BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Revision.

2. The title of the information collection: 10 CFR Part 19, "Notices, Instructions, and Reports to Workers: Inspections and Investigations."

3. The form number if applicable: Not applicable.

4. How often the collection is required: As necessary in order that adequate and timely reports of radiation exposure be made to individuals involved in NRC-licensed activities.

5. Who will be required or asked to report: Licensees authorized to receive, possess, use, or transfer material licensed by the NRC.

6. An estimate of the number of annual responses: 401,000.

7. An estimate of the total number of hours needed annually to complete the requirement or request: 33,417 (an average of 5 minutes per response).

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: Title 10 of the Code of Federal Regulations, Part 19, requires licensees to advise workers on an annual basis of any radiation exposure they may have received as a result of NRC-licensed activities or when certain conditions are met. These conditions apply during termination of the worker's employment, at the request of a worker, former worker, or when the worker's employer (the NRC licensee) must report radiation exposure information on the worker to the NRC. Part 19 also establishes requirements for instructions by licensees to individuals participating in licensed activities and options available to these individuals in connection with Commission inspections of licensees to ascertain compliance with the provisions of the Atomic Energy Act of 1954, as amended, Title II of the Energy Reorganization Act of 1974, and regulations, orders and licenses thereunder regarding radiological working conditions.

The worker should be informed of the radiation dose he or she receives because: (a) That information is needed by both a new employer and the individual when the employee changes jobs in the nuclear industry; (b) the individual needs to know the radiation dose received as a result of an accident or incident (if this dose is in excess of the 10 CFR Part 20 limits) so that he or she can seek counseling about future work involving radiation, medical attention, or both, as desired; and (c) since long-term exposure to radiation may be an adverse health factor, the individual needs to know whether the accumulated dose is being controlled within NRC limits. The worker also needs to know about health risks from occupational exposure to radioactive materials or radiation, precautions or procedures to minimize exposure, worker responsibilities and options to report any licensee conditions which may lead to or cause a violation of Commission regulations, and individual radiation exposure reports which are available to him.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room 2120 L Street, NW. (Lower Level), Washington, DC 20555-0001.

Comments and questions should be directed to the OMB reviewer: Troy Hillier, Office of Information and Regulatory Affairs (3150-0044), NEOB-
