This subtitle may be cited as the "Creating Resources for Every American To Experiment with Artificial Intelligence Act of 2024" or the "CREATE AI Act of 2024".

SEC. 1097. FINDINGS.

Congress finds the following:

(1) Cutting-edge artificial intelligence research relies on access to computational resources and large datasets.

(2) Access to the computational resources and datasets necessary for artificial intelligence research and development is often limited to very large technology companies.

(3) The lack of access to computational and data resources has resulted in insufficient diversity in the artificial intelligence research and development community.

(4) Engaging the full and diverse talent of the United States is critical for maintaining United States leadership in artificial intelligence and ensuring that artificial intelligence is developed in a manner that benefits all people of the United States.

(5) The National Artificial Intelligence Research Resource Task Force, authorized under section 5106 of the National Artificial Intelligence Initiative Act of 2020 (15 U.S.C. 9401 et seq.), recommended the establishment of a National Artificial Intelligence Research Resource in a report entitled ''Strengthening and Democratizing the U.S. Artificial Intelligence Innovation Ecosystem: An Implementation Plan for a National Artificial Intelligence Research Resource'', issued on January 24, 2023.

SEC. 1291. SENSE OF CONGRESS IN SUPPORT OF NATO.

(a) FINDINGS.—Congress makes the following findings:

(1) The North Atlantic Treaty Organization (NATO) was founded on April 4, 1949, to ''safeguard the freedom, common heritage and civilisation of [its] peoples, founded on the principles of democracy, individual liberty and the rule of law''.

(2) The United States Senate approved the North Atlantic Treaty of 1949 on July 21, 1949, and the United States Government acceded to membership in NATO on August 24, 1949.

(3) NATO was originally founded to ensure the collective security of its members, and stand against the Soviet threat to peace and acts collectively to promote freedom, stability, and peace in the North Atlantic region.

(4) Since the formation of NATO, 10 rounds of enlargement have grown the alliance from 12 members to 32.

(5) NATO is the most successful political-military alliance in history and, guided by a set of common values, provides collective defense to more than 950,000,000 people living in its member nations.

(6) The sustained commitment of NATO to mutual defense has contributed to the democratic and economic transformation of Central and Eastern Europe.

(7) Enlargement has strengthened NATO, and the Alliance remains open to additional enlargement for European states that advance the principles of the North Atlantic Treaty and contribute to the security of the North Atlantic area, in line with Article 10 of the Treaty.

(8) The newest members of the alliance, Finland and Sweden, contribute already interoperable militaries, including robust navies, powerful air forces, strong cyber capabilities, and large numbers of active military personnel and ready reservists to the alliance.

(9) The allies invoked NATO's Article 5 collective defense clause for the first and only time to offer political and military assistance to the United States in responding to the attacks of September 11, 2001.

(10) NATO serves as a force multiplier, whose command structures, training institutions, and multilateral exercises have generated multinational contributions to United States national security priorities and enabled European and Canadian soldiers to serve with members of the United States Armed Forces in various missions.

(11) NATO is currently involved in several operations benefitting United States national security, including NATO's Kosovo Force (KFOR), Standing Naval Forces, Operation Sea Guardian, NATO Mission Iraq, and air policing missions in Eastern Europe.

(12) Through the Partnership for Peace and Enhanced Forward Presence, NATO has extended opportunities for cooperation with non-NATO nations.

(13) NATO members have stood against Russian aggression in Eastern Europe, reinforced existing battlegroups and established new ones, supported United States sanctions on the Russian Federation, and imposed their own sanctions measures in coordination with the United States and other allies.

(14) The NATO Wales Summit Declaration of 2014 pledged, ''Allies currently meeting the NATO guideline to spend a minimum of 2 percent of their Gross Domestic Product (GDP) on defence will aim to continue to do so . . . Allies whose current proportion of GDP spent on defence is below this level will: halt any decline in defence expenditure; aim to increase defence expenditure in real terms as GDP grows; aim to move towards the 2 percent guideline within a decade with a view to meeting their NATO Capability Targets and filling NATO's capability shortfalls.''

(15) 22 NATO nations have increased their military spending since the Wales Declaration of 2014.

(16) At the NATO Vilnius Summit in 2023, member countries affirmed their commitment to spend ''at least'' 2 percent of GDP on defense, and noted that ''in many cases, expenditure beyond 2 percent of GDP will be needed in order to remedy existing shortfalls and meet the requirements across all domains arising from a more contested security order''.

(17) 20 NATO members still fall short of meeting their 2 percent commitment.

(18) Collective security demands real and sustained burden sharing.

(19) NATO members that do not meet their 2 percent goal have a responsibility to the other member states and should rapidly address their budget shortfalls and prioritize defense spending.

(20) NATO updated its Strategic Concept planning document in 2022 to recognize emerging threats to the alliance, including from the People's Republic of China, and begin the process of adapting our collective approach to face them in the coming generation.

(21) At the NATO Vilnius Summit in 2023, NATO reaffirmed its commitment to its core values and take decisive action to defend them against threats across multiple domains.

(22) Nations must put defense spending in their base budgets to provide long-term certainty to NATO planners and their partners.

(23) The Russian Federation's invasion of Ukraine marks the largest military conflict in Europe since World War II, representing a dramatic shift for European security and requiring NATO to change its policies to increase, modernize, and enhance its force posture and to create more strategic depth to adequately confront new challenges.

(24) In adapting to growing aggression by the People's Republic of China, NATO has deepened its partnerships with Indo-Pacific allies, including South Korea, Japan, Australia, and New Zealand.

(25) Section 1250A of the National Defense Authorization Act for Fiscal Year 2024 (Public Law 118–31) requires the advice and consent of the Senate for any President of the United States to suspend, terminate, denounce, or withdraw the United States from the North Atlantic Treaty.

(b) SENSE OF CONGRESS.—Congress—

(1) lauds NATO for its 75-year maintenance of the alliance and recognizes its foundational contributions to maintaining the safety, security, and democratic systems of its members;

(2) welcomes all NATO members and observers as the United States hosts the 75th Annual Summit in July 2024, in Washington, D.C.;

(3) recognizes the key role NATO has played in enabling the most peaceful and prosperous period in history for the North Atlantic area and also that NATO does not only benefit the defense of its own member states, but enhances security and stability beyond its borders;

(4) appreciates the burden and sacrifice made by each member nation and each service member who has acted to maintain the collective security of NATO;

(5) reaffirms that NATO members join by free choice, not by compulsion or coercion, and that sovereign nations should be free to choose with whom they associate and enter into alliances without fear of violent reprisal;

(6) continues to affirm the importance of Article 5 of the North Atlantic Treaty;

(7) reaffirms the importance of nuclear deterrence in NATO planning and supports the modernization and development of new systems while continuing risk-reduction discussions with our adversaries;

(8) reaffirms that all NATO territory is equally under the protection of its collective defense;

(9) strongly calls on all NATO member states to immediately meet their pledges and raise their defense levels above the 2 percent GDP target, and to more fully share the security burden by focusing on meeting capabilities targets, enhancing interoperability, improving readiness, and modernization to respond to the threats that face the alliance on each of its flanks;

(10) urges all NATO member countries to meet their commitments to the principles of democracy, individual liberty, and the rule of law;

(11) stands in robust support of those NATO members who spend 2 percent or more of their GDPs on defense and acknowledges the 8 countries that have met that goal since 2014;

(12) welcomes the recent additions of Finland and Sweden to the alliance;

(13) recognizes that NATO, in its planning processes, must take into account security threats to the alliance from around the world, including the People's Republic of China;

(14) encourages NATO to build closer ties with the Indo-Pacific to confront the challenges posed by the deepening partnership and alignment between the Russian Federation and the People's Republic of China;

(15) urges all members to consider the value that Ukraine will add to NATO's defense and stability for Europe ahead of the Washington Summit in 2024; and

(16) reaffirms the commitment of the United States to NATO's mission, and its belief that NATO is the most successful security alliance in our Nation's history and one that should continue to be a cornerstone of United States national security.

Subtitle G—Maintaining Our Ironclad Commitment to Israel's Security Act

SEC. 1291. SHORT TITLE.

This subtitle may be cited as the ''Maintaining Our Ironclad Commitment to Israel's Security Act''.

SEC. 1292. FINDINGS.

Congress makes the following findings:

(1) In 2016, the Obama administration concluded negotiations with Israel for a 10-year memorandum of understanding to provide security assistance to Israel for the period of fiscal years 2019 through 2028 that affirmed ''the unshakeable commitment of the United States to Israel's security''.

(2) In May 2024, the Biden administration delayed shipment to Israel of 1,800 2,000-pound bombs and 1,700 500-pound bombs in an effort to apply political pressure to the Government of Israel. The decision to delay such shipment was made without consulting with or notifying Congress and despite repeated public assurances that the United States-Israel relationship was ''ironclad'' and that there was ''no change in policy''.

(3) On May 8, 2024, President Biden stated, with respect to Israel, ''We're not going to supply the weapons and artillery shells.''.

SEC. 1293. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) Israel has a right to defend itself, which includes the need for offensive capabilities to

deter and defeat threats, including threats posed by Iran and its terrorist proxies Hamas, Hezbollah, and the Houthis;

(2) previously negotiated and approved United States arms sales to Israel should proceed, and all pauses should be lifted, to ensure that Israel is properly equipped to defend itself and defeat threats, including threats posed by Iran and its terrorist proxies Hamas, Hezbollah, and the Houthis; and

(3) limiting or otherwise delaying the sale or delivery of United States-made defense articles to Israel runs counter to the commitments the United States made to Israel as part of the 2016 memorandum of understanding and undermines regional security, including prospective advances in Israel-Saudi normalization.

SEC. 1294. CONGRESSIONAL OVERSIGHT OF PROPOSED CHANGES TO ARMS SALES TO ISRAEL.

(a) IN GENERAL.—The President may not take any action to pause, suspend, delay, or abrogate the delivery of covered defense articles and defense services to Israel, including as part of a policy review, unless, not less than 15 legislative days prior to such action, the President provides to the appropriate committees of Congress the notification described in subsection (b) relating to such pause, suspension, delay, or abrogation in unclassified form, with a classified annex as necessary.

(b) NOTIFICATION DESCRIBED.—The notification described in this subsection is a notification relating to a pause, suspension, delay, or abrogation of the delivery of covered defense articles and defense services, which shall include the following:

(2) A detailed description of the type of covered defense articles and defense services concerned, including the date on which Congress was notified of the transfer of such covered defense articles and defense services.

(3) A policy justification for the pause, suspension, delay, or abrogation and a description of the potential impact such action may have on United States national security interests.

(4) An identification of conditions for lifting the pause, suspension, delay, or abrogation, a statement as to whether such conditions will be communicated to the Government of Israel, and the timeline for meeting such conditions.

(5) A description of the sources of funds used to provide the covered defense articles and defense services concerned, including an identification of appropriations accounts, as applicable.

(6) An identification of any bilateral agreement or memorandum of understanding related to the authority to provide the covered defense articles and defense services concerned.

(7) An assessment as to whether the pause, suspension, delay, or abrogation would adversely affect the qualitative military edge of Israel over military threats to Israel.

(c) DEFINITIONS.—In this section:

(1) APPROPRIATE COMMITTEES OF CONGRESS.—The term ''appropriate committees of Congress'' means—

(A) the Committee on Foreign Relations and the Committee on Appropriations of the Senate; and

(B) the Committee on Foreign Affairs and the Committee on Appropriations of the House of Representatives.

(2) QUALITATIVE MILITARY EDGE.—The term ''qualitative military edge'' has the meaning given such term in section 36(h)(3) of the Arms Export Control Act (22 U.S.C. 2776(h)(3)).

(2) one-way attack drones and similar low-cost armed unmanned aerial systems are the most dangerous asymmetric threat employed by Iranian-aligned militias against Americans and American interests;

(5) the partner countries of the United States, including Iraq, Jordan, and countries on the Arabian Peninsula, face urgent and emerging threats from unmanned aerial systems and other unmanned aerial vehicles;

SEC. 1216. LIMITING UNITED STATES ASSISTANCE THAT DIRECTLY BENEFITS THE TALIBAN.

(a) SHORT TITLE.—This section may be cited as the ''Stop Supporting the Taliban Act''.

(b) FINDINGS.—Congress finds the following:

(1) After al-Qaeda attacked the United States on September 11, 2001, the United States sought to eliminate al-Qaeda's safe havens and training camps in Afghanistan.

(2) The Taliban government that was in control of Afghanistan, under the leadership of Mullah Omar, had granted al-Qaeda sanctuary in Afghanistan.

(3) The Taliban government fell in 2001 following the United States-led Operation Enduring Freedom, but returned to power during the United States' withdrawal from Afghanistan in August 2021.

(4) The United States Armed Forces and international partners fought with valor, honor, and effectiveness to eliminate terrorist threats, including threats against the United States.

(5) More than 800,000 Americans answered our Nation's call and served in Operation Enduring Freedom, which was the longest military operation in United States history.

(6) A total of 2,459 United States military personnel were killed in Afghanistan during Operation Enduring Freedom and more than 20,000 servicemembers were wounded during the operation.

(7) Since the American withdrawal from Afghanistan, the Taliban have engaged in widespread human rights abuses to Afghan women and girls and Afghanistan has again become a terrorism concern.

(8) The Taliban has erased rights for women and girls to include barring access to education, reinstating guardianship laws, ejecting women from the workplace, and the resumption of stoning women in public.

(9) On April 22, 2024, the annual Department of State Country Report on Human Rights Practices in Afghanistan cited a ''significant deterioration in women's rights'' due to Taliban actions, including credible reports of killings, torture, forced marriages, and extensive gender-based violence.

(10) On July 31, 2022, al-Qaeda emir Ayman al-Zawahiri, who was provided sanctuary by the Taliban, was killed in a United States drone strike in Afghanistan.

(11) On January 29, 2024, the United Nations Security Council published a report stating ''the relationship between the Taliban and al-Qaeda remain close'', and in the most recent 6-month period, al-Qaeda had established up to 8 new training camps in Afghanistan.

(12) The Taliban lack the capability and the will to effectively counter the Islamic State Khorasan (commonly known as ''ISIS-K'').

(13) On March 7, 2024, the Commander of the United States Central Command Commander testified that terrorist groups, such as ISIS–K, ''retain a safe haven in Afghanistan''.

(14) On March 22, 2024, ISIS–K killed 140 people in an attack on a concert venue in Russia, demonstrating the capability and will to conduct transnational terrorist attacks.

(15) On April 11, 2024, Federal Bureau of Investigation Director Christopher Wray testified ''the potential for a coordinated attack here in the homeland, akin to the ISIS–K attack'' in Russia is ''increasingly concerning''.

(16) In November 2023, the Special Inspector General for Afghanistan Reconstruction (SIGAR) testified, ''The Taliban is diverting or otherwise benefitting from a considerable amount of U.S. assistance.''.

(17) The May 2024 SIGAR report stated that—

(A) implementing partners of United States assistance collectively paid at least $10,900,000 to the Taliban; and

Subtitle I—International Nuclear Energy Financing Act of 2024

SEC. 1096. SHORT TITLE.

This subtitle may be cited as the ''International Nuclear Energy Financing Act of 2024''.

SEC. 1097. FINDINGS.

Congress finds as follows:

(1) Nuclear power provides clean energy with greater reliability than wind or solar energy, and with comparable life cycle greenhouse gas emissions.

(2) According to W. Gyude Moore, the former Minister of Public Works for Liberia, ''Obstacles to the financing of nuclear power in emerging economies work to prevent countries like my own from industrializing our economies and building climate-resilient infrastructure. This is especially bad timing as the next generation of nuclear technologies, including small modular reactors and microreactors, are especially suitable to emerging markets. Such restrictions are an example of climate injustice, not a reaction against it.''.

(3) The People's Republic of China and the Russian Federation have sought to export nuclear reactors to Europe, Eurasia, Latin America, and South Asia using technologies which, according to a 2017 study by Columbia University's Center on Global Energy Policy, are associated with higher safety risk than American and Japanese reactor designs.

(4) In a 2019 letter to congressional leaders, 38 national security experts emphasized the importance of nuclear energy finance to counter Chinese and Russian ambitions, writing: ''In the nuclear energy sector, the initial supply of a reactor typically leads to the supplier's involvement throughout the hundred-year life of the nuclear program, enabling long-term influence on nuclear safety, security and nonproliferation, as well as the ability to advance energy security and broader foreign policy interests.''.

(5) As Rafael Mariano Grossi, Director General of the International Atomic Energy Agency, wrote in Climate Change and Nuclear Power 2020, ''Nuclear power, currently being generated in 30 countries, is already reducing carbon dioxide emissions by about two gigatons per year. That is the equivalent of taking more than 400 million cars off the road—every year.''. He continued, ''Nuclear power now provides about 10 percent of the world's electricity, but it contributes almost 30 percent of all low carbon electricity. Nuclear power will be essential for achieving the low carbon future which world leaders have agreed to strive for.''.

SEC. 1098. INTERNATIONAL FINANCIAL INSTITUTION SUPPORT FOR NUCLEAR ENERGY.

The Secretary of the Treasury shall instruct the United States Executive Director at the International Bank for Reconstruction and Development and, as the Secretary deems appropriate, the United States Executive Director at any other international financial institution (as defined in section 1701(c)(2) of the International Financial Institutions Act (22 U.S.C. 262r(c)(2)), to use the voice, vote, and influence of the United States at the institution to support financial assistance for the generation and distribution of nuclear energy, consistent with the national security interests of the United States.

SEC. 1099. WAIVER AUTHORITY.

The Secretary of the Treasury may waive the requirement of section 1098 on a case-by-base basis upon notifying the Committee on Foreign Relations of the Senate and the Committee on Financial Services of the House of Representatives that the waiver is in the national interest of the United States, with a detailed explanation of the reasons therefor.

SEC. 1099A. PROGRESS REPORT.

The Chairman of the National Advisory Council on International Monetary and Financial Policies shall include in the annual report required by section 1701 of the International Financial Institutions Act (22 U.S.C. 262r) a discussion of any progress made in promoting international financial institution (as defined in section 1701(c)(2) of such Act) assistance for nuclear energy.

TITLE _____—NEIGHBORHOOD HOMES INVESTMENT ACT

SEC. __1. SHORT TITLE.

This title may be cited as the ''Neighborhood Homes Investment Act''

SEC. __2. FINDINGS AND SENSE OF CONGRESS.

(a) FINDINGS.—Congress finds the following:

(1) Experts have determined that it could take nearly a decade to address the housing shortage in the United States, in large part due to increasing housing prices and decreased housing inventory.

(2) The housing supply shortage disproportionately impacts low-income and distressed communities.

(3) Homeownership is a primary source of household wealth and neighborhood stability. Many distressed communities have low rates of homeownership and lack quality, affordable starter homes.

(4) Housing revitalization in distressed communities is prevented by the value gap, the difference between the price to rehabilitate a home and the sale value of the home.

(5) The Neighborhood Homes Investment Act can address the value gap to increase housing rehabilitation in distressed communities.

(6) The Neighborhood Homes Investment Act has the potential to generate 500,000 homes over 10 years, $125,000,000,000 of total development activity, over 800,000 jobs in construction and construction-related industries, and over $35,000,000,000 in Federal, state, and local tax revenues.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the neighborhood homes credit (as added under section __3 of this title) should be an activity administered in a manner which—

(1) is consistent with the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.);

(2) empowers residents in eligible communities; and

(3) revitalizes distressed neighborhoods.

SEC. __3. NEIGHBORHOOD HOMES CREDIT.

(a) IN GENERAL.—Subpart D of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1986 is amended by inserting after section 42 the following new section:

''SEC. 42A. NEIGHBORHOOD HOMES CREDIT.

''(a) ALLOWANCE OF CREDIT.—For purposes of section 38, the neighborhood homes credit determined under this section for the taxable year is, with respect to each qualified residence sold by the taxpayer during such taxable year in an affordable sale, the lesser of—

''(1) an amount equal to—

''(A) the excess (if any) of—

''(i) the reasonable development costs paid or incurred by the taxpayer with respect to such qualified residence, over

''(ii) the sale price of such qualified residence (reduced by any reasonable expenses paid or incurred by the taxpayer in connection with such sale), or

''(B) if the neighborhood homes credit agency determines it is necessary to ensure financial feasibility, an amount not to exceed 120 percent of the amount under subparagraph (A),

''(2) 35 percent of the eligible development costs paid or incurred by the taxpayer with respect to such qualified residence, or

''(3) 28 percent of the national median sale price for new homes (as determined pursuant to the most recent census data available as of the date on which the neighborhood homes credit agency makes an allocation for the qualified project).

''(b) DEVELOPMENT COSTS.—For purposes of this section—

''(1) REASONABLE DEVELOPMENT COSTS.—

''(A) IN GENERAL.—The term 'reasonable development costs' means amounts paid or incurred for the acquisition of buildings and land, construction, substantial rehabilitation, demolition of structures, or environmental remediation, to the extent that the neighborhood homes credit agency determines that such amounts meet the standards specified pursuant to subsection (f)(1)(C) (as of the date on which construction or substantial rehabilitation is substantially complete, as determined by such agency) and are necessary to ensure the financial feasibility of such qualified residence.

At the end of subtitle H of title X, insert the following:

SEC. 1095. PRESERVE ACCESS TO AFFORDABLE GENERICS AND BIOSIMILARS ACT.

(a) SHORT TITLE.—This section may be cited as the ''Preserve Access to Affordable Generics and Biosimilars Act''.

(b) CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSES.—

(1) FINDINGS.—Congress finds the following:

(A) In 1984, the Drug Price Competition and Patent Term Restoration Act (Public Law 98–417) (referred to in this Act as the ''1984 Act''), was enacted with the intent of facilitating the early entry of generic drugs while preserving incentives for innovation.

(B) Prescription drugs make up approximately 10 percent of the national health care spending.

(C) Initially, the 1984 Act was successful in facilitating generic competition to the benefit of consumers and health care payers, although 88 percent of all prescriptions dispensed in the United States are generic drugs, they account for only 28 percent of all expenditures.

(D) Generic drugs cost substantially less than brand name drugs, with discounts off the brand price averaging 80 to 85 percent.

(E) Federal dollars currently account for over 40 percent of the $325,000,000,000 spent on retail prescription drugs, and this share is expected to rise to 47 percent by 2025.

(F)(i) In recent years, the intent of the 1984 Act has been subverted by certain settlement agreements in which brand name companies transfer value to their potential generic competitors to settle claims that the generic company is infringing the branded company's patents.

(ii) These ''reverse payment'' settlement agreements—

(I) allow a branded company to share its monopoly profits with the generic company as a way to protect the branded company's monopoly; and

(II) have unduly delayed the marketing of low-cost generic drugs contrary to free competition, the interests of consumers, and the principles underlying antitrust law.

(iii) Because of the price disparity between brand name and generic drugs, such agreements are more profitable for both the brand and generic manufacturers than competition and will become increasingly common unless prohibited.

(iv) These agreements result in consumers losing the benefits that the 1984 Act was intended to provide.

(G) In 2010, the Biologics Price Competition and Innovation Act (Public Law 111–148) (referred to in this Act as the ''BPCIA''), was enacted with the intent of facilitating the early entry of biosimilar and interchangeable follow-on versions of branded biological products while preserving incentives for innovation.

(H) Biological drugs play an important role in treating many serious illnesses, from cancers to genetic disorders. They are also expensive, representing more than 40 percent of all prescription drug spending.

(I) Competition from biosimilar and interchangeable biological products promises to lower drug costs and increase patient access to biological medicines. But ''reverse payment'' settlement agreements also threaten to delay the entry of biosimilar and interchangeable biological products, which would undermine the goals of BPCIA.

(2) PURPOSES.—The purposes of this section are—

(A) to enhance competition in the pharmaceutical market by stopping anticompetitive agreements between brand name and generic drug and biosimilar biological product manufacturers that limit, delay, or otherwise prevent competition from generic drugs and biosimilar biological products; and

(B) to support the purpose and intent of antitrust law by prohibiting anticompetitive practices in the pharmaceutical industry that harm consumers.

(c) UNLAWFUL COMPENSATION FOR DELAY.—

(1) IN GENERAL.—The Federal Trade Commission Act (15 U.S.C. 44 et seq.) is amended by inserting after section 26 (15 U.S.C. 57c–2) the following:

''SEC. 27. PRESERVING ACCESS TO AFFORDABLE GENERICS AND BIOSIMILARS.

''(a) IN GENERAL.—

''(1) ENFORCEMENT PROCEEDING.—The Commission may initiate a proceeding to enforce the provisions of this section against the parties to any agreement resolving or settling, on a final or interim basis, a patent claim, in connection with the sale of a drug product or biological product.

''(2) PRESUMPTION AND VIOLATION.—

''(A) IN GENERAL.—Subject to subparagraph (B), in such a proceeding, an agreement shall be presumed to have anticompetitive effects and shall be a violation of this section if—

''(i) an ANDA filer or a biosimilar biological product application filer receives anything of value, including an exclusive license; and

''(ii) the ANDA filer or biosimilar biological product application filer agrees to limit or forgo research, development, manufacturing, marketing, or sales of the ANDA product or biosimilar biological product, as applicable, for any period of time.

''(B) EXCEPTION.—Subparagraph (A) shall not apply if the parties to such agreement demonstrate by clear and convincing evidence that—

''(i) the value described in subparagraph (A)(i) is compensation solely for other goods or services that the ANDA filer or biosimilar biological product application filer has promised to provide; or

''(ii) the procompetitive benefits of the agreement outweigh the anticompetitive effects of the agreement.

''(b) EXCLUSIONS.—Nothing in this section shall prohibit a resolution or settlement of a patent infringement claim in which the consideration that the ANDA filer or biosimilar biological product application filer, respectively, receives as part of the resolution or settlement includes only one or more of the following:

''(1) The right to market and secure final approval in the United States for the ANDA product or biosimilar biological product at a date, whether certain or contingent, prior to the expiration of—

''(A) any patent that is the basis for the patent infringement claim; or

''(B) any patent right or other statutory exclusivity that would prevent the marketing of such ANDA product or biosimilar biological product.

''(2) A payment for reasonable litigation expenses not to exceed—

''(A) for calendar year 2024, $7,500,000; or

''(B) for calendar year 2025 and each subsequent calendar year, the amount determined for the preceding calendar year adjusted to reflect the percentage increase (if any) in the Producer Price Index for Legal Services published by the Bureau of Labor Statistics of the Department of Labor for the most recent calendar year.

''(3) A covenant not to sue on any claim that the ANDA product or biosimilar biological product infringes a United States patent.

''(c) ENFORCEMENT.—

''(1) ENFORCEMENT.—A violation of this section shall be treated as an unfair method of competition under section 5(a)(1).

''(2) JUDICIAL REVIEW.—

''(A) IN GENERAL.—Any party that is subject to a final order of the Commission, issued in an administrative adjudicative proceeding under the authority of subsection (a)(1), may, within 30 days of the issuance of such order, petition for review of such order in—

''(i) the United States Court of Appeals for the District of Columbia Circuit;

''(ii) the United States Court of Appeals for the circuit in which the ultimate parent entity, as defined in section 801.1(a)(3) of title 16, Code of Federal Regulations, or any successor thereto, of the NDA holder or biological product license holder is incorporated as of the date that the NDA or biological product license application, as applicable, is filed with the Secretary of Health and Human Services; or

''(iii) the United States Court of Appeals for the circuit in which the ultimate parent entity of the ANDA filer or biosimilar biological product application filer is incorporated as of the date that the ANDA or biosimilar biological product application is filed

with the Secretary of Health and Human Services.

''(B) TREATMENT OF FINDINGS.—In a proceeding for judicial review of a final order of the Commission, the findings of the Commission as to the facts, if supported by evidence, shall be conclusive.

''(d) ANTITRUST LAWS.—Nothing in this section shall modify, impair, limit, or supersede the applicability of the antitrust laws as defined in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), and of section 5 of this Act to the extent that section 5 applies to unfair methods of competition. Nothing in this section shall modify, impair, limit, or supersede the right of an ANDA filer or biosimilar biological product application filer to assert claims or counterclaims against any person, under the antitrust laws or other laws relating to unfair competition.

''(e) PENALTIES.—

''(1) FORFEITURE.—Each party that violates or assists in the violation of this section shall forfeit and pay to the United States a civil penalty sufficient to deter violations of this section, but in no event greater than 3 times the value received by the party that is reasonably attributable to the violation of this section. If no such value has been received by the NDA holder, the biological product license holder, the ANDA filer, or the biosimilar biological product application filer, the penalty to the NDA holder, the biological product license holder, the ANDA filer, or the biosimilar biological product application filer shall be sufficient to deter violations, but in no event shall be greater than 3 times the value given to an ANDA filer or biosimilar biological product application filer reasonably attributable to the violation of this section. Such penalty shall accrue to the United States and may be recovered in a civil action brought by the Commission, in its own name by any of its attorneys designated by it for such purpose, in a district court of the United States against any party that violates this section. In such actions, the United States district courts are empowered to grant mandatory injunctions and such other and further equitable relief as they deem appropriate.

''(2) CEASE AND DESIST.—

''(A) IN GENERAL.—If the Commission has issued a cease and desist order with respect to a party in an administrative adjudicative proceeding under the authority of subsection (a)(1), an action brought pursuant to paragraph (1) may be commenced against such party at any time before the expiration of 1 year after such order becomes final pursuant to section 5(g).

''(B) EXCEPTION.—In an action under subparagraph (A), the findings of the Commission as to the material facts in the administrative adjudicative proceeding with respect to the violation of this section by a party shall be conclusive unless—

''(i) the terms of such cease and desist order expressly provide that the Commission's findings shall not be conclusive; or

''(ii) the order became final by reason of section 5(g)(1), in which case such finding shall be conclusive if supported by evidence.

''(3) CIVIL PENALTY.—In determining the amount of the civil penalty described in this section, the court shall take into account—

''(A) the nature, circumstances, extent, and gravity of the violation;

''(B) with respect to the violator, the degree of culpability, any history of violations, the ability to pay, any effect on the ability to continue doing business, profits earned by the NDA holder, the biological product license holder, the ANDA filer, or the biosimilar biological product application filer, compensation received by the ANDA filer or biosimilar biological product application filer, and the amount of commerce affected; and

''(C) other matters that justice requires.

(B) non-Federal interests have reported that the indemnification clause and OMRR&R requirements are a barrier to entering into project partnership agreements with the Corps of Engineers;

(C) critical water resources development projects are being delayed by years, or not pursued at all, due to the barriers described in subparagraph (B); and

(D) legal structures have changed since the indemnification clause was first applied and there may be more suitable tools available to address risk and liability issues.

(A) a review of risk for the Federal Government and non-Federal interests with respect to removing requirements for the indemnification clause;

(B) an assessment of whether the indemnification clause is still necessary given the changes in engineering, legal structures, and water resources development projects since 1910, with a focus on the quantity and types of claims and takings over time;

(C) an identification of States with State laws that prohibit those States from entering into agreements that include an indemnification clause;

(D) a comparison to other Federal agencies with respect to how those agencies approach indemnification and OMRR&R requirements in projects, if applicable;

(E) a review of indemnification and OMRR&R requirements for projects that States require with respect to agreements with cities and localities, if applicable;

(F) an analysis of the useful lifespan of water resources development projects, including any variations in that lifespan for different types of water resources development projects and how changing weather patterns and increased extreme weather events impact that lifespan;

(G) a review of situations in which non-Federal interests have been unable to meet OMRR&R requirements; and

(H) a review of policy alternatives to OMRR&R requirements, such as allowing extension, reevaluation, or deauthorization of water resources development projects.

(ii) whether increased use of covered easements in relation to projects described in clause (i) could promote greater participation from cooperating landowners in addressing local flooding or ecosystem restoration challenges;

(iii) whether such increased use could result in cost savings in the implementation of the projects described in clause (i), without any reduction in project benefits; and

(iv) the extent to which the Secretary should expand what is considered by the Secretary to be part of a series of estates deemed standard for construction, operation, or maintenance of a project for flood risk management, hurricane and storm damage risk reduction, or ecosystem restoration.

(b) FLEXIBILITIES PROVIDED.—Notwithstanding any other provision of law, but maintaining any existing easement agreement or executed project partnership agreement for a project described in subsection (c), the Secretary may proceed to construction of a project described in that subsection with an easement of not less than 25 years, in lieu of the perpetual beach storm damage reduction easement standard estate if—

(3) the non-Federal interest agrees to pay the costs of acquiring easements for periodic nourishment of the project after the expiration of the initial easements, for which the non-Federal interest may not receive credit toward the non-Federal share of the costs of the project.

(e) WRITTEN NOTICE.—Not less than 5 years before the date of expiration of an easement for a project described in subsection (c), the Secretary shall provide to the non-Federal interest for the project written notice that if the easement expires and is not extended under subsection (f)—

(2) the non-Federal interest or the applicable State will have the responsibility to renourish or restore the project.

(f) EXTENSION.—With respect to a project described in subsection (c), before the expiration of an easement that has a term of less than 50 years and is subject to subsection (b), the Secretary may allow the non-Federal interest for the project to extend the easement, subject to the condition that the easement and any extensions do not exceed 50 years in total.

(g) TEMPORARY EASEMENTS.—In the case of a project described in subsection (c) that received funding under section 5 of the Act of August 18, 1941 (commonly known as the ''Flood Control Act of 1941'') (55 Stat. 650, chapter 377; 33 U.S.C. 701n), made available by a supplemental appropriations Act, or is eligible to receive such funding as a result of storm damage incurred during fiscal year 2022, 2023, 2024, 2025, or 2026, the project may use 1 or more temporary easements, subject to the conditions that—

Subtitle ____—BELARUS DEMOCRACY, HUMAN RIGHTS, AND SOVEREIGNTY

SEC. ___01. SHORT TITLE.

This subtitle may be cited as the ''Belarus Democracy, Human Rights, and Sovereignty Act of 2024''.

SEC. ___02. FINDINGS.

Section 2 of the Belarus Democracy Act of 2004 (Public Law 108–347; 22 U.S.C. 5811 note) is amended to read as follows:

''SEC. 2. FINDINGS.

''Congress finds the following:

''(1) Consistently, Alyaksandr Lukashenka, the illegitimate leader of Belarus, engages in a pattern of clear and persistent violations of human rights, democratic governance, and fundamental freedoms.

''(2) Alyaksandr Lukashenka has overseen and participated in multiple fundamentally flawed presidential and parliamentary elections undermining the legitimacy of executive, judicial, and legislative authority in Belarus.

''(3) On August 9, 2020, the Government of Belarus conducted a presidential election that was fraudulent and did not meet international standards. There were serious irregularities with ballot counting and the reporting of election results. The Government of Belarus also put in place restrictive measures that impeded the work of local independent observers and did not provide sufficient notice to the OSCE to allow for the OSCE to monitor the elections, as is customary.

''(4) Independent election monitors recognized Sviatlana Tsikhanouskaya as the legitimate winner of the August 9, 2020 election for president in Belarus following her candidacy after her husband, opposition leader Sergei Tikhanovsky, was imprisoned for challenging Lukashenka for president in 2020.

''(5) Following threats to her safety, Sviatlana Tsikhanouskaya was forced into exile in Lithuania after Mr. Lukashenka claimed victory in the fraudulent 2020 elections, and since that time, the Government of Lithuania has hosted the Office of Sviatlana Tsikhanouskaya, the Belarusian Democratic Leader, and the Government of Poland has hosted the Belarusian United Transitional Cabinet.

''(6) Thousands of employees at Belarusian state-owned enterprises went on strike across the country to protest Mr. Lukashenka's illegitimate election and the subsequent crackdowns on peaceful protestors to the contested results of the election, including at some of Belarus's largest factories such as the BelAZ truck plant, the Minsk Tractor Works, and the Minsk Automobile Plant.

''(7) After the August 9, 2020, presidential election, the Government of Belarus restricted the free flow of information to silence the opposition and to conceal the regime's violent crackdown on peaceful protestors, including by stripping the accreditation of journalists from major foreign news outlets, disrupting internet access, limiting access to social media and other digital communication platforms, and detaining and harassing countless journalists.

''(8) The Government of Belarus, led by Alyaksandr Lukashenka, continues to subject thousands of pro-democracy political activists and peaceful protesters to harassment, beatings, enforced disappearance, and imprisonment, particularly as a result of their attempts to peacefully exercise their right to freedom of assembly and association, including following violent crackdowns on peaceful protestors and mass detentions of peaceful protesters resisting the results of the contested 2020 election.

''(9) Women serve as the leading force in demonstrations across the country, protesting police brutality and mass detentions by wearing white, carrying flowers, forming 'solidarity chains', and unmasking undercover police trying to arrest demonstrators.

''(10) The Government of Belarus, led by Alyaksandr Lukashenka, suppresses independent media and journalists and restricts access to the internet, including social media and other digital communication platforms, in violation of the right to freedom of speech and expression of those dissenting from the dictatorship of Alyaksandr Lukashenka.

''(11) The Government of Belarus, led by Alyaksandr Lukashenka, has criminalized access to independent media sources and media channels, including foreign media, by designating such sources and channels as extremist and conducting arbitrary arrests and detainments of media workers, activists, and users.

''(12) The Government of Belarus, led by Alyaksandr Lukashenka, continues a systematic campaign of harassment, repression, and closure of nongovernmental organizations, including independent trade unions and entrepreneurs, creating a climate of fear that inhibits the development of civil society and social solidarity.

''(13) The Government of Belarus, led by Alyaksandr Lukashenka, has pursued a policy undermining the country's sovereignty and independence by making Belarus political, economic, cultural, and societal interests subservient to those of Russia.

''(14) Against the will of the majority of the Belarusian people, Russian President Vladimir Putin has propped up the Alyaksandr Lukashenka regime, including by offering security assistance, providing significant financial support, and sending Russian propagandists to help disseminate pro-regime and pro-Kremlin propaganda on Belarus state television.

''(15) Efforts by the Government of the Russian Federation to subsume Belarus into its sphere of influence and consider Belarus as part of the Russian empire or as a 'Union State' include security, political, economic, and ideological integration between Russia and Belarus, which intensified in 2020 after President Putin supported Mr. Lukashenka's illegitimate election and resulted in the Government of Belarus permitting Russian troops to use Belarusian territory to conduct military exercises ahead of the February 2022 further invasion of Ukraine and staging part of the February 2022 further invasion of Ukraine from Belarusian territory, including by providing Russia with the use of airbases which allowed Russia to shoot artillery and missiles from Belarusian territory into Ukraine.

''(16) The United States Government and United States partners and allies have imposed sanctions on Alyaksandr Lukashenka and the Government of Belarus in response to anti-democratic activities and human rights abuses for more than 20 years, including in response to the Government of Belarus' support for Russia's further invasion of Ukraine, which include property blocking and visa restrictions and export restrictions.

''(17) The Kremlin has provided the Government of Belarus with loans amounting to more than $1,500,000,000 dollars to prop up Lukashenka's illegitimate regime and Russia continues to provide Belarus with access to an economic market to avoid the impacts of United States and allied countries' sanctions on key Belarusian industries.

''(18) The Government of Belarus is relied upon by the Government of the Russian Federation to increase production of ammunition and other military equipment to facilitate the Kremlin's crimes of aggression, war

crimes, and crimes against humanity during the illegal war in Ukraine.

''(19) Since before the 2022 further invasion of Ukraine, the Government of Belarus has hosted Russian troops on Belarusian territory and enabled the violation of Ukraine's sovereignty by Russia in February 2022 and since the further invasion of Ukraine, the Government of Belarus has also hosted Russian mercenary fighters and reportedly hosted Russian nuclear warheads.

''(20) The international community has seen credible evidence that children forcibly removed from Ukraine by Russia during the further invasion of Ukraine have transited through the territory of Belarus or been illegally removed to the territory of Belarus with support from Alyaksandr Lukashenka and been subjected to Russian re-education programs.

''(21) The Government of Belarus' continued support of Russia, especially in the unprovoked further invasion of Ukraine, and continued oppression of the Belarusian people may amount to crimes against humanity, war crimes, and the crime of aggression.

''(22) The Government of Belarus also threatens the safety, security, and sovereignty of European countries, including NATO allies Latvia, Lithuania, and Poland, by facilitating illegal migration through the territory of Belarus, resulting in efforts by the United States to support a Customs and Border Patrol Technical Assessment in Latvia to ensure European allies and partners can secure their borders.

''(23) The Government of Lithuania and other United States partners and allies host independent Belarusian free media, including Radio Free Europe/Radio Liberty's Minsk bureau, and facilitate information and content in the Belarusian language, which the Lukashenka regime has dismissed and defacto outlawed as an inferior language to Russian for the purpose of facilitating Russification campaigns in Belarus.

''(24) The governments of Lithuania, Latvia, Poland, and other European partners host members of the Belarusian pro-democracy movement, including political leaders, free and independent media, and exiled civil society groups and provide essential support to these individuals and groups that make up the Belarus democracy movement.

''(25) The Government of Belarus has further attempted to suppress freedom of movement of Belarusian people and Belarusian diaspora and retaliate against those Belarusians living overseas and who have fled the Lukashenka regime by refusing to provide overseas passport services.

''(26) The International Civil Aviation Organization found that the Government of Belarus committed an act of unlawful interference when it deliberately diverted Ryanair Flight 9478 in order to arrest two Belarusian citizens, including an opposition activist and journalist.

''(27) The Belarus democracy movement has legitimate aspirations for a transatlantic future for the people of Belarus and continue to seek justice for those imprisoned and oppressed by the Lukashenka regime and resist Russian encroachment on Belarusian territory, culture, and identity.''.

''(20) to provide technical support to the United Transitional Cabinet of Belarus and European allies and partners to develop and implement national identification documents (New Belarusian Passport) that will enable the more than 2,000,000 Belarusians living abroad to access freedom of movement and essential services while maintaining Belarusian national identity and unity;

''(21) to include Belarusian nationals living in Ukraine as of February 24, 2022, in the Uniting For Ukraine program to provide a pathway for Belarusian nations and their immediate family members outside of the United States to come to the United States and stay for a period of not more than two years of parole and subject those Belarusian nationals to the same qualifications for entry into the program as Ukrainian nationals;

''(22) to engage in the United States-Belarus democratic movement strategic dialogue when necessary to reaffirm commitments to promoting freedom and democracy in Belarus and promote efforts to restore free and open presidential and parliamentary elections in Belarus that are conducted consistent with OSCE standards and under the supervision of OSCE observers and independent domestic observers;

''(23) to refuse to recognize the legitimacy of the Lukashenka regime to enter into any international agreements or treaties;

SA 2892. Ms. WARREN (for herself, Mr. BLUMENTHAL, Mr. PADILLA, Ms. SMITH, and Mr. MERKLEY) submitted an amendment intended to be proposed by her to the bill S. 4638, to authorize appropriations for fiscal year 2025 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle H of title V, add the following:

SEC. 594. RESCISSION OF MEDALS OF HONOR AWARDED FOR ACTS AT WOUNDED KNEE CREEK ON DECEMBER 29, 1890.

(a) FINDINGS.—Congress finds as follows:

(1) The Medal of Honor is the highest military award of the United States.

(2) Congress found that to earn the Medal of Honor ''the deed of the person . . . must be so outstanding that it clearly distinguishes his gallantry beyond the call of duty from lesser forms of bravery''.

(3) The actions of Medal of Honor recipients inspire bravery in those currently serving in the Armed Forces and those who will come to serve in the future.

(4) Those listed on the Medal of Honor Roll have come to exemplify the best traits of members of the Armed Forces, a long and proud lineage of those who went beyond the call of service to the United States of America.

(5) To date the Medal of Honor has been awarded only 3,522 times, including only 145 times for the Korean War, 126 times in World War I, 23 times during the Global War on Terror, and 20 times for the massacre at Wounded Knee.

(6) The Medal of Honor is awarded in the name of Congress.

(7) As found in Senate Concurring Resolution 153 of the 101st Congress, on December 29, 1890, the 7th Cavalry of the United States engaged a tribal community ''resulting in the tragic death and injury of approximately 350–375 Indian men, women, and children'' led by Lakota Chief Spotted Elk of the Miniconjou band at ''Cankpe' Opi Wakpa'' or ''Wounded Knee Creek''.

(8) This engagement became known as the ''Wounded Knee Massacre'', and took place between unarmed Native Americans and soldiers, heavily armed with standard issue army rifles as well as four ''Hotchkiss guns'' with five 37 mm barrels capable of firing 43 rounds per minute.

(9) Nearly two-thirds of the Native Americans killed during the Massacre were unarmed women and children who were participating in a ceremony to restore their traditional homelands prior to the arrival of European settlers.

(10) Poor tactical emplacement of the soldiers meant that most of the casualties suffered by the United States troops were inflicted by friendly fire.

(11) On January 1, 1891, Major General Nelson A. Miles, Commander of the Division of Missouri, telegraphed Major General John M. Schofield, Commander-in-Chief of the Army notifying him that ''[I]t is stated that the disposition of four hundred soldiers and four pieces of artillery was fatally defective and large number of soldiers were killed and wounded by the fire from their own ranks and a very large number of women and children were killed in addition to the Indian men''.

(12) The United States awarded 20 Medals of Honor to soldiers of the U.S. 7th Cavalry following their participation in the Wounded Knee Massacre.

(13) In 2001, the Cheyenne River Sioux Tribe, a member Tribe of the Great Sioux Nation, upon information provided by Lakota elders and by veterans, passed Tribal Council Resolution No. 132–01, requesting that the Federal Government revoke the Medals of Honor from the soldiers of the United States Army, 7th Cavalry issued following the massacre of unarmed men, women, children, and elderly of the Great Sioux Nation on December 29, 1890, on Tribal Lands near Wounded Knee Creek.

(14) The National Congress of American Indians requested in a 2007 Resolution that the Congress ''renounce the issuance of said medals, and/or to proclaim that the medals are null and void, given the atrocities committed upon unarmed men, women, children and elderly of the Great Sioux Nation''.

(15) General Miles contemporaneously stated that a ''[w]holesale massacre occurred and I have never heard of a more brutal, coldblooded massacre than that at Wounded Knee''.

(16) Allowing any Medal of Honor, the United States highest and most prestigious military decoration, to recognize a member of the Armed Forces for distinguished service for participating in the massacre of hundreds of unarmed Native Americans is a disservice to the integrity of the United States and its citizens, and impinges on the integrity of the award and those who have earned the Medal since.

(b) IN GENERAL.—Each Medal of Honor awarded for acts at Wounded Knee Creek, Lakota Pine Ridge Indian Reservation, South Dakota, on December 29, 1890, is rescinded.

(c) MEDAL OF HONOR ROLL.—The Secretary concerned shall remove the name of each individual awarded a Medal of Honor for acts described in subsection (a) from the Army, Navy, Air Force, and Coast Guard Medal of Honor Roll maintained under section 1134a of title 10, United States Code.

(d) RETURN OF MEDAL NOT REQUIRED.—No person may be required to return to the Federal Government a Medal of Honor rescinded under subsection (b).

(e) NO DENIAL OF BENEFITS.—This Act shall not be construed to deny any individual any benefit from the Federal Government.

SA 2893. At the end of subtitle H of title X, add the following:

SEC. 1095. RETURNING SKILLED WORKERS TO THE STEM WORKFORCE.

(a) SHORT TITLE.—This section may be cited as the ''STEM Restoring Employment Skills through Targeted Assistance, Reentry, and Training Act'' or the ''STEM RESTART Act''.

(b) IN GENERAL.—Subtitle D of title I of the Workforce Innovation and Opportunity Act is amended—

(1) by redesignating section 172 (29 U.S.C. 3227) as section 173; and

(2) by inserting after section 171 the following:

''SEC. 172. GRANTS TO SUPPORT SKILLED WORKERS IN RETURNING OR TRANSITIONING TO THE STEM WORKFORCE.

''(a) FINDINGS.—Congress finds the following:

''(1) The Brookings Institution expects the coronavirus pandemic will have lasting effects on the labor market and could change the composition of available jobs indefinitely, with the ensuing economic decline ushering in a new era of automation. Employers will likely shed less skilled workers and replace them with higher-skilled technology workers, which increases labor productivity as a recession tapers off.

''(2) The current pipeline of engineering talent does not include many college graduates from large cohorts of the population.

Women represent over 57 percent of college graduates but only 22 percent of the engineers entering the workforce. Within the workforce, only 14 percent of engineers are women. Women also leave the engineering profession in greater numbers than men do.

''(3) A 2018 Pew Research Center study showed there are wide racial gaps among current STEM workers regarding reasons why so few Black and Hispanic people work in STEM. For example, over 70 percent of Black STEM workers view lack of access to education and discriminatory hiring and promotion practices as reasons there are so few Black men and women in the STEM fields. By comparison, less than 30 percent of White and Asian STEM workers view that lack of access and those practices as barriers to Black people entering the fields. Additionally, 62 percent of Black STEM workers say they have faced discrimination in their jobs compared to just 13 percent of White STEM workers.

''(4) Among the 25,300,000 United States women ages 25 through 54 with a bachelor's degree or higher degree in 2017, 4,200,000 were out of the labor force. While some of those women were disabled or retired, the remaining 3,600,000 women may be candidates to return to work.

''(5) The Center for Talent Innovation's research shows that while 93 percent of women who left the workforce want to resume their careers, only 74 percent manage to get any kind of job at all and just 40 percent successfully return to work full-time.

''(6) Mid-career internship and other returnship programs are an effective way to address the difficulties of former STEM employees seeking to return to work, as the programs provide a probationary period and also an opportunity to obtain mentorship, professional development, and support as the participants transition back to work. Even more important, returnship programs allow an employer to base a hiring decision on an actual work sample instead of a series of interviews. At the same time, the programs give participants an opportunity to return to work together, in a cohort of similarly situated returners.

''(7) Fortune 500 companies like Apple, Honeywell, Northrop Grumman, Ingersoll Rand, and The Procter & Gamble Company have taken the initiative to try to close the gender gap among STEM professionals by providing mid-career internships for returning technical professionals. However, a 2008 study by Anthony Breitzman and Diana Hicks for the Office of Advocacy of the Small Business Administration, entitled 'An Analysis of Small Business Patents by Industry and Firm Size', found that 'Small firms are much more likely to develop emerging technologies than are large firms. This is perhaps intuitively reasonable given theories on small firms effecting technological change, but the quantitative data here support this assertion. Specifically, although small firms account for only 8 percent of patents granted, they account for 24 percent of the patents in the top 100 emerging clusters.'.

''(b) PURPOSES.—The purposes of this section are to—

''(1) prioritize expanding opportunities, through high-quality internships or other returnships in STEM fields for unemployed or underemployed workers, particularly workers from underrepresented populations and workers from rural areas, who are mid-career skilled workers seeking to return or transition to in-demand industry sectors or occupations within the STEM workforce, at positions and compensation above entry level; and

''(2) establish grant funding and other incentives for small-sized and medium-sized companies in in-demand industry sectors or occupations to establish programs that provide on-the-job evaluation, education, and training for mid-career skilled workers described in paragraph (1).

''(c) DEFINITIONS.—In this section:

''(1) MEDIUM-SIZED ENTERPRISE.—The term 'medium-sized', used with respect to an enterprise, means an entity that employs more than 499 and fewer than 10,000 employees.

''(2) RESTART GRANT.—The term 'RESTART grant' means a grant made under subsection (d).

''(3) RETURNSHIP.—The term 'returnship' shall mean any internship, apprenticeship, re-entry opportunity, direct hiring opportunity with support, or other similar opportunity designed to provide workers seeking to return or transition to the STEM workforce with positions that—

''(C) provide training that leads workers toward full-time careers and provides pathways toward advancement and leadership.

''(4) RURAL AREA.—The term 'rural area' means an area that is not an urban area (within the meaning of the notice of final program criteria entitled 'Urban Area Criteria for the 2010 Census' (76 Fed. Reg. 53030 (August 24, 2011))).

''(5) SMALL-SIZED ENTERPRISE.—The term 'small-sized', used with respect to an enterprise, means an entity that employs more than 49 and fewer than 500 individuals.

''(6) STEM.—The term 'STEM' has the meaning given the term in section 2 of the America COMPETES Reauthorization Act of 2010 (42 U.S.C. 6621 note).

''(7) UNDERREPRESENTED POPULATION.—The term 'underrepresented population' means a group that is underrepresented in science and engineering, as determined by the Secretary of Education under section 637.4(b) of title 34, Code of Federal Regulations (as in effect on the date of enactment of the STEM RESTART Act).

''(8) UNEMPLOYED OR UNDEREMPLOYED INDIVIDUAL.—The term 'unemployed or underemployed individual' means—

''(A) an unemployed or underemployed individual as defined by the Bureau of Labor Statistics; and

''(B) a displaced or furloughed worker.

''(d) GRANT.—

''(1) IN GENERAL.—From the amounts made available to carry out this section, the Secretary shall award grants, on a competitive basis, to eligible entities, to carry out returnship programs that provide opportunities above entry level in STEM fields for mid-career skilled workers, and achieve the purposes described in subsection (b).

''(2) PERIODS.—The Secretary shall award the grants for an initial period of not less than 3 years and not more than 5 years.

''(3) AMOUNTS.—In awarding grants under this subsection, the Secretary shall award a grant—

''(2) ELIGIBLE PROVIDERS.—

''(i) may or may not directly employ skilled workers in STEM fields but—

''(I) shall have expertise in human resources-related activities, such as identifying or carrying out staffing with skilled workers or underrepresented populations; and

Subtitle I—Antisemitism Awareness

SEC. 1096. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), prohibits discrimination on the basis of race, color, and national origin in programs and activities receiving Federal financial assistance;

(2) while such title does not cover discrimination based solely on religion, individuals who face discrimination based on actual or perceived shared ancestry or ethnic characteristics do not lose protection under such title for also being members of a group that share a common religion;

(3) discrimination against Jews may give rise to a violation of such title when the discrimination is based on race, color, or national origin, which can include discrimination based on actual or perceived shared ancestry or ethnic characteristics;

(4) it is the policy of the United States to enforce such title against prohibited forms of discrimination rooted in antisemitism as vigorously as against all other forms of discrimination prohibited by such title; and

(5) as noted in the U.S. National Strategy to Counter Antisemitism issued by the White House on May 25, 2023, it is critical to—

(A) increase awareness and understanding of antisemitism, including its threat to America;

(B) improve safety and security for Jewish communities;

(C) reverse the normalization of antisemitism and counter antisemitic discrimination; and

(D) expand communication and collaboration between communities.

SEC. 1096A. FINDINGS.

Congress finds the following:

(1) Antisemitism is on the rise in the United States and is impacting Jewish students in K–12 schools, colleges, and universities.

(2) The International Holocaust Remembrance Alliance (referred to in this subtitle as the ''IHRA'') Working Definition of Antisemitism is a vital tool which helps individuals understand and identify the various manifestations of antisemitism.

(3) On December 11, 2019, Executive Order 13899 extended protections against discrimination under the Civil Rights Act of 1964 to individuals subjected to antisemitism on college and university campuses and tasked Federal agencies to consider the IHRA Working Definition of Antisemitism when enforcing title VI of such Act.

(4) Since 2018, the Department of Education has used the IHRA Working Definition of Antisemitism when investigating violations of that title VI.

(5) The White House released the first-ever United States National Strategy to Counter Antisemitism on May 25, 2023, making clear that the fight against this hate is a national, bipartisan priority that must be successfully conducted through a whole-of-government-and-society approach.

SEC. 1096B. DEFINITIONS.

For purposes of this subtitle, the term ''definition of antisemitism''—

(1) means the definition of antisemitism adopted on May 26, 2016, by the IHRA, of which the United States is a member, which definition has been adopted by the Department of State; and

(2) includes the ''[c]ontemporary examples of antisemitism'' identified in the IHRA definition.

SEC. 1096C. RULE OF CONSTRUCTION FOR TITLE VI OF THE CIVIL RIGHTS ACT OF 1964.

In reviewing, investigating, or deciding whether there has been a violation of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) on the basis of race, color, or national origin, based on an individual's actual or perceived shared Jewish ancestry or Jewish ethnic characteristics, the Department of Education shall take into consideration the definition of antisemitism as part of the Department's assessment of whether the practice was motivated by antisemitic intent.

SEC. 1096D. OTHER RULES OF CONSTRUCTION.

(a) GENERAL RULE OF CONSTRUCTION.—Nothing in this subtitle shall be construed—

(1) to expand the authority of the Secretary of Education;

(2) to alter the standards pursuant to which the Department of Education makes a determination that harassing conduct amounts to actionable discrimination; or

(3) to diminish or infringe upon the rights protected under any other provision of law that is in effect as of the date of enactment of this Act.

(b) CONSTITUTIONAL PROTECTIONS.—Nothing in this subtitle shall be construed to diminish or infringe upon any right protected under the First Amendment to the Constitution of the United States.

SA 2915. Mr. HEINRICH (for himself and Mr. SCHUMER) submitted an amendment intended to be proposed by him to the bill S. 4638, to authorize appropriations for fiscal year 2025 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

U.S. SUPREME COURT

Mr. CORNYN. Mr. President, it is no secret that, in recent years, the Supreme Court has become a political target for our friends across the aisle, the Democrats. I still remember a time—maybe it was a quaint period during our Nation's history—when Robert Jackson, former Supreme Court Justice, said: The Supreme Court is not final because it is always right. It is right because it is always final.

The point is, there has to be someplace, somewhere in the U.S. Government, where decisions are made on something other than a political basis. We know that in Congress—the political branches of government—we run for office; we stand for reelection. The voters can agree with us or disagree with us based upon our actions, and we will then be held accountable at the ballot box. The same is true for the President of the United States, the head of the executive branch.

But the judicial branch is supposed to be different. Judges don't stand for election. They can't be removed from office for virtually anything other than impeachable behavior, which is rare indeed, and Congress can't reduce their pay during their tenure in office. All of these are designed to preserve the independence of the judiciary.

Justice Scalia, during his lifetime, liked to observe that constitutions are simply words on paper, and he pointed out that the Soviet Union—the former Soviet Union—had one of the best constitutions on paper that existed at the time. But the difference between the Soviet Union and the United States is that we have an independent judiciary—unelected, unaccountable at the ballot box, but who continue, during their good behavior, as members of the court who have to make hard decisions. Their decisions are supposed to be made not on public opinion polls, not on votes cast at the ballot box, not on what is most popular but what conforms with the Constitution and laws of the United States. They have to literally call balls and strikes.

But some of our Democratic colleagues have decided that, when they don't like those decisions made by this independent judiciary, the best tactic is to attack the Judges and to thereby claim that, somehow, they are just another political branch—an unelected political branch—but nothing could be farther from the truth.

As evidence of their attempt to politicize the courts, I would point to the time that five of our Democratic colleagues threatened to ''restructure the Court'' if it didn't deliver their preferred outcome in a case involving the Second Amendment.

There was a time when some of our colleagues said: We need to pack the Court with more judges because we don't like the ones that currently sit on the Court, and we want a different outcome in the Court's decision.

And then there was the time when 15 of our Democratic colleagues recommended slashing the Court's budget unless it implemented a preferred code of ethics dictated by the legislative branch and not an independent judiciary.

And, of course, we can't forget the time when the majority leader, the Senator from New York, stood on the steps of the Supreme Court and threatened two Justices by name, saying they would ''pay the price''; they wouldn't know what hit them if they didn't reach his preferred decision in a case involving abortion.

Over and over again, many of our Democratic colleagues have shown their contempt for an independent judiciary, the very foundation of our form of government and the crown jewels of what makes us different from the rest of the world.

Let's forget unbiased judges who reach decisions based on the law and the Constitution. Some of our Democratic colleagues want to put their thumbs on the scales of justice in order to achieve specific results. And in pursuit of what? I would suggest it is in pursuit of power by any means whatsoever, as opposed to regarding the Constitution itself and the very structure of our Government as being sacrosanct, something to be celebrated and honored. They view it as something to be circumvented in order to pursue power, in order to pursue desired results.

We all know that, last week, the Supreme Court concluded a busy and consequential term that included a number of cases on a wide range of matters, from voting rights and homelessness to Presidential immunity and the power of Federal Agencies. Based on the reaction of some on the left, you would think the sky is falling. You would think the apocalypse is nigh and that we had reached the end of democracy as we know it.

Well, let's first look at the decision that the Court made to strike down something called the Chevron doctrine. This is a 40-year-old interpretation of an Agency's power that basically deferred to an Agency and created immense, unaccountable authority in bureaucrats who were not elected to office. This doctrine originated in 1984 in a case where the Supreme Court gave Federal Agencies broad leeway to interpret laws passed by Congress.

Over time, Chevron deference has emboldened Agencies to expand their powers, far beyond what Congress has authorized, to enact policies that go far beyond what Congress intended, with little or no oversight and no accountability.

If you think about it, Congress is the one given the authority, under our Constitution, to legislate, to make the laws. There is no authority under the Constitution for the executive branch to make laws, and certainly no authority under the Constitution given to Federal Agencies to make laws, absent authority granted to them by the legislative branch.

But here is one example of how the administrative Agencies have abused their authority. In the wake of a horrific mass shooting in Uvalde, TX, 2 years ago, I worked with colleagues on both sides of the aisle to pass a bill called the Bipartisan Safer Communities Act. It was signed into law a month after the shooting and made historic investments in mental health and school safety. We also included targeted reforms to protect public safety, without infringing on the rights of law-abiding citizens under the Second Amendment to the Constitution.

The firearms-related provisions of the bill were designed to be targeted and extremely narrow. But when it came to interpreting or implementing the law, the Biden administration's Bureau of Alcohol, Tobacco, and Firearms colored way outside the lines that Congress authorized.

The administration used these provisions as a pretext to implement broader reforms that were flatly rejected by Congress multiple times during the course of the negotiations. In other words, we considered and rejected the very outcome that the Bureau of Alcohol, Tobacco, and Firearms sought to achieve by this rewrite of what Congress had authorized. In short, unelected bureaucrats, accountable to no one, ignored the express will of the people's representatives in Congress and took a bipartisan law that was crafted in good faith and turned it into a Trojan horse for their own radical gun control policies, all contrary to the Constitution.

Senator TILLIS, the Senator from North Carolina, and I had worked together with our friends and colleagues Senator CHRIS MURPHY from Connecticut and Senator KYRSTEN SINEMA from Arizona to be the principal authors of the Bipartisan Safer Communities Act.

Senator TILLIS and I—after the Bureau of Alcohol, Tobacco, and Firearms issued their unauthorized and unconstitutional rule—introduced a measure to block the Biden rule, and I hope that we have a chance to vote on that soon. The truth is, it has already been enjoined, or stayed, by Federal courts as being outside of the authority given to the Agency to interpret the Bipartisan Safer Communities Act—in other words, an extralegal act to try to create law where Congress had not.

But the truth is Congress shouldn't have to pass a resolution of disapproval

every time the administration overreaches. That alone could be a full-time job.

In its recent ruling, the Supreme Court affirmed what should be obvious to all of us, because that is what the Constitution says: that it is up to Congress to pass laws, not unaccountable bureaucrats—an unremarkable holding, really, but one that was long overdue.

If an Agency takes too many creative liberties with implementing the law, that matter should be examined and ultimately struck down by a court as outside the authorities that the Constitution gives the executive branch Agency.

Again, our Framers designed three coequal and distinct separate branches of government. When Agencies attempt to legislate, even though the Constitution does not permit it, the courts have a responsibility to step in and strike down unlawful attempts to usurp the article I authority granted solely to the legislative branch, including the U.S. Senate.

In our country, all power—all political power—is derived from a single source; that is the consent of the governed. Laws that affect people across the country should be crafted, debated, and passed by Congress, not handed down through administrative actions and rulemaking where Congress is not authorized.

If a President's party wants to change the law, the only option is to come to Congress and work with Congress. There are no shortcuts. The executive branch doesn't have the authority to legislate on its own, whether under the guise of rulemaking or otherwise.

That is why the end of this so-called Chevron deference is so important to the restoration of democracy and constitutional government. It takes power out of the hands of unaccountable bureaucrats, and it puts the responsibility back in the hands of those of us who are Members of the political branch, the legislature.

We run for office. Voters can vote for us or vote against us, and that is the sort of accountability that the Constitution contemplates.

Despite some of the dramatic overreaction by some of our colleagues, the end of Chevron deference does not signal the end of democracy. It simply says the Court has to look at the Constitution and the laws passed by Congress, and if the administration overreaches, it is the duty of the Court to strike it down as being unauthorized by Congress. Regardless of political affiliation, everyone should want that because that is what the Constitution requires.

No administration—no Republican administration, no Democratic administration—should have the authority to violate the Constitution and usurp the will and the responsibilities given solely to Congress.

In another highly anticipated opinion, the Supreme Court clarified what Presidents can and cannot be sued for. Well, based on some reaction to the case, you would think the Court had given the President the green light to commit murder, rob a bank, or traffic illegal drugs from the White House. But, obviously, that is not case. As a matter of fact, the Supreme Court stated that official acts of a President should be given immunity but did not go on to say that individual acts that have been charged in pending cases were, in fact, immune. It has remanded those decisions back to the trial courts to apply the law as the Court articulated.

The Court did not offer any sort of protection against unofficial acts. The Justices didn't grant the President carte blanche to commit crimes with impunity. It simply clarified that the President is entitled to immunity while performing official acts.

This opinion is not, contrary to some claims, a monumental shift in policy. Presidential immunity was established in previous cases to protect the integrity of the executive branch, and it recognizes that a President—any President—a Democratic President or a Republican President—needs some latitude to make tough calls on public policy and matters facing the country without the threat of being sued incessantly and being distracted from their duties to serve the American people in this office.

I think back on George W. Bush's Presidency, when the Nation was attacked by al-Qaida on 9/11. Nearly 3,000 Americans were killed on that day, and President Bush made the decision that, I have to imagine, was one of the most difficult decisions that any President can make: He made the decision to go to war against these terrorists.

American troops were deployed in the Middle East to destroy al-Qaida, and many on the left viewed this act of self-defense as something else entirely. Some went so far as to label that what the President did made him a ''war criminal'' for his decision to defend the country against terrorists.

Current Supreme Court Justice Brown Jackson served as a Federal public defender at the time, and she even filed a brief accusing President Bush of committing a war crime.

Can you imagine if the President was dragged into court every time somebody had a disagreement about what the President decides in acting in his or her official capacity? It would, obviously, not only chill decision making, but it would severely limit the President's ability to govern effectively. The recourse is not in court; it is at the ballot box.

Presidents must be able to perform their duties without the fear of incessant and harassing litigation. The Commander in Chief should not have his or her hands tied by a looming threat of prosecution for actions taken during their official duties as part of the Presidency of the United States.

The Supreme Court, in fact, simply clarified that criminal law cannot be used as a weapon against a President for his or her official acts. But given the fact that many of our colleagues on the left have tried to weaponize a judicial system in recent years, the Supreme Court's decision was particularly important.

We have had a new word created recently called lawfare, basically using litigation as a form of warfare rather than arguing for votes and having debates about policies that are then decided by the voters at the ballot box.

We have seen some of our Democratic colleagues attempting to use every tool to tear down President Biden's campaign rival, former President Trump.

And in the process, we have seen some Democrats weaponize the Department of Justice against President Trump and his allies, and we have seen that in the district attorney in the State of New York in a recent litigation against former President Trump.

Prosecutors blew past exculpatory evidence when looking at the January 6 cases, for example. Manhattan District Attorney Alvin Bragg even campaigned on the promise to prosecute President Trump. This is just the latest chapter in the never-ending saga that is the Democrats' war against an independent judiciary and using the court to try to accomplish what they should be trying to accomplish not in court but at the ballot box, through legitimate debate, transparency and, ultimately, the decision of the American people.

Some of our colleagues on the left don't want judges to follow the law. They want easy victories. They want layups. And when they can't win in Congress because they don't have the votes, they want the courts to fill in the gaps and accomplish the goals that they could not accomplish in Congress.

Some of our colleagues want the court to reach a conclusion first, without regard to the facts or the law, and then work backward to try to come up with some sort of justification for the outcome. That is called results-oriented decision making. It is the opposite of what judges should be doing.

Whether that means taking down a political rival, implementing radical pro-abortion policies, or expanding the power of unelected bureaucrats, some of our colleagues on the left want the Supreme Court to be a shortcut to easy wins—easy political wins—again, that they could not accomplish in the Halls of Congress or at the ballot box.

These Justices are not puppets that can be manipulated for partisan gain. They are members of a separate and coequal branch of government, and their decisions must be respected.

That doesn't mean you need to agree with them, but you do need to respect their right to make the decision and to finally settle these issues, at least until Congress or another branch of government decides to overturn them on other than constitutional grounds. Obviously, the Supreme Court is the

final word in interpreting the Constitution. And unless we see the Constitution amended at some point by the American people, that is going to stand.

Many of the Courts' decisions are based on statutory interpretation, based on what the legislature has done, what the Senate has done. And those are things that the Senate can come back and address through legislation.

But the biggest threat to democracy isn't the Supreme Court; it is a never-ending series of political attacks on the Court by many on the left.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FETTERMAN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SCHUMER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

KIDS ONLINE SAFETY ACT

CHILDREN AND TEENS' ONLINE PRIVACY PROTECTION ACT

Mr. SCHUMER. Mr. President, I come here today to speak on the continued bipartisan efforts to protect our kids from the risks of social media and other online platforms.

Three weeks ago, I spoke here on the floor with my good friend and colleague Senator BLUMENTHAL about the need to get two bills done: The Kids Online Safety Act and the Children and Teens' Online Privacy Protection Act.

Moving on KOSA and COPPA is a top priority of mine. I have listened to so many parents whose kids have been gravely harmed by social media. Some of these kids face bullying or were victims of exploitation and online predators or saw their mental health suffer. And in horrible stories that I have heard on many occasions, in too many instances, the kids took their own lives. Imagine, 13, 14, 15 years old, killing themselves because of what they saw online. And imagine the families who live with the hole in their heart for the rest of their lives. It is horrible. We shouldn't allow it to happen any longer.

So getting these bills done is very important for the well-being of our kids, but it will require bipartisan cooperation to move forward, as so many things in the Senate do. As all know, there has been a lot of discussion about the best way to proceed.

I said at the end of June I would give all objectors 2 weeks to offer solutions for addressing their concerns. Sadly, a few of our colleagues continue to block these bills without offering any constructive ideas for how to revise the text. So now we must look ahead, and all options are on the table.
