish the new framework through rulemaking.

Because the NRC needs to ensure that its regulatory infrastructure can be responsive to these new applications, some of which may involve new technologies not previously licensed by the NRC, the Committee provided \$10,000,000 in additional budget authority to the NRC for fiscal year 2002 so that it can adequately prepare for and respond to these new reactor initiatives without jeopardizing the safety of operating facilities and without impeding ongoing initiatives on license renewals, power uprates, and moving toward a more risk-informed regulatory environment. While the Committee expects the NRC to continue to support these important national initiatives in fiscal year 2003, funds for maintaining these programs should be realized through implementing internal efficiencies in the NRC.

Recognizing the impact of September 11 on NRC's safeguards mission, an additional

\$36,000,000 was added to the NRC budget authority for fiscal year 2002. The Committee recognizes that these funds were used to strengthen the NRC's ability to respond to terrorist threats and to assess and enhance security requirements at nuclear facilities. The Committee understands that work is well underway with orders issued to all operating and decommissioned commercial nuclear energy plants. Looking to fiscal year 2003, the focus of security will begin to shift from strengthening security regulations and the response capability of the NRC to the implementation of required enhancements by the licensee. The Committee expects that the funds for oversight of these licensee programs should be realized through implementing internal efficiencies in the NRC.

The Committee recommendation for the NRC is \$578,184,000. This amount is offset by estimated revenues of \$520,087,000 resulting in a net appropriation of \$58,097,000.

Fee Recovery.—Pursuant to the agreement reached in fiscal year 2001, the NRC is required to recover 94 percent of its budget authority, less the appropriation from the Nuclear Waste Fund, by assessing license and annual fees.

Reports.—The Committee directs the Commission to continue to provide monthly reports on the status of its licensing and other regulatory activities. In addition, continued congressional oversight is necessary to ensure the NRC streamlines its business processes to improve regulatory efficiency while reducing unnecessary burden on licensees. NRC should report to the Congress by March 31, 2003, on efficiencies gained through implementation of the reactor oversight process. NRC should report to the Congress by June 30, 2003, on regulatory efficiencies that would be gained by consolidating or eliminating regional offices.

OFFICE OF INSPECTOR GENERAL	
GROSS APPROPRIATION	
Appropriations, 2002	\$6,180,000
Budget estimate, 2003	6,800,000
Committee recommendation	6,800,000
REVENUES	
Appropriations, 2002	\$5,933,000
Budget estimate, 2003	6,392,000
Committee recommendation	6,392,000

This appropriation provides for the Office of Inspector General of the Nuclear Regulatory Commission. The Committee recommends an appropriation of \$6,800,000 for fiscal year 2003.

NUCLEAR WASTE TECHNICAL REVIEW BOARD	
Appropriations	
Appropriations, 2002	\$3,100,000
Budget estimate, 2003	3,102,000
Committee recommendation	3,200,000

The Committee recommends an appropriation of \$3,200,000 for the Nuclear Waste Technical Review Board. The Nuclear Waste Policy Amendments Act of 1987 directed the Board to evaluate the technical and scientific validity of the activities of the Department of Energy's nuclear waste disposal program. The Board must report its findings not less than two times a year to the Congress and the Secretary of Energy.

TITLE V—GENERAL PROVISIONS

The following list of general provisions are recommended by the Committee. The recommendation includes several provisions which have been included in previous Energy and Water Development Appropriations Acts:

Language is included under section 501 which provides that none of the funds appropriated in this Act may be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before Congress, other than to communicate to Members of Congress as described in section 1913 of Title 18, United States Code. A similar provision was contained in the Energy and Water Development Act, 2000, Public Law 106–60.

Language is included under section 502 which requires that American-made equipment and goods be purchased to the greatest extent practicable. A similar provision was contained in the Energy and Water Development Act, 2000, Public Law 106–60.

Language is included under section 503 which extends the existing authority for the Denali Commission.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

The recommended appropriations in title III, Department of Energy, generally are subject to annual authorization. However, the Congress has not enacted an annual Department of Energy authorization bill for several years, with the exception of the programs funded within the atomic energy defense activities which are authorized in annual defense authorization acts. The authorization for the atomic energy defense activities, contained in the National Defense Authorization Act of Fiscal Year 2003, is currently being considered by the Senate.

Also, contained in title III, Department of Energy, in connection with the appropriation under the heading "Nuclear Waste Disposal Fund," the recommended item of appropriation is brought to the attention of the Senate.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI, OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATION BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. McCONNELL, from the Committee on Appropriations, submitted the following

R E P O R T

[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for Foreign Operations and related programs for

SUMMARY TABLE: AMOUNTS IN NEW BUDGET AUTHORITY

Item	Budget request	Committee recommendation	Committee recommendation compared with budget estimate increase (+) or decrease (-)
Export Assistance	\$399,281,000	\$399,281,000
Bilateral Economic Assistance	10,050,704,000	10,079,111,000	+ \$28,407,000
Military Assistance	4,295,450,000	4,272,025,000	—23,425,000
Multilateral Assistance	1,747,497,000	1,544,097,000	—203,400,000

INTRODUCTION

In fiscal year 2002, the Committee appropriated \$16,367,780,000 for foreign operations and related programs, including supplemental appropriations. This year, the Committee has provided \$16,294,514,000, of which \$16,249,314,000 is for discretionary spending and \$45,200,000 is for mandatory spending.

ACCURAL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Appropriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both

the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amounts in new budget authority

Fiscal year 2002 appropriations	\$16,367,780,000
Fiscal year 2003 budget estimate	16,515,932,000
Amount of bill as reported to Senate	16,294,514,000
Bill as recommended to Senate compared to:	
2002 appropriations	—73,266,000
Budget estimate	—221,418,000

Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

TITLE I	
EXPORT ASSISTANCE	
EXPORT-IMPORT BANK OF THE UNITED STATES	
SUBSIDY APPROPRIATION	
Appropriations, 2002	\$727,323,000
Budget estimate, 2003	541,400,000

Committee recommendation	541,400,000
ADMINISTRATIVE EXPENSES	
Appropriations, 2002	\$63,000,000
Budget estimate, 2003	68,300,000
Committee recommendation	68,300,000

The Committee provides \$541,400,000 for a subsidy appropriation for the Export-Import Bank. This is the same as the request and \$185,923,000 below the fiscal year 2002 level. Because of a reassessment of international lending risk, the fiscal year 2003 appropriation will allow the Export-Import Bank to support approximately an additional \$1,000,000,000 in exports over the fiscal year 2002 level. The Committee provides \$68,300,000 for administrative expenses, which is equal to the request and \$5,300,000 above the fiscal year 2002 level.

The Committee directs the Export-Import Bank, no later than 120 days after enactment of this Act, to report to the Committee on Appropriations the number of employees for which it utilizes the authority provided in this Act that permits the Bank to notwithstanding subsection (b) of section 117 of the Export Enhancement Act of 1992. This report is to include the positions, job descriptions, and salaries, including consulting fees, of the individuals for which this authority is exercised. The Committee has extended dual use authority for the Export-Import Bank through September 30, 2003.

OVERSEAS PRIVATE INVESTMENT CORPORATION

SUBSIDY APPROPRIATION	
DIRECT LOANS	
Appropriations, 2002	\$24,000,000
Budget estimate, 2003	24,000,000
Committee recommendation	24,000,000

The Committee provides a subsidy appropriation for the Overseas Private Investment Corporation (OPIC) for direct and guaranteed loan credit programs of \$24,000,000, which is equal to the budget request. In fiscal year 2002, no money was provided for a subsidy appropriation, as \$24,000,000 in carryover was available for use.

ADMINISTRATIVE EXPENSES	
Appropriations, 2002	\$38,608,000
Budget estimate, 2003	39,885,000
Committee recommendation	39,885,000

The Committee includes \$39,885,000 for administrative expenses. This level is equal to the administration's budget request.

TRADE AND DEVELOPMENT AGENCY	
Appropriations, 2002	\$50,024,000
Budget estimate, 2003	44,696,000
Committee recommendation	44,696,000

The Committee provides \$44,696,000 for the Trade and Development Agency (TDA). This amount is \$5,328,000 below the fiscal year 2002 level and equal to the request.

TITLE II

BILATERAL ECONOMIC ASSISTANCE	
FUNDS APPROPRIATED TO THE PRESIDENT	
UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT	
Appropriations, 2002	\$3,626,880,000
Budget estimate, 2003	3,932,924,000
Committee recommendation	4,222,424,000

The amounts listed in the above table for fiscal year 2002 appropriations, the fiscal year 2003 budget estimate and the Committee recommendation, include funds appropriated or requested under child survival and health programs, development assist-

ance, USAID operating expenses, USAID Inspector General operating expenses, mandatory retirement expenses, international disaster assistance, transition initiatives and credit programs.	
CHILD SURVIVAL AND HEALTH PROGRAMS FUND	
Appropriations, 2002	\$1,433,500,000
Budget estimate, 2003	1,790,000,000

The Committee provides \$1,790,000,000 for the Child Survival and Health Programs Fund of which \$350,000,000 is for child survival and maternal health. These funds are available for programs and activities to reduce child mortality and morbidity, combat infectious diseases including HIV/AIDS, and address a wide range of other public health problems around the world. The Committee reiterates its strong support for a comprehensive approach to global health, with an emphasis on building local capacity in developing countries to conduct effective surveillance and deliver basic health services.

After several years of discussions, the Committee believed that the administration would request, and Congress would appropriate, funds managed by USAID in two separate accounts, Child Survival and Health Programs Fund and Development Assistance. While recognizing that there are some shortcomings with this approach, the Committee has continued to appropriate funds in both accounts in order to maintain more effective oversight and accounting of funds.

HIV/AIDS

It is widely recognized that the HIV/AIDS pandemic poses the gravest threat to global health. For reasons expressed in prior reports, the Committee believes that the response of the international community to this crisis has been woefully inadequate.

For fiscal year 2003, the Committee provides a total of \$791,500,000 for programs to combat HIV/AIDS. Of this amount, \$741,500,000 is from the Child Survival and Health Programs Fund and \$50,000,000 is from the Economic Support Fund (ESF), Assistance for Eastern Europe and the Baltic States (SEED), and Assistance for the Independent States of the Former Soviet Union (FSU) accounts. Of the amount provided under the Child Survival and Health Programs Fund, \$200,000,000 is for a United States contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria.

The Committee notes the administration's September 3, 2002 request for an additional \$100,000,000 for the International Mother and Child HIV Prevention Initiative, and provides \$100,000,000 for this purpose. The Committee looks forward to working with the administration during the 2004 budget cycle to ensure that this program receives the proper attention it deserves.

The Committee believes that the first priority for HIV/AIDS funds should be to support HIV/AIDS prevention programs, to reduce the number of new infections and save lives. However, the Committee believes that USAID needs to devote significantly more resources to treatment programs (including programs to facilitate access by infected persons to anti-retroviral drugs) which have also been shown to be important in preventing the spread of HIV. The Committee is aware of the concern that some HIV/AIDS affected countries, especially those in sub-Saharan Africa, lack the capacity to effectively use additional funds for the prevention and treatment of HIV/AIDS. The Committee believes that where local capacity is lacking, USAID should urgently target resources to build that capacity.

The Committee believes strongly that the magnitude of the HIV/AIDS crisis requires

that USAID pursue all available options and authorities to ensure the most cost-effective utilization of available resources to produce the greatest possible impact in stemming the pandemic.

Media Training.—The Committee believes that more education about the causes, effects, and treatment of HIV/AIDS is needed in many areas, especially sub-Saharan Africa and southeast Asia. One promising way to increase knowledge about the disease is through a program started in fiscal year 2002 to promote accurate and unbiased media reporting on the prevention of HIV/AIDS and the care of people suffering from the disease. The Committee recommends that these efforts be expanded and that USAID make available at least \$2,000,000 in fiscal year 2003.

UNAIDS.—The Committee supports the work of UNAIDS, which plays a key coordination role in the global effort to design national AIDS plans, expand access to HIV drugs, set standards for vaccine trials, and collect data that is critical in combating the HIV/AIDS pandemic.

Microbicides.—The Committee provides not less than \$18,000,000 to support the development of microbicides as a means of combating HIV/AIDS. The Committee recognizes the urgent public health need to develop new HIV prevention options and the emerging scientific opportunities in the field. The Committee supports USAID's research in this area and urges the Office of HIV/AIDS, in conjunction with other USAID offices and appropriate Federal agencies, to fully implement USAID's comprehensive strategy to support the development and use of microbicides.

Safe Blood.—The Committee encourages USAID to support the efforts of Safe Blood for Africa, which assists African nations through training and technical assistance, to develop systems to ensure that blood supplies are screened for HIV/AIDS and other communicable diseases.

Lott Carey International.—The Committee recognizes Lott Carey International's (LCI) work to establish programs to help mitigate the devastation caused by HIV/AIDS in Africa and the Caribbean, including education, building health care infrastructure, and caring for orphans, widows, and other family members affected by HIV/AIDS. The Committee urges USAID to seriously consider supporting proposals from LCI.

Enhanced Testing.—The Committee believes that USAID should support wider use of new methods of testing for HIV/AIDS that improve the accuracy and timeliness of the results.

Mother to Child Transmission.—The Committee continues to strongly support additional assistance for programs to prevent HIV/AIDS transmission from mother-to-child.

Nurse Training.—The Committee continues to support training for nurses to cope with the HIV/AIDS crisis in sub-Saharan Africa. Because of the acute shortage of African doctors, nurses are often the first and only contact that people have with the health care system.

OTHER INFECTIOUS DISEASES

The Committee provides \$185,000,000 for programs to combat other infectious diseases, to strengthen disease surveillance, and to reduce anti-microbial resistance in developing countries. This is the 6th year of a congressional initiative begun in fiscal year 1998, which has resulted in additional appropriations of over \$400,000,000 for these activities.

Tuberculosis.—The Committee recommends not less than \$75,000,000 to combat tuberculosis (TB), including at least \$65,000,000

from the Child Survival and Health Programs Fund and at least \$10,000,000 from the ESF, SEED, and FSU accounts. The Committee expects funds for TB from the ESF, SEED, and FSU accounts to be obligated and disbursed rapidly. The Committee supports DOTS TB programs and other multilateral efforts, including the Global Fund to Combat TB.

Malaria.—The Committee recommends not less than \$75,000,000 from the Child Survival and Health Programs Fund for programs to combat malaria, a debilitating disease that afflicts an estimated 500 million people each year, of whom one million die, mostly African children. The Committee is aware of Medicines for Malaria Venture, a public-private partnership to develop new anti-malaria drugs, which are urgently needed. The Committee recommends that USAID provide direct support to this initiative. The Committee also supports the Centers for Disease Control program of malaria research centers, which are an important part of international efforts to combat malaria. The Committee also recommends that USAID allocate approximately 10 percent of its funding for malaria programs to vaccine research and development, including for the Malaria Vaccine Initiative.

UNITED NATIONS CHILDREN'S FUND (UNICEF)

The Committee supports efforts to reach the child survival goals set by the World Summit for Children. In order to implement these goals, the Committee provides \$120,000,000 from under the Child Survival and Health Programs Fund for a contribution to UNICEF. This does not preclude USAID from providing additional funding for specific UNICEF projects as may be appropriate.

IMMUNIZATIONS

The Committee is aware that at least 3 million children die each year because they do not receive life-saving immunizations. Last year, Congress provided funding for The Vaccine Fund, which supports the international, public and private partnership recommendations of the Global Alliance for Vaccines and Immunization. The Committee strongly supports continued funding for this program and recommends up to \$60,000,000 for The Vaccine Fund in fiscal year 2003.

IODINE DEFICIENCY DISORDERS

The Committee is aware that iodine deficiency disorder (IDD) is the leading preventable cause of mental retardation in children. Problems associated with IDD are particularly of concern in Africa, south Asia, the former Soviet republics and southeast Europe. Private funding raised by Kiwanis International and implemented by UNICEF is helping to prevent the mental retardation of millions of children each year. In order to help meet the IDD goals, the Committee recommends that USAID provide a total of at least \$2,250,000 from the Child Survival and Health Programs Fund, and \$1,000,000 from the FSU and SEED accounts for the Kiwanis/UNICEF IDD partnership program.

VITAMIN A AND OTHER MICRONUTRIENTS

The Committee supports increased funding for the vitamin A deficiency program. Vitamin A is a low cost solution to easily preventable diseases and blindness. Like last year, the Committee recommends at least \$30,000,000 for the overall USAID micronutrient program, of which at least \$20,000,000 should be for programs related to vitamin A deficiency.

POLIO ERADICATION

The Committee again recommends \$30,000,000 for the multilateral effort to eradicate polio, an extraordinary public-private effort which is in its final years of completion.

BLIND CHILDREN

The Committee recognizes the work being done by Helen Keller Worldwide, the International Eye Foundation, and other organizations to assist blind children in developing countries with simple and inexpensive methods of prevention and treatment. The Committee recommends that \$1,500,000 be made available for such programs in fiscal year 2003.

DISPLACED CHILDREN AND ORPHANS FUND

The Committee recommends \$12,000,000 for the Displaced Children and Orphans Fund, which is in addition to other funding for HIV/AIDS orphans. The Committee has again provided authority to use up to \$32,500 in program funds for displaced and orphaned children and victims of war, to enable the USAID office responsible for the design and management of these programs to monitor and oversee their implementation. USAID is also encouraged to use other operating expense funds, as necessary, to further the effectiveness of the oversight of these programs.

FAMILY PLANNING/REPRODUCTIVE HEALTH

The Committee provides a total of \$425,000,000 for family planning/reproductive health programs, of which \$368,500,000 is made available under the Child Survival and Health Programs Fund.

The Committee is aware that unchecked population growth is a major cause of environmental degradation, and expects USAID to develop performance goals and indicators which promote cross-sectoral collaboration on community-based, population-health-environment programs, and to consult with the Committee regarding these goals and indicators.

The Committee supports organizations such as the Population Media Center, which promotes the use of mass media to educate people in developing countries about the personal benefits of family planning, encourage the use of effective measures to prevent transmission of HIV, and adopt other health measures.

MATERNAL HEALTH

The Committee is aware that pregnancy-related deaths exceed 600,000 annually, most of which are preventable. The Committee believes that far more should be done to address this urgent need, and recommends \$75,000,000 for maternal health activities and that additional funding be made available specifically to reduce pregnancy-related deaths.

HEALTH CARE INFRASTRUCTURE

The Committee recognizes the work of the Jeffrey Modell Foundation, which has established programs aimed at combating primary immunodeficiencies. The Committee recommends that USAID support the Jeffrey Modell Foundation's efforts in Central and Latin America.

The Committee also notes the public health work of Esperanca in impoverished communities in Latin America and encourages ongoing support for these activities.

PROGRAMS FOR PEOPLE WITH DISABILITIES

The Committee strongly supports efforts to address the needs of people suffering from physical and mental disabilities in developing countries. The Committee regards this as a health issue as well as a social and economic development issue.

The Committee endorses efforts in developing countries to produce wheelchairs and artificial limbs for the disabled, who are often unable to become productive members of society due to discrimination and a lack of mobility. The Committee supports the innovative wheelchair design, seating and use approaches of Motivation, which has worked

to build the capacity of local partners in many needed countries.

The Committee also strongly supports Special Olympics, which has programs in several countries for children with mental disabilities who are often locked away in filthy facilities where they receive little or no care. The Committee recognizes that these programs can significantly improve the health and hygiene of these children, as well as enhance their self esteem and strengthen their families and communities. The Committee recommends that USAID, as part of a comprehensive strategy to improve the lives of disabled children in developing countries, provide \$3,000,000 to Special Olympics for the expansion of its overseas programs.

The Committee recognizes the work of Mobility International/USA and believes that USAID and the State Department should seriously consider providing \$300,000 to expand Mobility International/USA's professional exchange and other overseas programs. The Committee believes the State Department, USAID, and other U.S. Government entities should undertake additional efforts to promote equal opportunity for people with disabilities. The Committee continues to support efforts to help those in developing countries who have been disabled by a variety of causes.

The Committee strongly supports The Wheelchair Foundation, which provides assistance for needy children and adults in developing countries who have lost limbs or are otherwise disabled. The Committee is encouraged by the administration's public/private campaign for volunteer and assistance efforts, and has provided \$10,000,000 in Economic Support Fund assistance for the Foundation, to be made available on a matching dollar for dollar basis.

The Committee supports the efforts of the Polus Center in Nicaragua to develop a mobility and social access project for individuals who have lost limbs from acts of war, landmines or diseases.

LEAD-FREE CERAMICS

The Committee is aware of an initiative by Aid To Artisans, an organization that provides technical and marketing assistance to artisans in developing countries, to promote the use of lead-free pottery glazes in Mexico. The use of lead glazes poses serious health risks for people in many countries, and also inhibits the marketability of ceramic products. The Committee believes that this initiative has the potential to improve the health and welfare of millions of people in Mexico and elsewhere, and urges USAID to support it.

DEVELOPMENT ASSISTANCE

Appropriations, 2002	\$1,178,000,000
Budget estimate, 2003	2,839,500,000
Committee recommendation	1,365,500,000

The Development Assistance account consists of a wide range of poverty-reduction and long-term development activities including democracy and the rule of law, free market development, agriculture and rural development, urban programs, environment and energy, basic education, and micro-credit.

GLOBAL DEVELOPMENT ALLIANCE

The Committee supports, in principle, USAID's Global Development Alliance (GDA), to promote public-private partnerships in international development. However, the Committee has yet to receive sufficient information on this initiative, and has therefore provided that funds for the GDA Secretariat in fiscal year 2003 are subject to the regular notification procedures of the Committees on Appropriations.

The Committee encourages USAID to consider using GDA funds to build and support

schools and other educational institutions in developing countries. These projects should be focused on designing and promoting tolerant, secular education curricula in countries where the needs for basic education and increased understanding of democratic values are most acute.

WOMEN IN DEVELOPMENT

The Committee recommends \$15,000,000 in fiscal year 2003 for USAID's Office of Women in Development (WID). In addition to providing adequate funding, the Committee expects the Administrator of USAID to strengthen the WID Office. The Office continues to play a key role in integrating gender perspectives into USAID's programs and policies, and providing technical support, research and implementation of initiatives focused on women's economic status and legal rights, and girls' education.

The Committee strongly supports the mission of Women's Campaign International (WCI), which works to enhance the status of women through media, leadership, business, organizational, and public-service training in developing countries. The Committee recommends at least \$600,000 for WCI in fiscal year 2003.

CHILDREN'S BASIC EDUCATION

Educating children in developing countries is fundamental to long term development. The Committee believes that USAID should significantly broaden its support for these activities, and provides \$200,000,000 for children's basic education in fiscal year 2003. The Committee expects USAID to emphasize programs that expand access and quality of education for girls, enhance community and parental participation in schools, improve teacher training, and build local management capacity. USAID should ensure that it has sufficient education specialists to manage this increased emphasis on basic education.

The Committee supports the work of Schools3, a private voluntary initiative to build primary schools at low cost in developing countries.

AMERICAN SCHOOLS AND HOSPITALS ABROAD

The Committee continues to recognize the important contributions made to U.S. foreign policy by institutions funded by the American Schools and Hospitals Abroad (ASHA) program, and provides that not less than \$19,000,000 should be made available to support these institutions in fiscal year 2003. The Committee, once again, expects USAID to allocate sufficient sums to administer the ASHA program from funds provided for Operating Expenses, so it will not be necessary to expend any program funds for administrative purposes.

Although the Committee understands that ASHA funds are available for a variety of purposes, such as construction and equipment, libraries, computer technology, curriculum and staff support, and related expenses, the Committee reaffirms its intention that this assistance is not to be presumed to offer permanent budget support to ASHA recipients. The Committee strongly encourages ASHA to give priority to organizations which demonstrate a commitment to private fundraising to match government support.

By increasing ASHA funding above the fiscal year 2002 level, the Committee intends to ensure that support is provided to institutions that are effective demonstration centers of American educational and medical practices. The Committee continues to be impressed with the contributions to United States interests made by several institutions and believes that they warrant further support, including Lebanese American University, International College; The Johns Hop-

kins University's Centers in Nanjing, China and Bologna, Italy; the Center for American Studies at Fudan University, Shanghai; the Hadassah Medical Organization; the American University of Beirut; the American University of Cairo; and the Feinberg Graduate School of the Weizmann Institute of Science.

VICTIMS OF TORTURE

The Committee recommends that USAID provide up to \$10,000,000 in fiscal year 2003 for programs and activities to assist victims of torture, including for centers for victims of torture that provide services consistent with the goals of the Torture Victims Relief Re-authorization Act of 1999.

PATRICK LEAHY WAR VICTIMS FUND

The Committee continues to strongly support the Leahy War Victims Fund, which, since 1989, has provided essential orthopedic and related medical, surgical, and rehabilitative assistance for civilians who are disabled as a direct or indirect result of civil strife or armed conflict. In addition to enabling amputees and other people with disabilities to regain mobility, the Committee supports USAID's efforts to increase their accessibility to mainstream educational, recreational and economic opportunities. The Committee expects USAID to provide \$12,000,000 for this program in fiscal year 2003.

The Committee is concerned with Afghans civilians who have suffered serious injuries as a result of the military operations, and recommends that the Fund, or other assistance in the Act that is available for Afghanistan, be used to provide rehabilitation and related assistance to these people.

The Committee continues to encourage the Fund to increase its support for initiatives in conflict-affected countries that will lead to appropriate disability laws and policies, and improvements in and the expansion of appropriate services and programs that are needed by people with conflict-related, physical disabilities.

The Committee again expresses its appreciation to the USAID employees who manage this program, and who have earned the respect of disability experts around the world.

SPORTS PROGRAMS

The Committee is aware of the intrinsic value of sports in enhancing child health and development and building communities. Olympic Aid is an athlete-driven, non-profit organization using sport and recreation to achieve these goals with programs in Afghanistan, Nepal, the Democratic Republic of Timor-Leste, and several African countries. The Committee encourages USAID and the State Department to provide up to \$2,000,000 to support Olympic Aid's programs.

COOPERATIVE ASSOCIATION FOR STATES FOR SCHOLARSHIPS

The Committee supports the work of the Cooperative Association for States for Scholarships and expects USAID to continue funding this program.

URBAN DEVELOPMENT

The Committee is aware that urban populations in developing countries are growing at a tremendous rate, and is concerned that, despite this trend and the immense social and economic problems it poses, funding for USAID urban programs and associated technical staff have been declining. The Committee strongly recommends that additional funds be provided to USAID's Urban Programs Office to enhance these increasingly important programs.

The Committee strongly supports the work of the Institute for Liberty and Democracy (ILD), which has successfully implemented a number of economic growth and poverty reduction programs in developing countries.

The Committee endorses the House report language on the ILD and looks forward to recommending a final funding level in the statement of managers accompanying the conference report that exceeds the level recommended in the House report.

DEVELOPMENT AWARENESS

The Committee endorses Operation Day's Work/USA, which enables interested students to study selected countries and raise funds for basic development activities. The Committee expects USAID to continue to provide funding to expand this program.

COMMERCIAL DEVELOPMENT PROGRAMS

The Committee strongly supports micro-credit programs for very poor people and funding for other micro-credit activities, and recommends USAID provide at least \$175,000,000 for these and other micro-credit activities. The Committee supports the development of poverty measurements, and recommends that at least half of these resources be targeted to the world's poorest people. The Committee also encourages USAID to begin a micro-credit program in Afghanistan as soon as practicable. The Committee recognizes the positive impact that microcredit programs have on the lives of women around the world.

The Committee continues to strongly support the volunteer activities of the International Executive Service Corps (IESC), and believes that USAID has underutilized the IESC's capacity to promote economic growth by assisting small and medium sized companies. The Committee believes that aggressive use of volunteer organizations such as IESC produces positive results in development programs abroad, and shares the administration's support for greater volunteerism in America. The Committee expects USAID to significantly increase funding to IESC.

The Committee recognizes the important role that U.S. credit unions and cooperatives can play in overseas programs. The Committee recommends \$8,000,000 for the Office of Private Voluntary Cooperation for cooperative development organizations, in order to enhance their technical capacities and build business alliances for overseas activities with U.S. cooperatives.

The Committee is aware of the efforts of the World Council of Credit Unions to further develop credit union systems in South Africa and Mexico in order to promote free-market principles and increase the ability of poor people to access credit and other banking services. The Committee recommends up to \$2,000,000 for this initiative.

The Committee provides \$1,000,000 for the U.S. Telecommunications Training Institute (USTTI). USTTI is a nonprofit joint venture between the public and private sectors dedicated to providing tuition free communications and broadcast training to professionals from around the world.

AGRICULTURE DEVELOPMENT PROGRAMS

The Committee supports USAID's renewed emphasis on agriculture, as it has long believed that agricultural development is critical to combating poverty. The Committee has provided that \$35,000,000 should be made available for plant biotechnology programs, with an emphasis on research projects to improve food security and nutrition in Africa and Asia. The Committee continues to believe that dairy development is an important component of U.S. foreign assistance programs and recommends that USAID increase funding above the current level.

The Committee notes that USAID is in the process of drafting an agricultural strategy paper, which the Committee expects will improve its internal planning mechanisms. The Committee recognizes that the Board for International Food and Agricultural Development (BIFAD) is an important part of this

process. The Committee expects that vacant Board positions will be expeditiously filled and that USAID will provide BIFAD with sufficient resources to enable the Board to function next year.

COFFEE PRICE CRISIS

The Committee endorses the language on the coffee crisis in House Report 107-663. The Committee also notes that, during the 107th Congress, the Senate and House of Representatives passed resolutions, S. Res. 368 and H. Res. 604, calling on the administration to develop a coordinated, global solution to the coffee crisis. The Committee expects the State Department, USAID, and other appropriate agencies to brief the Committee on their progress on this issue no later than 60 days after enactment of this Act.

INTERNATIONAL FERTILIZER DEVELOPMENT CENTER

The Committee continues to support the work of the International Fertilizer Development Center (IFDC) and provides that not less than \$2,300,000 should be made available for its core grant. The Committee also recommends an additional \$1,700,000 to support the research and development activities of IFDC.

COLLABORATIVE RESEARCH SUPPORT PROGRAMS

The Committee continues its strong support for the Collaborative Research Support Programs (CRSPs). Recognizing the important research and training functions of these programs, the Committee expects that funding above the fiscal year 2002 level of \$22,383,138 will be provided for the CRSPs, and that the CRSPs be seriously considered for funding for a broad range of development-related activities.

PROTECTION OF THE ENVIRONMENT

The Committee has a long history of supporting programs, through USAID, the Department of State, and the U.S. directors to the multilateral development banks, to protect the global environment. Despite increasing amounts of resources and greater appreciation within these agencies and organizations for the importance of addressing environmental concerns, as well as many successes on the ground, the overall trend is disheartening, as from forests to oceans, the global environment is facing unprecedented threats.

The Committee believes that USAID should be at the forefront of efforts in this area, and is, therefore, extremely concerned by policy, personnel, programmatic and funding changes which could weaken USAID's expertise and role in environmental protection. The Committee is aware that environmental conservation, natural resource management, and sustainable agriculture practices are often inter-related. Indeed, in many instances, one cannot occur without the other. However, effective environmental conservation can also require establishing protected areas, as has been done with USAID support in Gabon and other countries where there are pristine forests rich in biodiversity or other areas of unique environmental significance. The Committee directs USAID to consult closely with the Committee on future plans concerning its environment programs.

Energy.—The Committee has established a fund to address a wide range of energy conservation, energy efficiency, and clean energy programs. The Committee does not believe these programs have received sufficient support at a time when the environment is under siege in many developing countries due to, among other causes, unchecked population growth, extensive resource extraction, and the burning of fossil fuels in antiquated power plants and other manufacturing proc-

esses. The Committee provides \$185,000,000 for this fund, to support programs and activities which promote energy conservation, clean energy, energy efficiency, and renewable energy technologies. The Committee also expects these funds to be used to assist developing countries to measure, monitor, report, verify, and reduce greenhouse gases and related activities. Like last year, the Committee has required the President to submit a report detailing U.S. Government support for climate change programs, efforts to promote the transfer and deployment of clean energy and energy efficiency technologies, and other information.

The Committee supports the efforts of Dakota Gasification to develop a reliable, renewable energy technology, with applications in developing nations, that would combine coal gasification with wind power. The Committee recommends that USAID give serious consideration to this project.

Office of Energy.—The Committee is concerned that USAID proposes to cut more than half of the budget for the Office of Energy and Information Technology. This office has served a crucial function by providing developing countries with expertise and other assistance on energy efficiency measures that can reduce costs, protect the environment, and improve the quality of life. The Committee provides \$13,000,000 for the Office in fiscal year 2003.

Biodiversity.—The Committee has also established a fund to protect biodiversity and tropical forests, including activities to deter illegal logging. The Committee supports USAID's efforts in this area, but believes they fall far short of what is urgently needed to stem the onslaught of destructive practices which threaten the world's remaining tropical forests and other areas of unique biodiversity, particularly in central Africa, southeast Asia, and the Amazon basin. The Committee provides \$150,000,000 in Development Assistance funds for these programs, including initiatives to enhance biodiversity in marine environments.

The Committee commends USAID for its expanded Central Africa Regional Program for the Environment (CARPE) initiative, and provides \$15,000,000 to support it in fiscal year 2003.

East Asian Pacific Environmental Initiative.—The Committee supports the East Asian Pacific Environmental Initiative (EAPEI), a program jointly managed by the State Department and USAID. The Committee is troubled that funds were not requested for EAPEI, and expects the administration to provide no less than the fiscal year 2002 level of \$3,500,000 for this program.

PARKS IN PERIL

The Committee continues to strongly support the Parks in Peril program, which matches USAID funds with private contributions to support conservation of imperiled ecosystems in Latin America and the Caribbean.

BIRDS OF PREY

Although best known for its efforts to recover the Peregrine Falcon, The Peregrine Fund continues to build a record of conserving birds of prey worldwide. A significant undertaking in the pursuit of preservation is the establishment of The Peregrine Fund's Neotropical Raptor Center in Panama. From this location, The Peregrine Fund would conduct all of its work in the neo-tropics. Like last year, the Committee recommends \$500,000 to support this goal, which the Committee understands will be matched by private contributions.

MOUNTAIN GORILLAS

The Committee remains concerned with the survival of mountain gorillas which in-

habit the high altitude jungles of Rwanda, Uganda, and the Democratic Republic of the Congo. Like last year, the Committee expects that \$1,500,000 will be provided to support groups that protect these animals, such as the Dian Fossey Gorilla Fund International and other nongovernmental organizations whose mission it is to deter poaching and protect the mountain gorilla's habitat.

ORANGUTANS

The Committee remains concerned with the destruction of orangutan habitat in Indonesia, and expects USAID to provide at least \$2,500,000 for continued support through nongovernmental organizations, including the Orangutan Foundation and others, for activities to save the orangutan from extinction. The Committee expects these funds to be used to protect orangutan habitat in both Borneo and Sumatra, including, if appropriate, to support law enforcement activities, and requests to be consulted prior to the obligation of these funds.

WATER CONSERVATION

The Committee notes the small amount of funding requested for programs to provide access to reliable sources of drinking water. Water scarcity, and the serious health and environmental problems that occur from it, are reaching crisis proportions in many countries, and the Committee believes the international community should be doing more to address it. For many people in developing countries, a disproportionate amount of time each day is devoted to searching for a shrinking supply of clean water to meet basic needs, severely inhibiting efforts to promote individual and community development. The Committee is concerned that, when inquires were made to USAID about funding levels for prior and current fiscal years for clean water programs, only fiscal year 2000 figures were available. The Committee provides \$100,000,000 for drinking water supply projects, and \$450,000,000 for all water projects in fiscal year 2003. The Committee also directs USAID to submit a report to the Committee no later than 120 days after enactment of the Act, on funding and implementation of its water projects.

The Committee strongly supports the Clean Water for the Americas Partnership, which is a public-private partnership that would help establish projects aimed at providing clean drinking water and protecting the environment. The Committee strongly recommends that USAID fund this Partnership.

The Committee continues to support the efforts of International Project WET, which has been involved for nearly two decades in international water resources management. The Committee recommends that USAID support International Project WET's efforts to expand its research, development, and implementation capabilities.

The Committee supports the Middle East Desalination Research Center (MEDRC), which has been integral to efforts to find long-term solutions to regional water problems. The Committee notes that the United States was one of the founding donors of the MEDRC and recommends that the Administration consider providing up to \$2,500,000 to MEDRC.

UNIVERSITY PROGRAMS

The Committee has, once again, received a large number of requests to fund specific activities at or through American institutions of higher education. The Committee strongly supports activities that advance international development and U.S. foreign policy goals. The Committee has reviewed the concepts proposed for funding, and recommends that USAID and/or the Department of State (as appropriate for the proposed project) actively consider proposals submitted by the following organizations.

Unless a proposal demonstrates a unique, innovative, or proprietary capability, or demonstrates special considerations that justify limited or non-competitive treatment, the Committee expects that competitive procedures will be applied with regard to the proposals on the list that follows. The Committee also expects USAID to give priority to proposals that have technical merit, realistic budgets, and achievable objectives.

No later than 60 days after the submission of the report required by section 653(a) of the Foreign Assistance Act, USAID should submit a report to the Committee on the status of each activity identified below. Such a report should include: (1) the status of the funding proposal by the organization associated with each activity; (2) the degree to which the proposal is consistent with and would advance international development and U.S. foreign policy goals for the country or region in which the activity would take place; (3) the degree to which matching or other funds would be provided by the organization to complement the Federal contribution; (4) to the extent known at the time, any decision by USAID or the Department of State on funding the activity, including the funding level; and (5) any other relevant information deemed important by USAID or the Department of State. The Committee also expects to receive a second report on the status of these proposals no later than July 1, 2003.

In last year's report, the Committee noted that USAID had not been responsive to a number of proposals put forward by universities and directed USAID to improve its performance in this regard. The Committee is disappointed with USAID's slow pace in responding to the Committee's latest directives for handling university requests. For example, it took months for USAID to publish a brochure detailing basic information that could be helpful to universities interested in submitting proposals. In addition, USAID's initial efforts to set up a communications system, from which information on university projects could be easily accessed, were woefully inadequate. If USAID is not more responsive to Committee directives concerning university proposals, the Committee will have to consider modifying its approach.

With the foregoing in mind, the Committee recommends the following proposals for USAID's active consideration:

Africa-America Institute.—A program by the African Technology for Education and Workforce Development Initiative (AFTECH) to establish a distance learning program between U.S. universities and African universities.

Alliance of Louisiana Universities.—A proposal of the Louisiana/Honduras Alliance, composed of five Louisiana Universities (University of New Orleans, Louisiana State University Agricultural Center, Loyola University, Tulane University, and Southeastern Louisiana University) and entities in Honduras, to develop a plan to deliver long-term capacity-building assistance in Honduras.

Ave Maria College of the Americas.—A proposal to create a scholarship program targeted at women and rural students.

Brandeis University.—A proposal run by the Heller School for Social Policy to train and educate students from the developing world in health policy management and a range of other topics.

Chicago State University.—A joint proposal with Obafemi Awolowo University in Nigeria to establish and strengthen occupational therapy, nursing, and community health education programs.

Columbia University.—A proposal, to be managed by the International Research In-

stitute for Climate Prediction, for drought monitoring, health care, food security, and climate change activities.

Connecticut State University System.—A proposal to work with Mico and Sam Sharpe Colleges to enhance teacher education programs in the Caribbean region.

Dartmouth College.—A joint proposal by a consortium of public and private organizations to enhance information technology development in Lithuania.

Delaware Technical and Community College.—A proposal to develop an environmental training center in Bulgaria.

EARTH University.—A proposal to support EARTH University, an institution partnered with 23 universities in the United States, to further develop its Center for Sustainability and Biodiversity in Costa Rica, which is working on enhancing sustainable agriculture, developing medicines using tropical plants, and preserving natural resources in Central America.

Eastern Michigan University.—A proposal to establish a center for Middle East Studies and Research.

Emory University.—A proposal implemented by the Atlanta-Tbilisi partnership and executed in conjunction with several other Georgia universities to further develop health care infrastructure in the Republic of Georgia.

Historically Black Colleges.—A proposal to support the efforts of these institutions to develop a virtual university consortium and establish an Institute for Emerging Democracies.

Johns Hopkins University.—A proposal in conjunction with University of Alabama at Birmingham and the Gorgas Memorial Institute to improve tuberculosis control.

Kansas State University.—A proposal for the Cereal Genome Initiative to use genomics technologies to develop grain production.

La Roche College.—A proposal to expand programs to educate young people from conflict, post-conflict, and developing regions of the world.

Louisiana State University.—A proposal to develop a commercial law program with several Latin American countries.

Louisiana State University A&M College.—A proposal to provide independent media training to local governmental officials from developing countries.

Louisiana State University A&M College.—A proposal to develop mariculture and aquaculture resources with the University of Namibia.

Montana State University, Billings.—A proposal to expand programs in international business in order to enable MSU-Billings to offer additional courses in accounting and e-commerce in foreign countries.

Montana State University, Billings.—A proposal to develop an online Master of Health Administration Degree Program with October 6 University in Egypt.

Morehouse School of Medicine.—A proposal to establish an interchange of medical knowledge and technical capability to improve health care infrastructure in Africa.

San Diego State University.—A proposal to help implement a cooperative program to address water scarcity and climate change in south Asia.

San Diego State University.—A proposal to work in collaboration with the Peres Center for Peace to promote sustainable and efficient use of alternative water resources in agricultural development in the Middle East.

St. Thomas University.—A proposal to further develop the African democracy network in order to work on issues involving democracy, human rights, and gender.

South Dakota State University.—A proposal to enhance research and education with Russian and Central Asian governments and

non-governmental organizations on agricultural development.

Suffolk University.—A proposal to enhance course offerings at its Senegal campus.

University of Alabama at Birmingham.—A proposal in conjunction with Johns Hopkins University and the Gorgas Memorial Institute to improve tuberculosis control.

University of Alaska.—A program with Alaska Pacific University and the North Slope Borough and the Northwest Arctic Borough to provide training and technical assistance to strengthen Chukotka's economy, develop market driven systems and improve social conditions, particularly for indigenous people in the region.

University of Arkansas Medical School.—A collaborative effort with the Volgograd City Health Department, Volgograd Medical Academy, and other public-private partners in the community to enhance various health care delivery systems in the region.

University of Georgia.—A proposal to establish a training program for legal professionals, journalists, and government officials from developing countries.

University of Idaho.—A proposal to help restore the food production and food distribution system in Afghanistan.

University of Iowa.—A proposal to continue basic education initiatives in East Timor.

University of Kentucky.—A program relating to the development of crop insurance in Romania.

University of Kentucky.—A proposal for coal mine safety programs in the former Soviet Union.

University of Louisville.—A project to conduct training on drinking water system management, financing, laboratory analytical methods, preventive and system maintenance, and the development of public support for water systems in the Republic of Georgia.

University of Louisville.—A collaborative program with the University of Alabama-Birmingham, the Medical University of South Carolina, and Clemson University for research on plant materials in the rain forests of Dominica.

University of Louisville.—A proposal for the continued funding of a program in partnership with Rand Afrikaans University to work with impoverished communities in South Africa on economic reform.

University of Massachusetts, Boston.—A proposal to conduct further research on international conflict.

University of Miami.—A proposal for the Cuba Transition Project.

University of Mississippi.—A project by the National Center for Physical Acoustics to help improve mine detection technologies.

University of Mississippi.—A project by the Center for Marine Resources and Biotechnology to perform environmental research, biowaste treatment, and a hydrographic survey of coastal zones in Central America.

University of Missouri, Columbia.—A proposal to build capacity for sustainable community development training and application in Afghanistan.

University of Missouri, Columbia.—A proposal to develop South African indigenous plants as value-added crops and therapeutics for diseases.

University of Nebraska.—A proposal by the Medical Center's Office of International Health Care Services to combat a range of infectious diseases.

University of Nebraska, Omaha.—A proposal to further expand efforts to provide basic education in Afghanistan.

University of Notre Dame.—A proposal by the Kroc Institute for International Peace Studies to promote institution building in Muslim societies.

University of Northern Iowa.—A proposal for University of Northern Iowa's Orava Project

to enhance democracy-building in Central and Eastern Europe through educational reform.

University of Northern Iowa.—A proposal concerning the Global Health Corps program, which trains university students to conduct community health programs in under-served areas in developing countries.

University of Northern Iowa.—A proposal for the Russo-American Institute to deepen cultural understanding and promote professional collaboration through exchange programs with Moscow International University and other Russian universities.

University of South Alabama.—A proposal to enhance the Birth Defects Monitoring Program in the Rivne and Volyn oblasts in the Ukraine, which will allow the program to begin monitoring environmentally linked birth defects.

Western Kentucky University.—A proposal for the continued funding of an international journalist training program.

Western Kentucky University.—A project to develop and promote safe coal use practices and karst water resources in China.

COUNTRY ISSUES

AFGHANISTAN

The Committee notes the many positive changes in Afghanistan in the past year: the brutal Taliban regime has been toppled; a Loya Jirga was convened which selected a government to serve until elections in June 2004; and international relief efforts have started to have a noticeable impact in some portions of the country.

The Committee, however, also recognizes that enormous social, economic, and political challenges remain. These include a lack of security, food scarcity, insufficient assistance for refugees and internally displaced persons, and reconstruction after decades of conflict. The Committee is extremely concerned that, if more is not done by the United States and the international community to address these issues, Afghanistan will be increasingly at risk of relapsing into civil strife.

The Committee is supportive of increased assistance for Afghanistan, and notes the enactment of the Afghanistan Freedom Support Act which authorizes a total of \$1,700,000,000 for assistance for Afghanistan over the next 4 years. While a formal budget request for Afghanistan was not submitted for fiscal year 2003, the Committee has been informally advised that the administration plans to allocate \$98,000,000 for that transitional country. The Committee believes that additional funds are necessary and provides \$220,000,000 for Afghanistan in this Act. This is short of the fiscal year funding levels authorized in the Afghanistan Freedom Support Act, but the Committee is unable to make additional contributions without making deep cuts in other important international assistance programs. The Committee encourages the administration to submit a supplemental request for Afghanistan, including to support training and equipment for the Afghan National Army.

The Committee continues to be troubled by the security situation throughout Afghanistan as the lack of security continues to create severe impediments to relief and reconstruction efforts and has resulted, at various times, in the scaling back or cessation of critical humanitarian and development operations around the country. A more detailed discussion of this issue is under the "Peacekeeping Operations" heading in this report. The Committee is also aware of the concerns raised by some parts of the administration and nongovernmental organizations regarding reports of military personnel engaging in humanitarian activities while outfitted in civilian clothing. The Com-

mittee supports a solution to this issue which is acceptable to all parties involved.

The Committee supports the deployment of "Provincial Reconstruction Teams" and believes that they have the potential to improve the security situation for NGOs, USAID, and others working on reconstruction projects in the more remote parts of Afghanistan. The Committee recommends continued close coordination between all parties involved.

The Committee notes that while conditions for some women in Afghanistan have improved from what existed under Taliban rule, serious obstacles, including illiteracy, joblessness, violence specifically targeting women, lack of access to health care, and the lack of clearly defined legal rights, continue to hinder the progress of Afghan women. The Committee recognizes the difficulties inherent in implementing assistance programs in Afghanistan, but is nonetheless concerned about the slow pace and relatively small amount of assistance devoted specifically to improving the lives and opportunities of Afghan women. The Committee is concerned with reports of harsh restrictions imposed on women and girls in western Afghanistan.

The Committee believes that the Afghan Ministry of Women's Affairs is uniquely positioned to become the primary center of capacity to carry out women-focused development in Afghanistan, and commends USAID for the support it has given to the Ministry thus far. The Committee provides \$5,000,000 to enable the Ministry to establish multi-service women's centers throughout Afghanistan, and to initiate programs to improve girl's and women's education and health, protect their legal rights, and expand their economic opportunities.

The Committee also supports the United Nations Fund for Women's reconstruction activities in Afghanistan.

The Committee recognizes the vast energy needs in Afghanistan and believes that the private sector in the United States, through organizations such as the International Energy Advisory Group, is well positioned to complement USAID's efforts in this area.

BURMA

The Committee commends Burmese democracy leader Daw Aung San Suu Kyi and the National League for Democracy (NLD) for their unwavering commitment and dedication to democracy and human rights in Burma. The Committee remains gravely concerned with the abuses inflicted upon the people of Burma by the repressive State Peace and Development Council (SPDC), including the systematic rape and killing of ethnic minorities, the imprisonment and torture of political opponents, forced and child labor, and the widespread use of child soldiers. The Committee, like the NLD, is deeply concerned about the welfare of the people of Burma, and has continued its support of humanitarian and democracy efforts.

The Committee supports \$1,000,000 for HIV/AIDS programs and activities in Burma, and suggests an additional \$500,000 be made available in commodities from the United States Agency for International Development's HIV/AIDS Commodity Promotion Fund. The Committee directs that all HIV/AIDS programs in Burma be carried out in consultation with the leadership of the National League for Democracy, and that no assistance be provided to the State Peace and Development Council. Given the SPDC's mismanagement of Burma's resources, including the investment of hundreds of millions of dollars in arms purchases and nuclear technology from Russia and China, the Committee suggests the State Department consider a matching requirement from the SPDC for funds provided to Burma to combat a rampant HIV/AIDS infection rate.

The Committee counsels the State Department to be measured in its response to the SPDC's ongoing campaign to improve its image abroad, and believes that the SPDC should be judged not by what it says, but rather by how it evidences movement toward political dialogue and transition to democracy. The Committee believes that narcotics manufacturing and trafficking in Burma poses a clear and present danger to the region, particularly Thailand, Europe, and the United States.

CAMBODIA

The Committee regrets that the Government of Cambodia failed to hold legitimate local elections in February 2002, adequately investigate and prosecute human rights abuses, or fully implement reforms necessary for the country's economic, political, legal, and social development. Moreover, the Government of Cambodia continues to abuse the constitutional rights and dignity of its citizens, and the lack of the rule of law stifles economic development and perpetuates human suffering, as demonstrated by Cambodia's low ranking in the United Nations Development Program's 2001 Human Development Report.

As the Committee believes that the Cambodian leadership should be held accountable for its poor governance and human rights record, restrictions on assistance to the Government of Cambodia have been continued and strengthened. The Committee suggests that international financial institutions, particularly the World Bank and the Asian Development Bank, conduct independent audits of their loans and grants to that country, including contributions to the Government of Cambodia's Social Fund.

The Committee believes that the 2003 parliamentary elections provide the people of Cambodia with an opportunity to elect new leadership committed to the rule of law, and encourages the State Department to take a vocal and active role in ensuring a level political playing field and holding accountable those who commit election-related violence and chicanery. The Committee is concerned that absent political change, Cambodia will continue to be a haven for criminal undesirables, including international terrorists.

The Committee remains concerned about illegal logging in Cambodia, and encourages USAID to support programs in community forest management, which can contribute to forest preservation as well as promote democratic development at the local level.

The Committee commends the work of the Documentation Center of Cambodia, and expects that at least \$275,000 will be provided to the Center in fiscal year 2002, with funds from USAID and the State Department's Bureau for Democracy, Human Rights and Labor. The Committee recommends that at least this amount be provided for the Center in fiscal year 2003, including, if warranted, to purchase a suitable motor vehicle to facilitate the Center's investigative work throughout rural Cambodia.

The Committee provides \$3,750,000 as an initial U.S. contribution for an endowment to sustain the Vietnam Veterans of America Foundation's rehabilitation program in Cambodia. This program, which produces artificial limbs, braces and wheelchairs and provides rehabilitation services, has received USAID funding for many years and is widely regarded to be of superior quality and effectiveness. The program is implemented by trained Cambodian staff, and currently meets the rehabilitations needs of the majority of Cambodians suffering from physical disabilities, many of whom are victims of landmines. It also supports income generating activities for the disabled. The Committee supports USAID's plans to gradually

phase out its funding for this successful program, if an endowment is established that ensures its long-term sustainability. The U.S. Government funds provided to the VVAF for the endowment are to be matched by one-half with contributions from private sources.

CHINA

The Committee provides \$25,000,000 for programs to support democracy, human rights and the rule of law in China, Hong Kong, Taiwan, and Tibet, of which not less than \$15,000,000 shall be made available for programs in China to be administered by the Bureau of Democracy, Human Rights and Labor at the State Department. These funds are in addition to such sums provided to the Bureau in the President's fiscal year 2003 request. The Committee expects that of the remaining funds, up to \$3,000,000 will be provided to the National Endowment for Democracy, and the balance will be provided to nongovernmental and academic organizations to support programs relating to China, Tibet, and Hong Kong. The Committee strongly endorses activities targeted toward freedom of expression in the media and on the internet, the rule of law, labor reform, and grassroots elections in China.

CYPRUS

The Committee provides \$15,000,000 from the ESF account for Cyprus to be used for scholarships, bicultural projects, and measures aimed at reunification of the island and designed to reduce tensions and promote peace and cooperation between the two communities on Cyprus. The Committee intends that these resources be made available to maximize leverage to improve prospects for a peaceful settlement in Cyprus.

The Committee notes the work of the Cyprus Institute of Neurology and Genetics, which is a bicultural program aimed at providing specialized services in neurology, genetics, and molecular medicine. The Committee is particularly pleased with the progress that the Institute has made to enhance efforts on biomedical research, stroke prevention, gene therapy and brain development research on Cyprus.

GUATEMALA

The Committee continues to be concerned with the unsolved murders of American citizens in Guatemala, including Larry Lee, Steven Michael Gartman, Juan Antonio Zimeri, David James Erf, Robert Orville Edeleman, Sister Barbara Ann Ford, Carlos Humberto Melgar, and Suzanne Spalding Hendricks. The Committee again requests the State Department to make every effort to obtain the cooperation of Guatemalan law enforcement authorities in bringing to justice the perpetrators of these crimes.

INDONESIA

The Committee expresses its condolences to the victims and the families of those killed and injured in the October 12, 2002 terrorist attack in Bali. While the Committee commends the progress to date in the investigation, it remains gravely concerned with the presence of indigenous and foreign terrorist elements in Indonesia. The Committee believes Indonesia to be a frontline state in efforts to combat international terrorism.

As the Committee recognizes the devastating economic and social impact of the attack on the residents of Bali, it recommends that not less than \$5,000,000 be provided for reconstruction and recovery efforts. The Committee expects the Government of Indonesia to continue to aggressively pursue terrorists throughout the archipelago, and supports the recommendation of the International Crisis Group for a re-opening of investigations into earlier bombing attacks in Indonesia.

With parliamentary and presidential elections scheduled for 2004, Indonesia is at an important crossroads in its democratic development. While recognizing that the process of reform is a long-term endeavor, the Committee notes that the pace of reform in many sectors has not kept pace with expectations and cautions that the continued failure of leadership at all levels may have adverse political, economic, and social impacts. In the face of these challenges, the Committee provides not less than \$150,000,000 for assistance for Indonesia, and expects significant assistance to be provided to democracy and governance programs in support of the upcoming polls.

The Committee sees no evidence that the Government of Indonesia is serious about developing or implementing military reforms. The Indonesian military's (TNI) decentralized, territorial structure and dependence upon revenue from off-line sources perpetuates corruption, gross human rights violations, and association with extremist and criminal groups and individuals. The Committee is outraged by TNI's alleged complicity in the murder of Americans in Papua on August 31, 2002 and demands that justice be served for these crimes.

Given the clear and present danger that terrorist groups pose to Indonesia and the region, the Committee has not included restrictions on IMET to the Indonesian military. The Committee understands the limitations of this program as a means of reforming the Indonesian military, and makes clear its view that the provision of IMET is in the national security interests of the United States. Any other interpretation—including the perception of IMET as endorsement of TNI—is wholly incorrect.

The Committee has maintained restrictions on FMF assistance and licenses of lethal defense articles to Indonesia in this Act, until the President certifies that the Indonesian Minister of Defense is suspending and the Indonesian Government is prosecuting and punishing human rights violators within the Indonesian Armed Forces. Unfortunately, the ongoing special trials of lower ranking officers for abuses in East Timor suffer from serious deficiencies, and the Indonesian military has sought to intimidate judges and prosecutors.

The Committee is hopeful the recent ceasefire agreement in Aceh will hold, and expects that not less than \$10,000,000 shall be made available to support programs and activities in Aceh.

LAOS

The Committee strongly supports the administration's request of \$2,000,000 from Development Assistance and the Child Survival and Health Programs Fund for activities to meet basic human needs in Laos. The Committee continues to be concerned by the repressive policies of the Government of Laos.

LEBANON

The Committee believes that economic development in Lebanon should be a priority for U.S. foreign policy in the Middle East, and provides \$35,000,000 in ESF assistance for Lebanon. However, none of these funds may be made available for assistance for the central Government of Lebanon.

The Committee supports the work of American educational institutions in Lebanon and encourages USAID and the State Department make available a portion of these funds for scholarships and direct support of these institutions.

The Committee is deeply disappointed that past efforts to secure the return of American children abducted to Lebanon have been unsuccessful. The Committee is aware of cases in which the Lebanese Government has failed to enforce the orders of the Lebanese

civil courts. These unresolved cases will continue to be an obstacle to closer relations between the United States and Lebanese governments. The Committee calls on the Lebanese Government to ensure that the rule of law is upheld.

MONGOLIA

The Committee supports the administration's \$12,000,000 request for assistance for Mongolia for fiscal year 2003. While the Mongolian people are to be commended for their continued commitment to democracy and human rights, The Committee is disturbed by recent actions by the Government of Mongolia that seek to stifle popular dissent. The Committee will continue to watch events in Mongolia closely to determine if any backsliding in the democratic process is taking place.

NICARAGUA

The Committee recognizes the important work of the Fabretto Children's Foundation, which provides essential opportunities for children in Nicaragua to escape poverty. The Committee recommends that USAID provide up to \$1,500,000 to support four Fabretto programs in Nicaragua.

The Committee also supports efforts to improve mass transportation systems in Nicaragua and other Central American countries, where cities are overwhelmed with migrants from rural areas seeking employment.

NIGERIA

The Committee is aware that a Judicial Commission of Inquiry is currently investigating the causes of inter-communal conflict in Benue, Nassarawa, Taraba, and Plateau states. However, the Committee is also aware that the commission has no prosecutorial powers, and therefore its work does not represent an effective measure to bring to justice individuals responsible for gross violations of human rights.

NORTH KOREA

The Committee is extremely disturbed by recent events in North Korea that underscore that failed state's threat to international security and stability through its production and proliferation of weapons of mass destruction. The Committee commends the administration for exposing the fallacy of North Korea's commitment to international obligations.

The Committee remains deeply concerned with the abuses inflicted upon the people of North Korea by the repressive Stalinist regime, and notes that extrajudicial killings, torture, starvation and a failed economy have caused thousands of North Koreans to seek refuge in the People's Republic of China. The Committee recommends the State Department and USAID provide \$10,000,000 to safeguard the human rights and dignity of North Korean refugees and asylum seekers, whether through the establishment of camps, contributions to organizations, or other means. The Committee is deeply troubled by the horrific fate that awaits those who are forcibly repatriated to North Korea.

SIERRA LEONE

The Committee notes the progress that Sierra Leone is making toward restoring peace and democratic rule. The Committee particularly commends the efforts of the British Government and the United Nations to end the armed conflict, demobilize combatants, hold free and fair elections, and repatriate refugees.

The Committee recognizes that the Government of Sierra Leone faces enormous challenges to rebuild the country, and provides \$9,000,000 in ESF assistance, in addition to funds from "Development Assistance" and funds budgeted for the "Countries in Transition" program, for these purposes. The Committee expects that assistance provided

above the budget request for Sierra Leone will not result in cuts to programs for other African countries.

The Committee strongly supports the efforts of the Special Court for Sierra Leone and the Truth and Reconciliation Committee (TRC) to hold accountable those individuals involved in atrocities committed during the conflict. The Committee is also encouraged that the Court is undertaking broader efforts to restore the rule of law and outreach activities to accelerate and strengthen the reconciliation process. The Committee is disappointed that in fiscal year 2002 the State Department ignored Committee directives in Senate Report 107-58 and House Report 107-345 to accelerate U.S. financial assistance to the Court. Moreover, the State Department did not offer any justification for this decision. The Committee has also been informed that, while the Court is making substantial progress on a limited budget, additional funds are needed to meet pressing security, transportation, and other needs. Therefore, the Committee has provided \$10,000,000 in Economic Support Fund assistance for a contribution to the Special Court. The Committee again strongly urges the Special Court to pursue those most responsible for these heinous acts, even if they are not currently living in Sierra Leone.

THAILAND

The Committee recognizes and appreciates Thailand's efforts to combat international terrorism and encourages continued vigilance by the Thai government and military, particularly in the southern part of the country. The Committee fully supports the administration's IMET and FMF requests for Thailand.

The Committee is fully aware of the challenges posed to Thailand by its repressive neighbor, Burma, and remains concerned with the plight of all people who flee to Thailand. The Committee notes the many reports detailing the State Peace and Development Council's (SPDC) systematic and egregious abuses inflicted on the people of Burma and recommends that the State Department work closely with other democratic nations, and the appropriate U.N. agencies, to investigate these reports in order to better understand the extent of these abuses and to formulate and coordinate appropriate policy responses.

TIBET

The Committee recommends \$3,000,000 in ESF assistance for programs that provide training and education to Tibetans in democracy and human rights, preserve cultural traditions, and promote economic development and environmental conservation in Tibetan autonomous areas, including the area designated as the "Tibetan Autonomous Region" where such activities are underway. The Committee is aware of the valuable assistance the Bridge Fund has provided to promote Tibetan-owned and operated businesses and educational, cultural, and natural resource conservation projects in Tibet.

INTERNATIONAL DISASTER ASSISTANCE

Appropriations, 2002	\$235,500,000
Emergency supplemental ..	90,000,000
Budget estimate, 2003	285,500,000
Committee recommendation	290,000,000

With the large number of humanitarian emergencies around the world, the Committee believes that, even with supplemental funds, the administration's fiscal year 2003 request falls short of meeting these emergency needs, especially in Afghanistan. Therefore, the Committee has provided \$290,000,000 for "International Disaster Assistance" programs, of which \$60,000,000 is for Afghanistan.

The Committee believes that the Modular Command Post System (MCPS), a mobile communications, command and control facility, can be of value in responding to international disasters around the world. The Committee urges USAID and the State Department to consider using the MCPS in complex relief operations.

TRANSITION INITIATIVES

Appropriations, 2002	\$50,000,000
Budget estimate, 2003	55,000,000
Committee recommendation	55,000,000

The Committee commends the work of USAID's Office of Transition Initiatives (OTI), which is on the ground in countries around the world providing essential assistance to bridge the gap between emergency relief and long-term development.

DEVELOPMENT CREDIT AUTHORITY

OPERATING EXPENSES

Appropriations, 2002	\$7,500,000
Budget estimate, 2003	7,591,000
Committee recommendation	7,591,000

PAYMENT TO THE FOREIGN SERVICE

RETIREMENT AND DISABILITY FUND

Appropriations, 2002	\$44,880,000
Budget estimate, 2003	45,200,000
Committee recommendation	45,200,000

The Foreign Service retirement and disability fund is a mandatory expense of USAID.

OPERATING EXPENSES OF THE UNITED STATES AGENCY FOR INTERNATIONAL DEVELOPMENT

Appropriations, 2002	\$549,000,000
Emergency supplemental ..	7,000,000
Budget estimate, 2003	572,087,000
Committee recommendation	571,087,000

The Committee provides \$571,087,000 for operating expenses of the United States Agency for International Development. The Committee remains concerned about USAID's deficient financial, procurement, and personnel management systems, and recognizes that solving these problems will be costly. At the same time, the Committee believes that USAID's greatest resource is its staff, many of whom have developed extraordinary expertise in their areas of responsibility. The Committee is concerned that USAID has lost some of its most experienced professionals over the years due to misguided management decisions, and it does not want to see those mistakes repeated.

CAPITAL INVESTMENT FUND

Appropriations, 2002
Budget estimate, 2003	\$95,000,000
Committee recommendation	65,000,000

The Committee has earmarked funds to upgrade USAID's information technology systems, which is long overdue and necessary to the effective management of USAID's mission-based operations. However, the Committee continues to be concerned with the lack of coordination between USAID and the State Department's Office of Overseas Buildings Operations, regarding construction of new USAID facilities. The Committee is concerned about the potential cost of these building projects and expects to be consulted regarding plans for future construction.

The Committee is concerned about the acute shortage of USAID personnel in Afghanistan. USAID's reconstruction program in Afghanistan is a national security priority for the United States, and an estimated 40 additional personnel are urgently needed to effectively administer this program. While a new USAID building may be con-

structed at some point, no decision has been made. Therefore, the Committee provides up to \$10,000,000 for temporary, secure facilities for an appropriate number of USAID personnel in Kabul, located at a suitable site.

COMMITTEE BILLS AND REPORTS

The Committee is concerned that some employees of the State Department and USAID do not read the portions of the Act and accompanying Committee reports which deal with their respective areas of responsibility. The effect is that these employees do not always accurately and fully implement the laws, policies, programs and activities contained in these documents. The Committee expects that the Secretary of State and the Administrator of the United States Agency for International Development will ensure that each employee under their authority receives a copy of the Act and the relevant reports, and will direct each employee to read the relevant portions of these documents. The Committee intends that these documents may be provided or accessed via the Internet.

OPERATING EXPENSES OF THE OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2002	\$31,500,000
Budget estimate, 2003	33,046,000
Committee recommendation	33,046,000

The Committee provides \$33,046,000 for operating expenses of the Office of the Inspector General.

OTHER BILATERAL ECONOMIC ASSISTANCE

ECONOMIC SUPPORT FUND

Appropriations, 2002	\$2,199,000,000
Emergency supplemental ..	465,000,000
Budget estimate, 2003	2,490,000,000
Committee recommendation	2,260,000,000

MIDDLE EAST COUNTRIES

In 1998, the United States reached agreements with the Governments of Israel and Egypt to reduce the levels of ESF assistance for these countries over a 10-year schedule. In accordance with this schedule, the Committee provides \$600,000,000 for Israel and \$615,000,000 for Egypt for fiscal year 2003. The Committee provides \$250,000,000 for assistance for Jordan, which reflects the amount requested by the administration. The Committee provides \$75,000,000 for assistance to the Palestinian people in the West Bank and Gaza, and notes that restrictions on the use of funds provided under the Act remain unchanged from prior years.

The Committee remains concerned with the situation in the Middle East, and, in particular, with the welfare of the Israeli and Palestinian people. The Committee encourages continued efforts by all parties to achieve lasting peace in the region.

The Committee is disappointed that this will be the last year of funding for the U.S.-Israel Cooperative Development Program and hopes that USAID will continue to utilize the expertise, including that of Israel's Center for International Cooperation (MASHAV), accumulated by this program.

The Committee believes that continued political, legal, and economic reform programs should continue in the West Bank and Gaza. The Committee recognizes that calls for reform already exist within Palestinian civil society, and supports the provision of assistance to those groups and associations, including from the United States, advocating greater transparency, accountability, and political pluralism. The Committee notes that rule of law programs would enhance these reforms and encourages the administration to support technical assistance programs in the West Bank and Gaza, if practicable.

The Committee recognizes that Egypt is a vital and strategic ally of the United States and plays an important role in the Middle East peace process. However, the Committee remains concerned with challenges to the rule of law, human rights, and democracy in Egypt. The Committee commends the State Department for undertaking a review of assistance programs for Egypt.

The Committee notes with appreciation Jordan's constructive role in the peace process and efforts to implement economic reforms.

CONFLICT RESOLUTION

The Committee has provided \$5,000,000 in Economic Support Fund assistance for conflict resolution programs and activities that promote understanding, reconciliation and problem solving in the Middle East. The Committee believes that the following organizations are among those deserving of support—

- The Arava Institute for Environmental Studies, which manages programs that bring college age Arabs and Israelis together to promote better relations and solve common environmental problems;
 - Seeds of Peace, a widely respected organization which promotes understanding between teenagers in the Middle East, Cyprus, and the Balkans; and
 - Jerusalem International YMCA, which brings together Christian, Jewish and Muslim youth in a positive environment that promotes peace, respect and understanding.
- The Committee also recommends an additional \$2,000,000 in Development Assistance, SEED, and ESF funds, to support other conflict resolution programs and activities. The Committee believes that the following organizations are among those deserving of support—
- International Crisis Group, whose analysts in the field identify potentially explosive problems, produce objective assessments, and prescribe policy responses to prevent or reduce the level of violence resulting from complex crises; and
 - Foundation for Security and Sustainability, a public institute chartered to further understanding about resource scarcity and environmental problems and provide opportunities to avert and better prepare for potential crises.

CHILD SOLDIERS

The Committee recognizes the serious problems associated with child soldiers around the world, as they are used as combatants, camp laborers, sex slaves, and runners, under horrendous conditions. To help address this issue, the Committee recommends \$5,000,000 for programs for war-affected youth in such countries as Afghanistan, Angola, Colombia, Sierra Leone, Sri Lanka, and the Democratic Republic of the Congo.

TERRORISM IN SOUTHEAST ASIA

The Committee is concerned with the ability of terrorists and other extremists to gain footholds in Muslim communities throughout Southeast Asia, particularly in Indonesia and the Philippines. The Committee believes that community development programs, including those focusing on health and education, and economic development, deter the ability of terrorists to gain a foothold in these communities, and may dissuade Muslim students from seeking educational opportunities in radical institutions both at home and abroad.

The Committee requests the State Department to submit a report within 60 days after the enactment of this Act detailing its strategy to implement educational programs in Indonesia that can help mitigate the influ-

ence of extremist boarding schools. In addition, the Committee recommends that not less than \$5,000,000 be made available in this Act to bolster and support ongoing programs in the southern Philippines that seek to undermine the social, economic, and political environments in which extremism may take root.

WAR CRIMES TRIBUNALS

The Committee continues to strongly support the war crimes tribunals in Yugoslavia, Rwanda, and Sierra Leone. The Committee expects the administration to ensure that the tribunals have sufficient budgets, staff, and equipment, and provides \$30,000,000 in drawdown authority for war crimes tribunals established or authorized by the U.N. Security Council with U.S. support, including the tribunal in Sierra Leone. The Committee also urges the administration, where appropriate, to support commissions or judicial bodies that complement the activities of these tribunals. The Committee notes that drawdowns made under this section are unrelated to the establishment of an international criminal court.

TRANSPARENCY AND ACCOUNTABILITY

The Committee is concerned that the governments of many countries that receive assistance from the United States do not accurately report revenues from the extraction of natural resources such as oil, natural gas, mining and timber, and from other sources such as tax receipts. In some countries such as Angola, billions of dollars in oil revenues have reportedly been stolen by corrupt officials, while the United States and other donors have expended similar amounts to provide food and medical care to the impoverished Angolan people.

The Committee believes that public disclosure of this information, which is common practice in developed countries, is basic to good governance, and that governments that receive assistance from the United States should adopt similar disclosure practices. Absent such disclosure, United States tax dollars may in effect be offsetting the ill-gotten gains of corrupt foreign officials. Therefore, the Committee has included a provision which requires the Secretary of State to submit a detailed report on the public disclosure of revenues by governments which receive assistance from the United States. The Committee will consider this report in its deliberations on the administration's fiscal year 2004 budget request.

IRAQ OPPOSITION

The Committee supports activities targeted toward bringing about a transition to democracy in Iraq, and commends, in particular, the "Future of Iraq" program. The Committee is pleased that the administration is working with Iraqi nationals from civil society, ex-military officers, international experts, and representatives from a multitude of NGOs to establish political pluralism and the rule of law in a post-Saddam Iraq. The Committee supports the State Department Inspector General's efforts to bring increased transparency and accountability to this program.

In addition to other Iraqi opposition programs, the Committee recognizes efforts to improve educational programs at the Universities of Sulaimani, Dohuk, and Irbil, to continue development efforts in parts of Northern Iraq that are not under the control of Saddam Hussein's government. The Committee recommends that the administration consider providing funding to these universities in order to support a range of initiatives, including expanding the availability of information technologies, learning materials, and university-sponsored literacy programs.

DEMOCRACY, TRANSPARENCY, AND THE RULE OF LAW IN MUSLIM COUNTRIES

The Committee provides \$20,000,000 for programs and activities which foster democracy, human rights, civic education, women's development, press freedoms, and the rule of law in countries with a significant Muslim population. The Committee has also provided the authority for the funding of programs and activities to support the advancement of democracy and human rights in Iran. Of these funds, the Committee provides \$10,000,000 for the Human Rights and Democracy Fund of the Bureau of Democracy, Human Rights and Labor. The Committee also provides \$3,000,000 for professional training for journalists.

FREE AND INDEPENDENT MEDIA

The Committee strongly supports programs to promote free, independent and professional media in developing nations. The Committee expects USAID and the State Department to fund new, and bolster ongoing, media programs and activities in predominantly Muslim countries, including Afghanistan, Pakistan, Egypt and Indonesia. The Committee expects that funding will be used primarily to support programs that provide skills development and promote a deeper understanding of the United States. The Committee believes that free, independent and professional media will provide objective news and credible information throughout the Muslim world, which may help to counterbalance political and religious extremism and terrorism.

CONFLICT DIAMONDS

The Committee strongly supports the efforts of the administration, non-governmental organizations, and the diamond industry to establish the Kimberly Process Implementation Scheme (KPIIS), an international regime aimed at stopping the trade in "conflict diamonds" which has been used to finance brutal conflicts in Africa and international terrorist organizations. The Committee notes that KPIIS will come into effect in early 2003, and is aware that African nations will need assistance to help set up their certification processes and enforcement mechanisms. The Committee has been informed that a major diamond producing nation has already asked the administration for assistance to implement KPIIS and expects that there could be similar requests for other nations. The Committee has, therefore, provided \$3,500,000 for these purposes.

In addition, to help combat the numerous, well-documented problems associated with the trade in conflict diamonds that have plagued Sierra Leone and other parts of Africa, the Committee has included language, similar to last year, concerning conflict diamonds.

The Committee also directs the Secretary of State, no later than 120 days after enactment of the Act, to submit a report that identifies: (1) countries that have exported rough or polished diamonds to the United States that are implementing effective measures to curtail the trade in conflict diamonds (and include a description of such measures); (2) countries that have failed to implement effective measures to curtail the trade in conflict diamonds; and (3) a description of additional U.S. financial, technical, or other measures which could help countries implement effective measures to curtail the trade in conflict diamonds, including technological means for determining the origin of diamonds and tracking the trade in diamonds.

PARTNERSHIP TO ELIMINATE SWEATSHOPS

The Committee supports the Partnership to Eliminate Sweatshops, which facilitates cooperation among corporations, consumers,

non-governmental organizations, universities, organized labor, and others to address unacceptable working conditions around the world through a variety of approaches. The Committee recommends that \$5,000,000 be made available for this program.

ASSISTANCE FOR EASTERN EUROPE AND THE BALTIC STATES

Appropriations, 2002	\$621,000,000
Budget estimate, 2003	495,000,000
Committee recommendation	530,000,000

The Committee provides \$530,000,000 for Eastern Europe and the Baltic States, which is \$35,000,000 above the administration's fiscal year 2003 request but \$91,000,000 below the fiscal year 2002 level. While the Committee supports and encourages the graduation of countries from receiving U.S. foreign assistance, several countries in this region, which are vital to U.S. interests, continue to require substantial support to further implement critically needed democratic reforms and to promote economic development. The Committee expects that of the additional funds provided, Bosnia-Herzegovina, Serbia, Macedonia, and Kosovo will receive assistance above the fiscal year 2003 requested levels. The Committee also notes the progress that the Baltic States have made in implementing reforms and strengthening the rule of law, and recommends that \$5,000,000 be provided to the Baltic States.

INTERNATIONAL LEGAL AND ECONOMIC INITIATIVES

The Committee notes the efforts by the American Bar Association (ABA) to strengthen democracy through programs that promote the rule of law in Central and Eastern Europe. The Committee recommends that USAID support these ABA-CEELI projects, especially in Belarus, Bosnia, and Kosovo. The Committee also notes the work of the International Real Property Foundation in the region.

The Committee notes the work of the Center for Economic Research and Graduate Education Institute, which promotes economic growth and reform in Central and Eastern Europe.

KOSOVO

The Committee continues to support reconstruction, reform, and reconciliation efforts in Kosovo, and expects that not less than \$100,000,000 should be made available for assistance for Kosovo under the heading "Assistance for Eastern Europe and the Baltic States". The Committee has also provided \$2,000,000 to support the National Albanian American Council's training program for Kosovar women.

SERBIA

The Committee recommends up to \$115,000,000 for assistance for Serbia for fiscal year 2003. The Committee remains committed to assisting reformers in the Republic of Serbia as they continue to recover from the devastation of the Milosevic era. The Committee is pleased that Kosovo-Albanian political prisoners have finally been released, and that selected persons indicted by the International Criminal Tribunal for the former Yugoslavia (ICTY) have surrendered and/or been transferred to The Hague. The Committee strongly encourages further economic, political, and legal reforms, and intends to closely follow the development of a free and independent media.

The Committee notes, however, that while Milosevic has been out of office since October 5, 2000, many of his unfortunate legacies continue, including an unreformed State security apparatus and military, a politicized judiciary, and political and financial support to hardliners in Bosnia's Republika Srpska

and northern Kosovo. The Committee provides \$750,000 for programs to promote reconciliation between ethnic groups throughout the region, and expects that USAID will adequately fund programs that educate the people of Serbia on past crimes committed by the Milosevic regime.

While the Committee notes some progress in Serbia's cooperation with the ICTY, such as the issuance of arrest warrants for indictees, the Committee is very concerned that a predictable, consistent record of cooperation has not yet been established. Federal Yugoslav officials continue to flaunt the authority of the ICTY. The pace of surrenders and transfers of indictees, the continuing freedom of several notorious indictees, and highly circumscribed access to documents and witnesses, suggests that conditioning U.S. assistance is still, regrettably, necessary. It is unacceptable that, according to reliable reports, General Ratko Mladic, who is among those most responsible for the brutality that terrorized the people of the former Yugoslavia during much of the 1990s, continues to live freely in Serbia. Other credible reports indicate that Radovan Karadzic, the former Bosnian Serb leader responsible for the slaughter of thousands of Bosnian Muslims and Croats, regularly travels to Montenegro. The Committee has therefore continued, with modifications, the March 31 certification requirement contained in last year's Act.

The Committee remains concerned with reports of linkages between Yugoslav defense companies and Iraq. The Committee recognizes and appreciates the cooperation of government authorities in investigating this matter, and expects the State Department to continue to press for a full accounting of these linkages and to keep the Committee informed of its progress.

ASSISTANCE FOR THE INDEPENDENT STATES OF THE FORMER SOVIET UNION

Appropriations, 2002	\$784,000,000
Emergency supplemental ..	110,000,000
Budget estimate, 2003	755,000,000
Committee recommendation	765,000,000

The Committee provides \$765,000,000 for Assistance for the Independent States of the Former Soviet Union, which is \$19,000,000 below the fiscal year 2002 level but \$10,000,000 above the administration's fiscal year 2003 request.

RUSSIAN FAR EAST

The Committee was pleased to learn that the State Department and USAID provided \$20,617,000 for assistance for Russian Far East programs, which was above the amount earmarked in fiscal year 2002. The Committee has again earmarked these funds and encourages the administration to continue funding at the fiscal year 2002 level.

PUBLIC HEALTH PROGRAMS

The Committee is aware of the Primary Health Care Initiative of the World Council of Hellenes, which was instituted in the former Soviet republics to provide desperately needed basic health care. This program, which is alleviating suffering of people through thousands of visits each month, also enhances U.S. relations with these countries. The Committee recommends at least \$2,000,000 for this program in fiscal year 2003.

The Committee continues to follow the work of the Eurasian Medical Education Program of the American College of Physicians, to enhance the medical capabilities of Russian physicians in the treatment of tuberculosis, cardiovascular disease, and diabetes. This exchange program has been carried out in four regions of the Russian Federation, and volunteer American physicians have shared experience and knowledge with their

Russian colleagues to the benefit of the Russian medical profession and the Russian people. The Committee, once again, expresses its support for this program and requests to be consulted regarding future funding for it.

ORPHANS

The Committee continues to support USAID's Russian orphans strategy, which focuses on programs to reduce the number of children entering state orphanages and works with orphanage officials to meet the immediate medical and basic needs of these children. The Committee applauds the work of Holt International Children's Services, Kidsave International, and Mercy Corps International.

The Committee expects USAID to work with non-profit groups, especially those with contacts in the Russian Far East, including Rotary International, the Anchorage Interfaith Council, and the Municipality of Anchorage. The Committee recommends \$4,000,000 for this program in fiscal year 2003.

EDUCATIONAL EXCHANGES

The Committee recommends up to \$5,000,000 for the Russian, Eurasian, and East European Research and Training Program (Title VIII).

The Committee continues to support the East Central European Scholarship Program, with its emphasis on providing training for participants from the countries of southeast Europe.

The Committee supports continued funding for exchanges with secondary school educators, particularly the Partners in Education and Teaching Excellence Awards programs and the Secondary School Excellence program. The Committee encourages the administration to consider supporting these programs.

The Committee also recognizes the efforts by the American Councils for International Education and the Institute for Experimental Learning to begin a program to bring individuals from Central Asia to participate in internships. The Committee recommends that USAID and the State Department consider supporting proposals from these organizations.

LEGAL EDUCATION

The Committee strongly supports distance learning legal education programs that have been initiated in central and eastern Europe. The Committee recommends that USAID expand these programs and urges the Agency to seriously consider undertaking similar efforts in Central Asia.

The Committee also supports continued funding for the Russian American Rule of Law Consortium, an outgrowth of the successful Vermont/Karelia Rule of Law Project, which promotes the development of the rule of law in the Russian Federation. The Consortium manages a growing number of partnerships between the legal communities in other U.S. states and Russian regions.

VIOLENCE AGAINST WOMEN

The Committee, once again, commends USAID, the State Department, and the Justice Department for its programs to reduce domestic violence in Russia. As in prior years, the Committee believes the administration should continue to consult closely with and provide direct support to the Russian Association of Crisis Centers for Women to further strengthen local capacity to respond to this endemic problem. Emphasis should be given to strengthening police and prosecutorial capacity in this area. In addition, American grant recipients, including police trainers, should have expertise in domestic violence issues, and Russian NGOs should be consulted in the design, evaluation, and monitoring of these programs. The

Committee recommends funding for these activities at not less than the current level, and requests the State Department to submit a report by July 1, 2003, summarizing the actions taken, results to date, and future plans for this initiative.

ARMENIA

The Committee provides \$90,000,000 under the heading "Assistance for the Independent States of the Former Soviet Union" and \$3,000,000 under the heading "Foreign Military Financing" for assistance for Armenia. The Committee recommends that a portion of the FMF assistance provided for Armenia be used to enhance communications capabilities. The Committee recommends \$750,000 for Armenia under the heading "International Military Education and Training."

The Committee encourages the efforts of the administration, the Minsk Group, and all parties to the Nagorno-Karabakh conflict to continue negotiations toward a peaceful resolution of the dispute. The Committee supports a mutually acceptable negotiated solution, and continues to endorse confidence-building measures among all parties to the conflict, which may include such activities as joint commissions relating to water resources, refugee resettlement, landmine clearance, and joint activities relating to parliamentary, journalist, and rule of law training. The Committee encourages Turkey to reconsider establishing a rail link between Kars, Turkey and Gyumri, Armenia. The Committee believes that such action would make a positive contribution to America's efforts to prevent and respond to international terrorism and the economic development of both Turkey and Armenia. The Committee encourages the State Department and USAID to consider utilizing the American University of Armenia as a learning center for students from the region.

The Committee is aware of the proposed CANDEL project for Armenia. As the scope of the project far exceeds that of more traditional assistance programs, the Committee recommends that the project's sponsors, the State Department, and relevant Armenian officials continue discussions on the economic viability of CANDEL, including, in particular, issues relating to its sustainability absent assistance from the United States. Given scarce resources within the FSU account, the Committee recommends that continued funding for the project's study be made available from assistance provided for Armenia in this Act.

UKRAINE

The Committee remains concerned with reports of Ukraine's covert transfer of the Kolchuga radar system to Iraq. The Committee encourages the State Department and other Federal authorities to continue to determine if this transfer took place, and calls for greater cooperation by Ukrainian authorities in this endeavor.

While the Committee believes that the independence and sovereignty of Ukraine is of crucial strategic importance to the United States and stability in Europe, the Committee condemns President Leonid Kuchma's increasingly autocratic rule. The Committee notes that under the leadership of President Kuchma, Ukrainian opposition activists have been intimidated and harassed, and journalists murdered. In addition, the Committee remains concerned with an investment climate that is less than favorable to foreign businesses, particularly the lack of transparent and fair resolution of business disputes.

The Committee believes that substantial assistance should be provided to support reformers pressing for much needed political, legal, and economic reforms. The Committee endorses increased funding for U.S. non-

governmental organizations seeking to strengthen democracy and the rule of law in Ukraine.

The Committee provides that not less than \$30,000,000 shall be made available for nuclear reactor safety initiatives, which are in the national security interests of the United States. The Committee also provides that not less than \$3,000,000 shall be made available for coal mine safety programs and activities in Ukraine. The Committee recommends that \$1,000,000 be made available for the study of the environmental causes of birth defects in Rivne and Volyn oblasts. The Committee also recognizes the growing physical security and environmental threats associated with unexploded ordnance and excess weapons stockpiles in Ukraine, and suggests that the State Department evaluate environmentally-safe, commercially available disposal technologies for demining activities, the clearance of unexploded ordnance, and the destruction of excess weapon stockpiles.

The Committee supports efforts to improve nuclear safety in Ukraine and recognizes the important work of the International Nuclear Safety Program, including the Computer Information Systems component of this program.

GEORGIA

The Committee provides \$87,000,000 for assistance for Georgia, and commends Georgia for its support for U.S. efforts to prevent and respond to international terrorism. The Committee continues to support the enhancement of Georgia's border control capabilities, and appreciates the timely and effective response of Georgian authorities to the unauthorized deployment of Russian troops in the Kodori gorge region last year. As in the past, the Committee remains concerned with the high incidence of corruption in Georgia and the limited progress by Russia in closing military bases in Georgia.

The Committee recommends not less than \$3,000,000 for a small business development project relating to private sector technology start-ups for Georgia.

NAGORNO-KARABAKH

The Committee continues to be concerned about the plight of the victims of the Nagorno-Karabakh conflict, and expects that the remainder of the \$20,000,000 in humanitarian assistance, initially provided in fiscal year 1998, will be promptly disbursed. The Committee expects that should these funds be obligated and expended before the end of fiscal year 2003, up to \$5,000,000 should be made available to address ongoing humanitarian needs in Nagorno-Karabakh.

INDEPENDENT AGENCIES

PEACE CORPS

Appropriations, 2002	\$275,000,000
Budget estimate, 2003	317,228,000
Committee recommendation	285,000,000

The Committee strongly supports the Peace Corps' mission and is receptive to the President's proposal to increase the number of volunteers in the field over the next 5 years. The Committee is concerned, however, that the quality, effectiveness, and security of volunteers may be compromised if this expansion is not carefully planned. The Committee requests more information about the significant decline of volunteers in the field to 5,648 during fiscal year 2002, and is concerned that the Peace Corps may be overly ambitious in budgeting for 8,200 volunteers in the field by the end of fiscal year 2003.

The Committee recommends \$285,000,000 for the Peace Corps, which is a \$10,000,000 increase over last year's level. The Committee is confident that ample resources are being

made available to support a prudent expansion of the number of volunteers, as the fiscal year 2000 budget of \$275,000,000 supported a program of nearly 6,000 volunteers. The Committee looks forward to receiving a comprehensive analysis of how the Peace Corps intends to expand its programs over the next 5 years while maintaining the quality and integrity of its mission.

The Committee is pleased that the Peace Corps has initiated a program in the Democratic Republic of Timor-Leste (formally East Timor) and supports efforts to place additional volunteers there in fiscal year 2003.

AFRICAN DEVELOPMENT FOUNDATION

Appropriations, 2002	\$16,542,000
Budget estimate, 2003	16,689,000
Committee recommendation	17,689,000

The Committee provides \$17,689,000 for the African Development Foundation (ADF). The Committee commends the work of the ADF, which provides critical, small-scale support for projects which benefit some of sub-Saharan Africa's most impoverished communities.

INTER-AMERICAN FOUNDATION

Appropriations, 2002	\$13,106,950
Budget estimate, 2003	14,185,000
Committee recommendation	16,385,000

The Committee provides \$16,385,000 for the Inter-American Foundation (IAF), which is \$3,278,000 above the fiscal year 2002 level. The Committee commends the progress the IAF has made in addressing past management deficiencies.

DEPARTMENT OF STATE

INTERNATIONAL NARCOTICS AND LAW ENFORCEMENT

Appropriations, 2002	\$217,000,000
Emergency supplemental ..	114,000,000
Budget estimate, 2003	196,713,000
Committee recommendation	196,713,000

The Committee provides \$196,713,000 for International Narcotics and Law Enforcement (INL), which is equal to the administration's request. The Committee is perplexed by the administration's decision to cut funding for INL programs in anti-corruption, financial crimes, border controls, and other law enforcement efforts, at a time when the need for these activities is increasingly apparent.

TRAFFICKING IN PERSONS

The Committee provides \$20,000,000 in INL funds for programs and activities to counter trafficking in persons. The Committee remains strongly committed to assisting women and children who are the most innocent victims of this gross human rights violation, which also contributes to the spread of HIV/AIDS. The Committee believes that these funds should be used to combat all three components of anti-trafficking: addressing the root causes of trafficking, protecting and providing services for victims, and prosecuting traffickers. The Committee believes that the issue of human trafficking is sufficiently well-understood that these funds should not be used for additional studies or conferences to assess needs, but rather directed largely to NGOs to implement programs to prevent trafficking, assist victims, and prosecute traffickers.

INTERNATIONAL LAW ENFORCEMENT ACADEMIES

The Committee continues to support the work that the International Law Enforcement Academies (ILEA) provide to the international community. The Committee is pleased that the administration doubled funding for these programs from fiscal year

2001 to 2002, but notes that the administration's request for the ILEA programs has remained constant for fiscal year 2003 even though it is considering opening an additional center in Latin America. The Committee is aware of ongoing discussions on the location of this center, and recommends that the administration consider Southern Mexico as an appropriate site for the establishment of a regional center. The Committee urges the administration to provide adequate resources for each of these centers and to complete a new facility for the Roswell Center as soon as possible. The Committee strongly endorses the participation of the Democratic Republic of Timor-Leste in regional ILEA programs and activities.

MARITIME INTERDICTION

The Committee continues to believe that both the Bahamas and Costa Rica play important roles in combating the flow of illegal narcotics, especially through maritime interdiction. The Committee directs the State Department to submit a report, no later than 120 days after the date of enactment of the Act, on the procurement needs of the governments of the Bahamas and Costa Rica to implement an effective counternarcotics strategy. This report is to examine these needs, including an assessment of the procurement of high speed boats, within the context of the projected budget for counternarcotics programs in fiscal year 2004.

ANDEAN COUNTERDRUG INITIATIVE

Appropriations, 2002	\$625,000,000
Budget estimate, 2003	731,000,000
Committee recommendation	650,000,000

The Committee provides \$650,000,000 for the Andean Counterdrug Initiative (ACI), and the authority for the transfer of up to an additional \$35,000,000 from the "International Narcotics Control and Law Enforcement" account for the ACI. In addition, the Committee provides up to \$88,000,000 from the Foreign Military Financing Program account for equipment and training for the Colombian Armed Forces for pipeline security in Arauca department.

The Committee notes that the expectations of "Plan Colombia" remain high, particularly with respect to international donor contributions, coca and poppy eradication, and alternative development activities. The Committee is aware that efforts to eradicate coca and poppy cultivation are hampered by Colombia's ongoing civil war, and recognizes the nexus between those involved in the narcotics trade and in guerrilla warfare against the Colombian people. The Committee provides the authority, requested by the administration, to support Colombia's unified campaign against narcotics trafficking and paramilitary and guerrilla terrorist organizations.

The Committee appreciates the determination of President Uribe to improve Colombia's security situation and his commitment to eradicate illicit drug cultivation. The Committee notes that since taking office earlier this year, President Uribe has devoted more resources to the military than previous administrations, imposed a tax upon the wealthiest Colombians in an effort to raise \$800,000,000, and submitted a budget for 2003 that boosts security spending for the police. The Committee cautions that with these welcomed increases—which evidences the Colombian Government's renewed will to tackle its most pressing challenges—must come greater vigilance to protect and defend the human rights and dignity of the Colombian people.

The Committee has again included conditions tying the obligation of funds to

progress on human rights, and on the aerial spraying of herbicide. The Committee has also retained its limits imposed in fiscal year 2001 on the number of U.S. military on duty, and U.S. civilian personnel employed, in Colombia.

As the Committee believes that viable alternative sources of income for coca and poppy farmers are essential for the sustainable eradication of illicit crops, it provides \$225,000,000 for USAID alternative development programs and activities.

The Committee condemns the abuses of human rights by all parties to the conflict, particularly paramilitaries and the FARC who are responsible for the large majority of atrocities against civilians. The Committee expects the Colombian Government to hold accountable government and military officials who violate human rights, and to ensure that all government agencies and organizations are fully committed to prosecuting those who violate the law.

As the Committee believes that a special unit of the Colombian Armed Forces should be dedicated to the apprehension of the leaders of paramilitary organizations, it has included authority and funding from the "International Narcotics Control and Law Enforcement" and "Foreign Military Financing Program" accounts to train and equip such a unit.

The Committee is aware of an initiative in Colombia, the Colombia Military Project, which promotes dialogue and analysis among civilians and retired military officers about the conflict and the implications of peace processes for the Armed Forces. Topics include a cease fire, decommissioning of weapons, demobilization, and the reinsertion into civil society of ex-combatants. Given that any successful peace process requires the active support of the Armed Forces, the Committee believes that the State Department should seriously consider providing financial support to the Colombia Military Project.

The Committee is increasingly concerned that developments in Colombia may lead to a significant spill-over of refugees, insurgents, and narcotics traffickers into the territory of Colombia's neighbors, and expects the administration's allocation of resources for the Andean Counterdrug Initiative to reflect these volatile conditions.

The Committee is aware of Colombia's extraordinary national parks and reserves, which encompass some of the world's most biologically diverse tropical forests. These areas, which are among Colombia's greatest natural resource and a potential source of income from eco-tourism, are increasingly threatened by coca farmers and illegal loggers. The Committee provides \$3,500,000 for training, equipment and other assistance to protect these parks and reserves.

The Committee is concerned that PLANTE has not followed through on its pledge to provide some \$700,000 in fiscal year 2002 funds to the Colombian National Park Service to support coca eradication activities in communities located adjacent to several national parks. The Committee is aware that \$150,000 was provided for planning purposes. The Committee believes that this program is important to the economic development of the communities involved and to the protection of these threatened natural areas, and expects the additional funds to be provided expeditiously.

MIGRATION AND REFUGEE ASSISTANCE

Appropriations, 2002	\$705,000,000
Budget estimate, 2003	704,565,000
Committee recommendation	787,000,000

In fiscal year 2002, the Committee reduced the amount provided for Migration and Refugee Assistance (MRA) because an additional

\$100,000,000 had been provided in supplemental funding. At that time, the Committee clearly stated that this reduction was not to be interpreted as a lack of support for the MRA account or to be used as a baseline when formulating the fiscal year 2003 request. Thus, the Committee is disappointed with the amount that the administration requested for this account.

The Committee recognizes that, even with supplemental funding, the crisis in Afghanistan has severely strained the MRA budget. In addition, a number of other urgent humanitarian crises around the world, including those in Africa, southeast Asia, the North Caucasus, and Colombia, have left millions of people at risk of starvation, exposure, and disease. Therefore, the Committee provides \$787,000,000 for the Migration and Refugee Assistance account.

RESETTLEMENT IN ISRAEL

The Committee provides \$60,000,000 for the resettlement of migrants from the former Soviet Union, Eastern Europe, and other areas to Israel. This is equal to the amount appropriated in fiscal year 2002. The Committee notes that while Israel has accepted more than 1 million refugees since 1989, over the past year there has been a modest decline in the number of refugees from the former Soviet Union resettling in Israel. Should this decline continue, the Committee anticipates that funding for this program will be decreased in fiscal year 2004.

UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES

The Committee strongly supports the work of the United Nations High Commissioner for Refugees (UNHCR), which provides assistance to millions of refugees and internally displaced persons. The Committee is deeply concerned by the large budget shortfall that currently confronts UNHCR, and while the Committee commends UNHCR for making a number of necessary spending reductions, it is alarmed that this shortfall is beginning to adversely impact field operations in a number of regions.

The Committee has, therefore, increased funding for the Migration and Refugee Assistance account with the expectation that the United States will increase its contribution to UNHCR should the need arise. However, the Committee notes that U.S. contributions now exceed 25 percent of the total UNHCR budget and that other international donors are not contributing sufficient amounts or following through on outstanding pledges. The Committee urges UNHCR to use the U.S. contribution to leverage additional support from other nations.

The Committee continues to be concerned by allegations that refugees in Africa were sexually abused by employees of UNHCR and nongovernmental organizations in the field. While the Committee recognizes that the United Nations has initiated an investigation and implemented measures to prevent a recurrence, including hiring protection staff, the Committee urges the United Nations to ensure that its investigation is thorough and completed in a timely manner, and that those responsible for these acts are punished. The Committee also urges appropriate non-governmental organizations to take similar action.

THE UNITED NATIONS RELIEF AND WORKS AGENCY FOR PALESTINE REFUGEES IN THE NEAR EAST

The Committee recognizes the important contribution of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), to provide basic humanitarian services to approximately 3.8 million refugees in the region. The Committee is concerned, however, with reports

that some individuals involved in international terrorism have come from refugee camps administered by UNRWA. The Committee urges UNRWA to cooperate with efforts to prevent and respond to acts of international terrorism.

TIBETAN REFUGEES

Like last year, the Committee supports continued funding to assist Tibetan refugees and recommends \$2,000,000 for this purpose. The Committee, again, requests that the State Department coordinate with USAID in determining responsibility for long term assistance for Tibetan refugees.

REFUGEES AND INTERNALLY DISPLACED PERSONS IN AFRICA

The Committee notes the dire situation of the more than 4 million refugees and IDPs throughout Africa living in deplorable conditions. The Committee urges the administration to work with international organizations, including the World Food Program and UNHCR, as well as other governments to provide additional assistance to the region in fiscal year 2003.

EMERGENCY REFUGEE AND MIGRATION ASSISTANCE FUND

Appropriations, 2002	\$15,000,000
Budget estimate, 2003	15,000,000
Committee recommendation	32,000,000

The Committee notes that the Emergency Refugee and Migration Assistance (ERMA) fund has been drawn down several times over the past year. The Committee is concerned that, despite some supplemental funding, the ERMA account has been reduced to substantially lower than anticipated levels. The Committee provides \$32,000,000 for ERMA, which is \$17,000,000 more than the amount requested.

NONPROLIFERATION, ANTI-TERRORISM, DEMINING, AND RELATED PROGRAMS

Appropriations, 2002	\$313,500,000
Emergency supplemental ..	83,000,000
Budget estimate, 2003	372,400,000
Committee recommendation	306,400,000

The Committee provides \$306,400,000 for the Nonproliferation, Anti-terrorism, Demining, and Related Programs account. The Committee continues its strong support for these programs which are critical to efforts by the United States to combat the proliferation of weapons of mass destruction, prevent and respond to international terrorism, and help improve border security.

COMPREHENSIVE TEST BAN TREATY PREPARATORY COMMISSION

The Committee provides \$17,300,000 for a contribution to the Comprehensive Test Ban Treaty Preparatory Commission. These funds help leverage donations from other nations for the International Monitoring System, which is designed to collect data from seismic, hydroacoustic, infrasound, and radionuclide stations around the world, enhancing U.S. capabilities for detecting and monitoring nuclear tests.

INTERNATIONAL ATOMIC ENERGY AGENCY

The Committee is concerned that the request for a contribution to the International Atomic Energy Agency (IAEA) is insufficient, as the IAEA is facing increasing demands on its budget to execute a range of programs that are critical to U.S. security interests. The Committee provides \$4,400,000 above the amount requested for the IAEA.

KOREAN PENINSULA ENERGY DEVELOPMENT ORGANIZATION

As North Korea both violated and withdrew from the Agreed Framework, the administration informally informed the Com-

mittee that it was rescinding the \$75,000,000 request for the Korean Peninsula Energy Development Organization (KEDO).

The Committee, therefore, has restricted funding for KEDO in this Act. The President may waive this restriction and provide up to \$3,500,000 to KEDO for administrative expenses only if he determines, and provides a written policy justification to the appropriate congressional committees, that it is vital to national security interests to do so.

HUMANITARIAN DEMINING

The Committee supports the State Department's Humanitarian Demining Program to clear landmines and other unexploded ordnance that continue to endanger people in over 60 countries. The Committee provides \$57,000,000 for these activities. Of this amount, up to \$10,000,000 may be made available for the Slovenia Trust Fund, on a dollar-for-dollar matching basis.

The Committee notes that the State Department has developed about 30 public-private partnerships with nongovernmental organizations, foundations, and private companies, in support of mine action activities. To maximize the effectiveness of these public-private partnerships, the State Department needs the ability to enter into grants and cooperative agreements. The grant process would allow the Government and the private sector grantee to enter into a partnership to achieve shared objectives such as training demining personnel and mine-detecting dogs; developing training materials and mine risk education materials that teach children and adults how to recognize, report and avoid landmines; and research and development into new technologies to increase the effectiveness and speed of detecting and removing landmines. To the maximum extent feasible, grants and cooperative agreements should be used to support mine action activities of nongovernmental organizations. The State Department is to implement this authority in compliance with all statutory and regulatory guidelines governing grants and cooperative agreements.

The Committee notes that several country recipients of demining funds from the NADR account also receive large amounts of assistance from the ESF, SEED, or FSU accounts. The Committee is concerned about pressures on the NADR budget which contains a limited amount of humanitarian demining funds, and believes that demining programs in these countries should be funded jointly from both NADR and these other accounts.

SMALL ARMS AND LIGHT WEAPONS

The Committee is aware that small arms and light weapons, including mortars, rocket propelled grenades, and heavy machine guns, have been used by international terrorist organizations, contributed to human rights violations, fueled conflicts, and impeded development efforts. The Committee provides \$4,000,000 in fiscal year 2003 for the Small Arms Destruction Initiative, which provides assistance to countries that have requested help in eliminating stockpiles of these weapons. This is \$1,000,000 above the fiscal year 2002 level.

DEPARTMENT OF THE TREASURY

INTERNATIONAL AFFAIRS TECHNICAL TRAINING	
Appropriations, 2002	\$6,500,000
Budget estimate, 2003	10,000,000
Committee recommendation	10,500,000

The Committee strongly supports the Department of the Treasury's International Affairs Technical Assistance program and provides \$10,500,000 for fiscal year 2003. This amount is \$500,000 above the budget request and the fiscal year 2002 level. The Committee appreciates the responsiveness of the Treas-

ury Department to Committee requests for information concerning its international affairs programs.

TITLE III

MILITARY ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT INTERNATIONAL MILITARY EDUCATION AND TRAINING

Appropriations, 2002	\$70,000,000
Budget estimate, 2003	80,000,000
Committee recommendation	80,000,000

The Committee continues its strong support for the International Military Education and Training (IMET) program and provides \$80,000,000 for this account. The Committee believes that, by capitalizing on the worldwide respect for the U.S. Armed Forces, the IMET program offers a unique opportunity to establish important contacts with foreign militaries and promote American values.

The Committee recognizes that absent a political commitment on the part of foreign governments to support reforms within their militaries—including those promoting greater accountability and civilian oversight—IMET's impact may be limited. The Committee believes that in those countries where military reform is not a priority, but where IMET programs are conducted in the security interests of the United States, the administration should make clear that the provision of IMET is not a broad or general endorsement of a foreign government's or military's actions.

The Committee directs the State Department, in conjunction with the Department of Defense, to provide a report not later than 120 days after enactment of the Act, containing the number of civilians from non-governmental organizations that participated in the IMET program during fiscal year 2002. The report should also include the professional backgrounds of these individuals, their nationality, and the type of IMET program in which they participated.

The Committee is aware that previously enacted legislation, including the Security Assistance Act of 2000 (Public Law 106-280), authorized assistance levels above the administration's fiscal year 2003 request for IMET assistance for Greece and Turkey and encouraged joint training of Greek and Turkish officers to the maximum extent practicable. The Committee continues to be supportive of these initiatives, which could help strengthen ties between two important NATO allies, and encourages the administration to fund these programs at the highest appropriate level.

FOREIGN MILITARY FINANCING

GRANT PROGRAM LEVEL

Appropriations, 2002	\$3,650,000,000
Emergency supplemental ..	357,000,000
Budget estimate, 2003	4,107,200,000
Committee recommendation	4,072,000,000

The Committee provides \$4,072,000,000 in Foreign Military Financing grant programs for fiscal year 2003. This is \$422,000,000 above the fiscal year 2002 allocation, and \$35,200,000 below the administration's request.

MIDDLE EAST COUNTRIES

The Committee provides the administration's request of \$2,100,000,000 in FMF for Israel and \$1,300,000,000 for Egypt. The Committee also provides the request level of \$198,000,000 for Jordan.

TURKEY

The Committee supports military assistance for Turkey without the 10-to-7 ratio of assistance to Greece, because these funds

will be used only to support Turkey's command of the International Security Assistance Force in Afghanistan and for its military role, in cooperation with the United States and Greece, in Operation Enduring Freedom and other efforts against international terrorism.

THE PHILIPPINES

Recognizing the efforts and determination of the Philippines to combat terrorism, the Committee provided increased Foreign Military Financing program funds for the archipelago in the supplemental appropriations bill. The Committee notes with appreciation the cooperation between the United States and the Philippines to counter terrorism, and again recommends increased Foreign Military Financing assistance above the administration's request of \$20,000,000.

BALTIC STATES

The Committee continues to endorse the measures that Lithuania, Latvia, and Estonia have taken to bring their militaries in line with Western standards. The Committee strongly supports full funding of the administration's request for IMET and FMF for the Baltic States.

TUNISIA

The Committee supports the administration's request of \$5,000,000 in FMF and \$1,500,000 in IMET assistance for Tunisia.

FOREIGN MILITARY TRAINING REPORT

The Committee commends the administration's efforts to improve the transparency and accessibility of the fiscal year 2001–2002 Foreign Military Training Report. The Committee expects next year's report to be similar in content and in the amount of information that is classified, including information on training activities by civilian contractors funded by the U.S. Government. The Committee expects to be consulted on the format and contents of the report, if the administration anticipates making significant changes in its format or content.

PATROL BOATS

The Committee recommends \$5,000,000 for the Government of Malta to purchase additional coastal patrol boats. The Committee also urges the Administration to seriously consider a request from the Government of El Salvador to purchase additional high-speed, aluminum patrol boats.

NON-LETHAL EQUIPMENT

The Committee is concerned that, too often, foreign soldiers and law enforcement officials, because they lack the proper training and equipment, have failed to deal effectively with civil unrest and rioting, resulting in unnecessary bloodshed. The Committee believes that the administration, in consultation with the Committees on Appropriations, should consider providing up to \$7,000,000 from the "Foreign Military Financing Program" and "International Narcotics Control and Law Enforcement" accounts to help governments train and equip units with non-lethal weapons. This assistance should be provided only after thorough vetting of participants and consistent with existing laws on human rights.

LIMITATION ON ASSISTANCE

The Committee reaffirms its language under this heading in its fiscal year 2002 report (pages 57–58 of Report 107–58). The Committee requests to be consulted by the Bureau for Democracy, Human Rights and Labor on steps taken to establish and maintain a centralized, electronic database of credible evidence of violations by foreign security force units. In addition, in order to implement the law effectively, the Committee expects American embassy officials to take affirmative steps to consult regu-

larly with local security and intelligence agencies, human rights groups, and other reliable sources of information about gross violations of human rights, and to record any relevant information in the embassy database. When credible evidence exists, American embassy officials should contact the local security and justice agencies to ensure that they are aware of the law and the need to bring those responsible to justice.

PEACEKEEPING OPERATIONS

Appropriations, 2002	\$135,000,000
Budget estimate, 2003	108,250,000
Committee recommendation	120,250,000

The Committee remains concerned with the security situation in Afghanistan, and recommends that the administration continue its discussions with international donors on how best to secure a stable environment.

While the changing mission of U.S. troops in Afghanistan will enhance stability in parts of the country, the Committee notes that the primary justification that the administration has used to oppose expanding the mandate of the International Security Assistance Force (ISAF) is its commitment to train the Afghan National Army (ANA). The Committee shares the belief that training the ANA is the only viable way to improve security over the long term, and is pleased by the recent announcement by the Government of Afghanistan that an army of 70,000 will eventually be fielded. However, it is the Committee's understanding that a battle-ready ANA is at least 2 years away, and the Committee strongly urges the administration to consider a wide range of options to deal with the immediate security needs in Afghanistan.

The Committee remains concerned with the funding levels budgeted for training the ANA. The Committee understands that the situation in Afghanistan remains fluid and dynamic, and, therefore, recommends that \$7,000,000 from the "Peacekeeping Operations" account be made available to support efforts to establish an effective Afghan National Army.

The Committee is concerned that the administration's request proposes cuts in important peacekeeping missions in Africa. The Committee recommends that \$10,000,000 of the funds provided above the request should be used to restore some of these reductions.

TITLE IV

MULTILATERAL ECONOMIC ASSISTANCE INTERNATIONAL FINANCIAL INSTITUTIONS

SUMMARY

Appropriations, 2002	\$1,174,796,000
Budget estimate, 2003	1,437,097,000
Committee recommendation	1,329,097,000

The Committee recommends the total amount of paid-in capital funding shown above to provide for contributions to the International Development Association, Multilateral Investment Guarantee Agency, the Global Environment Facility (GEF), the Inter-American Development Bank's Inter-American Investment Corporation and Multilateral Investment Fund, the Asian Development Fund, the African Development Bank and Fund, the European Bank for Reconstruction and Development, and the International Fund for Agriculture Development.

World Bank.—The Committee continues to follow the World Bank's efforts to reform its internal grievance procedures. Despite some progress, it remains apparent that as long as the Bank and the other international financial institutions are immune from the court

process, they need to do more to ensure that complaints are independently investigated and adjudicated in accordance with due process, and that managers are punished for misconduct, especially retaliation. The Committee is particularly concerned with the professionalism of the Bank's legal department, and questions its ability to carry out its responsibilities fairly and effectively. Among other things, the Bank's lawyers have expended resources prolonging cases that should have been resolved quickly, or defended management when it would have been in the interests of the institution to represent the complainants, who often cannot afford lawyers of their own.

World Commission on Dams.—The Committee is concerned with the World Bank's failure to formally adopt the guidelines recommended by the World Commission on Dams (WCD), whose report, "Dams and Development," addresses a complex, controversial subject in a balanced way, including proposing comprehensive, practical and innovative guidelines for future action. The Committee again urges the Bank to continue to engage with the full range of interested parties in the implementation of the WCD's report, and to integrate these guidelines to the fullest extent practicable into the Bank's relevant operational policies and directives, including those relating to resettlement, environmental assessment, and water and energy policies.

International Monetary Fund.—The Committee remains concerned that the IMF has not implemented many of the recommendations of its 1994 Working Group on the Status of Women, especially those aimed at increasing the number of women in managerial positions. Last year, the Committee urged the IMF to obtain an updated regression analysis to determine what further steps are needed to correct persistent gender disparities in hiring and promotion. Regrettably, the IMF has failed to do so.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

INTERNATIONAL DEVELOPMENT ASSOCIATION

Appropriations, 2002	\$792,400,000
Budget estimate, 2003	874,338,333
Committee recommendation	837,338,333

GLOBAL ENVIRONMENT FACILITY

Appropriations, 2002	\$100,500,000
Budget estimate, 2003	177,813,533
Committee recommendation	177,813,533

MULTILATERAL INVESTMENT GUARANTEE AGENCY

Appropriations, 2002	\$5,000,000
Budget estimate, 2003	3,631,000
Committee recommendation	1,631,000

The Committee remains concerned about the Bujagali dam proposal and expects to be consulted concerning the U.S. position prior to a vote on this project.

INTER-AMERICAN DEVELOPMENT BANK

INTER-AMERICAN INVESTMENT CORPORATION

Appropriations, 2002	\$18,000,000
Budget estimate, 2003	30,352,000
Committee recommendation	18,351,667

MULTILATERAL INVESTMENT FUND

Appropriations, 2002	
Budget estimate, 2003	\$29,590,667
Committee recommendation	29,590,667

ASIAN DEVELOPMENT BANK

ASIAN DEVELOPMENT FUND

Appropriations, 2002	\$98,017,000
Budget estimate, 2003	147,386,133

Committee recommendation	100,386,133
AFRICAN DEVELOPMENT BANK	
Appropriations, 2002	\$5,100,000
Budget estimate, 2003	5,104,473
Committee recommendation	5,104,473
AFRICAN DEVELOPMENT FUND	
Appropriations, 2002	\$100,000,000
Budget estimate, 2003	118,073,333
Committee recommendation	108,073,333
EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT	
Appropriations, 2002	\$35,779,000
Budget estimate, 2003	35,804,955
Committee recommendation	35,804,955

The Committee notes that Article 1 of the Agreement Establishing the European Bank for Reconstruction and Development (EBRD) states that the Bank's purpose is to foster transition toward market economies in countries that are committed to and applying the principles of multiparty democracy and pluralism. The Committee, therefore, is troubled by the EBRD's decision to hold its annual meeting next year in Tashkent, Uzbekistan, and expects the Treasury Department and the EBRD to use this opportunity to urge the Government of Uzbekistan to meet its commitments under the "Declaration on the Strategic Partnership and Cooperation Framework Between the Republic of Uzbekistan and the United States of America", by ensuring respect for human rights and freedoms, building a multiparty democracy, and implementing judicial and legal reforms.

INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT	
Appropriations, 2002	\$20,000,000
Budget estimate, 2003	15,003,667
Committee recommendation	15,003,667

The Committee recommends \$15,003,667 for a contribution to the International Fund for Agricultural Development (IFAD) and expects the United States to continue its strong support of IFAD during negotiations for the 6th replenishment of IFAD.

The Committee is supportive of the IFAD's new rural finance policy, and encourages IFAD to coordinate more effectively with co-operative development organizations in the United States to build sustainable, member-owned cooperatives and credit unions.

The Committee also supports IFAD's continuing participation in the enhanced Heavily-Indebted Poor Countries (HIPC) initiative. The Committee recommends that the administration explore ways to ensure that IFAD's continued participation in the enhanced HIPC initiative will not detract from its capacity to manage its development programs.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS	
Appropriations, 2002	\$208,500,000
Budget estimate, 2003	310,400,000
Committee recommendation	215,000,000

The Committee provides \$215,000,000 for the "International Organizations and Programs" account. This amount does not include funding for the Korean Peninsula Energy Development Organization and the International Atomic Energy Agency.

UNITED NATIONS FUND FOR VICTIMS OF TORTURE

The Committee continues to support the United Nations Fund for Victims of Torture and recommends a U.S. contribution of \$5,000,000 in fiscal year 2003. The Committee

is aware that this Fund supports nearly 100 treatment programs and projects for victims of torture in over 50 countries. The Committee urges the State Department to seek additional contributions from other governments for the Fund.

INTERNATIONAL EFFORTS TO COMBAT THE ILLICIT TRADE IN SMALL ARMS AND LIGHT WEAPONS

The Committee directs the Secretary of State, no later than 120 days after the date of enactment of the Act, to transmit a report describing the activities undertaken, and the progress made, by the Department of State or other agencies and entities of the U.S. Government in implementing the goals of the Program of Action of the 2001 United Nations Conference on the Illicit Trade in Small Arms and Light Weapons in All Its Aspects.

UNITED NATIONS POPULATION FUND

Last year, the President requested \$25,000,000 for the U.N. Population Fund (UNFPA), based on a February 2001 determination by the State Department that the UNFPA's program in the People's Republic of China was not in violation of the "Kemp-Kasten Amendment" which prohibits United States funds to any organization or program which "supports or participates in the management of a program of coercive abortions or involuntary sterilization."

After lengthy negotiations and a series of comprises, the House and Senate approved up to \$34,000,000 for UNFPA. The Statement of the Managers accompanying the fiscal year 2002 Foreign Operations Conference Report made clear that the Congress intended to provide \$34,000,000 for UNFPA. Congress also continued the prohibition on the use of United States funds in China.

Allegations that UNFPA was in violation of Kemp-Kasten prompted the administration to withhold disbursement of the fiscal year 2002 funds for UNFPA and to dispatch a 3-member investigative team to China in April. The Committee commends the administration for its efforts to investigate these allegations, and deplores the coercive aspects of China's family planning program which are violations of human rights.

As the administration is in the process of working with UNFPA and the Chinese Government in an attempt to resolve this matter, the Committee has provided that funds appropriated in this Act, and in Public Law 107-115 that were available for the UNFPA, shall be made available to the UNFPA if the Secretary of State determines that UNFPA no longer participates in the management of a program of coercive abortion or involuntary sterilization.

The Committee has continued its prohibition on the use of funds made available to UNFPA in the People's Republic of China.

UNITED NATIONS ENVIRONMENT PROGRAM

The Committee has provided \$12,025,000 for a United States contribution to the United Nations Environment Program, which plays a key role in addressing a wide range of environmental problems, including ozone depletion, the unsafe use of toxic chemicals, and land-based and marine pollution. The Committee recognizes that UNEP's activities are complimentary to U.S. interests in protecting the global environment, and believes the United States should more strongly support UNEP.

WORLD FOOD PROGRAM

Traditionally, the Committee has provided funds for costs associated with the delivery and management of U.S. food donations to the World Food Program in the Foreign Operations, Export Financing, and Related Programs Appropriations Act. In its fiscal year 2003 budget, the administration requested

funds for this purpose in the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act. The Committee prefers to continue its past practice, and provides \$6,000,000 for the World Food Program.

The Committee is extremely concerned with the food security crisis in sub-Saharan Africa, where a combination of adverse climate conditions, mismanagement of grain reserves, and questionable government policies, particularly in Zimbabwe, have put approximately 38 million people at risk. The Committee has provided additional funds in the "International Disaster Assistance" and "Migration and Refugee Assistance" accounts to help address this crisis and urges the administration to increase food aid to the region. The Committee urges the administration to request supplemental funding for this purpose.

UNITED NATIONS UNIVERSITY

The Committee is aware that U.N. University contributes, through research and capacity building, to international efforts to address pressing global issues such as food security, environmental degradation, and governance. Rather than a degree-granting institution, U.N. University is an important resource for the United Nations, promoting bridges between the United Nations and the international academic community. The Committee encourages the administration to consider resuming support for U.N. University.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI OF THE STANDING RULES OF THE SENATE

Rule XVI, paragraph 7 requires that every report on a general appropriation bill filed by the Committee must identify each recommended amendment, with particularity, which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.

Items providing funding for fiscal year 2003 which lack authorization are as follows:

Child Survival and Health Programs Fund	\$1,780,000,000
Development Assistance	1,350,000,000
International Disaster Assistance	255,500,000
USAID Operating Expenses	571,087,000
USAID Operating Expenses, Office of Inspector General	33,046,000
USAID Capital Investment Fund	65,000,000
Economic Support Fund	2,250,000,000
Assistance for Eastern Europe and the Baltics	555,000,000
Assistance for the Independent States of the Former Soviet Union	765,000,000
African Development Foundation	17,689,000

Inter-American Foundation	16,385,000
International Narcotics Control and Law Enforcement	196,713,000
Migration and Refugee Assistance	782,000,000
Emergency Migration and Refugee Assistance	32,000,000
Nonproliferation, Anti-Terrorism, Demining and Related Assistance	376,400,000
Treasury Technical Assistance	10,500,000
Debt Restructuring	40,000,000
International Military Education and Training	80,000,000
Foreign Military Financing Program	4,067,000,000
Peacekeeping Operations ..	125,250,000
International Organizations and Programs	230,461,000
International Development Association	837,338,000
Asian Development Fund ..	127,386,000
African Development Fund	108,073,000

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee report on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, the following changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets, new matter is printed in italic, and existing law in which no change is proposed is shown in roman.

With respect to this bill, it is the opinion of the Committee that it is necessary to dispense with these requirements in order to expedite the business of the Senate.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 2002 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR FISCAL YEAR 2003

[In thousands of dollars]

[COMMITTEE PRINT]**[NOTICE: This is a draft for use of the Committee and its staff only, in preparation for markup.]**

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS BILL, 2003

JANUARY ___, 2003.—Ordered to be printed

Mr. BURNS, from the Committee on Appropriations, submitted the following REPORT
[To accompany S. 0000]

The Committee on Appropriations reports the bill (S. 0000) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 2003, and for other purposes, reports favorably thereon and recommends that the bill do pass.

Amounts in new budget (obligational) authority, fiscal year 2003

Total of bill as reported to

Senate \$18,973,625,000

Amounts in new budget (obligational) authority, fiscal year 2003—Continued

Estimates considered by

Senate 18,938,078,000

Above the budget estimate, 2003 35,547,000

Below appropriations, 2002 (including emergencies) 184,145,000

SUMMARY OF BILL

For this bill, estimates totaling \$18,938,916,000 in new obligational authority were considered by the Committee for the programs and activities of the agencies and bureaus of the Department of the Interior, except the Bureau of Reclamation, and the following related agencies:

Department of Agriculture:

Forest Service:

Department of Energy:

Clean coal technology.

Fossil energy research and development.

Naval petroleum and oil shale reserves.

Elk Hills School lands fund.

Energy conservation.

Economic regulation.

Strategic petroleum reserve.

SPR petroleum account.

Energy Information Administration.

Department of Health and Human Services:

Indian Health Service.

Office of Navajo and Hopi Indian Relocation.

Institute of American Indian and Alaska Native Culture and Arts Development.

Smithsonian Institution.

National Gallery of Art.

John F. Kennedy Center for the Performing Arts.

Woodrow Wilson International Center for Scholars.

National Foundation on the Arts and Humanities:

National Endowment for the Arts.

National Endowment for the Humanities.

Challenge America Arts Funds.

Commission of Fine Arts.

Advisory Council on Historic Preservation.

National Capital Planning Commission.

United States Holocaust Memorial Museum.

Presidio Trust.

REVENUE GENERATED BY AGENCIES IN BILL

Oil and gas leasing and other mineral leasing activities, recreation and user fees, the

timber and range programs, and oil production from the naval petroleum reserves are estimated to generate income to the Government of \$6,148,958,000 in fiscal year 2003.

These estimated receipts, for agencies under the subcommittee's jurisdiction, are tabulated below:

Item	Fiscal year—		
	2001	2002	2003
Department of the Interior	\$10,865,661,000	\$6,609,623,000	\$5,719,689,000
Forest Service	424,019,000	420,972,000	422,036,000
Naval petroleum reserves	7,836,000	7,187,000	7,233,000
Total receipts	11,297,516,000	7,037,782,000	6,148,958,000

MAJOR CHANGES RECOMMENDED IN THE BILL

The Committee has developed revisions to the budget estimate for the 2003 fiscal year.

A comparative summary of funding in the bill by agency or principal program in the following table:

[In thousands of dollars]

		Committee recommendation	Committee recommendation compared with budget estimate
Title I—Department of the Interior:			
Bureau of Land Management	1,861,458	+ 36,036	
U.S. Fish and Wildlife Service	1,213,108	- 70,256	
National Park Service	2,286,305	- 69,256	
United States Geological Survey	914,617	+ 47,279	
Minerals Management Service	170,427	+ 100	
Office of Surface Mining Reclamation and Enforcement	297,112	+ 17,710	
Bureau of Indian Affairs	2,267,329	+ 21,525	
Departmental Offices	420,126	- 3,409	
Total, Title I—Department of the Interior	9,430,482	- 20,271	
Title II—Related agencies:			
Forest Service	3,949,824	+ 1,113	
Department of Energy	1,764,243	+ 47,002	
Indian Health Service	2,821,271	+ 5,703	
Office of Navajo and Hopi Indian Relocation	14,491		
Institute of American Indian and Alaska Native Culture and Arts Development	5,130		
Smithsonian Institution	530,960	+ 3,000	
National Gallery of Art	93,449	- 1,000	
John F. Kennedy Center for the Performing Arts	33,910		
Woodrow Wilson International Center for Scholars	8,488		
National Endowment for the Arts	116,489	+ 17,000	
National Endowment for the Humanities	125,754		
Institute of Museum and Library Services			
Challenge America Arts Fund		- 17,000	
Commission of Fine Arts	1,224		
National Capital Arts and Cultural Affairs	7,000		
Advisory Council on Historic Preservation	3,667		
National Capital Planning Commission	7,253		
U.S. Holocaust Memorial Museum	38,663		
Presidio Trust	21,327		
Total, Title II—Related Agencies	9,543,143	+ 55,818	
Grand total, fiscal year 2003	18,973,625	+ 35,547	

CONSERVATION SPENDING CATEGORY

Title VIII of the Interior and Related Agencies Appropriations Act, 2001, created a separate conservation spending category within the Budget Act. Given the expiration of the Budget Act and the absence of formal spending allocations pursuant to a budget resolution, the Committee has not included references to the conservation spending category in this bill. The total funding provided for conservation category programs, however, meets the aggregate total projected for fiscal year 2003.

ACCRAUL FUNDING OF RETIREMENT COSTS AND POST-RETIREMENT HEALTH BENEFITS

The President's Budget included a legislative proposal under the jurisdiction of the Senate Committee on Governmental Affairs to charge to individual agencies, starting in fiscal year 2003, the fully accrued costs related to retirement benefits of Civil Service Retirement System employees and retiree health benefits for all civilian employees. The Budget also requested an additional dollar amount in each affected discretionary account to cover these accrued costs.

The authorizing committee has not acted on this legislation, therefore the Senate Ap-

propriations Committee has reduced the dollar amounts of the President's request shown in the "Comparative Statement of New Budget Authority Request and Amounts Recommended in the Bill", as well as in other tables in this report, to exclude the accrual funding proposal.

The Committee further notes that administration proposals requiring legislative action by the authorizing committees of Congress are customarily submitted in the budget as separate schedules apart from the regular appropriations requests. Should such a proposal be enacted, a budget amendment formally modifying the President's appropriation request for discretionary funding is subsequently transmitted to the Congress.

The Senate Appropriations Committee joins with the House Appropriations Committee in raising concern that this practice, which has always worked effectively for both Congress and past administrations, was not followed for the accrual funding proposal. In this case, the Office of Management and Budget (OMB) decided to include accrual amounts in the original discretionary appropriations language request. These amounts are based on legislation that has yet to be considered and approved by the appropriate

committees of Congress. This led to numerous misunderstandings both inside and outside of Congress of what was the "true" President's budget request. The Committee believes that, in the future, OMB should follow long-established procedures with respect to discretionary spending proposals that require legislative action.

TITLE I—DEPARTMENT OF THE INTERIOR

LAND AND WATER RESOURCES

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LAND AND RESOURCES

Appropriations, 2002	\$775,632,000
Budget estimate, 2003	812,990,000
Committee recommendation	816,062,000

The Committee recommends an appropriation of \$816,062,000, an increase of \$3,072,000 above the budget estimate. The funding amounts described below are at the activity level. Additional details on funding for sub-activities within the various appropriations accounts for the Bureau are set out in a table in the back of the report. A comparison of the Committee recommendations with the budget estimate is as follows:

	Budget estimate	Committee recommendation	Change
Land resources	\$177,557,000	\$179,857,000	+\$2,300,000
Wildlife and fisheries management	33,755,000	33,755,000	

	Budget esti- mate	Committee rec- ommendation	Change
Threatened and endangered species	21,288,000	21,288,000
Recreation management	62,696,000	64,096,000	+1,400,000
Energy and minerals	104,841,000	105,591,000	+750,000
Alaska minerals	2,228,000	4,000,000	+1,772,000
Realty and ownership management	85,250,000	89,850,000	+4,600,000
Resource protection and maintenance	76,227,000	76,977,000	+750,000
Transportation and facilities maintenance	77,958,000	79,458,000	+1,500,000
Land and resources information systems	19,341,000	19,341,000
Mining law administration:			
Administration	32,696,000	32,696,000
Offsetting fees	-32,696,000	-32,696,000
Work force and organizational support	132,876,000	132,876,000
Challenge cost share	18,973,000	8,973,000	-10,000,000
Total, management of lands and resources	812,990,000	816,062,000	+3,072,000

Land resources.—The Committee recommends \$179,857,000 for land resources, which is an increase of \$2,300,000 above the request. Increases above the request include \$300,000 for the Rio Puerco watershed project in New Mexico for a total of \$700,000; \$1,000,000 to continue work at the National Center for Ecologically-Based Noxious Weed Management at Montana State University, including work on treatments of burned over areas to prevent the spread of noxious weeds; \$1,000,000 for the Idaho Department of Agriculture to provide coordination, facilitation, administrative support, and cost-shared weed control project funding to Cooperative Weed Management Areas.

The Committee notes that the funding provided for land resources fully supports the budget request for noxious weed management. The projects funded above are over and above the request and should provide additional capability to the Bureau in its efforts to manage the serious problem of invasive weed control across all ownerships.

The Committee is concerned that the Bureau retain its current level of support for the National Conservation Training Center, and directs that \$500,000 shall be used for this purpose and made available to NCTC within 60 days of enactment.

Wildlife and fisheries management.—The Committee recommends \$33,755,000 for wildlife and fisheries management, which is equal to the request.

Threatened and endangered species.—The Committee recommends \$21,288,000 for threatened and endangered species management, which is equal to the request.

Recreation management.—The Committee recommends \$64,096,000 for recreation management, which is an increase of \$1,400,000 above the request. Increases above the request are \$1,000,000 to continue the Undaunted Stewardship program and \$400,000 for operations at the Colorado Canyons National Conservation Area. To the extent that Bureau needs to allocate the additional funds provided for the NCA throughout the Management of Lands and Resources appropriation in order to accomplish the program of work at Colorado Canyons it may do so upon notification and consultation with the Committee.

Energy and minerals management including Alaska minerals.—The Committee has provided \$105,591,000 for energy and minerals management, which is an increase of \$750,000 above the request. The increase above the request is for the permitting, including supporting analysis, of geothermal energy applications and the processing of wind-energy rights-of-way in Nevada.

The Committee has provided an additional \$4,000,000 for the Alaska minerals program, which is an increase of \$1,772,000 above the request. The additional funding is for the minerals at risk program, which will complete this project.

Realty and ownership management.—The Committee recommends \$89,850,000 for realty and ownership management, which is an increase of \$4,600,000 above the request. In-

creases above the request are \$2,000,000 for the Alaska Conveyance program, \$1,850,000 for the cadastral survey program, and \$750,000 for additional personnel to perform realty work in the State of Nevada.

The Committee is concerned about the failure of the Bureau to process applications under the Native Allotment Act of 1906 in a timely manner. Some applications have been pending nearly a century while all applications have been pending for over 30 years. The Committee has provided \$2,000,000 in additional funding for the Alaska conveyance program, and directs that of the total amount provided for the program at least \$15,000,000 shall be for cadastral surveys. The Committee expects the Bureau to develop a plan to complete work on all allotment applications and all land selections under the Alaska Statehood Act of 1959 by 2009, 50 years after its enactment and nearly 40 years after the deadline for applying for Native allotments.

Within the funds provided by the Committee for the cadastral survey program, an additional \$350,000 is for the State of Utah Automated Geographic Reference Center to continue work on a centralized GIS database of wilderness inventories, and \$1,500,000 to continue work on a public lands survey and ownership database for the State of Alaska.

Resource protection and maintenance.—The Committee recommends \$76,977,000 for resource protection and maintenance, which is \$750,000 above the request. The increase above the request is for the digitization and cataloging of the extensive collection of five combined Department of the Interior resource libraries in Alaska.

Transportation and facilities maintenance.—The Committee recommends \$79,458,000 for transportation and facilities maintenance, which is \$1,500,000 above the request. Increases above the request are \$500,000 to continue maintenance work on the Iditarod National Historic Trail, and \$1,000,000 for the capping of oil wells in the National Petroleum Reserve to prevent leakage and oil spills into the environment.

Land and information systems.—The Committee recommends \$19,341,000 for land and information systems, which is equal to the request.

Mining law administration.—The Committee recommends \$32,696,000 for mining law administration, which is equal to the request.

Workforce organization and support.—The Committee recommends \$132,876,000 for workforce organization and support, which is equal to the request.

Challenge cost share.—The Committee has provided \$8,973,000 for the challenge cost share program, which is equal to the enacted level. The Committee has not provided funds for the Cooperative Conservation Initiative, but has funded the challenge cost share program at current levels which performs similar activities.

General.—It has come to the Committee's attention that the Department has made little progress responding to direction included in last year's Conference Report urging the

Department and its bureaus to begin utilizing battery pulse technology in vehicles and other equipment. The experience of the United States military has illustrated impressive cost savings and environmental benefits following the aggressive application of this technology to extend the service life of batteries. The Department is directed to evaluate the application of this technology within its bureaus and report back to the Committee within 90 days of enactment of this Act on the feasibility and benefits of the use of pulse technology for batteries.

The Committee notes that the Bureau of Land Management's Preferred Alternative in the Final SEIS for the reclamation of the Zortman Landusky Mine near the Fort Belknap Reservation in Montana proposes additional funding of \$33.5 million over the amount bonded for reclamation, including \$11 million to ensure the water treatment facilities proposed in the alternative can be operated in perpetuity. The Committee believes that protecting water quality in the region should be a top priority for the BLM budget requests for fiscal years 2004 and 2005.

WILDLAND FIRE MANAGEMENT

Appropriations, 2002	\$678,421,000
Budget estimate, 2003	653,754,000
Committee recommenda- tion	654,254,000

The Committee recommends a total appropriation of \$654,254,000 for wildland fire management activities, which is \$500,000 above the request.

The Committee recommendation includes \$277,213,000 for fire preparedness, which is equal to the request and \$3,594,000 below the enacted level.

The Committee also recommends a total of \$160,351,000 for fire suppression activities, which is equal to the request.

The Committee's recommendation includes \$216,690,000 for Other Fire Operations, which is \$500,000 above the request. Within the amount provided, \$186,690,000 is for hazardous fuels reduction, \$20,000,000 is for burned area rehabilitation, and \$10,000,000 is for rural fire assistance. The increase above the request is for the National Center for Landscape Fire Analysis at the University of Montana, for a total of \$1,500,000 for the Bureau's share of this cooperative project.

The Committee notes that it has more than fully funded the request for hazardous fuels reduction of \$186,190,000 within the amounts provided. The Committee believes that reduction of fuel loads in areas adjacent to communities in the wildland-urban interface is critical for protecting the public and that these areas should be a primary focus of the Department. Accordingly, the Committee directs the Department of the Interior to allocate the funding level proposed in the budget request of \$111,255,000 on projects in the wildland-urban interface. If for any reason the Department is unable to attain the proposed levels, it shall promptly notify the Committee explaining why the Department was unable to expend such sums. The Committee recognizes the serious problem of

deteriorating forest health as an underlying cause of wildland fire. A comprehensive approach to improving degraded forests and reducing the threat of wildfire includes forest restoration treatment. The Committee understands that the Ecological Restoration Institute in Flagstaff, Arizona provides research, application, development, and assistance to communities needed to implement landscape level treatments and improve forest health.

CENTRAL HAZARDOUS MATERIALS FUND

Appropriations, 2002	\$9,978,000
Budget estimate, 2003	9,978,000
Committee recommendation	9,978,000

The Committee recommends an appropriation of \$9,978,000 for the central hazardous materials fund, which is equal to the request.

CONSTRUCTION

Appropriations, 2002	\$13,076,000
Budget estimate, 2003	10,976,000
Committee recommendation	12,976,000

The Committee recommends \$12,976,000 for construction, which is an increase of \$2,000,000 above the request. The increase above the request is for construction of the California Trail Interpretive Center in Elko County, Nevada.

PAYMENTS IN LIEU OF TAXES

Appropriations, 2002	\$210,000,000
Budget estimate, 2003	165,000,000
Committee recommendation	210,000,000

The Committee recommends \$210,000,000 for Payments in Lieu of Taxes. The amount provided is an increase of \$45,000,000 above the budget request.

LAND ACQUISITION

Appropriations, 2002	\$49,920,000
Budget estimate, 2003	44,686,000
Committee recommendation	30,150,000

The Committee recommends an appropriation of \$30,150,000 for land acquisition, a decrease of \$14,536,000 below the budget estimate.

The following table shows the Committee's recommendations:

Area and State	Committee Recommendation	Budget estimate, 2003	105,633,000
Beaver Creek National WSR/White Mountains NRA (AK)	\$750,000		
Cosumnes River Watershed (CA)	2,500,000		
Golden Bair Ranch (CO)	1,500,000		
Kasha-Katuwe Tent Rocks National Monument (NM)	1,500,000		
King Range National Conservation Area (CA)	2,000,000		
Lewis and Clark National Historic Trail (ID)	1,000,000		
Lewis and Clark National Historic Trail (MT)	1,000,000		
Moses Coulee (WA)	2,000,000		
Otay Mountain Wilderness (CA)	2,000,000		
Rio Grande National WSR (NM)	4,500,000		
Sandy River (OR)	2,500,000		
Santa Rosa and San Jacinto Mountains NM (CA)	2,000,000		
Squaw Leap Management Area (CA) (San Joaquin River)	900,000		
Steens Cooperative Management and Protection Area (OR)	2,000,000		
Use of carryover/anticipated slippage	-3,000,000		
Subtotal, Acquisitions	23,150,000		
Emergency/Inholding/Relocation Land Exchange Equalization Payments	2,500,000		
Acquisition Management	500,000		
Total, BLM Land Acquisition	30,150,000		
 From unobligated funds previously appropriated for the Spring Gulch, WY project, the Bureau is directed to provide \$4,000,000 for the West Slope (Devil's Canyon Ranch), WY project and \$584,000 for the Continental Divide National Scenic Trail, WY.			
 The Committee has consistently supported the West Eugene Wetlands acquisition program over the years, and is aware that the Federal portion of the acquisition program is nearing completion. In order to properly conclude the project, however, certain issues regarding the status of lands in the project area must be resolved. Should these issues be resolved in a manner that warrants additional Federal acquisition support, the Committee will consider providing funding to complete the project.			
 OREGON AND CALIFORNIA GRANT LANDS			
Appropriations, 2002	\$105,165,000		
 MISCELLANEOUS TRUST FUNDS			
Appropriations, 2002	\$12,405,000

Committee recommendation	12,405,000		
 FISH AND WILDLIFE AND PARKS			
U.S. FISH AND WILDLIFE SERVICE			
RESOURCE MANAGEMENT			
Appropriations, 2002	\$850,597,000		
Budget estimate, 2003	903,604,000		
Committee recommendation	902,697,000		
	Budget esti- mate	Committee rec- ommendation	Change
Ecological Services	\$211,147,000	\$226,659,000	+\$15,512,000
Refuges and Wildlife	456,717,000	442,692,000	-14,025,000
Fisheries	94,763,000	104,734,000	+9,971,000
General Administration	140,977,000	128,612,000	-12,365,000
Total, Resource Management	903,604,000	902,697,000	-907,000

The Committee recommends \$902,697,000 for resource management, \$907,000 below the budget estimate. The detail table at the back of the report displays the distribution of funds among the Service's activities. Changes to the budget estimate are detailed below.

Ecological Services.—The Committee recommends \$226,659,000 for ecological services, an increase of \$15,512,000 above the budget estimate. For the ecological services activity, the Committee recommends an increase of \$5,716,000 for the endangered species subactivity. Within that increase, the Committee recommends \$1,300,000 for candidate conservation, of which \$150,000 is for the conservation of the burbot population in the Kootenai River, \$400,000 is for continued funding of the Idaho Sage Grouse Management Plan through the Idaho Office of Species Conservation, \$750,000 is for sea otter research in Alaska, and \$50,000 is made available to the Idaho State Department of Agri-

culture to study the influence of herbivory on Slickspot Peppergrass within general program activities. The Committee recommends an increase of \$200,000 in consultation programs for the Central Valley and Southern California Habitat Conservation Plan. For recovery, the Committee recommends a net increase of \$4,212,000, of which \$1,500,000 is for Atlantic salmon recovery activities administered by the National Fish and Wildlife Foundation, \$500,000 is for the U.S. Fish and Wildlife Service to undertake Atlantic Salmon recovery efforts in Maine, \$1,000,000 is for eider recovery work undertaken by the Alaska Seafire Center, \$50,000 is for freshwater mussel recovery to be performed in conjunction with White Sulphur Springs NPFH, \$600,000 is for recovery of the Lahontan cutthroat trout, and \$1,160,000 is for the wolf recovery program in the State of Idaho. Of the funds provided for wolf monitoring, \$600,000 is for the Nez Perce Tribe, \$100,000 is for the Snake River Basin Fish and Wildlife Service

Office, and \$460,000 is for the Office of Species Conservation. These funds are provided in lieu of funds the Service proposed for wolf monitoring in the request. The Peregrine Fund should be funded at \$400,000 in fiscal year 2003. The funds provided also include the \$750,000 requested to continue the Virgin River Resource Recovery and Management Plan.

The Committee is aware of efforts to prevent the Salt Creek Tiger beetle from being listed as an endangered species. The Committee encourages the Service to support these endeavors.

The Committee recommends \$84,423,000 for habitat conservation, an increase of \$9,800,000 over the budget request. Changes recommended for habitat conservation programs include an increase of \$9,600,000 for the Partners for Fish and Wildlife Program, of which \$200,000 is for bald eagle restoration performed in cooperation with the Vermont Natural Heritage Partners program, \$500,000

is for the Big Hole Watershed Committee, \$600,000 is for Columbia River Estuary Research, \$1,000,000 is for the Hawaii Endangered Species Act Community Conservation Plan, \$1,450,000 is for the Nevada Biodiversity Research and Conservation Project, \$250,000 is for the Thunder Basin Grasslands Initiative, \$500,000 is for the Montana Water Center for the Wild Fish Habitat Initiative, and \$1,400,000 is for Washington State regional salmon enhancement. Also within the \$9,600,000 increase provided for the Partners program, \$2,700,000 is provided for invasive species control efforts in the State of Hawaii, Blackwater National Wildlife Refuge, and Willapa Bay. An additional \$400,000 is also provided through refuge operations to eradicate spartina at Willapa NWR. The Committee encourages the Service to address the growing problem of invasive species in its fiscal year 2004 budget request. In project planning, the Committee recommends an increase of \$200,000 for the Middle Rio Grande (Bosque) Research program. The Committee also recommends an increase

of \$1,000,000 for the Cook Inlet Aquaculture Association through coastal programs. The Committee recommends the budget request for environmental contaminants.

The Committee is concerned by reports that participation of the Fish and Wildlife Service in the Chesapeake Bay Program has diminished over the past decade. The Committee expects the Service to develop and submit to the Committee by April 1, 2003, an action plan to increase support for meeting the living resource, habitat restoration and education goals of the Chesapeake Bay Program.

Refuges and wildlife.—The Committee recommends \$442,692,000 for refuges and wildlife, a decrease of \$14,025,000 below the budget estimate.

The Committee has recommended an increase of \$46,517,000 for the national wildlife refuge system in recognition of the upcoming refuge system centennial.

The Committee recognizes the agreement reached by the Fish and Wildlife Service, the State of California, and a private landowner

for the purchase of salt ponds in the San Francisco Bay area for inclusion in the Don Edwards National Wildlife Refuge. The Committee urges the Fish and Wildlife Service to allocate resources to provide for maintenance and operations associated with the refuge's increased size.

A total of \$998,000, the budget estimate, is recommended to continue the Salton Sea recovery program, contingent on matching funds from the State of California. The Committee does not object to including this program in the regular operations account in fiscal year 2004 and beyond.

In migratory bird management, the Committee recommends an increase of \$575,000 for continued seabird bycatch reduction. Due to funding constraints, the Committee was unable to provide an increase above the request for the North American Waterfowl Management Plans. The Committee agrees to the following distribution of funds for joint ventures:

	Joint venture	Fiscal year 2002	Rec- ommended fiscal year 2003	Target level fiscal year 2004
Atlantic Coast		\$506,000	\$531,000	\$800,000
Lower Mississippi		576,000	605,000	750,000
Upper Mississippi		363,000	382,000	650,000
Prairie Pothole		1,248,000	1,310,000	1,400,000
Gulf Coast		448,000	470,000	700,000
Playa Lakes		369,000	387,000	700,000
Rainwater Basin		278,000	292,000	400,000
Intermountain West		469,000	492,000	1,000,000
Central Valley		417,000	438,000	550,000
Pacific Coast		378,000	397,000	700,000
San Francisco Bay		269,000	282,000	370,000
Sonoran		278,000	292,000	400,000
Arctic Goose		210,000	221,000	370,000
Black Duck		188,000	197,000	370,000
Sea Duck		340,000	357,000	550,000
General Program Activities		662,000	695,000	750,000
Administration		69,000
Total		6,999,000	7,417,000	10,460,000

The Committee provides the budget request for law enforcement.

The Director of the U.S. Fish and Wildlife Service shall, within 180 days of the enactment of this Act, report to the Committee on Appropriations on the current availability of recreational air access to the Charles M. Russell National Wildlife Refuge, the history of such access over the life of the refuge, and alternatives for the enhancement of such access in a manner consistent with refuge purposes. Such report shall specifically address the possibility of providing access to the Slippery Ann and Sand Creek airstrip, as well as other alternatives. The Director shall consult with the Montana Pilots Association and other interested stakeholders in preparing the report.

Fisheries.—The Committee recommends \$104,734,000 for fisheries, \$9,971,000 more than the budget request.

For hatchery operations and maintenance, the Committee recommends \$52,952,000, which includes an increase of \$2,000,000 for hatchery operations and an increase of \$1,000,000 for hatchery maintenance. The Committee notes that, while it has restored the cut to hatchery general operations, the Service should pursue cost recovery opportunities outlined in the plan for achieving the proposed budget reduction. Any savings realized from these measures should be used to address the many unmet needs of the hatchery system. Within the funds provided for hatcheries, the Committee expects the Service to address the needs at the Pittsford National Fish Hatchery and the Ouray National Fish Hatchery.

The Committee encourages the Service to articulate a coherent long-term plan for the hatchery system in the fiscal year 2004 budget, incorporating the numerous reviews com-

pleted over the past several years, including the Sport Fishing and Boating Partnership Council report.

The Committee recommends \$51,782,000 for fish and wildlife management, an increase of \$6,971,000 over the request. The Committee has provided the budget request for anadromous fish management, \$5,771,000 above the request for fish and wildlife assistance, and \$1,200,000 above the request for marine mammals. Within the increase provided for fish and wildlife assistance, \$400,000 is provided for fish passage improvements along railroads in Alaska, \$118,000 is for fish surveys in West Virginia to be performed in conjunction with White Sulphur Springs NFH, \$500,000 is for the Great Lakes fish and wildlife restoration program, \$850,000 is for continued wildlife enhancement in Starkville, Mississippi, \$500,000 is for the wildlife health center in Montana, and \$3,403,000 is for Yukon River Treaty implementation (for a total of \$4,000,000 devoted to Yukon River Treaty implementation). Within the fish and wildlife assistance program, \$2,246,000 is provided for continuation of activities begun in fiscal year 1997 to combat whirling disease and related fish health issues. Within the amount provided, \$950,000 is for the National Partnership on the Management of Wild and Native Coldwater Fisheries (of which \$250,000 is for resistant trout research in coordination with the Whirling Disease Foundation), and \$1,296,000 is provided to continue the National Wild Fish Health Survey, expand whirling disease investigations, and recruit and train health professionals. In marine mammals, \$1,200,000 is provided above the request for continued marine mammal protection in Alaska.

General Administration.—The Committee recommends \$128,612,000 for general adminis-

tration, a decrease of \$12,365,000 below the budget request. Within the funds provided, the Committee recommends an increase of \$35,000 above the request for the National Fish and Wildlife Foundation as well as an increase of \$50,000 for training needs at the National Conservation Training Center (NCTC) and a \$550,000 increase for maintenance at NCTC. The Committee directs the Service to evaluate the NCTC maintenance budget as to whether it sufficiently meets Federal Facilities Council standards for routine maintenance and repair of a facility of its size and scope. Within funds available for NCTC, up to \$5,000 is recommended to help defray the costs for civic and community groups using the facility provided community use does not conflict with that of service and other departmental groups.

The Committee is also concerned that training courses offered at NCTC have decreased by more than 20 percent at a time when studies point to the need for additional training and the service is completing construction of a new lodge that will only increase the demand for additional offerings.

The Committee has not funded the Cooperative Conservation Initiative. While the Committee recognizes the value of cooperative partnerships in conservation, it cannot justify the establishment of another grant program when so many existing needs are not met.

Administrative Provisions.—The Committee has included language regarding the Great Salt Pond.

CONSTRUCTION

Appropriations, 2002	\$55,543,000
Budget estimate, 2003	35,402,000
Committee recommendation	42,882,000

The Committee recommends \$42,882,000 for construction, an increase of \$7,480,000 above the budget estimate.

The Committee agrees to the following distribution of funds:

Unit	Project	Committee recommendation
Black-Footed Ferret Wildlife Research Center, CO	New Endangered Species Facility—Phase IV [cc]	\$3,240,000
Bozeman Fish Technology Center, MT	Seismic Safety Rehabilitation of Three Buildings—Phase I [p/d]	150,000
Bozeman Fish Technology Center, MT	Construction of Laboratory/Administration Building—Phase IV [c]	500,000
Caddo Lake NWR, TX	Caddo Lake Ramsar Wetland Science Center	200,000
Cape Romain NWR, SC	Restoration of Dominick House	150,000
Cat Island NWR, LA	Environmental Education Center Construction [p/d]	330,000
Canaan Valley NWR, WV	Road Maintenance	650,000
Clark R. Bavin NFWF Forensics Lab, OR	Forensics Laboratory Expansion—Phase III [c]	6,235,000
Craig Brook NFH, ME	Wastewater Compliance—Phase I [p]	200,000
Garrison Dam NFH, ND	Heat Pump Water System Maintenance [c]	200,000
Jackson NFH, WY	Seismic Safety Rehabilitation—Phase II [d]	80,000
Jordan River NFH, MI	Replace Great Lakes Fish Stocking Vessel, M/V Togue—Phase II [d]	800,000
Kealia Pond, HI	Mitigation and restoration [c]	1,000,000
Klamath Basin NWR Complex, CA	Water Supply and Management—Phase IV	1,000,000
Kodiak NWR, AK	Visitor Center Construction	3,000,000
Mammoth Springs NFH, AR	Renovation of Environmental Education Center [p,d,c]	1,400,000
Missisquoi NWR, VT	Visitor Center completion [c]	1,500,000
Ohio River Islands, WV	Visitor Center Utilizing standard design—Phase I [d/c]	1,100,000
Orangeburg NFH, SC	Orangeburg Substation Dam—Phase II [cc]	4,144,000
Quicchee NFH, WA	Seismic Safety Rehabilitation of the Hatchery Building—Phase I [d]	45,000
Sevilleta NWR, NM	Laboratory design	1,250,000
Silvio O. Conte NFWR (Nulhegan Division), VT	Refuge Headquarters/Visitor Center [p,d]	300,000
Servicewide	Bridge Safety Inspections	560,000
Servicewide	Dam Safety Programs and Inspections	705,000
Servicewide	Seismic Safety Rehabilitation of Shop Buildings—Phase II [cc]	200,000
Sonny Bono Salton Sea NWR, CA	Visitor Center Construction	2,600,000
Waccamaw NWR, SC	Maintenance	625,000
White Sulphur Springs NFH, WV	Construction	500,000
World Birding Center, TX		
Subtotal, Line Item Construction		32,664,000
Servicewide	Nationwide Engineering Services	5,468,000
Servicewide	Cost Allocation Methodology	3,000,000
Servicewide	Seismic Safety Program	200,000
Servicewide	Environmental Compliance Management	1,400,000
Servicewide	Waste Prevention and Recycling	150,000
Subtotal, Nationwide Engineering Services		10,218,000
Total, Construction		42,882,000

The Alaska region is directed to evaluate whether additional public use cabins are needed in the Kenai National Wildlife Refuge given the huge increase in visitation it is experiencing. This evaluation should make recommendations on the need for public use cabins and identify alternatives for funding including the use of concessionaires.

Bill language.—The Committee has provided the authority for the Service to contract for the full scope of constructing a visitor center at Kodiak NWR in hopes this will save the Service money in the long term.

LAND ACQUISITION

Appropriations, 2002	\$99,135,000
Budget estimate, 2003	70,384,000
Committee recommendation	81,555,000

The Committee recommends \$81,555,000, \$11,171,000 above the budget request for FWS land acquisition.

The following table shows the Committee's recommendations:

Area and State	Committee Recommendation
Baca Ranch (CO)	\$4,000,000
Back Bay NWR (VA)	2,000,000
Balcones Canyonlands NWR (TX)	2,200,000
Bandon Marsh NWR (OR)	140,000
Big Muddy NFWR (MO)	2,000,000
Cache River NWR (AR)	2,000,000
Cahaba NWR (AL)	3,000,000
Cape May NWR (NJ)	1,100,000
Cat Island NWR (LA)	2,500,000
Centennial Valley NWR (MT)	500,000
Chickasaw NWR (TN)	500,000
Clarks River NWR (KY)	2,000,000
Cypress Creek NWR (IL)	250,000
Dakota Tallgrass Prairie WMA (ND/SD)	1,000,000
Fairfield Marsh WPA (WI)	2,000,000
Great Bay NWR (NH)	300,000
Great Meadows NWR (MA)	1,600,000
Great River NWR (MO)	2,000,000
J.N. Ding Darling NWR (FL)	1,000,000

Area and State	Committee Recommendation	Area and State	Committee Recommendation
James Campbell NWR (HI)	2,000,000	Emergencies & Hardships ..	2,000,000
Laguna Atascosa NWR (TX)	750,000	Total, FWS Land Acquisition	81,555,000
Lower Hatchie NWR (TN)	500,000	The Committee recognizes the Service's efforts to reform acquisition management and has provided \$10,000,000 for this activity, which reflects the actual acquisition management costs for the division of realty.	
Lower Rio Grande Valley NWR (TX)	500,000	Within funds available for land acquisition, the Service should provide for survey and related costs at Canaan Valley National Wildlife Refuge associated with the recent land purchase.	
National Key Deer Refuge (FL)	1,500,000	The funds provided for the Rhode Island Refuge Complex should be spent at Ninigret NWR, John H. Chafee NWR, and Sachuest NWR.	
Neal Smith NWR (IA)	1,000,000	LANDOWNER INCENTIVE PROGRAM	
North Dakota WMA (ND)	1,500,000	Appropriations, 2002	\$40,000,000
Northern Tallgrass Prairie NWR (MN/IA)	1,000,000	Budget estimate, 2003	50,000,000
Ottawa NWR (OH)	1,000,000	Committee recommendation	600,000
Parker River NWR (MA)	500,000	The Committee has provided \$600,000 for the landowner incentive program primarily to cover residual expenses incurred in the distribution of fiscal year 2002 funds. A portion of these funds may be used to study the program's effectiveness and to determine the most appropriate funding level in the context of the other conservation grant programs available through the Service. The Service should produce a comprehensive comparison of its grant programs in the fiscal year 2004 budget justification so the Committee can better understand the differences between the existing programs and their individual purposes.	
Patoka River NWR (IN)	250,000	The landowner incentive program was established in fiscal year 2002 to provide competitive matching grants to States, territories, and tribes for assistance to landowners in protecting imperiled species and funded with a \$40,000,000 appropriation. Unfortunately the Service did not publish the	
Prime Hook NWR (DE)	1,350,000		
Rachel Carson NWR (ME)	3,000,000		
Rappahannock River Valley NWR (VA)	180,000

Inholdings	2,500,000		

Federal Register notice for this program until June 7, 2002, more than 8 months after enactment of the fiscal year 2002 appropriation bill. This significant delay is unacceptable to the Committee. While the Committee appreciates the Service's attempt to involve States and other stakeholders in the development of the program, this consultation should have occurred prior to the program's proposal. The Committee cannot justify providing additional funds for grants in fiscal year 2003, when the fiscal year 2002 grants process was initiated at such a late date, and obligation may not occur during this fiscal year.

STEWARDSHIP GRANTS

Appropriations, 2002	\$10,000,000
Budget estimate, 2003	10,000,000
Committee recommendation	200,000

The Committee recommends \$200,000 for stewardship grants, which are competitive awards made directly to individuals and groups involved in endangered species recovery efforts on private lands. Similar to the Landowner Incentive Program, the Committee cannot provide a large appropriation for an untested program only recently announced in the Federal Register on June 7, 2002. Since no grants have been made, the Committee cannot determine the effectiveness of this conservation measure and, therefore, has only provided a nominal sum for remaining costs incurred in the fiscal year 2002 cycle and evaluation of the program.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

Appropriations, 2002	\$96,235,000
Budget estimate, 2003	91,000,000
Committee recommendation	81,000,000

The Committee recommends \$81,000,000 for the cooperative endangered species fund, of which \$2,600,000 is for administration and \$51,471,000 is for habitat conservation plan

land acquisition. The Committee has not derived this program from the land and water conservation fund, as proposed in the budget request.

NATIONAL WILDLIFE REFUGE FUND

Appropriations, 2002	\$14,414,000
Budget estimate, 2003	14,414,000
Committee recommendation	14,414,000

The Committee recommends \$14,414,000 for the national wildlife refuge fund, the same as the budget request.

NORTH AMERICAN WETLANDS CONSERVATION FUND

Appropriations, 2002	\$43,500,000
Budget estimate, 2003	43,560,000
Committee recommendation	38,560,000

The Committee recommends \$38,560,000 for the North American wetlands conservation fund, a reduction of \$5,000,000 below the budget request.

NEOTROPICAL MIGRATORY BIRD CONSERVATION

Appropriations, 2002	\$3,000,000
Budget estimate, 2003
Committee recommendation	2,000,000

The Committee recommends \$2,000,000 for neotropical migratory bird conservation, instead of transferring \$1,000,000 for neotropical bird conservation to the multinational species fund as proposed in the request. As in fiscal year 2002, the Committee expects the Service's Division of Bird Habitat Conservation to administer this program. The Division of Bird Habitat Conservation should solicit significant input from the international program staff, utilizing their expertise.

MULTINATIONAL SPECIES CONSERVATION FUND

Appropriations, 2002	\$4,000,000
Budget estimate, 2003	5,000,000
Committee recommendation	4,200,000

The Committee recommends an appropriation of \$4,200,000 for the multinational species conservation fund, an increase of \$200,000 above the budget estimate. The increase is provided for rhinoceros and tiger conservation.

STATE AND TRIBAL WILDLIFE GRANTS

Appropriations, 2002	\$60,000,000
Budget estimate, 2003	60,000,000
Committee recommendation	45,000,000

The Committee recommends \$45,000,000 for State and tribal wildlife grants. Of the amount provided, \$3,000,000 is provided for tribal grants. The Committee believes there are opportunities to develop synergies between the State and Tribal Wildlife Grants program and the State Assistance program funded through the National Park Service. The Committee has addressed this issue in the National Park Service, Land Acquisition and State Assistance section of the report.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM		
Appropriations, 2002	\$1,487,075,000
Budget estimate, 2003	1,584,565,000
Committee recommendation	1,571,065,000

The Committee recommends \$1,571,065,000 for operation of the national park system, an increase of \$83,990,000 above the fiscal year 2002 enacted level. Increases above the current enacted level include \$16,466,000 in fixed costs, and an overall increase of \$15,000,000 in basic park operations. The Committee is aware of the unmet needs in many of our nation's parks and has included the additional funds in an effort to address those needs.

The following table shows the amounts recommended by the Committee as compared with the budget request:

	Budget estimate	Committee recommendation	Change
Park management:			
Resource stewardship	\$334,923,000	\$340,227,000	+\$5,304,000
Visitor services	309,681,000	314,128,000	+4,447,000
Maintenance	531,428,000	528,823,000	-2,605,000
Park support	300,297,000	279,651,000	-20,646,000
External administrative costs	108,236,000	108,236,000
Total, Operation of the National Park System	1,584,565,000	1,571,065,000	-13,500,000

Resource Stewardship.—The Committee recommends \$340,227,000 for resource stewardship, an increase of \$21,915,000 above the fiscal year 2002 enacted level, and \$5,304,000 above the budget request. Within the amount provided, \$600,000 is for additional funding for the Vanishing Treasures program, and \$500,000 is to be made available to the Klondike Goldrush National Park for the acquisition of the Rapuzzi historic gold rush collection.

Within the amounts provided, the Committee expects the Service to continue the lake trout control program at Yellowstone National Park.

Visitor Services.—The Committee recommends \$314,128,000 for visitor services, an increase of \$17,037,000 over the fiscal year 2002 enacted level, and \$4,447,000 above the budget request. The increase over the request is for park operations.

Facility Operations and Maintenance.—The Committee recommends \$528,823,000 in facility operations and maintenance, an increase of \$47,622,000 above the fiscal year 2002 enacted level, and \$2,605,000 below the budget request. The amount provided includes increases of \$20,000,000 over the current year level for cyclic maintenance and \$7,640,000 for condition assessments; and an increase

over the request of \$4,395,000 for park operations. In addition, the Committee expects the National Park Service to meet its responsibilities under the Assateague Island Restoration Project, and to make the required funds available in fiscal year 2003 to match the contribution by the Army Corps of Engineers. Finally, the Committee expects the Service to continue its current level of support for the New River Gorge Parkway Authority for technical advice and maintenance activities on the parkway.

Park Support.—The Committee recommends \$279,651,000 for park support, an increase of \$4,626,000 above the fiscal year 2002 level, and a decrease of \$20,646,000 below the budget request. Increases above the request include \$854,000 in park operations, and \$500,000 for the Volunteer in the Parks program. The decrease of \$22,000,000 in cooperative programs reflects the decision of the Committee to utilize all available resources in support of an overall increase in basic park operations as opposed to the more limited scope contained in the budget request. The amount provided continues the Lewis and Clark challenge cost share at the request level. Within the amounts provided, \$750,000 is to be used for an independent and comprehensive management, operational, per-

formance and financial review of Yellowstone National Park.

External administrative costs.—The Committee recommends \$108,236,000 for external administrative costs, an increase of \$2,888,000 above the fiscal year 2002 enacted level, and fully commensurate with the budget request.

General.—The Going to the Sun Road provides close to 2 million visitors annually with an unparalleled opportunity to experience the wonders of Glacier National Park. Age and neglect have taken a toll, however, and the threat of catastrophic road failure looms if steps are not taken to reconstruct significant portions of the historic road. The Committee is aware that the National Park Service has drafted an Environmental Impact Statement that assesses road reconstruction options, and directs the Service to devote the resources necessary to complete the EIS in a timely fashion so that reconstruction work can begin promptly. In developing the Record of Decision, the Service should be mindful of the input provided by the Going to the Sun Road Advisory Committee.

Whichever alternative is selected in the Record of Decision, significant additional resources will be required to rehabilitate the road consistent with the Park's General

Management Plan. The Committee strongly urges the Administration to anticipate these needs in developing its proposal for the reauthorization of the transportation bill. The Committee further urges the Service to pursue aggressive completion of road rehabilitation work for which planning has already been done, and which will need to be performed regardless of the alternative selected in the Record of Decision. The Committee understands that there is at least \$11,000,000 of such work ready for execution in fiscal year 2003. The Committee has included a general provision in this title authorizing the use of certain unobligated carryover funds to accomplish rehabilitation work.

While the long term reconstruction of the Going to the Sun Road has been the recent focus of park planners, the Committee remains concerned about the ongoing operation of the Road itself. In addition to being the principle route used by visitors to experience the Park, the Road is vitally important to the health of the communities in and around the Park that serve those visitors. In that regard, the opening of the Road each spring is a much anticipated event in these communities. The Committee is concerned that the Park may not be placing adequate emphasis on opening the road in a timely manner each year. While snow conditions and plow crew safety must remain primary considerations in determining the road's opening date, the Committee recommends that the Service undertake a review to determine if options exist to facilitate an earlier opening date and to maximize the window

during which the road is open. The Committee understands, while new snow removal equipment has been acquired in recent years, the current policy may be antiquated and does not fully utilize current technological and safety advances used by organizations working in similar, extreme environments. This review should be performed in cooperation with local entities, and should result in a written policy that articulates the Park's road-clearing strategy and offers alternatives for enhancing road-clearing performance. Options explored should include contracting portions of the work to expand the work week or seeking aid from other entities with snow removal duties. The results of this review should be provided to the Committee by March 15, 2003.

Within the funds provided for ONPS, the Committee expects the National Park Service to continue to provide at least \$500,000, the current level of support, to the National Conservation Training Center.

In the year 2003, the centennial of the Wright brothers' first flight, national and international attention will focus on the two national parks that tell the story of the Wright brothers. The Dayton Aviation Heritage Park, which was first created in 1992, honors the contributions of the Wright brothers. The only Wright brothers' bicycle shop that remains on its original site, the Wright brothers' print shop, the 1905 Wright flyer, and the Huffman Prairie Flying Field are all located at this park. The Committee recognizes the importance of the centennial of flight celebration and has fully funded the

budget request for operating funds at the Dayton Aviation Heritage National Historic Park and the Wright Brothers National Memorial.

Not less often than annually, the Director of the National Park Service shall report to the Committee on the status of the Colorado River Management Plan.

UNITED STATES PARK POLICE

Appropriations, 2002	\$90,555,000
Budget estimate, 2003	78,431,000
Committee recommendation	78,431,000

The Committee recommends \$78,431,000 for the United States Park Police, a decrease of \$12,124,000 below the fiscal year 2002 enacted level, and fully commensurate with the budget request. The decrease below the enacted level is attributable to one-time security costs provided as a result of the September 11, 2001, terrorist attacks.

NATIONAL RECREATION AND PRESERVATION

Appropriations, 2002	\$66,159,000
Budget estimate, 2003	46,824,000
Committee recommendation	62,978,000

The Committee recommends \$62,978,000 for national recreation and preservation, a decrease of \$3,181,000 below the fiscal year 2002 enacted level, and an increase of \$16,154,000 above the budget request. A comparison of the Committee recommendation to the budget request follows:

	Budget esti- mate	Committee rec- ommendation	Change
Recreation programs	\$552,000	\$552,000	
Natural programs	10,948,000	11,198,000	+\$250,000
Cultural programs	19,748,000	19,748,000	
International park affairs	1,719,000	1,719,000	
Environmental and compliance review	400,000	400,000	
Grant administration	1,585,000	1,585,000	
Heritage Partnership Programs	7,735,000	13,384,000	+ 5,649,000
Statutory or Contractual Aid	4,137,000	14,392,000	+ 10,255,000

Recreation Programs.—The Committee recommends \$552,000 for recreation programs, which is fully commensurate with the budget request.
<i>Natural Programs.</i> —The Committee recommends \$11,198,000 for natural programs, an increase of \$268,000 above the fiscal year 2002 enacted level, and \$250,000 above the budget request. The increase above the request is provided for the Northern Forest Canoe trail. Within the Rivers and Trails Conservation Program, careful consideration should be given to applications for assistance for the Ohio River Trail in Cincinnati, Ohio; the Fanno Creek Greenway Trail in Washington County, Oregon; and the Tuscaloosa Nature Preserve and Hiking Trail.
<i>Cultural Programs.</i> —The Committee recommends \$19,748,000 for cultural programs, a decrease of \$1,021,000 from the fiscal year 2002 enacted level, but fully commensurate with the budget request. Within available funds, the Service is directed to provide \$100,000 to the National Park Service's Southeastern Archeological Center to conduct a cultural study of the national importance and cultural significance of the Congaree Creek site. In addition, the Service is directed to provide \$170,000 for restoration of the area around Ft. Piute in the Mojave National Preserve.
<i>Environmental and Compliance Review.</i> —The Committee recommends \$400,000 for environmental and compliance review, the amount requested by the Service.

Grants Administration.—The Committee recommends \$1,585,000 for grants administration, the amount request by the Service.

International Park Affairs.—The Committee recommends \$1,719,000 for international park affairs, the amount request by the Service.

Heritage Partnership Programs.—The Committee recommends \$13,384,000 for heritage partnership programs, an increase of \$175,000 above the fiscal year 2002 enacted level, and \$5,649,000 above the budget request. The Committee recommends the following distribution of funds:

Project	Amount
America's Agricultural Heritage Partnership	\$800,000
Augusta Canal National Heritage Area	600,000
Automobile National Heritage Area	500,000
Cache La Poudre River Corridor ..	50,000
Cane River National Heritage Area	995,000
Delaware and Lehigh National Heritage Corridor	850,000
Erie Canalway	210,000
Essex National Heritage Area	1,000,000
Hudson River Valley National Heritage Area	600,000
Illinois and Michigan Canal National Heritage Corridor	400,000
John H. Chafee Blackstone River Valley National Heritage Corridor	800,000

Project	Amount
Lackawanna Heritage Area	750,000
National Coal Heritage Area	210,000
Ohio and Erie Canal National Heritage Corridor	700,000
Quinebaug and Shetucket Rivers Valley National Heritage Corridor	1,000,000
Rivers of Steel National Heritage Area	1,000,000
Schuylkill National Heritage Center	400,000
Shenandoah Valley Battlefields National Historic District	500,000
South Carolina National Heritage Corridor	1,000,000
Tennessee Civil War Heritage Area	210,000
Wheeling National Heritage Area	480,000
Yuma Crossing National Heritage Area	210,000
Administrative support	119,000
Total	13,384,000

Statutory or Contractual Aid.—The Committee recommends \$14,392,000 for statutory or contractual aid, a decrease of \$2,613,000 below the fiscal year 2002 enacted level, and an increase of \$10,255,000 above the budget request. The Committee recommends the following distribution of funds:

	Budget esti- mate	Committee rec- ommendation
Aleutian World War II Nat'l Historic Area	\$400,000	
Brown Foundation (<i>Brown v. Board of Ed</i>)	\$401,000	
Chesapeake Bay Gateways & Water Trails	798,000	3,000,000

		Budget esti- mate	Committee rec- ommendation
Dayton Aviation Heritage Commission		47,000	500,000
Ice Age National Scientific Reserve		806,000	806,000
Illinois & Michigan Canal Passage			500,000
Jamestown 2007			400,000
Johnstown Area Heritage Association		49,000	49,000
Lampry Wild & Scenic River		200,000	1,000,000
Louisiana Creole Heritage Center			250,000
Louisiana Purchase Comm. of Arkansas			350,000
Martin Luther King, Jr. Center			528,000
National Constitution Center			500,000
Native Hawaiian Culture & Arts Program		749,000	740,000
New Orleans Jazz Commission		66,000	66,000
Office of Arctic Studies			1,500,000
Penn Center National Landmark			1,000,000
Roosevelt Campobello Int'l Park Commission		802,000	802,000
Sewall-Belmont House			500,000
Sleeping Rainbow Ranch, Capitol Reef NP			700,000
Vancouver NHR			400,000
Total		4,137,000	14,392,000

The amount provided for the Dayton Aviation Heritage Commission includes \$150,000 for interpretive exhibits.

URBAN PARKS AND RECREATION FUND

Appropriations, 2002	\$30,000,000
Budget estimate, 2003	300,000
Committee recommenda- tion	10,000,000

The Committee recommends \$10,000,000 for the urban parks and recreation fund, a decrease of \$20,000,000 below the fiscal year 2002 enacted level, and an increase of \$9,700,000 above the budget request.

HISTORIC PRESERVATION FUND

Appropriations, 2002	\$74,500,000
Budget estimate, 2003	67,000,000
Committee recommenda- tion	67,000,000

The Committee recommends \$67,000,000 for the historic preservation fund, a decrease of \$7,500,000 below the fiscal year 2002 enacted level. The amount provided includes \$34,000,000 in Grants in Aid to States, \$3,000,000 in Grants in Aid to Tribes, \$30,000,000 for the Save America's Treasures program.

CONSTRUCTION

Appropriations, 2002	\$387,668,000
Budget estimate, 2003	322,384,000
Committee recommenda- tion	322,826,000

The Committee recommends \$322,826,000 for construction, a decrease of \$64,842,000 below the fiscal year 2002 enacted level, and an increase of \$442,000 above the budget request. The decrease below the enacted level is attributable, in large part, to one-time security costs provided as a result of the September 11, 2001, terrorist attacks. The Committee recommends the following distribution of funds:

National Park Service Construction

Project	Committee recommendation
Acadia NP, ME (rehab bridges)	\$3,351,000
Acadia NP, ME (upgrade utilities/ camp)	5,171,000
Adams NP, MA (p/d visitor cen- ter)	541,000
American, Saipan (upgrade water system)	858,000
Apostle Islands NL, WI (upgrade utility system)	1,030,000
Arches NP, UT (replace visitor center)	5,600,000
Bent's Old Fort NHS, CO (new space/restrooms)	1,325,000
Big Bend NP, TX (rehab/expand water system)	246,000

Yellowstone NP, WY (rehab hq bldg)	6,396,000
Subtotal	207,078,000
Emergency and Unscheduled Projects	3,500,000
Housing Replacement	12,500,000
Dam Safety	2,700,000
Equipment Replacement	32,460,000
Construction Planning (10 percent), pre-design and Supplementary Services	25,400,000
Construction Program Management and Operations	24,792,000
General Management Planning ...	14,396,000

TOTAL, NPS Construction ... 322,826,000

The Committee has not recommended appropriations for several projects included in the budget request for which funds could not be obligated in fiscal year 2003. The Committee expects the Service to resubmit these projects in the fiscal year 2004 budget request.

Funds provided for the Pacific Coast Immigration Station and the Japanese American History project at the Presidio are for completion of ongoing planning and feasibility studies. All funding for actual construction (estimated at \$7,200,000) will need to be raised through partnerships with the private and non-profit sectors.

Funding has been provided for further design of the Grand Portage Heritage Center at the Grand Portage National Monument. The Committee is aware that initial planning and design has been completed. Nevertheless, the Committee urges the National Park Service to rethink the size and scope of the Grand Portage project and work to downsize the effort.

Within the amounts provided for equipment replacement, not to exceed \$750,000 is to be provided to the Isle Royale National Park for the acquisition of replacement boats.

Within the increases provided for general management planning, the Service is directed to allocate \$490,000 for the continuation of the GMP at the Harpers Ferry National Historical Park. The Service should also initiate special resource studies of the Baranof Museum and the historic sites in Beaufort, South Carolina if these studies are authorized.

The Committee has provided additional funds for construction of the Morris Thompson Visitor and Native Cultural Center, but is concerned that the scope of the project has not yet been fully defined. The funds provided for construction should not be released until the Service and the non-Federal co-operators have briefed the Committee regarding project scope and plans to comply with the requirements of H. Rept. 107-234.

Funding provided for the New Bedford Whaling NHP is for planning activities associated with the interior and exterior rehabilitation of the Corson Building, which the Committee understands is to be donated to the Service for use as an education and community outreach center. Future funding for the project will be contingent upon the Service's ability to complete the donation process.

The Committee expects funding for the New River Gorge NSR to be used for visitor

access improvements (\$275,000), building stabilization and demolition (\$200,000), boundary surveys (\$217,000), and emergency radio equipment (\$176,000).

The Committee recommends \$5,600,000 for the Arches National Park visitor center. In combination with remaining balances from this project in the planning account, these funds will be sufficient to complete the proposed facility.

The Committee concurs with the following modifications to project scopes from the presentation included in the fiscal year 2003 budget justification: Bent's Old Fort (visitor restrooms have already been constructed, but final siting of the proposed structures necessitates higher than anticipated utility hook-up costs); Gateway National Recreation Area (project will not replace facility but will reuse the shell of the existing building and provide viewing opportunities in an alternative way); and Fredericksburg/Spotsylvania National Historical Park (stabilize 14 historic ruins dispersed throughout the park rather than 9 historic ruins in one location).

The Committee recommends \$2,700,000 for the visitor center at Great Basin National Park, with the understanding that this completes the project and that funding for the exhibits, estimated at \$1,100,000, will come from non-Federal sources.

LAND AND WATER CONSERVATION FUND (RESCISSON)

Appropriations, 2002	-\$30,000,000
Budget estimate, 2003	-30,000,000
Committee recommendation	-30,000,000

The Committee recommends a rescission of \$30,000,000 in annual contract authority provided by 16 U.S.C. 460/10a. This authority has not been used in recent years and there are no plans to use it in fiscal year 2002.

LAND ACQUISITION AND STATE ASSISTANCE

Appropriations, 2002	\$274,117,000
Budget estimate, 2003	286,057,000
Committee recommendation	204,005,000

The Committee recommends \$204,005,000 for land acquisition and State assistance, a reduction of \$82,052,000 below the budget request.

The following table shows the Committee recommendation:

<i>Area and State</i>	<i>Committee Recommendation</i>
Big Thicket National Preserve (TX)	\$5,800,000
Black Canyon NP (CO)	300,000
Chickamauga & Chattanooga NMP (TN)	1,030,000
Ebey's Landing National Historical Reserve (WA)	1,100,000
Fredericksburg & Spotsylvania County Battlefields NMP (VA)	1,100,000
Gauley River NRA (WV)	1,750,000
Great Sand Dunes NM & Preserve (CO)	6,500,000
Gulf Islands NS (MS)	10,600,000
Hawaii Volcanoes NP (HI)	10,000,000
Ice Age National Scenic Trail (WI) (Interpretive Center at Cross Plains) ...	200,000
Keweenaw NHP (MI)	600,000
Little Rock Central HS NHS (AR)	130,000
Mississippi National River and Recreation Area (MN)	607,000
Missouri National Recreational River (SD)	1,000,000
Mojave NP (CA)	2,000,000
Piscataway Park (MD)	500,000
Richmond Battlefield Park (VA)	2,000,000

<i>Area and State</i>	<i>Committee Recommendation</i>
Sleeping Bear Dunes National Lakeshore (MI)	2,000,000
Timucuan Ecological Preserve (FL)	3,000,000
Valley Forge NHP (PA)	2,000,000
Virgin Islands NP (USVI)	1,500,000
Western Arctic National Parklands (AK)	1,200,000
Grant to the State of Florida (FL) (Everglades Restoration)	19,500,000
Use of carryover/anticipated slippage	-5,000,000
Subtotal, Acquisitions	68,417,000
Acquisition Management	12,588,000
Emergencies/Hardships	4,000,000
Inholdings/Exchanges	4,000,000
Total, NPS Federal Land Acquisition	89,005,000
Stateside Grants	111,000,000
State Assistance Grant Administration	4,000,000
Subtotal, NPS State Land Acquisition	115,000,000
Total, NPS Land Acquisition and State Assistance	204,005,000
The amount provided for the acquisition of Cat Island at the Gulf Island National Seashore is based on the latest information available to the Committee regarding the acreage and value of lands to be acquired. The Committee is aware that discussions are ongoing among the National Park Service, the landowner and third party interests, and that the amount required to complete phase two of this acquisition may change. The Service should keep the Committee informed of the status of these discussions.	
The Committee is aware that legislation has been enacted to authorize the acquisition of Pemberton's Headquarters for inclusion in Vicksburg National Military Park. The Committee directs the Service to complete the acquisition using acquisition balances available at the Park, together with additional carryover balances if necessary.	
The Committee has provided \$200,000 to purchase the interpretive center at Cross Plains along the Ice Age Scenic Trail. The Committee understands that this amount combined with the current unobligated balance is sufficient to complete the purchase.	
The Committee authorizes the purchase of land from willing sellers under the Inholding program of the National Park Service (Units of the System authorized before fiscal year 1960) without referring the offers to the Committee for approval unless the acquisition is more than the approved appraisal and said appraised value is greater than \$500,000.	
In addition to the amount provided for State Assistance, the Committee has provided significant funding for State and Tribal Wildlife Grants through the U.S. Fish and Wildlife Service. The Committee believes that these two programs can be mutually beneficial, as grants supported by the State Assistance program may be beneficial to non-game wildlife and grants supported by the State and Tribal Wildlife Grants program may have associated recreation benefits. The Committee urges the Department to work with States, tribes and other relevant stakeholders to explore opportunities to develop synergies between these two programs.	
ENERGY AND MINERALS	
U.S. GEOLOGICAL SURVEY	
SURVEYS, INVESTIGATIONS, AND RESEARCH Appropriations, 2002	\$914,002,000

Budget estimate, 2003	867,338,000
Committee recommendation	914,617,000

The Committee recommends an appropriation of \$914,617,000 for the United States Geological Survey (USGS) for fiscal year 2003. This amount is \$615,000 above the fiscal year 2002 enacted level and \$47,279,000 above the budget estimate. The detail table at the back of the report displays the Committee's proposed distribution of funds among the Survey's activities.

The Committee is dismayed that the budget estimate for the USGS once again recommends large reductions to valuable ongoing programs. Proposals such as the elimination of the Toxic Substances Hydrology program, a significant reduction to the National Water-Quality Assessment program (NAWQA), and the elimination of Federal funding for the Water Resources Research Institutes are but a few of the recommendations included in the budget estimate. The Committee does not agree to the termination or substantial weakening of programs for which there is strong support from a broad constituency, and a demonstrated value through the significant amount of non-Federal funds that are leveraged through most USGS programs. In the Committee's view, it will remain difficult to find the resources to support new directions for the Survey as long as the annual need to restore large amounts to base programs continues. As budget planning gets underway for fiscal year 2004, the Committee urges those involved in the process to bear in mind the expressed public support across the United States for the Survey's programs.

National Mapping Program.—The Committee recommends \$131,077,000 for the National Mapping Program, a decrease of \$200,000 from the current year enacted level and \$1,783,000 above the budget estimate. Funds are restored in the amount of \$809,000 for the urban dynamics program. An amount of \$1,000,000 is provided for the Alaska mapping activities, of which \$500,000 is designated for the North Slope project described in the budget. An additional \$500,000 is provided for an Alaska Mapping Initiative that will be undertaken in other areas of the State.

Geologic hazards, resources and processes.—The Committee recommends \$234,903,000 for the geologic hazards, resources and processes activity. This amount is an increase of \$2,093,000 above the fiscal year 2002 enacted level and \$10,247,000 above the budget estimate. The Committee recommendation includes a transfer of \$4,000,000 from the National Park Service to support a Critical Ecosystems Initiative in the Everglades. Decreases from the budget request include \$1,200,000 for oil and gas assessments and \$500,000 for geothermal assessments. The Committee does not agree with many of the program reductions assumed in the budget request and has restored the following: \$4,987,000 for the National Cooperative Geologic Mapping program; \$500,000 to continue coastal erosion studies in North Carolina; \$500,000 to continue land subsidence studies in southeastern Louisiana; \$1,300,000 for regional aggregate materials projects; \$1,500,000 to complete the Alaska Minerals-at-Risk project; \$474,000 for geological surveys of the Yukon Flats; and \$1,000,000 for the purchase and installation of volcano monitoring equipment at Shemya, AK. In agreement with the budget request, the following programs are continued within base

funds: \$1,250,000 for South Carolina/Georgia Coastal Erosion and Coastal Monitoring Studies, of which \$250,000 is intended for the South Carolina coastal erosion monitoring program; \$3,000,000 for operations of the Alaska Volcano Observatory; and \$250,000 for the cooperative program at the University of Hawaii-Hilo. Within the coastal program, over \$4,000,000 is dedicated specifically to research efforts in the Gulf of Mexico.

Water resources investigations.—The Committee recommends \$206,626,000 for water resources investigations. This amount is \$3,800,000 above the current year enacted level and \$28,798,000 above the budget estimate. The Committee does not concur with the proposed reductions and has restored programmatic funds as follows: \$4,796,000 for the NAWQA program; \$12,919,000 for the Toxic Substances Hydrology program, which was proposed for elimination in its current form; \$2,096,000 for streamgaging activities; \$5,500,000 for the Water Resources Research Institutes program, which was proposed for elimination; \$200,000 for a study of extremophilic life in the Berkeley Pit Lake; \$299,000 for toxic materials studies at Lake Champlain, making the total available for this project \$485,000; \$450,000 for monitoring water resources in Hawaii; and \$195,000 for the Noyes Slough study. A decrease from the budget request of \$1,000,000 has been assumed for the proposed United States-Mexico border environmental health initiative. Other increases to the budget estimate include:

\$220,000 for a cladophora bloom algae study in coastal Maui; \$500,000 for the Community Rivers Coalition watershed protection project; and \$500,000 for the Rathdrum Prairie/Spokane Valley aquifer study. The Committee understands that a State or local match for the Federal contributions will be provided for both the Alaska and Idaho/Washington projects. Within the funds restored for the Toxic Substances Hydrology program, \$500,000 is continued for the Gulf Hypoxia project. The Committee continues the direction that allows for up to \$1,000,000 to be expended for the Survey's participation in the work of the Long-Term Estuary Assessment Group.

Biological Resources.—The Committee recommends \$166,927,000 for Biological Resources. This amount is \$538,000 above the fiscal year 2002 enacted level and \$6,446,000 above the budget estimate. The Committee does not agree with many of the reductions proposed in the budget estimate and has restored the following: \$750,000 to continue a mining study on the Mark Twain National Forest in cooperation with the Water Resources activity and the Forest Service; \$180,000 for Yukon River Chum Salmon research; and \$400,000 to continue molecular biology studies at the Leetown Science Center. An amount of \$500,000 is included for a Pallid Sturgeon study; this study is funded currently at \$300,000, but was proposed for elimination. An amount of \$100,000 is included for continuation of the Diamondback Terrapin study, currently funded at \$250,000 and also proposed for elimination in the budget request. Other increases above the budget request include: \$1,000,000 for the National Biological Information Infrastructure (NBII); \$1,000,000 for a DNA bear sampling study in Montana; \$300,000 for a multidisciplinary water resources study to be conducted at the Leetown Science Center; and \$1,000,000 for additional work at Lake Tahoe, which will include \$500,000 for a decision support system, and \$500,000 to initiate the process for a

place-based study. Within the funds provided for the DNA bear sampling study, USGS may hire temporary FTEs as necessary to support the project. The Committee notes the interest that has been expressed in establishing additional State cooperative research units and, therefore, directs the Survey to develop a priority system for expanding the current program. The Committee supports the NBII but encourages the USGS to more broadly distribute the funding throughout the system and to place greater emphasis on scientific data for the management of public lands.

Science Support.—The Committee recommends \$85,734,000 for science support activities. This amount is \$521,000 below the current year enacted level and \$370,000 below the budget request. Changes to the budget request include decreases of \$1,625,000 for accessible data transfer work and \$1,000,000 for the Enterprise GIS proposal.

Facilities.—The Committee recommends \$89,350,000 for facilities costs. This amount is \$95,000 below the current year enacted level and \$375,000 above the budget request. The proposed increase to the budget estimate is provided to the Leetown Science Center for planning and design of much needed additional space at the facility.

General.—The Committee has concurred with proposed budget increases for fixed costs and reductions to travel costs throughout USGS activities. Other streamlining savings proposed in the budget request have not been assumed because no additional information was provided to assure the Committee that savings would not be gained by reducing programmatic activities.

The Committee urges the Survey, in conjunction with other agencies of the Department, to work with Alaska educators in developing a science initiative that could involve school children in the Earth and life sciences programs of the Department of the Interior.

The Committee is deeply concerned by the ongoing spread of Chronic Wasting Disease (CWD) among wildlife populations around the country, and is especially troubled by the possibility of cross-species transmission of CWD. The Committee is aware of the Interagency Plan for Assisting States, Federal Agencies, and Tribes in Managing Chronic Wasting Disease in Wild and Captive Cervids, and believes it is appropriate for USGS to expand its collaborative work with outside research institutions to conduct prion research focusing on chronic wasting disease treatments for impacted wildlife populations.

MINERALS MANAGEMENT SERVICE

ROYALTY AND OFFSHORE MINERALS MANAGEMENT

Appropriations, 2002	\$150,667,000
Budget estimate, 2003	164,222,000
Committee recommendation	164,322,000

The Committee recommends an appropriation of \$164,322,000 for royalty and offshore minerals management, an increase of \$100,000 above the budget request. A comparison of the budget estimates and the Committee recommendations are shown in the following table. The funding amounts set out below are at the activity level. Additional details on funding for sub-activities within the various appropriations accounts for the Service are set out in a table in the back of this report.

	Budget estimate	Committee recommendation	Change
Outer Continental Shelf lands	\$137,543,000	\$137,643,000	+\$100,000
Royalty management	83,284,000	83,284,000
General administration	43,625,000	43,625,000

Outer Continental Shelf lands	\$137,543,000	\$137,643,000	+\$100,000
Royalty management	83,284,000	83,284,000
General administration	43,625,000	43,625,000

	Budget esti- mate	Committee rec- ommendation	Change
Use of receipts	– 100,230,000	– 100,230,000
Total, royalty and offshore minerals management	164,222,000	164,322,000	+ 100,000

Within the funds for the leasing and environmental program in the Outer Continental Shelf lands activity, the Committee has provided \$150,000 for the Alaska Eskimo Whaling Commission to ensure that proposed OCS sales in Alaska properly consider the impacts of offshore drilling on whale migration patterns and whaling activities.

The Committee has provided an increase of \$1,600,000 above the budget request for the resource evaluation program in the Outer Continental Shelf lands activity. The increase is comprised of \$800,000 for the Center for Marine Resources and Environmental Technology to support exploration and sustainable development of seabed minerals and \$800,000 for the Marine Mineral Technology Center in Alaska to conduct assessments on potential gold reserves off the coast of Nome.

Within the funds provided for the regulatory program in the Outer Continental Shelf lands activity, \$1,400,000 shall be for the Offshore Technology Research Center to

perform research for MMS through the cooperative agreement dated June 18, 1999.

Within the funds provided for the information management program in the Outer Continental Shelf lands activity, the Committee has reduced the request for the agency's e-government initiative by \$2,000,000.

The Committee has continued bill language that was included in the fiscal year 2002 appropriations act under general provisions, Department of the Interior to prohibit the use of funds for Outer Continental Shelf leasing and development in certain areas.

The Committee understands that the process of projecting offsetting receipts 1 to 2 years into the future is an uncertain business. Recognizing this, the Committee has again given the Minerals Management Service the authority to utilize receipts accruing from rental rates in effect prior to August 5, 1993 to augment primary sources of receipts should this be necessary to reach the operating levels intended by the Committee.

	Budget esti- mate	Committee rec- ommendation	Change
Environmental restoration	\$162,000	\$162,000
Environmental protection	79,159,000	79,159,000
Technology development and transfer	12,593,000	12,593,000
Financial management	485,000	485,000
Executive direction	12,693,000	12,693,000
Subtotal, regulation and technology	105,092,000	105,092,000
Civil penalties	275,000	275,000
Total, regulation and technology	105,367,000	105,367,000

ABANDONED MINE RECLAMATION FUND (Definite, Trust Fund)	Committee recom- menda- tion	191,745,000
Appropriations, 2002	\$203,455,000	
Budget estimate, 2003	174,035,000	

	Budget esti- mate	Committee rec- ommendation	Change
Environmental restoration	\$156,987,000	\$174,697,000	+ \$17,710,000
Technology development and transfer	4,164,000	4,164,000
Financial management	6,179,000	6,179,000
Executive direction	6,705,000	6,705,000
Total	174,305,000	191,745,000	+ 17,710,000

The Committee has included \$10,000,000 for the Appalachian clean streams initiative to address acid mine drainage problems.

The Committee remains concerned about the \$6,800,000,000 backlog of high priority mine reclamation work that must be completed throughout the Nation. Accordingly, the Committee has restored \$17,710,000 of the reduction the administration proposed for the abandoned mine reclamation program within the environmental restoration activity. The increase is comprised of \$17,500,000 for State grants and \$210,000 for Federal high priority reclamation projects.

Bill language.—As in prior years, the bill includes language related to the conduct of the abandoned mine land program. The Committee has included language that maintains the Federal emergency reclamation program and limits expenditures in any one State to 25 percent of the total appropriated for Federal and State-run emergency programs.

Language also is included in the bill to permit States to use prior-year carryover funds from the emergency program without being subject to the 25-percent statutory limitation per State. The Committee also has recommended language in the bill which would fund minimum program State grants at \$1,500,000 per State as well as language which provides \$10,000,000 to be used for projects in the Appalachian clean streams initiative.

The Committee also has included language specific to the State of Maryland authorizing the State to set aside the greater of \$1,000,000 or 10 percent of the total of the grants made available to the State under title IV of the Surface Mining Control and Reclamation Act of 1977, subject to specific provisions identified in the bill language.

INDIAN AFFAIRS

BUREAU OF INDIAN AFFAIRS

OPERATION OF INDIAN PROGRAMS

Appropriations, 2002

\$1,799,809,000

	Budget esti- mate	Committee rec- ommendation	Change
TRIBAL BUDGET SYSTEM			
Tribal Priority Allocations	\$775,534,000	\$775,534,000
Other Recurring Programs	596,192,000	595,642,000	– \$550,000
Non-Recurring Programs	67,510,000	72,360,000	+ 4,850,000

OIL SPILL RESEARCH	
Appropriations, 2002	\$6,105,000
Budget estimate, 2003	6,105,000
Committee recommenda- tion	6,105,000

The Committee recommends an appropriation of \$6,105,000 for oil spill research, which is equal to the request.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

REGULATION AND TECHNOLOGY

Appropriations, 2002	\$103,075,000
Budget estimate, 2003	105,367,000
Committee recommenda- tion	105,367,000

The Committee recommends an appropriation of \$105,367,000 for regulation and technology, which is equal to the budget estimate. A comparison of the budget estimate and the Committee recommendation is as follows:

	Budget esti- mate	Committee rec- ommendation	Change
Environmental restoration	\$162,000	\$162,000
Environmental protection	79,159,000	79,159,000
Technology development and transfer	12,593,000	12,593,000
Financial management	485,000	485,000
Executive direction	12,693,000	12,693,000
Subtotal, regulation and technology	105,092,000	105,092,000
Civil penalties	275,000	275,000
Total, regulation and technology	105,367,000	105,367,000

is an increase above the budget estimate of \$17,710,000. A comparison of the Committee recommendation and the budget estimate is as follows:

	Budget esti- mate	Committee rec- ommendation	Change
Environmental restoration	\$156,987,000	\$174,697,000	+ \$17,710,000
Technology development and transfer	4,164,000	4,164,000
Financial management	6,179,000	6,179,000
Executive direction	6,705,000	6,705,000
Total	174,305,000	191,745,000	+ 17,710,000

	Budget estimate, 2003	
Committee recommenda- tion	1,837,110,000	

The Committee recommends \$1,837,110,000 for the operation of Indian programs, an increase of \$55,826,000 above the fiscal year 2002 enacted level, and \$18,525,000 above the budget estimate. Increases include internal transfers and fixed costs in the amount of \$13,381,000. In addition, the Committee has included the full amount requested for the Bureau's trust and trust reform programs; restored cuts made in vital education programs, including the Tribally Controlled Community Colleges; and increased law enforcement funding in the area of border security. The following table provides a comparison of the budget estimate and Committee recommendations in the major programmatic areas:

	Budget esti- mate	Committee rec- ommendation	Change
Total, Tribal Budget System	1,439,236,000	1,443,536,000	+ 4,300,000
BIA OPERATIONS			
Central Office Operations	72,490,000	72,490,000
Regional Office Operations	64,223,000	64,223,000
Special Programs and Pooled Overhead	261,161,000	275,386,000	+ 14,225,000
Total, BIA Operations	397,874,000	412,099,000	+ 14,225,000
Total, Operation of Indian Programs	1,837,110,000	1,855,635,000	+ 18,525,000

Additional details on the funding for the Bureau's Activities are provided in a table in the back of this report.

Tribal priority allocation.—The Committee recommends \$775,534,000 for tribal priority allocations (TPA), an increase of \$23,378,000 above the fiscal year 2002 enacted level and fully commensurate with the budget estimate. The increase above the enacted level includes \$6,637,000 in internal transfers and fixed costs.

Other recurring programs.—The Committee recommends \$595,642,000 for other recurring programs, an increase of \$8,674,000 above the fiscal year 2002 enacted level, and \$550,000 below the budget estimate. The amount provided includes \$5,993,000 in internal transfers and fixed costs. Increases above the budget estimate include \$4,000,000 for operating grants for Tribally Controlled Community Colleges, \$550,000 for the western Washington shellfish program (Boldt decision), \$3,100,000 for the Timber-Fish-Wildlife project, \$300,000 for the Great Lakes Area Resource Management (Circle of Flight) program, and \$3,400,000 for the following Tribal Management/Development programs: the Alaska Sea Otter Commission (\$100,000), the Wetlands/Waterfowl Management program (\$600,000), the Upper Columbia United Tribes (\$320,000), the Bering Sea Fishermen's Association (\$800,000), the Lake Roosevelt Management program (\$630,000), the bison program (\$600,000), and the Chugach Regional Resources Commission (\$350,000). Decreases below the budget estimate are \$11,900,000 for the proposed school privatization which includes \$5,000,000 from ISEP (Program Adjustments), \$2,000,000 from student transportation, \$1,900,000 from facilities operations and maintenance, and \$3,000,000 from administrative cost grants.

Non-recurring programs.—The Committee recommends \$72,360,000 for non-recurring programs, a decrease of \$438,000 below the fiscal year 2002 enacted level, and an increase of \$4,850,000 above the budget estimate. The amount provided includes a decrease of \$554,000 in internal transfers and fixed costs. Increases above the budget estimate include \$2,000,000 for the Rocky Mountain Technology Foundation's distance learning project, \$1,000,000 for the rural Alaska fire program, \$1,500,000 for the Cheyenne River Sioux Tribe's prairie management plan, and \$350,000 for legal services provided by the Alaska Legal Services program.

Central office operations.—The Committee recommends \$72,490,000 for central office op-

erations, an increase of \$14,384,000 above the fiscal year 2002 enacted level, and fully commensurate with the budget estimate. The amount provided includes \$230,000 in internal transfers and fixed costs. Major programmatic increases above the enacted level include \$5,700,000 for trust services, and \$5,500,000 for information resources technology.

Regional office operations.—The Committee recommends \$64,223,000 for regional office operations, an increase of \$1,544,000 above the fiscal year 2002 enacted level, and fully commensurate with the budget estimate. The amount provided includes \$44,000 in internal transfers and fixed costs.

Special programs/pooled overhead.—The Committee recommends \$275,386,000 for special programs/pooled overhead, an increase of \$8,284,000 above the fiscal year 2002 enacted level, and \$14,225,000 above the budget estimate. The amount provided includes \$1,031,000 in internal transfers and fixed costs. Increases above the budget estimate included the following: In education, \$200,000 for the pre-law preparatory course conducted by the Law Institute for American Indians; in public safety and justice, \$3,000,000 for additional detention center services, and \$2,175,000 for additional costs associated with existing law enforcement responsibilities along the Canadian and Mexican borders; in community development, \$3,000,000 for the United Tribes Technical College, \$350,000 for the United Sioux Tribes Development Corporation, \$1,500,000 for the Crownpoint Institute of Technology, \$1,500,000 for the Western Heritage Center's tribal history and distance learning project, \$500,000 for the American Indian and Alaska Native child abuse/child welfare study, \$1,000,000 for the Alaska Native Aviation Training program, and \$1,000,000 for continuation of work on the Yuit Elitnauviat People's Learning Center. Funding for the aviation training program and the Learning Center is contingent upon compliance with the reporting requirements mandated in House Report 107-234 and Senate Report 107-36, respectively. Funding is provided to the Bureau to formulate and pilot an American Indian and Alaska Native child abuse/child welfare program which addresses the adverse effects of child abuse on American Indians and Alaska Natives. In developing the program, the Bureau is instructed to consult with tribes and social service agencies to identify communities willing to participate in the development of

and execution of a pilot project aimed at reducing child abuse and addressing the effects of child abuse. The Committee is aware of interest expressed by the Oglala Sioux Tribe and the Alaska Children's Alliance. The Committee recommends that the Bureau strongly consider utilizing partnerships with these entities, other tribal organizations, State social services and/or non-profit agencies for execution of the program.

General.—The Committee directs the Bureau of Indian Affairs to establish a Tribal Service Area for the Samish Indian Nation consistent with the tribe's existing Tribal Service Area for services provided by the Indian Health Service. When the service area is completed, the Samish Indian Nation shall be included in the Bureau's budget for services and programs offered to Samish tribal members, in addition to the tribe's existing funding for "Other Aid to Tribal Government." The Committee directs the Secretary to report to the Congress within 60 days of enactment of this Act on the status of the actions taken in regard to the Samish Indian Nation.

Fractionated ownership of trust assets continues to be one of the primary hurdles to implementing effective trust management within BIA. Consolidating these fractionated interests is one of the most effective means of ameliorating a problem that grows worse every year. The Indian Land Consolidation Pilot has been successful on those few reservations where it has been implemented. No additional funds were requested for fiscal year 2003 because of past years' unexpended balances being carried over. Not later than September 30, 2003, the Department should report to the Congress on the obstacles that are preventing the full implementation of not only the pilot but the implementation of the Indian Land Consolidation Act Amendments of 2000.

CONSTRUCTION

Appropriations, 2002	\$357,132,000
Budget estimate, 2003	345,252,000
Committee recommenda- tion	348,252,000

The Committee recommends \$348,252,000 for construction, a decrease of \$8,880,000 from the fiscal year 2002 enacted level, and an increase of \$3,000,000 from the budget estimate. The following table provides a comparison of the budget estimate with the Committee recommendations:

	Budget esti- mate	Committee rec- ommendation	Change
Education	\$292,717,000	\$295,717,000	+ \$3,000,000
Public safety and justice	5,046,000	5,046,000
Resources management	39,173,000	39,173,000
General administration	2,182,000	2,182,000
Construction management	6,134,000	6,134,000
Total, Construction	345,252,000	348,252,000	+ 3,000,000

The Committee's recommendation for education construction includes \$125,223,000 for replacement school construction. This amount will address the needs of the next six schools on the Bureau's priority list. Those schools are: Santa Fe Indian School,

Kayenta Boarding School, Tiospa Zina Tribal School, Wide Ruins Boarding School, Low Mountain Boarding School, and St. Francis Indian School. In addition, the Committee has recommended \$3,000,000 for the tribal

school construction demonstration program established in fiscal year 2001.

INDIAN LAND AND WATER CLAIMS SETTLEMENTS

AND MISCELLANEOUS PAYMENTS TO INDIANS

Appropriations, 2002	\$60,949,000
----------------------------	--------------

Budget estimate, 2003	57,949,000	The Committee recommends \$57,949,000 for Indian land and water claims settlements	and miscellaneous payments to Indians. Funding is provided as follows:
Committee recommendation	57,949,000		

		Budget esti- mate	Committee rec- ommendation	Change
White Earth Land Settlement Act (Admin)		\$625,000	\$625,000
Hoopo-Yurok settlement fund		250,000	250,000
Pyramid Lake water rights settlement		142,000	142,000
Ute Indian water rights settlement		24,728,000	24,728,000
Rocky Boy's		5,068,000	5,068,000
Shiwits Band Settlement		16,000,000	16,000,000
Santo Domingo Pueblo Settlement		3,136,000	3,136,000
Colorado Ute Settlement		8,000,000	8,000,000
Total		57,949,000	57,949,000

The Committee understands that the funding provided for the Santa Domingo Pueblo settlement is in the second year of a 3-year obligation. The Committee also understands that, following the provision of funds in fiscal year 2003, the Bureau's remaining obligation is approximately \$10,000,000. As such, the Committee expects the Bureau to include this final installment in its fiscal year 2004 budget.

INDIAN GUARANTEED LOAN PROGRAM ACCOUNT

Appropriations, 2002	\$4,986,000	Appropriations, 2002	\$78,950,000
----------------------------	-------------	----------------------------	--------------

		Budget esti- mate	Committee rec- ommendation	Change
Territorial assistance:				
Office of Insular Affairs		\$5,295,000	\$5,295,000
Technical assistance		7,461,000	12,461,000	+ \$5,000,000
Maintenance assistance fund		2,300,000	2,300,000
Brown tree snake		2,350,000	2,350,000
Insular management controls		1,491,000	1,491,000
Coral reef initiative		500	500
Subtotal, territorial assistance		19,397,000	24,397,000	+ 5,000,000
American Samoa: Operations grants		23,100,000	23,100,000
Northern Mariana Islands: Covenant grants		27,720,000	27,720,000
Total, assistance to territories		70,217,000	75,217,000	+ 5,000,000

Territorial assistance.—The Committee recommends \$24,397,000 for territorial assistance, which is \$5,000,000 above the request.

The increase above the request is for Impact of Compact aid to the State of Hawaii and Healthcare Association of Hawaii.

American Samoa operations grants/American Samoa construction.—The Committee recommends \$23,100,000 for operations grants to American Samoa, which is equal to the request.

CNMI/Covenant grants.—The Committee recommends \$27,720,000 for covenant grants. Included in this amount is \$11,000,000 for CNMI construction, \$4,580,000 for impact aid to Guam, \$840,000 for impact aid to CNMI, \$10,140,000 for American Samoa, and \$1,160,000 for the CNMI immigration, labor, and law enforcement initiative. The Committee un-

derstands that the statutory matching requirement for CNMI construction funds will expire during fiscal year 2003 so that \$5,580,000 of these funds will be available without any match from the CNMI. Given the economic difficulties facing the Commonwealth, the Committee has chosen not to reinstitute the matching requirement at this time.

The Committee is aware of the serious challenges facing the Virgin Islands in complying with certain environmental standards. Accordingly, the committee directs the Secretary of the Interior, acting through the Deputy Assistant Secretary for Insular Affairs, to develop, in consultation with the Government of the Virgin Islands and other relevant Federal agencies, a Federal-local fi-

nancing plan to accomplish the environmental infrastructure improvements required by Federal law. Such plan shall be submitted to the authorizing committees of jurisdiction and to the committees on appropriations of the Congress no later than June 15, 2003.

COMPACT OF FREE ASSOCIATION

Appropriations, 2002	\$23,245,000
Budget estimate, 2003	20,745,000
Committee recommenda- tion	20,925,000

The Committee recommends \$20,925,000 for compact of free association, which is \$180,000 above the request. A comparison of the Committee recommendation to the budget estimate follows:

		Budget esti- mate	Committee rec- ommendation	Change
Compact of free association—Federal services		\$7,354,000	\$7,354,000
Mandatory payments—Program grant assistance		12,000,000	12,000,000
Enewetak support		1,391,000	1,571,000	+ \$180,000

Total, compact of free association		20,745,000	20,925,000	+ \$180,000
--	--	------------	------------	-------------

Federal services assistance.—The Committee recommends \$7,354,000 for Federal services assistance, equal to the budget request.

Program grant assistance.—The Committee recommends \$12,000,000 for program grant assistance, equal to the budget request.

Enewetak support.—The Committee recommends \$1,571,000 for Enewetak support, which is \$180,000 above the request. The additional funds shall be used for repairs to the

shipping vessel which provides food to Enewetak as part of the Enewetak Food and Agriculture Program.

	DEPARTMENTAL MANAGEMENT SALARIES AND EXPENSES
Appropriations, 2002	\$69,946,000
Budget estimate, 2003	78,596,000
Committee recommenda- tion	72,427,000

The Committee recommends \$72,427,000 for departmental management, an increase of \$2,481,000 above the fiscal year 2002 enacted level of \$69,946,000, and a decrease of \$6,169,000 from the budget estimate. The amount provided includes \$2,176,000 in fixed costs. A comparison of the Committee recommendations and the budget estimate follows:

		Budget esti- mate	Committee rec- ommendation	Change
Departmental direction		\$13,405,000	\$13,405,000
Management and coordination		26,455,000	26,455,000
Hearings and appeals		8,198,000	8,198,000

	Budget estimate	Committee recommendation	Change
Central services	26,429,000	23,528,000	-\$2,901,000
Bureau of Mines workers compensation/unemployment	4,109,000	841,000	-3,268,000
Total	78,596,000	72,427,000	-6,169,000

Pursuant to the Cardiac Arrest Survival Act of 2000, the Department of Health and Human Services and the General Services Administration have released guidelines for agencies wishing to implement automated external defibrillator (AED) programs. The Department of the Interior is in the process of ordering additional AED units, and has already installed more than 450 AEDs at various locations. The Committee feels that a comprehensive review of the Department's AED program is appropriate at this time. The Department should submit a report to the Committee that describes the number of AEDs currently in place or on order for DOI facilities, their geographic distribution, their distribution among DOI bureaus, current maintenance and training costs, and the Department's long term plans for AED placement, service and training. This report should be submitted by March 1, 2003.

OFFICE OF THE SOLICITOR

SALARIES AND EXPENSES

Appropriations, 2002	\$45,000,000
Budget estimate, 2003	47,773,000
Committee recommendation	47,773,000

The Committee recommends an appropriation of \$47,773,000 for salaries and expenses of the Office of the Solicitor, an increase of \$2,773,000 over the fiscal year 2002 enacted level. Within the funds provided, the Solicitor's Office shall hire one full time attorney to work exclusively with the Indian Arts and Crafts Board in enforcement of the Indian Arts and Crafts Act. The office shall report to the Committee upon the hiring of this attorney.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

Appropriations, 2002	\$34,302,000
Budget estimate, 2003	36,659,000
Committee recommendation	36,239,000

The Committee recommends an appropriation of \$36,239,000 for the Office of Inspector General.

The amount provided includes the program changes proposed in the budget request and \$861,000 for fixed costs, an amount consistent with that provided for other departmental bureaus.

OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS

FEDERAL TRUST PROGRAMS

Appropriations, 2002	\$99,224,000
Budget estimate, 2003	151,027,000
Committee recommendation	151,027,000

The Committee recommends an appropriation of \$151,027,000 for the Office of the Special Trustee for American Indians, which is the same level as the budget request and \$51,803,000 above the fiscal year 2002 enacted level. The Committee continues to recognize the dire need for the Federal Government to improve Indian trust management and continues to support the Bureau's efforts in this regard.

INDIAN LAND CONSOLIDATION PROJECT

Appropriations, 2002	\$10,980,000
Budget estimate, 2003	7,980,000
Committee recommendation	10,980,000

The Committee recommends \$10,980,000 for Indian land consolidation, which is the same

as the fiscal year 2002 enacted level and \$3,000,000 above the budget request. The increase reflects the Committee's decision to consolidate the proposed Federal priority land acquisitions and exchanges program with the Indian land consolidation program.

NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION

NATURAL RESOURCE DAMAGE ASSESSMENT FUND

Appropriations, 2002	\$5,497,000
Budget estimate, 2003	5,538,000
Committee recommendation	5,538,000

The Committee recommends an appropriation of \$5,538,000 for natural resource damage assessments, which is the same as the request.

GENERAL PROVISIONS DEPARTMENT OF THE INTERIOR

The Committee has included in "General Provisions, Department of the Interior" various legislative provisions affecting the Department of the Interior. Several of these provisions have been carried in previous years and others are proposed new this year. The provisions are:

SEC. 101. Provides Secretarial authority to transfer program funds for expenditures in cases of emergency when all other emergency funds are exhausted.

SEC. 102. Provides for expenditure or transfer of funds by the Secretary in the event of actual or potential emergencies including forest fires, range fires, earthquakes, floods, volcanic eruptions, storms, oilspills, grasshopper and Mormon cricket outbreaks, and surface mine reclamation emergencies.

SEC. 103. Provides for use of appropriated funds for operation of garages, shops, warehouses, and similar facilities.

SEC. 104. Provides for use of appropriated funds for contracts, rental cars and aircraft, certain library memberships, and certain telephone expenses.

SEC. 105. Provides for use of appropriated funds to purchase uniforms or to provide a uniform allowance.

SEC. 106. Provides that contracts issued for services and rentals with appropriated funds be in effect for a period not to exceed 12 months.

SECS. 107-110. Prohibits the use of funds provided in the act for certain offshore leasing and related activities pursuant to the revised 5-year plan for Outer Continental Shelf oil and gas leasing.

SEC. 111. Provides that advance payments under the Indian Self-Determination and Education Assistance Act may be (1) invested only in obligations of the United States, or in obligations or securities that are guaranteed or insured by the United States, or mutual (or other) funds registered with the Securities and Exchange Commission and which only invest in obligations of the United States or securities that are guaranteed or insured by the United States; or (2) deposited only into accounts that are insured by an agency or instrumentality of the United States, or are fully collateralized to ensure protection of the funds, even in the event of a bank failure.

SEC. 112. Provides for the transfer of unobligated balances from the Bureau of Indian Affairs or the Office of the Special Trustee for American Indians for expenditure or transfer for Indian trust management activities.

SEC. 113. Allows the hiring of administrative law judges to address the Indian probate backlog.

SEC. 114. Permits the redistribution of tribal priority allocation and tribal base funds to alleviate funding inequities.

SEC. 115. Continues a provision requiring the allocation of Bureau of Indian Affairs postsecondary schools funds consistent with unmet needs.

SEC. 116. Provides for the protection of lands of the Huron Cemetery for religious and cultural uses and as a burial ground.

SEC. 117. Continues a provision that land and other reimbursement the Secretary may receive in the conveyance of the Twin Cities Research Center may be used for the benefit of the National Wildlife Refuge System in Minnesota and for activities authorized by Public Law 104-134.

SEC. 118. Authorizes the National Park Service to enter into a cooperative agreement with the Golden Gate National Parks Association to provide fee-based education, interpretive and visitor service functions within the Crissy Field and Fort Point areas of the Presidio.

SEC. 119. Allows the Bureau of Land Management to retain revenues derived from the sale of surplus seedlings.

SEC. 120. Continues a cost-shared tribal school construction program. This item is discussed in more detail under the Bureau of Indian Affairs construction account.

SEC. 121. Permits the sale of improvements and equipment at the White River Oil Shale Mine in Utah, and the retention and use of those funds by the Bureau of Land Management and the General Services Administration.

SEC. 122. Authorizes the Secretary of the Interior to use helicopters or motor vehicles to capture and transport horses and burros at the Sheldon and Hart National Wildlife Refuges.

SEC. 123. Prohibits use of funds to approve the transfer of lands on South Fox Island, Michigan, until Congress has authorized such transfer.

SEC. 124. Provides certain contract authority regarding transportation at Zion National Park in Utah and Rocky Mountain National Park in Colorado.

SEC. 125. Removes outdated grant restriction on a heritage education park in Fairbanks, Alaska to allow for rehabilitation of the park.

SEC. 126. Prohibits the use of funds to issue a Record of Decision or to take any action to issue a right-of-way grant for a pipeline or associated facilities related to the Cadiz groundwater storage and dry-year supply program.

SEC. 127. Authorizes use of previously appropriated funds to plan the John Adams Presidential Memorial.

SEC. 128. Provides that funds appropriated and remaining available in the Construction (Trust Fund) account of the National Park Service at the completion of all authorized projects shall be available for the rehabilitation and improvement of Going-to-the-Sun Road in Glacier National Park.

SEC. 129. Directs the National Park Service to make interim payments as part of the Glacier Bay compensation program. The Committee notes that the Park Service has been developing this program for more than three years, and most fishermen, fishing-dependent businesses, and local communities have still not received compensation.

SEC. 130. Extends certain authorities applicable to the Department of Interior's National Business Center.

SEC. 131. Clarifies the effect of section 134 of the Department of the Interior and Related Agencies Appropriations Act, 2002 regarding certain lands in the State of Kansas.

SEC. 132. Makes technical correction to Public Law 99-548 regarding the conveyance of land to the city of Mesquite, Nevada.

SEC. 133. Authorizes transfer of funds to meet operational needs at Midway Atoll National Wildlife refuge.

SEC. 134. Amends Public Law 107-331, which authorizes appropriations for the construction of the Native American Cultural Center and Museum.

SEC. 135. Modifies authorities applicable to the Department of the Interior franchise fund.

TITLE II—RELATED AGENCIES DEPARTMENT OF AGRICULTURE FOREST SERVICE

The Committee notes the Administration's proposal to eliminate funding for prior year Congressional earmarks in favor of its own priorities. The Committee does not accept the Administration's action to present a budget that does not continue these worthwhile and significant projects, and expects the agency to continue funding those programs to a level that will assure projects are completed and objectives accomplished. Except as otherwise noted in this report, the agency is directed to continue funding of the congressional priorities noted in prior years where work remains to be accomplished or

where such priorities require several years to accomplish.

FOREST AND RANGELAND RESEARCH

Appropriations, 2002	\$241,304,000
Budget estimate, 2003	242,798,000
Committee recommendation	247,804,000

The Committee recommends an appropriation of \$247,804,000, which is an increase of \$5,006,000 above the budget request, \$6,500,000 above the enacted level.

The administration proposed redirections of \$35,900,000 of ongoing research in order to fund a number of its new initiatives. The Committee does not concur with this proposal which would have led to the closure of a number of critical research facilities and required the termination or reassignment of 275 employees. Over the past 15 years the research program has lost approximately half of its research scientists and the Committee cannot concur with a proposal to further erode the base research program. Accordingly, funding for activities in the research program shall not be reduced from the enacted level, including funding levels for all prior year congressional projects that were proposed for elimination in fiscal year 2003 such as \$2,000,000 for the Northeastern States Research Cooperative, and \$1,130,000 for the research laboratory in Sitka, Alaska.

Increases above the enacted level are \$5,000,000 for the Forest Inventory and Analysis program in order to further the goal of reducing cycle times for completing inventory work and to expand the program to additional States, \$1,000,000 for the global cli-

mate change initiative as proposed in the budget request, and \$500,000 to improve research and technology development capacity for the Northeastern Research Station at Morgantown, WV to reduce the impacts to eastern forests from invasive pathogens, parasites, and insects. Within the increase for the Forest Inventory and Analysis program, \$500,000 shall be provided to support programs at the Mississippi Institute for Forest Inventory. The Committee believes the Institute offers a unique opportunity to interpret, expand, and process Forest Inventory and Analysis data in a manner making data more readily available and useful to non-Federal entities. Within the funds provided for research \$500,000 shall be granted to the Joe Skeen Institute for Rangeland Restoration to perform research work on significant rangeland restoration initiatives.

STATE AND PRIVATE FORESTRY

Appropriations, 2002	\$291,221,000
Budget estimate, 2003	277,363,000
Committee recommendation	297,472,000

The Committee recommends an appropriation of \$297,472,000, an increase of \$6,251,000 above the enacted level, and \$20,109,000 above the request.

The following table provides a comparison of the budget estimate with the Committee recommendations. Additional details on funding for activities below the budget line item level are provided in a table in the back of this report.

	Budget estimate	Committee recommendation	Change
Forest health management	\$81,380,000	\$83,412,000	+\$2,032,000
Cooperative fire protection	30,393,000	30,893,000	+500,000
Cooperative forestry	160,554,000	177,667,000	+17,113,000
International forestry	5,036,000	5,500,000	+464,000
Total, State and private forestry	277,363,000	297,472,000	+20,109,000

Forest health management

Cooperative fire protection

Cooperative forestry

International forestry

Total, State and private forestry

Forest Health Management.—The Committee recommends \$83,412,000 for forest health management, which is \$15,108,000 above the enacted level. The Committee has provided \$44,374,000, an increase of \$1,070,000 above the enacted level, for Federal lands forest health management which is for fixed cost increases.

The Committee continues support of the cooperative effort between the State of Vermont and the University of Vermont for the Vermont forest monitoring cooperative, and has provided \$300,000 for this effort.

The Committee has provided \$14,000,000 to support the administration's new proposed fund to rapidly respond to invasive species problems. This is \$2,032,000 more than the request. The Committee has included bill language that assures these funds are available for the full spectrum of invasive species including pests, pathogens, and plants. Within the funds provided is \$5,000,000 for research and control of Sudden Oak Death, including \$2,500,000 for control and containment activities and \$2,500,000 for research. The Committee expects the Forest Service to focus these activities in States which have had Sudden Oak Death outbreaks such as California, Arkansas, and Mississippi or in States where the risk of outbreaks is high due to the high concentration of oak species.

The Committee is disappointed that the Forest Service has not fulfilled its stewardship responsibility of controlling leafy spurge on its land, particularly in the Dakota Grasslands. Within the funds provided, the Committee encourages the Forest Service to make controlling leafy spurge a priority. The Committee has included \$300,000 for the Dakota Prairie Grasslands Unit to control leafy spurge on the National Grass-

lands. The Committee urges the Forest Service to spend these additional funds on management activities on the ground.

Cooperative Fire Protection.—The Committee recommends \$30,893,000 for cooperative fire protection, which is \$530,000 above the enacted level. The Committee has provided \$25,853,000 for State fire assistance and \$5,040,000 for volunteer fire assistance. Additional funding for these programs is also included under the Wildland Fire Management heading.

Within the funds provided for State fire assistance, \$500,000 shall be provided to the Cook Inlet Tribal Council in the form of an advance direct lump sum payment to perform work in areas infested by the spruce bark beetle which has caused severe fire danger on the Kenai Peninsula.

Cooperative Forestry.—The Committee recommends \$177,667,000 for cooperative forestry, which is \$9,624,000 below the enacted level.

The Committee has provided \$32,221,000 for the forest stewardship program which is \$950,000 below the enacted level. Within the funds provided, \$1,000,000 is for the Chesapeake Bay program to support forestry efforts in the Chesapeake Bay watershed, and \$300,000 above the normal allocation for Utah is to support forestry education for private landowners with timber resources on their lands.

The Committee has provided \$74,000,000 for the forest legacy program which is \$9,000,000 above the enacted level. The distribution of these funds is set out in the table below.

Project Name	Senate
Coon Gulf, phase 2, AL	\$2,000,000
Perdido River, AL	2,000,000

Project Name	Senate
East Sacramento Oak Woodlands, phase 1, CA	2,600,000
Spruce Mountain Ranch, CO	1,875,000
Stone House Brook Project, CT	1,100,000
Green Horizons, phase 2, CT	2,000,000
Sheffield, GA	100,000
McCandless Ranch, HI	1,300,000
Yellow River Forest Project, IA	700,000
Coon Creek Woods, IL	95,000
Kyte River, IL	305,000
Mt. Tea Ridge, IN	1,600,000
Eagleville Pines, MA	835,000
Karney Brook Ridge, MA	525,000
Pintail, MD	150,000
Deer Creek, MD	150,000
Leavitt Plantation, ME	600,000
West Branch, phase 2, ME	2,900,000
North Duluth, phase 1&2, MN	400,000
Schiemann, MT	600,000
Thompson Fisher, phase 4, MT	4,000,000

New State start-up, ID	500,000
Forest Service program administration and AON Planning	3,890,000
Total	74,000,000

The Committee has provided \$37,750,000 for the urban and community forestry program which is \$1,750,000 above the enacted level. Increases above the enacted level are \$250,000 for the Chicago Green Streets program, \$400,000 for a total of \$750,000 for the Cook County Forest Preserve to conduct environmental and technical work associated with the Preserve's forestry programs in Illinois, \$300,000 for tree planting work in cooperation with the city of Milwaukee, Wisconsin, and \$800,000 to establish the Urban Watershed Forest Research and Demonstration Project Cooperative to help support existing applied research, technology transfer, and urban natural resources stewardship in Baltimore, Maryland. The Committee directs that \$350,000 of the amount for the Cooperative be provided to the Northeastern Research Station for work associated with the Baltimore Ecosystem Study and the remainder of the funds be provided to the Parks and People Foundation of Baltimore.

The Committee notes that the administration proposed to eliminate the Economic Action Program for fiscal year 2003. However, the Committee believes that the EAP pro-

grams are crucial to assisting rural timber-dependent communities, many of which have acute economic problems. Accordingly, the Committee recommends \$28,700,000 for the Economic Action Programs (EAP), which is \$28,700,000 above the request and \$5,980,000 below the enacted level. The allocation of funds for EAP is set out in the table below:

Economic Recovery Program	\$6,730,000
Rural Development Program	4,400,000
Forest Products Conservation & Recycling Program	1,300,000
Wood in Transportation Program	1,920,000

Special Projects:

Four Corners Sustainable Forestry, NM	1,000,000
Kake Land Exchange, AK	2,000,000
KY mine reforestation	1,000,000
Mountain Studies Institute, CO	500,000
Envir. Sci. & Public Policy Research, ID	500,000
Rural Technology Transfer Initiative, WA	900,000
Fuels-in-schools biomass program, MT	750,000
Wood Education & Resource Center, WV	2,700,000
Lake Tahoe erosion control grants, CA	3,000,000
Little Sandy River, fish passage improvements, OR	2,000,000
Subtotal special projects	14,350,000
Total Economic Action Programs	28,700,000

The Committee notes that the administration also proposed eliminating the Pacific Northwest Assistance program for fiscal year 2003. While the Committee has not provided a separate budget line for the Pacific Northwest Assistance programs as in prior years, it has added an additional \$3,045,000 above the enacted level for the economic recovery program component of EAP. The Committee expects that the agency will allocate these funds with special consideration for projects in the Pacific Northwest.

The Committee directs that no less than \$2,500,000 of the funds provided for Rural Development Through Forestry shall be allocated to the Northeast-Midwest program.

The Committee has included bill language to facilitate the transfer of the \$2,000,000 provided within Economic Action Programs to Kake Tribal Corporation in order to implement the Kake Tribal Corporation Land Transfer Act.

International Forestry.—The Committee recommends \$5,500,000 for the international forestry program which is \$237,000 above the enacted level. The Committee encourages continued focus of the program on efforts to protect the habitat of migratory birds and on invasive species control.

NATIONAL FOREST SYSTEM

Appropriations, 2002	\$1,331,439,000
Budget estimate, 2003	1,366,475,000
Committee recommendation	1,352,999,000

The Committee recommends an appropriation of \$1,352,999,000, an increase of \$21,560,000 above the enacted level, and a decrease of \$13,476,000 compared to the request.

The distribution of the Committee's recommendations are as follows:

	Budget esti-mate	Committee rec-ommendation	Change
Land management planning	\$72,195,000	\$72,195,000
Inventory and monitoring	176,306,000	176,306,000
Recreation, heritage and wilderness	252,444,000	252,444,000
Wildlife and fish habitat management	133,506,000	133,506,000
Grazing management	35,850,000	35,850,000
Forest products	264,753,000	263,753,000	-\$1,000,000
Vegetation and watershed management	190,644,000	190,644,000
Minerals and geology management	53,635,000	53,635,000
Landownership Management	91,016,000	91,016,000
Law enforcement operations	80,142,000	80,500,000	+358,000
Valles Caldera National Preserve	984,000	3,150,000	+2,166,000
Expedited consultations	15,000,000	-15,000,000
Total, National Forest System	1,366,475,000	1,352,999,000	-13,476,000

Land Management Planning.—The Committee recommends \$248,501,000 for land management planning activities, including inventorying and monitoring, which is \$4,827,000 above the enacted level. The Committee has provided \$72,195,000 for land management planning, for national forest and grassland planning activities and \$176,306,000 for inventorying and monitoring. The increases above the enacted level are \$4,827,000 for fixed costs. Within the funds provided, a total of \$600,000 is to support adaptive management activities at Lake Tahoe.

Recreation, heritage, and wilderness.—The Committee recommends \$252,444,000 for recreation, heritage, and wilderness programs, which is an increase of \$6,944,000 above the enacted level. Increases above the enacted level are \$6,444,000 for fixed costs, and \$500,000 to prepare an Environmental Impact Statement to identify ways to mitigate the impacts of helicopter charter flights in the Tongass National Forest on the community of Juneau, Alaska. Within the funds provided for recreation, \$450,000 shall be allocated to the Arthur Carhart Wilderness Training Center in Missoula, Montana.

Wildlife and fish habitat management.—The Committee recommends \$133,506,000 for life and fisheries habitat management, which is an increase of \$1,659,000 above the enacted level. The increase is for fixed costs. Within the funds provided, \$250,000 shall be allocated to efforts to protect and improve river, stream banks and habitat areas of the Battle Kill river.

Grazing management.—The Committee recommends \$35,850,000 for grazing management, an increase of \$1,075,000 above the enacted level. The increase is for fixed costs.

Forest products.—The Committee recommends \$263,753,000 for forest products, a decrease of \$2,587,000 below the enacted level, and \$1,000,000 below the budget request. The Committee has retained bill language included in prior years which allows the funds provided for timber pipeline supply above the normal regional allocation on the Tongass National Forest to be allocated between the Capital Improvement and Maintenance and the National Forest System appropriation. The amount provided this purpose is \$4,000,000.

The Committee expects the Forest Service to continue preparing and submitting its quarterly reports on the timber sales program. The Committee recommends that the agency identify the volumes that are offered,

sold, and harvested categorized as net merchantable sawtimber in its quarterly reports.

Vegetation and watershed management.—The Committee recommends \$190,644,000 for vegetation and watershed management, which is an increase of \$531,000 above the enacted level. Increases above the enacted level are for fixed costs. Within the funds provided, \$305,000 is for pine restoration work on the Mark Twain National Forest, \$300,000 is for the Wasatch Canyon Water Quality Initiative, \$135,000 is for a hydrology study on the Monongahela National Forest, and \$1,000,000 for a total of \$4,550,000 is for wetland and riparian restoration, urban lot management, and other activities at Lake Tahoe.

Minerals and geology management.—The Committee recommends \$53,635,000 which is \$4,679,000 above the enacted level. The increase is for fixed costs.

Land ownership management.—The Committee recommends \$91,016,000 for land ownership management, which is \$2,582,000 above the enacted level. The increase is for fixed costs.

Law enforcement operations.—The Committee recommends \$80,500,000 for law enforcement operations, which is \$1,500,000 above the enacted level. Within the funds

provided, a total of \$950,000 is for counterdrug operations on the Daniel Boone National Forest.

Valles Caldera.—The Committee has provided \$3,150,000 for the Valles Caldera Trust for management activities at the Baca Ranch, New Mexico. This is equal to the enacted level.

Expedited consultations.—The Committee has not established a new budget line item in the amount of \$15,000,000 as proposed by the administration for expedited Endangered Species Act consultations. The agency received \$11,000,000 for such consultations in fiscal year 2001 under the wildland fire management appropriation and was unable to spend more than \$1,000,000 of these funds. If the agency demonstrates the ability to efficiently utilize funds for consultation purposes in the future, the Committee would reconsider such a request. While the Committee has not established a new budget line item with additional consultations, it has given the agency the authority to transfer up to \$15,000,000 within the existing budget structure for this purpose in the administrative provisions section.

Quincy Library Group.—The Committee recommends \$26,000,000 for the Quincy Library Group project, which is equal to the enacted level and the request. Funding for this project is included in both the national forest system and wildland fire management appropriation accounts.

Land Between the Lakes NRA.—The Committee has included funding in various accounts such that not less than \$8,400,000 shall be used by the Forest Service for management of the Land Between the Lakes NRA.

Lake Tahoe.—The Committee notes that it has provided a total of \$22,000,000 for activities in the Lake Tahoe Basin. This is an increase of \$980,000 above the enacted level and \$15,150,000 above the budget request. Within the National Forest System appropriation these amounts are allocated as follows, \$600,000 within inventorying and monitoring to support adaptive management work, \$150,000 within recreation, heritage, and wilderness management, \$50,000 within wildlife and fisheries management, \$4,550,000 within

vegetation and watershed management, and \$350,000 for landownership management. To the extent that a change in the program of work is necessitated by a change in priorities in the field the distribution of these funds may be revised upon notification and consultation with the Committee.

The Committee has also provided \$3,000,000 within the State and Private Forestry appropriation, \$3,000,000 in the Capital Improvement and Maintenance appropriation, \$3,000,000 within the Wildland Fire Management Appropriation, \$350,000 from the Roads and Trails fund, and approximately \$6,950,000 within the Land Acquisition appropriation for activities at Lake Tahoe.

WILDLAND FIRE MANAGEMENT

Appropriations, 2002	\$1,560,349,000
Budget estimate, 2003	1,369,138,000
Committee recommendation	1,349,291,000

The Committee recommends a total appropriation of \$1,349,291,000 for wildland fire management activities, which is \$19,847,000 below the budget request.

The Committee recommendation includes full funding of the request for wildland fire preparedness in the amount of \$600,703,000. The Committee has also provided a total of \$420,699,000 for wildland fire suppression which is equal to the request.

The Committee has provided a total of \$327,889,000 for other fire operations which is \$19,847,000 below the budget request. Within this amount, the Committee has fully funded the hazardous fuels reduction request of \$228,109,000. Of the funds provided for hazardous fuels, a total of \$8,000,000 shall be allocated for fuels reduction work at Lake Tahoe, including work on urban lots, and \$1,500,000 shall be allocated to the Santa Fe National Forest for the implementation of the Santa Fe Watershed Thinning Project.

The Committee continues to believe that reduction of fuel loads on national forests and in areas adjacent to communities in the wildland-urban interface is critical for protecting the environment and the safety of the public. The Committee also believes that the agency should focus on treating acres in

the urban interface where lives and property are most at risk. Accordingly, the agency is directed to spend 70 percent of its hazardous fuels funds on treating acres in the wildland urban interface as proposed in the agency's budget request. If for any reason the Forest Service is unable to attain these levels, it shall promptly notify the Committee explaining why the agency was unable to expend such sums.

The remaining funds within the other fire operations appropriations account are allocated as follows, \$3,624,000 for rehabilitation and restoration as proposed in the request; \$21,427,000 for research and development; \$8,000,000 for the joint fire science program as proposed in the request; \$46,555,000 for the State fire assistance program; \$8,240,000 for volunteer fire assistance as proposed in the request; and \$11,934,000 for forest health activities as proposed in the request.

Within the funds provided for research and development, \$1,700,000 shall be allocated to the National Center for Landscape Fire Analysis at the University of Montana for the Forest Service share of this cooperative project. Of these funds, \$200,000 shall be used for the FRAMES project in conjunction with the University of Idaho.

Within the amounts provided for State fire assistance, \$6,000,000 is for the Municipality of Anchorage and the Matanuska Susitna Borough in the form of an advance direct lump sum payment to perform work in areas affected by the spruce bark beetle which has created a severe fire risk to large areas of Southcentral Alaska.

CAPITAL IMPROVEMENT AND MAINTENANCE

Appropriations, 2002	\$546,188,000
Budget estimate, 2003	552,088,000
Committee recommendation	543,656,000

The Committee recommends \$543,656,000 for capital improvement and maintenance, which is \$2,532,000 below the enacted level.

The Committee agrees to the following distribution of funds:

	Budget estimate	Committee recommendation	Change
Facilities	\$200,500,000	\$168,652,000	-\$29,848,000
Roads	231,893,000	235,566,000	+3,673,000
Trails	68,829,000	69,572,000	+743,000
Infrastructure improvement	50,866,000	69,866,000	+19,000,000
Total, capital improvement and maintenance	552,088,000	543,656,000	-8,432,000

Facilities.—The Committee recommends \$168,652,000 for facilities maintenance and capital improvement, which is a decrease of \$16,795,000 below the enacted level. The funding allocations are set out below.

Facilities Maintenance/ Capital Improvement	\$153,413,000
Franklin County Lake, MS Mystic Ranger District Station, SD	2,400,000
Old Stoney feasibility study, WY	1,500,000
Green Mountain NF, Su- pervisor's Office	300,000
