SUPPLEMENTARY INFORMATION:

A. Purpose

The information relative to the place of performance and owner of plant or facility, if other than the prospective contractor, is a basic requirement when contracting for supplies or services (including construction). This information is instrumental in determining bidder responsibility, responsiveness, and price reasonableness. A prospective contractor must affirmatively demonstrate its responsibility. Hence, the Government must be apprised of this information prior to award. The contracting officer must know the place of performance and the owner of the plant or facility to (a) determine bidder responsibility; (b) determine price reasonableness; (c) conduct plant or source inspections; and (d) determine whether the prospective contractor is a manufacturer or a regular dealer. The information is used to determine the firm's eligibility for awards and to assure proper preparation of the contract.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 4 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 79,397; responses per respondent, 14; total annual responses, 1,111,558; preparation hours per response, .07; and total response burden hours, 77,810.

SUPPLEMENTARY INFORMATION:

A. Purpose

Bid acceptance period is the period of time from receipt of bids that is available to the Government to award the contract. This acceptance period is normally established by the Government. However, the bidder may establish a longer acceptance period than the minimum acceptance period set by the Government by filling in the blank. There are instances when the Government is unable to award a contract within the acceptance period due to unforeseen complications. Rather than incur the costly expense of readvertising, the Government requests

the bidders to extend their bids for a longer period of time.

These data are placed with the respective bids and placed in the contract file to become a matter of record.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph De Stefano, Office of Federal Acquisition Policy, GSA, (202) 501-1758.

SUPPLEMENTARY INFORMATION:

A. Purpose

When a mistake in bid is discovered by the contracting officer (CO) after bid opening but before award, the CO obtains verification of the bid intended. This verification is needed to establish the bidder's correct bid. If the bidder requests permission to correct the bid, the bidder must submit clear and convincing evidence that a mistake was made. If the bidder requests permission to correct the bid and submits evidence that a mistake was made, the evidence is analyzed by the CO to determine whether or not the bidder should be allowed to correct the bid. The data (evidence) submitted by the bidder is attached to bidder's bid and placed in the contract file along with the CO's determination.

The verification of the correct bid is attached to the original bid and a copy of the verification is attached to the duplicate bid and placed in the contract file.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph De Stefano, Office of Federal Acquisition Policy, GSA (202) 501-1758.

SUPPLEMENTARY INFORMATION:

A. Purpose

Two-step sealed bidding is a method of contracting designed to obtain the benefits of sealed bidding when adequate specifications are not available. An objective is to permit the development of a sufficiently restrictive statement of the Government's requirements, including an adequate technical data package, so that subsequent acquisitions may be made by conventional sealed bidding. This method is especially useful in acquisitions requiring technical proposals, particularly those for complex items. It is conducted in two steps:

(a) Step 1 consists of the request for, submission, evaluation, and (if necessary) discussion of a technical proposal. No pricing is involved. The objective is to determine the acceptability of the supplies or services offered. As used in this context, the word "technical" has a broad connotation and includes, among other things, the engineering approach, special manufacturing processes, and special testing techniques. It is the proper step for clarification of questions relating to technical requirements.

(b) Step 2 involves the submission of sealed price bids by those who submitted acceptable technical

proposals in step 1. The requested information is needed, in the absence of adequate specifications, to develop a sufficiently descriptive and not unduly restrictive statement of the Government's requirements and to determine the acceptability of proposals received. The contracting officer evaluates the acceptability of the information received, based on the criteria in the request for proposals.

B. Annual Reporting Burden

Public reporting burden for this collection of information is estimated to average 8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows: Respondents, 3,225; responses per respondent, 1; total annual responses, 3,225; preparation hours per response, 8; and total response burden hours, 25,800.
