Chapters 1-4: Background Information. Chapter 1 describes the purpose and application of the Guidelines; briefly reviews the hazards of lead-based paint in housing; summarizes major departures from past approaches; and provides context in terms of Federal law and regulations and agency programs. Chapter 2 introduces categories of individuals involved in evaluating and controlling lead-based paint hazards in housing, explains their roles, and summarizes their qualifications. Chapter 3 identifies the critical steps that must be taken to avoid problems and mistakes that can result in project delays and cost overruns. Chapter 4 provides general advice on how to carry out work in older housing so that lead hazards are not inadvertently created and on how to combine renovation with abatement work.

Chapters 5–7: Hazard Evaluation. Hazard evaluation helps to ensure the selection of the safest and most costeffective hazard control strategy for each situation. Chapter 5 provides detailed guidance on how risk assessments are to be conducted in various categories of housing, including protocols for environmental sample collection and interpretation, evaluation of building and paint condition, and methods for sampling a subset of units in multifamily buildings. Chapter 6 describes how reevaluations are to be performed and provides detailed schedules for when reevaluations are needed. Chapter 7 provides detailed information on methods for testing housing to determine the presence of lead-based paint on a surface-by-surface basis, including the use of portable XRF analyzers and paint-chip sampling for laboratory analysis.

Chapters 8–10: Preparation for the Project. Chapters 8–10 cover the critical steps in preparing to control lead-based paint hazards. Chapter 8 provides guidance on the steps needed to ensure that occupants are not endangered and that contamination is not spread. Chapter 9 provides detailed advice on how to comply with the OSHA Lead in Construction Standard while performing work in housing. Chapter 10 provides detailed, practical advice on methods for segregating, handling, and disposing of various kinds of debris, to protect the environment and meet hazardous waste requirements at the lowest cost.

Chapters 11–15: Hazard Control, Cleanup, and Clearance. Chapters 11–15 provide detailed information on how to carry out all aspects of lead hazard control. Chapter 11 provides specific guidance on interim controls: general principles of interim controls, dust

removal, paint stabilization, friction surface treatments, and soil and exterior dust treatments. Chapter 12 covers general principles of abatement, such as component replacement, enclosure, paint removal methods, and soil abatement. Chapter 13 describes how to use an encapsulant and the status of such products pending the development of performance standards pursuant to Title X. Chapter 14 details cleanup procedures for lead hazard control projects. Chapter 15 explains how to conduct clearance tests after a lead hazard control project, to ensure that a unit or area is safe for occupancy.

Chapters 16–18: Other Issues. The final chapters provide information on addressing lead-based paint hazards in special situations. Chapter 16 describes the special measures that are usually taken by health department staff and others to investigate environmental lead hazards once a child has been identified as lead-poisoned. Chapter 17 addresses the range of issues related to lead-based paint as it is encountered in the course of routine maintenance work. Chapter 18 discusses the special situations and issues surrounding lead-based paint in historic dwellings.

## **Purchasing the Guidelines**

Copies of the Guidelines can be obtained from HUD USER, P.O. Box 6091, Rockville, MD 20850, for the cost of handling and postage. All orders must be prepaid. When the cost is being charged to a VISA or MasterCard account, purchasers may also order by telephoning HUD USER at 1–800–245–2691. All inquiries, whether by mail or telephone, should reference "Notice FR–3939. Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing."

Dated: August 11, 1995.

## Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms may be obtained by contacting Reclamation's clearance officer at the telephone number listed below. Comments and suggestions on the proposal should be made directly to Reclamation's clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1006-\*), Washington, DC 20503, telephone 202-395-7340.

Title: Customer Satisfaction Survey-Bureau of Reclamation-Pacific Northwest Region (to Implement Executive Order 12862)

OMB approval number: 1006-\*\*\*\*
Abstract: As required by Executive
Order 12862, written survey of our
water resource customers
(environmental groups; irrigators;
Federal, State, and local entities;
Native American Tribes; public, etc.)
to determine the quality of services
they want and their level of
satisfaction with existing services
Bureau form number: None

Frequency: On going

Description of respondents: Water
resource customers (environmental
groups: irrigators: Federal State an

resource customers (environmental groups; irrigators; Federal, State, and local entities; Native American Tribes; public, etc.).

Estimated completion time: 1/2 hour Annual responses: 1,000 Annual burden hours: 500
