### **S.D. Warren Company; Notice of Public Scoping Meeting**

August 3, 1995.

The Federal Energy Regulatory Commission (Commission) has received a "Report on S.D. Warren Company's Level Management Plan for Sebago Lake", required by the August 1994, Order on Complaints. The Order on Complaints required the licensee to file, for Commission approval, a lake level management plan that balances the various competing uses of Sebago Lake and that contains procedures for monitoring the impacts of the lake level management plan on indicators such as shoreline erosion, lake pollution, fish and wildlife resources, recreation, etc.

The Commission will proceed with scoping for an Environmental Impact Statement (EIS) for the Sebago Lake Water Management Plan. The Sebago Lake Water Level Management Plan EIS will describe and evaluate the probable impacts of the licensee's proposed management plan and all reasonable alternatives.

One element of the NEPA process is scoping. Scoping activities are initiated early in the process to:

- Identify reasonable alternative operational procedures and environmental enhancement measures that should be evaluated in the document;
- Identify significant environmental issues related to the elements of the proposed water level management plan;

- Determine the depth of analysis for issues that will be discussed in the document; and

- Identify resource issues that are of lesser importance and, consequently, do not require detailed analysis.

### **Scoping Meetings**

Commission staff will conduct two public meetings for the Sebago Lake Water Level Management Plan EIS. All interested individuals, organizations, and agencies are invited to attend the planned meetings and help staff identify the scope of environmental issues that should be analyzed in the EIS.

The first scoping meeting, primarily, for public, will be conducted at 7 p.m. on Tuesday, August 22, 1995, at the Heffernan Center Auditorium, Saint Joseph's College, Windham, Maine.

The second meeting, primarily for agencies, will be held at 2 p.m. on Wednesday, August 23, 1995, at the Portland Public Library, Rines Auditorium, 5 Monument Square, Portland, Maine.

### **Procedures**

The meetings, which will be recorded by a stenographer, will become part of the formal record of the Commission's proceeding on the EIS. Individuals presenting statements at the meeting need to sign in before the meeting starts and to identify themselves for the record.

Concerned parties are encouraged to speak during the public meetings. Speaking time allowed for individuals will be determined before the meeting, based on the number of persons wishing to speak and the approximate amount of time available for the session, but all speakers will be provided at least five minutes to present their views.

### **Scoping Meeting Objectives**

At each scoping meeting, the staff will:

- Summarize the environmental issues tentatively identified for analysis in the EIS;
- Identify resource issues that the staff believes are of lesser importance and, therefore, do not require detailed analysis;
- Solicit from the meeting participants all available information, especially quantifiable data, concerning significant local resources; and
- Encourage statements from experts and the public on issues that should be analyzed in the EIS.

### **Information Requested**

Federal and state resource agencies, local government officials, interested groups, area residents, and concerned

individuals are requested to provide any information they believe will assist the Commission staff to analyze the environmental impacts associated with the proposed Sebago Lake Water Level Management Plan. The types of information sought include the following:

- Data, reports, and resource plans that characterize the baseline physical, biological, or social environments in the vicinity of the projects; and
- Information and data that helps staff identify or evaluate significant environmental issues.

Scoping information and associated comments should be submitted to the Commission no later than September 5, 1995. Written comments should be provided at the scoping meeting or mailed to the Commission, as follows: Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

All filings sent to the Secretary of the Commission should contain an original and 8 copies. Failure to file an original and 8 copies may result in appropriate staff not receiving the benefit of your comments in a timely manner. See 18 CFR 4.34(h).

All correspondence should clearly show the following caption on the first page:

FERC No. 2984  
Sebago Lake Water Level Management Plan EIS

Intervenors and interceders (as defined in 18 CFR 385.2010) who file documents with the Commission are reminded of the Commission's Rules of Practice and Procedure requiring them to serve a copy of all documents filed with the Commission on each person whose name is listed on the official service list for this proceeding.
