United States Enrichment Corporation: Paducah Gaseous Diffusion Plant; Portsmouth Gaseous Diffusion Plant; Notice of Receipt of Application for Certification for the Gaseous Diffusion Plants, Notice of Comment Period, and Notice of Public Meetings

I. Receipt of Application and Availability of Documents

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC or the Commission) has received by letter dated September 15, 1995, an application in its entirety to replace the application dated April 18, 1995, from the United States Enrichment Corporation (USEC) for the initial certification of the gaseous diffusion plants (GDPs) located near Paducah, Kentucky and Piketon, Ohio. The Energy Policy Act of 1992 established the USEC to operate the GDPs under lease from the U.S. Department of Energy, and required the NRC to establish a certification process and standards for the GDPs to assure protection of public and workers' health and safety and adequate safeguards and security. NRC determined that USEC's April submittal did not adequately address the standards NRC had established for the GDPs and therefore rejected the application on May 5, 1995. NRC's decision to reject the application was not a determination that the operations of the plants were unsafe. NRC originally intended to issue a certification decision in October 1995. However, because the original application was rejected, NRC now plans to issue a decision in February, 1996.

Copies of the application for certification (except for classified and proprietary portions withheld in accordance with 10 CFR 2.790,
