

### Diagnosing Alzheimer's Disease And Schizophrenia

Serial No. 07/904,045

Alzheimer's disease represents the fourth leading cause of death in the United States, killing over 100,000 annually, and afflicting some 4 million Americans. Various reports indicate that the incidence of Alzheimer's disease increases with age and estimate that the prevalence of Alzheimer's disease in people over 80 years of age is between 20 and 50%. Schizophrenia occurs in approximately 1.5% of adults. Over 2.5 million people in the U.S. and nearly 47 million people worldwide suffer from schizophrenia. Under currently available technology Alzheimer's disease can only be presumptively diagnosed by pathological examination of brain tissue during autopsy in conjunction with a clinical history of dementia. In the diagnosis of schizophrenia, the clinician is limited to aberrations of behavior. Although there has previously been no generally accepted laboratory markers for either of these two diseases of the central nervous system it has been discovered that production of certain proteins is increased in acute phase reactions associated with these disorders. The present invention provides methods of diagnosing Alzheimer's disease and schizophrenia by detecting elevated levels of such proteins in a biological sample from a patient either by immunoassay or 2D-gel electrophoresis. BILLING CODE 4140-01-M

**Office of Inspector General**

**Program Exclusions: June 1995**

**AGENCY:** Office of Inspector General, HHS.

**ACTION:** Notice of program exclusions.

During the month of June 1995, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, Maternal and Child Health Services Block Grant and Block Grants to States for Social Services programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all other Federal non-procurement programs.
