Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement/ Environmental Impact Report (DEIS/ EIR) for the Seven Oaks Dam Water Conservation and Supply Study, San Bernardino, CA

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent.

SUMMARY: The Los Angeles District will prepare a EIS/EIR to evaluate the feasibility of establishing a seasonal water conservation and supply pool at Seven Oaks Dam. The dam, which is currently under construction, is the upstream component of the Santa Ana River Mainstem Project (SARP), and is located in the San Bernardino National Forest along the upper Santa Ana River at the base of the San Bernardino Mountains. The study was developed in response to local concerns regarding future water supply sources, given continued regional population growth, dwindling imported water supplies, and continued increases in the cost of water. Establishment of a seasonal water conservation and supply pool at Seven Oaks would increase groundwater reserves by extending the period water is available for release to downstream spreading grounds. Additionally, the feasibility of developing dispersed, non-motorized recreational facilities will be investigated in cooperation with staff from the San Bernardino National Forest.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and EIS/EIR can be answered by: Mr. Gary Gunther, Study Manager, CESPL-PD-WA, P.O. Box 2711, Los Angeles,
