DEPARTMENT OF THE INTERIOR

National Park Service

Record of Decision; Final Environmental Impact Statement/General Management Plan; Grand Canyon National Park; Coconino and Mohave Counties, AZ

Summary: Pursuant to § 102(2)(C) of the National Environmental Policy Act of 1969 and the regulations promulgated by the Council on Environmental Quality (40 CFR 1505.2), the Department of the Interior, National Park Service, has prepared a Record of Decision on the Final Environmental

Impact Statement/General Management Plan for Grand Canyon National Park, Coconino and Mohave Counties, Arizona. This Record of Decision is a concise statement of what decisions were made, what alternatives were considered, the basis for the decision, and the mitigating measures developed to avoid or minimize environmental impacts.

Decision: The National Park Service will implement the proposed general management plan for Grand Canyon National Park, as detailed in Alternative 2 of the Final General Management Plan and Environmental Impact Statement issued in July 1995. The draft plan and environmental impact statement was issued in March 1995. The proposal is described below as the Selected Action.

Selected Action: The selected action is a comprehensive proposal for future management and use of the park, including a regional, ecosystem planning focus, park management zones, visitor experience, expanded provision of alternative visitor transportation services, interpretation planning, park operations, and park facilities development.

Summary of Actions: The regional context of Grand Canyon National Park will be emphasized, and proposals for resource preservation and visitor use will take into account environmental effects on the park as well as the region. Planning outside the park will be done cooperatively, with an emphasis on disseminating information, preserving regional and park resources, and providing a quality visitor experience. The National Park Service will work jointly with adjacent entities to provide for many park needs outside park boundaries. A gateway information center, some community services, and up to 500 employee housing units will be provided in Tusayan. The most appropriate locations for facilities will be considered in a regional context, taking into consideration principles of sustainable design and the need to preserve resources while providing for a quality visitor experience.

Alternative modes of transportation (public transit, hiking, and biking) will be emphasized within the park. A primary orientation center and public transit hub will be constructed near Mather Point. From there several shuttle routes will provide efficient and quiet visitor transportation to Grand Canyon Village and other points on the South Rim. Visitor parking and a shuttle system will also be established on the North Rim.

To minimize impacts on natural and cultural resources within the park, existing structures will be adaptively

reused, and required new facilities will be built in previously disturbed areas wherever possible. The Kachina and Thunderbird lodges will be removed and the number and size of gift shops on the South Rim will be reduced. The RV campground and the existing helicopter base will be redesigned. Some disturbed areas will be revegetated.

To ensure a quality experience, the number of visitors admitted to certain areas will be limited during peak visitation periods based on recommendations derived from a carrying capacity monitoring program. The methodology for determining use limits will be the same throughout the developed areas of the park; however, visitor use limits for specific areas will vary considerably, and visitor use may be limited sooner in some areas than in others. Day use on the South Rim and the corridor trails will not need to be limited during the life of this plan, provided the recommended alternative visitor transportation services are fully funded and operational; day visitation on the North Rim will be limited by the year 2005 or 2010, depending on the effectiveness of management actions; and day use at Tuweep may be limited during peak times. In areas where reservations become necessary, visitors will be able to obtain reservations ahead of time (their reservations will be checked at park entrances). A monitoring system will be established to measure resource impacts, facility use, visitor satisfaction, and levels of visitor attendance in each park developed area. The reservation system will be adjusted as needed.

Summary of Impacts: A stable situation for the future will be provided for all the developed areas of the park, significantly improving management's ability to preserve and protect the natural and cultural resources, provide a high-quality visitor experience, and ensure quality living and operating conditions for park employees. Most development will in-fill on already disturbed areas. Historic structures will be adaptively reused, resource damage will be minimized, and local economies will be enhanced. Sustainable planning, design, and implementation will be encouraged within a regional context.

Alternatives Considered

No-Action Alternative—Existing Conditions / Ongoing Programs

Summary of Actions: Unlimited day visitation would continue in all park developed areas, with nearly every visitor facility in developed areas of the South Rim continuing to be
