DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Notice of Evaluation of Medical Technology

The Agency for Health Care Policy and Research (AHCPR), through the Center for Health Care Technology (CHCT) (formerly OHTA), announces that it is conducting an evaluation of the safety, effectiveness, and clinical utility of positron emission tomography (PET), using fluorine 18 labelled 2-deoxy-2-fluoro-D-glucose (FDG), as a diagnostic and management tool for use in patients with focal or partial epilepsy.

This evaluation will be concerned with the use of FDG-PET in the localization of seizure focus for possible surgical excision and seeks to answer the following questions: (1) Does FDG-PET provide information of value to a clinician that is not otherwise available? (2) What is the extent of any incremental benefit obtained from the use of FDG-PET when the information obtained is comparable to that available from other diagnostic modalities? (3) How does the sensitivity and specificity of FDG-PET compare with other diagnostic modalities currently in use? (4) Where does FDG-PET fit in the overall scheme of diagnostic testing? Should it be used in lieu of, or in addition to other diagnostic modalities? (5) What patient selection criteria should be applied?

AHCPR is interested in receiving information based on review and assessment of past, current, and planned research related to this technology, as well as a bibliography of published, controlled clinical trials and other well-designed clinical studies. Also requested is information related to the

characteristics of the patient population most likely to benefit from the use of FDG-PET as well as information on the clinical acceptability, effectiveness, and the extent of use of this technology. Information relevant to this review should be submitted in writing to CHCT at the address below.

To enable the interested scientific community to evaluate the information included in this review, AHCPR will discuss in the review only those data and analyses for which a source(s) can be cited. Respondents are therefore encouraged to include with their submission a written consent permitting AHCPR to cite the source of the data and comments provided. Otherwise, in accordance with the confidentiality statute governing information collected by AHCPR, 42 U.S.C. 299a-1(c), no information received will be published or disclosed which could identify an individual or entity described in the information or could identify an entity or individual supplying the information.

Dependent upon the quality and quantity of the scientific data, CHCT will prepare an assessment, review, or other evaluation of the technology under consideration. (The AHCPR Technology Assessment process was described in the December 3, 1993 **Federal Register** (58 FR 63988)).

Written material should be submitted to: Thomas V. Holohan, M.D., Acting Director, Center for Health Care Technology, Agency for Health Care Policy and Research, 6000 Executive Boulevard, Suite 309, Rockville, MD 20852, Phone: (301) 594-4023, Fax: (301) 594-4030.
