#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

One objective of the 2000 decennial census calls for the Census Bureau to make greater use of other agencies' administrative record files to reduce cost, respondent burden, and the differential in the results among various components of the population. The Administrative Records Notifications Evaluation is a test to measure mail and item response rates to census forms containing different administrative record use notifications. The test also will measure how requests for Social Security numbers will affect mail return and item response rates.

##### II. Method of Collection

For this one-time survey, census questionnaires will be mailed to the sampled households and returned in postage-paid envelopes. We also plan to mail pre-notice letters, reminder cards, and replacement questionnaires (the only means used for following up on nonresponding households). There will be no telephone or field enumeration follow-up.

##### III. Data

*OMB Number:* Not available.

*Form Numbers:* DN-1A, DN-2A, DN-1B, and DN-2B.

*Type of Review:* Regular submission.  
*Affected Public:* Individuals and households.

[Docket 68-95]

#### Foreign-Trade Zone 26—Atlanta, GA; Application for Subzone Status, United Technologies Corporation and Precision Components International, Inc., Plants (Aircraft Turbine Engine Components) Columbus, Georgia

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Georgia Foreign-Trade Zone, Inc., grantee of FTZ 26, requesting special-purpose subzone status for the aircraft turbine engine component manufacturing facilities of the United Technologies Corporation, Pratt & Whitney Group (Pratt & Whitney) and Precision Components International, Inc. (PCI) (a subsidiary of a Pratt & Whitney joint venture), located in Columbus, Georgia. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on November 1, 1995.

The facilities (700,000 sq.ft., 720 employees) are located on a 339-acre site at 8801 Macon Road in Columbus (Muscookee County), Georgia, some 90 miles southwest of Atlanta. They are used to produce titanium disk forgings and airfoils (HTS# 8411.91.90) for the compressor components of turbine-type aircraft engines. Pratt & Whitney manufactures the disk forgings, and PCI manufactures the airfoils under contract for Pratt & Whitney. The airfoils and disk forgings are manufactured from titanium alloy sourced from abroad (HTS# 8108.10.50.45, 8108.90.60.30; duty rate: 15%). The disk forgings and airfoils are shipped to other U.S. Pratt & Whitney facilities for further processing and/or assembly into aircraft turbine engines, or they are exported.

Zone procedures would exempt Pratt & Whitney and PCI from Customs duty payments on the foreign titanium alloy used in export production. On domestic sales, the companies would be able to choose the lower duty rates that apply to finished aircraft turbine engine components (duty free, 3.0%) for the foreign titanium alloy. The application indicates that the savings from zone procedures would help improve the facilities' international competitiveness.
