**Standards for Accredited Veterinarian Duties**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Technical amendment.

**SUMMARY:** We are making a technical amendment to correct an omission in the regulations regarding standards for accredited veterinarians.

**EFFECTIVE DATE:** November 1, 1995.

**FOR FURTHER INFORMATION CONTACT:** Dr. J.A. Heamon, Senior Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 43, Riverdale, MD, 20737-1231; (301) 734-6954.

**SUPPLEMENTARY INFORMATION:**

**Background**

In accordance with 9 CFR parts 160, 161, and 162 (referred to below as the regulations), some veterinarians are accredited by the Federal Government to cooperate with the Animal and Plant Health Inspection Service (APHIS) in controlling and preventing the spread of animal diseases throughout the country and internationally. Accredited veterinarians use their professional training in veterinary medicine to perform certain regulatory tasks.

As part of a final rule published in the Federal Register on August 4, 1995 (60 FR 39840-39842, Docket No. 94-027-2), and effective September 5, 1995, we revised the regulations in § 161.3(a) to allow accredited veterinarians to issue official animal health documents for up to 30 days after inspecting animals in herds or flocks under regular health maintenance programs and for up to 10 days after inspecting all other animals. When we revised that paragraph, we inadvertently failed to retain the provisions of the original paragraph that specified the conditions under which the subject animal must be inspected. It was never our intention to remove or modify those conditions, and no changes to those conditions were discussed in the final rule or in the proposed rule that preceded it (60 FR 13084-13086, Docket No. 94-027-1, published March 10, 1995). We are, therefore, amending the introductory text of § 161.3(a) to restore those provisions regarding the location and manner in which animals must be inspected.

**§ 161.3 Standards for accredited veterinarian duties.**

\* \* \* \* \*

(a) \* \* \* Inspections under this paragraph must be conducted in a location that allows the accredited veterinarian sufficient space to observe the animal in such a manner as to detect abnormalities related to areas such as, but not limited to, locomotion, body excretion, respiration, and skin conditions. An accredited veterinarian shall examine each animal showing abnormalities, in order to determine whether or not there is clinical evidence compatible with the presence or absence of a communicable disease.
