AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on revising the expenses and assessment rate previously established under Marketing Order No. 928 for the 1995-96 fiscal year. SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Agreement and Order No. 928 (7 CFR part 928), regulating the handling of papayas grown in Hawaii; hereinafter referred to as the "order." The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this proposed rule in conformance with Executive Order 12866.

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, papayas grown in Hawaii are subject to assessments. It is intended that the assessment rate as proposed herein will be applicable to all assessable papayas handled during the 1995-96 fiscal year, which began on July 1, 1995, and ends June 30, 1996. This proposed rule would not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 300 producers of papayas in Hawaii, and approximately 60 handlers regulated under this marketing order. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than \$500,000, and small agricultural service firms are defined as those whose annual receipts are less than \$5,000,000. The majority of these producers and handlers may be classified as small entities.

The papaya marketing order, administered by the Department, requires that the assessment rate for a particular fiscal year apply to all assessable papayas handled from the beginning of such year. Annual budgets of expenses are prepared by the Committee, the agency responsible for local administration of this marketing order, and submitted to the Department for approval. The members of the Committee are handlers and producers of Hawaiian papayas. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local area, and are thus in a position to formulate appropriate budgets. The Committee's budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of papayas. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the Committee's expected expenses. In recommending an assessment rate, the Committee also considered funds available in a monetary reserve that could be used to pay expenses.

The Committee met on April 28, 1995, and unanimously recommended expenses totaling \$562,044 for its 1995-96 budget. The Committee met again on July 20, 1995, and unanimously recommended a new budget because the original budget contained inaccuracies. The revised recommendation contained expenses totaling \$465,800 for the 1995-96 budget. This was a \$123,400 reduction in expenses compared to the 1994-95 budget of \$589,200.

The Committee also unanimously recommended an assessment rate of \$.0089 per pound for the 1995-96 fiscal year, which was the same as was recommended for the 1994-95 fiscal year.

An interim final rule implementing these recommendations was published in the Federal Register [60 FR 43351, August 21, 1995] and provided a 30-day comment period for interested persons. No comments were received. A final rule was published in the Federal Register on September 28, 1995 [60 FR 50078].

The Committee met again on September 28, 1995, and recommended revising the budget to reduce expenses to \$435,800, and the assessment rate to \$.0059 per pound for the 1995-96 fiscal year, which is \$.0030 less than was recommended for the 1994-95 fiscal year. The Committee recommended reducing their expenses for research and development by \$30,000, and reducing the reserve carryover for the following year to \$26,597. There was some concern expressed at the meeting as to whether the Committee would have enough income to meet expenses. Ultimately, by a vote of eight to three with one abstention, the Committee recommended the reduced expenses of \$435,800 and an assessment rate of \$.0059.

The assessment rate, when applied to anticipated shipments of 33 million pounds, would yield \$194,700 in assessment income. Other sources of program income include \$40,000 from the Hawaii Department of Agriculture, \$57,000 from the USDA's Foreign Agricultural Service, \$7,800 from the Japanese Inspection Program, \$3,000 in interest income, and \$4,766 from the County of Hawaii. Thus, total income would be expected to be \$307,266. The Committee plans on using money from its reserve to meet its estimated expenses for the year.

Major expense categories for the 1995 fiscal year include \$165,500 for the market expansion program, \$115,000 for research and development, and \$67,000 for salaries. Funds in the reserve at the end of the 1995-96 fiscal year, estimated at \$26,597, would be within

the maximum permitted by the order of one fiscal year's expenses.

This action would reduce the assessment obligation imposed on handlers. The assessments would be uniform for all handlers. The assessment costs would be offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

Interested persons are invited to submit their views and comments on this proposal. Comments received within 30 days of publication of this proposed rule in the Federal Register will be considered prior to any final action being taken.
