DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting Notice

Pursuant to the provisions of the
Federal Advisory Committee Act (P.L.
92-463 as amended), notice is hereby
given of a meeting of the Labor Advisory
Committee for Trade Negotiations and
Trade Policy.

Date, time and place: November 9, 1995,
10:00 am—12:00 noon, U.S. Department of
Labor, Room N-3437 A/B, 200 Constitution
Ave., NW., Washington, DC 20210.

Purpose: The meeting will include a
review and discussion of current issues
which influence U.S. trade policy. Potential
U.S. negotiating objectives and bargaining
positions in current and anticipated trade
negotiations will be discussed. Pursuant to
section 9(B) of the Government in the

Sunshine Act, 5 U.S.C. 552b(c)(9)(B) it has been determined that the meeting will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions. Accordingly, the meeting will be closed to the public.

For further information, contact: Fernand Lavallee, Director, Trade Advisory Group, Phone: (202) 219-4752.

Signed at Washington, D.C. this 24th day of October 1995.

Joaquin Otero,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510-28-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8027]

Sequoyah Fuels Corporation; Issuance of Director's Decision Under 10 CFR Part 2.206

I. Introduction

Notice is hereby given that the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission (NRC) has issued a Director's Decision under 10 CFR 2.206 regarding the Sequoyah Fuels Facility in response to a petition received from Ms. Diane Curran (Petitioner), dated March 14, 1995, on behalf of the Native Americans for a Clean Environment. (NACE) The petition also considered a subsequent letter from Petitioner dated March 31, 1995.

The petition was referred to the staff for consideration pursuant to 10 CFR 2.206 of the Commission's regulations. For the reasons stated in the enclosed "Director's Decision under 10 CFR 2.206," items 1, 3, and 4 of the Petition have been denied, and item 2 is moot.

Native Americans for a Clean Environment (NACE) submitted to the Nuclear Regulatory Commission (NRC), a "Petition for an Order Requiring Sequoyah Fuels Corporation to File a Final Site Characterization Plan (SCP) and for an Order to Obtain a License Amendment" (Petition) dated March 11, 1995. NACE requested NRC to take action with respect to the Sequoyah Fuels Corporation (SFC or Licensee) pursuant to 10 CFR 2.206. The Petitioner requests that NRC:

(1) Reverse the NRC staff's decision to permit SFC to proceed with site characterization without submitting a final Site Characterization Plan (SCP), by issuing an Order or a Confirmatory Action Letter obliging SFC to submit a final SCP by a date certain;

(2) Obtain a copy of the Environmental Protection Agency's (EPA) title search or perform a title search of all property used in connection with the SFC license, in order to clarify the identity and ownership of all property subject to NRC License No. SUB-1010;

(3) Issue an order forbidding SFC, Sequoyah Fuels International Corporation, Sequoyah Holding Corporation, or any other associated corporation that holds title to property under NRC License No. SUB-1010 from transferring any interest in any of its property before SFC applies for and receives a license amendment authorizing transfer; and

(4) Before issuing any such license amendment, find reasonable assurance that any entity acquiring an interest in the SFC property fully understands the nature of the liabilities and responsibilities it is undertaking for cleanup and long-term care of the site and that it has the financial capability to carry out those responsibilities.

The Petition alleges the following bases for its requests:

(1) The NRC staff illegally and improperly excused SFC from its obligation to submit a final SCP;

(2) SFC is presenting a "Trust Indenture" to several towns and the county of Sequoyah for the creation of an industrial park;

(3) Neither SFC's letter to Mr. Main (Secretary of Commerce, Oklahoma Department of Commerce), the Fact Sheet, nor the Trust Agreement, itself, refers to the fact that SFC has been ordered by NRC and EPA to characterize the extent of the contamination in the 1,400 acres that surround the 85-acre processing area, the focus of site characterization and remediation efforts; nor do those documents refer to the other sources of potential contamination, consisting of groundwater migration from the admittedly contaminated processing area, effluent streams and ditches, and the Carlisle School (located on the land proposed for an industrial park, and used by SFC as a laboratory);

(4) The Trust Indenture depicts the 1,400 acres of land subject to NRC License No. SUB-1010 as the candidate area for the industrial park; SFC has made conflicting representations regarding the size of the "facility" or "site" to NRC and in the Trust Indenture. SFC responded to the Petition by a letter dated March 29, 1995, and requests that the Petition be denied in all respects.

By letter dated March 31, 1995, NACE supplemented its Petition. NACE states that SFC is conducting site

characterization by utilizing the EPA Facility Investigation Workplan (FIW), which was prepared for the EPA pursuant to requirements of the Resource Conservation and Recovery Act (RCRA). Petitioner asserts that by relying on the FIW to conduct site characterization, SFC has neither understood nor implemented NRC staff criticisms of the draft SCP. Petitioner asserts that NRC should require SFC to submit a written final SCP because the FIE does not:

(1) Resolve NRC comments related to site hydrogeology and vertical and lateral contamination;

(2) Resolve NRC sample density concerns; or

(3) Provide for characterization of the DUF₄ processing, decorative pond, and parking lot areas.

By letter dated May 10, 1995, the Director, Office of Nuclear Material Safety and Safeguards acknowledged receipt of the Petition, and informed the Petitioner that the Petition would be evaluated under 10 CFR 2.206 of the Commission's regulations.

I have completed my evaluation of the matters raised by the Petitioner and have determined that, for the reasons stated below, the Petition is denied in part, was satisfied in part, and NRC regulations address the Petitioner's concerns related to the requests for issuance of orders related to transfer of property.

II. Background

From 1970 until July 6, 1993, SFC operated a uranium conversion facility at a site located in Gore, Oklahoma, under the authority of NRC License No. SUB-1010, issued pursuant to 10 CFR Part 40. The main process was the conversion of uranium oxide (yellowcake) to uranium hexafluoride. A second process, initiated in 1987, consisted of the conversion of depleted uranium hexafluoride to uranium tetrafluoride, the first step in producing depleted uranium metal.

After the discovery of contaminated soil surrounding structures used by SFC for its licensed activities, NRC staff issued an order suspending SFC's authorization to operate its conversion facilities. See "Order Modifying License (Effective Immediately) and Demand for Information," EA 91-067 (October 3, 1991). After studies by SFC, operational and organizational changes by SFC, extensive NRC inspections, and several public meetings, NRC, on April 16, 1992, lifted the order suspending the SFC license and authorized SFC to resume operation of its conversion facility.
