

Register on August 24, 1995 (60 FR 44079).

The certification was amended August 18, 1995, to cover workers of the subject firm located in South Bend, Indiana. The notice will soon be published in the Federal Register.

New information received from the State Agency shows that worker separations have occurred at Wirekraft Industries, Incorporated, Burcliff Industries Division in Lakeville, Indiana. The workers produce electrical wire harnesses for appliances.

The intent of the Department's certification is to include all workers of Wirekraft Industries adversely affected by imports.

The amended notice applicable to TA-W-31,119 is hereby issued as follows:

All workers of the Burcliff Industries Division of Wirekraft Industries, Incorporated, Cardington, Ohio (TA-W-31,119), South Bend, Indiana (TA-W-31,119A), and Lakeville, Indiana (TA-W-31,119B) who became totally or partially separated from employment on or after May 26, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 7th day of September 1995.

Victor J. Trunzo,

*Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.*

### NUCLEAR REGULATORY COMMISSION

[Docket No. 50-286]

#### Power Authority of the State of New York; Indian Point Nuclear Generating Unit No. 3 Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a one time schedular exemption from the requirements of 10 CFR 50.71(e)(4) for the submittal of the periodic Final Safety Analysis Report (FSAR) update from Facility Operating License No. DPR-64, issued to the Power Authority of the State of New York (the licensee) for the Indian Point Nuclear Generating Unit No. 3 (IP3), located at the licensee's site in Westchester County, New York.

Environmental Assessment

#### Identification of the Proposed Action

The proposed schedular exemption would reschedule the required FSAR update from July 22, 1995, to December 27, 1995 (i.e. 6 months after restart from the extended shutdown). Title 10 of the Code of Federal Regulations (10 CFR), 10 CFR 50.71(e)(4) requires that FSAR revisions must be submitted annually or 6 months after a refueling outage provided the interval between updates does not exceed 2 years. In addition, 10 CFR 50.54(a)(3) requires that changes to the quality assurance program description that do not reduce commitments must be submitted to the NRC in accordance with the FSAR update requirements of 10 CFR 50.71(e).

The licensee shut down IP3 in February 1993 for a performance improvement outage. The plant was recently restarted on June 27, 1995. Although this extended shutdown was not a refueling outage, the number of facility changes made by the licensee during the shutdown equates it to one. As such, a one time FSAR update schedular exemption would enable the licensee to include most of the modifications, technical specifications amendments, and other changes completed during the extended shutdown in the next FSAR update.

The proposed action is in accordance with the licensee's application for exemption dated June 20, 1995.

#### The Need for the Proposed Action

The proposed schedular exemption is needed to permit the licensee to include most of the modifications, technical specifications amendments, and other changes completed during the extended shutdown in the next FSAR update.
