Committee for the Implementation of Textile Agreements

August 31, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on March 30, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textiles and textile products and silk blend and other vegetable fiber apparel, produced or manufactured in Malaysia and exported during the twelve-month period which began on January 1, 1995 and extends through December 31, 1995.

Effective on September 11, 1995, you are directed to amend the March 30, 1995 directive to reduce the limit for Categories 331/631 to 1,706,846 dozen pairs¹, as provided for under the terms of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs

exception to the rulemaking provisions of 5 U.S.C.553(a)(1).

Sincerely,

Donald R. Foote,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Morganza, Louisiana, to the Gulf of Mexico Feasibility Study

AGENCY: U.S. Army Corps of Engineers,
DoD.

ACTION: Notice of intent.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the U.S. Army Corps of Engineers (COE) will prepare a draft environmental impact statement (EIS) to analyze the direct and indirect beneficial and adverse impacts of implementing a proposed hurricane protection project in Terrebonne and Lafourche Parishes, Louisiana. The purposes of the proposed action are to provide protection to existing development from tropical storm and hurricane-induced tidal flooding such as that which occurred during Hurricane Andrew, and to protect coastal wetlands from hurricane surges in a portion of Terrebonne Parish, Louisiana. The proposed action would consist of upgrading many existing forced-drainage-system levees; using permitted and/or installed flood-control features (e.g., floodgates); constructing some new levees and water-control structures; and closing the water-control structures and flood gates in a coordinated manner in the event of tropical storm or hurricane tidal surges.

FOR FURTHER INFORMATION CONTACT:

Questions regarding the EIS may be directed to Mr. Robert Martinson, CELMN-PD-RS, U.S. Army Corps of Engineers, P.O. Box 60267, New Orleans, Louisiana 70160-0267, telephone: (504) 862-2582.

Questions regarding the proposed action may be directed to Mr. Troy Constance, CELMN-PD-FB, U.S. Army Corps of Engineers, P.O. Box 60267, New Orleans, Louisiana 70160-0267, telephone: (504) 862-2742.

SUPPLEMENTARY INFORMATION: A similar flood protection plan has been proposed by the South Terrebonne Tidewater Management and Conservation District (STTMCD). A Notice of Intent to prepare an EIS for the STTMCD plan under the COE Regulatory Program was issued on April 7, 1993 (**Federal Register**, Volume 58, Number 65, pp. 18084-18085). Because the underlying purposes of the two proposed actions are the same, and in the interest of cost effectiveness, one EIS will be prepared rather than two.

Proposed Action

The STTMCD proposed action would consist of upgrading many existing forced-drainage-system levees from near Larose at the eastern end to Waterproof on the western end; using permitted and/or installed flood-control features (e.g., floodgates) in the area; constructing some new levees and water-control structures, particularly in the Lake gates in a coordinated manner in the event of tropical storm or

hurricane tidal surges. The flood gates and water control structures would normally be left open for navigation and tidal ingress and egress. Several communities, including the City of Houma, Dulac, Chauvin, and Montegut, would receive protection from the proposed action.

Alternatives

The no-action alternative must be evaluated. Additionally, several levee alignments around the Lake Boudreaux area will be evaluated, including the STTMCD plan. Non-structural solutions to protecting existing development will also be evaluated.

On May 12, 1993, the COE held a formal NEPA scoping meeting at Houma, Louisiana, for the previously announced regulatory EIS. Fifty-two individuals registered at the meeting. Questions and issues of concern were solicited at the meeting and a summary of the results was made available to participants on April 12, 1994. One of the main areas of concern brought out during the 1993 scoping was potential impacts to Lake Boudreaux, surrounding marshes, and associated marine organisms. Additional meetings with local interests from the various bayou areas will be held in the near future, and leadership and work group meetings will continue to be held to keep the public informed and involved.

The COE does not plan to hold additional formal NEPA scoping meetings at this time, but meetings will continue to be held throughout the planning process, as discussed above.

A draft EIS is scheduled to be available for public review during January 1998.

Kenneth H. Clow,

Colonel, U.S. Army, District Engineer.
