encumbrances, thereby allowing the property to be disposed with fewer or no Army-imposed restrictions on future use. The impacts of reuse are evaluated in terms of low, medium and high land use intensities.

No significant environmental or human health effects are anticipated for any of the three disposal alternatives. Medium and high intensity reuse of certain study areas would have longterm significant impacts on various environmental resources. Hazardous waste remediation in the contonment area will have a beneficial effect on soils, surface water, and groundwater. Mitigation measures that future owners could take include exercise of discretion in land use planning and infrastructure development. Adherence to deed restrictions and enforcement of zoning, subdivision regulation, and building permits could help maintain visual resources inherent at the JPG site.

ADDRESSES: Copies of the Final Environmental Impact Statement can be obtained by writing or calling Mr. James Davidson, at the U.S. Army Materiel Command, ATTN: AMCSO, 5001 Eisenhower Avenue, Alexandria, VA 22333–0001, (703) 274–5510.

Dated: October 13, 1995.

Acting Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health), OASA, (I,L&E).
