Bureau of Labor Statistics

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Business Birth Pilot Study

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be

properly assessed. Currently, the Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed new "Business Birth Pilot Study."

A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the address section of this notice.

DATES: Written comments must be submitted on or before January 2, 1996.

ADDRESSES: Send comments to Karin G. Kurz, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 3255, 2 Massachusetts Avenue NE., Washington, DC 20212.

FOR FURTHER INFORMATION CONTACT:

Ms. Kurz on 202-606-7628 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

The Bureau of Labor Statistics is initiating a major redesign of the Current Employment Statistics (CES) monthly payroll survey, including further research into methods for directly capturing data on new business births as an integrated part of a probability sample design. The purpose of this collection is to explore a procedure for estimating business birth employment utilizing sampled data. An ongoing sample of business births would be maintained in order to produce birth estimates and to accurately reflect the changes in employment of business births from one benchmark period to the next.

II. Current Actions

The CES program is a monthly payroll survey of nearly 400,000 business establishments. It provides estimates of employment, average weekly hours, and average hourly earnings, by industry, for the Nation, States, and approximately 270 large metropolitan areas. These data are used by National as well as State policy makers to analyze current economic conditions and to set economic policy.

The advantage of CES data to its users is timely release of data at industry and geographic levels with an annual benchmark to full population counts. However the CES has limitations which hamper its ability to accurately reflect current monthly employment trends: the lack of a probability-based sample design and the absence of a method for directly measuring employment resulting from business births.

A sound statistical procedure which utilize a probability sample selected from a comprehensive list of business births, in conjunction with population counts available from that list, would provide for reliable estimates to be made for business birth employment at the National and State levels by major industry division.

The data collected from this pilot survey would be used to estimate business births to complement the redesigned CES survey based on a probability sample design. In addition, a longitudinal data base of the birth units would be kept to track the trend of these firms in comparison to the "non-birth" units in the CES survey. This information would be used to
