

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at her discretion, exempt a State agency from any registration provision of FIFRA if she determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for use of the herbicide, pyriithiobac-sodium, available as Staple from DuPont Agricultural Products, to control Palmer amaranth on up to 135,000 acres of cotton in South Carolina. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, dinitroaniline (dna) herbicides were used on essentially all of South Carolina's cotton acreage since the mid 1960's. It was not until 1989, that the presence of a dna-resistant Palmer amaranth biotype was first suspected in a Lee County cotton field in South Carolina. Since this time Palmer amaranth has become recognized as South Carolina's most troublesome weed in cotton. This phenomenon is due to the intensive selection pressure associated with yearly applications of dinitroaniline herbicides with essentially no herbicide rotation. In fields where Palmer amaranth exhibited resistance to the dna's and where acceptable early-season control was not achieved with the other soil-applied herbicides, Palmer amaranth could not be controlled with postemergence treatments. No selective postemergence over-the-top herbicides are registered for cotton that will control Palmer amaranth. The applicant estimates a 60 percent yield reduction resulting in significant economic loss if the request for use of pyriithiobac-sodium on cotton is not granted.

Under the proposed exemption, a maximum of two ground applications of Staple would be made at 1.0 fluid ounces of product (0.0625 pounds active ingredient=1.2 ounces of product) per acre. Not to exceed 2.0 fluid ounces of product (0.1250 pound active ingredient=2.4 ounces of product) per acre per season for pre and post applications. No applications would be made within 45 days of harvest.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in

any currently registered pesticide) [40 CFR 166.24 (a)(1)].

Pyriithiobac-sodium is a new chemical. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the South Carolina Department of Fertilizer and Pesticide Control.
