BILLING CODE 4310-FB-P

Fish and Wildlife Service

Availability of an Environmental Assessment (EA) and Receipt of an Application for an Incidental Take Permit (ITP) for the Red-Cockaded Woodpecker (RCW) by Potlatch Corporation for Timber Harvesting and Management in Calhoun, Cleveland, and Bradley Counties in South-Central Arkansas

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Potlatch Corporation (Applicant) is seeking an ITP from the Fish and Wildlife Service (Service), pursuant to Section 10(a)(1)(B) of the Endangered Species Act (Act), as amended. The permit would authorize the take of the red-cockaded woodpecker (*Picoides borealis*), an endangered species, in Calhoun, Cleveland, and Bradley Counties in south-central Arkansas, for a period of 30 years. The proposed incidental take would be the inadvertent harvest of an unknown RCW cavity tree during forest management on land owned by the Applicant or other privately owned land where the Applicant has purchased timber.

The Service also announces the availability of a habitat conservation plan (HCP) and EA. The Applicant's HCP describes conservation measures that will be taken to avoid accidentally harvesting cavity trees. Also, the HCP delineates other measures to conserve cavity trees, cavity tree clusters, and RCW foraging habitat. The EA prepared by the Service describes the environmental consequences of issuing or denying the ITP. As stated in the EA, the Service proposes to issue the requested permit. This proposal is based on a preliminary determination that the Applicant has satisfied the requirements for permit issuance and that the HCP provides conservation benefits to RCWs that exceed the impact of inadvertently harvesting cavity trees. Copies of the EA and HCP may be obtained by making a written request to the Regional Office [See ADDRESSES below]. This notice is provided pursuant to Section 10(c) of

the Act and National Environmental Policy Act Regulations (40 CFR 1506.6). **DATES:** Written comments on the permit application, EA, and HCP should be received on or before December 1, 1995.

ADDRESSES: Persons wishing to review the application, HCP, and EA may obtain a copy by writing the Service's Southeast Regional Office, Atlanta, Georgia. Requests for the documents must be in writing to be processed. Documents will also be available for public inspection by appointment during normal business hours at the Regional Office, or the Jackson, Mississippi, Field Office. Written data or comments concerning the application, EA, or HCP should be submitted to the Regional Office. Please reference permit under PRT-807952 in such comments:

Regional Permit Coordinator, U.S. Fish and Wildlife Service, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (404-679-7110, fax 404-679-7081)

Field Supervisor, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, Mississippi 39213 (601-965-4900, fax 601-965-4340)

FOR FURTHER INFORMATION CONTACT: Will McDearman, Jackson, Mississippi, Field Office or Rick Gooch at the Atlanta, Georgia, Regional Office.

SUPPLEMENTARY INFORMATION: Section 9 of the Endangered Species Act (Act), and implementing regulations, prohibits the take of RCWs. Take, in part, is defined as an activity that kills, injures, harms, or harasses a listed endangered or threatened species. Section 10(a)(1)(B) of the Act provides an exemption, under certain circumstances, to the Section 9 prohibition if the taking is incidental to, and not the purpose of otherwise lawful activities.

The RCW is the only woodpecker in North America that excavates its roosting and nesting cavities in live pine trees. Cavities are located in heartwood that is usually infected and softened by the red-heart fungus (*Phellinus pini*). Mature trees usually 80 or more years old are typically selected for cavities because the heartwood is sufficiently large for a cavity and the incidence of red-heart fungus is greater in older trees. RCWs do not excavate and place cavities in sapwood.

RCWs are non-migratory, territorial, and live in family units that are called groups. A group usually consists of a breeding pair, offspring of the current year, and one or more male helpers that are offspring from previous years. Each bird has a roost cavity that, collectively,
