DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95-NM-178-AD; Amendment 39-9388; AD 95-21-03]

Airworthiness Directives; Learjet Model 31A and 60 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Learjet Model 31A and 60 airplanes. This action requires an inspection to identify the serial numbers of the engine fire pull switch assemblies, and replacement of the assembly with a serviceable assembly, if necessary. This amendment is prompted by a report indicating that certain engine fire pull switch assemblies may contain microswitches that were manufactured with internal defects. Such defects could result in electrical failure of the switch in the open or closed position. The actions specified in this AD are intended to prevent failure of the switch, which could result in the inability of the flight crew to shut down certain systems or to arm the fire extinguishers due to inoperation of the fire tee handle, or inadvertent shutdown of one or both engines due to fuel starvation.

DATES: Effective October 26, 1995.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 26, 1995.

Comments for inclusion in the Rules Docket must be received on or before December 11, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 95-NM-178-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. The service information referenced in this

AD may be obtained from Gates Learjet, Mid-Continent Airport, P. O. Box 7707, Wichita, Kansas 67277. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Wichita Aircraft Certification Office, Small Airplane Directorate, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT:

C. Dale Bleakney, Aerospace Engineer, FAA, Wichita Aircraft Certification Office, Small Airplane Directorate, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas; telephone (316) 946-4135; fax (316) 946-4407.

SUPPLEMENTARY INFORMATION: The FAA has received a report indicating that a certain batch of engine fire pull switch assemblies may contain microswitches that were manufactured with internal defects. These assemblies are installed on Learjet Model 31A and 60 airplanes. The left-hand (pilot) and right-hand (copilot) engine fire pull switch assemblies contain four microswitches each, all of which may be affected. Such internal defects can cause electrical failure of the switch in the open or closed position, regardless of the position of the ENG FIRE PULL tee handle. If the switch fails in the open position, the fire tee handle would be inoperable. This condition, if not corrected, could result in the inability of the flight crew to shut down certain systems (such as the fuel or hydraulics system) or to arm the fire extinguishers. Failure of the switch in the closed position could result in fuel starvation. This condition, if not corrected, could result in inadvertent shutdown of one or both engines during flight.

The FAA has reviewed and approved Learjet Alert Service Bulletin SB A31-26-3 (for Model 31A airplanes) and SB A60-26-1 (for Model 60 airplanes), both dated July 14, 1995, which describe procedures for an inspection to identify the serial numbers of the left-hand (pilot) and right-hand (copilot) engine fire pull switch assemblies, and replacement of any suspect assembly with a serviceable assembly. Replacement of suspect assemblies will restore the integrity of the engine fire pull switch.

Since an unsafe condition has been identified that is likely to exist or develop on other Learjet Model 31A and 60 airplanes of the same type design, this AD is being issued to prevent electrical failure of the microswitches in

the engine fire pull switch assembly, which could result in the inability of the flight crew to shut down certain systems or to arm the fire extinguishers, or inadvertent shutdown of one or both engines. This AD requires an inspection to identify the serial numbers of the left-hand (pilot) and right-hand (copilot) engine fire pull switch assemblies, and replacement of any suspect assembly with a serviceable assembly. The actions are required to be accomplished in accordance with the alert service bulletins described previously.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95-NM-178-AD." The postcard will be date stamped and returned to the commenter.
