³ Estimated average human-caused mortality for the West Indian manatee—Florida stock from 1984–1992. The estimated average annual human caused mortality from 1974–1992 is 36 animals.

⁴ N/AP indicates Not Applicable. Although the PBR level for the southern sea otter—California stock was calculated to be 7, their incidental take is not governed under Section 118 of the 1994 amendments to the marine Mammal Protection Act.

⁵ Unknown. Human caused mortalities of sea otters have been attributed to drowning in gill nets and lobster/crab pots, shootings, boat collisions, disease, and oil spills. However, data are insufficient for estimating annual losses. See stock assessment for additional information.

⁶ Unknown. Observer coverage is inadequate to estimate annual fishery mortality.

⁷ Sea otters in Washington State are susceptible to the same sources of human-caused mortality as they are in California.
