

stating that the windows in question were marked AS-3. Russo argued:

The windshields that were installed in these vehicles were labeled AS-1.

The [installers] had shown us the windshield label on the windshield stock plate before the installation and fitting process. The San Jose Fire Dept.'s Battalion Chief Master Mechanic was also shown the label at this time and he said this to Mr. Shifflet [of NHTSA's Office of Vehicle Safety Compliance] during his visit.

We have a sample of the label that the glass company that supplies the Fire Dept. And all of California had supplied(sic) to show DOT.

The windshield that was supplied to us by San Jose Glass contained this label:

Laminated
16 CFR 1201 M550
CATT II AS-1
DOT 273

* * * * *

The labeling on the driver's and passenger's window is also inconsequential to vehicle safety as shown by supporting data that the glass manufacturer uses all the same AS 2 glass except for a very slight insignificant light transmission in AS-certified configuration.

The City of San Jose notes that the side windows are AS-3 rather than AS-2. Darlene E. Skelton and the Fire Marshal note that the noncompliance is easily remedied by the installation of new glass. The Fire Marshal also believes that the windshield should be marked to bring it into full compliance with Standard No. 205.

Because all windshields are required to be AS-1 glazing, NHTSA is confident that, if the unmarked windshields have to be replaced, the replacement windshield will be AS-1 glazing. The agency does not concur with Russo's characterization of the substitution of AS-3 glazing for AS-2 glazing as resulting in "a very slight insignificant light transmission", but it does conclude that, because the noncompliance exists in only two vehicles, it will have an inconsequential effect on safety.

4. FMVSS No. 207, "Seating Systems"

In April 1991, Russo produced one Command/Communications van (1989 Gillig chassis) with an 18,000 pound gross vehicle weight rating. The vehicle is a specially configured portable meeting room for use at the scene of disasters. It is a closed, straight body van-type vehicle consisting essentially of a cab for vehicle operation and a cargo area which Russo converted into a conference room.

Section 4.4 of FMVSS No. 207 requires that all seats not designed to be occupied while the vehicle is in motion are to be conspicuously labeled to that effect. The seats located in the meeting

room area of this vehicle are not designed to be occupied while the vehicle is being operated, but are not labeled as such.

Subsequent to its petition, Russo agreed to provide the labels for the seats in question. This moots its penalty for exemption from the statutory remedial requirements. Any failures to comply with the letter of the notification requirements of Part 577 are less significant in the case where notification is to be provided a single owner who is aware of the noncompliance and has commented to NHTSA on it.

Accordingly, in consideration of the foregoing, it is hereby found that the petitioner has met its burden of persuasion that the noncompliances herein described are inconsequential to motor vehicle safety, and its petition is granted.

Issued on April 18, 1995.

Associate Administrator for Safety Performance Standards.
