Sec. 6, N $\frac{1}{2}$.

T. 23 N., R. 10 E.,

Sec. 36, S $\frac{1}{2}$ NE $\frac{1}{4}$ and SE $\frac{1}{4}$.

T. 23 N., R. 11 E.,

Sec. 27, lots 7 and 8, and SW $\frac{1}{4}$;

Sec. 28, S $\frac{1}{2}$ S $\frac{1}{2}$;

Sec. 29, S $\frac{1}{2}$ SE $\frac{1}{4}$;

Sec. 31, S $\frac{1}{2}$;

Sec. 32;

Sec. 33, N $\frac{1}{2}$ and NW $\frac{1}{4}$ SW $\frac{1}{4}$;

Sec. 34, lot 5 and NW $\frac{1}{4}$.

The area described, including both public and nonpublic lands, aggregate 2,937.67 acres in Taos and Rio Arriba Counties.

The purpose of the proposed withdrawal is to protect the riparian,

scenic, and recreational values of the Embudo Canyon Area of Critical Environmental Concern.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Albuquerque District Manager of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the Albuquerque District Manager within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meetings.

The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are licenses, permits, cooperative agreements, or discretionary land use authorizations of a temporary nature but only with the approval of an authorized officer of the Bureau of Land Management.

Dated: August 30, 1995.

Sue E. Richardson,

Acting District Manager.

Fish and Wildlife Service

Notice of Availability of a Draft Recovery Plan for the Cave Crayfish (*Cambarus aculabrum*) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of a draft recovery plan for the Cave crayfish (*Cambarus aculabrum*). The cave crayfish is only known from two cave streams in Benton County, northwest Arkansas. One of the caves (Logan) is federally owned as part of the National Wildlife Refuge System while the other

cave (Bear Hollow) is privately owned. The surrounding watershed and recharge area of both caves is in private ownership. This species is listed as endangered without critical habitat. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before November 30, 1995, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Jackson Field Office, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, Mississippi 39213. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address.

Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Theresa Jacobson at the above address (601/965-4900).

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The species considered in this draft recovery plan is *Cambarus aculabrum*.

This cave crayfish inhabits streams and pools located in two Ozarkian solution channels (caves) in the Mississippian cherty-limestone Boone Formation of Benton county, Arkansas. Cave crayfish (troglobites) are highly specialized for living in stable cave environments with low light and low temperatures and as such are unable to cope with changes in their habitats that may be induced by human activities. The cave crayfish was listed as endangered in 1993 due to its limited distribution, with only two known populations containing a small number of individuals; its limited reproductive potential; the potential for take by humans; and threat of water quality degradation.

The objective of this proposed plan is reclassification of the cave crayfish to threatened status. Reclassification will be considered when the two known populations are self-sustaining and are protected to the degree that they are secure from present or foreseeable threats. Actions needed to reach this goal include: (1) protecting populations and habitat, (2) educating the public on sensitivity of groundwater and fauna to pollution, (3) monitoring populations and habitat, including water quality, (4) searching for additional populations, (5) studying species biology, and (6) monitoring and studying troglomorphic competitors and predators (non-obligate cave inhabitants).

This Plan is being submitted for agency review. After consideration of comments received during the review period, it will be submitted for final approval.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is Section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 11, 1995.

Paul Hartfield,

Acting Field Supervisor.
