

habitat) and at certain times of the year. This may cause, for the short term, an increase in carbon monoxide and smoke particulates. Burning would be coordinated with the Oregon Department of Environmental Quality to ensure that impacts to air quality would be minimal.

To avoid adverse impacts to fish and wildlife habitat, management of public access will include the use of interpretive signs to educate visitors on the need to stay in designated areas, using vegetation as a natural barrier to prevent off-trail use, and/or having seasonal restrictions on visitor access.

Timing and location of management activities (burning of Reed canary grass, mechanical removal of blackberries, and trapping of bullfrogs) would occur in such a manner as to minimize disturbance to native fish and wildlife, especially during such critical periods as the breeding season for waterfowl.

A cultural resource survey was performed on the Burlington Bottoms site in September of 1994. No prehistoric materials were observed, possibly due to twentieth century fill material and dense vegetation which obscure the ground surface, hindering recognition of these resources. Any ground-disturbing activities (e.g., excavations or surface leveling) related to the construction of the trail and wildlife viewing areas and the placement of interpretive signs will be monitored by an archaeologist since it is possible that unrecorded prehistoric sites exist beneath the ground surface.

Determination: Based on the information in the EA, summarized here, BPA determines that the proposed action is not a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA, 42 U.S.C. 4321 *et seq.* Therefore, an EIS will not be prepared and BPA is issuing this FONSI.

Issued in Portland, Oregon, on December 28, 1994.

Randall W. Hardy,

Administrator and Chief Executive Officer.

i. FERC Contact: Mohamad Fayyad, (202) 219-2665.

j. Comment Date: February 6, 1995.

k. Description of Amendment:

Licensee proposes to modify the route of project's transmission line, which has not been constructed yet. Under the proposed route, the transmission line would be 26-mile-long, 138-Kv overhead line from Belleville Hydroelectric Project powerhouse to Ohio Power Company's Rutherford Substation. The line would consist primarily of wood pole H-frame structures with typical spans between 800 to 900 feet.

Please, note that we are currently in the process of preparing a draft environmental assessment, which we will notice for comments upon completion.

1. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene.—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214.
