(CAA or the Act). EPA's final action on this notice of proposed rulemaking (NPRM) will incorporate this regulation into the federally approved SIP. EPA has evaluated this regulation and is proposing to conditionally approve it under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas. The EPA's final conditional approval is contingent on the SCAQMD providing the Agency with an enforceable commitment which addresses and cures all of the deficiencies associated with NO<sub>x</sub> and SO<sub>x</sub> RECLAIM within 12 months of the publication of the proposed conditional approval. In the event that SCAQMD fails to provide EPA with such a commitment, then EPA will publish a final rule to approve NO<sub>x</sub> and SO<sub>x</sub> RECLAIM in the form of a limited approval/limited disapproval action. Both the conditional approval action and the limited approval/limited disapproval action are discussed in this NPRM.

**Approval and Promulgation of Implementation Plans; California Implementation Plan Revision; South Coast Air Quality Management District**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** EPA is proposing to conditionally approve revisions to the California State Implementation Plan (SIP) which concern the control of oxides of nitrogen (NO<sub>x</sub>) and oxides of sulfur (SO<sub>x</sub>) emissions using an emissions-limiting economic incentives program, the NO<sub>x</sub> and SO<sub>x</sub> Regional Clean Air Incentives Market (NO<sub>x</sub> and SO<sub>x</sub> RECLAIM). This program, which consists of twelve rules and associated appendices known as Regulation XX, applies to facilities in the South Coast Air Quality Management District (SCAQMD) with four or more tons of NO<sub>x</sub> or SO<sub>x</sub> emissions per year from permitted equipment. The subject facilities, in order to meet annual emission reduction requirements, will participate in an economic incentive program (EIP) in order to reduce emissions at a significantly lower cost.

The intended effect of proposing approval of Regulation XX is to regulate emissions of NO<sub>x</sub> and SO<sub>x</sub> in accordance with the requirements of the Clean Air Act, as amended in 1990
