Statement of Serious Damage

Colombia

Cotton and Manmade Fiber Underwear

Category 352/652

Import Situation and Conclusion

U.S. imports of cotton and manmade fiber underwear, Category 352/652, from Colombia reached 1,509,880 dozen in 1994, 46 percent above the 1,032,210 dozen imported in 1993 and 160 percent above its 1992 level. Imports from Colombia were 1.6 percent of total U.S. imports of Category 352/652 in 1994, and were equivalent to nearly 1 percent of U.S. production of Category 352/652 in the year ending September 1994.

U.S. imports of cotton and manmade fiber underwear, from Colombia in Category 352/652, entered the U.S. at an average landed duty-paid value of \$13.79 per dozen, 54 percent below U.S. producers' average price for cotton and manmade fiber underwear. The sharp and substantial increase of low priced imports from Colombia is causing serious damage to the U.S. domestic industry producing cotton and manmade fiber underwear.

U.S. Production, Import Penetration, and Market Share

U.S. production of cotton and manmade fiber underwear, Category 352/652, declined from 175,542,000 dozen in 1992 to 168,802,000 dozen in 1993, a decline of 4 percent. Production continued to decline in 1994, falling to 126,962,000 dozen during the first nine months of 1994, 4 percent below January-September 1993 production level. In contrast imports of Category 352/652 surged from 65,507,000 dozen in 1992 to 79,962,000 dozen in 1993, a 22 percent increase. Cotton and manmade fiber underwear, Category 352/652, imports continued to increase in 1994, reaching 97,375,000 dozen, 22 percent above the 1993 level and 49 percent above the level imported in 1992.

The ratio of imports to domestic production increased from 37 percent in 1992 to 47 percent in 1993, and reached 54 percent during January-September 1994. The share of this market held by domestic manufacturers fell from 73 percent in 1992 to 68 percent in 1993, a decline of five percentage points. The

domestic market share dropped to 65 percent during the first nine months of 1994.

Chairman, Committee for the Implementation of Textile Agreements.

Statement of Serious Damage

Cotton and Manmade Fiber Underwear—Category 352/652

The sharp and substantial increase in imports of cotton and manmade fiber underwear, Category 352/652, is causing serious damage to the U.S. industry producing cotton and manmade fiber underwear.

Category 352/652 imports surged from 65,507,000 dozen in 1992 to 79,962,000 dozen in 1993, a 22 percent increase. Cotton and manmade fiber underwear imports, Category 352/652, continued to increase in 1994, reaching 97,375,000 dozen, 22 percent above the 1993 level and 49 percent above the level imported in 1992.

Serious damage to the domestic industry resulting from the sharp and substantial increase in imports of cotton and manmade fiber underwear is attributed to imports from the Dominican Republic, Costa Rica, Honduras, Thailand and Turkey¹. The combination of high import levels, surging imports, and low priced goods from these countries have resulted in loss of domestic output, market share, investment, employment, and man-hours worked.

Total imports from the five countries listed above increased from 22,675,508 dozen in 1992 to 40,293,259 dozen in 1994, a sharp and substantial increase of 78 percent. As a group their imports were up 32 percent in 1994 over their 1993 level. Together their 1992 imports were 35 percent of total Category 352/652 imports. Their share of total category imports increased to 41 percent in 1994. Their 1994 imports were 24.5 percent of total U.S. production of cotton and manmade fiber underwear in the year ending September 1994.
