(d) PREFERENCES FOR PROCUREMENT ACTIONS OR SOLICITATIONS.—

(1) IN GENERAL.—In carrying out the pilot program, the Secretary of Defense shall give a preference described in paragraph (2) for any procurement action or solicitation by a non-public partner who has entered into a public-private partnership with the Secretary in the source selection process if such non-public partner uses an arsenal of the Department of the Army that is owned and operated by the United States Government as a partner in any type of contractual agreement with the United States Government.

(2) PREFERENCE DESCRIBED.—A preference described in this paragraph is the addition of 20 percent to the price of any offer by a non-public partner that does not use an arsenal of the Department of the Army that is owned and operated by the United States Government as a partner in its bid for the same procurement action or solicitation described in paragraph (1).

(3) FURTHER PREFERENCE.—In selecting non-public partners under paragraph (1), the Secretary of Defense shall give preference to non-public partners that—

(A) utilize the Advanced Manufacturing Center of Excellence of the Army; and

(B) ensure not less than 25 percent of the activities under the partnership are performed by employees of the Department of Defense.

(e) REPORT REQUIRED.—

(1) IN GENERAL.—Not later than one year after the date of the enactment of this Act, the Secretary of Defense shall submit to the appropriate congressional committees a report on the activities carried out under pilot program, including a description of any operational challenges identified.

(2) ELEMENTS.—The report required under paragraph (1) shall include the following:

(A) A breakout, by relevant budget accounts, of workload at an arsenal of the Department of the Army that is owned and operated by the United States Government that was achieved in the prior fiscal year, whether directly or through public-private partnerships under the pilot program.

(B) An assessment of relevant budget accounts where such an arsenal can be utilized to meet future procurement needs of the Department of Defense, irrespective of cost.

(C) An outlook of expected workload at each such arsenal during the period covered by the future-years defense program submitted to Congress under section 221 of title 10, United States Code.

(D) The capital investments required to be made at each such arsenal in order to ensure compliance and operational capacity.

(f) DEFINITIONS.—In this section:

(1) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term ''appropriate congressional committees'' means—

(A) the Committee on Armed Services and the Subcommittee on Defense of the Committee on Appropriations of the Senate; and

(B) the Committee on Armed Services and the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives.

(2) NON-PUBLIC PARTNER.—The term ''non-public partner'' means a corporation, individual, university, or nonprofit organization that is not part of the United States Government.

SA 2437. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill S. 4638, to authorize appropriations for fiscal year 2025 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. [____]. DEFIANCE ACT OF 2024.

(a) SHORT TITLE.—This section may be cited as the ''Disrupt Explicit Forged Images and Non-Consensual Edits Act of 2024'' or the ''DEFIANCE Act of 2024''.

(b) FINDINGS.—Congress finds that:

(1) Digital forgeries, often called deepfakes, are synthetic images and videos that look realistic. The technology to create digital forgeries is now ubiquitous and easy to use. Hundreds of apps are available that can quickly generate digital forgeries without the need for any technical expertise.

(2) Digital forgeries can be wholly fictitious but can also manipulate images of real people to depict sexually intimate conduct that did not occur. For example, some digital forgeries will paste the face of an individual onto the body of a real or fictitious

individual who is nude or who is engaging in sexual activity. Another example is a photograph of an individual that is manipulated to digitally remove the clothing of the individual so that the person appears to be nude.

(3) The individuals depicted in such digital forgeries are profoundly harmed when the content is produced, disclosed, or obtained without the consent of those individuals. These harms are not mitigated through labels or other information that indicates that the depiction is fake.

(4) It can be destabilizing to victims whenever those victims are depicted in sexual digital forgeries against their will, as the privacy of those victims is violated and the victims lose control over their likeness and identity.

(5) Victims can feel helpless because the victims—

(A) may not be able to determine who has created the content; and

(B) do not know how to prevent further disclosure of the digital forgery or how to prevent more forgeries from being made.

(6) Victims may be fearful of being in public out of concern that individuals the victims encounter have seen the digital forgeries. This leads to social rupture through the loss of the ability to trust, stigmatization, and isolation.

(7) Victims of non-consensual, sexually intimate digital forgeries may experience depression, anxiety, and suicidal ideation. These victims may also experience the ''silencing effect'' in which the victims withdraw from online spaces and public discourse to avoid further abuse.

(8) Digital forgeries are often used to—

(A) harass victims, interfering with their employment, education, reputation, or sense of safety; or

(B) commit extortion, sexual assault, domestic violence, and other crimes.

(9) Because of the harms caused by non-consensual, sexually intimate digital forgeries, such digital forgeries are considered to be a form of image-based sexual abuse.

(c) CIVIL ACTION RELATING TO DISCLOSURE OF INTIMATE IMAGES.—

(1) DEFINITIONS.—Section 1309 of the Consolidated Appropriations Act, 2022 (15 U.S.C. 6851) is amended—

(A) in the heading, by inserting ''**OR NON-CONSENSUAL ACTIVITY INVOLVING DIGITAL FORGERIES**'' after ''**INTIMATE IMAGES**''; and

(III) by striking ''distribution'' and inserting ''disclosure, solicitation, or possession''; and

(ii) in subparagraph (B)—

(I) by inserting ''identifiable'' before individual;

(II) by inserting ''or digital forgery'' after each place the term ''depiction'' appears; and

(III) by inserting '', solicitation, or possession'' after ''disclosure'';

(C) by redesignating paragraph (4) as paragraph (5);

(D) by striking paragraph (3) and inserting the following:

''(ii) the cost of the action, including reasonable attorney fees and other litigation costs reasonably incurred.

''(B) PUNITIVE DAMAGES AND OTHER RELIEF.—The court may, in addition to any other relief available at law, award punitive damages or order equitable relief, including a temporary restraining order, a preliminary injunction, or a permanent injunction ordering the defendant to delete, destroy, or cease display or disclosure of the intimate visual depiction or digital forgery.

At the end of subtitle F of title XII, add the following:

SEC. 1291. NORTH KOREAN HUMAN RIGHTS.

(a) SHORT TITLE.—This section may be cited as the ''North Korean Human Rights Reauthorization Act of 2024''.

(b) FINDINGS.—Congress makes the following findings:

(1) The North Korean Human Rights Act of 2004 (Public Law 108–333; 22 U.S.C. 7801 et seq.) and subsequent reauthorizations of such Act were the product of broad, bipartisan consensus regarding the promotion of human rights, documentation of human rights violations, transparency in the delivery of humanitarian assistance, and the importance of refugee protection.

(2) The human rights and humanitarian conditions within North Korea remain deplorable and have been intentionally perpetuated against the people of North Korea through policies endorsed and implemented by Kim Jong-un and the Workers' Party of Korea.

(3) According to a 2014 report released by the United Nations Human Rights Council's Commission of Inquiry on Human Rights in the Democratic People's Republic of Korea, between 80,000 and 120,000 children, women, and men were being held in political prison camps in North Korea, where they were subjected to deliberate starvation, forced labor, executions, torture, rape, forced abortion, and infanticide.

(4) North Korea continues to hold a number of South Koreans and Japanese abducted after the signing of the Agreement Concerning a Military Armistice in Korea, signed at Panmunjom July 27, 1953 (commonly referred to as the ''Korean War Armistice Agreement''), and refuses to acknowledge the abduction of more than 100,000 South Koreans during the Korean War in violation of the Geneva Convention.

(5) Human rights violations in North Korea, which include forced starvation, sexual violence against women and children, restrictions on freedom of movement, arbitrary detention, torture, executions, and enforced disappearances, amount to crimes against humanity according to the United Nations Commission of Inquiry on Human Rights in the Democratic People's Republic of Korea.

(6) The effects of the COVID–19 pandemic and North Korea's strict lockdown of its borders and crackdowns on informal market activities and small entrepreneurship have drastically increased food insecurity for its people and given rise to famine conditions in parts of the country.

(7) North Korea's COVID–19 border lockdown measures also include shoot-to-kill orders that have resulted in the killing of—

(A) North Koreans attempting to cross the border; and

(B) at least 1 South Korean citizen in September 2020.

(8) The Chinese Communist Party and the Government of the People's Republic of China are aiding and abetting in crimes against humanity by forcibly repatriating North Korean refugees to North Korea where they are sent to prison camps, harshly interrogated, and tortured or executed.

(9) The forcible repatriation of North Korean refugees violates the People's Republic of China's freely undertaken obligation to uphold the principle of non-refoulement, under the Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (and made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)).

(10) North Korea continues to bar freedom of religion and persecute religious minorities, especially Christians. Eyewitnesses report that Christians in North Korea have been tortured, forcibly detained, and even executed for possessing a Bible or professing Christianity.

(11) United States and international broadcasting operations into North Korea—

(A) serve as a critical source of outside news and information for the North Korean people; and

(B) provide a valuable service for countering regime propaganda and false narratives.

(12) The position of Special Envoy on North Korean Human Rights Issues has been vacant since January 2017, even though the President is required to appoint a Senate-confirmed Special Envoy to fill this position in accordance with section 107 of the North Korean Human Rights Act of 2004 (22 U.S.C. 7817).

(c) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) promoting information access in North Korea continues to be a successful method of countering North Korean propaganda;

(2) the United States Government should continue to support efforts described in paragraph (1), including by enacting and implementing the Otto Warmbier North Korean Censorship and Surveillance Act of 2021, which was introduced by Senator Portman on June 17, 2021;

(3) because refugees among North Koreans fleeing into China face severe punishments upon their forcible return, the United States should urge the Government of the People's Republic of China—

(A) to immediately halt its forcible repatriation of North Koreans;

(B) to allow the United Nations High Commissioner for Refugees (referred to in this section as ''UNHCR'') unimpeded access to North Koreans within China to determine whether they are refugees and require assistance;

(C) to fulfill its obligations under the Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (and made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)) and the Agreement on the upgrading of the UNHCR Mission in the People's Republic of China to UNHCR branch office in the People's Republic of China, done at Geneva December 1, 1995;

(D) to address the concerns of the United Nations Committee Against Torture by incorporating into domestic legislation the principle of non-refoulement; and

(E) to recognize the legal status of North Korean women who marry or have children with Chinese citizens and ensure that all such mothers and children are granted resident status and access to education and other public services in accordance with Chinese law and international standards;

(4) the United States Government should continue to promote the effective and transparent delivery and distribution of any humanitarian aid provided in North Korea to ensure that such aid reaches its intended recipients to the point of consumption or utilization by cooperating closely with the Government of the Republic of Korea and international and nongovernmental organizations;

(5) the Department of State should continue to take steps to increase public awareness about the risks and dangers of travel by United States citizens to North Korea, including by continuing its policy of blocking United States passports from being used to travel to North Korea without a special validation from the Department of State;

(6) the United Nations, which has a significant role to play in promoting and improving human rights in North Korea, should press for access for the United Nations Special Rapporteur and the United Nations High Commissioner for Human Rights on the situation of human rights in North Korea;

(7) the Special Envoy for North Korean Human Rights Issues should be appointed without delay—

(A) to properly promote and coordinate North Korean human rights and humanitarian issues; and

(B) to participate in policy planning and implementation with respect to refugee issues;

(8) the United States should urge North Korea to repeal the Reactionary Thought and Culture Denunciation Law and other draconian laws, regulations, and decrees that manifestly violate the freedom of opinion and expression and the freedom of thought, conscience, and religion;

(9) the United States should urge North Korea to ensure that any restrictions on addressing the COVID–19 pandemic are necessary, proportionate, nondiscriminatory, time-bound, transparent, and allow international staff to operate inside the North Korea to provide international assistance based on independent needs assessments;

(10) the United States should expand the Rewards for Justice program to be open to

North Korean officials who can provide evidence of crimes against humanity being committed by North Korean officials;

(11) the United States should continue to seek cooperation from all foreign governments—

(A) to allow the UNHCR access to process North Korean refugees overseas for resettlement; and

(B) to allow United States officials access to process refugees for possible resettlement in the United States; and

(12) the Secretary of State, through diplomacy by senior officials, including United States ambassadors to Asia-Pacific countries, and in close cooperation with South Korea, should make every effort to promote the protection of North Korean refugees, escapees, and defectors.

''(e) REPORT ON APPOINTMENT OF SPECIAL ENVOY.—Not later than 180 days after the date of the enactment of this subsection and annually thereafter through 2028 if the position of Special Envoy remains vacant, the Secretary of State shall submit a report to the appropriate congressional committees that describes the efforts being taken to appoint the Special Envoy.''.

(g) SUPPORT FOR NORTH KOREAN REFUGEES.—

(1) IN GENERAL.—The Secretary of State and the Secretary of Homeland Security should collaborate with faith-based and Korean-American organizations to resettle North Korean participants in the United States Refugee Admissions Program in areas with existing Korean-American communities to mitigate trauma and mental health considerations of refugees, as appropriate.

(i) REPORT ON HUMANITARIAN EXEMPTIONS TO SANCTIONS IMPOSED WITH RESPECT TO NORTH KOREA.—

(1) SENSE OF CONGRESS.—It is the sense of Congress that—

(A) the continued pursuit by the North Korean regime of weapons of mass destruction (including nuclear, chemical, and biological weapons), in addition to its ballistic missile program, along with the regime's gross violations of human rights, have led the international community to impose sanctions with respect to North Korea, including sanctions imposed by the United Nations Security Council;

(B) authorities should grant exemptions for humanitarian assistance to the people of North Korea consistent with past United Nations Security Council resolutions; and

(C) humanitarian assistance intended to provide humanitarian relief to the people of North Korea must not be exploited or misdirected by the North Korean regime to benefit the military or elites of North Korea.

(IV) any known explanations for the denials and delays referred to in clause (iii); and

(ii) details any action by a foreign government during the covered period that has delayed or impeded humanitarian assistance that was approved by the 1718 Sanctions Committee.

DIVISION F—STATE TRADE EXPANSION PROGRAM

SEC. 6001. SHORT TITLE.

This division may be cited as the ''State Trade Expansion Program Modernization Act of 2024''.

SEC. 6002. FINDINGS.

Congress finds the following:

(1) The State Trade Expansion Program established under section 22(l) of the Small Business Act (15 U.S.C. 649(l)) (in this section referred to as ''STEP'') was created by Congress in 2010 to grow the number of small business concerns (as defined under section 3 of such Act (15 U.S.C. 632) and in this section referred to as a ''small business concern'') that export, increase the value of goods exported by the small business sector, and help businesses identify new markets.

(2) Helping small firms in the United States begin to export or build upon their existing export capacity generates investment in local economies and spurs employment.

(3) Despite 95 percent of global consumers living outside of the United States, less than 4 percent of small business concerns in the United States export their products or services.

(4) Many small business concerns in the United States that could grow by exporting lack the dedicated staff, required technical skills, and necessary budgetary resources for international expansion.

(5) STEP provides vital assistance to small business concerns, particularly to those that have never had the opportunity to sell their products or services abroad.

(6) According to data of the Bureau of the Census, there were approximately 5,900,000 employer firms in the United States as of 2021, of which more than 1,200,000, or approximately 22 percent, were women-owned. However, according to the data, of the 128,460 exporting small firms, only 21,626, or 17 percent, were women-owned firms, meaning that, of small firms, 5 times as many male-owned firms export as women-owned firms. The data show that the overall disparity in business ownership between men and women is even greater among exporting businesses.

(7) According to research conducted by the Small Business Administration, smaller firms tend to produce fewer outputs and are less likely to export than larger firms. Data of the Bureau of the Census show that women-owned firms employ 33 percent fewer workers on average than male-owned firms and are less likely to enjoy the benefits of international trade.

(8) Exporting is a highly effective way for businesses to expand their markets and increase their productivity. As States expand export-enhancing activities through STEP, additional small firms will benefit from the higher demand for their goods and services and increased profits associated with international trade.

(9) During the first 10 years of operation, STEP enabled more than 12,000 small business concerns to explore export opportunities, helping them reach markets in 141 countries.

(10) Congress recognizes that STEP can be improved to reduce the administrative burden for grantees, streamline reporting and compliance requirements, give grantees more flexibility, make grant awards more transparent and consistent, and set more predictable application deadlines.

(11) Congress also recognizes that making awards under STEP more consistent and transparent will simplify the program and incentivize more States to participate so that small business concerns are supported in all States.

SEC. 6003. STREAMLINING APPLICATION, REPORTING, AND COMPLIANCE REQUIREMENTS.

(d) ABILITY TO REVIEW APPLICATIONS AFTER AWARD.—Section 22(l)(3) of the Small Business Act (15 U.S.C. 649(l)(3)), as amended by subsection (a) of this section, is amended by adding at the end the following:

''(II) such State, territory, or commonwealth submits notification of the revision to the Associate Administrator.

''(ii) EXCEPTION.—If a revision under clause (i) reallocates 10 percent or more of the amounts described in the budget plan of the State, territory, or commonwealth submitted under subparagraph (D), the State, territory, or commonwealth may not implement the revised budget plan without the approval of the Associate Administrator, unless the Associate Administrator fails to approve or deny the revised plan within 20 days after receipt of such revised plan.''.

''(4) LIMITATIONS.—

''(A) DEFINITIONS.—In this paragraph—

''(ii) the term 'prior fiscal year' means the most recent fiscal year before the current fiscal year for which a State, territory, or commonwealth received a grant under the program.

''(C) POTENTIAL ADDITIONAL ADJUSTMENTS.—

''(i) EXCEPTION FOR REDUCTION IN APPROPRIATIONS.—Subject to subparagraph (D), if the total amount appropriated for the program for the current fiscal year is less than the amount appropriated for the program for the prior fiscal year, for purposes of applying subparagraph (B), the Administrator shall substitute for 'the amount received by the State, territory, or commonwealth under a grant under the program for the prior fiscal year' the product obtained by multiplying—

''(I) subject to clause (ii) of this subparagraph, the amount received by the State, territory, or commonwealth under a grant under the program for the prior fiscal year; by

''(I) the amount equal to 50 percent of the amount remaining available under the grant under the program to the State, territory, or commonwealth for the prior fiscal year, as of the last day of such period; from

''(II) the amount of the grant under the program to the State, territory, or commonwealth for the prior fiscal year.

''(iii) EXCEPTION FOR INCREASE IN GRANTEES RESULTING IN INSUFFICIENT FUNDING.—If the number of States, territories, or commonwealths participating in the program has increased from the prior fiscal year to such an extent that funding is not sufficient to provide each grantee the minimum amount required under this paragraph (including any reductions under clause (i) or (ii) of this subparagraph, if applicable) the Administrator may make pro rata reductions to the minimum grant amount otherwise required under this paragraph on a one-time basis to ensure that all qualified applicants may receive grants.

''(D) VIOLATIONS.—The amount of a grant to a State, territory, or commonwealth may be less than the minimum amount determined under subparagraph (B) (including any substitution of amounts under clauses (i) and (ii) of subparagraph (C), as applicable), if the State, territory, or commonwealth has been found to have committed a significant violation of the rules or policies of the program.''.

''(bb) FORFEITED GRANTS.—Item (aa) shall not apply to a grant under the program to a State, territory, or commonwealth that was forfeited due to a significant program violation by the State, territory, or commonwealth.

''(cc) RETURN OF GRANT FUNDS.—A State, territory, or commonwealth shall return to the Treasury—

''(AA) any amounts remaining available under a grant under the program at the end of the period of the grant established under subclause (I) that are not available for expenditure under item (aa) of this subclause; and

''(BB) any amounts that are available for expenditure under item (aa) and are not expended on or before the date that is 1 year after the last day of the original period of the grant established under subclause (I).''.

eligible small business concerns that are located in the State to the amount of the grant received by the State.

''(II) 20 percent of amounts remaining shall be proportionally allocated based on the ratio, for the most recently completed grant cycle for which complete reporting data is available, of the total number of activities described in paragraph (2) undertaken by eligible small business concerns participating in the program that are located in the State to the amount of the grant received by the State.

''(III) 15 percent of amounts remaining shall be proportionally allocated based on the ratio, for the most recently completed grant cycle for which complete reporting data is available, of the number of eligible small business concerns participating in the program for the first time that are located in the State to the amount of the grant received by the State.

''(IV) 15 percent of amounts remaining shall be proportionally allocated based on the ratio, for the most recently completed grant cycle for which complete reporting data is available, of the number of eligible small business concerns participating in the program that are located in the State and that engaged in trade outside the United States for the first time to the amount of the grant received by the State.

SEC. 1299E. FINDINGS.

Congress makes the following findings:

(1) According to the United Nations Children's Fund (UNICEF), there are approximately 240,000,000 children and youth with disabilities in the world, including approximately 53,000,000 children under the age of 5.

(2) Millions of children, particularly children with intellectual and other developmental disabilities, are placed in large or small residential institutions and most of those children are left to grow up without love, support, and guidance of a family.

(3) The vast majority of children placed in residential institutions have at least one living parent or have extended family, many of whom would keep their children at home, if they had the support and legal protections necessary to do so.

(4) Leading child protection organizations have documented that children and adolescents raised without families in residential

institutions face high risk of violence, trafficking for forced labor or sex, forced abortion or sterilization, and criminal detention.

(5) According to the Department of State, persons with disabilities face a heightened risk of human trafficking, including children in residential institutions, who may be targeted by traffickers seeking to coerce them to leave or find ways to exploit them.

(6) According to the Department of State, residential institutions have been complicit or directly involved in human trafficking, even extending to the practice of recruiting children for residential institutions for such purposes.

(7) Children with disabilities placed in residential institutions remain vulnerable to human trafficking even after leaving, in part due to the physical and psychological damage such children have suffered, social isolation, and inadequate schooling, and traffickers target individuals who leave or age out of institutions.

SEC. 1299F. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) stigma and discrimination against children with disabilities, particularly intellectual and other developmental disabilities, and lack of support for community inclusion have left people with disabilities and their families economically and socially marginalized;

(2) organizations of persons with disabilities and family members of persons with disabilities are often too small to apply for or obtain funds from domestic or international sources or ineligible to receive funds from such sources;

(3) as a result of the factors described in paragraphs (1) and (2), key stakeholders have often been left out of public policymaking on matters that affect children with disabilities; and

(4) financial support, technical assistance, and active engagement of persons with disabilities and their families is needed to ensure the development of effective policies that protect families, ensure the full inclusion in society of children with disabilities, and promote the ability of persons with disabilities to live in the community with choices equal to others.

Congress recognizes and honors those who have served, or are presently serving, in the diplomatic corps of the United States, in commemorating the 100th Anniversary of the Act entitled, ''An Act for the reorganization and improvement of the Foreign Service of the United States, and for other purposes'' (43 stat. 140, chapter 182), commonly known as the ''Rogers Act of 1924'', which on May 24, 1924, established what has come to be known as the Foreign Service. Today, the Department of State includes more than 13,000 Foreign Service personnel working alongside more than 11,000 civil service personnel and 45,000 locally engaged staff at more than 270 embassies and consulates.

SEC. 9102. WORKFORCE MODERNIZATION EFFORTS.

The Secretary should prioritize efforts to further modernize the Department, including—

(1) making workforce investments, including increasing wages for locally employed staff and providing other non-cash benefits, and hiring up to 100 new members of the Foreign Service above projected attrition to reduce overseas vacancies and mid-level staffing gaps;

(2) utilizing authorities that allow the Department to acquire or build and open new embassy compounds quicker and at significantly less cost to get diplomats on the front lines of strategic competition; and

(3) modernizing legacy systems and human resource processes.

SEC. 9103. TRAINING FLOAT OF THE DEPARTMENT OF STATE FOR CIVIL AND FOREIGN SERVICE PERSONNEL.

(a) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Secretary shall develop and submit to the appropriate congressional committees a strategy to establish and maintain a ''training float'' by January 1, 2027, to allow for a minimum of 8 percent and up to 10 percent of members of the Civil and Foreign Service to participate in long-term training at any given time. (a) SENSE OF CONGRESS.—It is the sense of Congress that—

SEC. 9107. ELECTRONIC MEDICAL RECORDS.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) Foreign Service personnel at the Department serve with distinction in austere places and under challenging conditions around the world with limited healthcare availability;

(2) the use of paper medical records, which require Foreign Service personnel to carry files containing protected health information from post to post, limits the availability of their health information to Department medical personnel during critical health incidents;

(3) electronic medical records are necessary, particularly as the Department opens new embassies in the South Pacific, thousands of miles from the nearest Department medical officer, who may not have access to up-to-date personnel medical files;

(4) the lack of electronic medical records is even more important for mental health records, as the Department only has a small number of regional medical officer psychiatrists and relies heavily on telehealth for most Foreign Service personnel; and

(5) due to the critical need for electronic medical records, it is imperative that the Department address the situation quickly and focus on secure commercially available or other successful systems utilized by public and private sector organizations with a track record of successfully implementing large-scale projects of this type.

(b) ELECTRONIC MEDICAL RECORDS REQUIREMENT.—Not later than December 31, 2027, the Secretary shall have fully implemented an electronic medical records process or system for all Foreign Service personnel and their Eligible Family Members that eliminates reliance on paper medical records and includes appropriate safeguards to protect personal privacy.

(1) any legal constraints or considerations;

SEC. 1291. UNITED STATES LEGAL GOLD AND MINING PARTNERSHIP.

(a) SHORT TITLE.—This section may be cited as the ''United States Legal Gold and Mining Partnership Act''.

(b) FINDINGS.—Congress makes the following findings:

(1) The illicit mining, trafficking, and commercialization of gold in the Western Hemisphere—

(A) negatively affects the region's economic and social dynamics;

(B) strengthens transnational criminal organizations and other international illicit actors; and

(C) has a deleterious impact on the environment, indigenous peoples, and food security.

(2) A lack of economic opportunities and the weak rule of law promote illicit activities, such as illicit gold mining, which increases the vulnerability of individuals in mining areas, including indigenous communities, who have been subjected to trafficking in persons, other human rights abuses, and population displacement in relation to mining activity, particularly in the artisanal and small-scale mining sector.

(3) Illicit gold mining in Latin America often involves and benefits transnational criminal organizations, drug trafficking organizations, terrorist groups, and other illegal armed groups that extort miners and enter into illicit partnerships with them in order to gain revenue from the illicit activity.

(4) Illicit gold supply chains are international in nature and frequently involve—

(A) the smuggling of gold and supplies, such as mercury;

(B) trade-based money laundering; and

(C) other cross-border flows of illicit assets.

(5) In Latin America, mineral traders and exporters, local processors, and shell companies linked to transnational criminal networks and illegally armed groups all play a key role in the trafficking, laundering, and commercialization of illicit gold from the region.

(6) According to a report on illegally mined Gold in Latin America by the Global Initiative Against Transnational Organized Crime—

(A) more than 70 percent of the gold mined in several Latin American countries, such as Colombia, Ecuador, and Peru, is mined through illicit means; and

(i) to Mibiturven, a joint venture operated by the Maduro regime composed of Minerven, a gold processor that has been designated by the Office of Foreign Assets Control of the Department of the Treasury, pursuant to Executive Order 13850 (relating to blocking property of additional persons contributing to the situation in Venezuela), and Marilyns Proje Yatirim, S.A., a Turkish company; or

(ii) through other trafficking and commercialization networks from which the Maduro regime benefits financially.

(7) Illegal armed groups and foreign terrorist organizations, such as the Ejército de Liberación Nacional (National Liberation Army—ELN), work with transnational criminal organizations in Venezuela that participate in the illicit mining, trafficking, and commercialization of gold.

(8) Transnational criminal organizations based in Venezuela, such as El Tren de Aragua, have expanded their role in the illicit mining, trafficking, and commercialization of gold to increase their criminal profits.

(9) Nicaragua's gold exports during 2021 were valued at an estimated $989,000,000 in value, of which

(A) gold valued at an estimated $898,000,000 was shipped to the United States;

(B) gold valued at an estimated $48,700,000 was shipped to Switzerland;

DIVISION E—ECONOMIC DEVELOPMENT REAUTHORIZATION ACT OF 2024

SEC. 5001. SHORT TITLE.

This division may be cited as the ''Economic Development Reauthorization Act of 2024''.

TITLE LI—PUBLIC WORKS AND ECONOMIC DEVELOPMENT

SEC. 5101. FINDINGS AND DECLARATIONS.

Section 2 of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3121) is amended to read as follows:

''SEC. 2. FINDINGS AND DECLARATIONS.

''(a) FINDINGS.—Congress finds that—

''(1) there continue to be areas of the United States—

''(A) experiencing chronic high unemployment, underemployment, outmigration, and low per capita incomes; and

''(B) facing sudden and severe economic dislocations because of structural economic changes, changing trade patterns, certain Federal actions (including environmental requirements that result in the removal of economic activities from a locality), impacts from natural disasters, and transitioning industries, including energy generation, steel production, and mining;

''(2) economic growth in the States, cities, and rural areas of the United States is produced by expanding economic opportunities, expanding free enterprise through trade, promoting resilience in public infrastructure, creating conditions for job creation, job retention, and business development, and by capturing the opportunities to lead the industries of the future, including advanced technologies, clean energy production, and advanced manufacturing technologies;

''(3) the goal of Federal economic development programs is to raise the standard of living for all citizens and increase the wealth and overall rate of growth of the economy by encouraging communities to develop a more competitive and diversified economic base by—

''(A) creating an environment that promotes economic activity by improving and expanding modern public infrastructure;

''(B) promoting job creation, retention, and workforce readiness through increased innovation, productivity, and entrepreneurship; and

''(C) empowering local and regional communities experiencing chronic high unemployment, underemployment, low labor force participation, and low per capita income to develop private sector business and attract increased private sector capital investment;

''(4) while economic development is an inherently local process, the Federal Government should work in partnership with public and private State, regional, Tribal, and local organizations to maximize the impact of existing resources and enable regions, communities, and citizens to participate more fully in the American dream and national prosperity;

''(5) in order to avoid duplication of effort and achieve meaningful, long-lasting results, Federal, State, Tribal, and local economic development activities should have a clear focus, improved coordination, a comprehensive approach, and simplified and consistent requirements;

''(6) Federal economic development efforts will be more effective if the efforts are coordinated with, and build on, the trade, workforce investment, scientific research, environmental protection, transportation, and technology programs of the United States, including through the consolidation and alignment of plans and strategies to promote effective economic development;

''(7) rural communities face unique challenges in addressing infrastructure needs, sometimes lacking the necessary tax base for required upgrades, and often encounter limited financing options and capacity, which can impede new development and long-term economic growth; and

''(8) assisting communities and regions in becoming more resilient to the effects of extreme weather threats and events will promote economic development and job creation.

''(b) DECLARATIONS.—In order to promote a strong, growing, resilient, competitive, and secure economy throughout the United States, the opportunity to pursue, and be employed in, high-quality jobs with family-sustaining wages, and to live in communities that enable business creation and wealth, Congress declares that—

''(1) assistance under this Act should be made available to both rural- and urban-distressed communities;

''(2) local communities should work in partnership with neighboring communities, States, Indian tribes, and the Federal Government to increase the capacity of the local communities to develop and implement comprehensive economic development strategies to alleviate economic distress and enhance competitiveness in the global economy;

''(3) whether suffering from long-term distress or a sudden dislocation, distressed communities should be encouraged to support entrepreneurship to take advantage of the development opportunities afforded by technological innovation and expanding newly opened global markets; and

''(4) assistance under this Act should be made available to modernize and promote recycling, promote the productive reuse of abandoned industrial facilities and the redevelopment of brownfields, and invest in public assets that support travel and tourism and outdoor recreation.''.

(d) AMENDMENTS TO SECTION 989 OF TITLE 10.—

(1) NOTICE.—Subsection (c)(1) of section 989 of title 10, United States Code, is amended by inserting '', including violations punishable under section 207(m) of title 18'' after ''violations of the prohibition''.

(2) REFERRALS FOR PROSECUTION.—Subsection (d) of such section is amended—

(A) in paragraph (1), by striking ''; and'' and inserting a semicolon;

(B) in paragraph (2), by striking the period at the end and inserting ''; and''; and

(C) by adding at the end the following new paragraph:

''(3) refer the case to the Attorney General for prosecution under section 207(m) of title 18.''.

SEC. 1291. SHORT TITLE.

This subtitle may be cited as the ''PLO and PA Terror Payments Accountability Act of 2024''.

SEC. 1292. FINDINGS; STATEMENT OF POLICY.

(a) FINDINGS.—Congress makes the following findings:

(1) The Palestine Liberation Organization and the Palestinian Authority provide hundreds of millions of dollars per year in payments, salaries, and benefits to terrorists and the families of terrorists as part of a system compensation that incentivizes, encourages, rewards, and supports acts of terrorism.

(2) The Palestine Liberation Organization and the Palestinian Authority policies, laws, and regulations that direct, authorize, enact, facilitate, and implement a system of compensation in support of acts of terrorism require payments, salaries, and benefits to terrorists including those who are members and part of organizations designated as foreign terrorist organizations by the Secretary of State under section 219 of the Immigration and Nationality Act (8 U.S.C. 1189), including Hamas and Islamic Jihad, that receive direct support including financial and military assistance from Iran, the leading state sponsor of terrorism in the world.

(3) In 2018, Congress passed the Taylor Force Act (title X of division S of Public Law 115–141; 132 Stat. 1143) into law that calls on the Palestine Liberation Organization and the Palestinian Authority to end their system of compensation that incentivizes, encourages, rewards, and supports acts of terrorism and restricts United States assistance ''that directly benefits the Palestinian Authority'' unless the Secretary of State certifies to Congress that the Palestine Liberation Organization and the Palestinian Authority have met specific conditions including terminating that system of compensation and revoking the policies, laws, and regulations that authorize and implement the system of compensation.

(4) Despite the enactment of the Taylor Force Act, the Palestine Liberation Organization and the Palestinian Authority have continued their system of compensation that incentivizes, encourages, rewards, and supports acts of terrorism.

(5) On October 7, 2023, Hamas, Islamic Jihad, and other Gaza-based terrorist organizations attacked Israel on Shabbat and during the Jewish holiday of Simchat Torah, committing the deadliest attack on the Jewish people since the Holocaust.

(6) On October 7, 2023, Hamas fired thousands of rockets into Israel, deliberately targeting Israeli civilians, and thousands of terrorists invaded Israeli communities—massacring, raping, torturing, decapitating, burning alive, seriously injuring, and kidnapping Israelis and Americans, including men, women, children, babies, and grandparents, and including Holocaust survivors, with children being murdered in front of their parents and parents being murdered in front of their children.

(7) On October 7, 2023, Hamas murdered more than 1,200 who were mostly civilians, and kidnapped more than 240, including Israeli and American men, women, children, babies, and grandparents, and took them to Gaza as hostages.

(b) STATEMENT OF POLICY.—It shall be the policy of the United States to hold the Palestine Liberation Organization and the Palestinian Authority accountable including through the imposition of sanctions for providing payments, salaries, and benefits to terrorists and the families of terrorists as part of a system compensation that incentivizes, encourages, rewards, and supports acts of terrorism.

At the end of subtitle F of title XII, add the following:

SEC. 1291. SENSE OF THE SENATE ON DIGITAL TRADE AND THE DIGITAL ECONOMY.

(a) FINDINGS.—The Senate makes the following findings:

(1) Over half of the world's population, totaling more than 5,000,000,000 people, use the internet.

(2) The digital economy encompasses the economic and social activity from billions of online connections among people, businesses, devices, and data as a result of the internet, mobile technology, and the internet of things.

(3) The Bureau of Economic Analysis found that the digital economy contributed nearly 10.3 percent of United States gross domestic product and supported 8,000,000 United States jobs in 2020.

(4) The digital sector added 1,400,000 new jobs between 2019 and 2022.

(5) United States jobs supported by the digital economy have sustained annual wage growth at a rate of 5.9 percent since 2010, as compared to a 4.2 percent for all jobs.

(6) In 2021, United States exports of digital services surpassed $594,000,000,000, accounting for more than half of all United States services exports and generating a digital services trade surplus for the United States of $262,300,000,000.

(7) Digital trade bolsters the digital economy by enabling the sale of goods on the internet and the supply of online services across borders and depends on the free flow of data across borders to promote commerce, manufacturing, and innovation.

(8) Digital trade has become increasingly vital to United States workers and businesses of all sizes, including the countless small and medium-sized enterprises that use digital technology, data flows, and e-commerce to export goods and services across the world.

(9) Digital trade has advanced entrepreneurship opportunities for women, people of color, and individuals from otherwise underrepresented backgrounds and enabled the formation of innovative start-ups.

(10) International supply chains are becoming increasingly digitized and data driven and businesses in a variety of industries, such as construction, healthcare, transportation, and aerospace, invested heavily in digital supply chain technologies in 2020.

(11) United States Trade Representative Katherine Tai said, ''[T]here is no bright line separating digital trade from the digital economy—or the 'traditional' economy for that matter. Nearly every aspect of our economy has been digitized to some degree.''.

(12) Industries outside of the technology sector, such as manufacturing and agriculture, are integrating digital technology into their businesses in order to increase efficiency, improve safety, reach new customers, and remain globally competitive.

(13) The increasing reliance on digital technologies has modernized legacy processes, accelerated workflows, increased access to information and services, and strengthened security in a variety of industries, leading to better health, environmental, and safety outcomes.

(14) The COVID–19 pandemic has led to increased uptake and reliance on digital technologies, data flows, and e-commerce.

(15) Ninety percent of adults in the United States say that the internet has been essential or important for them personally during the COVID–19 pandemic.

(16) United States families, workers, and business owners have seen how vital access to the internet has been to daily life, as work, education, medicine, and communication with family and friends have shifted increasingly online.

(17) Many individuals and families, especially in rural and Tribal communities, struggle to participate in the digital economy because of a lack of access to a reliable internet connection.

(18) New developments in technology must be deployed with consideration to the unique access challenges of rural, urban underserved, and vulnerable communities.

(19) Digital trade has the power to help level the playing field and uplift those in traditionally unrepresented or underrepresented communities.

(20) Countries have negotiated international rules governing digital trade in various bilateral and plurilateral agreements, but those rules remain fragmented, and no multilateral agreement on digital trade exists within the World Trade Organization.

(21) The United States, through free trade agreements or other digital agreements, has been a leader in developing a set of rules and standards on digital governance and e-commerce that has helped allies and partners of the United States unlock the full economic and social potential of digital trade.

(22) Congress recognizes the need for agreements on digital trade, as indicated by its support for a robust digital trade chapter in the United States-Mexico-Canada Agreement.

(23) Other countries are operating under their own digital rules, some of which are contrary to democratic values shared by the United States and many allies and partners of the United States.

(24) Those countries are attempting to advance their own digital rules on a global scale.

(25) Examples of the plethora of nontariff barriers to digital trade that have emerged around the globe include—

(A) overly restrictive data localization requirements and limitations on cross border data flows that do not achieve legitimate public policy objectives;

(B) intellectual property rights infringement;

(C) policies that make market access contingent on forced technology transfers or voluntary transfers subject to coercive terms;

(D) web filtering;

(E) economic espionage;

(F) cybercrime exposure; and

(G) government-directed theft of trade secrets.

(26) Certain countries are pursuing or have implemented digital policies that unfairly discriminate against innovative United States technology companies and United States workers that create and deliver digital products and services.

(27) The Government of the People's Republic of China is currently advancing a model for digital governance and the digital economy domestically and abroad through its Digital Silk Road Initiative that permits censorship, surveillance, human and worker rights abuses, forced technology transfers, and data flow restrictions at the expense of human and worker rights, privacy, the free flow of data, and an open internet.

(28) The 2022 Country Reports on Human Rights Practices of the Department of State highlighted significant human rights issues committed by the People's Republic of China in the digital realm, including ''arbitrary interference with privacy including pervasive and intrusive technical surveillance and monitoring including the use of COVID–19 tracking apps for nonpublic-health purposes; punishment of family members for offenses allegedly committed by an individual; serious restrictions on free expression and media, including physical attacks on and criminal prosecution of journalists, lawyers, writers, bloggers, dissidents, petitioners, and others; serious restrictions on internet freedom, including site blocking''.

(29) The United States discourages digital authoritarianism, including practices that undermine human and worker rights and result in other social and economic coercion.

(30) Allies and trading partners of the United States in the Indo-Pacific region have urged the United States to deepen economic engagement in the region by negotiating rules on digital trade and technology standards.

(31) The digital economy has provided new opportunities for economic development, entrepreneurship, and growth in developing countries around the world.

(32) Negotiating strong digital trade principles and commitments with allies and partners across the globe enables the United States to unite like-minded economies around common standards and ensure that principles of democracy, rule of law, freedom of speech, human and worker rights, privacy, and a free and open internet are at the very core of digital governance.

(33) United States leadership and substantive engagement is necessary to ensure that global digital rules reflect United States values so that workers are treated fairly, small businesses can compete and win in the global economy, and consumers are guaranteed the right to privacy and security.

(34) The United States supports rules that reduce digital trade barriers, promote free expression and the free flow of information, enhance privacy protections, protect sensitive information, defend human and worker rights, prohibit forced technology transfer, and promote digitally enabled commerce.

(35) The United States supports efforts to cooperate with allies and trading partners to mitigate the risks of cyberattacks, address potentially illegal or deceptive business activities online, promote financial inclusion and digital workforce skills, and develop rules to govern the use of artificial intelligence and other emerging and future technologies.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the United States should negotiate strong, inclusive, forward-looking, and enforceable rules on digital trade and the digital economy with like-minded countries as part of a broader trade and economic strategy to address digital barriers and ensure that the United States values of democracy, rule of law, freedom of speech, human and worker rights, privacy, and a free and open internet are at the very core of the digital world and advanced technology;

(2) in conducting such negotiations, the United States must—

(A) pursue digital trade rules that—

(i) serve the best interests of workers, consumers, and small and medium-sized enterprises;

(ii) empower United States workers;

(iii) fuel wage growth; and

(iv) lead to materially positive economic outcomes for all people in the United States;

(B) ensure that any future agreement prevents the adoption of non-democratic, coercive, or overly restrictive policies that would be obstacles to a free and open internet and harm the ability of the e-commerce marketplace to continue to grow and thrive;

(C) coordinate sufficient trade-related assistance to ensure that developing countries can improve their capacity and benefit from increased digital trade; and

(D) consult closely with all relevant stakeholders, including workers, consumers, small and medium-sized enterprises, civil society groups, and human rights advocates; and

(3) with respect to any negotiations for an agreement facilitating digital trade, the United States Trade Representative and the heads of other relevant Federal agencies must consult closely and on a timely basis with Congress.

TITLE ____—IMPROVING DIGITAL IDENTITY

SEC. ___01. FINDINGS.

Congress finds the following:

(1) The lack of an easy, affordable, reliable, and secure way for organizations, businesses, and government agencies to identify whether an individual is who they claim to be online creates an attack vector that is widely exploited by adversaries in cyberspace and precludes many high-value transactions from being available online.

(2) Incidents of identity theft and identity fraud continue to rise in the United States, where more than 293,000,000 people were impacted by data breaches in 2021.

(3) Since 2017, losses resulting from identity fraud have increased by 333 percent, and, in 2020, those losses totaled $56,000,000,000.

(4) The Director of the Financial Crimes Enforcement Network of the Department of the Treasury has stated that the abuse of personally identifiable information and other building blocks of identity is a key enabler behind much of the fraud and cybercrime affecting the United States today.

(5) The inadequacy of current digital identity solutions degrades security and privacy for all people in the United States, and next generation solutions are needed that improve security, privacy, equity, and accessibility.

(6) Government entities, as authoritative issuers of identity in the United States, are uniquely positioned to deliver critical components that address deficiencies in the digital identity infrastructure of the United States and augment private sector digital identity and authentication solutions.

(7) State governments are particularly well-suited to play a role in enhancing digital identity solutions used by both the public and private sectors, given the role of State governments as the issuers of driver's licenses and other identity documents commonly used today.

(8) The public and private sectors should collaborate to deliver solutions that promote confidence, privacy, choice, equity, accessibility, and innovation. The private sector drives much of the innovation around digital identity in the United States and has an important role to play in delivering digital identity solutions.

(9) The bipartisan Commission on Enhancing National Cybersecurity has called for the Federal Government to ''create an interagency task force directed to find secure, user-friendly, privacy-centric ways in which agencies can serve as 1 authoritative source to validate identity attributes in the broader identity market. This action would enable Government agencies and the private sector to drive significant risk out of new account openings and other high-risk, high-value online services, and it would help all citizens more easily and securely engage in transactions online.''.

(10) It should be the policy of the Federal Government to use the authorities and capabilities of the Federal Government, in coordination with State, local, Tribal, and territorial partners and private sector innovators, to enhance the security, reliability, privacy, equity, accessibility, and convenience of consent-based digital identity solutions that support and protect transactions between individuals, government entities, and businesses, and that enable people in the United States to prove who they are online.

Subtitle ____—Veteran Education Empowerment Act

SEC. ____. SHORT TITLE.

This subtitle may be cited as the ''Veteran Education Empowerment Act''.

SEC. ____. FINDINGS.

Congress finds the following:

(1) More than 1,000,000 veterans attend institutions of higher education each year.

(2) Veterans face unique challenges in transitioning from the battlefield to the classroom and eventually to the workforce, including: age differences, family obligations, significant time away from academic life, and service-related disabilities.

(3) The National Education Association found that student veterans can feel lonely and vulnerable on campus and that ''connecting student veterans can effectively ease this isolation'' by bringing together new student veterans with those who have already successfully navigated the first few semesters of college.

(4) According to Mission United—a United Way program that helps veterans re-acclimate to civilian life—it is often ''essential'' for student veterans to be mentored by ''another veteran who understands their mindset and experience''.

(5) Student Veteran Centers are recognized as an institutional best practice by Student Veterans of America.

(6) The American Council on Education, which represents more than 1,700 institutions of higher education across the United States, has called having a dedicated space for veterans on campus ''a promising way for colleges and universities to better serve veterans on campus'' and a ''critical'' component of many colleges' efforts to serve their student veterans.

(7) The Department of Education included as one of its 8 Keys to Veterans' Success that colleges and universities should ''coordinate and centralize campus efforts for all veterans, together with the creation of a designated space for them''.

(8) Budget constraints often make it difficult or impossible for institutions of higher education to dedicate space to veteran offices, lounges, or student centers.

(9) The 110th Congress authorized the funding of Student Veteran Centers through the Centers of Excellence for Veteran Student Success under part T of title VIII of the Higher Education Act of 1965 (20 U.S.C. 1161t). Congress also chose to appropriate funding for this program for fiscal year 2015 under the Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113–235).

(10) According to the Department of Education, federally funded Student Veteran Centers and staff have generated improved recruitment, retention, and graduation rates, have helped student veterans feel better connected across campus, and have directly contributed to the successful academic outcomes of student veterans.

SEC. ____. GRANT PROGRAM TO ESTABLISH, MAINTAIN, AND IMPROVE STUDENT VETERAN CENTERS.

SEC. ___. ESTABLISHMENT OF MEDSHIELD PROGRAM.

(a) SHORT TITLE.—This section may be cited as the ''MedShield Act of 2024''.

(b) FINDINGS; SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds as follows:

(A) The COVID–19 pandemic revealed the need to better organize pathogen defense of the people of the United States.

(B) The National Security Commission on Artificial Intelligence concluded that COVID–19 scientific advancements, notably accelerated by the application of artificial intelligence, in addition to many other existing science and technology initiatives in the United States, should be used to build a comprehensive, operational, and integrated biodefense program that functions like a ''shield'' against manmade and non-manmade pathogens.

(2) SENSE OF CONGRESS.—It is the sense of Congress that—

(A) an initiative such as Operation Warp Speed should not be required for the next pandemic;

(B) there is a requirement for a pandemic preparedness and response program that would negate the need for a future Operation Warp Speed-like program or a declaration of a public health emergency under section 319 of the Public Health Service Act (42 U.S.C. 247d); and

(C) the program established under subsection (c) would operationalize artificial intelligence and a system-of-systems integration across the interagency and private sector, under the direction of the Secretary of Health and Human Services.

(c) MEDSHIELD PROGRAM.—

(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this section as the ''Secretary'') shall implement a pandemic preparedness and response program utilizing artificial intelligence and other relevant technologies, to be known as the ''MedShield program'' (referred to in this section as the ''Program''), in accordance with recommendations of the National Security Commission on Artificial Intelligence. The Program shall operationalize a national medical shield that gathers innovations across the public-private ecosystem in the United States, as well as from allies and partners, to improve the efficiency and effectiveness of delivering medical solutions to individuals, functioning as a shield against biological threats. The Program shall continuously operate and monitor threats, for the purpose of safeguarding the public health of the United States.

(2) PLAN AND INTEGRATION.—Pursuant to the Program, the Secretary shall—

(A) develop a plan to integrate the recommendations of the National Security Commission on Artificial Intelligence for pandemic preparedness and response, in accordance with the responsibilities of the Department of Health and Human Services as the primary agency and coordinator for the emergency support function relating to public health and medical services under the National Response Framework of the Federal Emergency Management Agency; and

(B) consult with heads of appropriate Federal agencies and select allies and partners to ensure the integration of the Program between relevant departments and agencies and international partners to achieve a coordinated international effort to address a pandemic.

(3) UTILIZATION OF ARTIFICIAL INTELLIGENCE.—In carrying out the Program, the Secretary shall leverage artificial intelligence and other relevant technologies and capabilities, including as follows:

(A) Development and deployment of a global pathogen surveillance system for the real-time detection and tracking of pathogens.

(B) Employment of artificial intelligence enabled systems to accelerate the identification and development of effective vaccines.

(C) Development and deployment of therapeutic treatments for individuals affected by biological threats.

(D) Advanced artificial intelligence-enabled modeling to optimize strategies for pathogen tracking, vaccine distribution, and therapeutic interventions.

(E) Streamlining and enhancing rapid manufacturing of vaccines and therapeutics.

(d) REPORTING.—Not later than 180 days after the date of enactment of this Act, the Secretary shall submit to the Committee on Health, Education, Labor, and Pensions and the Committee on Appropriations of the Senate and the Committee on Energy and Commerce and the Committee on Appropriations of the House of Representatives a report detailing the plan required under subsection (c)(2). Such report shall be submitted in unclassified form, and may include a classified annex.

(e) DEFINITIONS.—In this section—

(1) the term ''artificial intelligence'' has the meaning given such term in section 1051(f) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (Public Law 115–232; 132 Stat. 1962).

(3) the term ''National Security Commission on Artificial Intelligence'' means such commission established under section 1051 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 (132 Stat. 1962; Public Law 115–232).

(f) AUTHORIZATION OF APPROPRIATIONS.—For purposes of carrying out the MedShield program, there are authorized to be appropriated to the Secretary—

(1) $300,000,000 for fiscal year 2025;
(2) $350,000,000 for fiscal year 2026;
(3) $400,000,000 for fiscal year 2027;
(4) $450,000,000 for fiscal year 2028; and

SA 2610. Mr. ROUNDS (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill S. 4638, to authorize appropriations for fiscal year 2025 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

SEC. ___02. FINDINGS, DECLARATIONS, AND PURPOSES.

(a) FINDINGS AND DECLARATIONS.—Congress finds and declares the following:

(1) All Federal Government records related to unidentified anomalous phenomena should be preserved and centralized for historical and Federal Government purposes.

(2) All Federal Government records concerning unidentified anomalous phenomena should carry a presumption of immediate disclosure and all records should be eventually disclosed to enable the public to become fully informed about the history of the Federal Government's knowledge and involvement surrounding unidentified anomalous phenomena.

(3) Legislation is necessary to create an enforceable, independent, and accountable process for the public disclosure of such records.

(4) Legislation is necessary because credible evidence and testimony indicates that Federal Government unidentified anomalous phenomena records exist that have not been declassified or subject to mandatory declassification review as set forth in Executive Order 13526 (50 U.S.C. 3161 note; relating to classified national security information) due in part to exemptions under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.), as well as an over-broad interpretation of ''transclassified foreign nuclear information'', which is also exempt from mandatory declassification, thereby preventing public disclosure under existing provisions of law.

(5) Legislation is necessary because section 552 of title 5, United States Code (commonly referred to as the ''Freedom of Information Act''), as implemented by the Executive branch of the Federal Government, has proven inadequate in achieving the timely public disclosure of Government unidentified anomalous phenomena records that are subject to mandatory declassification review.

(6) Legislation is necessary to restore proper oversight over unidentified anomalous phenomena records by elected officials in both the executive and legislative branches of the Federal Government that has otherwise been lacking as of the enactment of this Act.

(7) Legislation is necessary to afford complete and timely access to all knowledge gained by the Federal Government concerning unidentified anomalous phenomena in furtherance of comprehensive open scientific and technological research and development essential to avoiding or mitigating potential technological surprise in furtherance of urgent national security concerns and the public interest.
