New Features of Broadband PCS C Block FCC Form 175 Application Software

November 3, 1995.

This Public Notice highlights important features of the FCC Form 175 Application Software (application software) to be used in the Broadband PCS C block auction. These features were added to the application software that potential bidders received prior to the cancelled auction dates of June 8, 1995 and August 2, 1995. The new application software, entitled "F175v5.exe," was made available to potential bidders over the Internet and the FCC Auction Bulletin Board Service on October 18, 1995.

The instructions in the "Readme File" of the new application software direct applicants to place "confidential information" in Exhibit E. In previous versions of the electronic software, Exhibit E was reserved for miscellaneous or "other" information. With the new application software, applicants must include miscellaneous or "other" information in the Exhibit (A, B, C or D) that appears most appropriate. Applications that contain miscellaneous or "other" information in Exhibit E will be deemed incomplete and must be resubmitted with the information inserted in the proper exhibit prior to the resubmission date.

In addition, only those applicants who have previously sought and received approval from the Commission to include "confidential" information with their application should enter such information in Exhibit E. Any other applications that submit any information in Exhibit E will be considered incomplete. These applicants will then be permitted to resubmit their incomplete applications with the information included in the appropriate exhibit during the resubmission period. Applicants should be aware that all information required by the Commission's Rules in connection with applications to participate in spectrum auctions is necessary to determine the applicants' qualifications and, as such, will be available for public inspection. Accordingly, the Commission envisions that confidentiality requests would be granted only in rate instances, if ever. Applicants requesting confidential treatment for any information required as a condition to participate in the auction must follow the procedures set out in § 0.459 of the Commission's Rules (47 CFR 0.459). An applicant's request

for confidentiality must include a demonstration that it would suffer substantial competitive harm from the public disclosure of the confidential information.

The "Readme" file also contains instructions on submitting information in the "Ownership Worksheet" file. Because the "Ownership Worksheet" file asks for applicants' Social Security Numbers or Taxpayer Identification Numbers, the Commission will not release it to the public. Applicants are strongly encouraged, but are not required, to submit the ownership information in this file. In addition, all applicants are required to submit the ownership documentation in Exhibit A, which will be made public. By submitting the "Ownership Worksheet" file, applicants help ensure expeditious processing of their applications by the Commission.

Finally, the application software contains a file for waiver requests. Requests for waivers that are made within the body of any of the Exhibits A through D should be repeated in the "Waiver" screen. By including waiver requests in the "Waiver" screen, applicants will help ensure that the requests are properly considered. For Further Information, contact: Jamie Hedlund—Auctions Division, Wireless Telecommunications Bureau, at (202) 418-0660.

Rate Rules for Cable Services

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Federal Communications Commission is seeking comment on its proposal to waive, on a temporary and trial basis, certain rules governing the rates charged for cable services in Dover Township, New Jersey, in light of the initiation there of the first permanent commercial video dialtone system.

DATES: Interested parties may file comments on or before December 13, 1995, and reply comments on or before December 28, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street, N.W., Washington, D.C., 20554.

FOR FURTHER INFORMATION CONTACT: Rick Chessen, Cable Services Bureau (202) 416-0800.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Order Requesting Comments adopted November 2, 1995 and released November 6, 1995. The complete text of this Order is available for inspection and copying during normal business hours in the FCC Cable Reference Center (room 333), 2033 M Street, N.W., Washington, D.C., 20554.

Synopsis of the Order Requesting Comments

I. Introduction

Under the Cable Television Consumer Protection and Competition Act of 1992 (the "1992 Cable Act"), the Commission is charged with identifying criteria for determining whether rates for cable programming service tiers ("CPSTs") are unreasonable with respect to cable operators that are subject to regulation. In carrying out this mandate, the Commission has adopted a rate setting approach for CPSTs that utilizes a competitive differential, benchmarks, and cost-of-service factors. By this Order, we seek to develop a record that would permit us to decide whether to waive, on a temporary and trial basis, certain rules governing the rates charged for CPSTs by cable operators serving subscribers in Dover Township, Ocean County, New Jersey, in light of the initiation there of the first permanent commercial video dialtone ("VDT") system.

We tentatively conclude that the provision of video programming by multiple independent programmers over a permanent VDT system within the franchise areas of these cable operators, along with certain other conditions described below, will ensure that the rates the operators charge for cable programming services will not be unreasonable. If we are correct as to the substantial impact that the VDT programmers will have, then we believe that congressional intent would be furthered by a properly conditioned waiver of our rules on the initiation of commercial operation of the VDT system, to the extent those rules require that rates for CPSTs be set in accordance with our benchmark or cost-of-service methodologies. Such an approach holds the promise of reducing the administrative burdens of rate regulation and providing the cable operators greater flexibility in responding to competition and developing their systems through programming and technological innovation, while ensuring that the rates charged to subscribers for CPSTs are not unreasonable. Providing the cable operators such flexibility will also promote competition with unaffiliated
