DEPARTMENT OF ENERGY

Draft Environmental Impact Statement for the Management of Spent Nuclear Fuel From the K Basins at the Hanford Site, Richland, Washington

AGENCY: Department of Energy.

ACTION: Notice of availability and public hearing.

SUMMARY: The Department of Energy (DOE) announces the availability of the Draft Environmental Impact Statement (DEIS) for the Management of Spent Nuclear Fuel from the K Basins at the Hanford Site, Richland, Washington (DOE/EIS-0245D) for public review and comment. The date, time, and place for a public hearing on the DEIS is also provided. The alternative actions analyzed in the DEIS would occur at the DOE's Hanford Site in south central Washington State and in a foreign country if the foreign processing alternative were selected.

DATES: Comments must be postmarked by December 29, 1995, to ensure consideration. Late comments will be considered to the extent practicable. The DOE will use the comments received to help prepare the Final EIS. A public hearing on the DEIS will be held on December 12, 1995 at 1:30 p.m. and again at 7 p.m. at the Red Lion Inn, 2525 N 20th, Pasco, Washington. The public hearing will provide an opportunity for information exchange and discussion and for submission of oral and/or written comments.

ADDRESSES: Requests for copies of the DEIS, written comments on the DEIS, or other matters regarding this environmental review should be addressed to: Dr. P.G. Loscoe, U.S.

Department of Energy, P.O. Box 550, M/S S7-41, Richland, Washington 99352. Dr. Loscoe may be contacted by telephone at (509) 376-7434 or at (800) 321-2008.

FOR FURTHER INFORMATION CONTACT: For general information on the project, interested parties may contact Dr. Loscoe at the address and phone number above. For general information on the DOE NEPA process, please contact Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance, EH-42, Department of Energy, 1000 Independence Ave., SW, Washington, D.C. 20585. Ms. Borgstrom may be contacted by leaving a message at (800) 472-2756 or by calling (202) 586-4600.

SUPPLEMENTARY INFORMATION: The DEIS was prepared pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370d), the Council on Environmental Quality NEPA regulations (40 CFR 1500), and the DOE NEPA regulations (10 CFR 1021).

DOE proposes to provide for the safe management and storage of spent nuclear fuel (SNF) that is currently stored in the K-East and K-West storage basins at the Hanford Site. DOE has determined that the K Basins at Hanford are not suitable for long-term storage of SNF.

The DEIS analyzes the environmental consequences of alternative ways to provide for the safe management and storage of SNF currently stored in the Hanford K Basins. DOE's preferred alternative is drying/passivation (conditioning) of the SNF followed by dry vault storage. This alternative would provide for drying the SNF, placing it in multi-canister overpacks in an inert atmosphere, and storing it in a vault for up to 40 years. The DEIS compares the environmental impacts that would be expected to occur from continuing storage in the K-East and K-West basins (the no action alternative) with the consequences that would be expected to occur if DOE implemented the preferred alternative or one of five other alternatives. The five other alternatives are (1) an enhanced K Basin storage alternative under which SNF would be consolidated in the K-West Basin; (2) removal of the SNF and subsequent storage in a new wet storage facility at Hanford; (3) removal of the SNF followed by calcination and dry storage at Hanford; (4) removal of the SNF followed by processing at Hanford and dry storage of the recovered uranium and plutonium at Hanford; and (5) removal of the SNF followed by foreign processing and dry storage of the

recovered uranium and plutonium at Hanford.

DOE has distributed copies of the DEIS to appropriate members of Congress, legislators, State of Washington agencies, American Indian tribal governments, local and county governments, federal agencies, and other interested parties.

Signed in Richland, Washington, this 2nd day of November 1995, for the United States Department of Energy.

Paul F.X. Dunigan, Jr.,
NEPA Compliance Officer, Richland Operations Office.
