BILLING CODE 4210-29-M

Office of Lead-Based Paint Abatement and Poisoning Prevention

[Docket No. FR-3939-N-01]

Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing

AGENCY: Office of Lead-Based Paint Abatement and Poisoning Prevention, HUD.

ACTION: Notice of availability of new Guidelines.

SUMMARY: The "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" provide detailed, comprehensive, technical information on how to identify lead-based paint hazards in housing and how to control such hazards safely and efficiently. The goal of the document is to help property owners, private contractors, and Government agencies sharply reduce children's exposure to lead without unnecessarily increasing the cost of housing. This notice describes the content and availability of the Guidelines.

DATES: The Guidelines will be available August 25, 1995.

ADDRESSES: For copies of the Guidelines, contact HUD USER at P.O. Box 6091, Rockville, MD 20850. Additional information on purchasing the Guidelines, including cost and ordering by telephone, is provided under the heading "Supplementary Information" in this notice.

FOR FURTHER INFORMATION CONTACT: William Wisner, Planning and Standards Division, Office of Lead-Based Paint Abatement and Poisoning Prevention, Room B-133, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410; telephone (202) 755-1805, extension 107; or 1-800-877-8339 (TDD). (Only the "800" TDD number is toll-free.)

SUPPLEMENTARY INFORMATION: The Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (Guidelines) are issued pursuant to section 1017 of the Residential Lead-Based Paint Hazard Reduction Act of 1992, which is often referred to as Title X (pronounced "title ten"), because it was enacted as Title X of the Housing and Community

Development Act of 1992 (Pub. L. 102-550, 106 Stat. 3897; 42 U.S.C. 4851 et seq.). The Guidelines are based on the concepts, definitions, and requirements set forth by Congress in Title X. The Department prepared the Guidelines in close consultation with the Environmental Protection Agency, the Centers for Disease Control, the Occupational Safety and Health Administration, and several other Federal agencies.

General Description

Section 1017 requires the Secretary to issue guidelines for the conduct of federally supported work involving risk assessments, inspections, interim controls, and abatement of lead-based paint hazards. Therefore, the primary purpose of the document is to provide guidance to people involved in identifying and controlling lead-based paint hazards in housing that is associated with the Federal Government. The Guidelines may also be useful to individuals in housing that has no connection with the Federal Government, as well as day-care centers and public buildings that exhibit conditions similar to those in residential structures.

Evaluation and control of lead-based paint hazards is an evolving field. Recognizing that problems require answers, the Guidelines offer advice based on the experience and considered judgment of the authors and reviewers. Whenever possible, the Guidelines explain the rationale for recommendations and provide a technical description of the action to be taken. For cases in which research has demonstrated that certain techniques are appropriate, references are cited. For cases in which citations are not provided, the reader should assume that it is the best advice that HUD can provide at this time.

Contents of Guidelines

A short summary of steps is provided at the beginning of each technical chapter to alert the reader to especially critical points and action steps. In general, the material is presented in each chapter in order of the sequence in a typical lead project. Photographs and technical graphics are used throughout the document and Appendices are also included. The document contains 680 pages. It is unbound and pages are pre-punched for use in a three ring binder (not provided). The shrink-wrapped package also contains a multi-color front cover, back cover, and spine (for use in binders with clear plastic overlays on front, back and spine.)

Chapters 1–4: Background Information. Chapter 1 describes the purpose and application of the Guidelines; briefly reviews the hazards of lead-based paint in housing; summarizes major departures from past approaches; and provides context in terms of Federal law and regulations and agency programs. Chapter 2 introduces categories of individuals involved in evaluating and controlling lead-based paint hazards in housing, explains their roles, and summarizes their qualifications. Chapter 3 identifies the critical steps that must be taken to avoid problems and mistakes that can result in project delays and cost overruns. Chapter 4 provides general advice on how to carry out work in older housing so that lead hazards are not inadvertently created and on how to combine renovation with abatement work.

Chapters 5–7: Hazard Evaluation. Hazard evaluation helps to ensure the selection of the safest and most cost-effective hazard control strategy for each situation. Chapter 5 provides detailed guidance on how risk assessments are to be conducted in various categories of housing, including protocols for environmental sample collection and interpretation, evaluation of building and paint condition, and methods for sampling a subset of units in multifamily buildings. Chapter 6 describes how reevaluations are to be performed and provides detailed schedules for when reevaluations are needed. Chapter 7 provides detailed information on methods for testing housing to determine the presence of lead-based paint on a surface-by-surface basis, including the use of portable XRF analyzers and paint-chip sampling for laboratory analysis.

Chapters 8–10: Preparation for the Project. Chapters 8–10 cover the critical steps in preparing to control lead-based paint hazards. Chapter 8 provides guidance on the steps needed to ensure that occupants are not endangered and that contamination is not spread. Chapter 9 provides detailed advice on how to comply with the OSHA Lead in Construction Standard while performing work in housing. Chapter 10 provides detailed, practical advice on methods for segregating, handling, and disposing of various kinds of debris, to protect the environment and meet hazardous waste requirements at the lowest cost.

Chapters 11–15: Hazard Control, Cleanup, and Clearance. Chapters 11–15 provide detailed information on how to carry out all aspects of lead hazard control. Chapter 11 provides specific guidance on interim controls: general principles of interim controls, dust

removal, paint stabilization, friction surface treatments, and soil and exterior dust treatments. Chapter 12 covers general principles of abatement, such as component replacement, enclosure, paint removal methods, and soil abatement. Chapter 13 describes how to use an encapsulant and the status of such products pending the development of performance standards pursuant to Title X. Chapter 14 details cleanup procedures for lead hazard control projects. Chapter 15 explains how to conduct clearance tests after a lead hazard control project, to ensure that a unit or area is safe for occupancy.

Chapters 16–18: Other Issues. The final chapters provide information on addressing lead-based paint hazards in special situations. Chapter 16 describes the special measures that are usually taken by health department staff and others to investigate environmental lead hazards once a child has been identified as lead-poisoned. Chapter 17 addresses the range of issues related to lead-based paint as it is encountered in the course of routine maintenance work. Chapter 18 discusses the special situations and issues surrounding lead-based paint in historic dwellings.

Purchasing the Guidelines

Copies of the Guidelines can be obtained from HUD USER, P.O. Box 6091, Rockville, MD 20850, for the cost of handling and postage. All orders must be prepaid. When the cost is being charged to a VISA or MasterCard account, purchasers may also order by telephoning HUD USER at 1–800–245–2691. All inquiries, whether by mail or telephone, should reference “Notice FR–3939. Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing.”

Dated: August 11, 1995.

David E. Jacobs,

Director, Office of Lead-Based Paint Abatement and Poisoning Prevention.

Bureau of Reclamation

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms may be obtained by contacting Reclamation's clearance officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to Reclamation's clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1006–****), Washington, DC 20503, telephone 202–395–7340.

Title: Customer Satisfaction Survey—Bureau of Reclamation-Pacific Northwest Region (to Implement Executive Order 12862)

OMB approval number: 1006–****

Abstract: As required by Executive Order 12862, written survey of our water resource customers (environmental groups; irrigators; Federal, State, and local entities; Native American Tribes; public, etc.) to determine the quality of services they want and their level of satisfaction with existing services

Bureau form number: None

Frequency: On going

Description of respondents: Water resource customers (environmental groups; irrigators; Federal, State, and local entities; Native American Tribes; public, etc.).

Estimated completion time: 1/2 hour

Annual responses: 1,000

Annual burden hours: 500
