Proposed Project: Evaluation of study entitled Preventing Problem Behavior Among Middle School Students. The purpose of the study is to test the effect of education on the prevalence of problem behavior. The study involves the students in seven middle schools in one Maryland school district. The school board, school superintendent, principals of each middle school, and various parent and teacher groups have reviewed and approved or endorsed the study, including data collection. At the beginning of 6th grade, and at the end of 6th, 7th, 8th, and 9th grades, students will be asked to complete questionnaires on attitudes and behavior regarding the use of tobacco and alcohol and misconduct at school and in the community. Also, a sample of 1000 parents will be interviewed by telephone about practices that protect children from problem behavior. The estimated annual burden is 4900 hours, with 7900 respondents providing an average of .73 responses of .91 hours duration.
