**SEC. 71002. SEAFOOD IMPORT MONITORING PROGRAM.**

(a) FINDINGS.—Congress finds the following:

(1) It remains the policy of the United States to take action to curtail the global trade in seafood and seafood products derived from illegal, unreported, or unregulated fishing, including the links of such trade to forced labor and transnational organized illegal activity.

(2) The Federal Government and State authorities have implemented measures to prevent United States persons from engaging in illegal, unreported, or unregulated fishing, using forced labor in the production of seafood, and fraudulently concealing relevant information concerning the production of seafood, including—

(A) enhanced enforcement activities by the Coast Guard and effective enforcement by Federal and State authorities of criminal and civil penalties;

(B) actions taken by the National Marine Fisheries Service of the National Oceanic and Atmospheric Administration to enhance traceability of seafood produced in the United States, including actions taken pursuant to division B of the Consolidated Appropriations Act, 2018 (Public Law 115-141; 132 Stat. 400) and the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 et seq.); and

(C) inspections undertaken by the Food and Drug Administration and the Department of Agriculture of aquaculture facilities in the United States.

(3) Seafood that is the result of illegal, unreported, or unregulated fishing, forced labor, or human trafficking may still enter United States commerce as those conditions remain a severe problem in the global fisheries sector, as reflected in reports and studies prepared by the United States International Trade Commission (USITC), the International Labour Organization (ILO), and the Food and Agriculture Organization of the United Nations (FAO).

(4) According to a study and model by the USITC published in March 2021, nearly 11 percent of total United States seafood imports and more than 13 percent of United States imports caught at sea in 2019 were derived from illegal, unreported, or unregulated fishing.

(5) As recognized by the FAO, traceability of fish and fishery products is critical for verifying the integrity of a supply chain and ensures the quality and safety of the fishery products of the supply chain, the legality of such products, and that such products originate from fisheries that are sustainably managed.

(6) Effective implementation of the Agreement on Port State Measures to Prevent, Deter, and Eliminate Illegal, Unreported, and Unregulated Fishing set forth by the Food and Agriculture Organization of the United Nations, done at Rome, Italy November 22, 2009, and entered into force June 5, 2016, including the provisions of the agreement relating to cooperation, will be enhanced by ensuring effective traceability of seafood imported into the United States.

**SEC. 73006. SENSE OF CONGRESS ON LEADERSHIP AT WORLD TRADE ORGANIZATION.**

(a) FINDINGS.—Congress makes the following findings:

(1) The United States had led the formation, as well as reform, of rules governing the multilateral trading system since World War II.

(2) The United States is a founding member of the World Trade Organization (in this section referred to as the “WTO”) and a key architect of the organization.

(3) The United States secured important commitments in the WTO to facilitate trade in goods and services, to prevent the application of non-scientific restrictions on United States agriculture, and to protect United States intellectual property.

(4) The United States uses the rules of the WTO to benefit workers, farmers, fishers, and businesses in the United States by facilitating access to the 90 percent of the world’s consumers who live outside the borders of the United States.

(5) The fundamental purpose of the WTO is to create space for members to negotiate with each other, and the WTO reserves to those members exclusively the right to nego-

tiate and adopt rules that reduce and eliminate trade barriers and discriminatory treatment.

(6) The prompt settlement of disputes in which a member of the WTO considers that its rights are being impaired by the actions of another member is essential to the functioning of the WTO and the maintenance of a proper balance between the rights and obligations of members.

(7) The WTO’s dispute settlement function, including in particular the Appellate Body, has increasingly failed to enforce the rules of the WTO in a timely manner, and has usurped the negotiating prerogative of members by creating new obligations and rights that are inconsistent with or not included in the rules negotiated by members.

(8) The creation of those obligations and rights undermines—

(A) the WTO’s negotiating function by discouraging members from making concessions; and

(B) the WTO’s dispute settlement function by encouraging overuse of the process and undermining its legitimacy, including by preventing free market economies from responding to globally trade distortive practices by nonmarket economies.

(9) The WTO does not have sufficient rules to discipline the distortive economic policies of nonmarket economies, such as policies relating to excess capacity and forced technology transfer, the special treatment those economies afford to state-owned enterprises, and their massive and opaque industrial subsidies.

(10) There is long-standing bipartisan support in Congress to reform the WTO to address those failings.

(11) The current presidential administration, as well as prior administrations, raised concerns about the failings described in this subsection and have made reform of the WTO a top priority of United States trade policy.

(12) The United States urges WTO members to work constructively with the United States to assess the reasons why the existing WTO rules have proven inadequate in order to create an atmosphere within the WTO that is conducive to the development of new rules less subject to jurisprudential drift.

(13) The guiding principle for reform of the WTO, and the lens through which WTO members should consider specific reform proposals, is the restoration of the WTO’s capability and capacity for negotiation among members.

(14) The United States has achieved its trade policy objectives through active leadership at the WTO, and an absence of that leadership would be filled by nonmarket economies that are hostile to a host of United States interests.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) while the United States finds value and usefulness in the WTO, in order to fulfill the needs of the United States and other free and open economies in the 21st century, significant reforms are needed;

(2) the United States must therefore continue to demonstrate leadership to achieve reforms that restore the effectiveness of the WTO’s—

(A) negotiating function;

(B) dispute settlement function so that it transparently, efficiently, and fully enforces outcomes negotiated by members rather than usurping their primacy by creating new rights or obligations; and

(C) rules for special and differential treatment to ensure those rules promote advancement for truly developing countries, rather than becoming tools for globally competitive countries, like the People’s Republic of China, to engage in protectionism and market distortions;

(3) the efforts to reform the negotiating function of the WTO should revitalize the negotiating function by providing confidence to members that the WTO operates according to the rules as negotiated and adopted by members;

(4) a revitalized negotiating function must include new rules that reflect the 21st century economy, further combat anticompetitive and protectionist barriers, and ensure disputes are efficiently resolved;

(5) the United States Trade Representative should continue to lead efforts to work with WTO members to pursue reforms at the WTO that—

(A) ensure the dispute settlement mechanism faithfully applies the rules adopted by members, including by undertaking measures to ensure the WTO's Appellate Body does not create new rights and obligations;

(B) improve public confidence in dispute settlement by promoting greater transparency and efficiency in the conduct of proceedings;

(C) redress the consistent failure by certain members to satisfy their notification obligations under various WTO agreements, including through measures that strengthen accountability;

(D) ensure rules for special and differential treatment are appropriately reserved for countries whose state of development and global competitiveness actually warrants such flexibility;

(E) create new rules and structures that can serve the interests of the United States while promoting peace, prosperity, good governance, transparency, effective operation of legal regimes, the rule of law, and free enterprise; and

(F) expand upon the trilateral negotiations currently underway with Japan and the European Union; and

(6) the United States Trade Representative should explore and assess specific reform proposals, including—

(A) pursuing plurilateral agreements that further the interests of the United States while limiting the benefits accruing to countries that are not parties to those agreements;

(B) efforts to ensure that incorrect interpretations by the Appellate Body, including with respect to the Agreement on Safeguards, the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade 1994, and the Agreement on Subsidies and Countervailing Measures, are corrected, and not to be deemed precedential;

(C) new rules and norms to address practices of nonmarket economies, such as practices relating to state-owned enterprises, which certain countries often utilize for objectives that cause severe trade distortions; and

(D) better implementation of existing rules, such as the prohibition in paragraph 4 of Article XIV of the General Agreement on Tariffs and Trade on currency manipulation, to ensure that those rules are effective to preserve the rights of free market economies.

It is the policy of the United States to sustain economic pressure on the Government of the Democratic People's Republic of Korea (referred to in this section as the “DPRK”) until the regime undertakes concrete, verifiable actions toward denuclearization, including by—

(1) pressing all nations, including the PRC, to implement and enforce existing United Nations sanctions with regard to the DPRK;

#### TITLE — NATIONAL FAB LAB NETWORK SEC. 1. SHORT TITLE.

This title may be cited as the “National Fab Lab Network Act of 2021”.

#### SEC. 2. FINDINGS.

Congress finds the following:

(1) Scientific discoveries and technical innovations are critical to the economic and national security of the United States.

(2) Maintaining the leadership of the United States in science, technology, engineering, and mathematics will require a diverse population with the skills, interest, and access to tools required to advance these fields.

(3) Just as earlier digital revolutions in communications and computation provided individuals with the internet and personal computers, a digital revolution in fabrication will allow anyone to make almost anything, anywhere.

(4) These creations include elements of a typical household basket of goods (furnishings, apparel, food production equipment, shelter, transportation, education and communication, recreation, and other goods and services), personal technology, means for personal expression, the production of digital fabrication machinery, community design, and manufacturing capability.

(5) The Center for Bits and Atoms of the Massachusetts Institute of Technology (CBA) has contributed significantly to the advancement of these goals through its work in creating and advancing digital fabrication facilities, or “fab labs” in the United States and abroad.

(6) Such digital fabrication facilities may include MakerSpaces, Hackerspaces, and other creative spaces that use digital fabrication as a platform for education, innovation, entrepreneurship, personal expression, public access, and social impact.

(7) Such digital fabrication facilities provide a model for a new kind of national laboratory that operates as a network, linking local facilities for advanced manufacturing, providing universal access, cultivating new literacies, and empowering communities.
