BILLING CODE 4140-01-M

National Institutes Of Health

Prospective Grant of Exclusive License: Immunologic Enhancement With Intermittent Interleukin-2 Therapy

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: This is notice in accordance with 15 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institutes of Health (NIH), Department of Health

and Human Services, is contemplating the grant of an exclusive world-wide license to practice the invention embodied in U.S. Patent Application SN 08/063,315 (U.S. Patent 5,419,900) entitled "Immunologic Enhancement with Intermittent Interleukin-2 Therapy" and related U.S. and foreign patent applications to Chiron Corporation of Emeryville, CA. The patent rights in this invention have been assigned to the United States of America.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. It is anticipated that this license may be limited to all therapeutic applications including treatment of HIV infection and AIDS. This prospective exclusive license may be granted unless within 60 days from the date of this published notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The patent application describes the continuous intermittent infusion of interleukin-2, alone or in combination with retroviral therapy, into a patient as a means of enhancing the patient's immune system. The ability of this therapy to stimulate immune function may have advantages in any disease state in which interleukin-2 plays a role in the associated immune response, and may therefore be useful in the treatment of HIV infections and AIDS, as well as for the attendant opportunistic infections that occur in AIDS patients.

ADDRESSES: Requests for a copy of this patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Steven M. Ferguson, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852. Telephone: (301) 496-7735; Facsimile: (301) 402-0220; E-mail: Steve—Ferguson@NIH.GOV. Applications for a license filed in response to this notice will be treated as objections to the grant of the contemplated license. Only written comments and/or applications for a license which are received by NIH on or before October 16, 1995, will be considered. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552. A signed Confidential Disclosure

Agreement will be required to receive a copy of the patent application.

Dated: August 2, 1995.

Barbara M. McGarey,

Deputy Director, Office of Technology Transfer.
