

ways of meeting their programmatic obligations.

The primary goals of this program are to:

(1) Provide the Nation, through a center of excellence, with models on which to base programs dealing with clinical, fiscal, and management aspects of State-based mental health service delivery;

(2) Develop collaboratively with SMHAs model standards for systems of mental health services that can be adopted by the States to improve their fiscal, management and clinical functioning;

(3) Provide a center for information and expertise in technical assistance to meet the needs of State public mental health agencies that receive Federal funding in a crossover from Block Grants to funding under Mental Health Services Performance Partnership Grants;

(4) Constitute a centralized resource for technical assistance to the State mental health agencies that can effectively help States anticipate mental health related trends, such as the impact of managed care, and assist them in quickly planning appropriate strategies; and

(5) Serve as a reservoir of expertise to disseminate information to assist States in implementation of mental health planning efforts.

NASMHPD, through its needs assessment surveys, frequent contact in "meet-me" telephone conferences, focus groups, semi-annual meetings, and electronic communication channels, can rapidly address information to the specific needs of the States, its members, and evaluate member response, and can communicate technical mental health information from the States to the Technical Assistance Center and vice versa. Such capability provides a singular benefit to the States in that information that is invaluable to program success but generally unavailable because of Federal process requirements becomes available to States through NASMHPD's close organizational relationship with its members.

Because of its research activities, this organization is also able to identify the prime movers in the mental health field, and to enlist them in the creation of authority-articulated clinical, management, and fiscal model standards. Also through NASMHPD's membership, the TA Center's knowledge base and technical assistance extends to the State mental health planning councils, to block grant sub-recipient programs, and thence to consumers and their families.

AVAILABILITY OF FUNDS: The project will be for a 3-year period with \$500,000 available for the first year. Future year funding will depend on the availability of funds and program performance.
