

Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to the approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The primary species considered in this draft recovery plan is *Amaranthus pumilus* (Seabeach amaranth). The areas of emphasis for recovery actions for this plant are the Atlantic coastal areas from Massachusetts to South Carolina. Habitat protection, reintroduction, and the preservation of genetic material are the major objectives of this recovery plan.
