

improved performance). The research should be aimed at elucidating the physics principles of such improved toroidal magnetic power systems. Research projects are desired which are unique, first of a kind and provide new insights. Applications for research on existing large tokamaks should not be submitted in response to this notice.

**DATES:** To permit timely consideration for awards in Fiscal Year 1996, formal applications submitted in response to this notice must be received no later than 4:30 p.m., June 1, 1995. No electronic submissions of formal applications will be accepted.

**ADDRESSES:** Formal applications referencing Program Notice 95-10 should be forwarded to: U.S. Department of Energy, Office of Energy Research, Acquisition and Assistance Management Division, ER-64 (GTN), Washington, DC 20585, Attn: Program Notice 95-10. The following address must be used when submitting applications by U.S. Postal Service Express mail, any commercial mail delivery service, or when handcarried by the applicant: U.S. Department of Energy, Acquisition and Assistance Management Division, ER-64, 19901 Germantown Road, Germantown, MD 20874.

**FOR FURTHER INFORMATION CONTACT:** Dr. Ronald A. Blanken, Division of Advanced Physics & Technology, Office of Fusion Energy, ER-542, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874, (301) 903-3306 or 903-3421, or by Internet address, ronald.blanken@mailgw.er.doe.gov.

**SUPPLEMENTARY INFORMATION:** In selecting applications for funding, the DOE Office of Fusion Energy will give priority to applications that can produce experimental results within three to five years after grant initiation. Applications in fusion confinement concepts without closed toroidal magnetic surfaces and without significant rotational transform will not be considered under this Notice, but may be the subject of a future Notice.

This notice requests that the detailed description of the proposed project component of a complete grant application required by 10 CFR 605.9 (b) (2) should include a detailed experimental research plan which includes the specific results expected at the end of the project period. Evaluation of this written component against the selection criteria set forth in 10 CFR Part 605 will be the principal means for selecting the successful applications.

It is anticipated that up to \$5,000,000 in FY 1996 will be available to start new

projects from applications received in response to this Notice. Future year funding is anticipated to be greater but will depend on the nature of the applications, suitable experimental progress and the availability of funds. Because of the total amount of anticipated available funding and because of the intent to have a broadly based program, applications with a base yearly requirement in any year in excess of \$4,000,000 are unlikely to be funded. Evaluation against the selection criteria will be normalized on a per dollar basis so as not to favor applications of any particular size. Applications requiring yearly funding as low as \$50,000 are welcome and encouraged.

Applicants are requested to supply with their application a three page written summary (plus one page of figures) which will be read by all peer reviewers. The following sections should be included in the summary:

- (1) Goal of the experiment;
- (2) Synopsis of the experimental program plan;
- (3) Deliverable result expected (please be specific);
- (4) Adequacy of the facilities;
- (5) Adequacy of the budget (include yearly funding requested);
- (6) Discussion on why this research would have an important impact on the prospects for toroidal magnetic fusion power plants; and
- (7) Discussion of how the experiment would elucidate the physics principles of the innovation. It is expected that the review process will be completed in August 1995 and that OFE decisions will be announced in September 1995. To expedite communications, please include the principal investigator's telefax number and Internet address in Item 15 of the grant application.

Information about the development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and procedures may be found in the Application Guide for the Office of Energy Research Financial Assistance Program. The Application Guide is available from the U.S. Department of Energy, Office of Fusion Energy, Division of Advanced Physics and Technology, ER-542, Washington, DC 20585. Instructions for preparation of an application are included in the Application Guide. Telephone requests for the Application Guide may be made by calling (301) 903-3421.

The Catalog of Federal Domestic Assistance Number for this program is

81.049, and the solicitation control number is ERFAP 10 CFR Part 605.

## Federal Energy Regulatory Commission

[Project No. 2459-005 West Virginia]

### West Penn Power Co.; Notice of Availability of Final Environmental Assessment

December 28, 1994.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for a new license for the Lake Lynn Hydroelectric Project, located in Monogalia County, West Virginia, and Fayette County, Pennsylvania, and has prepared a Final Environmental Assessment (FEA) for the project. In the FEA, the Commission's staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate environmental protection or enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the FEA are available for review in the Public Reference Branch, Room 3104, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.
