Groundfish of the Gulf of Alaska; Foreign Fishing; Limited Access Management of Federal Fisheries In and Off of Alaska; Final 1995 Harvest Specifications of Groundfish; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final 1995 harvest specifications of groundfish and associated management measures; correction.

SUMMARY: This document contains a correction to the final 1995 harvest specifications (I.D. 112894A), which was published Tuesday, February 14, 1995 (60 FR 8470). The rex sole species was inadvertently omitted from the list of the deep-water species complex for the trawl halibut prohibited species catch (PSC) limit allowances.

EFFECTIVE DATE: February 8, 1995, through 2400 Alaska local time, on December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Kaja Brix, NMFS, (907) 586-7228.

SUPPLEMENTARY INFORMATION:

Under § 672.20(f), annual Pacific halibut PSC limits are established and apportioned to trawl and hook-and-line gear, and are established for pot gear. The Final 1995 Pacific Halibut PSC Limits, Allowances, and Apportionments are contained in Table 6 (page 8476) of the final 1995 harvest

specifications. Regulations at § 672.20(f)(1)(i) authorize apportionments of the trawl halibut PSC limit allowance as bycatch allowances to the deep-water species complex and the shallow-water species complex. The final 1995 apportionment of Pacific halibut PSC trawl limits between the deep-water species complex and the shallow-water species complex is contained in Table 7 (page 8477) of the final 1995 harvest specifications. Rex sole is part of the deep-water species complex that is discussed in regulations at § 672.20(f)(1)(i)(B)(2). However, rex sole was inadvertently omitted from the list of the deep-water species complex contained on page 8476 of the final specifications.

Accordingly, the publication on February 14, 1995 (60 FR 8470), which was the subject of FR Doc. 95-3483, is corrected as follows:

On page 8476, in the third column, last line, and continuing to page 8477, in the first column, line one, the sentence "The deep-water species complex consists of sablefish, rockfish, deep-water flatfish, and arrowtooth flounder." is corrected to read "The deep-water species complex consists of sablefish, rockfish, deep-water flatfish, rex sole, and arrowtooth flounder."

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 21, 1995.

Groundfish of the Bering Sea and Aleutian Islands Area; Atka Mackerel in the Central Aleutian District

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for Atka mackerel in the Central Aleutian District of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the final groundfish specification of Atka mackerel in that area.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), April 25, 1995, until 12 midnight, A.l.t., December 31, 1995.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, 907-586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by NMFS according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

In accordance with § 675.20(a)(7)(ii) the Atka mackerel total allowable catch

(TAC) for the Central Aleutian District was established by the final 1995 initial groundfish specifications (60 FR 8479, February 14, 1995) as 42,500 metric tons (mt).

The Director, Alaska Region, NMFS (Regional Director), has determined, in accordance with § 675.20(a)(8), that the Atka mackerel TAC in the Central Aleutian District soon will be reached. Therefore, the Regional Director has established a directed fishing allowance of 41,500 mt after determining that 1,000 mt will be taken as incidental catch in directed fishing for other species in the Central Aleutian District. Consequently, NMFS is prohibiting directed fishing for Atka mackerel in the Central Aleutian District. Directed fishing standards for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under § 675.20 and is exempt from review under E.O. 12866.
