

Virginia, to gather additional technical information to assist EPA in resolving these technical issues in order to finalize the guidance. This meeting will involve representatives from EPA Regions, States, the regulated community, trade associations, the scientific community, and environmental groups. Representatives from the parties submitting comments are invited to attend the meeting to present supporting data. This meeting will focus particularly on the procedure for developing quantitation levels (when there is no promulgated ML) to measure compliance with WQBELs. The meeting will provide an opportunity for commenters to present information supporting their specific concerns.

EPA is interested in the following types of technical data:

(1) Data to support the proposed use of the minimum level at 3.18 times the MDL (analogous to the International Union of Pure and Applied Chemistry (IUPAC) and the American Chemical Society (ACS) limit of quantitation) in the absence of a promulgated ML.

(2) Data to support an alternative quantitation level for compliance monitoring with WQBELs in the absence of a promulgated ML.

(3) Data which show the impacts of matrix interference which are not accounted for through the proposed site-specific MDLs or MLs, as well as any industry matrix interference data to support matrix interference cases.

In addition to the technical data above, EPA would like to review any actual examples submitted by commenters of enforcement actions taken for violating WQBELs set below detection or quantitation levels.

It is EPA's objective that this meeting be comprised of representatives who: contribute technical expertise relevant to this topic; represent a wide spectrum of interests (e.g. business, academia, environmental groups, and government); and are willing to participate in the entire two day meeting.

Participants must submit any supporting data they wish to provide by *June 22, 1995*. The data will be compiled by EPA prior to the meeting to ensure an organized presentation of information. Please note that technical comments on alternative approaches to develop quantitation levels received without supporting technical data cannot be considered at the meeting. If a copy of the March 22, 1994, draft "National Guidance for the Permitting, Monitoring, and Enforcement of Water Quality-based Effluent Limitations Set Below Analytical Detection or Quantitation Levels" is needed, please

contact Mildred Thomas at 202/260-6054 to receive a copy.

Once EPA has reviewed the data, data summaries will be sent to all registered participants prior to the August meeting. Specific information on the meeting location, time of meeting and meeting agenda will be sent to each registered participant prior to the August 2 & 3, 1995 meeting.

Dated: May 17, 1995.

Michael B. Cook,

Director, Office of Wastewater Management.
