General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 12th day of October 1995.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-336]

Northeast Nuclear Energy Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-65, issued to the Northeast Nuclear Energy Company (NNECO/the licensee), for operation of the Millstone Nuclear Power Station, Unit No. 2, located in New London County, Connecticut.

The proposed amendment would revise the Technical Specifications (TS) 3.8.1.1, "A.C SOURCES," by adding a footnote that, for Cycle 13 operation only, to extend the allowed outage time (AOT) of the offsite power source obtained from Millstone Unit 1 from 3 days to 7 days.

This proposed amendment is needed to avert an unnecessary Unit 2 shutdown should offsite power obtained from Unit 1 become unavailable for more than 72 hours when maintenance is performed on the Unit 1 Reserve Station Service Transformer (RSST) and cross-tie 14H bus during the upcoming Unit 1 outage.

The Unit 1 outage is currently scheduled to begin October 27, 1995, and work on the relevant electrical cross-tie equipment is scheduled to start on or about November 5, 1995. The licensee will take every effort to restore the Unit 1 electrical cross-tie equipment as soon as maintenance is completed. Since the completion time for this
