Inseason Action

1995 Halibut Landing Report Number 9

Area 2A Non-treaty Commercial Fishery to Reopen

The July 5 fishing period in Area 2A resulted in a catch of 9.07 metric tons (mt) (20,000 lb), leaving 32.22 mt (71,052 lb) in the commercial catch limit. Although 350 commercial licenses were issued in Area 2A, very few vessels participated in the July 5th opening, resulting in a low catch. The total catch limit remaining, including the "rolled-over" amount from the salmon troll fishery, is 387.89 mt (85,157 lb).

Area 2A will reopen on July 18 for 10 hours from 8:00 a.m. to 6:00 p.m. local time. The fishery is restricted to waters that are south of Point Chehalis, WA $(46^{\circ}53'18''\ N.\ lat.)$ under regulations promulgated by NMFS. Fishing period limits as indicated in the following table will be in effect for this opening.

Vessel class		Fishing period limit (lb)	
Length	Letter	Dressed, head-on	Dressed, head- off*
0–25	A B C D E F G H	225 240 380 1,050 1,130 1,350 1,510 2,275	200 210 335 925 995 1,190 1,330 2,000

*Weights are after 2 percent has been deducted for ice and slime if fish are not washed prior to weighing.

The appropriate vessel length class and letter is printed on each halibut license.

The fishing period limit is shown in terms of dressed, head-off weight as well as dressed, head-on weight, although fishermen are reminded that regulations require that all halibut from Area 2A be landed with the head on.

The fishing period limit applies to the vessel, not the individual fisherman, and any landings over the vessel limit will be subject to forfeiture and fine.

Dated: July 26, 1995.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.
