

through traditional regulatory means. The U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, is interested in exploring emerging structures and institutions for ensuring that basic public policy goals continue to be met, increasingly through market-based mechanisms. Specifically, the IRP Program intends to sponsor innovative research to explore the nature of the investor-owned electric utility industry and market transformation, and the development of new institutions supporting energy efficiency, environmental quality, equity, fuel diversity and research and development. Seven (7) broad subject areas in which research can be proposed include: (1) The economic costs and benefits of alternative wholesale and retail market structures. (2) The evolving nature of retail electricity markets. (3) New institutions for promoting and enhancing environmental quality. (4) New institutions for improving energy efficiency. (5) Analytical methods for a competitive market. (6) New structures for resource planning. (7) Emerging issues in the electric utility. More details on the types of projects and activities that might be expected as a result of this competition are included in the solicitation.

Review of applications will begin on or about June 15, 1995. Selections will commence approximately mid-July, with anticipated award issuance during August through September 1995. It is anticipated that the Denver Support Office of the Department of Energy will make multiple financial assistance awards as a result of this solicitation. Approximately \$400,000 has been allocated to this program in Fiscal Year 1995. Approximately four (4) to eight (8) awards will be made with Federal share funding levels not to exceed \$100,000 for any individual award. Project should be completed within nine (9) months of the award date, unless approved otherwise by a DOE Contracting Officer in writing.

Awards may be either grants or cooperative agreements, depending on the amount of substantial involvement anticipated between the Department of Energy and the recipient during performance of the contemplated activity.

The solicitation will be issued on or about April 15, 1995, and will contain detailed information on funding, cost sharing requirements, eligibility, application preparation, and evaluation. Responses to the solicitation will be due 60 days after solicitation release.
