<sup>2</sup> Adjusted upwards to 72 animals from the calculated PBR of 48 to reflect the approximate 2 male:1 female sex ratio of the harvest. See stock assessment for additional information.

<sup>3</sup> Estimated average human-caused mortality for the West Indian manatee—Florida stock from 1984–1992. The estimated average annual human caused mortality from 1974–1992 is 36 animals.

<sup>4</sup> N/AP indicates Not Applicable. Although the PBR level for the southern sea otter—California stock was calculated to be 7, their incidental take is not governed under Section 118 of the 1994 amendments to the marine Mammal Protection Act.

<sup>5</sup> Unknown. Human caused mortalities of sea otters have been attributed to drowning in gill nets and lobster/crab pots, shootings, boat collisions, disease, and oil spills. However, data are insufficient for estimating annual losses. See stock assessment for additional information.

<sup>6</sup> Unknown. Observer coverage is inadequate to estimate annual fishery mortality.

<sup>7</sup> Sea otters in Washington State are susceptible to the same sources of human-caused mortality as they are in California.

#### Justice/BOP-010

##### SYSTEM NAME:

Access Control Entry/Exit System.

##### SYSTEM LOCATION:

Records may be retained at the Central Office, Regional Offices, and at any of the Bureau of Prison (Bureau) facilities. A list of these system locations may be found at 28 CFR part 503.

##### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former staff, inmates now or formerly under the custody of the Attorney General or the Bureau, and all visitors to Bureau facilities, including law enforcement personnel, contractors, volunteers, and inmate visitors.

##### CATEGORIES OF RECORDS IN THE SYSTEM:

Information retrieved and stored by the system may include any information relative to providing safe and secure prison facilities, to protecting the prison population and/or the general public, and/or, where appropriate, to otherwise promoting the interests of effective law enforcement. Examples include:

(a) Identification data (much of which is collected from the individual) such as the person's name, current residence, social security number, employer, place and date of birth, age, height, weight, digital image, biometric identifier information, alien registration number, driver's license number, telephone number, passport number, system-generated number, hair color, eye color, sex, race, escort of visitor into institution, and system classification of individual;

(b) Other data collected from the visitor and/or from law enforcement to enable prison officials to determine the suitability/acceptability of a visitor such as: The purpose of the visit, relationship to the inmate and information indicating whether the visitor is under investigation by law enforcement and/or has ever been convicted of a crime, probation and/or parole status, name of supervising probation/parole officer, etc.;

(c) Records generated by the system to report entry/exit activity e.g., date and time of entry/exit, entry/exit locations used; and location data, including location in the institution visited and/or movement within the institution;

(d) Any related law enforcement or investigatory data, provided by third parties such as inmates, courts, and other Federal, State, local, and foreign law enforcement agencies, e.g., criminal history and/or investigatory data relating to potential visitors; investigatory data otherwise developed by Bureau officials regarding any activity, or suspicious activity, which may threaten the safe and secure operation of Federal correctional facilities, e.g., remarks describing a possible introduction of contraband; and any other information that may enable the Bureau to pursue an internal investigation on a record subject.

##### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system is established and maintained under the authority of 18 U.S.C. 3621, 4003, 4042, 4082.

The records in this system are maintained to better ensure the safety, security and good order of Bureau facilities; to improve staff ability to quickly account for all persons (inmates, visitors, and staff) within an institution in the event of an emergency, such as an institution disturbance or a natural disaster; to identify and, where appropriate, determine the suitability of visitors with respect to entering prison facilities; and, to more effectively prevent violation of institution policy and/or criminal activities such as inmate escapes and the introduction of contraband. Where these efforts fail to prevent such violations, and/or where otherwise appropriate, records may be collected and used by the Bureau for internal investigations.

##### ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Relevant data from this system will be disclosed as follows:

(a) To Federal, State, local and foreign law enforcement agencies who have a need for the information to perform their duties, e.g., in the course of apprehensions, investigations, possible criminal prosecutions, civil court actions, regulatory proceedings, inmate disciplinary hearings, parole hearings, responding to emergencies, or other law enforcement activity;

(b) To Federal, State, local and foreign law enforcement agencies in order to solicit or obtain data needed by prison officials for law enforcement purposes, e.g., to determine whether a visitor may be under investigation, have a criminal record, or otherwise be unsuitable to visit; or to obtain any information that may enable the Bureau to pursue an internal investigation pertaining to any record subject based on information developed by the Bureau;

(c) To the news media and the public pursuant to 28 CFR § 50.2 unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy;
