Defense Science Board Task Force on Defense Mapping for Future Operations; Meetings

SUMMARY: The Defense Science Board Task Force on Defense Mapping for Future Operations will meet in closed session on May 2-3, 1995 at Science Applications International Corporation, Arlington, Virginia. In order for the Task Force to obtain time sensitive classified briefings, critical to the understanding of the issues, this meeting is scheduled on short notice.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense (Acquisition and Technology) on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will develop recommendations for implementing a cost-effective approach for providing geospatial information and products to Department of Defense users.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Public Law 92-463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: April 24, 1995.

Department of the Army

Intent To Prepare a Draft Environmental Impact Statement/ Environmental Impact Report for a Permit Application for Proposed Activities at Playa Vista, Los Angeles County, CA

AGENCY: U.S. Army Corps of Engineers, Los Angeles District, DOD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps) is considering an application for Section 404 and Section 10 permits to (1) conduct dredge and fill activities to implement restoration of the Ballona Salt Marsh and (2) construct a marina or other saltwater boating facility and an adjacent mixed use (residential/commercial/visitor serving) community (marina).

The primary Federal concern is the dredging and discharging of materials within waters of the United States, including wetlands and potential significant impacts on the human environment. Therefore, in accordance with the National Environmental Policy Act (NEPA), the Corps is requiring the preparation of an Environmental Impact Statement (EIS) prior to consideration of any permit action. The Corps may ultimately make a determination to permit or deny either or both items (1) and (2) above, or permit or deny modified versions of items (1) and (2) above.

Pursuant to the California Environmental Quality Act (CEQA), the City of Los Angeles will serve as Lead Agency for the preparation of an Environmental Impact Report (EIR) for its consideration of development approvals within its jurisdiction. The County of Los Angeles will serve as a Responsible Agency under CEQA and will use the EIR for consideration of project approvals within its jurisdiction. The Corps and the City have agreed to jointly prepare a Draft EIS/EIR in order to optimize efficiency and avoid duplication. The Draft EIS/EIR is

intended to be sufficient in scope to address both the Federal and the state and local requirements and environmental issues concerning the proposed activities and permit approvals.

ADDRESSES: U.S. Army Engineer District, Los Angeles, Regulatory Branch, ATTN: File Number 95-0212-CSC, P.O. Box 2711, Los Angeles, California 90012.

FOR FURTHER INFORMATION CONTACT: Phone message or questions will be handled at 213-485-8009.

SUPPLEMENTARY INFORMATION:

Project Site

The proposed project is located near Marina del Rey. The salt marsh restoration activities are planned for a portion of the project area known as Area B which is located within the City of Los Angeles. The marina development is planned for an adjacent portion of the project known as Area A within an unincorporated portion of the County of Los Angeles. The area proposed for salt marsh restoration is located in the remnant portions of the once extensive Ballona Salt Marsh. The proposed marina site is located within an area containing extensive fill resulting from previous Marina del Rey and flood control construction projects.

Proposed Action

The project applicant, Maguire Thomas Partners (MTP), proposes to restore a 190 acre salt marsh system within a substantially undeveloped area containing approximately 154 acres of existing degraded wetlands. Establishment of this proposed salt marsh system will include three actions: (1) Enhancement of the western portion of existing wetlands by reestablishing tidal flows to a mid-tidal regime; (2) restoration of the eastern portion of the wetlands by reestablishing tidal flow to a full tidal regime and (3) creation of new wetlands from existing uplands. The proposed project includes the construction of culverts providing access to tidal flows within the Ballona Channel. The proposed project also involves the widening of Culvert Boulevard to meet regional transportation demand.

It is further proposed that a water oriented mixed use community be constructed in Area A on 138.6 acres of substantially undeveloped property separated from the salt marsh restoration project by the Ballona Channel. This development would include a 48 acre marina, 2,576 residential units, 450 hotel rooms, 125,000 square feet of office space,
