

IV

For the foregoing reasons, the NRC staff has concluded that the use of the two demonstration assemblies in the TMI-1 reactor during Cycles 11, 12, and 13 will not present an undue risk to public health and safety and is consistent with the common defense and security. The NRC staff has determined that there are special circumstances present as specified in 10 CFR 50.12(a)(2)(ii) such that application of 10 CFR 50.46, 10 CFR Part 50, Appendix K, and 10 CFR 50.44 to explicitly consider the advanced clad fuel rods present within the two demonstration assemblies is not necessary in order to achieve the underlying purpose of these regulations.

Accordingly, the Commission has determined that pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or common defense and security and is otherwise in the public interest, and hereby grants GPU Nuclear Corporation an exemption from the requirements of 10 CFR 50.44, 10 CFR 50.46, and Appendix K to 10 CFR Part 50 in that explicit consideration of the advanced zirconium-based clad fuel present within the two demonstration assemblies is not required in order to be in compliance with these regulations. This exemption applies only to the two demonstration assemblies for the time period (Cycles 11, 12, and 13) for which these assemblies will be in the TMI-1 reactor core.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the quality of the human environment (60 FR 34559).

This exemption is effective upon issuance.

Dated at Rockville, Maryland this 12th day of October 1995.

For the Nuclear Regulatory Commission.
